Ἐπεὶ δὲ ἐν ἐνὶ ἐναντίον, ἀπορήσειεν ἂν τις πῶς ἀντίκειται τὸ ἐν καὶ τὰ πολλά, καὶ τὸ ἴσον τῷ μεγάλῳ καὶ τῷ μικρῷ. εἰ γὰρ τὸ πότερον ἀεὶ ἐν ἀντιθέσει λέγομεν, οἷον πότερον λευκὸν ἢ μέλαν, καὶ πότερον λευκὸν ἢ οὐ λευκόν (πότερον δὲ ἄνθρωπος ἢ λευκὸν οὐ λέγομεν, ἐὰν μὴ ἐξ ὑποθέσεως καὶ ζητοῦντες οἷον πότερον ἦλθε Κλέων ἢ Σωκράτης - ἀλλ' οὐκ ἀνάγκη ἐν οὐδενὶ γένει τοῦτο. ἀλλὰ καὶ τοῦτο ἐκείθεν ἐλήλυθεν. τὰ γὰρ ἀντικείμενα μόνᾳ οὐκ ἐνδέχεται ἅμα ὑπάρχειν, ὧ καὶ ἐνταῦθα χρῆται ἐν τῷ πότερος ἦλθεν. Βιβλίο 1

Πᾶσα τέχνη καὶ πᾶσα μέθοδος, ὁμοίως δὲ πρᾶξις τε καὶ προαίρεσις, ἀγαθοῦ τινὸς ἐφίεσθαι δοκεῖ· διὸ καλῶς ἀπεφήναντο τὰγαθόν, οὐ πάντ' ἐφίεται. διαφορὰ δὲ τις φαίνεται τῶν τελῶν· τὰ μὲν γὰρ εἰσιν ἐνέργειαι, τὰ δὲ παρ' αὐτάς [5] ἔργα τινά. ὧν δ' εἰσὶ τέλη τινὰ παρὰ τὰς πράξεις, ἐν τούτοις βελτίω πέφυκε τῶν ἐνεργειῶν τὰ ἔργα. πολλῶν δὲ πράξεων οὐσῶν καὶ τεχνῶν καὶ ἐπιστημῶν πολλὰ γίνεται καὶ τὰ τέλη· ἱατρικῆς μὲν γὰρ ὑγίεια, ναυπηγικῆς δὲ πλοῖον, στρατηγικῆς δὲ νίκη, οἰκονομικῆς δὲ πλοῦτος. διαφέρει δ' οὐδὲν τὰς ἐνεργείας αὐτάς εἶναι τὰ τέλη τῶν πράξεων ἢ παρὰ ταύτας ἄλλο τι, καθάπερ ἐπὶ τῶν λεχθεισῶν ἐπιστημῶν.

Εἰ δὴ τι τέλος ἐστὶ τῶν πρακτῶν ὃ δι' αὐτὸ βουλόμεθα, τᾶλλα δὲ διὰ τοῦτο, καὶ μὴ [20] πάντα δι' ἕτερον αἰρούμεθα (πρόεισι γὰρ οὕτω γ' εἰς ἄπειρον, ὥστ' εἶναι κενὴν καὶ ματαίαν τὴν ὄρεξιν), δηλὸν ὡς τοῦτ' ἂν εἴη τὰγαθόν καὶ τὸ ἄριστον. ἄρ' οὖν καὶ πρὸς τὸν βίον ἢ γνῶσις αὐτοῦ μεγάλην ἔχει ῥοπήν, καὶ καθάπερ τοξόται σκοπὸν ἔχοντες μᾶλλον ἂν τυγχάνοιμεν τοῦ δέοντος; εἰ δ' [25] οὕτω, πειρατέον τύπῳ γε περιλαβεῖν αὐτὸ τί ποτ' ἐστὶ καὶ τίνας τῶν ἐπιστημῶν ἢ δυνάμεων. δόξειε δ' ἂν τῆς κυριωτάτης καὶ μάλιστα ἀρχιτεκτονικῆς. τοιαύτη δ' ἢ πολιτικὴ φαίνεται· τίνας γὰρ εἶναι χρεὼν τῶν ἐπιστημῶν ἐν ταῖς πόλεσι, 1094b [1] καὶ ποίας ἐκάστους μαθάνειν καὶ μέχρι τίνας, αὕτη διατάσσει· ὀρῶμεν δὲ καὶ τὰς ἐντιμοτάτας τῶν δυνάμεων ὑπὸ ταύτην οὔσας, οἷον στρατηγικὴν οἰκονομικὴν ῥητορικὴν· χρωμένης δὲ ταύτης ταῖς λοιπαῖς [πρακτικαῖς] τῶν ἐπιστημῶν, [5] ἔτι δὲ νομοθετούσης τί δεῖ πράττειν καὶ τίνων ἀπέχεσθαι, τὸ ταύτης τέλος περιέχει ἂν τὰ τῶν ἄλλων, ὥστε τοῦτ' ἂν εἴη τὰνθρώπινον ἀγαθόν. εἰ γὰρ καὶ ταυτόν ἐστιν ἐνὶ καὶ πόλει, μεῖζόν γε καὶ τελειότερον τὸ τῆς πόλεως φαίνεται καὶ λαβεῖν καὶ σφῆξιν· ἀγαπητὸν μὲν γὰρ καὶ ἐνὶ [10] μόνῳ, κάλλιον δὲ καὶ θειότερον ἔθνει καὶ πόλεσιν. ἢ μὲν οὖν μέθοδος τούτων ἐφίεται, πολιτικὴ τις οὔσα.

Λέγοιτο δ' ἂν ἱκανῶς, εἰ κατὰ τὴν ὑποκειμένην ὕλην διασαφηθείη· τὸ γὰρ ἀκριβὲς οὐχ ὁμοίως ἐν ἅπασιν τοῖς λόγοις ἐπιζητητέον, ὥσπερ οὐδ' ἐν τοῖς δημιουργουμένοις. τὰ δὲ καλὰ καὶ τὰ δίκαια, [15] περὶ ὧν ἡ πολιτικὴ σκοπεῖται, πολλὴν ἔχει διαφορὰν

καὶ πλάνην, ὥστε δοκεῖν νόμῳ μόνον εἶναι, φύσει δὲ μή. τοιαύτην δὲ
τινα πλάνην ἔχει καὶ τὰγαθὰ διὰ τὸ πολλοῖς συμβαίνειν βλάβας ἀπ’
αὐτῶν· ἥδη γάρ τινες ἀπώλοντο διὰ πλοῦτον, ἕτεροι δὲ δι’ ἀνδρείαν.
ἀγαπητὸν οὖν περὶ τοιούτων [20] καὶ ἐκ τοιούτων λέγοντας παχυλῶς
καὶ τύπῳ τάληθές ἐνδείκνυσθαι, καὶ περὶ τῶν ὡς ἐπὶ τὸ πολὺ καὶ ἐκ
τοιούτων λέγοντας τοιαῦτα καὶ συμπεραίνεισθαι. τὸν αὐτὸν δὴ
τρόπον καὶ ἀποδέχεσθαι χρεὼν ἕκαστα τῶν λεγομένων·
πεπαιδευμένου γάρ ἐστιν ἐπὶ τοσοῦτον τὰκριβές ἐπιζητεῖν καθ’
ἕκαστον [25] γένος, ἐφ’ ὅσον ἡ τοῦ πράγματος φύσις ἐπιδέχεται·
παραπλήσιον γὰρ φαίνεται μαθηματικοῦ τε πιθανολογοῦντος
ἀποδέχεσθαι καὶ ῥητορικὸν ἀποδείξεις ἀπαιτεῖν.

Ἐκαστος δὲ κρίνει καλῶς ἃ γινώσκει, καὶ τούτων ἐστὶν ἀγαθὸς
κριτής. 1095a [1] καθ’ ἕκαστον μὲν ἄρα ὁ πεπαιδευμένος, ἀπλῶς δ’ ὁ
περὶ πᾶν πεπαιδευμένος. διὸ τῆς πολιτικῆς οὐκ ἔστιν οἰκεῖος
ἀκροατῆς ὁ νέος· ἄπειρος γὰρ τῶν κατὰ τὸν βίον πράξεων, οἱ λόγοι
δ’ ἐκ τούτων καὶ περὶ τούτων· ἔτι δὲ τοῖς πάθεσιν ἀκολουθητικὸς ὢν
[5] ματαίως ἀκούσεται καὶ ἀνωφελῶς, ἐπειδὴ τὸ τέλος ἐστὶν οὐ
γνώσις ἀλλὰ πρᾶξις. διαφέρει δ’ οὐδὲν νέος τὴν ἡλικίαν ἢ τὸ ἦθος
νεαρός· οὐ γὰρ παρὰ τὸν χρόνον ἢ ἔλλειψις, ἀλλὰ διὰ τὸ κατὰ πάθος
ζῆν καὶ διώκειν ἕκαστα. τοῖς γὰρ τοιούτοις ἀνόνητος ἢ γνώσις
γίνεται, καθάπερ τοῖς ἀκρατέσιν· [10] τοῖς δὲ κατὰ λόγον τὰς ὁρέξεις
ποιούμενοις καὶ πράττουσι πολυωφελὲς ἂν εἴη τὸ περὶ τούτων
εἰδέναι.

Καὶ περὶ μὲν ἀκροατοῦ, καὶ πῶς ἀποδεκτέον, καὶ τί προτιθέμεθα,
πεφροιμιάσθω ταῦτα.

Λέγωμεν δ’ ἀναλαβόντες, ἐπειδὴ πᾶσα γνώσις καὶ προαίρεσις
[15] ἀγαθοῦ τινὸς ὁρέγεται, τί ἐστὶν οὗ λέγομεν τὴν πολιτικὴν
ἐφίεσθαι καὶ τί τὸ πάντων ἀκρότατον τῶν πρακτῶν ἀγαθῶν. ὀνόματι
μὲν οὖν σχεδὸν ὑπὸ τῶν πλείστων ὁμολογεῖται· τὴν γὰρ εὐδαιμονίαν
καὶ οἱ πολλοὶ καὶ οἱ χαρίεντες λέγουσιν, τὸ δ’ εὖ ζῆν καὶ τὸ εὖ
πράττειν ταῦτόν ὑπολαμβάνουσι [20] τῷ εὐδαιμονεῖν· περὶ δὲ τῆς
εὐδαιμονίας, τί ἐστὶν, ἀμφισβητοῦσι καὶ οὐχ ὁμοίως οἱ πολλοὶ τοῖς
σοφοῖς ἀποδιδόασιν. οἱ μὲν γὰρ τῶν ἐναργῶν τι καὶ φανερῶν, οἷον
ἡδονὴν ἢ πλοῦτον ἢ τιμὴν, ἄλλοι δ’ ἄλλο — πολλὰκις δὲ καὶ ὁ αὐτὸς
ἕτερον· νοσήσας μὲν γὰρ ὑγίειαν, πενόμενος δὲ [25] πλοῦτον·
συνειδότες δ’ ἑαυτοῖς ἄγνοιαν τοὺς μέγα τι καὶ ὑπὲρ αὐτοὺς
λέγοντας θαυμάζουσιν. ἔνιοι δ’ ᾤοντο παρὰ τὰ πολλὰ ταῦτα ἀγαθὰ

ἄλλο τι καθ' αὐτὸ εἶναι, ὃ καὶ τούτοις πᾶσιν αἰτίον ἐστὶ τοῦ εἶναι ἀγαθὰ. ἀπάσας μὲν οὖν ἐξετάζειν τὰς δόξας ματαιότερον ἴσως ἐστίν, ἱκανὸν δὲ τὰς μάλιστα [30] ἐπιπολαζούσας ἢ δοκούσας ἔχειν τινὰ λόγον.

Μὴ λανθανέτω δ' ἡμᾶς ὅτι διαφέρουσιν οἱ ἀπὸ τῶν ἀρχῶν λόγοι καὶ οἱ ἐπὶ τὰς ἀρχάς. εὖ γὰρ καὶ ὁ Πλάτων ἠπόρει τοῦτο καὶ ἐζήτηε, πότερον ἀπὸ τῶν ἀρχῶν ἢ ἐπὶ τὰς ἀρχάς ἐστὶν ἡ ὁδός, 1095b [1] ὥσπερ ἐν τῷ σταδίῳ ἀπὸ τῶν ἀθλοθετῶν ἐπὶ τὸ πέρασ ἢ ἀνάπαλιν. ἀρκτέον μὲν γὰρ ἀπὸ τῶν γνωρίμων, ταῦτα δὲ διττῶς· τὰ μὲν γὰρ ἡμῖν τὰ δ' ἀπλῶς. ἴσως οὖν ἡμῖν γε ἀρκτέον ἀπὸ τῶν ἡμῖν γνωρίμων. διὸ δεῖ τοῖς ἔθεσιν ἦχθαι καλῶς τὸν [5] περὶ καλῶν καὶ δικαίων καὶ ὅλως τῶν πολιτικῶν ἀκουσόμενον ἱκανῶς. ἀρχὴ γὰρ τὸ ὅτι, καὶ εἰ τοῦτο φαίνοιτο ἀρκούντως, οὐδὲν προσδεήσει τοῦ διότι· ὁ δὲ τοιοῦτος ἔχει ἢ λάβοι ἂν ἀρχὰς ῥαδίως. ὧ δὲ μηδέτερον ὑπάρχει τούτων, ἀκουσάτω τῶν Ἡσιόδου· [10] οὗτος μὲν πανάριστος ὃς αὐτὸς πάντα νοήσῃ,

ἐσθλὸς δ' αὖτ' ἀκέραιος ὃς εὖ εἰπὸντι πίθηται.

ὃς δέ κε μήτ' αὐτὸς νοήῃ μήτ' ἄλλου ἀκούων

ἐν θυμῷ βάλληται, ὃ δ' αὖτ' ἀχρήσιος ἀνὴρ.

Ἡμεῖς δὲ λέγωμεν ὅθεν παρεξέβημεν. τὸ γὰρ ἀγαθὸν [15] καὶ τὴν εὐδαιμονίαν οὐκ ἀλόγως εἰκόσασιν ἐκ τῶν βίων ὑπολαμβάνειν οἱ μὲν πολλοὶ καὶ φορτικώτατοι τὴν ἡδονήν· διὸ καὶ τὸν βίον ἀγαπῶσι τὸν ἀπολαυστικόν. τρεῖς γάρ εἰσι μάλιστα οἱ προύχοντες, ὃ τε νῦν εἰρημένος καὶ ὁ πολιτικὸς καὶ τρίτος ὁ θεωρητικὸς. οἱ μὲν οὖν πολλοὶ παντελῶς [20] ἀνδραποδώδεις φαίνονται βοσκημάτων βίον προαιρούμενοι, τυγχάνουσι δὲ λόγου διὰ τὸ πολλοὺς τῶν ἐν ταῖς ἐξουσίαις ὁμοιοπαθεῖν Σαρδαναπάλλῳ. οἱ δὲ χαρίεντες καὶ πρακτικοὶ τιμὴν· τοῦ γὰρ πολιτικοῦ βίου σχεδὸν τοῦτο τέλος. φαίνεται δ' ἐπιπολαιότερον εἶναι τοῦ ζητουμένου· δοκεῖ γὰρ ἐν [25] τοῖς τιμῶσι μᾶλλον εἶναι ἢ ἐν τῷ τιμωμένῳ, τὰγαθὸν δὲ οἰκεῖόν τι καὶ δυσαφαίρετον εἶναι μαντευόμεθα. ἔτι δ' εἰκόσασιν τὴν τιμὴν διώκειν ἵνα πιστεύσωσιν ἑαυτοὺς ἀγαθοὺς εἶναι· ζητοῦσι γοῦν ὑπὸ τῶν φρονίμων τιμᾶσθαι, καὶ παρ' οἷς γινώσκονται, καὶ ἐπ' ἀρετῇ· δηλον οὖν ὅτι κατὰ γε [30] τούτους ἡ ἀρετὴ κρείττων. τάχα δὲ καὶ μᾶλλον ἂν τις τέλος τοῦ πολιτικοῦ βίου ταύτην ὑπολάβοι. φαίνεται δὲ ἀτελεστέρα καὶ αὕτη· δοκεῖ γὰρ ἐνδέχεσθαι καὶ καθεύδειν ἔχοντα τὴν ἀρετὴν ἢ ἀπρακτεῖν διὰ βίου, καὶ πρὸς τούτοις κακοπαθεῖν καὶ

ἀτυχεῖν τὰ μέγιστα· 1096a [1] τὸν δ' οὕτω ζῶντα οὐδεὶς ἂν εὐδαιμονίσειεν, εἰ μὴ θέσιν διαφυλάττων. καὶ περὶ μὲν τούτων ἅλως· ἱκανῶς γὰρ καὶ ἐν τοῖς ἐγκυκλίοις εἴρηται περὶ αὐτῶν. τρίτος δ' ἐστὶν ὁ θεωρητικός, ὑπὲρ οὗ [5] τὴν ἐπίσκεψιν ἐν τοῖς ἐπομένοις ποιησόμεθα.

Ὁ δὲ χρηματιστὴς βίαιός τις ἐστίν, καὶ ὁ πλοῦτος δῆλον ὅτι οὐ τὸ ζητούμενον ἀγαθόν· χρήσιμον γὰρ καὶ ἄλλου χάριν. διὸ μᾶλλον τὰ πρότερον λεχθέντα τέλη τις ἂν ὑπολάβοι· δι' αὐτὰ γὰρ ἀγαπᾶται. φαίνεται δ' οὐδ' ἐκεῖνα· καίτοι πολλοὶ λόγοι [10] πρὸς αὐτὰ καταβέβληνται. ταῦτα μὲν οὖν ἀφείσθω.

Τὸ δὲ καθόλου βέλτιον ἴσως ἐπισκέψασθαι καὶ διαπορῆσαι πῶς λέγεται, καίπερ προσάντους τῆς τοιαύτης ζητήσεως γινομένης διὰ τὸ φίλους ἄνδρας εἰσαγαγεῖν τὰ εἶδη. δόξειε δ' ἂν ἴσως βέλτιον εἶναι καὶ δεῖν ἐπὶ σωτηρίᾳ γε τῆς [15] ἀληθείας καὶ τὰ οἰκεῖα ἀναιρεῖν, ἄλλως τε καὶ φιλοσόφους ὄντας· ἀμφοῖν γὰρ ὄντων φίλιν ὅσιον προτιμᾶν τὴν ἀλήθειαν.

Οἱ δὴ κομίσαντες τὴν δόξαν ταύτην οὐκ ἐποιοῦν ιδέας ἐν οἷς τὸ πρότερον καὶ ὕστερον ἔλεγον, διόπερ οὐδὲ τῶν ἀριθμῶν ιδέαν κατεσκεύαζον· τὸ δ' ἀγαθὸν λέγεται καὶ ἐν [20] τῷ τί ἐστὶ καὶ ἐν τῷ ποιῶ καὶ ἐν τῷ πρὸς τι, τὸ δὲ καθ' αὐτὸ καὶ ἡ οὐσία πρότερον τῇ φύσει τοῦ πρὸς τι (παραφυάδι γὰρ τοῦτ' ἔοικε καὶ συμβεβηκότι τοῦ ὄντος)· ὥστ' οὐκ ἂν εἴη κοινὴ τις ἐπὶ τούτοις ιδέα. ἔτι δ' ἐπεὶ τὰγαθὸν ἰσαχῶς λέγεται τῷ ὄντι (καὶ γὰρ ἐν τῷ τί λέγεται, οἷον ὁ θεὸς καὶ [25] ὁ νοῦς, καὶ ἐν τῷ ποιῶ αἱ ἀρεταί, καὶ ἐν τῷ ποσῷ τὸ μέτριον, καὶ ἐν τῷ πρὸς τι τὸ χρήσιμον, καὶ ἐν χρόνῳ καιρὸς, καὶ ἐν τόπῳ δίαίτα καὶ ἔτερα τοιαῦτα), δῆλον ὡς οὐκ ἂν εἴη κοινόν τι καθόλου καὶ ἔν· οὐ γὰρ ἂν ἐλέγετ' ἐν πάσαις ταῖς κατηγορίαις, ἀλλ' ἐν μιᾷ μόνῃ. ἔτι δ' ἐπεὶ τῶν [30] κατὰ μίαν ιδέαν μία καὶ ἐπιστήμη, καὶ τῶν ἀγαθῶν ἀπάντων ἦν ἂν μία τις ἐπιστήμη· νῦν δ' εἰσὶ πολλαὶ καὶ τῶν ὑπὸ μίαν κατηγορίαν, οἷον καιροῦ, ἐν πολέμῳ μὲν γὰρ στρατηγικὴ ἐν νόσῳ δ' ἰατρικὴ, καὶ τοῦ μετρίου ἐν τροφῇ μὲν ἰατρικὴ ἐν πόνοις δὲ γυμναστικὴ. ἀπορήσειε δ' ἂν τις τί [35] ποτε καὶ βούλονται λέγειν αὐτοέκαστον, εἴπερ ἔν τε αὐτοανθρώπῳ 1096b [1] καὶ ἐν ἀνθρώπῳ εἷς καὶ ὁ αὐτὸς λόγος ἐστὶν ὁ τοῦ ἀνθρώπου. ἦ γὰρ ἄνθρωπος, οὐδὲν διοίσουσιν· εἰ δ' οὕτως, οὐδ' ἦ ἀγαθόν. ἀλλὰ μὴν οὐδὲ τῷ αἰδίον εἶναι μᾶλλον ἀγαθὸν ἔσται, εἴπερ μηδὲ λευκότερον τὸ πολυχρόνιον τοῦ [5] ἐφημέρου. πιθανώτερον δ' εἰκόασιν οἱ

Πυθαγόρειοι λέγειν περὶ αὐτοῦ, τιθέντες ἐν τῇ τῶν ἀγαθῶν συστοιχίᾳ τὸ ἓν· οἷς δὴ καὶ Σπεύσιππος ἐπακολουθήσαι δοκεῖ.

Ἀλλὰ περὶ μὲν τούτων ἄλλος ἔστω λόγος· τοῖς δὲ λεχθεῖσιν ἀμφισβήτησις τις ὑποφαίνεται διὰ τὸ μὴ περὶ παντὸς ἀγαθοῦ τοὺς λόγους [10] εἰρῆσθαι, λέγεσθαι δὲ καθ' ἓν εἶδος τὰ καθ' αὐτὰ διωκόμενα καὶ ἀγαπώμενα, τὰ δὲ ποιητικὰ τούτων ἢ φυλακτικὰ πῶς ἢ τῶν ἐναντίων κωλυτικὰ διὰ ταῦτα λέγεσθαι καὶ τρόπον ἄλλον. δηλὸν οὖν ὅτι διττῶς λέγοιτ' ἂν τὰγαθὰ, καὶ τὰ μὲν καθ' αὐτά, θάτερα δὲ διὰ ταῦτα. χωρίσαντες [15] οὖν ἀπὸ τῶν ὠφελίμων τὰ καθ' αὐτὰ σκεπώμεθα εἰ λέγεται κατὰ μίαν ιδέαν. καθ' αὐτὰ δὲ ποῖα θεῖη τις ἄν; ἢ ὅσα καὶ μονούμενα διώκεται, οἷον τὸ φρονεῖν καὶ ὀρᾶν καὶ ἡδοναί τινες καὶ τιμαί; ταῦτα γὰρ εἰ καὶ δι' ἄλλο τι διώκομεν, ὅμως τῶν καθ' αὐτὰ ἀγαθῶν θεῖη τις ἄν. ἢ οὐδ' [20] ἄλλο οὐδὲν πλὴν τῆς ιδέας; ὥστε μάταιον ἔσται τὸ εἶδος. εἰ δὲ καὶ ταῦτ' ἐστὶ τῶν καθ' αὐτά, τὸν τὰγαθοῦ λόγον ἐν ἅπασιν αὐτοῖς τὸν αὐτὸν ἐμφαίνεσθαι δεήσει, καθάπερ ἐν χιόνι καὶ ψιμυθίῳ τὸν τῆς λευκότητος. τιμῆς δὲ καὶ φρονήσεως καὶ ἡδονῆς ἕτεροι καὶ διαφέροντες οἱ λόγοι ταύτῃ [25] ἢ ἀγαθὰ. οὐκ ἔστιν ἄρα τὸ ἀγαθὸν κοινόν τι κατὰ μίαν ιδέαν.

Ἀλλὰ πῶς δὴ λέγεται; οὐ γὰρ ἔοικε τοῖς γε ἀπὸ τύχης ὁμωνύμοις. ἀλλ' ἄρα γε τῷ ἀφ' ἐνὸς εἶναι ἢ πρὸς ἓν ἅπαντα συντελεῖν, ἢ μᾶλλον κατ' ἀναλογίαν; ὥς γὰρ ἐν σώματι ὄψις, ἐν ψυχῇ νοῦς, καὶ ἄλλο δὴ ἐν ἄλλῳ. [30] ἀλλ' ἴσως ταῦτα μὲν ἀφετέον τὸ νῦν· ἐξακριβοῦν γὰρ ὑπὲρ αὐτῶν ἄλλης ἂν εἴη φιλοσοφίας οἰκειότερον. ὁμοίως δὲ καὶ περὶ τῆς ιδέας· εἰ γὰρ καὶ ἔστιν ἓν τι τὸ κοινῇ κατηγορούμενον ἀγαθὸν ἢ χωριστὸν αὐτό τι καθ' αὐτό, δηλὸν ὥς οὐκ ἂν εἴη πρακτὸν οὐδὲ κτητὸν ἀνθρώπῳ· νῦν δὲ τοιοῦτόν τι [35] ζητεῖται. τάχα δὲ τῷ δόξειεν ἂν βέλτιον εἶναι γνωρίζειν αὐτὸ 1097a [1] πρὸς τὰ κτητὰ καὶ πρακτὰ τῶν ἀγαθῶν· οἷον γὰρ παράδειγμα τοῦτ' ἔχοντες μᾶλλον εἰσόμεθα καὶ τὰ ἡμῖν ἀγαθὰ, κἂν εἰδῶμεν, ἐπιτευξόμεθα αὐτῶν. πιθανότητα μὲν οὖν τίνα ἔχει ὁ λόγος, ἔοικε δὲ ταῖς ἐπιστήμαις διαφωνεῖν· [5] πᾶσαι γὰρ ἀγαθοῦ τινὸς ἐφιέμεναι καὶ τὸ ἐνδεές ἐπιζητοῦσαι παραλείπουσι τὴν γνῶσιν αὐτοῦ. καίτοι βοήθημα τηλικούτον τοὺς τεχνίτας ἅπαντας ἀγνοεῖν καὶ μὴδ' ἐπιζητεῖν οὐκ εὐλογον. ἄπορον δὲ καὶ τί ὠφεληθήσεται ὑφάντης ἢ τέκτων πρὸς τὴν αὐτοῦ τέχνην εἰδὼς τὸ αὐτὸ τοῦτο ἀγαθόν, [10] ἢ πῶς ἰατρικώτερος ἢ στρατηγικώτερος ἔσται ὁ τὴν ιδέαν αὐτὴν τεθεαμένος. φαίνεται

μὲν γὰρ οὐδὲ τὴν ὑγίειαν οὕτως ἐπισκοπεῖν ὁ ἱατρός, ἀλλὰ τὴν ἀνθρώπου, μᾶλλον δ' ἴσως τὴν τοῦδε· καθ' ἕκαστον γὰρ ἱατρεῦει. καὶ περὶ μὲν τούτων ἐπὶ τοσοῦτον εἰρήσθω.

[15] Πάλιν δ' ἐπανεέλθωμεν ἐπὶ τὸ ζητούμενον ἀγαθόν, τί ποτ' ἂν εἴη. φαίνεται μὲν γὰρ ἄλλο ἐν ἄλλῃ πράξει καὶ τέχνῃ· ἄλλο γὰρ ἐν ἱατρικῇ καὶ στρατηγικῇ καὶ ταῖς λοιπαῖς ὁμοίως. τί οὖν ἐκάστης τάγαθόν; ἢ οὗ χάριν τὰ λοιπὰ πράττεται; τοῦτο δ' ἐν ἱατρικῇ μὲν ὑγίεια, ἐν στρατηγικῇ [20] δὲ νίκη, ἐν οἰκοδομικῇ δ' οἰκία, ἐν ἄλλῳ δ' ἄλλο, ἐν ἀπάσῃ δὲ πράξει καὶ προαιρέσει τὸ τέλος· τούτου γὰρ ἕνεκα τὰ λοιπὰ πράττουσι πάντες. ὥστ' εἴ τι τῶν πρακτῶν ἀπάντων ἐστὶ τέλος, τοῦτ' ἂν εἴη τὸ πρακτὸν ἀγαθόν, εἰ δὲ πλείω, ταῦτα.

Μεταβαίνων δὴ ὁ λόγος εἰς ταῦτον ἀφίκεται· τοῦτο [25] δ' ἐπὶ μᾶλλον διασαφῆσαι πειρατέον. ἐπεὶ δὲ πλείω φαίνεται τὰ τέλη, τούτων δ' αἰρούμεθά τινα δι' ἕτερον, οἷον πλοῦτον αὐλοῦς καὶ ὅλως τὰ ὄργανα, δηλὸν ὡς οὐκ ἔστι πάντα τέλεια· τὸ δ' ἄριστον τέλειόν τι φαίνεται. ὥστ' εἰ μὲν ἐστὶν ἓν τι μόνον τέλειον, τοῦτ' ἂν εἴη τὸ ζητούμενον, [30] εἰ δὲ πλείω, τὸ τελειότατον τούτων. τελειότερον δὲ λέγομεν τὸ καθ' αὐτὸ διωκτὸν τοῦ δι' ἕτερον καὶ τὸ μηδέποτε δι' ἄλλο αἰρετὸν τῶν <καὶ> καθ' αὐτὰ καὶ δι' αὐτὸ αἰρετῶν, καὶ ἀπλῶς δὴ τέλειον τὸ καθ' αὐτὸ αἰρετὸν αἰεὶ καὶ μηδέποτε δι' ἄλλο. τοιοῦτον δ' ἡ εὐδαιμονία μάλιστα εἶναι δοκεῖ.

1097b [1] Ταύτην γὰρ αἰρούμεθα αἰεὶ δι' αὐτὴν καὶ οὐδέποτε δι' ἄλλο, τιμὴν δὲ καὶ ἡδονὴν καὶ νοῦν καὶ πᾶσαν ἀρετὴν αἰρούμεθα μὲν καὶ δι' αὐτὰ (μηθενὸς γὰρ ἀποβαίνοντος ἐλοίμεθ' ἂν ἕκαστον αὐτῶν), αἰρούμεθα δὲ καὶ τῆς εὐδαιμονίας χάριν, [5] διὰ τούτων ὑπολαμβάνοντες εὐδαιμονήσειν. τὴν δ' εὐδαιμονίαν οὐδεὶς αἰρεῖται τούτων χάριν, οὐδ' ὅλως δι' ἄλλο. φαίνεται δὲ καὶ ἐκ τῆς αὐταρκειᾶς τὸ αὐτὸ συμβαίνειν· τὸ γὰρ τέλειον ἀγαθὸν αὐταρκες εἶναι δοκεῖ. τὸ δ' αὐταρκες λέγομεν οὐκ αὐτῷ μόνῳ, τῷ ζῶντι βίον μονώτην, ἀλλὰ καὶ γονεῦσι [10] καὶ τέκνοις καὶ γυναικὶ καὶ ὅλως τοῖς φίλοις καὶ πολίταις, ἐπειδὴ φύσει πολιτικὸν ὁ ἄνθρωπος. τούτων δὲ ληπτέος ὅρος τις· ἐπεκτείνοντι γὰρ ἐπὶ τοὺς γονεῖς καὶ τοὺς ἀπογόνους καὶ τῶν φίλων τοὺς φίλους εἰς ἄπειρον πρόεισιν. ἀλλὰ τοῦτο μὲν εἰσαυθὶς ἐπισκεπτέον· τὸ δ' αὐταρκες τίθεμεν ὁ μονούμενον [15] αἰρετὸν ποιεῖ τὸν βίον καὶ μηδενὸς ἐνδεᾶ· τοιοῦτον δὲ τὴν εὐδαιμονίαν οἰόμεθα εἶναι· ἔτι δὲ πάντων αἰρετωτάτην μὴ συναριθμουμένην — συναριθμουμένην δὲ δηλὸν ὡς αἰρετωτέραν

μετὰ τοῦ ἐλαχίστου τῶν ἀγαθῶν· ὑπεροχὴ γὰρ ἀγαθῶν γίνεται τὸ προστιθέμενον, ἀγαθῶν δὲ τὸ μεῖζον αἰρετώτερον αἰεί. [20] τέλειον δὴ τι φαίνεται καὶ αὐταρκες ἢ εὐδαιμονία, τῶν πρακτῶν οὕσα τέλος.

Ἀλλ' ἴσως τὴν μὲν εὐδαιμονίαν τὸ ἄριστον λέγειν ὁμολογούμενόν τι φαίνεται, ποθεῖται δ' ἐναργέστερον τί ἐστὶν ἔτι λεχθῆναι. τάχα δὴ γένοιτ' ἂν τοῦτ', εἰ ληφθῇ τὸ ἔργον [25] τοῦ ἀνθρώπου. ὥσπερ γὰρ αὐλητῇ καὶ ἀγαλματοποιῷ καὶ παντὶ τεχνίτῃ, καὶ ὅλως ὧν ἔστιν ἔργον τι καὶ πρᾶξις, ἐν τῷ ἔργῳ δοκεῖ τὰγαθὸν εἶναι καὶ τὸ εὖ, οὕτω δόξειεν ἂν καὶ ἀνθρώπῳ, εἴπερ ἔστι τι ἔργον αὐτοῦ. πότερον οὖν τέκτονος μὲν καὶ σκυτέως ἔστιν ἔργα τινὰ καὶ πράξεις, ἀνθρώπου δ' [30] οὐδέν ἐστιν, ἀλλ' ἄργον πέφυκεν; ἢ καθάπερ ὀφθαλμοῦ καὶ χειρὸς καὶ ποδὸς καὶ ὅλως ἐκάστου τῶν μορίων φαίνεται τι ἔργον, οὕτω καὶ ἀνθρώπου παρὰ πάντα ταῦτα θεῖη τις ἂν ἔργον τι; τί οὖν δὴ τοῦτ' ἂν εἴη ποτέ; τὸ μὲν γὰρ ζῆν κοινὸν εἶναι φαίνεται καὶ τοῖς φυτοῖς, ζητεῖται δὲ τὸ ἴδιον. 1098a [1] ἀφοριστέον ἄρα τὴν τε θρεπτικὴν καὶ τὴν αὐξητικὴν ζωὴν. ἐπομένη δὲ αἰσθητικὴ τις ἂν εἴη, φαίνεται δὲ καὶ αὐτὴ κοινὴ καὶ ἵππῳ καὶ βοῖ καὶ παντὶ ζῴῳ. λείπεται δὴ πρακτικὴ τις τοῦ λόγον ἔχοντος· τούτου δὲ τὸ μὲν ὡς ἐπιπειθὲς λόγῳ, τὸ δ' ὡς [5] ἔχον καὶ διανοούμενον. διττῶς δὲ καὶ ταύτης λεγομένης τὴν κατ' ἐνέργειαν θετέον· κυριώτερον γὰρ αὕτη δοκεῖ λέγεσθαι. εἰ δ' ἐστὶν ἔργον ἀνθρώπου ψυχῆς ἐνέργεια κατὰ λόγον ἢ μὴ ἄνευ λόγου, τὸ δ' αὐτὸ φαμεν ἔργον εἶναι τῷ γενεῖ τοῦδε καὶ τοῦδε σπουδαίου, ὥσπερ κιθαριστοῦ καὶ σπουδαίου [10] κιθαριστοῦ, καὶ ἀπλῶς δὴ τοῦτ' ἐπὶ πάντων, προστιθεμένης τῆς κατὰ τὴν ἀρετὴν ὑπεροχῆς πρὸς τὸ ἔργον· κιθαριστοῦ μὲν γὰρ κιθαρίζειν, σπουδαίου δὲ τὸ εὖ· εἰ δ' οὕτως, [ἀνθρώπου δὲ τίθεμεν ἔργον ζωὴν τινα, ταύτην δὲ ψυχῆς ἐνέργειαν καὶ πράξεις μετὰ λόγου, σπουδαίου δ' ἀνδρὸς εὖ ταῦτα καὶ [15] καλῶς, ἕκαστον δ' εὖ κατὰ τὴν οἰκείαν ἀρετὴν ἀποτελεῖται· εἰ δ' οὕτω,] τὸ ἀνθρώπινον ἀγαθὸν ψυχῆς ἐνέργεια γίνεται κατ' ἀρετὴν, εἰ δὲ πλείους αἱ ἀρεταί, κατὰ τὴν ἀρίστην καὶ τελειοτάτην.

Ἔτι δ' ἐν βίῳ τελείῳ. μία γὰρ χελιδὼν ἔαρ οὐ ποιεῖ, οὐδὲ μία ἡμέρα· οὕτω δὲ οὐδὲ μακάριον καὶ εὐδαίμονα [20] μία ἡμέρα οὐδ' ὀλίγος χρόνος.

Περιγεγράφθω μὲν οὖν τὰγαθὸν ταύτῃ· δεῖ γὰρ ἴσως ὑποτυπῶσαι πρῶτον, εἴθ' ὕστερον ἀναγράψαι. δόξειε δ' ἂν παντὸς εἶναι προαγαγεῖν καὶ διαρθρῶσαι τὰ καλῶς ἔχοντα τῇ περιγραφῇ, καὶ ὁ

χρόνος τῶν τοιούτων εὐρετῆς ἢ συνεργὸς ἀγαθὸς εἶναι· ὅθεν καὶ τῶν τεχνῶν [25] γεγόνασιν αἱ ἐπιδόσεις· παντὸς γὰρ προσθεῖναι τὸ ἐλλεῖπον. μεμνησθαι δὲ καὶ τῶν προειρημένων χρή, καὶ τὴν ἀκρίβειαν μὴ ὁμοίως ἐν ἅπασιν ἐπιζητεῖν, ἀλλ' ἐν ἐκάστοις κατὰ τὴν ὑποκειμένην ὕλην καὶ ἐπὶ τοσοῦτον ἐφ' ὅσον οἰκεῖον τῇ μεθόδῳ. καὶ γὰρ τέκτων καὶ γεωμέτρης διαφερόντως [30] ἐπιζητοῦσι τὴν ὀρθήν· ὁ μὲν γὰρ ἐφ' ὅσον χρησίμη πρὸς τὸ ἔργον, ὁ δὲ τί ἐστὶν ἡ ποιὸν τι· θεατῆς γὰρ τάληθοῦς, τὸν αὐτὸν δὴ τρόπον καὶ ἐν τοῖς ἄλλοις ποιητέον, ὅπως μὴ τὰ ἀπαρergα τῶν ἔργων πλείω γίνηται. 1098b [1] οὐκ ἀπαιτητέον δ' οὐδὲ τὴν αἰτίαν ἐν ἅπασιν ὁμοίως, ἀλλ' ἱκανὸν ἐν τισὶ τὸ ὅτι δειχθῆναι καλῶς, οἷον καὶ περὶ τὰς ἀρχάς· τὸ δ' ὅτι πρῶτον καὶ ἀρχή. τῶν ἀρχῶν δ' αἱ μὲν ἐπαγωγῇ θεωροῦνται, αἱ δ' αἰσθήσει, αἱ δ' ἐθισμῷ τινί, καὶ ἄλλαι δ' ἄλλως. μετιέναι [5] δὲ πειρατέον ἐκάστας ἢ πεφύκασιν, καὶ σπουδαστέον ὅπως διορισθῶσι καλῶς· μεγάλην γὰρ ἔχουσι ῥοπήν πρὸς τὰ ἐπόμενα. δοκεῖ γὰρ πλεῖον ἢ ἥμισυ τοῦ παντὸς εἶναι ἡ ἀρχή, καὶ πολλὰ συμφανῇ γίνεσθαι δι' αὐτῆς τῶν ζητουμένων.

Σκεπτέον δὲ περὶ αὐτῆς οὐ μόνον ἐκ τοῦ συμπεράσματος [10] καὶ ἐξ ὧν ὁ λόγος, ἀλλὰ καὶ ἐκ τῶν λεγομένων περὶ αὐτῆς· τῷ μὲν γὰρ ἀληθεῖ πάντα συνάδει τὰ ὑπάρχοντα, τῷ δὲ ψευδεῖ ταχὺ διαφωνεῖ τάληθές. νενεμημένων δὴ τῶν ἀγαθῶν τριχῇ, καὶ τῶν μὲν ἐκτὸς λεγομένων τῶν δὲ περὶ ψυχὴν καὶ σῶμα, τὰ περὶ ψυχὴν κυριώτατα λέγομεν καὶ [15] μάλιστα ἀγαθὰ, τὰς δὲ πράξεις καὶ τὰς ἐνεργείας τὰς ψυχικὰς περὶ ψυχὴν τίθεμεν. ὥστε καλῶς ἂν λέγοιτο κατὰ γε ταύτην τὴν δόξαν παλαιὰν οὕσαν καὶ ὁμολογουμένην ὑπὸ τῶν φιλοσοφούντων. ὀρθῶς δὲ καὶ ὅτι πράξεις τινὲς λέγονται καὶ ἐνέργειαι τὸ τέλος· οὕτω γὰρ τῶν περὶ ψυχὴν ἀγαθῶν [20] γίνεται καὶ οὐ τῶν ἐκτὸς. συνάδει δὲ τῷ λόγῳ καὶ τὸ εὖ ζῆν καὶ τὸ εὖ πράττειν τὸν εὐδαίμονα· σχεδὸν γὰρ εὐζωία τις εἴρηται καὶ εὐπραξία. φαίνεται δὲ καὶ τὰ ἐπιζητούμενα τὰ περὶ τὴν εὐδαιμονίαν ἅπανθ' ὑπάρχειν τῷ λεχθέντι. τοῖς μὲν γὰρ ἀρετῇ τοῖς δὲ φρόνησις ἄλλοις δὲ σοφία τις εἶναι δοκεῖ, [25] τοῖς δὲ ταῦτα ἢ τούτων τι μεθ' ἡδονῆς ἢ οὐκ ἄνευ ἡδονῆς· ἕτεροι δὲ καὶ τὴν ἐκτὸς εὐετηρίαν συμπαραλαμβάνουσιν. τούτων δὲ τὰ μὲν πολλοὶ καὶ παλαιοὶ λέγουσιν, τὰ δὲ ὀλίγοι καὶ ἑνδοξοὶ ἄνδρες· οὐδετέρους δὲ τούτων εὐλογον διαμαρτάνειν τοῖς ὅλοις, ἀλλ' ἐν γέ τι ἢ καὶ τὰ πλεῖστα κατορθοῦν.

[30] Τοῖς μὲν οὖν λέγουσι τὴν ἀρετὴν ἢ ἀρετὴν τινα συνφδός ἐστιν ὁ λόγος· ταύτης γὰρ ἐστὶν ἡ κατ' αὐτὴν ἐνέργεια. διαφέρει δὲ ἴσως οὐ μικρὸν ἐν κτήσει ἢ χρήσει τὸ ἄριστον ὑπολαμβάνειν, καὶ ἐν ἔξει ἢ ἐνεργείᾳ. τὴν μὲν γὰρ ἔξιν ἐνδέχεται μηδὲν ἀγαθὸν ἀποτελεῖν ὑπάρχουσιν, 1099a [1] οἷον τῷ καθεύδοντι ἢ καὶ ἄλλως πῶς ἐξηργηκότι, τὴν δ' ἐνέργειαν οὐχ οἷόν τε· πράξει γὰρ ἐξ ἀνάγκης, καὶ εὖ πράξει. ὥσπερ δ' Ὀλυμπιάσιν οὐχ οἱ κάλλιστοι καὶ ἰσχυρότατοι στεφανοῦνται ἀλλ' [5] οἱ ἀγωνιζόμενοι (τούτων γὰρ τινες νικῶσιν), οὕτω καὶ τῶν ἐν τῷ βίῳ καλῶν καγαθῶν οἱ πράττοντες ὀρθῶς ἐπήβολοι γίνονται.

Ἔστι δὲ καὶ ὁ βίος αὐτῶν καθ' αὐτὸν ἡδύς. τὸ μὲν γὰρ ἥδεσθαι τῶν ψυχικῶν, ἐκάστω δ' ἐστὶν ἡδὺ πρὸς ὃ λέγεται φιλοτοιοῦτος, οἷον ἵππος μὲν τῷ φιλίππῳ, θέαμα [10] δὲ τῷ φιλοθεώρῳ· τὸν αὐτὸν δὲ τρόπον καὶ τὰ δίκαια τῷ φιλοδικαίῳ καὶ ὅλως τὰ κατ' ἀρετὴν τῷ φιλαρέτῳ. τοῖς μὲν οὖν πολλοῖς τὰ ἡδέα μάχεται διὰ τὸ μὴ φύσει τοιαῦτ' εἶναι, τοῖς δὲ φιλοκάλοις ἐστὶν ἡδέα τὰ φύσει ἡδέα· τοιαῦται δ' αἱ κατ' ἀρετὴν πράξεις, ὥστε καὶ τούτοις εἰσὶν ἡδεῖαι καὶ [15] καθ' αὐτάς. οὐδὲν δὴ προσδεῖται τῆς ἡδονῆς ὁ βίος αὐτῶν ὥσπερ περιάπτου τινός, ἀλλ' ἔχει τὴν ἡδονὴν ἐν ἑαυτῷ. πρὸς τοῖς εἰρημένοις γὰρ οὐδ' ἐστὶν ἀγαθὸς ὁ μὴ χαίρων ταῖς καλαῖς πράξεσιν· οὔτε γὰρ δίκαιον οὐθεὶς ἂν εἴποι τὸν μὴ χαίροντα τῷ δικαιοπραγεῖν, οὔτ' ἐλευθέριον τὸν μὴ χαίροντα [20] ταῖς ἐλευθερίοις πράξεσιν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ δ' οὕτω, καθ' αὐτάς ἂν εἶεν αἱ κατ' ἀρετὴν πράξεις ἡδεῖαι. ἀλλὰ μὴν καὶ ἀγαθαὶ γε καὶ καλαί, καὶ μάλιστα τούτων ἕκαστον, εἴπερ καλῶς κρίνει περὶ αὐτῶν ὁ σπουδαῖος· κρίνει δ' ὡς εἴπομεν. ἄριστον ἄρα καὶ κάλλιστον καὶ ἡδιστον ἢ [25] εὐδαιμονία, καὶ οὐ διώρισται ταῦτα κατὰ τὸ Δηλιακὸν ἐπίγραμμα·

κάλλιστον τὸ δικαιοτάτον, λῶστον δ' ὑγιαίνειν·

ἡδιστον δὲ πέφυχ' οὗ τις ἐρᾷ τὸ τυχεῖν.

Ἄπαντα γὰρ ὑπάρχει ταῦτα ταῖς ἀρίσταις ἐνεργείαις· ταύτας [30] δέ, ἢ μίαν τούτων τὴν ἀρίστην, φαμὲν εἶναι τὴν εὐδαιμονίαν.

Φαίνεται δ' ὅμως καὶ τῶν ἐκτὸς ἀγαθῶν προσδεομένη, καθάπερ εἴπομεν· ἀδύνατον γὰρ ἢ οὐ ράδιον τὰ καλὰ πράττειν ἀχορήγητον ὄντα. πολλὰ μὲν γὰρ πράττεται, 1099b [1] καθάπερ δι' ὀργάνων, διὰ φίλων καὶ πλούτου καὶ πολιτικῆς δυνάμεως· ἐνίων δὲ τητῶμενοι ῥυπαίνουσι τὸ μακάριον, οἷον εὐγενείας εὐτεκνίας κάλλους· οὐ πάνυ

γὰρ εὐδαιμονικὸς ὁ τὴν ιδέαν παναίσχυς ἢ δυσγενής ἢ μονώτης καὶ ἄτεκνος, [5] ἔτι δ' ἴσως ἦττον, εἴ τῳ πάγκακοι παῖδες εἶεν ἢ φίλοι, ἢ ἀγαθοὶ ὄντες τεθνᾶσιν. καθάπερ οὖν εἵπομεν, ἔοικε προσδεῖσθαι καὶ τῆς τοιαύτης εὐημερίας· ὅθεν εἰς ταῦτο τάττουσιν ἔνιοι τὴν εὐτυχίαν τῇ εὐδαιμονίᾳ, ἕτεροι δὲ τὴν ἀρετὴν.

Ὅθεν καὶ ἀπορεῖται πότερόν ἐστι μαθητὸν ἢ ἐθιστὸν ἢ καὶ [10] ἄλλως πῶς ἀσκητόν, ἢ κατὰ τινα θείαν μοῖραν ἢ καὶ διὰ τύχην παραγίνεται. εἰ μὲν οὖν καὶ ἄλλο τί ἐστι θεῶν δῶρημα ἀνθρώποις, εὐλογον καὶ τὴν εὐδαιμονίαν θεόσδοτον εἶναι, καὶ μάλιστα τῶν ἀνθρωπίνων ὅσῳ βέλτιστον. ἀλλὰ τοῦτο μὲν ἴσως ἄλλης ἂν εἴη σκέψεως οἰκειότερον, φαίνεται δὲ καὶ εἰ [15] μὴ θεόπεμπτός ἐστιν ἀλλὰ δι' ἀρετὴν καὶ τινα μάθησιν ἢ ἄσκησιν παραγίνεται, τῶν θειοτάτων εἶναι· τὸ γὰρ τῆς ἀρετῆς ἄθλον καὶ τέλος ἄριστον εἶναι φαίνεται καὶ θεῖόν τι καὶ μακάριον.

Εἴη δ' ἂν καὶ πολὺκοινον· δυνατὸν γὰρ ὑπάρξαι πᾶσι τοῖς μὴ πεπηρωμένοις πρὸς ἀρετὴν διὰ τινος μαθήσεως [20] καὶ ἐπιμελείας. εἰ δ' ἐστὶν οὕτω βέλτιον ἢ τὸ διὰ τύχην εὐδαιμονεῖν, εὐλογον ἔχειν οὕτως, εἴπερ τὰ κατὰ φύσιν, ὥς οἷόν τε κάλλιστα ἔχειν, οὕτω πέφυκεν, ὁμοίως δὲ καὶ τὰ κατὰ τέχνην καὶ πᾶσαν αἰτίαν, καὶ μάλιστα <τὰ> κατὰ τὴν ἀρίστην. τὸ δὲ μέγιστον καὶ κάλλιστον ἐπιτρέψαι τύχῃ λίαν πλημμελὲς [25] ἂν εἴη.

Συμφανὲς δ' ἐστὶ καὶ ἐκ τοῦ λόγου τὸ ζητούμενον· εἴρηται γὰρ ψυχῆς ἐνέργεια κατ' ἀρετὴν ποιά τις. τῶν δὲ λοιπῶν ἀγαθῶν τὰ μὲν ὑπάρχειν ἀναγκαῖον, τὰ δὲ συνεργὰ καὶ χρήσιμα πέφυκεν ὀργανικῶς. ὁμολογούμενα δὲ ταῦτ' ἂν εἴη καὶ τοῖς ἐν ἀρχῇ· τὸ γὰρ τῆς πολιτικῆς [30] τέλος ἄριστον ἐτίθεμεν, αὕτη δὲ πλειστήν ἐπιμέλειαν ποιεῖται τοῦ ποιούσης τινος καὶ ἀγαθοῦς τοὺς πολίτας ποιῆσαι καὶ πρακτικοὺς τῶν καλῶν.

Εἰκότως οὖν οὔτε βοῦν οὔτε ἵππον οὔτε ἄλλο τῶν ζώων οὐδὲν εὐδαιμον λέγομεν· 1100a [1] οὐδὲν γὰρ αὐτῶν οἷόν τε κοινωνῆσαι τοιαύτης ἐνεργείας. διὰ ταύτην δὲ τὴν αἰτίαν οὐδὲ παῖς εὐδαίμων ἐστίν· οὐπω γὰρ πρακτικὸς τῶν τοιούτων διὰ τὴν ἡλικίαν· οἱ δὲ λεγόμενοι διὰ τὴν ἐλπίδα μακαρίζονται. δεῖ γάρ, ὥσπερ εἵπομεν, καὶ ἀρετῆς τελείας [5] καὶ βίου τελείου. πολλαὶ γὰρ μεταβολαὶ γίνονται καὶ παντοῖαι τύχαι κατὰ τὸν βίον, καὶ ἐνδέχεται τὸν μάλιστ' εὐθηνοῦντα μεγάλας συμφοραῖς περιπεσεῖν ἐπὶ γήρῳ, καθάπερ ἐν τοῖς Τρωικοῖς περὶ Πριάμου μυθεύεται· τὸν δὲ τοιαύταις χρησάμενον

τύχαις καὶ τελευτήσαντα ἀθλίως οὐδεὶς εὐδαιμονίζει.

[10] Πότερον οὖν οὐδ' ἄλλον οὐδένα ἀνθρώπων εὐδαιμονιστέον ἕως ἂν ζῇ, κατὰ Σόλωνα δὲ χρεῶν τέλος ὁρᾶν; εἰ δὲ δὴ καὶ θετέον οὕτως, ἄρα γε καὶ ἔστιν εὐδαίμων τότε ἐπειδὴν ἀποθάνῃ; ἢ τοῦτό γε παντελῶς ἄτοπον, ἄλλως τε καὶ τοῖς λέγουσιν ἡμῖν ἐνέργειάν τινα τὴν εὐδαιμονίαν; εἰ δὲ μὴ λέγομεν [15] τὸν τεθνεῶτα εὐδαίμονα, μὴδὲ Σόλων τοῦτο βούλεται, ἀλλ' ὅτι τῆνικαὐτα ἂν τις ἀσφαλῶς μακαρίσειεν ἄνθρωπον ὥς ἐκτὸς ἤδη τῶν κακῶν ὄντα καὶ τῶν δυστυχημάτων, ἔχει μὲν καὶ τοῦτ' ἀμφισβήτησιν τινα· δοκεῖ γὰρ εἶναι τι τῷ τεθνεῶτι καὶ κακὸν καὶ ἀγαθόν, εἴπερ καὶ τῷ ζῶντι μὴ [20] αἰσθανομένῳ δέ, οἷον τιμαὶ καὶ ἀτιμίαι καὶ τέκνων καὶ ὅλως ἀπογόνων εὐπραξίαι τε καὶ δυστυχίαι. ἀπορίαν δὲ καὶ ταῦτα παρέχει· τῷ γὰρ μακαρίως βεβιωκότι μέχρι γήρως καὶ τελευτήσαντι κατὰ λόγον ἐνδέχεται πολλὰς μεταβολὰς συμβαίνειν περὶ τοὺς ἐκγόνους, καὶ τοὺς μὲν αὐτῶν [25] ἀγαθοὺς εἶναι καὶ τυχεῖν βίου τοῦ κατ' ἀξίαν, τοὺς δ' ἐξ ἐναντίας· δῆλον δ' ὅτι καὶ τοῖς ἀποστήμασι πρὸς τοὺς γονεῖς παντοδαπῶς ἔχειν αὐτοὺς ἐνδέχεται. ἄτοπον δὴ γίνοιτ' ἂν, εἰ συμμεταβάλλοι καὶ ὁ τεθνεὼς καὶ γίνοιτο ὅτε μὲν εὐδαίμων πάλιν δ' ἄθλιος· ἄτοπον δὲ καὶ τὸ μὴδὲν μὴδ' ἐπὶ [30] τινα χρόνον συνικνεῖσθαι τὰ τῶν ἐκγόνων τοῖς γονεῦσιν.

Ἀλλ' ἐπανιτέον ἐπὶ τὸ πρότερον ἀπορηθέν· τάχα γὰρ ἂν θεωρηθεῖ καὶ τὸ νῦν ἐπιζητούμενον ἐξ ἐκείνου. εἰ δὴ τὸ τέλος ὁρᾶν δεῖ καὶ τότε μακαρίζειν ἕκαστον οὐχ ὥς ὄντα μακάριον ἀλλ' ὅτι πρότερον ἦν, πῶς οὐκ ἄτοπον, εἰ ὅτ' ἔστιν εὐδαίμων, [35] μὴ ἀληθεύεται κατ' αὐτοῦ τὸ ὑπάρχον 1100b [1] διὰ τὸ μὴ βούλεσθαι τοὺς ζῶντας εὐδαιμονίζειν διὰ τὰς μεταβολὰς, καὶ διὰ τὸ μόνιμόν τι τὴν εὐδαιμονίαν ὑπειληφέναι καὶ μῆδαμῶς εὐμετάβολον, τὰς δὲ τύχας πολλάκις ἀνακυκλεῖσθαι περὶ τοὺς αὐτούς; δῆλον γὰρ ὥς εἰ συνακολουθοίημεν [5] ταῖς τύχαις, τὸν αὐτὸν εὐδαίμονα καὶ πάλιν ἄθλιον ἐροῦμεν πολλάκις, χαμαιλέοντά τινα τὸν εὐδαίμονα ἀποφαίνοντες καὶ σαθρῶς ἰδρυμένον. ἢ τὸ μὲν ταῖς τύχαις ἐπακολουθεῖν οὐδαμῶς ὀρθόν; οὐ γὰρ ἐν ταύταις τὸ εὖ ἢ κακῶς, ἀλλὰ προσδεῖται τούτων ὁ ἀνθρώπινος βίος, καθάπερ εἶπομεν, κύριαι [10] δ' εἰσὶν αἱ κατ' ἀρετὴν ἐνέργειαι τῆς εὐδαιμονίας, αἱ δ' ἐναντίαι τοῦ ἐναντίου.

Μαρτυρεῖ δὲ τῷ λόγῳ καὶ τὸ νῦν διαπορηθέν. περὶ οὐδὲν γὰρ οὕτως ὑπάρχει τῶν ἀνθρωπίνων ἔργων βεβαιότης ὥς περὶ τὰς

ἐνεργείας τὰς κατ' ἀρετὴν· μονιμώτεραι γὰρ καὶ τῶν ἐπιστημῶν αὗται δοκοῦσιν εἶναι· [15] τούτων δ' αὐτῶν αἱ τιμιώταται μονιμώτεραι διὰ τὸ μάλιστα καὶ συνεχέστατα καταζῆν ἐν αὐταῖς τοὺς μακαρίους· τοῦτο γὰρ ἔοικεν αἰτίῳ τοῦ μὴ γίνεσθαι περὶ αὐτὰς λήθην· ὑπάρξει δὴ τὸ ζητούμενον τῷ εὐδαίμονι, καὶ ἔσται διὰ βίου τοιοῦτος· αἶψα γὰρ ἢ μάλιστα πάντων πράξει καὶ θεωρήσει [20] τὰ κατ' ἀρετὴν, καὶ τὰς τύχας οἴσει κάλλιστα καὶ πάντη πάντως ἐμμελῶς ὃ γ' ὡς ἀληθῶς ἀγαθὸς καὶ τετράγωνος ἄνευ ψόγου.

Πολλῶν δὲ γινομένων κατὰ τύχην καὶ διαφερόντων μεγέθει καὶ μικρότητι, τὰ μὲν μικρὰ τῶν εὐτυχημάτων, ὁμοίως δὲ καὶ τῶν ἀντικειμένων, δῆλον ὡς οὐ ποιεῖ [25] ῥοπὴν τῆς ζωῆς, τὰ δὲ μεγάλα καὶ πολλὰ γινόμενα μὲν εὖ μακαριώτερον τὸν βίον ποιήσει (καὶ γὰρ αὐτὰ συνεπικοσμεῖν πέφυκεν, καὶ ἡ χρῆσις αὐτῶν καλὴ καὶ σπουδαία γίνεται), ἀνάπαλιν δὲ συμβαίνοντα θλίβει καὶ λυμαίνεται τὸ μακάριον· λύπας τε γὰρ ἐπιφέρει καὶ ἐμποδίζει πολλαῖς [30] ἐνεργείαις. ὅμως δὲ καὶ ἐν τούτοις διαλάμπει τὸ καλόν, ἐπειδὴν φέρη τις εὐκόλως πολλὰς καὶ μεγάλας ἀτυχίας, μὴ δι' ἀναλγησίαν, ἀλλὰ γεννάδας ὧν καὶ μεγαλόψυχος.

Εἰ δ' εἰσὶν αἱ ἐνέργειαι κύριαι τῆς ζωῆς, καθάπερ εἵπομεν, οὐδεὶς ἂν γένοιτο τῶν μακαρίων ἄθλιος· οὐδέποτε [35] γὰρ πράξει τὰ μισητὰ καὶ τὰ φαῦλα. 1101a [1] τὸν γὰρ ὡς ἀληθῶς ἀγαθὸν καὶ ἔμφρονα πάσας οἰόμεθα τὰς τύχας εὐσχημόνως φέρειν καὶ ἐκ τῶν ὑπαρχόντων ἀεὶ τὰ κάλλιστα πράττειν, καθάπερ καὶ στρατηγὸν ἀγαθὸν τῷ παρόντι στρατοπέδῳ χρῆσθαι πολεμικώτατα καὶ σκυτοτόμον ἐκ τῶν δοθέντων [5] σκυτῶν κάλλιστον ὑπόδημα ποιεῖν· τὸν αὐτὸν δὲ τρόπον καὶ τοὺς ἄλλους τεχνίτας ἅπαντας. εἰ δ' οὕτως, ἄθλιος μὲν οὐδέποτε γένοιτ' ἂν ὁ εὐδαίμων, οὐ μὴν μακάριός γε, ἂν Πριαμικαῖς τύχαις περιπέσῃ.

Οὐδὲ δὴ ποικίλος γε καὶ εὐμετάβολος· οὔτε γὰρ ἐκ τῆς εὐδαιμονίας κινηθήσεται ῥαδίως, [10] οὐδ' ὑπὸ τῶν τυχόντων ἀτυχημάτων ἀλλ' ὑπὸ μεγάλων καὶ πολλῶν, ἐκ τε τῶν τοιούτων οὐκ ἂν γένοιτο πάλιν εὐδαίμων ἐν ὀλίγῳ χρόνῳ, ἀλλ' εἵπερ, ἐν πολλῷ τινὶ καὶ τελείῳ, μεγάλων καὶ καλῶν ἐν αὐτῷ γενόμενος ἐπήβολος.

Τί οὖν κωλύει λέγειν εὐδαίμονα τὸν κατ' ἀρετὴν τελείαν [15] ἐνεργοῦντα καὶ τοῖς ἐκτὸς ἀγαθοῖς ἱκανῶς κεχορηγημένον μὴ τὸν τυχόντα χρόνον ἀλλὰ τέλειον βίον; ἢ προσθετέον καὶ βιωσόμενον οὕτω καὶ τελευτήσοντα κατὰ λόγον; ἐπειδὴ τὸ μέλλον ἀφανὲς ἡμῖν

ἐστίν, τὴν εὐδαιμονίαν δὲ τέλος καὶ τέλειον τίθεμεν πάντῃ πάντως. εἰ δ' οὕτω, μακαρίους ἐροῦμεν [20] τῶν ζώντων οἷς ὑπάρχει καὶ ὑπάρξει τὰ λεχθέντα, μακαρίους δ' ἀνθρώπους. καὶ περὶ μὲν τούτων ἐπὶ τοσοῦτον διωρίσθω.

Τὰς δὲ τῶν ἀπογόνων τύχας καὶ τῶν φίλων ἀπάντων τὸ μὲν μηδοτιοῦν συμβάλλεσθαι λίαν ἄφιλον φαίνεται καὶ ταῖς δόξαις ἐναντίον· πολλῶν δὲ καὶ παντοίας ἐχόντων διαφορὰς [25] τῶν συμβαινόντων, καὶ τῶν μὲν μᾶλλον συνικνουμένων τῶν δ' ἥττον, καθ' ἕκαστον μὲν διαιρεῖν μακρὸν καὶ ἀπέραντον φαίνεται, καθόλου δὲ λεχθὲν καὶ τύπῳ τάχ' ἂν ἱκανῶς ἔχοι. εἰ δὴ, καθάπερ καὶ τῶν περὶ αὐτὸν ἀτυχημάτων τὰ μὲν ἔχει τι βρῖθος καὶ ῥοπήν πρὸς τὸν βίον τὰ [30] δ' ἐλαφροτέροις ἔοικεν, οὕτω καὶ τὰ περὶ τοὺς φίλους ὁμοίως ἅπαντας, διαφέρει δὲ τῶν παθῶν ἕκαστον περὶ ζῶντας ἢ τελευτήσαντας συμβαίνειν πολὺ μᾶλλον ἢ τὰ παράνομα καὶ δεινὰ προϋπάρχειν ἐν ταῖς τραγωδίαις ἢ πράττεσθαι, συλλογιστέον δὴ καὶ ταύτην τὴν διαφοράν, μᾶλλον δ' ἴσως [35] τὸ διαπορεῖσθαι περὶ τοὺς κεκμηκότας εἴ τινος ἀγαθοῦ κοινωνοῦσιν ἢ τῶν ἀντικειμένων. 1101b [1] ἔοικε γὰρ ἐκ τούτων εἰ καὶ διικνεῖται πρὸς αὐτοὺς ὅτιοῦν, εἴτ' ἀγαθὸν εἴτε τοῦναντίον, ἀφαιρόν τι καὶ μικρὸν ἢ ἀπλῶς ἢ ἐκείνοις εἶναι, εἰ δὲ μή, τοσοῦτόν γε καὶ τοιοῦτον ὥστε μὴ ποιεῖν εὐδαίμονας τοὺς μὴ ὄντας [5] μηδὲ τοὺς ὄντας ἀφαιρεῖσθαι τὸ μακάριον. συμβάλλεσθαι μὲν οὖν τι φαίνονται τοῖς κεκμηκόσιν αἱ εὐπραξίαι τῶν φίλων, ὁμοίως δὲ καὶ αἱ δυσπραξίαι, τοιαῦτα δὲ καὶ τηλικαῦτα ὥστε μήτε τοὺς εὐδαίμονας μὴ εὐδαίμονας ποιεῖν μήτ' ἄλλο τῶν τοιούτων μηδέν.

[10] Διωρισμένων δὲ τούτων ἐπισκεψώμεθα περὶ τῆς εὐδαιμονίας πότερα τῶν ἐπαινετῶν ἐστίν ἢ μᾶλλον τῶν τιμίων· δῆλον γὰρ ὅτι τῶν γε δυνάμεων οὐκ ἔστιν. φαίνεται δὴ πᾶν τὸ ἐπαινετὸν τῷ ποιόν τι εἶναι καὶ πρὸς τι πῶς ἔχειν ἐπαινεῖσθαι· τὸν γὰρ δίκαιον καὶ τὸν ἀνδρεῖον καὶ ὅλως τὸν [15] ἀγαθόν τε καὶ τὴν ἀρετὴν ἐπαινοῦμεν διὰ τὰς πράξεις καὶ τὰ ἔργα, καὶ τὸν ἰσχυρὸν δὲ καὶ τὸν δρομικὸν καὶ τῶν ἄλλων ἕκαστον τῷ ποιόν τινα πεφυκέναι καὶ ἔχειν πῶς πρὸς ἀγαθόν τι καὶ σπουδαῖον. δῆλον δὲ τοῦτο καὶ ἐκ τῶν περὶ τοὺς θεοὺς ἐπαίνων· γελοῖοι γὰρ φαίνονται πρὸς ἡμᾶς ἀναφερόμενοι, [20] τοῦτο δὲ συμβαίνει διὰ τὸ γίνεσθαι τοὺς ἐπαίνους δι' ἀναφορᾶς, ὥσπερ εἵπομεν. εἰ δ' ἐστὶν ὁ ἔπαινος τῶν τοιούτων, δῆλον ὅτι τῶν ἀρίστων οὐκ ἔστιν ἔπαινος, ἀλλὰ μεῖζόν τι καὶ βέλτιον, καθάπερ καὶ φαίνεται·

τούς τε γὰρ θεοὺς μακαρίζομεν καὶ εὐδαιμονίζομεν καὶ τῶν ἀνδρῶν
τοὺς θειοτάτους [25] [μακαρίζομεν]. ὁμοίως δὲ καὶ τῶν ἀγαθῶν·
οὐδεὶς γὰρ τὴν εὐδαιμονίαν ἐπαινεῖ καθάπερ τὸ δίκαιον, ἀλλ' ὡς
θειότερόν τι καὶ βέλτιον μακαρίζει.

Δοκεῖ δὲ καὶ Εὐδόξος καλῶς συνηγορῆσαι περὶ τῶν ἀριστείων τῇ
ἡδονῇ· τὸ γὰρ μὴ ἐπαινέσθαι τῶν ἀγαθῶν οὕσαν μηνύειν ᾧτο ὅτι
κρεῖττόν ἐστι [30] τῶν ἐπαινετῶν, τοιοῦτον δ' εἶναι τὸν θεὸν καὶ
τάγαθόν· πρὸς ταῦτα γὰρ καὶ τᾶλλα ἀναφέρεσθαι. ὁ μὲν γὰρ ἔπαινος
τῆς ἀρετῆς· πρακτικοὶ γὰρ τῶν καλῶν ἀπὸ ταύτης· τὰ δ' ἐγκώμια
τῶν ἔργων ὁμοίως καὶ τῶν σωματικῶν καὶ τῶν ψυχικῶν. ἀλλὰ ταῦτα
μὲν ἴσως οἰκειότερον ἐξακριβοῦν [35] τοῖς περὶ τὰ ἐγκώμια
πεπονημένοις· ἡμῖν δὲ δηλὸν ἐκ τῶν εἰρημένων 1102a [1] ὅτι ἐστὶν ἡ
εὐδαιμονία τῶν τιμίων καὶ τελείων. ἔοικε δ' οὕτως ἔχειν καὶ διὰ τὸ
εἶναι ἀρχή· ταύτης γὰρ χάριν τὰ λοιπὰ πάντα πάντες πράττομεν, τὴν
ἀρχὴν δὲ καὶ τὸ αἴτιον τῶν ἀγαθῶν τίμιόν τι καὶ θεῖον τίθεμεν.

[5] Ἐπεὶ δ' ἐστὶν ἡ εὐδαιμονία ψυχῆς ἐνέργειά τις κατ' ἀρετὴν
τελείαν, περὶ ἀρετῆς ἐπισκεπτέον ἂν εἴη· τάχα γὰρ οὕτως ἂν βέλτιον
καὶ περὶ τῆς εὐδαιμονίας θεωρήσαιμεν. δοκεῖ δὲ καὶ ὁ κατ' ἀλήθειαν
πολιτικὸς περὶ ταύτην μάλιστα πεπονησθαι· βούλεται γὰρ τοὺς
πολίτας ἀγαθοὺς ποιεῖν καὶ τῶν [10] νόμων ὑπηκόους. παράδειγμα
δὲ τούτων ἔχομεν τοὺς Κρητῶν καὶ Λακεδαιμονίων νομοθέτας, καὶ
εἴ τινες ἕτεροι τοιοῦτοι γεγέννηται. εἰ δὲ τῆς πολιτικῆς ἐστὶν ἡ
σκέψις αὕτη, δηλὸν ὅτι γίνοιτ' ἂν ἡ ζήτησις κατὰ τὴν ἐξ ἀρχῆς
προαίρεσιν. περὶ ἀρετῆς δὲ ἐπισκεπτέον ἀνθρωπίνης δηλὸν ὅτι· καὶ
γὰρ τάγαθόν [15] ἀνθρώπινον ἐζητοῦμεν καὶ τὴν εὐδαιμονίαν
ἀνθρωπίνην. ἀρετὴν δὲ λέγομεν ἀνθρωπίνην οὐ τὴν τοῦ σώματος
ἀλλὰ τὴν τῆς ψυχῆς· καὶ τὴν εὐδαιμονίαν δὲ ψυχῆς ἐνέργειαν
λέγομεν. εἰ δὲ ταῦθ' οὕτως ἔχει, δηλὸν ὅτι δεῖ τὸν πολιτικὸν εἰδέναι
πὺς τὰ περὶ ψυχῆς, ὥσπερ καὶ τὸν ὀφθαλμοὺς θεραπεύσοντα [20]
καὶ πᾶν <τὸ> σῶμα, καὶ μᾶλλον ὅσῳ τιμιωτέρα καὶ βελτίων ἡ
πολιτικὴ τῆς ἱατρικῆς· τῶν δ' ἱατρῶν οἱ χαρίεντες πολλὰ
πραγματεύονται περὶ τὴν τοῦ σώματος γνῶσιν. θεωρητέον διὸ καὶ τῷ
πολιτικῷ περὶ ψυχῆς, θεωρητέον δὲ τούτων χάριν, καὶ ἐφ' ὅσον
ικανῶς ἔχει πρὸς τὰ ζητούμενα· [25] τὸ γὰρ ἐπὶ πλεῖον ἐξακριβοῦν
ἐργωδέστερον ἴσως ἐστὶ τῶν προκειμένων.

Λέγεται δὲ περὶ αὐτῆς καὶ ἐν τοῖς ἐξωτερικοῖς λόγοις ἀρκούντως
ἔνια, καὶ χρηστὸν αὐτοῖς· οἷον τὸ μὲν ἄλογον αὐτῆς εἶναι, τὸ δὲ

λόγον ἔχον. ταῦτα δὲ πότερον διώρισται καθάπερ τὰ τοῦ σώματος μόρια καὶ πᾶν τὸ [30] μεριστόν, ἢ τῷ λόγῳ δύο ἐστὶν ἀχώριστα πεφυκότα καθάπερ ἐν τῇ περιφερείᾳ τὸ κυρτὸν καὶ τὸ κοῦλον, οὐθὲν διαφέρει πρὸς τὸ παρόν.

Τοῦ ἀλόγου δὲ τὸ μὲν ἔοικε κοινῷ καὶ φυτικῷ, λέγω δὲ τὸ αἴτιον τοῦ τρέφεσθαι καὶ αὔξεσθαι· τὴν τοιαύτην γὰρ δύναμιν τῆς ψυχῆς ἐν ἅπασιν τοῖς τρεφομένοις θεΐη τις ἂν 1102b [1] καὶ ἐν τοῖς ἐμβρύοις, τὴν αὐτὴν δὲ ταύτην καὶ ἐν τοῖς τελείοις· εὐλογώτερον γὰρ ἢ ἄλλην τινά. ταύτης μὲν οὖν κοινὴ τις ἀρετὴ καὶ οὐκ ἀνθρωπίνη φαίνεται· δοκεῖ γὰρ ἐν τοῖς ὕπνοις ἐνεργεῖν μάλιστα τὸ μόριον τοῦτο καὶ [5] ἡ δύναμις αὕτη, ὃ δ' ἀγαθὸς καὶ κακὸς ἤκιστα διάδηλοι καθ' ὕπνον (ὅθεν φασὶν οὐδὲν διαφέρειν τὸ ἡμισυ τοῦ βίου τοὺς εὐδαίμονας τῶν ἀθλίων· συμβαίνει δὲ τοῦτο εἰκότως· ἀργία γὰρ ἐστὶν ὁ ὕπνος τῆς ψυχῆς ἣ λέγεται σπουδαία καὶ φαύλη), πλὴν εἰ μὴ κατὰ μικρὸν καὶ διικνουῦνται τινες τῶν κινήσεων, [10] καὶ ταύτῃ βελτίω γίνεται τὰ φαντάσματα τῶν ἐπιεικῶν ἢ τῶν τυχόντων. ἀλλὰ περὶ μὲν τούτων ἄλλως, καὶ τὸ θρεπτικὸν ἐατέον, ἐπειδὴ τῆς ἀνθρωπικῆς ἀρετῆς ἅμοιρον πέφυκεν.

Ἔοικε δὲ καὶ ἄλλη τις φύσις τῆς ψυχῆς ἄλογος εἶναι, μετέχουσα μέντοι πῃ λόγου. τοῦ γὰρ ἐγκρατοῦς καὶ ἀκρατοῦς τὸν [15] λόγον καὶ τῆς ψυχῆς τὸ λόγον ἔχον ἐπαινοῦμεν· ὁρθῶς γὰρ καὶ ἐπὶ τὰ βέλτιστα παρακαλεῖ· φαίνεται δ' ἐν αὐτοῖς καὶ ἄλλο τι παρὰ τὸν λόγον πεφυκός, ὃ μάχεται καὶ ἀντιτείνει τῷ λόγῳ. ἀτεχνῶς γὰρ καθάπερ τὰ παραλελυμένα τοῦ σώματος μόρια εἰς τὰ δεξιὰ προαιρουμένων κινῆσαι [20] τοῦναντίον εἰς τὰ ἀριστερὰ παραφέρεται, καὶ ἐπὶ τῆς ψυχῆς οὕτως· ἐπὶ τὰναντία γὰρ αἱ ὁρμαὶ τῶν ἀκρατῶν. ἀλλ' ἐν τοῖς σώμασι μὲν ὀρῶμεν τὸ παραφερόμενον, ἐπὶ δὲ τῆς ψυχῆς οὐχ ὀρῶμεν. ἴσως δ' οὐδὲν ἦττον καὶ ἐν τῇ ψυχῇ νομιστέον εἶναί τι παρὰ τὸν λόγον, ἐναντιούμενον τούτῳ καὶ ἀντιβαῖνον. [25] πῶς δ' ἕτερον, οὐδὲν διαφέρει. λόγου δὲ καὶ τοῦτο φαίνεται μετέχειν, ὥσπερ εἴπομεν· πειθαρχεῖ γοῦν τῷ λόγῳ τὸ τοῦ ἐγκρατοῦς — ἔτι δ' ἴσως εὐηκοώτερόν ἐστι τὸ τοῦ σώφρονος καὶ ἀνδρείου· πάντα γὰρ ὁμοφωνεῖ τῷ λόγῳ.

Φαίνεται δὲ καὶ τὸ ἄλογον διττόν. τὸ μὲν γὰρ φυτικὸν οὐδαμῶς κοινωνεῖ [30] λόγου, τὸ δ' ἐπιθυμητικὸν καὶ ὅλως ὀρεκτικὸν μετέχει πῶς, ἣ κατήκοόν ἐστιν αὐτοῦ καὶ πειθαρχικόν· οὕτω δὲ καὶ τοῦ πατρὸς καὶ τῶν φίλων φαιμέν ἔχειν λόγον, καὶ οὐχ ὥσπερ τῶν

μαθηματικῶν. ὅτι δὲ πείθεται πως ὑπὸ λόγου τὸ ἄλογον, μηνύει καὶ ἡ νοουθέντης καὶ πᾶσα ἐπιτίμησις τε καὶ παράκλησις. 1103a [1] εἰ δὲ χρὴ καὶ τοῦτο φάναι λόγον ἔχειν, διττὸν ἔσται καὶ τὸ λόγον ἔχον, τὸ μὲν κυρίως καὶ ἐν αὐτῷ, τὸ δ' ὥσπερ τοῦ πατρὸς ἀκουστικόν τι.

Διορίζεται δὲ καὶ ἡ ἀρετὴ κατὰ τὴν διαφορὰν ταύτην· λέγομεν γὰρ αὐτῶν τὰς [5] μὲν διανοητικὰς τὰς δὲ ἠθικάς, σοφίαν μὲν καὶ σύνεσιν καὶ φρόνησιν διανοητικὰς, ἐλευθεριότητα δὲ καὶ σωφροσύνην ἠθικάς. λέγοντες γὰρ περὶ τοῦ ἥθους οὐ λέγομεν ὅτι σοφὸς ἢ συνετὸς ἀλλ' ὅτι πρᾶος ἢ σώφρων· ἐπαινοῦμεν δὲ καὶ τὸν σοφὸν κατὰ τὴν ἕξιν· τῶν ἕξεων δὲ τὰς ἐπαινετὰς ἀρετὰς [10] λέγομεν.

Βιβλίο 2

Διττῆς δὴ τῆς ἀρετῆς οὐσης, τῆς μὲν διανοητικῆς τῆς [15] δὲ ἠθικῆς, ἡ μὲν διανοητικὴ τὸ πλεῖον ἐκ διδασκαλίας ἔχει καὶ τὴν γένεσιν καὶ τὴν αὐξησην, διόπερ ἐμπειρίας δεῖται καὶ χρόνου, ἡ δ' ἠθικὴ ἐξ ἔθους περιγίνεται, ὅθεν καὶ τοῦνομα ἔσχηκε μικρὸν παρεκκλῖνον ἀπὸ τοῦ ἔθους. ἐξ οὗ καὶ δῆλον ὅτι οὐδεμία τῶν ἠθικῶν ἀρετῶν φύσει ἡμῖν ἐγγίνεται· οὐθὲν [20] γὰρ τῶν φύσει ὄντων ἄλλως ἐθίζεται, οἷον ὁ λίθος φύσει κάτω φερόμενος οὐκ ἂν ἐθισθεῖ ἄνω φέρεσθαι, οὐδ' ἂν μυριάκις αὐτὸν ἐθίξῃ τις ἄνω ριπτῶν, οὐδὲ τὸ πῦρ κάτω, οὐδ' ἄλλο οὐδὲν τῶν ἄλλως πεφυκότων ἄλλως ἂν ἐθισθεῖ. οὕτ' ἄρα φύσει οὔτε παρὰ φύσιν ἐγγίνονται αἱ ἀρεταί, ἀλλὰ [25] πεφυκόσι μὲν ἡμῖν δέξασθαι αὐτάς, τελειούμενοις δὲ διὰ τοῦ ἔθους.

Ἔτι ὅσα μὲν φύσει ἡμῖν παραγίνεται, τὰς δυνάμεις τούτων πρότερον κοιμίζομεθα, ὕστερον δὲ τὰς ἐνεργείας ἀποδίδομεν (ὅπερ ἐπὶ τῶν αἰσθήσεων δῆλον· οὐ γὰρ ἐκ τοῦ πολλάκις ἰδεῖν ἢ πολλάκις ἀκοῦσαι τὰς αἰσθήσεις ἐλάβομεν, [30] ἀλλ' ἀνάπαλιν ἔχοντες ἐχρησάμεθα, οὐ χρησάμενοι ἔσχομεν)· τὰς δ' ἀρετὰς λαμβάνομεν ἐνεργήσαντες πρότερον, ὥσπερ καὶ ἐπὶ τῶν ἄλλων τεχνῶν· ἃ γὰρ δεῖ μαθόντας ποιεῖν, ταῦτα ποιοῦντες μαθάνομεν, οἷον οἰκοδομοῦντες οἰκοδόμοι γίνονται καὶ κιθαρίζοντες κιθαρισταί· 1103b [1] οὕτω δὴ καὶ τὰ μὲν δίκαια πράττοντες δίκαιοι γινόμεθα, τὰ δὲ σώφρονα σώφρονες, τὰ δ' ἀνδρεῖα ἀνδρεῖοι. Μαρτυρεῖ δὲ καὶ τὸ γινόμενον ἐν ταῖς πόλεσιν· οἱ γὰρ νομοθέται τοὺς πολίτας ἐθίζοντες ποιοῦσιν ἀγαθοὺς, καὶ τὸ μὲν βούλημα παντὸς νομοθέτου [5] τοῦτ' ἐστίν, ὅσοι δὲ μὴ εὖ αὐτὸ ποιοῦσιν ἀμαρτάνουσιν, καὶ διαφέρει τούτῳ πολιτεία πολιτείας ἀγαθὴ φαύλης.

Ἔτι ἐκ τῶν αὐτῶν καὶ διὰ τῶν αὐτῶν καὶ γίνεται πᾶσα ἀρετὴ καὶ φθείρεται, ὁμοίως δὲ καὶ τέχνη· ἐκ γὰρ τοῦ κιθαρίζειν καὶ οἱ ἀγαθοὶ καὶ κακοὶ γίνονται κιθαρισταί. ἀνάλογον [10] δὲ καὶ οἰκοδόμοι καὶ οἱ λοιποὶ πάντες· ἐκ μὲν γὰρ τοῦ εὖ οἰκοδομεῖν ἀγαθοὶ οἰκοδόμοι ἔσονται, ἐκ δὲ τοῦ κακῶς κακοί. εἰ γὰρ μὴ οὕτως εἶχεν, οὐδὲν ἂν ἔδει τοῦ διδάζοντος, ἀλλὰ πάντες ἂν ἐγίνοντο ἀγαθοὶ ἢ κακοί. οὕτω δὴ καὶ ἐπὶ τῶν ἀρετῶν ἔχει· πράττοντες γὰρ τὰ ἐν τοῖς συναλλάγμασι

[15] τοῖς πρὸς τοὺς ἀνθρώπους γινόμεθα οἱ μὲν δίκαιοι οἱ δὲ ἄδικοι, πράττοντες δὲ τὰ ἐν τοῖς δεινοῖς καὶ ἐθιζόμενοι φοβεῖσθαι ἢ θαρρῆναι οἱ μὲν ἀνδρεῖοι οἱ δὲ δειλοί. ὁμοίως δὲ καὶ τὰ περὶ τὰς ἐπιθυμίας ἔχει καὶ τὰ περὶ τὰς ὀργάς· οἱ μὲν γὰρ σώφρονες καὶ πρᾶοι γίνονται, οἱ δ' ἀκόλαστοι καὶ ὀργίλοι, [20] οἱ μὲν ἐκ τοῦ οὕτως ἐν αὐτοῖς ἀναστρέφεσθαι, οἱ δὲ ἐκ τοῦ οὕτως. καὶ ἐνὶ δὴ λόγῳ ἐκ τῶν ὁμοίων ἐνεργειῶν αἱ ἕξεις γίνονται. διὸ δεῖ τὰς ἐνεργείας ποιᾶς ἀποδιδόναι· κατὰ γὰρ τὰς τούτων διαφορὰς ἀκολουθοῦσιν αἱ ἕξεις. οὐ μικρὸν οὖν διαφέρει τὸ οὕτως ἢ οὕτως εὐθὺς ἐκ νέων ἐθίζεσθαι, [25] ἀλλὰ πάμπολυ, μᾶλλον δὲ τὸ πᾶν.

Ἐπεὶ οὖν ἡ παρούσα πραγματεία οὐ θεωρίας ἕνεκά ἐστιν ὥσπερ αἱ ἄλλαι (οὐ γὰρ ἵνα εἰδῶμεν τί ἐστιν ἡ ἀρετὴ σκεπτόμεθα, ἀλλ' ἵν' ἀγαθοὶ γενώμεθα, ἐπεὶ οὐδὲν ἂν ἦν ὄφελος αὐτῆς), ἀναγκαῖον ἐπισκέψασθαι τὰ περὶ τὰς [30] πράξεις, πῶς πρακτέον αὐτάς· αὗται γάρ εἰσι κύριαι καὶ τοῦ ποιᾶς γενέσθαι τὰς ἕξεις, καθάπερ εἰρήκαμεν. τὸ μὲν οὖν κατὰ τὸν ὀρθὸν λόγον πράττειν κοινὸν καὶ ὑποκείσθω — ῥηθήσεται δ' ὕστερον περὶ αὐτοῦ, καὶ τί ἐστιν ὁ ὀρθὸς λόγος, καὶ πῶς ἔχει πρὸς τὰς ἄλλας ἀρετάς. 1104a [1] ἐκεῖνο δὲ προδιομολογείσθω, ὅτι πᾶς ὁ περὶ τῶν πρακτῶν λόγος τύπῳ καὶ οὐκ ἀκριβῶς ὀφείλει λέγεσθαι, ὥσπερ καὶ κατ' ἀρχὰς εἵπομεν ὅτι κατὰ τὴν ὕλην οἱ λόγοι ἀπαιτητέοι· τὰ δ' ἐν ταῖς πράξεσι καὶ τὰ συμφέροντα οὐδὲν ἐστηκὸς ἔχει, ὥσπερ [5] οὐδὲ τὰ ὑγιεινά. τοιούτου δ' ὄντος τοῦ καθόλου λόγου, ἔτι μᾶλλον ὁ περὶ τῶν καθ' ἕκαστα λόγος οὐκ ἔχει τὰκριβές· οὔτε γὰρ ὑπὸ τέχνην οὔθ' ὑπὸ παραγγελίαν οὐδεμίαν πίπτει, δεῖ δ' αὐτοὺς ἀεὶ τοὺς πράττοντας τὰ πρὸς τὸν καιρὸν σκοπεῖν, ὥσπερ καὶ ἐπὶ τῆς ἱατρικῆς ἔχει καὶ τῆς [10] κυβερνητικῆς. ἀλλὰ καίπερ ὄντος τοιούτου τοῦ παρόντος λόγου πειρατέον βοηθεῖν. πρῶτον οὖν τοῦτο θεωρητέον, ὅτι τὰ τοιαῦτα πέφυκεν ὑπ' ἐνδείας καὶ ὑπερβολῆς φθείρεσθαι, (δεῖ γὰρ ὑπὲρ τῶν ἀφανῶν τοῖς φανεροῖς μαρτυρίοις χρῆσθαι) ὥσπερ ἐπὶ τῆς ἰσχύος καὶ τῆς ὑγείας ὀρῶμεν· [15] τὰ τε γὰρ ὑπερβάλλοντα γυμνάσια καὶ τὰ ἐλλείποντα φθείρει τὴν ἰσχύν, ὁμοίως δὲ καὶ τὰ ποτὰ καὶ τὰ σιτία πλείω καὶ ἐλάττω γινόμενα φθείρει τὴν ὑγίειαν, τὰ δὲ σύμμετρα καὶ ποιεῖ καὶ αὖξει καὶ σφάζει. οὕτως οὖν καὶ ἐπὶ σωφροσύνης καὶ ἀνδρείας ἔχει καὶ τῶν ἄλλων ἀρετῶν. [20] ὃ τε γὰρ πάντα φεύγων καὶ φοβούμενος καὶ μηδὲν ὑπομένων δειλὸς γίνεται, ὃ τε μηδὲν ὅλως

φοβούμενος ἀλλὰ πρὸς πάντα βαδίζων θρασύς· ὁμοίως δὲ καὶ ὁ μὲν πάσης ἡδονῆς ἀπολαύων καὶ μηδεμιᾶς ἀπεχόμενος ἀκόλαστος, ὁ δὲ πᾶσαν φεύγων, ὥσπερ οἱ ἄγροικοι, ἀναίσθητός [25] τις· φθείρεται δὴ σωφροσύνη καὶ ἡ ἀνδρεία ὑπὸ τῆς ὑπερβολῆς καὶ τῆς ἐλλείψεως, ὑπὸ δὲ τῆς μεσότητος σώζεται.

Ἀλλ' οὐ μόνον αἱ γενέσεις καὶ αὐξήσεις καὶ αἱ φθοραὶ ἐκ τῶν αὐτῶν καὶ ὑπὸ τῶν αὐτῶν γίνονται, ἀλλὰ καὶ αἱ ἐνέργειαι ἐν τοῖς αὐτοῖς ἔσονται· καὶ γὰρ ἐπὶ τῶν [30] ἄλλων τῶν φανερωτέρων οὕτως ἔχει, οἷον ἐπὶ τῆς ἰσχύος· γίνεται γὰρ ἐκ τοῦ πολλὴν τροφήν λαμβάνειν καὶ πολλοὺς πόνους ὑπομένειν, καὶ μάλιστα ἂν δύναται· αὐτὰ ποιεῖν ὁ ἰσχυρός. οὕτω δ' ἔχει καὶ ἐπὶ τῶν ἀρετῶν· ἔκ τε γὰρ τοῦ ἀπέχεσθαι τῶν ἡδονῶν γινόμεθα σώφρονες, καὶ γενόμενοι [35] μάλιστα δυνάμεθα ἀπέχεσθαι αὐτῶν· 1104b [1] ὁμοίως δὲ καὶ ἐπὶ τῆς ἀνδρείας· ἐπιζόμενοι γὰρ καταφρονεῖν τῶν φοβερῶν καὶ ὑπομένειν αὐτὰ γινόμεθα ἀνδρεῖοι, καὶ γενόμενοι μάλιστα δυνησόμεθα ὑπομένειν τὰ φοβερά.

Σημεῖον δὲ δεῖ ποιεῖσθαι τῶν ἕξεων τὴν ἐπιγινομένην ἡδονὴν ἢ λύπην [5] τοῖς ἔργοις· ὁ μὲν γὰρ ἀπεχόμενος τῶν σωματικῶν ἡδονῶν καὶ αὐτῷ τούτῳ χαίρων σώφρων, ὁ δ' ἀχθόμενος ἀκόλαστος, καὶ ὁ μὲν ὑπομένων τὰ δεινὰ καὶ χαίρων ἢ μὴ λυπούμενός γε ἀνδρεῖος, ὁ δὲ λυπούμενος δειλός. περὶ ἡδονὰς γὰρ καὶ λύπας ἐστὶν ἡ ἠθικὴ ἀρετὴ· διὰ μὲν γὰρ [10] τὴν ἡδονὴν τὰ φαῦλα πράττομεν, διὰ δὲ τὴν λύπην τῶν καλῶν ἀπεχόμεθα. διὸ δεῖ ἡχθᾶν πῶς εὐθὺς ἐκ νέων, ὥς ὁ Πλάτων φησὶν, ὥστε χαίρειν τε καὶ λυπεῖσθαι οἷς δεῖ· ἡ γὰρ ὀρθὴ παιδεία αὕτη ἐστίν.

Ἔτι δ' εἰ αἱ ἀρεταὶ εἰσι περὶ πράξεις καὶ πάθη, παντὶ δὲ πάθει καὶ πάσῃ πράξει ἔπεται [15] ἡδονὴ καὶ λύπη, καὶ διὰ τοῦτ' ἂν εἴη ἡ ἀρετὴ περὶ ἡδονὰς καὶ λύπας. μηνύουσι δὲ καὶ αἱ κολάσεις γινόμεναι διὰ τούτων· ἱατρεῖαι γὰρ τινές εἰσιν, αἱ δὲ ἱατρεῖαι διὰ τῶν ἐναντίων πεφύκασιν γίνεσθαι.

Ἔτι, ὥς καὶ πρόην εἶπομεν, πᾶσα ψυχῆς ἕξις, ὑφ' οἷων πέφυκε γίνεσθαι [20] χεῖρων καὶ βελτίων, πρὸς ταῦτα καὶ περὶ ταῦτα τὴν φύσιν ἔχει· δι' ἡδονὰς δὲ καὶ λύπας φαῦλοι γίνονται, τῷ διώκειν

ταύτας καὶ φεύγειν, ἢ ἅς μὴ δεῖ ἢ ὅτε οὐ δεῖ ἢ ὥς οὐ δεῖ ἢ ὅσαχῶς ἄλλως ὑπὸ τοῦ λόγου διορίζεται τὰ τοιαῦτα. διὸ καὶ ὀρίζονται τὰς ἀρετὰς ἀπαθείας τινὰς [25] καὶ ἡρεμίας· οὐκ εὖ δέ, ὅτι ἀπλῶς λέγουσιν, ἀλλ' οὐχ ὥς δεῖ καὶ ὥς οὐ δεῖ καὶ ὅτε, καὶ ὅσα ἄλλα προστίθεται. ὑπόκειται ἄρα ἡ ἀρετὴ εἶναι ἡ τοιαύτη περὶ ἡδονὰς καὶ λύπας τῶν βελτίστων πρακτικῇ, ἢ δὲ κακία τούναντίον.

Γένοιτο δ' ἂν ἡμῖν καὶ ἐκ τούτων φανερόν ὅτι περὶ τῶν [30] αὐτῶν. τριῶν γὰρ ὄντων τῶν εἰς τὰς αἰρέσεις καὶ τριῶν τῶν εἰς τὰς φυγὰς, καλοῦ συμφέροντος ἡδέος, καὶ [τριῶν] τῶν ἐναντίων, αἰσχροῦ βλαβεροῦ λυπηροῦ, περὶ ταῦτα μὲν πάντα ὁ ἀγαθὸς κατορθωτικός ἐστίν ὁ δὲ κακὸς ἀμαρτητικός, μάλιστα δὲ περὶ τὴν ἡδονήν· κοινὴ τε γὰρ αὕτη [35] τοῖς ζώοις, καὶ πᾶσι τοῖς ὑπὸ τὴν αἴρεσιν παρακολουθεῖ· 1105a [1] καὶ γὰρ τὸ καλὸν καὶ τὸ συμφέρον ἡδὺ φαίνεται.

Ἔτι δ' ἐκ νηπίου πᾶσιν ἡμῖν συντέθραπται· διὸ χαλεπὸν ἀποτρίψασθαι τοῦτο τὸ πάθος ἐγκεχρωσμένον τῷ βίῳ. κανονίζομεν δὲ καὶ τὰς πράξεις, οἳ μὲν μᾶλλον οἳ δ' ἥττον, [5] ἡδονῇ καὶ λύπῃ. διὰ τοῦτ' οὖν ἀναγκαῖον εἶναι περὶ ταῦτα τὴν πᾶσαν πραγματείαν· οὐ γὰρ μικρὸν εἰς τὰς πράξεις εὖ ἢ κακῶς χαίρειν καὶ λυπεῖσθαι.

Ἔτι δὲ χαλεπώτερον ἡδονῇ μάχεσθαι ἢ θυμῷ, καθάπερ φησὶν Ἡράκλειτος, περὶ δὲ τὸ χαλεπώτερον ἀεὶ καὶ τέχνη γίνεται καὶ ἀρετὴ· [10] καὶ γὰρ τὸ εὖ βέλτιον ἐν τούτῳ. ὥστε καὶ διὰ τοῦτο περὶ ἡδονὰς καὶ λύπας πᾶσα ἡ πραγματεία καὶ τῇ ἀρετῇ καὶ τῇ πολιτικῇ· ὁ μὲν γὰρ εὖ τούτοις χρώμενος ἀγαθὸς ἔσται, ὁ δὲ κακῶς κακός.

Ὅτι μὲν οὖν ἐστὶν ἡ ἀρετὴ περὶ ἡδονὰς καὶ λύπας, καὶ ὅτι ἐξ ὧν γίνεται, ὑπὸ τούτων καὶ αὖξεται [15] καὶ φθείρεται μὴ ὡσαύτως γινομένων, καὶ ὅτι ἐξ ὧν ἐγένετο, περὶ ταῦτα καὶ ἐνεργεῖ, εἰρήσθω.

Ἀπορήσειε δ' ἂν τις πῶς λέγομεν ὅτι δεῖ τὰ μὲν δίκαια πράττοντας δικαίους γίνεσθαι, τὰ δὲ σώφρονα σώφρονας· εἰ γὰρ πράττουσι τὰ δίκαια καὶ σώφρονα, [20] ἤδη εἰσὶ δίκαιοι καὶ σώφρονες, ὥσπερ εἰ τὰ γραμματικὰ καὶ τὰ μουσικὰ, γραμματικοὶ καὶ μουσικοί. ἢ οὐδ' ἐπὶ τῶν τεχνῶν οὕτως ἔχει; ἐνδέχεται γὰρ γραμματικόν τι ποιῆσαι καὶ

ἀπὸ τύχης καὶ ἄλλου ὑποθεμένου. τότε οὖν ἔσται γραμματικός, ἐὰν καὶ γραμματικόν τι ποιήσῃ καὶ [25] γραμματικῶς· τοῦτο δ' ἐστὶ τὸ κατὰ τὴν ἐν αὐτῷ γραμματικὴν.

Ἔτι οὐδ' ὅμοιον ἐστὶν ἐπὶ τε τῶν τεχνῶν καὶ τῶν ἀρετῶν· τὰ μὲν γὰρ ὑπὸ τῶν τεχνῶν γινόμενα τὸ εὖ ἔχει ἐν αὐτοῖς· ἀρκεῖ οὖν ταῦτα πῶς ἔχοντα γενέσθαι· τὰ δὲ κατὰ τὰς ἀρετὰς γινόμενα οὐκ ἐὰν αὐτὰ πῶς ἔχῃ, δικαίως [30] ἢ σωφρόνως πράττεται, ἀλλὰ καὶ ἐὰν ὁ πράττων πῶς ἔχων πράττῃ, πρῶτον μὲν ἐὰν εἰδῶς, ἔπειτ' ἐὰν προαιρούμενος, καὶ προαιρούμενος δι' αὐτά, τὸ δὲ τρίτον ἐὰν καὶ βεβαίως καὶ ἀμετακινήτως ἔχων πράττῃ.

1105b [1] Ταῦτα δὲ πρὸς μὲν τὸ τὰς ἄλλας τέχνας ἔχειν οὐ συναριθμεῖται, πλὴν αὐτὸ τὸ εἰδέναι· πρὸς δὲ τὸ τὰς ἀρετὰς τὸ μὲν εἰδέναι οὐδὲν ἢ μικρὸν ἰσχύει, τὰ δ' ἄλλα οὐ μικρὸν ἀλλὰ τὸ πᾶν δύναται, ἅπερ ἐκ τοῦ πολλάκις πράττειν τὰ δίκαια καὶ [5] σῶφρονα περιγίνεται.

Τὰ μὲν οὖν πράγματα δίκαια καὶ σῶφρονα λέγεται, ὅταν ἢ τοιαῦτα οἶα ἂν ὁ δίκαιος ἢ ὁ σῶφρων πράξειεν· δίκαιος δὲ καὶ σῶφρων ἐστὶν οὐχ ὁ ταῦτα πράττων, ἀλλὰ καὶ [ὁ] οὕτω πράττων ὡς οἱ δίκαιοι καὶ σῶφρονες πράττουσιν. εὖ οὖν λέγεται ὅτι ἐκ τοῦ τὰ δίκαια πράττειν [10] ὁ δίκαιος γίνεται καὶ ἐκ τοῦ τὰ σῶφρονα ὁ σῶφρων· ἐκ δὲ τοῦ μὴ πράττειν ταῦτα οὐδεὶς ἂν οὐδὲ μελλήσῃε γίνεσθαι ἀγαθός.

Ἀλλ' οἱ πολλοὶ ταῦτα μὲν οὐ πράττουσιν, ἐπὶ δὲ τὸν λόγον καταφεύγοντες οἶονται φιλοσοφεῖν καὶ οὕτως ἔσεσθαι σπουδαῖοι, ὅμοιον τι ποιοῦντες τοῖς [15] κάμνουσιν, οἱ τῶν ἰατρῶν ἀκούουσι μὲν ἐπιμελῶς, ποιοῦσι δ' οὐδὲν τῶν προσταττομένων. ὥσπερ οὖν οὐδ' ἐκεῖνοι εὖ ἔξουσι τὸ σῶμα οὕτω θεραπευόμενοι, οὐδ' οὗτοι τὴν ψυχὴν οὕτω φιλοσοφοῦντες.

Μετὰ δὲ ταῦτα τί ἐστὶν ἡ ἀρετὴ σκεπτέον. ἐπεὶ οὖν [20] τὰ ἐν τῇ ψυχῇ γινόμενα τρία ἐστί, πάθη δυνάμεις ἑξεις, τούτων ἂν τι εἴῃ ἡ ἀρετὴ. λέγω δὲ πάθη μὲν ἐπιθυμίαν ὀργὴν φόβον θάρσος φθόνον χαρὰν φιλίαν μῖσος πόθον ζῆλον ἔλεον, ὅλως οἷς ἔπεται ἡδονὴ ἢ

λύπη· δυνάμεις δὲ καθ' ἃς παθητικοὶ τούτων λεγόμεθα, οἷον καθ' ἃς δυνατοὶ [25] ὀργισθῆναι ἢ λυπηθῆναι ἢ ἐλεῆσαι· ἔξεις δὲ καθ' ἃς πρὸς τὰ πάθη ἔχομεν εὖ ἢ κακῶς, οἷον πρὸς τὸ ὀργισθῆναι, εἰ μὲν σφοδρῶς ἢ ἀναιμμένως, κακῶς ἔχομεν, εἰ δὲ μέσως, εὖ· ὁμοίως δὲ καὶ πρὸς τὰλλα.

Πάθη μὲν οὖν οὐκ εἰσὶν οὐθ' αἱ ἀρεταὶ οὐθ' αἱ κακίαι, ὅτι οὐ λεγόμεθα [30] κατὰ τὰ πάθη σπουδαῖοι ἢ φαῦλοι, κατὰ δὲ τὰς ἀρετὰς καὶ τὰς κακίας λεγόμεθα, καὶ ὅτι κατὰ μὲν τὰ πάθη οὐτ' ἐπαινούμεθα οὔτε ψεγόμεθα (οὐ γὰρ ἐπαινεῖται ὁ φοβούμενος οὐδὲ ὁ ὀργιζόμενος, οὐδὲ ψέγεται ὁ ἀπλῶς ὀργιζόμενος ἀλλ' ὁ πῶς), 1106a [1] κατὰ δὲ τὰς ἀρετὰς καὶ τὰς κακίας ἐπαινούμεθα ἢ ψεγόμεθα.

Ἔτι ὀργιζόμεθα μὲν καὶ φοβούμεθα ἀπροαιρέτως, αἱ δ' ἀρεταὶ προαιρέσεις τινὲς ἢ οὐκ ἄνευ προαιρέσεως. πρὸς δὲ τούτοις κατὰ μὲν τὰ πάθη [5] κινεῖσθαι λεγόμεθα, κατὰ δὲ τὰς ἀρετὰς καὶ τὰς κακίας οὐ κινεῖσθαι ἀλλὰ διακεῖσθαι πῶς.

Διὰ ταῦτα δὲ οὐδὲ δυνάμεις εἰσὶν· οὔτε γὰρ ἀγαθοὶ λεγόμεθα τῷ δύνασθαι πάσχειν ἀπλῶς οὔτε κακοὶ, οὐτ' ἐπαινούμεθα οὔτε ψεγόμεθα· ἔτι δυνατοὶ μὲν ἐσμεν φύσει, ἀγαθοὶ δὲ ἢ κακοὶ [10] οὐ γινόμεθα φύσει· εἶπομεν δὲ περὶ τούτου πρότερον. εἰ οὖν μήτε πάθη εἰσὶν αἱ ἀρεταὶ μήτε δυνάμεις, λείπεται ἔξεις αὐτὰς εἶναι.

Ὅ τι μὲν οὖν ἐστὶ τῷ γένει ἡ ἀρετή, εἴρηται.

Δεῖ δὲ μὴ μόνον οὕτως εἰπεῖν, ὅτι ἔξις, ἀλλὰ καὶ [15] ποία τις. ῥητέον οὖν ὅτι πᾶσα ἀρετή, οὗ ἂν ἡ ἀρετή, αὐτό τε εὖ ἔχον ἀποτελεῖ καὶ τὸ ἔργον αὐτοῦ εὖ ἀποδίδωσιν, οἷον ἡ τοῦ ὀφθαλμοῦ ἀρετὴ τόν τε ὀφθαλμόν σπουδαῖον ποιεῖ καὶ τὸ ἔργον αὐτοῦ· τῇ γὰρ τοῦ ὀφθαλμοῦ ἀρετῇ εὖ ὁρῶμεν. ὁμοίως ἡ τοῦ ἵππου ἀρετὴ ἵππον τε [20] σπουδαῖον ποιεῖ καὶ ἀγαθὸν δραμεῖν καὶ ἐνεγκεῖν τὸν ἐπιβάτην καὶ μεῖναι τοὺς πολεμίους. εἰ δὴ τοῦτ' ἐπὶ πάντων οὕτως ἔχει, καὶ ἡ τοῦ ἀνθρώπου ἀρετὴ εἴη ἂν ἡ ἔξις ἀφ' ἧς ἀγαθὸς ἄνθρωπος γίνεται καὶ ἀφ' ἧς εὖ τὸ ἐαυτοῦ ἔργον ἀποδώσει.

Πῶς δὲ τοῦτ' ἔσται, ἥδη μὲν εἰρήκαμεν, ἔτι [25] δὲ καὶ ὧδ' ἔσται

φανερόν, ἐὰν θεωρήσωμεν ποία τίς ἐστίν ἡ φύσις αὐτῆς. ἐν παντί δὴ συνεχεῖ καὶ διαιρετῶ ἔστι λαβεῖν τὸ μὲν πλεῖον τὸ δ' ἔλαττον τὸ δ' ἴσον, καὶ ταῦτα ἢ κατ' αὐτὸ τὸ πρᾶγμα ἢ πρὸς ἡμᾶς· τὸ δ' ἴσον μέσον τι ὑπερβολῆς καὶ ἐλλείψεως. λέγω δὲ τοῦ μὲν πράγματος [30] μέσον τὸ ἴσον ἀπέχον ἀφ' ἑκατέρου τῶν ἄκρων, ὅπερ ἐστὶν ἐν καὶ τὸ αὐτὸ πᾶσιν, πρὸς ἡμᾶς δὲ ὁ μήτε πλεονάζει μήτε ἐλλείπει· τοῦτο δ' οὐχ ἓν, οὐδὲ ταὐτὸν πᾶσιν. οἷον εἰ τὰ δέκα πολλὰ τὰ δὲ δύο ὀλίγα, τὰ ἕξ μέσα λαμβάνουσι κατὰ τὸ πρᾶγμα· ἴσῳ γὰρ ὑπερέχει τε καὶ [35] ὑπερέχεται· τοῦτο δὲ μέσον ἐστὶ κατὰ τὴν ἀριθμητικὴν ἀναλογίαν. τὸ δὲ πρὸς ἡμᾶς οὐχ οὕτω ληπτέον· 1106b [1] οὐ γὰρ εἴ τῳ δέκα μναῖ φαγεῖν πολὺ δύο δὲ ὀλίγον, ὁ ἀλείπτῃς ἕξ μναῖς προστάξει· ἐστὶ γὰρ ἴσως καὶ τοῦτο πολὺ τῷ ληψομένῳ ἢ ὀλίγον· Μίλωνι μὲν γὰρ ὀλίγον, τῷ δὲ ἀρχομένῳ τῶν γυμνασίων πολὺ. ὁμοίως ἐπὶ δρόμου καὶ [5] πάλης. οὕτω δὴ πᾶς ἐπιστήμων τὴν ὑπερβολὴν μὲν καὶ τὴν ἔλλειψιν φεύγει, τὸ δὲ μέσον ζητεῖ καὶ τοῦθ' αἰρεῖται, μέσον δὲ οὐ τὸ τοῦ πράγματος ἀλλὰ τὸ πρὸς ἡμᾶς.

Εἰ δὴ πᾶσα ἐπιστήμη οὕτω τὸ ἔργον εὖ ἐπιτελεῖ, πρὸς τὸ μέσον βλέπουσα καὶ εἰς τοῦτο ἄγουσα τὰ ἔργα (ὅθεν εἰώθασιν [10] ἐπιλέγειν τοῖς εὖ ἔχουσιν ἔργοις ὅτι οὕτ' ἀφελεῖν ἔστιν οὔτε προσθεῖναι, ὡς τῆς μὲν ὑπερβολῆς καὶ τῆς ἐλλείψεως φθειρούσης τὸ εὖ, τῆς δὲ μεσότητος σφάζουσας, οἱ δ' ἀγαθοὶ τεχνῖται, ὡς λέγομεν, πρὸς τοῦτο βλέποντες ἐργάζονται)· ἢ δ' ἀρετὴ πάσης τέχνης ἀκριβεστέρα καὶ [15] ἀμείνων ἐστὶν ὥσπερ καὶ ἡ φύσις, τοῦ μέσου ἂν εἴη στοχαστική. λέγω δὲ τὴν ἠθικὴν· αὕτη γάρ ἐστι περὶ πάθη καὶ πράξεις, ἐν δὲ τούτοις ἔστιν ὑπερβολὴ καὶ ἔλλειψις καὶ τὸ μέσον. οἷον καὶ φοβηθῆναι καὶ θαρρῆσαι καὶ ἐπιθυμῆσαι καὶ ὀργισθῆναι καὶ ἐλεῆσαι καὶ ὅλως ἡσθῆναι [20] καὶ λυπηθῆναι ἔστι καὶ μᾶλλον καὶ ἥττον, καὶ ἀμφοτέρωθεν οὐκ εὖ· τὸ δ' ὅτε δεῖ καὶ ἐφ' οἷς καὶ πρὸς οὓς καὶ οὗ ἕνεκα καὶ ὡς δεῖ, μέσον τε καὶ ἄριστον, ὅπερ ἐστὶ τῆς ἀρετῆς. ὁμοίως δὲ καὶ περὶ τὰς πράξεις ἔστιν ὑπερβολὴ καὶ ἔλλειψις καὶ τὸ μέσον. ἢ δ' ἀρετὴ περὶ πάθη καὶ [25] πράξεις ἐστίν, ἐν οἷς ἢ μὲν ὑπερβολὴ ἀμαρτάνεται καὶ ἡ ἔλλειψις [ψέγεται], τὸ δὲ μέσον ἐπαινεῖται καὶ κατορθοῦται· ταῦτα δ' ἄμφω τῆς ἀρετῆς. μεσότης τις ἄρα ἐστὶν ἡ ἀρετὴ, στοχαστικὴ γε οὕσα τοῦ μέσου.

Ἔτι τὸ μὲν ἀμαρτάνειν πολλαχῶς ἔστιν (τὸ γὰρ κακὸν τοῦ

ἀπείρου, ὥς οἱ [30] Πυθαγόρειοι εἵκαζον, τὸ δ' ἀγαθὸν τοῦ πεπερασμένου), τὸ δὲ κατορθοῦν μοναχῶς (διὸ καὶ τὸ μὲν ῥάδιον τὸ δὲ χαλεπὸν, ῥάδιον μὲν τὸ ἀποτυχεῖν τοῦ σκοποῦ, χαλεπὸν δὲ τὸ ἐπιτυχεῖν)· καὶ διὰ ταῦτ' οὖν τῆς μὲν κακίας ἢ ὑπερβολῇ καὶ ἢ ἔλλειψις, τῆς δ' ἀρετῆς ἢ μεσότης·

[35] ἐσθλοὶ μὲν γὰρ ἀπλῶς, παντοδαπῶς δὲ κακοί.

Anon.

ἔστιν ἄρα ἡ ἀρετὴ ἕξις προαιρετικὴ, ἐν μεσότητι οὖσα τῇ πρὸς ἡμᾶς, 1107a [1] ὠρισμένη λόγῳ καὶ ᾧ ἂν ὁ φρόνιμος ὀρίσειεν. μεσότης δὲ δύο κακιῶν, τῆς μὲν καθ' ὑπερβολὴν τῆς δὲ κατ' ἔλλειψιν· καὶ ἔτι τῷ τὰς μὲν ἐλλείπειν τὰς δ' ὑπερβάλλειν τοῦ δέοντος ἐν τε τοῖς πάθεσι καὶ ἐν [5] ταῖς πράξεσι, τὴν δ' ἀρετὴν τὸ μέσον καὶ εὐρίσκειν καὶ αἰρεῖσθαι. διὸ κατὰ μὲν τὴν οὐσίαν καὶ τὸν λόγον τὸν τὸ τί ἦν εἶναι λέγοντα μεσότης ἐστὶν ἡ ἀρετὴ, κατὰ δὲ τὸ ἄριστον καὶ τὸ εὖ ἀκρότης.

Οὐ πᾶσα δ' ἐπιδέχεται πρᾶξις οὐδὲ πᾶν πάθος τὴν μεσότητα· ἕνια γὰρ εὐθὺς ὠνόμασται [10] συνειλημμένα μετὰ τῆς φαυλότητος, οἷον ἐπιχαιρεκακία ἀναισχυντία φθόνος, καὶ ἐπὶ τῶν πράξεων μοιχεία κλοπὴ ἀνδροφονία· πάντα γὰρ ταῦτα καὶ τὰ τοιαῦτα λέγεται τῷ αὐτὰ φαῦλα εἶναι, ἀλλ' οὐχ αἱ ὑπερβολαὶ αὐτῶν οὐδ' αἱ ἐλλείψεις. οὐκ ἔστιν οὖν οὐδέποτε περὶ αὐτὰ κατορθοῦν, [15] ἀλλ' αἰεὶ ἀμαρτάνειν· οὐδ' ἔστι τὸ εὖ ἢ μὴ εὖ περὶ τὰ τοιαῦτα ἐν τῷ ἦν δεῖ καὶ ὅτε καὶ ὥς μοιχεύειν, ἀλλ' ἀπλῶς τὸ ποιεῖν ὅτιοῦν τούτων ἀμαρτάνειν ἐστίν. ὅμοιον οὖν τὸ ἀξιοῦν καὶ περὶ τὸ ἀδικεῖν καὶ δειλαίνειν καὶ ἀκολασταίνειν εἶναι μεσότητα καὶ ὑπερβολὴν καὶ ἔλλειψιν· [20] ἔσται γὰρ οὕτω γε ὑπερβολῆς καὶ ἐλλείψεως μεσότης καὶ ὑπερβολῆς ὑπερβολὴ καὶ ἔλλειψις ἐλλείψεως. ὥπερ δὲ σωφροσύνης καὶ ἀνδρείας οὐκ ἔστιν ὑπερβολὴ καὶ ἔλλειψις διὰ τὸ τὸ μέσον εἶναι πως ἄκρον, οὕτως οὐδ' ἐκείνων μεσότης οὐδ' ὑπερβολὴ καὶ ἔλλειψις, ἀλλ' ὥς ἂν [25] πρᾶττηται ἀμαρτάνεται· ὅλως γὰρ οὐθ' ὑπερβολῆς καὶ ἐλλείψεως μεσότης ἔστιν, οὔτε μεσότητος ὑπερβολὴ καὶ ἔλλειψις.

Δεῖ δὲ τοῦτο μὴ μόνον καθόλου λέγεσθαι, ἀλλὰ καὶ τοῖς καθ' ἕκαστα ἐφαρμόττειν. ἐν γὰρ τοῖς περὶ τὰς [30] πράξεις λόγοις οἱ μὲν καθόλου κοινότεροί εἰσιν, οἱ δ' ἐπὶ μέρους ἀληθινώτεροι· περὶ γὰρ τὰ καθ' ἕκαστα αἱ πράξεις, δέον δ' ἐπὶ τούτων συμφωνεῖν. ληπτέον οὖν ταῦτα ἐκ τῆς διαγραφῆς. περὶ μὲν οὖν φόβους καὶ θάρρη ἀνδρεία μεσότης· 1107b [1] τῶν δ' ὑπερβαλλόντων ὁ μὲν τῇ ἀφοβίᾳ ἀνώνυμος (πολλὰ δ' ἐστὶν ἀνώνυμα), ὁ δ' ἐν τῷ θαρρῆν ὑπερβάλλον θρασύς, ὁ δ' ἐν τῷ μὲν φοβεῖσθαι ὑπερβάλλον τῷ δὲ θαρρῆν ἐλλείπων δειλός. περὶ ἡδονὰς δὲ καὶ λύπας — οὐ [5] πάσας, ἦττον δὲ “καὶ” περὶ τὰς λύπας — μεσότης μὲν σωφροσύνη, ὑπερβολὴ δὲ ἀκολασία. ἐλλείποντες δὲ περὶ τὰς ἡδονὰς οὐ πάνυ γίνονται· διόπερ οὐδ' ὀνόματος τετυχήκασιν οὐδ' οἱ τοιοῦτοι, ἔστωσαν δὲ ἀναίσθητοι.

Περὶ δὲ δόσιν χρημάτων καὶ λῆψιν μεσότης μὲν ἐλευθεριότης, ὑπερβολὴ [10] δὲ καὶ ἔλλειψις ἀσωτία καὶ ἀνελευθερία. ἐναντίως δ' ἐν αὐταῖς ὑπερβάλλουσι καὶ ἐλλείπουσιν· ὁ μὲν γὰρ ἄσωτος ἐν μὲν προέσει ὑπερβάλλει ἐν δὲ λήψει ἐλλείπει, ὁ δ' ἀνελεύθερος ἐν μὲν λήψει ὑπερβάλλει ἐν δὲ προέσει ἐλλείπει. νῦν μὲν οὖν τύπῳ καὶ ἐπὶ κεφαλαίου λέγομεν, [15] ἀρκούμενοι αὐτῷ τούτῳ· ὕστερον δὲ ἀκριβέστερον περὶ αὐτῶν διορισθήσεται. περὶ δὲ χρήματα καὶ ἄλλαι διαθέσεις εἰσὶ, μεσότης μὲν μεγαλοπρέπεια (ὁ γὰρ μεγαλοπρεπὴς διαφέρει ἐλευθερίου· ὁ μὲν γὰρ περὶ μεγάλα, ὁ δὲ περὶ μικρά), ὑπερβολὴ δὲ ἀπειροκαλία καὶ βαναυσία, ἔλλειψις [20] δὲ μικροπρέπεια· διαφέρουσι δ' αὗται τῶν περὶ τὴν ἐλευθεριότητα, πῇ δὲ διαφέρουσιν, ὕστερον ρηθήσεται. περὶ δὲ τιμὴν καὶ ἀτιμίαν μεσότης μὲν μεγαλοψυχία, ὑπερβολὴ δὲ χαυνότης τις λεγομένη, ἔλλειψις δὲ μικροψυχία· ὥς δ' ἐλέγομεν ἔχειν πρὸς τὴν μεγαλοπρέπειαν τὴν ἐλευθεριότητα, [25] <τῷ> περὶ μικρὰ διαφέρουσιν, οὕτως ἔχει τις καὶ πρὸς τὴν μεγαλοψυχίαν, περὶ τιμὴν οὕσαν μεγάλην, αὕτη περὶ μικρὰν οὕσα· ἔστι γὰρ ὥς δεῖ ὀρέγεσθαι τιμῆς καὶ μᾶλλον ἢ δεῖ καὶ ἦττον, λέγεται δ' ὁ μὲν ὑπερβάλλον ταῖς ὀρέξεσι φιλότιμος, ὁ δ' ἐλλείπων ἀφιλότιμος, ὁ δὲ [30] μέσος ἀνώνυμος. ἀνώνυμοι δὲ καὶ αἱ διαθέσεις, πλὴν ἡ τοῦ φιλοτίμου φιλοτιμία. ὅθεν ἐπιδικάζονται οἱ ἄκροι τῆς μέσης χώρας· καὶ ἡμεῖς δὲ ἔστι μὲν ὅτε τὸν μέσον φιλότιμον καλοῦμεν ἔστι δ' ὅτε ἀφιλότιμον, 1108a [1] καὶ ἔστι μὲν ὅτε ἐπαινοῦμεν τὸν φιλότιμον

ἔστι δ' ὅτε τὸν ἀφιλότιμον. διὰ τίνα δ' αἰτίαν τοῦτο ποιούμεν, ἐν τοῖς ἐξῆς ῥηθήσεται· νῦν δὲ περὶ τῶν λοιπῶν λέγωμεν κατὰ τὸν ὑφηγημένον τρόπον.

Ἔστι δὲ καὶ περὶ τὴν ὀργὴν ὑπερβολὴ καὶ ἔλλειψις καὶ [5] μεσότης, σχεδὸν δὲ ἀνωνύμων ὄντων αὐτῶν τὸν μέσον πρᾶον λέγοντες τὴν μεσότητα πραότητα καλέσωμεν· τῶν δ' ἄκρων ὁ μὲν ὑπερβάλλον ὀργίλος ἔστω, ἡ δὲ κακία ὀργιλότης, ὁ δ' ἐλλείπων ἀόρηγτός τις, ἡ δ' ἔλλειψις ἀορηγσία.

Εἰσὶ δὲ καὶ ἄλλαι τρεῖς μεσότητες, ἔχουσαι μὲν [10] τινα ὁμοιότητα πρὸς ἀλλήλας, διαφέρουσαι δ' ἀλλήλων· πᾶσαι μὲν γὰρ εἰσι περὶ λόγων καὶ πράξεων κοινωνίαν, διαφέρουσι δὲ ὅτι ἡ μὲν ἐστὶ περὶ τάληθές τὸ ἐν αὐτοῖς, αἱ δὲ περὶ τὸ ἡδύ· τούτου δὲ τὸ μὲν ἐν παιδιᾷ τὸ δ' ἐν πᾶσι τοῖς κατὰ τὸν βίον. ῥητέον οὖν καὶ περὶ τούτων, ἵνα [15] μᾶλλον κατίδωμεν ὅτι ἐν πᾶσιν ἡ μεσότης ἐπαινετόν, τὰ δ' ἄκρα οὐτ' ἐπαινετὰ οὐτ' ὀρθὰ ἀλλὰ ψεκτά. εἰσὶ μὲν οὖν καὶ τούτων τὰ πλείω ἀνώνυμα, πειρατέον δ', ὥσπερ καὶ ἐπὶ τῶν ἄλλων, αὐτοὺς ὀνοματοποιεῖν σαφηνείας ἕνεκα καὶ τοῦ εὐπαρακολουθήτου. περὶ μὲν οὖν τὸ ἀληθές [20] ὁ μὲν μέσος ἀληθής τις καὶ ἡ μεσότης ἀλήθεια λεγέσθω, ἡ δὲ προσποιήσις ἡ μὲν ἐπὶ τὸ μεῖζον ἀλαζονεία καὶ ὁ ἔχων αὐτὴν ἀλαζών, ἡ δ' ἐπὶ τὸ ἔλαττον εἰρωνεία καὶ εἴρων <ὁ ἔχων>. περὶ δὲ τὸ ἡδύ τὸ μὲν ἐν παιδιᾷ ὁ μὲν μέσος εὐτράπελος καὶ ἡ διάθεσις εὐτραπελία, ἡ δ' ὑπερβολὴ βωμολοχία [25] καὶ ὁ ἔχων αὐτὴν βωμολόχος, ὁ δ' ἐλλείπων ἄγροικός τις καὶ ἡ ἕξις ἀγροικία· περὶ δὲ τὸ λοιπὸν ἡδύ τὸ ἐν τῷ βίῳ ὁ μὲν ὡς δεῖ ἡδὺς ὢν φίλος καὶ ἡ μεσότης φιλία, ὁ δ' ὑπερβάλλον, εἰ μὲν οὐδενὸς ἕνεκα, ἄρεσκος, εἰ δ' ὠφελείας τῆς αὐτοῦ, κόλαξ, ὁ δ' ἐλλείπων [30] καὶ ἐν πᾶσιν ἀηδὴς δύσερίς τις καὶ δύσκολος.

Εἰσὶ δὲ καὶ ἐν τοῖς παθήμασι καὶ περὶ τὰ πάθη μεσότητες· ἡ γὰρ αἰδὼς ἀρετὴ μὲν οὐκ ἔστιν, ἐπαινεῖται δὲ καὶ ὁ αἰδήμων. καὶ γὰρ ἐν τούτοις ὁ μὲν λέγεται μέσος, ὁ δ' ὑπερβάλλον, ὡς ὁ καταπλήξ ὁ πάντα αἰδούμενος· ὁ δ' ἐλλείπων [35] ἢ μηδὲν ὅλως ἀναίσχυντος, ὁ δὲ μέσος αἰδήμων. 1108b [1] νέμεσις δὲ μεσότης φθόνου καὶ ἐπιχαιρεκακίας, εἰσὶ δὲ περὶ λύπην καὶ ἡδονὴν τὰς ἐπὶ τοῖς συμβαίνουσι τοῖς πέλας γινομένας· ὁ μὲν γὰρ νεμεσητικὸς λυπεῖται

ἐπὶ τοῖς ἀναξίως εὖ πράττουσιν, ὁ δὲ φθονερός ὑπερβάλλων τοῦτον ἐπὶ [5] πᾶσι λυπεῖται, ὁ δ' ἐπιχαιρέκακος τοσοῦτον ἐλλείπει τοῦ λυπεῖσθαι ὥστε καὶ χαίρειν. ἀλλὰ περὶ μὲν τούτων καὶ ἄλλοθι καιρὸς ἔσται· περὶ δὲ δικαιοσύνης, ἐπεὶ οὐχ ἀπλῶς λέγεται, μετὰ ταῦτα διελόμενοι περὶ ἐκατέρας ἐροῦμεν πῶς μεσότητές εἰσιν· ὁμοίως δὲ καὶ περὶ τῶν λογικῶν [10] ἀρετῶν.

Τριῶν δὴ διαθέσεων οὓσων, δύο μὲν κακιῶν, τῆς μὲν καθ' ὑπερβολὴν τῆς δὲ κατ' ἔλλειψιν, μιᾶς δ' ἀρετῆς τῆς μεσότητος, πᾶσαι πάσαις ἀντίκεινται πως· αἱ μὲν γὰρ ἄκραι καὶ τῇ μέσῃ καὶ ἀλλήλαις ἐναντία εἰσίν, ἡ δὲ [15] μέση ταῖς ἄκραις· ὥσπερ γὰρ τὸ ἴσον πρὸς μὲν τὸ ἔλαττον μείζον πρὸς δὲ τὸ μείζον ἔλαττον, οὕτως αἱ μέσαι ἕξεις πρὸς μὲν τὰς ἐλλείψεις ὑπερβάλλουσι πρὸς δὲ τὰς ὑπερβολὰς ἐλλείπουσιν ἔν τε τοῖς πάθεσι καὶ ταῖς πράξεσιν. ὁ γὰρ ἀνδρεῖος πρὸς μὲν τὸν δειλὸν θρασὺς φαίνεται, [20] πρὸς δὲ τὸν θρασὺν δειλός· ὁμοίως δὲ καὶ ὁ σώφρων πρὸς μὲν τὸν ἀναίσθητον ἀκόλαστος, πρὸς δὲ τὸν ἀκόλαστον ἀναίσθητος, ὁ δ' ἐλευθέριος πρὸς μὲν τὸν ἀνελεύθερον ἄσωτος, πρὸς δὲ τὸν ἄσωτον ἀνελεύθερος. διὸ καὶ ἀπωθοῦνται τὸν μέσον οἱ ἄκροι ἐκάτερος πρὸς ἐκάτερον, καὶ καλοῦσι [25] τὸν ἀνδρεῖον ὁ μὲν δειλὸς θρασὺν ὁ δὲ θρασὺς δειλόν, καὶ ἐπὶ τῶν ἄλλων ἀνάλογον. Οὕτω δ' ἀντικειμένων ἀλλήλοις τούτων, πλείστη ἐναντιότης ἐστὶ τοῖς ἄκροις πρὸς ἄλληλα ἢ πρὸς τὸ μέσον· πορρωτέρω γὰρ ταῦτα ἀφέστηκεν ἀλλήλων ἢ τοῦ μέσου, ὥσπερ τὸ μέγα τοῦ μικροῦ καὶ τὸ μικρὸν [30] τοῦ μεγάλου ἢ ἄμφω τοῦ ἴσου. ἔτι πρὸς μὲν τὸ μέσον ἐνίοις ἄκροις ὁμοιότης τις φαίνεται, ὡς τῇ θρασύτητι πρὸς τὴν ἀνδρείαν καὶ τῇ ἀσωτίᾳ πρὸς τὴν ἐλευθεριότητα· τοῖς δὲ ἄκροις πρὸς ἄλληλα πλείστη ἀνομοιότης· τὰ δὲ πλείστον ἀπέχοντα ἀπ' ἀλλήλων ἐναντία ὀρίζονται, ὥστε καὶ [35] μᾶλλον ἐναντία τὰ πλείον ἀπέχοντα. Πρὸς δὲ τὸ μέσον 1109a [1] ἀντίκειται μᾶλλον ἐφ' ὧν μὲν ἡ ἔλλειψις ἐφ' ὧν δὲ ἡ ὑπερβολή, οἷον ἀνδρεία μὲν οὐχ ἡ θρασύτης ὑπερβολὴ οὕσα, ἀλλ' ἡ δειλία ἔλλειψις οὕσα, τῇ δὲ σωφροσύνη οὐχ ἡ ἀναίσθησία ἔνδεια οὕσα, ἀλλ' ἡ ἀκολασία ὑπερβολὴ [5] οὕσα. διὰ δύο δ' αἰτίας τοῦτο συμβαίνει, μίαν μὲν τὴν ἐξ αὐτοῦ τοῦ πράγματος· τῷ γὰρ ἐγγύτερον εἶναι καὶ ὁμοιότερον τὸ ἕτερον ἄκρον τῷ μέσῳ, οὐ τοῦτο ἀλλὰ τοῦναντίον ἀντιτίθεμεν μᾶλλον· οἷον ἐπεὶ ὁμοιότερον εἶναι δοκεῖ τῇ ἀνδρείᾳ ἢ θρασύτης καὶ ἐγγύτερον, ἀνομοιότερον [10] δ' ἡ δειλία, ταύτην

μᾶλλον ἀντιτίθεμεν· τὰ γὰρ ἀπέχοντα πλεῖον τοῦ μέσου ἐναντιώτερα δοκεῖ εἶναι. μία μὲν οὖν αἰτία αὕτη, ἐξ αὐτοῦ τοῦ πράγματος· ἑτέρα δὲ ἐξ ἡμῶν αὐτῶν· πρὸς ἃ γὰρ αὐτοὶ μᾶλλον πεφύκαμέν πως, ταῦτα μᾶλλον ἐναντία τῷ μέσῳ φαίνεται. οἷον αὐτοὶ μᾶλλον [15] πεφύκαμεν πρὸς τὰς ἡδονάς, διὸ εὐκαταφορώτεροί ἐσμεν πρὸς ἀκολασίαν ἢ πρὸς κοσμιότητα. ταῦτ' οὖν μᾶλλον ἐναντία λέγομεν, πρὸς ἃ ἡ ἐπίδοσις μᾶλλον γίνεται· καὶ διὰ τοῦτο ἡ ἀκολασία ὑπερβολὴ οὕσα ἐναντιωτέρα ἐστὶ τῇ σωφροσύνῃ.

[20] Ὅτι μὲν οὖν ἐστὶν ἡ ἀρετὴ ἡ ἠθικὴ μεσότης, καὶ πῶς, καὶ ὅτι μεσότης δύο κακιῶν, τῆς μὲν καθ' ὑπερβολὴν τῆς δὲ κατ' ἔλλειψιν, καὶ ὅτι τοιαύτη ἐστὶ διὰ τὸ στοχαστικὴ τοῦ μέσου εἶναι τοῦ ἐν τοῖς πάθεσι καὶ ἐν ταῖς πράξεσιν, ἱκανῶς εἴρηται. διὸ καὶ ἔργον ἐστὶ σπουδαῖον εἶναι. ἐν ἐκάστῳ [25] γὰρ τὸ μέσον λαβεῖν ἔργον, οἷον κύκλου τὸ μέσον οὐ παντὸς ἀλλὰ τοῦ εἰδότος· οὕτω δὲ καὶ τὸ μὲν ὀργισθῆναι παντὸς καὶ ῥάδιον, καὶ τὸ δοῦναι ἀργύριον καὶ δαπανῆσαι· τὸ δ' ᾧ καὶ ὅσον καὶ ὅτε καὶ οὗ ἔνεκα καὶ ὥς, οὐκέτι παντὸς οὐδὲ ῥάδιον· διόπερ τὸ εὖ καὶ σπάνιον καὶ ἐπαινετὸν καὶ [30] καλόν. διὸ δεῖ τὸν στοχαζόμενον τοῦ μέσου πρῶτον μὲν ἀποχωρεῖν τοῦ μᾶλλον ἐναντίου, καθάπερ καὶ ἡ Καλυψὼ παραινεῖ τούτου μὲν καπνοῦ καὶ κύματος ἐκτὸς ἔεργε νῆα.

Hom. Od. 12.219

Τῶν γὰρ ἄκρων τὸ μὲν ἐστὶν ἀμαρτωλότερον τὸ δ' ἥττον· ἐπεὶ οὖν τοῦ μέσου τυχεῖν ἄκρως χαλεπόν, κατὰ τὸν δεύτερον, [35] φασί, πλοῦν τὰ ἐλάχιστα ληπτέον τῶν κακῶν· τοῦτο δ' ἔσται μάλιστα τοῦτον τὸν τρόπον ὃν λέγομεν. 1109b [1] σκοπεῖν δὲ δεῖ πρὸς ἃ καὶ αὐτοὶ εὐκατάφοροί ἐσμεν· ἄλλοι γὰρ πρὸς ἄλλα πεφύκαμεν· τοῦτο δ' ἔσται γνώριμον ἐκ τῆς ἡδονῆς καὶ τῆς λύπης τῆς γινομένης περὶ ἡμᾶς. εἰς τοῦναντίον [5] δ' ἑαυτοὺς ἀφέλκειν δεῖ· πολὺ γὰρ ἀπάγοντες τοῦ ἀμαρτάνειν εἰς τὸ μέσον ἤξομεν, ὅπερ οἱ τὰ διεστραμμένα τῶν ξύλων ὀρθοῦντες ποιοῦσιν.

Ἐν παντὶ δὲ μάλιστα φυλακτέον τὸ ἡδὺ καὶ τὴν ἡδονήν· οὐ γὰρ ἀδέκαστοι κρίνομεν αὐτήν. ὅπερ οὖν οἱ δημογέροντες ἔπαθον πρὸς τὴν Ἑλένην, [10] τοῦτο δεῖ παθεῖν καὶ ἡμᾶς πρὸς τὴν ἡδονήν, καὶ ἐν

πᾶσι τὴν ἐκείνων ἐπιλέγειν φωνήν· οὕτω γὰρ αὐτὴν ἀποπεμπόμενοι ἦττον ἀμαρτησόμεθα. ταῦτ' οὖν ποιοῦντες, ὡς ἐν κεφαλαίῳ εἶπεῖν, μάλιστα δυνησόμεθα τοῦ μέσου τυγχάνειν.

Χαλεπὸν δ' ἴσως τοῦτο, καὶ μάλιστ' ἐν τοῖς καθ' ἕκαστον· οὐ [15] γὰρ ῥάδιον διορίσαι καὶ πῶς καὶ τίσι καὶ ἐπὶ ποίοις καὶ πόσον χρόνον ὀργιστέον· καὶ γὰρ ἡμεῖς ὅτε μὲν τοὺς ἐλλείποντας ἐπαινοῦμεν καὶ πρᾶους φαμέν, ὅτε δὲ τοὺς χαλεπαίνοντας ἀνδρώδεις ἀποκαλοῦντες. ἀλλ' ὁ μὲν μικρὸν τοῦ εὖ παρεκβαίνων οὐ ψέγεται, οὔτ' ἐπὶ τὸ μᾶλλον οὔτ' ἐπὶ τὸ [20] ἦττον, ὁ δὲ πλέον· οὗτος γὰρ οὐ λανθάνει. ὁ δὲ μέχρι τίνος καὶ ἐπὶ πόσον ψεκτὸς οὐ ῥάδιον τῷ λόγῳ ἀφορίσαι· οὐδὲ γὰρ ἄλλο οὐδὲν τῶν αἰσθητῶν· τὰ δὲ τοιαῦτα ἐν τοῖς καθ' ἕκαστα, καὶ ἐν τῇ αἰσθήσει ἡ κρίσις. τὸ μὲν ἄρα τοσοῦτο δηλοῖ ὅτι ἡ μέση ἕξις ἐν πᾶσιν ἐπαινετὴ, ἀποκλίνειν δὲ [25] δεῖ ὅτε μὲν ἐπὶ τὴν ὑπερβολὴν ὅτε δ' ἐπὶ τὴν ἔλλειψιν· οὕτω γὰρ ῥᾶστα τοῦ μέσου καὶ τοῦ εὖ τευξόμεθα.

Βιβλίο 3

τῆς ἀρετῆς δὴ περὶ πάθη τε καὶ πράξεις οὔσης, καὶ ἐπὶ μὲν τοῖς ἑκουσίοις ἐπαίνων καὶ ψόγων γινομένων, ἐπὶ δὲ τοῖς ἀκουσίοις συγγνώμης, ἐνίοτε δὲ καὶ ἐλέου, τὸ ἐκούσιον καὶ τὸ ἀκούσιον ἀναγκαῖον ἴσως διορίσαι τοῖς περὶ ἀρετῆς ἐπισκοποῦσι, χρήσιμον δὲ καὶ τοῖς νομοθετοῦσι πρὸς τε τὰς [35] τιμὰς καὶ τὰς κολάσεις. δοκεῖ δὴ ἀκούσια εἶναι τὰ βία ἢ δι' ἄγνοιαν γινόμενα· 1110a [1] βίαιον δὲ οὗ ἢ ἀρχὴ ἔξωθεν, τοιαύτη οὖσα ἐν ἧ μὴδὲν συμβάλλεται ὁ πράττων ἢ ὁ πάσχων, οἷον εἰ πνεῦμα κομίσαι ποι ἢ ἄνθρωποι κύριοι ὄντες.

ὅσα δὲ διὰ φόβον μειζόνων κακῶν πράττεται ἢ διὰ [5] καλόν τι, οἷον εἰ τύραννος προστάττοι αἰσχρόν τι πρᾶξι κύριος ὢν γονέων καὶ τέκνων, καὶ πράξαντος μὲν σφύζοιντο μὴ πράξαντος δ' ἀποθνήσκοιεν, ἀμφισβήτησιν ἔχει πότερον ἀκούσιᾶ ἐστὶν ἢ ἐκούσια. τοιοῦτον δὲ τι συμβαίνει καὶ περὶ τὰς ἐν τοῖς χειμῶσιν ἐκβολάς· ἀπλῶς μὲν γὰρ οὐδεὶς ἀποβάλλεται [10] ἐκὼν, ἐπὶ σωτηρίᾳ δ' αὐτοῦ καὶ τῶν λοιπῶν ἅπαντες οἱ νοῦν ἔχοντες. μικταὶ μὲν οὖν εἰσιν αἱ τοιαῦται πράξεις, εἰκότα δὲ μᾶλλον ἐκουσίοις· αἶρεται γάρ εἰσι τότε ὅτε πράττονται, τὸ δὲ τέλος τῆς πράξεως κατὰ τὸν καιρὸν ἐστίν. καὶ τὸ ἐκούσιον δὴ καὶ τὸ ἀκούσιον, ὅτε πράττει, [15] λεκτέον. πράττει δὲ ἐκὼν· καὶ γὰρ ἢ ἀρχὴ τοῦ κινεῖν τὰ ὀργανικὰ μέρη ἐν ταῖς τοιαύταις πράξεσιν ἐν αὐτῷ ἐστίν· ὢν δ' ἐν αὐτῷ ἢ ἀρχή, ἐπ' αὐτῷ καὶ τὸ πράττειν καὶ μή. ἐκούσια δὴ τὰ τοιαῦτα, ἀπλῶς δ' ἴσως ἀκούσια· οὐδεὶς γὰρ ἂν ἔλοιτο καθ' αὐτὸ τῶν τοιούτων οὐδέν. [20] ἐπὶ ταῖς πράξεσι δὲ ταῖς τοιαύταις ἐνίοτε καὶ ἐπαινοῦνται, ὅταν αἰσχρόν τι ἢ λυπηρὸν ὑπομένωσιν ἀντὶ μεγάλων καὶ καλῶν· ἂν δ' ἀνάπαλιν, ψέγονται· τὰ γὰρ αἰσχισθ' ὑπομεῖναι ἐπὶ μὴδενὶ καλῷ ἢ μετρίῳ φαύλου. ἐπ' ἐνίοις δ' ἔπαινος μὲν οὐ γίνεται, συγγνώμη δ', ὅταν διὰ τοιαῦτα πράξῃ [25] τις ἢ μὴ δεῖ, ἢ τὴν ἀνθρωπίνην φύσιν ὑπερτείνει καὶ μὴδεὶς ἂν ὑπομεῖναι. ἔνια δ' ἴσως οὐκ ἔστιν ἀναγκασθῆναι, ἀλλὰ μᾶλλον ἀποθανετέον παθόντι τὰ δεινότατα· καὶ γὰρ τὸν Εὐριπίδου Ἀλκμαίωνα γελοῖα φαίνεται τὰ ἀναγκάσαντα μητροκτονῆσαι. ἔστι δὲ χαλεπὸν ἐνίοτε διακρίναι [30] ποῖον ἀντὶ ποίου αἰρετέον καὶ τί ἀντὶ τίνος ὑπομενετέον, ἔτι δὲ χαλεπώτερον ἐμμεῖναι τοῖς γνωσθεῖσιν· ὥς γὰρ ἐπὶ τὸ πολὺ ἐστὶ τὰ μὲν προσδοκώμενα λυπηρά, ἢ δ'

ἀναγκάζονται αἰσχροί, ὅθεν ἔπαινοι καὶ ψόγοι γίνονται περὶ τοὺς ἀναγκασθέντας ἢ μή.

1110b [1] τὰ δὴ ποῖα φατέον βίαια; ἢ ἀπλῶς μὲν, ὅπότε ἂν ἡ αἰτία ἐν τοῖς ἐκτός ἢ καὶ ὁ πράττων μηδὲν συμβάλληται; ἃ δὲ καθ' αὐτὰ μὲν ἀκούσιά ἐστι, νῦν δὲ καὶ ἀντὶ τῶνδε αἰρετά, καὶ ἡ ἀρχὴ ἐν τῷ πράττοντι, [5] καθ' αὐτὰ μὲν ἀκούσιά ἐστι, νῦν δὲ καὶ ἀντὶ τῶνδε ἐκούσια. μᾶλλον δ' ἔοικεν ἐκουσίοις· αἱ γὰρ πράξεις ἐν τοῖς καθ' ἕκαστα, ταῦτα δ' ἐκούσια. ποῖα δ' ἀντὶ ποίων αἰρετέον, οὐ ρᾶδιον ἀποδοῦναι· πολλαὶ γὰρ διαφοραὶ εἰσιν ἐν τοῖς καθ' ἕκαστα.

εἰ δέ τις τὰ ἡδέα καὶ τὰ καλὰ φαίη βίαια [10] εἶναι (ἀναγκάζειν γὰρ ἔξω ὄντα), πάντα ἂν εἴη αὐτῷ βίαια· τούτων γὰρ χάριν πάντες πάντα πράττουσιν. καὶ οἱ μὲν βίᾳ καὶ ἄκοντες λυπηρῶς, οἱ δὲ διὰ τὸ ἡδὺ καὶ καλὸν μεθ' ἡδονῆς· γελοῖον δὲ τὸ αἰτιᾶσθαι τὰ ἐκτός, ἀλλὰ μὴ αὐτὸν εὐθήρατον ὄντα ὑπὸ τῶν τοιούτων, καὶ τῶν μὲν [15] καλῶν ἑαυτόν, τῶν δ' αἰσchrῶν τὰ ἡδέα. ἔοικε δὴ τὸ βίαιον εἶναι οὗ ἔξωθεν ἡ ἀρχή, μηδὲν συμβαλλομένου τοῦ βιασθέντος.

τὸ δὲ δι' ἄγνοιαν οὐχ ἐκούσιον μὲν ἅπαν ἐστίν, ἀκούσιον δὲ τὸ ἐπίλυπον καὶ ἐν μεταμελείᾳ· ὁ γὰρ δι' ἄγνοιαν [20] πράξας ὁτιοῦν, μηδὲν τι δυσχεραίνων ἐπὶ τῇ πράξει, ἐκὼν μὲν οὐ πέπραχεν, ὃ γε μὴ ἤδει, οὐδ' αὖ ἄκων, μὴ λυπούμενός γε. τοῦ δὴ δι' ἄγνοιαν ὁ μὲν ἐν μεταμελείᾳ ἄκων δοκεῖ, ὁ δὲ μὴ μεταμελόμενος, ἐπεὶ ἕτερος, ἔστω οὐχ ἐκὼν· ἐπεὶ γὰρ διαφέρει, βέλτιον ὄνομα ἔχειν ἴδιον. ἕτερον δ' [25] ἔοικε καὶ τὸ δι' ἄγνοιαν πράττειν τοῦ ἀγνοοῦντα· ὁ γὰρ μεθύων ἢ ὀργιζόμενος οὐ δοκεῖ δι' ἄγνοιαν πράττειν ἀλλὰ διὰ τι τῶν εἰρημένων, οὐκ εἰδώς δὲ ἄλλ' ἀγνοῶν.

ἀγνοεῖ μὲν οὖν πᾶς ὁ μοχθηρὸς ἃ δεῖ πράττειν καὶ ὧν ἀφεκτέον, καὶ διὰ τὴν τοιαύτην ἁμαρτίαν ἄδικοι καὶ ὅλως [30] κακοὶ γίνονται· τὸ δ' ἀκούσιον βούλεται λέγεσθαι οὐκ εἴ τις ἀγνοεῖ τὰ συμφέροντα· οὐ γὰρ ἡ ἐν τῇ προαιρέσει ἄγνοια αἰτία τοῦ ἀκουσίου ἀλλὰ τῆς μοχθηρίας, οὐδ' ἡ καθόλου (ψέγονται γὰρ διὰ γε ταύτην) ἀλλ' ἡ καθ' ἕκαστα, ἐν οἷς καὶ περὶ ἃ ἡ πρᾶξις· 1111a [1] ἐν τούτοις γὰρ καὶ ἔλεος καὶ συγγνώμη· ὁ γὰρ τούτων τι ἀγνοῶν ἀκουσίως πράττει.

ἴσως οὖν οὐ χεῖρον διορίσαι αὐτά, τίνα καὶ πόσα ἐστί, τίς τε δὴ καὶ τί καὶ περὶ τί ἢ ἐν τίνι πράττει, ἐνίστε δὲ καὶ [5] τίνι, οἷον ὀργάνῳ, καὶ ἔνεκα τίνος, οἷον σωτηρίας, καὶ πῶς, οἷον ἡρέμα ἢ σφόδρα. ἅπαντα μὲν οὖν ταῦτα οὐδεὶς ἂν ἀγνοήσκει μὴ μαινόμενος, δῆλον δ' ὡς οὐδὲ τὸν πράττοντα· πῶς γὰρ ἑαυτὸν γε; ὁ δὲ πράττει ἀγνοήσκειν ἂν τις, οἷον “λέγοντές φασιν ἐκπεσεῖν αὐτοῦς”, ἢ οὐκ εἰδέναι ὅτι ἀπόρρητα [10] ἦν, ὥσπερ Αἰσχύλος τὰ μυστικά, ἢ δεῖξαι βουλόμενος ἀφεῖναι, ὡς ὁ τὸν καταπέλτην. οἰηθείη δ' ἂν τις καὶ τὸν υἱὸν πολέμιον εἶναι ὥσπερ ἡ Μερόπη, καὶ ἐσφαιρῶσθαι τὸ λελογγῶμενον δόρυ, ἢ τὸν λίθον κίσσηριν εἶναι· καὶ ἐπὶ σωτηρία πίσας ἀποκτείνειν ἂν· καὶ θίξαι βουλόμενος, [15] ὥσπερ οἱ ἀκροχειριζόμενοι, πατάξειν ἂν. περὶ πάντα δὴ ταῦτα τῆς ἀγνοίας οὔσης, ἐν οἷς ἢ πρᾶξις, ὁ τούτων τι ἀγνοήσας ἄκων δοκεῖ πεπραχέναι, καὶ μάλιστα ἐν τοῖς κυριωτάτοις· κυριώτατα δ' εἶναι δοκεῖ ἐν οἷς ἢ πρᾶξις καὶ οὗ ἔνεκα. τοῦ δὴ κατὰ τὴν τοιαύτην ἀγνοίαν ἀκουσίου λεγομένου [20] ἔτι δεῖ τὴν πρᾶξιν λυπηρὰν εἶναι καὶ ἐν μεταμελείᾳ.

ὄντος δ' ἀκουσίου τοῦ βίᾳ καὶ δι' ἀγνοίαν, τὸ ἐκούσιον δόξειεν ἂν εἶναι οὗ ἢ ἀρχὴ ἐν αὐτῷ εἰδοῖται τὰ καθ' ἕκαστα ἐν οἷς ἢ πρᾶξις. ἴσως γὰρ οὐ καλῶς λέγεται ἀκούσια [25] εἶναι τὰ διὰ θυμὸν ἢ ἐπιθυμίαν. πρῶτον μὲν γὰρ οὐδὲν ἔτι τῶν ἄλλων ζώων ἐκουσίως πράξει, οὐδ' οἱ παῖδες· εἴτα πότερον οὐδὲν ἐκουσίως πράττομεν τῶν δι' ἐπιθυμίαν καὶ θυμὸν, ἢ τὰ καλὰ μὲν ἐκουσίως τὰ δ' αἰσχρὰ ἀκουσίως; ἢ γελοῖον ἐνός γε αἰτίου ὄντος; ἄτοπον δὲ ἴσως [30] ἀκούσια φάναι ὧν δεῖ ὀρέγεσθαι· δεῖ δὲ καὶ ὀργίζεσθαι ἐπὶ τισι καὶ ἐπιθυμεῖν τινῶν, οἷον ὑγείας καὶ μαθήσεως. δοκεῖ δὲ καὶ τὰ μὲν ἀκούσια λυπηρὰ εἶναι, τὰ δὲ κατ' ἐπιθυμίαν ἡδέα. ἔτι δὲ τί διαφέρει τῷ ἀκούσια εἶναι τὰ κατὰ λογισμὸν ἢ θυμὸν ἀμαρτηθέντα; φευκτὰ μὲν γὰρ ἅμφω, 1111b [1] δοκεῖ δὲ οὐχ ἦττον ἀνθρωπικὰ εἶναι τὰ ἄλογα πάθη, ὥστε καὶ αἱ πράξεις τοῦ ἀνθρώπου <αἱ> ἀπὸ θυμοῦ καὶ ἐπιθυμίας. ἄτοπον δὴ τὸ τιθέναι ἀκούσια ταῦτα.

διωρισμένων δὲ τοῦ τε ἐκουσίου καὶ τοῦ ἀκουσίου, [5] περὶ προαιρέσεως ἔπεται διελθεῖν· οἰκειότατον γὰρ εἶναι δοκεῖ τῇ ἀρετῇ καὶ μᾶλλον τὰ ἥθη κρίνειν τῶν πράξεων.

ἡ προαίρεσις δὴ ἐκούσιον μὲν φαίνεται, οὐ ταὐτὸν δέ, ἀλλ' ἐπὶ πλεον τὸ ἐκούσιον· τοῦ μὲν γὰρ ἐκουσίου καὶ παῖδες καὶ τᾶλλα ζῶα κοινωνεῖ, προαιρέσεως δ' οὐ, καὶ τὰ ἐξαίφνης [10] ἐκούσια μὲν λέγομεν, κατὰ προαίρεσιν δ' οὐ.

οἱ δὲ λέγοντες αὐτὴν ἐπιθυμίαν ἢ θυμὸν ἢ βούλησιν ἢ τινα δόξαν οὐκ εἰκόασιν ὀρθῶς λέγειν. οὐ γὰρ κοινὸν ἡ προαίρεσις καὶ τῶν ἀλόγων, ἐπιθυμία δὲ καὶ θυμός. καὶ ὁ ἀκρατὴς ἐπιθυμῶν μὲν πράττει, προαιρούμενος δ' οὐ· ὁ ἐγκρατὴς δ' ἀνάπαλιν [15] προαιρούμενος μὲν, ἐπιθυμῶν δ' οὐ. καὶ προαιρέσει μὲν ἐπιθυμία ἐναντιοῦται, ἐπιθυμία δ' ἐπιθυμία οὐ. καὶ ἡ μὲν ἐπιθυμία ἡδέος καὶ ἐπιλύπου, ἡ προαίρεσις δ' οὔτε λυπηροῦ οὔθ' ἡδέος.

θυμὸς δ' ἔτι ἦττον· ἥκιστα γὰρ τὰ διὰ θυμὸν κατὰ προαίρεσιν εἶναι δοκεῖ.

ἀλλὰ μὴν οὐδὲ βούλησις [20] γε, καίπερ σύνεγγυς φαινόμενον· προαίρεσις μὲν γὰρ οὐκ ἔστι τῶν ἀδυνάτων, καὶ εἴ τις φαίη προαιρεῖσθαι, δοκοίη ἂν ἡλίθιος εἶναι· βούλησις δ' ἔστι <καὶ> τῶν ἀδυνάτων, οἷον ἀθανασίας. καὶ ἡ μὲν βούλησις ἔστι καὶ περὶ τὰ μηδαμῶς δι' αὐτοῦ πραχθέντα ἂν, οἷον ὑποκριτὴν τινα νικᾶν ἢ ἀθλητὴν· [25] προαιρεῖται δὲ τὰ τοιαῦτα οὐδεὶς, ἀλλ' ὅσα οἶεται γενέσθαι ἂν δι' αὐτοῦ. ἔτι δ' ἡ μὲν βούλησις τοῦ τέλους ἔστι μᾶλλον, ἡ δὲ προαίρεσις τῶν πρὸς τὸ τέλος, οἷον ὑγιαίνειν βουλόμεθα, προαιρούμεθα δὲ δι' ὧν ὑγιανοῦμεν, καὶ εὐδαιμονεῖν βουλόμεθα μὲν καὶ φαμέν, προαιρούμεθα δὲ λέγειν οὐχ ἀρμόζει· ὅλως [30] γὰρ ἔοικεν ἡ προαίρεσις περὶ τὰ ἐφ' ἡμῖν εἶναι.

οὐδὲ δὴ δόξα ἂν εἴη· ἡ μὲν γὰρ δόξα δοκεῖ περὶ πάντα εἶναι, καὶ οὐδὲν ἦττον περὶ τὰ αἰδία καὶ τὰ ἀδύνατα ἢ τὰ ἐφ' ἡμῖν· καὶ τῷ ψευδεῖ καὶ ἀληθεῖ διαιρεῖται, οὐ τῷ κακῷ καὶ ἀγαθῷ, ἡ προαίρεσις δὲ τούτοις μᾶλλον.

1112a [1] ὅλως μὲν οὖν δόξη ταὐτὸν ἴσως οὐδὲ λέγει οὐδεὶς. ἀλλ' οὐδὲ τινί· τῷ γὰρ προαιρεῖσθαι τἀγαθὰ ἢ τὰ κακὰ ποιοῖ τινές ἐσμεν, τῷ δὲ δοξάζειν οὐ. καὶ προαιρούμεθα μὲν λαβεῖν ἢ φυγεῖν [ἢ] τι τῶν τοιούτων, δοξάζομεν δὲ τί ἐστίν ἢ τίνι συμφέρει ἢ πῶς· [5] λαβεῖν δ'

ἢ φυγεῖν οὐ πάνυ δοξάζομεν. καὶ ἡ μὲν προαίρεσις ἐπαινεῖται τῷ εἶναι οὗ δεῖ μᾶλλον ἢ τῷ ὀρθῶς, ἡ δὲ δόξα τῷ ὥς ἀληθῶς. καὶ προαιρούμεθα μὲν ἃ μάλιστα ἴσμεν ἀγαθὰ ὄντα, δοξάζομεν δὲ ἃ οὐ πάνυ ἴσμεν· δοκοῦσι δὲ οὐχ οἱ αὐτοὶ προαιρεῖσθαι τε ἄριστα καὶ δοξάζειν, ἀλλ' [10] ἔνιοι δοξάζειν μὲν ἄμεινον, διὰ κακίαν δ' αἰρεῖσθαι οὐχ ἃ δεῖ. εἰ δὲ προγίνεται δόξα τῆς προαιρέσεως ἢ παρακολουθεῖ, οὐδὲν διαφέρει· οὐ τοῦτο γὰρ σκοποῦμεν, ἀλλ' εἰ ταυτόν ἐστι δόξη τινί. τί οὖν ἡ ποιόν τι ἐστίν, ἐπειδὴ τῶν εἰρημένων οὐθέν; ἐκούσιον μὲν δὴ φαίνεται, τὸ δ' ἐκούσιον οὐ πᾶν προαιρετόν. [15] ἀλλ' ἄρά γε τὸ προβεβουλευμένον; ἡ γὰρ προαίρεσις μετὰ λόγου καὶ διανοίας. ὑποσημαίνειν δ' ἔοικε καὶ τοῦνομα ὥς ὃν πρὸ ἐτέρων αἰρετόν.

βουλεύονται δὲ πότερον περὶ πάντων, καὶ πᾶν βουλευτόν ἐστιν, ἢ περὶ ἐνίων οὐκ ἔστι βουλή; λεκτέον δ' ἴσως βουλευτόν [20] οὐχ ὑπὲρ οὗ βουλεύσαιτ' ἂν τις ἡλίθιος ἢ μαινόμενος, ἀλλ' ὑπὲρ ὧν ὁ νοῦν ἔχων. περὶ δὴ τῶν αἰδίων οὐδεὶς βουλεύεται, οἷον περὶ τοῦ κόσμου ἢ τῆς διαμέτρου καὶ τῆς πλευρᾶς, ὅτι ἀσύμμετροι. ἀλλ' οὐδὲ περὶ τῶν ἐν κινήσει, ἀεὶ δὲ κατὰ ταῦτά γινομένων, εἴτ' ἐξ ἀνάγκης εἴτε καὶ [25] φύσει ἢ διὰ τина αἰτίαν ἄλλην, οἷον τροπῶν καὶ ἀνατολῶν. οὐδὲ περὶ τῶν ἄλλοτε ἄλλως, οἷον αὐχμῶν καὶ ὄμβρων. οὐδὲ περὶ τῶν ἀπὸ τύχης, οἷον θησαυροῦ εὐρέσεως. ἀλλ' οὐδὲ περὶ τῶν ἀνθρωπίνων ἀπάντων, οἷον πῶς ἂν Σκύθαι ἄριστα πολιτεύοντο οὐδεὶς Λακεδαιμονίων βουλεύεται. [30] οὐ γὰρ γένοιτ' ἂν τούτων οὐθέν δι' ἡμῶν. βουλευόμεθα δὲ περὶ τῶν ἐφ' ἡμῖν καὶ πρακτῶν· ταῦτα δὲ καὶ ἔστι λοιπά. αἰτίαι γὰρ δοκοῦσιν εἶναι φύσις καὶ ἀνάγκη καὶ τύχη, ἔτι δὲ νοῦς καὶ πᾶν τὸ δι' ἀνθρώπου. τῶν δ' ἀνθρώπων ἕκαστοι βουλεύονται περὶ τῶν δι' αὐτῶν πρακτῶν. 1112b [1] καὶ περὶ μὲν τὰς ἀκριβεῖς καὶ αὐτάρκεις τῶν ἐπιστημῶν οὐκ ἔστι βουλή, οἷον περὶ γραμμάτων (οὐ γὰρ διστάζομεν πῶς γραπτέον)· ἀλλ' ὅσα γίνεται δι' ἡμῶν, μὴ ὡσαύτως δ' ἀεὶ, περὶ τούτων βουλευόμεθα, οἷον περὶ τῶν κατ' ἱατρικὴν καὶ χρηματιστικὴν, [5] καὶ περὶ κυβερνητικὴν μᾶλλον ἢ γυμναστικὴν, ὅσῳ ἥττον διηκρίβωται, καὶ ἔτι περὶ τῶν λοιπῶν ὁμοίως, μᾶλλον δὲ καὶ περὶ τὰς τέχνας ἢ τὰς ἐπιστήμας· μᾶλλον γὰρ περὶ ταύτας διστάζομεν. τὸ βουλεύεσθαι δὲ ἐν τοῖς ὥς ἐπὶ τὸ πολὺ, ἀδήλοις δὲ πῶς ἀποβήσεται, καὶ ἐν οἷς ἀδιόριστον. [10] συμβούλους δὲ παραλαμβάνομεν εἰς τὰ μεγάλα, ἀπιστοῦντες ἡμῖν αὐτοῖς ὥς οὐχ

ικανοῖς διαγνῶναι. βουλευόμεθα δ' οὐ περὶ τῶν τελῶν ἀλλὰ περὶ τῶν
 πρὸς τὰ τέλη. οὔτε γὰρ ἱατρὸς βουλεύεται εἰ ὑγιάσει, οὔτε ῥήτωρ εἰ
 πείσει, οὔτε πολιτικὸς εἰ εὐνομίαν ποιήσει, οὐδὲ τῶν λοιπῶν οὐδεὶς
 [15] περὶ τοῦ τέλους· ἀλλὰ θέμενοι τὸ τέλος τὸ πῶς καὶ διὰ τίνων
 ἔσται σκοποῦσι· καὶ διὰ πλειόνων μὲν φαινομένου γίνεσθαι διὰ τίνος
 ῥᾶστα καὶ κάλλιστα ἐπισκοποῦσι, δι' ἐνὸς δ' ἐπιτελουμένου πῶς διὰ
 τούτου ἔσται κάκεῖνο διὰ τίνος, ἕως ἂν ἔλθωσιν ἐπὶ τὸ πρῶτον
 αἴτιον, ὃ ἐν τῇ εὐρέσει ἔσχατον [20] ἐστίν. ὁ γὰρ βουλευόμενος ἔοικε
 ζητεῖν καὶ ἀναλύειν τὸν εἰρημένον τρόπον ὥσπερ διάγραμμα
 (φαίνεται δ' ἡ μὲν ζήτησις οὐ πᾶσα εἶναι βούλευσις, οἷον αἱ
 μαθηματικάι, ἡ δὲ βούλευσις πᾶσα ζήτησις), καὶ τὸ ἔσχατον ἐν τῇ
 ἀναλύσει πρῶτον εἶναι ἐν τῇ γενέσει. κἂν μὲν ἀδυνάτῳ ἐντύχωσιν,
 [25] ἀφίστανται, οἷον εἰ χρημάτων δεῖ, ταῦτα δὲ μὴ οἷόν τε
 πορισθῆναι· ἐὰν δὲ δυνατόν φαίνεται, ἐγχειροῦσι πράττειν. δυνατὰ
 δὲ ἃ δι' ἡμῶν γένοιντ' ἄν· τὰ γὰρ διὰ τῶν φίλων δι' ἡμῶν πως ἐστίν·
 ἡ γὰρ ἀρχὴ ἐν ἡμῖν. ζητεῖται δ' ὅτε μὲν τὰ ὄργανα ὅτε δ' ἡ χρεία
 αὐτῶν· [30] ὁμοίως δὲ καὶ ἐν τοῖς λοιποῖς ὅτε μὲν δι' οὗ ὅτε δὲ πῶς ἡ
 διὰ τίνος. ἔοικε δὴ, καθάπερ εἴρηται, ἄνθρωπος εἶναι ἀρχὴ τῶν
 πράξεων· ἡ δὲ βουλὴ περὶ τῶν αὐτῷ πρακτῶν, αἱ δὲ πράξεις ἄλλων
 ἔνεκα. οὐ γὰρ ἂν εἴη βουλευτὸν τὸ τέλος ἀλλὰ τὰ πρὸς τὰ τέλη· οὐδὲ
 δὴ τὰ καθ' ἕκαστα, 1113a [1] οἷον εἰ ἄρτος τοῦτο ἡ πέπεπται ὥς δεῖ·
 αἰσθήσεως γὰρ ταῦτα. εἰ δὲ ἀεὶ βουλεύσεται, εἰς ἄπειρον ἥξει.
 βουλευτὸν δὲ καὶ προαιρετὸν τὸ αὐτό, πλὴν ἀφωρισμένον ἤδη τὸ
 προαιρετόν· τὸ γὰρ ἐκ τῆς βουλῆς κριθέν προαιρετόν [5] ἐστίν.
 παύεται γὰρ ἕκαστος ζητῶν πῶς πράξει, ὅταν εἰς αὐτὸν ἀναγάγῃ τὴν
 ἀρχήν, καὶ αὐτοῦ εἰς τὸ ἡγούμενον· τοῦτο γὰρ τὸ προαιρούμενον.
 δῆλον δὲ τοῦτο καὶ ἐκ τῶν ἀρχαίων πολιτειῶν, ὡς Ὅμηρος ἐμιμεῖτο·
 οἱ γὰρ βασιλεῖς ἃ προείλοντο ἀνήγγελλον τῷ δήμῳ. ὄντος δὲ τοῦ
 [10] προαιρετοῦ βουλευτοῦ ὀρεκτοῦ τῶν ἐφ' ἡμῖν, καὶ ἡ προαίρεσις
 ἂν εἴη βουλευτικὴ ὀρεξις τῶν ἐφ' ἡμῖν· ἐκ τοῦ βουλευσασθαι γὰρ
 κρίναντες ὀρεγόμεθα κατὰ τὴν βούλευσιν. ἡ μὲν οὖν προαίρεσις
 τύπῳ εἰρήσθω, καὶ περὶ ποῖά ἐστι καὶ ὅτι τῶν πρὸς τὰ τέλη.

[15] ἡ δὲ βούλησις ὅτι μὲν τοῦ τέλους ἐστὶν εἴρηται, δοκεῖ δὲ τοῖς
 μὲν τὰγαθοῦ εἶναι, τοῖς δὲ τοῦ φαινομένου ἀγαθοῦ. συμβαίνει δὲ τοῖς
 μὲν [τὸ] βουλευτὸν τὰγαθὸν λέγουσι μὴ εἶναι βουλευτὸν ὃ βούλεται ὃ
 μὴ ὀρθῶς αἰρούμενος (εἰ γὰρ ἔσται βουλευτόν, καὶ ἀγαθόν· ἦν δ', εἰ

οὕτως ἔτυχε, κακόν), [20] τοῖς δ' αὖ τὸ φαινόμενον ἀγαθὸν βουλευτὸν λέγουσι μὴ εἶναι φύσει βουλευτόν, ἀλλ' ἐκάστω τὸ δοκοῦν· ἄλλο δ' ἄλλω φαίνεται, καὶ εἰ οὕτως ἔτυχε, τάναντία. εἰ δὲ δὴ ταῦτα μὴ ἀρέσκει, ἄρα φατέον ἀπλῶς μὲν καὶ κατ' ἀλήθειαν βουλευτὸν εἶναι τἀγαθόν, ἐκάστω δὲ τὸ φαινόμενον; [25] τῷ μὲν οὖν σπουδαίῳ τὸ κατ' ἀλήθειαν εἶναι, τῷ δὲ φαύλῳ τὸ τυχόν, ὥσπερ καὶ ἐπὶ τῶν σωμάτων τοῖς μὲν εὖ διακειμένοις ὑγιεινά ἐστι τὰ κατ' ἀλήθειαν τοιαῦτα ὄντα, τοῖς δ' ἐπινόσοις ἕτερα, ὁμοίως δὲ καὶ πικρὰ καὶ γλυκέα καὶ θερμὰ καὶ βαρέα καὶ τῶν ἄλλων ἕκαστα· ὁ σπουδαῖος γὰρ [30] ἕκαστα κρίνει ὀρθῶς, καὶ ἐν ἐκάστοις τἀληθές αὐτῷ φαίνεται. καθ' ἐκάστην γὰρ ἔξιν ἰδίᾳ ἐστι καλὰ καὶ ἡδέα, καὶ διαφέρει πλεῖστον ἴσως ὁ σπουδαῖος τῷ τἀληθές ἐν ἐκάστοις ὁρᾶν, ὥσπερ κανὼν καὶ μέτρον αὐτῶν ὢν. ἐν τοῖς πολλοῖς δὲ ἡ ἀπάτη διὰ τὴν ἡδονὴν ἔοικε γίνεσθαι· οὐ γὰρ οὕσα ἀγαθὸν φαίνεται. 1113b [1] αἰροῦνται οὖν τὸ ἡδὺ ὡς ἀγαθόν, τὴν δὲ λύπην ὡς κακὸν φεύγουσιν. ὄντος δὲ βουλευτοῦ μὲν τοῦ τέλους, βουλευτῶν δὲ καὶ προαιρετῶν τῶν πρὸς τὸ τέλος, αἱ περὶ ταῦτα πράξεις [5] κατὰ προαίρεσιν ἂν εἶεν καὶ ἐκούσιοι. αἱ δὲ τῶν ἀρετῶν ἐνέργειαι περὶ ταῦτα. ἐφ' ἡμῖν δὴ καὶ ἡ ἀρετὴ, ὁμοίως δὲ καὶ ἡ κακία. ἐν οἷς γὰρ ἐφ' ἡμῖν τὸ πράττειν, καὶ τὸ μὴ πράττειν, καὶ ἐν οἷς τὸ μὴ, καὶ τὸ ναί· ὥστ' εἰ τὸ πράττειν καλὸν ὃν ἐφ' ἡμῖν ἐστί, καὶ τὸ μὴ πράττειν ἐφ' ἡμῖν [10] ἔσται αἰσχρὸν ὃν, καὶ εἰ τὸ μὴ πράττειν καλὸν ὃν ἐφ' ἡμῖν, καὶ τὸ πράττειν αἰσχρὸν ὃν ἐφ' ἡμῖν. εἰ δ' ἐφ' ἡμῖν τὰ καλὰ πράττειν καὶ τὰ αἰσχρά, ὁμοίως δὲ καὶ τὸ μὴ πράττειν, τοῦτο δ' ἦν τὸ ἀγαθοῖς καὶ κακοῖς εἶναι, ἐφ' ἡμῖν ἄρα τὸ ἐπιεικέσι καὶ φαύλοις εἶναι. τὸ δὲ λέγειν ὡς οὐδεὶς ἐκῶν [15] πονηρὸς οὐδ' ἄκων μακάριος ἔοικε τὸ μὲν ψευδεῖ τὸ δ' ἀληθεῖ· μακάριος μὲν γὰρ οὐδεὶς ἄκων, ἡ δὲ μοχθηρία ἐκούσιον. ἢ τοῖς γε νῦν εἰρημένοις ἀμφισβητητέον, καὶ τὸν ἄνθρωπον οὐ φατέον ἀρχὴν εἶναι οὐδὲ γεννητὴν τῶν πράξεων ὥσπερ καὶ τέκνων. εἰ δὲ ταῦτα φαίνεται καὶ μὴ ἔχομεν [20] εἰς ἄλλας ἀρχὰς ἀναγαγεῖν παρὰ τὰς ἐν ἡμῖν, ὧν καὶ αἱ ἀρχαὶ ἐν ἡμῖν, καὶ αὐτὰ ἐφ' ἡμῖν καὶ ἐκούσια. τούτοις δ' ἔοικε μαρτυρεῖσθαι καὶ ἰδίᾳ ὑφ' ἐκάστων καὶ ὑπ' αὐτῶν τῶν νομοθετῶν· κολάζουσι γὰρ καὶ τιμωροῦνται τοὺς δρῶντας μοχθηρά, ὅσοι μὴ βία ἢ δι' ἄγνοιαν ἥς μὴ αὐτοὶ [25] αἵτιοι, τοὺς δὲ τὰ καλὰ πράττοντας τιμῶσιν, ὡς τοὺς μὲν προτρέφοντες τοὺς δὲ κωλύσοντες. καίτοι ὅσα μήτ' ἐφ' ἡμῖν ἐστί μήθ' ἐκούσια, οὐδεὶς προτρέπεται πράττειν, ὡς οὐδὲν πρὸ ἔργου ὃν

τὸ πεισθῆναι μὴ θερμαίνεσθαι ἢ ἀλγεῖν ἢ πεινῆν ἢ ἄλλ' ὅτιοῦν τῶν τοιούτων· οὐθὲν γὰρ ἤττον πεισόμεθα [30] αὐτά. καὶ γὰρ ἐπ' αὐτῷ τῷ ἀγνοεῖν κολάζουσιν, ἐὰν αἴτιος εἶναι δοκῇ τῆς ἀγνοίας, οἷον τοῖς μεθύουσι διπλᾶ τὰ ἐπιτίμια· ἡ γὰρ ἀρχὴ ἐν αὐτῷ· κύριος γὰρ τοῦ μὴ μεθυσθῆναι, τοῦτο δ' αἴτιον τῆς ἀγνοίας. καὶ τοὺς ἀγνοοῦντάς τι τῶν ἐν τοῖς νόμοις, ἃ δεῖ ἐπίστασθαι καὶ μὴ χαλεπά ἐστι, 1114a [1] κολάζουσιν, ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις, ὅσα δι' ἀμέλειαν ἀγνοεῖν δοκοῦσιν, ὥς ἐπ' αὐτοῖς ὅν τὸ μὴ ἀγνοεῖν· τοῦ γὰρ ἐπιμεληθῆναι κύριοι. ἀλλ' ἴσως τοιοῦτός ἐστιν ὥστε μὴ ἐπιμεληθῆναι. ἀλλὰ τοῦ τοιούτους γενέσθαι αὐτοὶ αἴτιοι [5] ζῶντες ἀνειμένως, καὶ τοῦ ἀδίκους ἢ ἀκολάστους εἶναι, οἱ μὲν κακουργοῦντες, οἱ δὲ ἐν πότοις καὶ τοῖς τοιούτοις διάγοντες· αἱ γὰρ περὶ ἕκαστα ἐνέργειαι τοιούτους ποιοῦσιν. τοῦτο δὲ δῆλον ἐκ τῶν μελετώντων πρὸς ἡντιοῦν ἀγωνίαν ἢ πρᾶξιν· διατελοῦσι γὰρ ἐνεργοῦντες. τὸ μὲν οὖν ἀγνοεῖν ὅτι ἐκ τοῦ [10] ἐνεργεῖν περὶ ἕκαστα αἱ ἕξεις γίνονται, κομιδῇ ἀναισθήτου. ἔτι δ' ἄλογον τὸν ἀδικοῦντα μὴ βούλεσθαι ἄδικον εἶναι ἢ τὸν ἀκολασταίνοντα ἀκόλαστον. εἰ δὲ μὴ ἀγνοῶν τις πράττει ἐξ ὧν ἔσται ἄδικος, ἐκὼν ἄδικος ἂν εἴη, οὐ μὴν ἐὰν γε βούληται, ἄδικος ὢν παύσεται καὶ ἔσται δίκαιος. οὐδὲ γὰρ [15] ὁ νοσῶν ὑγίης. καὶ εἰ οὕτως ἔτυχεν, ἐκὼν νοσεῖ, ἀκρατῶς βιοτεύων καὶ ἀπειθῶν τοῖς ἰατροῖς. τότε μὲν οὖν ἐξῆν αὐτῷ μὴ νοσεῖν, προεμένῳ δ' οὐκέτι, ὥσπερ οὐδ' ἀφέντι λίθον ἔτ' αὐτὸν δυνατὸν ἀναλαβεῖν· ἀλλ' ὅμως ἐπ' αὐτῷ τὸ βαλεῖν [καὶ ῥῖψαι]· ἡ γὰρ ἀρχὴ ἐν αὐτῷ. οὕτω δὲ καὶ τῷ ἀδίκῳ [20] καὶ τῷ ἀκολάστῳ ἐξ ἀρχῆς μὲν ἐξῆν τοιούτοις μὴ γενέσθαι, διὸ ἐκόντες εἰσίν· γενομένοις δ' οὐκέτι ἔστι μὴ εἶναι. οὐ μόνον δ' αἱ τῆς ψυχῆς κακίαι ἐκούσιοί εἰσιν, ἀλλ' ἐνίοις καὶ αἱ τοῦ σώματος, οἷς καὶ ἐπιτιμῶμεν· τοῖς μὲν γὰρ διὰ φύσιν αἰσχροῖς οὐδεὶς ἐπιτιμᾷ, τοῖς δὲ δι' ἀγυμνασίαν καὶ [25] ἀμέλειαν. ὁμοίως δὲ καὶ περὶ ἀσθένειαν καὶ πῆρωσιν· οὐθεὶς γὰρ ἂν ὀνειδίσαιε τυφλῷ φύσει ἢ ἐκ νόσου ἢ ἐκ πληγῆς, ἀλλὰ μᾶλλον ἐλεῆσαι· τῷ δ' ἐξ οἰνοφλυγίας ἢ ἄλλης ἀκολασίας πᾶς ἂν ἐπιτιμήσαι. τῶν δὲ περὶ τὸ σῶμα κακιῶν αἱ ἐφ' ἡμῖν ἐπιτιμῶνται, αἱ δὲ μὴ ἐφ' ἡμῖν οὐ. εἰ [30] δ' οὕτω, καὶ ἐπὶ τῶν ἄλλων αἱ ἐπιτιμώμεναι τῶν κακιῶν ἐφ' ἡμῖν ἂν εἴεν. εἰ δέ τις λέγοι ὅτι πάντες ἐφίενται τοῦ φαινομένου ἀγαθοῦ, τῆς δὲ φαντασίας οὐ κύριοι, 1114b [1] ἀλλ' ὁποῖός ποθ' ἕκαστός ἐστι, τοιοῦτο καὶ τὸ τέλος φαίνεται αὐτῷ· εἰ μὲν οὖν ἕκαστος ἑαυτῷ τῆς ἑξέως ἐστί πως αἴτιος, καὶ τῆς φαντασίας ἔσται πως αὐτὸς αἴτιος· εἰ δὲ μή, οὐθεὶς

αὐτῷ αἴτιος τοῦ κακοποιεῖν, ἀλλὰ δι' ἄγνοιαν τοῦ τέλους ταῦτα [5] πράττει, διὰ τούτων οἰόμενος αὐτῷ τὸ ἄριστον ἔσσεσθαι, ἡ δὲ τοῦ τέλους ἔφεσις οὐκ αὐθαίρετος, ἀλλὰ φῦναι δεῖ ὥσπερ ὄψιν ἔχοντα, ἣ κρινεῖ καλῶς καὶ τὸ κατ' ἀλήθειαν ἀγαθὸν αἰρήσεται, καὶ ἔστιν εὐφυῆς ᾧ τοῦτο καλῶς πέφυκεν· τὸ γὰρ μέγιστον καὶ κάλλιστον, καὶ ὁ παρ' ἐτέρου μὴ οἷόν [10] τε λαβεῖν μηδὲ μαθεῖν, ἀλλ' οἷον ἔφυ τοιοῦτον ἔξει, καὶ τὸ εὖ καὶ τὸ καλῶς τοῦτο πεφυκέναι ἡ τελεία καὶ ἀληθινὴ ἂν εἴη εὐφυῖα. εἰ δὴ ταῦτ' ἐστὶν ἀληθῆ, τί μᾶλλον ἡ ἀρετὴ τῆς κακίας ἔσται ἐκούσιον; ἀμφοῖν γὰρ ὁμοίως, τῷ ἀγαθῷ καὶ τῷ κακῷ, τὸ τέλος φύσει ἢ ὅπωςδὴποτε φαίνεται [15] καὶ κεῖται, τὰ δὲ λοιπὰ πρὸς τοῦτο ἀναφέροντες πράττουσιν ὅπωςδὴποτε. εἴτε δὴ τὸ τέλος μὴ φύσει ἐκάστῳ φαίνεται οἷονδὴποτε, ἀλλὰ τι καὶ παρ' αὐτόν ἐστιν, εἴτε τὸ μὲν τέλος φυσικόν, τῷ δὲ τὰ λοιπὰ πράττειν ἐκούσιως τὸν σπουδαῖον ἢ ἀρετὴ ἐκούσιόν ἐστιν, οὐθὲν ἥττον καὶ ἡ κακία [20] ἐκούσιον ἂν εἴη· ὁμοίως γὰρ καὶ τῷ κακῷ ὑπάρχει τὸ δι' αὐτόν ἐν ταῖς πράξεσι καὶ εἰ μὴ ἐν τῷ τέλει. εἰ οὖν, ὥσπερ λέγεται, ἐκούσιοί εἰσιν αἱ ἀρεταί (καὶ γὰρ τῶν ἔξεων συναίτιοί πως αὐτοὶ ἐσμεν, καὶ τῷ ποιοῖ τινες εἶναι τὸ τέλος τοιόνδε τιθέμεθα), καὶ αἱ κακίαι ἐκούσιοι ἂν εἴεν· [25] ὁμοίως γάρ. κοινῇ μὲν οὖν περὶ τῶν ἀρετῶν εἴρηται ἡμῖν τό τε γένος τύπῳ, ὅτι μεσότητές εἰσιν καὶ ὅτι ἔξεις, ὑφ' ὧν τε γίνονται, ὅτι τούτων πρακτικαὶ <καὶ> καθ' αὐτάς, καὶ ὅτι ἐφ' ἡμῖν καὶ ἐκούσιοι, καὶ οὕτως ὥς ἂν ὁ ὀρθὸς λόγος [30] προστάξῃ. οὐχ ὁμοίως δὲ αἱ πράξεις ἐκούσιοί εἰσι καὶ αἱ ἔξεις· τῶν μὲν γὰρ πράξεων ἀπ' ἀρχῆς μέχρι τοῦ τέλους κύριοι ἐσμεν, εἰδότες τὰ καθ' ἕκαστα, τῶν ἔξεων δὲ τῆς ἀρχῆς, 1115a [1] καθ' ἕκαστα δὲ ἡ πρόσθεσις οὐ γνώριμος, ὥσπερ ἐπὶ τῶν ἀρρώστιων· ἀλλ' ὅτι ἐφ' ἡμῖν ἦν οὕτως ἢ μὴ οὕτω χρῆσασθαι, διὰ τοῦτο ἐκούσιοι. ἀναλαβόντες δὲ περὶ ἐκάστης εἵπωμεν τίνες εἰσὶ καὶ [5] περὶ ποῖα καὶ πῶς· ἅμα δ' ἔσται δῆλον καὶ πόσαι εἰσίν. καὶ πρῶτον περὶ ἀνδρείας.

ὅτι μὲν οὖν μεσότης ἐστὶ περὶ φόβους καὶ θάρρη, ἥδη φανερόν γεγενῆται· φοβούμεθα δὲ δῆλον ὅτι τὰ φοβερά, ταῦτα δ' ἐστὶν ὡς ἀπλῶς εἰπεῖν κακά· διὸ καὶ τὸν φόβον ὀρίζονται προσδοκίαν κακοῦ. [10] φοβούμεθα μὲν οὖν πάντα τὰ κακά, οἷον ἀδοξίαν πενίαν νόσον ἀφιλίαν θάνατον, ἀλλ' οὐ περὶ πάντα δοκεῖ ὁ ἀνδρεῖος εἶναι· ἔνια γὰρ καὶ δεῖ φοβεῖσθαι καὶ καλόν, τὸ δὲ μὴ αἰσχρόν, οἷον ἀδοξίαν· ὁ μὲν γὰρ φοβούμενος ἐπιεικῆς καὶ αἰδήμων, ὁ δὲ μὴ φοβούμενος

ἀναίσχυντος. λέγεται [15] δ' ὑπό τινων ἀνδρείος κατὰ μεταφοράν· ἔχει γάρ τι ὅμοιον τῷ ἀνδρείῳ· ἄφοβος γάρ τις καὶ ὁ ἀνδρείος. πενίαν δ' ἴσως οὐ δεῖ φοβεῖσθαι οὐδὲ νόσον, οὐδ' ὅλως ὅσα μὴ ἀπὸ κακίας μηδὲ δι' αὐτόν. ἀλλ' οὐδ' ὁ περὶ ταῦτα ἄφοβος ἀνδρείος. λέγομεν δὲ καὶ τοῦτον καθ' ὁμοιότητα. [20] ἔνιοι γὰρ ἐν τοῖς πολεμικοῖς κινδύνοις δειλοὶ ὄντες ἐλευθέριοι εἰσι καὶ πρὸς χρημάτων ἀποβολὴν εὐθαρσῶς ἔχουσιν. οὐδὲ δὴ εἴ τις ὕβριν περὶ παῖδας καὶ γυναῖκα φοβεῖται ἢ φθόνον ἢ τι τῶν τοιούτων, δειλὸς ἐστίν· οὐδ' εἰ θαρρῆι μέλλων μαστιγοῦσθαι, ἀνδρείος. περὶ ποῖα οὖν τῶν φοβερῶν [25] ὁ ἀνδρείος; ἢ περὶ τὰ μέγιστα; οὐθίς γὰρ ὑπομενετικώτερος τῶν δεινῶν. φοβερώτατον δ' ὁ θάνατος· πέρας γάρ, καὶ οὐδὲν ἔτι τῷ τεθνεῶτι δοκεῖ οὐτ' ἀγαθὸν οὔτε κακὸν εἶναι. δόξειε δ' ἂν οὐδὲ περὶ θάνατον τὸν ἐν παντὶ ὁ ἀνδρείος εἶναι, οἷον ἐν θαλάττῃ ἢ νόσοις. ἐν τίσιν οὖν; ἢ ἐν [30] τοῖς καλλίστοις; τοιοῦτοι δὲ οἱ ἐν πολέμῳ· ἐν μεγίστῳ γὰρ καὶ καλλίστῳ κινδύνῳ. ὁμόλογοι δὲ τούτοις εἰσι καὶ αἱ τιμαὶ αἱ ἐν ταῖς πόλεσι καὶ παρὰ τοῖς μονάρχοις. κυρίως δὴ λέγοιτ' ἂν ἀνδρείος ὁ περὶ τὸν καλὸν θάνατον ἀδεῆς, καὶ ὅσα θάνατον ἐπιφέρει ὑπόγυια ὄντα· τοιαῦτα δὲ μάλιστα [35] τὰ κατὰ πόλεμον. οὐ μὴν ἀλλὰ καὶ ἐν θαλάττῃ καὶ ἐν νόσοις ἀδεῆς ὁ ἀνδρείος, 1115b [1] οὐχ οὕτω δὲ ὥς οἱ θαλάττιοι· οἱ μὲν γὰρ ἀπεγνώκασιν τὴν σωτηρίαν καὶ τὸν θάνατον τὸν τοιοῦτον δυσχεραίνουσιν, οἱ δὲ εὐέλπιδές εἰσι παρὰ τὴν ἐμπειρίαν. ἅμα δὲ καὶ ἀνδρίζονται ἐν οἷς ἐστὶν ἀλκὴ [5] ἢ καλὸν τὸ ἀποθανεῖν· ἐν ταῖς τοιαύταις δὲ φθοραῖς οὐδέτερον ὑπάρχει.

τὸ δὲ φοβερὸν οὐ πᾶσι μὲν τὸ αὐτό, λέγομεν δέ τι καὶ ὑπὲρ ἄνθρωπον. τοῦτο μὲν οὖν παντὶ φοβερὸν τῷ γε νοῦν ἔχοντι· τὰ δὲ κατ' ἄνθρωπον διαφέρει μεγέθει καὶ τῷ [10] μᾶλλον καὶ ἥττον· ὁμοίως δὲ καὶ τὰ θαρράλεα. ὁ δὲ ἀνδρείος ἀνέκπληκτος ὥς ἄνθρωπος. φοβήσεται μὲν οὖν καὶ τὰ τοιαῦτα, ὥς δεῖ δὲ καὶ ὥς ὁ λόγος ὑπομενεῖ τοῦ καλοῦ ἔνεκα· τοῦτο γὰρ τέλος τῆς ἀρετῆς. ἔστι δὲ μᾶλλον καὶ ἥττον ταῦτα φοβεῖσθαι, καὶ ἔτι τὰ μὴ φοβερὰ ὥς τοιαῦτα [15] φοβεῖσθαι. γίνεται δὲ τῶν ἀμαρτιῶν ἢ μὲν ὅτι <ὁ> οὐ δεῖ, ἢ δὲ ὅτι οὐχ ὥς δεῖ, ἢ δὲ ὅτι οὐχ ὅτε, ἢ τι τῶν τοιούτων· ὁμοίως δὲ καὶ περὶ τὰ θαρράλεα. ὁ μὲν οὖν ἂν δεῖ καὶ οὗ ἔνεκα ὑπομένων καὶ φοβούμενος, καὶ ὥς δεῖ καὶ ὅτε, ὁμοίως δὲ καὶ θαρρῶν, ἀνδρείος· κατ' ἀξίαν γάρ, καὶ ὥς ἂν ὁ λόγος, [20] πάσχει καὶ πράττει ὁ

ἀνδρεῖος. τέλος δὲ πάσης ἐνεργείας ἐστὶ τὸ κατὰ τὴν ἔξιν. καὶ τῷ
 ἀνδρεῖῳ δὲ ἡ ἀνδρεία καλὸν. τοιοῦτον δὴ καὶ τὸ τέλος· ὀρίζεται γὰρ
 ἕκαστον τῷ τέλει. καλοῦ δὲ ἔνεκα ὁ ἀνδρεῖος ὑπομένει καὶ πράττει
 τὰ κατὰ τὴν ἀνδρείαν. τῶν δ' ὑπερβαλλόντων ὁ μὲν τῇ ἀφοβίᾳ [25]
 ἀνώνυμος (εἴρηται δ' ἡμῖν ἐν τοῖς πρότερον ὅτι πολλά ἐστὶν
 ἀνώνυμα), εἴη δ' ἂν τις μαινόμενος ἢ ἀνάληγτος, εἰ μὴδὲν φοβοῖτο,
 μήτε σεισμὸν μήτε κύματα, καθάπερ φασὶ τοὺς Κελτοὺς· ὁ δὲ τῷ
 θαρρῆν ὑπερβάλλον περι τὰ φοβερά θρασὺς. δοκεῖ δὲ καὶ ἀλαζῶν
 εἶναι ὁ θρασὺς καὶ [30] προσποιητικὸς ἀνδρείας· ὥς γοῦν ἐκεῖνος
 περι τὰ φοβερά ἔχει, οὗτος βούλεται φαίνεσθαι· ἐν οἷς οὖν δύναται,
 μιμεῖται. διὸ καὶ εἰσὶν οἱ πολλοὶ αὐτῶν θρασυδελιοὶ· ἐν τούτοις γὰρ
 θρασυνόμενοι τὰ φοβερά οὐχ ὑπομένουσιν. ὁ δὲ τῷ φοβεῖσθαι
 ὑπερβάλλον δειλὸς· καὶ γὰρ ἂ μὴ δεῖ [35] καὶ ὥς οὐ δεῖ, καὶ πάντα
 τὰ τοιαῦτα ἀκολουθεῖ αὐτῷ. 1116a [1] ἐλλείπει δὲ καὶ τῷ θαρρῆν·
 ἀλλ' ἐν ταῖς λύπαις ὑπερβάλλον μᾶλλον καταφανὴς ἐστίν. δύσελπις
 δὴ τις ὁ δειλός· πάντα γὰρ φοβεῖται. ὁ δ' ἀνδρεῖος ἐναντίως· τὸ γὰρ
 θαρρῆν εὐέλπιδος. περι ταῦτα μὲν οὖν ἐστὶν ὃ τε δειλὸς [5] καὶ ὁ
 θρασὺς καὶ ὁ ἀνδρεῖος, διαφόρως δ' ἔχουσι πρὸς αὐτά· οἱ μὲν γὰρ
 ὑπερβάλλουσι καὶ ἐλλείπουσιν, ὃ δὲ μέσως ἔχει καὶ ὥς δεῖ· καὶ οἱ
 μὲν θρασεῖς προπετεῖς, καὶ βουλόμενοι πρὸ τῶν κινδύνων ἐν αὐτοῖς
 δ' ἀφίστανται, οἱ δ' ἀνδρεῖοι ἐν τοῖς ἔργοις ὀξεῖς, πρότερον δ'
 ἡσύχιοι. [10] καθάπερ οὖν εἴρηται, ἡ ἀνδρεία μεσότης ἐστὶ περι
 θαρράλεια καὶ φοβερά, ἐν οἷς εἴρηται, καὶ ὅτι καλὸν αἰρεῖται καὶ
 ὑπομένει, ἢ ὅτι αἰσχροὺς τὸ μῆ. τὸ δ' ἀποθνήσκειν φεύγοντα πενίαν ἢ
 ἔρωτα ἢ τι λυπηρὸν οὐκ ἀνδρείου, ἀλλὰ μᾶλλον δειλοῦ· μαλακία γὰρ
 τὸ φεύγειν τὰ ἐπίπονα, καὶ [15] οὐχ ὅτι καλὸν ὑπομένει, ἀλλὰ
 φεύγων κακόν.

ἔστι μὲν οὖν ἡ ἀνδρεία τοιοῦτόν τι, λέγονται δὲ καὶ ἕτεραι κατὰ
 πέντε τρόπους· πρῶτον μὲν ἡ πολιτικὴ· μάλιστα γὰρ ἔοικεν. δοκοῦσι
 γὰρ ὑπομένειν τοὺς κινδύνους οἱ πολῖται διὰ τὰ ἐκ τῶν νόμων
 ἐπιτίμια καὶ τὰ ὀνειδῆ καὶ διὰ τὰς τιμὰς· [20] καὶ διὰ τοῦτο
 ἀνδρειότατοι δοκοῦσιν εἶναι παρ' οἷς οἱ δειλοὶ ἄτιμοι καὶ οἱ ἀνδρεῖοι
 ἔντιμοι. τοιούτους δὲ καὶ Ὅμηρος ποιεῖ, οἷον τὸν Διομήδην καὶ τὸν
 Ἔκτορα·

Πουλυδάμας μοι πρῶτος ἐλεγχείην ἀναθήσει·

καὶ [Διομήδης] [25]

Ἔκτωρ γάρ ποτε φήσῃ ἐνὶ Τρώεσσ' ἀγορεύων

Τυδείδης ὑπ' ἐμείο.

ὠμοίωται δ' αὕτη μάλιστα τῇ πρότερον εἰρημένη, ὅτι δι' ἀρετὴν γίνεται· δι' αἰδῶ γάρ καὶ διὰ καλοῦ ὄρεξιν (τιμῆς γάρ) καὶ φυγὴν ὀνειδούς, αἰσχροῦ ὄντος. τάξαι δ' ἂν τις [30] καὶ τοὺς ὑπὸ τῶν ἀρχόντων ἀναγκαζομένους εἰς ταυτό· χεῖρους δ', ὅσῳ οὐ δι' αἰδῶ ἀλλὰ διὰ φόβον αὐτὸ δρῶσι, καὶ φεύγοντες οὐ τὸ αἰσχρὸν ἀλλὰ τὸ λυπηρόν· ἀναγκάζουσι γὰρ οἱ κύριοι, ὥσπερ ὁ Ἔκτωρ

ὃν δέ κ' ἐγὼν ἀπάνευθε μάχης πτώσσοντα νοήσω,

οὗ οἱ ἄρκιον ἐσσεῖται φυγέειν κύνας.

καὶ οἱ προστάττοντες, κἂν ἀναχωρῶσι τύπτοντες, τὸ αὐτὸ δρῶσι, 1116b [1] καὶ οἱ πρὸ τῶν τάφρων καὶ τῶν τοιούτων παρατάττοντες· πάντες γὰρ ἀναγκάζουσιν. δεῖ δ' οὐ δι' ἀνάγκην ἀνδρεῖον εἶναι, ἀλλ' ὅτι καλόν. δοκεῖ δὲ καὶ ἡ ἐμπειρία ἡ περὶ ἕκαστα ἀνδρεία εἶναι· ὅθεν καὶ ὁ Σωκράτης φήθη [5] ἐπιστήμην εἶναι τὴν ἀνδρείαν. τοιοῦτοι δὲ ἄλλοι μὲν ἐν ἄλλοις, ἐν τοῖς πολεμικοῖς δ' οἱ στρατιῶται· δοκεῖ γὰρ εἶναι πολλὰ κενὰ τοῦ πολέμου, ἃ μάλιστα συνεισάκουσιν οὗτοι· φαίνονται δὲ ἀνδρεῖοι, ὅτι οὐκ ἴσασιν οἱ ἄλλοι οἷά ἐστιν. εἴτα ποιῆσαι καὶ μὴ παθεῖν μάλιστα δύνανται ἐκ τῆς ἐμπειρίας, [10] δυνάμενοι χρῆσθαι τοῖς ὅπλοις καὶ τοιαῦτα ἔχοντες ὅποια ἂν εἴη καὶ πρὸς τὸ ποιῆσαι καὶ πρὸς τὸ μὴ παθεῖν κράτιστα· ὥσπερ οὖν ἀνόπλοις ὀπλισμένοι μάχονται καὶ ἀθληταὶ ιδιώταις· καὶ γὰρ ἐν τοῖς τοιούτοις ἀγῶσιν οὐχ οἱ ἀνδρειότατοι μαχιμώτατοί εἰσιν, ἀλλ' οἱ μάλιστα [15] ἰσχύοντες καὶ τὰ σώματα ἄριστα ἔχοντες. οἱ στρατιῶται δὲ δειλοὶ γίνονται, ὅταν ὑπερτείνῃ ὁ κίνδυνος καὶ λείπωνται τοῖς πλήθεσι καὶ ταῖς παρασκευαῖς· πρῶτοι γὰρ φεύγουσι, τὰ δὲ πολιτικὰ μένοντα ἀποθνήσκει, ὅπερ κάπῃ τῷ Ἑρμαίῳ συνέβη. τοῖς μὲν γὰρ αἰσχρὸν τὸ φεύγειν [20] καὶ ὁ θάνατος τῆς τοιαύτης σωτηρίας αἰρετώτερος· οἱ δὲ καὶ ἐξ ἀρχῆς ἐκινδύνευον ὡς κρείττους ὄντες,

γνόντες δὲ φεύγουσι, τὸν θάνατον μᾶλλον τοῦ αἰσχροῦ φοβούμενοι· ὁ δ' ἀνδρεῖος οὐ τοιοῦτος. καὶ τὸν θυμὸν δ' ἐπὶ τὴν ἀνδρείαν φέρουσιν· ἀνδρεῖοι γὰρ εἶναι δοκοῦσι καὶ οἱ διὰ θυμὸν [25] ὥσπερ τὰ θηρία ἐπὶ τοὺς τρώσαντας φερόμενα, ὅτι καὶ οἱ ἀνδρεῖοι θυμοειδεῖς· ἱητικώτατον γὰρ ὁ θυμὸς πρὸς τοὺς κινδύνους, ὅθεν καὶ Ὅμηρος “σθένος ἔμβαλε θυμῷ” καὶ “μένος καὶ θυμὸν ἔγειρε” καὶ “δριμὺ δ' ἀνὰ ῥίνας μένος” καὶ “ἔξεσεν αἷμα”· πάντα γὰρ τὰ τοιαῦτα ἔοικε σημαίνειν [30] τὴν τοῦ θυμοῦ ἔγερσιν καὶ ὁρμήν. οἱ μὲν οὖν ἀνδρεῖοι διὰ τὸ καλὸν πράττουσιν, ὁ δὲ θυμὸς συνεργεῖ αὐτοῖς· τὰ θηρία δὲ διὰ λύπην· διὰ γὰρ τὸ πληγῆναι ἢ διὰ τὸ φοβεῖσθαι, ἐπεὶ ἕαν γε ἐν ὕλῃ [ἢ ἐν ἔλει] ἦ, οὐ προσέρχονται. οὐ δὴ ἔστιν ἀνδρεία διὰ τὸ ὑπ' ἀλγηδόνης καὶ θυμοῦ ἐξελαυνόμενα [35] πρὸς τὸν κίνδυνον ὁρμᾶν, οὐθὲν τῶν δεινῶν προορῶντα, ἐπεὶ οὕτω γε κἂν οἱ ὄνοι ἀνδρεῖοι εἶεν πεινῶντες· τυπτόμενοι γὰρ οὐκ ἀφίστανται τῆς νομῆς· 1117a [1] καὶ οἱ μοιχοὶ δὲ διὰ τὴν ἐπιθυμίαν τολμηρὰ πολλὰ δρῶσιν. [οὐ δὴ ἔστιν ἀνδρεία τὰ δι' ἀλγηδόνης ἢ θυμοῦ ἐξελαυνόμενα πρὸς τὸν κίνδυνον.] φυσικωτάτῃ δ' ἔοικεν ἡ διὰ τὸν θυμὸν εἶναι, καὶ προσλαβοῦσα [5] προαίρεσιν καὶ τὸ οὗ ἔνεκα ἀνδρεία εἶναι. καὶ οἱ ἄνθρωποι δὴ ὀργιζόμενοι μὲν ἀλγοῦσι, τιμωρούμενοι δ' ἡδοναί· οἱ δὲ διὰ ταῦτα μαχόμενοι μάχιμοι μὲν, οὐκ ἀνδρεῖοι δέ· οὐ γὰρ διὰ τὸ καλὸν οὐδ' ὥς ὁ λόγος, ἀλλὰ διὰ πάθος· παραπλήσιον δ' ἔχουσιν τι. οὐδὲ δὴ οἱ εὐέλπιδες [10] ὄντες ἀνδρεῖοι· διὰ γὰρ τὸ πολλάκις καὶ πολλοὺς νενικηκέναι θαρρόουσιν ἐν τοῖς κινδύνους· παρόμοιοι δέ, ὅτι ἄμφω θαρράλαιοι· ἀλλ' οἱ μὲν ἀνδρεῖοι διὰ τὰ πρότερον εἰρημένα θαρράλαιοι, οἱ δὲ διὰ τὸ οἶσθαι κράτιστοι εἶναι καὶ μηθὲν ἂν παθεῖν. τοιοῦτον δὲ ποιοῦσι καὶ οἱ μεθυσκόμενοι· [15] εὐέλπιδες γὰρ γίνονται. ὅταν δὲ αὐτοῖς μὴ συμβῇ τὰ τοιαῦτα, φεύγουσιν· ἀνδρείου δ' ἦν τὰ φοβερὰ ἀνθρώπων ὄντα καὶ φαινόμενα ὑπομένειν, ὅτι καλὸν καὶ αἰσχρὸν τὸ μῆ. διὸ καὶ ἀνδρειοτέρου δοκεῖ εἶναι τὸ ἐν τοῖς αἰφνιδίοις φόβοις ἄφοβον καὶ ἀτάραχον εἶναι ἢ ἐν τοῖς προδήλοις· [20] ἀπὸ ἔξω γὰρ μᾶλλον ἦν, ὅτι ἦττον ἐκ παρασκευῆς· τὰ προφανῆ μὲν γὰρ κἂν ἐκ λογισμοῦ καὶ λόγου τις προέλοιτο, τὰ δ' ἐξαίφνης κατὰ τὴν ἔξιν. ἀνδρεῖοι δὲ φαίνονται καὶ οἱ ἀγνοοῦντες, καὶ εἰσὶν οὐ πόρρω τῶν εὐελπίδων, χείρους δ' ὅσῳ ἀξίωμα οὐδὲν ἔχουσιν, ἐκεῖνοι δέ. διὸ καὶ μένουσιν τινα [25] χρόνον· οἱ δ' ἡπατημένοι, ἕαν γινῶσιν ὅτι ἕτερον ἢ ὑποπεύσωσι, φεύγουσιν· ὅπερ οἱ Ἀργεῖοι ἔπαθον περιπεσόντες τοῖς Λάκωσιν ὡς Σικυωνίοις. οἱ τε

δη ἀνδρεῖοι εἰρηνται ποῖοί τινες, καὶ οἱ δοκοῦντες ἀνδρεῖοι. περὶ θάρρη δὲ καὶ φόβους ἡ ἀνδρεία οὕσα οὐχ ὁμοίως [30] περὶ ἄμφω ἐστίν, ἀλλὰ μᾶλλον περὶ τὰ φοβερά· ὁ γὰρ ἐν τούτοις ἀτάραχος καὶ περὶ ταῦθ' ὥς δεῖ ἔχων ἀνδρείος μᾶλλον ἢ ὁ περὶ τὰ θάρράλεα. τῷ δὴ τὰ λυπηρὰ ὑπομένειν, ὥς εἴρηται, ἀνδρεῖοι λέγονται. διὸ καὶ ἐπίλυπον ἡ ἀνδρεία, καὶ δικαίως ἐπαινεῖται· χαλεπώτερον γὰρ τὰ λυπηρὰ [35] ὑπομένειν ἢ τῶν ἡδέων ἀπέχεσθαι. 1117b [1] οὐ μὴν ἀλλὰ δόξειεν ἂν εἶναι τὸ κατὰ τὴν ἀνδρείαν τέλος ἡδύ, ὑπὸ τῶν κύκλῳ δ' ἀφανίζεσθαι, οἷον κὰν τοῖς γυμνικοῖς ἀγῶσι γίνεται· τοῖς γὰρ πύκταις τὸ μὲν τέλος ἡδύ, οὗ ἔνεκα, ὁ στέφανος καὶ αἱ τιμαί, τὸ δὲ τύπτεσθαι ἀλγεινόν, εἶπερ [5] σάρκινοι, καὶ λυπηρόν, καὶ πᾶς ὁ πόνος· διὰ δὲ τὸ πολλὰ ταῦτ' εἶναι, μικρὸν ὄν τὸ οὗ ἔνεκα οὐδὲν ἡδὺ φαίνεται ἔχειν. εἰ δὴ τοιοῦτόν ἐστι καὶ τὸ περὶ τὴν ἀνδρείαν, ὁ μὲν θάνατος καὶ τὰ τραύματα λυπηρὰ τῷ ἀνδρείῳ καὶ ἄκοντι ἔσται, ὑπομενεῖ δὲ αὐτὰ ὅτι καλὸν ἢ ὅτι αἰσχρὸν τὸ μῆ. καὶ [10] ὅσῳ ἂν μᾶλλον τὴν ἀρετὴν ἔχη πᾶσαν καὶ εὐδαιμονέστερος ἦ, μᾶλλον ἐπὶ τῷ θανάτῳ λυπήσεται· τῷ τοιούτῳ γὰρ μάλιστα ζῆν ἄξιον, καὶ οὗτος μεγίστων ἀγαθῶν ἀποστερεῖται εἰδώς, λυπηρόν δὲ τοῦτο. ἀλλ' οὐδὲν ἥττον ἀνδρείος, ἴσως δὲ καὶ μᾶλλον, ὅτι τὸ ἐν τῷ πολέμῳ καλὸν ἀντ' [15] ἐκείνων αἰρεῖται. οὐ δὴ ἐν ἀπάσαις ταῖς ἀρεταῖς τὸ ἡδέως ἐνεργεῖν ὑπάρχει, πλὴν ἐφ' ὅσον τοῦ τέλους ἐφάπτεται. στρατιώτας δ' οὐδὲν ἴσως κωλύει μὴ τοὺς τοιούτους κρατίστους εἶναι, ἀλλὰ τοὺς ἥττον μὲν ἀνδρείους, ἄλλο δ' ἀγαθὸν μηδὲν ἔχοντας· ἔτοιμοι γὰρ οὗτοι πρὸς τοὺς κινδύνους, καὶ τὸν [20] βίον πρὸς μικρὰ κέρδη καταλλάττονται. περὶ μὲν οὖν ἀνδρείας ἐπὶ τοσοῦτον εἰρήσθω· τί δ' ἐστίν, οὐ χαλεπὸν τύπῳ γε περιλαβεῖν ἐκ τῶν εἰρημένων.

μετὰ δὲ ταύτην περὶ σωφροσύνης λέγωμεν· δοκοῦσι γὰρ τῶν ἀλόγων μερῶν αὐταὶ εἶναι αἱ ἀρεταί. ὅτι μὲν [25] οὖν μεσότης ἐστὶ περὶ ἡδονὰς ἢ σωφροσύνη, εἴρηται ἡμῖν· ἥττον γὰρ καὶ οὐχ ὁμοίως ἐστὶ περὶ τὰς λύπας· ἐν τοῖς αὐτοῖς δὲ καὶ ἡ ἀκολασία φαίνεται. περὶ ποίας οὖν τῶν ἡδονῶν, νῦν ἀφορίσωμεν. διηρήσθωσαν δὴ αἱ ψυχικαὶ καὶ αἱ σωματικαί, οἷον φιλοτιμία φιλομάθεια· ἐκάτερος γὰρ [30] τούτων χαίρει, οὗ φιλητικός ἐστίν, οὐδὲν πάσχοντος τοῦ σώματος, ἀλλὰ μᾶλλον τῆς διανοίας· οἱ δὲ περὶ τὰς τοιαύτας ἡδονὰς οὔτε σῶφρονες οὔτε ἀκόλαστοι λέγονται. ὁμοίως δ' οὐδ' οἱ περὶ τὰς ἄλλας ὅσαι μὴ σωματικαὶ εἰσιν· τοὺς γὰρ φιλομύθους καὶ

διηγητικούς και περί τῶν τυχόντων [35] κατατρίβοντας τὰς ἡμέρας ἀδολέσχας, ἀκολάστους δ' οὐ λέγομεν, 1118a [1] οὐδὲ τοὺς λυπουμένους ἐπὶ χρήμασιν ἢ φίλοις. περὶ δὲ τὰς σωματικὰς εἴη ἂν ἡ σωφροσύνη, οὐ πάσας δὲ οὐδὲ ταύτας· οἱ γὰρ χαίροντες τοῖς διὰ τῆς ὄψεως, οἷον χρώμασι καὶ σχήμασι καὶ γραφῇ, οὔτε σώφρονες οὔτε ἀκόλαστοι [5] λέγονται· καίτοι δόξειεν ἂν εἶναι καὶ ὥς δεῖ χαίρειν καὶ τούτοις, καὶ καθ' ὑπερβολὴν καὶ ἔλλειπιν. ὁμοίως δὲ καὶ ἐν τοῖς περὶ τὴν ἀκοήν· τοὺς γὰρ ὑπερβεβλημένως χαίροντας μέλεσιν ἢ ὑποκρίσει οὐθεὶς ἀκολάστους λέγει, οὐδὲ τοὺς ὥς δεῖ σώφρονας. οὐδὲ τοὺς περὶ τὴν ὁσμήν, πλὴν κατὰ [10] συμβεβηκός· τοὺς γὰρ χαίροντας μῆλων ἢ ρόδων ἢ θυμιαμάτων ὁσμαῖς οὐ λέγομεν ἀκολάστους, ἀλλὰ μᾶλλον τοὺς μύρων ἢ ὄψων· χαίρουσι γὰρ τούτοις οἱ ἀκόλαστοι, ὅτι διὰ τούτων ἀνάμνησις γίνεται αὐτοῖς τῶν ἐπιθυμημάτων. ἴδοι δ' ἂν τις καὶ τοὺς ἄλλους, ὅταν πεινώσι, χαίροντας ταῖς [15] τῶν βρωμάτων ὁσμαῖς· τὸ δὲ τοιούτοις χαίρειν ἀκολάστου· τούτῳ γὰρ ἐπιθυμήματα ταῦτα. οὐκ ἔστι δὲ οὐδ' ἐν τοῖς ἄλλοις ζώοις κατὰ ταύτας τὰς αἰσθήσεις ἡδονὴ πλὴν κατὰ συμβεβηκός. οὐδὲ γὰρ ταῖς ὁσμαῖς τῶν λαγωῶν αἱ κύνες χαίρουσιν ἀλλὰ τῇ βρώσει, τὴν δ' αἰσθῆσιν ἢ ὁσμὴ ἐποίησεν· [20] οὐδ' ὁ λέων τῇ φωνῇ τοῦ βοῦς ἀλλὰ τῇ ἐδωδῇ· ὅτι δ' ἐγγύς ἐστι, διὰ τῆς φωνῆς ἦσθετο, καὶ χαίρειν δὴ ταύτῃ φαίνεται· ὁμοίως δ' οὐδ' ἰδὼν “ἢ [εὐρὼν] ἔλαφον ἢ ἄγριον αἶγα,” ἀλλ' ὅτι βορὰν ἔξει. περὶ τὰς τοιαύτας δ' ἡδονὰς ἡ σωφροσύνη καὶ ἡ ἀκολασία ἐστὶν ὧν καὶ τὰ λοιπὰ [25] ζῶα κοινωνεῖ, ὅθεν ἀνδραποδώδεις καὶ θηριώδεις φαίνονται· αὗται δ' εἰσὶν ἀφή καὶ γεῦσις. φαίνονται δὲ καὶ τῇ γεύσει ἐπὶ μικρὸν ἢ οὐθὲν χρῆσθαι· τῆς γὰρ γεύσεως ἐστὶν ἡ κρίσις τῶν χυμῶν, ὅπερ ποιοῦσιν οἱ τοὺς οἶνους δοκιμάζοντες καὶ τὰ ὄψα ἀρτύοντες· οὐ πάνυ δὲ χαίρουσι τούτοις, ἢ οὐχ [30] οἱ γε ἀκόλαστοι, ἀλλὰ τῇ ἀπολαύσει, ἢ γίνεται πᾶσα δι' ἀφῆς καὶ ἐν σιτίοις καὶ ἐν ποτοῖς καὶ τοῖς ἀφροδισίοις λεγομένοις. διὸ καὶ ἠῤῥατό τις ὀνοφάγος ὢν τὸν φάρυγγα αὐτῷ μακρότερον γεράνου γενέσθαι, ὥς ἡδόμενος τῇ ἀφῇ. 1118b [1] κοινοτάτῃ δὴ τῶν αἰσθήσεων καθ' ἣν ἡ ἀκολασία· καὶ δόξειεν ἂν δικαίως ἐπονείδιστος εἶναι, ὅτι οὐχ ἢ ἄνθρωποι ἐσμεν ὑπάρχει, ἀλλ' ἢ ζῶα. τὸ δὴ τοιούτοις χαίρειν καὶ μάλιστα ἀγαπᾶν θηριώδες. καὶ γὰρ αἱ ἐλευθεριώταται [5] τῶν διὰ τῆς ἀφῆς ἡδονῶν ἀφήρηνται, οἷον αἱ ἐν τοῖς γυμνασίοις διὰ τρίψεως καὶ τῆς θερμασίας γινόμεναι· οὐ γὰρ περὶ πᾶν τὸ σῶμα ἢ τοῦ ἀκολάστου ἀφή, ἀλλὰ

περί τινα μέρος.

τῶν δ' ἐπιθυμιῶν αἱ μὲν κοιναὶ δοκοῦσιν εἶναι, αἱ δ' ἴδιοι καὶ ἐπίθετοι· οἷον ἡ μὲν τῆς τροφῆς φυσικὴ· [10] πᾶς γὰρ ἐπιθυμεῖ ὁ ἐνδεὴς ξηρᾶς ἢ ὑγρᾶς τροφῆς, ὅτε δὲ ἀμφοῖν, καὶ εὐνῆς, φησὶν Ὅμηρος, ὁ νέος καὶ ἀκμάζων· τὸ δὲ τοιαῦδε ἢ τοιαῦδε, οὐκέτι πᾶς, οὐδὲ τῶν αὐτῶν. διὸ φαίνεται ἡμέτερον εἶναι. οὐ μὴν ἄλλ' ἔχει γέ τι καὶ φυσικόν· ἕτερα γὰρ ἑτέροις ἐστὶν ἡδέα, καὶ ἔνια πᾶσιν ἡδίω [15] τῶν τυχόντων. ἐν μὲν οὖν ταῖς φυσικαῖς ἐπιθυμίαις ὀλίγοι ἁμαρτάνουσι καὶ ἐφ' ἓν, ἐπὶ τὸ πλεῖον· τὸ γὰρ ἐσθίειν τὰ τυχόντα ἢ πίνειν ἕως ἂν ὑπερπλησθῇ, ὑπερβάλλειν ἐστὶ τὸ κατὰ φύσιν τῷ πλήθει· ἀναπλήρωσις γὰρ τῆς ἐνδεείας ἢ φυσικῆ ἐπιθυμίας. διὸ λέγονται οὗτοι γαστρίμαργοι, ὥς [20] παρὰ τὸ δέον πληροῦντες αὐτήν. τοιοῦτοι δὲ γίνονται οἱ λίαν ἀνδραποδώδεις. περὶ δὲ τὰς ἰδίας τῶν ἡδονῶν πολλοὶ καὶ πολλαχῶς ἁμαρτάνουσιν. τῶν γὰρ φιλοτοιοῦτων λεγομένων ἢ τῷ χαίρειν οἷς μὴ δεῖ, ἢ τῷ μᾶλλον ἢ ὥς οἱ πολλοί, ἢ μὴ ὥς δεῖ, κατὰ πάντα δ' οἱ ἀκόλαστοι ὑπερβάλλουσιν· [25] καὶ γὰρ χαίρουσιν ἐνίοις οἷς οὐ δεῖ (μισητὰ γάρ), καὶ εἴ τισι δεῖ χαίρειν τῶν τοιούτων, μᾶλλον ἢ δεῖ καὶ ἢ ὥς οἱ πολλοὶ χαίρουσιν. ἡ μὲν οὖν περὶ τὰς ἡδονὰς ὑπερβολὴ ὅτι ἀκολασία καὶ ψεκτόν, δηλόν· περὶ δὲ τὰς λύπας οὐχ ὥσπερ ἐπὶ τῆς ἀνδρείας τῷ ὑπομένειν λέγεται [30] σώφρων οὐδ' ἀκόλαστος τῷ μῇ, ἀλλ' ὁ μὲν ἀκόλαστος τῷ λυπεῖσθαι μᾶλλον ἢ δεῖ ὅτι τῶν ἡδέων οὐ τυγχάνει (καὶ τὴν λύπην δὲ ποιεῖ αὐτῷ ἡ ἡδονή), ὁ δὲ σώφρων τῷ μὴ λυπεῖσθαι τῇ ἀπουσίᾳ καὶ τῷ ἀπέχεσθαι τοῦ ἡδέος. 1119a [1] ὁ μὲν οὖν ἀκόλαστος ἐπιθυμεῖ τῶν ἡδέων πάντων ἢ τῶν μάλιστα, καὶ ἄγεται ὑπὸ τῆς ἐπιθυμίας ὥστε ἀντὶ τῶν ἄλλων ταῦθ' αἰρεῖσθαι· διὸ καὶ λυπεῖται καὶ ἀποτυγχάνων καὶ ἐπιθυμῶν· μετὰ λύπης γὰρ ἡ ἐπιθυμία· ἀτόπῳ [5] δ' ἔοικε τὸ δι' ἡδονὴν λυπεῖσθαι. ἐλλείποντες δὲ τὰ περὶ τὰς ἡδονὰς καὶ ἥττον ἢ δεῖ χαίροντες οὐ πάνυ γίνονται· οὐ γὰρ ἀνθρωπικὴ ἐστὶν ἡ τοιαύτη ἀναισθησία· καὶ γὰρ τὰ λοιπὰ ζῷα διακρίνει τὰ βρώματα, καὶ τοῖς μὲν χαίρει τοῖς δ' οὐ· εἰ δὲ τῷ μηδὲν ἐστὶν ἡδὺ μηδὲ διαφέρει ἕτερον ἑτέρου, πόρρω [10] ἂν εἴη τοῦ ἀνθρώπου εἶναι· οὐ τέτευχε δ' ὁ τοιοῦτος ὀνόματος διὰ τὸ μὴ πάνυ γίνεσθαι. ὁ δὲ σώφρων μέσῳ μὲν περὶ ταῦτ' ἔχει· οὔτε γὰρ ἡδεται οἷς μάλιστα ὁ ἀκόλαστος, ἀλλὰ μᾶλλον δυσχεραίνει, οὐδ' ὅλως οἷς μὴ δεῖ οὐδὲ σφόδρα τοιούτῳ οὐδενί, οὔτ' ἀπόντων λυπεῖται οὐδ' ἐπιθυμεῖ, ἢ

μετρίως, οὐδὲ [15] μᾶλλον ἢ δεῖ, οὐδ' ὅτε μὴ δεῖ, οὐδ' ὅλως τῶν τοιούτων οὐδέν· ὅσα δὲ πρὸς ὑγίειάν ἐστιν ἢ πρὸς εὐεξίαν ἡδέα ὄντα, τούτων ὀρέζεται μετρίως καὶ ὡς δεῖ, καὶ τῶν ἄλλων ἡδέων μὴ ἐμποδίων τούτοις ὄντων ἢ παρὰ τὸ καλὸν ἢ ὑπὲρ τὴν οὐσίαν. ὁ γὰρ οὕτως ἔχων μᾶλλον ἀγαπᾷ τὰς τοιαύτας ἡδονὰς τῆς [20] ἀξίας· ὁ δὲ σῶφρων οὐ τοιοῦτος, ἀλλ' ὡς ὁ ὀρθὸς λόγος.

ἐκουσίῳ δὲ μᾶλλον ἔοικεν ἡ ἀκολασία τῆς δειλίας. ἡ μὲν γὰρ δι' ἡδονήν, ἡ δὲ διὰ λύπην, ὧν τὸ μὲν αἰρετόν, τὸ δὲ φευκτόν· καὶ ἡ μὲν λύπη ἐξίστησι καὶ φθείρει τὴν τοῦ ἔχοντος φύσιν, ἡ δὲ ἡδονὴ οὐδέν τοιοῦτο ποιεῖ. μᾶλλον [25] δὴ ἐκούσιον. διὸ καὶ ἐπονειδιστότερον· καὶ γὰρ ἐθισθῆναι ῥᾶον πρὸς αὐτά· πολλὰ γὰρ ἐν τῷ βίῳ τὰ τοιαῦτα, καὶ οἱ ἐθισμοὶ ἀκίνδυνοι, ἐπὶ δὲ τῶν φοβερῶν ἀνάπαλιν. δόξειε δ' ἂν οὐχ ὁμοίως ἐκούσιον ἢ δειλία εἶναι τοῖς καθ' ἕκαστον· αὐτὴ μὲν γὰρ ἄλυπος, ταῦτα δὲ διὰ λύπην ἐξίστησιν, ὥστε [30] καὶ τὰ ὅπλα ῥίπτειν καὶ τᾶλλα ἀσχημονεῖν· διὸ καὶ δοκεῖ βίαια εἶναι. τῷ δ' ἀκολάστῳ ἀνάπαλιν τὰ μὲν καθ' ἕκαστα ἐκούσια (ἐπιθυμοῦντι γὰρ καὶ ὀρεγομένῳ), τὸ δ' ὅλον ἦττον· οὐθεὶς γὰρ ἐπιθυμεῖ ἀκόλαστος εἶναι. τὸ δ' ὄνομα τῆς ἀκολασίας καὶ ἐπὶ τὰς παιδικὰς ἀμαρτίας φέρομεν· 1119b [1] ἔχουσι γὰρ τινὰ ὁμοιότητα. πότερον δ' ἀπὸ ποτέρου καλεῖται, οὐθὲν πρὸς τὰ νῦν διαφέρει, δηλὸν δ' ὅτι τὸ ὕστερον ἀπὸ τοῦ προτέρου. οὐ κακῶς δ' ἔοικε μετενηγέσθαι· κεκολάσθαι γὰρ δεῖ τὸ τῶν αἰσχυρῶν ὀρεγόμενον καὶ πολλὴν αὐξήσιν ἔχον, τοιοῦτον [5] δὲ μάλιστα ἢ ἐπιθυμία καὶ ὁ παῖς· κατ' ἐπιθυμίαν γὰρ ζῶσι καὶ τὰ παιδιά, καὶ μάλιστα ἐν τούτοις ἢ τοῦ ἡδέος ὄρεξις. εἰ οὖν μὴ ἔσται εὐπειθεὶς καὶ ὑπὸ τὸ ἄρχον, ἐπὶ πολὺ ἤξει· ἄπληστος γὰρ ἢ τοῦ ἡδέος ὄρεξις καὶ πανταχόθεν τῷ ἀνοήτῳ, καὶ ἡ τῆς ἐπιθυμίας ἐνέργεια αὐξοῖ τὸ συγγενές, [10] καὶ μεγάλα καὶ σφοδρὰ ὥσι, καὶ τὸν λογισμὸν ἐκκρούουσιν. διὸ δεῖ μετρίως εἶναι αὐτὰς καὶ ὀλίγας, καὶ τῷ λόγῳ μὴτὲν ἐναντιοῦσθαι — τὸ δὲ τοιοῦτον εὐπειθεὶς λέγομεν καὶ κεκολασμένον — ὥσπερ δὲ τὸν παῖδα δεῖ κατὰ τὸ πρόσταγμα τοῦ παιδαγωγοῦ ζῆν, οὕτω καὶ τὸ ἐπιθυμητικὸν κατὰ τὸν [15] λόγον. διὸ δεῖ τοῦ σῶφρονος τὸ ἐπιθυμητικὸν συμφωνεῖν τῷ λόγῳ· σκοπὸς γὰρ ἀμφοῖν τὸ καλόν, καὶ ἐπιθυμεῖ ὁ σῶφρων ὧν δεῖ καὶ ὡς δεῖ καὶ ὅτε· οὕτω δὲ τάττει καὶ ὁ λόγος. ταῦτ' οὖν ἡμῖν εἰρήσθω περὶ σωφροσύνης.

Βιβλίο 4

λέγωμεν δ' ἐξῆς περὶ ἐλευθεριότητος. δοκεῖ δὴ εἶναι ἡ περὶ χρήματα μεσότης· ἐπαινείται γὰρ ὁ ἐλευθέριος οὐκ ἐν τοῖς πολεμικοῖς, οὐδ' ἐν οἷς ὁ σῶφρων, οὐδ' αὖ ἐν ταῖς κρίσεσιν, [25] ἀλλὰ περὶ δόσιν χρημάτων καὶ λήψιν, μᾶλλον δ' ἐν τῇ δόσει. χρήματα δὲ λέγομεν πάντα ὅσων ἡ ἀξία νομίσματι μετρεῖται. ἔστι δὲ καὶ ἡ ἀσωτία καὶ ἡ ἀνελευθερία περὶ χρήματα ὑπερβολαὶ καὶ ἐλλείψεις· καὶ τὴν μὲν ἀνελευθερίαν προσάπτομεν ἀεὶ τοῖς μᾶλλον ἢ δεῖ περὶ χρήματα [30] σπουδάζουσι, τὴν δ' ἀσωτίαν ἐπιφέρομεν ἐνίστε συμπλέκοντες· τοὺς γὰρ ἀκρατεῖς καὶ εἰς ἀκολασίαν δαπανηροὺς ἀσώτους καλοῦμεν. διὸ καὶ φανυλότατοι δοκοῦσιν εἶναι· πολλὰς γὰρ ἅμα κακίας ἔχουσιν. οὐ δὲ οἰκείως προσαγορεύονται· βούλεται γὰρ ἄσωτος εἶναι ὁ ἐν κακὸν ἔχων, 1120a [1] τὸ φθείρειν τὴν οὐσίαν· ἄσωτος γὰρ ὁ δι' αὐτὸν ἀπολλύμενος, δοκεῖ δ' ἀπώλειά τις αὐτοῦ εἶναι καὶ ἡ τῆς οὐσίας φθορά, ὥς τοῦ ζῆν διὰ τούτων ὄντος. οὕτω δὲ τὴν ἀσωτίαν ἐκδεχόμεθα. ὦν δ' ἐστὶ χρεία, ἔστι τούτοις χρῆσθαι καὶ εὖ καὶ κακῶς· [5] ὁ πλοῦτος δ' ἐστὶ τῶν χρησίμων· ἐκάστῳ δ' ἄριστα χρῆται ὁ ἔχων τὴν περὶ τοῦτο ἀρετὴν· καὶ πλούτῳ δὲ χρήσεται ἄριστα ὁ ἔχων τὴν περὶ τὰ χρήματα ἀρετὴν· οὗτος δ' ἐστὶν ὁ ἐλευθέριος. χρήσις δ' εἶναι δοκεῖ χρημάτων δαπάνη καὶ δόσις· ἡ δὲ λήψις καὶ ἡ φυλακὴ κτήσις μᾶλλον. διὸ μᾶλλον [10] ἐστὶ τοῦ ἐλευθερίου τὸ διδόναι οἷς δεῖ ἢ λαμβάνειν ὅθεν δεῖ καὶ μὴ λαμβάνειν ὅθεν οὐ δεῖ. τῆς γὰρ ἀρετῆς μᾶλλον τὸ εὖ ποιεῖν ἢ τὸ εὖ πάσχειν, καὶ τὰ καλὰ πράττειν μᾶλλον ἢ τὰ αἰσχροὰ μὴ πράττειν· οὐκ ἄδηλον δ' ὅτι τῇ μὲν δόσει ἔπεται τὸ εὖ ποιεῖν καὶ τὸ καλὰ πράττειν, τῇ δὲ λήψει [15] τὸ εὖ πάσχειν ἢ μὴ αἰσχροπραγεῖν. καὶ ἡ χάρις τῷ διδόντι, οὐ τῷ μὴ λαμβάνοντι, καὶ ὁ ἔπαινος δὲ μᾶλλον. καὶ ῥᾶον δὲ τὸ μὴ λαβεῖν τοῦ δοῦναι· τὸ γὰρ οἰκεῖον ἥττον προΐενται μᾶλλον ἢ οὐ λαμβάνουσι τὸ ἀλλότριον. καὶ ἐλευθέριοι δὲ λέγονται οἱ διδόντες· οἱ δὲ μὴ λαμβάνοντες οὐκ [20] εἰς ἐλευθεριότητα ἐπαινοῦνται, ἀλλ' οὐχ ἥττον εἰς δικαιοσύνην· οἱ δὲ λαμβάνοντες οὐδ' ἐπαινοῦνται πάνυ. φιλοῦνται δὲ σχεδὸν μάλιστα οἱ ἐλευθέριοι τῶν ἀπ' ἀρετῆς· ὠφέλιμοι γὰρ, τοῦτο δ' ἐν τῇ δόσει. αἱ δὲ κατ' ἀρετὴν πράξεις καλαὶ καὶ τοῦ καλοῦ ἕνεκα. καὶ ὁ ἐλευθέριος οὖν δώσει τοῦ καλοῦ ἕνεκα [25] καὶ ὀρθῶς· οἷς γὰρ δεῖ καὶ ὅσα καὶ ὅτε, καὶ τᾶλλα ὅσα ἔπεται τῇ

ὀρθῇ δόσει· καὶ ταῦτα ἡδέως ἢ ἀλύπως· τὸ γὰρ κατ' ἀρετὴν ἡδὺ ἢ ἄλυπον, ἥκιστα δὲ λυπηρόν. ὁ δὲ διδοὺς οἷς μὴ δεῖ, ἢ μὴ τοῦ καλοῦ ἔνεκα ἀλλὰ διὰ τιν' ἄλλην αἰτίαν, οὐκ ἐλευθέριος ἀλλ' ἄλλος τις ῥηθήσεται. οὐδ' ὁ λυπηρῶς· [30] μᾶλλον γὰρ ἔλοιτ' ἂν τὰ χρήματα τῆς καλῆς πράξεως, τοῦτο δ' οὐκ ἐλευθερίου. οὐδὲ λήγεται δὲ ὅθεν μὴ δεῖ· οὐ γὰρ ἐστὶ τοῦ μὴ τιμῶντος τὰ χρήματα ἢ τοιαύτη λῆψις. οὐκ ἂν εἴη δὲ οὐδ' αἰτητικός· οὐ γὰρ ἐστὶ τοῦ εὖ ποιούντος εὐχερῶς εὐεργετεῖσθαι. ὅθεν δὲ δεῖ, λήγεται, 1120b [1] οἷον ἀπὸ τῶν ιδίων κτημάτων, οὐχ ὥς καλὸν ἀλλ' ὥς ἀναγκαῖον, ὅπως ἔχη διδόναι. οὐδ' ἀμελήσει τῶν ιδίων, βουλόμενός γε διὰ τούτων τισὶν ἐπαρκεῖν. οὐδὲ τοῖς τυχοῦσι δώσει, ἵνα ἔχη διδόναι οἷς δεῖ καὶ ὅτε καὶ οὗ καλόν. ἐλευθερίου δ' ἐστὶ [5] σφόδρα καὶ τὸ ὑπερβάλλειν ἐν τῇ δόσει, ὥστε καταλείπειν ἑαυτῷ ἐλάττω· τὸ γὰρ μὴ βλέπειν ἐφ' ἑαυτὸν ἐλευθερίου. κατὰ τὴν οὐσίαν δ' ἡ ἐλευθεριότης λέγεται· οὐ γὰρ ἐν τῷ πλήθει τῶν διδομένων τὸ ἐλευθέριον, ἀλλ' ἐν τῇ τοῦ διδόντος ἔξει, αὕτη δὲ κατὰ τὴν οὐσίαν δίδωσιν. οὐθὲν δὲ κωλύει [10] ἐλευθεριώτερον εἶναι τὸν τὰ ἐλάττω διδόντα, ἐὰν ἀπ' ἐλαττόνων διδῶ. ἐλευθεριώτεροι δὲ εἶναι δοκοῦσιν οἱ μὴ κτησάμενοι ἀλλὰ παραλαβόντες τὴν οὐσίαν· ἄπειροί τε γὰρ τῆς ἐνδείας, καὶ πάντες ἀγαπῶσι μᾶλλον τὰ αὐτῶν ἔργα, ὥσπερ οἱ γονεῖς καὶ οἱ ποιηταί. πλουτεῖν δ' οὐ ῥάδιον τὸν [15] ἐλευθέριον, μήτε ληπτικὸν ὄντα μήτε φυλακτικόν, προετικὸν δὲ καὶ μὴ τιμῶντα δι' αὐτὰ τὰ χρήματα ἀλλ' ἔνεκα τῆς δόσεως. διὸ καὶ ἐγκαλεῖται τῇ τύχῃ ὅτι οἱ μάλιστα ἄξιοι ὄντες ἥκιστα πλουτοῦσιν. συμβαίνει δ' οὐκ ἀλόγως τοῦτο· οὐ γὰρ οἷόν τε χρήματ' ἔχειν μὴ ἐπιμελόμενον ὅπως ἔχη, ὥσπερ [20] οὐδ' ἐπὶ τῶν ἄλλων. οὐ μὴν δώσει γε οἷς οὐ δεῖ οὐδ' ὅτε μὴ δεῖ, οὐδ' ὅσα ἄλλα τοιαῦτα· οὐ γὰρ ἂν ἔτι πράττοι κατὰ τὴν ἐλευθεριότητα, καὶ εἰς ταῦτα ἀναλώσας οὐκ ἂν ἔχοι εἰς ἃ δεῖ ἀναλίσκειν. ὥσπερ γὰρ εἴρηται, ἐλευθερίος ἐστὶν ὁ κατὰ τὴν οὐσίαν δαπανῶν καὶ εἰς ἃ δεῖ· ὁ δ' ὑπερβάλλων [25] ἄσωτος. διὸ τοὺς τυράννους οὐ λέγομεν ἀσώτους· τὸ γὰρ πλῆθος τῆς κτήσεως οὐ δοκεῖ ῥάδιον εἶναι ταῖς δόσεσι καὶ ταῖς δαπάναις ὑπερβάλλειν. τῆς ἐλευθεριότητος δὲ μεσότητος οὔσης περὶ χρημάτων δόσιν καὶ λῆψιν, ὁ ἐλευθέριος καὶ δώσει καὶ δαπανήσει εἰς ἃ δεῖ καὶ ὅσα δεῖ, ὁμοίως ἐν μικροῖς [30] καὶ μεγάλοις, καὶ ταῦτα ἡδέως· καὶ λήγεται δ' ὅθεν δεῖ καὶ ὅσα δεῖ. τῆς ἀρετῆς γὰρ περὶ ἄμφω οὔσης μεσότητος, ποιήσει ἀμφοτέρω ὥς δεῖ· ἔπεται γὰρ τῇ ἐπιεικεῖ δόσει ἢ τοιαύτη λῆψις, ἢ δὲ μὴ τοιαύτη

έναντία ἐστίν. αἱ μὲν οὖν ἐπόμεναι γίνονται ἅμα ἐν τῷ αὐτῷ, αἱ δ' ἐναντίαι δῆλον ὡς οὐ. 1121a [1] ἐὰν δὲ παρὰ τὸ δέον καὶ τὸ καλῶς ἔχον συμβαίνει αὐτῷ ἀναλίσκειν, λυπήσεται, μετρίως δὲ καὶ ὡς δεῖ· τῆς ἀρετῆς γὰρ καὶ ἡδεσθαι καὶ λυπεῖσθαι ἐφ' οἷς δεῖ καὶ ὡς δεῖ. καὶ εὐκοινωνήτος δ' ἐστὶν ὁ ἐλευθέριος εἰς χρήματα. [5] δύναται γὰρ ἀδικεῖσθαι, μὴ τιμῶν γε τὰ χρήματα, καὶ μᾶλλον ἀχθόμενος εἴ τι δέον μὴ ἀνάλωσεν ἢ λυπούμενος εἰ μὴ δέον τι ἀνάλωσεν, καὶ τῷ Σιμωνίδῃ οὐκ ἀρεσκόμενος. ὁ δ' ἄσωτος καὶ ἐν τούτοις διαμαρτάνει· οὔτε γὰρ ἡδεται ἐφ' οἷς δεῖ οὐδὲ ὡς δεῖ οὔτε λυπεῖται· ἔσται δὲ προῖοῦσι φανερώτερον. [10] εἴρηται δὴ ἡμῖν ὅτι ὑπερβολαὶ καὶ ἐλλείψεις εἰσὶν ἢ ἀσωτία καὶ ἢ ἀνελευθερία, καὶ ἐν δυσὶν, ἐν δόσει καὶ λήψει· καὶ τὴν δαπάνην γὰρ εἰς τὴν δόσιν τίθεμεν. ἢ μὲν οὖν ἀσωτία τῷ διδόναι καὶ μὴ λαμβάνειν ὑπερβάλλει, τῷ δὲ λαμβάνειν ἐλλείπει, ἢ δ' ἀνελευθερία τῷ διδόναι μὲν ἐλλείπει, [15] τῷ λαμβάνειν δ' ὑπερβάλλει, πλὴν ἐν μικροῖς. τὰ μὲν οὖν τῆς ἀσωτίας οὐ πάνυ συνδυάζεται· οὐ γὰρ ῥᾷδιον μηδαμόθεν λαμβάνοντα πᾶσι διδόναι· ταχέως γὰρ ἐπιλείπει ἢ οὐσία τοὺς ιδιώτας διδόντας, οἷπερ καὶ δοκοῦσιν ἄσωτοι εἶναι· ἐπεὶ ὁ γε τοιοῦτος δόξειεν ἂν οὐ μικρῷ βελτίων εἶναι [20] τοῦ ἀνελευθέρου. εὐίατός τε γὰρ ἐστὶ καὶ ὑπὸ τῆς ἡλικίας καὶ ὑπὸ τῆς ἀπορίας, καὶ ἐπὶ τὸ μέσον δύναται ἐλθεῖν. ἔχει γὰρ τὰ τοῦ ἐλευθερίου· καὶ γὰρ δίδωσι καὶ οὐ λαμβάνει, οὐδέτερον δ' ὡς δεῖ οὐδ' εὖ. εἰ δὴ τοῦτο ἐθισθεῖη ἢ πως ἄλλως μεταβάλῃ, εἴη ἂν ἐλευθέριος· δώσει γὰρ οἷς δεῖ, [25] καὶ οὐ λήψεται ὅθεν οὐ δεῖ. διὸ καὶ δοκεῖ οὐκ εἶναι φαῦλος τὸ ἥθος· οὐ γὰρ μοχθηροῦ οὐδ' ἀγεννοῦς τὸ ὑπερβάλλειν διδόντα καὶ μὴ λαμβάνοντα, ἡλιθίου δέ. ὁ δὲ τοῦτον τὸν τρόπον ἄσωτος πολὺ δοκεῖ βελτίων τοῦ ἀνελευθέρου εἶναι διὰ τε τὰ εἰρημένα, καὶ ὅτι ὁ μὲν ὠφελεῖ πολλούς, ὁ δὲ οὐθένα, [30] ἀλλ' οὐδ' αὐτόν. ἀλλ' οἱ πολλοὶ τῶν ἀσώτων, καθάπερ εἴρηται, καὶ λαμβάνουσιν ὅθεν μὴ δεῖ, καὶ εἰσὶ κατὰ τοῦτο ἀνελεύθεροι. ληπτικοὶ δὲ γίνονται διὰ τὸ βούλεσθαι μὲν ἀναλίσκειν, εὐχερῶς δὲ τοῦτο ποιεῖν μὴ δύνασθαι· ταχὺ γὰρ ἐπιλείπει αὐτοὺς τὰ ὑπάρχοντα. ἀναγκάζονται οὖν ἐτέρωθεν πορίζειν. 1121b [1] ἅμα δὲ καὶ διὰ τὸ μηδὲν τοῦ καλοῦ φροντίζειν ὀλιγώρως καὶ πάντοθεν λαμβάνουσιν· διδόναι γὰρ ἐπιθυμοῦσι, τὸ δὲ πῶς ἢ πόθεν οὐδὲν αὐτοῖς διαφέρει. διόπερ οὐδ' ἐλευθέριοι αἱ δόσεις αὐτῶν εἰσὶν· οὐ γὰρ καλαί, οὐδὲ τούτου [5] ἕνεκα, οὐδὲ ὡς δεῖ· ἀλλ' ἐνίοτε οὖς δεῖ πένεσθαι, τούτους πλουσίους ποιοῦσι, καὶ τοῖς μὲν μετρίοις τὰ ἥθη οὐδὲν ἂν δοῖεν, τοῖς

δὲ κόλαξιν ἢ τιν' ἄλλην ἡδονὴν πορίζουσι πολλά. διὸ καὶ ἀκόλαστοι αὐτῶν εἰσὶν οἱ πολλοί· εὐχερῶς γὰρ ἀναλίσκοντες καὶ εἰς τὰς ἀκολασίας δαπανηροὶ εἰσι, καὶ διὰ τὸ μὴ πρὸς [10] τὸ καλὸν ζῆν πρὸς τὰς ἡδονὰς ἀποκλίνουσιν. ὁ μὲν οὖν ἄσωτος ἀπαιδαγώγητος γενόμενος εἰς ταῦτα μεταβαίνει, τυχὼν δ' ἐπιμελείας εἰς τὸ μέσον καὶ εἰς τὸ δέον ἀφίκοιτ' ἄν. ἢ δ' ἀνελευθερία ἀνιάτός τ' ἐστίν (δοκεῖ γὰρ τὸ γῆρας καὶ πᾶσα ἀδυναμία ἀνελευθέρους ποιεῖν), καὶ συμφυέστερον τοῖς ἀνθρώποις [15] τῆς ἀσωτίας· οἱ γὰρ πολλοὶ φιλοχρήματοι μᾶλλον ἢ δοτικοί. καὶ διατείνει δ' ἐπὶ πολὺ, καὶ πολυειδὲς ἐστίν· πολλοὶ γὰρ τρόποι δοκοῦσι τῆς ἀνελευθερίας εἶναι. ἐν δυσὶ γὰρ οὕσα, τῇ τ' ἐλλείψει τῆς δόσεως καὶ τῇ ὑπερβολῇ τῆς λήψεως, οὐ πᾶσιν ὁλόκληρος παραγίνεται, ἀλλ' ἐνίοτε χωρίζεται, [20] καὶ οἱ μὲν τῇ λήψει ὑπερβάλλουσιν, οἱ δὲ τῇ δόσει ἐλλείπουσιν. οἱ μὲν γὰρ ἐν ταῖς τοιαύταις προσηγορίαις οἷον φειδωλοὶ γλίσχροι κίμβικες, πάντες τῇ δόσει ἐλλείπουσι, τῶν δ' ἄλλοτρίων οὐκ ἐφίενται οὐδὲ βούλονται λαμβάνειν, οἱ μὲν δὲ διὰ τινὰ ἐπιείκειαν καὶ εὐλάβειαν τῶν αἰσχυρῶν [25] (δοκοῦσι γὰρ ἔνιοι ἢ φασί γε διὰ τοῦτο φυλάττειν, ἵνα μὴ ποτ' ἀναγκασθῶσιν αἰσχυρόν τι πρᾶξαι· τούτων δὲ καὶ ὁ κυμινοπρίστης καὶ πᾶς ὁ τοιοῦτος· ὠνόμασται δ' ἀπὸ τῆς ὑπερβολῆς τοῦ μηδὲν ἂν δοῦναι)· οἱ δ' αὖ διὰ φόβον ἀπέχονται τῶν ἄλλοτρίων ὥς οὐ ῥάδιον αὐτὸν μὲν τὰ ἐτέρων [30] λαμβάνειν, τὰ δ' αὐτοῦ ἐτέρους μὴ· ἀρέσκει οὖν αὐτοῖς τὸ μῆτε λαμβάνειν μῆτε διδόναι. οἱ δ' αὖ κατὰ τὴν λῆψιν ὑπερβάλλουσιν τῷ πάντοθεν λαμβάνειν καὶ πᾶν, οἷον οἱ τὰς ἀνελευθέρους ἐργασίας ἐργαζόμενοι, πορνοβοσκοὶ καὶ πάντες οἱ τοιοῦτοι, καὶ τοκισταὶ κατὰ μικρὰ καὶ ἐπὶ πολλῷ. 1122a [1] πάντες γὰρ οὗτοι ὅθεν οὐ δεῖ λαμβάνουσι, καὶ ὅποσον οὐ δεῖ. κοινὸν δ' ἐπ' αὐτοῖς ἡ αἰσχροκέρδεια φαίνεται· πάντες γὰρ ἔνεκα κέρδους, καὶ τούτου μικροῦ, ὀνειδῇ ὑπομένουσιν. τοὺς γὰρ τὰ μεγάλα μὴ ὅθεν δὲ δεῖ λαμβάνοντας, μηδὲ ἃ δεῖ, οὐ [5] λέγομεν ἀνελευθέρους, οἷον τοὺς τυράννους πόλεις πορθοῦντας καὶ ἱερὰ συλῶντας, ἀλλὰ πονηροὺς μᾶλλον καὶ ἀσεβεῖς καὶ ἀδίκους. ὁ μέντοι κυβευτὴς καὶ ὁ λωποδύτης καὶ ὁ ληστής τῶν ἀνελευθέρων εἰσὶν· αἰσχροκερδεῖς γάρ. κέρδους γὰρ ἔνεκα ἀμφοτέροι πραγματεύονται καὶ ὀνειδῇ ὑπομένουσιν, καὶ [10] οἱ μὲν κινδύνους τοὺς μεγίστους ἔνεκα τοῦ λήμματος, οἱ δ' ἀπὸ τῶν φίλων κερδαίνουσιν, οἷς δεῖ διδόναι. ἀμφοτέροι δὲ ὅθεν οὐ δεῖ κερδαίνειν βουλόμενοι αἰσχροκερδεῖς· καὶ πᾶσαι δὴ αἱ τοιαῦται λήψεις ἀνελεύθεροι. εἰκότως δὲ τῇ

ἐλευθεριότητι ἀνελευθερία ἐναντίον λέγεται· μεῖζόν τε γάρ ἐστι κακὸν τῆς [15] ἀσωτίας, καὶ μᾶλλον ἐπὶ ταύτην ἀμαρτάνουσιν ἢ κατὰ τὴν λεχθεῖσαν ἀσωτίαν. περὶ μὲν οὖν ἐλευθεριότητος καὶ τῶν ἀντικειμένων κακιῶν τοσαῦτ' εἰρήσθω.

δόξα δ' ἂν ἀκόλουθον εἶναι καὶ περὶ μεγαλοπρεπείας διελθεῖν. δοκεῖ γὰρ καὶ αὕτη περὶ χρήματά τις ἀρετὴ εἶναι· [20] οὐχ ὥσπερ δ' ἢ ἐλευθεριότης διατείνει περὶ πάσας τὰς ἐν χρήμασι πράξεις, ἀλλὰ περὶ τὰς δαπανηρὰς μόνον· ἐν τούτοις δ' ὑπερέχει τῆς ἐλευθεριότητος μεγέθει. καθάπερ γὰρ τοῦνομα αὐτὸ ὑποσημαίνει, ἐν μεγέθει πρέπουσα δαπάνη ἐστίν. τὸ δὲ μέγεθος πρὸς τι· οὐ γὰρ τὸ αὐτὸ δαπάνημα τριηράρχῳ [25] καὶ ἀρχιθεωρῷ. τὸ πρέπον δὴ πρὸς αὐτόν, καὶ ἐν ᾧ καὶ περὶ ὅ. ὁ δ' ἐν μικροῖς ἢ ἐν μετρίοις κατ' ἀξίαν δαπανῶν οὐ λέγεται μεγαλοπρεπής, οἷον τὸ

Hom. Od. 17.420

ἀλλ' ὁ ἐν μεγάλοις οὕτως. ὁ μὲν γὰρ μεγαλοπρεπὴς ἐλευθέριος, ὁ δ' ἐλευθέριος οὐδὲν μᾶλλον μεγαλοπρεπής. τῆς [30] τοιαύτης δ' ἔξωθεν ἢ μὲν ἔλλειψις μικροπρέπεια καλεῖται, ἢ δ' ὑπερβολὴ βανανυσία καὶ ἀπειροκαλία καὶ ὅσαι τοιαῦται, οὐχ ὑπερβάλλουσιν τῷ μεγέθει περὶ ἃ δεῖ, ἀλλ' ἐν οἷς οὐ δεῖ καὶ ὥς οὐ δεῖ λαμπρυνόμεναι· ὕστερον δ' ὑπὲρ αὐτῶν ἐροῦμεν. ὁ δὲ μεγαλοπρεπὴς ἐπιστήμονι ἔοικεν· τὸ πρέπον γὰρ [35] δύναται θεωρῆσαι καὶ δαπανῆσαι μεγάλα ἐμμελῶς. 1122b [1] ὥσπερ γὰρ ἐν ἀρχῇ εἵπομεν, ἢ ἔξις ταῖς ἐνεργείαις ὀρίζεται, καὶ ὧν ἐστίν. αἱ δὲ τοῦ μεγαλοπρεποῦς δαπάναι μεγάλα καὶ πρέπουσαι. τοιαῦτα δὴ καὶ τὰ ἔργα· οὕτω γὰρ ἔσται μέγα δαπάνημα καὶ πρέπον τῷ ἔργῳ. ὥστε τὸ μὲν ἔργον τῆς δαπάνης [5] ἄξιον δεῖ εἶναι, τὴν δὲ δαπάνην τοῦ ἔργου, ἢ καὶ ὑπερβάλλειν. δαπανήσει δὲ τὰ τοιαῦτα ὁ μεγαλοπρεπὴς τοῦ καλοῦ ἔνεκα· κοινὸν γὰρ τοῦτο ταῖς ἀρεταῖς. καὶ ἔτι ἡδέως καὶ προετικῶς· ἢ γὰρ ἀκριβολογία μικροπρεπές. καὶ πῶς κάλλιστον καὶ πρεπωδέστατον, σκέψαιτ' ἂν μᾶλλον ἢ πόσου καὶ [10] πῶς ἐλαχίστου. ἀναγκαῖον δὴ καὶ ἐλευθέριον τὸν μεγαλοπρεπῆ εἶναι. καὶ γὰρ ὁ ἐλευθέριος δαπανήσει ἃ δεῖ καὶ ὥς δεῖ· ἐν τούτοις δὲ τὸ μέγα τοῦ

μεγαλοπρεπούς, οἷον μέγεθος, περὶ ταῦτα τῆς ἐλευθεριότητος οὔσης, καὶ ἀπὸ τῆς ἴσης δαπάνης τὸ ἔργον ποιήσει μεγαλοπρεπέστερον. οὐ γὰρ ἡ αὐτὴ [15] ἀρετὴ κτήματος καὶ ἔργου. κτῆμα μὲν γὰρ τὸ πλείστου ἄξιον τιμιώτατον, οἷον χρυσός, ἔργον δὲ τὸ μέγα καὶ καλόν (τοῦ γὰρ τοιούτου ἡ θεωρία θαυμαστή, τὸ δὲ μεγαλοπρεπὲς θαυμαστόν)· καὶ ἔστιν ἔργου ἀρετὴ, μεγαλοπρέπεια, ἐν μεγέθει. ἔστι δὲ τῶν δαπανημάτων οἷα λέγομεν τὰ τίμια, οἷον τὰ [20] περὶ θεούς, ἀναθήματα καὶ κατασκευαὶ καὶ θυσίαι, ὁμοίως δὲ καὶ περὶ πᾶν τὸ δαιμόνιον, καὶ ὅσα πρὸς τὸ κοινὸν εὐφιλοτίμητά ἐστιν, οἷον εἴ που χορηγεῖν οἴονται δεῖν λαμπρῶς ἢ τριηραρχεῖν ἢ καὶ ἐστιᾶν τὴν πόλιν. ἐν ἅπασι δ' ὥσπερ εἴρηται, καὶ πρὸς τὸν πράττοντα ἀναφέρεται τὸ τίς [25] ὢν καὶ τίνων ὑπαρχόντων· ἄξια γὰρ δεῖ τούτων εἶναι, καὶ μὴ μόνον τῷ ἔργῳ ἀλλὰ καὶ τῷ ποιῶντι πρέπειν. διὸ πένης μὲν οὐκ ἂν εἴη μεγαλοπρεπής· οὐ γὰρ ἔστιν ἀφ' ὧν πολλὰ δαπανήσῃ πρεπόντως· ὁ δ' ἐπιχειρῶν ἡλίθιος· παρὰ τὴν ἀξίαν γὰρ καὶ τὸ δέον, κατ' ἀρετὴν δὲ τὸ ὀρθῶς. πρέπει [30] δὲ [καὶ] οἷς τοιαῦτα προϋπάρχει δι' αὐτῶν ἢ τῶν προγόνων ἢ ὧν αὐτοῖς μέτεστιν, καὶ τοῖς εὐγενέσι καὶ τοῖς ἐνδόξοις καὶ ὅσα τοιαῦτα· πάντα γὰρ ταῦτα μέγεθος ἔχει καὶ ἀξίωμα. μάλιστα μὲν οὖν τοιοῦτος ὁ μεγαλοπρεπής, καὶ ἐν τοῖς τοιούτοις δαπανήμασιν ἡ μεγαλοπρέπεια, ὥσπερ [35] εἴρηται· μέγιστα γὰρ καὶ ἐντιμότερα· τῶν δὲ ιδίων ὅσα εἰσάπαξ γίνεται, 1123a [1] οἷον γάμος καὶ εἴ τι τοιοῦτον, καὶ εἰ περὶ τι ἡ πᾶσα πόλις σπουδάζει ἢ οἱ ἐν ἀξιώματι, καὶ περὶ ξένων δὲ ὑποδοχὰς καὶ ἀποστολάς, καὶ δωρεὰς καὶ ἀντιδωρεάς· οὐ γὰρ εἰς ἑαυτὸν δαπανηρὸς ὁ μεγαλοπρεπής ἀλλ' [5] εἰς τὰ κοινά, τὰ δὲ δῶρα τοῖς ἀναθήμασιν ἔχει τι ὅμοιον. μεγαλοπρεπούς δὲ καὶ οἶκον κατασκευάσασθαι πρεπόντως τῷ πλούτῳ (κόσμος γάρ τις καὶ οὗτος), καὶ περὶ ταῦτα μᾶλλον δαπανᾶν ὅσα πολυχρόνια τῶν ἔργων (κάλλιστα γὰρ ταῦτα), καὶ ἐν ἐκάστοις τὸ πρέπον· οὐ γὰρ ταῦτ' ἀρμόζει [10] θεοῖς καὶ ἀνθρώποις, οὐδ' ἐν ἱερῷ καὶ τάφῳ. καὶ ἐπεὶ τῶν δαπανημάτων ἕκαστον μέγα ἐν τῷ γένει, καὶ μεγαλοπρεπέστατον <ἀπλῶς> μὲν τὸ ἐν μεγάλῳ μέγα, ἐνταῦθα δὲ τὸ ἐν τούτοις μέγα, καὶ διαφέρει τὸ ἐν τῷ ἔργῳ μέγα τοῦ ἐν τῷ δαπανήματι· σφαῖρα μὲν γὰρ ἡ καλλίστη ἢ λήκυθος μεγαλοπρέπειαν [15] ἔχει παιδικοῦ δώρου, ἡ δὲ τούτου τιμὴ μικρὸν καὶ ἀνελεύθερον· διὰ τοῦτό ἐστι τοῦ μεγαλοπρεπούς, ἐν ᾧ ἂν ποιῇ γένει, μεγαλοπρεπῶς ποιεῖν (τὸ γὰρ τοιοῦτον οὐκ εὐπέρβλητον) καὶ ἔχον

κατ' ἀξίαν τοῦ δαπανήματος. τοιοῦτος μὲν οὖν ὁ μεγαλοπρεπής· ὁ δ' ὑπερβάλλων καὶ βάναντος τῷ [20] παρὰ τὸ δέον ἀναλίσκειν ὑπερβάλλει, ὥσπερ εἴρηται. ἐν γὰρ τοῖς μικροῖς τῶν δαπανημάτων πολλὰ ἀναλίσκει καὶ λαμπρύνεται παρὰ μέλος, οἷον ἐρανιστὰς γαμικῶς ἐστιῶν, καὶ κωμωδοῖς χορηγῶν ἐν τῇ παρόδῳ πορφύραν εἰσφέρων, ὥσπερ οἱ Μεγαροῖ. καὶ πάντα τὰ τοιαῦτα ποιήσει οὐ τοῦ [25] καλοῦ ἕνεκα, ἀλλὰ τὸν πλοῦτον ἐπιδεικνύμενος, καὶ διὰ ταῦτα οἰόμενος θαυμάζεσθαι, καὶ οὗ μὲν δεῖ πολλὰ ἀναλῶσαι, ὀλίγα δαπανῶν, οὗ δ' ὀλίγα, πολλά. ὁ δὲ μικροπρεπὴς περὶ πάντα ἐλλείπει, καὶ τὰ μέγιστα ἀναλώσας ἐν μικρῷ τὸ καλὸν ἀπολεῖ, καὶ ὃ τι ἂν ποιῇ μέλλων καὶ [30] σκοπῶν πῶς ἂν ἐλάχιστον ἀναλώσαι, καὶ ταῦτ' ὀδυρόμενος, καὶ πάντ' οἰόμενος μείζω ποιεῖν ἢ δεῖ. εἰσὶ μὲν οὖν αἱ ἕξεις αὗται κακίαι, οὐ μὴν ὀνειδῇ γ' ἐπιφέρουσι διὰ τὸ μῆτε βλαβεραὶ τῷ πέλας εἶναι μῆτε λίαν ἀσχήμονες.

ἡ δὲ μεγαλοψυχία περὶ μέγала μὲν καὶ ἐκ τοῦ ὀνόματος [35] ἔοικεν εἶναι, περὶ ποῖα δ' ἐστὶ πρῶτον λάβωμεν· 1123b [1] διαφέρει δ' οὐδὲν τὴν ἕξιν ἢ τὸν κατὰ τὴν ἕξιν σκοπεῖν. δοκεῖ δὲ μεγαλόψυχος εἶναι ὁ μεγάλων αὐτὸν ἀξιῶν ἄξιος ὢν· ὁ γὰρ μὴ κατ' ἀξίαν αὐτὸ ποιῶν ἡλίθιος, τῶν δὲ κατ' ἀρετὴν οὐδεὶς ἡλίθιος οὐδ' ἀνόητος. μεγαλόψυχος μὲν οὖν ὁ εἰρημένος. [5] ὁ γὰρ μικρῶν ἄξιος καὶ τούτων ἀξιῶν ἑαυτὸν σώφρων, μεγαλόψυχος δ' οὐ· ἐν μεγέθει γὰρ ἡ μεγαλοψυχία, ὥσπερ καὶ τὸ κάλλος ἐν μεγάλῳ σώματι, οἱ μικροὶ δ' ἀστεῖοι καὶ σύμμετροι, καλοὶ δ' οὐ. ὁ δὲ μεγάλων ἑαυτὸν ἀξιῶν ἀνάξιος ὢν χαῦνος· ὁ δὲ μειζόνων ἢ ἄξιος οὐ πᾶς χαῦνος. ὁ δ' ἐλαττόνων [10] ἢ ἄξιος μικρόψυχος, ἐάν τε μεγάλων ἐάν τε μετρίων, ἐάν τε καὶ μικρῶν ἄξιος ὢν ἐτι ἐλαττόνων αὐτὸν ἀξιοῖ. καὶ μάλιστα ἂν δόξειεν ὁ μεγάλων ἄξιος· τί γὰρ ἂν ἐποίει, εἰ μὴ τοσοῦτων ἦν ἄξιος; ἔστι δὲ ὁ μεγαλόψυχος τῷ μὲν μεγέθει ἄκρος, τῷ δὲ ὡς δεῖ μέσος· τοῦ γὰρ κατ' ἀξίαν αὐτὸν [15] ἀξιοῖ· οἱ δ' ὑπερβάλλουσι καὶ ἐλλείπουσιν. εἰ δὲ μεγάλων ἑαυτὸν ἀξιοῖ ἄξιος ὢν, καὶ μάλιστα τῶν μεγίστων, περὶ ἐν μάλιστα ἂν εἴη. ἡ δ' ἀξία λέγεται πρὸς τὰ ἐκτὸς ἀγαθὰ· μέγιστον δὲ τοῦτ' ἂν θεΐμεν ὁ τοῖς θεοῖς ἀπονέμεμεν, καὶ οὗ μάλιστα ἐφίενται οἱ ἐν ἀξιώματι, καὶ τὸ ἐπὶ τοῖς καλλίστοις [20] ἄθλον· τοιοῦτον δ' ἡ τιμὴ· μέγιστον γὰρ δὴ τοῦτο τῶν ἐκτὸς ἀγαθῶν· περὶ τιμᾶς δὲ καὶ ἀτιμίας ὁ μεγαλόψυχός ἐστιν ὡς δεῖ. καὶ ἄνευ δὲ λόγου φαίνονται οἱ μεγαλόψυχοι περὶ τιμὴν εἶναι· τιμῆς γὰρ

μάλιστα [οἱ μεγάλοι] ἀξιοῦσιν ἑαυτούς, κατ' ἀξίαν δέ. ὁ δὲ μικρόψυχος ἐλλείπει καὶ πρὸς ἑαυτὸν [25] καὶ πρὸς τὸ τοῦ μεγαλοψύχου ἀξίωμα. ὁ δὲ χαῦνος πρὸς ἑαυτὸν μὲν ὑπερβάλλει, οὐ μὴν τὸν γε μεγαλόψυχον. ὁ δὲ μεγαλόψυχος, εἴπερ τῶν μεγίστων ἄξιος, ἄριστος ἂν εἴη· μείζονος γὰρ ἂν εἴη ὁ βελτίων ἄξιος, καὶ μεγίστων ὁ ἄριστος. τὸν ὡς ἀληθῶς ἄρα μεγαλόψυχον δεῖ ἀγαθὸν εἶναι. καὶ [30] δόξειεν <ἂν> εἶναι μεγαλοψύχου τὸ ἐν ἐκάστη ἀρετῇ μέγα. οὐδαμῶς τ' ἂν ἀρμόζοι μεγαλοψύχῳ φεύγειν παρασεΐσαντι, οὐδ' ἀδικεῖν· τίνος γὰρ ἔνεκα πράξει αἰσχροῦ ὃ γ' οὐδὲν μέγα; καθ' ἕκαστα δ' ἐπισκοποῦντι πάμπαν γελοῖος φαίνοιτ' ἂν ὁ μεγαλόψυχος μὴ ἀγαθὸς ὢν. οὐκ εἴη δ' ἂν οὐδὲ τιμῆς ἄξιος [35] φαῦλος ὢν· τῆς ἀρετῆς γὰρ ἄθλον ἢ τιμὴ, καὶ ἀπονέμεται τοῖς ἀγαθοῖς. 1124a [1] ἔοικε μὲν οὖν ἡ μεγαλοψυχία οἷον κόσμος τις εἶναι τῶν ἀρετῶν· μείζους γὰρ αὐτὰς ποιεῖ, καὶ οὐ γίνεται ἄνευ ἐκείνων. διὰ τοῦτο χαλεπὸν τῇ ἀληθείᾳ μεγαλόψυχον εἶναι· οὐ γὰρ οἷόν τε ἄνευ καλοκαγαθίας. μάλιστα [5] μὲν οὖν περὶ τιμᾶς καὶ ἀτιμίας ὁ μεγαλόψυχός ἐστι· καὶ ἐπὶ μὲν ταῖς μεγάλαις καὶ ὑπὸ τῶν σπουδαίων μετρίως ἡσθήσεται, ὡς τῶν οἰκείων τυγχάνων ἢ καὶ ἐλαττόνων· ἀρετῆς γὰρ παντελοῦς οὐκ ἂν γένοιτο ἄξια τιμὴ, οὐ μὴν ἀλλ' ἀποδέξεται γε τῷ μὴ ἔχειν αὐτοὺς μείζω αὐτῷ ἀπονέμειν· [10] τῆς δὲ παρὰ τῶν τυχόντων καὶ ἐπὶ μικροῖς πάμπαν ὀλιγορήσει· οὐ γὰρ τούτων ἄξιος· ὁμοίως δὲ καὶ ἀτιμίας· οὐ γὰρ ἔσται δικαίως περὶ αὐτόν. μάλιστα μὲν οὖν ἐστίν, ὥσπερ εἴρηται, ὁ μεγαλόψυχος περὶ τιμᾶς, οὐ μὴν ἀλλὰ καὶ περὶ πλοῦτον καὶ δυναστείαν καὶ πᾶσαν εὐτυχίαν καὶ ἀτυχίαν [15] μετρίως ἔξει, ὅπως ἂν γίνηται, καὶ οὐτ' εὐτυχῶν περιχαρὴς ἔσται οὐτ' ἀτυχῶν περίλυπος. οὐδὲ γὰρ περὶ τιμὴν οὕτως ἔχει ὡς μέγιστον ὄν. αἱ γὰρ δυναστεῖαι καὶ ὁ πλοῦτος διὰ τὴν τιμὴν ἐστὶν αἰρετά· οἱ γοῦν ἔχοντες αὐτὰ τιμᾶσθαι δι' αὐτῶν βούλονται· ὃ δὲ καὶ ἡ τιμὴ μικρόν ἐστι, τούτῳ καὶ τᾶλλα. [20] διὸ ὑπερόπται δοκοῦσιν εἶναι. δοκεῖ δὲ καὶ τὰ εὐτυχήματα συμβάλλεσθαι πρὸς μεγαλοψυχίαν. οἱ γὰρ εὐγενεῖς ἀξιοῦνται τιμῆς καὶ οἱ δυναστεύοντες ἢ πλουτοῦντες· ἐν ὑπεροχῇ γάρ, τὸ δ' ἀγαθὸν ὑπερέχον πᾶν ἐντιμότερον. διὸ καὶ τὰ τοιαῦτα μεγαλοψυχοτέρους ποιεῖ· τιμῶνται γὰρ ὑπὸ τινῶν· [25] κατ' ἀλήθειαν δ' ὁ ἀγαθὸς μόνος τιμητός· ὃ δ' ἄμφω ὑπάρχει, μᾶλλον ἀξιοῦται τιμῆς. οἱ δ' ἄνευ ἀρετῆς τὰ τοιαῦτα ἀγαθὰ ἔχοντες οὔτε δικαίως ἑαυτοὺς μεγάλων ἀξιοῦσιν οὔτε ὀρθῶς μεγαλόψυχοι λέγονται· ἄνευ γὰρ ἀρετῆς

παντελοῦς οὐκ ἔστι ταῦτα. ὑπερόπται δὲ καὶ ὕβρισταὶ καὶ οἱ [30] τὰ τοιαῦτα ἔχοντες ἀγαθὰ γίνονται. ἄνευ γὰρ ἀρετῆς οὐ ῥάδιον φέρειν ἐμμελῶς τὰ εὐτυχήματα· 1124b [1] οὐ δυνάμενοι δεφέρειν καὶ οἰόμενοι τῶν ἄλλων ὑπερέχειν ἐκείνων μὲν καταφρονοῦσιν, αὐτοὶ δ' ὅ τι ἂν τύχῃσι πράττουσιν. μιμοῦνται γὰρ τὸν μεγαλόψυχον οὐχ ὅμοιοι ὄντες, τοῦτο δὲ δρῶσιν ἐν οἷς δύνανται· τὰ μὲν οὖν κατ' ἀρετὴν οὐ πράττουσι, καταφρονοῦσι [5] δὲ τῶν ἄλλων. ὁ μὲν γὰρ μεγαλόψυχος δικαίως καταφρονεῖ (δοξάζει γὰρ ἀληθῶς), οἱ δὲ πολλοὶ τυχόντως. οὐκ ἔστι δὲ μικροκίνδυνος οὐδὲ φιλοκίνδυνος διὰ τὸ ὀλίγα τιμᾶν, μεγαλοκίνδυνος δέ, καὶ ὅταν κινδυνεύῃ, ἀφειδῆς τοῦ βίου ὥς οὐκ ἄξιον ὃν πάντως ζῆν. καὶ οἷος εὖ ποιεῖν, εὐεργετούμενος [10] δ' αἰσχύνεται· τὸ μὲν γὰρ ὑπερέχοντος, τὸ δ' ὑπερεχομένου. καὶ ἀντευεργετικὸς πλειόνων· οὕτω γάρ οἱ προσοφλήσει ὁ ὑπάρξας καὶ ἔσται εὖ πεπονθῶς. δοκοῦσι δὲ καὶ μνημονεύειν οὗ ἂν ποιήσωσιν εὖ, ὧν δ' ἂν πάθωσιν οὗ (ἐλάττων γὰρ ὁ παθὼν εὖ τοῦ ποιήσαντος, βούλεται δ' ὑπερέχειν), καὶ [15] τὰ μὲν ἡδέως ἀκούειν, τὰ δ' ἀηδῶς· διὸ καὶ τὴν Θέτιν οὐ λέγειν τὰς εὐεργεσίας τῷ Δίῃ, οὐδ' οἱ Λάκωνες πρὸς τοὺς Ἀθηναίους, ἀλλ' ἃ πεπόνθεσαν εὖ. μεγαλοψύχου δὲ καὶ τὸ μηδενὸς δεῖσθαι ἢ μόλις, ὑπηρετεῖν δὲ προθύμως, καὶ πρὸς μὲν τοὺς ἐν ἀξιώματι καὶ εὐτυχίαις μέγαν εἶναι, πρὸς δὲ [20] τοὺς μέσους μέτριον· τῶν μὲν γὰρ ὑπερέχειν χαλεπὸν καὶ σεμνόν, τῶν δὲ ῥάδιον, καὶ ἐπ' ἐκείνοις μὲν σεμνύνεσθαι οὐκ ἀγεννές, ἐν δὲ τοῖς ταπεινοῖς φορτικόν, ὥσπερ εἰς τοὺς ἀσθενεῖς ἰσχυρίζεσθαι· καὶ εἰς τὰ ἔντιμα μὴ ἰέναι, ἢ οὗ πρῳτεῦουσιν ἄλλοι· καὶ ἀργὸν εἶναι καὶ μελλητὴν ἀλλ' ἢ ὅπου [25] τιμὴ μεγάλη ἢ ἔργον, καὶ ὀλίγων μὲν πρακτικόν, μεγάλων δὲ καὶ ὀνομαστῶν. ἀναγκαῖον δὲ καὶ φανερομισθί εἶναι καὶ φανερόφιλον (τὸ γὰρ λανθάνειν φοβούμενου, καὶ ἀμελεῖν τῆς ἀληθείας μᾶλλον ἢ τῆς δόξης), καὶ λέγειν καὶ πράττειν φανερῶς (παρρησιαστικῆς γὰρ διὰ τὸ καταφρονητικὸς εἶναι, [30] καὶ ἀληθευτικὸς, πλὴν ὅσα μὴ δι' εἰρωνείαν [εἰρωνεία δὲ] πρὸς τοὺς πολλούς), καὶ πρὸς ἄλλον μὴ δύνασθαι ζῆν ἀλλ' ἢ φίλον· 1125a [1] δουλικὸν γάρ· διὸ καὶ πάντες οἱ κόλακες θητικοὶ καὶ οἱ ταπεινοὶ κόλακες. οὐδὲ θαυμαστικός· οὐδὲν γὰρ μέγα αὐτῷ ἐστίν. οὐδὲ μνησίκακος· οὐ γὰρ μεγαλοψύχου τὸ ἀπομνημονεύειν, ἄλλως τε καὶ κακά, ἀλλὰ [5] μᾶλλον παρορᾶν. οὐδ' ἀνθρωπολόγος· οὔτε γὰρ περὶ αὐτοῦ ἐρεῖ οὔτε περὶ ἐτέρου· οὔτε γὰρ ἵνα ἐπαινῆται μέλει αὐτῷ οὔθ' ὅπως οἱ ἄλλοι ψέγωνται· οὐδ' αὖ ἐπαινετικός ἐστίν· διόπερ οὐδὲ

κακολόγος, οὐδὲ τῶν ἐχθρῶν, εἰ μὴ δι' ὕβριν. καὶ περὶ ἀναγκαίων ἢ μικρῶν ἥκιστα ὀλοφυρτικός [10] καὶ δεητικός· σπουδάζοντος γὰρ οὕτως ἔχειν περὶ ταῦτα. καὶ οἷος κεκτῆσθαι μᾶλλον τὰ καλὰ καὶ ἄκαρπα τῶν καρπίμων καὶ ὠφελίμων· αὐτάρκους γὰρ μᾶλλον. καὶ κίνησις δὲ βραδεῖα τοῦ μεγαλοψύχου δοκεῖ εἶναι, καὶ φωνὴ βαρεῖα, καὶ λέξις στάσιμος· οὐ γὰρ σπευστικός ὁ περὶ ὀλίγα [15] σπουδάζων, οὐδὲ σύντονος ὁ μηδὲν μέγα οἰόμενος· ἢ δ' ὀξύφωνία καὶ ἡ ταχυτὴς διὰ τούτων. τοιοῦτος μὲν οὖν ὁ μεγαλόψυχος· ὁ δ' ἐλλείπων μικρόψυχος, ὁ δ' ὑπερβάλλων χαῦνος. οὐ κακοὶ μὲν οὖν δοκοῦσιν εἶναι οὐδ' οὗτοι (οὐ γὰρ κακοποιοὶ εἰσιν), ἡμαρτημένοι δέ. ὁ μὲν γὰρ μικρόψυχος [20] ἄξιος ὢν ἀγαθῶν ἑαυτὸν ἀποστερεῖ ὢν ἄξιός ἐστι, καὶ ἔοικε κακὸν ἔχειν τι ἐκ τοῦ μὴ ἀξιοῦν ἑαυτὸν τῶν ἀγαθῶν, καὶ ἀγνοεῖν δ' ἑαυτόν· ὠρέγετο γὰρ ἂν ὢν ἄξιος ἦν, ἀγαθῶν γε ὄντων. οὐ μὴν ἡλίθιοί γε οἱ τοιοῦτοι δοκοῦσιν εἶναι, ἀλλὰ μᾶλλον ὀκνηροί. ἢ τοιαύτη δὲ δόξα δοκεῖ καὶ χείρους ποιεῖν· [25] ἕκαστοι γὰρ ἐφίενται τῶν κατ' ἀξίαν, ἀφίστανται δὲ καὶ τῶν πράξεων τῶν καλῶν καὶ τῶν ἐπιτηδευμάτων ὡς ἀνάξιοι ὄντες, ὁμοίως δὲ καὶ τῶν ἐκτὸς ἀγαθῶν. οἱ δὲ χαῦνοι ἡλίθιοι καὶ ἑαυτοὺς ἀγνοοῦντες, καὶ ταῦτ' ἐπιφανῶς· οὐ γὰρ ἄξιοι ὄντες τοῖς ἐντίμοις ἐπιχειροῦσιν, εἴτα ἐξελέγχονται· [30] καὶ ἐσθῆτι κοσμοῦνται καὶ σχήματι καὶ τοῖς τοιούτοις, καὶ βούλονται τὰ εὐτυχήματα καὶ φανερὰ εἶναι αὐτῶν, καὶ λέγουσι περὶ αὐτῶν ὡς διὰ τούτων τιμηθησόμενοι. ἀντιτίθεται δὲ τῇ μεγαλοψυχίᾳ ἢ μικροψυχίᾳ μᾶλλον τῆς χαυνότητος· καὶ γὰρ γίνεται μᾶλλον καὶ χεῖρόν ἐστιν. ἢ μὲν οὖν μεγαλοψυχία [35] περὶ τιμὴν ἐστι μεγάλην, ὥσπερ εἴρηται.

1125b [1] ἔοικε δὲ καὶ περὶ ταύτην εἶναι ἀρετὴ τις, καθάπερ ἐν τοῖς πρώτοις ἐλέχθη, ἢ δόξειεν ἂν παραπλησίως ἔχειν πρὸς τὴν μεγαλοψυχίαν ὥσπερ καὶ ἡ ἐλευθεριότης πρὸς τὴν μεγαλοπρέπειαν. ἅμφω γὰρ αὗται τοῦ μὲν μεγάλου ἀφεστᾶσι, [5] περὶ δὲ τὰ μέτρια καὶ μικρὰ διατιθέασιν ἡμᾶς ὡς δεῖ· ὥσπερ δ' ἐν λήψει καὶ δόσει χρημάτων μεσότης ἐστι καὶ ὑπερβολή τε καὶ ἔλλειψις, οὕτω καὶ ἐν τιμῇ ὀρέξει τὸ μᾶλλον ἢ δεῖ καὶ ἥττον, καὶ τὸ ὅθεν δεῖ καὶ ὡς δεῖ. τὸν τε γὰρ φιλότιμον ψέγομεν ὡς μᾶλλον ἢ δεῖ καὶ ὅθεν οὐ δεῖ [10] τῆς τιμῆς ἐφιεμένον, τὸν τε ἀφιλότιμον ὡς οὐδ' ἐπὶ τοῖς καλοῖς προαιρούμενον τιμᾶσθαι. ἐστὶ δ' ὅτε τὸν φιλότιμον ἐπαινοῦμεν ὡς ἀνδρώδη καὶ φιλόκαλον, τὸν δ' ἀφιλότιμον ὡς μέτριον καὶ σώφρονα,

ὥσπερ καὶ ἐν τοῖς πρώτοις εἶπομεν. δῆλον δ' ὅτι πλεοναχῶς τοῦ φιλοτοιοῦτου λεγομένου οὐκ [15] ἐπὶ τὸ αὐτὸ φέρομεν ἀεὶ τὸ φιλότιμον, ἀλλ' ἐπαινοῦντες μὲν ἐπὶ τὸ μᾶλλον ἢ οἱ πολλοί, ψέγοντες δ' ἐπὶ τὸ μᾶλλον ἢ δεῖ. ἀνωνύμου δ' οὔσης τῆς μεσότητος, ὡς ἐρήμης ἔοικεν ἀμφισβητεῖν τὰ ἄκρα. ἐν οἷς δ' ἔστιν ὑπερβολὴ καὶ ἔλλειψις, καὶ τὸ μέσον· ὀρέγονται δὲ τῆς τιμῆς καὶ μᾶλλον ἢ [20] δεῖ καὶ ἦττον· ἔστι δὴ καὶ ὡς δεῖ· ἐπαινεῖται δ' οὖν ἡ ἕξις αὕτη, μεσότης οὔσα περὶ τιμὴν ἀνώνυμος. φαίνεται δὲ πρὸς μὲν τὴν φιλοτιμίαν ἀφιλοτιμία, πρὸς δὲ τὴν ἀφιλοτιμίαν φιλοτιμία, πρὸς ἀμφοτέρω δὲ ἀμφοτέρω πῶς. ἔοικε δὲ τοῦτ' εἶναι καὶ περὶ τὰς ἄλλας ἀρετάς. ἀντικεισθαι δ' ἐνταῦθ' [25] οἱ ἄκροι φαίνονται διὰ τὸ μὴ ὠνομάσθαι τὸν μέσον.

πραότης δ' ἐστὶ μεσότης περὶ ὀργάς· ἀνωνύμου δ' ὄντος τοῦ μέσου, σχεδὸν δὲ καὶ τῶν ἄκρων, ἐπὶ τὸ μέσον τὴν πραότητα φέρομεν, πρὸς τὴν ἔλλειψιν ἀποκλίνουσιν, ἀνώνυμον οὔσαν. ἡ δ' ὑπερβολὴ ὀργιλότης τις λέγοιτ' ἄν. [30] τὸ μὲν γὰρ πάθος ἐστὶν ὀργή, τὰ δ' ἐμποιοῦντα πολλὰ καὶ διαφέροντα. ὁ μὲν οὖν ἐφ' οἷς δεῖ καὶ οἷς δεῖ ὀργιζόμενος, ἔτι δὲ καὶ ὡς δεῖ καὶ ὅτε καὶ ὅσον χρόνον, ἐπαινεῖται· πρᾶος δὴ οὗτος ἂν εἴη, εἴπερ ἡ πραότης ἐπαινεῖται. βούλεται γὰρ ὁ πρᾶος ἀτάραχος εἶναι καὶ μὴ ἄγεσθαι ὑπὸ τοῦ πάθους, [35] ἀλλ' ὡς ἂν ὁ λόγος τάξει, οὕτω καὶ ἐπὶ τούτοις καὶ ἐπὶ τοσοῦτον χρόνον χαλεπαίνειν· 1126a [1] ἀμαρτάνειν δὲ δοκεῖ μᾶλλον ἐπὶ τὴν ἔλλειψιν· οὐ γὰρ τιμωρητικὸς ὁ πρᾶος, ἀλλὰ μᾶλλον συγγνωμονικός. ἡ δ' ἔλλειψις, εἴτ' ἀοργησία τίς ἐστὶν εἴθ' ὃ τι δὴ ποτε, ψέγεται. οἱ γὰρ μὴ ὀργιζόμενοι ἐφ' οἷς [5] δεῖ ἡλίθιοι δοκοῦσιν εἶναι, καὶ οἱ μὴ ὡς δεῖ μὴδ' ὅτε μὴδ' οἷς δεῖ· δοκεῖ γὰρ οὐκ αἰσθάνεσθαι οὐδὲ λυπεῖσθαι, μὴ ὀργιζόμενός τε οὐκ εἶναι ἀμυντικός, τὸ δὲ προπηλακιζόμενον ἀνέχεσθαι καὶ τοὺς οἰκείους περιορᾶν ἀνδραποδῶδες. ἡ δ' ὑπερβολὴ κατὰ πάντα μὲν γίνεται (καὶ γὰρ οἷς οὐ δεῖ, [10] καὶ ἐφ' οἷς οὐ δεῖ, καὶ μᾶλλον ἢ δεῖ, καὶ θᾶττον, καὶ πλείω χρόνον), οὐ μὴν ἅπαντά γε τῷ αὐτῷ ὑπάρχει. οὐ γὰρ ἂν δύναιτ' εἶναι· τὸ γὰρ κακὸν καὶ ἑαυτὸ ἀπόλλυσι, κἂν ὀλόκληρον ἦ, ἀφόρητον γίνεται. οἱ μὲν οὖν ὀργίλοι ταχέως μὲν ὀργίζονται καὶ οἷς οὐ δεῖ καὶ ἐφ' οἷς οὐ δεῖ καὶ μᾶλλον ἢ [15] δεῖ, παύονται δὲ ταχέως· ὁ καὶ βέλτιστον ἔχουσιν. συμβαίνει δ' αὐτοῖς τοῦτο, ὅτι οὐ κατέχουσι τὴν ὀργὴν ἀλλ' ἀνταποδιδόασιν ἢ φανεροί εἰσι διὰ τὴν ὀξύτητα, εἴτ'

ἀποπαύονται. ὑπερβολῇ δ' εἰσὶν οἱ ἀκρόχολοι ὀξεῖς καὶ πρὸς πᾶν ὀργίλοι καὶ ἐπὶ παντί· ὅθεν καὶ τοῦνομα. οἱ δὲ πικροὶ [20] δυσδιάλυτοι, καὶ πολὺν χρόνον ὀργίζονται· κατέχουσι γὰρ τὸν θυμόν. παῦλα δὲ γίνεται ὅταν ἀνταποδιδῶ· ἡ γὰρ τιμωρία παύει τῆς ὀργῆς, ἡδονὴν ἀντὶ τῆς λύπης ἐμποιοῦσα. τούτου δὲ μὴ γινομένου τὸ βάρος ἔχουσιν· διὰ γὰρ τὸ μὴ ἐπιφανὲς εἶναι οὐδὲ συμπεῖθει αὐτοὺς οὐδεῖς, ἐν αὐτῷ δὲ πέψαι [25] τὴν ὀργὴν χρόνου δεῖ. εἰσὶ δ' οἱ τοιοῦτοι ἑαυτοῖς ὀχληρότατοι καὶ τοῖς μάλιστα φίλοις. χαλεποὺς δὲ λέγομεν τοὺς ἐφ' οἷς τε μὴ δεῖ χαλεπαίνοντας καὶ μᾶλλον ἢ δεῖ καὶ πλείω χρόνον, καὶ μὴ διαλλαττομένους ἄνευ τιμωρίας ἢ κολάσεως. τῇ πραότητι δὲ μᾶλλον τὴν ὑπερβολὴν ἀντιτίθεμεν· καὶ [30] γὰρ μᾶλλον γίνεται· ἀνθρωπικώτερον γὰρ τὸ τιμωρεῖσθαι· καὶ πρὸς τὸ συμβιοῦν οἱ χαλεποὶ χεῖρους. ὁ δὲ καὶ ἐν τοῖς πρότερον εἴρηται, καὶ ἐκ τῶν λεγομένων δῆλον· οὐ γὰρ ῥάδιον διορίσαι τὸ πῶς καὶ τίσι καὶ ἐπὶ ποίοις καὶ πόσον χρόνον ὀργιστέον, καὶ τὸ μέχρι τίνος ὀρθῶς ποιεῖ τις ἢ ἀμαρτάνει. [35] ὁ μὲν γὰρ μικρὸν παρεκβαίνων οὐ ψέγεται, οὗτ' ἐπὶ τὸ μᾶλλον οὗτ' ἐπὶ τὸ ἥττον· ἐνίστε γὰρ τοὺς ἐλλείποντας ἐπαινοῦμεν καὶ πράους φαμέν, 1126b [1] καὶ τοὺς χαλεπαίνοντας ἀνδρώδεις ὡς δυναμένους ἄρχειν. ὁ δὲ πόσον καὶ πῶς παρεκβαίνων ψεκτός, οὐ ῥάδιον τῷ λόγῳ ἀποδοῦναι· ἐν γὰρ τοῖς καθ' ἕκαστα κἂν τῇ αἰσθήσει ἢ κρίσις. ἀλλὰ τό γε τοσοῦτον [5] δῆλον, ὅτι ἡ μὲν μέση ἕξις ἐπαινετὴ, καθ' ἣν οἷς δεῖ ὀργιζόμεθα καὶ ἐφ' οἷς δεῖ καὶ ὡς δεῖ καὶ πάντα τὰ τοιαῦτα, αἱ δ' ὑπερβολαὶ καὶ ἐλλείψεις ψεκταί, καὶ ἐπὶ μικρὸν μὲν γινόμεναι ἡρέμα, ἐπὶ πλεον δὲ μᾶλλον, ἐπὶ πολὺ δὲ σφόδρα. δῆλον οὖν ὅτι τῆς μέσης ἕξεως ἀνθεκτέον. αἱ μὲν οὖν [10] περὶ τὴν ὀργὴν ἕξεις εἰρήσθωσαν.

ἐν δὲ ταῖς ὁμιλίαις καὶ τῷ συζῆν καὶ λόγων καὶ πραγμάτων κοινωνεῖν οἱ μὲν ἄρεσκοι δοκοῦσιν εἶναι, οἱ πάντα πρὸς ἡδονὴν ἐπαινοῦντες καὶ οὐθὲν ἀντιτείνοντες, ἀλλ' οἰόμενοι δεῖν ἄλυποι τοῖς ἐντυγχάνουσιν εἶναι· οἱ δ' ἐξ ἐναντίας τούτοις [15] πρὸς πάντα ἀντιτείνοντες καὶ τοῦ λυπεῖν οὐδ' ὅτιοῦν φροντίζοντες δύσκολοι καὶ δυσέριδες καλοῦνται. ὅτι μὲν οὖν αἱ εἰρημέναι ἕξεις ψεκταὶ εἰσιν, οὐκ ἄδηλον, καὶ ὅτι ἡ μέση τούτων ἐπαινετὴ, καθ' ἣν ἀποδέχεται ἃ δεῖ καὶ ὡς δεῖ, ὁμοίως δὲ καὶ δυσχερανεῖ· ὄνομα δ' οὐκ ἀποδέδοται αὐτῇ [20] τι, ἔοικε δὲ μάλιστα φιλία. τοιοῦτος γὰρ ἐστὶν ὁ κατὰ τὴν μέσην ἕξιν οἶον βουλόμεθα λέγειν τὸν ἐπιεικῆ φίλον, τὸ στέργειν

προσλαβόντα. διαφέρει δὲ τῆς φιλίας, ὅτι ἄνευ πάθους ἐστὶ καὶ τοῦ στέργειν οἷς ὁμιλεῖ· οὐ γὰρ τῷ φιλεῖν ἢ ἐχθαίρειν ἀποδέχεται ἕκαστα ὡς δεῖ, ἀλλὰ τῷ τοιοῦτος [25] εἶναι. ὁμοίως γὰρ πρὸς ἀγνώτας καὶ γνωρίμους καὶ συνήθεις καὶ ἀσυνήθεις αὐτὸ ποιήσει, πλὴν καὶ ἐν ἑκάστοις ὡς ἀρμόζει· οὐ γὰρ ὁμοίως προσήκει συνήθων καὶ ὁθνείων φροντίζειν, οὐδ' αὖ λυπεῖν. καθόλου μὲν οὖν εἴρηται ὅτι ὡς δεῖ ὁμιλήσει, ἀναφέρων δὲ πρὸς τὸ καλὸν καὶ τὸ συμφέρον στοχάζεται [30] τοῦ μὴ λυπεῖν ἢ συνηδύνειν. ἔοικε μὲν γὰρ περὶ ἡδονὰς καὶ λύπας εἶναι τὰς ἐν ταῖς ὁμιλίαις γινομένας· τούτων δ' ὅσας μὲν αὐτῷ ἐστὶ μὴ καλὸν ἢ βλαβερὸν συνηδύνειν, δυσχερανεῖ, καὶ προαιρήσεται λυπεῖν· κἂν τῷ ποιοῦντι δ' ἀσχημοσύνην φέρῃ, καὶ ταύτην μὴ μικράν, ἢ βλάβην, ἢ δ' ἐναντίωσις [35] μικρὰν λύπην, οὐκ ἀποδέχεται ἀλλὰ δυσχερανεῖ. διαφερόντως δ' ὁμιλήσει τοῖς ἐν ἀξιώμασι καὶ τοῖς τυχοῦσι, 1127a [1] καὶ μᾶλλον ἢ ἥττον γνωρίμοις, ὁμοίως δὲ καὶ κατὰ τὰς ἄλλας διαφοράς, ἑκάστοις ἀπονέμων τὸ πρέπον, καὶ καθ' αὐτὸ μὲν αἰρούμενος τὸ συνηδύνειν, λυπεῖν δ' εὐλαβούμενος, τοῖς δ' ἀποβαίνουσιν, ἐὰν ἢ μείζω, συνεπόμενος, λέγω δὲ [5] τῷ καλῷ καὶ τῷ συμφέροντι. καὶ ἡδονῆς δ' ἕνεκα τῆς εἰσαυθις μεγάλης μικρὰ λυπήσει. ὁ μὲν οὖν μέσος τοιοῦτός ἐστιν, οὐκ ὠνόμασται δέ· τοῦ δὲ συνηδύνοντος ὁ μὲν τοῦ ἡδὺς εἶναι στοχαζόμενος μὴ διὰ τι ἄλλο ἄρεσκος, ὁ δ' ὅπως ὠφέλειά τις αὐτῷ γίνηται εἰς χρήματα καὶ ὅσα διὰ χρημάτων, [10] κόλαξ· ὁ δὲ πᾶσι δυσχεραίνων εἴρηται ὅτι δύσκολος καὶ δύσερις. ἀντικεῖσθαι δὲ φαίνεται τὰ ἄκρα ἑαυτοῖς διὰ τὸ ἀνώνυμον εἶναι τὸ μέσον.

περὶ τὰ αὐτὰ δὲ σχεδὸν ἐστὶ καὶ ἡ τῆς ἀλαζονείας <καὶ εἰρωνείας> μεσότης· ἀνώνυμος δὲ καὶ αὐτή. οὐ χεῖρον δὲ καὶ [15] τὰς τοιαύτας ἐπελθεῖν· μᾶλλον τε γὰρ ἂν εἰδείημεν τὰ περὶ τὸ ἦθος, καθ' ἕκαστον διελθόντες, καὶ μεσότητος εἶναι τὰς ἀρετὰς πιστεῦσαιμεν ἂν, ἐπὶ πάντων οὕτως ἔχον συνιδόντες. ἐν δὲ τῷ συζῆν οἱ μὲν πρὸς ἡδονὴν καὶ λύπην ὁμιλοῦντες εἴρηνται, περὶ δὲ τῶν ἀληθευόντων τε καὶ ψευδομένων εἰπόμεν [20] ὁμοίως ἐν λόγοις καὶ πράξεσι καὶ τῷ προσποιήματι. δοκεῖ δὴ ὁ μὲν ἀλαζὼν προσποιητικὸς τῶν ἐνδόξων εἶναι καὶ μὴ ὑπαρχόντων καὶ μειζόνων ἢ ὑπάρχει, ὁ δὲ εἴρων ἀνάπαλιν ἀρνεῖσθαι τὰ ὑπάρχοντα ἢ ἐλάττω ποιεῖν, ὁ δὲ μέσος αὐθέκαστος τις ὢν ἀληθευτικὸς καὶ τῷ βίῳ καὶ τῷ λόγῳ, τὰ [25] ὑπάρχοντα ὁμολογῶν εἶναι περὶ αὐτόν, καὶ οὔτε μείζω οὔτε ἐλάττω.

ἔστι δὲ τούτων ἕκαστα καὶ ἔνεκά τινος ποιεῖν καὶ μηδενός. ἕκαστος δ' οἷός ἐστι, τοιαῦτα λέγει καὶ πράττει καὶ οὕτω ζῇ, ἐὰν μὴ τινος ἔνεκα πράττη. καθ' αὐτὸ δὲ τὸ μὲν ψεῦδος φαῦλον καὶ ψεκτόν, τὸ δ' ἀληθές καλὸν καὶ [30] ἐπαινετόν. οὕτω δὲ καὶ ὁ μὲν ἀληθευτικός μέσος ὢν ἐπαινετός, οἱ δὲ ψευδόμενοι ἀμφοτέρωθεν μὲν ψεκτοί, μᾶλλον δ' ὁ ἀλαζών. περὶ ἐκατέρου δ' εἵπωμεν, πρότερον δὲ περὶ τοῦ ἀληθευτικοῦ. οὐ γὰρ περὶ τοῦ ἐν ταῖς ὁμολογίαις ἀληθεύοντος λέγομεν, οὐδ' ὅσα εἰς ἀδικίαν ἢ δικαιοσύνην συντείνει 1127b [1] (ἄλλης γὰρ ἂν εἴη ταῦτ' ἀρετῆς), ἀλλ' ἐν οἷς μηδενὸς τοιούτου διαφέροντος καὶ ἐν λόγῳ καὶ ἐν βίῳ ἀληθεύει τῷ τὴν ἕξιν τοιοῦτος εἶναι. δόξειε δ' ἂν ὁ τοιοῦτος ἐπιεικής εἶναι. ὁ γὰρ φιλαλήθης, καὶ ἐν οἷς μὴ διαφέρει ἀληθεύων, ἀληθεύσει [5] καὶ ἐν οἷς διαφέρει ἔτι μᾶλλον· ὥς γὰρ αἰσχρὸν τὸ ψεῦδος εὐλαβήσεται, ὃ γε καὶ καθ' αὐτὸ ηὐλαβεῖτο· ὁ δὲ τοιοῦτος ἐπαινετός. ἐπὶ τὸ ἔλαττον δὲ μᾶλλον τοῦ ἀληθοῦς ἀποκλίνει· ἐμμελέστερον γὰρ φαίνεται διὰ τὸ ἐπαχθεῖς τὰς ὑπερβολὰς εἶναι. ὁ δὲ μείζων τῶν ὑπαρχόντων προσποιούμενος [10] μηδενὸς ἔνεκα φαύλῳ μὲν ἔοικεν (οὐ γὰρ ἂν ἔχαιρε τῷ ψεύδει), μάταιος δὲ φαίνεται μᾶλλον ἢ κακός· εἰ δ' ἔνεκά τινος, ὁ μὲν δόξης ἢ τιμῆς οὐ λίαν ψεκτός, “ὥς ὁ ἀλαζών”, ὁ δὲ ἀργυρίου, ἢ ὅσα εἰς ἀργύριον, ἀσχημονέστερος (οὐκ ἐν τῇ δυνάμει δ' ἐστὶν ὁ ἀλαζών, ἀλλ' ἐν τῇ προαιρέσει· [15] κατὰ τὴν ἕξιν γὰρ καὶ τῷ τοιόσδε εἶναι ἀλαζών ἐστιν)· ὥσπερ καὶ ψεύστης ὁ μὲν τῷ ψεύδει αὐτῷ χαίρων, ὁ δὲ δόξης ὀρεγόμενος ἢ κέρδους. οἱ μὲν οὖν δόξης χάριν ἀλαζονευόμενοι τὰ τοιαῦτα προσποιοῦνται ἐφ' οἷς ἔπαινος ἢ εὐδαιμονισμός, οἱ δὲ κέρδους, ὧν καὶ ἀπόλαυσίς ἐστι τοῖς πέλας καὶ διαλαθεῖν [20] ἔστι μὴ ὄντα, οἷον μάντιν σοφὸν ἱατρὸν. διὰ τοῦτο οἱ πλεῖστοι προσποιοῦνται τὰ τοιαῦτα καὶ ἀλαζονεύονται· ἔστι γὰρ ἐν αὐτοῖς τὰ εἰρημένα. οἱ δ' εἰρωνες ἐπὶ τὸ ἔλαττον λέγοντες χαριέστεροι μὲν τὰ ἥθη φαίνονται· οὐ γὰρ κέρδους ἔνεκα δοκοῦσι λέγειν, ἀλλὰ φεύγοντες τὸ ὀγκηρόν· [25] μάλιστα δὲ καὶ οὗτοι τὰ ἔνδοξα ἀπαρνοῦνται, οἷον καὶ Σωκράτης ἐποίει. οἱ δὲ τὰ μικρὰ καὶ φανερά [προσποιούμενοι] βαυκοπανοῦργοι λέγονται καὶ εὐκαταφρονητότεροί εἰσιν· καὶ ἐνίοτε ἀλαζονεία φαίνεται, οἷον ἡ τῶν Λακώνων ἐσθής· καὶ γὰρ ἡ ὑπερβολὴ καὶ ἡ λίαν ἑλλειψὶς ἀλαζονικόν. οἱ δὲ [30] μετρίως χρώμενοι τῇ εἰρωνείᾳ καὶ περὶ τὰ μὴ λίαν ἐμποδὼν καὶ φανερά εἰρωνευόμενοι χαριέντες φαίνονται. ἀντικεῖσθαι δ' ὁ ἀλαζών φαίνεται τῷ ἀληθευτικῷ· χείρων γάρ.

οὔσης δὲ καὶ ἀναπαύσεως ἐν τῷ βίῳ, καὶ ἐν ταύτῃ διαγωγῇ μετὰ παιδιᾶς, δοκεῖ καὶ ἐνταῦθα εἶναι ὁμιλία τις ἐμμελής, 1128a [1] καὶ οἷα δεῖ λέγειν καὶ ὥς, ὁμοίως δὲ καὶ ἀκούειν. διοίσει δὲ καὶ τὸ ἐν τοιούτοις λέγειν ἢ τοιούτων ἀκούειν. δῆλον δ' ὥς καὶ περὶ ταῦτ' ἔστιν ὑπερβολή τε καὶ ἔλλειψις τοῦ μέσου. οἱ μὲν οὖν τῷ γελοίῳ ὑπερβάλλοντες βωμολόχοι [5] δοκοῦσιν εἶναι καὶ φορτικοί, γλιχόμενοι πάντως τοῦ γελοίου, καὶ μᾶλλον στοχαζόμενοι τοῦ γέλωτα ποιῆσαι ἢ τοῦ λέγειν εὐσχήμονα καὶ μὴ λυπεῖν τὸν σκωπτόμενον· οἱ δὲ μήτ' αὐτοὶ ἂν εἰπόντες μηδὲν γελοῖον τοῖς τε λέγουσι δυσχεραίνοντες ἄγροικοι καὶ σκληροὶ δοκοῦσιν εἶναι. οἱ δ' ἐμμελῶς [10] παίζοντες εὐτράπελοι προσαγορεύονται, οἷον εὐτροποι· τοῦ γὰρ ἥθους αἱ τοιαῦται δοκοῦσι κινήσεις εἶναι, ὥσπερ δὲ τὰ σώματα ἐκ τῶν κινήσεων κρίνεται, οὕτω καὶ τὰ ἥθη. ἐπιπολάζοντος δὲ τοῦ γελοίου, καὶ τῶν πλείστων χαιρόντων τῇ παιδιᾷ καὶ τῷ σκώπτειν μᾶλλον ἢ δεῖ, καὶ οἱ βωμολόχοι [15] εὐτράπελοι προσαγορεύονται ὥς χαρίεντες· ὅτι δὲ διαφέρουσι, καὶ οὐ μικρόν, ἐκ τῶν εἰρημένων δῆλον. τῇ μέσῃ δ' ἔξει οἰκεῖον καὶ ἡ ἐπιδεξιότης ἐστίν· τοῦ δ' ἐπιδεξίου ἐστὶ τοιαῦτα λέγειν καὶ ἀκούειν οἷα τῷ ἐπιεικεῖ καὶ ἐλευθερίῳ ἀρμόττει· ἔστι γὰρ τινα πρέποντα τῷ τοιούτῳ λέγειν ἐν [20] παιδιᾷς μέρει καὶ ἀκούειν, καὶ ἡ τοῦ ἐλευθερίου παιδιὰ διαφέρει τῆς τοῦ ἀνδραποδώδους, καὶ πεπαιδευμένου καὶ ἀπαιδευτοῦ. ἴδιοι δ' ἂν τις καὶ ἐκ τῶν κωμωδιῶν τῶν παλαιῶν καὶ τῶν καινῶν· τοῖς μὲν γὰρ ἦν γελοῖον ἡ αἰσχρολογία, τοῖς δὲ μᾶλλον ἡ ὑπόνοια· διαφέρει δ' οὐ μικρόν ταῦτα [25] πρὸς εὐσχημοσύνην. πότερον οὖν τὸν εὖ σκώπτοντα ὀριστεόν τῷ λέγειν μὴ ἀπρεπῇ ἐλευθερίῳ, ἢ τῷ μὴ λυπεῖν τὸν ἀκούοντα ἢ καὶ τέρπειν; ἢ καὶ τό γε τοιοῦτον ἀόριστον; ἄλλο γὰρ ἄλλῳ μισητόν τε καὶ ἡδύ. τοιαῦτα δὲ καὶ ἀκούσεται· ἃ γὰρ ὑπομένει ἀκούων, ταῦτα καὶ ποιεῖν δοκεῖ. οὐ δὴ πᾶν ποιήσει· [30] τὸ γὰρ σκῶμμα λαιδωρήματι ἐστίν, οἱ δὲ νομοθέται ἔνια λαιδορεῖν κωλύουσιν· ἔδει δ' ἴσως καὶ σκώπτειν. ὁ δὲ χαρίεις καὶ ἐλευθέριος οὕτως ἔξει, οἷον νόμος ὢν ἑαυτῷ. τοιοῦτος μὲν οὖν ὁ μέσος ἐστίν, εἴτ' ἐπιδέξιος εἴτ' εὐτράπελος λέγεται. ὁ δὲ βωμολόχος ἥττων ἐστὶ τοῦ γελοίου, καὶ οὔτε ἑαυτοῦ οὔτε [35] τῶν ἄλλων ἀπεχόμενος εἰ γέλωτα ποιήσει, καὶ τοιαῦτα λέγων 1128b [1] ὧν οὐδὲν ἂν εἴποι ὁ χαρίεις, ἔνια δ' οὐδ' ἂν ἀκούσαι. ὁ δ' ἄγροικος εἰς τὰς τοιαύτας ὁμιλίας ἀχρεῖος· οὐθὲν γὰρ

συμβαλλόμενος πᾶσι δυσχεραίνει. δοκεῖ δὲ ἡ ἀνάπαυσις καὶ ἡ παιδιὰ ἐν τῷ βίῳ εἶναι ἀναγκαῖον. τρεῖς οὖν αἱ εἰρημέναι [5] ἐν τῷ βίῳ μεσότητες, εἰσὶ δὲ πᾶσαι περὶ λόγων τινῶν καὶ πράξεων κοινωνίαν. διαφέρουσι δ' ὅτι ἡ μὲν περὶ ἀλήθειάν ἐστιν, αἱ δὲ περὶ τὸ ἡδύ. τῶν δὲ περὶ τὴν ἡδονὴν ἡ μὲν ἐν ταῖς παιδιαῖς, ἡ δ' ἐν ταῖς κατὰ τὸν ἄλλον βίον ὁμιλίας.

[10] περὶ δὲ αἰδοῦς ὥς τινος ἀρετῆς οὐ προσήκει λέγειν· πάθει γὰρ μᾶλλον ἔοικεν ἢ ἔξει. ὀρίζεται γοῦν φόβος τις ἀδοξίας, καὶ ἀποτελεῖται τῷ περὶ τὰ δεινὰ φόβῳ παραπλήσιον· ἐρυθραίνονται γὰρ οἱ αἰσχυρόμενοι, οἱ δὲ τὸν θάνατον φοβούμενοι ὠχρίῳσιν. σωματικὰ δὴ φαίνεται πως εἶναι [15] ἀμφοτέρα, ὅπερ δοκεῖ πάθους μᾶλλον ἢ ἔξεως εἶναι. οὐ πάσῃ δ' ἡλικίᾳ τὸ πάθος ἀρμόζει, ἀλλὰ τῇ νέᾳ. οἴομεθα γὰρ δεῖν τοὺς τηλικούτους αἰδήμονας εἶναι διὰ τὸ πάθει ζῶντας πολλὰ ἀμαρτάνειν, ὑπὸ τῆς αἰδοῦς δὲ κωλύεσθαι· καὶ ἐπαινοῦμεν τῶν μὲν νέων τοὺς αἰδήμονας, πρεσβύτερον δ' [20] οὐδεὶς ἂν ἐπαιnéσειεν ὅτι αἰσχυνηλός· οὐδὲν γὰρ οἴομεθα δεῖν αὐτὸν πράττειν ἐφ' οἷς ἐστὶν αἰσχύνῃ. οὐδὲ γὰρ ἐπιεικοὺς ἐστὶν ἡ αἰσχύνῃ, εἴπερ γίνεται ἐπὶ τοῖς φαύλοις (οὐ γὰρ πρακτέον τὰ τοιαῦτα· εἰ δ' ἐστὶ τὰ μὲν κατ' ἀλήθειαν αἰσχροὶ τὰ δὲ κατὰ δόξαν, οὐδὲν διαφέρει· οὐδέτερα γὰρ πρακτέα, [25] ὥστ' οὐκ αἰσχυντέον)· φαύλου δὲ καὶ τὸ εἶναι τοιοῦτον οἷον πράττειν τι τῶν αἰσχυρῶν. τὸ δ' οὕτως ἔχειν ὥστ' εἰ πράξαι τι τῶν τοιούτων αἰσχύνεσθαι, καὶ διὰ τοῦτ' οἶεσθαι ἐπιεικῆ εἶναι, ἄτοπον· ἐπὶ τοῖς ἐκουσίοις γὰρ ἡ αἰδώς, ἐκὼν δ' ὁ ἐπιεικὴς οὐδέποτε πράξει τὰ φαῦλα. εἴη δ' ἂν ἡ αἰδώς ἐξ [30] ὑποθέσεως ἐπιεικής· εἰ γὰρ πράξαι, αἰσχύνοιτ' ἂν· οὐκ ἔστι δὲ τοῦτο περὶ τὰς ἀρετάς. εἰ δ' ἡ ἀναισχυντία φαῦλον καὶ τὸ μὴ αἰδεῖσθαι τὰ αἰσχροὶ πράττειν, οὐδὲν μᾶλλον τὸν τὰ τοιαῦτα πράττοντα αἰσχύνεσθαι ἐπιεικής. οὐκ ἔστι δ' οὐδ' ἡ ἐγκράτεια ἀρετὴ, ἀλλὰ τις μικτὴ· δειχθήσεται δὲ περὶ [35] αὐτῆς ἐν τοῖς ὕστερον. νῦν δὲ περὶ δικαιοσύνης εἵπωμεν.

Βιβλίο 5

περὶ δὲ δικαιοσύνης καὶ ἀδικίας σκεπτέον, περὶ ποίας τε τυγχάνουσιν οὐσαι πράξεις, καὶ ποία μεσότης ἐστὶν ἡ [5] δικαιοσύνη, καὶ τὸ δίκαιον τίνων μέσον. ἡ δὲ σκέψις ἡμῖν ἔστω κατὰ τὴν αὐτὴν μέθοδον τοῖς προειρημένοις. ὁρῶμεν δὴ πάντας τὴν τοιαύτην ἕξιν βουλομένους λέγειν δικαιοσύνην, ἀφ' ἧς πρακτικοὶ τῶν δικαίων εἰσὶ καὶ ἀφ' ἧς δικαιοπραγοῦσι καὶ βούλονται τὰ δίκαια: τὸν αὐτὸν δὲ τρόπον καὶ [10] περὶ ἀδικίας, ἀφ' ἧς ἀδικοῦσι καὶ βούλονται τὰ ἄδικα. διὸ καὶ ἡμῖν πρῶτον ὥς ἐν τύπῳ ὑποκείσθω ταῦτα. οὐδὲ γὰρ τὸν αὐτὸν ἔχει τρόπον ἐπὶ τε τῶν ἐπιστημῶν καὶ δυνάμεων καὶ ἐπὶ τῶν ἔξεων. δύναμις μὲν γὰρ καὶ ἐπιστήμη δοκεῖ τῶν ἐναντίων ἡ αὐτὴ εἶναι, ἕξις δ' ἡ ἐναντία τῶν ἐναντίων [15] οὐ, οἷον ἀπὸ τῆς ὑγιείας οὐ πράττεται τὰ ἐναντία, ἀλλὰ τὰ ὑγιεινὰ μόνον: λέγομεν γὰρ ὑγιεινῶς βαδίζειν, ὅταν βαδίζῃ ὥς ἂν ὁ ὑγιαίνων. πολλάκις μὲν οὖν γνωρίζεται ἡ ἐναντία ἕξις ἀπὸ τῆς ἐναντίας, πολλάκις δὲ αἱ ἕξεις ἀπὸ τῶν ὑποκειμένων: ἐάν τε γὰρ ἡ εὐεξία ἦ φανερά, καὶ ἡ [20] καχεξία φανερά γίνεται, καὶ ἐκ τῶν εὐεκτικῶν ἡ εὐεξία καὶ ἐκ ταύτης τὰ εὐεκτικά. εἰ γὰρ ἐστὶν ἡ εὐεξία πυκνότης σαρκός, ἀνάγκη καὶ τὴν καχεξίαν εἶναι μανότητα σαρκὸς καὶ τὸ εὐεκτικὸν τὸ ποιητικὸν πυκνότητος ἐν σαρκί. ἀκολουθεῖ δ' ὥς ἐπὶ τὸ πολὺ, ἐὰν θάτερον πλεοναχῶς λέγηται, [25] καὶ θάτερον πλεοναχῶς λέγεσθαι, οἷον εἰ τὸ δίκαιον, καὶ τὸ ἄδικον. ἔοικε δὲ πλεοναχῶς λέγεσθαι ἡ δικαιοσύνη καὶ ἡ ἀδικία, ἀλλὰ διὰ τὸ σύνεγγυς εἶναι τὴν ὁμωνυμίαν αὐτῶν λανθάνει καὶ οὐχ ὥσπερ ἐπὶ τῶν πόρρῳ δήλη μᾶλλον, ἥ γὰρ διαφορὰ πολλὴ ἡ κατὰ τὴν ιδεάν οἷον ὅτι καλεῖται [30] κλείς ὁμωνύμως ἢ τε ὑπὸ τὸν αὐχένα τῶν ζώων καὶ ἢ τὰς θύρας κλείουσιν. εἰλήφθω δὴ ὁ ἄδικος ποσαχῶς λέγεται. δοκεῖ δὴ ὁ τε παράνομος ἄδικος εἶναι καὶ ὁ πλεονέκτης καὶ ἄνισος, ὥστε δῆλον ὅτι καὶ [ὁ] δίκαιος ἔσται ὁ τε νόμιμος καὶ ὁ ἴσος. τὸ μὲν δίκαιον ἄρα τὸ νόμιμον καὶ τὸ ἴσον, τὸ δ' ἄδικον τὸ παράνομον καὶ τὸ ἄνισον.

1129b [1] ἐπεὶ δὲ πλεονέκτης ὁ ἄδικος, περὶ τὰγαθὰ ἔσται, οὐ πάντα, ἀλλὰ περὶ ὅσα εὐτυχία καὶ ἀτυχία, ἃ ἐστὶ μὲν ἀπλῶς ἀεὶ ἀγαθὰ, τινὲς δ' οὐκ ἀεὶ. οἱ δ' ἄνθρωποι ταῦτα εὖχονται καὶ διώκουσιν: [5] δεῖ δ' οὐ, ἀλλ' εὖχεσθαι μὲν τὰ ἀπλῶς ἀγαθὰ καὶ αὐτοῖς ἀγαθὰ

εἶναι, αἰρεῖσθαι δὲ τὰ αὐτοῖς ἀγαθὰ. ὁ δ' ἄδικος οὐκ ἀεὶ τὸ πλεον αἰρεῖται, ἀλλὰ καὶ τὸ ἔλαττον ἐπὶ τῶν ἀπλῶς κακῶν: ἀλλ' ὅτι δοκεῖ καὶ τὸ μείον κακὸν ἀγαθὸν πως εἶναι, τοῦ δ' ἀγαθοῦ ἐστὶν ἡ πλεονεξία, διὰ τοῦτο δοκεῖ [10] πλεονέκτης εἶναι. ἔστι δ' ἄνισος: τοῦτο γὰρ περιέχει καὶ κοινόν. ἐπεὶ δ' ὁ παράνομος ἄδικος ἦν ὁ δὲ νόμιμος δίκαιος, δηλὸν ὅτι πάντα τὰ νόμιμά ἐστὶ πως δίκαια: τὰ τε γὰρ ὠρισμένα ὑπὸ τῆς νομοθετικῆς νόμιμά ἐστι, καὶ ἕκαστον τούτων δίκαιον εἶναι φαμεν. οἱ δὲ νόμοι ἀγορεύουσι περὶ ἀπάντων, [15] στοχαζόμενοι ἢ τοῦ κοινῇ συμφέροντος πᾶσιν ἢ τοῖς ἀρίστοις ἢ τοῖς κυρίοις [κατ' ἀρετὴν] ἢ κατ' ἄλλον τινὰ τρόπον τοιοῦτον: ὥστε ἓνα μὲν τρόπον δίκαια λέγομεν τὰ ποιητικὰ καὶ φυλακτικὰ εὐδαιμονίας καὶ τῶν μορίων αὐτῆς τῇ πολιτικῇ κοινωνίᾳ. προστάττει δ' ὁ νόμος καὶ τὰ [20] τοῦ ἀνδρείου ἔργα ποιεῖν, οἷον μὴ λείπειν τὴν τάξιν μηδὲ φεύγειν μηδὲ ρίπτειν τὰ ὅπλα, καὶ τὰ τοῦ σώφρονος, οἷον μὴ μοιχεύειν μηδ' ὑβρίζειν, καὶ τὰ τοῦ πρᾶου, οἷον μὴ τύπτειν μηδὲ κακηγορεῖν, ὁμοίως δὲ καὶ κατὰ τὰς ἄλλας ἀρετὰς καὶ μοχθηρίας τὰ μὲν κελεύων τὰ δ' ἀπαγορεύων, ὀρθῶς [25] μὲν ὁ κείμενος ὀρθῶς, χειρὸν δ' ὁ ἀπεσχεδιασμένος. αὕτη μὲν οὖν ἡ δικαιοσύνη ἀρετὴ μὲν ἐστὶ τελεία, ἀλλ' οὐχ ἀπλῶς ἀλλὰ πρὸς ἕτερον. καὶ διὰ τοῦτο πολλάκις κρατίστη τῶν ἀρετῶν εἶναι δοκεῖ ἡ δικαιοσύνη, καὶ οὐθ' ἕσπερος οὐθ' ἑῷος οὕτω θαυμαστός: καὶ παροιμιαζόμενοί φαμεν

[30] ἐν δὲ δικαιοσύνῃ συλλήβδην πᾶς ἀρετὴ ἔνι

καὶ τελεία μάλιστα ἀρετὴ, ὅτι τῆς τελείας ἀρετῆς χρῆσις ἐστίν. τελεία δ' ἐστίν, ὅτι ὁ ἔχων αὐτὴν καὶ πρὸς ἕτερον δύναται τῇ ἀρετῇ χρῆσθαι, ἀλλ' οὐ μόνον καθ' αὐτόν: πολλοὶ γὰρ ἐν μὲν τοῖς οἰκείοις τῇ ἀρετῇ δύνανται χρῆσθαι, ἐν δὲ τοῖς πρὸς ἕτερον ἀδυνατοῦσιν.

1130a [1] καὶ διὰ τοῦτο εὖ δοκεῖ ἔχειν τὸ τοῦ Βίαντος, ὅτι ἀρχὴ ἄνδρα δεῖξει: πρὸς ἕτερον γὰρ καὶ ἐν κοινωνίᾳ ἡδὴ ὁ ἄρχων. διὰ δὲ τὸ αὐτὸ τοῦτο καὶ ἀλλότριον ἀγαθὸν δοκεῖ εἶναι ἡ δικαιοσύνη μόνῃ τῶν ἀρετῶν, ὅτι πρὸς ἕτερόν ἐστιν: ἄλλω [5] γὰρ τὰ συμφέροντα πράττει, ἢ ἄρχοντι ἢ κοινωνῷ. κάκιστος μὲν οὖν ὁ καὶ πρὸς αὐτόν καὶ πρὸς τοὺς φίλους χρώμενος τῇ μοχθηρίᾳ, ἄριστος δ' οὐχ ὁ πρὸς αὐτόν τῇ ἀρετῇ ἀλλὰ πρὸς ἕτερον: τοῦτο γὰρ ἔργον χαλεπόν. αὕτη μὲν οὖν ἡ δικαιοσύνη οὐ μέρος ἀρετῆς ἀλλ' ὅλη ἀρετὴ ἐστίν, οὐδ' ἡ

έναντία [10] ἀδικία μέρος κακίας ἀλλ' ὅλη κακία. τί δὲ διαφέρει ἡ ἀρετὴ καὶ ἡ δικαιοσύνη αὕτη, δῆλον ἐκ τῶν εἰρημένων: ἔστι μὲν γὰρ ἡ αὕτη, τὸ δ' εἶναι οὐ τὸ αὐτό, ἀλλ' ἥ μὲν πρὸς ἕτερον, δικαιοσύνη, ἥ δὲ τοιάδε ἕξις ἀπλῶς, ἀρετή.

ζητοῦμεν δέ γε τὴν ἐν μέρει ἀρετῆς δικαιοσύνην: ἔστι [15] γάρ τις, ὡς φαμέν. ὁμοίως δὲ καὶ περὶ ἀδικίας τῆς κατὰ μέρος. σημεῖον δ' ὅτι ἔστιν: κατὰ μὲν γὰρ τὰς ἄλλας μοχθηρίας ὁ ἐνεργῶν ἀδικεῖ μὲν, πλεονεκτεῖ δ' οὐδέν, οἷον ὁ ρίψας τὴν ἀσπίδα διὰ δειλίαν ἢ κακῶς εἰπὼν διὰ χαλεπότητα ἢ οὐ βοηθήσας χρήμασι δι' ἀνελευθερίαν: ὅταν δὲ [20] πλεονεκτῇ, πολλάκις κατ' οὐδεμίαν τῶν τοιούτων, ἀλλὰ μὴν οὐδὲ κατὰ πάσας, κατὰ πονηρίαν δέ γε τινὰ ὑέγομεν γὰρ καὶ κατ' ἀδικίαν. ἔστιν ἄρ' ἄλλη τις ἀδικία ὡς μέρος τῆς ὅλης, καὶ ἄδικόν τι ἐν μέρει τοῦ ὅλου ἀδίκου τοῦ παρὰ τὸν νόμον. ἔτι εἰ ὁ μὲν τοῦ κερδαίνειν ἕνεκα μοιχεύει καὶ [25] προσλαμβάνων, ὁ δὲ προστιθεὶς καὶ ζημιούμενος δι' ἐπιθυμίαν, οὗτος μὲν ἀκόλαστος δόξειεν ἂν εἶναι μᾶλλον ἢ πλεονέκτης, ἐκεῖνος δ' ἄδικος, ἀκόλαστος δ' οὐ: δῆλον ἄρα ὅτι διὰ τὸ κερδαίνειν. ἔτι περὶ μὲν τᾶλλα πάντα ἀδικήματα γίνεται ἡ ἐπαναφορὰ ἐπὶ τινι μοχθηρίαν ἀεὶ, οἷον εἰ ἐμοίχευσεν, [30] ἐπ' ἀκολασίαν, εἰ ἐγκατέλιπε τὸν παραστάτην, ἐπὶ δειλίαν, εἰ ἐπάταξεν, ἐπ' ὀργήν: εἰ δ' ἐκέρδανεν, ἐπ' οὐδεμίαν μοχθηρίαν ἀλλ' ἢ ἐπ' ἀδικίαν. ὥστε φανερόν ὅτι ἔστι τις ἀδικία παρὰ τὴν ὅλην ἄλλη ἐν μέρει, συνώνυμος, ὅτι ὁ ὀρισμὸς ἐν τῷ αὐτῷ γένει: 1130b [1] ἄμφω γὰρ ἐν τῷ πρὸς ἕτερον ἔχουσι τὴν δύναμιν, ἀλλ' ἢ μὲν περὶ τιμὴν ἢ χρήματα ἢ σωτηρίαν, ἢ εἴ τι ἐχοίμεν ἐνὶ ὀνόματι περιλαβεῖν ταῦτα πάντα, καὶ δι' ἡδονὴν τὴν ἀπὸ τοῦ κέρδους, ἢ δὲ περὶ ἅπαντα περὶ ὅσα [5] ὁ σπουδαῖος.

ὅτι μὲν οὖν εἰσὶν αἱ δικαιοσύναι πλείους, καὶ ὅτι ἔστι τις καὶ ἑτέρα παρὰ τὴν ὅλην ἀρετὴν, δῆλον: τίς δὲ καὶ ποία τις, ληπτέον. διώρισται δὴ τὸ ἄδικον τό τε παράνομον καὶ τὸ ἄνισον, τὸ δὲ δίκαιον τό τε νόμιμον καὶ τὸ ἴσον. κατὰ [10] μὲν οὖν τὸ παράνομον ἢ πρότερον εἰρημένη ἀδικία ἐστίν. ἐπεὶ δὲ τὸ ἄνισον καὶ τὸ παράνομον οὐ ταυτὸν ἀλλ' ἕτερον ὡς μέρος πρὸς ὅλον τὸ μὲν γὰρ ἄνισον ἅπαν παράνομον, τὸ δὲ παράνομον οὐχ ἅπαν ἄνισον, καὶ τὸ ἄδικον καὶ ἡ ἀδικία οὐ ταυτὰ ἀλλ' ἕτερα ἐκείνων, τὰ μὲν ὡς μέρη τὰ δ' ὡς ὅλα: μέρος γὰρ [15] αὕτη ἡ ἀδικία τῆς ὅλης ἀδικίας, ὁμοίως δὲ καὶ ἡ

δικαιοσύνη τῆς δικαιοσύνης. ὥστε καὶ περὶ τῆς ἐν μέρει δικαιοσύνης καὶ περὶ τῆς ἐν μέρει ἀδικίας λεκτέον, καὶ τοῦ δικαίου καὶ ἀδίκου ὡσαύτως. ἡ μὲν οὖν κατὰ τὴν ὅλην ἀρετὴν τεταγμένη δικαιοσύνη καὶ ἀδικία, ἡ μὲν τῆς ὅλης ἀρετῆς [20] οὕσα χρῆσις πρὸς ἄλλον ἢ δὲ τῆς κακίας, ἀφείσθω. καὶ τὸ δίκαιον δὲ καὶ τὸ ἄδικον τὸ κατὰ ταύτας φανερόν ὡς διοριστέον: σχεδὸν γὰρ τὰ πολλὰ τῶν νομίμων τὰ ἀπὸ τῆς ὅλης ἀρετῆς προσταττόμενά ἐστιν: καθ' ἐκάστην γὰρ ἀρετὴν προστάττει ζῆν καὶ καθ' ἐκάστην μοχθηρίαν κωλύει ὁ νόμος. [25] τὰ δὲ ποιητικὰ τῆς ὅλης ἀρετῆς ἐστὶ τῶν νομίμων ὅσα νανομοθέτῃται περὶ παιδείαν τὴν πρὸς τὸ κοινόν. περὶ δὲ τῆς καθ' ἕκαστον παιδείας, καθ' ἣν ἀπλῶς ἀνὴρ ἀγαθὸς ἐστὶ, πότερον τῆς πολιτικῆς ἐστὶν ἢ ἐτέρας, ὕστερον διοριστέον: οὐ γὰρ ἴσως ταῦτόν ἀνδρὶ τ' ἀγαθῷ εἶναι καὶ πολίτῃ παντί. [30] τῆς δὲ κατὰ μέρος δικαιοσύνης καὶ τοῦ κατ' αὐτὴν δικαίου ἐν μὲν ἐστὶν εἶδος τὸ ἐν ταῖς διανομαῖς τιμῆς ἢ χρημάτων ἢ τῶν ἄλλων ὅσα μεριστὰ τοῖς κοινωνοῦσι τῆς πολιτείας ἐν τούτοις γὰρ ἐστὶ καὶ ἄνισον ἔχειν καὶ ἴσον ἕτερον ἐτέρου, 1131a [1] ἐν δὲ τὸ ἐν τοῖς συναλλάγμασι διορθωτικόν. τούτου δὲ μέρη δύο: τῶν γὰρ συναλλαγμάτων τὰ μὲν ἐκούσια ἐστὶ τὰ δ' ἀκούσια, ἐκούσια μὲν τὰ τοιάδε οἷον πρᾶσις ὦνῃ δανεισμὸς ἐγγύῃ χρῆσις παρακαταθήκη μίσθωσις ἐκούσια δὲ λέγεται, [5] ὅτι ἡ ἀρχὴ τῶν συναλλαγμάτων τούτων ἐκούσιοσ', τῶν δ' ἀκουσίων τὰ μὲν λαθραῖα, οἷον κλοπὴ μοιχεῖα φαρμακεῖα προαγωγεία δουλαπατία δολοφονία ψευδομαρτυρία, τὰ δὲ βίαια, οἷον αἰκία δεσμὸς θάνατος ἀρπαγὴ πῆρωςις κακηγορία προπηλακισμός.

[10] ἐπεὶ δ' ὁ τ' ἄδικος ἄνισος καὶ τὸ ἄδικον ἄνισον, δῆλον ὅτι καὶ μέσον τι ἐστὶ τοῦ ἀνίσου. τοῦτο δ' ἐστὶ τὸ ἴσον: ἐν ὁποίᾳ γὰρ πράξει ἐστὶ τὸ πλεόν καὶ τὸ ἔλαττον, ἐστὶ καὶ τὸ ἴσον. εἰ οὖν τὸ ἄδικον ἄνισον, τὸ δίκαιον ἴσον: ὅπερ καὶ ἄνευ λόγου δοκεῖ πᾶσιν. ἐπεὶ δὲ τὸ ἴσον μέσον, τὸ δίκαιον μέσον τι ἂν [15] εἴη. ἐστὶ δὲ τὸ ἴσον ἐν ἐλαχίστοις δυσὶν. ἀνάγκη τοίνυν τὸ δίκαιον μέσον τε καὶ ἴσον εἶναι καὶ πρὸς τι καὶ τισίν, καὶ ἢ μὲν μέσον, τινῶν ταῦτα δ' ἐστὶ πλεῖον καὶ ἔλαττον, ἢ δ' ἴσον, δυοῖν, ἢ δὲ δίκαιον, τισίν. ἀνάγκη ἄρα τὸ δίκαιον ἐν ἐλαχίστοις εἶναι τέτταρσιν: οἷς τε γὰρ δίκαιον τυγχάνει [20] ὄν, δύο ἐστὶ, καὶ ἐν οἷς, τὰ πράγματα, δύο. καὶ ἡ αὐτὴ ἐστὶ ἰσότης, οἷς καὶ ἐν οἷς: ὡς γὰρ ἐκεῖνα ἔχει, τὰ ἐν οἷς, οὕτω κἀκεῖνα ἔχει: εἰ γὰρ μὴ ἴσοι, οὐκ ἴσα ἔξουσιν, ἀλλ' ἐντεῦθεν αἱ μάχαι καὶ τὰ ἐγκλήματα,

ὅταν ἢ μὴ ἴσα ἴσοι ἢ μὴ ἴσοι ἴσα ἔχωσι καὶ νέμονται. ἔτι ἐκ τοῦ κατ' ἀξίαν [25] τοῦτο δηλον: τὸ γὰρ δίκαιον ἐν ταῖς νομαῖς ὁμολογοῦσι πάντες κατ' ἀξίαν τινὰ δεῖν εἶναι, τὴν μέντοι ἀξίαν οὐ τὴν αὐτὴν λέγουσι πάντες [ὑπάρχειν], ἀλλ' οἱ μὲν δημοκρατικοὶ ἐλευθερίαν, οἱ δ' ὀλιγαρχικοὶ πλοῦτον, οἱ δ' εὐγένειαν, οἱ δ' ἀριστοκρατικοὶ ἀρετὴν. ἔστιν ἄρα τὸ δίκαιον ἀνάλογόν τι. [30] τὸ γὰρ ἀνάλογον οὐ μόνον ἐστὶ μοναδικοῦ ἀριθμοῦ ἴδιον, ἀλλ' ὅλως ἀριθμοῦ: ἡ γὰρ ἀναλογία ἰσότης ἐστὶ λόγων, καὶ ἐν τέτταρσιν ἐλαχίστοις. ἡ μὲν οὖν διηρημένη ὅτι ἐν τέτταρσι, δηλον. ἀλλὰ καὶ ἡ συνεχῆς: τῷ γὰρ ἐνὶ ὧς δυσὶ χρήται καὶ δις λέγει, 1131b [1] οἷον ὡς ἡ τοῦ α πρὸς τὴν τοῦ β, οὕτως ἡ τοῦ β πρὸς τὴν τοῦ γ. δις οὖν ἡ τοῦ β εἴρηται: ὥστ' ἐὰν ἡ τοῦ β τεθῇ δίς, τέτταρα ἔσται τὰ ἀνάλογα. ἔστι δὲ καὶ τὸ δίκαιον ἐν τέτταρσιν ἐλαχίστοις, καὶ ὁ λόγος ὁ αὐτός: [5] διήρηται γὰρ ὁμοίως οἷς τε καὶ ᾗ. ἔσται ἄρα ὡς ὁ α ὅρος πρὸς τὸν β, οὕτως ὁ γ πρὸς τὸν δ, καὶ ἐναλλάξ ἄρα, ὡς ὁ α πρὸς τὸν γ, ὁ β πρὸς τὸν δ. ὥστε καὶ τὸ ὅλον πρὸς τὸ ὅλον: ὅπερ ἡ νομὴ συνδυάζει, κἂν οὕτω συντεθῇ, δικαίως συνδυάζει. ἡ ἄρα τοῦ α ὅρου τῷ γ καὶ ἡ τοῦ β τῷ δ σύζευξις [10] τὸ ἐν διανομῇ δίκαιόν ἐστι, καὶ μέσον τὸ δίκαιον τοῦτ' ἐστί, τὸ παρὰ τὸ ἀνάλογον: τὸ γὰρ ἀνάλογον μέσον, τὸ δὲ δίκαιον ἀνάλογον. καλοῦσι δὲ τὴν τοιαύτην ἀναλογίαν γεωμετρικὴν οἱ μαθηματικοί: ἐν γὰρ τῇ γεωμετρικῇ συμβαίνει καὶ τὸ ὅλον πρὸς τὸ ὅλον ὅπερ ἐκάτερον πρὸς ἐκάτερον. [15] ἔστι δ' οὐ συνεχῆς αὕτη ἡ ἀναλογία: οὐ γὰρ γίνεται εἷς ἀριθμῷ ὅρος, ᾧ καὶ ὅ. τὸ μὲν οὖν δίκαιον τοῦτο, τὸ ἀνάλογον: τὸ δ' ἄδικον τὸ παρὰ τὸ ἀνάλογον. γίνεται ἄρα τὸ μὲν πλεόν τὸ δ' ἔλαττον, ὅπερ καὶ ἐπὶ τῶν ἔργων συμβαίνει: ὁ μὲν γὰρ ἀδικῶν πλεόν ἔχει, ὁ δ' ἀδικούμενος [20] ἔλαττον τοῦ ἀγαθοῦ. ἐπὶ δὲ τοῦ κακοῦ ἀνάπαλιν: ἐν ἀγαθοῦ γὰρ λόγῳ γίνεται τὸ ἔλαττον κακὸν πρὸς τὸ μείζον κακόν: ἔστι γὰρ τὸ ἔλαττον κακὸν μᾶλλον αἰρετὸν τοῦ μείζονος, τὸ δ' αἰρετὸν ἀγαθόν, καὶ τὸ μᾶλλον μείζον. τὸ μὲν οὖν ἐν εἶδος τοῦ δικαίου τοῦτ' ἐστίν.

[25] τὸ δὲ λοιπὸν ἐν τὸ διορθωτικόν, ὃ γίνεται ἐν τοῖς συναλλάγμασι καὶ τοῖς ἐκουσίοις καὶ τοῖς ἀκουσίοις. τοῦτο δὲ τὸ δίκαιον ἄλλο εἶδος ἔχει τοῦ πρότερον. τὸ μὲν γὰρ διανεμητικὸν δίκαιον τῶν κοινῶν ἀεὶ κατὰ τὴν ἀναλογίαν ἐστὶ τὴν εἰρημένην: καὶ γὰρ ἀπὸ χρημάτων κοινῶν ἐὰν γίνηται [30] ἡ διανομή, ἔσται κατὰ τὸν λόγον τὸν αὐτὸν ὅνπερ ἔχουσι πρὸς ἀλλήλα τὰ εἰσενεχθέντα: καὶ

τὸ ἄδικον τὸ ἀντικείμενον τῷ δικαίῳ τούτῳ τὸ παρὰ τὸ ἀνάλογόν ἐστιν. τὸ δ' ἐν τοῖς συναλλάγμασι δίκαιον ἐστὶ μὲν ἴσον τι, καὶ τὸ ἄδικον ἄνισον, 1132a [1] ἀλλ' οὐ κατὰ τὴν ἀναλογίαν ἐκείνην ἀλλὰ κατὰ τὴν ἀριθμητικὴν. οὐδὲν γὰρ διαφέρει, εἰ ἐπιεικὴς φαῦλον ἀπεστέρησεν ἢ φαῦλος ἐπιεικῇ, οὐδ' εἰ ἐμοίχευσεν ἐπιεικὴς ἢ φαῦλος: ἀλλὰ πρὸς τοῦ βλάβους τὴν διαφορὰν μόνον βλέπει [5] ὁ νόμος, καὶ χρῆται ὡς ἴσοις, εἰ ὁ μὲν ἀδικεῖ ὁ δ' ἀδικεῖται, καὶ εἰ ἔβλαψεν ὁ δὲ βέβλαπται. ὥστε τὸ ἄδικον τοῦτο ἄνισον ὃν ισάζειν πειρᾶται ὁ δικαστής: καὶ γὰρ ὅταν ὁ μὲν πληγῇ ὁ δὲ πατάξῃ, ἢ καὶ κτείνῃ ὁ δ' ἀποθάνῃ, διήρηται τὸ πάθος καὶ ἡ πρᾶξις εἰς ἄνισα: ἀλλὰ πειρᾶται τῇ [10] ζημίᾳ ισάζειν, ἀφαιρῶν τοῦ κέρδους. λέγεται γὰρ ὡς ἀπλῶς εἰπεῖν ἐπὶ τοῖς τοιούτοις, κἂν εἰ μὴ τις οἰκεῖον ὄνομα εἴῃ, τὸ κέρδος, οἷον τῷ πατάξαντι, καὶ ἡ ζημία τῷ παθόντι: ἀλλ' ὅταν γε μετρηθῇ τὸ πάθος, καλεῖται τὸ μὲν ζημία τὸ δὲ κέρδος. ὥστε τοῦ μὲν πλείονος καὶ ἐλάττονος τὸ ἴσον [15] μέσον, τὸ δὲ κέρδος καὶ ἡ ζημία τὸ μὲν πλεον τὸ δ' ἔλαττον ἐναντίως, τὸ μὲν τοῦ ἀγαθοῦ πλεον τοῦ κακοῦ δ' ἔλαττον κέρδος, τὸ δ' ἐναντίον ζημία: ὣν ἦν μέσον τὸ ἴσον, ὁ λέγομεν εἶναι δίκαιον: ὥστε τὸ ἐπανορθωτικὸν δίκαιον ἂν εἴῃ τὸ μέσον ζημίας καὶ κέρδους. διὸ καὶ ὅταν ἀμφισβητῶσιν, [20] ἐπὶ τὸν δικαστὴν καταφεύγουσιν: τὸ δ' ἐπὶ τὸν δικαστὴν ἰέναι ἰέναι ἐστὶν ἐπὶ τὸ δίκαιον: ὁ γὰρ δικαστὴς βούλεται εἶναι οἷον δίκαιον ἐμψυχον: καὶ ζητοῦσι δικαστὴν μέσον, καὶ καλοῦσιν ἔνιοι μεσιδίους, ὡς ἐὰν τοῦ μέσου τύχωσι, τοῦ δικαίου τευζόμενοι. μέσον ἄρα τι τὸ δίκαιον, εἴπερ καὶ ὁ δικαστής. ὁ δὲ [25] δικαστὴς ἐπανισοῖ, καὶ ὥπερ γραμμῆς εἰς ἄνισα τετμημένης, ᾧ τὸ μείζον τμήμα τῆς ἡμισείας ὑπερέχει, τοῦτ' ἀφεῖλε καὶ τῷ ἐλάττονι τμήματι προσέθηκεν. ὅταν δὲ δίχα διαιρεθῇ τὸ ὅλον, τότε φασὶν ἔχειν τὸ αὐτοῦ ὅταν λάβωσι τὸ ἴσον. τὸ δ' ἴσον μέσον ἐστὶ τῆς μείζονος καὶ [30] ἐλάττονος κατὰ τὴν ἀριθμητικὴν ἀναλογίαν. διὰ τοῦτο καὶ ὀνομάζεται δίκαιον, ὅτι δίχα ἐστίν, ὥπερ ἂν εἴ τις εἴποι δίχαιον, καὶ ὁ δικαστὴς διχαστής. ἐπὶ γὰρ δύο ἴσων ἀφαιρεθῇ ἀπὸ θατέρου, πρὸς θάτερον δὲ προστεθῇ, δυσὶ τούτοις ὑπερέχει θάτερον: εἰ γὰρ ἀφηρέθη μὲν, μὴ προστεθῇ δέ, ἐνὶ ἂν μόνον ὑπερεῖχεν.

1132b [1] τοῦ μέσου ἄρα ἐνί, καὶ τὸ μέσον, ἀφ' οὗ ἀφηρέθη, ἐνί. τούτῳ ἄρα γνωριούμεν τί τε ἀφελεῖν δεῖ ἀπὸ τοῦ πλεον ἔχοντος, καὶ τί προσθεῖναι τῷ ἐλάττον ἔχοντι: ᾧ μὲν γὰρ τὸ μέσον ὑπερέχει, τοῦτο

προσθεῖναι [5] δεῖ τῷ ἔλαττον ἔχοντι, ᾧ δ' ὑπερέχεται, ἀφελεῖν ἀπὸ τοῦ μεγίστου. ἴσαι αἱ ἐφ' ὧν αα ββ γγ ἀλλήλαις: ἀπὸ τῆς αα ἀφηρησθῶ τὸ αε, καὶ προσκείσθω τῇ γγ τὸ ἐφ' ᾧ γδ, ὥστε ὅλη ἡ δγγ τῆς εα ὑπερέχει τῷ γδ καὶ τῷ γζ: τῆς ἄρα ββ τῷ γδ. [ἔστι δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων τεχνῶν: [10] ἀνηροῦντο γὰρ ἄν, εἰ μὴ ἐποίει τὸ ποιοῦν καὶ ὅσον καὶ οἶον, καὶ τὸ πάσχον ἔπασχε τοῦτο καὶ τοσοῦτον καὶ τοιοῦτον.] ἐλήλυθε δὲ τὰ ὀνόματα ταῦτα, ἧ τε ζημία καὶ τὸ κέρδος, ἐκ τῆς ἐκουσίου ἀλλαγῆς: τὸ μὲν γὰρ πλέον ἔχειν ἢ τὰ αὐτοῦ κερδαίνειν λέγεται, τὸ δ' ἔλαττον τῶν ἐξ ἀρχῆς ζημιοῦσθαι, [15] οἶον ἐν τῷ ὠνεῖσθαι καὶ πωλεῖν καὶ ἐν ὅσοις ἄλλοις ἄδειαν δέδωκεν ὁ νόμος: ὅταν δὲ μήτε πλέον μήτ' ἔλαττον ἀλλ' αὐτὰ δι' αὐτῶν γένηται, τὰ αὐτῶν φασὶν ἔχειν καὶ οὔτε ζημιοῦσθαι οὔτε κερδαίνειν. ὥστε κέρδους τινὸς καὶ ζημίας μέσον τὸ δίκαιόν ἐστι τῶν παρὰ τὸ ἐκούσιον, τὸ ἴσον ἔχειν [20] καὶ πρότερον καὶ ὕστερον.

δοκεῖ δέ τις καὶ τὸ ἀντιπεπονθὸς εἶναι ἀπλῶς δίκαιον, ὥσπερ οἱ Πυθαγόρειοι ἔφασαν: ὠρίζοντο γὰρ ἀπλῶς τὸ δίκαιον τὸ ἀντιπεπονθὸς ἄλλω. τὸ δ' ἀντιπεπονθὸς οὐκ ἐφαρμόττει οὔτ' ἐπὶ τὸ νεμητικὸν δίκαιον οὔτ' ἐπὶ τὸ διορθωτικόν — καίτοι [25] βούλονται γε τοῦτο λέγειν καὶ τὸ Παδαμάνθυος δίκαιον:

εἴ κε πάθοι τά τ' ἔρεξε, δίκη κ' ἰθεῖα γένοιτο

— πολλαχοῦ γὰρ διαφωνεῖ: οἶον εἰ ἀρχὴν ἔχων ἐπάταξεν, οὐ δεῖ ἀντιπληγῆναι, καὶ εἰ ἄρχοντα ἐπάταξεν, οὐ πληγῆναι [30] μόνον δεῖ ἀλλὰ καὶ κολασθῆναι. ἔτι τὸ ἐκούσιον καὶ τὸ ἀκούσιον διαφέρει πολὺ. ἀλλ' ἐν μὲν ταῖς κοινωνίαις ταῖς ἀλλακτικαῖς συνέχει τὸ τοιοῦτον δίκαιον, τὸ ἀντιπεπονθὸς κατ' ἀναλογίαν καὶ μὴ κατ' ἰσότητα. τῷ ἀντιποιεῖν γὰρ ἀνάλογον συμμένει ἡ πόλις. ἡ γὰρ τὸ κακῶς ζητοῦσιν: 1133a [1] εἰ δὲ μή, δουλεία δοκεῖ εἶναι [εἰ μὴ ἀντιποιήσῃ]: ἡ τὸ εὖ: εἰ δὲ μή, μετάδοσις οὐ γίνεται, τῇ μεταδόσει δὲ συμμένουσιν. διὸ καὶ Χαρίτων ἱερὸν ἐμποδὼν ποιοῦνται, ἵν' ἀνταπόδοσις ᾗ: τοῦτο γὰρ ἴδιον χάριτος: ἀνθυπηρετῆσαι γὰρ δεῖ τῷ [5] χαρισμένῳ, καὶ πάλιν αὐτὸν ἄρξαι χαριζόμενον. ποιεῖ δὲ τὴν ἀντίδοσιν τὴν κατ' ἀναλογίαν ἢ κατὰ διάμετρον σύζευξις. οἰκοδόμος ἐφ' ᾧ α, σκυτοτόμος ἐφ' ᾧ β, οἰκία ἐφ' ᾧ γ, ὑπόδημα ἐφ' ᾧ δ. δεῖ οὖν λαμβάνειν τὸν οἰκοδόμον παρὰ τοῦ σκυτοτόμου τὸ ἐκείνου

ἔργον, καὶ αὐτὸν [10] ἐκείνῳ μεταδιδόναι τὸ αὐτοῦ. ἐὰν οὖν πρῶτον ἢ τὸ κατὰ τὴν ἀναλογίαν ἴσον, εἴτα τὸ ἀντιπεπονθὸς γένηται, ἔσται τὸ λεγόμενον. εἰ δὲ μή, οὐκ ἴσον, οὐδὲ συμμένει· οὐθὲν γὰρ κωλύει κρεῖττον εἶναι τὸ θατέρου ἔργον ἢ τὸ θατέρου· δεῖ οὖν ταῦτα ἰσασθῆναι. ἔστι δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων τεχνῶν· ἀνηροῦντο [15] γὰρ ἄν, εἰ μὴ ἐποίει τὸ ποιοῦν καὶ ὅσον καὶ οἶον, καὶ τὸ πάσχον ἔπασχε τοῦτο καὶ τοσοῦτον καὶ τοιοῦτον. οὐ γὰρ ἐκ δύο ἰατρῶν γίνεται κοινωνία, ἀλλ' ἐξ ἱατροῦ καὶ γεωργοῦ, καὶ ὅλως ἐτέρων καὶ οὐκ ἴσων· ἀλλὰ τούτους δεῖ ἰσασθῆναι. διὸ πάντα συμβλητὰ δεῖ πως εἶναι, ὧν ἐστὶν ἀλλαγὴ. [20] ἐφ' ὃ τὸ νόμισμ' ἐλήλυθε, καὶ γίνεται πως μέσον· πάντα γὰρ μετρεῖ, ὥστε καὶ τὴν ὑπεροχὴν καὶ τὴν ἔλλειψιν, πόσα ἄττα δὴ ὑποδήματ' ἴσον οἰκία ἢ τροφῇ. δεῖ τοίνυν ὅπερ οἰκοδόμος πρὸς σκυτοτόμον, τοσαδὶ ὑποδήματα πρὸς οἰκίαν ἢ τροφήν. εἰ γὰρ μὴ τοῦτο, οὐκ ἔσται ἀλλαγὴ οὐδὲ κοινωνία. [25] τοῦτο δ', εἰ μὴ ἴσα εἴη πως, οὐκ ἔσται. δεῖ ἄρα ἐνὶ τινὶ πάντα μετρεῖσθαι, ὥσπερ ἐλέγχθη πρότερον. τοῦτο δ' ἐστὶ τῇ μὲν ἀληθείᾳ ἡ χρεία, ἢ πάντα συνέχει· εἰ γὰρ μὴθὲν δέοιντο ἢ μὴ ὁμοίως, ἢ οὐκ ἔσται ἀλλαγὴ ἢ οὐχ ἡ αὐτή· οἶον δ' ὑπάλλαγμα τῆς χρείας τὸ νόμισμα γέγονε κατὰ συνθήκην· [30] καὶ διὰ τοῦτο τοῦνομα ἔχει νόμισμα, ὅτι οὐ φύσει ἀλλὰ νόμῳ ἐστὶ, καὶ ἐφ' ἡμῖν μεταβαλεῖν καὶ ποιῆσαι ἄχρηστον. ἔσται δὲ ἀντιπεπονθὸς, ὅταν ἰσασθῇ, ὥστε ὅπερ γεωργὸς πρὸς σκυτοτόμον, τὸ ἔργον τὸ τοῦ σκυτοτόμου πρὸς τὸ τοῦ γεωργοῦ.

1133b [1] εἰς σχῆμα δ' ἀναλογίας οὐ δεῖ ἄγειν, ὅταν ἀλλάζωνται· εἰ δὲ μή, ἀμφοτέρως ἔξει τὰς ὑπεροχὰς τὸ ἕτερον ἄκρον, ἀλλ' ὅταν ἔχωσι τὰ αὐτῶν. οὕτως ἴσοι καὶ κοινωνοί, ὅτι αὕτη ἡ ἰσότης δύναται ἐπ' αὐτῶν γίνεσθαι. γεωργὸς α, τροφὴ γ, [5] σκυτοτόμος β, τὸ ἔργον αὐτοῦ τὸ ἰσασμένον δ. εἰ δ' οὕτω μὴ ἦν ἀντιπεπονθέναί, οὐκ ἂν ἦν κοινωνία. ὅτι δ' ἡ χρεία συνέχει ὥσπερ ἓν τι ὄν, δηλοῖ ὅτι ὅταν μὴ ἐν χρείᾳ ὧσιν ἀλλήλων, ἢ ἀμφοτέροι ἢ ἄτερος, οὐκ ἀλλάττονται, ὥσπερ ὅταν οὗ ἔχει αὐτὸς δέηται τις, οἶον οἴνου, διδόντες σίτου ἐξαγωγήν.† [10] δεῖ ἄρα τοῦτο ἰσασθῆναι. ὑπὲρ δὲ τῆς μελλούσης ἀλλαγῆς, εἰ νῦν μὴδὲν δεῖται, ὅτι ἔσται ἂν δεηθῇ, τὸ νόμισμα οἶον ἐγγυητὴς ἐσθ' ἡμῖν· δεῖ γὰρ τοῦτο φέροντι εἶναι λαβεῖν. πάσχει μὲν οὖν καὶ τοῦτο τὸ αὐτό· οὐ γὰρ ἀεὶ ἴσον δύναται· ὅμως δὲ βούλεται μένειν μᾶλλον. διὸ δεῖ πάντα [15] τετιμῆσθαι· οὕτω γὰρ ἀεὶ ἔσται

ἀλλαγῇ, εἰ δὲ τοῦτο, κοινωνία. τὸ δὲ νόμισμα ὥσπερ μέτρον σύμμετρα ποιῆσαν ἰσάζει: οὔτε γὰρ ἂν μὴ οὔσης ἀλλαγῆς κοινωνία ἦν, οὔτ' ἀλλαγῇ ἰσότητος μὴ οὔσης, οὔτ' ἰσότης μὴ οὔσης συμμετρίας. τῇ μὲν οὖν ἀληθείᾳ ἀδύνατον τὰ τοσοῦτον διαφέροντα σύμμετρα [20] γενέσθαι, πρὸς δὲ τὴν χρεῖαν ἐνδέχεται ἱκανῶς. ἐν δὲ τι δεῖ εἶναι, τοῦτο δ' ἐξ ὑποθέσεως: διὸ νόμισμα καλεῖται: τοῦτο γὰρ πάντα ποιεῖ σύμμετρα: μετρεῖται γὰρ πάντα νομίσματι. οἰκία α, μναῖ δέκα β, κλίνη γ. τὸ α τοῦ β ἥμισυ, εἰ πέντε μνῶν ἀξία ἡ οἰκία, ἡ ἴσον: ἡ δὲ κλίνη δέκατον [25] μέρος, τὸ γ τοῦ β: δῆλον τοίνυν πόσαι κλῖναι ἴσον οἰκία, ὅτι πέντε. ὅτι δ' οὕτως ἡ ἀλλαγῇ ἦν πρὶν τὸ νόμισμα εἶναι, δῆλον: διαφέρει γὰρ οὐδὲν ἢ κλῖναι πέντε ἀντὶ οἰκίας, ἢ ὅσου αἱ πέντε κλῖναι.

τί μὲν οὖν τὸ ἄδικον καὶ τί τὸ δίκαιόν ἐστιν, εἴρηται. [30] διωρισμένων δὲ τούτων δῆλον ὅτι ἡ δικαιοπραγία μέσον ἐστὶ τοῦ ἀδικεῖν καὶ ἀδικεῖσθαι: τὸ μὲν γὰρ πλεόν ἔχειν τὸ δ' ἔλαττόν ἐστιν. ἡ δὲ δικαιοσύνη μεσότης τίς ἐστιν, οὐ τὸν αὐτὸν δὲ τρόπον ταῖς ἄλλαις ἀρεταῖς, ἀλλ' ὅτι μέσου ἐστίν: ἡ δ' ἀδικία τῶν ἀκρῶν.

[10] ταῦτόν ἄρα δίκαιον καὶ ἐπιεικὲς, καὶ ἀμφοῖν σπουδαῖον ὄντοιν κρεῖττον τὸ ἐπιεικὲς. ποιεῖ δὲ τὴν ἀπορίαν ὅτι τὸ ἐπιεικὲς δίκαιον μὲν ἐστιν, οὐ τὸ κατὰ νόμον δέ, ἀλλ' ἐπανόρθωμα νομίμου δικαίου. αἴτιον δ' ὅτι ὁ μὲν νόμος καθόλου

παῖς, περὶ ἐνίων δ' οὐχ οἷόν τε ὀρθῶς εἰπεῖν καθόλου. ἐν οἷς οὖν [15] ἀνάγκη μὲν εἰπεῖν καθόλου, μὴ οἷόν τε δὲ ὀρθῶς, τὸ ὥς ἐπὶ τὸ πλεον λαμβάνει ὁ νόμος, οὐκ ἀγνοῶν τὸ ἀμαρτανόμενον. καὶ ἔστιν οὐδὲν ἥττον ὀρθός: τὸ γὰρ ἀμάρτημα οὐκ ἐν τῷ νόμῳ οὐδ' ἐν τῷ νομοθέτῃ ἀλλ' ἐν τῇ φύσει τοῦ πράγματός ἐστιν: εὐθύς γὰρ τοιαύτη ἡ τῶν πρακτῶν ὕλη ἐστίν. [20] ὅταν οὖν λέγῃ μὲν ὁ νόμος καθόλου, συμβῇ δ' ἐπὶ τούτου παρὰ τὸ καθόλου, τότε ὀρθῶς ἔχει, ἢ παραλείπει ὁ νομοθέτης καὶ ἥμαρτεν ἀπλῶς εἰπὼν, ἐπανορθοῦν τὸ ἐλλειφθέν, ὃ κἂν ὁ νομοθέτης αὐτὸς ἂν εἶπεν ἐκεῖ παρών, καὶ εἰ ἥδει, ἐνομοθέτησεν. διὸ δίκαιον μὲν ἐστὶ, καὶ βέλτιον τινος δικαίου, [25] οὐ τοῦ ἀπλῶς δὲ ἀλλὰ τοῦ διὰ τὸ ἀπλῶς ἀμαρτήματος. καὶ ἔστιν αὕτη ἡ φύσις ἡ τοῦ ἐπιεικοῦς, ἐπανόρθωμα νόμου, ἢ ἐλλείπει διὰ τὸ καθόλου. τοῦτο γὰρ αἴτιον καὶ τοῦ μὴ πάντα κατὰ νόμον εἶναι, ὅτι περὶ ἐνίων ἀδύνατον θέσθαι νόμον, ὥστε ψηφίσματος δεῖ. τοῦ γὰρ ἀορίστου ἀόριστος καὶ [30] ὁ κανὼν ἐστίν, ὥσπερ καὶ τῆς Λεσβίας οἰκοδομίας ὁ μολίβδινος κανὼν: πρὸς γὰρ τὸ σχῆμα τοῦ λίθου μετακινεῖται καὶ οὐ μένει ὁ κανὼν, καὶ τὸ ψηφισμα πρὸς τὰ πράγματα. τί μὲν οὖν ἐστὶ τὸ ἐπιεικές, καὶ ὅτι δίκαιον καὶ τινὸς βέλτιον δικαίου, δῆλον. φανερόν δ' ἐκ τούτου καὶ ὁ ἐπιεικὴς τίς [35] ἐστίν: ὁ γὰρ τῶν τοιούτων προαιρετικὸς καὶ πρακτικὸς, καὶ 1138a [1] ὁ μὴ ἀκριβοδίκαιος ἐπὶ τὸ χεῖρον ἀλλ' ἐλαττωτικός, καίπερ ἔχων τὸν νόμον βοηθόν, ἐπιεικὴς ἐστὶ, καὶ ἡ ἕξις αὕτη ἐπιείκεια, δικαιοσύνη τις οὕσα καὶ οὐχ ἑτέρα τις ἕξις.

πότερον δ' ἐνδέχεται ἑαυτὸν ἀδικεῖν ἢ οὐ, φανερόν ἐκ [5] τῶν εἰρημένων. τὰ μὲν γὰρ ἐστὶ τῶν δικαίων τὰ κατὰ πᾶσαν ἀρετὴν ὑπὸ τοῦ νόμου τεταγμένα, οἷον οὐ κελεύει ἀποκτινύναι ἑαυτὸν ὁ νόμος, ἃ δὲ μὴ κελεύει, ἀπαγορεύει. ἔτι ὅταν παρὰ τὸν νόμον βλάβη μὴ ἀντιβλάπτων ἐκὼν, ἀδικεῖ, ἐκὼν δὲ ὁ εἰδὼς καὶ ὄν καὶ ᾧ: ὁ δὲ δι' ὀργὴν ἑαυτὸν [10] σφάττων ἐκὼν τοῦτο δρᾷ παρὰ τὸν ὀρθὸν λόγον, ὃ οὐκ ἐᾷ ὁ νόμος: ἀδικεῖ ἄρα. ἀλλὰ τίνα; ἢ τὴν πόλιν, αὐτὸν δ' οὐ; ἐκὼν γὰρ πάσχει, ἀδικεῖται δ' οὐδεὶς ἐκὼν. διὸ καὶ ἡ πόλις ζημιοῖ, καὶ τις ἀτιμία πρόσσεστι τῷ ἑαυτὸν διαφθείραντι ὥς τὴν πόλιν ἀδικοῦντι. ἔτι καθ' ὃ ἄδικος μόνον ὁ ἀδικῶν [15] καὶ μὴ ὅλως φαῦλος, οὐκ ἔστιν ἀδικῆσαι ἑαυτόν· τοῦτο γὰρ ἄλλος ἐκείνου: ἔστι γὰρ πῶς ὁ ἄδικος οὕτω πονηρὸς ὥσπερ ὁ δειλός, οὐχ ὥς ὅλην ἔχων τὴν πονηρίαν, ὥστ' οὐδὲ κατὰ ταύτην ἀδικεῖ: ἅμα γὰρ ἂν τῷ αὐτῷ

εἴη ἀφηρηθῆναι καὶ προσκεῖσθαι τὸ αὐτό: τοῦτο δὲ ἀδύνατον, ἀλλ’ αἰεὶ ἐν πλείοσιν [20] ἀνάγκη εἶναι τὸ δίκαιον καὶ τὸ ἄδικον. ἔτι δὲ ἐκούσιόν τε καὶ ἐκ προαιρέσεως καὶ πρότερον: ὁ γὰρ διότι ἔπαθε καὶ τὸ αὐτὸ ἀντιποιῶν οὐ δοκεῖ ἀδικεῖν: αὐτὸς δ’ αὐτόν, ταῦτά ἅμα καὶ πᾶσχει καὶ ποιεῖ. ἔτι εἴη ἂν ἐκόντα ἀδικεῖσθαι. πρὸς δὲ τούτοις, ἄνευ τῶν κατὰ μέρος ἀδικημάτων [25] οὐδεὶς ἀδικεῖ, μοιχεύει δ’ οὐδεὶς τὴν ἑαυτοῦ οὐδὲ τοιχωρυχεῖ τὸν ἑαυτοῦ τοῖχον οὐδὲ κλέπτει τὰ αὐτοῦ. ὅλως δὲ λύεται τὸ αὐτὸν ἀδικεῖν καὶ κατὰ τὸν διορισμὸν τὸν περὶ τοῦ ἐκουσίως ἀδικεῖσθαι. φανερόν δὲ καὶ ὅτι ἄμφω μὲν φαῦλα, καὶ τὸ ἀδικεῖσθαι καὶ τὸ ἀδικεῖν τὸ μὲν γὰρ ἔλαττον τὸ [30] δὲ πλέον ἔχειν ἐστὶ τοῦ μέσου καὶ ὥσπερ ὑγιεινὸν μὲν ἐν ἰατρικῇ, εὐεκτικὸν δὲ ἐν γυμναστικῇ: ἀλλ’ ὅμως χειρόν τὸ ἀδικεῖν: τὸ μὲν γὰρ ἀδικεῖν μετὰ κακίας καὶ ψεκτόν, καὶ κακίας ἢ τῆς τελείας καὶ ἀπλῶς ἢ ἐγγύς οὐ γὰρ ἅπαν τὸ ἐκούσιον μετὰ ἀδικίας, τὸ δ’ ἀδικεῖσθαι ἄνευ κακίας καὶ [35] ἀδικίας. καθ’ αὐτὸ μὲν οὖν τὸ ἀδικεῖσθαι ἥττον φαῦλον, 1138b [1] κατὰ συμβεβηκὸς δ’ οὐδὲν κωλύει μείζον εἶναι κακόν. ἀλλ’ οὐδὲν μέλει τῇ τέχνῃ, ἀλλὰ πλευρίτιν λέγει μείζω νόσον προσπταίσματος: καίτοι γένοιτ’ ἂν ποτε θάτερον κατὰ συμβεβηκός, εἰ προσπταίσαντα διὰ τὸ πεσεῖν συμβαίῃ [5] ὑπὸ τῶν πολεμίων ληφθῆναι ἢ ἀποθανεῖν. κατὰ μεταφορὰν δὲ καὶ ὁμοιότητα ἔστιν οὐκ αὐτῷ πρὸς αὐτὸν δίκαιον ἀλλὰ τῶν αὐτοῦ τισίν, οὐ πᾶν δὲ δίκαιον ἀλλὰ τὸ δεσποτικὸν ἢ τὸ οἰκονομικόν. ἐν τούτοις γὰρ τοῖς λόγοις διέστηκε τὸ λόγον ἔχον μέρος τῆς ψυχῆς πρὸς τὸ ἄλογον: εἰς [10] ἃ δὴ βλέπουσι καὶ δοκεῖ εἶναι ἀδικία πρὸς αὐτόν, ὅτι ἐν τούτοις ἔστι πᾶσχειν τι παρὰ τὰς ἑαυτῶν ὀρέξεις: ὥσπερ οὖν ἄρχοντι καὶ ἀρχομένῳ εἶναι πρὸς ἄλληλα δίκαιόν τι καὶ τούτοις. περὶ μὲν οὖν δικαιοσύνης καὶ τῶν ἄλλων, τῶν ἠθικῶν ἀρετῶν, διωρίσθω τὸν τρόπον τοῦτον.

Βιβλίο 6

ἐπεὶ δὲ τυγχάνομεν πρότερον εἰρηκότες ὅτι δεῖ τὸ μέσον αἰρεῖσθαι, μὴ τὴν ὑπερβολὴν μηδὲ τὴν ἔλλειψιν, τὸ [20] δὲ μέσον ἐστὶν ὡς ὁ λόγος ὁ ὀρθὸς λέγει, τοῦτο διέλωμεν. ἐν πάσαις γὰρ ταῖς εἰρημέναις ἔξεσι, καθάπερ καὶ ἐπὶ τῶν ἄλλων, ἔστι τις σκοπὸς πρὸς ὃν ἀποβλέπων ὁ τὸν λόγον ἔχων ἐπιτείνει καὶ ἀνίησιν, καὶ τις ἔστιν ὅρος τῶν μεσοτήτων, ἃς μεταξύ φαμεν εἶναι τῆς ὑπερβολῆς καὶ τῆς ἐλλείψεως, [25] οὕσας κατὰ τὸν ὀρθὸν λόγον. ἔστι δὲ τὸ μὲν εἰπεῖν οὕτως ἀληθὲς μὲν, οὐθὲν δὲ σαφές· καὶ γὰρ ἐν ταῖς ἄλλαις ἐπιμελείαις, περὶ ὅσας ἐστὶν ἐπιστήμη, τοῦτ' ἀληθὲς μὲν εἰπεῖν, ὅτι οὔτε πλείω οὔτε ἐλάττω δεῖ πονεῖν οὐδὲ ῥαθυμεῖν, ἀλλὰ τὰ μέσα καὶ ὡς ὁ ὀρθὸς λόγος· τοῦτο δὲ μόνον ἔχων ἂν [30] τις οὐδὲν ἂν εἰδείη πλέον, οἷον ποῖα δεῖ προσφέρεισθαι πρὸς τὸ σῶμα, εἴ τις εἴπειεν ὅτι ὅσα ἡ ἰατρικὴ κελεύει καὶ ὡς ὁ ταύτην ἔχων. διὸ δεῖ καὶ περὶ τὰς τῆς ψυχῆς ἔξεις μὴ μόνον ἀληθῶς εἶναι τοῦτ' εἰρημένον, ἀλλὰ καὶ διωρισμένον τίς ἐστὶν ὁ ὀρθὸς λόγος καὶ τούτου τίς ὅρος.

[35] τὰς δὴ τῆς ψυχῆς ἀρετὰς διελόμενοι 1139a [1] τὰς μὲν εἶναι τοῦ ἥθους ἔφαμεν τὰς δὲ τῆς διανοίας. περὶ μὲν οὖν τῶν ἠθικῶν διεληλύθαμεν, περὶ δὲ τῶν λοιπῶν, περὶ ψυχῆς πρῶτον εἰπόντες, λέγωμεν οὕτως. πρότερον μὲν οὖν ἐλέχθη δὴ εἶναι μέρη τῆς ψυχῆς, τό τε λόγον ἔχον καὶ τὸ ἄλογον· [5] νῦν δὲ περὶ τοῦ λόγον ἔχοντος τὸν αὐτὸν τρόπον διαιρετέον. καὶ ὑποκείσθω δύο τὰ λόγον ἔχοντα, ἐν μὲν ᾧ θεωροῦμεν τὰ τοιαῦτα τῶν ὄντων ὅσων αἱ ἀρχαὶ μὴ ἐνδέχονται ἄλλως ἔχειν, ἐν δὲ ᾧ τὰ ἐνδεχόμενα· πρὸς γὰρ τὰ τῷ γένει ἕτερα καὶ τῶν τῆς ψυχῆς μορίων ἕτερον τῷ [10] γένει τὸ πρὸς ἑκάτερον πεφυκός, εἴπερ καθ' ὁμοιότητά τινα καὶ οἰκειότητα ἡ γνῶσις ὑπάρχει αὐτοῖς. λεγέσθω δὲ τούτων τὸ μὲν ἐπιστημονικὸν τὸ δὲ λογιστικόν· τὸ γὰρ βουλευέσθαι καὶ λογίζεσθαι ταυτόν, οὐδεὶς δὲ βουλευέται περὶ τῶν μὴ ἐνδεχομένων ἄλλως ἔχειν. ὥστε τὸ λογιστικόν ἐστὶν [15] ἐν τι μέρος τοῦ λόγον ἔχοντος. ληπτέον ἄρ' ἑκατέρου τούτων τίς ἡ βελτίστη ἔξις· αὕτη γὰρ ἀρετὴ ἑκατέρου, ἡ δ' ἀρετὴ πρὸς τὸ ἔργον τὸ οἰκεῖον. τρία δὴ ἐστὶν ἐν τῇ ψυχῇ τὰ κύρια πράξεως καὶ ἀληθείας, αἰσθησις νοῦς ὄρεξις. τούτων δ' ἡ αἰσθησις οὐδεμιᾶς ἀρχῇ πράξεως· δῆλον δὲ τῷ [20] τὰ θηρία αἰσθησιν μὲν

ἔχειν πράξεως δὲ μὴ κοινωνεῖν. ἔστι δ' ὅπερ ἐν διανοίᾳ κατάφασις καὶ ἀπόφασις, τοῦτ' ἐν ὀρέξει δίωξις καὶ φυγή· ὥστ' ἐπειδὴ ἡ ἠθικὴ ἀρετὴ ἕξις προαιρετικὴ, ἡ δὲ προαίρεσις ὄρεξις βουλευτική, δεῖ διὰ ταῦτα μὲν τὸν τε λόγον ἀληθῆ εἶναι καὶ τὴν ὄρεξιν ὀρθήν, [25] εἴπερ ἡ προαίρεσις σπουδαία, καὶ τὰ αὐτὰ τὸν μὲν φάναι τὴν δὲ διώκειν. αὕτη μὲν οὖν ἡ διάνοια καὶ ἡ ἀλήθεια πρακτικὴ· τῆς δὲ θεωρητικῆς διανοίας καὶ μὴ πρακτικῆς μηδὲ ποιητικῆς τὸ εὖ καὶ κακῶς τάλιθές ἐστι καὶ ψεῦδος (τοῦτο γὰρ ἐστι παντὸς διανοητικοῦ ἔργον)· τοῦ δὲ πρακτικοῦ [30] καὶ διανοητικοῦ ἀλήθεια ὁμολόγως ἔχουσα τῇ ὀρέξει τῇ ὀρθῇ. πράξεως μὲν οὖν ἀρχὴ προαίρεσις — ὅθεν ἡ κίνησις ἄλλ' οὐχ οὗ ἔνεκα — προαιρέσεως δὲ ὄρεξις καὶ λόγος ὁ ἔνεκά τινος. διὸ οὐτ' ἄνευ νοῦ καὶ διανοίας οὐτ' ἄνευ ἠθικῆς ἐστὶν ἕξεως ἡ προαίρεσις· εὐπραξία γὰρ καὶ τὸ [35] ἐναντίον ἐν πράξει ἄνευ διανοίας καὶ ἡθους οὐκ ἔστιν. διάνοια δ' αὕτη οὐθέν κινεῖ, ἄλλ' ἡ ἔνεκά του καὶ πρακτικὴ· 1139b [1] αὕτη γὰρ καὶ τῆς ποιητικῆς ἄρχει· ἔνεκα γὰρ του ποιεῖ πᾶς ὁ ποιῶν, καὶ οὐ τέλος ἀπλῶς (ἀλλὰ πρὸς τι καὶ τινός) τὸ ποιητόν, ἀλλὰ τὸ πρακτόν· ἡ γὰρ εὐπραξία τέλος, ἡ δ' ὄρεξις τούτου. διὸ ἡ ὀρεκτικὸς νοῦς ἡ προαίρεσις [5] ἡ ὄρεξις διανοητικὴ, καὶ ἡ τοιαύτη ἀρχὴ ἄνθρωπος. οὐκ ἔστι δὲ προαιρετὸν οὐδὲν γεγονός, οἷον οὐδεὶς προαιρεῖται Ἰλίον πεπορθηκένα· οὐδὲ γὰρ βουλευέται περὶ τοῦ γεγονότος ἀλλὰ περὶ τοῦ ἐσομένου καὶ ἐνδεχομένου, τὸ δὲ γεγονὸς οὐκ ἐνδέχεται μὴ γενέσθαι· διὸ ὀρθῶς Ἀγάθων

[10] μόνου γὰρ αὐτοῦ καὶ θεὸς στερίσκεται, ἀγέννητα ποιεῖν ἄσσ' ἂν ἢ πεπραγμένα.

ἀμφοτέρων δὴ τῶν νοητικῶν μορίων ἀλήθεια τὸ ἔργον. καθ' ἃς οὖν μάλιστα ἕξεις ἀληθεύσει ἐκάτερον, αὗται ἀρεταὶ ἀμφοῖν.

ἀρξάμενοι οὖν ἄνωθεν περὶ αὐτῶν πάλιν λέγωμεν. [15] ἔστω δὴ οἷς ἀληθεύει ἡ ψυχὴ τῷ καταφάναι ἢ ἀποφάναι, πέντε τὸν ἀριθμόν· ταῦτα δ' ἐστὶ τέχνη ἐπιστήμη φρόνησις σοφία νοῦς· ὑπολήψει γὰρ καὶ δόξῃ ἐνδέχεται διαψεύδεσθαι. ἐπιστήμη μὲν οὖν τί ἐστίν, ἐντεῦθεν φανερόν, εἰ δεῖ ἀκριβολογεῖσθαι καὶ μὴ ἀκολουθεῖν ταῖς ὁμοιότησιν. [20] πάντες γὰρ ὑπολαμβάνομεν, ὃ ἐπιστάμεθα, μηδ' ἐνδέχεσθαι ἄλλως ἔχειν· τὰ δ' ἐνδεχόμενα ἄλλως, ὅταν ἔξω τοῦ

θεωρεῖν γένηται, λανθάνει εἰ ἔστιν ἢ μή. ἐξ ἀνάγκης ἄρα ἐστὶ τὸ ἐπιστητόν. αἰδίων ἄρα· τὰ γὰρ ἐξ ἀνάγκης ὄντα ἀπλῶς πάντα αἰδία, τὰ δ' αἰδία ἀγένητα καὶ ἀφθαρτα. [25] ἔτι διδακτὴ ἅπαντα ἐπιστήμη δοκεῖ εἶναι, καὶ τὸ ἐπιστητόν μαθητόν. ἐκ προγινωσκομένων δὲ πᾶσα διδασκαλία, ὥσπερ καὶ ἐν τοῖς ἀναλυτικοῖς λέγομεν· ἡ μὲν γὰρ δι' ἐπαγωγῆς, ἡ δὲ συλλογισμῶ. ἡ μὲν δὴ ἐπαγωγή ἀρχὴ ἐστὶ καὶ τοῦ καθόλου, ὁ δὲ συλλογισμὸς ἐκ τῶν καθόλου. εἰσὶν [30] ἄρα ἀρχαὶ ἐξ ὧν ὁ συλλογισμὸς, ὧν οὐκ ἔστι συλλογισμὸς· ἐπαγωγή ἄρα. ἡ μὲν ἄρα ἐπιστήμη ἐστὶν ἕξις ἀποδεικτική, καὶ ὅσα ἄλλα προσδιορίζομεθα ἐν τοῖς ἀναλυτικοῖς· ὅταν γὰρ πῶς πιστεύῃ καὶ γνῶριμοι αὐτῷ ὧσιν αἱ ἀρχαί, ἐπίσταται· εἰ γὰρ μὴ μᾶλλον τοῦ συμπεράσματος, [35] κατὰ συμβεβηκὸς ἔξει τὴν ἐπιστήμην. περὶ μὲν οὖν ἐπιστήμης διωρίσθω τὸν τρόπον τοῦτον.

1140a [1] τοῦ δ' ἐνδεχομένου ἄλλως ἔχειν ἔστι τι καὶ ποιητόν καὶ πρακτόν· ἕτερον δ' ἐστὶ ποίησις καὶ πρᾶξις (πιστεύομεν δὲ περὶ αὐτῶν καὶ τοῖς ἐξωτερικοῖς λόγοις)· ὥστε καὶ ἡ μετὰ λόγου ἕξις πρακτικὴ ἕτερόν ἐστὶ τῆς μετὰ λόγου ποιητικῆς [5] ἕξεως. διὸ οὐδὲ περιέχεται ὑπ' ἀλλήλων· οὔτε γὰρ ἡ πρᾶξις ποίησις οὔτε ἡ ποίησις πρᾶξις ἐστίν. ἐπεὶ δ' ἡ οἰκοδομικὴ τέχνη τίς ἐστὶ καὶ ὅπερ ἕξις τις μετὰ λόγου ποιητικῆ, καὶ οὐδεμία οὔτε τέχνη ἐστὶν ἥτις οὐ μετὰ λόγου ποιητικὴ ἕξις ἐστίν, οὔτε τοιαύτη ἢ οὐ τέχνη, ταῦτόν [10] ἂν εἴη τέχνη καὶ ἕξις μετὰ λόγου ἀληθοῦς ποιητικῆ. ἔστι δὲ τέχνη πᾶσα περὶ γένεσιν καὶ τὸ τεχνάζειν καὶ θεωρεῖν ὅπως ἂν γένηται τι τῶν ἐνδεχομένων καὶ εἶναι καὶ μὴ εἶναι, καὶ ὧν ἡ ἀρχὴ ἐν τῷ ποιοῦντι ἀλλὰ μὴ ἐν τῷ ποιουμένῳ· οὔτε γὰρ τῶν ἐξ ἀνάγκης ὄντων ἢ γινομένων ἢ [15] τέχνη ἐστίν, οὔτε τῶν κατὰ φύσιν· ἐν αὐτοῖς γὰρ ἔχουσι ταῦτα τὴν ἀρχήν. ἐπεὶ δὲ ποίησις καὶ πρᾶξις ἕτερον, ἀνάγκη τὴν τέχνην ποιήσεως ἄλλ' οὐ πράξεως εἶναι. καὶ τρόπον τινὰ περὶ τὰ αὐτά ἐστιν ἡ τύχη καὶ ἡ τέχνη, καθάπερ καὶ Ἀγάθων φησὶ

τέχνη τύχην ἑστερξε καὶ τύχη τέχνην.

[20] ἡ μὲν οὖν τέχνη, ὥσπερ εἴρηται, ἕξις τις μετὰ λόγου ἀληθοῦς ποιητικῆ ἐστίν, ἡ δ' ἀτεχνία τοῦναντίον μετὰ λόγου ψευδοῦς ποιητικῆ ἕξις, περὶ τὸ ἐνδεχόμενον ἄλλως ἔχειν.

περὶ δὲ φρονήσεως οὕτως ἂν λάβοιμεν, θεωρήσαντες [25] τίνας λέγομεν τοὺς φρονίμους. δοκεῖ δὴ φρονίμου εἶναι τὸ δύνασθαι καλῶς βουλευσασθαι περὶ τὰ αὐτῷ ἀγαθὰ καὶ συμφέροντα, οὐ κατὰ μέρος, οἷον ποῖα πρὸς ὑγίειαν, πρὸς ἰσχύν, ἀλλὰ ποῖα πρὸς τὸ εὖ ζῆν ὅλως. σημεῖον δ' ὅτι καὶ τοὺς περὶ τι φρονίμους λέγομεν, ὅταν πρὸς τέλος τι σπουδαῖον [30] εὖ λογίσωνται, ὧν μὴ ἔστι τέχνη. ὥστε καὶ ὅλως ἂν εἴη φρόνιμος ὁ βουλευτικός. βουλεύεται δ' οὐθεις περὶ τῶν ἀδυνάτων ἄλλως ἔχειν, οὐδὲ τῶν μὴ ἐνδεχομένων αὐτῷ πράττειν. ὥστ' εἴπερ ἐπιστήμη μὲν μετ' ἀποδείξεως, ὧν δ' αἱ ἀρχαὶ ἐνδέχονται ἄλλως ἔχειν, τούτων μὴ ἔστιν ἀπόδειξις [35] (πάντα γὰρ ἐνδέχεται καὶ ἄλλως ἔχειν), 1140b [1] καὶ οὐκ ἔστι βουλευσασθαι περὶ τῶν ἐξ ἀνάγκης ὄντων, οὐκ ἂν εἴη ἡ φρόνησις ἐπιστήμη οὐδὲ τέχνη, ἐπιστήμη μὲν ὅτι ἐνδέχεται τὸ πρακτὸν ἄλλως ἔχειν, τέχνη δ' ὅτι ἄλλο τὸ γένος πράξεως καὶ ποιήσεως. λείπεται ἄρα αὐτὴν εἶναι [5] ἕξι ἀληθῇ μετὰ λόγου πρακτικὴν περὶ τὰ ἀνθρώπων ἀγαθὰ καὶ κακά. τῆς μὲν γὰρ ποιήσεως ἕτερον τὸ τέλος, τῆς δὲ πράξεως οὐκ ἂν εἴη· ἔστι γὰρ αὐτὴ ἡ εὐπραξία τέλος. διὰ τοῦτο Περικλέα καὶ τοὺς τοιοῦτους φρονίμους οἰόμεθα εἶναι, ὅτι τὰ αὐτοῖς ἀγαθὰ καὶ τὰ τοῖς ἀνθρώποις δύνανται θεωρεῖν· [10] εἶναι δὲ τοιοῦτους ἡγούμεθα τοὺς οἰκονομικοὺς καὶ τοὺς πολιτικούς. ἔνθεν καὶ τὴν σωφροσύνην τούτῳ προσαγορεύομεν τῷ ὀνόματι, ὡς σφῶζουσιν τὴν φρόνησιν. σφῶζει δὲ τὴν τοιαύτην ὑπόληψιν. οὐ γὰρ ἅπασαν ὑπόληψιν διαφθείρει οὐδὲ διαστρέφει τὸ ἡδὺ καὶ λυπηρόν, οἷον ὅτι τὸ τρίγωνον [15] δύο ὀρθὰς ἔχει ἢ οὐκ ἔχει, ἀλλὰ τὰς περὶ τὸ πρακτὸν. αἱ μὲν γὰρ ἀρχαὶ τῶν πρακτῶν τὸ οὐ ἔνεκα τὰ πρακτά· τῷ δὲ διεφθαρμένῳ δι' ἡδονὴν ἢ λύπην εὐθύς οὐ φαίνεται ἀρχή, οὐδὲ δεῖν τούτου ἔνεκεν οὐδὲ διὰ τοῦθ' αἰρεῖσθαι πάντα καὶ πράττειν· ἔστι γὰρ ἡ κακία φθαρτικὴ [20] ἀρχῆς. ὥστ' ἀνάγκη τὴν φρόνησιν ἕξι εἶναι μετὰ λόγου ἀληθῇ περὶ τὰ ἀνθρώπινα ἀγαθὰ πρακτικὴν. ἀλλὰ μὴν τέχνης μὲν ἔστιν ἀρετή, φρονήσεως δ' οὐκ ἔστιν· καὶ ἐν μὲν τέχνῃ ὁ ἐκὼν ἀμαρτάνων αἰρετώτερος, περὶ δὲ φρόνησιν ἦττον, ὥσπερ καὶ περὶ τὰς ἀρετάς. δῆλον οὖν ὅτι ἀρετή [25] τις ἔστι καὶ οὐ τέχνη. δυοῖν δ' ὄντων μεροῖν τῆς ψυχῆς τῶν λόγον ἐχόντων, θατέρου ἂν εἴη ἀρετή, τοῦ δοξαστικοῦ· ἢ τε γὰρ δόξα περὶ τὸ ἐνδεχόμενον ἄλλως ἔχειν καὶ ἡ φρόνησις. ἀλλὰ μὴν οὐδ' ἕξις μετὰ λόγου μόνον· σημεῖον δ' ὅτι λήθη μὲν τῆς τοιαύτης ἕξεως ἔστι, φρονήσεως δ' [30] οὐκ ἔστιν.

ἐπεὶ δ' ἡ ἐπιστήμη περὶ τῶν καθόλου ἐστὶν ὑπόληψις καὶ τῶν ἐξ ἀνάγκης ὄντων, εἰσὶ δ' ἀρχαὶ τῶν ἀποδεικτῶν καὶ πάσης ἐπιστήμης (μετὰ λόγου γὰρ ἡ ἐπιστήμη), τῆς ἀρχῆς τοῦ ἐπιστητοῦ οὗτ' ἂν ἐπιστήμη εἴη οὔτε τέχνη οὔτε [35] φρόνησις· τὸ μὲν γὰρ ἐπιστητὸν ἀποδεικτόν, 1141a [1] αἱ δὲ τυγχάνουσιν οὔσαι περὶ τὰ ἐνδεχόμενα ἄλλως ἔχειν. >οὐδὲ δὴ σοφία τούτων ἐστίν· τοῦ γὰρ σοφοῦ περὶ ἐνίων ἔχειν ἀποδείξιν ἐστίν. εἰ δὴ οἷς ἀληθεύομεν καὶ μηδέποτε διαψευδόμεθα περὶ τὰ μὴ ἐνδεχόμενα ἢ καὶ ἐνδεχόμενα ἄλλως [5] ἔχειν, ἐπιστήμη καὶ φρόνησις ἐστὶ καὶ σοφία καὶ νοῦς, τούτων δὲ τῶν τριῶν μηδὲν ἐνδέχεται εἶναι (λέγω δὲ τρία φρόνησιν ἐπιστήμην σοφίαν), λείπεται νοῦν εἶναι τῶν ἀρχῶν.

τὴν δὲ σοφίαν ἔν τε ταῖς τέχναις τοῖς ἀκριβεστάτοις [10] τὰς τέχνας ἀποδίδομεν, οἷον Φειδίαν λιθουργὸν σοφὸν καὶ Πολύκλειτον ἀνδριαντοποιόν, ἐνταῦθα μὲν οὖν οὐθὲν ἄλλο σημαίνοντες τὴν σοφίαν ἢ ὅτι ἀρετὴ τέχνης ἐστίν· εἶναι δὲ τινὰς σοφοὺς οἰόμεθα ὅλως οὐ κατὰ μέρος οὐδ' ἄλλο τι σοφοὺς, ὥσπερ Ὅμηρός φησιν ἐν τῷ Μαργίτῃ

[15] τὸν δ' οὗτ' ἄρ σκαπτῆρα θεοὶ θέσαν οὗτ' ἀροτῆρα οὗτ' ἄλλως τι σοφόν.

ὥστε δηλὸν ὅτι ἀκριβεστάτη ἂν τῶν ἐπιστημῶν εἴη ἡ σοφία. δεῖ ἄρα τὸν σοφὸν μὴ μόνον τὰ ἐκ τῶν ἀρχῶν εἰδέναι, ἀλλὰ καὶ περὶ τὰς ἀρχὰς ἀληθεύειν. ὥστ' εἴη ἂν ἡ σοφία νοῦς καὶ ἐπιστήμη, ὥσπερ κεφαλὴν ἔχουσα ἐπιστήμη [20] τῶν τιμιωτάτων. ἄτοπον γὰρ εἴ τις τὴν πολιτικὴν ἢ τὴν φρόνησιν σπουδαιοτάτην οἶεται εἶναι, εἰ μὴ τὸ ἄριστον τῶν ἐν τῷ κόσμῳ ἀνθρωπός ἐστιν. εἰ δὴ ὑγιεινὸν μὲν καὶ ἀγαθὸν ἕτερον ἀνθρώποις καὶ ἰχθύσι, τὸ δὲ λευκὸν καὶ εὐθὺ ταυτὸν ἀεί, καὶ τὸ σοφὸν ταυτὸ πάντες ἂν εἴποιεν, φρόνιμον [25] δὲ ἕτερον· τὰ γὰρ περὶ αὐτὸ ἕκαστα τὸ εὖ θεωροῦν φησὶν εἶναι φρόνιμον, καὶ τούτῳ ἐπιτρέψει αὐτά. διὸ καὶ τῶν θηρίων ἔνια φρόνιμά φασιν εἶναι, ὅσα περὶ τὸν αὐτῶν βίον ἔχοντα φαίνεται δύναμιν προνοητικὴν. φανερόν δὲ καὶ ὅτι οὐκ ἂν εἴη ἡ σοφία καὶ ἡ πολιτικὴ ἢ αὐτή· εἰ γὰρ [30] τὴν περὶ τὰ ὠφέλιμα τὰ αὐτοῖς ἐροῦσι σοφίαν, πολλὰ ἔσονται σοφαί· οὐ γὰρ μία περὶ τὸ ἀπάντων ἀγαθὸν τῶν ζώων, ἀλλ' ἑτέρα περὶ ἕκαστον, εἰ μὴ καὶ ἰατρικὴ μία περὶ πάντων τῶν ὄντων. εἰ δ' ὅτι

βέλτιστον ἄνθρωπος τῶν ἄλλων ζώων, οὐδὲν διαφέρει· καὶ γὰρ ἀνθρώπου ἄλλα πολὺ θεϊότερα τὴν φύσιν, 1141b [1] οἷον φανερώτατά γε ἐξ ὧν ὁ κόσμος συνέστηκεν. ἐκ δὴ τῶν εἰρημένων δῆλον ὅτι ἡ σοφία ἐστὶ καὶ ἐπιστήμη καὶ νοῦς τῶν τιμιωτάτων τῇ φύσει. διὸ Ἀναξαγόραν καὶ Θαλῆν καὶ τοὺς τοιούτους σοφοὺς μὲν φρονίμους [5] δ' οὐ φασιν εἶναι, ὅταν ἴδωσιν ἀγνοοῦντας τὰ συμφέροντα ἑαυτοῖς, καὶ περιττὰ μὲν καὶ θαυμαστὰ καὶ χαλεπὰ καὶ δαιμόνια εἰδέναι αὐτοὺς φασιν, ἄχρηστα δ', ὅτι οὐ τὰ ἀνθρώπινα ἀγαθὰ ζητοῦσιν. ἡ δὲ φρόνησις περὶ τὰ ἀνθρώπινα καὶ περὶ ὧν ἔστι βουλευσασθαι· τοῦ γὰρ φρονίμου [10] μάλιστα τοῦτ' ἔργον εἶναι φασιν, τὸ εὖ βουλευέσθαι, βουλευέται δ' οὐδεὶς περὶ τῶν ἀδυνάτων ἄλλως ἔχειν, οὐδ' ὅσων μὴ τέλος τι ἔστι, καὶ τοῦτο πρακτὸν ἀγαθόν. ὁ δ' ἀπλῶς εὐβουλος ὁ τοῦ ἀρίστου ἀνθρώπου τῶν πρακτῶν στοχαστικὸς κατὰ τὸν λογισμόν. οὐδ' ἐστὶν ἡ φρόνησις τῶν [15] καθόλου μόνον, ἀλλὰ δεῖ καὶ τὰ καθ' ἕκαστα γνωρίζειν· πρακτικὴ γάρ, ἡ δὲ πρᾶξις περὶ τὰ καθ' ἕκαστα. διὸ καὶ ἔνιοι οὐκ εἰδότες ἐτέρων εἰδότες πρακτικώτεροι, καὶ ἐν τοῖς ἄλλοις οἱ ἔμπειροι· εἰ γὰρ εἰδείη ὅτι τὰ κοῦφα εὐπεπτα κρέα καὶ ὑγιεινά, ποῖα δὲ κοῦφα ἀγνοοῖ, οὐ ποιήσει ὑγίειαν, [20] ἀλλ' ὁ εἰδὼς ὅτι τὰ ὀρνίθεια [κοῦφα καὶ] ὑγιεινὰ ποιήσει μᾶλλον. ἡ δὲ φρόνησις πρακτικὴ· ὥστε δεῖ ἅμωφ ἔχειν, ἢ ταύτην μᾶλλον. εἴη δ' ἂν τις καὶ ἐνταῦθα ἀρχιτεκτονικὴ. ἔστι δὲ καὶ ἡ πολιτικὴ καὶ ἡ φρόνησις ἡ αὕτη μὲν ἕξις, τὸ μέντοι εἶναι οὐ ταῦτὸν αὐταῖς. τῆς δὲ περὶ [25] πόλιν ἢ μὲν ὡς ἀρχιτεκτονικὴ φρόνησις νομοθετικὴ, ἡ δὲ ὡς τὰ καθ' ἕκαστα τὸ κοινὸν ἔχει ὄνομα, πολιτικὴ· αὕτη δὲ πρακτικὴ καὶ βουλευτικὴ· τὸ γὰρ ψήφισμα πρακτὸν ὡς τὸ ἔσχατον. διὸ πολιτεύεσθαι τούτους μόνον λέγουσιν· μόνοι γὰρ πράττουσιν οὗτοι ὥσπερ οἱ χειροτέχνη. δοκεῖ [30] δὲ καὶ φρόνησις μάλιστ' εἶναι ἡ περὶ αὐτὸν καὶ ἕνα· καὶ ἔχει αὕτη τὸ κοινὸν ὄνομα, φρόνησις· ἐκείνων δὲ ἡ μὲν οἰκονομία ἡ δὲ νομοθεσία ἡ δὲ πολιτικὴ, καὶ ταύτης ἡ μὲν βουλευτικὴ ἡ δὲ δικαστικὴ. εἶδος μὲν οὖν τι ἂν εἴη γνώσεως τὸ αὐτῷ εἰδέναι· ἀλλ' ἔχει διαφορὰν πολλήν· 1142a [1] καὶ δοκεῖ ὁ τὰ περὶ αὐτὸν εἰδὼς καὶ διατρίβων φρόνιμος εἶναι, οἱ δὲ πολιτικοὶ πολυπράγμονες· διὸ Εὐριπίδης

ζητοῦσι γὰρ τὸ αὐτοῖς ἀγαθόν, καὶ οἶονται τοῦτο δεῖν πράττειν. ἐκ ταύτης οὖν τῆς δόξης ἐλήλυθε τὸ τούτους φρονίμους εἶναι· καίτοι ἴσως οὐκ ἔστι τὸ αὐτοῦ εὖ ἄνευ οἰκονομίας [10] οὐδ' ἄνευ πολιτείας. ἔτι δὲ τὰ αὐτοῦ πῶς δεῖ διοικεῖν, ἄδηλον καὶ σκεπτέον. σημεῖον δ' ἐστὶ τοῦ εἰρημένου καὶ διότι γεωμετρικοὶ μὲν νέοι καὶ μαθηματικοὶ γίνονται καὶ σοφοὶ τὰ τοιαῦτα, φρόνιμος δ' οὐ δοκεῖ γίνεσθαι. αἴτιον δ' ὅτι καὶ τῶν καθ' ἕκαστά ἐστιν ἡ φρόνησις, ἃ γίνεται [15] γνώριμα ἐξ ἐμπειρίας, νέος δ' ἔμπειρος οὐκ ἔστιν· πλῆθος γὰρ χρόνου ποιεῖ τὴν ἐμπειρίαν· ἐπεὶ καὶ τοῦτ' ἂν τις σκέψαιτο, διὰ τί δὴ μαθηματικὸς μὲν παῖς γένοιτ' ἂν, σοφὸς δ' ἢ φυσικὸς οὐ. ἢ ὅτι τὰ μὲν δι' ἀφαιρέσεώς ἐστιν, τῶν δ' αἱ ἀρχαὶ ἐξ ἐμπειρίας· καὶ τὰ μὲν οὐ πιστεύουσιν [20] οἱ νέοι ἀλλὰ λέγουσιν, τῶν δὲ τὸ τί ἐστιν οὐκ ἄδηλον; ἔτι ἡ ἀμαρτία ἢ περὶ τὸ καθόλου ἐν τῷ βουλευέσασθαι ἢ περὶ τὸ καθ' ἕκαστον· ἢ γὰρ ὅτι πάντα τὰ βαρύσταθμα ὕδατα φαῦλα, ἢ ὅτι τοδὶ βαρύσταθμον. ὅτι δ' ἡ φρόνησις οὐκ ἐπιστήμη, φανερόν· τοῦ γὰρ ἐσχάτου ἐστίν, ὥσπερ εἴρηται· [25] τὸ γὰρ πρακτὸν τοιοῦτον. ἀντίκειται μὲν δὴ τῷ νῷ· ὁ μὲν γὰρ νοῦς τῶν ὅρων, ὧν οὐκ ἔστι λόγος, ἢ δὲ τοῦ ἐσχάτου, οὐ οὐκ ἔστιν ἐπιστήμη ἀλλ' αἴσθησις, οὐχ ἡ τῶν ιδίων, ἀλλ' οἷα αἰσθανόμεθα ὅτι τὸ [ἐν τοῖς μαθηματικοῖς] ἐσχάτον τρίγωνον· στήσεται γὰρ κάκεῖ. ἀλλ' αὕτη μᾶλλον [30] αἴσθησις ἢ φρόνησις, ἐκείνης δ' ἄλλο εἶδος.

τὸ ζητεῖν δὲ καὶ τὸ βουλευέσθαι διαφέρει· τὸ γὰρ βουλευέσθαι ζητεῖν τι ἐστίν. δεῖ δὲ λαβεῖν καὶ περὶ εὐβουλίας τί ἐστὶ, πότερον ἐπιστήμη τις ἢ δόξα ἡ εὐστοχία ἢ ἄλλο τι γένος. ἐπιστήμη μὲν δὴ οὐκ ἔστιν· οὐ γὰρ ζητοῦσι περὶ ὧν ἴσασιν, 1142b [1] ἢ δ' εὐβουλία βουλή τις, ὁ δὲ βουλευόμενος ζητεῖ καὶ λογίζεται. ἀλλὰ μὴν οὐδ' εὐστοχία· ἄνευ τε γὰρ λόγου καὶ ταχύ τι ἢ εὐστοχία, βουλεύονται δὲ πολὺν χρόνον, καὶ φασὶ πράττειν μὲν δεῖν ταχὺ τὰ βουλευθέντα, [5] βουλευέσθαι δὲ βραδέως. ἔτι ἡ ἀγχίνοια ἕτερον καὶ ἡ εὐβουλία· ἔστι δ' εὐστοχία τις ἢ ἀγχίνοια. οὐδὲ δὴ δόξα ἡ εὐβουλία οὐδεμία. ἀλλ' ἐπεὶ ὁ μὲν κακῶς βουλευόμενος ἀμαρτάνει, ὁ δ' εὖ ὀρθῶς βουλεύεται, δῆλον ὅτι ὀρθότης τις ἢ εὐβουλία ἐστίν, οὗτ' ἐπιστήμης δὲ οὐτε δόξης· [10] ἐπιστήμης μὲν γὰρ οὐκ ἔστιν ὀρθότης (οὐδὲ γὰρ ἀμαρτία), δόξης δ' ὀρθότης ἀλήθεια· ἅμα δὲ καὶ ὥρισται ἤδη πᾶν οὗ δόξα ἐστίν. ἀλλὰ μὴν οὐδ' ἄνευ λόγου ἢ εὐβουλία. διανοίας ἄρα

ἔστι δὲ καὶ ἡ σύνεσις καὶ ἡ εὐσυνεσία, 1143a [1] καθ' ἧς λέγομεν συνετοὺς καὶ εὐσυνέτους, οὐθ' ὅλως τὸ αὐτὸ ἐπιστήμη ἢ δόξη (πάντες γὰρ ἂν ἦσαν συνετοί) οὔτε τις μία τῶν κατὰ μέρος ἐπιστημῶν, οἷον ἡ ἱατρικὴ περὶ ὑγιεινῶν, ἡ γεωμετρία περὶ μεγέθη· οὔτε γὰρ περὶ τῶν αἰεὶ ὄντων καὶ [5] ἀκινήτων ἡ σύνεσις ἐστίν οὔτε περὶ τῶν γιγνομένων ὅτουσιν, ἀλλὰ περὶ ὧν ἀπορήσειεν ἂν τις καὶ βουλευσάιτο. διὸ περὶ τὰ αὐτὰ μὲν τῇ φρονήσει ἐστίν, οὐκ ἔστι δὲ τὸ αὐτὸ σύνεσις καὶ φρόνησις. ἡ μὲν γὰρ φρόνησις ἐπιτακτική ἐστίν· τί γὰρ δεῖ πράττειν ἢ μή, τὸ τέλος αὐτῆς ἐστίν· ἡ δὲ σύνεσις [10] κριτικὴ μόνον. ταῦτό γὰρ σύνεσις καὶ εὐσυνεσία καὶ συνετοὶ καὶ εὐσύνετοι. ἔστι δ' οὔτε τὸ ἔχειν τὴν φρόνησιν οὔτε τὸ λαμβάνειν ἡ σύνεσις· ἀλλ' ὥσπερ τὸ μανθάνειν λέγεται συνιέναι, ὅταν χρῆται τῇ ἐπιστήμῃ, οὕτως ἐν τῷ χρῆσθαι τῇ δόξῃ ἐπὶ τὸ κρίνειν περὶ τούτων περὶ ὧν ἡ [15] φρόνησις ἐστίν, ἄλλου λέγοντος, καὶ κρίνειν καλῶς· τὸ γὰρ εὖ τῷ καλῶς τὸ αὐτό. καὶ ἐντεῦθεν ἐλήλυθε τοῦνομα ἡ σύνεσις, καθ' ἣν εὐσύνετοι, ἐκ τῆς ἐν τῷ μανθάνειν· λέγομεν γὰρ τὸ μανθάνειν συνιέναι πολλάκις.

ἡ δὲ καλουμένη γνώμη, καθ' ἣν συγγνώμονας καὶ [20] ἔχειν φαμέν γνώμην, ἡ τοῦ ἐπεικοῦς ἐστὶ κρίσις ὀρθή. σημεῖον δέ· τὸν γὰρ ἐπεικῇ μάλιστα φαμεν εἶναι συγγνωμονικόν, καὶ ἐπεικὲς τὸ ἔχειν περὶ ἓνα συγγνώμην. ἡ δὲ συγγνώμη γνώμη ἐστὶ κριτικὴ τοῦ ἐπεικοῦς ὀρθή· ὀρθή δ' ἡ τοῦ ἀληθοῦς.

[25] εἰσὶ δὲ πᾶσαι αἱ ἕξεις εὐλόγως εἰς ταὐτὸ τείνουσαι· λέγομεν γὰρ γνώμην καὶ σύνεσιν καὶ φρόνησιν καὶ νοῦν ἐπὶ τοὺς αὐτοὺς ἐπιφέροντες γνώμην ἔχειν καὶ νοῦν ἤδη καὶ φρονίμους καὶ συνετούς. πᾶσαι γὰρ αἱ δυνάμεις αὗται τῶν ἐσχάτων εἰσὶ καὶ τῶν καθ' ἕκαστον· καὶ ἐν μὲν τῷ [30] κριτικὸς εἶναι περὶ ὧν ὁ φρόνιμος, συνετὸς καὶ εὐγνώμων ἢ συγγνώμων· τὰ γὰρ ἐπεικῇ κοινὰ τῶν ἀγαθῶν ἀπάντων ἐστὶν ἐν τῷ πρὸς ἄλλον. ἔστι δὲ τῶν καθ' ἕκαστα καὶ τῶν ἐσχάτων ἅπαντα τὰ πρακτά· καὶ γὰρ τὸν φρόνιμον δεῖ γινώσκειν αὐτά, καὶ ἡ σύνεσις καὶ ἡ γνώμη περὶ τὰ [35] πρακτά, ταῦτα δ' ἔσχατα. καὶ ὁ νοῦς τῶν ἐσχάτων ἐπ' ἀμφοτέρα· καὶ γὰρ τῶν πρώτων ὅρων καὶ τῶν ἐσχάτων 1143b [1] νοῦς ἐστὶ καὶ οὐ λόγος, καὶ ὁ μὲν κατὰ τὰς ἀποδείξεις τῶν ἀκινήτων ὅρων καὶ πρώτων, ὁ δ' ἐν ταῖς πρακτικαῖς τοῦ ἐσχάτου καὶ ἐνδεχομένου καὶ τῆς ἐτέρας προτάσεως· ἀρχαὶ γὰρ τοῦ οὗ ἔνεκα αὗται· ἐκ τῶν καθ' ἕκαστα γὰρ [5] τὰ καθόλου· τούτων οὖν ἔχειν δεῖ αἰσθῆσιν, αὕτη δ' ἐστὶ νοῦς. διὸ καὶ φυσικὰ δοκεῖ εἶναι ταῦτα, καὶ φύσει σοφὸς μὲν οὐδεὶς, γνώμην δ' ἔχειν καὶ σύνεσιν καὶ νοῦν. σημεῖον δ' ὅτι καὶ ταῖς ἡλικίαις οἰόμεθα ἀκολουθεῖν, καὶ ἥδε ἡ ἡλικία νοῦν ἔχει καὶ γνώμην, ὥς τῆς φύσεως αἰτίας οὕσης. [διὸ [10] καὶ ἀρχὴ καὶ τέλος νοῦς· ἐκ τούτων γὰρ αἱ ἀποδείξεις καὶ περὶ τούτων.] ὥστε δεῖ προσέχειν τῶν ἐμπειρῶν καὶ πρεσβυτέρων ἢ φρονίμων ταῖς ἀναποδείκτοις φάσεσι καὶ δόξαις οὐχ ἥττον τῶν ἀποδείξεων· διὰ γὰρ τὸ ἔχειν ἐκ τῆς ἐμπειρίας ὄμμα ὀρθῶς. τί μὲν οὖν ἐστὶν ἡ [15] φρόνησις καὶ ἡ σοφία, καὶ περὶ τί ἑκάτερα τυγχάνει οὕσα, καὶ ὅτι ἄλλου τῆς ψυχῆς μορίου ἀρετὴ ἑκάτερα, εἴρηται.

διαπορήσειε δ' ἂν τις περὶ αὐτῶν τί χρήσιμοί εἰσιν. ἡ μὲν γὰρ σοφία οὐδὲν θεωρήσει ἐξ ὧν ἔσται εὐδαίμων [20] ἄνθρωπος (οὐδεμιᾶς γάρ ἐστι γενέσεως), ἡ δὲ φρόνησις τοῦτο μὲν ἔχει, ἀλλὰ τίνοος ἔνεκα δεῖ αὐτῆς; εἴπερ ἡ μὲν φρόνησις ἐστὶν ἡ περὶ τὰ δίκαια καὶ καλὰ καὶ ἀγαθὰ ἀνθρώπῳ, ταῦτα δ' ἐστὶν ἃ τοῦ ἀγαθοῦ ἐστὶν

ἀνδρὸς πράττειν, οὐδὲν δὲ πρακτικώτεροι τῷ εἰδέναι αὐτὰ ἔσμεν, εἴπερ ἕξεις [25] αἱ ἀρεταὶ εἰσιν, ὥσπερ οὐδὲ τὰ ὑγιεινὰ οὐδὲ τὰ εὐεκτικά, ὅσα μὴ τῷ ποιεῖν ἀλλὰ τῷ ἀπὸ τῆς ἕξεως εἶναι λέγεται· οὐθὲν γὰρ πρακτικώτεροι τῷ ἔχειν τὴν ἱατρικὴν καὶ γυμναστικὴν ἔσμεν. εἰ δὲ μὴ τούτων χάριν φρόνιμον ῥητέον ἀλλὰ τοῦ γίνεσθαι, τοῖς οὗσι σπουδαίοις οὐθὲν ἂν εἴη χρήσιμος· [30] ἔτι δ' οὐδὲ τοῖς μὴ ἔχουσιν· οὐδὲν γὰρ διοίσει αὐτοὺς ἔχειν ἢ ἄλλοις ἔχουσι πείθεσθαι, ἱκανῶς τ' ἔχοι ἂν ἡμῖν ὥσπερ καὶ περὶ τὴν ὑγίειαν· βουλόμενοι γὰρ ὑγιαίνειν ὅμως οὐ μανθάνομεν ἱατρικὴν. πρὸς δὲ τούτοις ἄτοπον ἂν εἶναι δόξειεν, εἰ χεῖρων τῆς σοφίας οὕσα κυριωτέρα αὐτῆς ἔσται· [35] ἢ γὰρ ποιοῦσα ἄρχει καὶ ἐπιτάττει περὶ ἕκαστον. περὶ δὲ τούτων λεκτέον· νῦν μὲν γὰρ ἠπόρηται περὶ αὐτῶν μόνον. 1144a [1] πρῶτον μὲν οὖν λέγωμεν ὅτι καθ' αὐτὰς ἀναγκαῖον αἰρετάς αὐτὰς εἶναι, ἀρετάς γ' οὕσας ἐκατέραν ἐκατέρου τοῦ μορίου, καὶ εἰ μὴ ποιοῦσι μηδὲν μηδετέρα αὐτῶν. ἔπειτα καὶ ποιοῦσι μὲν, οὐχ ὥς ἡ ἱατρικὴ δὲ ὑγίειαν, ἀλλ' ὥς ἡ ὑγίεια, οὕτως [5] ἡ σοφία εὐδαιμονίαν· μέρος γὰρ οὕσα τῆς ὅλης ἀρετῆς τῷ ἔχεσθαι ποιεῖ καὶ †τῷ ἐνεργεῖν εὐδαιμόνα.† ἔτι τὸ ἔργον ἀποτελεῖται κατὰ τὴν φρόνησιν καὶ τὴν ἠθικὴν ἀρετὴν· ἢ μὲν γὰρ ἀρετὴ τὸν σκοπὸν ποιεῖ ὀρθόν, ἢ δὲ φρόνησις τὰ πρὸς τοῦτον. τοῦ δὲ τετάρτου μορίου τῆς ψυχῆς οὐκ ἔστιν [10] ἀρετὴ τοιαύτη, τοῦ θραπευτικοῦ· οὐδὲν γὰρ ἐπ' αὐτῷ πράττειν ἢ μὴ πράττειν. περὶ δὲ τοῦ μηθὲν εἶναι πρακτικωτέρους διὰ τὴν φρόνησιν τῶν καλῶν καὶ δικαίων, μικρὸν ἄνωθεν ἀρκτέον, λαβόντας ἀρχὴν ταύτην. ὥσπερ γὰρ καὶ τὰ δίκαια λέγομεν πράττοντάς τινας οὕτω δικαίους εἶναι, οἷον [15] τοὺς τὰ ὑπὸ τῶν νόμων τεταγμένα ποιοῦντας ἢ ἄκοντας ἢ δι' ἄγνοιαν ἢ δι' ἕτερόν τι καὶ μὴ δι' αὐτά (καίτοι πράττουσί γε ἃ δεῖ καὶ ὅσα χρή τὸν σπουδαῖον), οὕτως, ὥς ἔοικεν, ἔστι τὸ πῶς ἔχοντα πράττειν ἕκαστα ὥστ' εἶναι ἀγαθόν, λέγω δ' οἷον διὰ προαίρεσιν καὶ αὐτῶν ἔνεκα τῶν [20] πραττομένων. τὴν μὲν οὖν προαίρεσιν ὀρθὴν ποιεῖ ἡ ἀρετὴ, τὸ δ' ὅσα ἐκείνης ἔνεκα πέφυκε πράττεσθαι οὐκ ἔστι τῆς ἀρετῆς ἀλλ' ἐτέρας δυνάμεως. λεκτέον δ' ἐπιστήσασι σαφέστερον περὶ αὐτῶν. ἔστι δὲ δύναμις ἢν καλοῦσι δεινότητα· αὕτη δ' ἐστὶ τοιαύτη ὥστε τὰ πρὸς τὸν ὑποτεθέντα [25] σκοπὸν συντείνοντα δύνασθαι ταῦτα πράττειν καὶ τυγχάνειν αὐτοῦ. ἂν μὲν οὖν ὁ σκοπὸς ἦ καλός, ἐπαινετὴ ἔστιν, ἐὰν δὲ φαῦλος, πανουργία· διὸ καὶ τοὺς φρονίμους δεινοὺς καὶ πανούργους φαμέν εἶναι. ἔστι δ' ἡ φρόνησις οὐχ ἡ δύναμις, ἀλλ' οὐκ

ἄνευ τῆς δυνάμεως ταύτης· ἡ δ' ἕξις τῷ [30] ὁμματι τούτῳ γίνεται τῆς ψυχῆς οὐκ ἄνευ ἀρετῆς, ὡς εἴρηται τε καὶ ἔστι δῆλον· οἱ γὰρ συλλογισμοὶ τῶν πρακτῶν ἀρχὴν ἔχοντές εἰσιν, ἐπεὶ τοιόνδε τὸ τέλος καὶ τὸ ἄριστον, ὅτι διήποτε ὄν (ἔστω γὰρ λόγου χάριν τὸ τυχόν)· τοῦτο δ' εἰ μὴ τῷ ἀγαθῷ, οὐ φαίνεται· διαστρέφει γὰρ ἡ [35] μοχθηρία καὶ διαψεύδεσθαι ποιεῖ περὶ τὰς πρακτικὰς ἀρχάς. ὥστε φανερόν ὅτι ἀδύνατον φρόνιμον εἶναι μὴ ὄντα ἀγαθόν.

1144b [1] σκεπτέον δὴ πάλιν καὶ περὶ ἀρετῆς· καὶ γὰρ ἡ ἀρετὴ παραπλησίως ἔχει ὡς ἡ φρόνησις πρὸς τὴν δεινότητα — οὐ ταυτὸ μὲν, ὅμοιον δέ — οὕτω καὶ ἡ φυσικὴ ἀρετὴ πρὸς τὴν κυρίαν. πᾶσι γὰρ δοκεῖ ἕκαστα τῶν ἡθῶν ὑπάρχειν [5] φύσει πως· καὶ γὰρ δίκαιοι καὶ σωφρονικοὶ καὶ ἀνδρεῖοι καὶ τᾶλλα ἔχομεν εὐθὺς ἐκ γενετῆς· ἄλλ' ὅμως ζητοῦμεν ἕτερόν τι τὸ κυρίως ἀγαθόν καὶ τὰ τοιαῦτα ἄλλον τρόπον ὑπάρχειν. καὶ γὰρ παισὶ καὶ θηρίοις αἱ φυσικαὶ ὑπάρχουσιν ἕξεις, ἄλλ' ἄνευ νοῦ βλαβεραὶ φαίνονται οὔσαι. Σωκράτης μὲν οὖν λόγους τὰς ἀρετὰς ᾤετο εἶναι (ἐπιστήμας γὰρ εἶναι [30] πάσας), ἡμεῖς δὲ μετὰ λόγου. δῆλον οὖν ἐκ τῶν εἰρημένων ὅτι οὐχ οἷόν τε ἀγαθὸν εἶναι κυρίως ἄνευ φρονήσεως, οὐδὲ φρόνιμον ἄνευ τῆς ἡθικῆς ἀρετῆς. ἀλλὰ καὶ ὁ λόγος ταύτη λύοιτ' ἂν, ὃ διαλεχθεὶς τις ἂν ὅτι χωρίζονται ἀλλήλων αἱ ἀρεταί· οὐ

γὰρ ὁ αὐτὸς εὐφυέστατος πρὸς ἀπάσας, [35] ὥστε τὴν μὲν ἤδη τὴν δ' οὐπω εἰληφὼς ἔσται· τοῦτο γὰρ κατὰ μὲν τὰς φυσικὰς ἀρετὰς ἐνδέχεται, 1145a [1] καθ' ἃς δὲ ἀπλῶς λέγεται ἀγαθός, οὐκ ἐνδέχεται· ἅμα γὰρ τῇ φρονήσει μιᾷ ὑπαρχούσῃ πᾶσαι ὑπάρξουσιν. δῆλον δέ, κἂν εἰ μὴ πρακτικὴ ᾖ, ὅτι ἔδει ἂν αὐτῆς διὰ τὸ τοῦ μορίου ἀρετὴν εἶναι, καὶ ὅτι οὐκ ἔσται ἡ προαίρεσις ὀρθὴ ἄνευ [5] φρονήσεως οὐδ' ἄνευ ἀρετῆς· ἡ μὲν γὰρ τὸ τέλος ἡ δὲ τὰ πρὸς τὸ τέλος ποιεῖ πράττειν. ἀλλὰ μὴν οὐδὲ κυρία γ' ἐστὶ τῆς σοφίας οὐδὲ τοῦ βελτίονος μορίου, ὥσπερ οὐδὲ τῆς ὑγιείας ἡ ἰατρικὴ· οὐ γὰρ χρῆται αὐτῇ, ἀλλ' ὀρᾷ ὅπως γένηται· ἐκείνης οὖν ἕνεκα ἐπιτάττει, ἀλλ' οὐκ ἐκείνη. [10] ἔτι ὅμοιον κἂν εἴ τις τὴν πολιτικὴν φαίη ἄρχειν τῶν θεῶν, ὅτι ἐπιτάττει περὶ πάντα τὰ ἐν τῇ πόλει.

μετὰ δὲ ταῦτα λεκτέον, ἄλλην ποιησαμένους ἀρχήν, ὅτι τῶν περὶ τὰ ἦθη φευκτῶν τρία ἐστὶν εἶδη, κακία ἀκρασία θηριότης. τὰ δ' ἐναντία τοῖς μὲν δυσὶ δῆλα· τὸ μὲν γὰρ ἀρετὴν τὸ δ' ἐγκράτειαν καλοῦμεν· πρὸς δὲ τὴν θηριότητα μάλιστ' ἂν ἀρμόττοι λέγειν τὴν ὑπὲρ ἡμᾶς ἀρετὴν, [20] ἡρωικὴν τινα καὶ θεϊαν, ὥσπερ Ὅμηρος περὶ Ἑκτορος πεποίηκε λέγοντα τὸν Πρίαμον ὅτι σφόδρα ἦν ἀγαθός,

οὐδὲ ἐφ' αὐτῷ ἀνδρός γε θνητοῦ πάϊς ἔμμεναι ἀλλὰ θεοῖο.

ὥστ' εἰ, καθάπερ φασίν, ἐξ ἀνθρώπων γίνονται θεοὶ δι' ἀρετῆς ὑπερβολήν, τοιαύτη τις ἂν εἴη δῆλον ὅτι ἡ τῇ θηριώδει [25] ἀντιτιθεμένη ἕξις· καὶ γὰρ ὥσπερ οὐδὲ θηρίου ἐστὶ κακία οὐδ' ἀρετή, οὕτως οὐδὲ θεοῦ, ἀλλ' ἡ μὲν τιμιώτερον ἀρετῆς, ἡ δ' ἕτερόν τι γένος κακίας. ἐπεὶ δὲ σπάνιον καὶ τὸ θεῖον ἄνδρα εἶναι, καθάπερ οἱ Λάκωνες εἰώθασι προσαγορεύειν, ὅταν ἀγασθῶσι σφόδρα του, σεῖος ἀνὴρ φασιν, οὕτω καὶ [30] ὁ θηριώδης ἐν τοῖς ἀνθρώποις σπάνιος· μάλιστα δ' ἐν τοῖς βαρβάροις ἐστίν, γίνεται δ' ἔνια καὶ διὰ νόσους καὶ πηρώσεις· καὶ τοὺς διὰ κακίαν δὲ τῶν ἀνθρώπων ὑπερβάλλοντας οὕτως ἐπιδυσφημοῦμεν. ἀλλὰ περὶ μὲν τῆς διαθέσεως τῆς τοιαύτης ὕστερον ποιητέον τινὰ μνείαν, περὶ δὲ κακίας [35] εἴρηται πρότερον· περὶ δὲ ἀκρασίας καὶ μαλακίας καὶ τρυφῆς λεκτέον, καὶ περὶ ἐγκρατείας καὶ καρτερίας· 1145b [1] οὐτε γὰρ ὡς περὶ τῶν αὐτῶν ἕξεων τῇ ἀρετῇ καὶ τῇ μοχθηρίᾳ ἐκατέραν αὐτῶν ὑποληπτέον, οὔθ' ὡς ἕτερον γένος. δεῖ δ', ὥσπερ ἐπὶ τῶν ἄλλων, τιθέντας τὰ φαινόμενα καὶ πρῶτον διαπορήσαντας οὕτω δεικνύναι μάλιστα μὲν πάντα τὰ [5] ἔνδοξα περὶ ταῦτα τὰ πάθη, εἰ δὲ μή, τὰ πλεῖστα καὶ κυριώτατα· ἐὰν γὰρ λύηται τε τὰ δυσχερῆ καὶ καταλείπεται τὰ ἔνδοξα, δεδειγμένον ἂν εἴη ἱκανῶς.

δοκεῖ δὴ ἡ τε ἐγκράτεια καὶ καρτερία τῶν σπουδαίων καὶ [τῶν] ἐπαινετῶν εἶναι, ἡ δ' ἀκρασία τε καὶ μαλακία [10] τῶν φαύλων καὶ ψεκτῶν, καὶ ὁ αὐτὸς ἐγκρατὴς καὶ ἐμμενετικὸς τῷ λογισμῷ, καὶ ἀκρατὴς καὶ ἐκστατικὸς τοῦ λογισμοῦ. καὶ ὁ μὲν ἀκρατὴς εἰδὼς ὅτι φαῦλα πράττει διὰ πάθος, ὁ δ' ἐγκρατὴς εἰδὼς ὅτι φαῦλαι αἱ

ἐπιθυμίαι οὐκ ἀκολουθεῖ διὰ τὸν λόγον. καὶ τὸν σώφρονα μὲν ἐγκρατῇ καὶ [15] καρτερικόν, τὸν δὲ τοιοῦτον οἱ μὲν πάντα σώφρονα οἱ δ' οὐ, καὶ τὸν ἀκόλαστον ἀκρατῇ καὶ τὸν ἀκρατῇ ἀκόλαστον συγκεχυμένως, οἱ δ' ἐτέρους εἶναι φασιν. τὸν δὲ φρόνιμον ὅτε μὲν οὐ φασιν ἐνδέχεσθαι εἶναι ἀκρατῇ, ὅτε δ' ἐνίους φρονίμους ὄντας καὶ δεινούς ἀκρατεῖς εἶναι. ἔτι ἀκρατεῖς λέγονται καὶ [20] θυμοῦ καὶ τιμῆς καὶ κέρδους. τὰ μὲν οὖν λεγόμενα ταῦτ' ἐστίν.

ἀπορήσειε δ' ἂν τις πῶς ὑπολαμβάνων ὀρθῶς ἀκρατεύεται τις. ἐπιστάμενον μὲν οὖν οὐ φασί τινες οἷόν τε εἶναι· δεινὸν γὰρ ἐπιστήμης ἐνούσης, ὡς ᾤετο Σωκράτης, ἄλλο τι κρατεῖν καὶ περιέλκειν αὐτὴν ὥσπερ ἀνδράποδον. [25] Σωκράτης μὲν γὰρ ὅλως ἐμάχετο πρὸς τὸν λόγον ὡς οὐκ οὔσης ἀκρασίας· οὐθένα γὰρ ὑπολαμβάνοντα πράττειν παρὰ τὸ βέλτιστον, ἀλλὰ δι' ἄγνοϊαν. οὗτος μὲν οὖν ὁ λόγος ἀμφισβητεῖ τοῖς φαινομένοις ἐναργῶς, καὶ δέον ζητεῖν περὶ τὸ πάθος, εἰ δι' ἄγνοϊαν, τίς ὁ τρόπος γίνεται τῆς ἀγνοίας. [30] ὅτι γὰρ οὐκ οἶεταί γε ὁ ἀκρατευόμενος πρὶν ἐν τῷ πάθει γενέσθαι, φανερόν. εἰσι δὲ τινες οἱ τὰ μὲν συγχωροῦσι τὰ δ' οὐ· τὸ μὲν γὰρ ἐπιστήμης μὴτὲν εἶναι κρεῖττον ὁμολογοῦσιν, τὸ δὲ μὴτὲν πράττειν παρὰ τὸ δόξαν βέλτιον οὐχ ὁμολογοῦσιν, καὶ διὰ τοῦτο τὸν ἀκρατῇ φασὶν οὐκ ἐπιστήμην [35] ἔχοντα κρατεῖσθαι ὑπὸ τῶν ἡδονῶν ἀλλὰ δόξαν. ἀλλὰ μὴν εἴγε δόξα καὶ μὴ ἐπιστήμη, μὴδ' ἰσχυρὰ ὑπόληψις 1146a [1] ἢ ἀντιτείνουσα ἀλλ' ἡρεμαία, καθάπερ ἐν τοῖς διστάζουσιν, συγγνώμη τῷ μὴ μένειν ἐν αὐταῖς πρὸς ἐπιθυμίας ἰσχυράς· τῇ δὲ μοχθηρίᾳ οὐ συγγνώμη, οὐδὲ τῶν ἄλλων οὐδενὶ τῶν ψεκτῶν. φρονήσεως ἄρα ἀντιτεινούσης; [5] αὕτη γὰρ ἰσχυρότατον. ἀλλ' ἄτοπον· ἔσται γὰρ ὁ αὐτὸς ἅμα φρόνιμος καὶ ἀκρατής, φήσκει δ' οὐδ' ἂν εἷς φρονίμου εἶναι τὸ πράττειν ἐκόντα τὰ φαυλότατα. πρὸς δὲ τούτοις δέδεικται πρότερον ὅτι πρακτικός γε ὁ φρόνιμος (τῶν γὰρ ἐσχάτων τις) καὶ τὰς ἄλλας ἔχων ἀρετάς. ἔτι εἰ μὲν ἐν [10] τῷ ἐπιθυμίας ἔχειν ἰσχυρὰς καὶ φαύλας ὁ ἐγκρατής, οὐκ ἔσται ὁ σώφρων ἐγκρατής οὐδ' ὁ ἐγκρατής σώφρων· οὔτε γὰρ τὸ ἅγαν σώφρονος οὔτε τὸ φαύλας ἔχειν. ἀλλὰ μὴν δεῖ γε· εἰ μὲν γὰρ χρησταὶ αἱ ἐπιθυμίαι, φαύλη ἢ κωλύουσα ἕξις μὴ ἀκολουθεῖν, ὥσθ' ἡ ἐγκράτεια οὐ πᾶσα [15] σπουδαία· εἰ δ' ἀσθενεῖς καὶ μὴ φαῦλαι, οὐθὲν σεμνόν, οὐδ' εἰ φαῦλαι καὶ ἀσθενεῖς, οὐδὲν μέγα. ἔτι εἰ πάση δόξει ἐμμενετικὸν ποιεῖ ἡ ἐγκράτεια, φαύλη, οἷον εἰ καὶ τῇ ψευδεῖ· καὶ εἰ

πάσης δόξης ἢ ἀκρασία ἐκστατικόν, ἔσται τις σπουδαία ἀκρασία, οἷον ὁ Σοφοκλέους Νεοπτόλεμος ἐν [20] τῷ Φιλοκτήτῃ· ἐπαινετὸς γὰρ οὐκ ἐμμένων οἷς ἐπέισθη ὑπὸ τοῦ Ὀδυσσέως διὰ τὸ λυπεῖσθαι ψευδόμενος. ἔτι ὁ σοφιστικὸς λόγος [ψευδόμενος] ἀπορία· διὰ γὰρ τὸ παράδοξα βούλεσθαι ἐλέγχειν, ἵνα δεινοὶ ὧσιν ὅταν ἐπιτύχωσιν, ὁ γενόμενος συλλογισμὸς ἀπορία γίνεται· δέδεται γὰρ ἡ [25] διάνοια, ὅταν μένειν μὴ βούληται διὰ τὸ μὴ ἀρέσκειν τὸ συμπερανθέν, προῖεναι δὲ μὴ δύνηται διὰ τὸ λῦσαι μὴ ἔχειν τὸν λόγον. συμβαίνει δὴ ἕκ τινος λόγου ἢ ἀφροσύνη μετ' ἀκρασίας ἀρετῇ· τάναντία γὰρ πράττει ὢν ὑπολαμβάνει διὰ τὴν ἀκρασίαν, ὑπολαμβάνει δὲ τὰγαθὰ [30] κακὰ εἶναι καὶ οὐ δεῖν πράττειν, ὥστε τὰγαθὰ καὶ οὐ τὰ κακὰ πράζει. ἔτι ὁ τῷ πεπεισθαι πράττων καὶ διώκων τὰ ἡδέα καὶ προαιρούμενος βελτίων ἂν δόξειεν τοῦ μὴ διὰ λογισμὸν ἀλλὰ δι' ἀκρασίαν· εὐιατότερος γὰρ διὰ τὸ μεταπεισθῆναι ἂν. ὁ δ' ἀκρατὴς ἔνοχος τῇ παροιμίᾳ ἐν ἣ [35] φαμέν “ὅταν τὸ ὕδωρ πνίγη, τί δεῖ ἐπιπίνειν;” εἰ μὲν γὰρ ἐπέπειστο ἃ πράττει, 1146b [1] μεταπεισθεὶς ἂν ἐπαύσατο· νῦν δὲ πεπεισμένος οὐδὲν ἤττον [ἄλλα] πράττει. ἔτι εἰ περὶ πάντα ἀκρασία ἐστὶ καὶ ἐγκράτεια, τίς ὁ ἀπλῶς ἀκρατὴς; οὐδεὶς γὰρ ἀπάσας ἔχει τὰς ἀκρασίας, φαμέν δ' εἶναί τινας [5] ἀπλῶς.

αἱ μὲν οὖν ἀπορίαι τοιαῦταί τινες συμβαίνουσιν, τούτων δὲ τὰ μὲν ἀνελεῖν δεῖ τὰ δὲ καταλιπεῖν· ἡ γὰρ λύσις τῆς ἀπορίας εὗρεσις ἐστίν. πρῶτον μὲν οὖν σκεπτέον πότερον εἰδότες ἢ οὐ, καὶ πῶς εἰδότες· εἴτα περὶ ποῖα τὸν ἀκρατῇ [10] καὶ τὸν ἐγκρατῇ θετέον, λέγω δὲ πότερον περὶ πᾶσαν ἡδονὴν καὶ λύπην ἢ περὶ τινὰς ἀφωρισμένας, καὶ τὸν ἐγκρατῇ καὶ τὸν καρτερικόν, πότερον ὁ αὐτὸς ἢ ἕτερός ἐστιν· ὁμοίως δὲ καὶ περὶ τῶν ἄλλων ὅσα συγγενῇ τῆς θεωρίας ἐστὶ ταύτης. ἔστι δ' ἀρχὴ τῆς σκέψεως, πότερον [15] ὁ ἐγκρατὴς καὶ ὁ ἀκρατὴς εἰσι τῷ περὶ ἃ ἢ τῷ ὧς ἔχοντες τὴν διαφοράν, λέγω δὲ πότερον τῷ περὶ ταδὶ εἶναι μόνον ἀκρατὴς ὁ ἀκρατὴς, ἢ οὐ ἀλλὰ τῷ ὧς, ἢ οὐ ἀλλ' ἐξ ἀμφοῖν· ἔπειτ' εἰ περὶ πάντ' ἐστὶν ἀκρασία καὶ ἐγκράτεια ἢ οὐ. οὔτε γὰρ περὶ ἅπαντ' ἐστὶν ὁ ἀπλῶς ἀκρατὴς, [20] ἀλλὰ περὶ ἅπερ ὁ ἀκόλαστος, οὔτε τῷ πρὸς ταῦτα ἀπλῶς ἔχειν (ταυτὸν γὰρ ἂν ἦν τῇ ἀκολασίᾳ), ἀλλὰ τῷ ὠδὶ ἔχειν. ὁ μὲν γὰρ ἄγεται προαιρούμενος, νομίζων αἰεὶ δεῖν τὸ παρὸν ἡδὺ διώκειν· ὁ δ' οὐκ οἶεται μὲν, διώκει δέ. περὶ μὲν οὖν τοῦ δόξαν ἀληθῆ ἀλλὰ μὴ ἐπιστήμην [25] εἶναι παρ' ἣν ἀκρατεύονται, οὐδὲν διαφέρει πρὸς τὸν

λόγον· ἔνιοι γὰρ τῶν δοξαζόντων οὐ διστάζουσιν, ἀλλ' οἶονται ἀκριβῶς εἰδέναι. εἰ οὖν διὰ τὸ ἡρέμα πιστεύειν οἱ δοξάζοντες μᾶλλον τῶν ἐπισταμένων παρὰ τὴν ὑπόληψιν πράξουσιν, οὐθὲν διοίσει ἐπιστήμη δόξης· ἔνιοι γὰρ πιστεύουσιν οὐδὲν [30] ἥττον οἷς δοξάζουσιν ἢ ἕτεροι οἷς ἐπίστανται· δηλοῖ δ' Ἡράκλειτος. ἀλλ' ἐπεὶ διχῶς λέγομεν τὸ ἐπίστασθαι· καὶ γὰρ ὁ ἔχων μὲν οὐ χρώμενος δὲ τῇ ἐπιστήμῃ καὶ ὁ χρώμενος λέγεται ἐπίστασθαι, διοίσει τὸ ἔχοντα μὲν μὴ θεωροῦντα δὲ καὶ τὸ θεωροῦντα ἃ μὴ δεῖ πράττειν [τοῦ ἔχοντα καὶ θεωροῦντα]· [35] τοῦτο γὰρ δοκεῖ δεινόν, ἀλλ' οὐκ εἰ μὴ θεωρῶν. 1147a [1] ἔτι ἐπεὶ δύο τρόποι τῶν προτάσεων, ἔχοντα μὲν ἀμφοτέρας οὐδὲν κωλύει πράττειν παρὰ τὴν ἐπιστήμην, χρώμενον μέντοι τῇ καθόλου ἀλλὰ μὴ τῇ κατὰ μέρος· πρακτὰ γὰρ τὰ καθ' ἕκαστα. διαφέρει δὲ καὶ τὸ καθόλου· τὸ μὲν γὰρ ἐφ' ἑαυτοῦ [5] τὸ δ' ἐπὶ τοῦ πράγματός ἐστιν· οἷον ὅτι παντὶ ἀνθρώπῳ συμφέρει τὰ ξηρά, καὶ ὅτι αὐτὸς ἄνθρωπος, ἢ ὅτι ξηρὸν τὸ τοιόνδε· ἀλλ' εἰ τόδε τοιόνδε, ἢ οὐκ ἔχει ἢ οὐκ ἐνεργεῖ· κατὰ τε δὴ τούτους διοίσει τοὺς τρόπους ἀμήχανον ὅσον, ὥστε δοκεῖν οὕτω μὲν εἰδέναι μηδὲν ἄτοπον, ἄλλως δὲ θαυμαστόν. [10] ἔτι τὸ ἔχειν τὴν ἐπιστήμην ἄλλον τρόπον τῶν νῦν ῥηθέντων ὑπάρχει τοῖς ἀνθρώποις· ἐν τῷ γὰρ ἔχειν μὲν μὴ χρῆσθαι δὲ διαφέρουσιν ὁρῶμεν τὴν ἔξιν, ὥστε καὶ ἔχειν πως καὶ μὴ ἔχειν, οἷον τὸν καθεύδοντα καὶ μαινόμενον καὶ οἰνωμένον. ἀλλὰ μὴν οὕτω διατίθενται οἱ γε ἐν [15] τοῖς πάθεσιν ὄντες· θυμοὶ γὰρ καὶ ἐπιθυμίαι ἀφροδισίων καὶ ἔνια τῶν τοιούτων ἐπιδήλως καὶ τὸ σῶμα μεθιστᾶσιν, ἐνίοις δὲ καὶ μανίας ποιοῦσιν. δῆλον οὖν ὅτι ὁμοίως ἔχειν λεκτέον τοὺς ἀκρατεῖς τούτοις. τὸ δὲ λέγειν τοὺς λόγους τοὺς ἀπὸ τῆς ἐπιστήμης οὐδὲν σημεῖον· καὶ γὰρ οἱ ἐν τοῖς πάθεσι [20] τούτοις ὄντες ἀποδείξεις καὶ ἔπη λέγουσιν Ἐμπεδοκλέους, καὶ οἱ πρῶτον μαθόντες συνείρουσι μὲν τοὺς λόγους, ἴσασι δ' οὐπω· δεῖ γὰρ συμφυῆναι, τοῦτο δὲ χρόνου δεῖται· ὥστε καθάπερ τοὺς ὑποκρινομένους, οὕτως ὑποληπτέον λέγειν καὶ τοὺς ἀκρατευομένους. ἔτι καὶ ὧδε φυσικῶς ἂν τις ἐπιβλέψειε [25] τὴν αἰτίαν. ἢ μὲν γὰρ καθόλου δόξα, ἢ δ' ἑτέρα περὶ τῶν καθ' ἕκαστά ἐστιν, ὧν αἴσθησις ἤδη κυρία· ὅταν δὲ μία γένηται ἐξ αὐτῶν, ἀνάγκη τὸ συμπερανθὲν ἔνθα μὲν φάναι τὴν ψυχὴν, ἐν δὲ ταῖς ποιητικαῖς πράττειν εὐθύς· οἷον, εἰ παντὸς γλυκέος γεύεσθαι δεῖ, τοῦτι δὲ γλυκὺ ὥς [30] ἐν τι τῶν καθ' ἕκαστον, ἀνάγκη τὸν δυνάμενον καὶ μὴ κωλυόμενον ἅμα τοῦτο καὶ πράττειν. ὅταν οὖν ἡ μὲν καθόλου ἐνῇ

κωλύουσα γεύεσθαι, ἥ δέ, ὅτι πᾶν γλυκὺ ἡδύ, τουτὶ δὲ γλυκύ (αὕτη δὲ ἐνεργεῖ), τύχη δ' ἐπιθυμία ἐνοῦσα, ἥ μὲν οὖν λέγει φεύγειν τοῦτο, ἢ δ' ἐπιθυμία ἄγει· [35] κινεῖν γὰρ ἕκαστον δύναται τῶν μορίων· 1147b [1] ὥστε συμβαίνειν ὑπὸ λόγου πῶς καὶ δόξης ἀκρατεῦεσθαι, οὐκ ἐναντίας δὲ καθ' αὐτήν, ἀλλὰ κατὰ συμβεβηκός — ἡ γὰρ ἐπιθυμία ἐναντία, ἀλλ' οὐχ ἡ δόξα — τῷ ὀρθῷ λόγῳ· ὥστε καὶ διὰ τοῦτο τὰ θηρία οὐκ ἀκρατῇ, ὅτι οὐκ ἔχει καθόλου ὑπόληψιν [5] ἀλλὰ τῶν καθ' ἕκαστα φαντασίαν καὶ μνήμην. πῶς δὲ λύεται ἡ ἄγνοια καὶ πάλιν γίνεται ἐπιστήμων ὁ ἀκρατής, ὁ αὐτὸς λόγος καὶ περὶ οἰνωμένου καὶ καθεύδοντος καὶ οὐκ ἴδιος τούτου τοῦ πάθους, ὃν δεῖ παρὰ τῶν φυσιολόγων ἀκούειν. ἐπεὶ δ' ἡ τελευταία πρότασις δόξα τε [10] αἰσθητοῦ καὶ κυρία τῶν πράξεων, ταύτην ἡ οὐκ ἔχει ἐν τῷ πάθει ὢν, ἡ οὕτως ἔχει ὡς οὐκ ἦν τὸ ἔχειν ἐπίστασθαι ἀλλὰ λέγειν ὥσπερ ὁ οἰνωμένος τὰ Ἐμπεδοκλέους. καὶ διὰ τὸ μὴ καθόλου μηδ' ἐπιστημονικὸν ὁμοίως εἶναι δοκεῖν τῷ καθόλου τὸν ἔσχατον ὅρον καὶ ἔοικεν ὁ ἐζήτει [15] Σωκράτης συμβαίνειν· οὐ γὰρ τῆς κυρίως ἐπιστήμης εἶναι δοκούσης παρουσίας γίνεται τὸ πάθος, οὐδ' αὕτη περιέλεται διὰ τὸ πάθος, ἀλλὰ τῆς αἰσθητικῆς. περὶ μὲν οὖν τοῦ εἰδότα καὶ μὴ, καὶ πῶς εἰδότα ἐνδέχεται ἀκρατεῦεσθαι, τοσαῦτα εἰρήσθω.

[20] πότερον δ' ἐστὶ τις ἀπλῶς ἀκρατής ἢ πάντες κατὰ μέρος, καὶ εἰ ἔστι, περὶ ποῖά ἐστι, λεκτέον ἐφεξῆς. ὅτι μὲν οὖν περὶ ἡδονᾶς καὶ λύπας εἰσὶν οἱ τ' ἐγκρατεῖς καὶ καρτερικοὶ καὶ οἱ ἀκρατεῖς καὶ μαλακοί, φανερόν. ἐπεὶ δ' ἐστὶ τὰ μὲν ἀναγκαῖα τῶν ποιούντων ἡδονήν, τὰ δ' αἰρετὰ μὲν [25] καθ' αὐτὰ ἔχοντα δ' ὑπερβολήν, ἀναγκαῖα μὲν τὰ σωματικά (λέγω δὲ τὰ τοιαῦτα, τὰ τε περὶ τὴν τροφήν καὶ τὴν τῶν ἀφροδισίων χρείαν, καὶ τὰ τοιαῦτα τῶν σωματικῶν περὶ ᾧ τὴν ἀκολασίαν ἔθεμεν καὶ τὴν σωφροσύνην), τὰ δ' ἀναγκαῖα μὲν οὐχί, αἰρετὰ δὲ καθ' αὐτὰ (λέγω δ' [30] οἷον νίκην τιμὴν πλοῦτον καὶ τὰ τοιαῦτα τῶν ἀγαθῶν καὶ ἡδέων)· τοὺς μὲν οὖν πρὸς ταῦτα παρὰ τὸν ὀρθὸν λόγον ὑπερβάλλοντας τὸν ἐν αὐτοῖς ἀπλῶς μὲν οὐ λέγομεν ἀκρατεῖς, προστιθέντες δὲ τὸ χρημάτων ἀκρατεῖς καὶ κέρδους καὶ τιμῆς καὶ θυμοῦ, ἀπλῶς δ' οὐ, ὡς ἑτέρους καὶ καθ' [35] ὁμοιότητα λεγομένους, ὥσπερ ἄνθρωπος ὁ τὰ Ὀλύμπια νικῶν· 1148a [1] ἐκείνῳ γὰρ ὁ κοινὸς λόγος τοῦ ἰδίου μικρὸν διέφερεν, ἀλλ' ὅμως ἕτερος ἦν. σημεῖον δέ· ἡ μὲν γὰρ ἀκρασία

ὥστ' εἶπερ ἀδικωτέρα καὶ αἰσχύων ἢ ἀκρασία αὕτη τῆς περὶ τὸν θυμὸν ἐστὶ, καὶ ἀπλῶς ἀκρασία καὶ [20] κακία πως. ἔτι οὐδείς ὑβρίζει λυπούμενος, ὁ δ' ὀργῇ ποιῶν πᾶς ποιεῖ λυπούμενος, ὁ δ' ὑβρίζων μεθ' ἡδονῆς. εἰ οὖν οἷς ὀργίζεσθαι μάλιστα δίκαιον, ταῦτα ἀδικωτέρα, καὶ ἡ ἀκρασία ἢ δι' ἐπιθυμίαν· οὐ γὰρ ἐστὶν ἐν θυμῷ ὕβρις. ὥς μὲν τοίνυν αἰσχύων ἢ περὶ ἐπιθυμίας ἀκρασία τῆς περὶ τὸν θυμὸν, [25] καὶ ὅτι ἐστὶν ἐγκράτεια καὶ ἡ ἀκρασία περὶ ἐπιθυμίας καὶ ἡδονὰς σωματικές, δῆλον· αὐτῶν δὲ τούτων τὰς διαφορὰς ληπτέον. ὥσπερ γὰρ εἴρηται κατ' ἀρχάς, αἱ μὲν ἀνθρώπιναι εἰσι καὶ φυσικαὶ καὶ τῷ γένει καὶ τῷ μεγέθει, αἱ δὲ θηριώδεις, αἱ δὲ διὰ πηρώσεις καὶ νοσήματα. [30] τούτων δὲ περὶ τὰς πρώτας σωφροσύνη καὶ ἀκολασία μόνον ἐστίν· διὸ καὶ τὰ θηρία οὔτε σώφρονα οὔτ' ἀκόλαστα λέγομεν ἄλλ' ἢ κατὰ μεταφοράν καὶ εἴ τιτι ὅλως ἄλλο πρὸς ἄλλο διαφέρει γένος τῶν ζώων ὕβρει καὶ σιναμωρία καὶ τῷ παμφάγον εἶναι· οὐ γὰρ ἔχει προαίρεσιν [35] οὐδὲ λογισμόν, ἀλλ' ἐξέστηκε τῆς φύσεως, ὥσπερ οἱ μαινόμενοι τῶν ἀνθρώπων. 1150a [1] ἔλαττον δὲ θηριότης κακίας, φοβερώτερον δέ· οὐ γὰρ διέφθαρται τὸ βέλτιον, ὥσπερ ἐν τῷ ἀνθρώπῳ, ἀλλ' οὐκ ἔχει. ὅμοιον οὖν ὥσπερ ἄψυχον συμβάλλειν πρὸς ἔμψυχον, πότερον κάκιον· ἀσινεστέρα γὰρ ἢ [5] φαυλότης αἰεὶ ἢ τοῦ μὴ ἔχοντος ἀρχήν, ὁ δὲ νοῦς ἀρχή. παραπλήσιον οὖν τὸ συμβάλλειν ἀδικίαν πρὸς ἄνθρωπον ἀδικον. ἐστὶ γὰρ ὥς ἐκάτερον κάκιον· μυριοπλάσια γὰρ ἂν κακὰ ποιήσειεν ἄνθρωπος κακὸς θηρίου.

περὶ δὲ τὰς δι' ἀφῆς καὶ γεύσεως ἡδονὰς καὶ λύπας [10] καὶ ἐπιθυμίας καὶ φυγὰς, περὶ ἧς ἡ τε ἀκολασία καὶ ἡ σωφροσύνη διωρίσθη πρότερον, ἐστὶ μὲν οὕτως ἔχειν ὥστε ἡττάσθαι καὶ ὧν οἱ πολλοὶ κρείττους, ἐστὶ δὲ κρατεῖν καὶ ὧν οἱ πολλοὶ ἥττους· τούτων δ' ὁ μὲν περὶ ἡδονὰς ἀκρατής ὁ δ' ἐγκρατής, ὁ δὲ περὶ λύπας μαλακὸς ὁ δὲ καρτερικός. ἀλλ' ἐπεὶ οὐχ ἡ αὐτὴ οὔτε φύσις οὔθ' ἕξις ἡ ἀρίστη οὔτ' ἔστιν [30] οὔτε δοκεῖ, οὐδ' ἡδονὴν διώκουσι τὴν αὐτὴν πάντες, ἡδονὴν μέντοι πάντες. ἴσως δὲ καὶ διώκουσιν οὐχ ἦν οἶονται οὐδ' ἦν ἂν φαῖεν, ἀλλὰ τὴν αὐτήν· πάντα γὰρ φύσει ἔχει τι θεῖον. ἀλλ' εἰλήφασιν τὴν τοῦ ὀνόματος κληρονομίαν αἱ σωματικαὶ ἡδοναὶ διὰ τὸ πλειστάκις τε παραβάλλειν εἰς αὐτάς καὶ [35] πάντας μετέχειν αὐτῶν· διὰ τὸ μόνας οὖν γνωρίμους εἶναι ταύτας μόνας οἶονται εἶναι. 1154a [1] φανερόν δὲ καὶ ὅτι, εἰ μὴ ἡδονὴ ἀγαθὸν καὶ ἡ ἐνέργεια, οὐκ ἔσται ζῆν ἡδέως τὸν εὐδαίμονα· τίνος γὰρ ἔνεκα δεοὶ ἂν αὐτῆς, εἴπερ μὴ ἀγαθόν, ἀλλὰ καὶ λυπηρῶς ἐνδέχεται ζῆν; οὔτε κακὸν γὰρ οὔτ' ἀγαθὸν ἡ [5] λύπη, εἴπερ μὴδ' ἡδονή· ὥστε διὰ τί ἂν φεύγοι; οὐδὲ δὴ ἡδίων ὁ βίος ὁ τοῦ σπουδαίου, εἰ μὴ καὶ αἱ ἐνέργειαι αὐτοῦ.

περὶ δὲ δὴ τῶν σωματικῶν ἡδονῶν ἐπισκεπτέον τοῖς λέγουσιν ὅτι ἔναι γε ἡδοναὶ αἰρεταὶ σφόδρα, οἷον αἱ καλαί, [10] ἀλλ' οὐχ αἱ σωματικαὶ καὶ περὶ ἃς ὁ ἀκόλαστος. διὰ τί οὖν αἱ ἐναντίαι λῦπαι

ἐπεὶ δ' οὐ μόνον δεῖ τἀληθὲς εἰπεῖν ἀλλὰ καὶ τὸ αἴτιον τοῦ ψεύδους· τοῦτο γὰρ συμβάλλεται πρὸς τὴν πίστιν· ὅταν γὰρ εὐλογον φανῇ τὸ διὰ τί φαίνεται ἀληθὲς οὐκ ὄν [25] ἀληθές, πιστεύειν ποιεῖ τῷ ἀληθεῖ μᾶλλον· ὥστε λεκτέον διὰ τί φαίνονται αἱ σωματικαὶ ἡδοναὶ αἰρετώτεραι. πρῶτον μὲν οὖν δὴ ὅτι ἐκκρούει τὴν λύπην· καὶ διὰ τὰς ὑπερβολὰς τῆς λύπης, ὡς οὔσης ἰατρείας, τὴν ἡδονὴν διώκουσι τὴν ὑπερβάλλουσαν καὶ ὅλως τὴν σωματικὴν. σφοδραὶ δὲ γίνονται [30] αἱ ἰατροὶαι, διὸ καὶ διώκονται, διὰ τὸ παρὰ τὸ ἐναντίον φαίνεσθαι. καὶ οὐ σπουδαῖον δὴ δοκεῖ ἡ ἡδονὴ διὰ δύο ταῦτα, ὥσπερ εἴρηται, ὅτι αἱ μὲν φαύλης φύσεώς εἰσι πράξεις (ἢ ἐκ γενετῆς, ὥσπερ θηρίου, ἢ δι' ἔθος, οἷον αἱ τῶν φαύλων ἀνθρώπων), αἱ δ' ἰατροὶαι [ὅτι] ἐνδεοῦς, καὶ ἔχειν βέλτιον ἢ γίνεσθαι· 1154b[1] αἱ δὲ συμβαίνουσι τελευτουμένων· κατὰ συμβεβηκὸς οὖν σπουδαῖαι. ἔτι διώκονται διὰ τὸ σφοδραὶ εἶναι ὑπὸ τῶν ἄλλαις μὴ δυναμένων χαίρειν· αὐτοὶ γοῦν αὐτοῖς δίνας τινὰς παρασκευάζουσιν. ὅταν μὲν οὖν ἀβλαβεῖς, ἀνεπιτίμητον, [5] ὅταν δὲ βλαβεράς, φαῦλον. οὔτε γὰρ ἔχουσιν ἕτερα ἐφ' οἷς χαίρουσιν, τὸ τε μηδέτερον πολλοῖς λυπηρὸν διὰ τὴν φύσιν. αἰ γὰρ πονεῖ τὸ ζῆον, ὥσπερ καὶ οἱ φυσιολόγοι μαρτυροῦσι, τὸ ὄραν, τὸ ἀκούειν φάσκοντες εἶναι λυπηρόν· ἀλλ' ἤδη συνήθεις ἐσμέν, ὡς φασίν. ὁμοίως δ' ἐν μὲν τῇ [10] νεότητι διὰ τὴν αὐξήσιν ὥσπερ οἱ οἰνωμένοι διάκεινται, καὶ ἡδὺ ἡ νεότης. οἱ δὲ μελαγχολικοὶ τὴν φύσιν δέονται αἰ ἰατρείας· καὶ γὰρ τὸ σῶμα δακνόμενον διατελεῖ διὰ τὴν κρᾶσιν, καὶ αἰ ἐν ὀρέξει σφοδρᾷ εἰσίν· ἐξελαύνει δὲ ἡδονὴ λύπην ἢ τ' ἐναντία καὶ ἡ τυχοῦσα, ἐὰν ἢ ἰσχυρά· καὶ διὰ [15] ταῦτα ἀκόλαστοι καὶ φαῦλοι γίνονται. αἱ δ' ἄνευ λυπῶν οὐκ ἔχουσιν ὑπερβολὴν· αὗται δὲ τῶν φύσει ἡδέων καὶ μὴ κατὰ συμβεβηκός. λέγω δὲ κατὰ συμβεβηκός ἡδέα τὰ ἰατρούοντα· ὅτι γὰρ

συμβαίνει ιατρεύεσθαι τοῦ ὑπομένοντος ὑγιοῦς πράττοντός τι, διὰ τοῦτο ἡδὺν δοκεῖ εἶναι· [20] φύσει δ' ἡδέα, ἃ ποιεῖ πρᾶξιν τῆς τοιαύσδε φύσεως. οὐκ αἰεὶ δ' οὐθὲν ἡδὺν τὸ αὐτὸ διὰ τὸ μὴ ἀπλῆν ἡμῶν εἶναι τὴν φύσιν, ἀλλ' ἐνεῖναί τι καὶ ἕτερον, καθὼς φθαρτοί, ὥστε ἂν τι θάτερον πράττη, τοῦτο τῇ ἑτέρᾳ φύσει παρὰ φύσιν, ὅταν δ' ἰσάζῃ, οὔτε λυπηρὸν δοκεῖ οὔθ' ἡδὺν τὸ πραττόμενον· ἐπεὶ [25] εἴ του ἢ φύσις ἀπλῆ εἴη, αἰεὶ ἡ αὐτὴ πρᾶξις ἡδίστη ἔσται. διὸ ὁ θεὸς αἰεὶ μίαν καὶ ἀπλῆν χαίρει ἡδονήν· οὐ γὰρ μόνον κινήσεώς ἐστιν ἐνέργεια ἀλλὰ καὶ ἀκινήσιας, καὶ ἡδονὴ μᾶλλον ἐν ἡρεμίᾳ ἐστὶν ἢ ἐν κινήσει. μεταβολὴ δὲ πάντων γλυκύ, κατὰ τὸν ποιητὴν, διὰ πονηρίαν τινά· ὥσπερ γὰρ [30] ἄνθρωπος εὐμετάβολος ὁ πονηρός, καὶ ἡ φύσις ἡ δεομένη μεταβολῆς· οὐ γὰρ ἀπλῆ οὐδ' ἐπιεικής.

περὶ μὲν οὖν ἐγκρατείας καὶ ἀκρασίας καὶ περὶ ἡδονῆς καὶ λύπης εἴρηται, καὶ τί ἕκαστον καὶ πῶς τὰ μὲν ἀγαθὰ αὐτῶν ἐστὶ τὰ δὲ κακὰ· λοιπὸν δὲ καὶ περὶ φιλίας ἐροῦμεν.

τάχα δ' ἂν γένοιτο περὶ αὐτῶν φανερόν γγνωρισθέντος τοῦ φιλητοῦ. δοκεῖ γὰρ οὐ πᾶν φιλεῖσθαι ἀλλὰ τὸ φιλητόν, τοῦτο δ' εἶναι ἀγαθόν ἢ ἡδὺ ἢ χρήσιμον· δόξειε δ' ἂν χρήσιμον [20] εἶναι δι' οὗ γίνεται ἀγαθόν τι ἢ ἡδονή, ὥστε φιλητὰ ἂν εἴη τὰγαθόν τε καὶ τὸ ἡδὺ ὡς τέλη. πότερον οὖν τὰγαθὸν φιλοῦσιν ἢ τὸ αὐτοῖς ἀγαθόν; διαφωνεῖ γὰρ ἐνίοτε ταῦτα. ὁμοίως δὲ καὶ περὶ τὸ ἡδύ. δοκεῖ δὲ τὸ αὐτῷ ἀγαθὸν φιλεῖν ἕκαστος, καὶ εἶναι ἀπλῶς μὲν τὰγαθὸν φιλητόν, ἐκάστω [25] δὲ τὸ ἐκάστω· φιλεῖ δ' ἕκαστος οὐ τὸ ὄν αὐτῷ ἀγαθὸν ἀλλὰ τὸ φαινόμενον. διοίσει δ' οὐδέν· ἔσται γὰρ τὸ φιλητόν φαινόμενον. τριῶν δ' ὄντων δι' ἃ φιλοῦσιν, ἐπὶ μὲν τῇ τῶν ἀψύχων φιλήσει οὐ λέγεται φιλία· οὐ γάρ ἐστὶν ἀντιφίλησις, οὐδὲ βούλησις ἐκεῖνῳ ἀγαθοῦ (γελοῖον γὰρ ἴσως τῷ οἴνῳ βούλεσθαι [30] τὰγαθὰ, ἀλλ' εἴπερ, σφάζεσθαι βούλεται αὐτόν, ἵνα αὐτὸς ἔχη)· τῷ δὲ φίλῳ φασὶ δεῖν βούλεσθαι τὰγαθὰ ἐκείνου ἕνεκα. τοὺς δὲ βουλομένους οὕτω τὰγαθὰ εὐνοὺς λέγουσιν, ἂν μὴ ταῦτό καὶ παρ' ἐκείνου γίνηται· εὐνοίαν γὰρ ἐν ἀντιπεπονθόσι φιλίαν εἶναι. ἢ προσθετέον μὴ λανθάνουσιν; πολλοὶ γάρ [35] εἰσιν εὐνοὶ οἷς οὐχ ἐωράκασιν, ὑπολαμβάνουσι δὲ ἐπιεικεῖς εἶναι ἢ χρησίμους· 1156a [1] τοῦτο δὲ τὸ αὐτὸ κἂν ἐκείνων τις πάθοι πρὸς τοῦτον. εὐνοὶ μὲν οὖν οὗτοι φαίνονται ἀλλήλοισι· φίλους δὲ πῶς ἂν τις εἴποι λανθάνοντας ὡς ἔχουσιν ἑαυτοῖς; δεῖ ἄρα εὐνοεῖν ἀλλήλοισι καὶ βούλεσθαι τὰγαθὰ μὴ λανθάνοντας [5] δι' ἐν τι τῶν εἰρημένων.

διαφέρει δὲ ταῦτα ἀλλήλων εἶδει· καὶ αἱ φιλήσεις ἄρα καὶ αἱ φιλίαι. τρία δὴ τὰ τῆς φιλίας εἶδη, ἰσάριθμα τοῖς φιλητοῖς· καθ'

ἕκαστον γάρ ἐστιν ἀντιφίλησις οὐ λανθάνουσα, οἱ δὲ φιλοῦντες ἀλλήλους βούλονται τάγαθὰ ἀλλήλοις [10] ταύτη ἢ φιλοῦσιν. οἱ μὲν οὖν διὰ τὸ χρήσιμον φιλοῦντες ἀλλήλους οὐ καθ' αὐτοὺς φιλοῦσιν, ἀλλ' ἢ γίνεται τι αὐτοῖς παρ' ἀλλήλων ἀγαθόν. ὁμοίως δὲ καὶ οἱ δι' ἡδονήν· οὐ γὰρ τῷ ποιούς τινας εἶναι ἀγαπῶσι τοὺς εὐτραπέλους, ἀλλ' ὅτι ἡδεῖς αὐτοῖς. οἱ τε δὴ διὰ τὸ χρήσιμον φιλοῦντες διὰ τὸ αὐτοῖς [15] ἀγαθὸν στέργουσι, καὶ οἱ δι' ἡδονήν διὰ τὸ αὐτοῖς ἡδύ, καὶ οὐχ ἢ ὁ φιλούμενός ἐστιν, ἀλλ' ἢ χρήσιμος ἢ ἡδύς. κατὰ συμβεβηκός τε δὴ αἱ φιλίαι αὐταῖ εἰσιν· οὐ γὰρ ἢ ἐστὶν ὅσπερ ἐστὶν ὁ φιλούμενος, ταύτη φιλεῖται, ἀλλ' ἢ πορίζουσιν οἱ μὲν ἀγαθόν τι οἱ δ' ἡδονήν. εὐδιάλυτοι δὴ αἱ τοιαῦται [20] εἰσι, μὴ διαμενόντων αὐτῶν ὁμοίων· ἐὰν γὰρ μηκέτι ἡδεῖς ἢ χρήσιμοι ᾖσι, παύονται φιλοῦντες. τὸ δὲ χρήσιμον οὐ διαμένει, ἀλλ' ἄλλοτε ἄλλο γίνεται. ἀπολυθέντος οὖν δι' ὃ φίλοι ἦσαν, διαλύεται καὶ ἡ φιλία, ὥς οὔσης τῆς φιλίας πρὸς ἐκεῖνα. μάλιστα δ' ἐν τοῖς πρεσβύταις ἡ τοιαύτη δοκεῖ [25] φιλία γίνεσθαι (οὐ γὰρ τὸ ἡδὺ οἱ τηλικούτοι διώκουσιν ἀλλὰ τὸ ὠφέλιμον), καὶ τῶν ἐν ἀκμῇ καὶ νέων ὅσοι τὸ συμφέρον διώκουσιν. οὐ πάνυ δ' οἱ τοιοῦτοι οὐδὲ συζῶσι μετ' ἀλλήλων· ἐνίστε γὰρ οὐδ' εἰσὶν ἡδεῖς· οὐδὲ δὴ προσδέονται τῆς τοιαύτης ὁμιλίας, ἐὰν μὴ ὠφέλιμοι ᾖσιν· ἐπὶ τοσοῦτον [30] γὰρ εἰσὶν ἡδεῖς ἐφ' ὅσον ἐλπίδας ἔχουσιν ἀγαθοῦ. εἰς ταύτας δὲ καὶ τὴν ξενικὴν τιθέασιν. ἡ δὲ τῶν νέων φιλία δι' ἡδονήν εἶναι δοκεῖ· κατὰ πάθος γὰρ οὗτοι ζῶσι, καὶ μάλιστα διώκουσι τὸ ἡδὺ αὐτοῖς καὶ τὸ παρόν· τῆς ἡλικίας δὲ μεταπιπτούσης καὶ τὰ ἡδέα γίνεται ἕτερα. διὸ ταχέως γίνονται [35] φίλοι καὶ παύονται· ἅμα γὰρ τῷ ἡδεῖ ἡ φιλία μεταπίπτει, 1156b [1] τῆς δὲ τοιαύτης ἡδονῆς ταχεῖα ἡ μεταβολή. καὶ ἐρωτικοὶ δ' οἱ νέοι· κατὰ πάθος γὰρ καὶ δι' ἡδονήν τὸ πολὺ τῆς ἐρωτικῆς· διόπερ φιλοῦσι καὶ ταχέως παύονται, πολλάκις τῆς αὐτῆς ἡμέρας μεταπίπτοντες. συνημερεύειν δὲ καὶ [5] συζῆν οὗτοι βούλονται· γίνεται γὰρ αὐτοῖς τὸ κατὰ τὴν φιλίαν οὕτως.

τελεία δ' ἐστὶν ἡ τῶν ἀγαθῶν φιλία καὶ κατ' ἀρετὴν ὁμοίων· οὗτοι γὰρ τάγαθὰ ὁμοίως βούλονται ἀλλήλοις ἢ ἀγαθοί, ἀγαθοὶ δ' εἰσὶ καθ' αὐτούς. οἱ δὲ βουλόμενοι τάγαθὰ [10] τοῖς φίλοις ἐκείνων ἔνεκα μάλιστα φίλοι· δι' αὐτοὺς γὰρ οὕτως ἔχουσι, καὶ οὐ κατὰ συμβεβηκός· διαμένει οὖν ἡ τούτων φιλία ἕως ἂν ἀγαθοὶ ᾖσιν, ἢ δ' ἀρετὴ μόνιμον. καὶ ἔστιν ἐκάτερος ἀπλῶς ἀγαθὸς καὶ τῷ φίλῳ· οἱ

γὰρ ἀγαθοὶ καὶ ἀπλῶς ἀγαθοὶ καὶ ἀλλήλοις ὠφέλιμοι. ὁμοίως δὲ καὶ [15] ἡδεῖς· καὶ γὰρ ἀπλῶς οἱ ἀγαθοὶ ἡδεῖς καὶ ἀλλήλοις· ἐκάστῳ γὰρ καθ' ἡδονὴν εἰσιν αἱ οἰκεῖαι πράξεις καὶ αἱ τοιαῦται, τῶν ἀγαθῶν δὲ αἱ αὐταὶ ἢ ὅμοιαι. ἡ τοιαύτη δὲ φιλία μόνιμος εὐλόγως ἐστίν· συνάπτει γὰρ ἐν αὐτῇ πάνθ' ὅσα τοῖς φίλοις δεῖ ὑπάρχειν. πᾶσα γὰρ φιλία δι' ἀγαθὸν ἐστίν [20] ἢ δι' ἡδονὴν, ἢ ἀπλῶς ἢ τῷ φιλοῦντι, καὶ καθ' ὁμοιότητά τινα· ταύτη δὲ πάνθ' ὑπάρχει τὰ εἰρημένα καθ' αὐτούς· †ταύτη γὰρ ὅμοια† καὶ τὰ λοιπά, τό τε ἀπλῶς ἀγαθὸν καὶ ἡδὺ ἀπλῶς ἐστίν, μάλιστα δὲ ταῦτα φιλητά· καὶ τὸ φιλεῖν δὴ καὶ ἡ φιλία ἐν τούτοις μάλιστα καὶ ἀρίστη. σπανίας δ' [25] εἰκὸς τὰς τοιαύτας εἶναι· ὀλίγοι γὰρ οἱ τοιοῦτοι. ἔτι δὲ προσδεῖται χρόνου καὶ συνηθείας· κατὰ τὴν παροιμίαν γὰρ οὐκ ἔστιν εἰδῆσαι ἀλλήλους πρὶν τοὺς λεγομένους ἄλλας συναναλῶσαι· οὐδ' ἀποδέξασθαι δὴ πρότερον οὐδ' εἶναι φίλους, πρὶν ἂν ἐκάτερος ἐκατέρῳ φανῇ φιλητὸς καὶ πιστευθῇ. οἱ δὲ ταχέως [30] τὰ φιλικὰ πρὸς ἀλλήλους ποιοῦντες βούλονται μὲν φίλοι εἶναι, οὐκ εἰσὶ δέ, εἰ μὴ καὶ φιλητοί, καὶ τοῦτ' ἴσασιν· βούλησις μὲν γὰρ ταχεῖα φιλίας γίνεται, φιλία δ' οὔ.

αὕτη μὲν οὖν καὶ κατὰ τὸν χρόνον καὶ κατὰ τὰ λοιπὰ τελεία ἐστί, καὶ κατὰ πάντα ταῦτα γίνεται καὶ ὅμοια ἐκατέρῳ [35] παρ' ἐκατέρου, ὅπερ δεῖ τοῖς φίλοις ὑπάρχειν. 1157a [1] ἡ δὲ διὰ τὸ ἡδὺ ὁμοίωμα ταύτης ἔχει· καὶ γὰρ οἱ ἀγαθοὶ ἡδεῖς ἀλλήλοις. ὁμοίως δὲ καὶ ἡ διὰ τὸ χρήσιμον· καὶ γὰρ τοιοῦτοι ἀλλήλοις οἱ ἀγαθοί. μάλιστα δὲ καὶ ἐν τούτοις αἱ φιλίαι μένουσιν, ὅταν τὸ αὐτὸ γίνηται παρ' ἀλλήλων, οἷον [5] ἡδονή, καὶ μὴ μόνον οὕτως ἀλλὰ καὶ ἀπὸ τοῦ αὐτοῦ, οἷον τοῖς εὐτραπέλοις, καὶ μὴ ὡς ἐραστῇ καὶ ἐρωμένῳ. οὐ γὰρ ἐπὶ τοῖς αὐτοῖς ἡδονταὶ οὗτοι, ἀλλ' ὁ μὲν ὁρῶν ἐκεῖνον, ὁ δὲ θεραπευόμενος ὑπὸ τοῦ ἐραστοῦ· ληγούσης δὲ τῆς ὥρας ἐνίοτε καὶ ἡ φιλία λήγει (τῷ μὲν γὰρ οὐκ ἔστιν ἡδεῖα ἢ [10] ὄψις, τῷ δ' οὐ γίνεται ἡ θεραπεία)· πολλοὶ δ' αὖ διαμένουσιν, ἐὰν ἐκ τῆς συνηθείας τὰ ἥθη στέρξωσιν, ὁμοήθεις ὄντες. οἱ δὲ μὴ τὸ ἡδὺ ἀντικαταλλαττόμενοι ἀλλὰ τὸ χρήσιμον ἐν τοῖς ἐρωτικοῖς καὶ εἰσὶν ἥττον φίλοι καὶ διαμένουσιν. οἱ δὲ διὰ τὸ χρήσιμον ὄντες φίλοι ἅμα τῷ συμφέροντι [15] διαλύονται· οὐ γὰρ ἀλλήλων ἦσαν φίλοι ἀλλὰ τοῦ λυσιτελοῦς. δι' ἡδονὴν μὲν οὖν καὶ διὰ τὸ χρήσιμον καὶ φαύλους ἐνδέχεται φίλους ἀλλήλοις εἶναι καὶ ἐπιεικεῖς φαύλοις καὶ μηδέτερον ὁποιοῦν, δι' αὐτούς δὲ δηλὸν ὅτι μόνους τοὺς ἀγαθοὺς· οἱ γὰρ κακοὶ οὐ χαίρουσιν ἑαυτοῖς, [20] εἰ μὴ

τις ὠφέλεια γίνοιτο. καὶ μόνη δὲ ἡ τῶν ἀγαθῶν φιλία ἀδιάβλητός ἐστιν· οὐ γὰρ ῥάδιον οὐδενὶ πιστεῦσαι περὶ τοῦ ἐν πολλῷ χρόνῳ ὑφ' αὐτοῦ δεδοκιμασμένου· καὶ τὸ πιστεύειν ἐν τούτοις, καὶ τὸ μηδέποτε ἂν ἀδικῆσαι, καὶ ὅσα ἄλλα ἐν τῇ ὥς ἀληθῶς φιλία ἀξιοῦται. ἐν δὲ ταῖς ἐτέραις [25] οὐδὲν κωλύει τὰ τοιαῦτα γίνεσθαι. ἐπεὶ γὰρ οἱ ἄνθρωποι λέγουσι φίλους καὶ τοὺς διὰ τὸ χρήσιμον, ὥσπερ αἱ πόλεις (δοκοῦσι γὰρ αἱ συμμαχίαι ταῖς πόλεσι γίνεσθαι ἕνεκα τοῦ συμφέροντος), καὶ τοὺς δι' ἡδονὴν ἀλλήλους στέργοντας, ὥσπερ οἱ παῖδες, ἴσως λέγειν μὲν δεῖ καὶ ἡμᾶς φίλους τοὺς [30] τοιούτους, εἶδη δὲ τῆς φιλίας πλείω, καὶ πρῶτως μὲν καὶ κυρίως τὴν τῶν ἀγαθῶν ἢ ἀγαθῶν, τὰς δὲ λοιπὰς καθ' ὁμοιότητα· ἥ γὰρ ἀγαθὸν τι καὶ ὁμοίον τι, ταύτῃ φίλοι· καὶ γὰρ τὸ ἡδὺ ἀγαθὸν τοῖς φιληδέσιν. οὐ πάνυ δ' αὐταὶ συνάπτουσιν, οὐδὲ γίνονται οἱ αὐτοὶ φίλοι διὰ τὸ χρήσιμον [35] καὶ διὰ τὸ ἡδύ· οὐ γὰρ πάνυ συνδυάζεται τὰ κατὰ συμβεβηκός.

[1157b [1] εἰς ταῦτα δὲ τὰ εἶδη τῆς φιλίας νενεμημένης οἱ μὲν φαῦλοι ἔσονται φίλοι δι' ἡδονὴν ἢ τὸ χρήσιμον, ταύτῃ ὅμοιοι ὄντες, οἱ δ' ἀγαθοὶ δι' αὐτοὺς φίλοι· ἥ γὰρ ἀγαθοί. οὗτοι μὲν οὖν ἀπλῶς φίλοι, ἐκεῖνοι δὲ κατὰ συμβεβηκός [5] καὶ τῷ ὁμοιωσθαι τούτοις. ὥσπερ δ' ἐπὶ τῶν ἀρετῶν οἱ μὲν καθ' ἑξιν οἱ δὲ κατ' ἐνέργειαν ἀγαθοὶ λέγονται, οὕτω καὶ ἐπὶ τῆς φιλίας· οἱ μὲν γὰρ συζῶντες χαίρουσιν ἀλλήλοις καὶ πορίζουσι τὰγαθὰ, οἱ δὲ καθεύδοντες ἢ κεχωρισμένοι τοῖς τόποις οὐκ ἐνεργοῦσι μὲν, οὕτω δ' ἔχουσιν ὥστ' [10] ἐνεργεῖν φιλικῶς· οἱ γὰρ τόποι οὐ διαλύουσι τὴν φιλίαν ἀπλῶς, ἀλλὰ τὴν ἐνέργειαν. ἐὰν δὲ χρόνιος ἡ ἀπουσία γίνηται, καὶ τῆς φιλίας δοκεῖ λήθην ποιεῖν· ὅθεν εἴρηται

πολλὰς δὲ φιλίας ἀπροσηγορία διέλυσεν.

οὐ φαίνονται δ' οὐθ' οἱ πρεσβῦται οὐθ' οἱ στρυφνοὶ φιλικοὶ εἶναι· βραχὺ [15] γὰρ ἐν αὐτοῖς τὸ τῆς ἡδονῆς, οὐδεὶς δὲ δύναται συνημερεύειν τῷ λυπηρῷ οὐδὲ τῷ μὴ ἡδέϊ· μάλιστα γὰρ ἡ φύσις φαίνεται τὸ λυπηρὸν φεύγειν, ἐφίεσθαι δὲ τοῦ ἡδέος. οἱ δ' ἀποδεχόμενοι ἀλλήλους, μὴ συζῶντες δέ, εὖνοις ἐοίκασιν μᾶλλον ἢ φίλοις. οὐδὲν γὰρ οὕτως ἐστὶ φίλων ὥς τὸ συζῆν [20] (ὠφελείας μὲν γὰρ οἱ ἐνδεεῖς ὀρέγονται, συνημερεύειν δὲ καὶ οἱ μακάριοι· μονώταις γὰρ εἶναι τούτοις ἥκιστα προσήκει)· συνδιάγειν δὲ μετ' ἀλλήλων οὐκ

ἔστι μὴ ἡδεῖς ὄντας μὴδὲ χαίροντας τοῖς αὐτοῖς, ὅπερ ἡ ἐταιρική δοκεῖ ἔχειν.

[25] μάλιστα μὲν οὖν ἐστὶ φιλία ἡ τῶν ἀγαθῶν, καθάπερ πολλάκις εἴρηται· δοκεῖ γὰρ φιλητὸν μὲν καὶ αἰρετὸν τὸ ἀπλῶς ἀγαθὸν ἢ ἡδύ, ἐκάστῳ δὲ τὸ αὐτῷ τοιοῦτον· ὁ δ' ἀγαθὸς τῷ ἀγαθῷ δι' ἄμφω ταῦτα. ἔοικε δ' ἡ μὲν φίλησις πάθει, ἡ δὲ φιλία ἔξει· ἡ γὰρ φίλησις οὐχ ἦττον [30] πρὸς τὰ ἄψυχά ἐστιν, ἀντιφιλοῦσι δὲ μετὰ προαιρέσεως, ἡ δὲ προαίρεσις ἀφ' ἑξέως· καὶ τὰγαθὰ βούλονται τοῖς φιλουμένοις ἐκείνων ἔνεκα, οὐ κατὰ πάθος ἀλλὰ καθ' ἑξιν. καὶ φιλοῦντες τὸν φίλον τὸ αὐτοῖς ἀγαθὸν φιλοῦσιν· ὁ γὰρ ἀγαθὸς φίλος γινόμενος ἀγαθὸν γίνεται ὢ φίλος. ἐκάτερος [35] οὖν φιλεῖ τε τὸ αὐτῷ ἀγαθόν, καὶ τὸ ἴσον ἀνταποδίδωσι τῇ βουλήσει καὶ τῷ ἡδεῖ· λέγεται γὰρ φιλότης ἰσότης, 1158a [1] μάλιστα δὲ τῇ τῶν ἀγαθῶν ταῦθ' ὑπάρχει. ἐν δὲ τοῖς στρυφνοῖς καὶ πρεσβυτικοῖς ἦττον γίνεται ἡ φιλία, ὅσῳ δυσκολώτεροί εἰσι καὶ ἦττον ταῖς ὁμιλίαις χαίρουσιν· ταῦτα γὰρ δοκεῖ μάλιστ' εἶναι φιλικὰ καὶ ποιητικὰ φιλίας. διὸ [5] νέοι μὲν γίνονται φίλοι ταχύ, πρεσβῦται δ' οὐ· οὐ γὰρ γίνονται φίλοι οἷς ἂν μὴ χαίρωσιν· ὁμοίως δ' οὐδ' οἱ στρυφνοί. ἀλλ' οἱ τοιοῦτοι εὖνοι μὲν εἰσιν ἀλλήλοις· βούλονται γὰρ τὰγαθὰ καὶ ἀπαντῶσιν εἰς τὰς χρείας· φίλοι δ' οὐ πάνυ εἰσὶ διὰ τὸ μὴ συνημερεῦειν μὴδὲ χαίρειν ἀλλήλοις, [10] ἃ δὴ μάλιστ' εἶναι δοκεῖ φιλικὰ. πολλοῖς δ' εἶναι φίλον κατὰ τὴν τελείαν φιλίαν οὐκ ἐνδέχεται, ὥσπερ οὐδ' ἐρᾶν πολλῶν ἅμα (ἔοικε γὰρ ὑπερβολῇ, τὸ τοιοῦτο δὲ πρὸς ἓνα πέφυκε γίνεσθαι)· πολλοὺς δ' ἅμα τῷ αὐτῷ ἀρέσκειν σφόδρα οὐ ῥάδιον, ἴσως δ' οὐδ' ἀγαθοὺς εἶναι. δεῖ δὲ καὶ ἐμπειρίαν [15] λαβεῖν καὶ ἐν συνηθείᾳ γενέσθαι, ὃ παγχάλεπον. διὰ τὸ χρήσιμον δὲ καὶ τὸ ἡδὺ πολλοῖς ἀρέσκειν ἐνδέχεται· πολλοὶ γὰρ οἱ τοιοῦτοι, καὶ ἐν ὀλίγῳ χρόνῳ αἱ ὑπηρεσίαι. τούτων δὲ μᾶλλον ἔοικε φιλία ἢ διὰ τὸ ἡδύ, ὅταν ταῦτά ἀπ' ἀμφοῖν γίνηται καὶ χαίρωσιν ἀλλήλοις ἢ τοῖς [20] αὐτοῖς, οἷαι τῶν νέων εἰσὶν αἱ φιλίαι· μᾶλλον γὰρ ἐν ταύταις τὸ ἐλευθέριον. ἡ δὲ διὰ τὸ χρήσιμον ἀγοραίων. καὶ οἱ μακάριοι δὲ χρησίων μὲν οὐδὲν δέονται, ἡδέων δέ· συζῆν μὲν γὰρ βούλονταί τισι, τὸ δὲ λυπηρὸν ὀλίγον μὲν χρόνον φέρουσιν, συνεχῶς δ' οὐδεὶς ἂν ὑπομείναι, οὐδ' αὐτὸ [25] τὸ ἀγαθόν, εἰ λυπηρὸν αὐτῷ εἴη· διὸ τοὺς φίλους ἡδεῖς ζητοῦσιν. δεῖ δ' ἴσως καὶ ἀγαθοὺς τοιούτους ὄντας, καὶ ἔτι αὐτοῖς· οὕτω γὰρ ὑπάρξει αὐτοῖς ὅσα δεῖ τοῖς φίλοις. οἱ δ' ἐν ταῖς ἐξουσίαις διηρημένοις

φαίνονται χρῆσθαι τοῖς φίλοις· ἄλλοι γὰρ αὐτοῖς εἰσὶ χρήσιμοι καὶ ἕτεροι ἡδεῖς, ἅμφω δ' οἱ αὐτοὶ [30] οὐ πάνυ· οὔτε γὰρ ἡδεῖς μετ' ἀρετῆς ζητοῦσιν οὔτε χρησίμους εἰς τὰ καλά, ἀλλὰ τοὺς μὲν εὐτραπέλους τοῦ ἡδέος ἐφιέμενοι, τοὺς δὲ δεινούς πρᾶξαι τὸ ἐπιταχθέν, ταῦτα δ' οὐ πάνυ γίνεται ἐν τῷ αὐτῷ. ἡδὺς δὲ καὶ χρήσιμος ἅμα εἶρηται ὅτι ὁ σπουδαῖος· ἀλλ' ὑπερέχοντι οὐ γίνεται ὁ τοιοῦτος φίλος, ἐὰν μὴ [35] καὶ τῇ ἀρετῇ ὑπερέχῃται· εἰ δὲ μὴ, οὐκ ἰσάζει ἀνάλογον ὑπερεχόμενος. οὐ πάνυ δ' εἰώθασι τοιοῦτοι γίνεσθαι.

1158b [1] εἰσὶ δ' οὖν αἱ εἰρημέναι φιλίαι ἐν ἰσότητι· τὰ γὰρ αὐτὰ γίνεται ἀπ' ἀμφοῖν καὶ βούλονται ἀλλήλοις, ἢ ἕτερον ἀνθ' ἑτέρου καταλλάττονται, οἷον ἡδονὴν ἀντ' ὠφελείας· ὅτι δὲ καὶ ἡττόν εἰσιν αὗται φιλίαι καὶ μένουσιν, εἶρηται. [5] δοκοῦσι δὲ [καὶ] δι' ὁμοιότητα καὶ ἀνομοιότητα ταῦτοῦ εἶναι τε καὶ οὐκ εἶναι φιλίαι· καθ' ὁμοιότητα γὰρ τῆς κατ' ἀρετὴν φαίνονται φιλίαι (ἢ μὲν γὰρ τὸ ἡδὺ ἔχει ἢ δὲ τὸ χρήσιμον, ταῦτα δ' ὑπάρχει κάκειν), τῷ δὲ τὴν μὲν ἀδιάβλητον καὶ μόνιμον εἶναι, ταύτας δὲ ταχέως [10] μεταπίπτειν ἄλλοις τε διαφέρειν πολλοῖς, οὐ φαίνονται φιλίαι, δι' ἀνομοιότητα ἐκείνης. ἕτερον δ' ἐστὶ φιλίας εἶδος τὸ καθ' ὑπεροχὴν, οἷον πατρὶ πρὸς υἱὸν καὶ ὅλως πρεσβυτέρῳ πρὸς νεώτερον, ἀνδρὶ τε πρὸς γυναῖκα καὶ παντὶ ἄρχοντι πρὸς ἀρχόμενον. διαφέρουσι δ' αὗται καὶ ἀλλήλων· [15] οὐ γὰρ ἡ αὐτὴ γονεῦσι πρὸς τέκνα καὶ ἄρχουσι πρὸς ἀρχομένους, ἀλλ' οὐδὲ πατρὶ πρὸς υἱὸν καὶ υἱῷ πρὸς πατέρα, οὐδ' ἀνδρὶ πρὸς γυναῖκα καὶ γυναικὶ πρὸς ἄνδρα. ἑτέρα γὰρ ἐκάστου τούτων ἀρετὴ καὶ τὸ ἔργον, ἑτέρα δὲ καὶ δι' ἃ φιλοῦσιν· ἑτεραι οὖν καὶ αἱ φιλήσεις καὶ αἱ φιλίαι. [20] ταῦτά μὲν δὴ οὔτε γίνεται ἐκατέρῳ παρὰ θατέρου οὔτε δεῖ ζητεῖν· ὅταν δὲ γονεῦσι μὲν τέκνα ἀπονέμῃ ἃ δεῖ τοῖς γεννήσασι, γονεῖς δὲ [υἱέσιν] ἃ δεῖ τοῖς τέκνοις, μόνιμος ἡ τῶν τοιούτων καὶ ἐπιεικὴς ἔσται φιλία. ἀνάλογον δ' ἐν πάσαις ταῖς καθ' ὑπεροχὴν οὖσαις φιλίαις καὶ τὴν φίλησιν [25] δεῖ γίνεσθαι, οἷον τὸν ἀμείνω μᾶλλον φιλεῖσθαι ἢ φιλεῖν, καὶ τὸν ὠφελιμώτερον, καὶ τῶν ἄλλων ἕκαστον ὁμοίως· ὅταν γὰρ κατ' ἀξίαν ἡ φίλησις γίνηται, τότε γίνεται πῶς ἰσότης, ὃ δὴ τῆς φιλίας εἶναι δοκεῖ.

οὐχ ὁμοίως δὲ τὸ ἴσον ἐν τε τοῖς δικαίοις καὶ ἐν τῇ [30] φιλίᾳ φαίνεται ἔχειν· ἔστι γὰρ ἐν μὲν τοῖς δικαίοις ἴσον πρῶτως τὸ κατ'

ἀξίαν, τὸ δὲ κατὰ ποσὸν δευτέρως, ἐν δὲ τῇ φιλίᾳ τὸ μὲν κατὰ ποσὸν
πρώτως, τὸ δὲ κατ' ἀξίαν δευτέρως. δηλον δ', ἂν πολὺ διάστημα
γένηται ἀρετῆς ἢ κακίας ἢ εὐπορίας ἢ τινος ἄλλου· οὐ γὰρ ἔτι φίλοι
εἰσιν [35] ἀλλ' οὐδ' ἀξιοῦσιν. ἐμφανέστατον δὲ τοῦτ' ἐπὶ τῶν θεῶν·
πλεῖστον γὰρ οὗτοι πᾶσι τοῖς ἀγαθοῖς ὑπερέχουσιν. 1159a [1] δηλον
δὲ καὶ ἐπὶ τῶν βασιλέων· οὐδὲ γὰρ τούτοις ἀξιοῦσιν εἶναι φίλοι οἱ
πολὺ καταδεέστεροι, οὐδὲ τοῖς ἀρίστοις ἢ σοφωτάτοις οἱ μηδενὸς
ἄξιοι. ἀκριβὴς μὲν οὖν ἐν τοῖς τοιούτοις οὐκ ἔστιν ὀρισμός, ἕως τίνος
οἱ φίλοι· πολλῶν γὰρ ἀφαιρουμένων ἔτι [5] μένει, πολὺ δὲ
χωρισθέντος, οἷον τοῦ θεοῦ, οὐκέτι. ὅθεν καὶ ἀπορεῖται, μή ποτ' οὐ
βούλονται οἱ φίλοι τοῖς φίλοις τὰ μέγιστα τῶν ἀγαθῶν, οἷον θεοὺς
εἶναι· οὐ γὰρ ἔτι φίλοι ἔσονται αὐτοῖς, οὐδὲ δὴ ἀγαθὰ· οἱ γὰρ φίλοι
ἀγαθὰ. εἰ δὴ καλῶς εἴρηται ὅτι ὁ φίλος τῷ φίλῳ βούλεται τὰγαθὰ
[10] ἐκείνου ἔνεκα, μένειν ἂν δέοι οἷός ποτ' ἐστὶν ἐκείνος· ἀνθρώπῳ
δὴ ὄντι βουλήσεται τὰ μέγιστα ἀγαθὰ. ἴσως δ' οὐ πάντα· αὐτῷ γὰρ
μάλισθ' ἕκαστος βούλεται τὰγαθὰ. οἱ πολλοὶ δὲ δοκοῦσι διὰ
φιλοτιμίαν βούλεσθαι φιλεῖσθαι μᾶλλον ἢ φιλεῖν· διὸ φιλοκόλακες οἱ
πολλοί· ὑπερεχόμενος γὰρ [15] φίλος ὁ κόλαξ, ἢ προσποιεῖται
τοιοῦτος καὶ μᾶλλον φιλεῖν ἢ φιλεῖσθαι· τὸ δὲ φιλεῖσθαι ἐγγὺς εἶναι
δοκεῖ τοῦ τιμᾶσθαι, οὗ δὴ οἱ πολλοὶ ἐφίενται. οὐ δι' αὐτὸ δ' εὐόκασιν
αἰρεῖσθαι τὴν τιμὴν, ἀλλὰ κατὰ συμβεβηκός· χαίρουσι γὰρ οἱ μὲν
πολλοὶ ὑπὸ τῶν ἐν ταῖς ἐξουσίαις τιμώμενοι [20] διὰ τὴν ἐλπίδα
(οἷονται γὰρ τεύξεσθαι παρ' αὐτῶν, ἂν του δέωνται· ὥς δὴ σημείῳ
τῆς εὐπαθείας χαίρουσι τῇ τιμῇ)· οἱ δ' ὑπὸ τῶν ἐπικεικῶν καὶ εἰδότην
ὀρεγόμενοι τιμῆς βεβαιῶσαι τὴν οἰκείαν δόξαν ἐφίενται περὶ αὐτῶν·
χαίρουσι δὴ, ὅτι εἰσὶν ἀγαθοὶ πιστεύοντες τῇ τῶν λεγόντων κρίσει.
[25] τῷ φιλεῖσθαι δὲ καθ' αὐτὸ χαίρουσιν· διὸ δόξειεν ἂν κρεῖττον
εἶναι τοῦ τιμᾶσθαι, καὶ ἡ φιλία καθ' αὐτὴν αἰρετὴ εἶναι. δοκεῖ δ' ἐν
τῷ φιλεῖν μᾶλλον ἢ ἐν τῷ φιλεῖσθαι εἶναι. σημεῖον δ' αἱ μητέρες τῷ
φιλεῖν χαίρουσαι· ἔναι γὰρ διδόασιν τὰ ἑαυτῶν τρέφεσθαι, καὶ
φιλοῦσι μὲν εἰδυῖαι, [30] ἀντιφιλεῖσθαι δ' οὐ ζητοῦσιν, ἐὰν
ἀμρότερα μὴ ἐνδέχεται, ἀλλ' ἱκανὸν αὐταῖς ἔοικεν εἶναι ἐὰν ὁρῶσιν
εὖ πράττοντας, καὶ αὐταὶ φιλοῦσιν αὐτοὺς καὶ ἐκεῖνοι μηδὲν ὦν
μητρὶ προσήκει ἀπονέμωσι διὰ τὴν ἄγνοιαν. μᾶλλον δὲ τῆς φιλίας
οὔσης ἐν τῷ φιλεῖν, καὶ τῶν φιλοφίλων ἐπαινουμένων, φίλων [35]
ἀρετὴ τὸ φιλεῖν ἔοικεν, ὥστ' ἐν οἷς τοῦτο γίνεται κατ' ἀξίαν, 1159b
[1] οὗτοι μόνιμοι φίλοι καὶ ἡ τούτων φιλία. οὕτω δ' ἂν καὶ οἱ ἄνιστοι

μάλιστ' εἶεν φίλοι· ισάζοιντο γὰρ ἄν. ἡ δ' ἰσότης καὶ ὁμοιότης φιλότης, καὶ μάλιστα μὲν ἡ τῶν κατ' ἀρετὴν ὁμοιότης· μόνιμοι γὰρ ὄντες καθ' αὐτοὺς καὶ πρὸς ἀλλήλους [5] μένουσι, καὶ οὔτε δέονται φαύλων οὐθ' ὑπηρετοῦσι τοιαῦτα, ἀλλ' ὥς εἰπεῖν καὶ διακωλύουσιν· τῶν ἀγαθῶν γὰρ μήτ' αὐτοὺς ἀμαρτάνειν μήτε τοῖς φίλοις ἐπιτρέπειν. οἱ δὲ μοχθηροὶ τὸ μὲν βέβαιον οὐκ ἔχουσιν· οὐδὲ γὰρ αὐτοῖς διαμένουσιν ὅμοιοι ὄντες· ἐπ' ὀλίγον δὲ χρόνον γίνονται φίλοι, [10] χαίροντες τῇ ἀλλήλων μοχθηρίᾳ. οἱ χρήσιμοι δὲ καὶ ἡδεῖς ἐπὶ πλεῖον διαμένουσιν· ἕως γὰρ ἂν πορίζωσιν ἡδονὰς ἢ ὠφελείας ἀλλήλοις. ἐξ ἐναντίων δὲ μάλιστα μὲν δοκεῖ ἡ διὰ τὸ χρησίμον γίνεσθαι φιλία, οἷον πένης πλουσίῳ, ἀμαθῆς εἰδοτί· οὗ γὰρ τυγχάνει τις ἐνδεὴς ὢν, τούτου ἐφιέμενος ἀντιδωρεῖται [15] ἄλλο. ἐνταῦθα δ' ἂν τις ἔλκοι καὶ ἐραστὴν καὶ ἐρώμενον, καὶ καλὸν καὶ αἰσχρόν. διὸ φαίνονται καὶ οἱ ἐρασταὶ γελοῖοι ἐνίστε, ἀξιοῦντες φιλεῖσθαι ὡς φιλοῦσιν· ὁμοίως δὲ φιλητοὺς ὄντας ἴσως ἀξιωτέον, μηδὲν δὲ τοιοῦτον ἔχοντας γελοῖον. ἴσως δὲ οὐδ' ἐφίεται τὸ ἐναντίον τοῦ ἐναντίου [20] καθ' αὐτό, ἀλλὰ κατὰ συμβεβηκός, ἡ δ' ὄρεξις τοῦ μέσου ἐστίν· τοῦτο γὰρ ἀγαθόν, οἷον τῷ ξηρῷ οὐχ ὑγρῷ γενέσθαι ἄλλ' ἐπὶ τὸ μέσον ἐλθεῖν, καὶ τῷ θερμῷ καὶ τοῖς ἄλλοις ὁμοίως. ταῦτα μὲν οὖν ἀφείσθω· καὶ γὰρ ἐστὶν ἀλλοτριώτερα.

[25] ἔοικε δέ, καθάπερ ἐν ἀρχῇ εἴρηται, περὶ ταῦτα καὶ ἐν τοῖς αὐτοῖς εἶναι ἢ τε φιλία καὶ τὸ δίκαιον. ἐν ἀπάσῃ γὰρ κοινωνίᾳ δοκεῖ τι δίκαιον εἶναι, καὶ φιλία δέ· προσαγορεύουσι γοῦν ὡς φίλους τοὺς σύμπλους καὶ τοὺς συστρατιώτας, ὁμοίως δὲ καὶ τοὺς ἐν ταῖς ἄλλαις κοινωνίαις. καθ' [30] ὅσον δὲ κοινωνοῦσιν, ἐπὶ τοσοῦτόν ἐστι φιλία· καὶ γὰρ τὸ δίκαιον. καὶ ἡ παροιμία “κοινὰ τὰ φίλων,” ὀρθῶς· ἐν κοινωνίᾳ γὰρ ἡ φιλία. ἔστι δ' ἀδελφοῖς μὲν καὶ ἐταίροις πάντα κοινά, τοῖς δ' ἄλλοις ἀφωρισμένα, καὶ τοῖς μὲν πλείω τοῖς δ' ἐλάττω· καὶ γὰρ τῶν φιλιῶν αἱ μὲν μᾶλλον [35] αἱ δ' ἥττον. διαφέρει δὲ καὶ τὰ δίκαια· 1160a [1] οὐ γὰρ ταῦτα γονεῦσι πρὸς τέκνα καὶ ἀδελφοῖς πρὸς ἀλλήλους, οὐδ' ἐταίροις καὶ πολίταις, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων φιλιῶν. ἕτερα δὲ καὶ τὰ ἄδικα πρὸς ἐκάστους τούτων, καὶ αὐξήσιν λαμβάνει τῷ μᾶλλον πρὸς φίλους εἶναι, οἷον χρήματα [5] ἀποστερῆσαι ἐταῖρον δεινότερον ἢ πολίτην, καὶ μὴ βοηθῆσαι ἀδελφῷ ἢ ὀθνεῖω, καὶ πατάξαι πατέρα ἢ ὄντινον ἄλλον. αὐξέσθαι δὲ πέφυκεν ἅμα τῇ φιλίᾳ καὶ τὸ δίκαιον, ὡς ἐν τοῖς αὐτοῖς ὄντα καὶ ἐπ'

ἴσον διήκοντα. αἱ δὲ κοινωνίαι πᾶσαι μορίοις ἐοίκασι τῆς πολιτικῆς· συμπορεύονται [10] γὰρ ἐπὶ τινι συμφέροντι, καὶ ποριζόμενοί τι τῶν εἰς τὸν βίον· καὶ ἡ πολιτικὴ δὲ κοινωνία τοῦ συμφέροντος χάριν δοκεῖ καὶ ἐξ ἀρχῆς συνελθεῖν καὶ διαμένειν· τούτου γὰρ καὶ οἱ νομοθεταὶ στοχάζονται, καὶ δίκαιόν φασιν εἶναι τὸ κοινῇ συμφέρον. αἱ μὲν οὖν ἄλλαι κοινωνίαι κατὰ μέρη [15] τοῦ συμφέροντος ἐφίενται, οἷον πλωτῆρες μὲν τοῦ κατὰ τὸν πλοῦν πρὸς ἐργασίαν χρημάτων ἢ τι τοιοῦτον, συστρατιῶται δὲ τοῦ κατὰ τὸν πόλεμον, εἴτε χρημάτων εἴτε νίκης ἢ πόλεως ὀρεγόμενοι, ὁμοίως δὲ καὶ φυλέται καὶ δημόται. [ἔναι δὲ τῶν κοινωνιῶν δι' ἡδονὴν δοκοῦσι γίνεσθαι, θιασωτῶν [20] καὶ ἐρανιστῶν· αὗται γὰρ θυσίας ἔνεκα καὶ συνουσίας.] πᾶσαι δ' αὗται ὑπὸ τὴν πολιτικὴν ἐοίκασιν εἶναι· οὐ γὰρ τοῦ παρόντος συμφέροντος ἡ πολιτικὴ ἐφίεται, ἀλλ' εἰς ἅπαντα τὸν βίον . . . θυσίας τε ποιοῦντες καὶ περὶ ταύτας συνόδους, τιμὰς ἀπονέμοντες τοῖς θεοῖς, καὶ αὐτοῖς ἀναπαύσεις [25] πορίζοντες μεθ' ἡδονῆς. αἱ γὰρ ἀρχαῖαι θυσίαι καὶ σύνοδοι φαίνονται γίνεσθαι μετὰ τὰς τῶν καρπῶν συγκομιδὰς οἷον ἀπαρχαί· μάλιστα γὰρ ἐν τούτοις ἐσχόλαζον τοῖς καιροῖς. πᾶσαι δὲ φαίνονται αἱ κοινωνίαι μόρια τῆς πολιτικῆς εἶναι· ἀκολουθήσουσι δὲ αἱ τοιαῦται φιλίαι ταῖς [30] τοιαύταις κοινωνίαις.

πολιτείας δ' ἐστὶν εἶδη τρία, ἴσαι δὲ καὶ παρεκβάσεις, οἷον φθοραὶ τούτων. εἰσὶ δ' αἱ μὲν πολιτεῖαι βασιλεία τε καὶ ἀριστοκρατία, τρίτη δὲ ἀπὸ τιμημάτων, ἣν τιμοκρατικὴν λέγειν οἰκεῖον φαίνεται, πολιτείαν δ' αὐτὴν [35] εἰώθασιν οἱ πλεῖστοι καλεῖν. τούτων δὲ βελτίστη μὲν ἡ βασιλεία, χειρίστη δ' ἡ τιμοκρατία. παρέκβασις δὲ βασιλείας μὲν τυραννίς· 1160b [1] ἄμφω γὰρ μοναρχαί, διαφέρουσι δὲ πλεῖστον· ὁ μὲν γὰρ τύραννος τὸ αὐτῷ συμφέρον σκοπεῖ, ὁ δὲ βασιλεὺς τὸ τῶν ἀρχομένων. οὐ γάρ ἐστι βασιλεὺς ὁ μὴ αὐτάρκης καὶ πᾶσι τοῖς ἀγαθοῖς ὑπερέχων· ὁ δὲ [5] τοιοῦτος οὐδενὸς προσδεῖται· τὰ ὠφέλιμα οὖν αὐτῷ μὲν οὐκ ἂν σκοποῖη, τοῖς δ' ἀρχομένοις· ὁ γὰρ μὴ τοιοῦτος κληρωτὸς ἂν τις εἴη βασιλεὺς. ἡ δὲ τυραννίς ἐξ ἐναντίας ταύτης· τὸ γὰρ ἑαυτῷ ἀγαθὸν διώκει. καὶ φανερώτερον ἐπὶ ταύτης ὅτι χειρίστη· κάκιστον δὲ τὸ ἐναντίον τῷ βελτίστῳ. [10] μεταβαίνει δ' ἐκ βασιλείας εἰς τυραννίδα· φαυλότης γάρ ἐστι μοναρχίας ἢ τυραννίς, ὁ δὲ μοχθηρὸς βασιλεὺς τύραννος γίνεται. ἐξ ἀριστοκρατίας δὲ εἰς ὀλιγαρχίαν κακία τῶν ἀρχόντων, οἱ

νέμουσι τὰ τῆς πόλεως παρὰ τὴν ἀξίαν, καὶ πάντα ἢ τὰ πλείστα τῶν ἀγαθῶν ἑαυτοῖς, καὶ τὰς ἀρχὰς [15] ἀεὶ τοῖς αὐτοῖς, περὶ πλείστου ποιούμενοι τὸ πλουτεῖν· ὀλίγοι δὲ ἄρχουσι καὶ μοχθηροὶ ἀντὶ τῶν ἐπιεικεστάτων. ἐκ δὲ τιμοκρατίας εἰς δημοκρατίαν· σύνοροι γὰρ εἰσιν αὗται· πλήθους γὰρ βούλεται καὶ ἡ τιμοκρατία εἶναι, καὶ ἴσοι πάντες οἱ ἐν τῷ τιμήματι. ἥκιστα δὲ μοχθηρόν ἐστιν ἡ [20] δημοκρατία· ἐπὶ μικρὸν γὰρ παρεκβαίνει τὸ τῆς πολιτείας εἶδος. μεταβάλλουσι μὲν οὖν μάλισθ' οὕτως αἱ πολιτεῖαι· ἐλάχιστον γὰρ οὕτω καὶ ῥᾶστα μεταβαίνουνσιν. ὁμοιώματα δ' αὐτῶν καὶ οἷον παραδείγματα λάβοι τις ἂν καὶ ἐν ταῖς οἰκίαις. ἡ μὲν γὰρ πατὴρ πρὸς υἱεῖς κοινωνία βασιλείας [25] ἔχει σχῆμα· τῶν τέκνων γὰρ τῷ πατρὶ μέλει· ἐντεῦθεν δὲ καὶ Ὅμηρος τὸν Δία πατέρα προσαγορεύει· πατρικὴ γὰρ ἀρχὴ βούλεται ἡ βασιλεία εἶναι. ἐν Πέρσαις δ' ἡ τοῦ πατρὸς τυραννικὴ· χρῶνται γὰρ ὡς δούλοις τοῖς υἱέσιν. τυραννικὴ δὲ καὶ ἡ δεσπότης πρὸς δούλους· τὸ γὰρ [30] τοῦ δεσπότης συμφέρον ἐν αὐτῇ πράττεται. αὕτη μὲν οὖν ὀρθὴ φαίνεται, ἡ Περσικὴ δ' ἡμαρτημένη· τῶν διαφερόντων γὰρ αἱ ἀρχαὶ διάφοροι. ἀνδρὸς δὲ καὶ γυναικὸς ἀριστοκρατικὴ φαίνεται· κατ' ἀξίαν γὰρ ὁ ἀνὴρ ἄρχει, καὶ περὶ ταῦτα ἃ δεῖ τὸν ἄνδρα· ὅσα δὲ γυναικὶ ἀρμόζει, [35] ἐκείνη ἀποδίδωσιν. ἀπάντων δὲ κυριεύων ὁ ἀνὴρ εἰς ὀλιγαρχίαν μεθίστησιν· παρὰ τὴν ἀξίαν γὰρ αὐτὸ ποιεῖ, καὶ οὐχ ἢ ἀμείνων. 1161a [1] ἐνίστε δὲ ἄρχουσιν αἱ γυναῖκες ἐπὶ κληροῖ οὕσαι· οὐ δὴ γίνονται κατ' ἀρετὴν αἱ ἀρχαί, ἀλλὰ διὰ πλοῦτον καὶ δύναμιν, καθάπερ ἐν ταῖς ὀλιγαρχίαις. τιμοκρατικὴ δ' ἔοικεν ἡ τῶν ἀδελφῶν· ἴσοι γάρ, πλὴν ἐφ' ὅσον [5] ταῖς ἡλικίαις διαλλάττουσιν· διόπερ ἂν πολὺ ταῖς ἡλικίαις διαφέρωσιν, οὐκέτι ἀδελφικὴ γίνεται ἡ φιλία. δημοκρατία δὲ μάλιστα μὲν ἐν ταῖς ἀδελφότησι τῶν οἰκίσεων (ἐνταῦθα γὰρ πάντες ἐξ ἴσου), καὶ ἐν αἷσι ἀσθενὴς ὁ ἄρχων καὶ ἐκάστῳ ἐξουσία.

[10] καθ' ἐκάστην δὲ τῶν πολιτειῶν φιλία φαίνεται, ἐφ' ὅσον καὶ τὸ δίκαιον, βασιλεῖ μὲν πρὸς τοὺς βασιλευμένους ἐν ὑπεροχῇ εὐεργεσίας· εὖ γὰρ ποιεῖ τοὺς βασιλευμένους, εἴπερ ἀγαθὸς ὢν ἐπιμελεῖται αὐτῶν, ἢν' εὖ πράττωσιν, ὥσπερ νομεὺς προβάτων· ὅθεν καὶ Ὅμηρος τὸν Ἀγαμέμνονα [15] ποιμένα λαῶν εἶπεν. τοιαύτη δὲ καὶ ἡ πατρικὴ, διαφέρει δὲ τῷ μεγέθει τῶν εὐεργετημάτων· αἴτιος γὰρ τοῦ εἶναι, δοκοῦντος μεγίστου, καὶ τροφῆς καὶ παιδείας. καὶ τοῖς προγόνοις δὲ ταῦτα προσνέμεται· φύσει τε ἀρχικὸν πατὴρ υἱῶν καὶ

πρόγονοι ἐκγόνων καὶ βασιλεὺς βασιλευσμένων. [20] ἐν ὑπεροχῇ δὲ αἱ φιλίαι αὗται, διὸ καὶ τιμῶνται οἱ γονεῖς. καὶ τὸ δίκαιον δὴ ἐν τούτοις οὐ ταῦτό ἀλλὰ τὸ κατ' ἀξίαν· οὕτω γὰρ καὶ ἡ φιλία. καὶ ἀνδρὸς δὲ πρὸς γυναῖκα ἡ αὐτὴ φιλία καὶ ἐν ἀριστοκρατίᾳ· κατ' ἀρετὴν γάρ, καὶ τῷ ἀμείνوني πλέον ἀγαθόν, καὶ τὸ ἀρμόζον ἐκάστω· [25] οὕτω δὲ καὶ τὸ δίκαιον. ἡ δὲ τῶν ἀδελφῶν τῇ ἐταιρικῇ ἔοικεν· ἴσοι γὰρ καὶ ἡλικιωται, οἱ τοιοῦτοι δ' ὁμοπαθεῖς καὶ ὁμοήθεις ὥς ἐπὶ τὸ πολὺ. ἔοικε δὲ ταύτῃ καὶ ἡ κατὰ τὴν τιμοκρατικὴν· ἴσοι γὰρ οἱ πολῖται βούλονται καὶ ἐπιεικεῖς εἶναι· ἐν μέρει δὴ τὸ ἄρχειν, καὶ ἐξ ἴσου· οὕτω δὴ [30] καὶ ἡ φιλία. ἐν δὲ ταῖς παρεκβάσεσιν, ὥσπερ καὶ τὸ δίκαιον ἐπὶ μικρὸν ἐστίν, οὕτω καὶ ἡ φιλία, καὶ ἥκιστα ἐν τῇ χειρίστῃ· ἐν τυραννίδι γὰρ οὐδὲν ἢ μικρὸν φιλίας. ἐν οἷς γὰρ μηδὲν κοινόν ἐστι τῷ ἄρχοντι καὶ ἀρχομένῳ, οὐδὲ φιλία· οὐδὲ γὰρ δίκαιον· οἷον τεχνίτῃ πρὸς ὄργανον καὶ [35] ψυχῇ πρὸς σῶμα καὶ δεσπότη πρὸς δοῦλον· 1161b [1] ὠφελεῖται μὲν γὰρ πάντα ταῦτα ὑπὸ τῶν χρωμένων, φιλία δ' οὐκ ἔστι πρὸς τὰ ἄψυχα οὐδὲ δίκαιον. ἀλλ' οὐδὲ πρὸς ἵππον ἢ βοῦν, οὐδὲ πρὸς δοῦλον ἢ δοῦλος. οὐδὲν γὰρ κοινόν ἐστίν· ὁ γὰρ δοῦλος ἔμψυχον ὄργανον, τὸ δ' ὄργανον ἄψυχος δοῦλος. [5] ἢ μὲν οὖν δοῦλος, οὐκ ἔστι φιλία πρὸς αὐτόν, ἢ δ' ἄνθρωπος· δοκεῖ γὰρ εἶναι τι δίκαιον παντὶ ἀνθρώπῳ πρὸς πάντα τὸν δυνάμενον κοινωνῆσαι νόμου καὶ συνθήκης· καὶ φιλία δὴ, καθ' ὅσον ἄνθρωπος. ἐπὶ μικρὸν δὴ καὶ ἐν ταῖς τυραννίσιν αἱ φιλίαι καὶ τὸ δίκαιον, ἐν δὲ ταῖς δημοκρατίαις [10] ἐπὶ πλεῖον· πολλὰ γὰρ τὰ κοινὰ ἴσοις οὗσιν.

ἐν κοινωνίᾳ μὲν οὖν πᾶσα φιλία ἐστίν, καθάπερ εἴρηται. ἀφορίσειε δ' ἂν τις τὴν τε συγγενικὴν καὶ τὴν ἐταιρικὴν. αἱ δὲ πολιτικαὶ καὶ φυλετικαὶ καὶ συμπλοϊκαί, καὶ ὅσαι τοιαῦται, κοινωνικαῖς ἐοίκασι μᾶλλον· οἷον γὰρ [15] καθ' ὁμολογίαν τινὰ φαίνονται εἶναι. εἰς ταύτας δὲ τάξειεν ἂν τις καὶ τὴν ξενικὴν. καὶ ἡ συγγενικὴ δὲ φαίνεται πολυειδὴς εἶναι, ἡρτῆσθαι δὲ πᾶσα ἐκ τῆς πατρικῆς· οἱ γονεῖς μὲν γὰρ στέργουσι τὰ τέκνα ὥς ἑαυτῶν τι ὄντα, τὰ δὲ τέκνα τοὺς γονεῖς ὥς ἀπ' ἐκείνων τι ὄντα. [20] μᾶλλον δ' ἴσασιν οἱ γονεῖς τὰ ἐξ αὐτῶν ἢ τὰ γεννηθέντα ὅτι ἐκ τούτων, καὶ μᾶλλον συνωκείωται τὸ ἀφ' οὗ τῷ γεννηθέντι ἢ τὸ γενόμενον τῷ ποιήσαντι· τὸ γὰρ ἐξ αὐτοῦ οἰκεῖον τῷ ἀφ' οὗ, οἷον ὁδοὺς θριζὶ ὅτιοῦν τῷ ἔχοντι· ἐκείνῳ δ' οὐδὲν τὸ ἀφ' οὗ, ἢ ἥττον. καὶ τῷ πλήθει

δὲ τοῦ χρόνου· οἱ μὲν [25] γὰρ εὐθὺς γενόμενα στέργουσιν, τὰ δὲ προελθόντος χρόνου τοὺς γονεῖς, σύνεσιν ἢ αἰσθησιν λαβόντα. ἐκ τούτων δὲ δῆλον καὶ δι' ἃ φιλοῦσι μᾶλλον αἱ μητέρες. γονεῖς μὲν οὖν τέκνα φιλοῦσιν ὡς ἑαυτοὺς (τὰ γὰρ ἐξ αὐτῶν οἶον ἕτεροι αὐτοῖς τῷ κεχωρίσθαι), τέκνα δὲ γονεῖς ὡς ἀπ' ἐκείνων πεφυκότα, [30] ἀδελφοὶ δ' ἀλλήλους τῷ ἐκ τῶν αὐτῶν πεφυκέναι· ἢ γὰρ πρὸς ἐκεῖνα ταυτότης ἀλλήλοις ταὐτὸ ποιεῖ· ὅθεν φασὶ ταὐτὸν αἷμα καὶ ρίζαν καὶ τὰ τοιαῦτα. εἰσὶ δὲ ταὐτό πως καὶ ἐν διηρημένοις. μέγα δὲ πρὸς φιλίαν καὶ τὸ σύντροφον καὶ τὸ καθ' ἡλικίαν· ἥλιξ γὰρ ἥλικα, [35] καὶ οἱ συνήθεις ἐταῖροι· διὸ καὶ ἡ ἀδελφικὴ τῇ ἐταιρικῇ ὁμοιοῦται. 1162a [1] ἀνεψιοὶ δὲ καὶ οἱ λοιποὶ συγγενεῖς ἐκ τούτων συνφκείωνται· τῷ γὰρ ἀπὸ τῶν αὐτῶν εἶναι. γίνονται δ' οἱ μὲν οἰκειότεροι οἱ δ' ἀλλοτριώτεροι τῷ σύνεγγυς ἢ πόρρω τὸν ἀρχηγὸν εἶναι. ἔστι δ' ἢ μὲν πρὸς γονεῖς φιλία τέκνοις, [5] καὶ ἀνθρώποις πρὸς θεοῦς, ὡς πρὸς ἀγαθὸν καὶ ὑπερέχον· εὖ γὰρ πεποιήκασιν τὰ μέγιστα· τοῦ γὰρ εἶναι καὶ τραφῆναι αἴτιοι, καὶ γενομένοις τοῦ παιδευθῆναι· ἔχει δὲ καὶ τὸ ἡδὺ καὶ τὸ χρήσιμον ἢ τοιαύτη φιλία μᾶλλον τῶν ὀθνείων, ὅσῳ καὶ κοινότερος ὁ βίος αὐτοῖς ἐστίν. ἔστι δὲ καὶ ἐν τῇ [10] ἀδελφικῇ ἅπερ καὶ ἐν τῇ ἐταιρικῇ καὶ μᾶλλον ἐν τοῖς ἐπιεικέσι, καὶ ὅλως ἐν τοῖς ὁμοίοις, ὅσῳ οἰκειότεροι καὶ ἐκ γενετῆς ὑπάρχουσι στέργοντες ἀλλήλους, καὶ ὅσῳ ὁμοθεέστεροι οἱ ἐκ τῶν αὐτῶν καὶ σύντροφοι καὶ παιδευθέντες ὁμοίως· καὶ ἢ κατὰ τὸν χρόνον δοκιμασία πλείστη καὶ [15] βεβαιωτάτη. ἀνάλογον δὲ καὶ ἐν τοῖς λοιποῖς τῶν συγγενῶν τὰ φιλικά. ἀνδρὶ δὲ καὶ γυναικὶ φιλία δοκεῖ κατὰ φύσιν ὑπάρχειν· ἄνθρωπος γὰρ τῇ φύσει συνδυαστικὸν μᾶλλον ἢ πολιτικόν, ὅσῳ πρότερον καὶ ἀναγκαιότερον οἰκία πόλεως, καὶ τεκνοποιία κοινότερον τοῖς ζώοις. τοῖς μὲν οὖν [20] ἄλλοις ἐπὶ τοσοῦτον ἢ κοινωνία ἐστίν, οἱ δ' ἄνθρωποι οὐ μόνον τῆς τεκνοποιίας χάριν συνοικοῦσιν, ἀλλὰ καὶ τῶν εἰς τὸν βίον· εὐθὺς γὰρ διήρηται τὰ ἔργα, καὶ ἔστιν ἕτερα ἀνδρὸς καὶ γυναικός· ἐπαρκοῦσιν οὖν ἀλλήλοις, εἰς τὸ κοινὸν τιθέντες τὰ ἴδια. διὰ ταῦτα δὲ καὶ τὸ χρήσιμον εἶναι δοκεῖ [25] καὶ τὸ ἡδὺ ἐν ταύτῃ τῇ φιλίᾳ. εἴη δ' ἂν καὶ δι' ἀρετὴν, εἰ ἐπιεικεῖς εἶεν· ἔστι γὰρ ἑκατέρου ἀρετὴ, καὶ χαίρουεν ἂν τῷ τοιούτῳ. σύνδεσμος δὲ τὰ τέκνα δοκεῖ εἶναι· διὸ θάπτον οἱ ἄτεκνοι διαλύονται· τὰ γὰρ τέκνα κοινὸν ἀγαθὸν ἀμφοῖν, συνέχει δὲ τὸ κοινόν. τὸ δὲ πῶς βιωτέον ἀνδρὶ [30] πρὸς γυναῖκα καὶ ὅλως φίλῳ πρὸς φίλον, οὐδὲν ἕτερον φαίνεται ζητεῖσθαι ἢ πῶς δίκαιον· οὐ γὰρ

ταὐτὸν φαίνεται τῷ φίλῳ πρὸς τὸν φίλον καὶ τὸν ὀθνεῖον καὶ τὸν ἐταῖρον καὶ τὸν συμφοιτητήν.

τριπτῶν δ' οὐσῶν φιλιῶν, καθάπερ ἐν ἀρχῇ εἴρηται, [35] καὶ καθ' ἐκάστην τῶν μὲν ἐν ἰσότητι φίλων ὄντων τῶν δὲ καθ' ὑπεροχὴν (καὶ γὰρ ὁμοίως ἀγαθοὶ φίλοι γίνονται καὶ ἀμείνων χεῖρονι, 1162b [1] ὁμοίως δὲ καὶ ἡδεῖς καὶ διὰ τὸ χρήσιμον, ἰσάζοντες ταῖς ὠφελείαις καὶ διαφέροντες), τοὺς ἴσους μὲν κατ' ἰσότητά δεῖ τῷ φιλεῖν καὶ τοῖς λοιποῖς ἰσάζειν, τοὺς δ' ἀνίσους τὸ ἀνάλογον ταῖς ὑπεροχαῖς ἀποδιδόναι. [5] γίνεται δὲ τὰ ἐγκλήματα καὶ αἱ μέμψεις ἐν τῇ κατὰ τὸ χρήσιμον φιλίᾳ ἢ μόνῃ ἢ μάλιστα, εὐλόγως. οἱ μὲν γὰρ δι' ἀρετὴν φίλοι ὄντες εὖ δρᾶν ἀλλήλους προθυμοῦνται (τοῦτο γὰρ ἀρετῆς καὶ φιλίας), πρὸς τοῦτο δ' ἀμιλλωμένων οὐκ ἔστιν ἐγκλήματα οὐδὲ μάχαι· τὸν γὰρ φιλοῦντα καὶ [10] εὖ ποιοῦντα οὐδεὶς δυσχεραίνει, ἀλλ' ἂν ἢ χαρίεις, ἀμύνεται εὖ δρῶν. ὁ δ' ὑπερβάλλον, τυγχάνων οὗ ἐφίεται, οὐκ ἂν ἐγκαλοίη τῷ φίλῳ· ἕκαστος γὰρ τοῦ ἀγαθοῦ ὀρέγεται. οὐ πάνυ δ' οὐδ' ἐν τοῖς δι' ἡδονήν· ἅμα γὰρ ἀμφοῖν γίνεται οὗ ὀρέγονται, εἰ τῷ συνδιαγείν χαίρουσιν· γελοῖος [15] δ' ἂν φαίνοιτο καὶ ὁ ἐγκαλῶν τῷ μὴ τέρποντι, ἐξὸν μὴ συνημερεῦειν. ἡ δὲ διὰ τὸ χρήσιμον ἐγκληματική· ἐπ' ὠφελείᾳ γὰρ χρώμενοι ἀλλήλοις ἀεὶ τοῦ πλείονος δέονται, καὶ ἔλαττον ἔχειν οἶονται τοῦ προσήκοντος, καὶ μέμφονται ὅτι οὐχ ὅσων δέονται τοσούτων τυγχάνουσιν ἄξιοι ὄντες. [20] οἱ δ' εὖ ποιοῦντες οὐ δύνανται ἐπαρκεῖν τοσαῦτα ὅσων οἱ πάσχοντες δέονται. ἔοικε δέ, καθάπερ τὸ δίκαιόν ἐστι διττόν, τὸ μὲν ἄγραφον τὸ δὲ κατὰ νόμον, καὶ τῆς κατὰ τὸ χρήσιμον φιλίας ἢ μὲν ἠθικὴ ἢ δὲ νομικὴ εἶναι. γίνεται οὖν τὰ ἐγκλήματα μάλισθ' ὅταν μὴ κατὰ τὴν αὐτὴν συναλλάξωσι [25] καὶ διαλύωνται. ἔστι δ' ἡ νομικὴ μὲν ἢ ἐπὶ ῥητοῖς, ἢ μὲν πάνπαν ἀγοραία ἐκ χειρὸς εἰς χεῖρα, ἢ δὲ ἐλευθεριωτέρα εἰς χρόνον, καθ' ὁμολογίαν δὲ τί ἀντὶ τίνας. δηλὸν δ' ἐν ταύτῃ τὸ ὀφείλημα κοῦκ ἀμφίλογον, φιλικὸν δὲ τὴν ἀναβολὴν ἔχει· διόπερ ἐνίοις οὐκ εἰσὶ τούτων [30] δίκαι, ἀλλ' οἶονται δεῖν στέργειν τοὺς κατὰ πίστιν συναλλάξαντας. ἡ δ' ἠθικὴ οὐκ ἐπὶ ῥητοῖς, ἀλλ' ὥς φίλῳ δωρεῖται ἢ ὅτιδῆποτε ἄλλο· κομίζεσθαι δὲ ἀξιοῖ τὸ ἴσον ἢ πλεόν, ὥς οὐ δεδωκὼς ἀλλὰ χρήσας· οὐχ ὁμοίως δὲ συναλλάξας καὶ διαλυόμενος ἐγκαλέσει. τοῦτο δὲ συμβαίνει [35] διὰ τὸ βούλεσθαι μὲν πάντας ἢ τοὺς πλείστους τὰ καλὰ, προαιρεῖσθαι δὲ τὰ ὠφέλιμα· καλὸν δὲ τὸ εὖ ποιεῖν μὴ ἵνα

ἐν πάσαις δὲ ταῖς ἀνομοιοειδέσι φιλίαις τὸ ἀνάλογον ἰσάζει καὶ σφάζει τὴν φιλίαν, καθάπερ εἴρηται, οἷον καὶ ἐν τῇ πολιτικῇ τῷ σκυτοτόμῳ ἀντὶ τῶν ὑποδημάτων ἀμοιβή [35] γίνεται κατ' ἀξίαν, καὶ τῷ ὑφάντῃ καὶ τοῖς λοιποῖς. 1164a [1] ἐνταῦθα μὲν οὖν πεπόρισται κοινὸν μέτρον τὸ νόμισμα, καὶ πρὸς τοῦτο δὴ πάντα ἀναφέρεται καὶ τούτῳ μετρεῖται· ἐν δὲ τῇ ἐρωτικῇ ἐνίοτε μὲν ὁ ἐραστὴς ἐγκαλεῖ ὅτι ὑπερφιλῶν οὐκ ἀντιφιλεῖται, οὐδὲν ἔχων φιλητόν, εἰ οὕτως ἔτυχεν, [5] πολλάκις δ' ὁ ἐρώμενος ὅτι πρότερον ἐπαγγελλόμενος πάντα νῦν οὐδὲν ἐπιτελεῖ. συμβαίνει δὲ τὰ τοιαῦτα, ἐπειδὴν ὁ μὲν δι' ἡδονὴν τὸν ἐρώμενον φιλεῖ, ὁ δὲ διὰ τὸ χρήσιμον τὸν ἐραστήν, ταῦτα δὲ μὴ ἀμφοῖν ὑπάρχει. διὰ ταῦτα γὰρ τῆς φιλίας οὔσης διάλυσις γίνεται, ἐπειδὴν [10] μὴ γίνηται ὧν ἕνεκα ἐφίλουν· οὐ γὰρ αὐτοὺς ἔστεργον ἀλλὰ τὰ ὑπάρχοντα, οὐ μόνιμα ὄντα· διὸ τοιαῦτα καὶ αἱ φιλῖαι. ἡ δὲ τῶν ἡθῶν καθ' αὐτὴν οὕσα μένει, καθάπερ εἴρηται. διαφέρονται δ' ὅταν ἕτερα γίνηται αὐτοῖς καὶ μὴ ὧν ὀρέγονται· ὅμοιον γὰρ τῷ μηδὲν γίνεσθαι, ὅταν [15] οὗ ἐφίεται μὴ τυγχάνῃ, οἷον καὶ τῷ κιθαρωδῷ ὁ ἐπαγγελλόμενος, καὶ ὅσῳ ἄμεινον ἄσειεν, τοσοῦτ' ἄλλῳ· εἰς ἕω δ' ἀπαιτοῦνται τὰς ὑποσχέσεις ἀνθ' ἡδονῆς ἡδονὴν ἀποδεδωκέναι ἔφη. εἰ μὲν οὖν ἐκάτερος τοῦτο ἐβούλετο, ἱκανῶς ἂν εἶχεν· εἰ δ' ὁ μὲν τέρψιν ὁ δὲ κέρδος, καὶ ὁ μὲν ἔχει [20] ὁ δὲ μή, οὐκ ἂν εἴη τὰ κατὰ τὴν κοινωνίαν καλῶς· ὧν γὰρ δεόμενος τυγχάνει, τούτοις καὶ προσέχει, κακείνου γε χάριν ταῦτα δώσει. τὴν ἀξίαν δὲ ποτέρου τάξαι ἐστί, τοῦ προῖεμένου ἢ τοῦ προλαβόντος; ὁ γὰρ προῖεμένος ἔοικ' ἐπιτρέπῃ ἐκείνῳ. ὅπερ φασὶ καὶ Πρωταγόραν ποιεῖν· [25] ὅτε γὰρ διδάξειεν ἀδήποτε, τιμῆσαι τὸν μαθόντα ἐκέλευεν ὅσου δοκεῖ ἄξια ἐπίστασθαι, καὶ ἐλάμβανε τοσοῦτον. ἐν τοῖς τοιούτοις δ' ἐνίοις ἀρέσκει τὸ “μισθὸς δ' ἀνδρί.” οἱ δὲ προλαμβάνοντες τὸ ἀργύριον, εἴτα μηδὲν ποιοῦντες ὧν ἔφασαν διὰ τὰς ὑπερβολὰς τῶν ἐπαγγελιῶν, εἰκότως ἐν ἐγκλήμασι [30] γίνονται· οὐ γὰρ ἐπιτελοῦσιν ἃ ὁμολόγησαν. τοῦτο δ' ἴσως ποιεῖν οἱ σοφισταὶ ἀναγκάζονται διὰ τὸ μηδένα ἂν δοῦναι ἀργύριον ὧν ἐπίστανται. οὗτοι μὲν οὖν ὧν ἔλαβον τὸν μισθόν, μὴ ποιοῦντες εἰκότως ἐν ἐγκλήμασιν εἰσιν. ἐν οἷς δὲ μὴ γίνεται διομολογία τῆς ὑπουργίας, οἱ μὲν δι' αὐτοὺς [35] προῖεμενοι εἴρηται ὅτι ἀνέγκλητοι (τοιαύτη γὰρ ἡ κατ' ἀρετὴν φιλία), 1164b [1]

καὶ βούλεται [15] δὴ ἑαυτῷ τὰγαθὰ καὶ τὰ φαινόμενα καὶ πράττει (τοῦ γὰρ ἀγαθοῦ τὰγαθὸν διαπονεῖν) καὶ ἑαυτοῦ ἔνεκα (τοῦ γὰρ διανοητικοῦ χάριν, ὅπερ ἕκαστος εἶναι δοκεῖ)· καὶ ζῆν δὲ βούλεται ἑαυτὸν καὶ σώζεσθαι, καὶ μάλιστα τοῦτο ᾧ φρονεῖ. ἀγαθὸν γὰρ τῷ σπουδαίῳ τὸ εἶναι, ἕκαστος δ' [20] ἑαυτῷ βούλεται τὰγαθὰ, γενόμενος δ' ἄλλος αἰρεῖται οὐδεὶς πάντ' ἔχειν [ἐκεῖνο τὸ γενόμενον] (ἔχει γὰρ καὶ νῦν ὁ θεὸς τὰγαθόν) ἀλλ' ὧν ὅ τι ποτ' ἐστίν· δόξειε δ' ἂν τὸ νοοῦν ἕκαστος εἶναι ἢ μάλιστα. συνδιάγειν τε ὁ τοιοῦτος ἑαυτῷ βούλεται· ἡδέως γὰρ αὐτὸ ποιεῖ· τῶν τε γὰρ πεπραγμένων [25] ἐπιτερπεῖς αἱ μνήμαι, καὶ τῶν μελλόντων ἐλπίδες ἀγαθαί, αἱ τοιαῦται δ' ἡδέϊαι. καὶ θεωρημάτων δ' εὐπορεῖ τῇ διανοίᾳ. συναλγεῖ τε καὶ συνῆδεται μάλισθ' ἑαυτῷ· πάντοτε γὰρ ἐστὶ τὸ αὐτὸ λυπηρόν τε καὶ ἡδύ, καὶ οὐκ ἄλλοτ' ἄλλο· ἀμεταμέλητος γὰρ ὡς εἰπεῖν. τῷ δὴ πρὸς [30] αὐτὸν ἕκαστα τούτων ὑπάρχειν τῷ ἐπιεικεῖ, πρὸς δὲ τὸν φίλον ἔχειν ὥσπερ πρὸς αὐτόν (ἐστὶ γὰρ ὁ φίλος ἄλλος αὐτός), καὶ ἡ φιλία τούτων εἶναι τι δοκεῖ, καὶ φίλοι οἷς ταῦθ' ὑπάρχει. πρὸς αὐτὸν δὲ πότερον ἔστιν ἢ οὐκ ἔστι φιλία, ἀφείσθω ἐπὶ τοῦ παρόντος· δόξειε δ' ἂν [35] ταύτῃ εἶναι φιλία, ἥ ἐστὶ δύο ἢ πλείω, ἐκ τῶν εἰρημένων, 1166b [1] καὶ ὅτι ἡ ὑπερβολὴ τῆς φιλίας τῇ πρὸς αὐτὸν ὁμοιοῦται. φαίνεται δὲ τὰ εἰρημένα καὶ τοῖς πολλοῖς ὑπάρχειν, καίπερ οὔσι φαύλοις. ἄρ' οὖν ἦ τ' ἀρέσκουσιν ἑαυτοῖς καὶ ὑπολαμβάνουσιν ἐπιεικεῖς εἶναι, ταύτῃ μετέχουσιν αὐτῶν; [5] ἐπεὶ τῶν γε κομιδῇ φαύλων καὶ ἀνοσιουργῶν οὐδενὶ ταῦθ' ὑπάρχει, ἀλλ' οὐδὲ φαίνεται. σχεδὸν δὲ οὐδὲ τοῖς φαύλοις· διαφέρονται γὰρ ἑαυτοῖς, καὶ ἐτέρων μὲν ἐπιθυμοῦσιν ἄλλα δὲ βούλονται, οἷον οἱ ἀκρατεῖς· αἰροῦνται γὰρ ἀντὶ τῶν δοκούντων ἑαυτοῖς ἀγαθῶν εἶναι τὰ ἡδέα βλαβερά [10] ὄντα· οἱ δ' αὖ διὰ δειλίαν καὶ ἀργίαν ἀφίστανται τοῦ πράττειν ἃ οἰόνται ἑαυτοῖς βέλτιστα εἶναι. οἷς δὲ πολλὰ καὶ δεινὰ πέπρακται καὶ διὰ τὴν μοχθηρίαν μισοῦνται, καὶ φεύγουσι τὸ ζῆν καὶ ἀναιροῦσιν ἑαυτούς. ζητοῦσί τε οἱ μοχθηροὶ μεθ' ὧν συνημερεύουσιν, ἑαυτούς δὲ φεύγουσιν· [15] ἀναμνησκονται γὰρ πολλῶν καὶ δυσχερῶν, καὶ τοιαῦθ' ἕτερα ἐλπίζουσι, καθ' ἑαυτούς ὄντες, μεθ' ἐτέρων δ' ὄντες ἐπιλανθάνονται. οὐδέν τε φιλητὸν ἔχοντες οὐδὲν φιλικὸν πάσχουσι πρὸς ἑαυτούς. οὐδὲ δὴ συγχαίρουσιν οὐδὲ συναλγοῦσιν οἱ τοιοῦτοι ἑαυτοῖς· στασιάζει γὰρ αὐτῶν ἡ ψυχὴ, [20] καὶ τὸ μὲν διὰ μοχθηρίαν ἀλγεῖ ἀπεχόμενόν τινων, τὸ δ' ἡδεται, καὶ τὸ μὲν δεῦρο τὸ δ' ἐκεῖσε ἔλκει ὥσπερ διασπῶντα. εἰ δὲ μὴ οἷόν τε ἅμα λυπεῖσθαι καὶ ἡδесθαι,

ἀλλὰ μετὰ μικρόν γε λυπεῖται ὅτι ἦσθη, καὶ οὐκ ἂν ἐβούλετο ἡδέα ταῦτα γενέσθαι αὐτῷ· μεταμελείας γὰρ [25] οἱ φαῦλοι γέμουσιν. οὐ δὴ φαίνεται ὁ φαῦλος οὐδὲ πρὸς ἑαυτὸν φιλικῶς διακεῖσθαι διὰ τὸ μηδὲν ἔχειν φιλητόν. εἰ δὴ τὸ οὕτως ἔχειν λίαν ἐστὶν ἄθλιον, φευκτέον τὴν μοχθηρίαν διατεταμένως καὶ πειρατέον ἐπιεικῇ εἶναι· οὕτω γὰρ καὶ πρὸς ἑαυτὸν φιλικῶς ἂν ἔχοι καὶ ἐτέρῳ φίλος γένοιτο.

[30] ἡ δ' εὖνοια φιλικῶ μὲν ἔοικεν, οὐ μὴν ἔστι γε φιλία· γίνεται γὰρ εὖνοια καὶ πρὸς ἀγνώτας καὶ λανθάνουσα, φιλία δ' οὐ. καὶ πρότερον δὲ ταῦτ' εἴρηται. ἀλλ' οὐδὲ φίλησις ἐστίν. οὐ γὰρ ἔχει διάτασιν οὐδ' ὄρεξιν, τῇ φιλήσει δὲ ταῦτ' ἀκολουθεῖ· καὶ ἡ μὲν φίλησις μετὰ συνηθείας, ἡ [35] δ' εὖνοια καὶ ἐκ προσπαίου, οἷον καὶ περὶ τοὺς ἀγωνιστὰς συμβαίνει· 1167a [1] εὖνοι γὰρ αὐτοῖς γίνονται καὶ συνθέλουσιν, συμπράττειν δ' ἂν οὐδέν· ὅπερ γὰρ εἵπομεν, προσπαίως εὖνοι γίνονται καὶ ἐπιπολαίως στέργουσιν. ἔοικε δὴ ἀρχὴ φιλίας εἶναι, ὥσπερ τοῦ ἐρᾶν ἡ διὰ τῆς ὀψεως ἡδονή· μὴ γὰρ [5] προησθεις τῇ ιδέᾳ οὐδεὶς ἐρᾷ, ὁ δὲ χαίρων τῷ εἶδει οὐδὲν μᾶλλον ἐρᾷ, ἀλλ' ὅταν καὶ ἀπόντα ποθῇ καὶ τῆς παρουσίας ἐπιθυμῇ· οὕτω δὴ καὶ φίλους οὐχ οἷόν τ' εἶναι μὴ εὖνους γενομένους, οἱ δ' εὖνοι οὐδὲν μᾶλλον φιλοῦσιν· βούλονται γὰρ μόνον τάγαθὰ οἷς εἰσὶν εὖνοι, συμπράττειν δ' [10] ἂν οὐδέν, οὐδ' ὀχληθεῖεν ὑπὲρ αὐτῶν. διὸ μεταφέρων φαίη τις ἂν αὐτὴν ἀργὴν εἶναι φιλίαν, χρονιζομένην δὲ καὶ εἰς συνήθειαν ἀφικνουμένην γίνεσθαι φιλίαν, οὐ τὴν διὰ τὸ χρήσιμον οὐδὲ τὴν διὰ τὸ ἡδύ· οὐδὲ γὰρ εὖνοια ἐπὶ τούτοις γίνεται. ὁ μὲν γὰρ εὐεργετηθεὶς ἀνθ' ὧν πέπονθεν [15] ἀπονέμει τὴν εὖνοιαν, τὰ δίκαια δρῶν· ὁ δὲ βουλόμενός τιν' εὐπραγεῖν, ἐλπίδα ἔχων εὐπορίας δι' ἐκείνου, οὐκ ἔοικ' εὖνους ἐκείνῳ εἶναι, ἀλλὰ μᾶλλον ἑαυτῷ, καθάπερ οὐδὲ φίλος, εἰ θεραπεύει αὐτὸν διὰ τινα χρήσιν. ὅλως δ' εὖνοια δι' ἀρετὴν καὶ ἐπιείκειάν τινα γίνεται, ὅταν τῷ φανῇ [20] καλὸς τις ἢ ἀνδρεῖος ἢ τι τοιοῦτον, καθάπερ καὶ ἐπὶ τῶν ἀγωνιστῶν εἵπομεν.

φιλικὸν δὲ καὶ ἡ ὁμόνοια φαίνεται. διόπερ οὐκ ἔστιν ὁμοδοξία· τοῦτο μὲν γὰρ καὶ ἀγνοοῦσιν ἀλλήλους ὑπάρξειεν ἂν· οὐδὲ τοὺς περὶ ὁτουοῦν ὁμογνωμονοῦντας ὁμονοεῖν φασίν, [25] οἷον τοὺς περὶ τῶν οὐρανίων (οὐ γὰρ φιλικὸν τὸ περὶ τούτων ὁμονοεῖν), ἀλλὰ τὰς πόλεις ὁμονοεῖν φασίν, ὅταν περὶ τῶν συμφερόντων ὁμογνωμονῶσι καὶ

ταῦτα προαιρῶνται καὶ πράττωσι τὰ κοινῇ δόξαντα. περὶ τὰ πρακτὰ δὴ ὁμονοοῦσιν, καὶ τούτων περὶ τὰ ἐν μεγέθει καὶ ἐνδεχόμενα [30] ἀμφοῖν ὑπάρχειν ἢ πᾶσιν, οἷον αἱ πόλεις, ὅταν πᾶσι δοκῇ τὰς ἀρχὰς αἰρετάς εἶναι, ἢ συμμαχεῖν Λακεδαιμονίοις, ἢ ἄρχειν Πιττακὸν ὅτε καὶ αὐτὸς ἤθελεν. ὅταν δ' ἐκάτερος ἑαυτὸν βούληται, ὥσπερ οἱ ἐν ταῖς Φοινίσσαις, στασιάζουσιν· οὐ γὰρ ἐστὶν ὁμονοεῖν τὸ αὐτὸ ἐκάτερον ἐννοεῖν [35] ὁδήποτε, ἀλλὰ τὸ ἐν τῷ αὐτῷ, οἷον ὅταν καὶ ὁ δῆμος 1167b [1] καὶ οἱ ἐπικεῖς τοὺς ἀρίστους ἄρχειν· οὕτω γὰρ πᾶσι γίνεται οὗ ἐφίενται. πολιτικὴ δὴ φιλία φαίνεται ἢ ὁμόνοια, καθάπερ καὶ λέγεται· περὶ τὰ συμφέροντα γὰρ ἐστὶ καὶ τὰ εἰς τὸν βίον ἤκοντα. ἔστι δ' ἡ τοιαύτη ὁμόνοια [5] ἐν τοῖς ἐπικεῖσιν· οὗτοι γὰρ καὶ ἑαυτοῖς ὁμονοοῦσι καὶ ἀλλήλοις, ἐπὶ τῶν αὐτῶν ὄντες ὡς εἰπεῖν τῶν τοιούτων γὰρ μένει τὰ βουλήματα καὶ οὐ μεταρρεῖ ὥσπερ εὐριπὸς, βούλονται τε τὰ δίκαια καὶ τὰ συμφέροντα, τούτων δὲ καὶ κοινῇ ἐφίενται. τοὺς δὲ φαύλους οὐχ οἷόν τε ὁμονοεῖν [10] πλὴν ἐπὶ μικρόν, καθάπερ καὶ φίλους εἶναι, πλεονεξίας ἐφιεμένους ἐν τοῖς ὠφελίμοις, ἐν δὲ τοῖς πόνοις καὶ ταῖς λειτουργίαις ἐλλείποντας· ἑαυτῷ δ' ἕκαστος βουλούμενος ταῦτα τὸν πέλας ἐξετάζει καὶ κωλύει· μὴ γὰρ τηρούντων τὸ κοινὸν ἀπόλλυται. συμβαίνει οὖν αὐτοῖς στασιάζειν, ἀλλήλους [15] μὲν ἐπαναγκάζοντας, αὐτοὺς δὲ μὴ βουλομένους τὰ δίκαια ποιεῖν.

οἱ δ' εὐεργέται τοὺς εὐεργετηθέντας δοκοῦσι μᾶλλον φιλεῖν ἢ οἱ εὖ παθόντες τοὺς δράσαντας, καὶ ὡς παρὰ λόγον γινόμενον ἐπιζητεῖται. τοῖς μὲν οὖν πλείστοις φαίνεται [20] ὅτι οἱ μὲν ὀφείλουσι τοῖς δὲ ὀφείλεται· καθάπερ οὖν ἐπὶ τῶν δανείων οἱ μὲν ὀφείλοντες βούλονται μὴ εἶναι οἷς ὀφείλουσιν, οἱ δὲ δανείσαντες καὶ ἐπιμελοῦνται τῆς τῶν ὀφειλόντων σωτηρίας, οὕτω καὶ τοὺς εὐεργετήσαντας βούλεσθαι εἶναι τοὺς παθόντας ὡς κομιουμένους τὰς χάριτας, [25] τοῖς δ' οὐκ εἶναι ἐπιμελὲς τὸ ἀνταποδοῦναι. Ἐπίχαρμος μὲν οὖν τάχ' ἂν φαίη ταῦτα λέγειν αὐτοὺς ἐκ πονηροῦ θεωμένους, ἔοικε δ' ἀνθρωπικῷ· ἀμνήμονες γὰρ οἱ πολλοί, καὶ μᾶλλον εὖ πάσχειν ἢ ποιεῖν ἐφίενται. δόξειε δ' ἂν φυσικώτερον εἶναι τὸ αἴτιον, καὶ οὐδ' ὅμοιον τὸ περὶ τοὺς [30] δανείσαντας· οὐ γὰρ ἐστὶ φίλησις περὶ ἐκείνους, ἀλλὰ τοῦ σφώζεσθαι βούλησις τῆς κομιδῆς ἕνεκα· οἱ δ' εὖ πεποιηκότες φιλοῦσι καὶ ἀγαπῶσι τοὺς πεπονθότας καὶ μὴδὲν ὧσι χρήσιμοι μὴδ' εἰς ὕστερον γένοιντ' ἄν. ὅπερ καὶ ἐπὶ

τῶν τεχνιτῶν συμβέβηκεν· πᾶς γὰρ τὸ οἰκεῖον ἔργον ἀγαπᾷ [35] μᾶλλον ἢ ἀγαπηθεῖν ἂν ὑπὸ τοῦ ἔργου ἐμψύχου γενομένου· 1168a [1] μάλιστα δ' ἴσως τοῦτο περὶ τοὺς ποιητὰς συμβαίνει· ὑπεραγαπῶσι γὰρ οὗτοι τὰ οἰκεῖα ποιήματα, στέργοντες ὥσπερ τέκνα. τοιοῦτῳ δὴ ἔοικε καὶ τὸ τῶν εὐεργετῶν· τὸ γὰρ εὖ πεπονθὸς ἔργον ἐστὶν αὐτῶν· τοῦτο δὴ ἀγαπῶσι μᾶλλον ἢ [5] τὸ ἔργον τὸν ποιήσαντα. τούτου δ' αἴτιον ὅτι τὸ εἶναι πᾶσιν αἰρετὸν καὶ φιλητόν, ἐσμὲν δ' ἐνεργεῖα (τῷ ζῆν γὰρ καὶ πράττειν), ἐνεργεῖα δὲ ὁ ποιήσας τὸ ἔργον ἔστι πως· στέργει δὴ τὸ ἔργον, διότι καὶ τὸ εἶναι. τοῦτο δὲ φυσικόν· ὁ γὰρ ἐστὶ δυνάμει, τοῦτο ἐνεργεῖα τὸ ἔργον μνηύει. ἅμα δὲ καὶ [10] τῷ μὲν εὐεργέτῃ καλὸν τὸ κατὰ τὴν πράξιν, ὥστε χαίρειν ἐν ᾧ τοῦτο, τῷ δὲ παθόντι οὐδὲν καλὸν ἐν τῷ δράσαντι, ἀλλ' εἴπερ, συμφέρον· τοῦτο δ' ἦττον ἢ δὴ καὶ φιλητόν. ἡδεῖα δ' ἐστὶ τοῦ μὲν παρόντος ἢ ἐνέργεια, τοῦ δὲ μέλλοντος ἢ ἐλπίς, τοῦ δὲ γεγεννημένου ἢ μνήμη· ἡδιστον δὲ τὸ κατὰ [15] τὴν ἐνέργειαν, καὶ φιλητὸν ὁμοίως. τῷ μὲν οὖν πεποιηκότι μένει τὸ ἔργον (τὸ καλὸν γὰρ πολυχρόνιον), τῷ δὲ παθόντι τὸ χρήσιμον παροίχεται. ἢ τε μνήμη τῶν μὲν καλῶν ἡδεῖα, τῶν δὲ χρησίμων οὐ πάνυ ἢ ἦττον· ἢ προσδοκία δ' ἀνάπαλιν ἔχειν ἔοικεν. καὶ ἡ μὲν φίλησις ποιήσει ἔοικεν, [20] τὸ φιλεῖσθαι δὲ τῷ πάσχειν· τοῖς ὑπερέχουσι δὲ περὶ τὴν πράξιν ἔπεται τὸ φιλεῖν καὶ τὰ φιλικά. ἔτι δὲ τὰ ἐπιπόνως γεγόμενα πάντες μᾶλλον στέργουσιν, οἶον καὶ τὰ χρήματα οἱ κτησάμενοι τῶν παραλαβόντων· δοκεῖ δὲ τὸ μὲν εὖ πάσχειν ἄπονον εἶναι, τὸ δ' εὖ ποιεῖν ἐργῶδες. διὰ ταῦτα [25] δὲ καὶ αἱ μητέρες φιλοτεκνότεραι· ἐπιπονωτέρα γὰρ ἢ γέννησις, καὶ μᾶλλον ἴσασιν ὅτι αὐτῶν. δόξειε δ' ἂν τοῦτο καὶ τοῖς εὐεργέταις οἰκεῖον εἶναι.

ἀπορεῖται δὲ καὶ πότερον δεῖ φιλεῖν ἑαυτὸν μάλιστα ἢ ἄλλον τινά. ἐπιτιμῶσι γὰρ τοῖς ἑαυτοὺς μάλιστ' ἀγαπῶσι, [30] καὶ ὥς ἐν αἰσχυρῷ φιλαύτους ἀποκαλοῦσι, δοκεῖ τε ὁ μὲν φαῦλος ἑαυτοῦ χάριν πάντα πράττειν, καὶ ὅσῳ ἂν μοχθηρότερος ᾖ, τοσοῦτῳ μᾶλλον — ἐγκαλοῦσι δὴ αὐτῷ οἶον ὅτι οὐδὲν ἄφ' ἑαυτοῦ πράττει — ὁ δ' ἐπιεικὴς διὰ τὸ καλόν, καὶ ὅσῳ ἂν βελτίων ᾖ, μᾶλλον διὰ τὸ καλόν, καὶ φίλου ἕνεκα, [35] τὸ δ' αὐτοῦ παρήσιν. τοῖς λόγοις δὲ τούτοις τὰ ἔργα διαφωνεῖ, οὐκ ἀλόγως. 1168b [1] φασὶ γὰρ δεῖν φιλεῖν μάλιστα τὸν μάλιστα φίλον, φίλος δὲ μάλιστα ὁ βουλόμενος ᾧ βούλεται τάγαθὰ ἐκείνου ἕνεκα, καὶ εἰ μηδεὶς εἴσεται· ταῦτα δ' ὑπάρχει

μάλιστ' αὐτῷ πρὸς αὐτόν, καὶ τὰ λοιπὰ δὴ πάνθ' [5] οἷς ὁ φίλος ὀρίζεται· εἴρηται γὰρ ὅτι ἀπ' αὐτοῦ πάντα τὰ φιλικὰ καὶ πρὸς τοὺς ἄλλους διήκει. καὶ αἱ παροιμίαι δὲ πᾶσαι ὁμογνωμονοῦσιν, οἷον τὸ “μία ψυχὴ” καὶ “κοινὰ τὰ φίλων” καὶ “ἰσότης φιλότης” καὶ “γόνυ κνήμης ἔγγιον·” πάντα γὰρ ταῦτα πρὸς αὐτὸν μάλιστ' ἂν ὑπάρχοι· μάλιστα [10] γὰρ φίλος αὐτῷ· καὶ φιλητέον δὴ μάλισθ' ἑαυτόν. ἀπορεῖται δὴ εἰκότως ποτέροις χρεὼν ἔπεσθαι, ἀμφοῖν ἐχόντοιν τὸ πιστόν. ἴσως οὖν τοὺς τοιοῦτους δεῖ τῶν λόγων διαιρεῖν καὶ διορίζειν ἐφ' ὅσον ἐκάτεροι καὶ πῇ ἀληθεύουσιν. εἰ δὴ λάβοιμεν τὸ φίλαυτον πῶς ἐκάτεροι λέγουσιν, τάχ' ἂν γένοιτο [15] δῆλον. οἱ μὲν οὖν εἰς ὄνειδος ἄγοντες αὐτὸ φιλαύτους καλοῦσι τοὺς ἑαυτοῖς ἀπονέμοντας τὸ πλεῖον ἐν χρήμασι καὶ τιμαῖς καὶ ἡδοναῖς ταῖς σωματικαῖς· τούτων γὰρ οἱ πολλοὶ ὀρέγονται, καὶ ἐσπουδάκασιν περὶ αὐτὰ ὡς ἄριστα ὄντα, διὸ καὶ περιμάχητά ἐστιν. οἱ δὲ περὶ ταῦτα πλεονέκται χαρίζονται [20] ταῖς ἐπιθυμίαις καὶ ὅλως τοῖς πάθεσι καὶ τῷ ἀλόγῳ τῆς ψυχῆς· τοιοῦτοι δ' εἰσὶν οἱ πολλοί· διὸ καὶ ἡ προσηγορία γεγένηται ἀπὸ τοῦ πολλοῦ φαύλου ὄντος· δικαίως δὲ τοῖς οὕτω φιλαύτοις ὀνειδίζεται. ὅτι δὲ τοὺς τὰ τοιαῦθ' αὐτοῖς ἀπονέμοντας εἰώθασιν λέγειν οἱ πολλοὶ φιλαύτους, οὐκ ἄδηλον· [25] εἰ γὰρ τις ἀεὶ σπουδάζοι τὰ δίκαια πράττειν αὐτὸς μάλιστα πάντων ἢ τὰ σώφρονα ἢ ὅποιον ἄλλα τῶν κατὰ τὰς ἀρετάς, καὶ ὅλως ἀεὶ τὸ καλὸν ἑαυτῷ περιποιοῖτο, οὐδεὶς ἐρεῖ τοῦτον φίλαυτον οὐδὲ ψέξει. δόξειε δ' ἂν ὁ τοιοῦτος μᾶλλον εἶναι φίλαυτος· ἀπονέμει γοῦν ἑαυτῷ τὰ κάλλιστα [30] καὶ μάλιστ' ἀγαθὰ, καὶ χαρίζεται ἑαυτοῦ τῷ κυριωτάτῳ, καὶ πάντα τούτῳ πείθεται· ὥσπερ δὲ καὶ πόλις τὸ κυριώτατον μάλιστ' εἶναι δοκεῖ καὶ πᾶν ἄλλο σύστημα, οὕτω καὶ ἄνθρωπος· καὶ φίλαυτος δὴ μάλιστα ὁ τοῦτο ἀγαπῶν καὶ τούτῳ χαριζόμενος. καὶ ἐγκρατὴς δὲ καὶ ἀκρατὴς λέγεται [35] τῷ κρατεῖν τὸν νοῦν ἢ μή, ὡς τούτου ἐκάστου ὄντος· 1169a [1] καὶ πεπραγένοι δοκοῦσιν αὐτοῖ καὶ ἐκουσίως τὰ μετὰ λόγου μάλιστα. ὅτι μὲν οὖν τοῦθ' ἕκαστός ἐστιν ἢ μάλιστα, οὐκ ἄδηλον, καὶ ὅτι ὁ ἐπιεικὴς μάλιστα τοῦτ' ἀγαπᾷ. διὸ φίλαυτος μάλιστ' ἂν εἴη, καθ' ἕτερον εἶδος τοῦ ὀνειδιζομένου, καὶ διαφέρων [5] τοσοῦτον ὅσον τὸ κατὰ λόγον ζῆν τοῦ κατὰ πάθος, καὶ ὀρέγεσθαι ἢ τοῦ καλοῦ ἢ τοῦ δοκοῦντος συμφέρειν. τοὺς μὲν οὖν περὶ τὰς καλὰς πράξεις διαφερόντως σπουδάζοντας πάντες ἀποδέχονται καὶ ἐπαινοῦσιν· πάντων δὲ ἀμιλλωμένων πρὸς τὸ καλὸν καὶ διατεινομένων τὰ κάλλιστα πράττειν κοινῇ τ' [10] ἂν πάντ' εἴη

τὰ δέοντα καὶ ἰδίᾳ ἐκάστῳ τὰ μέγιστα τῶν ἀγαθῶν, εἴπερ ἡ ἀρετὴ τοιοῦτόν ἐστιν. ὥστε τὸν μὲν ἀγαθὸν δεῖ φίλαυτον εἶναι (καὶ γὰρ αὐτὸς ὀνήσεται τὰ καλὰ πράττων καὶ τοὺς ἄλλους ὠφελήσει), τὸν δὲ μοχθηρὸν οὐ δεῖ· βλάβει γὰρ καὶ ἑαυτὸν καὶ τοὺς πέλας, φαύλοις πάθουσιν [15] ἐπόμενος. τῷ μοχθηρῷ μὲν οὖν διαφωνεῖ ἃ δεῖ πράττειν καὶ ἃ πράττει· ὁ δ' ἐπιεικὴς, ἃ δεῖ, ταῦτα καὶ πράττει· πᾶς γὰρ νοὺς αἰρεῖται τὸ βέλτιστον ἑαυτῷ, ὁ δ' ἐπιεικὴς πειθαρχεῖ τῷ νῷ. ἀληθὲς δὲ περὶ τοῦ σπουδαίου καὶ τὸ τῶν φίλων ἔνεκα πολλὰ πράττειν καὶ τῆς πατρίδος, κἂν δέῃ [20] ὑπεραποθνήσκειν· προήσεται γὰρ καὶ χρήματα καὶ τιμὰς καὶ ὅλως τὰ περιμάχητα ἀγαθὰ, περιποιούμενος ἑαυτῷ τὸ καλόν· ὀλίγον γὰρ χρόνον ἡσθῆναι σφόδρα μᾶλλον ἔλοιτ' ἂν ἢ πολὺν ἡρέμα, καὶ βιώσαι καλῶς ἐνιαυτὸν ἢ πόλλ' ἔτη τυχόντως, καὶ μίαν πρᾶξιν καλὴν καὶ μεγάλην ἢ πολλὰς [25] καὶ μικράς. τοῖς δ' ὑπεραποθνήσκουσι τοῦτ' ἴσως συμβαίνει· αἰροῦνται δὴ μέγα καλὸν ἑαυτοῖς. καὶ χρήματα προσοῖντ' ἂν ἐφ' ᾧ πλείονα λήψονται οἱ φίλοι· γίνεται γὰρ τῷ μὲν φίλῳ χρήματα, αὐτῷ δὲ τὸ καλόν· τὸ δὴ μεῖζον ἀγαθὸν ἑαυτῷ ἀπονέμει. καὶ περὶ τιμὰς δὲ καὶ ἀρχὰς ὁ [30] αὐτὸς τρόπος· πάντα γὰρ τῷ φίλῳ ταῦτα προήσεται· καλὸν γὰρ αὐτῷ τοῦτο καὶ ἐπαινετόν. εἰκότως δὴ δοκεῖ σπουδαῖος εἶναι, ἀντὶ πάντων αἰρούμενος τὸ καλόν. ἐνδέχεται δὲ καὶ πράξεις τῷ φίλῳ προῖεσθαι, καὶ εἶναι κάλλιον τοῦ αὐτὸν πρᾶξαι τὸ αἴτιον τῷ φίλῳ γενέσθαι. ἐν πᾶσι δὴ τοῖς [35] ἐπαινετοῖς ὁ σπουδαῖος φαίνεται ἑαυτῷ τοῦ καλοῦ πλεον νέμων. 1169b [1] οὕτω μὲν οὖν φίλαυτον εἶναι δεῖ, καθάπερ εἴρηται· ὥς δ' οἱ πολλοί, οὐ χρή.

πότερον δ' ἐν εὐτυχίαις μᾶλλον φίλων δεῖ ἢ ἐν δυστυχίαις; ἐν ἀμφοῖν γὰρ ἐπιζητοῦνται· οἱ τε γὰρ ἀτυχοῦντες δέονται ἐπικουρίας, οἱ τ' εὐτυχοῦντες συμβίων καὶ οὓς εὖ ποιήσουσιν· βούλονται γὰρ εὖ δρᾶν. ἀναγκαιότερον μὲν δὴ [25] ἐν ταῖς ἀτυχίαις, διὸ τῶν χρησίμων ἐνταῦθα δεῖ, κάλλιον δ' ἐν ταῖς εὐτυχίαις, διὸ καὶ τοὺς ἐπιεικεῖς ζητοῦσιν· τούτους γὰρ αἰρετώτερον εὐεργετεῖν καὶ μετὰ τούτων διάγειν. ἔστι γὰρ καὶ ἡ παρουσία αὐτῇ τῶν φίλων ἡδεῖα καὶ ἐν ταῖς εὐτυχίαις καὶ ἐν ταῖς δυστυχίαις. κουφίζονται γὰρ οἱ λυπούμενοι [30] συναλγούντων τῶν φίλων. διὸ κἂν ἀπορήσειεν τις πότερον ὥσπερ βάρους μεταλαμβάνουσιν, ἢ τοῦτο μὲν οὐ, ἢ παρουσία δ' αὐτῶν

ἡδεῖα οὖσα καὶ ἡ ἔννοια τοῦ συναλγεῖν ἐλάττω τὴν λύπην ποιεῖ. εἰ μὲν οὖν διὰ ταῦτα ἢ δι' ἄλλο τι κουφίζονται, ἀφείσθω· συμβαίνειν δ' οὖν φαίνεται τὸ λεχθέν. ἔοικε δ' [35] ἡ παρουσία μικτὴ τις αὐτῶν εἶναι. αὐτὸ μὲν γὰρ τὸ ὁρᾶν τοὺς φίλους ἡδύ, 1171b [1] ἄλλως τε καὶ ἀτυχοῦντι, καὶ γίνεται τις ἐπικουρία πρὸς τὸ μὴ λυπεῖσθαι (παραμυθητικὸν γὰρ ὁ φίλος καὶ τῇ ὄψει καὶ τῷ λόγῳ, ἐὰν ἢ ἐπιδέξιος· οἶδε γὰρ τὸ ἥθος καὶ ἐφ' οἷς ἡδεται καὶ λυπεῖται)· τὸ δὲ λυπούμενον αἰσθάνεσθαι [5] ἐπὶ ταῖς αὐτοῦ ἀτυχαίαις λυπηρόν· πᾶς γὰρ φεύγει λύπης αἴτιος εἶναι τοῖς φίλοις. διόπερ οἱ μὲν ἀνδρώδεις τὴν φύσιν εὐλαβοῦνται συλλυπεῖν τοὺς φίλους αὐτοῖς, κἂν μὴ ὑπερτείνῃ τῇ ἀλυπία, τὴν ἐκείνοις γινομένην λύπην οὐχ ὑπομένει, ὅλως τε συνθρήνους οὐ προσίεται διὰ τὸ μὴδ' αὐτὸς [10] εἶναι θρηνητικός· γύναια δὲ καὶ οἱ τοιοῦτοι ἄνδρες τοῖς συστένουσι χαίρουσι, καὶ φιλοῦσιν ὡς φίλους καὶ συναλγοῦντας. μιμεῖσθαι δ' ἐν ἅπασιν δεῖ δῆλον ὅτι τὸν βελτίω. ἢ δ' ἐν ταῖς εὐτυχίαις τῶν φίλων παρουσία τὴν τε διαγωγὴν ἡδεῖαν ἔχει καὶ τὴν ἔννοιαν ὅτι ἡδονται ἐπὶ τοῖς αὐτοῦ ἀγαθοῖς.. [15] διὸ δόξειεν ἂν δεῖν εἰς μὲν τὰς εὐτυχίας καλεῖν τοὺς φίλους προθύμως (εὐεργετικὸν γὰρ εἶναι καλόν), εἰς δὲ τὰς ἀτυχίας ὀκνοῦντα· μεταδιδόναι γὰρ ὡς ἥκιστα δεῖ τῶν κακῶν, ὅθεν τὸ “ἄλῃς ἐγὼ δυστυχῶν.” μάλιστα δὲ παρακλητέον ὅταν μέλλωσιν ὀλίγα ὀχληθέντες μεγάλ' αὐτὸν ὠφελήσῃν. [20] ἰέναι δ' ἀνάπαλιν ἴσως ἀρμόζει πρὸς μὲν τοὺς ἀτυχοῦντας ἄκλητον καὶ προθύμως (φίλου γὰρ εὖ ποιεῖν, καὶ μάλιστα τοὺς ἐν χρεῖα καὶ [τὸ] μὴ ἀξιώσαντας· ἀμφοῖν γὰρ κάλλιον καὶ ἥδιον), εἰς δὲ τὰς εὐτυχίας συνεργοῦντα μὲν προθύμως (καὶ γὰρ εἰς ταῦτα χρεῖα φίλων), πρὸς εὐπάθειαν δὲ σχολαίως· [25] οὐ γὰρ καλὸν τὸ προθυμεῖσθαι ὠφελεῖσθαι. δόξαν δ' ἀηδίας ἐν τῷ διωθεῖσθαι ἴσως εὐλαβητέον· ἐνίστε γὰρ συμβαίνει. ἡ παρουσία δὲ τῶν φίλων ἐν ἅπασιν αἰρετὴ φαίνεται.

Βιβλίο 10

μετὰ δὲ ταῦτα περὶ ἡδονῆς ἴσως ἔπεται διελθεῖν. [20] μάλιστα γὰρ δοκεῖ συνφκειῶσθαι τῷ γένει ἡμῶν, διὸ παιδεύουσι τοὺς νέους οἰακίζοντες ἡδονῇ καὶ λύπῃ· δοκεῖ δὲ καὶ πρὸς τὴν τοῦ ἥθους ἀρετὴν μέγιστον εἶναι τὸ χαίρειν οἷς δεῖ καὶ μισεῖν ἃ δεῖ. διατείνει γὰρ ταῦτα διὰ παντὸς τοῦ βίου, ῥοπὴν ἔχοντα καὶ δύναμιν πρὸς ἀρετὴν τε καὶ τὸν εὐδαίμονα [25] βίον· τὰ μὲν γὰρ ἡδέα προαιροῦνται, τὰ δὲ λυπηρὰ φεύγουσιν· ὑπὲρ δὲ τῶν τοιούτων ἥκιστ' ἂν δόξαιε παρετέον εἶναι, ἄλλως τε καὶ πολλὴν ἐχόντων ἀμφισβήτησιν. οἱ μὲν γὰρ τἀγαθὸν ἡδονὴν λέγουσιν, οἱ δ' ἐξ ἐναντίας κομιδῇ φαῦλον, οἱ μὲν ἴσως πεπεισμένοι οὕτω καὶ ἔχειν, οἱ δὲ οἰόμενοι βέλτιον [30] εἶναι πρὸς τὸν βίον ἡμῶν ἀποφαίνειν τὴν ἡδονὴν τῶν φαύλων, καὶ εἰ μὴ ἐστίν· ῥέπειν γὰρ τοὺς πολλοὺς πρὸς αὐτὴν καὶ δουλεύειν ταῖς ἡδοναῖς, διὸ δεῖν εἰς τὸνναντίον ἄγειν· ἐλθεῖν γὰρ ἂν οὕτως ἐπὶ τὸ μέσον. μὴ ποτε δὲ οὐ καλῶς τοῦτο λέγεται. οἱ γὰρ περὶ τῶν ἐν τοῖς πάθεσι καὶ [35] ταῖς πράξεσι λόγοι ἡττόν εἰσι πιστοὶ τῶν ἔργων· ὅταν οὖν διαφωνῶσι τοῖς κατὰ τὴν αἴσθησιν, καταφρονούμενοι καὶ τάληθές προσαναιροῦσιν· 1172b [1] ὁ γὰρ ψέγων τὴν ἡδονὴν, ὀφθεῖς ποτ' ἐφίεμενος, ἀποκλίνειν δοκεῖ πρὸς αὐτὴν ὡς τοιαύτην οὖσαν ἅπασαν· τὸ διορίζειν γὰρ οὐκ ἔστι τῶν πολλῶν. εἰκόασιν οὖν οἱ ἀληθεῖς τῶν λόγων οὐ μόνον πρὸς τὸ εἰδέναι [5] χρησιμώτατοι εἶναι, ἀλλὰ καὶ πρὸς τὸν βίον· συνφδοὶ γὰρ ὄντες τοῖς ἔργοις πιστεύονται, διὸ προτρέπονται τοὺς συνιέντας ζῆν κατ' αὐτοὺς. τῶν μὲν οὖν τοιούτων ἄλλης· τὰ δ' εἰρημένα περὶ τῆς ἡδονῆς ἐπέλωμεν.

εὐδοξος μὲν οὖν τὴν ἡδονὴν τἀγαθὸν ᾧετ' εἶναι διὰ τὸ [10] πάνθ' ὁρᾶν ἐφίεμενα αὐτῆς, καὶ ἔλλογα καὶ ἄλογα, ἐν πᾶσι δ' εἶναι τὸ αἰρετὸν τὸ ἐπιεικές, καὶ τὸ μάλιστα κράτιστον· τὸ δὲ πάντ' ἐπὶ ταῦτο φέρεσθαι μηνύειν ὡς πᾶσι τοῦτο ἄριστον ὄν (ἕκαστον γὰρ τὸ αὐτῷ ἀγαθὸν εὐρίσκειν, ὥσπερ καὶ τροφήν), τὸ δὲ πᾶσιν ἀγαθόν, καὶ οὐ πάντ' ἐφίεται, τἀγαθὸν [15] εἶναι. ἐπιστεύοντο δ' οἱ λόγοι διὰ τὴν τοῦ ἥθους ἀρετὴν μᾶλλον ἢ δι' αὐτούς· διαφερόντως γὰρ ἐδόκει σώφρων εἶναι· οὐ δὴ ὡς φίλος τῆς ἡδονῆς ἐδόκει ταῦτα λέγειν, ἀλλ' οὕτως ἔχειν κατ' ἀλήθειαν. οὐχ ἡττον δ' ᾧετ' εἶναι φανερόν ἐκ τοῦ ἐναντίου· τὴν γὰρ λύπην καθ' αὐτὸ πᾶσι φευκτὸν εἶναι, [20] ὁμοίως

[5] καὶ ἐφ' ἐκάστω δὲ θεωροῦντι τοῦτ' ἂν φανείη· ἑτέρα γὰρ ἵππου ἡδονὴ καὶ κυνὸς καὶ ἀνθρώπου, καθάπερ Ἡράκλειτός φησιν ὄνους σύρματ' ἂν ἐλέσθαι μᾶλλον ἢ χρυσόν· ἥδιον γὰρ χρυσοῦ τροφὴ ὄνοις. αἱ μὲν οὖν τῶν ἑτέρων τῷ εἶδει διαφέρουσιν εἶδει, τὰς δὲ τῶν αὐτῶν ἀδιαφόρους εὐλογον εἶναι. ἄρ' οὖν εἰ περὶ τε τούτων καὶ τῶν ἀρετῶν, ἔτι δὲ καὶ φιλίας καὶ ἡδονῆς, ἱκανῶς εἴρηται τοῖς τύποις, τέλος ἔχειν [35] οἷητέον τὴν προαίρεσιν; ἢ καθάπερ λέγεται, 1179b [1] οὐκ ἔστιν ἐν τοῖς πρακτοῖς τέλος τὸ θεωρῆσαι ἕκαστα καὶ γινῶναι, ἀλλὰ μᾶλλον τὸ πράττειν αὐτά· οὐδὲ δὴ περὶ ἀρετῆς ἱκανὸν τὸ εἰδέναι, ἀλλ' ἔχειν καὶ χρῆσθαι πειρατέον, ἢ εἰ πῶς ἄλλως ἀγαθοὶ γινόμεθα; εἰ μὲν οὖν ἦσαν οἱ λόγοι αὐτάρκεις πρὸς [5] τὸ ποιῆσαι ἐπιεικεῖς, πολλοὺς ἂν μισθοὺς καὶ μεγάλους δικαίως ἔφερον κατὰ τὸν Θέογνιν, καὶ ἔδει ἂν τούτους πορίσασθαι· νῦν δὲ φαίνονται προτρέψασθαι μὲν καὶ παρορμῆσαι τῶν νέων τοὺς ἐλευθερίους ἰσχύειν, ἡθὸς τ' εὐγενὲς καὶ ὡς ἀληθῶς φιλόκαλον ποιῆσαι ἂν κατοκῶχμον ἐκ τῆς ἀρετῆς, [10] τοὺς δὲ πολλοὺς ἀδυνατεῖν πρὸς καλοκαγαθίαν προτρέψασθαι· οὐ γὰρ πεφύκασιν αἰδοῖ πειθαρχεῖν ἀλλὰ φόβῳ, οὐδ' ἀπέχεσθαι τῶν φαύλων

[1] Ἐπειδὴ προαιρούμεθα λέγειν ὑπὲρ ἠθικῶν, πρῶτον ἂν εἴη σκεπτέον τίνοσ ἐστὶ μέρος τὸ ἦθος. ὥς μὲν οὖν συντόμως εἰπεῖν, δόξειεν ἄν οὐκ ἄλλης ἢ τῆς πολιτικῆς εἶναι μέρος. ἔστι γὰρ οὐθὲν ἐν τοῖς πολιτικοῖς δυνατόν πρᾶξαι ἄνευ τοῦ ποῖόν τινα εἶναι, λέγω δ' οἶον σπουδαῖον· τὸ δὲ [2] σπουδαῖον εἶναι ἐστὶ τὸ τὰς ἀρετὰς ἔχειν· δεῖ ἄρα, εἴ τις μέλλει ἐν τοῖς πολιτικοῖς πρακτικὸς εἶναι, τὸ [3] ἦθος εἶναι σπουδαῖος· μέρος ἐστὶν ἄρα, ὥς ἔοικε, καὶ ἀρχὴ ἢ περὶ τὰ ἦθη πραγματεία τῆς πολιτικῆς, τὸ δ' ὅλον καὶ τὴν ἐπωνυμίαν δικαίως δοκεῖ ἂν μοι ἔχειν ἢ πραγματεία οὐκ ἠθικὴν ἀλλὰ πολιτικὴν.

[4] Δεῖ ἄρα, ὥς ἔοικε, πρῶτον ὑπὲρ ἀρετῆς εἰπεῖν, τί τέ ἐστι καὶ ἐκ τίνων γίνεται. οὐθὲν γὰρ ἴσως ὄφελος εἰδέναι μὲν τὴν ἀρετὴν, πῶς δὲ ἔσται καὶ ἐκ τίνων μὴ ἐπαίειν. οὐ γὰρ μόνον ὅπως εἰδήσομεν τί ἐστὶ σκοπεῖσθαι δεῖ, ἀλλὰ καὶ ἐκ τίνων ἔσται σκέψασθαι. ἅμα γὰρ εἰδήσαι βουλόμεθα καὶ αὐτοὶ εἶναι τοιοῦτοι· τοῦτο δ' οὐ δυνησόμεθα, ἐὰν μὴ εἰδῶμεν καὶ ἐκ τίνων καὶ πῶς ἔσται.

[5] Ἀναγκαῖον μὲν οὖν εἰδήσαι τί ἐστὶν ἀρετὴ (οὐ γὰρ ῥάδιον εἰδέναι τὸ ἐκ τίνων ἔσται καὶ πῶς ἔσται, ἀγνοοῦντα τὸ τί ἐστίν, ὥσπερ οὐδ' ἐπὶ τῶν ἐπιστημῶν).

Οὐ δεῖ δὲ λανθάνειν οὐδ' εἴτινες πρότερον ὑπὲρ [6] τούτων εἰρήκασιν. πρῶτος μὲν οὖν ἐνεχείρησεν Πυθαγόρας περὶ ἀρετῆς εἰπεῖν, οὐκ ὀρθῶς δέ· τὰς γὰρ ἀρετὰς εἰς τοὺς ἀριθμοὺς ἀνάγων οὐκ οἰκείαν τῶν ἀρετῶν τὴν θεωρίαν ἐποιεῖτο· οὐ γάρ ἐστὶν ἡ δικαιοσύνη ἀριθμὸς ἰσάκεις ἴσος.

[7] Μετὰ τοῦτον Σωκράτης ἐπιγενόμενος βέλτιον καὶ ἐπὶ πλεῖον εἶπεν ὑπὲρ τούτων, οὐκ ὀρθῶς δὲ οὐδ' οὗτος. τὰς γὰρ ἀρετὰς ἐπιστήμας ἐποίει· τοῦτο δ' ἐστὶν εἶναι ἀδύνατον. αἱ γὰρ ἐπιστήμαι πᾶσαι μετὰ λόγου, λόγος δὲ ἐν τῷ διανοητικῷ τῆς ψυχῆς ἐγγίνεται μορίῳ· γίνονται οὖν αἱ ἀρεταὶ πᾶσαι κατ' αὐτὸν ἐν τῷ λογιστικῷ τῆς ψυχῆς μορίῳ· συμβαίνει οὖν αὐτῷ ἐπιστήμας ποιοῦντι τὰς ἀρετὰς ἀναιρεῖν τὸ ἄλογον μέρος τῆς ψυχῆς, τοῦτο δὲ ποιῶν ἀναιρεῖ καὶ πάθος καὶ ἦθος. διὸ οὐκ ὀρθῶς ἦψατο ταύτη τῶν ἀρετῶν.

[8] Μετὰ ταῦτα δὲ Πλάτων διείλετο τὴν ψυχὴν εἰς τε τὸ λόγον ἔχον καὶ εἰς τὸ ἄλογον ὀρθῶς, καὶ ἀπέδωκεν ἐκάστῳ [τάς] ἀρετὰς τὰς προσηκούσας. μέχρι μὲν οὖν τούτου καλῶς· μετὰ μέντοι τοῦτο

οὐκέτι ὀρθῶς. τὴν γὰρ ἀρετὴν κατέμιζεν [καὶ συνέζευξεν] εἰς τὴν πραγματείαν τὴν ὑπὲρ τάγαθοῦ, οὐ δὴ ὀρθῶς· οὐ γὰρ οἰκεῖον· ὑπὲρ γὰρ τῶν ὄντων καὶ ἀληθείας λέγοντα οὐκ ἔδει ὑπὲρ ἀρετῆς φράζειν· οὐδὲν γὰρ τοῦτω κάκειναι κοινόν.

[9] Οὗτοι μὲν οὖν ἐπὶ τοσοῦτον ἐφήψαντο καὶ οὕτως· ἐχόμενον δ' ἂν εἶη μετὰ ταῦτα σκέψασθαι τί δεῖ αὐτοὺς λέγειν ὑπὲρ τούτων.

Πρῶτον μὲν οὖν ἰδεῖν δεῖ ὅτι πάσης ἐπιστήμης καὶ δυνάμεως ἐστί τι τέλος, καὶ τοῦτ' ἀγαθόν· οὐδεμία γὰρ οὐτ' ἐπιστήμη οὔτε δύναμις ἔνεκεν [10] κακοῦ ἐστίν. εἰ οὖν πασῶν τῶν δυνάμεων ἀγαθὸν τὸ τέλος, δῆλον ὡς καὶ τῆς βελτίστης βέλτιστον ἂν εἶη. ἀλλὰ μὴν ἢ γε πολιτικὴ βελτίστη δύναμις, ὥστε τὸ τέλος αὐτῆς ἂν εἶη ἀγαθόν. ὑπὲρ ἀγαθοῦ ἄρα, ὡς ἔοικεν, ἡμῖν λεκτέον, καὶ ὑπὲρ ἀγαθοῦ οὐ τοῦ ἀπλῶς, ἀλλὰ τοῦ ἡμῖν· οὐ γὰρ τοῦ θεῶν ἀγαθοῦ· ἀλλ' ὑπὲρ μὲν τούτου καὶ ἄλλος λόγος καὶ ἀλλοτρία ἢ σκέψις. ὑπὲρ τοῦ πολιτικοῦ ἄρα ἡμῖν λεκτέον ἀγαθοῦ.

[11] Πάλιν δὲ καὶ τοῦτο διελεῖν δεῖ. ὑπὲρ ἀγαθοῦ τοῦ πῶς λεγομένου; οὐ γὰρ ἐστὶν ἀπλοῦν. λέγεται γὰρ ἀγαθὸν ἢ τὸ ἄριστον ἐν ἐκάστω τῶν ὄντων, τοῦτο δ' ἐστὶ τὸ διὰ τὴν αὐτοῦ φύσιν αἰρετόν· ἢ οὗ τᾶλλα μετασχόντα ἀγαθὰ ἐστίν, τοῦτο δὲ ἐστὶν ἡ ἰδέα τάγαθοῦ.

[12] Πότερον οὖν ὑπὲρ τῆς ἰδέας τοῦ ἀγαθοῦ δεῖ, ἢ οὐ, ἀλλ' ὡς τὸ κοινὸν ἐν ἅπασιν ὑπάρχον ἀγαθόν; ἕτερον γὰρ τῆς ἰδέας τοῦτο δόξειεν ἂν εἶναι. ἢ μὲν γὰρ ἰδέα χωριστὸν καὶ αὐτὸ καθ' αὐτό· τὸ δὲ κοινὸν ἐν ἅπασιν ὑπάρχει, οὐκ ἔστιν δὴ ταῦτόν τῳ χωριστῷ. οὐ γὰρ ἂν ποτε τὸ χωριστὸν καὶ τὸ πεφυκὸς αὐτὸ καθ' αὐτὸ εἶναι ἐν πᾶσιν ὑπάρχοι.

[13] Πότερον οὖν ὑπὲρ τούτου δεῖ λέγειν τάγαθοῦ τοῦ ἐνυπάρχοντος; ἢ οὐ; διὰ τί; ὅτι τοῦτο ἐστὶ μὲν τὸ κοινόν, ὡς ὁ ὀρισμὸς καὶ ἡ ἐπαγωγή· ὁ δὲ ὀρισμὸς βούλεται τὴν ἐκάστου οὐσίαν λέγειν, ἥτοι ὅτι ἀγαθὸν ἢ ὅτι κακὸν ἢ ὅ τι ἂν ἄλλο ἦ· λέγει δὲ ὁ ὅρος ὅτι τὸ τοιόνδ' ἀγαθὸν καθόλου, ὃ ἂν ἦ αὐτὸ δι' αὐτὸ αἰρετόν· τὸ δὲ ἐν ἅπασιν ἐνυπάρχον ὁμοιον τῷ ὄρω ἐστίν.

[14] Ὁ δὲ ὅρος λέγει ὅτι ἀγαθόν, ἐπιστήμη δὲ γε οὐδὲ δύναμις οὐδεμία λέγει ὑπὲρ τοῦ τέλους τοῦ αὐτῆς ὅτι ἀγαθόν, ἀλλὰ τοῦτο μὲν ἄλλης δυνάμεως ἐστὶ θεωρῆσαι (οὔτε γὰρ ὁ ἱατρὸς οὔτε ὁ οἰκοδόμος λέγει ὅτι ἀγαθὸν ἢ ὑγίεια οὐδὲ ἡ οἰκία, ἀλλ' ὅτι ὁ [15] μὲν ὑγίειαν ποιεῖ, καὶ ὡς ποιεῖ, ὃ δ' οἰκίαν)· δῆλον τοίνυν ὅτι οὐδὲ τῇ πολιτικῇ ὑπὲρ τοῦ ἀγαθοῦ λεκτέον τοῦ κοινοῦ. μία γὰρ ἐστὶν καὶ αὕτη τῶν

λοιπῶν ἐπιστημῶν· τοῦτο δὲ οὐδεμιᾶς ἦν λέγειν οὔτε δυνάμεως οὔτ' ἐπιστήμης ὡς τέλος· οὐδ' ἄρα τῆς πολιτικῆς ἐστὶν τὸ ὑπὲρ τοῦ κοινοῦ ἀγαθοῦ λέγειν τοῦ κατὰ τὸν ὀρισμόν.

[16] Ἀλλὰ μὴν οὐδὲ τοῦ κατὰ τὴν ἐπαγωγὴν κοινοῦ. διὰ τί; ὅτι ὅταν βουλόμεθα δεῖξαι [καί] τι τῶν μέρους ἀγαθῶν, ἢ τῷ ὀρισμῷ δείκνυμεν ὅτι ὁ αὐτὸς λόγος ἐφαρμόττει ἐπὶ τε τὰγαθὸν καὶ ἐπὶ τοῦτο ὃ ἂν βουλόμεθα δεῖξαι ὅτι ἀγαθόν, ἢ τῇ ἐπαγωγῇ, οἷον ὅταν θέλωμεν δεῖξαι ὅτι ἡ μεγαλοψυχία ἐστὶν ἀγαθόν, φαμέν ὅτι ἡ δικαιοσύνη ἀγαθόν καὶ ἡ ἀνδρεία καὶ ἀπλῶς αἱ ἀρεταί, ἡ δὲ μεγαλοψυχία ἀρετή, ὥστε καὶ ἡ μεγαλοψυχία ἀγαθόν· οὐδὲ δὴ [17] ὑπὲρ τοῦ κατὰ τὴν ἐπαγωγὴν κοινοῦ ἀγαθοῦ λεκτέον τῇ πολιτικῇ, ὅτι τὰ αὐτὰ ἀδύνατα συμβήσεται τούτῳ καὶ τῷ κατὰ τὸν ὅρον κοινῷ ἀγαθῷ. ὅτι γὰρ ἀγαθόν, καὶ ἐνταῦθ' ἐρεῖ.

Δῆλον τοίνυν ὅτι ὑπὲρ τοῦ ἀρίστου ἀγαθοῦ λεκτέον [18] ἐστὶν καὶ ἀρίστου τοῦ ἡμῖν ἀρίστου· τὸ δ' ὅλον ἴδιοι ἂν τις ὅτι οὐκ ἔστιν μιᾶς οὔτ' ἐπιστήμης οὔτε δυνάμεως τὸ ὑπὲρ παντὸς ἀγαθοῦ σκοπεῖν.

Διὰ τί; ὅτι τὰγαθὸν ἐν πάσαις ταῖς κατηγορίαις ἐστίν· καὶ γὰρ ἐν τῷ τί καὶ ἐν τῷ ποιῷ καὶ ἐν τῷ ποσῷ καὶ πότε καὶ πρὸς τι [καὶ τινί] καὶ ἀπλῶς ἐν [19] ἀπάσαις. ἀλλὰ μὴν τὸ πότε ἀγαθὸν ἐν μὲν ἰατρικῇ ὁ ἱατρὸς οἶδεν, ἐν δὲ κυβερνητικῇ ὁ κυβερνήτης, ἐν ἐκάστη δ' ἕκαστος. πότε μὲν γὰρ δεῖ τεμεῖν ὁ ἱατρὸς οἶδεν, πότε δὲ δεῖ πλεῖν ὁ κυβερνήτης. ἐν ἐκάστη δὲ τὸ πότε ἀγαθὸν ἕκαστος τὸ καθ' ἑαυτὸν εἰδήσει· οὔτε γὰρ ὁ ἱατρὸς τὸ ἐν τῇ κυβερνητικῇ ἀγαθὸν πότε εἰδήσει, οὔτε ὁ κυβερνήτης τὸ ἐν ἰατρικῇ. οὐκ ἄρα οὐδ' οὕτως ὑπὲρ τοῦ κοινοῦ ἀγαθοῦ λεκτέον· τὸ γὰρ πότε ἐν πάσαις κοινόν.

[20] Ὅμοιως δὲ καὶ τὸ πρὸς τι ἀγαθὸν καὶ τὸ κατὰ τὰς ἄλλας κατηγορίας κοινὸν μὲν ἀπάσαις, οὐδεμιᾶς δ' ἐστὶν οὔτε δυνάμεως οὔτ' ἐπιστήμης εἰπεῖν ὑπὲρ τοῦ ἐν ἐκάστη [πότε] ἀγαθοῦ, οὐδ' αὖ τῆς πολιτικῆς ὑπὲρ τοῦ κοινοῦ ἀγαθοῦ λέγειν. ὑπὲρ τοῦ ἀγαθοῦ ἄρα, καὶ ὑπὲρ τοῦ ἀρίστου, καὶ ὑπὲρ τοῦ ἡμῖν ἀρίστου.

[21] Ἵσως δὲ οὐδὲ δεῖ βουλούμενόν τι δεικνύναι, τοῖς μὴ φανεροῖς παραδείγμασι χρῆσθαι, ἀλλ' ὑπὲρ τῶν ἀφανῶν τοῖς φανεροῖς, καὶ ὑπὲρ τῶν νοητῶν τοῖς αἰσθητοῖς. [καί] ταῦτα γὰρ φανερώτερα. ὅταν οὖν ὑπὲρ τὰγαθοῦ τις ἐγχειρῇ λέγειν, οὐ λεκτέον [22] ἐστὶν ὑπὲρ τῆς ιδέας. καίτοι οἶονταί γε [δεῖν], ὅταν ὑπὲρ τοῦ ἀγαθοῦ λέγωσιν, ὑπὲρ τῆς ιδέας δεῖν λέγειν· ὑπὲρ γὰρ τοῦ μάλιστα ἀγαθοῦ φασὶ δεῖν λέγειν, αὐτὸ δὲ ἕκαστον μάλιστ' ἐστὶν [τὸ] τοιοῦτον, ὥστε μάλιστ' ἂν εἴη

ἀγαθὸν ἢ ἰδέα, ὥς οἴονται.

[23] ὁ δὴ τοιοῦτος λόγος ἀληθῆς μὲν ἐστὶν ἴσως· ἀλλ' οὐχ ἡ πολιτικὴ ἐπιστήμη ἢ δυνάμεις, ὑπὲρ ἧς νῦν ἐστὶν ὁ λόγος, οὐχ ὑπὲρ τούτου σκοπεῖ τἀγαθοῦ, ἀλλὰ τοῦ ἡμῖν ἀγαθοῦ. [οὐδεμία γὰρ οὕτ' ἐπιστήμη οὔτε δυνάμεις ὑπὲρ τοῦ τέλους λέγει ὅτι ἀγαθόν, ὥστε οὐδ' ἡ πολιτικὴ.] διὸ οὐχ ὑπὲρ τοῦ κατὰ τὴν ἰδέαν ἀγαθοῦ τὸν λόγον ποιεῖται.

[24] Ἀλλ' ἴσως [φησὶ] τούτῳ τἀγαθῷ ἀρχῇ χρησάμενος ὑπὲρ τῶν καθ' ἕκαστα, ἐκ τούτου προβάς, ἐρεῖ. οὐδ' οὕτως ὀρθῶς. δεῖ γὰρ τὰς ἀρχὰς οἰκείας λαμβάνειν. ἄτοπον γάρ, εἴ τις βουλόμενος τὸ τρίγωνον ὥς δυσὶν ὀρθαῖς ἴσας ἔχον δεῖξαι, λάβοι ἀρχὴν ὅτι ἡ ψυχὴ ἀθάνατος. οὐ γὰρ οἰκεία, δεῖ δὲ τὴν ἀρχὴν οἰκείαν εἶναι καὶ συνημμένην· νῦν δὲ καὶ ἄνευ τοῦ τὴν ψυχὴν εἶναι ἀθάνατον δείξει τις [25] δυσὶν ὀρθαῖς ἴσας ἔχον τὸ τρίγωνον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἀγαθῶν ἐστι θεάσασθαι τὰ ἄλλα ἄνευ τοῦ κατὰ τὴν ἰδέαν ἀγαθοῦ διὸ οὐκ οἰκείαν ἀρχὴν εἶναι τούτου τἀγαθοῦ.

[26] Οὐκ ὀρθῶς δὲ οὐδ' ὁ Σωκράτης ἐπιστήμας ἐποίει τὰς ἀρετάς. ἐκεῖνος γὰρ οὐδὲν ᾧετο δεῖν μάτην εἶναι, ἐκ δὲ τοῦ τὰς ἀρετὰς ἐπιστήμας εἶναι συνέβαινεν αὐτῷ τὰς ἀρετάς μάτην εἶναι. διὰ τί; ὅτι ἐπὶ τῶν ἐπιστημῶν συμβαίνει ἅμα εἰδέναι τὴν ἐπιστήμην τί ἐστὶ καὶ εἶναι ἐπιστήμονα (εἰ γὰρ ἰατρικὴν τις οἶδεν τί ἐστίν, καὶ ἰατρὸς οὗτος εὐθέως ἐστίν, ὁμοίως δὲ καὶ τῶν ἄλλων ἐπιστημῶν)· ἀλλ' [27] οὐκ ἐπὶ τῶν ἀρετῶν τοῦτο συμβαίνει. οὐ γὰρ εἴ τις οἶδεν τὴν δικαιοσύνην τί ἐστίν, εὐθέως δίκαιος ἐστίν, ὥς δ' αὐτως καπὶ τῶν ἄλλων. συμβαίνει οὖν καὶ μάτην τὰς ἀρετάς εἶναι καὶ μὴ εἶναι ἐπιστήμας.

[2]

[1] Ἐπεὶ δ' ὑπὲρ τούτων διώρισται, πειραθῶμεν λέγειν τἀγαθὸν ποσαχῶς λέγεται.

Ἔστι γὰρ τῶν ἀγαθῶν τὰ μὲν τίμια, τὰ δ' ἐπαινετά, τὰ δὲ δυνάμεις. τὸ δὲ τίμιον λέγω τὸ τοιοῦτον, τὸ θεῖον, τὸ βέλτιον, οἷον ψυχὴ, νοῦς, τὸ ἀρχαιότερον, ἢ ἀρχή, τὰ τοιαῦτα· τίμια γὰρ ἐφ' οἷς ἡ τιμὴ, τοῖς δὲ τοιούτοις πᾶσιν τιμὴ ἀκολουθεῖ. οὐκοῦν καὶ ἡ ἀρετὴ τίμιον, ὅταν γε δὴ ἀπ' αὐτῆς σπουδαῖός τις γένηται· ἥδη γὰρ οὗτος εἰς τὸ τῆς [2] ἀρετῆς σχῆμα ἤκει. τὰ δ' ἐπαινετά, οἷον ἀρεταί· ἀπὸ γὰρ τῶν κατ' αὐτὰς πράξεων ὁ ἔπαινος γίνεται. τὰ δὲ δυνάμεις, οἷον ἀρχὴ πλοῦτος ἰσχυρὸς κάλλος· τούτοις γὰρ καὶ ὁ σπουδαῖος εὖ ἂν δύνηται χρῆσασθαι καὶ ὁ φαῦλος κακῶς· διὸ δυνάμεις τὰ τοιαῦτα [3]

καλοῦνται ἀγαθὰ. ἀγαθὰ μὲν δὴ εἰσὶν (δοκιμάζεται γὰρ τῇ τοῦ σπουδαίου αὐτῶν ἕκαστον χρήσει, οὐ τῇ τοῦ φαύλου)· τοῖς δ' αὐτοῖς τούτοις συμβέβηκεν ἀγαθοῖς καὶ τὴν τύχην τῆς γενέσεως αὐτῶν αἰτίαν εἶναι. ἀπὸ τύχης γὰρ καὶ πλοῦτος γίνεται καὶ ἀρχὴ καὶ ὅλως ὅσα εἰς δυνάμειος τάξιν ἤκει.

[4] λοιπὸν δὲ καὶ τέταρτον τῶν ἀγαθῶν τὸ σωστικὸν καὶ ποιητικὸν ἀγαθοῦ, οἷον γυμνάσια ὑγείας καὶ εἴ τι ἄλλο τοιοῦτον.

[5] Ἄλλ' ἔτι καὶ ἄλλην ἔχει τὰγαθὰ διαίρεσιν· οἷον ἐστὶ τῶν ἀγαθῶν τὰ μὲν πάντη καὶ πάντως αἰρετά, τὰ δ' οὐ. οἷον ἢ μὲν δικαιοσύνη καὶ αἱ ἄλλαι ἀρεταὶ καὶ πάντη καὶ πάντως αἰρεταί, ἰσχύς δὲ καὶ πλοῦτος καὶ δύναμις καὶ τὰ τοιαῦτα οὔτε πάντη οὔτε πάντως.

[6] Ἔτι καὶ ἄλλως· τῶν γὰρ ἀγαθῶν τὰ μὲν ἐστὶν τέλη τὰ δ' οὐ τέλη, οἷον ἢ μὲν ὑγίεια τέλος, τὰ δὲ τῆς ὑγείας ἕνεκεν οὐ τέλη. καὶ ὅσα οὕτως ἔχει, τούτων αἰεὶ τὸ τέλος βέλτιον, οἷον ἢ ὑγίεια βέλτιον ἢ τὰ ὑγιεινά, καὶ ἀπλῶς αἰεὶ καθόλου τοῦτο βέλτιον οὐ ἕνεκεν καὶ τὰ ἄλλα.

[7] Πάλιν αὐτῶν τῶν τελῶν βέλτιον αἰεὶ τὸ τέλειον τοῦ ἀτελοῦς. τέλειον δὲ ἐστὶν οὗ παραγενομένου μηθενὸς ἔτι προσδεόμεθα, ἀτελές δὲ οὗ παραγενομένου προσδεόμεθα τινός, οἷον τῆς δικαιοσύνης μὲν [μόνον] παραγενομένης πολλῶν προσδεόμεθα, τῆς δὲ εὐδαιμονίας παραγενομένης οὐδενὸς ἔτι προσδεόμεθα. τοῦτο ἄρα ἐστὶν τὸ ἄριστον ἡμῖν ὃ ζητοῦμεν, ὃ ἐστὶ τέλος τέλειον· τὸ δὲ δὴ τέλειον τέλος τὰγαθὸν ἐστὶ καὶ τέλος τῶν ἀγαθῶν.

[8] Μετὰ ταῦτα τοίνυν πῶς τὸ ἄριστον δεῖ σκοπεῖν; πότερον οὕτως ὥς καὶ αὐτοῦ συναριθμουμένου; ἀλλ' ἄτοπον. τὸ γὰρ ἄριστον ἐπειδὴ ἐστὶ τέλος τέλειον, τὸ δὲ τέλειον τέλος ὥς ἀπλῶς εἰπεῖν οὐθὲν ἂν ἄλλο δόξειεν εἶναι ἢ εὐδαιμονία, τὴν δ' εὐδαιμονίαν ἐκ πολλῶν ἀγαθῶν συντίθεμεν· ἐὰν δὴ τὸ βέλτιστον σκοπῶν καὶ αὐτὸ συναριθμῆς, αὐτὸ αὐτοῦ ἔσται βέλτιον. αὐτὸ γὰρ βέλτιστον ἐστίν. οἷον τὰ ὑγιεινὰ θεῖς καὶ τὴν ὑγίειαν, σκόπει τί τούτων πάντων βέλτιστον· βέλτιστον δὲ ἐστὶν ὑγίεια· εἰ δὴ τοῦτο πάντων βέλτιστον, καὶ αὐτὸ [9] αὐτοῦ βέλτιστον. ἄτοπον δὴ συμβαίνει. οὐ δὴ ἴσως οὕτω γε σκεπτέον τὸ βέλτιστον.

Ἀλλὰ ἄρά γε οὕτω πως, οἷον χωρὶς αὐτοῦ; ἢ καὶ τοῦτο ἄτοπον; ἢ γὰρ εὐδαιμονία ἐστὶν ἐκ τινῶν ἀγαθῶν συγκειμένη· τὸ δ' ἐξ ὧν ἀγαθῶν σύγκειται, σκοπεῖν εἰ τοῦτ' ἐστὶν βέλτιον, ἄτοπον· οὐ γάρ ἐστὶν ἄλλο τι χωρὶς τούτων ἢ εὐδαιμονία, ἀλλὰ ταῦτα.

[10] Ἀλλ' ἄρά γε οὕτωςί πως ἂν τις ὀρθῶς σκοποῖτο συγκρίνων τὸ ἄριστον; οἷον αὐτὴν τὴν εὐδαιμονίαν τὴν ἐκ τούτων τῶν ἀγαθῶν οὔσαν συγκρίνων πρὸς ἄλλα ἃ μὴ ἐστὶν ἐν αὐτῇ ἐνόντα, οὕτω τὸ ἄριστον [11] σκοπῶν ὀρθῶς ἂν σκοποῖτο; ἀλλ' οὐκ ἔστιν ἀπλοῦν τὸ ἄριστον ὃ ζητοῦμεν νῦν. οἷον λέγοι ἂν τις εἶναι ἄριστον τὴν φρόνησιν ἀπάντων τῶν ἀγαθῶν καθ' ἐν συγκρινομένων. ἀλλ' ἴσως οὐχ οὕτως ζητητέον ἐστὶν τὸ ἄριστον ἀγαθόν. τὸ γὰρ τέλειον ζητοῦμεν ἀγαθόν, ἡ δὲ φρόνησις μόνη οὔσα οὐ τέλειον· οὐκ ἄρα τοῦτο τὸ ἄριστον ὃ ζητοῦμεν, οὐδὲ τὸ οὕτως ἄριστον.

[3]

[1] Μετὰ τοίνυν τοῦτο ἔχει τὰ ἀγαθὰ ἄλλην διαίρεσιν. ἔστι γὰρ τῶν ἀγαθῶν τὰ μὲν ἐν ψυχῇ, οἷον αἱ ἀρεταί, τὰ δὲ ἐν τῷ σώματι, οἷον ὑγίεια κάλλος, τὰ δ' ἐκτός, πλοῦτος ἀρχὴ τιμὴ ἢ εἴ τι ἄλλο τῶν τοιούτων. τούτων δὲ τὰ ἐν ψυχῇ [2] βέλτιστα. τὰ δ' ἐν ψυχῇ διώριστα ἀγαθὰ εἰς τρία, εἰς φρόνησιν εἰς ἀρετὴν καὶ ἡδονήν.

Ἦδη τοίνυν τὸ μετὰ τοῦτο, ὃ καὶ λέγομεν πάντες καὶ δοκεῖ καὶ τέλος τῶν ἀγαθῶν καὶ τελειότατον εἶναι, ἡ εὐδαιμονία, καὶ τοῦτο ταυτό φαμεν εἶναι [3] τὸ εὖ πράττειν καὶ εὖ ζῆν. τὸ δὲ τέλος ἐστὶν οὐχ ἀπλοῦν ἀλλὰ διττόν· ἐνίων μὲν γὰρ ἐστὶ τὸ τέλος αὐτὴ ἡ ἐνέργεια καὶ ἡ χρῆσις, οἷον τῆς ὀψεως [ἐστὶν ἡ ὄρασις]· καὶ ἔστιν γε ἡ χρῆσις αἰρετωτέρα τῆς ἕξεως· τέλος γὰρ ἡ χρῆσις· οὐδεὶς γὰρ ἂν βούλοιο ἔχειν τὴν ὄψιν μὴ μέλλων ὁρᾶν ἀλλὰ μύειν.

[4] ὁμοίως δὲ καὶ ἐπ' ἀκοῆς καὶ τῶν τοιούτων. ὦν ἄρα καὶ [ἡ] χρῆσις καὶ ἕξις ἐστίν, αἰεὶ βέλτιον καὶ αἰρετώτερον ἡ χρῆσις τῆς ἕξεως· ἡ γὰρ χρῆσις καὶ ἡ ἐνέργεια τέλος, ἡ δ' ἕξις τῆς χρήσεως ἕνεκεν.

[5] Μετὰ τοῦτο τοίνυν τοῦτ' ἐάν τις σκοπῇ ἐπὶ τῶν ἐπιστημῶν πασῶν, ὄψεται οὐκ ἄλλην μὲν ποιοῦσαν οἰκίαν, ἄλλην δὲ σπουδαίαν οἰκίαν, ἀλλὰ τὴν οἰκοδομικὴν· καὶ οὗ ποιητικὸς ὁ οἰκοδόμος, ἡ τούτου ἀρετὴ τοῦ αὐτοῦ τούτου εὖ ποιητική. ὁμοίως [καὶ] ἐπὶ τῶν ἄλλων ἀπάντων.

[4]

[1] Μετὰ τοίνυν τοῦτο ὁρῶμεν ὅτι οὐθενὶ ἄλλῳ ἢ ψυχῇ ζῶμεν· ἐν ψυχῇ δὲ ἐστὶν ἀρετὴ· τὸ αὐτό γέ τοι φαμεν τὴν τε ψυχὴν ποιεῖν καὶ τὴν τῆς ψυχῆς ἀρετὴν. ἀλλ' ἡ μὲν ἀρετὴ ἐν ἐκάστῳ τοῦτο ποιεῖ <εὖ> οὗ ἐστὶν ἀρετὴ, ἡ δὲ ψυχὴ καὶ ἅλλα μὲν, ψυχῇ δὲ ζῶμεν· διὰ τὴν τῆς ψυχῆς ἀρετὴν ἄρα εὖ ζήσομεν.

[2] Τὸ δέ γε εὖ ζῆν καὶ εὖ πράττειν οὐθὲν ἄλλο ἢ τὸ εὐδαιμονεῖν λέγομεν. τὸ ἄρα εὐδαιμονεῖν καὶ ἡ εὐδαιμονία ἐν τῷ εὖ ζῆν ἐστίν, τὸ δ' εὖ ζῆν ἐν τῷ κατὰ τὰς ἀρετὰς ζῆν. τοῦτ' ἄρ' ἐστὶν τέλος καὶ ἡ εὐδαιμονία καὶ τὸ ἄριστον.

[3] Ἐν χρήσει τοίνυν τινὶ ἂν εἴη καὶ ἐνεργεία ἡ εὐδαιμονία. ὧν γὰρ ἦν ἕξις καὶ χρήσις, ἡ χρήσις καὶ ἡ ἐνέργεια τέλος· τῆς δὲ ψυχῆς ἡ ἀρετὴ ἕξις ἐστίν· ἔστιν δὲ καὶ ἐνέργεια καὶ [ἡ] χρήσις αὐτῆς τῶν ἀρετῶν· ὥστε τέλος ἂν εἴη ἡ ἐνέργεια καὶ ἡ χρήσις αὐτῆς· ἡ εὐδαιμονία ἄρ' ἂν εἴη ἐν τῷ κατὰ [4] τὰς ἀρετὰς ζῆν. ἐπειδὴ περ οὖν τὸ ἄριστον ἀγαθὸν ἐστὶν ἡ εὐδαιμονία, καὶ αὕτη τέλος καὶ τέλειον τέλος ἐνεργεία, ζῶντες ἂν κατὰ τὰς ἀρετὰς εὐδαίμονες ἂν εἴημεν καὶ ἔχοιμεν τὸ ἄριστον ἀγαθόν.

[5] Ἐπεὶ δ' οὖν ἐστὶν ἡ εὐδαιμονία τέλειον ἀγαθὸν καὶ τέλος, οὐδὲ τοῦτο δεῖ λανθάνειν ὅτι καὶ ἐν τελείῳ ἔσται. οὐ γὰρ ἔσται ἐν παιδί (οὐ γὰρ ἐστὶ παῖς εὐδαίμων), ἀλλ' ἐν ἀνδρί· οὗτος γὰρ τέλειος.

Οὐδ' ἐν χρόνῳ γε ἀτελεῖ, ἀλλ' ἐν τελείῳ. τέλειος δ' ἂν εἴη χρόνος, ὅσον ἄνθρωπος βιοῖ. καὶ γὰρ λέγεται ὀρθῶς παρὰ τοῖς πολλοῖς ὅτι δεῖ τὸν εὐδαίμονα ἐν τῷ μεγίστῳ χρόνῳ τοῦ βίου κρίνειν, ὥς δέον τὸ τέλειον εἶναι καὶ ἐν χρόνῳ τελείῳ καὶ ἐν ἀνθρώπῳ.

[6] Ὅτι δὲ ἐνέργεια ἐστίν, ἴδιοι ἂν τις καὶ ἐντεῦθεν. ἐν γὰρ τοῖς ὕπνοις, οἷον εἴ τις καθεύδοι διὰ βίου, τὸν τοιοῦτον οὐ πάνυ βουλόμεθα λέγειν εὐδαίμονα εἶναι· τὸ μὲν γὰρ ζῆν αὐτῷ ὑπάρχει, ἀλλὰ τὸ ζῆν αὐτῷ κατὰ τὰς ἀρετὰς οὐχ ὑπάρχει, ὃ ἦν κατὰ τὴν ἐνέργειαν.

[7] Μετὰ τοῦτο τὸ μέλλον λέγεσθαι οὔτε λίαν δόξειεν ἂν οἰκεῖον εἶναι τούτων οὔτε μακρὰν ἀπέχον. οἷον ἐπειδὴ περ ἔστιν, ὥς δοκεῖ, μώριόν τι τῆς ψυχῆς ᾧ τρεφόμεθα, ὃ καλοῦμεν θρεπτικόν (τοῦτο γὰρ εὐλογόν ἐστιν εἶναι· τοὺς γοῦν λίθους ὀρῶμεν ἀδυνάτους τρέφεσθαι ὄντας, ὥστε δῆλον ὅτι τῶν ἐμψύχων ἐστὶ τὸ τρέφεσθαι· εἰ δὲ τῶν ἐμψύχων, ἡ [8] ψυχὴ ἂν εἴη αἰτία· τῆς δὲ ψυχῆς τούτων μὲν τῶν μορίων οὐθὲν αἴτιον ἂν εἴη τοῦ τρέφεσθαι, οἷον τὸ λογιστικόν ἢ τὸ θυμικόν ἢ τὸ ἐπιθυμητικόν, ἄλλο δέ τι παρὰ ταῦτα, ᾧ οὐθὲν ἔχομεν οἰκειότερον [9] ὄνομα ἐπιθεῖναι ἢ θρεπτικόν)· τί οὖν, ἂν τις εἴποι, πότερον καὶ τούτου τοῦ μορίου τῆς ψυχῆς ἔστιν ἀρετὴ; εἰ γὰρ ἔστι, δῆλον ὅτι καὶ ταύτῃ δεήσει ἐνεργεῖν· τῆς γὰρ τελείας ἀρετῆς ἡ ἐνέργεια εὐδαιμονία.

Εἰ μὲν οὖν ἐστὶν ἀρετὴ τούτου ἢ μὴ ἔστιν, ἄλλος λόγος· εἰ δ'

ἄρα ἔστιν, οὐκ ἔστιν ταύτης ἐνέργεια. ὦν γὰρ μὴ ἔστιν ὁρμή, οὐδ' ἐνέργεια τούτων ἔσται· οὐκ ἔοικεν δὲ εἶναι ὁρμή ἐν τῷ μορίῳ τούτῳ, ἀλλ' ὅμοιον ἔοικεν εἶναι τῷ πυρί. καὶ γὰρ ἐκεῖνο ὃ τι ἂν ἐμβάλης καταναλώσει, κἂν μὴ ἐμβάλης, οὐκ ἔχει ὁρμὴν πρὸς τὸ λαβεῖν. οὕτω καὶ τοῦτο τὸ μόριον τῆς ψυχῆς ἔχει· ἂν μὲν γὰρ ἐμβάλης τροφήν, τρέφει, ἂν δὲ μὴ ἐμβάλης τροφήν, οὐκ ἔχει ὁρμὴν τοῦ τρέφειν. διὸ οὐδὲ ἐνέργεια οὐ μὴδὲ ὁρμή. ὥστ' οὐδὲν συνεργεῖ τὸ μόριον τοῦτο πρὸς τὴν εὐδαιμονίαν.

[10]

Μετὰ ταῦτα τοίνυν λεκτέον ἂν εἴη τί ἐστὶν ἡ ἀρετὴ, ἐπεὶπερ ἡ ταύτης ἐνέργειά ἐστιν ἡ εὐδαιμονία. ὥς μὲν οὖν ἀπλῶς εἶπεῖν, ἐστὶν ἡ ἀρετὴ ἔξις ἡ βελτίστη· ἀλλ' ἴσως οὐχ ἰκανὸν οὕτως ἀπλῶς εἶπεῖν, ἀλλὰ σαφέστερον διορίσαι δεῖ.

[5]

[1] Πρῶτον μὲν οὖν λεκτέον ὑπὲρ τῆς ψυχῆς ἐν ἧ ἐγγίνεται, οὐ τί ἐστὶν ἡ ψυχὴ (ὑπὲρ μὲν γὰρ τούτου ἄλλος λόγος), ἀλλ' ὥς τύπῳ διελέσθαι. ἔστιν δ' ἡ ψυχὴ, ὥς φαμέν, εἰς δύο μέρη διηρημένη, εἰς τε τὸ λόγον ἔχον καὶ τὸ ἄλογον. ἐν μὲν δὴ τῷ λόγον ἔχοντι ἐγγίνεται φρόνησις ἀγχίνοια σοφία εὐμάθεια μνήμη καὶ τὰ τοιαῦτα, ἐν δὲ τῷ ἀλόγῳ αὐταὶ αἱ ἀρεταὶ λεγόμεναι, σωφροσύνη δικαιοσύνη ἀνδρεία ὅσαι ἄλλαι τοῦ ἥθους δοκοῦσιν ἐπαινεταὶ [2] εἶναι. κατὰ γὰρ ταύτας ἐπαινετοὶ λεγόμεθα· κατὰ δὲ τὰς τοῦ [τὸν] λόγον ἔχοντος οὐδεὶς ἐπαινεῖται. οὔτε γὰρ ὅτι σοφός, οὐδεὶς ἐπαινεῖται, οὔτε ὅτι φρόνιμος, οὐδ' ὅλως κατὰ τι τῶν τοιούτων οὐθέν. οὐδὲ δὴ τὸ ἄλογον, εἰ μὴ ἡ ὑπηρετικόν ἐστὶν καὶ ὑπηρετεῖ τῷ λόγον ἔχοντι μορίῳ.

[3] Ἔστιν δ' ἡ ἀρετὴ ἡ ἠθικὴ ὑπὸ ἐνδεΐας καὶ ὑπερβολῆς φθειρομένη. ὅτι δὲ ἡ ἐνδεΐα καὶ ἡ ὑπερβολὴ φθείρει, τοῦτ' ἰδεῖν ἔστιν ἐκ τῶν ἠθικῶν (δεῖ δ' ὑπὲρ τῶν ἀφανῶν τοῖς φανεροῖς μαρτυρίοις χρῆσθαι). εὐθέως γὰρ ἐπὶ γυμνασίων ἴδοι ἂν τις· πολλῶν γὰρ γινομένων φθείρεται ἡ ἰσχὺς, ὀλίγων τε ὡσαύτως. ἐπὶ τε ποτῶν καὶ σιτίων ὡσαύτως· πολλῶν τε γὰρ δὴ γινομένων φθείρεται ἡ ὑγίεια, ὀλίγων τε ὡσαύτως, συμμέτρων δὲ γινομένων σώζεται [4] ἡ ἰσχὺς καὶ ἡ ὑγίεια. ὁμοίως δὲ τούτοις συμβαίνει καὶ ἐπὶ σωφροσύνης καὶ ἐπὶ ἀνδρείας καὶ τῶν ἄλλων ἀρετῶν. ἐὰν μὲν γὰρ τινα λίαν ποιήσης ἄφοβον, ὥστε μὴδὲ τοὺς θεοὺς φοβεῖσθαι, οὐκ ἀνδρεῖος ἀλλὰ μαινόμενος, ἂν δὲ φοβούμενον πάντα, δειλός· ἀνδρεῖος ἄρα ἔσται οὔτε ὁ φοβούμενος πάντα [5] οὔτε ὁ μὴθέν. ταῦτ' ἄρα καὶ αὖξει καὶ

φθείρει τὴν ἀρετὴν. καὶ γὰρ οἱ λίαν φόβοι καὶ πάντες φθείρουσι, καὶ οἱ περὶ μηθὲν δὲ ὁμοίως. ἔστιν δ' ἡ ἀνδρεία περὶ φόβους, ὥστε οἱ μέτριοι φόβοι αὐξοῦσι τὴν ἀνδρείαν. ὑπὸ τῶν αὐτῶν ἄρα καὶ αὐξεται καὶ φθίρεται ἡ ἀνδρεία· ὑπὸ φόβων γὰρ τοῦτο πάσχουσιν. ὁμοίως δὲ καὶ αἱ ἄλλαι ἀρεταί.

[6]

[1] Ἦτι οὐ μόνον τοῖς τοιούτοις τὴν ἀρετὴν ἀφορίσειεν ἂν τις, ἀλλὰ καὶ λύπη καὶ ἡδονή. διὰ μὲν γὰρ τὴν ἡδονὴν τὰ φαῦλα πράττομεν, διὰ δὲ τὴν λύπην τῶν καλῶν ἀπεχόμεθα· ὅλως τε οὐκ ἔστιν λαβεῖν ἀρετὴν καὶ κακίαν ἄνευ λύπης καὶ ἡδονῆς. ἔστιν οὖν ἡ ἀρετὴ περὶ ἡδονὰς καὶ λύπας.

[2] Ἡ δ' ἠθικὴ ἀρετὴ ἐντεῦθεν τὰς ἐπωνυμίας ἔχει, εἰ δεῖ παρὰ γράμμα λέγοντα τὴν ἀλήθειαν ὥς ἔχει σκοπεῖν (δεῖ δ' ἴσως). τὸ γὰρ ἦθος ἀπὸ τοῦ ἔθους ἔχει τὴν ἐπωνυμίαν· ἠθικὴ γὰρ καλεῖται διὰ τὸ [3] ἐθίζεσθαι. ᾧ καὶ δῆλον ὅτι οὐδεμία ἡμῖν τῶν ἀρετῶν τῶν τοῦ ἀλόγου μέρους φύσει ἐγγίνεται· οὐθὲν γὰρ τῶν ὄντων φύσει ἔθει ἄλλως γίνεται. οἷον ὁ λίθος καὶ ὅλως τὰ βαρέα πέφυκε κάτω φέρεσθαι· ἂν τις οὖν ἄνω ρίπτῃ πολλάκις καὶ ἐθίξῃ ἄνω φέρεσθαι, ὅμως οὐκ ἂν ποτε ἄνω ἐνεχθεῖη, ἀλλ' αἰεὶ κάτω. ὁμοίως [καί] ἐπὶ τῶν ἄλλων τῶν τοιούτων.

[7]

[1] Μετὰ τοῖνυν τοῦτο δεῖ βουλομένους εἰπεῖν τὸ τί ἐστὶν ἡ ἀρετὴ, εἰδῆσαι τίνα ἐστὶν τὰ ἐν τῇ ψυχῇ γινόμενα. ἔστιν δ' ἃ γίνεται ταῦτα, πάθη δυνάμεις ἔξεις· ὥστε δῆλον ὅτι τούτων ἂν τι εἴη [2] ἀρετὴ. πάθη μὲν οὖν ἐστὶν ὀργὴ φόβος μῖσος πόθος ζῆλος ἔλεος τὰ τοιαῦτα, οἷς εἴωθεν παρακολουθεῖν λύπη καὶ ἡδονή· δυνάμεις δὲ καθ' ἃς παθητικοὶ τούτων λεγόμεθα, οἷον καθ' ἃς δυνατοὶ ἐσμεν ὀργισθῆναι λυπηθῆναι ἐλεῆσαι, [καί] τὰ τοιαῦτα· [3] ἔξεις δ' εἰσὶν καθ' ἃς πρὸς ταῦτα ἔχομεν εὖ ἢ κακῶς, οἷον πρὸς τὸ ὀργισθῆναι, εἰ μὲν λίαν ὀργίλως, κακῶς ἔχομεν πρὸς ὀργήν, εἰ δ' ὅλως μὴ ὀργιζόμεθα ἐφ' οἷς δεῖ, καὶ οὕτως κακῶς ἔχομεν πρὸς ὀργήν. τὸ ἄρα μέσως ἔχειν τὸ μῆτε λίαν [4] ὑπεραλγεῖν μῆτε παντελῶς ἀναλγῆτως ἔχειν. ὅταν οὖν οὕτως ἔχωμεν, εὖ διακείμεθα. ὁμοίως δὲ [καί] πρὸς τὰ ἄλλα τὰ ὅμοια. τὸ γὰρ εὐόρητον καὶ τὸ πρᾶον ἐν μεσότητί ἐστὶν ὀργῆς καὶ ἀναλγησίας τῆς πρὸς ὀργήν. ὁμοίως [καί] ἐπ' ἀλαζονείας καὶ εἰρωνείας. τὸ μὲν γὰρ πλείω προσποιεῖσθαι τῶν ὑπαρχόντων ἔχειν ἀλαζονείας, τὸ δὲ ἐλάττω εἰρωνείας· ἡ ἄρα μεσότης ἡ τούτων ἡ ἀλήθεια ἐστίν.

[8]

[1] Ὅμοίως καὶ ἐπὶ τῶν ἄλλων πάντων. τοῦτο γάρ ἐστι τῆς ἕξεως, τὸ εὖ ἢ κακῶς πρὸς ταῦτα ἔχειν, τὸ δ' εὖ ἔχειν πρὸς ταῦτ' ἐστὶν τὸ μήτε πρὸς τὴν ὑπερβολὴν ἔχειν μήτε πρὸς τὴν ἔνδειαν· πρὸς μεσότητά ἄρα τῶν τοιούτων καθ' ἃ ἐπαινετοὶ λεγόμεθα ἢ ἕξις ἐστὶ τοῦ εὖ ἔχειν, τοῦ δὲ κακῶς [2] πρὸς ὑπερβολὴν καὶ ἔνδειαν. ἐπεὶ τοίνυν ἐστὶν ἡ ἀρετὴ τῶν παθῶν τούτων μεσότης, τὰ δὲ πάθη ἤτοι λυπαί εἰσιν ἢ ἡδοναί ἢ οὐκ ἄνευ λύπης ἢ ἡδονῆς· ἢ ἄρα ἀρετὴ ἐστὶν περὶ λύπας καὶ ἡδονάς, καὶ ἐντεῦθεν ἐστὶ δῆλον.

[3] Ἔστι δὲ καὶ ἄλλα πάθη, ὥς δόξειεν ἂν τινι, ἐφ' ὧν ἡ κακία οὐκ ἐστὶν ἐν ὑπερβολῇ καὶ ἐλλείψει τινί, οἷον μοιχεία καὶ ὁ μοιχός· οὐκ ἐστὶν οὗτος ὁ μᾶλλον τὰς ἐλευθέρων διαφθείρων. ἀλλὰ καὶ τοῦτο, καὶ εἴ τι ἄλλο τοιοῦτόν ἐστιν, ὃ περιέχεται ἡδονῇ τῇ κατ' ἀκολασίαν, ἢ καὶ ὃ ἐν ἐλλείψει καὶ ὃ ἐν ὑπερβολῇ τὸ ψεκτὸν ἔχει.

[9]

[1] Μετὰ τοίνυν τοῦτο ἀναγκαῖόν ἐστιν ἴσως ρηθῆναι τί τῇ μεσότητι ἀντίκειται, πότερον ἡ ὑπερβολὴ ἢ ἡ ἔνδεια. ἐνίαις μὲν γὰρ μεσότησιν ἔνδεια ἐναντίον, ἐνίαις δὲ ὑπερβολή, οἷον ἀνδρεία μὲν οὐχ ἡ θρασύτης ὑπερβολὴ οὕσα, ἀλλ' ἡ δειλία ἔνδεια οὕσα, τῇ δὲ σωφροσύνῃ μεσότητι οὕση ἀκολασίας καὶ ἀναισθησίας τῆς περὶ ἡδονὰς οὐ δοκεῖ ἐναντίον εἶναι ἡ ἀναισθησία ἔνδεια οὕσα, ἀλλ' ἡ ἀκολασία οὕσα ὑπερβολή.

[2] Ἔστι δ' ἀμφοτέρω ἐναντία τῇ μεσότητι, καὶ ἡ ὑπερβολὴ καὶ ἡ ἔνδεια· ἡ γὰρ μεσότης τῆς μὲν ὑπερβολῆς ἐνδεέστερον, τῆς δ' ἐνδείας ὑπερβάλλον. διὸ καὶ οἱ μὲν ἄσωτοι τοὺς ἐλευθερίους ἀνελευθέρους φασὶν εἶναι, οἱ δ' ἀνελεύθεροι τοὺς ἐλευθερίους ἄσώτους, καὶ οἱ μὲν θρασεῖς καὶ προπετεῖς τοὺς ἀνδρείους καλοῦσι δειλοὺς, οἱ δὲ δειλοὶ τοὺς ἀνδρείους προπετεῖς καὶ μαινομένους.

[3] Διὰ δὴ δύο αἰτίας δόξαιμεν ἂν ἀντιτιθέναι τῇ μεσότητι τὴν ὑπερβολὴν καὶ τὴν ἔνδειαν. ἡ γὰρ ἐξ αὐτοῦ τοῦ πράγματος σκοποῦσιν πότερον ἐγγύτερόν ἐστι τοῦ μέσου ἢ πορρώτερον, οἷον ἐλευθεριότητι πότερον ἄσωτία ἢ ἀνελευθερία πορρώτερον. μᾶλλον γὰρ ἂν δόξειεν ἐλευθεριότης ἢ ἄσωτία ἢ ἡ ἀνελευθερία· πορρώτερον ἄρα ἢ [4] ἀνελευθερία. τὰ δὲ πλεῖον ἀπέχοντα τοῦ μέσου ἐναντιώτερα δόξειεν ἂν εἶναι. ἐκ μὲν ἄρα αὐτοῦ τοῦ πράγματος ἡ ἔνδεια ἐναντιώτερον φαίνεται.

Ἔστι δὲ καὶ ἄλλως, οἷον πρὸς ἃ μᾶλλον πεφύκαμεν, ταῦτα

μᾶλλον ἐναντία τῷ μέσῳ. οἷον πεφύκαμεν μᾶλλον ἀκόλαστοι ἢ κόσμιοι εἶναι· ἡ οὖν ἐπίδοσις γίνεται μᾶλλον πρὸς ἃ πεφύκαμεν· πρὸς ἃ δὲ μᾶλλον ἐπιδίδομεν, ταῦτα καὶ μᾶλλον ἐναντία· ἐπιδίδομεν δὲ πρὸς ἀκολασίαν μᾶλλον ἢ πρὸς κοσμιότητα· ὥστ' ἐναντιώτερον ἂν εἶη ὑπερβολὴ μεσότητος· ἡ γὰρ ἀκολασία ὑπερβολὴ σωφροσύνης.

[5]

Ὅ τι μὲν οὖν ἐστὶν ἡ ἀρετὴ, ἐπέσκεπται (μεσότης γὰρ δοκεῖ τις εἶναι τῶν παθῶν, ὥστε δέοι ἂν τὸν μέλλοντα κατὰ τὸ ἦθος εὐδοκιμήσειν τὴν μεσότητα [6] τῶν παθῶν ἐκάστου διατηρεῖν· διὸ καὶ ἔργον ἐστὶν σπουδαῖον εἶναι· ἐν ἐκάστῳ γὰρ τὸ μέσον λαβεῖν ἔργον, οἷον κύκλον μὲν γράψαι παντὸς ἐστί, τὸ δὲ μέσον τὸ ἐν αὐτῷ ἤδη λαβεῖν χαλεπόν, ὁμοίως δὲ καὶ ὀργισθῆναι μὲν ῥάδιον, καὶ τὸ ἐναντίον δὲ τούτῳ, τὸ δὲ μέσῳ ἔχειν χαλεπόν· ἀπλῶς δὲ ἐν ἐκάστῳ τῶν παθῶν ἔστιν ἰδεῖν ὅτι τὸ ἐμπεριέχον τὸ μέσον ῥάδιον ἐστί, τὸ δὲ μέσον χαλεπόν, καθ' ὃ ἐπαινούμεθα· διὸ καὶ σπάνιον τὸ σπουδαῖον).

[7] Ἐπεὶ δ' οὖν ὑπὲρ ἀρετῆς εἴρηται, μετὰ τοῦτ' ἂν εἶη σκεπτέον πότερον δυνατὴ παραγενέσθαι ἢ οὐ, ἀλλ' ὥσπερ Σωκράτης ἔφη, οὐκ ἔφ' ἡμῖν γενέσθαι τὸ σπουδαῖον εἶναι ἢ φαύλους. εἰ γὰρ τις, φησὶν, ἐρωτήσειεν ὄντιναοῦν πότερον ἂν βούλοιο δίκαιος εἶναι ἢ ἄδικος, οὐθεὶς ἂν ἔλοιο τὴν ἀδικίαν. ὁμοίως δ' ἐπ' ἀνδρείας καὶ δειλίας καὶ τῶν ἄλλων [8] ἀρετῶν ἀεὶ ὡσαύτως. δηλὸν δ' ὡς εἰ φαῦλοί τινες εἰσὶν, οὐκ ἂν ἐκόντες εἶησαν φαῦλοι· ὥστε δηλὸν ὅτι οὐδὲ σπουδαῖοι.

[9] Ὁ δὲ τοιοῦτος λόγος οὐκ ἔστιν ἀληθής. διὰ τί γὰρ ὁ νομοθέτης οὐκ ἔῃ τὰ φαῦλα πράττειν, τὰ δὲ καλὰ καὶ σπουδαῖα κελεύει; καὶ ἐπὶ μὲν τοῖς φαύλοις ζημίαν τάττει, ἂν πράττη, ἐπὶ δὲ τοῖς καλοῖς, ἂν μὴ πράττη; καίτοι ἄτοπος ἂν εἶη ταῦτα [10] νομοθετῶν, ἃ μὴ ἔφ' ἡμῖν ἐστὶ πράττειν. ἀλλ' ὡς ἔοικεν, ἔφ' ἡμῖν τὸ σπουδαῖον εἶναι καὶ τὸ φαύλον. - ἔτι δὲ μαρτυροῦσιν οἱ τ' ἔπαινοι καὶ οἱ ψόγοι γινόμενοι. ἐπὶ μὲν γὰρ τῇ ἀρετῇ ἔπαινος, ἐπὶ δὲ τῇ κακίᾳ ψόγος· ἔπαινος δὲ καὶ ψόγος οὐκ ἐπὶ τοῖς ἀκουσίοις· ὥστε δηλὸν ὅτι ὡσαύτως ἔφ' ἡμῖν καὶ τὰ σπουδαῖα ἐστὶ πράττειν καὶ τὰ φαῦλα.

[11] Ἐλεγον δὲ καὶ τοιαύτην τινὰ παραβολήν, βουλόμενοι δεικνύναι ὅτι οὐχ ἐκούσιον. διὰ τί γάρ, φασὶν, ὅταν νοσῶμεν ἢ αἰσχροὶ ὦμεν, οὐδεὶς ψέγει τοὺς τοιούτους; τὸ δ' οὐκ ἀληθές· ψέγομεν γὰρ καὶ τοὺς τοιούτους, ὅταν αὐτοὺς οἰηθῶμεν αἰτίους εἶναι

τοῦ νοσεῖν ἢ τοῦ κακῶς ἔχειν τὸ σῶμα, ὡς ὃν καὶ ἐνταῦθα τὸ ἐκούσιον. ἔοικεν οὖν ἐν τῷ κατ' ἀρετὴν καὶ κακίαν εἶναι τὸ ἐκούσιον.

[10]

[1] Ἐτι δ' ἂν τις τοῦτο ἐναργέστερον καὶ ἐντεῦθεν ἴδοι. πᾶσα γὰρ φύσις γεννητικὴ ἐστὶν οὐσίας τοιαύτης οἷα ἐστίν, οἷον τὰ φυτὰ καὶ τὰ ζῷα· ἀμφοτέρω γὰρ γεννητικά. γεννητικὰ δὲ ἐκ τῶν ἀρχῶν, οἷον τὸ δένδρον ἐκ τοῦ σπέρματος· αὕτη γάρ τις ἀρχή. τὸ δὲ μετὰ τὰς ἀρχὰς οὕτως ἔχει· ὡς γὰρ ἂν ἔχωσιν αἱ ἀρχαί, οὕτως καὶ τὰ ἐκ τῶν [2] ἀρχῶν ἔχει. ἐναργέστερον δ' ἐστὶ κατιδεῖν τοῦτο ἐν τοῖς κατὰ γεωμετρίαν. καὶ γὰρ ἐκεῖ ἐπειδὴ τινες λαμβάνονται ἀρχαί, ὡς ἂν αἱ ἀρχαὶ ἔχωσιν, οὕτω καὶ τὰ μετὰ τὰς ἀρχὰς, οἷον εἰ τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει, τὸ δὲ τετράγωνον τέτταρσιν, καὶ ὡς ἂν μεταβάλλῃ τὸ τρίγωνον, οὕτω καὶ τὸ τετράγωνον συμμεταβάλλει (ἀντιστρέφει γάρ), καὶ ἐὰν τὸ τετράγωνον μὴ ἔχῃ τέτταρσιν ὀρθαῖς ἴσας, οὐδὲ τὸ τρίγωνον ἔξει δυσὶν ὀρθαῖς ἴσας.

[11]

[1] Οὕτω τοίνυν καὶ ὁμοίως τούτοις καὶ ἐπ' ἀνθρώπου. ἐπειδὴ γὰρ γεννητικὸν ἐστὶν ἄνθρωπος οὐσίας, ἐκ τινων ἀρχῶν καὶ τῶν πράξεων ὧν πράττει ἄνθρωπος γεννητικὸν ἐστίν. τί γὰρ ἂν ἄλλο; οὔτε γὰρ ἀψύχων οὐθὲν λέγομεν πράττειν οὔτε τῶν ἐμψύχων τῶν ἄλλων ἔξω ἀνθρώπων. δῆλον οὖν [2] ὅτι ὁ ἄνθρωπος τῶν πράξεων ἐστὶ γεννητικός. ἐπεὶ οὖν ὀρῶμεν μεταβαλλούσας τὰς πράξεις καὶ οὐδέποτε τὰ αὐτὰ πράττομεν, εἰσὶν δὲ αἱ πράξεις γεγενημέναι ἐκ τινων ἀρχῶν, δῆλον ὅτι, ἐπειδὴ αἱ πράξεις μεταβάλλουσιν, καὶ αἱ ἀρχαὶ τῶν πράξεων, ἀφ' ὧν εἰσὶ, μεταβάλλουσιν, ὥσπερ ἔφαμεν παραβάλλοντες [3] ἐπὶ τῶν ἐν γεωμετρίᾳ. ἀρχὴ δ' ἐστὶ πράξεως καὶ σπουδαίας καὶ φαύλης προαίρεσις καὶ βούλησις καὶ τὸ κατὰ λόγον πᾶν. δῆλον τοίνυν ὅτι καὶ αὗται μεταβάλλουσιν. μεταβάλλομεν δὲ καὶ ταῖς πράξεσιν ἐκόντες· ὥστε καὶ ἡ ἀρχὴ [καὶ] ἡ προαίρεσις μεταβάλλει [γὰρ] ἐκουσίως. ὥστε δῆλον ὅτι ἐφ' ἡμῖν ἂν εἴη καὶ σπουδαίοις εἶναι καὶ φαύλοις.

[4] Ἴσως οὖν λέγοι ἂν τις, ἐπειδήπερ ἐπ' ἐμοί ἐστὶν τὸ δικαίον εἶναι καὶ σπουδαίον, ἐὰν βούλωμαι, ἔσομαι πάντων σπουδαιότατος. οὐ δὴ δυνατόν τοῦτο. διὰ τί; ὅτι οὐδ' ἐπὶ τοῦ σώματος γίγνεται τοῦτο. οὐ γὰρ ἂν τις βούληται ἐπιμελεῖσθαι τοῦ σώματος, καὶ δὴ πάντων ἄριστον ἔξει τὸ σῶμα. δεῖ γὰρ μὴ μόνον τὴν ἐπιμέλειαν

ὑπάρχειν, ἀλλὰ καὶ τῇ φύσει γίνεσθαι τὸ σῶμα καλὸν καγαθόν. βέλτιον μὲν οὖν ἔξει τὸ σῶμα, ἄριστα μέντοι πάντων [5] οὐ. ὁμοίως δὲ δεῖ ὑπολαμβάνειν καὶ ἐπὶ ψυχῆς· οὐ γὰρ ἔσται ὁ προαιρούμενος εἶναι σπουδαιότατος, ἂν μὴ καὶ ἡ φύσις ὑπάρξη, βελτίων μέντοι ἔσται.

[12]

[1] Ἐπεὶ οὖν φαίνεται ἐφ' ἡμῖν ὃν τὸ σπουδαῖον εἶναι, ἀναγκαῖον τὸ μετὰ ταῦτα εἰπεῖν ὑπὲρ ἐκούσιον, τί ἐστι τὸ ἐκούσιον· τοῦτο γάρ ἐστι τὸ κυριώτατον πρὸς τὴν ἀρετὴν, τὸ ἐκούσιον. ἐκούσιον δὲ ἀπλῶς μὲν οὕτως ῥηθῆναι ἐστὶν ὃ πράττομεν μὴ ἀναγκαζόμενοι· ἀλλ' ἴσως σαφέστερον λεκτέον ἐστὶν ὑπὲρ αὐτοῦ.

[2] Ἔστιν οὖν καθ' ὃ πράττομεν ὀρεξίς· ὀρέξεως δ' ἐστὶν εἶδη τρία, ἐπιθυμία θυμὸς βούλησις.

Πρῶτον μὲν οὖν τὴν κατ' ἐπιθυμίαν πρᾶξιν ἐπισκεπτέον, πότερον ἐκούσιόν ἐστιν ἢ ἀκούσιον. [οἷον] τὸ μὲν οὖν ἀκούσιον οὐκ ἂν δόξειεν. διὰ τί καὶ πόθεν; ὅτι ὅσα μὴ ἐκόντες πράττομεν, ἀναγκαζόμενοι πράττομεν, ἐπὶ δὲ τοῖς ἐξ ἀνάγκης πραττομένοις πᾶσιν ἔπεται λύπη, τοῖς δὲ δι' ἐπιθυμίαν πραττομένοις ἡδονὴ ἀκολουθεῖ, ὥστε οὕτως γε οὐκ ἂν εἴη τὰ δι' ἐπιθυμίαν πραττόμενα ἀκούσια, ἀλλ' ἐκούσια.

[3] Ἀλλὰ πάλιν ἄλλος λόγος τις τούτῳ ἐναντιοῦται, ὃ ἐπὶ τῇ ἀκρασίᾳ. οὐθεὶς γάρ, φησί, πράττει ἐκὼν τὰ κακά, εἰδὼς ὅτι κακὰ ἐστίν· ἀλλὰ μὴν, φησίν, ὃ γε ἀκρατὴς εἰδὼς ὅτι ταῦτα φαῦλά ἐστιν ὅμως πράττει, καὶ κατ' ἐπιθυμίαν γε πράττει· οὐκ ἄρα [4] ἐκὼν· ἀναγκαζόμενος ἄρα. ἐνταῦθα πάλιν ὁ αὐτὸς λόγος ἀπαντήσεται. καὶ γὰρ εἰ κατ' ἐπιθυμίαν, οὐκ ἐξ ἀνάγκης· τῇ γὰρ ἐπιθυμίᾳ ἡδονὴ ἀκολουθεῖ, τὰ δὲ δι' ἡδονὴν οὐκ ἐξ ἀνάγκης.

Καὶ ἄλλως τοῦτ' ἂν γένοιτο δηλόν, ὅτι ὁ ἀκρατὴς ἐκὼν πράττει. οἱ μὲν γὰρ ἀδικοῦντες ἐκόντες ἀδικοῦσιν, οἱ δὲ ἀκρατεῖς ἄδικοι καὶ ἀδικοῦσιν· ὥστε ὁ ἀκρατὴς ἐκὼν ἂν πράττοι τὰ κατὰ τὴν ἀκρασίαν.

[13]

[1] Ἀλλὰ πάλιν ἄλλος λόγος ἐναντιοῦται, ὅς φησιν οὐχ ἐκούσιον εἶναι. ὁ γὰρ ἐγκρατὴς ἐκὼν πράττει τὰ κατὰ τὴν ἐγκράτειαν· ἐπαινεῖται γάρ, ἐπαινοῦνται δὲ ἐπὶ τοῖς ἐκούσιοις. εἰ δ' ἐστὶν τὸ κατὰ τὴν ἐπιθυμίαν ἐκούσιον, τὸ παρὰ τὴν ἐπιθυμίαν ἀκούσιον· ὁ δ' ἐγκρατὴς παρὰ τὴν ἐπιθυμίαν πράττει· ὥστε ὁ ἐγκρατὴς οὐχ ἐκὼν ἂν

εἷη ἐγκρατής. ἀλλ' οὐ δοκεῖ· οὐδ' ἄρα τὸ κατ' ἐπιθυμίαν ἐκούσιον ἐστίν.

[2] Πάλιν ἐπὶ τῶν κατὰ τὸν θυμὸν ὁμοίως· οἱ γὰρ αὐτοὶ λόγοι οὔτε καὶ κατὰ τῆς ἐπιθυμίας ἀρμόττουσιν, ὥστε τὴν ἀπορίαν ποιήσουσιν· ἔστι γὰρ ἀκρατὴ καὶ ἐγκρατὴ ὀργῆς εἶναι.

[3] Ἔτι λοιπὴ ἐστὶν τῶν ὀρέξεων ὣν διειλόμεθα ἡ βούλησις, πρὸς τὸ ἐπισκέπτεσθαι εἴ ἐστιν ἐκούσιον. ἀλλὰ μὴν οἷ γε ἀκρατεῖς ἐφ' ἃ ὀρμῶσιν, ταῦτα τέως βούλονται· πράττουσιν ἄρα οἱ ἀκρατεῖς τὰ φαῦλα βουλόμενοι. ἐκὼν δέ γε οὐθεὶς τὰ κακὰ εἰδὼς πράττει ὅτι κακὰ ἐστίν· ὁ δὲ ἀκρατής, εἰδὼς τὰ κακὰ ὅτι κακὰ, πράττει βουλόμενος. οὐκ ἄρα ἐκὼν, οὐδ' ἡ βούλησις ἐκούσιον ἄρα ἐστίν.

[4] Ἀλλ' οὗτος ὁ λόγος ἀναιρεῖ ἀκρασίαν καὶ τὸν ἀκρατὴ. εἰ γὰρ μὴ ἐκὼν, οὐκ ἔστιν ψεκτός· ἀλλ' ἔστιν ὁ ἀκρατής ψεκτός· ἐκὼν ἄρα· ἡ ἄρα βούλησις ἐκούσιον.

Ἐπεὶ οὖν λόγοι τινὲς ἐναντίοι φαίνονται, σαφέστερον λεκτέον ὑπὲρ τοῦ ἐκουσίου.

[14]

[1] Πρότερον τοίνυν ἂν εἷη λεκτέον ὑπὲρ βίας καὶ ὑπὲρ ἀνάγκης. ἡ μὲν γὰρ βία ἐστὶν καὶ ἐν τοῖς ἀψύχοις. ἐκάστοις γὰρ ἐστὶ τῶν ἀψύχων οἰκείος τόπος ἀποδοδόμενος, τῷ μὲν πυρὶ ὁ ἄνω, τῇ δὲ γῇ ὁ κάτω· ἔστι μέντοι γε βιάσασθαι καὶ τὸν λίθον [2] ἄνω φέρεσθαι καὶ τὸ πῦρ κάτω. ἔστι δὲ καὶ τὸ ζῷον βιάσασθαι, οἷον ἵππον ἐπ' ὀρθὸν θέοντα ἀντιλαμβάνόμενον ἀποστρέψαι. ὅσοις μὲν οὖν ἐστὶν ἐκτός ἡ αἰτία τοῦ παρὰ φύσιν τι ἢ παρ' ἃ βούλονται ποιεῖν, ἐροῦμεν βιαζόμενοις ἃ ἂν ποιῶσι ποιεῖν· ἐν οἷς δ' ἐν αὐτοῖς ἐστὶν ἡ αἰτία, οὐκέτι τούτους [3] βιάζεσθαι ἐροῦμεν. εἰ δὲ μή, ὁ ἀκρατής ἀντερεῖ, οὐ φάσκων φαῦλος εἶναι· βιαζόμενος γὰρ φήσκει ὑπὸ τῆς ἐπιθυμίας τὰ φαῦλα πράττειν.

[15]

[1] Τοῦ οὖν βιαίου οὗτος ἡμῖν ἔστω ὁ ὁρισμός, ὧν ἐκτός ἐστὶν ἡ αἰτία, ὑφ' ἧς βιάζονται πράττειν (ὧν δ' ἐντὸς καὶ ἐν αὐτοῖς ἡ αἰτία, οὐ βία)· πάλιν δ' ὑπὲρ ἀνάγκης καὶ τοῦ ἀναγκαίου λεκτέον. τὸ δὲ ἀναγκαῖον οὐ πάντως οὐδ' ἐν παντὶ λεκτέον ἐστίν, οἷον ὅσα ἡδονῆς ἕνεκεν πράττομεν. εἰ γὰρ τις λέγοι ὅτι ἠναγκάσθην τὴν τοῦ φίλου γυναῖκα διαφθεῖραι [2] ὑπὸ τῆς ἡδονῆς, ἄτοπος ἂν εἷη. τὸ γὰρ ἀναγκαῖον οὐκ ἐν παντί, ἀλλ' ἤδη ἐν τοῖς ἐκτός, οἷον ὅς ἂν καταβλάπτηται ἀντικαταλλαττόμενός τι ἄλλο μεῖζον ἀναγκαζόμενος

ὑπὸ τῶν πραγμάτων. οἷον ἡναγκάσθην συντονώτερον βαδίσαι εἰς ἀγρόν· εἰ γὰρ μή, ἀπολωλότ' ἂν εὖρον τὰ ἐν ἀγρῷ. ἐν τοῖς τοιούτοις ἄρα τὸ ἀναγκαῖον.

[16]

[1] Ἐπεὶ δὲ τὸ ἐκούσιον ἐν οὐδεμιᾷ ὀρμῇ ἐστίν, λοιπὸν ἂν εἴη τὸ ἐκ διανοίας γιγνόμενον. τὸ γὰρ ἀκούσιόν ἐστι τό τε κατ' ἀνάγκην καὶ κατὰ βίαν γιγνόμενον, καὶ τρίτον ὃ μὴ μετὰ διανοίας γίγνεται. δηλὸν δ' ἐστὶ τοῦτο ἐκ τῶν γιγνομένων. ὅταν γὰρ τις πατάξῃ τινὰ ἢ ἀποκτείνῃ ἢ τι τῶν τοιούτων ποιήσῃ μηδὲν προδιανοηθεὶς, ἄκοντά φασιν ποιῆσαι, ὥς τοῦ ἐκουσίου ὄντος ἐν τῷ [2] διανοηθῆναι. οἷον φασὶ ποτέ τινα γυναῖκα φίλτρον τινὶ δοῦναι πιεῖν, εἴτα τὸν ἄνθρωπον ἀποθανεῖν ὑπὸ τοῦ φίλτρου, τὴν δ' ἄνθρωπον ἐν Ἀρείῳ πάγῳ ἀποφυγεῖν· οὗ παροῦσαν δι' οὐθὲν ἄλλο ἀπέλυσαν ἢ διότι οὐκ ἐκ προνοίας. ἔδωκε μὲν γὰρ φιλία, διήμαρτεν δὲ τούτου· διὸ οὐχ ἐκούσιον ἐδόκει εἶναι, ὅτι τὴν δόσιν τοῦ φίλτρου οὐ μετὰ διανοίας τοῦ ἀπολέσθαι αὐτὸν ἐδίδου. ἐνταῦθα ἄρα τὸ ἐκούσιον πίπτει εἰς τὸ μετὰ διανοίας.

[17]

[1] Ἐτι δὲ λοιπὸν ἐστὶν ἐπισκέψασθαι τὴν προαίρεσιν, πότερόν ἐστιν ὄρεξις, ἢ οὐ. ὄρεξις μὲν γὰρ καὶ ἐν τοῖς ἄλλοις ζῷοις ἐγγίγνεται, προαίρεσις δὲ οὐ· ἢ γὰρ προαίρεσις μετὰ λόγου, λόγος δὲ ἐν οὐδενὶ τῶν ἄλλων ζῶων ἐστίν. ὄρεξις μὲν δὴ οὐκ ἂν εἴη· ἀλλ' ἄρά γε βούλησις; ἢ οὐδὲ τοῦτο; [2] βούλησις μὲν γὰρ ἐστὶν καὶ τῶν ἀδυνάτων, οἷον βουλόμεθα μὲν ἀθάνατοι εἶναι, προαιρούμεθα δὲ οὐ. ἔτι δὲ προαίρεσις μὲν οὐκ ἔστιν τοῦ τέλους, ἀλλὰ τῶν πρὸς τὸ τέλος, οἷον οὐθεὶς προαιρεῖται ὑγιαίνειν, ἀλλὰ τὸ πρὸς τὴν ὑγίειαν προαιρούμεθα, περιπατεῖν, τροχάζειν· βουλόμεθα δὲ τὰ τέλη.

[3] ὑγιαίνειν γὰρ βουλόμεθα. ὥστε δηλὸν καὶ οὕτως ὅτι οὐ ταῦτόν ἢ βούλησις καὶ ἢ προαίρεσις· ἀλλὰ ἢ προαίρεσις ὅπως ἔχειν, ὥσπερ καὶ τοῦνομα αὐτῆς ἔχει, οἷον προαιρούμεθα τόδε ἀντὶ τοῦδε, οἷον τὸ βέλτιον ἀντὶ τοῦ χείρονος. ὅταν οὖν ἀντικαταλλαττώμεθα τὸ βέλτιον ἀντὶ τοῦ χείρονος ἐν αἰρέσει ὄντος, ἐνταῦθα τὸ προαιρεῖσθαι δόξειεν ἂν οἰκεῖον εἶναι.

[4] Ἐπεὶ οὖν ἢ προαίρεσις οὐθὲν τούτων ἐστίν, ἄρα γέ ἐστιν τὸ κατὰ διάνοιαν ἐν προαιρέσει; ἢ οὐδὲ τοῦτο; πολλὰ γὰρ διανοοῦμεθα καὶ δοξάζομεν κατὰ διάνοιαν· ἄρ' οὖν ἃ διανοοῦμεθα, ταῦτα καὶ προαιρούμεθα; ἢ οὐ; πολλάκις γὰρ διανοοῦμεθα ὑπὲρ τῶν ἐν Ἰνδοῖς,

ἀλλ' οὐτι καὶ προαιρούμεθα. οὐκ ἄρα οὐδὲ διάνοιά ἐστιν ἡ προαίρεσις.

[5] Ἐπεὶ οὖν καθ' ἕκαστον τούτων οὐθέν ἐστιν ἡ προαίρεσις, ταῦτα δέ ἐστιν τὰ ἐν τῇ ψυχῇ γινόμενα, ἀναγκαῖον [δὴ] συνδυαζομένων τινῶν τούτων εἶναι τὴν προαίρεσιν.

Ἐπεὶ οὖν ἐστίν, ὥσπερ ἔμπροσθεν ἐλέχθη, ἡ προαίρεσις τῶν πρὸς τὸ τέλος ἀγαθῶν καὶ οὐ τοῦ τέλους, καὶ τῶν δυνατῶν ἡμῖν, καὶ τῶν ἀντιλογίαν παραδιδόντων πότερον τοῦτο ἢ τοῦτο αἰρετόν, δηλονότι δέοι ἂν πρότερον διανοηθῆναι ὑπὲρ αὐτῶν καὶ βουλευσασθαι, εἴθ' ὅταν ἡμῖν φανῇ κρεῖττον διανοηθεῖσιν, οὕτως ὁρμή τις τοῦ πράττειν ἐστίν, καὶ τοῦτο δὴ πράττοντες κατὰ προαίρεσιν δοκοῦμεν πράττειν.

[6] Εἰ τοίνυν ἡ προαίρεσις ὁρεξίς τις βουλευτική μετὰ διανοίας, οὐκ ἔστιν τὸ ἐκούσιον προαιρετόν. ἐκόντες γὰρ πολλὰ πράττομεν πρὸ τοῦ διανοηθῆναι καὶ βουλευσασθαι, οἷον καθίζομεν καὶ ἀνιστάμεθα καὶ ἄλλα πολλὰ τοιαῦτα ἐκόντες μὲν ἄνευ δὲ τοῦ διανοηθῆναι, τὸ δὲ κατὰ προαίρεσιν πᾶν ἦν μετὰ [7] διανοίας. οὐκ ἄρα τὸ ἐκούσιον προαιρετόν, ἀλλὰ τὸ προαιρετὸν ἐκούσιον· ἂν τι γὰρ προαιρώμεθα πράττειν βουλευσάμενοι, ἐκόντες πράττομεν.

Φαίνονται δὲ τινες ὀλίγοι καὶ τῶν νομοθετῶν

διορίζειν τό τε ἐκούσιον καὶ τὸ ἐκ προαιρέσεως ἕτερον ὄν, ἐλάττους τὰς ζημίας ἐπὶ τοῖς ἐκούσίοις ἢ τοῖς κατὰ προαίρεσιν τάττοντες.

[8] Ἔστιν οὖν ἡ προαίρεσις ἐν τοῖς πρακτοῖς, καὶ τούτοις ἐν οἷς ἐφ' ἡμῖν ἐστιν καὶ πρᾶξι καὶ μὴ πρᾶξαι, καὶ οὕτως ἢ μὴ οὕτως, καὶ ἐν οἷς ἔστι λαβεῖν τὸ διὰ τί. τὸ δὲ διὰ τί οὐχ ἀπλοῦν ἐστίν.

[9] ἐν μὲν γὰρ γεωμετρίᾳ, ὅταν φῇ τὸ τετράγωνον τέτταρσιν ὀρθαῖς ἴσας ἔχειν, καὶ ἐρωτᾷ διὰ τί, ὅτι, φησίν, καὶ τὸ τρίγωνον δυσὶν ὀρθαῖς ἴσας ἔχει. ἐν μὲν οὖν τοῖς τοιούτοις ἐκ τῆς ἀρχῆς ὠρισμένης ἔλαβον τὸ διὰ τί· ἐν δέ γε τοῖς πρακτοῖς, ἐν οἷς ἡ προαίρεσις, οὐχ οὕτως (οὐδεμία γὰρ κεῖται ὠρισμένη), ἀλλ' ἂν ἀπαιτῇ τις, διὰ τί τοῦτο ἔπραξας; ὅτι οὐκ ἐνῆν ἄλλως, ἢ ὅτι βέλτιον οὕτως. ἐξ αὐτῶν τῶν συμβαινόντων, ὅποι' ἂν φαίνεται βελτίω εἶναι, [10] ταῦτα προαιρεῖται καὶ διὰ ταῦτα. διὸ δὴ ἐν τοῖς τοιούτοις τὸ βουλευσασθαί ἐστι τὸ πῶς δεῖ, ἐν δὲ ταῖς ἐπιστήμαις οὐ. οὐθεὶς γὰρ βουλεύεται πῶς δεῖ γράψαι τὸ ὄνομα Ἀρχικλέους, ὅτι ἐστίν ὠρισμένον πῶς δεῖ γράψαι τὸ ὄνομα Ἀρχικλέους. ἡ οὖν ἀμαρτία οὐ γίγνεται ἐν τῇ

διανοία, ἀλλ' ἐν τῇ ἐνεργείᾳ τοῦ γράφειν. ἐν οἷς γὰρ μὴ ἐστὶν ἡ ἁμαρτία ἐν τῇ διανοίᾳ, οὐδὲ βουλευόνται ὑπὲρ τούτων· ἀλλ' ἐν οἷς ἤδη ἀόριστόν ἐστι τὸ ὡς δεῖ, [11] ἐνταῦθα ἡ ἁμαρτία. ἔστιν δ' ἐν τοῖς πρακτοῖς τὸ ἀόριστον, καὶ ἐν οἷς διτταὶ αἱ ἁμαρτίαι. ἁμαρτάνομεν οὖν ἐν τοῖς πρακτοῖς καὶ ἐν τοῖς κατὰ τὰς ἀρετὰς ὁμοίως. τῆς γὰρ ἀρετῆς στοχαζόμενοι ἁμαρτάνομεν ἐπὶ τὰς πεφυκυίας ὁδοὺς. ἔστι γὰρ καὶ ἐν ἐλλείψει καὶ ἐν ὑπερβολῇ ἁμαρτία, ἐφ' ἑκάτερα δὲ τούτων φερόμεθα δι' ἡδονὴν καὶ λύπην· διὰ μὲν γὰρ τὴν ἡδονὴν τὰ φαῦλα πράττομεν, διὰ δὲ τὴν λύπην τὰ καλὰ φεύγομεν.

[18]

[1] Ἔτι δ' ἐστὶν ἡ διάνοια οὐχ ὥσπερ αἴσθησις, οἷον τῇ ὄψει οὐκ ἂν δύναιτ' οὐθὲν ἂν ἄλλο ποιῆσαι ἢ ἰδεῖν, οὐδὲ τῇ ἀκοῇ οὐθὲν ἄλλο ἢ ἀκοῦσαι. ὁμοίως δὲ οὐδὲ βουλευόμεθα πότερον δεῖ ἀκοῦσαι τῇ ἀκοῇ ἢ ἰδεῖν. ἡ δὲ διάνοια οὐ τοιοῦτον, ἀλλὰ καὶ τοῦτο δύναται πράττειν καὶ ἄλλα. διὰ [2] τοῦτο βουλευέσθαι ἐνταῦθα ἤδη ὑπάρχει. ἔστιν οὖν ἡ ἁμαρτία ἐν τῇ αἰρέσει τῶν ἀγαθῶν οὐ περὶ τὰ τέλη (ταῦτα μὲν γὰρ ἅπαντες ὁμογνωμονοῦσιν, οἷον τὴν ὑγίειαν ὅτι ἀγαθόν), ἀλλ' ἤδη τὰ κατὰ τὸ τέλος, οἷον πότερον ἀγαθὸν πρὸς ὑγίειαν φαγεῖν τοῦτο ἢ οὔ. μάλιστα οὖν ποιεῖ ἐν τούτοις τὸ σφάλλεσθαι ἡδονὴ καὶ λύπη· τὴν μὲν γὰρ φεύγομεν, τὴν δὲ αἰρούμεθα.

[3] Ἐπεὶ οὖν διήρηται ἐν τίνι ἡ ἁμαρτία καὶ πῶς, λοιπόν ἐστι τίνος ἐστὶν ἡ ἀρετὴ στοχαστική, πότερον τοῦ τέλους ἢ τῶν πρὸς τὸ τέλος, οἷον πότερον [4] τοῦ καλοῦ ἢ τῶν πρὸς τὸ καλόν. πῶς οὖν ἡ ἐπιστήμη; πότερον τῆς οἰκοδομικῆς ἐστὶν ἐπιστήμης τὸ τέλος καλῶς προθέσθαι, ἢ τὰ πρὸς τὸ τέλος ἰδεῖν; ἂν γὰρ τοῦτο καλῶς προθῇται, οἷον καλὴν οἰκίαν ποιῆσαι, καὶ τὰ πρὸς τοῦτο οὐκ ἄλλος τις εὐρήσει καὶ ποιεῖ ἢ οἰκοδόμος. ὁμοίως δὲ καὶ [5] ἐπὶ τῶν ἄλλων ἀπασῶν ἐπιστημῶν. ὡσαύτως ἄρα δόξειεν ἂν ἔχειν καὶ ἐπ' ἀρετῆς, μᾶλλον εἶναι αὐτῆς τὸν σκοπὸν [πρὸς] τὸ τέλος, ὃ δεῖ ὀρθῶς προθέσθαι, ἢ τὰ πρὸς τὸ τέλος· καὶ ἐξ ὧν τοῦτ' ἔσται οὐθεὶς ἄλλος ποιεῖ, καὶ εὐρήσει ἂν δεῖ πρὸς τοῦτο. καὶ εὐλογον δὲ τούτου εἶναι προθετικὴν τὴν ἀρετὴν· ἐν οἷς γὰρ ἡ ἀρχὴ τοῦ βελτίστου ἐστίν, ἕκαστον καὶ προθετικὸν καὶ ποιητικόν. οὐθὲν οὖν βέλτιον τῆς ἀρετῆς ἐστίν· ταύτης γὰρ ἕνεκα καὶ τᾶλλα ἐστίν, [6] καὶ πρὸς ταύτην ἐστὶν ἡ ἀρχή, [καὶ τούτου ἕνεκεν μᾶλλον τὰ πρὸς τοῦτ' ἐστίν· τὸ δὲ τέλος ἀρχῇ τινι ὅμοιον, καὶ τούτου ἕνεκέν ἐστιν ἕκαστον. ἀλλὰ κατὰ τρόπον τοῦτο

ἔσται.] ὥστε δῆλον ὡς καπὶ τῆς ἀρετῆς, ἐπειδὴ βελτίστη ἐστὶν αἰτία, ὅτι τοῦ τέλους ἐστὶ στοχαστικὴ μᾶλλον ἢ τῶν πρὸς τὸ τέλος.

[19]

[1] Ἀρετῆς δέ γ' ἐστὶ τέλος τὸ καλόν. τούτου ἄρ' ἐστὶν ἡ ἀρετὴ] στοχαστικὴ μᾶλλον ἢ ἐξ ὧν ἔσται. ἔστι δὲ καὶ ταῦτα ταύτης. ὅλως δὲ δὴ φαίνεται ἄτοπον· ἴσως γὰρ ἂν ἐν γραφικῇ εἴη τις ἀγαθὸς μιμητής, ὅμως δὲ οὐκ ἂν ἐπαινεθεῖη, ἂν μὴ τὸν σκοπὸν θῇ τὰ βέλτιστα μιμεῖσθαι. τῆς ἀρετῆς ἄρα παντελῶς τοῦτ' ἐστίν, τὸ καλὸν προθέσθαι.

[2] Διὰ τί οὖν, ἂν τις εἴποι, πρότερον μὲν ἐλέγομεν τὴν ἐνέργειαν κρεῖττον εἶναι ἢ τὴν ἔξιν τὴν αὐτήν, νῦν δὲ οὐκ ἐξ οὗ ἡ ἐνέργεια, τοῦτο τῇ ἀρετῇ ἀποδίδομεν ὡς κάλλιον, ἀλλ' ἐν ᾧ οὐκ ἔστιν ἐνέργεια; [3] ναί, ἀλλὰ καὶ νῦν φαμεν τοῦτο ὁμοίως, τὴν ἐνέργειαν τῆς ἔξεως βέλτιον εἶναι. οἱ γὰρ ἄλλοι ἄνθρωποι τὸν σπουδαῖον θεωροῦντες κρίνουσιν ἐκ τοῦ πράττειν, διὰ τὸ μὴ δυνατόν εἶναι δηλῶσαι τὴν ἐκάστου προαίρεσιν ἣν ἔχει, ἐπεὶ εἰ ἦν εἰδέναι τὴν ἐκάστου γνώμην, ὡς ἔχει πρὸς τὸ καλόν, καὶ ἄνευ τοῦ πράττειν σπουδαῖος ἂν ἐδόκει εἶναι.

[Ἐπεὶ δὲ μεσότητάς τινας τῶν παθῶν κατηριθμησάμεθα, λεκτέον ἂν εἴη περὶ ποῖα τῶν παθῶν εἰσίν.]

[20]

[1] Ἐπεὶ οὖν ἐστὶν ἡ ἀνδρεία περὶ θάρρη καὶ φόβους, σκεπτέον ἂν εἴη περὶ ποίους φόβους καὶ θάρρη. ἄρ' οὖν εἰ μὲν τις φοβεῖται μὴ ἀποβάλλῃ τὴν οὐσίαν, οὗτος δειλός, εἰ δέ τις θαρρεῖ περὶ ταῦτα, ἀνδρεῖος; ἢ οὐ; ὁμοίως δ' εἰ τις φοβεῖται νόσον ἢ θαρρεῖ, οὔτε δειλὸν φατέον εἶναι τὸν φοβούμενον οὔτ' ἀνδρεῖον τὸν μὴ φοβούμενον. οὐκ ἄρα ἐν τοῖς τοιούτοις φόβοις καὶ θάρρεσιν ἐστὶν [2] ἡ ἀνδρεία. ἀλλὰ μὴν οὐδ' ἐν τοῖς τοιούτοις, οἷον εἰ μὴ τις φοβεῖται βροντὰς ἢ ἀστραπὰς ἢ ἄλλο τι τῶν ὑπὲρ ἄνθρωπον φοβερῶν, οὐκ ἀνδρεῖος ἀλλὰ μαινόμενός τις. ἐν φόβοις ἄρα καὶ θάρρεσιν ἐστὶν ὁ ἀνδρεῖος τοῖς κατ' ἀνθρώπους· λέγω δὲ οἷον ἃ οἱ πολλοὶ φοβοῦνται ἢ οἱ πάντες, ἐν τούτοις ὁ ὢν θαρραλέος, οὗτος ἀνδρεῖος.

[3] Τούτων τοίνυν διωρισμένων σκεπτέον ἂν εἴη, ἐπειδὴ κατὰ πολλὰ εἰσιν οἱ ἀνδρεῖοι, ὁ ποῖος ἀνδρεῖος. ἔστιν γὰρ καὶ κατ' ἐμπειρίαν τις ἀνδρεῖος, οἷον οἱ στρατιῶται. οὗτοι γὰρ οἶδασιν δι' ἐμπειρίαν ὅτι ἐν τοιούτῳ τόπῳ ἢ ἐν τοιούτῳ καιρῷ ἢ οὕτως ἔχοντι ἀδύνατόν τι παθεῖν. ὁ δὲ ταῦτα εἰδὼς καὶ διὰ ταῦτα ὑπομένων τοὺς

πολεμίους οὐκ [4] ἀνδρείους· ἐὰν γὰρ τούτων μηθὲν ὑπάρχη, οὐχ ὑπομένει. διὸ τοὺς δι' ἐμπειρίαν οὐ φατέον ἀνδρείους.

Οὐδὲ Σωκράτης δὴ ὀρθῶς ἔλεγεν ἐπιστήμην φάσκων εἶναι τὴν ἀνδρείαν. ἡ γὰρ ἐπιστήμη ἐξ ἔθους τὴν ἐμπειρίαν λαβοῦσα ἐπιστήμη γίνεται· τοὺς δὲ δι' ἐμπειρίαν ὑπομένοντας οὐ φαμεν, οὐδ' ἐροῦσιν ἀνδρείους αὐτοὺς εἶναι· οὐκ ἄρα ἡ ἀνδρεία ἐπιστήμη ἂν εἴη.

[5] Πάλιν δ' αὖ εἰσιν ἀνδρεῖοι ἐκ τοῦ ἐναντίου τῆς ἐμπειρίας· οἱ γὰρ ἄπειροι τῶν ἐκβησομένων οὐ φοβοῦνται διὰ τὴν ἀπειρίαν. οὐδὲ δὴ οὐδὲ τούτους φατέον ἀνδρείους.

[6] Εἰσὶν δ' αὖ ἄλλοι δοκοῦντες ἀνδρεῖοι εἶναι διὰ τὰ πάθη, οἷον οἱ ἐρῶντες ἢ οἱ ἐνθουσιάζοντες. οὐδὲ δὴ τούτους φατέον ἀνδρείους εἶναι· ἐὰν γὰρ αὐτῶν τὸ πάθος ἀφαιρεθῇ, οὐκέτι εἰσιν ἀνδρεῖοι, δεῖ δὲ [7] τὸν ἀνδρεῖον ἀεὶ εἶναι ἀνδρεῖον. διὸ οὐδὲ τὰ θηρία οἷον τοὺς σὺς οὐκ ἂν τις εἴποι ἀνδρείους διὰ τὸ ἀμύνεσθαι, ἐπειδὰν πληγέντες λυπηθῶσιν, οὐδὲ δεῖ τὸν ἀνδρεῖον διὰ [τὸ] πάθος εἶναι ἀνδρεῖον.

[8] Πάλιν ἔστιν ἄλλη ἀνδρεία πολιτικὴ δοκοῦσα εἶναι, οἷον εἰ δι' αἰσχύνην τὴν πρὸς τοὺς πολίτας ὑπομένουσι τοὺς κινδύνους καὶ δοκοῦσιν ἀνδρεῖοι εἶναι. σημεῖον δὲ τούτου· καὶ γὰρ Ὅμηρος πεποίηκε τὸν Ἑκτορα λέγοντα

Πουλυδάμας μοι πρῶτος ἐλεγχείην ἀναθήσει,

διὸ οἶεται δεῖν μάχεσθαι. οὐδὲ δὴ τὴν τοιαύτην φατέον εἶναι· ὁ γὰρ αὐτὸς ἐφ' ἐκάστω τούτων διορισμὸς ἀρμόσει. οὐ γὰρ ἀφαιρουμένου μὴ διαμένει ἡ ἀνδρεία, οὐκ ἂν εἴη ἔτι ἀνδρεῖος· ἂν οὖν τὴν αἰσχύνην περιέλω δι' ἣν ἦν ἀνδρεῖος, οὐκέτι ἔσται ἀνδρεῖος.

[9] Ἔτι καὶ ἄλλως εἰσιν ἀνδρεῖοι δοκοῦντες εἶναι οἱ δι' ἐλπίδα καὶ προσδοκίαν ἀγαθοῦ. οὐδὲ δὴ τούτους φατέον εἶναι ἀνδρείους, ἐπειδὴ τοὺς τοιούτους καὶ ἐν τοῖς τοιούτοις ἀνδρείους λέγειν ἄτοπον φαίνεται.

Οὐδένα οὖν τῶν τοιούτων ἀνδρεῖον θετέον εἶναι· τὸν [ὁ] ποῖον οὖν ἀνδρεῖον, καὶ τίς ὁ ἀνδρεῖος [10] σκεπτέον. ὥς ἀπλῶς μὲν εἰπεῖν, ὁ διὰ μηθὲν τῶν προειρημένων ἀνδρεῖος ὢν, ἀλλὰ διὰ τὸ νομίζειν αὐτὸ εἶναι καλόν, καὶ τοῦτο ποιῶν κἂν παρῇ τις κἂν μὴ παρῇ.

Οὐδὲ δὴ παντελῶς ἄνευ πάθους καὶ ὀρμῆς ἐγγίγνεται ἡ ἀνδρεία. δεῖ δὲ τὴν ὀρμὴν γίνεσθαι ἀπὸ τοῦ λόγου διὰ τὸ καλόν. ὁ δὴ ὀρμῶν διὰ λόγον ἔνεκεν τοῦ καλοῦ ἐπὶ τὸ κινδυνεύειν, ἄφοβος ὢν περὶ ταῦτα, οὗτος ἀνδρεῖος, καὶ ἡ ἀνδρεία περὶ [11] ταῦτα. ἄφοβος δὲ οὐχ ὅταν οὕτω συμπέσῃ τῷ ἀνδρεῖῳ ὥστε ὅλως μὴ φοβεῖσθαι. ὁ

μὲν γὰρ τοιοῦτος οὐκ ἀνδρεῖος, ὃ ὅλως μηθέν ἐστι φοβερὸν· οὕτω μὲν γὰρ <ἂν> ὁ λίθος εἶη καὶ τᾶλλα ἄψυχα ἀνδρεῖα· ἀλλὰ δεῖ φοβεῖσθαι μὲν, ὑπομένειν δέ· εἰ γὰρ αὖ μὴ φοβούμενος ὑπομένει, οὐκ ἂν εἶη ἀνδρεῖος.

[12] - ἔτι δὲ καὶ ὥσπερ ἐπάνω διειλόμεθα, περὶ φόβους καὶ κινδύνους οὐ πάντας ἀλλὰ τοὺς ἀναιρετικούς τῆς οὐσίας. - ἔτι δὲ οὐδ' ἐν τῷ τυχόντι καὶ παντὶ χρόνῳ, ἀλλ' ἐν ᾧ οἱ φόβοι καὶ οἱ κίνδυνοι πλησίον εἰσίν. εἰ γάρ τις τὸν εἰς δέκατον ἔτος κίνδυνον μὴ φοβεῖται, οὕτω ἀνδρεῖος· ἐνιοὶ γὰρ θαρροῦσιν διὰ τὸ μακρὰν ἀπέχειν, ἂν δὲ πλησίον γένωνται, ἀποθνήσκουσιν τῷ δέει.

[21]

[1] Ἡ μὲν οὖν ἀνδρεία καὶ ὁ ἀνδρεῖος τοιοῦτος· σωφροσύνη δ' ἐστὶν μεσότης ἀκολασίας καὶ ἀναισθησίας τῆς περὶ τὰς ἡδονάς. ἔστιν γὰρ ἡ σωφροσύνη καὶ ἀπλῶς ἅπαντα ἀρετὴ ἕξις ἡ βελτίστη, ἡ δὲ βελτίστη ἕξις τοῦ βελτίστου ἐστίν, βέλτιστον δὲ τῆς ὑπερβολῆς καὶ τῆς ἐνδείας τὸ μέσον· κατ' ἀμφοτέρα γὰρ εἰσι ψεκτοί, καὶ καθ' ὑπερβολὴν καὶ κατ' ἐνδειαν. ὥστε εἴπερ τὸ μέσον βέλτιστον, ἡ σωφροσύνη μεσότης τις ἂν εἶη ἀκολασίας καὶ ἀναισθησίας.

[2] Μεσότης μὲν οὖν ἂν εἶη τούτων· ἔστιν δὲ ἡ σωφροσύνη περὶ ἡδονὰς καὶ λύπας, οὐ πάσας δὲ οὐδὲ τὰς περὶ πάντα. οὐ γὰρ εἴ τις ἡδεται θεωρῶν γραφὴν ἢ ἀνδριάντα ἢ τι ἄλλο τῶν τοιούτων, καὶ δὴ οὗτος ἀκόλαστος, ὁμοίως δὲ οὐδὲ περὶ ἀκοῆς οὐδὲ περὶ ὁσφρήσεως· ἀλλ' ἐν ἡδοναῖς ταῖς περὶ [3] ἀφὴν καὶ γεῦσιν. οὐδὲ δὴ περὶ ταύτας ἀνὴρ σώφρων ἔσται <ὁ> οὕτως ἔχων ὥστε μὴδ' ὑπὸ μιᾶς τῶν τοιούτων ἡδονῶν μηθέν πάσχειν (ὁ μὲν γὰρ τοιοῦτος ἀναίσθητος), ἀλλ' ἤδη ὁ πάσχων καὶ μὴ ἀγόμενος, ὥστε εἰς ὑπερβολὴν αὐτῶν ἀπολαύων πάντα τᾶλλα ποιεῖσθαι πάρεργα, καὶ αὐτόν γε τὸν ἤδη αὐτοῦ τοῦ καλοῦ ἔνεκεν καὶ μὴ ἄλλου πράττοντα [4] σώφρονα . ὅστις γὰρ τῶν τοιούτων ἡδονῶν τῆς ὑπερβολῆς ἀπέχεται ἢ διὰ φόβον ἢ δι' ἄλλο τι τῶν τοιούτων, οὐ σώφρων. οὐδὲ γὰρ τᾶλλα ζῶα λέγομεν εἶναι σώφρονα ἔξω ἀνθρώπου, διὰ τὸ μὴ εἶναι ἐν αὐτοῖς λόγον, ὃ δοκιμάζοντα τὸ καλὸν αἰροῦνται. πᾶσα γὰρ ἀρετὴ τοῦ καλοῦ καὶ πρὸς τὸ καλὸν ἐστίν. ὥστε εἶη ἂν ἡ σωφροσύνη περὶ ἡδονὰς καὶ λύπας, καὶ ταύτας τὰς ἐν ἀφῇ καὶ γεύσει γινομένας.

[22]

[1] Ἐχόμενον δ' ἂν εἶη τούτου λέγειν ὑπὲρ πραότητος, [καὶ] τί ἐστὶ καὶ ἐν τίσιν. ἔστιν [μὲν] οὖν ἡ πραότης ἀνὰ μέσον ὀργιλότητος

καὶ ἀοργησίας. καὶ ὅλως δὲ δοκοῦσιν αἱ ἀρεταὶ μεσότητές τινες εἶναι. ὅτι δ' εἰσὶ μεσότητες, καὶ οὕτως ἂν τις εἴποι· εἰ γὰρ ἐστὶν ἐν μεσότητι τὸ βέλτιστον, ἢ δ' ἀρετὴ ἐστὶν ἡ βελτίστη ἑξίς, [βέλτιστον δ' [2] ἐστὶ τὸ μέσον,] ἢ ἀρετὴ ἂν εἴη τὸ μέσον. δηλὸν δὲ ἔσται μᾶλλον καὶ καθ' ἕκαστον σκοποῦσιν.

Ἐπειδὴ γὰρ ἐστὶν ὀργίλος ὁ παντὶ καὶ πάντως καὶ ἐπὶ πλεῖον ὀργιζόμενος, καὶ ψεκτὸς δὲ ὁ τοιοῦτος (οὔτε γὰρ παντὶ δεῖ ὀργίζεσθαι οὐτ' ἐπὶ πᾶσιν οὔτε πάντως καὶ ἀεί, οὐδ' αὖ πάλιν οὕτως ἔχειν δεῖ, ὥστε μηθενὶ μηδέποτε· καὶ γὰρ οὗτος [3] ψεκτὸς, ἀνάλγητός γε ὢν). ἐπεὶ τοίνυν καὶ ὁ κατὰ τὴν ὑπερβολὴν ψεκτὸς καὶ ὁ κατὰ τὴν ἑλλειψιν· ὁ μέσος ἂν τούτων εἴη καὶ πρᾶος καὶ ἐπαινετός. οὔτε γὰρ ὁ ἐλλείπων τῇ ὀργῇ οὔτε ὁ ὑπερβάλλον ἐπαινετός, ἀλλ' ὁ μέσως ἔχων πρὸς ταῦτα, οὗτος πρᾶος. καὶ ἡ πραότης δὲ τούτων τῶν παθῶν μεσότης ἂν εἴη.

[23]

[1] Ἐλευθεριότης δὲ ἐστὶν μεσότης ἀσωτίας καὶ ἀνελευθερίας. ἔστιν δὲ περὶ χρήματα τὰ τοιαῦτα πάθη· ὁ τε γὰρ ἄσωτός ἐστιν ὁ ἀναλίσκων εἰς ἃ μὴ δεῖ καὶ πλείω ὧν δεῖ καὶ ὅτε μὴ δεῖ, ὃ τ' ἀνελεύθερος ἐναντίως τούτῳ ὁ μὴ ἀναλίσκων εἰς [2] ἃ δεῖ καὶ ὅσα δεῖ καὶ ὅτε δεῖ. ἀμφοτέρω δὲ οὗτοι ψεκτοί. ἔστι δὲ τούτων ὁ μὲν κατ' ἑλλειψιν ὁ δὲ καθ' ὑπερβολὴν. ὁ ἄρα ἐλευθέριος, ἐπειδὴ ἐστὶν ἐπαινετός, μέσος τις ἂν εἴη τούτων. τίς οὖν ἐστίν; ὁ ἀναλίσκων εἰς ἃ δεῖ καὶ ὅσα δεῖ καὶ ὅτε δεῖ.

[24]

[1] Ἔστι δὲ καὶ τῆς ἀνελευθεριότητος εἶδη πλείω, οἷον κίμβικάς τινας καλοῦμεν καὶ κυμινοπρίστας καὶ αἰσχροκερδεῖς καὶ μικρολόγους. πάντες δ' οὗτοι ὑπὸ τὴν ἀνελευθεριότητα πίπτουσιν. τὸ μὲν γὰρ κακὸν πολυειδές, τὸ δ' ἀγαθὸν μονοειδές, οἷον ἡ μὲν ὑγίεια ἀπλοῦν, ἡ δὲ νόσος πολυειδές. ὁμοίως ἡ μὲν ἀρετὴ ἀπλοῦν, ἡ δὲ κακία πολυειδές. πάντες γὰρ οὗτοι περὶ χρήματά εἰσι ψεκτοί.

[2] Πότερον οὖν τοῦ ἐλευθερίου καὶ τὸ κτήσασθαι ἐστὶ καὶ τὸ παρασκευάσασθαι χρήματα; ἢ οὐ; οὐδὲ γὰρ ἄλλης ἀρετῆς οὐδεμιᾶς. οὔτε γὰρ τῆς ἀνδρείας ἐστὶ τὸ ὅπλα ποιῆσαι, ἀλλ' ἄλλης, ταύτης δὲ λαβούσης τούτοις ὀρθῶς χρήσασθαι, ὁμοίως ἐπὶ σωφροσύνης καὶ τῶν ἄλλων· οὔτε δὴ τῆς ἐλευθεριότητος, ἀλλ' ἤδη χρηματιστικῆς.

[25]

[1] Ἡ δὲ μεγαλοψυχία μεσότης μὲν ἐστὶν χαυνότητος καὶ

μικροψυχίας, ἔστι δὲ περὶ τιμὴν καὶ ἀτιμίαν, καὶ περὶ τιμὴν οὐ τὴν παρὰ τῶν πολλῶν ἀλλὰ τὴν παρὰ τῶν σπουδαίων, καὶ μᾶλλον δὲ δὴ περὶ ταύτην. οἱ γὰρ σπουδαῖοι εἰδότες καὶ κρίνοντες ὀρθῶς τιμῆσουσιν· βουλήσεται οὖν μᾶλλον ὑπὸ τῶν συνειδότην αὐτῷ ὅτι ἄξιός ἐστι τιμῆς τιμᾶσθαι. οὐδὲ γὰρ περὶ πᾶσαν τιμὴν ἔσται, ἀλλὰ περὶ τὴν βελτίστην, καὶ τὸ τίμιον ἀγαθὸν καὶ ἀρχῆς τάξιν ἔχον.

[2] Οἱ μὲν οὖν εὐκαταφρόνητοι ὄντες καὶ φαῦλοι, μεγάλων δ' αὐτοὺς ἀξιοῦντες καὶ πρὸς τούτοις τιμᾶσθαι οἰόμενοι δεῖν, χαῖνοι· ὅσοι δὲ ἐλαττόνων αὐτοὺς ἀξιοῦσιν ἢ προσήκον αὐτοῖς, μικρόψυχοι.

[3] ὁ ἄρα μέσος τούτων ἐστὶν ὃς μήτε ἐλάττονος τιμῆς αὐτὸν ἀξιοῖ ἢ προσήκει, μήτε μείζονος ἢ ἄξιος ἐστίν, μήτε πάσης· οὗτος δ' ἐστὶν ὁ μεγαλόψυχος. ὥστε δὴλον ὅτι ἡ μεγαλοψυχία μεσότης ἐστὶ χαυνότητος καὶ μικροψυχίας.

[26]

[1] Μεγαλοπρέπεια δ' ἐστὶν μεσότης σαλακωνείας καὶ μικροπρεπείας. ἔστιν δ' ἡ μεγαλοπρέπεια περὶ δαπάνας ἃς τῷ πρέποντι γίνεσθαι προσήκει. ὅστις μὲν οὖν δαπανᾷ οὐ μὴ δεῖ, σαλάκων, οἷον εἴ τις ἐστιᾷ ἐρανιστὰς ὡς ἂν γάμους τις ἐστιῶν, ὁ τοιοῦτος σαλάκων (ὁ γὰρ σαλάκων τοιοῦτός ἐστιν, ὁ ἐν ᾧ μὴ δεῖ καιρῷ ἐνδεικνύμενος [2] τὴν ἑαυτοῦ εὐπορίαν)· ὁ δὲ μικροπρεπὴς ὁ ἐναντίος τούτῳ, ὃς οὐ δεῖ μὴ μεγαλείως δαπανῆσει, ἢ τοῦτο μὴ ποιῶν, οἷον εἰς γάμους ἢ χορηγίαν δαπανῶν, μὴ ἀξίως ἀλλ' ἐνδεῶς, ὁ τοιοῦτος μικροπρεπής.

[3] Ἡ δὲ μεγαλοπρέπεια καὶ ἀπὸ τοῦ ὀνόματος φανερά ἐστιν οὕσα τοιαύτη οἷαν λέγομεν· ἐπεὶ γὰρ ἐν τῷ καιρῷ τῷ πρέποντι τὸ μέγα δαπανᾷ, ὀρθῶς τῇ μεγαλοπρεπείᾳ τοῦνομα κεῖται. ἡ μεγαλοπρέπεια ἄρα ἂν εἴη, ἐπειδὴ ἐστὶν ἐπαινετὴ, μεσότης τις ἐλλείψεως καὶ ὑπερβολῆς τῆς περὶ δαπάνας τὰς προσηκούσας, ἐν οἷς δεῖ.

[4] Εἰσὶ δέ, ὡς οἴονται, καὶ πλείους μεγαλοπρέπειαι, οἷον φασὶ μεγαλοπρεπῶς τ' ἐβάδισε, καὶ ἄλλαι δὴ τοιαῦται μεγαλοπρέπειαι μεταφοραῖς λέγονται, οὐ κυρίως· οὐ γὰρ ἐστὶν ἐν τούτοις μεγαλοπρέπεια, ἀλλ' ἐν οἷς εἰρήκαμεν.

[27]

[1] Νέμεσις δὲ ἐστὶν μεσότης φθονερίας καὶ ἐπιχαιρεκακίας· ἀμφοτέραι γὰρ αὗται ψεκταὶ εἰσίν, ὁ δὲ νεμεσητικὸς ἐπαινετός. ἔστι δ' ἡ νέμεσις περὶ ἀγαθὰ, ἃ τυγχάνει ὑπάρχοντα ἀναξίῳ ὄντι, λυπὴ τις. νεμεσητικὸς οὖν ὁ ἐπὶ τοῖς τοιούτοις λυπητικός. καὶ ὁ αὐτός γε

πάλιν οὗτος λυπήσεται, ἂν τινα ἴδῃ κακῶς πράττοντα ἀνάξιον ὄντα.

[2] Ἡ μὲν οὖν νέμεσις καὶ ὁ νεμεσητικὸς ἴσως τοιοῦτος, ὁ δὲ γε φθονερός ἐναντίος τούτῳ. ἀπλῶς γάρ, ἂν τε ἄξιός τις ᾗ ἂν τε μὴ τοῦ εὖ πράττειν, λυπήσεται. ὁμοίως τούτῳ ὁ ἐπιχαιρέκακος ἡσθήσεται κακῶς πράττοντι καὶ τῷ ἀξίῳ καὶ τῷ ἀναξίῳ. ὁ δὲ γε νεμεσητικὸς οὐ [τοιοῦτος], ἀλλὰ μέσος τίς ἐστι τούτων.

[28]

[1] Σεμνότης δὲ ἐστὶν αὐθαδείας ἀνὰ μέσον τε καὶ ἀρεσκείας, ἔστιν δὲ περὶ τὰς ἐντεύξεις. ὁ τε γὰρ αὐθάδης τοιοῦτός ἐστιν οἷος μηθενὶ ἐντυχεῖν μηδὲ διαλεγῆναι (ἀλλὰ τοῦνομα ἔοικεν ἀπὸ τοῦ τρόπου κεῖσθαι· ὁ γὰρ αὐθάδης αὐτοάδης τις ἐστίν, [2] ἀπὸ τοῦ αὐτὸς αὐτῷ ἀρέσκειν)· ὁ δὲ ἄρεσκος τοιοῦτος οἷος πᾶσιν ὁμιλεῖν καὶ πάντως καὶ πανταχῇ. οὐδέτερος δὲ τούτων ἐπαινετός, ὁ δὲ γε σεμνὸς ἀνὰ μέσον τούτων ὢν ἐπαινετός· οὔτε γὰρ πρὸς πάντας, ἀλλὰ πρὸς τοὺς ἀξίους, οὔτε πρὸς οὐθένα, ἀλλὰ πρὸς τοὺς αὐτοὺς τούτους.

[29]

[1] Αἰδὼς δ' ἐστὶ μεσότης ἀναίσχυντίας καὶ καταπλήξεως, ἔστιν δὲ περὶ πράξεις καὶ λόγους. ὁ μὲν γὰρ ἀναίσχυντός ἐστιν ὁ ἐν παντὶ καὶ πρὸς πάντας λέγων καὶ πράττων ἃ ἔτυχεν, ὁ δὲ καταπεπληγμένος ὁ ἐναντίος τούτῳ, ὁ πάντα καὶ [πρὸς] πάντας εὐλαβούμενος καὶ πρᾶξαι καὶ εἰπεῖν (ἄπρακτος γὰρ ὁ τοιοῦτος, ὁ πάντα καταπληττόμενος)· [2] ἡ δὲ αἰδὼς καὶ ὁ αἰδήμων μεσότης τις τούτων. οὔτε γὰρ ἅπαντα καὶ πάντως, ὡς ὁ ἀναίσχυντος, καὶ ἔρεῖ καὶ πράξει, οὔτε ὡς ὁ καταπλήξ, ἐν παντὶ καὶ πάντως εὐλαβηθήσεται, ἀλλὰ πράξει καὶ ἔρεῖ ἐν οἷς δεῖ καὶ ἃ δεῖ καὶ ὅτε δεῖ.

[30]

[1] Εὐτραπεία δ' ἐστὶ μεσότης βωμολοχίας καὶ ἀγροικίας, ἔστιν δὲ περὶ [τὰ] σκώμματα. ὁ τε γὰρ βωμολόχος ἐστὶν ὁ πάντα καὶ πᾶν οἰόμενος δεῖν σκώπτειν, ὁ τε ἀγροικὸς ὁ μῆτε σκώπτειν βουλόμενος δεῖν μῆτε σκωφθῆναι, ἀλλ' ὀργιζόμενος· [2] ὁ δ' εὐτράπελος ἀνὰ μέσον τούτων, ὁ μῆτε πάντας καὶ πάντως σκώπτων μῆτ' αὐ[τὸς] ἀγροικὸς ὢν. ἔσται δὲ ὁ εὐτράπελος διττῶς πως λεγόμενος· καὶ γὰρ ὁ δυνάμενος σκῶψαι ἐμμελῶς, καὶ ὃς ἂν ὑπομείνῃ σκωπτόμενος, εὐτράπελος· καὶ ἡ εὐτραπεία τοιαύτη.

[31]

[1] Φιλία δ' ἐστὶν μεσότης κολακείας καὶ ἔχθρας, ἔστιν δὲ περὶ πράξεις καὶ λόγους· ὁ μὲν γὰρ κόλαξ ἐστὶν ὁ πλειὸν τῶν

προσηκόντων καὶ ὄντων προστιθείς, ὁ δὲ ἀπεχθητικὸς ἐχθρὸς καὶ τῶν ὑπαρχόντων περιαιρῶν. οὐδέτερος οὖν ὀρθῶς [2] ἐπαινετὸς ἐστίν, ὁ δὲ φίλος ἀνὰ μέσον τούτων· οὔτε γὰρ πλείω τῶν ὑπαρχόντων προσθήσει, οὔτ' ἐπαινέσει τὰ μὴ προσήκοντα, οὔτ' αὖ πάλιν ἐλάττω ποιήσει, οὔτε πάντως ἐναντιώσεται παρὰ τὸ δοκοῦν αὐτῷ.

[32]

[1] Ὁ μὲν οὖν φίλος τοιοῦτος· ἀλήθεια δέ ἐστιν μεταξὺ εἰρωνείας καὶ ἀλαζονείας. ἔστι δὴ περὶ λόγους, οὐ πάντας δέ. ὁ μὲν γὰρ ἀλαζῶν ἐστίν ὁ πλείω τῶν ὑπαρχόντων αὐτῷ προσποιούμενος εἶναι, ἢ εἰδέναι ἢ μὴ οἶδεν, ὁ δ' εἴρων ἐναντίος τούτῳ καὶ ἐλάττω τῶν ὑπαρχόντων προσποιούμενος αὐτῷ εἶναι, καὶ ἢ οἶδεν μὴ φάσκων, ἀλλ' ἐπικρυπτόμενος [2] τὸ εἰδέναι. ὁ δὲ ἀληθὴς οὐδέτερον τούτων ποιήσει. οὔτε γὰρ προσποιήσεται πλείω τῶν ὑπαρχόντων οὔτ' ἐλάττω, ἀλλὰ τὰ ὑπάρχοντα αὐτῷ ταῦτα φήσει καὶ εἶναι καὶ εἰδέναι.

Εἰ μὲν οὖν εἰσιν αὗται ἀρεταὶ ἢ μὴ ἀρεταί, ἄλλος ἂν εἶη λόγος· ὅτι δὲ μεσότητές εἰσι τῶν εἰρημένων, δηλον. οἱ γὰρ κατ' αὐτὰς ζῶντες ἐπαινοῦνται.

[33]

[1] Περὶ δὲ δικαιοσύνης λοιπὸν ἂν εἶη εἰπεῖν, τί ἐστὶ καὶ ἐν τίσιν καὶ περὶ ποῖα.

Πρῶτον μὲν οὖν εἰ λάβοιμεν τί ἐστὶ τὸ δίκαιον, ἔστιν δὴ διττὸν τὸ δίκαιον, ὧν τὸ μὲν ἐστὶ κατὰ [2] νόμον. δίκαια γὰρ φασιν εἶναι ἢ ὁ νόμος προστάττει. ὁ δὲ νόμος κελεύει τὰνδρεῖα πράττειν καὶ τὰ σώφρονα καὶ ἀπλῶς ἅπαντα ὅσα κατὰ τὰς ἀρετὰς λέγεται. διὸ καί, φασίν, δοκεῖ ἡ δικαιοσύνη τελεία τις ἀρετὴ εἶναι· εἰ γὰρ δίκαια μὲν ἐστὶν ἢ ὁ νόμος κελεύει ποιεῖν, ὁ δὲ νόμος τὰ κατὰ πάσας ἀρετὰς ὄντα προστάττει, ὁ ἄρα τοῖς κατὰ νόμον ἐμμένων δικαίοις τελείως σπουδαῖος ἔσται, ὥστε ὁ δίκαιος καὶ ἡ δικαιοσύνη τελεία τις ἀρετὴ ἐστίν.

[3] Ἐν μὲν δὴ τι δίκαιον ἐν τε τούτοις ἐστὶ καὶ περὶ ταῦτα· ἀλλὰ μὴν οὐ τοῦτο τὸ δίκαιον οὐδὲ τὴν περὶ ταῦτα δικαιοσύνην ζητοῦμεν. κατὰ μὲν γὰρ ταῦτα τὰ δίκαια ἔστιν καθ' ἑαυτὸν ὄντα δίκαιον εἶναι (ὁ γὰρ σώφρων καὶ ὁ ἀνδρεῖος καὶ ὁ ἐγκρατὴς καὶ αὐτὸς καθ' ἑαυτὸν ἐστὶ τοιοῦτος)· ἀλλὰ τὸ δίκαιον τὸ πρὸς ἕτερον ἄλλο τοῦ εἰρημένου κατὰ νόμον δικαίου ἐστίν. οὐ γὰρ ἔστιν ἐν τοῖς πρὸς ἕτερον δικαίοις οὓσιν καθ' αὐτὸν εἶναι δίκαιον. τοῦτο δ' ἐστὶν ὃ ζητοῦμεν δίκαιον

καὶ τὴν δικαιοσύνην τὴν περὶ ταῦτα.

[4] Τὸ τοίνυν δίκαιόν ἐστιν τὸ πρὸς ἕτερον ὡς ἀπλῶς εἰπεῖν τὸ ἴσον. τὸ γὰρ ἄδικον τὸ ἄνισον ἐστίν· ὅταν γὰρ τῶν μὲν ἀγαθῶν τὰ μείζω αὐτοῖς νέμωσι, τῶν δὲ κακῶν τὰ ἐλάσσονα, ἄνισον τοῦτ' ἐστί, καὶ [5] οὕτως ἀδικεῖν καὶ ἀδικεῖσθαι οἴονται. δῆλον ἄρα ὅτι ἐπειδὴ ἡ ἀδικία ἐν ἀνίσοις, ἡ δικαιοσύνη καὶ τὸ δίκαιον ἐν ἰσότητι συμβολαίων. ὥστε δῆλον ὅτι ἡ δικαιοσύνη μεσότης τις ἂν εἴη ὑπεροχῆς καὶ [6] ἐλλείψεως καὶ πολλοῦ καὶ ὀλίγου. ὃ τε γὰρ ἄδικος τῷ ἀδικεῖν πλείον ἔχει, καὶ ὁ ἀδικούμενος δὲ τῷ ἀδικεῖσθαι ἔλαττον· τὸ δέ γε μέσον τούτων δίκαιον ἐστί. τὸ δὲ μέσον ἴσον· ὥστε τὸ ἴσον ἂν πλείονος καὶ ἐλάττονος εἴη δίκαιον, καὶ δίκαιος δὲ ὁ τὸ ἴσον [7] βουλόμενος ἔχειν. τὸ δέ γε ἴσον ἐν ἐλαχίστοις δυσὶν ἐγγίνεται· τὸ ἄρα πρὸς ἕτερον ἴσον εἶναι δίκαιον ἐστί, καὶ δίκαιος ὁ τοιοῦτος ἂν εἴη.

[8] Ἐπεὶ οὖν ἡ δικαιοσύνη ἐν δικαίῳ καὶ ἐν ἴσῳ καὶ ἐν μεσότητι, «καὶ» τὸ μὲν δίκαιόν [ἐν] τισὶ λέγεται δίκαιον, τὸ δὲ ἴσον ἐν τισὶν ἴσον, τὸ δὲ μέσον τισὶ μέσον· ὥστε ἡ δικαιοσύνη καὶ τὸ δίκαιον ἔσται καὶ πρὸς τινὰς καὶ ἐν τισίν.

[9] Ἐπεὶ οὖν ἐστὶ τὸ δίκαιον ἴσον, καὶ τὸ τῷ ἀνάλογον ἴσον δίκαιον ἂν εἴη. τὸ δ' ἀνάλογον ἐν τέτταρσι γίνεται ἐλαχίστοις· ὡς γὰρ τὸ Α πρὸς τὸ Β, τὸ Γ πρὸς τὸ Δ. οἷον ἀνάλογόν ἐστιν τὸν τὰ πολλὰ κεκτημένον πολλὰ εἰσφέρειν, τὸν δὲ τὰ ὀλίγα κεκτημένον ὀλίγα· πάλιν ὁμοίως τὸν μὲν πολλὰ πεπονηκότα πολλὰ λαμβάνειν, τὸν δὲ ὀλίγα πεπονηκότα ὀλίγα λαμβάνειν. ὡς δὲ ἔχει ὁ πεπονηκὼς πρὸς τὸν μὴ πεπονηκότα, οὕτω τὰ πολλὰ πρὸς τὰ ὀλίγα. ὡς δὲ ὁ πεπονηκὼς πρὸς τὰ πολλὰ, οὕτως ὁ μὴ πεπονηκὼς πρὸς τὰ ὀλίγα.

[10] Ἔοικεν δὲ καὶ Πλάτων τῇ ἀναλογίᾳ ταύτῃ τοῦ δικαίου χρησθαι ἐν τῇ πολιτείᾳ. ὁ μὲν γὰρ γεωργός, φησί, σῆτον ποιεῖ, ὁ δ' οἰκοδόμος οἰκίαν, ὁ δὲ ὑφάντης ἱμάτιον, ὁ δὲ σκυτοτόμος ὑπόδημα. ὁ μὲν οὖν γεωργὸς τῷ οἰκοδόμῳ σῆτον δίδωσιν, ὁ δ' οἰκοδόμος τῷ γεωργῷ οἰκίαν· ὁμοίως δὲ οἱ ἄλλοι πάντες οὕτως ἔχουσιν ὥστε τὰ παρ' αὐτοῖς ἀντικαταλλάττεσθαι τῶν παρὰ τοῖς ἄλλοις.

[11] Ἔστιν δ' ἡ ἀναλογία αὕτη· ὡς γὰρ ὁ γεωργὸς τῷ οἰκοδόμῳ, οὕτως ὁ οἰκοδόμος τῷ γεωργῷ· ὁμοίως τῷ σκυτεῖ, τῷ ὑφάντῃ, τοῖς ἄλλοις πᾶσιν ἡ αὕτη ἀναλογία πρὸς ἀλλήλους γίνεται· καὶ συνέχει δὴ αὕτη «ἡ» ἀναλογία τὴν πολιτείαν. ὥστε τὸ δίκαιον ἔοικεν εἶναι τὸ ἀνάλογον. τὸ γὰρ δίκαιον συνέχει τὰς πολιτείας, τὸ αὐτὸ δ' ἐστὶ τὸ

δίκαιον τῷ ἀνάλογον.

[12] Ἐπεὶ δὲ ὁ οἰκοδόμος πλείονος ἄξιον ποιεῖ τὸ αὐτοῦ ἔργον ἢ ὁ σκυτεὺς, καὶ ἦν ἔργον ἀντικαταλλάττεσθαι [καὶ] τῷ σκυτεῖ πρὸς τὸν οἰκοδόμον, ἀνθ' ὑποδημάτων δ' οὐκ ἦν οἰκίαν λαβεῖν, ἐνταῦθα ἤδη ἐνόμισαν, οὗ ταῦτα πάντα ὦνητὰ ἐστίν, ἀργύριον προσαγορεύσαντες νόμισμα, τούτῳ χρῆσθαι, καὶ τὴν ἀξίαν ἕκαστον ἐκάστου διδόντας τὴν ἄλλαξιν ποιεῖσθαι παρ' ἀλλήλων, καὶ τούτῳ τὴν πολιτικὴν κοινωνίαν συνέχειν.

[13] Ἐπεὶ οὖν τὸ δίκαιόν ἐστιν ἐν τούτοις καὶ τοῖς εἰρημένοις ἔμπροσθεν, ἡ περὶ ταῦτα δικαιοσύνη ἂν εἴη τῇ ἔξει ὁρμὴν ἔχουσα μετὰ προαιρέσεως περὶ ταῦτα καὶ ἐν τούτοις.

Ἔστιν δὲ δίκαιον καὶ τὸ ἀντιπεπονθός, οὐ μέντοι γε ὥς οἱ Πυθαγόρειοι ἔλεγον. ἐκεῖνοι μὲν γὰρ ᾤοντο δίκαιον εἶναι, ἃ τις ἐποίησεν, ταῦτ' ἀντιπαθεῖν· τὸ δὲ τοιοῦτον οὐκ ἔστιν πρὸς ἅπαντας. [14] οὐ γάρ ἐστι δίκαιον οἰκέτῃ πρὸς ἐλεύθερον ταυτόν· ὁ οἰκέτης γὰρ ἐὰν πατάξῃ τὸν ἐλεύθερον, οὐκ ἔστιν δίκαιος ἀντιπληγῆναι, ἀλλὰ πολλάκις. καὶ τὸ ἀντιπεπονθός δὲ δίκαιόν ἐστιν ἐν τῷ ἀνάλογον. ὥς γὰρ ὁ ἐλεύθερος ἔχει πρὸς τὸν δοῦλον τῷ βελτίῳ εἶναι, οὕτως τὸ ἀντιποιῆσαι πρὸς τὸ ποιῆσαι. ὁμοίως δὲ καὶ ἐλευθέρῳ πρὸς ἐλεύθερον ἔξει. οὐ γὰρ δίκαιον, εἴ τις τὸν ὀφθαλμὸν ἐξέκοψεν τινός, ἀντεκκοπῆναι μόνον, ἀλλὰ πλείονα παθεῖν, ἀκολουθήσαντα τῇ ἀναλογίᾳ· καὶ γὰρ ἦρξε πρότερος καὶ ἠδίκησεν, ἀδικεῖ δὲ κατ' ἀμφοτέρα, ὥστε ἀνάλογον καὶ τὰ ἀδικήματα, καὶ τὸ ἀντιπαθεῖν πλείω ὢν ἐποίησεν δίκαιον ἐστίν.

[15] Ἐπεὶ δὲ τὸ δίκαιον πολλαχῶς λέγεται, διοριστέον ἂν εἴη ὑπὲρ ποίου δικαίου ἐστὶν ἡ σκέψις.

Ἔστιν δὴ δίκαιόν τι, ὥς φασίν, οἰκέτῃ πρὸς δεσπότην καὶ υἱῷ πρὸς πατέρα. τὸ δ' ἐν τούτοις δίκαιον ὁμωνύμως ἂν δόξειεν λέγεσθαι τῷ πολιτικῷ δικαίῳ (ἐστὶν γὰρ <τὸ> δίκαιον, ὑπὲρ οὗ ἐστὶν ἡ [16] σκέψις, τὸ πολιτικὸν δίκαιον)· τοῦτο γὰρ μάλιστα ἐστὶν ἐν ἰσότητι (κοινωνοὶ γὰρ οἱ πολῖται τινες, καὶ ὅμοιοι βούλονται εἶναι τῇ φύσει, τῷ δὲ τρόπῳ ἕτεροι), τῷ δὲ υἱῷ πρὸς πατέρα καὶ οἰκέτῃ πρὸς δεσπότην οὐκ ἂν δόξειεν εἶναι δίκαιον οὐθέν. οὔτε γὰρ τῷ ποδὶ τῷ ἐμῷ πρὸς ἐμὲ οὔτε τῇ χειρὶ, ὁμοίως δὲ οὐδ' ἐκάστῳ τῶν μορίων· ὡσαύτως ἂν οὖν δόξειεν ἔχειν καὶ ὁ υἱὸς πρὸς πατέρα· ὥσπερ γὰρ μέρος τί ἐστι τοῦ πατρὸς ὁ υἱός. πλην ὅταν ἤδη λάβῃ τὴν τοῦ ἀνδρὸς τάξιν καὶ χωρισθῇ ἀπ' αὐτοῦ, τότε ἤδη ἐν ἰσότητι καὶ ὁμοιότητι ἐστὶν

τῷ πατρί· οἱ δὲ πολῖται τοιοῦτοί τινες ἐθέλουσιν εἶναι.

[17] Ὡς δ' αὐτως οὐδ' οἰκέτη πρὸς δεσπότην ἐστὶ δίκαιον διὰ τὴν αὐτὴν αἰτίαν· τοῦ γὰρ δεσπότης τί ἐστὶν ὁ οἰκέτης· ἀλλὰ δὴ καὶ εἰ ἐστὶν αὐτῷ δίκαιον, τὸ οἰκονομικὸν δίκαιον πρὸς αὐτὸν ἐστίν. οὐ τοῦτο δέ γε ἡμεῖς ζητοῦμεν, ἀλλὰ τὸ πολιτικόν· ἐν ἰσότητι γὰρ καὶ ὁμοίότητι τὸ πολιτικὸν δίκαιον ἔοικεν εἶναι.

[18] Ἀλλὰ δὴ τὸ μὲν ἐν γυναικὸς καὶ ἀνδρὸς κοινωνία δίκαιόν ἐστιν ἐγγὺς τοῦ πολιτικοῦ δικαίου· χειρὸν μὲν γάρ ἐστιν ἡ γυνὴ τοῦ ἀνδρός, ἀλλ' οἰκειότερον, καὶ μετέχει ἰσότητός πως μᾶλλον, διότι ἐγγὺς τῆς πολιτικῆς κοινωνίας ὁ βίος αὐτῶν, ὥστε καὶ τὸ δίκαιον τὸ γυναικὶ πρὸς ἄνδρα μάλιστα πως ἤδη τῶν ἄλλων πολιτικὸν ἐστίν.

[19] Ἐπεὶ οὖν ἐστὶ δίκαιον τὸ ἐν πολιτικῇ κοινωνίᾳ ὄν, ἡ δικαιοσύνη καὶ ὁ δίκαιος περὶ τὸ πολιτικὸν δίκαιον ἔσται.

Τῶν δὲ δικαίων ἐστὶ τὰ μὲν φύσει τὰ δὲ νόμῳ. δεῖ δ' οὕτως ὑπολαμβάνειν μὴ ὥς μηδέποτε ἂν μεταπεσόντα· καὶ γὰρ τὰ φύσει ὄντα μεταλαμβάνουσι [20] μεταβολῆς. λέγω δ' οἷον εἰ τῇ ἀριστερᾷ μελετῶμεν πάντες ἀεὶ βάλλειν, γινοίμεθα ἂν ἀμφιδέξιοι· ἀλλὰ φύσει γε ἀριστερὰ ἐστίν, καὶ τὰ δεξιὰ οὐδὲν ἥττον φύσει βελτίω ἐστὶ τῆς ἀριστερᾶς, κἂν πάντα ποιῶμεν τῇ ἀριστερᾷ καθάπερ τῇ δεξιᾷ. οὐδ' ὅτι μεταπίπτουσι, διὰ τοῦτο οὐκ ἐστὶν φύσει· ἀλλ' εἰ ὥς ἐπὶ τὸ πολὺ καὶ τὸν πλείω χρόνον οὕτω διαμένει ἡ ἀριστερὰ οὔσα ἀριστερὰ καὶ ἡ δεξιὰ δεξιὰ, τοῦτο φύσει ἐστίν.

[21] Ὡσαύτως ἐπὶ τῶν φύσει δικαίων, μή, εἰ μεταβάλλει διὰ τὴν ἡμετέραν χρῆσιν, διὰ τοῦτ' οὐκ ἐστὶν δίκαιον φύσει· ἀλλ' ἐστὶν. τὸ γὰρ ὥς ἐπὶ τὸ πολὺ διαμένον, τοῦτο φύσει δίκαιον προφανές. ὁ γὰρ ἂν ἡμεῖς θώμεθα καὶ νομίσωμεν, τοῦτο καὶ ἐστὶ δίκαιον ἤδη καὶ καλοῦμεν κατὰ νόμον δίκαιον. βέλτιον οὖν δίκαιον τὸ κατὰ φύσιν τοῦ κατὰ νόμον. ἀλλ' ὁ ζητοῦμεν, δίκαιόν ἐστὶ πολιτικόν. τὸ δὲ πολιτικὸν ἐστὶν τὸ νόμῳ, οὐ τὸ φύσει.

[22] Τὸ δ' ἄδικον καὶ τὸ ἀδίκημα δόξειεν ἂν εἶναι οὕτω ταῦτόν, οὐκ ἐστὶ δέ· τὸ μὲν γὰρ ἄδικόν ἐστὶν τὸ νόμῳ ὠρισμένον, οἷον τὸ τὴν παρακαταθήκην ἀποστερηῆσαι ἄδικον ἐστί, τὸ δ' ἀδίκημά ἐστιν τὸ ἤδη ἀδίκως τι πράττειν. ὁμοίως δὲ τὸ δίκαιον καὶ τὸ δικαιοπράγημα οὐ ταῦτόν· τὸ μὲν γὰρ δίκαιον τὸ τῷ νόμῳ ὠρισμένον, τὸ δὲ δικαιοπράγημα τὸ τὰ δίκαια πράττειν.

[23] Πότε οὖν τὸ δίκαιον, καὶ πότε οὐ; ὥς ἀπλῶς μὲν εἶπεῖν, ὅταν πράττη κατὰ προαίρεσιν καὶ ἐκουσίως (τὸ δὲ ἐκουσίως ὁ ἦν, εἴρηται

ἐν τοῖς ἐπάνω ἡμῖν), καὶ ὅταν εἰδῶς καὶ ὄν καὶ ᾧ καὶ οὗ ἕνεκα, οὕτως δίκαιον πράττει. ὁμοίως καὶ ὡσαύτως καὶ ὁ ἄδικος ἔσται ὁ εἰδῶς καὶ ὄν καὶ ᾧ καὶ οὗ ἕνεκα. ὅταν δὲ μὴθὲν τούτων εἰδῶς πράξῃ τι ἄδικον, ἄδικος μὲν οὐκ ἔστιν, ἀτυχῆς δέ. εἰ γὰρ οἰόμενος τὸν πολέμιον ἀποκτείνειν τὸν πατέρα ἀπέκτεινεν, ἄδικον μὲν τι ἐπραξεν, ἀδικεῖ μέντοι οὐθένα, ἀτυχεῖ δέ.

[24] Ἐπεὶ οὖν τὸ μὴ ἀδικεῖν τὰ ἄδικα πράττοντα ἐν τῷ ἀγνοεῖν ἐστι τοῦτο, ὃ καὶ μικρὸν ἐπάνω ἐλέγετο, ὅταν μὴ εἰδῶς μὴθ' ὄν βλάπτει μὴθ' ᾧ μὴθ' οὗ ἕνεκεν· ἀλλ' ἤδη καὶ τὴν ἄγνοιαν διοριστέον ἐστίν, πῶς ἂν γινομένης τῆς ἀγνοίας, ὄν βλάπτει, οὐκ [25] ἀδικήσῃ. ἔστω δὴ οὗτος ὁ διορισμός. ὅταν μὲν γὰρ ἡ ἄγνοια αἰτία ᾗ τοῦ πρᾶξαι τι, οὐχ ἐκὼν τοῦτο πράττει, ὥστε οὐκ ἀδικεῖ· ὅταν δὲ τῆς ἀγνοίας αὐτὸς ᾗ αἴτιος, καὶ πράττῃ τι κατὰ τὴν ἄγνοιαν ἧς αὐτὸς αἴτιος ἐστίν, οὗτος ἤδη ἀδικεῖ, καὶ δικαίως ἄδικος ὁ τοιοῦτος κληθήσεται. οἷον ἐπὶ τῶν μεθυόντων. οἱ γὰρ μεθύοντες καὶ πράξαντές τι κακὸν ἀδικοῦσιν· τῆς γὰρ ἀγνοίας αὐτοὶ εἰσιν αἴτιοι· ἐξῆν γὰρ αὐτοῖς μὴ πίνειν τοσοῦτον, [26] ὥστ' ἀγνοήσαντας τύπτειν τὸν πατέρα. ὁμοίως [καὶ] ἐπὶ τῶν ἄλλων ἀγνοιῶν ὅσαι μὲν γίνονται δι' αὐτούς, οἱ κατὰ ταύτας ἀδικοῦντες ἄδικοι· ὧν δὲ μὴ αὐτοὶ εἰσιν αἴτιοι, ἀλλ' ἡ ἄγνοια κακείνοις ἐστίν αἰτία τοῖς πράξασι τοῦ πρᾶξαι, οὐκ ἄδικοι. ἔστιν δ' ἡ τοιαύτη ἄγνοια ἡ φυσικὴ, οἷον τὰ παιδιά ἀγνοοῦντα τοὺς πατέρας τύπτουσιν, ἀλλ' ἡ ἐν τούτοις ἄγνοια φυσικὴ οὐσα οὐ ποιεῖ διὰ τὴν πρᾶξιν ταύτην τὰ παιδιά λέγεσθαι ἄδικα· ἡ γὰρ ἄγνοια αἰτία τοῦ πράττειν ταῦτα, τῆς δ' ἀγνοίας οὐκ αὐτὰ αἰτία, διὸ οὐδ' ἄδικα λέγονται.

[27] Ὑπὲρ δὲ δὴ τοῦ ἀδικεῖσθαι πῶς; πότερον ἐκόντα ἔστιν ἀδικεῖσθαι; ἢ οὐ; δίκαια μὲν γὰρ καὶ ἄδικα πράττομεν ἐκόντες, ἀδικούμεθα δὲ οὐκέτι ἐκόντες· τὸ γὰρ κολάζεσθαι φεύγομεν, ὥστε δῆλον ὅτι οὐκ ἂν ἀδικοίμεθα ἐκόντες. οὐδεὶς γὰρ ἐκὼν βλάπτεσθαι ὑπομένει· τὸ γὰρ ἀδικεῖσθαι βλάπτεσθαι ἐστίν.

[28] Ναί, ἀλλ' εἰσὶ τινες οἱ δέον αὐτοὺς τὸ ἴσον ἔχειν παραχωροῦσι τισίν, ὥστε εἰ τὸ ἴσον ἔχειν ἦν δίκαιον, τὸ δ' ἔλαττον ἔχειν ἀδικεῖσθαι ἐστίν, ἔλαττον δὲ ἐκὼν ἔχει, ἐκὼν ἄρα, φησίν, ἀδικεῖται.

Ἀλλ' ἐντεῦθεν δῆλον πάλιν ὅτι οὐχ ἐκὼν. πάντες γὰρ οἱ ἔλαττον λαμβάνοντες ἀντικαταλλάττονται ἢ τιμὴν ἢ ἔπαινον ἢ δόξαν ἢ φιλίαν ἢ ἄλλο τι τῶν τοιούτων· ὁ δ' ἀντικαταλλαττόμενός τι ἀνθ'

οὐ προίεται, οὐκέτι ἀδικεῖται· εἰ δὲ μὴ ἀδικεῖται, οὐδὲ ἐκὼν ἄρα.

[29] Ἐτι πάλιν οἱ τὸ ἔλαττον λαμβάνοντες καὶ ἀδικούμενοι, ἧ οὐκ ἴσον λαμβάνουσιν, οὗτοι καλλωπίζονται καὶ σεμνύνονται ἐπὶ τῶν τοιούτων, ὅτι φασὶν “ἐξόν μοι ἴσον λαμβάνειν οὐκ ἐλάμβανον, ἀλλὰ παρήκα τῷ πρεσβυτέρῳ ἢ τῷ φίλῳ.” ἀδικούμενος δέ γε οὐδεὶς σεμνύνεται. εἰ δ’ ἐπὶ τοῖς ἀδικήμασι μὴ σεμνύνονται, ἐπὶ δὲ τούτοις σεμνύνονται, ὅλως οὐκ ἂν ἀδικοῖντο οὕτως ἐλαττούμενοι. εἰ δὲ μὴ ἀδικοῦνται, οὐδ’ ἂν ἐκόντες ἀδικοῖντο.

[30] Πρὸς δὲ ταῦτα καὶ τοῖς τοιούτοις λόγοις ὁ ἐπὶ τοῦ ἀκρατοῦς λόγος ἐναντιοῦται· ὁ γὰρ ἀκρατὴς βλάπτει αὐτὸς αὐτὸν τὰ φαῦλα πράττων, καὶ ἐκὼν γε ταῦτα πράττει, βλάπτει ἄρα αὐτὸς αὐτὸν εἰδώς, ὥστε ἐκὼν αὐτὸς ὑφ’ αὐτοῦ ἀδικεῖται.

Ἀλλ’ ἐνταῦθα [ὁ] διορισμὸς προστεθεὶς κωλύσει τὸν λόγον τοῦτον. ἔστιν δὲ ὁ διορισμὸς οὗτος, τὸ μηδένα βούλεσθαι ἀδικεῖσθαι. ὁ δέ γε ἀκρατὴς βουλόμενος πράττει τὰ κατὰ τὴν ἀκρασίαν, ὥστε αὐτὸς αὐτὸν ἀδικεῖ· βούλεται ἄρα τὰ φαῦλα πράττειν αὐτῷ. ἀλλ’ οὐδεὶς βούλεται ἀδικεῖσθαι· ὥστ’ οὐδὲ ὁ ἀκρατὴς αὐτὸς αὐτὸν ἐκὼν <ἂν> ἀδικοίη.

[31] Ἀλλ’ ἴσως ἐνταῦθα πάλιν ἀπορήσειεν ἂν τις, ἄρα γε ἐνδέχεται αὐτὸν αὐτὸν ἀδικεῖν; ἐκ μὲν δὴ τοῦ ἀκρατοῦς σκοπομένῳ ἔοικεν ἐνδέχεσθαι. καὶ πάλιν οὕτως. εἰ γὰρ ἂ ὁ νόμος πράττειν τάττει, ταῦτά ἐστιν δίκαια, ὁ μὴ πράττων ταῦτα ἀδικεῖ· καὶ εἰ πρὸς ὃν κελεύει πράττειν, πρὸς τοῦτον εἰ μὴ πράττει, τοῦτον ἀδικεῖ, ὁ δὲ νόμος κελεύει σώφρονα εἶναι, οὐσίαν κεκτῆσθαι, σώματος ἐπιμελεῖσθαι, καὶ τᾶλλα τὰ τοιαῦτα, ὁ ἄρα ταῦτα μὴ πράττων ἀδικεῖ αὐτόν. εἰς οὐθέν· γὰρ ἄλλον τῶν τοιούτων ἀδικημάτων ἢ ἀναφορὰ ἐστίν.

[32] Ἀλλὰ μή ποτε ταῦτα οὐκ ἀληθῆ ἦν, οὐδ’ ἐνδέχεται αὐτὸν ἀδικεῖν αὐτόν. τὸν γὰρ αὐτὸν οὐκ ἐνδέχεται κατὰ τὸν αὐτὸν χρόνον πλεῖον ἔχειν καὶ ἔλαττον, οὐδ’ ἐκόντα ἅμα καὶ ἄκοντα· ἀλλὰ μὴν ὁ ἀδικῶν, ἧ ἀδικεῖ, πλεῖον ἔχει, ὁ δ’ ἀδικούμενος, ἧ ἀδικεῖται, ἔλαττον· εἰ ἄρα αὐτὸς αὐτὸν ἀδικεῖ, ἐνδέχεται τὸν αὐτὸν κατὰ τὸν αὐτὸν χρόνον καὶ πλεῖον ἔχειν καὶ ἔλαττον. ἀλλὰ τοῦτ’ ἀδύνατον· οὐκ ἄρα ἐνδέχεται αὐτὸν αὐτὸν ἀδικεῖν.

[33] Ἐτι ὁ μὲν ἀδικῶν ἐκὼν ἀδικεῖ, ὁ δὲ ἀδικούμενος ἄκων ἀδικεῖται, ὥστε εἰ ἐνδέχεται αὐτὸν αὐτὸν ἀδικεῖν, ἐνδέχοιτ’ ἂν ἅμα καὶ ἀκουσίως καὶ ἐκουσίως πράττειν τι· τοῦτο δὲ ἀδύνατον· οὐκ ἄρα

οὐδ' οὕτως ἐνδέχεται αὐτὸν αὐτὸν ἀδικεῖν.

[34] Ἐπεὶ εἴ τις λαμβάνοι ἐκ τῶν κατὰ μέρος ἀδικημάτων. ἀδικοῦσι γὰρ πάντες ἥτοι παρακαταθήκην ἀποστεροῦντες ἢ μοιχεύοντες ἢ κλέπτοντες ἢ τι ἄλλο τῶν κατὰ μέρος ἀδικημάτων ποιοῦντες· οὐδείς δὲ πώποτε αὐτὸς αὐτὸν παρακαταθήκην ἀπεστέρησεν, οὐδ' ἐμοίχευσεν τὴν ἑαυτοῦ γυναῖκα, οὐδ' ἔκλεψεν αὐτὸς τὰ ἑαυτοῦ· ὥστε εἰ τὸ μὲν ἀδικεῖν ἐν τοῖς τοιούτοις ἐστίν, τούτων δὲ μὴθὲν ἐνδέχεται πρὸς αὐτὸν ποιεῖν, οὐκ ἂν ἐνδέχοιτο αὐτὸν ἀδικεῖν.

[35] Εἰ δὲ μή, οὐ τό γε πολιτικὸν ἀδίκημα, ἀλλὰ τὸ οἰκονομικόν. ἡ γὰρ ψυχὴ εἰς πλείω μεμερισμένη ἔχει τι αὐτῆς τὸ μὲν χεῖρον τὸ δὲ βέλτιον, ὥστ' εἴ τι ἐγγίνεται τῶν ἐν ψυχῇ ἀδίκημα, τῶν μερῶν ἐστὶ πρὸς ἄλληλα· τὸ οἰκονομικὸν δὲ ἀδίκημα διειλόμεθα τῷ ἐπὶ τὸ χεῖρον καὶ βέλτιον· ὥς γίνεσθαι πρὸς αὐτὸν ἄδικον καὶ δίκαιον. οὐ τοῦτο δ' ἡμεῖς [36] ἐπισκοπούμεθα, ἀλλὰ τὸ πολιτικόν. ὥστ' ἐν τοῖς τοιούτοις ἀδικήμασιν, ἐν οἷς ἡμεῖς ζητοῦμεν, οὐκ ἐνδέχεται αὐτὸν αὐτὸν ἀδικεῖν.

Πότερος δὲ πάλιν ἀδικεῖ, καὶ ἐν ποτέρῳ ἐστὶ τὸ ἀδίκημα, ἐν τῷ ἀδίκως ὀτιοῦν ἔχοντι; ἢ τῷ κρίναντι καὶ τῷ ἀπονείμαντι, ὥσπερ ἐν τοῖς ἀγῶσιν; καὶ γὰρ ὁ λαβὼν τὸν φοῖνικα παρὰ τοῦ ἐφεστῶτος καὶ ταῦτα κρίναντος οὐκ ἀδικεῖ, κἂν ἀδίκως αὐτῷ ἀποδοθῇ· ἀλλ' ἤδη ὁ κρίνας κακῶς καὶ δούς, οὗτος ἀδικεῖ. καὶ οὗτος ἐστὶ μὲν ἢ ἀδικεῖ, ἐστὶ δὲ ἢ οὐκ ἀδικεῖ· ἢ μὲν γὰρ τὸ τῇ ἀληθείᾳ καὶ τῇ φύσει ὄν δίκαιον μὴ ἔκρινεν, ταύτῃ μὲν ἀδικεῖ, ἢ δὲ τὸ αὐτῷ δοκοῦν εἶναι δίκαιον, οὐκ ἀδικεῖ.

[34]

[1] Ἐπειδὴ δ' ὑπὲρ τῶν ἀρετῶν εἴρηται, καὶ τίνες εἰσὶν καὶ ἐν τίσιν καὶ περὶ ποῖα, καὶ περὶ ἐκάστης αὐτῶν, ὅτι εἰ πράττομεν κατὰ τὸν ὀρθὸν λόγον τὸ βέλτιστον, τὸ μὲν οὕτως εἰπεῖν, τὸ κατὰ τὸν ὀρθὸν λόγον πράττειν, ὁμοίον ἐστὶν ὥσπερ ἂν εἴ τις εἴποι ὅτι ὑγίεια ἄριστ' ἂν γένοιτο, εἴ τις τὰ ὑγιεινὰ προσφέροιτο. τὸ δὲ τοιοῦτον ἀσαφές· ἀλλ' [2] ἐρεῖ μοι, τὰ ποῖα διασάφησόν ἐστιν ὑγιεινά. οὕτως καὶ ἐπὶ τοῦ λόγου, τί ἐστὶν ὁ λόγος καὶ τίς ὁ ὀρθὸς λόγος;

Ἀναγκαῖον ἴσως ἐστὶν πρῶτον μὲν, ἐν ᾧ ὁ λόγος [3] ἐγγίνεται, ὑπὲρ τούτου διελέσθαι. διωρίσθη μὲν οὖν ὑπὲρ ψυχῆς ὡς τύπῳ καὶ πρότερον, ὅτι τὸ μὲν αὐτῆς ἐστὶ λόγον ἔχον, τὸ δὲ ἄλογον μόνιον τῆς ψυχῆς· ἐστὶν δ' εἰς δύο τὴν διαίρεσιν ἔχον τὸ λόγον ἔχον μόνιον τῆς

ψυχῆς, ὧν ἐστὶ τὸ μὲν βουλευτικὸν τὸ δὲ ἐπιστημονικόν. ὅτι δὲ ἕτερα ἀλλήλων ἐστίν, [4] ἐκ τῶν ὑποκειμένων ἂν γένοιτο φανερόν. ὥσπερ γὰρ δὴ ἕτερά ἐστιν ἀλλήλων χρῶμά τε καὶ χυμὸς καὶ ψόφος καὶ ὀσμή, ὡσαύτως καὶ τὰς αἰσθήσεις ἐτέρας αὐτῶν ἢ φύσις ἀπέδωκεν (ψόφον μὲν γὰρ ἀκοῇ, χυμὸν δὲ γεύσει γνωρίζομεν, χρῶμα δὲ ὄψει), ὁμοίως δὲ καὶ τὰλλα τὸν αὐτὸν τρόπον δεῖ ὑπολαμβάνειν· ἐπεὶ δὴ ἕτερα τὰ ὑποκείμενα ἐστίν, ἕτερα καὶ τὰ τῆς ψυχῆς εἶναι μέρη οἷς ταῦτα γνωρίζομεν.

[5] ἕτερον δ' ἐστὶ τὸ νοητὸν καὶ τὸ αἰσθητόν· ταῦτα δὲ ψυχῇ γνωρίζομεν· ἕτερον ἄρ' ἂν εἴη τὸ μόριον τὸ περὶ τὰ αἰσθητὰ καὶ τὰ νοητά. τὸ δὲ βουλευτικὸν καὶ προαιρετικὸν περὶ τὰ αἰσθητὰ καὶ ἐν κινήσει καὶ ἀπλῶς ὅσα ἐν γενέσει τε καὶ φθορᾷ ἐστίν.

[6] βουλευόμεθα γὰρ ὑπὲρ τούτων ἃ ἐφ' ἡμῖν ἐστὶν καὶ πρᾶξαι καὶ μὴ πρᾶξαι προελομένοις, περὶ ἃ ἐστὶν [καὶ] βουλή καὶ προαίρεσις τοῦ πρᾶξαι ἢ μὴ πρᾶξαι· ταῦτα δ' ἐστὶν αἰσθητὰ καὶ ἐν κινήσει τοῦ μεταβάλλειν· ὥστε τὸ προαιρετικὸν μόριον τῆς ψυχῆς κατὰ τὸν λόγον τῶν αἰσθητῶν ἐστίν.

[7] Τούτων δὴ διωρισμένων, μετὰ ταῦτα λεκτέον ἂν εἴη, ἐπειδὴ ὑπὲρ τάληθοῦς ἐστὶν ὁ λόγος καὶ τάληθές ὡς ἔχει σκοπούμεθα, ἔστιν δ' ἐπιστήμη φρόνησις νοῦς σοφία ὑπόληψις, περὶ τί δὴ ἕκαστον τούτων ἐστίν.

[8] Ἡ μὲν οὖν ἐπιστήμη ἐστὶ περὶ ἐπιστητόν, καὶ τοῦτο μετ' ἀποδείξεως καὶ λόγου διατεινόμενον.

Ἡ δὲ φρόνησις περὶ τὰ πρακτά, ἐν οἷς αἴρεσις καὶ φυγὴ καὶ ἐφ' ἡμῖν ἐστὶν πρᾶξαι καὶ μὴ πρᾶξαι.

[9] Ἔστιν δὴ τῶν ποιουμένων καὶ πραττομένων οὐ ταῦτὸ τὸ ποιητικὸν καὶ πρακτικόν. τῶν μὲν γὰρ ποιητικῶν ἐστὶ τι παρὰ τὴν ποίησιν ἄλλο τέλος, οἷον παρὰ τὴν οἰκοδομικὴν, ἐπειδὴ ἐστὶν ποιητικὴ οἰκίας, οἰκία αὐτῆς τὸ τέλος παρὰ τὴν ποίησιν, ὁμοίως ἐπὶ τεκτονικῆς καὶ τῶν ἄλλων τῶν ποιητικῶν· [10] ἐπὶ δὲ τῶν πρακτικῶν οὐκ ἔστιν ἄλλο οὐθὲν τέλος παρ' αὐτὴν τὴν πρᾶξιν, οἷον παρὰ τὸ κιθαρίζειν οὐκ ἔστιν ἄλλο τέλος οὐθὲν, ἀλλ' αὐτὸ τοῦτο τέλος, ἢ ἐνέργεια καὶ ἡ πρᾶξις. περὶ μὲν οὖν τὴν πρᾶξιν καὶ τὰ πρακτά ἡ φρόνησις, περὶ δὲ τὴν ποίησιν καὶ τὰ ποιητὰ ἡ τέχνη· ἐν γὰρ τοῖς ποιητοῖς μᾶλλον ἢ ἐν τοῖς πρακτοῖς ἐστὶ τὸ τεχνάζειν.

[11] Ὡστε ἡ φρόνησις ἂν εἴη ἕξις τις προαιρετικὴ καὶ πρακτικὴ τῶν ἐφ' ἡμῖν ὄντων καὶ πρᾶξαι καὶ μὴ πρᾶξαι, ὅσα εἰς τὸ συμφέρον

ἤδη συντείνει.

[12] ἔστιν δ' ἡ φρόνησις ἀρετή, ὡς δόξειεν ἄν, οὐκ ἐπιστήμη. ἐπαινετοὶ γάρ εἰσιν οἱ φρόνιμοι, ὁ δ' ἔπαινος ἀρετῆς· ἔτι δ' ἐπιστήμης μὲν πάσης ἀρετή ἐστίν, φρονήσεως δὲ ἀρετή οὐκ ἔστιν, ἀλλ' ὡς ἔοικεν, αὐτό τί ἐστιν ἀρετή.

[13] Ὁ δὲ νοῦς ἐστι περὶ τὰς ἀρχὰς τῶν νοητῶν καὶ τῶν ὄντων· ἡ μὲν γὰρ ἐπιστήμη τῶν μετ' ἀποδείξεως ὄντων ἐστίν, αἱ δ' ἀρχαὶ ἀναπόδεικτοι, ὥστ' οὐκ ἄν εἴη περὶ τὰς ἀρχὰς ἡ ἐπιστήμη, ἀλλ' ὁ νοῦς.

[14] Ἡ δὲ σοφία ἐστὶν ἐξ ἐπιστήμης καὶ νοῦ συγκεκλιμένη. ἔστιν γὰρ ἡ σοφία καὶ περὶ τὰς ἀρχὰς καὶ τὰ ἐκ τῶν ἀρχῶν ἤδη δεικνύμενα, περὶ ἃ ἡ ἐπιστήμη· ἡ μὲν οὖν περὶ τὰς ἀρχὰς, τοῦ νοῦ αὐτὴ μετέχει, ἡ δὲ περὶ τὰ μετὰ τὰς ἀρχὰς μετ' ἀποδείξεως ὄντα, τῆς ἐπιστήμης μετέχει· ὥστε δῆλον ὅτι ἡ σοφία ἐστὶν ἐκ τε νοῦ καὶ ἐπιστήμης συγκεκλιμένη, ὥστ' εἴη ἄν περὶ ταυτὰ, περὶ ἃ καὶ ὁ νοῦς καὶ ἡ ἐπιστήμη.

[15] Ἡ δὲ ὑπόληψις ἐστὶν, ἥ ὑπὲρ ἀπάντων ἐπαμφοτερίζομεν, πρὸς τὸ καὶ εἶναι ταῦτα οὕτω καὶ μὴ εἶναι.

[16] Πότερον δ' ἐστὶν ἡ φρόνησις καὶ ἡ σοφία ταυτόν; ἢ οὐ; ἡ μὲν γὰρ σοφία ἐστὶν περὶ τὰ μετ' ἀποδείξεως καὶ αἰεὶ ὡσαύτως ὄντα, ἡ δὲ φρόνησις οὐ περὶ ταῦτα, ἀλλὰ περὶ τὰ ἐν μεταβολῇ ὄντα. λέγω δὲ οἶον εὐθὺ μὲν ἢ καμπύλον καὶ κοῖλον καὶ τὰ τοιαῦτά ἐστιν αἰεὶ τοιαῦτα, τὰ δὲ συμφέροντα οὐκέτι οὕτως ἔχουσιν τὸ μὴ εἰς ἄλλο τι μεταβάλλειν, ἀλλὰ μεταβάλλουσιν, καὶ νῦν μὲν συμφέρει τοῦτο, αὖριον δ' οὐ, καὶ τῷ μὲν, τῷ δ' οὐ, καὶ οὕτω μὲν συμφέρει, ἐκείνως δὲ οὐ συμφέρει. περὶ δὲ τὰ συμφέροντά ἐστιν ἡ φρόνησις, ἡ δὲ σοφία οὐ. ἕτερον ἄρα ἡ σοφία καὶ ἡ φρόνησις.

[17] Πότερον δ' ἐστὶν ἡ σοφία ἀρετὴ ἢ οὐ; διὰ τοῦτο δῆλον ἄν γένοιτο, ὅτι ἐστὶν ἀρετὴ, ἐξ αὐτῆς τῆς φρονήσεως. εἰ γὰρ ἡ φρόνησις ἀρετὴ ἐστίν, ὡς φαμέν, τοῦ μορίου τοῦ ἐτέρου τῶν λόγον ἐχόντων, ἔστιν δὲ χεῖρων ἡ φρόνησις τῆς σοφίας (περὶ χεῖρω γὰρ ἐστίν· ἡ μὲν γὰρ σοφία περὶ τὸ αἰδίων καὶ τὸ θεῖον, ὡς φαμέν, ἡ δὲ φρόνησις περὶ τὸ συμφέρον ἀνθρώπῳ), εἰ οὖν τὸ χεῖρον ἀρετὴ ἐστί, τό γε βέλτιον εἰκός ἐστιν ἀρετὴν εἶναι, ὥστε δῆλον ὅτι ἡ σοφία ἀρετὴ ἐστίν.

[18] Ἡ δὲ σύνεσις τί ἐστὶν ἢ περὶ τί; ἔστιν δ' ἡ σύνεσις ἐν οἷσπερ καὶ ἡ φρόνησις, περὶ τὰ πρακτά. ὁ γὰρ συνετός που λέγεται τῷ δυνατὸς βουλευέσθαι «εἶναι» καὶ ἐν τῷ ὀρθῶς τι κρῖναι καὶ ἰδεῖν·

περὶ μικρῶν δὲ καὶ ἐν μικροῖς ἢ κρίσις αὐτοῦ. ἔστιν οὖν ἡ σύνεσις καὶ ὁ συνετὸς μέρος τι φρονήσεως καὶ τοῦ φρονίμου, καὶ οὐκ ἄνευ τούτων· οὐ γὰρ ἂν χωρίσαις τὸν συνετὸν τοῦ φρονίμου.

[19] Ὅμοίως δ' ἂν δόξειεν ἔχειν καὶ τὰ ἐπὶ τῆς δεινότητος. ἡ γὰρ δεινότης καὶ ὁ δεινὸς οὐκ ἔστι μὲν οὔτε φρόνησις οὔτε φρόνιμος, ὁ μέντοι φρόνιμος δεινός, διὸ καὶ συνεργεῖ πῶς τῇ φρονήσει ἡ δεινότης· [20] ἀλλὰ δεινὸς μὲν καὶ ὁ φαῦλος λέγεται, οἷον Μέντωρ δεινὸς μὲν ἐδόκει εἶναι, ἀλλ' οὐ φρόνιμος ἦν. τοῦ γὰρ φρονίμου καὶ τῆς φρονησεώς ἐστι τὸ τῶν βελτίστων ἐφίεσθαι καὶ τούτων προαιρετικὸν εἶναι καὶ πρακτικὸν ἀεὶ, τῆς δὲ δεινότητος καὶ τοῦ δεινοῦ σκέψασθαι ἐκ τίνων ἂν ἕκαστον γένοιτο τῶν πρακτῶν, καὶ τὰ ταῦτα πορίσαι.

Δόξειεν ἂν οὖν εἶναι ὁ δεινὸς ἐν τοῖς τοιούτοις τε καὶ περὶ ταῦτα.

[21] Ἀπορήσειε δ' ἂν τις καὶ θαυμάσειε, διὰ τί ὑπὲρ ἡθῶν λέγοντες καὶ πολιτικῆς τινος πραγματείας ὑπὲρ σοφίας λέγομεν. ὅτι ἴσως γε πρῶτον μὲν οὐδ' ἄλλοτρία δόξειεν ἂν εἶναι ἡ σκέψις ἡ ὑπὲρ αὐτῆς, εἴπερ ἐστὶν ἀρετὴ, ὥς φαμέν. ἔτι δ' ἴσως ἐστὶν φιλοσόφου καὶ περὶ τούτων παρεπισκοπεῖν [22] ὅσα ἐν τῷ αὐτῷ τυγχάνουσιν ὄντα. καὶ ἀναγκαῖον δέ, ἐπεὶ περὶ τῶν ἐν ψυχῇ λέγομεν, περὶ πάντων λέγειν· ἔστι δὲ καὶ ἡ σοφία ἐν ψυχῇ· ὥστε οὐκ ἄλλοτρίως ὑπὲρ ψυχῆς ποιούμεθα τοὺς λόγους.

[23] Ὡς περ δ' ἔχει ἡ δεινότης πρὸς φρόνησιν, οὕτως δόξειεν ἂν ἔχειν ἐπὶ τῶν ἀρετῶν ἀπασῶν. λέγω δὲ οἷον εἰσὶν ἀρεταὶ καὶ φύσει ἐν ἐκάστοις ἐγγινόμεναι, οἷον ὀρμαὶ τινες ἐν ἐκάστῳ ἄνευ λόγου πρὸς τὰ ἀνδρεία καὶ τὰ δίκαια καὶ καθ' ἐκάστην πρὸς τὰ [24] τοιαῦτα· εἰσὶ δὲ δὴ καὶ ἔθει καὶ προαιρέσει. αἱ δὲ δὴ μετὰ λόγου οὔσαι τελέως ἀρεταὶ εἰσιν ἐπαινεταὶ ἐπιγινόμεναι. ἔστιν οὖν ἡ φυσικὴ ἀρετὴ αὕτη ἡ ἄνευ λόγου χωριζομένη μὲν τοῦ λόγου μικρὰ καὶ ἀπολειπομένη τοῦ ἐπαινεῖσθαι, πρὸς δὲ τὸν λόγον καὶ τὴν προαίρεσιν προστιθεμένη τελείαν ποιεῖ τὴν ἀρετὴν. διὸ καὶ συνεργεῖ τῷ λόγῳ καὶ οὐκ ἔστιν [25] ἄνευ τοῦ λόγου ἡ φυσικὴ ὁρμὴ πρὸς ἀρετὴν. οὐδ' αὖ ὁ λόγος καὶ ἡ προαίρεσις οὐ πάνυ τελειοῦται τῷ εἶναι ἀρετὴ ἄνευ τῆς φυσικῆς ὁρμῆς. διὸ οὐκ ὀρθῶς Σωκράτης ἔλεγεν, φάσκων εἶναι τὴν ἀρετὴν λόγον· οὐδὲν γὰρ ὄφελος εἶναι πράττειν τὰ ἀνδρεία καὶ τὰ δίκαια, μὴ εἰδότα καὶ προαιρούμενον τῷ λόγῳ. διὸ τὴν ἀρετὴν ἔφη λόγον εἶναι, οὐκ ὀρθῶς, ἀλλ' οἱ νῦν βέλτιον· τὸ γὰρ κατὰ τὸν ὀρθόν

λόγον [26] πράττειν τὰ καλά, τοῦτό φασιν εἶναι ἀρετήν· ὀρθῶς μὲν οὐδ' οὗτοι. πράξει μὲν γὰρ ἂν τις τὰ δίκαια προαιρέσει μὲν οὐδεμιᾷ, οὐδὲ γνώσει τῶν καλῶν, ἀλλ' ὁρμῇ τινι ἀλόγῳ, ὀρθῶς δὲ ταῦτα καὶ κατὰ τὸν ὀρθὸν λόγον (λέγω δέ, ὥς ἂν ὁ λόγος ὁ ὀρθὸς κελεύσειεν, οὕτως ἔπραξεν)· ἀλλ' ὅμως ἡ τοιαύτη πρᾶξις οὐκ ἔχει τὸ ἐπαινετόν. ἀλλὰ βέλτιον, ὥς ἡμεῖς ἀφορίζομεν, τὸ μετὰ λόγου εἶναι τὴν ὁρμὴν πρὸς τὸ καλόν· τὸ γὰρ τοιοῦτον καὶ ἀρετὴ καὶ ἐπαινετόν.

[27] Πότερον δ' ἐστὶν ἡ φρόνησις ἀρετὴ ἢ οὐ, ἀπορήσειεν ἂν τις. οὐ μὴν ἀλλ' ἐντεῦθεν ἂν γένοιτο δῆλον ὅτι ἀρετὴ. εἴπερ γὰρ ἡ δικαιοσύνη καὶ ἡ ἀνδρεία καὶ αἱ ἄλλαι ἀρεταί, διότι τῶν καλῶν πρακτικά, καὶ ἐπαινεταὶ εἰσίν, δῆλον ὥς καὶ ἡ φρόνησις τῶν ἐπαινετῶν ἂν τι εἴη καὶ τῶν ἐν ἀρετῇ τάξει ὄντων. ἐφ' ᾧ γὰρ ἡ ἀνδρεία ὁρμᾷ πράττειν, ἐπὶ ταῦτα καὶ ἡ φρόνησις. τὸ γὰρ ὅλον ὥς ἂν αὕτη προστάτῃ, οὕτω καὶ ἡ ἀνδρεία πράττει, ὥστε εἰ αὕτη ἐπαινετὴ τῷ ποιῆν ᾧ ἂν ἡ φρόνησις προστάτῃ, ἢ γε φρόνησις τελείως ἂν εἴη καὶ ἐπαινετὴ καὶ ἀρετὴ.

[28] Πότερον δ' ἐστὶν ἡ φρόνησις πρακτικὴ ἢ οὐ, ἴδοι ἂν τις ἐντεῦθεν, ἐπὶ τὰς ἐπιστήμας ἐπιβλέψας, οἷον ἐπὶ τὴν οἰκοδομικὴν. ἔστιν γάρ, ὥς φαμέν, ἐν οἰκοδομικῇ ὁ μὲν ἀρχιτέκτων τις καλούμενος, ὁ δὲ ὑπηρετῶν τούτῳ οἰκοδόμος· οὗτος δ' ἐστὶν ποιητικὸς οἰκίας. ἐστὶν δὲ καὶ ὁ ἀρχιτέκτων, καθὸ οὗτος ἐποίει οἰκίαν, ποιητικὸς οἰκίας. ὁμοίως δὲ ἐπὶ τῶν ἄλλων τῶν ποιητικῶν ἔχει, ἐν αἷς ἔστιν ἀρχιτέκτων καὶ ὑπηρετὴς τούτου. ποιητικὸς ἄρα τινὸς καὶ ὁ ἀρχιτέκτων ἔσται, καὶ τοῦ αὐτοῦ τούτου [29] <οὔ> ποιητικὸς καὶ ὁ ὑπηρετικός. εἰ τοίνυν ὁμοίως καὶ ἐπὶ τῶν ἀρετῶν ἔχει, ὅπερ εἰκὸς καὶ εὐλογον, καὶ ἡ φρόνησις ἂν εἴη πρακτικὴ. αἱ γὰρ ἀρεταὶ πᾶσαι πρακτικαὶ εἰσίν, ἡ δὲ φρόνησις ὥσπερ ἀρχιτέκτων τις αὐτῶν ἐστίν· ὅπως γὰρ αὕτη προστάζει, οὕτως αἱ ἀρεταὶ καὶ οἱ κατ' αὐτὰς πράττουσιν· ἐπεὶ οὖν αἱ ἀρεταὶ πρακτικά, καὶ ἡ φρόνησις πρακτικὴ ἂν εἴη.

[30] Πότερον δὲ αὕτη πάντων ἄρχει τῶν ἐν τῇ ψυχῇ, ὥσπερ δοκεῖ καὶ ἀπορεῖται; ἢ οὐ; τῶν γὰρ βελτιόνων οὐκ ἂν δόξειεν, οἷον τῆς σοφίας οὐκ ἄρχει. ἀλλὰ, φησίν, αὕτη ἐπιμελεῖται πάντων, καὶ κυρία ἐστὶ προστάττουσα.

[31] Ἀλλ' ἴσως ἔχει ὥσπερ ἐν οἰκίᾳ ὁ ἐπίτροπος. οὗτος γὰρ πάντων κύριος καὶ πάντα διοικεῖ· ἀλλ' οὐπω οὗτος ἄρχει πάντων, ἀλλὰ παρασκευάζει τῷ δεσπότῃ σχολήν, ὅπως ἂν ἐκεῖνος μὴ

κωλυόμενος ὑπὸ τῶν ἀναγκαίων ἐκκλείηται τοῦ τῶν καλῶν τι [32]
καὶ προσηκόντων πράττειν. οὕτω καὶ ὁμοίως τούτῳ ἢ φρόνησις
ὥσπερ ἐπίτροπός τις ἐστὶ τῆς σοφίας, καὶ παρασκευάζει ταύτη
σχολήν καὶ τὸ ποιεῖν τὸ αὐτῆς ἔργον, κατέχουσα τὰ πάθη καὶ ταῦτα
σωφρονίζουσα.

II

[1] Μετὰ δὲ ταῦτα ὑπὲρ ἐπιεικείας δέοι ἂν τὴν ἐπίσκεψιν ποιήσασθαι, τί τέ ἐστι καὶ ἐν τίσι καὶ περὶ ποῖα. ἔστιν δὲ ἡ ἐπιείκεια καὶ ὁ ἐπιεικὴς ὁ ἐλαττωτικὸς τῶν δικαίων τῶν κατὰ νόμον. ἃ γὰρ ὁ νομοθέτης ἐξαδυνατεῖ καθ' ἕκαστα ἀκριβῶς διορίζειν, ἀλλὰ καθόλου λέγει, ὁ ἐν τούτοις παραχωρῶν, καὶ ταῦθ' αἰρούμενος ἃ ὁ νομοθέτης ἐβούλετο μὲν τῷ καθ' ἕκαστα διορίσαι, οὐκ ἡδυνήθη δέ, ὁ τοιοῦτος ἐπιεικὴς. οὐκ ἔστιν δὲ ἐλαττωτικὸς τῶν δικαίων ἀπλῶς· τῶν μὲν γὰρ φύσει καὶ ὡς ἀληθῶς ὄντων δικαίων οὐκ ἐλαττοῦται, ἀλλὰ τῶν κατὰ νόμον, ἃ ὁ νομοθέτης ἐξαδυνατῶν ἀπέλιπεν.

[2] Ἡ δὲ εὐγνώμοσύνη καὶ ὁ εὐγνώμων ἐστὶν περὶ ταῦτα περὶ ἃ καὶ ἡ ἐπιείκεια, περὶ τὰ δίκαια [καὶ] τὰ ἐλλειμμένα ὑπὸ τοῦ νομοθέτου τῷ μὴ ἀκριβῶς διορίσθαι, κριτικὸς ὢν τῶν ἐλλειμμένων ὑπὸ τοῦ νομοθέτου, καὶ γινώσκων ὅτι ὑπὸ μὲν τοῦ νομοθέτου ἐλλέλειπται, ἔστι μέντοι δίκαια, ὁ τοιοῦτος εὐγνώμων.

Ἔστι μὲν οὖν οὐκ ἄνευ ἐπιεικείας ἡ εὐγνώμοσύνη· τὸ μὲν γὰρ κρῖναι τοῦ εὐγνώμονος, τὸ δὲ δὴ πράττειν [καὶ] κατὰ τὴν κρίσιν τοῦ ἐπιεικοῦς.

[3] Ἡ δὲ γε εὐβουλία ἐστὶ μὲν περὶ ταῦτα τῇ φρονήσει (περὶ γὰρ τὰ πρακτὰ ἐστὶ τὰ περὶ αἵρεσιν καὶ φυγὴν ὄντα), ἔστιν δὲ οὐκ ἄνευ φρονήσεως. ἡ μὲν γὰρ φρόνησις πρακτικὴ τούτων ἐστὶ, ἡ δὲ εὐβουλία ἕξις ἢ διάθεσις ἢ τι τοιοῦτον ἢ ἐπιτευκτικὴ τῶν ἐν τοῖς πρακτοῖς βελτίστων καὶ συμφωρωτάτων.

[2] διὸ οὐδὲ τὰ τοιαῦτα εὐβουλίας ἂν δόξειεν, τὰ ἀπὸ ταυτομάτου συμβαίνοντα κατὰ τρόπον· οἷς γὰρ μὴ ἐστὶν ὁ λόγος ὁ σκοπῶν τὸ βέλτιστον, οὐκέτι ἂν εἴποις, ὃ συνέβη τι κατὰ τρόπον, τοῦτον εὐβουλον, ἀλλ' εὐτυχῇ· τὰ γὰρ ἄνευ τοῦ λόγου τοῦ κρίνοντος γινόμενα κατορθώματα εὐτυχήματα ἐστίν.

[3] Πότερον δὲ ποτε τοῦ δικαίου ἐστὶν τὸ τῇ ἐντεύξει τὸ ἴσον ἐκάστω ἀποδιδόναι (λέγω δὲ οἷον, ὁποῖος ἂν ᾗ ἕκαστος, τοιοῦτον γινόμενον ἐντυγχάνειν); ἢ οὐ; τοῦτο μὲν γὰρ καὶ κόλακος καὶ ἀρέσκου δόξειεν ἂν εἶναι· ἀλλὰ τὸ κατ' ἀξίαν ἐκάστω ἀποδιδόναι τὴν ἐντευξιν, τοῦτο καὶ δικαίου καὶ σπουδαίου ἀπλῶς ἂν δόξειεν εἶναι.

[4] Ἀπορήσειε δ' ἂν τις καὶ τοῦτο. εἴπερ ἐστὶ τὸ ἀδικεῖν τὸ

βλάπτειν ἐκόντα καὶ εἰδότα καὶ ὄν καὶ ὥς καὶ οὗ ἕνεκα, ἔστι δ' ἡ βλάβη καὶ ἡ ἀδικία ἐν ἀγαθοῖς, καὶ περὶ ἀγαθὰ, ὁ ἀδικῶν ἄρα καὶ ὁ ἄδικος εἰδείη ἂν ὅποια ἀγαθὰ καὶ ὅποια κακὰ· τὸ δέ γε ὑπὲρ τῶν τοιούτων εἰδέναι ἐστὶν ἴδιον τοῦ φρονίμου καὶ τῆς φρονήσεως· ἄτοπον δὲ συμβαίνει τὸ τῷ ἀδίκῳ συμπαρακολουθεῖν τὸ μέγιστον ἀγαθὸν τὴν φρόνησιν.

[5] Ἡ οὐκ ἂν δόξειεν παρακολουθεῖν τῷ ἀδίκῳ ἡ φρόνησις; οὐ γὰρ σκοπεῖ ὁ ἄδικος οὐδὲ δύναται κρίνειν τὸ ἀπλῶς ἀγαθὸν καὶ τὸ αὐτῷ ἀγαθόν, ἀλλὰ [6] διαμαρτάνει. τῆς δὲ φρονήσεως τοῦτο ἐστὶ, τὸ ὀρθῶς δύνασθαι ταῦτα θεωρεῖν, ὁμοίως ὥσπερ ἐπὶ τῶν κατ' ἰατρικὴν τὸ μὲν ἀπλῶς ὑγιεινὸν καὶ τὸ ὑγιείας ποιητικὸν οἶδαμεν ἅπαντες, ὅτι ἐλλέβορος καὶ τὸ ἐλατήριον καὶ αἱ τομαὶ καὶ αἱ καύσεις ὑγιεινὰ εἰσιν καὶ ὑγιείας ποιητικά, ἀλλ' ὅμως οὐκ ἔχομεν τὴν ἰατρικὴν ἐπιστήμην· οὐ γὰρ ἔτι οἶδαμεν τὸ καθ' ἕκαστον ἀγαθόν, ὥσπερ ὁ ἱατρὸς οἶδεν τίνι ἐστὶ τοῦτ' ἀγαθὸν καὶ πότε καὶ πῶς διακειμένῳ· ἐν τούτῳ γὰρ ἤδη ἡ ἰατρικὴ ἐπιστήμη. τὰ μὲν οὖν ἀπλῶς ὑγιεινὰ εἰδότες ὅμως οὐκ ἔχομεν οὐδὲ παρακολουθεῖ ἡμῖν ἡ ἰατρικὴ ἐπιστήμη.

[7] Ὡς δ' αὐτως ὁ ἄδικος. ὅτι μὲν οὖν ἀπλῶς καὶ ἡ τυραννὶς ἀγαθὸν καὶ ἡ ἀρχὴ καὶ ἡ ἐξουσία, οἶδεν· ἀλλ' εἰ αὐτῷ ἀγαθὸν ἢ μή, ἢ πότε, ἢ πῶς διακειμένῳ, οὐκέτι οἶδεν. τοῦτο δ' ἐστὶν μάλιστα τῆς φρονήσεως, ὥστε τῷ ἀδίκῳ οὐ παρακολουθεῖ ἡ φρόνησις. αἰρεῖται γὰρ τὰ ἀγαθὰ, ὑπὲρ ὧν ἀδικεῖ, τὰ ἀπλῶς ἀγαθὰ, οὐ τὰ αὐτῷ ἀγαθὰ. ὁ γὰρ πλοῦτος καὶ ἡ ἀρχὴ ἀπλῶς μὲν ἀγαθόν, αὐτῷ μέντοι ἴσως οὐκ ἀγαθόν· εὐπορήσας γὰρ καὶ ἄρξας πολλὰ κακὰ αὐτὸς ἐαυτῷ ποιήσει καὶ τοῖς φίλοις· οὐ γὰρ δυνήσεται ἀρχὴ ὀρθῶς χρήσασθαι.

[8] Ἐχει δὲ καὶ τοῦτο ἀπορίαν καὶ σκέψιν, πότερόν ἐστι πρὸς τὸν φαῦλον ἀδικία, ἢ οὐ. εἰ γὰρ ἡ μὲν ἀδικία ἐστὶν ἐν βλάβῃ, ἡ δὲ βλάβη ἐν στερήσει τῶν ἀγαθῶν, οὐκ ἂν δόξειεν βλάπτειν· τὰ γὰρ ἀγαθὰ ἂ αὐτῷ οἴεται εἶναι ἀγαθὰ, οὐκ ἀγαθὰ εἰσίν· ἡ γὰρ ἀρχὴ καὶ ὁ πλοῦτος τὸν φαῦλον οὐ δυνάμενον αὐτοῖς χρῆσθαι ὀρθῶς βλάψει· εἰ οὖν αὐτὸν βλάψει παραγενόμενα, ὁ τούτων στερίσκων οὐκ ἂν δόξειεν [9] ἀδικεῖν. ὁ δὲ τοιοῦτος λόγος δόξειεν ἂν εἶναι παράδοξος τοῖς πολλοῖς· πάντες γὰρ οἴονται καὶ ἀρχῇ καὶ δυνάμει καὶ πλούτῳ δυνατοὶ εἶναι χρῆσθαι, [10] οὐκ ὀρθῶς ὑπολαμβάνοντες. δῆλον δὲ τοῦτο καὶ ἐκ τοῦ νομοθέτου· ὁ γὰρ νομοθέτης οὐ πᾶσιν ἐπιτρέπει τὸ ἄρχειν, ἀλλ' ὥριται καὶ ἡ ἡλικία καὶ ἡ εὐπορία ἣν δεῖ ὑπάρχειν τῷ

μέλλοντι ἄρχειν, ὥς οὐ δυνατόν ὄν παντὶ ἄρχειν ὑπάρξει. εἰ δὴ τις ἀγανακτοίῃ ὅτι οὐκ ἄρχει ἢ οὐδείς αὐτὸν ἐᾷ κυβερνᾶν, “οὐ γὰρ ἔχεις” εἴποι ἂν τις “οὐδὲν τοιοῦτον ἐν τῇ ψυχῇ ᾧ δυνήσῃ καὶ ἄρχειν καὶ [11] κυβερνᾶν.” ἢ ἐπὶ μὲν τοῦ σώματος ὁρῶμεν οὐ δυναμένους ὑγιαίνειν τοὺς τὰ ἀπλῶς ἀγαθὰ προσφερομένους, ἀλλ’ εἰ μέλλει τις ὑγιαίνειν τὸ σῶμα τὸ φαῦλον, ὕδωρ αὐτῷ πρότερον καὶ ὀλίγα σιτία προσενεκτέον· τῷ δὲ τὴν ψυχὴν φαύλην ἔχοντι πρὸς τὸ μηθὲν κακὸν ἐργάζεσθαι οὐκ ἀφεκτέον καὶ πλούτου καὶ ἀρχῆς καὶ δυνάμεως καὶ ἀπλῶς τῶν τοιούτων, ὅσῳ εὐκίνητοτερον καὶ εὐμεταβολώτερον ψυχὴ σώματος; ὥσπερ γὰρ ὁ φαῦλος τὸ σῶμα οὕτως ἦν ἐπιτήδειος διαιτᾶσθαι, καὶ ὁ φαῦλος τὴν ψυχὴν οὕτως ἐπιτήδειος διάγειν, μηθὲν τῶν τοιούτων ἔχων.

[12] Ἐχει δὲ καὶ τὸ τοιοῦτον ἀπορίαν, οἷον ἐπειδὴν μὴ ἢ ἅμα πρᾶξι τάνδρεϊα καὶ τὰ δίκαια, πότερ’ ἂν τις πράξειεν; ἐν μὲν δὴ ταῖς φυσικαῖς ἀρεταῖς ἔφαμεν τὴν ὁρμὴν μόνον [δεῖν] τὴν πρὸς τὸ καλὸν ὑπάρχειν ἄνευ λόγου· ᾧ δ’ ἐστὶν αἵρεσις, ἐν τῷ λόγῳ καὶ τῷ λόγον ἔχοντι ἐστίν. ὥστε ἅμα τὸ ἐλέσθαι [καὶ] παρέσται καὶ ἡ τελεία ἀρετὴ ὑπάρξει, ἣν ἔφαμεν μετὰ φρονήσεως εἶναι, οὐκ ἄνευ δὲ τῆς [13] φυσικῆς ὁρμῆς τῆς ἐπὶ τὸ καλόν. οὐδ’ ἐναντιώσεται ἀρετὴ ἀρετῇ. πέφυκεν γὰρ ὑπείκειν τῷ λόγῳ, [ἢ] ὥς οὗτος προστάττει, ὥστ’ ἐφ’ ὃ ἂν οὗτος ἄγῃ, ἐπὶ τοῦτο ἀποκλίνει. τὸ γὰρ βέλτιον οὗτός ἐστιν ὁ αἰρούμενος. οὐτε γὰρ ἄνευ τῆς φρονήσεως αἱ ἄλλαι ἀρεταὶ γίνονται, οὐθ’ ἡ φρόνησις τελεία ἄνευ τῶν ἄλλων ἀρετῶν, ἀλλὰ συνεργουσί πως μετ’ ἀλλήλων ἐπακολουθοῦσαι τῇ φρονήσει.

[14] Οὐχ ἥττον δὲ καὶ τὰ τοιαῦτα ἀπορήσεται, πότερόν ποτε καὶ ἐπὶ τῶν ἀρετῶν οὕτως ἔχει ὥσπερ ἐπὶ τῶν ἄλλων ἀγαθῶν τῶν τ’ ἐκτὸς καὶ τῶν περὶ σῶμα. ταῦτα γὰρ εἰς ὑπερβολὴν γινόμενα χεῖρους ποιεῖ, οἷον πλοῦτος πολὺς γενόμενος ὑπερόπτας καὶ ἀηδεῖς ἐποίησεν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων [15] ἀγαθῶν, ἀρχῆς τιμῆς κάλλους μεγέθους. πότερον οὖν καὶ ἐπ’ ἀρετῆς οὕτως ἔχει, ὥστε ἐάν τινι δικαιοσύνη ἢ ἀνδρεία εἰς ὑπερβολὴν παραγένηται, χεῖρων ἔσται, ἢ οὐ; <οὐ,> φησίν. ἀλλ’ ἀπὸ μὲν τῆς ἀρετῆς τιμὴ γίνεται, ἡ δὲ τιμὴ μεγάλη γινομένη χεῖρους ποιεῖ· ὥστε δῆλον ὅτι, φησίν, ἀρετὴ εἰς ἐπίδοσιν βαδίζουσα μεγέθους χεῖρους ποιήσει· τῆς γὰρ τιμῆς ἡ ἀρετὴ αἰτία, ὥστε καὶ ἡ ἀρετὴ ποιοίῃ ἂν χεῖρους μείζων γινομένη.

[16] Ἡ τοῦτο οὐκ ἀληθές; τῆς γὰρ ἀρετῆς εἰ καὶ ἄλλα πολλὰ ἐστὶν ἔργα, ὥσπερ καὶ ἔστιν, καὶ τοῦτο ἐν τοῖς μάλιστα, τὸ τοῖς

ἀγαθοῖς τούτοις καὶ τοῖς τοιούτοις δύνασθαι ὀρθῶς παραγενομένοις χρῆσθαι· εἰ δὴ ὁ σπουδαῖος παραγενομένης αὐτῷ ἢ τιμῆς ἢ ἀρχῆς μεγάλης μὴ χρήσεται ὀρθῶς τούτοις, οὐκέτι ἂν εἴη σπουδαῖος· οὔτε δὴ ἢ τιμὴ οὔτε ἢ ἀρχὴ ποιήσει τὸν σπουδαῖον χεῖρω, ὥστε οὐδ' ἢ ἀρετῇ.

[17] τὸ δ' ὅλον ἐπειδήπερ ἡμῖν ἐν ἀρχῇ διώρισται, ὅτι εἰσὶν αἱ ἀρεταὶ μεσότητες, καὶ ἡ μᾶλλον ἀρετὴ μᾶλλον ἐστὶ μεσότης· ὥστ' οὐχ ὅτι χεῖρω ποιήσει εἰς μέγεθος ἡ ἀρετὴ ἰοῦσα, ἀλλὰ βελτίω· ἡ γὰρ μεσότης ἐνδείας καὶ ὑπερβολῆς τῆς τῶν παθῶν ἦν μεσότης.

[4]

[1] Ταῦτα μὲν μέχρι τούτου· μετὰ δὲ ταῦτα ἀναγκαῖόν ἐστιν ἐτέραν ἀρχὴν ποιησαμένοις λέγειν ὑπὲρ ἐγκρατείας καὶ ἀκρασίας. ὥσπερ δὲ [καὶ] ἡ ἀρετὴ καὶ ἡ κακία αὐταὶ εἰσὶν ἄτοποι, ὡσαύτως ἀναγκαῖον καὶ τοὺς περὶ τούτων λόγους λεχθησομένους [2] ἀτόπους γίνεσθαι· οὐ γὰρ ὁμοία ἡ ἀρετὴ αὕτη ἐστὶν ταῖς ἄλλαις. ἐν μὲν γὰρ ταῖς ἄλλαις ἐπὶ ταῦτά καὶ ὁ λόγος καὶ τὰ πάθη ὁρμῶσιν καὶ οὐκ ἐναντιοῦνται ἀλλήλοις, ἐπὶ δὲ ταύτης ἐναντιοῦνται ἀλλήλοις ὃ τε λόγος καὶ τὰ πάθη.

[3] Ἔστι δὲ τρία τὰ ἐν τῇ ψυχῇ γινόμενα, καθ' ἃ φαῦλοι λεγόμεθα, κακία ἀκρασία θηριότης. ὑπὲρ μὲν οὖν κακίας καὶ ἀρετῆς τί ἐστὶ καὶ ἐν τίσιν, εἴρηται ἡμῖν ἐν τοῖς ἐπάνω· νῦν δὲ ὑπὲρ ἀκρασίας καὶ θηριότητος λεκτέον ἂν εἴη.

[5]

[1] Ἔστιν δὲ ἡ θηριότης ὑπερβάλλουσά τις κακία. ὅταν γάρ τινα παντελῶς ἴδωμεν φαῦλον, οὐδ' ἄνθρωπόν φαμεν εἶναι ἀλλὰ θηρίον, ὡς οὔσαν τινὰ [2] κακίαν θηριότητα. ἡ δὲ ἀντικειμένη ἀρετὴ ταύτη ἐστὶν ἀνώνυμος, ἔστιν δ' ἡ τοιαύτη ὑπὲρ ἄνθρωπον οὔσα, οἷον ἡρωϊκὴ τις καὶ θεία. ἀνώνυμος δὲ ἐστὶν αὕτη ἡ ἀρετὴ, ὅτι οὐκ ἔστιν θεοῦ ἀρετὴ· ὁ γὰρ θεὸς βελτίων τῆς ἀρετῆς καὶ οὐ κατ' ἀρετὴν ἐστὶ [3] σπουδαῖος· οὕτω μὲν γὰρ βέλτιον ἔσται ἡ ἀρετὴ τοῦ θεοῦ. διὸ ἀνώνυμος ἡ ἀρετὴ ἢ τῇ κακίᾳ τῇ θηριότητι ἀντικειμένη. θέλει δὲ τῇ τοιαύτῃ ἀντικεῖσθαι ἡ θεία καὶ ὑπὲρ ἄνθρωπον· ὥσπερ γὰρ καὶ ἡ κακία ἡ θηριότης ὑπὲρ ἄνθρωπον ἐστίν, οὕτω καὶ ἡ ἀρετὴ ἢ ἀντικειμένη.

[6]

[1] Ὑπὲρ δὲ ἀκρασίας καὶ ἐγκρατείας πρῶτον <ἂν> δέοι εἰπεῖν τὰ ἀπορούμενα καὶ τοὺς ἐναντιουμένους λόγους τοῖς φαινομένοις, ὅπως

ἐκ τῶν ἀπορουμένων καὶ ἐναντιουμένων λόγων συνεπισκεψάμενοι καὶ ταῦτα ἐξετάσαντες τὴν ἀλήθειαν ὑπὲρ αὐτῶν εἰς τὸ ἐνδεχόμενον ἴδωμεν· ῥῆον γὰρ οὕτως ἰδεῖν τάληθές ἐστι.

[2] Σωκράτης μὲν οὖν ὁ πρεσβύτερος ἀνῆρει ὅλως καὶ οὐκ ἔφη ἀκρασίαν εἶναι, λέγων ὅτι οὐθεὶς εἰδὼς τὰ κακὰ ὅτι κακὰ εἰσιν ἔλοιτ' ἄν· ὁ δὲ ἀκρατὴς δοκεῖ, εἰδὼς ὅτι φαῦλα εἰσίν, αἰρεῖσθαι ὅμως, ἀγόμενος ὑπὸ τοῦ πάθους. διὰ δὲ τὸν τοιοῦτον λόγον οὐκ [3] ὥς εἶναι ἀκρασίαν· οὐ δὲ ὀρθῶς. ἄτοπον γὰρ τῷ λόγῳ τούτῳ πεισθέντας ἀναιρεῖν τὸ πιθανῶς γινόμενον· ἀκρατεῖς γὰρ εἰσιν ἄνθρωποι, καὶ αὐτοὶ εἰδότες ὅτι φαῦλα ὅμως ταῦτα πράττουσιν.

[4] Ἐπεὶ δ' οὖν ἔστιν ἀκρασία, πότερον ὁ ἀκρατὴς ἐπιστήμην τινὰ ἔχει, ἢ θεωρεῖ καὶ ἐξετάζει τὰ φαῦλα; ἀλλὰ πάλιν οὐκ ἂν δόξειεν. ἄτοπον γὰρ τὸ κράτιστον καὶ βεβαιότατον τῶν ἐν ἡμῖν ἡττᾶσθαι ὑπὸ τινός· ἐπιστήμη γὰρ πάντων τῶν ἐν ἡμῖν μονιμώτατόν ἐστι καὶ βιαστικώτατον· ὥστε πάλιν ὁ λόγος οὗτος ἐναντιοῦται τῷ μὴ εἶναι ἐπιστήμην.

[5] Ἀλλ' ἄρα γε ἐπιστήμη μὲν οὐ, δόξα δέ; ἀλλ' εἰ δόξαν ἔχει ὁ ἀκρατὴς, οὐκ ἂν εἴη ψεκτός. εἰ γὰρ φαῦλόν τι πράττει μὴ ἀκριβῶς εἰδὼς ἀλλὰ δοξάζων, συγγνώμην ἂν τις ἀποδοίη προσθέσθαι τῇ ἡδονῇ καὶ πρᾶξαι τὰ φαῦλα, μὴ ἀκριβῶς εἰδόμενα ὅτι [οὐ] φαῦλα εἰσίν, ἀλλὰ δοξάζοντα· οἷς δέ γε συγγνώμην ἔχομεν, τούτους οὐ ψέγομεν· ὥστε ὁ ἀκρατὴς, εἴπερ δόξαν ἔχει, οὐκ ἔστι ψεκτός. ἀλλ' ἔστιν ψεκτός.

[6] Οἱ δὲ τοιοῦτοι λόγοι ἀπορεῖν ποιοῦσιν. οἱ μὲν γὰρ οὐκ ἔφασαν εἶναι ἐπιστήμην, ἄτοπόν τι γὰρ συμβαίνειν ἐποιοῦν· οἱ δὲ πάλιν οὐδὲ δόξαν, καὶ γὰρ οὗτοι ἄτοπόν τι πάλιν [ἐποιοῦν] συμβαίνειν.

[7] Ἀλλὰ δὴ καὶ ταῦτ' ἂν τις ἀπορήσειεν· ἐπεὶ γὰρ δοκεῖ ὁ σώφρων καὶ ἐγκρατὴς εἶναι, πότερον τῷ σώφρονι τι ποιήσει σφοδρὰς ἐπιθυμίας; εἰ μὲν οὖν ἔστι ἐγκρατὴς, σφοδρὰς δεήσει αὐτὸν ἔχειν ἐπιθυμίας (οὐ γὰρ ἂν εἰποῖς ἐγκρατῆ, ὅστις μετρίων ἐπιθυμιῶν κρατεῖ)· εἰ δέ γε σφοδρὰς [μὴ] ἔξει ἐπιθυμίας, οὐκέτι ἔστι σώφρων (ὁ γὰρ σώφρων ἐστὶν ὁ μὴ ἐπιθυμῶν μηδὲ πάσχων μηθέν).

[8] Ἐχει δὲ καὶ τὰ τοιαῦτα πάλιν ἀπορίαν. συμβαίνει γὰρ ἐκ τῶν λόγων καὶ τὸν ἀκρατῆ ποτε ἐπαινετὸν εἶναι καὶ τὸν ἐγκρατῆ ψεκτόν. ἔστω γὰρ τις, φησὶν, διημαρτηκῶς τῷ λογισμῷ, καὶ δοκεῖτω αὐτῷ λογιζομένῳ τὰ καλὰ εἶναι φαῦλα, ἢ δ' ἐπιθυμία ἀγέτω ἐπὶ τὰ καλὰ· οὐκοῦν ὁ μὲν λόγος οὐκ ἐάσει πράττειν, ὑπὸ δὲ τῆς ἐπιθυμίας

ἀγόμενος πράσσει (τοιούτος γὰρ ἦν ὁ ἀκρατής)· πράξει ἄρα τὰ καλὰ, ἢ γὰρ ἐπιθυμία ἐπὶ ταῦτα ἀγέτω (ὁ δὲ λόγος κωλύσει· διαμαρτανέτω γὰρ τῷ λογισμῷ τῶν καλῶν)· οὐκοῦν οὗτος ἀκρατής μὲν ἔσται, ἐπαινετὸς μέντοι· ἢ γὰρ πράττει τὰ καλὰ, ἐπαινετός· ἄτοπον δὲ τὸ συμβαῖνον.

[9] Πάλιν δ' αὖ διαμαρτανέτω τῷ λόγῳ, καὶ τὰ καλὰ αὐτῷ μὴ δοκεῖτω καλὰ εἶναι, ἢ δ' ἐπιθυμία ἀγέτω ἐπὶ τὰ καλὰ· ἐγκρατής δέ γε ἔστιν ὁ ἐπιθυμῶν μὲν, μὴ πράττων δὲ ταῦτα διὰ τὸν λόγον· οὐκοῦν ὁ διαμαρτάνων τῷ λόγῳ τῶν καλῶν κωλύσει ὧν ἐπιθυμεῖ πράττειν, κωλύει ἄρα τὰ καλὰ πράττειν (ἐπὶ ταῦτα γὰρ ἡ ἐπιθυμία ἤγαγεν)· ὁ δέ γε τὰ καλὰ μὴ πράττων δέον πράττειν ψεκτός· ὁ ἄρα ἐγκρατής ἔσται ποτὲ ψεκτός· ἄτοπον δὲ καὶ οὕτω τὸ συμβαῖνον.

[10] Πότερον δ' ἡ ἀκρασία καὶ ὁ ἀκρατής ἐν ἅπασιν ἔστιν καὶ περὶ πάντα, οἷον περὶ χρήματα καὶ τιμὴν καὶ ὀργὴν καὶ δόξαν (περὶ γὰρ ταῦτα πάντα δοκοῦσιν ἀκρατεῖς εἶναι), ἢ οὐ, ἀλλὰ περὶ τι ἀφορισμένον ἔστιν ἡ ἀκρασία, ἀπορήσειεν ἂν τις.

Τὰ μὲν οὖν τὴν ἀπορίαν παρέχοντα ταῦτ' ἐστίν· [11] ἀναγκαῖον δὲ λῦσαι τὰς ἀπορίας, πρῶτον μὲν οὖν τὴν ἐπὶ τῆς ἐπιστήμης· ἄτοπον γὰρ ἐδόκει εἶναι ἐπιστήμην ἔχοντα ταύτην ἀποβάλλειν ἢ μεταπίπτειν.

[12] Ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῆς δόξης· οὐθὲν γὰρ διαφέρει δόξαν εἶναι ἢ ἐπιστήμην· εἰ γὰρ ἔσται ἡ δόξα σφοδρὰ τῷ βέβαιον εἶναι καὶ ἀμετάπειστον, οὐθὲν διοίσει τῆς ἐπιστήμης, δόξης ἐχούσης τὸ πιστεύειν οὕτως ἔχειν ὥς δοξάζουσιν, οἷον Ἡράκλειτος ὁ Ἐφέσιος τοιαύτην ἔχει δόξαν ὑπὲρ ὧν αὐτῷ ἐδόκει.

[13] Οὐθὲν δὲ ἄτοπον τῷ ἀκρατεῖ, οὐτ' εἰ ἐπιστήμην ἔχει οὐτ' εἰ δόξαν οἷαν λέγομεν, πράττειν τι φαῦλον. ἔστι γὰρ τὸ ἐπίστασθαι διττόν, ὧν τὸ μὲν ἔστι τὴν ἐπιστήμην ἔχειν (ἐπίστασθαι γὰρ φαμεν τότε, ὅταν τις ἐπιστήμην ἔχη), τὸ δ' ἕτερον τὸ ἐνεργεῖν ἤδη τῇ ἐπιστήμῃ. ἀκρατής οὖν ἔστιν ὁ ἔχων τὴν ἐπιστήμην τῶν καλῶν, οὐκ ἐνεργῶν δὲ [14] αὐτῇ· ὅταν οὖν μὴ ἐνεργῇ τῇ ἐπιστήμῃ ταύτῃ, οὐδὲν ἄτοπον αὐτόν ἔστιν πράττειν τὰ φαῦλα ἔχοντα τὴν ἐπιστήμην. ὅμοιον γάρ ἐστιν ὥσπερ ἐπὶ τῶν καθευδόντων. οὗτοι γὰρ ἔχοντες τὴν ἐπιστήμην ὅμως ἐν τῷ ὕπνῳ πολλὰ δυσχερῆ καὶ πράττουσι καὶ πάσχουσιν. οὐ γὰρ ἐνεργεῖ ἐν αὐτοῖς ἡ ἐπιστήμη. ὡσαύτως δ' ἐπὶ τοῦ ἀκρατοῦς. ὥσπερ γὰρ καθεύδοντι ἔοικεν, καὶ τῇ ἐπιστήμῃ οὐκ [15] ἐνεργεῖ. λύεται δὲ ἀπορία οὕτως. ἡπορεῖτο γὰρ πότερον ὁ ἀκρατής

ἐκβάλλει τότε τὴν ἐπιστήμην ἢ μεταπίπτει. ἄτοπον γὰρ ἀμφοτέρω
δοκεῖ εἶναι.

Ἀλλὰ πάλιν ἐντεῦθεν ἂν γένοιτο φανερόν, ὥσπερ ἔφαμεν ἐν
τοῖς ἀναλυτικοῖς, ἐκ δύο προτάσεων γίνεσθαι τὸν συλλογισμόν, καὶ
τούτων εἶναι τὴν μὲν πρώτην καθόλου, τὴν δὲ δευτέραν ὑπὸ ταύτην
τε καὶ ἐπὶ μέρους. οἷον ἐπίσταμαι πάντ' ἄνθρωπον πυρέττοντα ὑγιῇ
ποιῆσαι· οὗτοσι δὲ πυρέττει· ἐπίσταμαι ἄρα καὶ τοῦτον ὑγιῇ ποιῆσαι.
ἔστιν οὖν ὁ τῇ μὲν καθόλου ἐπιστήμῃ ἐπίσταμαι, τῇ δ' ἐπὶ [16]
μέρους οὐ. γίνεται οὖν ἁμαρτία τῷ τὴν ἐπιστήμην ἔχοντι καὶ
ἐνταῦθα, οἷον ἅπαντα μὲν τὸν πυρέττοντα ὑγιῇ ποιῆσαι «ἐπίσταμαι»,
εἰ μέντοι οὗτος πυρέττει, οὐκ οἶδα. ὡσαύτως τοίνυν ἐπὶ τοῦ
ἄκρατοῦς τοῦ τὴν ἐπιστήμην ἔχοντος ἡ αὐτὴ ἁμαρτία συμβήσεται.
ἐνδέχεται γὰρ τὸν ἄκρατὴ τὴν μὲν καθόλου ἐπιστήμην ἔχειν, ὅτι τὰ
τοιαῦτα φαῦλα καὶ βλαβερὰ, μὴ μέντοι γε ὅτι ἐστὶν ταῦτα φαῦλα ἐπὶ
μέρους εἰδέναι, ὥστε οὕτως ἔχων τὴν ἐπιστήμην ἁμαρτήσεται· ἔχει
γὰρ τὴν καθόλου, τὴν δ' ἐπὶ μέρους οὐ.

[17] Οὐδὲν οὖν ἄτοπον οὐδ' οὕτω συμβήσεται ἐπὶ τοῦ ἄκρατοῦς,
τὸν ἔχοντα τὴν ἐπιστήμην φαῦλόν τι πράττειν. ἔστι γὰρ ὡς ἐπὶ τῶν
μεθύνοντων. οἱ γὰρ μεθύοντες, ὅταν αὐτοῖς ἡ μέθη ἀπαλλαγῇ, πάλιν
οἱ αὐτοὶ εἰσὶν· οὐκ ἐξέπεσεν δ' αὐτῶν ὁ λόγος οὐδ' ἡ ἐπιστήμη, ἀλλ'
ἐκρατήθη ὑπὸ τῆς μέθης, ἀπαλλαγέντες δὲ τῆς μέθης πάλιν οἱ αὐτοὶ
εἰσὶν. ὁμοίως οὖν ἔχει ὁ ἄκρατὴς [πάλιν]. ἐπικρατήσαν γὰρ τὸ πάθος
ἡρεμεῖν ἐποίησε τὸν λογισμόν· ὅταν δ' ἀπαλλαγῇ τὸ πάθος ὥσπερ ἡ
μέθη, πάλιν ὁ αὐτὸς ἐστίν.

[18] Ἦν δὲ καὶ ἄλλος τις λόγος ἐπὶ τῆς ἀκρασίας ὃς παρεῖχεν
ἀπορίαν, ὡς ἐπαινετοῦ ποτε τοῦ ἄκρατοῦς ἐσομένου καὶ ψεκτοῦ τοῦ
ἐγκρατοῦς. οὐ συμβαίνει δὲ τοῦτο. οὐ γὰρ ἐστὶν οὗτ' ἐγκρατὴς οὗτ'
ἄκρατὴς ὁ τῷ λόγῳ διεψευσμένος, ἀλλὰ ὁ λόγον ἔχων ὀρθὸν καὶ
τούτῳ τὰ φαῦλα ὄντα κρίνων καὶ τὰ καλὰ, καὶ ἄκρατὴς μὲν ὁ τῷ
τοιούτῳ λόγῳ ἀπειθῶν, ἐγκρατὴς δὲ ὁ πειθόμενος καὶ μὴ ὑπὸ τῶν
ἐπιθυμιῶν ἀγόμενος· οὐδὲ γὰρ ᾧ τινι οὐ δοκεῖ τὸν πατέρα τύπτειν
αἰσχρὸν εἶναι, ἐπιθυμῶν δὲ τύπτειν, ὁ τούτου [19] ἀπεχόμενος
ἐγκρατὴς ἐστὶ· ὥστε εἰ μὴ ἐστὶν ἐπὶ τῶν τοιούτων μήτε ἐγκράτεια
μήτε ἀκρασία, οὐδ' ἂν ἐπαινετὴ εἴη ἡ ἀκρασία οὐδὲ ψεκτὴ ἡ
ἐγκράτεια, ὥσπερ ἐδόκει.

[20] Εἰσὶ δὲ τῶν ἀκρασιῶν αἱ μὲν νοσηματικαὶ αἱ δὲ φύσει. οἷον
νοσηματικαὶ μὲν αἱ τοιαῦται· εἰσὶ γὰρ τινες οἱ τίλλοντες τρίχας

διατρώγουσιν. εἰ οὖν τις ταύτης τῆς ἡδονῆς κρατεῖ, οὐκ ἔστιν ἐπαινετός, οὐδὲ ψεκτός, εἰ μὴ κρατεῖ, ἢ οὐ σφόδρα γε. φύσει δέ, οἷον υἱόν ποτέ φασι κρινόμενον ἐν δικαστηρίῳ, ὅτι τὸν πατέρα τύπτει, ἀπολογεῖσθαι λέγονθ' ὅτι “καὶ γὰρ οὗτος τὸν ἑαυτοῦ πατέρα,” καὶ ἀποφυγεῖν δὴ· δοκεῖν γὰρ τοῖς δικασταῖς φυσικὴν εἶναι τὴν ἁμαρτίαν. εἰ δὴ τις τοῦ τὸν πατέρα τύπτειν [21] κρατοίη, οὐκ ἐπαινετός. οὐ δὴ τὰς τοιαύτας ζητοῦμεν νῦν ἀκρασίας οὐδ' ἐγκρατείας, ἀλλὰ καθ' ἃς ψεκτοὶ ἀπλῶς καὶ ἐπαινετοὶ λεγόμεθα.

Ἔστιν δὲ τῶν ἀγαθῶν τὰ μὲν ἐκτός, οἷον πλοῦτος ἀρχὴ τιμῆ φίλοι δόξα, τὰ δ' ἀναγκαῖα καὶ περὶ σῶμα ἐστίν, οἷον ἀφῆ τε καὶ γεῦσις ὁ οὖν περὶ ταῦτα ἀκρατής, οὗτος ἀπλῶς ἂν [καὶ] ἀκρατής δόξειεν εἶναι, καὶ ἡδοναὶ σωματικαί· καὶ ἦν ζητοῦμεν ἀκρασίαν, ἥδη περὶ ταῦτα δόξειεν ἂν εἶναι. ἤπορεῖτο δὲ περὶ τί ποτ' ἐστὶν ἡ ἀκρασία.

[22] Περὶ μὲν οὖν τιμὴν οὐκ ἔστιν ἀπλῶς ἀκρατής· ἐπαινεῖται γάρ πως ὁ περὶ τιμὴν ἀκρατής· φιλότιμος γάρ τις [ἐστίν]. τὸ δ' ὅλον λέγομεν καὶ ἐπὶ τῶν τοιούτων τὸν ἀκρατὴ προστιθέντες, περὶ τιμὴν ἀκρατής ἢ δόξαν ἢ ὀργήν. ἀλλὰ τῷ ἀπλῶς ἀκρατεῖ οὐ προστίθεμεν περὶ ἃ, ὥς ὑπάρχοντος αὐτῷ καὶ φανεροῦ ὄντος ἄνευ τῆς προσθέσεως, περὶ ἃ ἐστίν· ἔστιν γὰρ περὶ ἡδονὰς καὶ λύπας τὰς σωματικὰς ὁ ἀπλῶς ἀκρατής.

[23] Δῆλον δὲ καὶ ἐντεῦθεν, ὅτι περὶ ταῦτα ἡ ἀκρασία· ἐπεὶ γὰρ ψεκτός ὁ ἀκρατής, ψεκτὰ εἶναι δεῖ τὰ ὑποκείμενα· τιμὴ μὲν οὖν καὶ δόξα καὶ ἀρχὴ καὶ χρήματα καὶ περὶ ὅσα ἄλλα ἀκρατεῖς λέγονται, οὐκ εἰσὶν ψεκτά, αἱ δ' ἡδοναὶ αἱ σωματικαὶ ψεκταί· διὸ εἰκότως ὁ περὶ ταύτας ὢν μᾶλλον τοῦ δέοντος, οὗτος ἀκρατής τελέως λέγεται.

[24] Ἐπειδὴ δὲ ἐστὶ τῶν περὶ τὰ ἄλλα ἀκρασιῶν λεγομένων ἡ περὶ τὴν ὀργὴν οὕσα ἀκρασία ψεκτοτάτη, πότερον ψεκτοτέρα ἐστὶν ἡ περὶ τὴν ὀργὴν ἢ ἡ περὶ τὰς ἡδονάς;

Ἔστιν οὖν ἡ περὶ τὴν ὀργὴν ἀκρασία ὁμοία τῶν παίδων τοῖς πρὸς τὸ διακονεῖν προθύμως ἔχουσιν· καὶ γὰρ οὗτοι, ὅταν εἴπῃ ὁ δεσπότης “δός μοι,” τῇ προθυμίᾳ ἐξενεχθέντες, πρὸ τοῦ ἀκοῦσαι ὁ δεῖ δοῦναι, ἔδωκαν, καὶ ἐν τῇ δόσει διήμαρτον· πολλάκις γὰρ δέον βιβλίον δοῦναι γραφεῖον ἔδωκαν.

[25] ὅμοιον δὲ πέπονθε τούτῳ ὁ τῆς ὀργῆς ἀκρατής· ὅταν γὰρ ἀκούσῃ τὸ πρῶτον ῥῆμα ὅτι ἡδίκησεν, ὥρμησεν ὁ θυμὸς πρὸς τὸ τιμωρῆσθαι, οὐκέτι ἀναμείνας ἀκοῦσαι πότερον δεῖ ἢ οὐ δεῖ, ἢ ὅτι

γε [26] οὐχ οὕτω σφόδρα. ἡ μὲν οὖν τοιαύτη ὁρμὴ πρὸς ὀργήν, ἣ δοκεῖ ἀκρασία εἶναι ὀργῆς, οὐ λίαν ἐπιτιμητέα ἐστίν, ἡ δὲ πρὸς [τὴν] ἡδονὴν ὁρμὴ ψεκτὴ γε. ἔστιν γὰρ διαφορὰν ἔχουσα πρὸς ταύτην διὰ τὸν λόγον, ὃς ἀποτρέπει τοῦ μὴ πράττειν, ἀλλ' ὅμως πράττει παρὰ τὸν λόγον· διὸ ψεκτὴ ἐστὶ μᾶλλον τῆς δι' ὀργὴν ἀκρασίας. ἡ μὲν γὰρ δι' ὀργὴν ἀκρασία λύπη ἐστίν (οὐδεὶς γὰρ ὀργιζόμενος οὐ λυπεῖται), ἡ δὲ δι' ἐπιθυμίαν μεθ' ἡδονῆς· διὸ μᾶλλον ψεκτὴ· ἡ γὰρ δι' ἡδονὴν ἀκρασία μεθ' ὕβρεως δοκεῖ εἶναι.

[27] Πότερον δὲ καὶ ἡ ἐγκράτεια καὶ ἡ καρτερία ταυτὸν ἐστίν; ἢ οὐ; ἡ μὲν γὰρ ἐγκράτειά ἐστι περὶ ἡδονᾶς καὶ ὁ ἐγκρατὴς ὁ κρατῶν τῶν ἡδονῶν, ἡ δὲ καρτερία περὶ λύπας· ὁ γὰρ καρτερῶν καὶ ὑπομένων τὰς λύπας, οὗτος καρτερικὸς ἐστίν.

[28] Πάλιν ἡ ἀκρασία καὶ ἡ μαλακία οὐκ ἔστιν ταυτὸν· ἡ μὲν γὰρ μαλακία ἐστίν καὶ ὁ μαλακὸς ὁ μὴ ὑπομένων πόνους, οὐχ ἅπαντας δὲ ἀλλ' οὓς ἀναγκαίως ἂν ἄλλος τις ὑπομείνειεν, ὁ δ' ἀκρατὴς ὁ μὴ δυνάμενος ὑπομείνειν ἡδονάς, ἀλλὰ καταμαλακιζόμενος καὶ ὑπὸ τούτων ἀγόμενος.

[29] Ἔστιν αὖ πάλιν τις καλούμενος ἀκόλαστος· πότερον οὖν ὁ ἀκόλαστος [ἀκρατὴς] καὶ ὁ ἀκρατὴς ὁ αὐτός; ἢ οὐ; ὁ μὲν γὰρ ἀκόλαστος τοιοῦτός τις οἷος οἶεσθαι, ἃ πράττει, ταῦτα καὶ βέλτιστα εἶναι αὐτῷ καὶ συμφωρότατα, καὶ λόγον οὐδένα ἔχει ἐναντιούμενον τοῖς αὐτῷ φαινομένοις ἡδέσιν· ὁ δὲ ἀκρατὴς λόγον ἔχει ὃς ἐναντιοῦται αὐτῷ, ἐφ' ἃ ἡ ἐπιθυμία ἄγει.

[30] Πότερος δὲ εὐιατότερος, ὁ ἀκόλαστος ἢ ὁ ἀκρατὴς; οὕτω μὲν οὖν δόξειεν ἂν ἴσως οὐχ ὁ ἀκρατὴς· ὁ γὰρ ἀκόλαστος εὐιατότερος· εἰ γὰρ αὐτῷ λόγος ἐγγένοιτο ὁ διδάξων ὅτι φαῦλα, οὐκέτι πράξει· τῷ δὲ γε ἀκρατεῖ ὑπάρχει ὁ λόγος, καὶ ὅμως πράττει, ὥστε ἂν ὁ τοιοῦτος δόξειεν ἀνίατος εἶναι.

[31] Ἀλλὰ πότερος διάκειται χεῖρον, ᾧ μὴδὲν ἀγαθόν τι ὑπάρχει, «ἢ ᾧ ἀγαθόν τέ τι ὑπάρχει» καὶ τὰ κακὰ ταῦτα; ἢ δήλον ὅτι ἐκεῖνος, καὶ ὅσῳ γε ὁ τιμώτερον κακῶς διάκειται. ἔστι τοίνυν ὁ μὲν ἀκρατὴς ἀγαθὸν ἔχων τὸν λόγον ὀρθὸν ὄντα· ὁ δὲ [32] ἀκόλαστος οὐκ ἔχει. ἔτι ἐστὶν ὁ λόγος ἐκάστου ἀρχή· τοῦ μὲν οὖν ἀκρατοῦς ἡ ἀρχὴ τιμωτάτον ὃν εὖ διάκειται, τοῦ δὲ ἀκολάστου κακῶς· ὥστε χείρων ἂν εἴη ὁ ἀκόλαστος τοῦ ἀκρατοῦς.

[33] Ἔτι ὥσπερ καὶ ἐπὶ τῆς θηριότητος ἥς ἐλέγομεν κακίας οὐκ ἔστιν ἰδεῖν ἐν θηρίῳ οὕσαν, ἀλλ' ἐν ἀνθρώπῳ· ἡ γὰρ θηριότης ὀνομά

ἐστὶν τῇ ὑπερβαλλούσῃ κακία - διὰ τί; δι' οὐδὲν ἢ ὅτι ἀρχὴ φαύλη ἐν θηρίῳ οὐκ ἔστιν· ἔστιν δὲ ἡ ἀρχὴ ὁ λόγος. ἐπεὶ πότερος ἂν πλείω κακὰ ποιήσειεν, λέων, ἢ Διονύσιος ἢ Φάλαρις ἢ Κλέαρχος ἢ τις τούτων τῶν μοχθηρῶν; ἢ δῆλον ὅτι οὗτοι; ἡ γὰρ ἀρχὴ ἐνοῦσα φαύλη μεγάλα συμβάλλεται, ἐν δὲ θηρίῳ [34] ὅλως οὐκ ἔστιν ἀρχή. ἐν μὲν οὖν τῷ ἀκολάστῳ ἔνεστιν ἀρχὴ φαύλη. ἢ γὰρ πράττει φαῦλα ὄντα καὶ ὁ λόγος σύμφησιν ταῦτα καὶ δοκεῖ αὐτῷ ταῦτα δεῖν πράττειν, ἐν αὐτῷ ἡ ἀρχὴ ἔνεστιν οὐχ ὑγιής. διὸ βελτίων ἂν δόξειεν εἶναι ὁ ἀκρατὴς τοῦ ἀκολάστου.

[35]

Ἔστι δὲ καὶ τῆς ἀκρασίας δύο εἶδη, ἡ μὲν προπετική τις καὶ ἀπρονόητος καὶ ἐξαίφνης γινομένη (οἷον ὅταν ἴδωμεν καλὴν γυναῖκα, εὐθέως τι ἐπάθομεν, καὶ ἀπὸ τοῦ πάθους ὁρμὴ ἐγένετο πρὸς τὸ πρᾶξαι τι ὧν ἴσως οὐ δεῖ), ἡ δ' ἑτέρα οἷον ἀσθενική τις, ἡ μετὰ τοῦ λόγου οὔσα τοῦ ἀποτρέποντος.

Ἐκείνη μὲν οὖν οὐδ' ἂν λίαν δόξειεν εἶναι ψεκτή· καὶ γὰρ ἐν τοῖς σπουδαίοις ἡ τοιαύτη ἐγγίνεται, ἐν τοῖς θερμοῖς καὶ εὐφυέσιν· ἡ δὲ ἐν τοῖς ψυχροῖς καὶ [36] μελαγχολικοῖς, οἱ δὲ τοιοῦτοι ψεκτοί. ἔτι τέ ἐστὶν τῷ λόγῳ προλαβόντα μὴ ἐν παθεῖν, ὅτι ἥξει γυνὴ εὐπρόσωπος, δεῖ οὖν κατασχεῖν αὐτόν. τῷ δὲ τοιούτῳ λόγῳ προκαταλαβὼν ὁ ἐκ τῆς προσφάτου φαντασίας ἀκρατὴς οὐδὲν πείσεται οὐδὲ πράξει οὐδὲν αἰσχρόν. ὁ δὲ τῷ λόγῳ μὲν εἰδὼς ὅτι οὐ δεῖ, πρὸς δὲ τὴν ἡδονὴν ἐνδιδούς καὶ καταμαλακιζόμενος, ὁ τοιοῦτος ψεκτότερος. οὔτε γὰρ ὁ σπουδαῖος οὐδέποτε οὕτω γένοιτ' ἂν ἀκρατὴς, ὃ τε λόγος προκαταλαβὼν οὐκ ἂν ἰάσαιτο. ἡγεμῶν γὰρ οὗτος ἐν αὐτῷ ὑπάρχει, ὃ οὔτε πειθαρχεῖ, ἀλλὰ τῇ ἡδονῇ ἐνδίδωσιν, καὶ καταμαλακίζεται καὶ ἐξασθενεῖ πῶς.

[37] Πότερον δ' ὁ σώφρων ἐγκρατὴς ἐστίν, ἢ πορήθη μὲν ἐν τοῖς ἐπάνω, νῦν δὲ λέγωμεν. ἔστιν γὰρ ὁ σώφρων καὶ ἐγκρατὴς· ὁ γὰρ ἐγκρατὴς ἐστὶν οὐ μόνον ὁ ἐπιθυμιῶν ἐνουσῶν ταύτας κατέχων διὰ τὸν λόγον, ἀλλὰ καὶ ὁ τοιοῦτος ὧν οἷος καὶ μὴ ἐνουσῶν ἐπιθυμιῶν τοιοῦτος εἶναι οἷος εἰ ἐγγένοιτο [38] κατέχειν. ἔστιν δὲ σώφρων ὁ μὴ ἔχων ἐπιθυμίας φαύλας τόν τε λόγον τὸν περὶ ταῦτα ὀρθόν, ὁ δ' ἐγκρατὴς ὁ ἐπιθυμίας ἔχων φαύλας τόν τε λόγον τὸν περὶ ταῦτα ὀρθόν· ὥστ' ἀκολουθήσει τῷ σώφρονι ὁ ἐγκρατὴς, καὶ ἔσται <ὁ> σώφρων <ἐγκρατὴς, ἀλλ' οὐχ ὁ ἐγκρατὴς σώφρων>. ὁ μὲν γὰρ σώφρων ὁ μὴ πάσχων, ὁ δ' ἐγκρατὴς ὁ πάσχων καὶ τούτων κρατῶν ἢ

οἷός τε ὢν πάσχειν· οὐδέτερον δὲ τούτων τῷ σώφρονι ὑπάρχει· διὸ οὐκ ἔστιν ὁ ἐγκρατὴς σώφρων.

[39] Πότερον δὲ ὁ ἀκόλαστος ἀκρατὴς ἐστίν, ἢ ὁ ἀκρατὴς ἀκόλαστος; ἢ οὐδετέρῳ ἕτερος ἀκολουθεῖ; ὁ μὲν γὰρ ἀκρατὴς ἐστὶν οὗ ὁ λόγος τοῖς πάθεσι μάχεται, ὁ δ' ἀκόλαστος οὐ τοιοῦτος, ἀλλ' ὁ τῷ πράττειν τὰ φαῦλα ἅμα τὸν λόγον σύμψηφον ἔχων· οὔτε δὴ ὁ ἀκόλαστος οἷος ὁ ἀκρατὴς οὐθ' ὁ [40] ἀκρατὴς οἷος ὁ ἀκόλαστος. ἔτι δὲ καὶ φαυλότερος ὁ ἀκόλαστος τοῦ ἀκρατοῦς. δυσιατότερα γὰρ τὰ φυσικὰ τῶν ἐξ ἔθους γενομένων (καὶ γὰρ τὸ ἔθος διὰ τοῦτο δοκεῖ ἰσχυρὸν εἶναι, ὅτι εἰς φύσιν καθίστησιν)· [41] ὁ μὲν οὖν ἀκόλαστος αὐτὸς τοιοῦτός ἐστιν οἷος φαῦλός τις τῇ φύσει εἶναι, διὰ τοῦτο καὶ ἀπὸ τούτου ὁ λόγος φαῦλος ἐν αὐτῷ ἐστί· ἀλλ' οὐχ ὁ ἀκρατὴς οὕτως· οὐ γὰρ ὅτι αὐτὸς τοιοῦτος ἐστίν, ὁ λόγος οὐ σπουδαῖος (φαῦλον γὰρ αὐτὸν ἔδει εἶναι, [42] εἰ αὐτὸς τῇ φύσει τοιοῦτος ἦν οἷος ὁ φαῦλος)· ὁ μὲν [οὖν] ἄρα ἀκρατὴς ἔθει ἔοικε φαῦλος εἶναι, ὁ δὲ ἀκόλαστος φύσει· δυσιατότερος δὴ ὁ ἀκόλαστος. τὸ μὲν γὰρ ἔθος ἄλλῳ ἔθει ἐκκρούεται, ἢ δὲ φύσις οὐδενὶ ἐκκρούεται.

[43] Πότερον δὲ ἐπέιπερ ἐστὶν ὁ ἀκρατὴς τοιοῦτος [τις] οἷος εἰδέναι καὶ μὴ διεψεῦσθαι τῷ λόγῳ, ἔστιν δὲ καὶ ὁ φρόνιμος τοιοῦτος ὁ τῷ λόγῳ τῷ ὀρθῷ ἕκαστα θεωρῶν, πότερον [δ'] ἐνδέχεται τὸν φρόνιμον ἀκρατῇ εἶναι, ἢ οὐ; ἀπορήσειε γὰρ ἂν τις τὰ εἰρημένα· ἐὰν δὲ παρακολουθήσωμεν τοῖς ἔμπροσθεν εἰρημένοις, οὐκ ἔσται ὁ φρόνιμος ἀκρατὴς. ἔφαμεν γὰρ τὸν φρόνιμον εἶναι οὐχ ὅ ὀρθὸς λόγος μόνον ὑπάρχει, ἀλλ' ὅ καὶ τὸ πράττειν τὰ κατὰ τὸν λόγον φαινόμενα βέλτιστα· εἰ δὲ πράττει τὰ βέλτιστα ὁ φρόνιμος, οὐδ' ἂν ἀκρατὴς εἴη ὁ φρόνιμος, [44] ἀλλ' ὁ τοιοῦτος δεινὸς μὲν ἐστίν. διηρήμεθα γὰρ ἐν τοῖς ἐπάνω τὸν τε δεινὸν καὶ τὸν φρόνιμον ὡς ἐτέρων ὄντων. περὶ μὲν γὰρ ταῦτα· ἀλλ' ὁ μὲν πρακτικὸς περὶ ἃ δεῖ, ὁ δ' οὐ πρακτικὸς. τὸν οὖν δεινὸν ἀκρατῇ ἐνδέχεται εἶναι (οὐ γὰρ πρακτικὸς περὶ ἃ καὶ δεῖ), τὸν φρόνιμον δ' οὐκ ἐνδέχεται ἀκρατῇ εἶναι.

[7]

[1] Μετὰ δὲ ταῦτα λεκτέον ἂν εἴη περὶ ἡδονῆς, ἐπειδήπερ ὑπὲρ εὐδαιμονίας ἐστὶν ὁ λόγος, τὴν δ' εὐδαιμονίαν οἷονται πάντες ἥτοι ἡδονὴν εἶναι καὶ τὸ ἡδέως ζῆν, ἢ οὐκ ἄνευ γε ἡδονῆς. οἱ δὲ καὶ τῇ ἡδονῇ δυσχεραίνοντες καὶ οὐκ οἰόμενοι δεῖν τὴν ἡδονὴν ἐναριθμεῖσθαι τοῖς ἀγαθοῖς, ἀλλὰ τό γε ἄλυπον προστιθέασιν· ἐγγὺς

οὖν τὸ ἀλύπως τῆς ἡδονῆς ἐστίν.

[2] Διόπερ λεκτέον ὑπὲρ ἡδονῆς, οὐ μόνον δὲ διότι καὶ οἱ ἄλλοι οἴονται δεῖν, ἀλλὰ δὴ ἀναγκαῖον ἡμῖν ἐστὶν λέγειν ὑπὲρ ἡδονῆς. ἐπειδὴ γὰρ ὑπὲρ εὐδαιμονίας ἡμῖν ἐστὶν ὁ λόγος, τὴν δ' εὐδαιμονίαν διωρίκαμεν καὶ φαμέν εἶναι ἀρετῆς ἐνέργειαν ἐν βίῳ τελείῳ, ἡ δ' ἀρετὴ ἐστὶ περὶ ἡδονῆν καὶ λύπην· ὑπὲρ ἡδονῆς ἂν εἴη ἀναγκαῖον εἰπεῖν, ἐπειδὴ περ οὐκ ἔστιν ἡ εὐδαιμονία ἄνευ ἡδονῆς.

[3] Πρῶτον μὲν οὖν εἰπόμεν ἅ τινες λέγοντες οὐκ οἴονται δεῖν τὴν ἡδονὴν ὥς ἐν ἀγαθοῦ μέρει λαμβάνειν.

Πρῶτον μὲν γὰρ φασιν εἶναι τὴν ἡδονὴν γένεσιν, τὴν δὲ γένεσιν ἀτελές τι, τὸ δὲ ἀγαθὸν οὐδέποτε τὴν τοῦ ἀτελοῦς χώραν ἔχειν.

Δεύτερον δ' ὅτι εἰσὶ τινες φαῦλαι ἡδοναί, τὸ δ' ἀγαθὸν οὐδέποτε ἐν φαυλότητι εἶναι.

Πάλιν ὅτι ἐν πᾶσιν ἐγγίγνεται· καὶ γὰρ ἐν τῷ φαύλῳ καὶ ἐν τῷ σπουδαίῳ καὶ ἐν θηρίῳ καὶ ἐν βοσκήματι· τὸ δ' ἀγαθὸν ἀμιγές ἐστὶ τοῖς φαύλοις καὶ οὐ πολύκοινον.

Καὶ ὅτι οὐ κράτιστον ἡδονή, τὸ δ' ἀγαθὸν κράτιστον.

Καὶ ὅτι ἐμπόδιον τοῦ πράττειν τὰ καλὰ, τὸ δὲ κωλυτικὸν τῶν καλῶν οὐκ ἂν εἴη ἀγαθόν.

[4] Πρῶτον μὲν οὖν πρὸς τὸ πρῶτον ἂν εἴη λεκτέον, πρὸς τὴν γένεσιν, καὶ πειρατέον τὸν λόγον τοῦτον λύειν διὰ τὸ μὴ ἀληθὴ εἶναι. ἔστι γὰρ πρῶτον μὲν οὐ πᾶσα ἡδονὴ γένεσις. ἡ γὰρ ἀπὸ τοῦ θεωρεῖν ἡδονὴ γινομένη οὐκ ἔστιν γένεσις, οὐδ' ἡ ἀπὸ τοῦ ἀκοῦσαι καὶ ἰδεῖν καὶ ὁσφρανθῆναι. οὐ γὰρ ἐξ ἐνδεΐας γινομένη, ὥσπερ ἐπὶ τῶν ἄλλων, οἷον ἐκ τοῦ φαγεῖν ἢ πιεῖν. αὗται μὲν γὰρ ἐξ ἐνδεΐας καὶ ὑπερβολῆς γίνονται, τῷ ἢ τὴν ἐνδειαν ἀναπληροῦσθαι ἢ τῆς ὑπερβολῆς ἀφαιρεῖσθαι· διὸ γένεσις [5] δοκεῖ εἶναι. ἡ δ' ἐνδεια καὶ ὑπερβολὴ λύπη. λύπη οὖν ἐνταῦθα ἔνθα ἡδονῆς γένεσις. ἐπὶ δέ γε τοῦ ἰδεῖν καὶ ἀκοῦσαι καὶ ὁσφρανθῆναι οὐκ ἔστιν προλυπηθῆναι· οὐδεὶς γὰρ ἡδόμενος τῷ ὁρᾶν ἢ τῷ [6] ὁσφραίνεισθαι προελυπήθη. ὁμοίως δὲ καὶ ἐπὶ τῆς διανοίας ἔστι θεωροῦντά τι ἡδῆσθαι ἄνευ τοῦ προλυπηθῆναι. ὥστ' εἴη ἂν τις ἡδονὴ ἢ οὐκ ἔστι γένεσις.

Εἰ οὖν ἡ μὲν ἡδονή, ὥς ὁ λόγος αὐτῶν ἔφη, διὰ τοῦτο οὐκ ἀγαθόν, ὅτι γένεσις, ἔστι δέ τις ἡδονή, ἢ οὐκ ἔστιν γένεσις, αὕτη ἂν εἴη ἀγαθόν.

[7] Τὸ δ' ὅλον οὐκ ἔστιν οὐδεμία ἡδονὴ γένεσις· οὐδὲ γὰρ αὗται

αἱ ἀπὸ τοῦ φαγεῖν καὶ πιεῖν ἡδοναὶ οὐκ εἰσὶ γενέσεις, ἀλλὰ διαμαρτάνουσιν οἱ ταύτας φάσκοντες εἶναι τὰς ἡδονὰς γενέσεις. οἶονται γάρ, ἐπειδὴ τῆς προσφορᾶς γινομένης γίνεται ἡδονή, διὰ [8] τοῦτο γενέσιν εἶναι· ἔστι δ' οὐ. ἐπειδὴ γάρ ἐστι τῆς ψυχῆς τι μέρος ᾧ ἡδόμεθα ἅμα τῇ προσφορᾷ ὧν ἐσμεν ἐνδεεῖς, τοῦτο τὸ μόριον τῆς ψυχῆς ἐνεργεῖ καὶ κινεῖται, ἢ δὲ κίνησις αὐτοῦ καὶ ἡ ἐνέργειά ἐστιν ἡδονή· διὰ δὴ τὸ ἅμα τῇ προσφορᾷ ἐκεῖνο τὸ μόριον τὸ τῆς ψυχῆς ἐνεργεῖν, ἢ διὰ τὴν αὐτοῦ ἐνέργειαν, οἶονται γενέσιν εἶναι τὴν ἡδονήν τῷ τὴν προσφορὰν δῆλὴν εἶναι, τὸ δὲ τῆς ψυχῆς [9] μόριον ἄδηλον. ὅμοιον οὖν εἴ τις τὸν ἄνθρωπον οἶεται εἶναι σῶμα, ὅτι τοῦτο μὲν αἰσθητὸν ἐστίν, ἢ δὲ ψυχὴ οὐ· ἔστι δέ γε καὶ [ἡ] ψυχὴ. ὁμοίως δὲ καὶ ἐπὶ τούτου· ἔστιν γὰρ μόριόν τι τῆς ψυχῆς ᾧ ἡδόμεθα, ὃ ἅμα τῇ προσφορᾷ ἐνεργεῖ. διὸ οὐκ ἔστιν οὐδεμία ἡδονὴ γενέσις.

[10] Καὶ ἀποκατάστασις δέ, φασίν, εἰς φύσιν αἰσθητή. καὶ γὰρ μὴ ἀποκαθισταμένοις εἰς φύσιν ἐστὶν ἡδονή· τὸ γὰρ ἀποκαθίστασθαι ἐστὶ τὸ τοῦ ἐνδεοῦς τῇ φύσει, τούτου τὴν ἀναπλήρωσιν γενέσθαι, ἔστιν δέ, ὡς φαμέν, μὴ ὄντα ἐνδεᾶ ἥδεσθαι· ἢ μὲν γὰρ ἔνδεια λύπη, ἄνευ δὲ λύπης καὶ πρὸ λύπης φαμέν ἥδεσθαι· ὥστ' οὐκ ἂν εἴη ἡ ἡδονὴ ἀποκατάστασις τοῦ ἐνδεοῦς· ἐνδεὲς γὰρ ἐπὶ τῶν τοιούτων ἡδονῶν οὐδέν.

Ὅστε εἰ διότι μὲν γενέσις ἡ ἡδονὴ οὐκ ἀγαθὸν ἐδόκει εἶναι, οὐκ ἔστιν δὲ οὐδεμία ἡδονὴ γενέσις, ἀγαθὸν ἂν εἴη ἡ ἡδονή.

[11] Ἀλλὰ μετὰ τοῦτο οὐ πᾶσα, φασίν, ἡδονὴ ἀγαθόν. συνίδοι δ' ἂν τις καὶ ὑπὲρ τούτου οὕτως. ἐπεὶ γὰρ τἀγαθόν φαμεν ἐν πάσαις ταῖς κατηγορίαις λέγεσθαι (καὶ γὰρ ἐν οὐσίᾳ καὶ ἐν τῷ πρὸς τι καὶ ποσῷ καὶ πότε καὶ ὅλως ἐν ἀπάσαις), ἤδη γ' ἐκεῖνο φανερόν. κατὰ πάσας γὰρ ἀγαθοῦ ἐνεργείας ἡδονὴ τις ἀκολουθεῖ, ὥστ' ἐπειδὴ τὸ ἀγαθὸν ἐν πάσαις ταῖς κατηγορίαις, καὶ ἡδονὴ ἂν εἴη ἀγαθόν· ὥστ' ἐπειδὴ ἐν τούτοις μὲν τἀγαθὰ καὶ ἡδονή, ἢ δ' ἀπὸ τῶν ἀγαθῶν ἡδονὴ ἡδονή, ἀγαθὸν ἂν εἴη πᾶσα ἡδονή.

[12] Ἄμα δὲ δῆλον ἐκ τούτου ὅτι καὶ διάφοροι τῷ εἶδει αἱ ἡδοναὶ εἰσίν. διάφοροι γὰρ καὶ αἱ κατηγορίαι, ἐν αἷς ἐστὶν ἡδονή. οὐ γὰρ ὥσπερ ἐπὶ τῶν ἐπιστημῶν ἔχει, οἷον τῆς γραμματικῆς ἢ ἄλλης ἡστιν οσοῦν. ἐὰν ἔχῃ γὰρ Λάμπρος τὴν γραμματικὴν, ὁμοίως [δὲ] διακίεσται ὑπὸ τῆς γραμματικῆς ταύτης ὁ γραμματικὸς ἄλλω ὁτῶν ἔχοντι γραμματικὴν, οὐ(δὲ) δύο εἰσὶν διάφοροι αἱ γραμματικά, ἢ τ' ἐν Λάμπρῳ καὶ ἐν Ἰλεῖ. ἀλλ' ἐπὶ τῆς ἡδονῆς οὐχ'

οὕτως. ἡ γὰρ ἀπὸ τῆς μέθης ἡδονὴ καὶ ἡ ἀπὸ τοῦ συγγίνεσθαι οὐχ ὁμοίως διατιθέασιν. διὸ διάφοροι τῷ εἶδει δόξαιεν ἂν εἶναι αἱ ἡδοναί.

[13] Ἀλλὰ δὴ καὶ διότι φαῦλαί εἰσιν ἡδοναί τινες, καὶ διὰ τοῦτο οὐκ ἐδόκει ἡ ἡδονὴ αὐτοῖς ἀγαθὸν εἶναι. τὸ δὲ τοιοῦτον καὶ ἡ τοιαύτη κρίσις οὐκ ἰδιὸς ἐστὶν ἡδονῆς, ἀλλὰ καὶ ἐπὶ φύσεως καὶ ἐπιστήμης. ἔστι γὰρ καὶ φύσις φαύλη, οἷον ἡ τῶν σκωλήκων καὶ ἡ τῶν κανθάρων καὶ ὅλως ἡ τῶν ἀτίμων ζώων, ἀλλ' [14] οὐ διὰ τοῦτο ἡ φύσις τῶν φαύλων· ὁμοίως δ' εἰσὶ καὶ ἐπιστήμαι φαῦλαι, οἷον αἱ βάνανσοι, ἀλλ' ὅμως οὐ διὰ τοῦτο φαῦλον ἡ ἐπιστήμη, ἀλλ' ἀγαθὸν τῷ γένει καὶ ἐπιστήμῃ καὶ φύσιν. ὥσπερ γὰρ οὐδ' ἀνδριαντοποιὸν θεωρεῖν δεῖ ποῖός τις ἐστὶν ἐξ ὧν ἀπέτυχε καὶ κακῶς εἰργάσατο, ἀλλ' ἐξ ὧν εὖ, οὕτως οὐδ' ἐπιστήμην οὐδὲ φύσιν οὐδὲ ἄλλο οὐδὲν ποῖον τί ἐστὶν ἐκ τῶν φαύλων, ἀλλ' ἐκ τῶν σπουδαίων.

[15] Ὅμοίως δὲ καὶ ἡ ἡδονὴ τῷ γένει ἀγαθὸν ἐστίν, ἐπεὶ ὅτι γέ εἰσιν φαῦλαι ἡδοναί, οὐδὲ ἡμᾶς λανθάνει. ἐπεὶ γὰρ καὶ φύσεις τῶν ζώων εἰσιν διάφοροι, οἷον καὶ φαύλη καὶ σπουδαία, οἷον ἡ μὲν ἀνθρώπου σπουδαία ἡ δὲ λύκου ἢ τινος ἄλλου θηρίου φαύλη, ὁμοίως δ' ἐτέρα φύσις ἵππου καὶ ἀνθρώπου καὶ [16] ὄνου καὶ κυνός, ἡ δὲ ἡδονὴ ἐστὶ κατάστασις ἐκ τοῦ παρὰ φύσιν εἰς φύσιν ἐκάστῳ τὴν αὐτοῦ· ὥστε τοῦτ' ἂν εἴη ἰδιον, τῇ γε φαύλῃ φύσει ἡ φαύλη ἡδονή. οὐ γὰρ ἐστὶ ταῦτόν καὶ ἵππῳ καὶ ἀνθρώπῳ, ὁμοίως οὐδὲ τοῖς ἄλλοις· ἀλλ' ἐπεὶ αἱ φύσεις διάφοροι, καὶ αἱ ἡδοναὶ διάφοροι. ἡ γὰρ ἡδονὴ ἦν ἀποκατάστασις, καὶ ἡ ἀποκατάστασις, φασίν, εἰς φύσιν καθίστη, ὥστε τῆς μὲν φαύλης φύσεως ἡ κατάστασις φαύλη, τῆς δὲ σπουδαίας σπουδαία.

[17] Ἀλλ' οἱ φάσκοντες εἶναι τὴν ἡδονὴν οὐ σπουδαίαν πεπόνθασιν οἷον οἱ μὴ εἰδότες τὸ νέκταρ οἶονται τοὺς θεοὺς οἶνον πίνειν καὶ οὐκ εἶναι τούτου ἥδιον οὐδέν. τοῦτο δὲ πάσχουσι διὰ τὴν ἄγνοιαν. οἷς ὅμοιον πεπόνθασιν οἱ πάσας τὰς ἡδονὰς γενέσεις φάσκοντες εἶναι καὶ οὐκ ἀγαθόν· διὰ γὰρ τὸ μὴ εἰδέναι ἄλλας ἡδονὰς ἀλλ' ἢ τὰς σωματικὰς, ταύτας τε ὁρᾶν γενέσεις τε οὐσας καὶ μὴ σπουδαίας, ὅλως οὐκ οἶονται εἶναι τὴν ἡδονὴν ἀγαθόν.

[18] Ἐπεὶ δ' οὖν ἐστὶν ἡ ἡδονὴ καὶ καθισταμένης τῆς φύσεως καὶ καθεστηκυίας, οἷον καθισταμένης μὲν αἱ ἐξ ἐνδείας ἀναπληρώσεις, καθεστηκυίας δὲ αἱ ἀπὸ τῆς ὀψεως καὶ τῆς ἀκοῆς καὶ τῶν τοιούτων οὔσαι, βελτίους ἂν εἶησαν αἱ καθεστηκυίας τῆς φύσεως ἐνέργειαι· αἱ γὰρ ἡδοναὶ κατ' ἀμφοτέρους λεγόμεναι τοὺς τρόπους ἐνέργειαι

εἰσίν· ὥστε δῆλον ὅτι αἱ ἀπὸ τῆς ὀψεως ἡδοναὶ καὶ τῆς ἀκοῆς καὶ τοῦ διανοεῖσθαι βέλτισται ἂν εἴησαν, ἐπεὶ αἱ γε σωματικαὶ ἐξ ἀναπληρώσεως.

[19] Ἐτι καὶ τοῦτο ἐλέγετο, ὅτι οὐκ ἀγαθόν· τὸ γὰρ ἐν πᾶσιν εἶναι καὶ πᾶσι κοινὸν οὐκ ἀγαθόν. τὸ δὲ τοιοῦτον ἐπὶ φιλοτίμου μᾶλλον καὶ φιλοτιμίας οἰκεῖον ἐστίν. ὁ γὰρ φιλότιμός ἐστιν ὁ μόνος βουλόμενος ἔχειν καὶ τῷ τοιούτῳ τῶν ἄλλων ὑπερέχειν· καὶ τὴν ἡδονὴν οὖν, εἰ μέλλει ἀγαθὸν εἶναι, τοιοῦτον δεῖν εἶναι.

[20] Ἡ οὖν, ἀλλὰ καὶ τοῦναντίον διὰ τοῦτο ἂν δόξειεν ἀγαθὸν εἶναι, ὅτι πάντα τούτου ἐφίεται; τοῦ γὰρ ἀγαθοῦ πάντα πέφυκεν ἐφίεσθαι, ὥστ' εἰ τῆς ἡδονῆς πάντ' ἐφίεται, ἀγαθὸν ἂν εἴη τῷ γένει ἢ ἡδονῇ.

[21] Πάλιν καὶ ὅτι ἐστὶν ἐμπόδιον ἢ ἡδονή, οὐκ ἔφασαν αὐτὴν ἀγαθὸν εἶναι. τὸ δ' ἐμπόδιον φάσκειν εἶναι διὰ τὸ μὴ ὀρθῶς σκοπεῖν φαίνεται· αὐτοῖς. οὐ γάρ ἐστὶν ἐμπόδιον ἢ ἀπὸ τοῦ πράγματος τοῦ πραττομένου ἡδονή· ἐὰν μέντοι ἄλλη, ἐμπόδιον, [22] οἷον ἢ ἀπὸ τῆς μέθης ἡδονή ἐμπόδιόν ἐστι τοῦ πράττειν, ἀλλ' οὕτω μὲν καὶ ἐπιστήμη ἐπιστήμης ἐμπόδιον ἔσται· οὐ γὰρ ἐστὶν ἅμα ἀμφοτέραις ἐνεργεῖν. ἀλλὰ διὰ τί οὐκ ἀγαθὸν ἢ ἐπιστήμη, ἂν ποιῇ τὴν ἀπὸ τῆς ἐπιστήμης ἡδονήν; καὶ πότερον [23] ἐμπόδιον ἔσται; ἢ οὖν, ἀλλὰ μᾶλλον πράξει; ἢ γὰρ ἡδονὴ παρορμᾷ πρὸς τὸ μᾶλλον πράττειν ἀπ' αὐτοῦ γινομένη, ἐπεὶ τὸν σπουδαῖον ποίησον πράττειν τὰ κατ' ἀρετὴν, καὶ ἡδέως ταῦτα πράττειν· ἄρα οὐ πολλῶ μᾶλλον ἐνεργήσει κατὰ τὴν πρᾶξιν; καὶ ἐὰν μὲν γε ἡδόμενος πράττη, σπουδαῖος ἔσται, ἂν δὲ λυπούμενος τὰ καλὰ πράττη, οὐ σπουδαῖος. ἢ γὰρ λύπη ἐπὶ τοῖς δι' ἀνάγκην ἐστίν, ὥστ' εἰ λυπεῖται τις τὰ καλὰ πράττων, ἀναγκαζόμενος πράττει· ὁ δ' ἐξ ἀνάγκης πράττων οὐ σπουδαῖος.

[24] Ἀλλὰ μὴν οὐκ ἔστιν γε μὴ λυπούμενον ἢ ἡδόμενον τὰ κατ' ἀρετὴν πράττειν· τὸ δ' ἀνὰ μέσον οὐκ ἔστιν. διὰ τί; ὅτι ἢ ἀρετὴ ἐν πάθει, τὸ δὲ πάθος ἐν λύπῃ καὶ ἡδονῇ, ἐν δὲ τῷ ἀνὰ μέσον οὐκ ἔστιν· δῆλον οὖν ὥς καὶ ἢ ἀρετὴ μετὰ λύπης ἢ ἡδονῆς. εἰ μὲν οὖν λυπούμενός τις τὰ καλὰ πράττει, οὐ σπουδαῖος. ὥστε οὐκ ἂν εἴη ἢ ἀρετὴ [25] μετὰ λύπης· μεθ' ἡδονῆς ἄρα. οὐ μόνον ἄρα οὐκ ἐμπόδιόν ἐστιν ἢ ἡδονή, ἀλλὰ καὶ προτρεπτικὸν πρὸς τὸ πράττειν, καὶ τὸ ὅλον δὲ οὐκ ἐνδέχεται ἄνευ ἡδονῆς εἶναι τῆς ἀπ' αὐτῆς γινομένης.

[26] Ἄλλος ἦν λόγος ὅτι οὐδεμία ποιεῖ ἐπιστήμη ἡδονήν. ἔστιν δὲ

οὐδὲ τοῦτο ἀληθές. οἱ γὰρ δειπνοποιοὶ καὶ στεφανοποιοὶ καὶ [οἱ] μυρεψοὶ ἡδονῆς εἰσιν ποιητικοί. ἀλλὰ δὴ ταῖς ἄλλαις ἐπιστήμαις οὐκ ἔστιν ἡ ἡδονὴ ὡς τέλος, ἀλλὰ μεθ' ἡδονῆς τε καὶ οὐκ ἄνευ ἡδονῆς. ἔστιν οὖν καὶ ἐπιστήμη ποιητικὴ ἡδονῆς.

[27] Ἔτι δὲ καὶ ἄλλος ἐλέγετο, ὅτι οὐκ ἄριστον. ἀλλ' οὕτως μὲν καὶ τῷ τοιούτῳ λόγῳ ἀναιρήσεις καὶ τὰς καθ' ἕκαστα λεγομένας ἀρετάς. ἡ γὰρ ἀνδρεία οὐκ ἔστιν ἄριστον· ἄρ' οὖν διὰ τοῦτ' οὐκ ἀγαθόν; ἢ τοῦτ' ἄτοπον; ὁμοίως καὶ ἐπὶ τῶν ἄλλων. οὐδὲ ἡδονὴ διὰ τοῦτ' οὐκ ἀγαθόν, ὅτι οὐκ ἄριστον.

[28] Ἀπορήσεις δ' ἂν τις μεταβάς καὶ ἐπὶ τῶν ἀρετῶν τὸ τοιοῦτον. οἷον ἐπειδὴ ὁ λόγος κρατεῖ ποτε τῶν παθῶν (φαμέν γὰρ ἐπὶ τοῦ ἐγκρατοῦς), καὶ τὰ πάθη δὲ πάλιν ἀντεστραμμένως τοῦ λόγου κρατεῖ (οἷον ἐπὶ τῶν ἀκρατῶν συμβαίνει), ἐπεὶ οὖν τὸ ἄλογον μέρος τῆς ψυχῆς ἔχον τὴν κακίαν κρατεῖ τοῦ λόγου εὖ διακειμένου (ὁ γὰρ ἀκρατὴς τοιοῦτος), καὶ ὁ λόγος ὁμοίως φαύλως διακείμενος κρατήσῃ τῶν παθῶν εὖ διακειμένων καὶ ἐχόντων τὴν οἰκείαν ἀρετὴν, εἰ δὲ τοῦτ' ἔσται, συμβήσεται τῇ ἀρετῇ κακῶς χρῆσθαι (ὁ γὰρ λόγος φαύλως διακείμενος καὶ χρώμενος τῇ ἀρετῇ κακῶς αὐτῇ χρήσεται)· τὸ δὴ τοιοῦτον ἄτοπον ἂν συμβαίνειν δόξειεν.

[29] Πρὸς δὴ τὴν τοιαύτην ἀπορίαν ῥαδίον ἀντειπεῖν καὶ λῦσαι ἐκ τῶν ἔμπροσθεν ἡμῖν εἰρημένων ὑπὲρ ἀρετῆς. τότε γὰρ φαμέν εἶναι ἀρετὴν, ὅταν ὁ λόγος εὖ διακείμενος τοῖς πάθεσιν ἔχουσι τὴν οἰκείαν ἀρετὴν σύμμετρος ᾗ, καὶ τὰ πάθη τῷ λόγῳ· οὕτω γὰρ διακείμενα συμφωνήσουσι πρὸς ἄλληλα, ὥστε τὸν μὲν λόγον προστάττειν αἰεὶ τὸ βέλτιστον, τὰ δὲ πάθη ῥαδίως εὖ διακείμενα ποιεῖν ὃ ἂν ὁ λόγος [30] προστάτῃ· ἂν οὖν ὁ λόγος φαύλως ᾗ διακείμενος, τὰ δὲ πάθη εὖ, οὐκ ἔσται ἀρετὴ ἐκλείποντος τοῦ λόγου (ἐξ ἀμφοτέρων γὰρ ἡ ἀρετὴ)· ὥστ' οὐδὲ κακῶς χρῆσθαι ἐνδέχεται ἀρετῇ. ἀπλῶς δ' οὐχ, ὥσπερ οἶονται οἱ ἄλλοι, τῆς ἀρετῆς ἀρχὴ καὶ ἡγεμών ἐστιν ὁ λόγος, ἀλλὰ μᾶλλον τὰ πάθη. δεῖ γὰρ πρὸς τὸ καλὸν ὁρμὴν ἄλογόν τινα πρῶτον ἐγγίνεσθαι (ὃ καὶ γίνεται), εἴθ' οὕτως τὸν λόγον ὕστερον ἐπιψηφίζοντα εἶναι καὶ διακρίνοντα.

[31] ἴδοι δ' ἂν τις τοῦτο ἐκ τῶν παιδίων καὶ τῶν ἄνευ λόγου ζώντων· ἐν γὰρ τούτοις ἄνευ τοῦ λόγου ἐγγίνονται ὅρμαι τῶν παθῶν πρὸς τὸ καλὸν πρότερον, ὁ δὲ λόγος ὕστερος ἐπιγινόμενος καὶ σύμψηφος ὢν ποιεῖ πράττειν τὰ καλά. ἀλλ' οὐκ ἐὰν ἀπὸ τοῦ λόγου τὴν ἀρχὴν λάβῃ πρὸς τὰ καλά, οὐκ ἀκολουθεῖ τὰ πάθη

όμογνωμονοῦντα, ἀλλὰ πολλάκις ἐναντιοῦται· διὸ μᾶλλον ἀρχῇ ἔοικεν πρὸς τὴν ἀρετὴν τὸ πάθος εὖ διακείμενον ἢ ὁ λόγος.

[8]

[1] Ἐχόμενον δ' ἂν εἴη τούτων εἰπεῖν, ἐπειδὴ περὶ εὐδαιμονίας ἐστὶν ὁ λόγος, περὶ εὐτυχίας. οἶονται γὰρ οἱ πολλοὶ τὸν εὐδαίμονα βίον τὸν εὐτυχῇ εἶναι ἢ οὐκ ἄνευ γε εὐτυχίας, καὶ ὀρθῶς ἴσως· ἄνευ γὰρ τῶν ἐκτὸς ἀγαθῶν, ὧν ἡ τύχη ἐστὶ κυρία, οὐκ ἐνδέχεται εὐδαίμονα εἶναι. διὸ ρητέον ἐστὶν ὑπὲρ εὐτυχίας, καὶ ἀπλῶς ὁ εὐτυχῆς τίς ἐστὶ καὶ ἐν τίσι καὶ περὶ τί.

[2] Πρῶτον μὲν οὖν ἐπὶ ταῦτ' ἂν τις ἐλθὼν καὶ ἐπιβλένας ἀπορήσειεν. οὔτε γὰρ ἂν εἴποι τις τὴν τύχην ὥς ἐστὶ φύσις. ἡ γὰρ φύσις [αἰεὶ] οὗ ἐστὶν αἰτία, τούτου ὥς ἐπὶ τὸ πολὺ ἢ ὡσαύτως ποιητικὴ ἐστίν, ἡ δέ γε τύχη οὐδέποτε, ἀλλ' ἀτάκτως καὶ ὥς ἔτυχεν· διὸ ἡ τύχη ἐν τοῖς τοιοῦτοις λέγεται. οὔτε δὴ νοῦν γέ τινα ἢ λόγον ὀρθόν· καὶ γὰρ ἐνταῦθα οὐχ ἥττον ἐστὶ τὸ τεταγμένον καὶ τὸ αἰεὶ ὡσαύτως, ἡ δὲ τύχη οὐ. διὸ καὶ οὗ πλείστος νοῦς καὶ λόγος, ἐνταῦθα ἐλαχίστη [καὶ] τύχη, οὗ δὲ πλείστη τύχη, ἐνταῦθ' ἐλάχιστος νοῦς.

[3] Ἀλλ' ἄρά γε ἡ εὐτυχία ἐστὶν ὥς ἐπιμέλειά τις θεῶν; ἢ τοῦτ' οὐκ ἂν δόξειεν; τὸν γὰρ θεὸν ἀξιοῦμεν κύριον ὄντα τῶν τοιοῦτων τοῖς ἀξίοις ἀπονέμειν καὶ τάγαθα καὶ τὰ κακά, ἡ δὲ τύχη καὶ τὰ ἀπὸ τῆς τύχης ὥς ἀληθῶς ὥς ἂν τύχη γίνεται. εἰ δέ γε τῷ θεῷ τὸ τοιοῦτον ἀπονέμομεν, φαῦλον αὐτὸν κριτὴν ποιήσομεν ἢ οὐ δίκαιον· τοῦτο δ' οὐ προσήκον ἐστὶ [4] [τῷ] θεῷ. ἀλλὰ μὴν ἔξω γε τούτων εἰς οὐδὲν ἄλλο τὴν τύχην ἂν τις τάξειεν, ὥστε δηλὸν ὅτι τούτων ἂν τι εἴη. νοῦς μὲν δὴ καὶ λόγος καὶ ἐπιστήμη παντελῶς ἀλλότριόν τι ἔοικεν εἶναι. ἀλλὰ μὴν οὐδ' ἡ ἐπιμέλεια καὶ ἡ εὐνοία παρὰ τοῦ θεοῦ δόξειεν ἂν εἶναι εὐτυχία διὰ τὸ καὶ ἐν τοῖς φαύλοις ἐγγίγνεσθαι· τὸν δὲ θεὸν τῶν φαύλων οὐκ εἰκὸς ἐπιμελεῖσθαι.

[5] λοιπὸν τοίνυν καὶ οἰκειότατον τῆς εὐτυχίας ἐστὶν ἡ φύσις.

Ἔστιν δ' ἡ εὐτυχία καὶ ἡ τύχη ἐν τοῖς μὴ ἐφ' ἡμῖν οὔσιν, μηδ' ὧν αὐτοὶ κύριοί ἐσμεν καὶ δυνατοὶ πρᾶξαι. διὸ τὸν δίκαιον, ἢ δίκαιος, οὐθεὶς λέγει εὐτυχῇ οὐδὲ τὸν ἀνδρεῖον οὐδ' ὅλως τῶν κατ' ἀρετὴν οὐδένα· ἐφ' ἡμῖν γάρ ἐστὶ ταῦτα καὶ ἔχειν καὶ μὴ ἔχειν. ἀλλ' ἤδη ἐπὶ τοῖς τοιοῦτοις οἰκειότερον τὴν εὐτυχίαν ἐροῦμεν· τὸν γὰρ εὐγενῆ εὐτυχῇ λέγομεν, καὶ ὅλως ᾧ τὰ τοιαῦτα τῶν ἀγαθῶν ὑπάρχει, ὧν μὴ αὐτὸς κύριος ἐστίν.

[6] Ἀλλ' ὅμως οὐδ' ἐνταῦθα κυρίως ἂν ἡ εὐτυχία λέγοιτο. ἔστιν

δὲ πολλαχῶς ὁ εὐτυχὴς λεγόμενος· καὶ γὰρ ὃ παρὰ τὸν λογισμὸν τὸν αὐτοῦ συνέβη τι ἀγαθὸν πρᾶξαι, εὐτυχῇ φαμέν, καὶ ὃ κατὰ λόγον ζημίαν ἦν λαβεῖν, τὸν τοιοῦτον κερδάναντα εὐτυχῇ [7] φαμέν. ἔστιν οὖν ἡ εὐτυχία ἐν τῷ ἀγαθόν τι ὑπάρξαι παρὰ λόγον καὶ ἐν τῷ κακὸν μὴ λαβεῖν εὐλογον. ἀλλὰ μᾶλλον καὶ οἰκειότερον ἡ εὐτυχία ἂν δόξειεν εἶναι ἐν τῷ ἀγαθὸν λαβεῖν· τὸ μὲν γὰρ ἀγαθὸν λαβεῖν καθ' αὐτὸ δόξειεν ἂν εὐτύχημα εἶναι, τὸ δὲ κακὸν μὴ λαβεῖν κατὰ συμβεβηκὸς εὐτύχημα.

[8] Ἔστιν οὖν ἡ εὐτυχία ἄλογος φύσις· ὁ γὰρ εὐτυχὴς ἐστὶν ὁ ἄνευ λόγου ἔχων ὁρμὴν πρὸς τὰγαθὰ, καὶ τούτων ἐπιτυχγάνων, τοῦτο δ' ἐστὶ φύσεως· ἐν γὰρ τῇ ψυχῇ ἔνεστιν τῇ φύσει τοιοῦτον ὃ ὁρμῶμεν [9] ἀλόγως πρὸς ἃ ἂν εὖ ἔχωμεν. καὶ εἴ τις ἐρωτήσῃ τὸν οὕτως ἔχοντα, διὰ τί τοῦτο ἀρέσκει σοι οὕτω πράττειν; οὐκ οἶδα, φησὶν, ἀλλ' ἀρέσκει μοι, ὅμοιον πάσχων τοῖς ἐνθουσιάζουσιν· καὶ γὰρ οἱ ἐνθουσιάζοντες ἄνευ λόγου ὁρμὴν ἔχουσι πρὸς τὸ πράττειν τι.

[10] Τὴν δ' εὐτυχίαν οὐκ ἔχομεν οἰκείῳ καὶ ἰδίῳ ὀνόματι προσαγορεύειν, ἀλλ' αἰτίαν πολλάκις φαμέν εἶναι αὐτήν· ἡ δ' αἰτία ἀλλότριον τοῦ ὀνόματος. ἡ γὰρ αἰτία καὶ οὗ ἐστὶν αἰτία ἄλλο ἐστίν, καὶ ἄνευ ὁρμῆς τῆς ἐπιτυχγανούσης τῶν ἀγαθῶν αἰτία λεγομένη, οἷον ἡ τοῦ κακὸν μὴ λαβεῖν ἢ πάλιν τοῦ [11] μὴ οἰόμενον ἀγαθὸν λήψεσθαι ἀγαθὸν λαβεῖν. ἔστιν οὖν ἡ τοιαύτη εὐτυχία διάφορος ἐκείνης, καὶ ἔοικεν αὕτη ἐκ τῶν πραγμάτων τῆς μεταπτώσεως γίνεσθαι, καὶ κατὰ συμβεβηκὸς εὐτυχία. ὥστ' εἰ καὶ ἡ τοιαύτη ἐστὶν εὐτυχία, ἀλλ' οὖν πρὸς γε τὴν εὐδαιμονίαν ἡ τοιαύτη ἂν εἴη εὐτυχία οἰκειότερα, ἥς ἐν αὐτῷ ἡ ἀρχὴ τῆς ὁρμῆς τῶν ἀγαθῶν ἐστὶ τῆς ἐπιτεύξεως.

[12] Ἐπεὶ οὖν ἐστὶν ἡ εὐδαιμονία οὐκ ἄνευ τῶν ἐκτὸς ἀγαθῶν, ταῦτα δὲ γίνεται ἀπὸ τῆς εὐτυχίας, οἷον ἀρτίως ἔφαμεν, συνεργὸς ἂν εἴη τῇ εὐδαιμονίᾳ.

[9]

[1] Περὶ μὲν οὖν εὐτυχίας τοσαῦτα· ἐπειδὴ δὲ ὑπὲρ ἐκάστης τῶν ἀρετῶν κατὰ μέρος εἰρήκαμεν, λοιπὸν ἂν εἴη καθόλου συνθέντας τὰ καθ' ἕκαστα κεφαλαιωσαμένους εἰπεῖν.

[2] Ἔστι μὲν οὖν οὐ κακῶς λεγόμενον τοῦνομα ἐπὶ τοῦ τελέως σπουδαίου, ἢ καλοκάγαθία. καλὸς κἀγαθὸς γάρ, φασίν, ὅταν τελέως σπουδαῖος ᾖ. ἐπὶ γὰρ τῆς ἀρετῆς τὸν καλὸν κἀγαθὸν λέγουσιν, οἷον τὸν δίκαιον καλὸν κἀγαθὸν φασί, τὸν ἀνδρεῖον, τὸν σώφρονα, ὅλως

ἐπὶ τῶν ἀρετῶν.

[3] Ἐπειδὴ οὖν εἰς δύο διαιροῦμεν, καὶ τὰ μὲν φαμεν εἶναι καλὰ τὰ δὲ [καὶ] ἀγαθὰ, καὶ τῶν ἀγαθῶν τὰ μὲν ἀπλῶς ἀγαθὰ τὰ δὲ οὐ, καὶ καλὰ μὲν οἷον τὰς ἀρετὰς καὶ τὰς ἀπ' ἀρετῆς πράξεις, ἀγαθὰ δὲ [οἷον] ἀρχὴν πλοῦτον δόξαν τιμὴν τὰ τοιαῦτα· ἔστιν οὖν ὁ καλὸς κἀγαθὸς ὃ τὰ ἀπλῶς ἀγαθὰ ἔστιν ἀγαθὰ καὶ τὰ ἀπλῶς καλὰ καλὰ ἔστιν. ὁ τοιοῦτος γὰρ [4] καλὸς καὶ ἀγαθός. ὃ δὲ τὰ ἀπλῶς ἀγαθὰ μὴ ἔστιν ἀγαθὰ, οὐκ ἔστι καλὸς καὶ ἀγαθός, ὥσπερ οὐδὲ ὑγιαίνειν ἂν δόξειεν ὃ τὰ ἀπλῶς ὑγιεινὰ μὴ ὑγιεινὰ ἔστιν. εἰ γὰρ ὁ πλοῦτος καὶ ἡ ἀρχὴ παραγινόμενά τινα βλάπτειν, οὐκ ἂν αἰρετὰ εἶη, ἀλλὰ τὰ τοιαῦτα [5] ὅσα αὐτὸν μὴ βλάψει, βουλήσεται αὐτῷ εἶναι. ὁ δὲ τοιοῦτος ὢν οἷος ὑποστελλόμενός τι τῶν ἀγαθῶν πρὸς τὸ μὴ εἶναι αὐτῷ, οὐκ ἂν δόξειεν καλὸς κἀγαθὸς εἶναι· ἀλλ' ὃ τὰγαθὰ πάντα ὄντα ἀγαθὰ ἔστιν καὶ ὑπὸ τούτων μὴ διαφθείρεται, οἷον ὑπὸ πλούτου καὶ ἀρχῆς, ὁ τοιοῦτος καλὸς κἀγαθός.

[10]

[1] Ὑπὲρ δὲ τοῦ κατὰ τὰς ἀρετὰς ὀρθῶς πράττειν εἴρηται μὲν, οὐχ ἱκανῶς δέ. ἔφαμεν γὰρ τὸ κατὰ τὸν ὀρθὸν λόγον πράττειν· ἀλλ' ἴσως ἂν τις αὐτὸ τοῦτο ἀγνοῶν ἐρωτήσκειν, τὸ κατὰ τὸν ὀρθὸν λόγον τί ποτ' ἐστί, καὶ ποῦ ἔστιν ὁ ὀρθὸς λόγος; [2] ἔστιν οὖν κατὰ τὸν ὀρθὸν λόγον πράττειν, ὅταν τὸ ἄλογον μέρος τῆς ψυχῆς μὴ κωλύῃ τὸ λογιστικὸν ἐνεργεῖν τὴν αὐτοῦ ἐνέργειαν. τότε γὰρ ἡ πρᾶξις ἔσται κατὰ τὸν ὀρθὸν λόγον.

Ἐπειδὴ γάρ τι τῆς ψυχῆς τὸ μὲν χειρόν ἔχομεν τὸ δὲ βέλτιον, αἰεὶ δὲ τὸ χειρόν τοῦ βελτίονος ἔνεκεν ἔστιν, ὥσπερ ἐπὶ σώματος καὶ ψυχῆς τὸ σῶμα τῆς ψυχῆς ἔνεκεν, καὶ τότε ἐροῦμεν ἔχειν τὸ σῶμα καλῶς, ὅταν οὕτως ἔχῃ ὥστε μὴ κωλύειν, ἀλλὰ καὶ συμβάλλεσθαι καὶ συμπαρορμᾶν πρὸς τὸ τὴν ψυχὴν ἐπιτελεῖν τὸ αὐτῆς ἔργον (τὸ γὰρ χειρόν τοῦ βελτίονος ἔνεκεν, πρὸς τὸ συνεργεῖν τῷ βελτίονι). [3] ὅταν οὖν τὰ πάθη μὴ κωλύωσι τὸν νοῦν τὸ αὐτοῦ ἔργον ἐνεργεῖν, τότε ἔσται τὸ κατὰ τὸν ὀρθὸν λόγον γινόμενον.

Ναί, ἀλλ' ἴσως εἴποι τις ἂν, ὅταν πῶς ἔχωσι τὰ πάθη, οὐ κωλύουσι, καὶ πότε οὕτως ἔχουσιν; οὐ [4] γὰρ οἶδα. τὸ δὲ τοιοῦτον οὐκ ἔστιν εἰπεῖν ῥάδιον. οὐδὲ γὰρ ὁ ἱατρός· ἀλλ' ὅταν εἴπῃ τῷ πυρέττοντι πτισάνην προσφέρεισθαι, τοῦ δὲ πυρέττειν πῶς αἰσθάνομαι; ὅταν, φησὶν, ὀρθῶς ὥχρὸν ὦντα· τὸ δ' ὥχρὸν πῶς εἰδήσω; ἐνταῦθα δὴ συνιέτω ὁ ἱατρός· εἰ γὰρ μὴ ἔχεις παρὰ σανατῶ, φησί, τῶν

γε τοιούτων αἰσθησιν, οὐκ ἔτι. ὡσαύτως ὑπὲρ τῶν [5] ἄλλων κοινός ἐστι τῶν τοιούτων ὁ λόγος. ὁμοίως δ' ἔχει καὶ ἐπὶ τῶν παθῶν τοῦ γνωρίζειν· δεῖ γὰρ αὐτὸν συμβάλλεσθαι πρὸς αἰσθησίν τι.

[6] Ἐπιζητήσῃς δ' ἂν τις ἴσως καὶ τὸ τοιοῦτον· ἄρα γε ἔργῳ εἰδήσας ταῦτα καὶ δὴ εὐδαίμων ἔσομαι; οἶονται γάρ. τὸ δ' ἐστὶν οὐ τοιοῦτον. οὐδεμία γὰρ οὐδὲ τῶν ἄλλων ἐπιστημῶν παραδίδωσι τῷ μαθητῇ τὴν χρῆσιν καὶ τὴν ἐνέργειαν, ἀλλὰ τὴν ἕξιν μόνον· οὕτως οὐδ' ἐνταῦθα παραδίδωσιν τὸ εἰδῆσαι ταῦτα τὴν χρῆσιν (ἡ γὰρ εὐδαιμονία ἐστὶν ἐνέργεια, ὡς φαμέν), ἀλλὰ τὴν ἕξιν, οὐδ' ἐν τῷ εἰδέναι ἐξ ὧν ἐστὶν ἡ εὐδαιμονία, ἀλλ' ἐκ τοῦ τούτοις [7] χρήσασθαι. τὴν δὲ χρῆσιν καὶ τὴν ἐνέργειαν τούτων οὐκ ἔστι ταύτης τῆς πραγματείας τὸ παραδίδοναι· οὐδὲ γὰρ ἄλλη ἐπιστήμη οὐδεμία τὴν χρῆσιν παραδίδωσιν, ἀλλὰ τὴν ἕξιν.

[11]

[1] Ἐφ' ἅπασιν δὲ τούτοις ὑπὲρ φιλίας ἀναγκαῖόν ἐστιν εἰπεῖν, τί ἐστὶν καὶ ἐν τίσιν καὶ περὶ τί· ἐπειδὴ γὰρ ὁρῶμεν παρὰ πάντα τὸν βίον παρατείνουσιν καὶ ἐν παντὶ καιρῷ, καὶ οὕσαν ἀγαθόν, συμπαραληπτέα ἂν εἴη πρὸς τὴν εὐδαιμονίαν.

[2] Πρῶτον μὲν οὖν ἴσως ἂ ἀπορεῖται καὶ ζητεῖται, βέλτιον διελθεῖν. πότερον γάρ ἐστὶν ἡ φιλία ἐν τοῖς ὁμοίοις, ὥσπερ δοκεῖ καὶ λέγεται; καὶ γὰρ “κολοιός” φασὶ “παρὰ κολοῖον ἰζάνει,” καὶ

αἰεὶ τοι τὸν ὅμοιον ἄγει θεὸς ὡς τὸν ὅμοιον.

φασὶν δὲ καὶ κυνός ποτε αἰεὶ καθευδούσης ἐπὶ τῆς αὐτῆς κεραμίδος, ἐρωτηθέντα τὸν Ἐμπεδοκλέα, διὰ τί ποτε ἡ κύων ἐπὶ τῆς αὐτῆς κεραμίδος καθεύδει, εἰπεῖν ὅτι ἔχει τι τῇ κεραμίδι ὅμοιον ἢ κύων, ὡς [3] διὰ τὸ ὅμοιον τὴν κύνα φοιτῶσαν. πάλιν δ' αὖ δοκεῖ ἄλλοις τισὶν ἐν τοῖς ἐναντίοις μᾶλλον ἐγγίνεσθαι ἢ φιλία. “ἐρᾷ μὲν” γάρ, φασίν, “ὄμβρου γαῖα, ὅταν ξηρὸν πέδον·” τὸ δὴ ἐναντίον, φασίν, τῷ ἐναντίῳ βούλεσθαι φίλον εἶναι. ἐν μὲν γὰρ τοῖς ὁμοίοις οὐδὲ ἐνδέχεσθαι γίνεσθαι. τὸ γὰρ ὅμοιον, φασίν, τοῦ ὁμοίου οὐδὲν προσδεῖται, καὶ τὰ τοιαῦτα δῆ.

[4] Ἔτι δὲ πότερον ἔργον ἐστὶ φίλον γενέσθαι ἢ ῥάδιον γενέσθαι; οἱ γοῦν κόλακες ταχέως προσεδρεύσαντες φίλοι μὲν οὐκ εἰσίν, φαίνονται δὲ φίλοι εἶναι.

[5] Ἔτι δὲ καὶ τὰ τοιαῦτα ἀπορεῖται, πότερον ἔσται ὁ σπουδαῖος τῷ φαύλῳ φίλος; ἢ οὐ; ἢ μὲν γὰρ φιλία ἐν πίστει καὶ βεβαιότητι, ὁ δὲ φαῦλος ἥκιστα τοιοῦτος· καὶ ὁ φαῦλος τῷ φαύλῳ, ἢ οὐδὲ τοῦτο;

[6] Πρῶτον μὲν οὖν διοριστέον ἂν εἴη ὑπὲρ φιλίας ποίας σκοποῦμεν. ἔστι γάρ, ὥς οἴονται, φιλία καὶ πρὸς θεὸν καὶ τὰ ἄψυχα, οὐκ ὀρθῶς. τὴν γὰρ φιλίαν ἐνταῦθά φαμεν εἶναι οὗ ἔστι τὸ ἀντιφιλεῖσθαι, ἢ δὲ πρὸς θεὸν φιλία οὔτε ἀντιφιλεῖσθαι δέχεται, οὔθ' ὅλως τὸ φιλεῖν· ἄτοπον γὰρ ἂν εἴη εἰ [7] τις φαίη φιλεῖν τὸν Δία· οὐδὲ δὴ παρὰ τῶν ἀψύχων ἐνδέχεται ἀντιφιλεῖσθαι. φιλία μέντοι καὶ πρὸς τὰ ἄψυχα ἐστίν, οἷον οἶνον ἢ ἄλλο δὴ τῶν τοιούτων.

Διὸ δὴ οὔτε τὴν πρὸς τὸν θεὸν φιλίαν ἐπιζητοῦμεν οὔτε τὴν πρὸς τὰ ἄψυχα, ἀλλὰ τὴν πρὸς τὰ ἔμψυχα, καὶ πρὸς ταῦτα ἐν οἷς ἐστὶ τὸ ἀντιφιλεῖν.

[8] Εἰ δὴ τις μετὰ τοῦτο ἐπισκέψαιτο τί ἐστὶ τὸ φιλητόν, ἔστιν οὖν οὐκ ἄλλο τι ἢ τἀγαθόν. ἕτερον μὲν οὖν ἐστὶ τὸ φιλητόν καὶ τὸ φιλητέον, ὥσπερ καὶ [9] τὸ βουλευτόν καὶ τὸ βουλευτέον. βουλευτόν μὲν γὰρ τὸ ἀπλῶς ἀγαθόν, βουλευτέον δὲ τὸ ἐκάστω ἀγαθόν· οὕτω καὶ φιλητόν μὲν τὸ ἀπλῶς ἀγαθόν, φιλητέον δὲ τὸ αὐτῷ ἀγαθόν, ὥστε τὸ μὲν φιλητέον καὶ φιλητόν, τὸ δὲ φιλητόν οὐκ ἔστι φιλητέον.

[10] Ἐνταῦθα οὖν ἐστὶν καὶ διὰ τὸ τοιοῦτον ἡ ἀπορία, πότερόν ἐστιν ὁ σπουδαῖος τῷ φαύλῳ φίλος ἢ οὐ. συνήπται γὰρ πως τἀγαθῷ τὸ αὐτῷ ἀγαθόν καὶ τὸ φιλητέον τῷ φιλητῷ, ἔχεται δὲ καὶ ἀκολουθεῖ τῷ [11] ἀγαθῷ καὶ τὸ ἡδὺ εἶναι καὶ τὸ συμφέρον. ἢ μὲν οὖν τῶν σπουδαίων φιλία ἐστίν, ὅταν ἀντιφιλωσιν ἀλλήλους· φιλοῦσι δὲ ἀλλήλους, ἢ φιλητοί· φιλητοί [12] δέ, ἢ ἀγαθοί. οὐκοῦν ὁ σπουδαῖος, φησίν, τῷ φαύλῳ οὐκ ἔσται φίλος; ἔσται μὲν οὖν. ἐπειδὴ γὰρ τἀγαθῷ ἠκολουθεῖ τὸ συμφέρον καὶ τὸ ἡδύ, ἢ ἐστὶν φαῦλος ὢν ἡδύς, ταύτη φίλος· πάλιν αὖ [13] συμφέρων, ἢ συμφέρων, ταύτη φίλος. ἀλλ' οὐκ ἔσται γε κατὰ τὸ φιλητόν ἢ τοιαύτη φιλία. φιλητόν γὰρ ἦν τἀγαθόν, ὁ δὲ φαῦλος οὐ φιλητός· οὐ γὰρ ἀλλὰ κατὰ τὸ φιλητέον· εἰσὶν γὰρ ἀπὸ τῆς παντελοῦς φιλίας, τῆς ἐν τοῖς σπουδαίοις, καὶ αὗται αἱ φιλίαι, ἢ τε κατὰ τὸ ἡδὺ καὶ ἢ κατὰ τὸ συμφέρον.

[14] Ὁ οὖν κατὰ τὸ ἡδὺ φιλῶν οὐ φιλεῖ τὴν κατὰ τὸ [15] ἀγαθόν φιλίαν, οὐδὲ ὁ κατὰ τὸ συμφέρον· εἰσὶν δὲ καὶ αἱ φιλίαι αὗται, ἢ τε κατὰ τὸ ἀγαθόν καὶ ἢ κατὰ τὸ ἡδὺ καὶ ἢ κατὰ τὸ συμφέρον, οὐχ αἱ αὐταὶ μὲν, οὐ παντελῶς δὲ οὐδὲ ἀλλότριαι ἀλλήλων, ἀλλ' ἀπὸ ταύτου πῶς ἡρτημέναι εἰσὶν. οἷον φαμέν ἰατρικὸν τὸ μαχαίριον, ἰατρικὸν τὸν ἄνθρωπον, καὶ ἰατρικὴν τὴν ἐπιστήμην· ταῦτα οὐχ ὁμοίως λέγονται, ἀλλὰ τὸ μὲν μαχαίριον τῷ χρησίμον εἶναι πρὸς ἰατρικὴν ἰατρικὸν λέγεται, ὁ δ' ἄνθρωπος τῷ ποιητικὸς εἶναι ὑγείας,

ή δ' ἐπιστήμη τῷ αἰτία εἶναι [16] καὶ ἀρχή. ὁμοίως δὲ καὶ αἱ φιλίαι οὐχ ὡσαύτως, ἥ τε τῶν σπουδαίων ἢ διὰ τὸ ἀγαθὸν καὶ ἢ κατὰ τὸ ἡδὺ καὶ ἢ κατὰ τὸ συμφέρον. οὐδὲ δὴ ὁμωνύμως λέγονται, ἀλλ' οὐκ εἰσὶν μὲν αἱ αὐταί, περὶ ταῦτά [17] δὲ πως καὶ ἐκ τῶν αὐτῶν εἰσὶν. εἰ δὴ τις λέγοι “ὁ κατὰ τὸ ἡδὺ φιλῶν οὐκ ἔστιν φίλος τούτῳ· οὐ γὰρ κατὰ τὸ ἀγαθὸν φίλος ἐστίν,” βαδίζει ὁ τοιοῦτος ἐπὶ τὴν τῶν σπουδαίων φιλίαν, τὴν ἐξ ἀπάντων τούτων οὔσαν, καὶ ἐκ τοῦ ἀγαθοῦ καὶ ἐκ τοῦ ἡδέος καὶ ἐκ τοῦ συμφέροντος, ὥστ' ἀληθῶς οὐκ ἔστιν [κατ'] ἐκείνην γε τὴν φιλίαν φίλος, ἀλλὰ τὴν κατὰ τὸ ἡδὺ ἢ κατὰ τὸ συμφέρον.

[18] Πότερον οὖν ἔσται ὁ σπουδαῖος τῷ σπουδαίῳ φίλος, ἢ οὐ; οὐδὲν γὰρ προσδεῖται, φησὶν, ὁ ὅμοιος τοῦ ὁμοίου. ὁ δὴ τοιοῦτος λόγος ζητεῖ τὴν κατὰ τὸ συμφέρον φιλίαν· ἥ γὰρ προσδεῖται ὁ ἕτερος τοῦ ἑτέρου, ταύτῃ ὄντες φίλοι ἐν τῇ κατὰ τὸ συμφέρον [19] φιλίᾳ εἰσὶν. ἀλλὰ ἑτέρα διώρισται ἢ κατὰ τὸ συμφέρον φιλία καὶ ἢ κατ' ἀρετὴν καὶ ἡδονήν. εἰκὸς δὴ καὶ πολὺ μᾶλλον τούτους· πάντα γὰρ αὐτοῖς ὑπάρχει, τὰγαθὸν καὶ τὸ ἡδὺ καὶ τὸ συμφέρον. ἀλλὰ καὶ ὁ σπουδαῖος τῷ φαύλῳ· ἥ γὰρ ἴσως [20] ἡδύς, ταύτῃ καὶ φίλος. καὶ ὁ φαῦλός γε τῷ φαύλῳ· ἥ γὰρ ἴσως τὸ αὐτὸ αὐτοῖς συμφέρει, ταύτῃ φίλοι. ὀρῶμεν γὰρ τοῦτο γινόμενον, ὅταν τὸ αὐτὸ ἢ τὸ συμφέρον, φίλους τούτους διὰ τὸ συμφέρον, ὥστ' οὐδὲν κωλύσει καὶ φαύλοις οὔσιν ταυτόν τι συμφέρειν.

[21] Βεβαιωτάτη μὲν οὖν καὶ μονιμωτάτη καὶ καλλίστη ἡ ἐν τοῖς σπουδαίοις φιλία, ἢ κατ' ἀρετὴν καὶ τὰγαθὸν οὔσα, εἰκότως. ἡ μὲν γὰρ ἀρετὴ ἀμετάπτωτος, δι' ἣν ἢ φιλία, ὥστε εἰκὸς τὴν φιλίαν τὴν τοιαύτην ἀμετάπτωτον εἶναι, τὸ δὲ συμφέρον οὐδέποτε ταυτόν· διὸ ἢ διὰ τὸ συμφέρον φιλία οὐ [22] βεβαία, ἀλλὰ τῷ συμφέροντι συμμεταπίπτει· ὁμοίως καὶ ἢ κατὰ τὴν ἡδονήν.

Ἡ μὲν οὖν τῶν βελτίστων φιλία ἢ κατ' ἀρετὴν γινομένη ἐστίν, ἢ δὲ τῶν πολλῶν ἢ κατὰ τὸ συμφέρον, ἢ δὲ κατὰ τὴν ἡδονήν ἐν τοῖς φορτικοῖς καὶ τυχοῦσιν.

[23] Συμβαίνει δὲ καὶ ἀγανακτεῖν, ὅταν φαύλοις ἐντύχωσιν τοῖς φίλοις, καὶ θαυμάξουσιν· ἔστι δὲ οὐδὲν ἄτοπον. ὅταν γὰρ ἢ φιλία λάβῃ τὴν ἡδονὴν ἀρχήν, δι' ἣν φίλοι εἰσὶν, ἢ τὸ συμφέρον, ἅμα ταῦτ' [24] ἀπολείπει καὶ ἢ φιλία οὐ διαμένει. πολλάκις δὲ μένει μὲν ἢ φιλία, κακῶς δ' ἐχρήσατο τῷ φίλῳ, διὸ ἀγανακτοῦσιν· ἔστι δὲ οὐδὲ τοῦτο ἄλογον. οὐ γὰρ δι' ἀρετὴν ἢ φιλία σοι πρὸς τοῦτον ὑπῆρχεν, διὸ οὐδ'

ἄτοπον μηδὲν ποιεῖν αὐτὸν τῶν κατ' ἀρετὴν. ἀγανακτοῦσιν οὖν οὐκ ὀρθῶς. δι' ἡδονὴν γὰρ ποιησάμενοι τὴν φιλίαν, τὴν δι' ἀρετὴν οἴονται δεῖν αὐτοῖς ὑπάρχειν· τὸ δ' οὐ δυνατόν· οὐ γάρ ἐστιν ἡ δι' ἡδονὴν καὶ τὸ συμφέρον ἀρετῆς ἐχομένη.

[25] κοινωσάμενοι οὖν ἡδονῇ ἀρετὴν ζητοῦσιν, οὐκ ὀρθῶς· οὐ γὰρ ἀκολουθεῖ τῇ ἡδονῇ καὶ τῷ συμφέροντι ἡ ἀρετή, ἀλλὰ τῇ ἀρετῇ ἀμφοτέρω ταῦτα ἀκολουθεῖ. ἄτοπον γὰρ εἰ μὴ τις οἰήσεται τοὺς σπουδαίους αὐτοὺς αὐτοῖς ἡδίστους εἶναι· καὶ γὰρ οἱ φαῦλοι, ὥς φησιν Εὐριπίδης, αὐτοῖς ἑαυτοῖς ἡδεῖς εἰσίν· “κακὸς κακῷ” γὰρ “συντέτεκεν.” οὐ γὰρ ἀκολουθεῖ τῇ ἡδονῇ ἡ ἀρετή, ἀλλὰ τῇ ἀρετῇ ἡ ἡδονὴ ἀκολουθεῖ.

[26] Πότερον δὲ καὶ δεῖ ἐν τῇ τῶν σπουδαίων φιλίᾳ τὴν ἡδονὴν εἶναι, ἢ οὐ δεῖ; ἄτοπον γὰρ τὸ μὴ φάναι δεῖν. εἰ γὰρ ἀφελεῖς αὐτῶν τὸ ἡδεῖς εἶναι ἀλλήλοις, ἄλλους ποιοῦνται φίλους εἰς τὸ συζῆν, τοὺς ἡδεῖς· εἰς γὰρ τὸ συζῆν οὐδὲν μεῖζόν ἐστι τοῦ [27] ἡδεῖς εἶναι· ἄτοπον οὖν τὸ μὴ οἶσθαι δεῖν τοὺς σπουδαίους μάλιστα ἀλλήλοις συζῆν· τοῦτο δ' οὐκ ἔστιν ἄνευ τοῦ ἡδέος· δέοι ἂν ἄρα, ὥς ἔοικεν, μάλιστα τούτοις ὑπάρχειν τὸ ἡδέσιν εἶναι.

[28] Ἐπεὶ δὲ διήρηνται αἱ φιλῖαι εἰς τρία εἶδη, καὶ ἐν ταύταις ἡπορεῖτο, πότερον ἐν ἰσότητι ἡ φιλία ἐγγίνεται ἢ ἐν ἀνισότητι· ἔστιν οὖν κατ' ἀμφοτέρω. ἡ μὲν γὰρ καθ' ὁμοιότητα ἡ τῶν σπουδαίων καὶ ἡ τελεία φιλία· ἡ δὲ κατ' ἀνομοιότητα ἡ κατὰ τὸ συμφέρον. τῷ γὰρ εὐπόρῳ ὁ πένης διὰ τὴν ἔνδειαν ὧν ὁ πλούσιος εὐπορεῖ φίλος ἐστί, καὶ τῷ σπουδαίῳ ὁ φαῦλος διὰ ταυτό· διὰ γὰρ τὴν ἔνδειαν τὴν τῆς ἀρετῆς, παρ' οὗ οἶεται αὐτῷ ἔσσεσθαι, διὰ τοῦτο [29] τούτῳ φίλος. γίνεται οὖν ἐν τοῖς ἀνομοίοις φιλία κατὰ τὸ συμφέρον· διὸ καὶ Εὐριπίδης

ἐρᾷ μὲν ὄμβρου γαῖ', ὅταν ξηρὸν πέδον·

ὥς ἐναντίοις οὖσιν τούτοις ἐγγίνεται φιλία ἢ διὰ τὸ συμφέρον. καὶ γὰρ εἰ θέλεις τὰ ἐναντιώτατα ποιῆσαι πῦρ καὶ ὕδωρ, ταῦτα ἀλλήλοις χρήσιμα [30] εἰσίν. τὸ γὰρ πῦρ φασίν, ἐὰν μὴ ἔχῃ ὑγρόν, φθείρεσθαι, ὥς τοῦτ' αὐτῷ παρασκευάζον ὥσπερ τροφὴν τινά, ταύτην δὲ τοσαύτην, ὅσης κρατήσκειν ἄν· ἂν μὲν γὰρ πλεῖον ποιήσῃς τὸ ὑγρόν, ἐπικρατήσκειν <ποιήσῃ> φθείρεσθαι τὸ πῦρ, ἐὰν δὲ σύμμετρον, συνοίσει. δῆλον οὖν ὅτι καὶ ἐν τοῖς ἐναντιωτάτοις φιλία ἐγγίνεται διὰ τὸ συμφέρον.

[31] Ἀνάγονται δὲ πᾶσαι αἱ φιλῖαι, καὶ αἱ ἐν ἰσότητι καὶ αἱ ἐν

άνισότητι, εἰς τὰς διηρημένας τρεῖς.

Ἔστιν δ' ἐν ἀπάσαις ταῖς φιλίαις διαφορὰ γινομένη πρὸς ἀλλήλους, ὅταν μὴ ὁμοίως φιλῶσιν ἢ εὖ ποιῶσιν ἢ ὑπηρετῶσιν ἢ ὅ τι ἂν τῶν τοιούτων· ὅταν μὲν γὰρ ὁ μὲν ἐκτενῶς ποιῇ ὁ δ' ἐλλείπη, κατὰ τὴν [32] ἔλλειψιν τὸ ἐγκλημα καὶ ἡ μέμψις. οὐ μὴν ἀλλ' ἐπὶ μὲν τῶν τοιούτων ὧν τὸ αὐτὸ ἐστὶ τέλος τῆς φιλίας, οἷον εἰ ἀμφοτέρουι κατὰ τὸ συμφέρον ἀλλήλοις φίλοι ἢ κατὰ τὸ ἡδὺ ἢ κατ' ἀρετὴν, εὐδηλος ἡ ἔλλειψις ἢ παρὰ τοῦ ἐτέρου, ἐὰν οὖν πλείω ἀγαθὰ σύ μοι ποιῇς ἢ ἐγὼ σοί, οὐδ' ἀμφισβητῶ ἔτι μὴ οὐ [33] δεῖν σε μᾶλλον ὑπ' ἐμοῦ φιλεῖσθαι· ἐν ᾗ δὲ φιλία μὴ διὰ ταῦτό φίλοι ἐσμέν, μᾶλλον αἱ διαφοραί. ἄδηλος γὰρ ἡ ἔλλειψις παρ' ἐκατέρου. οἷον εἰ ὁ μὲν δι' ἡδονὴν φίλος ἐστὶν ὁ δὲ διὰ τὸ συμφέρον, ἐνταῦθα ἡ ἀμφισβήτησις· οὐτε γὰρ ὁ τῷ συμφέροντι ὑπερέχων ἀξίαν οἶεται τὴν ἡδονὴν ἀντικαταλλάττεσθαι τοῦ συμφέροντος, οὐτε ὁ τῇ ἡδονῇ ὑπερέχων ἀξίαν τῆς ἡδονῆς ἐν τῷ συμφέροντι χάριν ἀπολαμβάνειν. διὸ μᾶλλον αἱ διαφοραὶ ἐν ταῖς τοιαύταις φιλίαις γίνονται.

[34] Οἱ δ' ἐν ἀνισότητι φίλοι ὄντες, οἱ μὲν ὑπερέχοντες πλούτῳ ἢ ἄλλῳ τινὶ τοιούτῳ οὐκ οἶονται δεῖν αὐτοὶ φιλεῖν, ἀλλ' ὑπὸ τῶν ἐνδεεστέρων οἶονται δεῖν αὐτοὶ φιλεῖσθαι· ἔστιν δὲ βέλτιον τὸ φιλεῖν ἢ τὸ φιλεῖσθαι.

[35] - τὸ μὲν γὰρ φιλεῖν ἐνέργειά τις ἡδονῆς καὶ ἀγαθόν, ἀπὸ δὲ τοῦ φιλεῖσθαι οὐδεμία τῷ φιλουμένῳ ἐνέργεια [36] γίνεται. - ἔτι δὲ βέλτιον τὸ γνωρίζειν ἢ τὸ γνωρίζεσθαι· τὸ μὲν γὰρ γνωρίζεσθαι καὶ τὸ φιλεῖσθαι καὶ τοῖς ἀψύχοις ὑπάρχει, τὸ δὲ γνωρίζειν [37] καὶ τὸ φιλεῖν τοῖς ἐμψύχοις. - ἔτι τὸ εὐποιοητικὸν εἶναι βέλτιον ἢ τὸ μὴ· ὁ μὲν οὖν φιλῶν εὐποιοητικός, [38] ἢ φιλεῖ, ὁ δὲ φιλούμενος, ἢ φιλεῖται, οὐ. - ἀλλ' οἱ ἄνθρωποι διὰ φιλοτιμίαν φιλεῖσθαι μᾶλλον βούλονται ἢ φιλεῖν, διὰ τὸ ἐν τῷ φιλεῖσθαι ὑπεροχὴν τινα εἶναι· αἰεὶ γὰρ ὁ φιλούμενος ὑπερέχει ἡδονῇ ἢ εὐπορίᾳ ἢ ἀρετῇ, ὁ δὲ φιλότιμος τῆς ὑπεροχῆς [39] ὀρέγεται. καὶ οὐκ οἶονται δεῖν αὐτοὶ φιλεῖν οἱ ἐν ὑπεροχῇ ὄντες· ἀντιδιδόναι γὰρ ἐν οἷς ὑπερέχουσιν τοῖς φιλοῦσιν αὐτούς. ἔτι δὲ καὶ ἡττους αὐτῶν εἰσίν· διὸ οὐκ οἶονται δεῖν φιλεῖν ἀλλὰ φιλεῖσθαι. ὁ δ' ἐνδεὴς χρημάτων ἢ ἡδονῶν ἢ ἀρετῆς θαυμάζει τὸν ὑπερέχοντα τούτοις, καὶ φιλεῖ διὰ τὸ τούτων ἢ τυγχάνειν ἢ οἶεσθαι τεύξεσθαι.

[40] Εἰσὶν δὲ καὶ τοιαῦται φιλίαι ἐξ ὁμοιοπαθείας, ἐκ τοῦ τὰ γαθὸν βούλεσθαι τινὲ εἶναι. οὐκ ἔστιν δὲ ἡ ἐπὶ τούτων γινομένη φιλία πάντα

ταῦτα ἔχουσα· πολλάκις γὰρ ἄλλω μὲν εἶναι βουλόμεθα τάγαθά, [41] συζῆν μέντοι μετ' ἄλλου. ἀλλὰ ταῦτα πότερον φιλίας δεῖ εἰπεῖν, ἢ τῆς τελείας φιλίας τῆς κατ' ἀρετὴν πάθῃ; ἐν ἐκείνῃ γὰρ τῇ φιλίᾳ πάντα ταῦτα ἐνυπάρχει· καὶ γὰρ συζῆν μετ' οὐδενὸς ἄλλου ἂν θέλοιμεν (καὶ γὰρ τὸ ἡδὺ καὶ τὸ συμφέρον, καὶ ἡ ἀρετὴ τῷ σπουδαίῳ ὑπάρχει) καὶ τάγαθὰ τούτῳ μάλιστα βουλοίμεθ' ἂν, καὶ τὸ ζῆν καὶ τὸ εὖ ζῆν οὐκ ἄλλω τινὶ ἢ τούτῳ.

[42] Πότερον δ' ἐστὶν αὐτῷ [φιλία] καὶ πρὸς αὐτὸν φιλία, ἢ οὐ, νῦν μὲν ἀφείσθω, ὕστερον δ' ἐροῦμεν. πάντα δὲ βουλόμεθα ἡμῖν αὐτοῖς· καὶ γὰρ συζῆν μεθ' ἡμῶν αὐτῶν βουλόμεθα (ἴσως δὲ τοῦτο καὶ ἀναγκαῖον) καὶ τὸ εὖ ζῆν καὶ τὸ ζῆν καὶ τὸ βούλεσθαι [43] τάγαθόν, οὐκ ἄλλω τινί. ἔτι ὁμοιοπαθεῖς ἡμῖν αὐτοῖς μάλιστα ἐσμέν· ἂν γὰρ προσπταίσωμεν ἢ ἄλλω τινὶ περιπέσωμεν τῶν τοιούτων, εὐθὺς λυπούμεθα. διὸ δόξειεν ἂν οὕτως εἶναι αὐτῷ πρὸς αὐτὸν φιλία.

[44] Τὰ δὴ τοιαῦτα, οἷον τὴν ὁμοιοπάθειαν καὶ τὸ εὖ ζῆν καὶ τὰ ἄλλα, ἥτοι εἰς τὴν πρὸς ἡμᾶς αὐτοὺς φιλίαν ἀναφέροντες λέγομεν ἢ εἰς τὴν τελείαν· ἐν ἀμφοτέραις γὰρ πάντα ταῦτα ὑπάρχει· καὶ γὰρ [καὶ] τὸ συζῆν καὶ τὸ εἶναι βούλεσθαι καὶ τὸ εὖ εἶναι καὶ τὰ ἄλλα πάντα ἐν ταύταις ἐστίν.

[45] Ἐτι δὲ ἴσως ἂν δόξειεν, ἐν οἷς ἐστὶ δίκαιον, ἐν τούτοις καὶ φιλίαν εἶναι· διὸ καὶ ὅσα περ δικαίων εἶδη, τοσαῦτα καὶ φιλιῶν. τὸ δὴ δίκαιόν ἐστιν καὶ ξένῳ πρὸς πολίτην καὶ δούλῳ πρὸς δεσπότην καὶ πολίτῃ πρὸς πολίτην καὶ υἱῷ πρὸς πατέρα καὶ γυναικὶ πρὸς ἄνδρα, καὶ ὅσαι ἀπλῶς ἄλλαι κοινωναί [46] καὶ φιλίαι ἔννευσιν ἐν ἐκάστοις τούτων. βεβαιωτάτῃ δ' ἂν δόξειεν εἶναι τῶν φιλιῶν ἡ ξενικὴ· οὐ γὰρ ἐστὶν οὐδὲν αὐτοῖς τέλος κοινὸν ὑπὲρ οὗ ἀμφισβητοῦσιν, οἷον ἐν τοῖς πολίταις· διαμφισβητοῦντες γὰρ πρὸς ἀλλήλους κατὰ τὴν ὑπεροχὴν οὐ μένουσιν φίλοι ὄντες.

[47] Ἐχόμενον δ' ἂν εἴη νῦν τοῦτ' εἰπεῖν, πότερόν ἐστι πρὸς αὐτὸν φιλία, ἢ οὐ. ἐπεὶ δ' οὖν ὀρῶμεν, ὥσπερ καὶ μικρὸν ἐπάνω ἐλέγομεν, ὅτι ἐκ μὲν τῶν καθ' ἕκαστα τὸ φιλεῖν γνωρίζεται τὰ δὲ καθ' ἕκαστα αὐτοὶ αὐτοῖς ἂν μάλιστα βουλοίμεθα (καὶ γὰρ τάγαθὰ καὶ τὸ εἶναι καὶ τὸ εὖ εἶναι· ὁμοιοπαθέστατοι δ' αὐτοῖς ἡμῖν ἐσμέν· καὶ συζῆν δὲ μεθ' ἑαυτῶν μάλιστα βουλόμεθα)· ὥστ' εἰ μὲν ἐκ τῶν καθ' ἕκαστα γνωρίζεται ἡ φιλία, τὰ δὲ καθ' ἕκαστα ἡμῖν αὐτοῖς ἂν βουλοίμεθα ὑπάρχειν, δῆλόν ἐστιν ὡς ἐστὶ πρὸς αὐτοὺς φιλία, ὥσπερ καὶ τὴν ἀδικίαν [48] ἔφαμεν πρὸς αὐτὸν εἶναι. ἐπειδὴ γὰρ ἕτερος μὲν

ὁ ἀδικῶν ἕτερος δὲ ὁ ἀδικούμενος, ὁ αὐτὸς δ' εἷς ἐστὶν ἕκαστος, διὰ τὸ τοιοῦτον οὐκ ἐδόκει εἶναι πρὸς αὐτὸν ἀδικία· ἔστι μέντοι, ὡς ἔφαμεν σκοποῦντες ἐπὶ τῶν τῆς ψυχῆς μερῶν, ἐπειδὴ ἐστὶ πλείω, ὅταν ταῦτα μὴ ὁμονοῶσιν, τότε εἶναι πρὸς [49] αὐτὸν τὴν ἀδικίαν. ὁμοίως οὖν τούτῳ καὶ ἡ φιλία δόξειεν ἂν εἶναι πρὸς αὐτόν. ἐπειδὴ γὰρ ὁ φίλος ἐστίν, ὡς φαμέν, ὅταν βουλώμεθα σφόδρα φίλον εἰπεῖν, μία φαμέν ψυχὴ ἢ ἑμὴ καὶ ἡ τούτου· ἐπεὶ οὖν ἐστὶ τῆς ψυχῆς πλείω μέρη, τότ' ἔσται μία ψυχὴ, ὅταν συμφωνῶσι πρὸς ἄλληλα ὃ τε λόγος καὶ τὰ πάθη (οὕτω γὰρ μία ἔσται)· ὥστε μιᾶς γενομένης ἔσται πρὸς αὐτὸν φιλία.

[50] Αὕτη δ' ἔσται ἡ πρὸς αὐτὸν φιλία ἐν τῷ σπουδαίῳ· τούτῳ γὰρ μόνῳ τὰ τῆς ψυχῆς εὖ ἔχουσιν μέρη πρὸς ἄλληλα τῷ μὴ διαφέρεσθαι, ἐπεὶ ὃ γε φαῦλος οὐδέποτε· ἐστὶν αὐτὸς αὐτῷ φίλος, μάχεται γὰρ ἀεὶ ἑαυτῷ. ὁ γοῦν ἀκρατής, ὅταν πράξῃ τι τῶν καθ' ἡδονήν, μετ' οὐ πολὺ μεταμελεῖται καὶ κακίζει αὐτὸς αὐτόν· ὁμοίως ἐπὶ τῶν ἄλλων κακιῶν ὁ φαῦλος ἔχει. διατελεῖ γὰρ αὐτὸς αὐτῷ μαχόμενος καὶ ἐναντιούμενος.

[51] Ἔστιν δὲ φιλία καὶ ἐν ἰσότητι, οἷον ἡ μὲν τῶν ἐταίρων ἐν ἰσότητι ἀριθμῷ καὶ δυνάμει ἀγαθοῦ (οὐδέτερος γὰρ αὐτῶν ἐστὶν ἄξιος θατέρου πλέον ἔχειν οὔτε κατ' ἀριθμὸν ἀγαθῶν οὔτε κατὰ δυνάμιν οὔτε κατὰ μέγεθος, ἀλλὰ τὸ ἴσον· ἴσοι γάρ τινες [52] ἐθέλουσιν εἶναι οἱ ἐταῖροι)· ἐν ἀνισότητι δὲ ἡ πατρὸς πρὸς υἱόν, καὶ ἀρχομένου καὶ ἄρχοντος, καὶ κρείττονος καὶ χείρονος, καὶ γυναικὸς καὶ ἀνδρός, καὶ ἀπλῶς ἐν οἷς ἐστὶν ὁ τὴν τοῦ χείρονος καὶ [53] κρείττονος τάξιν ἔχων ἐν τῇ φιλίᾳ. αὕτη γὰρ ἐστὶν ἡ ἐν ἀνισότητι φιλία κατὰ λόγον. οὐδέποτε γὰρ ἐπ' ἀγαθοῦ δόσει οὐδεὶς ἴσον ἂν δοίῃ τῷ βελτίονι καὶ τῷ χείρονι, ἀλλὰ μείζον τῷ καθ' ὑπεροχὴν ὄντι ἀεὶ. τοῦτο δ' ἴσον ἐστὶν τῷ λόγῳ· ἴσον γὰρ πῶς ἐστὶν ὁ τὸ ἔλαττον ἔχων ἀγαθὸν χείρων ὢν τῷ μείζον ἔχοντι κρείττονι ὄντι.

[12]

[1] Τῶν δὲ φιλιῶν ἀπασῶν τῶν εἰρημένων τούτων μάλιστα πῶς ἐγγίνεται τὸ φιλεῖν ἐν τῇ συγγενικῇ, καὶ ταῦτα ἐν τῇ πατρὶ πρὸς υἱόν. καὶ διὰ τί ποτε ὁ πατὴρ τὸν υἱὸν μᾶλλον φιλεῖ ἢ ὁ υἱὸς τὸν πατέρα; πότερον οὖν, ὡς ἔνιοι λέγοντες ὀρθῶς πρὸς γε τοὺς πολλούς, ὅτι ὁ μὲν πατὴρ εὐεργέτηκέν πῶς τὸν υἱόν, ὁ δ' υἱὸς χάριν ὀφείλει τῆς εὐεργεσίας; [2] αὕτη μὲν οὖν ἡ αἰτία [καὶ] ἐν τῇ κατὰ τὸ συμφέρον φιλίᾳ δόξειεν ἂν ὑπάρχειν· ὥσπερ δὲ καὶ κατὰ τὰς ἐπιστήμας ὀρῶμεν

ἔχον, οὕτω πως ἔχει [3] καὶ ἐνταῦθα. λέγω δ' οἶον [ἐστίν] ἔστι μὲν ὢν τὸ αὐτὸ τέλος τε καὶ ἐνέργεια, καὶ οὐκ ἄλλο τι παρὰ τὴν ἐνέργειαν τέλος, οἶον τῷ αὐλητῇ ἡ αὐτῇ ἐνέργεια καὶ τέλος (τὸ γὰρ αὐλεῖν καὶ τέλος αὐτῷ ἐστὶ καὶ ἐνέργεια), ἀλλ' οὐ τῇ οἰκοδομικῇ (καὶ γὰρ [4] ἕτερον τέλος παρὰ τὴν ἐνέργειαν)· ἔστιν οὖν ἡ φιλία ἐνέργειά τις, οὐδὲν δὲ ἐστὶν ἄλλο τέλος παρὰ τὴν ἐνέργειαν τοῦ φιλεῖν, ἀλλὰ τοῦτο αὐτό. ὁ μὲν οὖν πατήρ ἐνεργεῖ πως ἀεὶ μᾶλλον παρὰ τὸ αὐτοῦ τι εἶναι ποίημα τὸν υἱόν. τοῦτο δ' ὁρῶμεν καὶ ἐπὶ τῶν ἄλλων ὄν· πάντες γὰρ πρὸς ὃ ἂν αὐτοὶ ποιήσωσιν, [5] πρὸς τοῦτό πως καὶ εὖνοι εἰσίν. ὁ οὖν πατήρ εὖνοεῖ πως πρὸς τὸν υἱὸν αὐτοῦ ὄντα ποίημα, τῇ μνήμῃ καὶ τῇ ἐλπίδι ἀγόμενος· διὸ μᾶλλον φιλεῖ ὁ πατήρ τὸν υἱὸν ἢ ὁ υἱὸς τὸν πατέρα.

[6] Δεῖ δὲ καὶ ὑπὲρ τῶν ἄλλων φιλιῶν τῶν λεγομένων καὶ δοκουσῶν ἐπισκέψασθαι εἰ εἰσὶν φιλίαί.

[7] οἶον ἡ εὖνοια φιλία δοκεῖ. ἀπλῶς μὲν οὖν οὐκ ἂν δόξειεν εἶναι ἡ εὖνοια φιλία (πολλοῖς γὰρ πολλάκις ἢ ἀπὸ τοῦ ἰδεῖν ἢ ἀπὸ τοῦ ἀκοῦσαι τι ὑπὲρ τινος ἀγαθὸν εὖνοι γινόμεθα· ἄρ' οὖν ἤδη καὶ φίλοι; ἢ οὐ; οὐ γὰρ εἴ τις ἦν Δαρειῷ εὖνους ἐν Πέρσαις ὄντι, ὥσπερ ἴσως ἦν, εὐθέως καὶ φιλία ἦν αὐτῷ [8] πρὸς Δαρεῖον)· ἀλλ' ἀρχὴ μὲν ἂν ποτε φιλίας ἡ εὖνοια δόξειεν εἶναι, γένοιτο δ' ἂν ἡ εὖνοια φιλία, εἰ προσλάβοι βούλησιν τοῦ τάγαθὰ δυνατὸς ὢν πρᾶξι πράττειν ἐκείνου ἕνεκεν ᾧ ἐστὶν εὖνους. - [9] ἔστιν δ' ἡ εὖνοια τοῦ ἡθους καὶ πρὸς τὸ ἡθος· οὐδεὶς γὰρ λέγεται εὖνους οἶνω ἢ ἄλλῳ τινὶ τῶν ἀνύχων ἀγαθῶν ἢ ἡδέων, ἀλλ' ἂν τις ἦ τὸ ἡθος [10] σπουδαῖος, πρὸς τοῦτον ἡ εὖνοια. - οὐκ ἔστιν δὲ χωρὶς τῆς φιλίας ἡ εὖνοια, ἀλλ' ἐν τῷ αὐτῷ· διὸ δοκεῖ φιλία εἶναι.

[11] Ἡ δ' ὁμόνοιά ἐστὶν μὲν σύνεγγυς τῇ φιλίᾳ, ἐὰν τὴν ὁμόνοιαν λάβῃς τὴν κυρίως λεγομένην. εἰ γὰρ τις Ἐμπεδοκλεῖ ὁμοίως ὑπολαμβάνει καὶ δοκεῖ αὐτῷ τὰ στοιχεῖα εἶναι ἃ κάκείνῳ, ἄρά γε οὗτος Ἐμπεδοκλεῖ ὁμονοεῖ; ἢ οὐ; ἐπεὶ περὶ τι ἄλλο [12] τοιοῦτον. πρῶτον μὲν γὰρ οὐκ ἔστιν ἡ ὁμόνοια ἐν τοῖς νοητοῖς ἀλλ' ἐν τοῖς πρακτοῖς, καὶ ἐν τούτοις οὐχ ἡ νοοῦσι ταῦτόν, ἀλλ' ἡ ἅμα τῷ ταῦτόν νοεῖν προαίρεσιν ἔχουσιν περὶ ἃ νοοῦσιν ἐπὶ ταῦτά. εἰ γὰρ ἐννοοῦσιν ἀμφοτέρω ἄρχειν, ἀλλ' ὁ μὲν αὐτὸν ὁ δ' αὐτόν, ἄρά γε ἤδη ὁμονοοῦσιν; ἢ οὐ; ἀλλ' εἰ κἀγὼ ἐμαυτὸν βούλομαι ἄρχειν κάκείνος ἐμέ, [13] οὕτως ἤδη ὁμονοοῦμεν. ἔστι δὲ ὁμονοεῖν ἐν τοῖς πρακτοῖς μετὰ βουλήσεως ταῦτοῦ. περὶ ἄρχοντος ἄρα κατάστασιν ἐν πρακτοῖς

τοῦ αὐτοῦ ἐστὶν ἡ ὁμόνοια ἢ κυρίως λεγομένη.

[13]

[1] Ἐπεὶ δ' ἐστίν, ὥς φαμέν, αὐτῷ πρὸς αὐτὸν φιλία, πότερον ὁ σπουδαῖος ἔσται φίλαυτος ἢ οὐ; ἔστιν δὲ φίλαυτος ὁ αὐτοῦ ἕνεκεν πάντα πράττων ἐν τοῖς κατὰ τὸ λυσιτελές. ὁ μὲν οὖν φαῦλος φίλαυτος ἐστίν (αὐτὸς αὐτοῦ γὰρ ἕνεκεν πάντα πράττει)· ἀλλ' οὐχ ὁ σπουδαῖος. διὰ τοῦτο γὰρ ἐστὶ σπουδαῖος, ὅτι ἄλλου ἕνεκεν τοῦτο πράττει. [2] διὸ οὐκ ἔστιν φίλαυτος. ἀλλ' ὁρμῶσι μὲν ἅπαντες ἐπὶ τάγαθά, καὶ οἶονται αὐτοῖς δεῖν μάλιστα ὑπάρχειν. τοῦτο δὲ ἐστὶ μάλιστα φανερόν ἐπὶ πλούτου καὶ ἀρχῆς. ὁ μὲν οὖν σπουδαῖος ἐκστήσεται τούτων ἄλλω, οὐχ ὥς οὐ προσῆκον αὐτῷ μάλιστα, ἀλλ' ἂν ὁρᾷ ἄλλον δυνησόμενον μᾶλλον τούτοις αὐτοῦ χρῆσθαι· οἱ δ' ἄλλοι τοῦτο οὐ ποιήσουσι δι' ἄγνοιαν (οὐ γὰρ οἶονται κακῶς ἂν χρήσασθαι τοῖς τοιούτοις [3] ἀγαθοῖς) ἢ διὰ φιλοτιμίαν τοῦ ἄρχειν. ὁ δὲ σπουδαῖος οὐδέτερον τούτων πείσεται· διὸ οὐδὲ φίλαυτος κατὰ γε τὰ τοιαῦτα ἀγαθά. ἀλλ' εἰ ἄρα, κατὰ τὸ καλόν. τούτου γὰρ μόνον ἄλλω οὐκ ἂν ἐκσταίῃ, τὰ [4] δὲ συμφέροντα καὶ ἡδέα ἐκστήσεται. τὴν μὲν οὖν κατὰ τὸ καλὸν αἵρεσιν φίλαυτος ἔσται· τὴν δὲ κατὰ τὸ συμφέρον καὶ καθ' ἡδονὴν λεγομένην οὐκ ἔσται ὁ σπουδαῖος, ἀλλὰ ὁ φαῦλος.

[14]

[1] Πότερον δέ ποτε ὁ σπουδαῖος φιλήσει αὐτὸς ἑαυτὸν μάλιστα ἢ οὐ; ἔστι μὲν οὖν αὐτὸς αὐτὸν μάλιστα ὥς φιλήσει, ἔστι δ' ὥς οὐ. ἐπειδὴ γὰρ φαμεν τὸν σπουδαῖον ἐκστήσεσθαι τῶν ἀγαθῶν τῶν κατὰ τὸ συμφέρον τῷ φίλῳ, τὸν φίλον μᾶλλον [2] αὐτοῦ φιλήσει. ναί, ἀλλ' ἢ τούτων ἐξιστάμενος τῷ φίλῳ αὐτῷ τὸ καλὸν περιποιεῖται, ταύτη ἐξίσταται τῶν τοιούτων. ἔστι μὲν οὖν ὥς τὸν φίλον αὐτὸς αὐτοῦ μᾶλλον φιλεῖ, ἔστι δὲ ὥς αὐτὸς αὐτὸν μάλιστα· κατὰ μὲν γὰρ τὸ συμφέρον τὸν φίλον, κατὰ δὲ τὸ καλὸν καὶ ἀγαθὸν αὐτὸς αὐτὸν μάλιστα· αὐτῷ [3] γὰρ ταῦτα περιποιεῖται κάλλιστα ὄντα. ἔστι μὲν οὖν καὶ φιλάγαθος, οὐ φίλαυτος· μόνον γὰρ, εἴπερ φιλεῖ αὐτὸς ἑαυτόν, ὅτι ἀγαθός. ὁ δὲ φαῦλος φίλαυτος· οὐδὲν γὰρ ἔχει δι' ὃ φιλήσει αὐτὸς ἑαυτὸν οἷον καλόν τι, ἀλλ' ἄνευ τούτων αὐτὸς ἑαυτὸν φιλήσει, ἢ αὐτός. διὸ καὶ οὗτος ἂν κυρίως λέγοιτο φίλαυτος.

[15]

[1] Ἐχόμενον δ' ἂν εἴη ὑπὲρ αὐταρκειᾶς εἰπεῖν καὶ τοῦ αὐτάρκους, πότερον ὁ αὐτάρκης προσδεήσεται φιλίας, ἢ οὐ, ἀλλ'

αὐτὸς ἑαυτῷ αὐτάρκης ἔσται καὶ κατὰ τοῦτο. λέγουσι γὰρ τοιαῦτα καὶ οἱ ποιηταί·

ὅταν δ' ὁ δαίμων εὖ διδῷ, τί δεῖ φίλων;

ὅθεν καὶ ἡ ἀπορία γίγνεται, πότερον ὁ πάντα τάγαθὰ ἔχων καὶ ὦν αὐτάρκης προσδεήσεται φίλου; ἢ τότε καὶ μάλιστα; τίνα γὰρ εὖ ποιήσει, ἢ μετὰ [2] τοῦ συμβιώσεται; οὐ γὰρ δὴ μόνος γε διάξει. εἰ τοίνυν τούτων δεήσεται, ταῦτα δὲ μὴ ἐνδέχεται ἄνευ φιλίας, προσδέοιτ' ἂν ὁ αὐτάρκης φιλίας.

[3] Ἡ μὲν οὖν ἐν τοῖς λόγοις εἰωθυῖα ὁμοιότης λαμβάνεσθαι ἐκ τοῦ θεοῦ οὐτ' ἐκεῖ ὀρθῶς οὐτ' ἂν ἐνταῦθα εἴη χρήσιμος· οὐ γὰρ εἰ ὁ θεὸς ἔστιν αὐτάρκης καὶ μηδενὸς δεῖται, διὰ τοῦτ' οὐδ' ἡμεῖς [4] οὐδενὸς δεησόμεθα. ἔστι γὰρ καὶ τοιοῦτός τις λόγος ἐπὶ τοῦ θεοῦ λεγόμενος. ἐπεὶ γάρ, φησί, πάντα ἔχει τάγαθὰ ὁ θεὸς καὶ ἔστιν αὐτάρκης, τί ποιήσει; οὐ γὰρ καθευδήσει. θεάσεται δὴ τι, φησίν· τοῦτο γὰρ κάλλιστον καὶ οἰκειότατον. τί οὖν θεάσεται; εἰ μὲν γὰρ ἄλλο τι θεάσεται, βέλτιον θεάσεται τι αὐτοῦ. ἀλλὰ τοῦτ' ἄτοπον, τὸ τοῦ θεοῦ ἄλλο τι εἶναι βέλτιον. αὐτὸς ἑαυτὸν ἄρα θεάσεται. ἀλλ' ἄτοπον· καὶ γὰρ ὁ ἄνθρωπος [ὅς] ἂν αὐτὸς ἑαυτὸν κατασκοπῇται, ὥς ἀναισθήτῳ ἐπιτιμῶμεν. ἄτοπος οὖν, φησίν, ὁ θεὸς ἔσται αὐτὸς ἑαυτὸν θεώμενος.

[5] Τί μὲν οὖν ὁ θεὸς θεάσεται, ἀφείσθω· ὑπὲρ δὲ τῆς αὐταρκειᾶς οὐ τῆς τοῦ θεοῦ τὴν σκέψιν ποιούμεθα, ἀλλ' ἀνθρωπίνης, πότερον ὁ αὐτάρκης δεήσεται φιλίας ἢ οὐ; εἰ δὴ τις ἐπὶ τὸν φίλον ἐπιβλέψας ἴδοι τί ἔστι καὶ ὁποῖός τις ὁ φίλος, τοιοῦτος οἶος ἕτερος εἶναι ἐγώ, ἂν γε καὶ σφόδρα φίλον ποιήσης, ὥσπερ τὸ λεγόμενον “ἄλλος οὗτος [6] Ἡρακλῆς, ἄλλος φίλος ἐγώ.” ἐπεὶ οὖν ἔστι καὶ χαλεπώτατον, ὥσπερ καὶ τῶν σοφῶν τινες εἰρήκασιν, τὸ γνῶναι αὐτόν, καὶ ἥδιστον (τὸ γὰρ αὐτόν εἰδέναι ἡδύ), αὐτοὶ μὲν οὖν αὐτοὺς ἐξ αὐτῶν οὐ δυνάμεθα θεάσασθαι (ὅτι δ' αὐτοὶ αὐτοὺς οὐ δυνάμεθα, δῆλον ἐξ ὧν ἄλλοις ἐπιτιμῶμεν, αὐτοὶ δὲ [7] λανθάνομεν ταῦτα ποιοῦντες· τοῦτο δὲ γίνεται δι' εὐνοίαν ἢ διὰ πάθος· πολλοῖς δὲ ἡμῶν ταῦτα ἐπισκοτεῖ πρὸς τὸ κρίνειν ὀρθῶς)· ὥσπερ οὖν ὅταν θέλωμεν αὐτοὶ αὐτῶν τὸ πρόσωπον ἰδεῖν, εἰς τὸ κάτοπτρον ἐμβλέψαντες εἶδομεν, ὁμοίως καὶ ὅταν αὐτοὶ αὐτοὺς βουλευθῶμεν γνῶναι, εἰς τὸν φίλον ἰδόντες γνωρίσαιμεν ἂν· ἔστι γάρ, ὥς φαμέν, ὁ [8] φίλος ἕτερος ἐγώ. εἰ οὖν ἡδὺ μὲν τὸ αὐτόν εἰδέναι, τοῦτο δ' οὐκ ἔστιν εἰδέναι ἄνευ ἄλλου φίλου, δεοίτ' ἂν ὁ αὐτάρκης φιλίας πρὸς τὸ αὐτὸς αὐτόν γνωρίζειν.

[9] Ἦτι δὲ καὶ εἴπερ ἐστὶν καλόν, ὥσπερ ἐστίν, τὸ εὖ ποιεῖν ἔχοντα τὰ παρὰ τῆς τύχης ἀγαθὰ, τίνα εὖ ποιήσει; μετὰ τίνος δὲ συμβιώσεται; οὐ γὰρ δὴ μόνος γε διάξει· τὸ γὰρ συμβιοῦν ἡδὺ καὶ ἀναγκαῖον. εἰ τοίνυν ταῦτα καλὰ καὶ ἡδέα καὶ ἀναγκαῖα, ταῦτα δὲ μὴ ἐνδέχεται εἶναι ἄνευ φιλίας, προσδέοιτ' ἂν ὁ αὐτάρκης φιλίας.

[16]

[1] Πότερον δὲ πολλοὺς κτητέον φίλους ἢ ὀλίγους; οὔτε δὴ πολλοὺς, ὥς ἀπλῶς εἶπεῖν, οὔτ' ὀλίγους δεῖ [αἰ]. πολλῶν μὲν γὰρ ὄντων ἔργον ἐφ' ἑκάστον μερίσαι τὸ φιλεῖν. ἐφ' ἀπάντων γὰρ καὶ τῶν ἄλλων ἐξαδυνατεῖ ἡμῶν ἡ φύσις ἀσθενῆς οὔσα πρὸς τὸ ἐπὶ πολὺ ἀφικνεῖσθαι. οὔτε γὰρ τῇ ὅψει ἐπὶ πολὺ ὀρῶμεν, ἀλλ' ἐὰν πλέον ἀποστήσης τοῦ συμμέτρου, ἐλλείπει διὰ τὴν ἀσθένειαν τῆς φύσεως, οὔτ' ἐπ' ἀκοῆς, οὔτ' ἐπὶ τῶν ἄλλων ὁμοίως ἀπάντων.

[2] ἐλλείπων οὖν τῷ φιλεῖν δι' ἀδυναμίαν καὶ ἐγκλήματ' ἂν τις ἔχοι δικαίως, καὶ οὐκ ἂν εἴη φίλος, μὴ φιλῶν γε ἀλλ' ἢ τῷ γε λόγῳ· ἢ δὲ [3] φιλία οὐ τοῦτο βούλεται. ἔτι ἂν ὧσιν πολλοί, οὐκ ἔστιν παύσασθαι λυπούμενον· πολλῶν γὰρ ὄντων εἰκὸς αἰεὶ περὶ ἓνα γέ τινα συμβαίνειν τι ἀτύχημα, ὧν γινομένων ἀναγκαῖον λυπεῖσθαι. οὔτ' αὖ πάλιν ὀλίγους, ἓνα ἢ δύο, ἀλλὰ συμμέτρους τῷ καιρῷ καὶ τῇ αὐτοῦ ὁρμῇ πρὸς τὸ φιλεῖν.

[17]

[1] Μετὰ δὲ ταῦτα σκεπτέον ἂν εἴη πῶς δεῖ φίλῳ χρῆσθαι. ἔστι δ' οὐκ ἐν ἀπάσῃ φιλίᾳ ἢ σκέψις, ἀλλ' ἐν ἣ μάλιστα ἐγκαλοῦσιν ἀλλήλοις οἱ φίλοι. οὐκ ἐγκαλοῦσι δὲ ἐν ταῖς ἄλλαις ὁμοίως, οἷον ἐν τῇ πατρὸς πρὸς υἱὸν οὐκ ἔστιν ἐγκλημα τοιοῦτον οἷον ἀξιοῦσιν ἐν ἐνίαις, ὥσπερ ἐγὼ σοί, οὕτως καὶ σὺ ἐμοί, εἰ δὲ μή, ἐνταῦθα τὸ σφοδρὸν [2] ἐγκλημα· ἐν δὲ ἀνίσοις φίλοις οὐκ ἔστι τὸ ἴσον, ἔστι δὲ ἢ πατρὸς πρὸς υἱὸν φιλία ἐν ἀνίσῳ, ὁμοίως ἢ γυναικὸς πρὸς ἄνδρα ἢ οἰκέτου πρὸς δεσπότην, καὶ ὅλως δὲ χείρονος καὶ βελτίονος. οὐχ ἔξουσιν δὴ τὰ τοιαῦτα ἐγκλήματα. ἀλλ' ἐν τοῖς ἴσοις φίλοις καὶ ἐν τῇ <τοι>αύτῃ φιλίᾳ τὸ τοιοῦτον ἐγκλημα. ὥστε σκεπτέον ἂν εἴη τὸ πῶς δεῖ χρῆσθαι φίλῳ ἐν τῇ ἐν ἴσοις φίλοις φιλίᾳ.* * .

Βιβλίο 1

[1214a] Ὁ μὲν ἐν Δήλῳ παρὰ τῷ θεῷ τὴν αὐτοῦ γνώμην ἀποφηνάμενος συνέγραψεν ἐπὶ τὸ προπύλαιον τοῦ Λητώφου, διελὼν οὐχ ὑπάρχοντα πάντα τῷ αὐτῷ, τό τε ἀγαθὸν καὶ τὸ καλὸν καὶ τὸ ἡδύ, ποιήσας

κάλλιστον τὸ δικαιοτάτον, λῶστον δ' ὑγιαίνειν·

πάντων ἡδιστον δ' οὗ τις ἐρᾷ τὸ τυχεῖν·

ἡμεῖς δ' αὐτῷ μὴ συγχωρῶμεν. ἡ γὰρ εὐδαιμονία κάλλιστον καὶ ἄριστον ἀπάντων οὕσα ἡδιστον ἐστίν.

πολλῶν δ' ὄντων θεωρημάτων ἃ περὶ ἕκαστον πρᾶγμα καὶ περὶ ἐκάστην φύσιν ἀπορίαν ἔχει καὶ δεῖται σκέψεως, τὰ μὲν αὐτῶν συντείνει πρὸς τὸ γινῶναι μόνον, τὰ δὲ καὶ περὶ τὰς κτήσεις καὶ περὶ τὰς πράξεις τοῦ πράγματος. ὅσα μὲν οὖν ἔχει φιλοσοφίαν μόνον θεωρητικὴν, λεκτέον κατὰ τὸν ἐπιβάλλοντα καιρὸν, ὃ τι περ οἰκεῖον ἦν τῇ μεθόδῳ· πρῶτον δὲ σκεπτέον ἐν τίνι τὸ εὖ ζῆν καὶ πῶς κητόν, πότερον φύσει γίνονται πάντες εὐδαίμονες οἱ τυγχάνοντες ταύτης τῆς προσηγορίας, ὥσπερ μεγάλοι καὶ μικροὶ καὶ τὴν χροιάν διαφέροντες, ἢ διὰ μαθήσεως, ὡς οὔσης ἐπιστήμης τινὸς τῆς εὐδαιμονίας, ἢ διὰ τινος ἀσκήσεως (πολλὰ γὰρ οὔτε κατὰ φύσιν οὔτε μαθοῦσιν ἀλλ' ἐθισθεῖσιν ὑπάρχει τοῖς ἀνθρώποις, φαῦλα μὲν τοῖς φαύλως ἐθισθεῖσι, χρηστὰ δὲ τοῖς χρηστῶς), ἢ τούτων μὲν κατ' οὐδένα τῶν τρόπων, δυοῖν δὲ θάτερον, ἥτοι καθάπερ οἱ νυμφόληπτοι καὶ θεόληπτοι τῶν ἀνθρώπων, ἐπιπνοία δαιμονίου τινὸς ὥσπερ ἐνθουσιάζοντες, ἢ διὰ τὴν τύχην (πολλοὶ γὰρ ταυτόν φασιν εἶναι τὴν εὐδαιμονίαν καὶ τὴν εὐτυχίαν).

ὅτι μὲν οὖν ἡ παρουσία διὰ τούτων ἀπάντων ἢ τινῶν ἢ τινὸς ὑπάρχει τοῖς ἀνθρώποις, οὐκ ἄδηλον (ἅπασαι γὰρ αἱ γενέσεις σχεδὸν πίπτουσιν εἰς ταύτας τὰς ἀρχάς· καὶ γὰρ <τὰς> ἀπὸ τῆς διανοίας ἀπάσας πρὸς τὰς ἀπὸ ἐπιστήμης ἂν τις συναγάγοι πράξεις)· τὸ δ' εὐδαιμονεῖν καὶ τὸ ζῆν μακαρίως καὶ καλῶς εἶη ἂν ἐν τρισὶ μάλιστα, τοῖς εἶναι δοκοῦσιν αἰρετωτάτοις. οἱ μὲν γὰρ τὴν φρόνησιν μέγιστον εἶναι φασιν ἀγαθόν, οἱ δὲ τὴν ἀρετὴν, οἱ δὲ τὴν ἡδονήν. καὶ πρὸς τὴν εὐδαιμονίαν ἐνιοὶ περὶ τοῦ μεγέθους αὐτῶν [1214b] διαμφισβητοῦσι, συμβάλλεσθαι φάσκοντες θάτερον θατέρου μᾶλλον εἰς αὐτήν, οἱ μὲν ὡς οὔσαν μεῖζον ἀγαθὸν τὴν φρόνησιν τῆς ἀρετῆς, οἱ δὲ ταύτης τὴν

ἀρετήν, οἱ δ' ἀμφοτέρων τούτων τὴν ἡδονήν. καὶ τοῖς μὲν ἐκ πάντων δοκεῖ τούτων, τοῖς δ' ἐκ δυοῖν, τοῖς δ' ἐν ἐνί τινι τούτων εἶναι τὸ ζῆν εὐδαιμόνως.

περὶ δὴ τούτων ἐπιστήσαντας, ἅπαντα τὸν δυνάμενον ζῆν κατὰ τὴν αὐτοῦ προαίρεσιν θέσθαι τινὰ σκοπὸν τοῦ καλῶς ζῆν, ἥτοι τιμὴν ἢ δόξαν ἢ πλοῦτον ἢ παιδείαν, πρὸς ὃν ἀποβλέπων ποιήσεται πάσας τὰς πράξεις (ὥς τό γε μὴ συντετάχθαι τὸν βίον πρὸς τι τέλος ἀφροσύνης πολλῆς σημεῖον ἐστίν), μάλιστα δὴ δεῖ πρῶτον ἐν αὐτῷ διορίσασθαι μήτε προπετῶς μήτε ραθύμως, ἐν τίνι τῶν ἡμετέρων τὸ ζῆν εὔ, καὶ τίνων ἄνευ τοῖς ἀνθρώποις οὐκ ἐνδέχεται τοῦθ' ὑπάρχειν. οὐ γὰρ ταῦτόν, ὧν τ' ἄνευ οὐχ οἷόν τε ὑγιαίνειν, καὶ τὸ ὑγιαίνειν· ὁμοίως δ' ἔχει τοῦτο καὶ ἐφ' ἑτέρων πολλῶν, ὥστ' οὐδὲ τὸ ζῆν καλῶς καὶ ὧν ἄνευ οὐ δυνατόν ζῆν καλῶς (ἐστὶ δὲ τῶν τοιούτων τὰ μὲν οὐκ ἴδια τῆς ὑγιείας οὐδὲ τῆς ζωῆς ἀλλὰ κοινὰ πάντων ὥς εἰπεῖν, καὶ τῶν ἔξεων καὶ τῶν πράξεων, οἷον ἄνευ τοῦ ἀναπνεῖν ἢ ἐγρηγορέναι ἢ κινήσεως μετέχειν οὐθὲν ἂν ὑπάρξειεν ἡμῖν οὔτ' ἀγαθὸν οὔτε κακόν, τὰ δ' ἴδια μᾶλλον περὶ ἐκάστην φύσιν· ἃ δεῖ μὴ λανθάνειν· οὐ γὰρ ὁμοίως οἰκεῖον πρὸς εὐεξίαν τοῖς εἰρηνέμοις κρεωφαγία καὶ τῶν περιπάτων οἱ μετὰ δεῖπνον). ἐστὶ γὰρ ταῦτ' αἷτια τῆς ἀμφισβητήσεως περὶ τοῦ εὐδαιμονεῖν, τί ἐστὶ καὶ γίνεται διὰ τίνων· ὧν ἄνευ γὰρ οὐχ οἷόν τε εὐδαιμονεῖν, ἐνιοὶ μέρη τῆς εὐδαιμονίας εἶναι νομίζουσι.

πάσας μὲν οὖν τὰς δόξας ἐπισκοπεῖν, ὅσας ἔχουσιν τινες περὶ αὐτῆς, περίεργον (πολλὰ γὰρ φαίνεται καὶ τοῖς παιδαρίοις καὶ τοῖς κάμνουσι καὶ παραφρονοῦσι, περὶ ὧν ἂν οὐθεὶς νοῦν ἔχων διαπορήσειεν· δέονται γὰρ οὐ λόγων, ἀλλ' οἱ μὲν ἡλικίας ἐν ἣ μεταβαλοῦσιν, οἱ δὲ κολάσεως ἱατρικῆς ἢ πολιτικῆς· κόλασις γὰρ ἢ φαρμακεία τῶν πληγῶν οὐκ ἐλάττων ἐστίν), ὁμοίως δὲ ταύταις οὐδὲ τὰς τῶν πολλῶν [1215a] «ἐπισκεπτέον» (εἰκῇ γὰρ λέγουσι σχεδὸν περὶ ἀπάντων, καὶ μάλιστα περὶ [ἐπισκεπτέον] «εὐδαιμονίας· ἄτοπον γὰρ προσφέρειν λόγον τοῖς λόγου μηθὲν δεομένοις, ἀλλὰ πάθους)· ἐπεὶ δ' εἰσὶν ἀπορίαι περὶ ἐκάστην πραγματείαν οἰκεῖαι, δῆλον ὅτι καὶ περὶ βίου τοῦ κρατίστου καὶ ζωῆς τῆς ἀρίστης εἰσὶν. ταύτας οὖν καλῶς ἔχει τὰς δόξας ἐξετάζειν· οἱ γὰρ τῶν ἀμφισβητούντων ἔλεγχοι τῶν ἐναντιουμένων αὐτοῖς λόγων ἀποδείξεις εἰσὶν. - ἐτι δὲ πρὸ ἔργου τὸ τὰ τοιαῦτα μὴ λανθάνειν, μάλιστα πρὸς ἃ δεῖ συντείνειν πᾶσαν σκέψιν, ἐκ τίνων ἐνδέχεται μετασχεῖν τοῦ εὔ καὶ καλῶς ζῆν, εἴ τῳ

μακαρίως ἐπιφθονώτερον εἰπεῖν, καὶ πρὸς τὴν ἐλπίδα τὴν περὶ ἕκαστα γενομένην ἂν τῶν ἐπαικῶν. εἰ μὲν γὰρ ἐν τοῖς διὰ τύχην γινομένοις ἢ τοῖς διὰ φύσιν τὸ καλῶς ζῆν ἐστίν, ἀνέλπιστον ἂν εἴη πολλοῖς (οὐ γὰρ ἐστι δι’ ἐπιμελείας ἢ κτήσις [οὐδὲ] ἐπ’ αὐτοῖς οὐδὲ τῆς αὐτῶν πραγματείας). εἰ δ’ ἐν τῷ αὐτὸν ποιόν τινα εἶναι καὶ τὰς κατ’ αὐτὸν πράξεις, κοινότερον ἂν εἴη τὸ ἀγαθὸν καὶ θεϊότερον, κοινότερον μὲν τῷ πλείοσιν ἐνδέχεσθαι μετασχεῖν, θεϊότερον δὲ τῷ κεῖσθαι τὴν εὐδαιμονίαν τοῖς αὐτοῦς παρασκευάζουσι ποιούς τινας καὶ τὰς πράξεις.

ἔσται δὲ φανερά τὰ πλεῖστα τῶν ἀμφισβητουμένων καὶ διαπορουμένων, ἂν καλῶς ὀρισθῇ τί χρὴ νομίζειν εἶναι τὴν εὐδαιμονίαν, πότερον ἐν τῷ ποιόν τινα μόνον εἶναι τὴν ψυχὴν, καθάπερ τινὲς ῥήθησαν τῶν σοφῶν καὶ πρεσβυτέρων, ἢ δεῖ μὲν καὶ ποιόν τινα ὑπάρχειν αὐτόν, μᾶλλον δὲ δεῖ τὰς πράξεις εἶναι ποιὰς τινάς.

διηρημένων δὲ τῶν βίων, καὶ τῶν μὲν <οὐδ’> ἀμφισβητούντων τῆς τοιαύτης εὐημερίας, ἀλλ’ ὥς τῶν ἀναγκαίων χάριν σπουδαζομένων, οἷον τῶν περὶ τὰς τέχνας τὰς φορτικὰς καὶ τῶν περὶ χρηματισμὸν καὶ τὰς βαναύσους (λέγω δὲ φορτικὰς μὲν τὰς πρὸς δόξαν πραγματευομένας μόνον, βαναύσους δὲ τὰς ἐδραίας καὶ μισθαρνικάς, χρηματιστικὰς δὲ τὰς πρὸς ἀγοράς μὲν καὶ πράσεις καπηλικάς), τῶν δ’ εἰς ἀγωγὴν εὐδαιμονικὴν ταπτομένων τριῶν ὄντων, τῶν καὶ πρότερον ῥηθέντων ἀγαθῶν ὥς μεγίστων τοῖς ἀνθρώποις, ἀρετῆς καὶ φρονήσεως καὶ ἡδονῆς, τρεῖς ὀρῶμεν καὶ βίους ὄντας, οὓς οἱ ἐπ’ ἐξουσίας τυγχάνοντες προαιροῦνται ζῆν ἅπαντες, πολιτικὸν φιλόσοφον [1215b] ἀπολαυστικόν. τούτων γὰρ ὁ μὲν φιλόσοφος βούλεται περὶ φρόνησιν εἶναι καὶ τὴν θεωρίαν τὴν περὶ τὴν ἀλήθειαν, ὁ δὲ πολιτικὸς περὶ τὰς πράξεις τὰς καλὰς (αὗται δ’ εἰσὶν αἱ ἀπὸ τῆς ἀρετῆς), ὁ δ’ ἀπολαυστικὸς περὶ τὰς ἡδονὰς τὰς σωματικὰς. διόπερ <ἕτερος> ἕτερον τὸν εὐδαίμονα προσαγορεύει, καθάπερ ἐλέχθη καὶ πρότερον. Ἀναξαγόρας μὲν ὁ Κλαζομένιος ἐρωτηθεὶς τίς ὁ εὐδαιμονέστατος, “οὐθεὶς”, εἶπεν, “ὧν σὺ νομίζεις· ἀλλ’ ἄτοπος ἂν τίς σοι φανείη”. τοῦτον δ’ ἀπεκρίνατο τὸν τρόπον ἐκεῖνος, ὅρῶν τὸν ἐρόμενον ἀδύνατον ὑπολαμβάνοντα μὴ μέγαν ὄντα καὶ καλὸν ἢ πλούσιον ταύτης τυγχάνειν τῆς προσηγορίας, αὐτὸς δ’ ἴσως ᾤετο τὸν ζῶντα ἀλύπως καὶ καθαρῶς πρὸς τὸ δίκαιον ἢ τινος θεωρίας κοινωνοῦντα θείας, τοῦτον ὥς ἄνθρωπον εἰπεῖν

μακάριον εἶναι.

περὶ πολλῶν μὲν οὖν καὶ ἐτέρων οὐ ῥάδιον τὸ κρῖναι καλῶς, μάλιστα δὲ περὶ οὗ πᾶσι ῥᾶστον εἶναι δοκεῖ, καὶ παντὸς ἀνδρὸς τὸ γνῶναι, τί τῶν ἐν τῷ ζῆν αἰρετόν, καὶ λαβὼν ἂν τις ἔχοι πλήρη τὴν ἐπιθυμίαν. πολλὰ γάρ ἐστι τοιαῦτα τῶν ἀποβαινόντων, <δι’ ᾧ> προΐενται τὸ ζῆν, οἷον νόσους περιωδυνίας χειμῶνας· ὥστε δῆλον ὅτι καὶ ἐξ ἀρχῆς αἰρετόν ἦν, εἰ τις αἵρεσιν ἐδίδου, διὰ γε ταῦτα τὸ μὴ γενέσθαι. πρὸς δὲ τούτοις <τίς> ὁ βίος, ὃν ζῶσιν ἔτι παῖδες ὄντες; καὶ γὰρ ἐπὶ τοῦτον ἀνακάμψαι ἄλιν οὐδεὶς ἂν ὑπομείνειεν εὖ φρονῶν. ἔτι δὲ πολλὰ τῶν τε μηδεμίαν ἐχόντων [μὲν] ἡδονὴν ἢ λύπην, καὶ τῶν ἐχόντων μὲν ἡδονὴν μὴ καλὴν δέ, τοιαῦτ’ ἐστὶν ὥστε τὸ μὴ εἶναι κρεῖττον εἶναι τοῦ ζῆν. ὅλως δ’ εἰ τις ἅπαντα συναγάγοι ὅσα πράττουσι μὲν καὶ πάσχουσιν ἅπαντες, ἐκόντες μέντοι μὴθὲν αὐτῶν διὰ τὸ μὴδ’ αὐτοῦ χάριν, καὶ προσθεῖη χρόνου πλῆθος ἀπέραντόν τι, οὐ μᾶλλον ἔνεκ’ ἂν τις τούτων ἔλοιτο ζῆν ἢ μὴ ζῆν. ἀλλὰ μὴν οὐδὲ διὰ τὴν τῆς τροφῆς μόνον ἡδονὴν ἢ τὴν τῶν ἀφροδισίων, ἀφαιρεθεῖσθαι τῶν ἄλλων ἡδονῶν, ὥς τὸ γινώσκειν ἢ βλέπειν ἢ τῶν ἄλλων τις αἰσθήσεων πορίζει τοῖς ἀνθρώποις, οὐδ’ ἂν εἰς προτιμήσειε τὸ ζῆν, μὴ παντελῶς ὦν ἀνδράποδον. δῆλον γὰρ ὅτι τῷ ταύτην ποιουμένῳ τὴν αἵρεσιν οὐθὲν ἂν διενέγκειε γενέσθαι θηρίον ἢ ἄνθρωπον· ὁ γοῦν ἐν [1216a] Αἰγύπτῳ βοῦς, ὃν ὡς Ἄπιν τιμῶσιν, ἐν πλείοσι τῶν τοιούτων ἐξουσιάζει πολλῶν μοναρχῶν. ὁμοίως δὲ οὐδὲ διὰ τὴν τοῦ καθεύδειν ἡδονήν· τί γὰρ διαφέρει καθεύδειν ἀνέγερτον ὕπνον ἀπὸ τῆς πρώτης ἡμέρας μέχρι τῆς τελευταίας ἐτῶν ἀριθμὸν χιλίων ἢ ὀποσωνοῦν, ἢ ζῆν ὄντα φυτόν; τὰ γοῦν φυτὰ τοιαύτης τινὸς ἔοικε μετέχειν ζωῆς, ὥσπερ καὶ τὰ παιδιά. καὶ γὰρ ταῦτα κατὰ τὴν πρώτην ἐν τῇ μητρὶ γένεσιν πεφυκότα μὲν διατελεῖ, καθεύδοντα δὲ τὸν πάντα χρόνον. ὥστε φανερόν ἐκ τῶν τοιούτων ὅτι διαφεύγει σκοπομένους, τί τὸ εὖ καὶ τί τὸ ἀγαθὸν τὸ ἐν τῷ ζῆν.

τὸν μὲν οὖν Ἀναξαγόραν φασὶν ἀποκρίνασθαι πρὸς τινα διαποροῦντα τοιαῦτ’ ἅττα καὶ διερωτῶντα τίνος ἔνεκ’ ἂν τις ἔλοιτο γενέσθαι μᾶλλον ἢ μὴ γενέσθαι “τοῦ” φάναι “θεωρῆσαι τὸν οὐρανὸν καὶ τὴν περὶ τὸν ὅλον κόσμον τάξιν”. οὗτος μὲν οὖν ἐπιστήμης τινὸς ἔνεκεν τὴν αἵρεσιν ᾤετο τιμίαν εἶναι τοῦ ζῆν· οἱ δὲ Σαρδανάπαλλον μακαρίζοντες ἢ Σμινδυρίδην τὸν Συβαρίτην ἢ τῶν ἄλλων τινὰς τῶν ζώντων τὸν ἀπολαυστικὸν βίον, οὗτοι δὲ πάντες ἐν τῷ χαίρειν φαίνονται τάττειν τὴν εὐδαιμονίαν· ἕτεροι δὲ τινες οὗτ’ ἂν φρόνησιν

οὐδεμίαν οὔτε τὰς σωματικὰς ἡδονὰς ἔλαιντο μᾶλλον ἢ τὰς πράξεις τὰς ἀπ' ἀρετῆς. αἰροῦνται γοῦν οὐ μόνον ἔνιοι δόξης χάριν αὐτάς, ἀλλὰ καὶ μὴ μέλλοντες εὐδοκιμήσειν. ἀλλ' οἱ πολλοὶ τῶν πολιτικῶν οὐκ ἀληθῶς τυγχάνουσι τῆς προσηγορίας· οὐ γάρ εἰσι πολιτικοὶ κατὰ τὴν ἀλήθειαν· ὁ μὲν γὰρ πολιτικὸς τῶν καλῶν ἐστὶ πράξεων προαιρετικὸς αὐτῶν χάριν, οἱ δὲ πολλοὶ χρημάτων καὶ πλεονεξίας ἔνεκεν ἅπτονται τοῦ ζῆν οὕτως.

ἐκ μὲν οὖν τῶν εἰρημένων φανερόν ὅτι πάντες ἐπὶ τρεῖς βίους φέρουσι τὴν εὐδαιμονίαν, πολιτικὸν φιλόσοφον ἀπολαυστικόν· τούτων δ' ἡ μὲν περὶ τὰ σώματα καὶ τὰς ἀπολαύσεις ἡδονή, καὶ τίς καὶ ποία τις γίνεται καὶ διὰ τίνων, οὐκ ἄδηλον, ὥστ' οὐ τίνες εἰσὶ δεῖ ζητεῖν αὐτάς, ἀλλ' εἰ συντείνουσί τι πρὸς εὐδαιμονίαν ἢ μὴ, καὶ πῶς συντείνουσι, καὶ πότερον εἰ δεῖ προσάπτειν τῷ ζῆν καλῶς ἡδονάς τινας, ταύτας δεῖ προσάπτειν, ἢ τούτων μὲν ἄλλον τινὰ τρόπον ἀνάγκη κοινωνεῖν, ἕτεραι δ' εἰσὶν ἡδοναὶ δι' ἃς εὐλόγως οἴονται τὸν εὐδαίμονα ζῆν ἡδέως καὶ μὴ μόνον ἀλύπως.

ἀλλὰ περὶ μὲν τούτων ὕστερον ἐπισκεπτέον· περὶ δ' ἀρετῆς καὶ φρονήσεως πρῶτον θεωρήσωμεν, τὴν τε φύσιν αὐτῶν ἑκατέρου τίς ἐστὶ, καὶ πότερον μόρια ταῦτα τῆς ἀγαθῆς ζωῆς ἐστίν, ἢ αὐτὰ ἢ αἱ πράξεις αἱ ἀπ' αὐτῶν, ἐπειδὴ [1216b] προσάπτουσιν αὐτὰ κἂν εἰ μὴ πάντες εἰς τὴν εὐδαιμονίαν, ἀλλ' οὖν οἱ λόγου ἄξιοι τῶν ἀνθρώπων πάντες.

Σωκράτης μὲν οὖν ὁ πρεσβύτερος ᾤετ' εἶναι τέλος τὸ γινώσκειν τὴν ἀρετὴν, καὶ ἐπεζήτηε τί ἐστὶν ἡ δικαιοσύνη καὶ τί ἡ ἀνδρεία καὶ ἕκαστον τῶν μορίων αὐτῆς. ἐποίει γὰρ ταῦτ' εὐλόγως. ἐπιστήμας γὰρ ᾤετ' εἶναι πάσας τὰς ἀρετάς, ὥσθ' ἅμα συμβαίνειν εἰδέναι τε τὴν δικαιοσύνην καὶ εἶναι δίκαιον. ἅμα μὲν γὰρ μεμαθήκαμεν τὴν γεωμετρίαν καὶ οἰκοδομίαν καὶ ἐσμὲν οἰκοδόμοι καὶ γεωμέτραι. διόπερ ἐζήτηε τί ἐστὶν ἀρετὴ, ἀλλ' οὐ πῶς γίνεται καὶ ἐκ τίνων. τοῦτο δὲ ἐπὶ μὲν τῶν ἐπιστημῶν συμβαίνει τῶν θεωρητικῶν (οὐθὲν γὰρ ἕτερόν ἐστὶ τῆς ἀστρολογίας οὐδὲ τῆς περὶ φύσεως ἐπιστήμης οὐδὲ γεωμετρίας πλὴν τὸ γνωρίσαι καὶ θεωρῆσαι τὴν φύσιν τῶν πραγμάτων τῶν ὑποκειμένων ταῖς ἐπιστήμαις· οὐ μὴν ἀλλὰ κατὰ συμβεβηκὸς οὐθὲν κωλύει πρὸς πολλὰ τῶν ἀναγκαίων εἶναι χρησίμους αὐτάς ἡμῖν)· τῶν δὲ ποιητικῶν ἐπιστημῶν ἕτερον τὸ τέλος τῆς ἐπιστήμης καὶ γνώσεως, οἷον ὑγίεια μὲν ἰατρικῆς, εὐνομία δὲ ἢ τι τοιοῦθ' ἕτερον τῆς πολιτικῆς. καλὸν μὲν οὖν καὶ τὸ γνωρίζειν

ἕκαστον τῶν καλῶν· οὐ μὴν ἀλλὰ γε περὶ ἀρετῆς οὐ τὸ εἰδέναι τιμωτάτον τί ἐστίν, ἀλλὰ τὸ γινώσκειν ἐκ τίνων ἐστίν. οὐ γὰρ εἰδέναι βουλόμεθα τί ἐστὶν ἀνδρεία, ἀλλ' εἶναι ἀνδρεῖοι, οὐδέ τί ἐστι δικαιοσύνη, ἀλλ' εἶναι δίκαιοι, καθάπερ καὶ ὑγιαίνειν μᾶλλον ἢ γινώσκειν τί ἐστὶ τὸ ὑγιαίνειν καὶ εὖ ἔχειν τὴν ἑξὶν μᾶλλον ἢ γινώσκειν τί ἐστὶ τὸ εὖ ἔχειν.

πειρατέον δὲ περὶ πάντων τούτων ζητεῖν τὴν πίστιν διὰ τῶν λόγων, μαρτυρίοις καὶ παραδείγμασι χρώμενον τοῖς φαινομένοις. κράτιστον μὲν γὰρ πάντας ἀνθρώπους φαίνεσθαι συνομολογοῦντας τοῖς ῥηθησομένοις, εἰ δὲ μὴ, τρόπον γέ τινα πάντας, ὅπερ μεταβιβαζόμενοι ποιήσουσιν· ἔχει γὰρ ἕκαστος οἰκειὸν τι πρὸς τὴν ἀλήθειαν, ἐξ ὧν ἀναγκαῖον δεικνύναι πως περὶ αὐτῶν· ἐκ γὰρ τῶν ἀληθῶς μὲν λεγομένων οὐ σαφῶς δέ, προϊοῦσιν ἔσται καὶ τὸ σαφῶς, μεταλαμβάνουσιν ἀεὶ τὰ γνωριμώτερα τῶν εἰωθότων λέγεσθαι συγκεχυμένως. διαφέρουσι δ' οἱ λόγοι περὶ ἐκάστην μέθοδον, οἱ τε φιλοσόφως λεγόμενοι καὶ μὴ φιλοσόφως. διόπερ καὶ τῶν πολιτικῶν οὐ χρὴ νομίζειν περιέργον εἶναι τὴν τοιαύτην θεωρίαν, δι' ἧς οὐ μόνον τὸ τί φανερόν, ἀλλὰ καὶ τὸ διὰ τί. φιλόσοφον γὰρ τὸ τοιοῦτον περὶ ἐκάστην μέθοδον. δεῖται μέντοι τοῦτο πολλῆς εὐλαβείας. εἰσὶ γὰρ τινες οἱ [1217a] διὰ τὸ δοκεῖν φιλοσόφου εἶναι τὸ μηθὲν εἰκῇ λέγειν ἀλλὰ μετὰ λόγου, πολλάκις λανθάνουσι λέγοντες ἄλλοτρίους λόγους τῆς πραγματείας καὶ κενούς. τοῦτο δὲ ποιοῦσιν ὅτε μὲν δι' ἄγνοιαν, ὅτε δὲ δι' ἀλαζονείαν, ὑφ' ὧν ἀλίσκεσθαι συμβαίνει καὶ τοὺς ἐμπείρους καὶ δυναμένους πράττειν ὑπὸ τούτων τῶν μῆτ' ἐχόντων μῆτε δυναμένων διάνοιαν ἀρχιτεκτονικὴν ἢ πρακτικὴν. πάσχουσι δὲ τοῦτο δι' ἀπαιδευσίαν· ἀπαιδευσία γάρ ἐστι περὶ ἕκαστον πρᾶγμα τὸ μὴ δύνασθαι κρίνειν τοὺς τ' οἰκείους λόγους τοῦ πράγματος καὶ τοὺς ἄλλοτρίου. καλῶς δ' ἔχει καὶ τὸ χωρὶς κρίνειν τὸν τῆς αἰτίας λόγον καὶ τὸ δεικνύμενον, διὰ τε τὸ ῥηθὲν ἀρτίως, ὅτι προσέχειν οὐ δεῖ πάντα τοῖς διὰ τῶν λόγων, ἀλλὰ πολλάκις μᾶλλον τοῖς φαινομένοις (νῦν δ' ὅπότ' ἂν λύειν μὴ ἔχωσιν, ἀναγκάζονται πιστεῦειν τοῖς εἰρημένοις), καὶ διότι πολλάκις τὸ μὲν ὑπὸ τοῦ λόγου δεδειχθαι δοκοῦν ἀληθὲς μὲν ἐστίν, οὐ μέντοι διὰ ταύτην τὴν αἰτίαν δι' ἣν φησιν ὁ λόγος. ἔστι γὰρ διὰ ψεύδους ἀληθὲς δεῖξαι· δῆλον δ' ἐκ τῶν ἀναλυτικῶν.

πεπροοιμασμένων δὲ [καὶ] τούτων, λέγωμεν ἀρξάμενοι πρῶτον ἀπὸ τῶν πρώτων, ὥσπερ εἴρηται, οὐ σαφῶς λεγομένων,

ζητοῦντες ἐπὶ τὸ σαφῶς εὐρεῖν τί ἐστὶν ἡ εὐδαιμονία. ὁμολογεῖται δὴ μέγιστον εἶναι καὶ ἄριστον τοῦτο τῶν ἀγαθῶν τῶν ἀνθρωπίνων. ἀνθρώπινον δὲ λέγομεν, ὅτι τάχ' ἂν εἴη καὶ βελτιονός τινας ἄλλου τῶν ὄντων εὐδαιμονία, οἷον θεοῦ. τῶν μὲν γὰρ ἄλλων ζώων, ὅσα χεῖρω τὴν φύσιν τῶν ἀνθρώπων ἐστίν, οὐθὲν κοινωνεῖ ταύτης τῆς προσηγορίας· οὐ γὰρ ἐστὶν εὐδαίμων ἵππος οὐδ' ὄρνις οὐδ' ἰχθὺς οὐδ' ἄλλο τῶν ὄντων οὐθὲν, ὃ μὴ κατὰ τὴν ἐπωνυμίαν ἐν τῇ φύσει μετέχει θεοῦ τινός, ἀλλὰ κατ' ἄλλην τινὰ τῶν ἀγαθῶν μετοχὴν τὸ μὲν βέλτιον ζῆ τὸ δὲ χεῖρον αὐτῶν.

ἀλλ' ὅτι τοῦτον ἔχει τὸν τρόπον, ὕστερον ἐπισκεπτέον· νῦν δὲ λέγομεν ὅτι τῶν ἀγαθῶν τὰ μὲν ἐστὶν ἀνθρώπῳ πρακτὰ τὰ δ' οὐ πρακτά. τοῦτο δὲ λέγομεν οὕτως, διότι ἔνια τῶν ὄντων οὐθὲν μετέχει κινήσεως, ὥστ' οὐδὲ τῶν ἀγαθῶν· καὶ ταῦτ' ἴσως ἄριστα τὴν φύσιν ἐστίν. ἔνια δὲ πρακτὰ μὲν, ἀλλὰ πρακτὰ κρείττοσιν ἡμῶν. ἐπειδὴ δὲ διχῶς λέγεται τὸ πρακτόν (καὶ γὰρ ὧν ἕνεκα πράττομεν καὶ ἃ τούτων ἕνεκα μετέχει πράξεως, οἷον καὶ τὴν ὑγίειαν καὶ τὸν πλοῦτον τίθεμεν τῶν πρακτῶν, καὶ τὰ τούτων πραττόμενα χάριν, τὰ θ' ὑγιεινὰ καὶ τὰ χρηματιστικά), δηλὸν ὅτι καὶ τὴν εὐδαιμονίαν τῶν ἀνθρώπῳ πρακτῶν ἄριστον θετέον.

[1217b] σκεπτέον τοίνυν τί τὸ ἄριστον, καὶ λέγεται ποσαχῶς. ἐν τρισὶ δὴ μάλιστα φαίνεται δόξαις εἶναι τοῦτο. φασὶ γὰρ ἄριστον μὲν εἶναι πάντων αὐτὸ τὸ ἀγαθόν, αὐτὸ δ' εἶναι τὸ ἀγαθὸν ᾧ ὑπάρχει τό τε πρῶτῳ εἶναι τῶν ἀγαθῶν καὶ τὸ αἰτίῳ τῇ παρουσίᾳ τοῖς ἄλλοις τοῦ ἀγαθοῦ εἶναι. ταῦτα δ' ὑπάρχειν ἀμφοτέρω τῇ ιδέᾳ τοῦ ἀγαθοῦ. λέγω δὲ ἀμφοτέρω τό τε πρῶτον τῶν ἀγαθῶν καὶ τὸ τοῖς ἄλλοις αἰτίον ἀγαθοῖς τῇ παρουσίᾳ τοῦ ἀγαθοῦ εἶναι. μάλιστα γὰρ τὰ ἀγαθὸν λέγεσθαι κατ' ἐκείνης ἀληθείας (κατὰ μετοχὴν γὰρ καὶ ὁμοιότητα τὰλλα ἀγαθὰ ἐκείνης εἶναι), καὶ πρῶτον τῶν ἀγαθῶν· ἀναιρουμένου γὰρ τοῦ μετεχομένου ἀναιρεῖσθαι καὶ τὰ μετέχοντα τῆς ιδέας, ἃ λέγεται τῷ μετέχειν ἐκείνης, τὸ δὲ πρῶτον τοῦτον ἔχειν τὸν τρόπον πρὸς τὸ ὕστερον. ὥστ' εἶναι αὐτὸ τὸ ἀγαθὸν τὴν ιδέαν τοῦ ἀγαθοῦ· καὶ γὰρ χωριστὴν εἶναι τῶν μετεχόντων, ὥσπερ καὶ τὰς ἄλλας ιδέας.

ἔστι μὲν οὖν τὸ διασκοπεῖν περὶ ταύτης τῆς δόξης ἐτέρας τε διατριβῆς καὶ τὰ πολλὰ λογικώτερας ἐξ ἀνάγκης (οἱ γὰρ ἅμα ἀναιρετικοί τε καὶ κοινοὶ λόγοι κατ' οὐδεμίαν εἰσὶν ἄλλην ἐπιστήμην)· εἰ δὲ δεῖ συντόμως εἰπεῖν περὶ αὐτῶν, λέγομεν ὅτι πρῶτον μὲν τὸ εἶναι ιδέαν μὴ μόνον ἀγαθοῦ ἀλλὰ καὶ ἄλλου ὁτουοῦν

λέγεται λογικῶς καὶ κενῶς. ἐπέσκεπται δὲ πολλοῖς περὶ αὐτοῦ τρόποις καὶ ἐν τοῖς ἐξωτερικοῖς λόγοις καὶ ἐν τοῖς κατὰ φιλοσοφίαν. - ἔπειτ' εἰ καὶ ὅτι μάλιστ' εἰσὶν αἱ ιδέαι καὶ ἀγαθοῦ ιδέα, μὴ ποτ' οὐδὲ χρήσιμος πρὸς ζωὴν ἀγαθὴν οὐδὲ πρὸς τὰς πράξεις. - πολλαχῶς γὰρ λέγεται καὶ ἰσαχῶς τῷ ὄντι τὸ ἀγαθόν. τό τε γὰρ ὄν, ὥσπερ ἐν ἄλλοις διήρηται, σημαίνει τὸ μὲν τί ἐστί, τὸ δὲ ποιόν, τὸ δὲ ποσόν, τὸ δὲ πότε, καὶ πρὸς τούτοις τὸ μὲν ἐν τῷ κινεῖσθαι τὸ δὲ ἐν τῷ κινεῖν, καὶ τὸ ἀγαθὸν ἐν ἐκάστη τῶν πτώσεών ἐστι τούτων, ἐν οὐσίᾳ μὲν ὁ νοῦς καὶ ὁ θεός, ἐν δὲ τῷ ποιῶ τὸ δίκαιον, ἐν δὲ τῷ ποσῷ τὸ μέτριον, ἐν δὲ τῷ πότε ὁ καιρός, τὸ δὲ διδάσκον καὶ τὸ διδασκόμενον περὶ κίνησιν. ὥσπερ οὖν οὐδὲ τὸ ὄν ἐν τί ἐστι περὶ τὰ εἰρημένα, οὕτως οὐδὲ τὸ ἀγαθόν, οὐδὲ ἐπιστήμη ἐστί μία οὔτε τοῦ ὄντος οὔτε τοῦ ἀγαθοῦ. ἀλλ' οὐδὲ τὰ ὁμοιοσχημόνως λεγόμενα ἀγαθὰ μιᾶς ἐστι θεωρῆσαι, οἷον τὸν καιρὸν ἢ τὸ μέτριον, ἀλλ' ἑτέρα ἕτερον καιρὸν θεωρεῖ καὶ ἑτέρα ἕτερον μέτριον, οἷον περὶ τροφὴν μὲν τὸν καιρὸν καὶ τὸ μέτριον ἰατρικὴ καὶ γυμναστική, περὶ δὲ τὰς πολεμικὰς πράξεις στρατηγία, καὶ οὕτως ἑτέρα περὶ ἑτέραν πράξις, ὥστε [1218a] σχολῇ αὐτό γε τὸ ἀγαθὸν θεωρῆσαι μιᾶς. - ἔτι ἐν ὅσοις ὑπάρχει τὸ πρότερον καὶ ὕστερον, οὐκ ἔστι κοινόν τι παρὰ ταῦτα, καὶ τοῦτο χωριστόν. εἴη γὰρ ἂν τι τοῦ πρώτου πρότερον· πρότερον γὰρ τὸ κοινὸν καὶ χωριστόν διὰ τὸ ἀναιρουμένου τοῦ κοινοῦ ἀναιρεῖσθαι τὸ πρῶτον. οἷον εἰ τὸ διπλάσιον πρῶτον τῶν πολλαπλασίων, οὐκ ἐνδέχεται τὸ πολλαπλάσιον τὸ κοινῇ κατηγορούμενον εἶναι χωριστόν· ἔσται γὰρ τοῦ διπλασίου πρότερον. . - εἰ συμβαίνει τὸ κοινὸν εἶναι τὴν ιδέαν, οἷον εἰ χωριστόν ποιήσειέ τις τὸ κοινόν. εἰ γὰρ ἐστι δικαιοσύνη ἀγαθόν, καὶ ἀνδρεία. ἔστι τοίνυν, φασίν, αὐτό τι ἀγαθόν. τὸ οὖν αὐτὸ πρόσκειται πρὸς τὸν λόγον τὸν κοινόν. τοῦτο δὲ τί ἂν εἴη πλην ὅτι αἰδίδιον καὶ χωριστόν; ἀλλ' οὐθὲν μᾶλλον λευκὸν τὸ πολλὰς ἡμέρας λευκὸν τοῦ μίαν ἡμέραν· ὥστ' οὐδὲ <τὸ ἀγαθὸν μᾶλλον ἀγαθὸν τῷ αἰδίδιον εἶναι· οὐδὲ> δὴ τὸ κοινὸν ἀγαθὸν ταῦτο τῇ ιδέᾳ· πᾶσι γὰρ ὑπάρχει <τὸ> κοινόν. - ἀνάπαλιν δὲ καὶ δεικτέον ἢ ὡς νῦν δεικνύουσι τὸ ἀγαθὸν αὐτό. νῦν μὲν γὰρ ἐκ τῶν ἀνομολογουμένων ἔχειν τὸ ἀγαθόν, ἐξ ἐκείνων τὰ ὁμολογούμενα εἶναι ἀγαθὰ δεικνύουσιν, ἐξ ἀριθμῶν, ὅτι ἡ δικαιοσύνη καὶ ἡ ὑγίεια ἀγαθόν· τάξεις γὰρ καὶ ἀριθμοί, ὡς τοῖς ἀριθμοῖς καὶ ταῖς μονάσιν ἀγαθὸν ὑπάρχον διὰ τὸ εἶναι τὸ ἐν αὐτὸ ἀγαθόν. δεῖ δ' ἐκ τῶν ὁμολογουμένων, οἷον ὑγείας ἰσχύος σωφροσύνης, ὅτι καὶ ἐν τοῖς ἀκινήτοις μᾶλλον τὸ καλόν.

πάντα γὰρ τάδε τάξις καὶ ἡρεμία· εἰ ἄρα, ἐκεῖνα μᾶλλον· ἐκείνοις γὰρ ὑπάρχει ταῦτα μᾶλλον. - παράβολος δὲ καὶ ἡ ἀπόδειξις ὅτι τὸ ἐν αὐτὸ τὸ ἀγαθόν, ὅτι οἱ ἀριθμοὶ ἐφίενται· οὔτε γὰρ ὡς ἐφίενται λέγονται φανερώς, ἀλλὰ λίαν ἀπλῶς τοῦτο φασί, καὶ ὁρεξίν εἶναι πῶς ἂν τις ὑπολάβοι ἐν οἷς ζωὴ μὴ ὑπάρχει· δεῖ δὲ περὶ τούτου πραγματευθῆναι, καὶ μὴ ἀξιοῦν μηθὲν ἀλόγως, ἃ καὶ μετὰ λόγου πιστεῦσαι οὐ ῥάδιον. - τό τε φάναι πάντα τὰ ὄντα ἐφίεσθαι ἐνός τινος ἀγαθοῦ οὐκ ἀληθές· ἕκαστον γὰρ ἰδίου ἀγαθοῦ ὁρέγεται, ὁφθαλμὸς ὄψεως, σῶμα ὑγείας, οὕτως ἄλλο ἄλλου.

ὅτι μὲν οὖν οὐκ ἔστιν αὐτὸ τι ἀγαθόν, ἔχει ἀπορίας τοιαύτας, καὶ ὅτι οὐ χρήσιμον τῇ πολιτικῇ, ἀλλ' ἰδιόν τι ἀγαθόν, ὥσπερ καὶ ταῖς ἄλλαις, οἷον γυμναστικῇ εὐεξία [ἔτι καὶ τὸ ἐν τῷ λόγῳ γεγραμμένον· ἢ γὰρ οὐδεμιᾷ χρήσιμον αὐτὸ τὸ τοῦ ἀγαθοῦ εἶδος ἢ πάσαις ὁμοίως· ἔτι οὐ πρακτόν]· ὁμοίως δ' οὐδὲ τὸ κοινὸν ἀγαθὸν οὔτε αὐτὸ ἀγαθόν [1218b] ἐστι (καὶ γὰρ ἂν μικρῷ ὑπάρξαι ἀγαθῷ) οὔτε πρακτόν. οὐ γὰρ ὅπως ὑπάρξει τὸ ὀφθεῖν ὑπάρχον ἢ ἱατρικὴ πραγματεύεται, ἀλλ' ὅπως ὑγίεια. ὁμοίως δὲ καὶ τῶν ἄλλων τεχνῶν ἐκάστη. ἀλλὰ πολλαχῶς τὸ ἀγαθόν, καὶ ἔστι τι αὐτοῦ καλόν, καὶ τὸ μὲν πρακτόν τὸ δ' οὐ πρακτόν. πρακτόν δὲ τὸ τοιοῦτον ἀγαθόν, τὸ οὗ ἕνεκα. οὐκ ἔστι δὲ τὸ ἐν τοῖς ἀκινήτοις.

φανερόν ὅτι οὔτε ἡ ἰδέα τἀγαθοῦ τὸ ζητούμενον αὐτὸ τὸ ἀγαθὸν ἐστίν, οὔτε τὸ κοινόν (τὸ μὲν γὰρ ἀκίνητον καὶ οὐ πρακτόν, τὸ δὲ κινήτὸν μὲν ἀλλ' οὐ πρακτόν)· τὸ δ' οὗ ἕνεκα ὡς τέλος ἄριστον καὶ αἴτιον τῶν ὑφ' αὐτὸ καὶ πρῶτον πάντων. ὥστε τοῦτ' ἂν εἴη αὐτὸ τὸ ἀγαθὸν τὸ τέλος τῶν ἀνθρώπων πρακτῶν. τοῦτο δ' ἐστὶ τὸ ὑπὸ τὴν κυρίαν πασῶν. αὕτη δ' ἐστὶ πολιτικὴ καὶ οἰκονομικὴ καὶ φρόνησις. διαφέρουσι γὰρ αὗται αἱ ἕξεις πρὸς τὰς ἄλλας τῷ τοιαῦται εἶναι· πρὸς δ' ἀλλήλας εἴ τι διαφέρουσιν, ὕστερον λεκτέον. ὅτι δ' αἴτιον τὸ τέλος τοῖς ὑφ' αὐτό, δηλοῖ ἡ διδασκαλία. ὀρισάμενοι γὰρ τὸ τέλος τᾶλλα δεικνύουσιν, ὅτι ἕκαστον αὐτῶν ἀγαθόν· αἴτιον γὰρ τὸ οὗ ἕνεκα. οἷον ἐπειδὴ τὸ ὑγιαίνειν τοδί, ἀνάγκη τότε εἶναι τὸ συμφέρον πρὸς αὐτήν· τὸ δ' ὑγιεινὸν τῆς ὑγείας αἴτιον ὡς κινήσαν, καὶ τότε τοῦ εἶναι ἀλλ' οὐ τοῦ ἀγαθὸν εἶναι τὴν ὑγίειαν. ἔτι οὐδὲ δείκνυσιν οὐθεις ὅτι ἀγαθὸν ἢ ὑγίεια, ἂν μὴ σοφιστὴς ἢ καὶ μὴ ἱατρός (οὗτοι γὰρ τοῖς ἀλλοτριόις λόγοις σοφίζονται), ὥσπερ οὐδ' ἄλλην ἀρχὴν οὐδεμίαν.

τὸ δ' ὡς τέλος ἀγαθὸν ἀνθρώπῳ καὶ τὸ ἄριστον τῶν πρακτῶν,

σκεπτέον ποσαχῶς τὸ ἄριστον πάντων, ἐπειδὴ τοῦτο ἄριστον, μετὰ ταῦτα ἄλλην λαβοῦσιν ἀρχήν.

Βιβλίο 2

μετὰ δὲ ταῦτ' ἄλλην λαβοῦσιν ἀρχὴν περὶ τῶν ἐπομένων λεκτέον. πάντα δὴ τὰ ἀγαθὰ ἢ ἐκτὸς ἢ <ἐν> ψυχῇ, καὶ τούτων αἰρετώτερα τὰ ἐν τῇ ψυχῇ, καθάπερ διαιρούμεθα καὶ ἐν τοῖς ἐξωτερικοῖς λόγοις· φρόνησις γὰρ καὶ ἀρετὴ καὶ ἡδονὴ ἐν ψυχῇ, ὧν ἡ ἓνια ἢ πάντα τέλος εἶναι δοκεῖ πᾶσιν. τῶν δὲ ἐν ψυχῇ τὰ μὲν ἕξεις ἢ δυνάμεις εἰσὶ, τὰ δ' ἐνέργειαι καὶ κινήσεις.

ταῦτα δὴ οὕτως ὑποκείσθω καὶ περὶ ἀρετῆς, ὅτι ἐστὶν ἡ βελτίστη διάθεσις ἢ ἕξις ἢ δυνάμεις ἐκάστων, ὅσων ἐστὶ [1219a] τις χρῆσις ἢ ἔργον. δηλὸν δ' ἐκ τῆς ἐπαγωγῆς. ἐπὶ πάντων γὰρ οὕτω τίθεμεν. οἷον ἱματίου ἀρετὴ ἐστίν· καὶ γὰρ ἔργον τι καὶ χρῆσις ἐστίν· καὶ ἡ βελτίστη ἕξις τοῦ ἱματίου ἀρετὴ ἐστίν. ὁμοίως δὲ καὶ πλοίου καὶ οἰκίας καὶ τῶν ἄλλων. ὥστε καὶ ψυχῆς· ἔστι γὰρ τι ἔργον αὐτῆς. καὶ τῆς βελτίονος δὴ ἕξεως ἔστω βέλτιον τὸ ἔργον· καὶ ὡς ἔχουσιν. αἱ ἕξεις πρὸς ἀλλήλας, οὕτω καὶ τὰ ἔργα τὰ ἀπὸ τούτων πρὸς ἀλλήλα ἐχέτω. καὶ τέλος ἐκάστου τὸ ἔργον. - φανερόν τοίνυν ἐκ τούτων ὅτι βέλτιον τὸ ἔργον τῆς ἕξεως· τὸ γὰρ τέλος ἄριστον ὡς τέλος· ὑπόκειται γὰρ τέλος τὸ βέλτιστον καὶ τὸ ἐσχατον, οὗ ἕνεκα τᾶλλα πάντα. ὅτι μὲν τοίνυν τὸ ἔργον βέλτιον τῆς ἕξεως καὶ τῆς διαθέσεως, δηλὸν· ἀλλὰ τὸ ἔργον λέγεται διχῶς. τῶν μὲν γὰρ ἐστὶν ἕτερόν τι τὸ ἔργον παρὰ τὴν χρῆσιν, οἷον οἰκοδομικῆς οἰκία ἀλλ' οὐκ οἰκοδόμησις καὶ ἱατρικῆς ὑγίεια ἀλλ' οὐχ ὑγίανσις οὐδ' ἰατρευσις, τῶν δ' ἡ χρῆσις ἔργον, οἷον ὄψεως ὄρασις καὶ μαθηματικῆς ἐπιστήμης θεωρία. ὥστ' ἀνάγκη, ὧν ἔργον ἢ χρῆσις, τὴν χρῆσιν βέλτιον εἶναι τῆς ἕξεως. - τούτων δὲ τοῦτον τὸν τρόπον διωρισμένων, λέγομεν ὅτι <ταὐτὸ> τὸ ἔργον τοῦ πράγματος καὶ τῆς ἀρετῆς, ἀλλ' οὐχ ὡσαύτως. οἷον σκυτοτομικῆς καὶ σκυτεύσεως ὑπόδημα· εἰ δὴ τίς ἐστὶν ἀρετὴ σκυτικῆς καὶ σπουδαίου σκυτέως, τὸ ἔργον ἐστὶ σπουδαῖον ὑπόδημα. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων. - ἔτι ἔστω ψυχῆς ἔργον τὸ ζῆν ποιεῖν, τοῦ δὲ χρῆσις καὶ ἐγρήγορσις· ὁ γὰρ ὕπνος ἀργία τις καὶ ἡσυχία. ὥστ' ἐπεὶ τὸ ἔργον ἀνάγκη ἐν καὶ ταὐτὸ εἶναι τῆς ψυχῆς καὶ τῆς ἀρετῆς, ἔργον ἂν εἴη τῆς ἀρετῆς ζωὴ σπουδαία. τοῦτ' ἄρα ἐστὶ τὸ τέλεον ἀγαθόν, ὅπερ ἦν ἡ εὐδαιμονία. δηλὸν δὲ ἐκ τῶν ὑποκειμένων (ἦν μὲν γὰρ ἡ εὐδαιμονία τὸ ἄριστον, τὰ δὲ τέλη ἐν ψυχῇ καὶ τὰ ἄριστα τῶν

ἀγαθῶν, αὐτὴ δὲ ἢ ἕξις ἢ ἐνέργεια), ἐπεὶ βέλτιον ἢ ἐνέργεια τῆς διαθέσεως καὶ τῆς βελτίστης ἕξεως ἢ βελτίστη ἐνέργεια, ἢ δ' ἀρετὴ βελτίστη ἕξις, τῆς ἀρετῆς ἐνέργειαν τῆς ψυχῆς ἄριστον εἶναι. ἦν δὲ καὶ ἡ εὐδαιμονία τὸ ἄριστον. ἔστιν ἄρα ἡ εὐδαιμονία ψυχῆς ἀγαθῆς ἐνέργεια. ἐπεὶ δὲ ἦν ἡ εὐδαιμονία τέλεόν τι, καὶ ἔστι ζωὴ καὶ τελέα καὶ ἀτελής, καὶ ἀρετὴ ὡσαύτως (ἡ μὲν γὰρ ὅλη, ἡ δὲ μόριον), ἡ δὲ τῶν ἀτελῶν ἐνέργεια ἀτελής, εἴη ἂν ἡ εὐδαιμονία ζωῆς τελείας ἐνέργεια κατ' ἀρετὴν τελείαν.

ὅτι δὲ τὸ γένος καὶ τὸν ὅρον αὐτῆς λέγομεν καλῶς, μαρτύρια [1219b] τὰ δοκοῦντα πᾶσιν ἡμῖν. τό τε γὰρ εὖ πράττειν καὶ τὸ εὖ ζῆν τὸ αὐτὸ τῷ εὐδαιμονεῖν, ὧν ἕκαστον χρησίς ἐστι καὶ ἐνέργεια, καὶ ἡ ζωὴ καὶ ἡ πρᾶξις (καὶ γὰρ ἡ πρακτικὴ χρηστικὴ ἐστίν· ὁ μὲν γὰρ χαλκεὺς ποιεῖ χαλινόν, χρῆται δ' ὁ ἵππικός) καὶ τὸ μήτε μίαν ἡμέραν εἶναι εὐδαίμονα μήτε παῖδα μήθ' ἡλικίαν πᾶσαν (διὸ καὶ τὸ Σόλωνος ἔχει καλῶς, τὸ μὴ ζῶντ' εὐδαιμονίζειν, ἀλλ' ὅταν λάβῃ τέλος· οὐθὲν γὰρ ἀτελὲς εὐδαίμων· οὐ γὰρ ὅλον)· ἔτι δ' οἱ ἔπαινοι τῆς ἀρετῆς διὰ τὰ ἔργα, καὶ τὰ ἐγκώμια τῶν ἔργων· καὶ στεφανοῦνται οἱ νικῶντες, ἀλλ' οὐχ οἱ δυνάμενοι νικᾶν, μὴ νικῶντες δέ· καὶ τὸ κρίνειν ἐκ τῶν ἔργων ὁποῖός τις ἐστίν· ἔτι διὰ τί ἡ εὐδαιμονία οὐκ ἐπαινεῖται; ὅτι διὰ ταύτην τᾶλλα, ἢ τῷ εἰς ταύτην ἀναφέρεσθαι ἢ τῷ μόρια εἶναι αὐτῆς. διὸ ἕτερον εὐδαιμονισμὸς καὶ ἔπαινος καὶ ἐγκώμιον. τὸ μὲν γὰρ ἐγκώμιον λόγος τοῦ καθ' ἕκαστον ἔργου· ὁ δ' ἔπαινος τοιοῦτον εἶναι καθόλου· ὁ δ' εὐδαιμονισμὸς τέλους. - καὶ τὸ ἀπορούμενον δ' ἐνίστε δῆλον ἐκ τούτων, διὰ τί ποτ' οὐθὲν βελτίους οἱ σπουδαῖοι τῶν φαύλων τὸν ἡμισυν τοῦ βίου· ὅμοιοι γὰρ καθεύδοντες πάντες. αἴτιον δ' ὅτι ἀργία ψυχῆς ὁ ὕπνος, ἀλλ' οὐκ ἐνέργεια. διὸ καὶ ἄλλο εἴ τι μόριόν ἐστι ψυχῆς, οἷον τὸ θρεπτικόν, ἢ τούτου ἀρετὴ οὐκ ἔστι μόριον τῆς ὅλης ἀρετῆς, ὥσπερ οὐδ' ἡ τοῦ σώματος· ἐν τῷ ὕπνῳ γὰρ μᾶλλον ἐνεργεῖ τὸ θρεπτικόν, τὸ δ' αἰσθητικόν καὶ ὀρεκτικόν ἀτελεῖ ἐν τῷ ὕπνῳ. ὅσον δὲ τοῦ πη κινεῖσθαι μετέχουσι, καὶ αἱ φαντασίαι βελτίους αἱ τῶν σπουδαίων, ἐὰν μὴ διὰ νόσον ἢ πῆρωσιν.

μετὰ ταῦτα περὶ ψυχῆς θεωρητέον· ἡ γὰρ ἀρετὴ ψυχῆς, οὐ κατὰ συμβεβηκός. ἐπεὶ δ' ἀνθρωπίνην ἀρετὴν ζητοῦμεν, ὑποκείσθω δύο μέρη ψυχῆς τὰ λόγου μετέχοντα, οὐ τὸν αὐτὸν δὲ τρόπον μετέχειν λόγου ἅμφω, ἀλλὰ τὸ μὲν τῷ ἐπιτάττειν, τὸ δὲ τῷ πειθεσθαι καὶ ἀκούειν πεφυκέναι· εἰ δέ τί ἐστιν ἐτέρως ἄλογον, ἀφείσθω τοῦτο τὸ μόριον. διαφέρει δ' οὐδὲν οὗτ' εἰ μεριστὴ ἢ ψυχὴ οὗτ' εἰ ἀμερῆς,

ἔχει μέντοι δυνάμεις διαφόρους καὶ τὰς εἰρημένας, ὥσπερ ἐν τῷ καμπύλῳ τὸ κοῖλον καὶ τὸ κυρτὸν ἀδιαχώριστον, καὶ τὸ εὐθὺ καὶ τὸ λευκόν· καίτοι τὸ εὐθὺ οὐ λευκόν, ἀλλὰ κατὰ συμβεβηκὸς καὶ οὐκ οὐσία τοῦ αὐτοῦ. - ἀφήρηται δὲ καὶ εἴ τι ἄλλο ἐστὶ μέρος ψυχῆς, οἷον τὸ φυτικόν. ἀνθρωπίνης γὰρ ψυχῆς τὰ εἰρημένα μόρια ἴδια· διὸ οὐδ' αἱ ἀρεταὶ αἱ τοῦ θρεπτικοῦ καὶ αὐξητικοῦ ἀνθρώπου· δεῖ γὰρ, εἰ ἡ ἄνθρωπος, λογισμὸν ἐνεῖναι [καὶ] ἀρχὴν καὶ πρᾶξιν, [1220a] ἄρχει δ' ὁ λογισμὸς οὐ λογισμοῦ ἀλλ' ὀρέξεως καὶ παθημάτων, ἀνάγκη ἄρα ταῦτ' ἔχειν τὰ μέρη. καὶ ὥσπερ ἡ εὐεξία σύγκειται ἐκ τῶν κατὰ μόριον ἀρετῶν, οὕτω καὶ ἡ τῆς ψυχῆς ἀρετὴ ἡ τέλος.

ἀρετῆς δ' εἶδη δύο, ἡ μὲν ἠθικὴ ἡ δὲ διανοητικὴ. ἐπαινοῦμεν γὰρ οὐ μόνον τοὺς δικαίους ἀλλὰ καὶ τοὺς συνετοὺς καὶ τοὺς σοφοὺς· ἐπαινετὸν γὰρ ὑπέκειτο ἡ ἀρετὴ ἢ τὸ ἔργον, ταῦτα δ' οὐκ ἐνεργεῖ, ἀλλ' εἰσὶν αὐτῶν ἐνέργειαι. ἐπεὶ δ' αἱ διανοητικαὶ μετὰ λόγου, αἱ μὲν τοιαῦται τοῦ λόγον ἔχοντος, ὃ ἐπιτακτικόν ἐστι τῆς ψυχῆς ἢ λόγον ἔχει, αἱ δ' ἠθικαὶ τοῦ ἀλόγου μὲν, ἀκολουθητικοῦ δὲ κατὰ φύσιν τῷ λόγον ἔχοντι· οὐ γὰρ λέγομεν ποῖός τις τὸ ἦθος, ὅτι σοφὸς ἢ δεινός, ἀλλ' ὅτι πρᾶος ἢ θρασύς.

μετὰ ταῦτα σκεπτέον πρῶτον περὶ ἀρετῆς ἠθικῆς, τί ἐστὶ, καὶ ποῖα μόρια αὐτῆς (εἰς τοῦτο γὰρ ἀνήκται), καὶ γίνεται διὰ τίνων. δεῖ δὴ ζητεῖν ὥσπερ ἐν τοῖς ἄλλοις ἔχοντές τι ζητοῦσι πάντες, ὥστε αἰετὰ διὰ τῶν ἀληθῶς μὲν λεγομένων οὐ σαφῶς δὲ πειραῖσθαι λαβεῖν καὶ τὸ ἀληθῶς καὶ σαφῶς. νῦν γὰρ ὁμοίως ἔχομεν ὥσπερ ἂν εἰ καὶ ὑγίειαν, ὅτι ἡ ἀρίστη διάθεσις τοῦ σώματος, καὶ Κορίσκος ὁ τῶν ἐν τῇ ἀγορᾷ μελάντατος· τί μὲν γὰρ ἐκάτερον τούτων οὐκ ἴσμεν, πρὸς μέντοι τὸ εἰδέναι τί ἐκάτερον αὐτῆς πρὸ ἔργου τὸ οὕτως ἔχειν. - ὑποκείσθω δὴ πρῶτον ἡ βελτίστη διάθεσις ὑπὸ τῶν βελτίστων γίνεσθαι, καὶ πράττεσθαι ἄριστα περὶ ἕκαστον ἀπὸ τῆς ἐκάστου ἀρετῆς, οἷον πόνοι τε ἄριστοι καὶ τροφή ἀφ' ὧν γίνεται εὐεξία, καὶ ἀπὸ τῆς εὐεξίας πονοῦσιν ἄριστα· ἔτι πᾶσαν διάθεσιν ὑπὸ τῶν αὐτῶν γίνεσθαι καὶ φθειρεσθαι πῶς προσφερομένων, ὥσπερ ὑγίεια ὑπὸ τροφῆς καὶ πόνων καὶ ὥρας. ταῦτα δὲ δῆλα ἐκ τῆς ἐπαγωγῆς. καὶ ἡ ἀρετὴ ἄρα ἡ τοιαύτη διάθεσις ἐστίν, ἡ γίνεται τε ὑπὸ τῶν ἀρίστων περὶ ψυχὴν κινήσεων καὶ ἀφ' ἧς πράττεται τὰ ἄριστα τῆς ψυχῆς ἔργα καὶ πάθη, καὶ ὑπὸ τῶν αὐτῶν πῶς μὲν γίνεται, πῶς δὲ φθείρεται, καὶ πρὸς ταῦτα ἡ χρῆσις αὐτῆς ὑφ' ὧν καὶ αὐξεται καὶ φθείρεται, πρὸς ἃ βέλτιστα διατίθησιν. σημεῖον δ' ὅτι περὶ ἡδέα καὶ λυπηρὰ καὶ ἡ

ἀρετὴ καὶ ἡ κακία· αἱ γὰρ κολάσεις ἰατρεῖαι οὖσαι καὶ γινόμεναι διὰ τῶν ἐναντίων, καθάπερ ἐπὶ τῶν ἄλλων, διὰ τούτων εἰσὶν.

ὅτι μὲν τοίνυν ἡ ἠθικὴ ἀρετὴ περὶ ἡδέα καὶ λυπηρά ἐστι, δῆλον· ἐπεὶ δ' ἐστὶ τὸ ἥθος, ὥσπερ καὶ τὸ ὄνομα σημαίνει [1220b] ὅτι ἀπὸ ἔθους ἔχει τὴν ἐπίδοσιν, ἐθίζεται δὲ τὸ ὑπ' ἀγωγῆς μὴ ἐμφύτου τῷ πολλάκις κινεῖσθαι πῶς, οὕτως ἤδη τὸ ἐνεργητικόν, ὃ ἐν τοῖς ἀψύχοις οὐχ ὀρῶμεν (οὐδὲ γὰρ ἂν μυριάκις ρίψῃς ἄνω τὸν λίθον, οὐδέποτε ποιήσει τοῦτο μὴ βία), διὸ ἔστω <τὸ> ἥθος τοῦτο ψυχῆς κατὰ ἐπιτακτικὸν λόγον <τοῦ ἀλόγου μὲν,> δυναμένου δ' ἀκολουθεῖν τῷ λόγῳ ποιότης. λεκτέον δὴ κατὰ τί τῆς ψυχῆς ποιότης τὰ ἦθη. ἔστι δὲ κατὰ τε τὰς δυνάμεις τῶν παθημάτων, καθ' ἃς ὡς παθητικοὶ λέγονται, καὶ κατὰ τὰς ἕξεις, καθ' ἃς πρὸς τὰ πάθη ταῦτα λέγονται τῷ πάσχειν πῶς ἢ ἀπαθεῖς εἶναι. μετὰ ταῦτα ἡ διαίρεσις ἐν τοῖς ἀπηλλαγμένοις τῶν παθημάτων καὶ τῶν δυνάμεων καὶ τῶν ἕξεων. λέγω δὲ πάθη μὲν τὰ τοιαῦτα, θυμὸν φόβον αἰδῶ ἐπιθυμίαν, ὅλως οἷς ἔπεται ὡς ἐπὶ τὸ πολὺ ἡ αἰσθητικὴ ἡδονὴ ἢ λύπη καθ' αὐτά. καὶ κατὰ μὲν ταῦτα οὐκ ἔστι ποιότης, ἀλλὰ πάσχει, κατὰ δὲ τὰς δυνάμεις ποιότης. λέγω δὲ [τὰς] δυνάμεις καθ' ἃς λέγονται κατὰ τὰ πάθη οἱ ἐνεργοῦντες, οἷον ὀργίλος ἀνάλγητος ἐρωτικὸς αἰσχυνηλὸς ἀναίσχυντος. ἕξεις δὲ εἰσιν ὅσαι αἰτιαὶ εἰσι τοῦ ταῦτα ἢ κατὰ λόγον ὑπάρχειν ἢ ἐναντίως, οἷον ἀνδρεία σωφροσύνη δειλία ἀκολασία.

διωρισμένων δὲ τούτων, ληπτέον ὅτι ἐν ἅπαντι συνεχεῖ καὶ διαιρετῷ ἐστὶν ὑπεροχὴ καὶ ἔλλειψις καὶ μέσον, καὶ ταῦτα ἢ πρὸς ἄλληλα ἢ πρὸς ἡμᾶς, οἷον ἐν γυμναστικῇ, ἐν ἱατρικῇ, ἐν οἰκοδομικῇ, ἐν κυβερνητικῇ, καὶ ἐν ὁποιοῦν πράξει, καὶ ἐπιστημονικῇ καὶ ἀνεπιστημονικῇ, καὶ τεχνικῇ καὶ ἀτέχνῳ. ἡ μὲν γὰρ κίνησις συνεχές, ἡ δὲ πρᾶξις κίνησις. ἐν πᾶσι δὲ τὸ μέσον τὸ πρὸς ἡμᾶς βέλτιστον· τοῦτο γὰρ ἐστὶν ὡς ἡ ἐπιστήμη κελεύει καὶ ὁ λόγος. πανταχοῦ δὲ τοῦτο καὶ ποιεῖ τὴν βελτίστην ἕξιν. καὶ τοῦτο δῆλον διὰ τῆς ἐπαγωγῆς καὶ τοῦ λόγου. τὰ γὰρ ἐναντία φθείρει ἄλληλα· τὰ δ' ἄκρα καὶ ἀλλήλοις καὶ τῷ μέσῳ ἐναντία. τὸ γὰρ μέσον ἐκάτερον πρὸς ἐκάτερον ἐστίν, οἷον τὸ ἴσον τοῦ μὲν ἐλάττονος μεῖζον, τοῦ μεῖζονος δὲ ἔλαττον. ὥστ' ἀνάγκη τὴν ἠθικὴν ἀρετὴν περὶ μέσ' ἅττα εἶναι καὶ μεσότητα τινά. ληπτέον ἄρα ἡ ποῖα μεσότης ἀρετὴ, καὶ περὶ ποῖα μέσα. εἰλήφθω δὴ παραδείγματος χάριν, καὶ θεωρεῖσθω ἕκαστον ἐκ τῆς ὑπογραφῆς.

τὰ μὲν πάθη ταῦτα καὶ τοιαῦτα συμβαίνει ταῖς ψυχαῖς, πάντα δὲ λέγεται τὰ μὲν τῷ ὑπερβάλλειν τὰ δὲ τῷ ἐλλείπειν. ὀργίλος μὲν γὰρ ἐστὶν ὁ μᾶλλον ἢ δεῖ ὀργιζόμενος καὶ θάπτον καὶ πλείοσιν ἢ οἷς δεῖ, ἀνάλγητος δὲ ὁ ἐλλείπων καὶ οἷς καὶ ὅτε καὶ ὥς· καὶ θρασύς μὲν ὁ μήτε ἄ χρη φοβούμενος μήθ' ὅτε μήθ' ὥς, δειλὸς δὲ ὁ καὶ ἄ μὴ δεῖ καὶ ὅτ' οὐ δεῖ καὶ ὥς οὐ δεῖ· ὁμοίως δὲ καὶ [ὁ] ἀκόλαστος καὶ ὁ ἐπιθυμητικὸς καὶ ὁ υπερβάλλων πᾶσιν ὅσοις ἐνδέχεται, ἀναισθητος δὲ ὁ ἐλλείπων καὶ μηδ' ὅσον βέλτιον καὶ κατὰ τὴν φύσιν ἐπιθυμῶν, ἀλλ' ἀπαθὴς ὥσπερ λίθος· κερδαλέος δὲ ὁ πανταχόθεν πλεονεκτικὸς, ζημιώδης δὲ ὁ μηδαμόθεν, ἀλλ' ὀλιγαχόθεν· ἀλαζὼν δὲ ὁ πλείω τῶν ὑπαρχόντων προσποιούμενος, εἴρων δὲ ὁ ἐλάττω· καὶ κόλαξ μὲν ὁ πλείω συνεπαινῶν ἢ καλῶς ἔχει, ἀπεχθητικὸς δὲ ὁ ἐλάττω· καὶ τὸ μὲν λίαν πρὸς ἡδονὴν ἀρέσκεια, τὸ δ' ὀλίγα καὶ μόγις εὐθάδεια· [ἔτι δ' ὁ μὲν μηδεμίαν ὑπομένων λύπην, μηδ' εἰ βέλτιον, τρυφερός, ὁ δὲ πᾶσαν ὁμοίως ὥς μὲν ἀπλῶς εἰπεῖν ἀνώνυμος, μεταφορᾷ δὲ λέγεται σκληρὸς καὶ ταλαίπωρος καὶ κακοπαθητικὸς·] χαῦνος δ' ὁ μειζόνων ἀξιῶν αὐτόν, μικρόψυχος δ' ὁ ἐλαττόνων· ἔτι δ' ἄσωτος ὁ πρὸς ἅπασαν δαπάνην ὑπερβάλλων, ἀνελεύθερος δὲ ὁ πρὸς ἅπασαν ἐλλείπων· ὁμοίως δὲ καὶ ὁ μικροπρεπὴς καὶ ὁ σαλάκων, ὁ μὲν γὰρ ὑπερβάλλει τὸ πρέπον, ὁ δ' ἐλλείπει τοῦ πρέποντος· [καὶ ὁ μὲν πανοῦργος πάντως καὶ πάντοθεν πλεονεκτικὸς, ὁ δ' εὐήθης οὐδ' ὅθεν δεῖ·] φθονερός δὲ τῷ λυπεῖσθαι ἐπὶ πλείοσιν εὐπραγίαις ἢ δεῖ (καὶ γὰρ οἱ ἄξιοι εὖ πράττειν λυποῦσι τοὺς φθονεροὺς εὖ

πράττοντες), ὁ δ' ἐναντίος ἀνωνυμώτερος, ἔστι [1221b] δ' ὁ ὑπερβάλλον [ἐπὶ] τῷ μὴ λυπεῖσθαι μηδ' ἐπὶ τοῖς ἀναξίοις εὖ πράττουσιν, ἀλλ' εὐχερὴς ὥσπερ οἱ γαστρίμαργοι πρὸς τροφήν, ὃ δὲ δυσχερὴς κατὰ τὸν φθόνον ἐστίν. - τὸ δὲ πρὸς ἕκαστον μὴ κατὰ συμβεβηκὸς οὕτως ἔχειν περιέργον διορίζειν· οὐδεμία γὰρ ἐπιστήμη, οὔτε θεωρητικὴ οὔτε ποιητικὴ, οὔτε λέγει οὔτε πράττει τοῦτο προσδιορίζουσα, ἀλλὰ τοῦτ' ἐστὶ πρὸς τὰς συκοφαντίας τῶν τεχνῶν τὰς λογικάς. ἀπλῶς μὲν οὖν διωρίσθω τὸν τρόπον τοῦτον, ἀκριβέστερον δ', ὅταν περὶ τῶν ἔξεων λέγωμεν τῶν ἀντικειμένων.

αὐτῶν δὲ τούτων τῶν παθημάτων εἶδη κατονομάζεται τῷ διαφέρειν κατὰ τὴν ὑπερβολὴν ἢ χρόνου ἢ τοῦ μᾶλλον ἢ πρὸς τι τῶν ποιούντων τὰ πάθη. λέγω δ' οἷον ὀξύθυμος μὲν τῷ θᾶττον πάσχειν ἢ δεῖ, χαλεπὸς δὲ καὶ θυμώδης τῷ μᾶλλον, πικρὸς δὲ τῷ φυλακτικὸς εἶναι τῆς ὀργῆς, πλήκτης δὲ καὶ λοιδορητικὸς ταῖς κολάσεσι ταῖς ἀπὸ τῆς ὀργῆς. ὀυσοφάγοι δὲ καὶ γαστρίμαργοι καὶ οἰνόφυλγες τῷ πρὸς ὀποτέρας τροφῆς ἀπόλαυσιν ἔχειν τὴν δύναμιν παθητικὴν παρὰ τὸν λόγον.

οὐ δεῖ δὲ ἀγνοεῖν ὅτι ἔνια τῶν λεγομένων οὐκ ἔστιν ἐν τῷ πῶς λαμβάνειν, ἀν πῶς λαμβάνηται τῷ μᾶλλον πάσχειν. οἷον μοιχὸς οὐ τῷ μᾶλλον ἢ δεῖ πρὸς τὰς γαμετὰς πλησιάζειν (οὐ γὰρ ἐστίν), ἀλλὰ μοχθηρία τις αὐτῇ δὴ ἐστίν. συνειλημμένον γὰρ τό τε πάθος λέγεται καὶ τὸ τοιόνδε εἶναι. ὁμοίως δὲ καὶ ἡ ὕβρις. διὸ καὶ ἀμφισβητοῦσι, συγγενέσθαι μὲν φάσκοντες, ἀλλ' οὐ μοιχεῦσαι· ἀγνοοῦντες γὰρ ἢ ἀναγκαζόμενοι καὶ πατάξαι μὲν, ἀλλ' οὐχ' ὕβρισαι· ὁμοίως δὲ καὶ ἐπὶ τὰ ἄλλα τὰ τοιαῦτα.

εἰλημμένων δὲ τούτων, μετὰ ταῦτα λεκτέον ὅτι ἐπειδὴ δύο μέρη τῆς ψυχῆς, καὶ αἱ ἀρεταὶ κατὰ ταῦτα διήρηνται, καὶ αἱ μὲν τοῦ λόγον ἔχοντος διανοητικάι, ὧν ἔργον ἀλήθεια, ἢ περὶ τοῦ πῶς ἔχει ἢ περὶ γενέσεως, αἱ δὲ τοῦ ἀλόγου, ἔχοντος δ' ὄρεξιν (οὐ γὰρ ὁτιοῦν μέρος ἔχει τῆς ψυχῆς ὄρεξιν, εἰ μεριστὴ ἐστίν), ἀνάγκη δὴ φαῦλον τὸ ἦθος καὶ σπουδαῖον εἶναι τῷ διώκειν καὶ φεύγειν ἡδονάς τινας καὶ λύπας. δῆλον δὲ τοῦτο ἐκ τῶν διαιρέσεων τῶν περὶ τὰ πάθη καὶ τὰς δυνάμεις καὶ τὰς ἔξεις. αἱ μὲν γὰρ δυνάμεις καὶ αἱ ἔξεις τῶν παθημάτων, τὰ δὲ πάθη λύπη καὶ ἡδονὴ διώρισται· ὥστε διὰ τε ταῦτα καὶ διὰ τὰς ἔμπροσθεν θέσεις συμβαίνει πᾶσαν ἠθικὴν ἀρετὴν περὶ ἡδονὰς εἶναι καὶ λύπας. πᾶσα γὰρ ψυχὴ ὑφ' οἷων πέφυκε γίνεσθαι χείρων καὶ βελτίων, πρὸς ταῦτα καὶ περὶ ταῦτά ἐστιν ἡ

[1222a] ἡδονή. δι' ἡδονὰς δὲ καὶ λύπας φαύλους εἶναι φαμέν, τῷ διώκειν καὶ φεύγειν ἢ ὡς μὴ δεῖ ἢ ἄς μὴ δεῖ. διὸ καὶ διορίζονται πάντες προχείρως ἀπάθειαν καὶ ἡρεμίαν περὶ ἡδονὰς καὶ λύπας εἶναι τὰς ἀρετάς, τὰς δὲ κακίας ἐκ τῶν ἐναντίων.

ἐπεὶ δ' ὑπόκειται ἀρετὴ εἶναι ἡ τοιαύτη ἕξις ἀφ' ἧς πρακτικοὶ τῶν βελτίστων καὶ καθ' ἣν ἄριστα διάκεινται περὶ τὸ βέλτιστον, βέλτιστον δὲ καὶ ἄριστον τὸ κατὰ τὸν ὀρθὸν λόγον, τοῦτο δ' ἐστὶ τὸ μέσον ὑπερβολῆς καὶ ἐλλείψεως τῆς πρὸς ἡμᾶς· ἀναγκαῖον ἂν εἴη τὴν ἠθικὴν ἀρετὴν καθ' αὐτὸν ἕκαστον μεσότητά εἶναι καὶ περὶ μέσ' ἅττα ἐν ἡδοναῖς καὶ λύπαις καὶ ἡδέσει καὶ λυπηροῖς. ἔσται δ' ἡ μεσότης ὅτε μὲν ἐν ἡδοναῖς (καὶ γὰρ ὑπερβολὴ καὶ ἔλλειψις), ὅτε δ' ἐν λύπαις, ὅτε δ' ἐν ἀμφοτέραις. ὁ γὰρ ὑπερβάλλων τῷ χαίρειν τῷ ἡδεῖ ὑπερβάλλει καὶ ὁ τῷ λυπεῖσθαι τῷ ἐναντίῳ, καὶ ταῦτα ἢ ἀπλῶς ἢ πρὸς τινα ὄρον, οἷον ὅταν μὴ ὡς οἱ πολλοί· ὁ δ' ἀγαθὸς ὡς δεῖ. - ἐπεὶ δ' ἐστὶ τις ἕξις ἀφ' ἧς τοιοῦτος ἔσται ὁ ἔχων αὐτὴν ὥστε τοῦ αὐτοῦ πράγματος ὁ μὲν ἀποδέχεσθαι τὴν ὑπερβολὴν ὁ δὲ τὴν ἔλλειψιν, ἀνάγκη, ὡς ταῦτ' ἀλλήλοις ἐναντία καὶ τῷ μέσῳ, οὕτω καὶ τὰς ἕξεις ἀλλήλαις ἐναντίας εἶναι καὶ τῇ ἀρετῇ. - συμβαίνει μέντοι τὰς ἀντιθέσεις ἔνθα μὲν φανερωτέρας εἶναι πάσας, ἔνθα δὲ τὰς ἐπὶ τὴν ὑπερβολὴν, ἐνιαχοῦ δὲ τὰς ἐπὶ τὴν ἔλλειψιν. αἴτιον δὲ τῆς ἐναντιώσεως, ὅτι οὐκ αἰεὶ ἐπὶ ταῦτά τῆς ἀνισότητος ἢ ὁμοιότητος πρὸς τὸ μέσον, ἀλλ' ὅτε μὲν θᾶπτον ἂν μεταβαίη ἀπὸ τῆς ὑπερβολῆς ἐπὶ τὴν μέσσην ἕξιν, ὅτε δ' ἀπὸ τῆς ἐλλείψεως, ἧς ὀδὸς πλέον ἀπέχει, οὗτος δοκεῖ ἐναντιώτερος εἶναι, οἷον καὶ περὶ τὸ σῶμα ἐν μὲν τοῖς πόνοις ὑγιεινότερον ἢ ὑπερβολὴ τῆς ἐλλείψεως καὶ ἐγγύτερον τοῦ μέσου, ἐν δὲ τῇ τροφῇ ἢ ἔλλειψις ὑπερβολῆς. ὥστε καὶ αἱ προαιρετικαὶ ἕξεις αἱ φιλογυμναστικαὶ φιλοῦγιεῖς μᾶλλον ἔσονται καθ' ἑκατέραν τὴν αἵρεσιν, ἔνθα μὲν αἱ πολυπονώτεραι, ἔνθα δ' αἱ ὑποστατικώτεραι, καὶ ἐναντίος τῷ μετρίῳ καὶ τῷ ὡς ὁ λόγος ἔνθα μὲν ὁ ἅπρονος καὶ οὐκ ἅμφω, ἔνθα δὲ [καὶ] ὁ ἀπολαυστικὸς καὶ οὐχ ὁ πεινητικὸς. συμβαίνει δὲ τοῦτο, διότι ἡ φύσις εὐθὺς οὐ πρὸς ἅπαντα ὁμοίως ἀφέστηκε τοῦ μέσου, ἀλλ' ἥττον μὲν φιλόπονοι ἐσμέν, μᾶλλον δ' ἀπολαυστικοί. ὁμοίως δὲ ταῦτ' ἔχει καὶ περὶ ψυχῆς. ἐναντίαν δὲ τίθεμεν τὴν ἕξιν ἐφ' ἣν τε ἀμαρτάνομεν μᾶλλον καὶ ἐφ' ἣν οἱ πολλοί (ἢ δ' ἑτέρα ὥσπερ οὐκ οὕσα λανθάνει· διὰ γὰρ τὸ ὀλίγον ἀναίσθητος ἐστίν), οἷον ὀργὴν πραότητι καὶ τὸν ὀργίλον [1222b] τῷ πράῳ. καίτοι ἐστὶν ὑπερβολὴ καὶ ἐπὶ τὸ ἴλεων εἶναι καὶ

τὸ καταλλακτικὸν εἶναι καὶ μὴ ὀργίζεσθαι ῥαπιζόμενον. ἀλλ' ὀλίγοι οἱ τοιοῦτοι, ἐπ' ἐκεῖνο δὲ πάντες ῥέπουσι μᾶλλον. διὸ καὶ οὐ κολακικὸν ὁ θυμός.

ἐπεὶ δ' εἴληπται ἡ διαλογία τῶν ἔξεων καθ' ἕκαστα τὰ πάθη, καὶ αἱ ὑπερβολαὶ καὶ ἐλλείψεις, καὶ τῶν ἐναντίων ἔξεων, καθ' ἃς ἔχουσι κατὰ τὸν ὀρθὸν λόγον (τίς δ' ὁ ὀρθὸς λόγος, καὶ πρὸς τίνα δεῖ ὄρον ἀποβλέποντας λέγειν τὸ μέσον, ὕστερον ἐπισκεπτέον), φανερὸν ὅτι πᾶσαι αἱ ἠθικαὶ ἀρεταὶ καὶ κακίαι περὶ ἡδονῶν καὶ λυπῶν ὑπερβολὰς καὶ ἐλλείψεις εἰσὶ, καὶ ἡδοναὶ καὶ λῦπαι ἀπὸ τῶν εἰρημένων ἔξεων καὶ παθημάτων γίνονται. ἀλλὰ μὴν ἢ γε βελτίστη ἔξις ἢ περὶ ἕκαστα μέση ἐστίν. δηλὸν τοίνυν ὅτι αἱ ἀρεταὶ ἢ πᾶσαι ἢ τούτων τινὲς ἔσονται τῶν μεσοτήτων.

λάβωμεν οὖν ἄλλην ἀρχὴν τῆς ἐπιούσης σκέψεως. εἰσὶ δὴ πᾶσαι μὲν αἱ οὐσίαι κατὰ φύσιν τινὲς ἀρχαί, διὸ καὶ ἐκάστη πολλὰ δύναται τοιαῦτα γεννᾶν, οἷον ἄνθρωπος ἀνθρώπους καὶ ζῶον ὃν ὅλως ζῶα καὶ φυτὸν φυτά. πρὸς δὲ τούτοις ὁ γ' ἄνθρωπος καὶ πράξεων τινῶν ἐστὶν ἀρχὴ μόνον τῶν ζώων· τῶν γὰρ ἄλλων οὐθέν εἴπομεν ἂν πράττειν. τῶν δ' ἀρχῶν ὅσαι τοιαῦται, ὅθεν πρῶτον αἱ κινήσεις, κύριαι λέγονται, μάλιστα δὲ δικαίως ἀφ' ὧν μὴ ἐνδέχεται ἄλλως, ἦν ἴσως ὁ θεὸς ἄρχει. ἐν δὲ ταῖς ἀκινήτοις ἀρχαῖς, οἷον ἐν ταῖς μαθηματικαῖς, οὐκ ἔστι τὸ κύριον, καίτοι λέγεται γε καθ' ὁμοίότητα· καὶ γὰρ ἐνταῦθα κινουμένης τῆς ἀρχῆς πάντα μάλιστ' ἂν τὰ δεικνύμενα μεταβάλλοι, αὐτὰ δ' αὐτὰ οὐ μεταβάλλει ἀναιρουμένου θατέρου ὑπὸ θατέρου, ἂν μὴ τῷ τὴν ὑπόθεσιν ἀνελεῖν καὶ δι' ἐκείνης δεῖξαι. ὁ δ' ἄνθρωπος ἀρχὴ κινήσεως τινός· ἡ γὰρ πρᾶξις κίνησις. ἐπεὶ δ' ὥσπερ ἐν τοῖς ἄλλοις ἡ ἀρχὴ αἰτία ἐστὶ τῶν δι' αὐτὴν ὄντων ἢ γινομένων, δεῖ νοῆσαι καθάπερ ἐπὶ τῶν ἀποδείξεων. εἰ γὰρ ἔχοντος τοῦ τριγώνου δύο ὀρθὰς ἀνάγκη τὸ τετράγωνον ἔχειν τέτταρας ὀρθὰς, φανερὸν ὡς αἴτιον τούτου τὸ δύο ὀρθὰς ἔχειν τὸ τρίγωνον. εἰ δέ γε μεταβάλλει τὸ τρίγωνον, ἀνάγκη καὶ τὸ τετράγωνον μεταβάλλειν, οἷον εἰ τρεῖς, ἕξ, εἰ δὲ τέτταρες, ὀκτώ. κἂν εἰ μὴ μεταβάλλοι, τοιοῦτον δ' ἐστὶ, κακεῖνο τοιοῦτον ἀναγκαῖον εἶναι. δηλὸν δ' ὁ ἐπιχειροῦμεν ὅτι ἀναγκαῖον, ἐκ τῶν ἀναλυτικῶν· νῦν δ' οὔτε μὴ λέγειν οὔτε λέγειν ἀκριβῶς οἷόν τε, πλὴν τοσοῦτον. εἰ γὰρ μὴθὲν ἄλλο αἴτιον τοῦ τὸ τρίγωνον οὕτως ἔχειν, ἀρχὴ τις ἂν εἴη τοῦτο καὶ αἴτιον τῶν ὕστερον. ὥστ' εἶπερ ἐστὶν ἓν τῶν ὄντων ἐνδεχόμενα ἐναντίως ἔχειν, ἀνάγκη καὶ τὰς ἀρχὰς αὐτῶν εἶναι

τοιαύτας.

[1223a] ἐκ γὰρ τῶν ἐξ ἀνάγκης ἀναγκαῖον τὸ συμβαῖνον ἐστί, τὰ δέ γε ἐντεῦθεν ἐνδέχεται γενέσθαι τάναντία, καὶ ὁ ἐφ' αὐτοῖς ἐστὶ τοῖς ἀνθρώποις, πολλὰ τῶν τοιούτων, καὶ ἀρχαὶ τῶν τοιούτων εἰσὶν αὐτοί. ὥστε ὅσων πράξεων ὁ ἀνθρωπὸς ἐστὶν ἀρχὴ καὶ κύριος, φανερόν ὅτι ἐνδέχεται καὶ γίνεσθαι καὶ μὴ, καὶ ὅτι ἐφ' αὐτῷ ταῦτ' ἐστὶ γίνεσθαι καὶ μὴ, ὧν γε κύριός ἐστι τοῦ εἶναι καὶ τοῦ μὴ εἶναι. ὅσα δ' ἐφ' αὐτῷ ἐστὶ ποιεῖν ἢ μὴ ποιεῖν, αἴτιος τούτων αὐτὸς ἐστίν· καὶ ὅσων αἴτιος, ἐφ' αὐτῷ. ἐπεὶ δ' ἢ τε ἀρετὴ καὶ ἡ κακία καὶ τὰ ἀπ' αὐτῶν ἔργα τὰ μὲν ἐπαινετὰ τὰ δὲ ψεκτά (ψέγεται γὰρ καὶ ἐπαινεῖται οὐ διὰ τὰ ἐξ ἀνάγκης ἢ τύχης ἢ φύσεως ὑπάρχοντα, ἀλλ' ὅσων αὐτοὶ αἴτιοι ἐσμέν· ὅσων γὰρ ἄλλος αἴτιος, ἐκεῖνος καὶ τὸν ψόγον καὶ τὸν ἔπαινον ἔχει), δηλὸν ὅτι καὶ ἡ ἀρετὴ καὶ ἡ κακία περὶ ταῦτ' ἐστὶν ὧν αὐτὸς αἴτιος καὶ ἀρχὴ πράξεων. ληπτέον ἄρα ποίων αὐτὸς αἴτιος καὶ ἀρχὴ πράξεων. πάντες μὲν δὴ ὁμολογοῦμεν, ὅσα μὲν ἐκούσια καὶ κατὰ προαίρεσιν τὴν ἐκάστου, ἐκεῖνον αἴτιον εἶναι, ὅσα δ' ἀκούσια, οὐκ αὐτὸν αἴτιον. πάντα δ' ὅσα προελόμενος, καὶ ἐκὼν δηλὸν ὅτι. δηλὸν τοίνυν ὅτι καὶ ἡ ἀρετὴ καὶ ἡ κακία τῶν ἐκουσίων ἂν εἴησαν.

ληπτέον ἄρα τί τὸ ἐκούσιον καὶ τί τὸ ἀκούσιον, καὶ τί ἐστὶν ἡ προαίρεσις, ἐπειδὴ ἡ ἀρετὴ καὶ ἡ κακία ὀρίζεται τούτοις. πρῶτον σκεπτέον τὸ ἐκούσιον καὶ τὸ ἀκούσιον. τριῶν δὴ τούτων ἓν τι δόξειεν ἄν εἶναι, ἥτοι κατ' ὄρεξιν ἢ κατὰ προαίρεσιν ἢ κατὰ διάνοιαν, τὸ μὲν ἐκούσιον κατὰ τούτων τι, τὸ δ' ἀκούσιον παρὰ τούτων τι. ἀλλὰ μὴν ἡ ὄρεξις εἰς τρία διαιρεῖται, εἰς βούλησιν καὶ θυμὸν καὶ ἐπιθυμίαν· ὥστε ταῦτα διαιρετέον, καὶ πρῶτον κατ' ἐπιθυμίαν.

δόξειε δ' ἂν πᾶν τὸ κατ' ἐπιθυμίαν ἐκούσιον εἶναι. τὸ γὰρ ἀκούσιον πᾶν δοκεῖ εἶναι βίαιον, τὸ δὲ βίαιον λυπηρόν, καὶ πᾶν ὁ ἀναγκαζόμενος ποιοῦσιν ἢ πάσχουσιν, ὥσπερ καὶ Εὐρηνοῦ φησί

“πᾶν γὰρ ἀναγκαῖον πρᾶγμ' ἀνιαρόν ἐφν.” ὥστ' εἴ τι λυπηρόν, βίαιον, καὶ εἰ βίαιον, λυπηρόν. τὸ δὲ παρὰ τὴν ἐπιθυμίαν πᾶν λυπηρόν (ἡ γὰρ ἐπιθυμία τοῦ ἡδέος), ὥστε βίαιον καὶ ἀκούσιον. τὸ ἄρα κατ' ἐπιθυμίαν ἐκούσιον· ἐναντία γὰρ ταῦτ' ἀλλήλοις. ἔτι ἡ μοχθηρία ἀδικώτερον πᾶσα ποιεῖ, ἢ δ' ἀκρασία μοχθηρία δοκεῖ εἶναι, ὁ δ' ἀκρατής ὁ κατὰ τὴν ἐπιθυμίαν παρὰ τὸν λογισμὸν οἷος πράττειν, ἀκρατεῦεται δ' ὅταν ἐνεργῇ κατ' αὐτήν, τὸ δ' ἀδικεῖν ἐκούσιον, ὥσθ' ὁ [1223b] ἀκρατής ἀδικήσει τῷ πράττειν κατ'

ἐπιθυμίαν· ἐκὼν ἄρα πράξει, καὶ ἐκούσιον τὸ κατ' ἐπιθυμίαν· καὶ γὰρ ἄτοπον εἰ δικαιότεροι ἔσονται οἱ ἀκρατεῖς γινόμενοι. - ἐκ μὲν τοίνυν τούτων δόξειεν ἂν τὸ κατ' ἐπιθυμίαν ἐκούσιον εἶναι, ἐκ δὲ τῶνδε τούναντίον. ἅπαν γὰρ ὁ ἐκὼν τις πράττει, βουλόμενος πράττει, καὶ ὁ βούλεται, ἐκὼν. βούλεται δ' οὐθεὶς ὁ οἶεται εἶναι κακόν. ἀλλὰ μὴν ὁ ἀκρατεύόμενος οὐχ ἅ βούλεται ποιεῖ· τὸ γὰρ παρ' ὁ οἶεται βέλτιστον εἶναι πράττειν δι' ἐπιθυμίαν ἀκρατεύεσθαι ἐστίν. ὥστε ἅμα συμβήσεται τὸν αὐτὸν ἐκόντα καὶ ἄκοντα πράττειν· τοῦτο δ' ἀδύνατον. ἔτι δ' ὁ ἐγκρατὴς δικαιοπραγήσει, καὶ μᾶλλον τῆς ἀκρασίας. ἢ γὰρ ἐγκράτεια ἀρετὴ, ἢ δ' ἀρετὴ δικαιότερους ποιεῖ. ἐγκρατεύεται δ' ὅταν πράττῃ παρὰ τὴν ἐπιθυμίαν κατὰ τὸν λογισμόν. ὥστ' εἰ τὸ μὲν δικαιοπραγεῖν ἐκούσιον, ὥσπερ καὶ τὸ ἀδικεῖν (ἄμφω γὰρ δοκεῖ ταῦτα ἐκούσια εἶναι, καὶ ἀνάγκη, εἰ θάτερον ἐκούσιον, καὶ θάτερον), τὸ δὲ παρὰ τὴν ἐπιθυμίαν ἀκούσιον, ἅμα ἄρα ὁ αὐτὸς τὸ αὐτὸ πράξει ἐκὼν καὶ ἄκων.

ὁ δ' αὐτὸς λόγος καὶ περὶ θυμοῦ. ἀκρασία γὰρ καὶ ἐγκράτεια καὶ θυμοῦ δοκεῖ εἶναι, ὥσπερ καὶ ἐπιθυμίας· καὶ τὸ παρὰ τὸν θυμὸν λυπηρόν, καὶ βίαιον ἢ κάθεξις, ὥστ' εἰ τὸ βίαιον ἀκούσιον, τὸ κατὰ τὸν θυμὸν ἐκούσιον ἂν εἴη πᾶν. ἔοικε δὲ καὶ Ἡράκλειτος λέγειν εἰς τὴν ἰσχὺν τοῦ θυμοῦ βλέψας ὅτι λυπηρὰ ἢ κώλυσις αὐτοῦ· “χαλεπὸν γάρ” φησι “θυμῷ μάχεσθαι· ψυχῆς γὰρ ὠνεῖται.” εἰ δ' ἀδύνατον τὸ αὐτὸν ἐκόντα καὶ ἄκοντα πράττειν ἅμα τὸ κατὰ τὸ αὐτὸ τοῦ πράγματος, μᾶλλον ἐκούσιον τὸ κατὰ βούλησιν τοῦ κατ' ἐπιθυμίαν καὶ θυμόν. τεκμήριον δέ· πολλὰ γὰρ πράττομεν ἐκόντες ἄνευ ὀργῆς καὶ ἐπιθυμίας.

λείπεται ἄρα, εἰ τὸ βουλόμενον καὶ ἐκούσιον ταυτό, σκέψασθαι. φαίνεται δὲ καὶ τοῦτο ἀδύνατον. ὑπόκειται γὰρ ἡμῖν καὶ δοκεῖ ἡ μοχθηρία ἀδικωτέρους ποιεῖν, ἢ δ' ἀκρασία μοχθηρία τις φαίνεται· συμβήσεται δὲ τούναντίον. βούλεται μὲν γὰρ οὐθεὶς ἅ οἶεται εἶναι κακά, πράττει δ' ὅταν γίνηται ἀκρατὴς· εἰ οὖν τὸ μὲν ἀδικεῖν ἐκούσιον, τὸ δ' ἐκούσιον τὸ κατὰ βούλησιν, ὅταν ἀκρατὴς γένηται, οὐκέτι ἀδικήσει, ἀλλ' ἔσται δικαιότερος ἢ πρὶν γενέσθαι ἀκρατὴς. τοῦτο δ' ἀδύνατον.

ὅτι μὲν τοίνυν οὐκ ἔστι τὸ ἐκούσιον τὸ κατὰ ὄρεξιν πράττειν, οὐδ' ἀκούσιον τὸ παρὰ τὴν ὄρεξιν, φανερόν· ὅτι δ' οὐδὲ κατὰ προαίρεσιν, πάλιν ἐκ τῶνδε δήλον. τὸ μὲν γὰρ κατὰ βούλησιν ὡς [1224a] οὐκ ἀκούσιον ἀπεδείχθη, ἀλλὰ μᾶλλον πᾶν ὁ βούλεται καὶ

ἐκούσιον (ἀλλ' ὅτι καὶ μὴ βουλόμενον ἐνδέχεται πράττειν ἐκόντα, τοῦτο δέδεικται μόνον)· πολλὰ δὲ βουλόμενοι πράττομεν ἐξαίφνης, προαιρεῖται δ' οὐδεὶς οὐδὲν ἐξαίφνης.

εἰ δὲ ἀνάγκη μὲν ἦν τριῶν τούτων ἐν τι εἶναι τὸ ἐκούσιον, ἢ κατ' ὄρεξιν ἢ κατὰ προαίρεσιν ἢ κατὰ διάνοιαν, τούτων δὲ τὰ δύο μὴ ἐστί, λείπεται ἐν τῷ διανοοῦμένῳ πως πράττειν εἶναι τὸ ἐκούσιον. ἔτι δὲ μικρὸν προαγαγόντες τὸν λόγον, ἐπιθῶμεν τέλος τῷ περὶ τοῦ ἐκουσίου καὶ ἀκουσίου διορισμῷ. δοκεῖ γὰρ τὸ βία καὶ μὴ βία τι ποιεῖν οἰκεῖα τοῖς εἰρημένοις εἶναι· τό τε γὰρ βίαιον ἀκούσιον, καὶ τὸ ἀκούσιον πᾶν βίαιον εἶναι φαμέν. ὥστε περὶ τοῦ βία σκεπτέον πρῶτον, τί ἐστί καὶ πῶς ἔχει πρὸς τὸ ἐκούσιον καὶ ἀκούσιον. δοκεῖ δὴ τὸ βίαιον καὶ τὸ ἀναγκαῖον ἀντικεῖσθαι, καὶ ἡ βία καὶ ἡ ἀνάγκη, τῷ ἐκουσίῳ καὶ τῇ πειθοῖ ἐπὶ τῶν πραττομένων. καθόλου δὲ τὸ βίαιον καὶ τὴν ἀνάγκην καὶ ἐπὶ τῶν ἀψύχων λέγομεν· καὶ γὰρ τὸν λίθον ἄνω καὶ τὸ πῦρ κάτω βία καὶ ἀναγκαζόμενα φέρεσθαι φαμέν. ταῦτα δ' ὅταν κατὰ τὴν φύσει καὶ τὴν καθ' αὐτὰ ὁρμὴν φέρηται, οὐ βία, οὐ μὴν οὐδ' ἐκούσια λέγεται, ἀλλ' ἀνώνυμος ἢ ἀντίθεσις. ὅταν δὲ παρὰ ταύτην, βία φαμέν. ὁμοίως δὲ καὶ ἐπὶ ἐμψύχων καὶ ἐπὶ τῶν ζώων ὁρῶμεν βία πολλὰ καὶ πάσχοντα καὶ ποιοῦντα, ὅταν παρὰ τὴν ἐν αὐτῷ ὁρμὴν ἐξωθέν τι κινῇ. ἐν μὲν τοῖς ἀνύχοις ἀπλή ἢ ἀρχή, ἐν δὲ τοῖς ἐμψύχοις πλεονάζει· οὐ γὰρ αἰὲ ἡ ὄρεξις καὶ ὁ λόγος συμφωνεῖ. ὥστ' ἐπὶ μὲν τῶν ἄλλων ζώων ἀπλοῦν τὸ βίαιον, ὥσπερ ἐπὶ τῶν ἀψύχων (οὐ γὰρ ἔχει λόγον καὶ ὄρεξιν ἐναντίαν, ἀλλὰ τῇ ὀρέξει ζῆ)· ἐν δ' ἀνθρώπῳ ἔνεστιν ἄμφω, καὶ ἐν τινὶ ἡλικίᾳ, ἢ καὶ τὸ πράττειν ἀποδίδομεν. οὐ γὰρ φαμεν τὸ παιδίον πράττειν, οὐδὲ τὸ θηρίον, ἀλλὰ τὸν ἤδη διὰ λογισμὸν πράττοντα. - δοκεῖ δὴ τὸ βίαιον ἅπαν λυπηρὸν εἶναι, καὶ οὐθεὶς βία μὲν ποιεῖ, χαίρων δέ. διὸ περὶ τὸν ἐγκρατῆ καὶ τὸν ἀκρατῆ πλείστη ἀμφισβήτησις ἐστίν. ἐναντίας γὰρ ὁρμᾶς ἔχων αὐτὸς ἕκαστος αὐτῷ πράττει, ὥσθ' ὁ τ' ἐγκρατὴς βία, φασίν, ἀφέλκει αὐτὸν ἀπὸ τῶν ἡδέων ἐπιθυμιῶν (ἀλγεῖ γὰρ ἀφέλκων πρὸς ἀντιτείνουσας τὴν ὄρεξιν), ὁ τ' ἀκρατὴς βία παρὰ τὸν λογισμόν. ἦττον δὲ δοκεῖ λυπεῖσθαι· ἡ γὰρ ἐπιθυμία τοῦ ἡδέος, ἢ ἀκολουθεῖ χαίρων, ὥστε ὁ ἀκρατὴς μᾶλλον ἐκὼν καὶ οὐ βία, ὅτι οὐ λυπηρῶς. ἡ δὲ πειθὴ τῇ βίᾳ καὶ ἀνάγκῃ ἀντιτίθεται. ὁ δ' ἐγκρατὴς [1224b] ἐφ' ᾧ πέπεισται ἄγει, καὶ πορεύεται οὐ βία, ἀλλ' ἐκὼν. ἡ δὲ ἐπιθυμία οὐ πείσασα ἄγει· οὐ γὰρ μετέχει λόγου. ὅτι μὲν οὖν δοκοῦσιν οὗτοι μόνοι βία καὶ ἄκοντες ποιεῖν, καὶ διὰ τίν' αἰτίαν, ὅτι

καθ' ὁμοιότητά τινα τοῦ βία, καθ' ἣν καὶ ἐπὶ τῶν ἀψύχων λέγομεν, εἴρηται· οὐ μὴν ἀλλ' εἴ τις προσθῇ τὸ ἐν τῷ διορισμῷ προσκείμενον, κάκει λύεται τὸ λεχθέν. ὅταν μὲν γάρ τι τῶν ἔξωθεν παρὰ τὴν ἐν αὐτῷ ὁρμὴν κινήῃ ἢ ἡρεμίσῃ, βία φαμέν, ὅταν δὲ μὴ, οὐ βία· ἐν δὲ τῷ ἀκρατεῖ καὶ ἐγκρατεῖ ἢ καθ' αὐτὸν ὁρμὴ ἐνοῦσα ἄγει (ἄμφω γὰρ ἔχει)· ὥστ' οὐ βία οὐδέτερος, ἀλλ' ἐκὼν διὰ γε ταῦτα πράττει ἄν, οὐδ' ἀναγκαζόμενος. τὴν γὰρ ἔξωθεν ἀρχήν, τὴν παρὰ τὴν ὁρμὴν ἢ ἐμποδίζουσαν ἢ κινουσαν, ἀνάγκην λέγομεν, ὥσπερ εἴ τις λαβὼν τὴν χεῖρα τύπτοι τινὰ ἀντιτείνοντος καὶ τῷ βούλεσθαι καὶ τῷ ἐπιθυμεῖν· ὅταν δ' ἔσωθεν ἢ ἀρχή, οὐ βία. ἔτι καὶ ἡδονὴ καὶ λύπη ἐν ἀμφοτέροις ἔνεστι. καὶ γὰρ ὁ ἐγκρατευόμενος λυπεῖται παρὰ τὴν ἐπιθυμίαν πράττων ἤδη, καὶ χαίρει τὴν ἀπ' ἐλπίδος ἡδονήν, ὅτι ὕστερον ὠφεληθήσεται, ἢ καὶ ἤδη ὠφελεῖται ὑγιαίνων· καὶ ὁ ἀκρατὴς χαίρει μὲν τυγχάνων ἀκρατευόμενος οὗ ἐπιθυμεῖ, λυπεῖται δὲ τὴν ἀπ' ἐλπίδος λύπην, οἶται γὰρ κακὸν πράττειν. ὥστε τὸ μὲν βία ἐκάτερον φάναι ποιεῖν ἔχει λόγον, καὶ διὰ τὴν ὀρεξιν καὶ διὰ τὸν λογισμὸν ἐκάτερον ἄκοντα ποτὲ πράττειν· κεχωρισμένα γὰρ ὄντα ἐκάτερα ἐκκρούεται ὑπ' ἀλλήλων. ὅθεν καὶ ἐπὶ τὴν ὅλην μεταφέρουσι ψυχὴν, ὅτι τῶν ἐν ψυχῇ τι τοιοῦτον ὁρῶσιν. ἐπὶ μὲν οὖν τῶν μορίων ἐνδέχεται τοῦτο λέγειν· ἢ δ' ὅλη ἐκοῦσα ψυχὴ καὶ τοῦ ἀκρατοῦς καὶ τοῦ ἐγκρατοῦς πράττει, βία δ' οὐδέτερος, ἀλλὰ τῶν ἐν ἐκείνοις τι, ἐπεὶ καὶ φύσει ἀμφότερα ἔχομεν. καὶ γὰρ ὁ λόγος φύσει ὑπάρχει, ὅτι ἐωμένης τῆς γενέσεως καὶ μὴ πηρωθείσης ἐνέσται, καὶ ἡ ἐπιθυμία, ὅτι εὐθύς ἐκ γενετῆς ἀκολουθεῖ καὶ ἔνεστιν. σχεδὸν δὲ τούτοις δυσὶ τὸ φύσει διορίζομεν, τῷ τε ὅσα εὐθύς γιγνομένοις ἀκολουθεῖ πᾶσι, καὶ ὅσα ἐωμένης τῆς γενέσεως εὐθυπορεῖν γίνγεται ἡμῖν, οἷον πολιὰ καὶ γῆρας καὶ τᾶλλα τὰ τοιαῦτα. ὥστε μὴ κατὰ φύσιν ἐκάτερος πράττει, ἀπλῶς δὲ κατὰ φύσιν ἐκάτερος, οὐ τὴν αὐτήν. αἱ μὲν οὖν περὶ τὸν ἀκρατὴ καὶ ἐγκρατὴ ἀπορίαι αὐταὶ περὶ τοῦ βία πράττειν ἢ ἀμφοτέρους ἢ τὸν ἕτερον, ὥστε ἢ μὴ ἐκόντας ἢ ἅμα βία καὶ ἐκόντας, εἰ δὲ τὸ βία ἀκούσιον, ἅμα ἐκόντας καὶ ἄκοντας πράττειν· [1225a] σχεδὸν δὲ ἐκ τῶν εἰρημένων δῆλον ἡμῖν ὡς ἀπαντητέον.

λέγονται δὲ κατ' ἄλλον τρόπον βία καὶ ἀναγκασθέντες πρᾶξαι, οὐ διαφωνοῦντος τοῦ λόγου καὶ τῆς ὀρέξεως, ὅταν πράττωσιν ὁ καὶ λυπηρὸν καὶ φαῦλον ὑπολαμβάνουσιν, ἀλλ' ἄν μὴ τοῦτο πράττωσι, πληγαὶ ἢ δεσμοὶ ἢ θάνατοι ὧσιν. ταῦτα γὰρ φασιν ἀναγκασθέντες πρᾶξαι. ἢ οὐ, ἀλλὰ πάντες ἐκόντες ποιοῦσιν αὐτὸ τοῦτο; ἔξεστι γὰρ

μη ποιεῖν, ἀλλ' ἐκεῖνο ὑπομεῖναι τὸ πάθος. ἔτι ἴσως τούτων τὰ μὲν φαίη τις ἂν τὰ δ' οὐ. ὅσα μὲν γὰρ ἐφ' αὐτῷ τῶν τοιούτων μὴ ὑπάρξαι ἢ ὑπάρξαι, ἀεὶ ὅσα πράττει ἢ μὴ βούλεται, ἐκὼν πράττει, καὶ οὐ βία· ὅσα δὲ μὴ ἐφ' αὐτῷ τῶν τοιούτων, βία πῶς, οὐ μέντοι γ' ἀπλῶς, ὅτι οὐκ αὐτὸ τοῦτο προαιρεῖται ὃ πράττει, ἀλλ' οὐ ἔνεκα, ἐπεὶ καὶ ἐν τούτοις ἐστὶ τις διαφορά. εἰ γὰρ ἴνα μὴ λάβῃ ψηλαφῶν ἀποκτεῖνοι, γελοῖος ἂν εἴη, εἰ λέγοι ὅτι βία καὶ ἀναγκαζόμενος, ἀλλὰ δεῖ μείζον κακὸν καὶ λυπηρότερον εἶναι, ὃ πείσεται μὴ ποιήσας. οὕτω γὰρ ἀναγκαζόμενος καὶ [μὴ] βία πράξει, ἢ οὐ φύσει, ὅταν κακὸν ἀγαθοῦ ἔνεκα ἢ μείζονος κακοῦ ἀπολύσεως πράττῃ, καὶ ἄκων γε· οὐ γὰρ ἐφ' αὐτῷ ταῦτα. διὸ καὶ τὸν ἔρωτα πολλοὶ ἀκούσιον τιθέασιν, καὶ θυμοὺς ἐνίους καὶ τὰ φυσικά, ὅτι ἰσχυρὰ καὶ ὑπὲρ τὴν φύσιν· καὶ συγγνώμην ἔχομεν ὡς πεφυκότα βιάζεσθαι τὴν φύσιν. καὶ μᾶλλον ἂν δόξειε βία καὶ ἄκων πράττειν, ἴνα μὴ ἀλγῇ ἰσχυρῶς, ἢ ἴνα μὴ ἡρέμα, καὶ ὅλως ἴνα μὴ ἀλγῇ ἢ ἴνα [μὴ] χαίρῃ. τὸ γὰρ ἐφ' αὐτῷ, εἰς ὃ ἀνάγεται ὅλον, τοῦτ' ἐστὶν ὃ ἢ αὐτοῦ φύσις οἷα τε φέρειν· ὃ δὲ μὴ οἷα τε, μήδ' ἐστὶ τῆς ἐκείνου φύσει ὀρέξεως ἢ λογισμοῦ, οὐκ ἐφ' αὐτῷ. διὸ καὶ τοὺς ἐνθουσιῶντας καὶ προλέγοντας, καίπερ διανοίας ἔργον ποιοῦντας, ὅμως οὐ φαμεν ἐφ' αὐτοῖς εἶναι, οὐτ' εἰπεῖν ἢ εἶπον, οὔτε πρᾶξαι ἢ ἔπραξαν. ἀλλὰ μὴν οὐδὲ δι' ἐπιθυμίαν· ὥστε καὶ διάνοιαι τινες καὶ πάθη οὐκ ἐφ' ἡμῖν εἰσίν, ἢ πράξεις αἱ κατὰ τὰς τοιαύτας διανοίας καὶ λογισμούς, ἀλλ' ὥσπερ Φιλόλαος ἔφη εἶναι τινας λόγους κρείττους ἡμῶν.

ὥστ' εἰ τὸ ἐκούσιον καὶ ἀκούσιον καὶ πρὸς τὸ βία ἔδει σκέψασθαι, τοῦτο μὲν οὕτω διηρήσθω (οἱ γὰρ μάλιστ' ἐμποδίζοντες τὸ ἐκούσιον ὡς βία πράττοντες, ἀλλ' ἐκόντες)· ἐπεὶ δὲ τοῦτ' ἔχει τέλος, καὶ οὔτε τῇ ὀρέξει οὔτε τῇ προαιρέσει τὸ ἐκούσιον ὥριται, λοιπὸν [1225b] δὴ ὀρίσασθαι τὸ κατὰ τὴν διάνοιαν. δοκεῖ δὴ ἐναντίον εἶναι τὸ ἐκούσιον τῷ ἀκουσίῳ, καὶ τὸ εἰδότα ἢ ὄν ἢ ᾧ ἢ οὐ ἔνεκα (ἐνίστε γὰρ οἶδε μὲν ὅτι πατήρ, ἀλλ' οὐχ ἴνα ἀποκτεῖνῃ, ἀλλ' ἴνα σώσῃ, ὥσπερ αἱ Πελιάδες, ἥτοι ὡς τοδὶ μὲν πόμα, ἀλλ' ὡς φίλτρον καὶ οἶνον, τὸ δ' ἦν κώνειον) τῷ ἀγνοοῦντα καὶ ὄν καὶ ᾧ καὶ ὃ δι' ἄγνοιαν, μὴ κατὰ συμβεβηκός· τὸ δὲ δι' ἄγνοιαν, καὶ ὃ καὶ ᾧ καὶ ὄν, ἀκούσιον· τὸ ἐναντίον ἄρ' ἐκούσιον. ὅσα μὲν οὖν ἐφ' ἑαυτῷ ὄν μὴ πράττειν πράττει μὴ ἀγνοῶν καὶ δι' αὐτόν, ἐκούσια ταῦτ' ἀνάγκη εἶναι, καὶ τὸ ἐκούσιον τοῦτ' ἐστίν· ὅσα δ' ἀγνοῶν καὶ διὰ τὸ ἀγνοεῖν, ἄκων. ἐπεὶ δὲ τὸ ἐπίστασθαι καὶ τὸ εἰδέναι διττόν, ἐν μὲν τὸ

ἔχειν, ἐν δὲ τὸ χρηῖσθαι τῇ ἐπιστήμῃ, ὁ ἔχων μὴ χρώμενος δὲ ἔστι μὲν ὡς δικαίως <ἂν> ἀγνοῶν λέγοιτο, ἔστι δὲ ὡς οὐ δικαίως, οἷον εἰ δι' ἀμέλειαν μὴ ἐχρῆτο. ὁμοίως δὲ καὶ μὴ ἔχων τις ψέγοιτο ἂν, εἰ ὁ ῥάδιον ἢ ἀναγκαῖον ἦν, μὴ ἔχει δι' ἀμέλειαν ἢ ἡδονὴν ἢ λύπην. ταῦτ' οὖν προσδιοριστέον.

περὶ μὲν οὖν τοῦ ἐκουσίου καὶ ἀκουσίου διωρίσθω τοῦτον τὸν τρόπον· περὶ δὲ προαιρέσεως μετὰ τοῦτο λέγωμεν, διαπορήσαντες πρῶτον τῷ λόγῳ περὶ αὐτῆς. διστάσειε γὰρ ἂν τις ἐν τῷ γένει πέφυκε καὶ ἐν ποίῳ θεῖναι αὐτὴν χρή, καὶ πότερον οὐ ταῦτόν τὸ ἐκούσιον καὶ τὸ προαιρετὸν ἢ ταὐτὸν ἐστίν. μάλιστα δὲ λέγεται παρὰ τινων, καὶ ζητοῦντι δόξειε δ' ἂν δυοῖν εἶναι θάτερον ἢ προαίρεσις, ἥτοι δόξα ἢ ὀρεξις· ἀμφοτέρα γὰρ φαίνεται παρακολουθοῦντα. ὅτι μὲν οὖν οὐκ ἔστιν ὀρεξις φανερόν. ἢ γὰρ βούλησις ἂν εἴη ἢ ἐπιθυμία ἢ θυμός· οὐθεὶς γὰρ ὀρέγεται μηθὲν πεπονθῶς τούτων. θυμὸς μὲν οὖν καὶ ἐπιθυμία καὶ τοῖς θηρίοις ὑπάρχει, προαίρεσις δ' οὐ. ἔτι δὲ καὶ οἷς ὑπάρχει ἅμφω ταῦτα, πολλὰ καὶ ἄνευ θυμοῦ καὶ ἐπιθυμίας προαιροῦνται· καὶ ἐν τοῖς πάθεσιν ὄντες οὐ προαιροῦνται, ἀλλὰ καρτεροῦσιν. ἔτι ἐπιθυμία μὲν καὶ θυμὸς ἀεὶ μετὰ λύπης, προαιρούμεθα δὲ πολλὰ καὶ ἄνευ λύπης. ἀλλὰ μὴν οὐδὲ βούλησις καὶ προαίρεσις ταὐτόν. βούλονται μὲν γὰρ ἓνια [ταὐτόν] καὶ τῶν ἀδυνάτων εἰδότες, οἷον βασιλεύειν τε πάντων ἀνθρώπων καὶ ἀθάνατοι εἶναι, προαιρεῖται δ' οὐθεὶς μὴ ἀγνοῶν ὅτι ἀδύνατον, οὐδ' ὅλως ἄδυνατόν μὲν, μὴ ἐφ' αὐτῷ δ' οἶεται πρᾶξαι ἢ μὴ πρᾶξαι. ὥστε τοῦτο μὲν φανερόν, ὅτι ἀνάγκη τὸ προαιρετὸν τῶν ἐφ' αὐτῷ τι εἶναι.

[1226a] ὁμοίως δὲ δῆλον ὅτι οὐδὲ δόξα, οὐδ' ἀπλῶς εἴ τις οἶεται τι. τῶν γὰρ ἐφ' αὐτῷ τι ἦν τὸ προαιρετόν, δοξάζομεν δὲ πολλὰ καὶ τῶν οὐκ ὄντων ἐφ' ἡμῖν, οἷον τὴν διάμετρον σύμμετρον. ἔτι οὐκ ἔστι προαίρεσις ἀληθῆς ἢ ψευδῆς. οὐδὲ δὴ ἢ τῶν ἐφ' αὐτῷ ὄντων πρακτῶν δόξα, ἢ τυγχάνομεν οἰόμενοι δεῖν τι πράττειν ἢ οὐ πράττειν. κοινὸν δὲ περὶ δόξης τοῦτο καὶ βουλήσεως· οὐθεὶς γὰρ τέλος οὐδὲν προαιρεῖται, ἀλλὰ τὰ πρὸς τὸ τέλος· λέγω δ' οἷον οὐθεὶς ὑγιαίνειν προαιρεῖται, ἀλλὰ περιπατεῖν ἢ καθῆσθαι τοῦ ὑγιαίνειν ἕνεκεν, οὐδ' εὐδαιμονεῖν, ἀλλὰ χρηματίζεσθαι ἢ κινδυνεύειν τοῦ εὐδαιμονεῖν ἕνεκα· καὶ ὅλως δηλοῖ ἀεὶ προαιρούμενος τί τε καὶ τίνος ἕνεκα προαιρεῖται, ἔστι δὲ τὸ μὲν τίνος, οὗ ἕνεκα προαιρεῖται ἄλλο, τὸ δὲ τί, ὃ προαιρεῖται ἕνεκα ἄλλου. βούλεται δέ γε μάλιστα τὸ τέλος, καὶ δοξάζει δεῖν καὶ ὑγιαίνειν καὶ εὖ πράττειν. ὥστε φανερόν διὰ τούτων

ὅτι ἄλλο καὶ δόξης καὶ βουλήσεως. βούλεσθαι μὲν <γὰρ> καὶ δόξα μάλιστα τοῦ τέλους, προαίρεσις δ' οὐκ ἔστιν.

ὅτι μὲν οὖν οὐκ ἔστιν οὔτε βούλησις οὔτε δόξα οὔθ' ὑπόληψις ἀπλῶς ἢ προαίρεσις, δηλόν· τί δὲ διαφέρει τούτων, καὶ πῶς ἔχει πρὸς τὸ ἐκούσιον; ἅμα δὲ δηλόν ἔσται, καὶ τί ἐστι προαίρεσις. ἔστι δὴ τῶν δυνατῶν καὶ εἶναι καὶ μὴ τὰ μὲν τοιαῦτα ὥστε ἐνδέχεσθαι βουλευσασθαι περὶ αὐτῶν· περὶ ἐνίων δ' οὐκ ἐνδέχεται. τὰ μὲν γὰρ δυνατὰ μὲν ἐστι καὶ εἶναι καὶ μὴ εἶναι, ἀλλ' οὐκ ἐφ' ἡμῖν αὐτῶν ἢ γένεσις ἐστίν, ἀλλὰ τὰ μὲν διὰ φύσιν τὰ δὲ δι' ἄλλας αἰτίας γίνεται, περὶ ὧν οὐδεὶς ἂν ἐγχειρήσειε βουλευέσθαι μὴ ἀγνοῶν· περὶ ὧν δ' ἐνδέχεται μὴ μόνον τὸ εἶναι καὶ μὴ, ἀλλὰ καὶ τὸ βουλευσασθαι τοῖς ἀνθρώποις, ταῦτα δ' ἐστὶν ὅσα ἐφ' ἡμῖν ἐστι πρᾶξις ἢ μὴ πρᾶξις. διὸ οὐ βουλευόμεθα περὶ τῶν ἐν Ἰνδοῖς, οὐδὲ πῶς ἂν ὁ κύκλος τετραγωνισθεῖη. τὰ μὲν γὰρ οὐκ ἐφ' ἡμῖν· τὸ δ' ὅλως οὐ πρακτόν ἀλλ' οὐδὲ περὶ τῶν ἐφ' ἡμῖν πρακτῶν περὶ ἀπάντων. (ἥ καὶ δηλόν ὅτι οὐδὲ δόξα ἀπλῶς ἢ προαίρεσις ἐστίν)· τὰ δὲ προαιρετὰ καὶ πρακτὰ τῶν ἐφ' ἡμῖν ὄντων ἐστίν. διὸ καὶ ἀπορήσειεν ἂν τις, τί δὴ ποθ' οἱ μὲν ἰατροὶ βουλευόνται περὶ ὧν ἔχουσι τὴν ἐπιστήμην, οἱ δὲ γραμματικοὶ οὐ; αἴτιον δ' ὅτι διχῇ γινομένης τῆς ἀμαρτίας (ἣ γὰρ λογιζόμενοι ἀμαρτάνομεν ἢ κατὰ τὴν αἴσθησιν αὐτὸ δρῶντες) ἐν μὲν τῇ ἱατρικῇ ἀμφοτέρως ἐνδέχεται ἀμαρτεῖν, ἐν δὲ τῇ γραμματικῇ κατὰ [1226b] τὴν αἴσθησιν καὶ πρᾶξιν, περὶ ἧς ἂν σκοπῶσιν, εἰς ἄπειρον ἥξουσιν. - ἐπειδὴ οὖν οὔτε δόξα οὔτε βούλησις ἐστι προαίρεσις ἐστὶν ὥς ἐκάτερον, οὐδ' ἄμφω (ἐξαίφνης γὰρ προαιρεῖται μὲν οὐθεὶς, δοκεῖ δὲ πράττειν καὶ βούλονται)· ὥς ἐξ ἀμφοῖν ἄρα. ἄμφω γὰρ ὑπάρχει τῷ προαιρουμένῳ ταῦτα. - ἀλλὰ πῶς ἐκ τούτων σκεπτέον; δηλοῖ δὲ πῶς καὶ τὸ ὄνομα αὐτό. ἢ γὰρ προαίρεσις αἴρεσις μὲν ἐστίν, οὐχ ἀπλῶς δέ, ἀλλ' ἐτέρου πρὸ ἐτέρου· τοῦτο δὲ οὐχ οἷόν τε ἄνευ σκέψεως καὶ βουλῆς. διὸ ἐκ δόξης βουλευτικῆς ἐστὶν ἡ προαίρεσις.

περὶ μὲν δὴ τοῦ τέλους οὐδεὶς βουλεύεται, ἀλλὰ τοῦτο κεῖται πᾶσι, περὶ δὲ τῶν εἰς τοῦτο τεινόντων, πότερον τότε ἢ τότε συντείνει, ἢ δεδογμένου τοῦτο πῶς ἔσται. βουλευόμεθα δὲ τοῦτο πάντες, ἔως ἂν εἰς ἡμᾶς ἀναγάγωμεν τῆς γενέσεως τὴν ἀρχήν. εἰ δὴ προαιρεῖται μὲν μηδεὶς μὴ παρασκευασάμενος μηδὲ βουλευσάμενος, εἰ χεῖρον ἢ βέλτιον, βουλεύεται δὲ ὅσα ἐφ' ἡμῖν ἐστι τῶν δυνατῶν καὶ εἶναι καὶ μὴ τῶν πρὸς τὸ τέλος, δηλόν ὅτι ἡ προαίρεσις μὲν ἐστὶν ὀρεξις τῶν ἐφ' αὐτῷ βουλευτικῇ. ἅπαντες γὰρ βουλευόμεθα ἃ καὶ

προαιρούμεθα, οὐ μέντοι γε ἃ βουλευόμεθα, πάντα προαιρούμεθα. λέγω δὲ βουλευτικήν, ἧς ἀρχὴ καὶ αἰτία βούλευσις ἐστὶ, καὶ ὀρέγεται διὰ τὸ βουλεύσασθαι. διὸ οὔτε ἐν τοῖς ἄλλοις ζώοις ἐστὶν ἡ προαίρεσις, οὔτε ἐν πάσῃ ἡλικίᾳ, οὔτε πάντως ἔχοντος ἀνθρώπου. οὐδὲ γὰρ τὸ βουλεύσασθαι, οὐδ' ὑπόληψις τοῦ διὰ τί· ἀλλὰ δοξάσαι μὲν εἰ ποιητέον ἢ μὴ ποιητέον οὐθὲν κωλύει πολλοῖς ὑπάρχειν, τὸ δὲ διὰ λογισμοῦ οὐκέτι. ἐστὶ γὰρ βουλευτικὸν τῆς ψυχῆς τὸ θεωρητικὸν αἰτίας τινός. ἡ γὰρ οὗ ἕνεκα μία τῶν αἰτιῶν ἐστίν· τὸ μὲν γὰρ διὰ τί αἰτία· οὗ δ' ἕνεκά ἐστὶν ἡ γίγνεται τι, τοῦτ' αἰτιὸν φαμεν εἶναι, οἷον τοῦ βαδίζειν ἢ κομιδῇ τῶν χρημάτων, εἰ τούτου ἕνεκα βαδίζει. διὸ οἷς μηθεὶς κεῖται σκοπός, οὐ βουλευτικοί. ὥστ' ἐπεὶ τὸ μὲν ἐφ' αὐτῷ ὄν ἢ πράττειν ἢ μὴ πράττειν, ἐάν τις πράττῃ ἢ ἀπρακτῇ δι' αὐτὸν καὶ μὴ δι' ἄγνοίαν, ἐκὼν πράττει ἢ ἀπρακτεῖ, πολλὰ δὲ τῶν τοιούτων πράττομεν οὐ βουλευσάμενοι οὐδὲ προνοήσαντες, ἀνάγκη τὸ μὲν προαιρετὸν ἅπαν ἐκούσιον εἶναι, τὸ δ' ἐκούσιον μὴ προαιρετὸν, καὶ τὰ μὲν κατὰ προαίρεσιν πάντα ἐκούσια εἶναι, τὰ δ' ἀκούσια μὴ πάντα κατὰ προαίρεσιν. ἅμα δ' ἐκ τούτων φανερὸν καὶ ὅτι καλῶς διορίζονται οἱ τῶν παθημάτων τὰ μὲν ἐκούσια τὰ δ' ἀκούσια τὰ δ' ἐκ προνοίας νομοθετοῦσιν· [1227a] εἰ γὰρ καὶ μὴ διακριβοῦσιν, ἀλλ' ἅπτονται γέ πῃ τῆς ἀληθείας. ἀλλὰ περὶ μὲν τούτων ἐροῦμεν ἐν τῇ περὶ τῶν δικαίων ἐπισκέψει· ἡ δὲ προαίρεσις ὅτι οὔτε ἀπλῶς βούλησις οὔτε δόξα ἐστὶ, δηλόν, ἀλλὰ δόξα τε καὶ ὀρεξις, ὅταν ἐκ τοῦ βουλεύσασθαι συμπερανθῶσιν.

ἐπεὶ δὲ βουλεύεται ἀεὶ ὁ βουλευόμενος ἕνεκα τινός, καὶ ἐστὶ σκοπός τις ἀεὶ τῷ βουλευομένῳ πρὸς ὃν σκοπεῖ τὸ συμφέρον, περὶ μὲν τοῦ τέλους οὐθεὶς βουλεύεται, ἀλλὰ τοῦτ' ἐστὶν ἀρχὴ καὶ ὑπόθεσις, ὥσπερ ἐν ταῖς θεωρητικαῖς ἐπιστήμαις ὑποθέσεις (εἴρηται δὲ περὶ αὐτῶν ἐν μὲν τοῖς ἐν ἀρχῇ βραχέως, ἐν δὲ τοῖς ἀναλυτικοῖς δι' ἀκριβείας), περὶ δὲ τῶν πρὸς τὸ τέλος φερόντων ἡ σκέψις καὶ μετὰ τέχνης καὶ ἄνευ τέχνης πᾶσιν ἐστίν, οἷον εἰ πολεμῶσιν ἢ μὴ πολεμῶσιν τοῦτο βουλευομένοις. ἐκ προτέρου δὲ μᾶλλον ἔσται τὸ δι' ὅ, τοῦτ' ἐστὶ τὸ οὗ ἕνεκα, οἷον πλοῦτος ἢ ἡδονὴ ἢ τι ἄλλο τοιοῦτον ὃ τυγχάνει οὗ ἕνεκα. βουλεύεται γὰρ ὁ βουλευόμενος, εἰ ἀπὸ τοῦ τέλους ἔσκεπται, <ἢ> ὅ τι ἐκεῖ συντείνει ὅπως εἰς αὐτὸν ἀγάγῃ, ἢ αὐτὸς δύναται πρὸς τὸ τέλος. τὸ δὲ τέλος ἐστὶ φύσει μὲν ἀεὶ ἀγαθόν, καὶ περὶ οὗ κατὰ μέρος βουλεύονται, οἷον ἰατρὸς βουλεύσαιτο ἂν εἰ δόψῃ φάρμακον, καὶ στρατηγὸς ποῦ

στρατοπεδεύσεται, οἷς ἀγαθὸν τὸ τέλος τὸ ἀπλῶς ἄριστον ἐστίν· παρὰ φύσιν δὲ καὶ διαστροφὴν οὐ τὸ ἀγαθόν, ἀλλὰ τὸ φαινόμενον ἀγαθόν. αἴτιον δ' ὅτι τῶν ὄντων τὰ μὲν οὐκ ἔστιν ἐπ' ἄλλω χρήσασθαι ἢ πρὸς ἃ πέφυκεν, οἷον ὄψει· οὐ γὰρ οἷόν τ' ἰδεῖν οὐ μὴ ἔστιν ὄψις, οὐδ' ἀκοῦσαι οὐ μὴ ἔστιν ἀκοή· ἀλλ' ἀπὸ ἐπιστήμης ποιῆσαι καὶ οὐ μὴ ἔστιν ἡ ἐπιστήμη. οὐ γὰρ ὁμοίως τῆς ὑγιείας ἡ αὕτη ἐπιστήμη καὶ νόσου, ἀλλὰ τῆς μὲν κατὰ φύσιν τῆς δὲ παρὰ φύσιν. ὁμοίως δὲ καὶ ἡ βούλησις φύσει μὲν τοῦ ἀγαθοῦ ἐστί, παρὰ φύσιν δὲ καὶ τοῦ κακοῦ, καὶ βούλεται φύσει μὲν τὸ ἀγαθόν, παρὰ φύσιν δὲ καὶ διαστροφὴν καὶ τὸ κακόν.

ἀλλὰ μὴν ἐκάστου γε φθορὰ καὶ διαστροφή οὐκ εἰς τὸ τυχόν, ἀλλ' εἰς τὰ ἐναντία καὶ τὰ μεταξύ. οὐ γὰρ ἔστιν ἐκβῆναι ἐκ τούτων, ἐπεὶ καὶ ἡ ἀπάτη οὐκ εἰς τὰ τυχόντα γίνεται, ἀλλ' εἰς τὰ ἐναντία ὅσοις ἐστὶν ἐναντία, καὶ εἰς ταῦτα τῶν ἐναντίων ἃ κατὰ τὴν ἐπιστήμην ἐναντία ἐστίν. ἀνάγκη ἄρα καὶ τὴν ἀπάτην καὶ τὴν προαίρεσιν ἀπὸ τοῦ μέσου ἐπὶ τὰ ἐναντία γίνεσθαι (ἐναντία δὲ τῷ μέσῳ [καὶ] τὸ πλέον καὶ τὸ ἔλαττον). - αἴτιον δὲ τὸ ἡδὺ καὶ τὸ λυπηρόν· οὕτω γὰρ ἔχει ὥστε τῇ ψυχῇ φαίνεσθαι τὸ μὲν ἡδὺ ἀγαθόν καὶ τὸ ἡδὺ ἄμεινον, καὶ τὸ λυπηρόν κακόν καὶ τὸ λυπηρότερον [1227b] χεῖρον. ὥστε καὶ ἐκ τούτων δῆλον ὅτι περὶ ἡδονὰς καὶ λύπας ἡ ἀρετὴ καὶ ἡ κακία. περὶ μὲν γὰρ τὰ προαιρετὰ τυγχάνουσιν οὔσαι, ἡ δὲ προαίρεσις περὶ τὸ ἀγαθόν καὶ κακόν καὶ τὰ φαινόμενα, τοιαῦτα δὲ φύσει ἡδονὴ καὶ λύπη.

ἀνάγκη τοίνυν, ἐπειδὴ ἡ ἀρετὴ μὲν ἡ ἠθικὴ αὕτη τε μεσότης τίς ἐστι καὶ περὶ ἡδονὰς καὶ λύπας πᾶσα, ἡ δὲ κακία ἐν ὑπερβολῇ καὶ ἐλλείψει καὶ περὶ ταῦτα τῇ ἀρετῇ, τὴν ἀρετὴν εἶναι τὴν ἠθικὴν ἕξιν προαιρετικὴν μεσότητος τῆς πρὸς ἡμᾶς ἐν ἡδέσι καὶ λυπηροῖς, καθ' ὅσα ποῖός τις λέγεται τὸ ἥθος, ἡ χαίρων ἡ λυπούμενος· ὁ γὰρ φιλόγλυκος ἢ φιλόπικρος οὐ λέγεται ποῖός τις τὸ ἥθος.

τούτων δὲ διωρισμένων, λέγωμεν πότερον ἡ ἀρετὴ ἀναμάρτητον ποιεῖ τὴν προαίρεσιν καὶ τὸ τέλος ὀρθόν, οὕτως ὥστε οὐ ἔνεκα δεῖ προαιρεῖσθαι, ἢ ὥσπερ δοκεῖ τισί, τὸν λόγον. ἔστι δὲ τοῦτο ἐγκράτεια· αὕτη γὰρ οὐ διαφθείρει τὸν λόγον. ἔστι δ' ἀρετὴ καὶ ἐγκράτεια ἕτερον. λεκτέον δ' ὕστερον περὶ αὐτῶν, ἐπεὶ ὅσοις γε δοκεῖ τὸν λόγον ὀρθὸν παρέχειν ἡ ἀρετὴ, τοῦτο αἴτιον. ἡ μὲν <γὰρ> ἐγκράτεια τοιοῦτον, τῶν ἐπαινετῶν δ' ἡ ἐγκράτεια. λέγομεν δὲ προαπορήσαντες. ἔστι γὰρ τὸν μὲν σκοπὸν ὀρθὸν εἶναι, ἐν δὲ τοῖς

πρὸς τὸν σκοπὸν διαμαρτάνειν· ἔστι δὲ τὸν μὲν σκοπὸν ἡμαρτηῆσθαι, τὰ δὲ πρὸς ἐκεῖνον περαίνοντα ὀρθῶς ἔχειν, καὶ μηδέτερον. πότερον δ' ἡ ἀρετὴ ποιεῖ τὸν σκοπὸν ἢ τὰ πρὸς τὸν σκοπόν; τιθέμεθα δὴ ὅτι τὸν σκοπόν, διότι τούτου οὐκ ἔστι συλλογισμὸς οὐδὲ λόγος. ἀλλὰ δὴ ὥσπερ ἀρχὴ τοῦτο ὑποκείσθω. οὔτε γὰρ ἰατρὸς σκοπεῖ εἰ δεῖ ὑγιαίνειν ἢ μὴ, ἀλλ' εἰ περιπατεῖν ἢ μὴ, οὔτε ὁ γυμναστικὸς εἰ δεῖ εὖ ἔχειν ἢ μὴ, ἀλλ' εἰ παλαῖσαι ἢ μὴ. ὁμοίως δ' οὐδ' ἄλλη οὐδεμία περὶ τοῦ τέλους· ὥσπερ γὰρ ταῖς θεωρητικαῖς αἱ ὑποθέσεις ἀρχαί, οὕτω καὶ ταῖς ποιητικαῖς τὸ τέλος ἀρχὴ καὶ ὑπόθεσις. ἐπειδὴ δεῖ τόδε ὑγιαίνειν, ἀνάγκη τοδὶ ὑπάρξαι, εἰ ἔσται ἐκεῖνο, ὥσπερ ἐκεῖ, εἰ ἔστι τὸ τρίγωνον δύο ὀρθαί, ἀνάγκη τοδὶ εἶναι. τῆς μὲν οὖν νοήσεως ἀρχὴ τὸ τέλος, τῆς δὲ πράξεως ἢ τῆς νοήσεως τελευτή. εἰ οὖν πάσης ὀρθότητος ἢ ὁ λόγος ἢ ἡ ἀρετὴ αἰτία, εἰ μὴ ὁ λόγος, διὰ τὴν ἀρετὴν ἂν ὀρθὸν εἶη τὸ τέλος, ἀλλ' οὐ τὰ πρὸς τὸ τέλος. τέλος δ' ἔστι τὸ οὗ ἕνεκα. ἔστι γὰρ πᾶσα προαίρεσις τινὸς καὶ ἕνεκα τινός. οὗ μὲν οὖν ἕνεκα τὸ μέσον ἐστίν, οὗ αἰτία ἡ ἀρετὴ τῷ προαιρεῖσθαι οὗ ἕνεκα. ἔστι μέντοι ἡ προαίρεσις οὐ τούτου, ἀλλὰ τῶν τούτου ἕνεκα. τὸ μὲν οὖν τυγχάνειν τούτων ἄλλης δυνάμεως, ὅσα ἕνεκα τοῦ τέλους δεῖ [1228a] πράττειν· τοῦ δὲ τὸ τέλος ὀρθὸν εἶναι τῆς προαιρέσεως [οὗ] ἢ ἀρετὴ αἰτία. καὶ διὰ τοῦτο ἐκ τῆς προαιρέσεως κρίνομεν ποῖός τις· τοῦτο δ' ἔστι τὸ τίνος ἕνεκα πράττει, ἀλλ' οὐ τί πράττει. ὁμοίως δὲ καὶ ἡ κακία τῶν ἐναντίων ἕνεκα ποιεῖ τὴν προαίρεσιν. εἰ δὴ τις, ἐφ' αὐτῷ ὃν πράττειν μὲν τὰ καλὰ ἀπρακτεῖν δὲ τὰ αἰσχροῦ, τοῦναντίον ποιεῖ, δῆλον ὅτι οὐ σπουδαῖός ἐστιν οὗτος ὁ ἄνθρωπος. ὥστ' ἀνάγκη τὴν τε κακίαν ἐκούσιον εἶναι καὶ τὴν ἀρετὴν· οὐδεμία γὰρ ἀνάγκη τὰ μοχθηρὰ πράττειν. διὰ ταῦτα καὶ ψεκτὸν ἡ κακία καὶ ἡ ἀρετὴ ἐπαινετόν· τὰ γὰρ ἀκούσια αἰσχροῦ καὶ κακὰ οὐ ψέγεται οὐδὲ τὰ ἀγαθὰ ἐπαινεῖται, ἀλλὰ τὰ ἐκούσια. ἔτι πάντας ἐπαινοῦμεν καὶ ψέγομεν εἰς τὴν προαίρεσιν βλέποντες μᾶλλον ἢ εἰς τὰ ἔργα· καίτοι αἰρετώτερον ἢ ἐνέργεια τῆς ἀρετῆς, ὅτι πράττουσι μὲν φαῦλα καὶ ἀναγκαζόμενοι, προαιρεῖται δ' οὐδεὶς. ἔτι διὰ τὸ μὴ ῥάδιον εἶναι ἰδεῖν τὴν προαίρεσιν ὅποια τις, διὰ ταῦτα ἐκ τῶν ἔργων ἀναγκαζόμεθα κρίνειν ποῖός τις. αἰρετώτερον μὲν οὖν ἢ ἐνέργεια, ἐπαινετώτερον δ' ἢ προαίρεσις. ἔκ τε τῶν κειμένων οὖν συμβαίνει ταῦτα, καὶ ἔτι ὁμολογεῖται τοῖς φαινομένοις.

Βιβλίο 3

ὅτι μὲν οὖν μεσότητές εἰσὶ τε ἐν ταῖς ἀρεταῖς, καὶ αὗται προαιρετικά, καὶ αἱ ἐναντία κακίαί, καὶ τίνες εἰσὶν αὗται, καθόλου εἴρηται· καθ' ἐκάστην δὲ λαμβάνοντες λέγωμεν ἐφεξῆς, καὶ πρῶτον εἴπωμεν περὶ ἀνδρείας. - σχεδὸν δὴ δοκεῖ πᾶσιν ὅ τ' ἀνδρείος εἶναι περὶ φόβους καὶ ἡ ἀνδρεία μία τῶν ἀρετῶν. διείλομεν δ' ἐν τῇ διαγραφῇ πρότερον καὶ θράσος καὶ φόβον ἐναντία· καὶ γὰρ ἐστὶ πως ἀντικείμενα ἀλλήλοις. δῆλον οὖν ὅτι καὶ οἱ κατὰ τὰς ἑξείς ταύτας λεγόμενοι ὁμοίως ἀντικείμενται σφίσιν αὐτοῖς, οἷον ὁ δειλὸς (οὗτος γὰρ λέγεται κατὰ τὸ φοβεῖσθαι μᾶλλον ἢ δεῖ καὶ θαρρεῖν ἥττον ἢ δεῖ) καὶ ὁ θρασὺς· καὶ γὰρ οὗτος κατὰ τὸ τοιοῦτος εἶναι οἷος φοβεῖσθαι μὲν ἥττον ἢ δεῖ, θαρρεῖν δὲ μᾶλλον ἢ δεῖ. διὸ καὶ παρωνυμιάζεται· ὁ γὰρ θρασὺς παρὰ τὸ θράσος λέγεται παρωνύμως. ὥστ' ἐπεὶ ἡ ἀνδρεία ἐστὶν ἡ βελτίστη ἑξὶς περὶ φόβους καὶ θάρρη, δεῖ δὲ μὴθ' οὕτως ὥς οἱ θρασεῖς (τὰ μὲν γὰρ ἐλλείπουσι, τὰ δ' ὑπερβάλλουσι) μὴθ' οὕτως ὥς οἱ δειλοί (καὶ γὰρ οὗτοι ταὐτὸ ποιοῦσι, [1228b] πλὴν οὐ περὶ ταῦτά ἀλλ' ἐξ ἐναντίας· τῷ μὲν γὰρ θαρρεῖν ἐλλείπουσι, τῷ δὲ φοβεῖσθαι ὑπερβάλλουσι), δῆλον ὥς ἡ μέση διάθεσις θρασύτητος καὶ δειλίας ἐστὶν ἀνδρεία· αὕτη γὰρ βελτίστη.

δοκεῖ δ' ὁ ἀνδρείος ἄφοβος εἶναι ὥς ἐπὶ τὸ πολὺ, ὁ δὲ δειλὸς φοβητικός, καὶ ὁ μὲν καὶ πολλὰ καὶ ὀλίγα καὶ μεγάλα καὶ μικρὰ φοβεῖσθαι, καὶ σφόδρα καὶ ταχύ, ὁ δὲ τὸ ἐναντίον ἢ οὐ φοβεῖσθαι ἢ ἡρέμα καὶ μόλις καὶ ὀλιγάκις καὶ μεγάλα, καὶ ὁ μὲν ὑπομένει τὰ φοβερά σφόδρα, ὁ δὲ οὐδὲ τὰ ἡρέμα. ποῖα οὖν ὑπομένει ὁ ἀνδρείος; πρῶτον πότερον τὰ ἑαυτῷ φοβερά ἢ τὰ ἐτέρῳ; εἰ μὲν δὴ τὰ ἐτέρῳ φοβερά, οὐθὲν σεμνὸν φαίη ἄν τις εἶναι· εἰ δὲ τὰ αὐτῷ, εἴη ἄν αὐτῷ μεγάλα καὶ πολλὰ φοβερά. φόβου ποιητικὰ ἐκάστω ᾧ φοβερά, οἷον εἰ μὲν σφόδρα φοβερά, εἴη ἄν ἰσχυρὸς ὁ φόβος, εἰ δ' ἡρέμα, ἀσθενής. ὥστε συμβαίνει τὸν ἀνδρεῖον μεγάλους φόβους καὶ πολλοὺς ποιεῖσθαι. ἐδόκει δὲ τούναντίον ἡ ἀνδρεία ἄφοβον παρασκευάζειν, τοῦτο δ' εἶναι ἐν τῷ ἢ μηθὲν ἢ ὀλίγα φοβεῖσθαι, καὶ ἡρέμα καὶ μόλις. ἀλλ' ἴσως τὸ φοβερὸν λέγεται, ὥσπερ καὶ τὸ ἡδὺ καὶ τὸ ἀγαθόν, διχῶς. τὰ μὲν γὰρ ἀπλῶς, τὰ δὲ τινὶ μὲν καὶ ἡδέα καὶ ἀγαθὰ ἐστίν, ἀπλῶς δ' οὐ, ἀλλὰ τούναντίον φαῦλα καὶ οὐχ ἡδέα, ὅσα τοῖς πονηροῖς ὠφέλιμα καὶ ὅσα ἡδέα τοῖς παιδίοις ἢ παιδία. ὁμοίως

δὲ καὶ τὰ φοβερὰ τὰ μὲν ἀπλῶς ἐστί, τὰ δὲ τινί. ἃ μὲν δὴ δειλὸς φοβεῖται ἢ δειλός, τὰ μὲν οὐδενί ἐστι φοβερὰ, τὰ δ' ἡρέμα· τὰ δὲ τοῖς πλείστοις φοβερὰ, καὶ ὅσα τῇ ἀνθρωπίνῃ φύσει, ταῦθ' ἀπλῶς φοβερὰ λέγομεν. ὁ δ' ἀνδρεῖος πρὸς ταῦτ' ἔχει ἀφόβως, καὶ ὑπομένει τὰ τοιαῦτα φοβερὰ, ἃ ἔστι μὲν ὡς φοβερὰ αὐτῷ, ἔστι δ' ὡς οὐ, ἢ μὲν ἄνθρωπος, φοβερὰ, ἢ δ' ἀνδρεῖος, οὐ φοβερὰ ἀλλ' ἢ ἡρέμα ἢ οὐδαμῶς. ἔστι μέντοι φοβερὰ ταῦτα· τοῖς γὰρ πλείστοις φοβερὰ. διὸ καὶ ἐπαινεῖται ἢ ἕξις· ὥσπερ γὰρ ὁ ἰσχυρὸς καὶ ὑγιεινὸς ἔχει. καὶ γὰρ οὗτοι οὐ τῷ ὑπὸ μηθενὸς ὁ μὲν πόνου τριβεσθαι, ὁ δ' ὑπὸ μηδεμιᾶς ὑπερβολῆς, τοιοῦτοι εἰσίν, ἀλλὰ τῷ ὑπὸ τούτων ἀπαθεῖς εἶναι, ἢ ἀπλῶς ἢ ἡρέμα, ὑφ' ὧν οἱ πολλοὶ καὶ οἱ πλείστοι. οἱ μὲν οὖν νοσώδεις καὶ ἀσθενεῖς καὶ δειλοὶ καὶ ὑπὸ τῶν κοινῶν παθημάτων πάσχουσί τι, πλὴν θάττον τε καὶ μᾶλλον ἢ οἱ πολλοί, καὶ ἔτι ὑφ' ὧν οἱ πολλοὶ πάσχουσιν, ὑπὸ τούτων ἀπαθεῖς ἢ ὅλως ἢ ἡρέμα.

ἀπορεῖται δ' εἰ τῷ ἀνδρεῖῳ οὐθέν ἐστι φοβερὸν, οὐδ' ἂν φοβηθεῖ. [1229a] ἢ οὐθέν κωλύει τὸν εἰρημένον τρόπον; ἢ γὰρ ἀνδρεία ἀκολούθησις τῷ λόγῳ ἐστίν, ὁ δὲ λόγος τὸ καλὸν αἰρεῖσθαι κελεύει. διὸ καὶ ὁ μὴ διὰ τοῦτο ὑπομένων αὐτά, οὗτος ἦτοι ἐξέστηκεν ἢ θρασύς· ὁ δὲ διὰ τὸ καλὸν ἄφοβος καὶ ἀνδρεῖος μόνος. ὁ μὲν οὖν δειλὸς καὶ ἃ μὴ δεῖ φοβεῖται, ὁ δὲ θρασὺς καὶ ἃ μὴ δεῖ θαρρεῖ· ὁ δ' ἀνδρεῖος ἅμφω ἃ δεῖ, καὶ ταύτῃ μέσος ἐστίν. ἃ γὰρ ἂν ὁ λόγος κελεύῃ, ταῦτα καὶ θαρρεῖ καὶ φοβεῖται. ὁ δὲ λόγος τὰ μέγαρα λυπηρὰ καὶ φθαρτικὰ οὐ κελεύει ὑπομένειν, ἂν μὴ καλὰ ᾖ. ὁ μὲν οὖν θρασύς, καὶ εἰ μὴ κελεύει, ταῦτα θαρρεῖ, ὁ δὲ δειλὸς οὐδ' ἂν κελεύῃ· ὁ δὲ ἀνδρεῖος μόνος, ἂν κελεύῃ.

ἔστι δ' εἶδη ἀνδρείας πέντε λεγόμενα καθ' ὁμοιότητα· <τὰ> αὐτὰ γὰρ ὑπομένουσιν, ἀλλ' οὐ διὰ τὰ αὐτά. μία μὲν πολιτικὴ· αὕτη δ' ἐστίν ἢ δι' αἰδῶ οὔσα. δευτέρα ἢ στρατιωτικὴ· αὕτη δὲ δι' ἐμπειρίαν καὶ τὸ εἰδέναι, οὐχ ὥσπερ Σωκράτης ἔφη τὰ δεινὰ, ἀλλ' ὅτι τὰς βοηθείας τῶν δεινῶν. τρίτη δ' ἢ δι' ἀπειρίαν καὶ ἄγνοιαν, δι' ἣν τὰ παιδία καὶ οἱ μαινόμενοι οἱ μὲν ὑπομένουσι τὰ φερόμενα, οἱ δὲ λαμβάνουσι τοὺς ὀφεις. ἄλλη δ' ἢ κατ' ἐλπίδα, καθ' ἣν οἱ τε κατευτυχηκότες πολλάκις ὑπομένουσι τοὺς κινδύνους καὶ οἱ μεθύοντες· εὐέλπιδας γὰρ ποιεῖ ὁ οἶνος. ἄλλη δὲ διὰ πάθος ἀλόγιστον, οἷον δι' ἔρωτα καὶ θυμόν. ἂν τε γὰρ ἐρᾷ, θρασὺς μᾶλλον ἢ δειλός, καὶ ὑπομένει πολλοὺς κινδύνους, ὥσπερ ὁ ἐν Μεταποντίῳ τὸν τύραννον ἀποκτείνας καὶ ὁ ἐν Κρήτῃ μυθολογούμενος· καὶ δι'

ὀργήν καὶ θυμὸν ὡσαύτως. ἐκστατικὸν γὰρ ὁ θυμός. διὸ καὶ οἱ ἄγριοι σύες ἀνδρεῖοι δοκοῦσιν εἶναι, οὐκ ὄντες· ὅταν γὰρ ἐκστῶσι, τοιοῦτοι εἰσίν, εἰ δὲ μὴ, ἀνώμαλοι, ὥσπερ οἱ θρασεῖς. ὅμως δὲ μάλιστα φυσικὴ ἡ τοῦ θυμοῦ· ἀήττητον γὰρ ὁ θυμός, διὸ καὶ οἱ παῖδες ἄριστα μάχονται. διὰ νόμον δὲ ἡ πολιτικὴ ἀνδρεία. κατ' ἀλήθειαν δὲ οὐδεμία τούτων, ἀλλὰ πρὸς τὰς παρακελεύσεις τὰς ἐν τοῖς κινδύνοις χρήσιμα ταῦτα πάντα.

περὶ δὲ τῶν φοβερῶν νῦν μὲν ἀπλῶς εἰρήκαμεν, βέλτιον δὲ διορίσασθαι μᾶλλον. ὅλως μὲν οὖν φοβερὰ λέγεται τὰ ποιητικὰ φόβου. τοιαῦτα δ' ἐστὶν ὅσα φαίνεται ποιητικὰ λύπης φθαρτικῆς· τοῖς γὰρ ἄλλην τινὰ προσδεχομένοις λύπην ἑτέρα μὲν ἂν τις ἴσως λύπη γένοιτο καὶ πάθος ἕτερον, φόβος δ' οὐκ ἔσται, οἷον εἴ τις προορῶτο ὅτι λυπήσεται λύπην ἣν οἱ φθονοῦντες λυποῦνται, ἢ τοιαύτην οἷαν οἱ ζηλοῦντες ἢ οἱ αἰσχυρόμενοι. ἀλλ' ἐπὶ μόναις ταῖς τοιαύταις φαινομέναις ἔσσεσθαι λύπαις φόβος γίνεται, ὅσων ἡ φύσις ἀναιρετικὴ τοῦ [1229b] ζῆν. διὸ καὶ σφόδρα τινὲς ὄντες μαλακοὶ περὶ ἔνια ἀνδρεῖοι εἰσὶ, καὶ ἔνιοι σκληροὶ καὶ καρτερικοὶ [καὶ] δειλοί. καὶ δὴ καὶ δοκεῖ σχεδὸν ἴδιον τῆς ἀνδρείας εἶναι τὸ περὶ τὸν θάνατον καὶ τὴν περὶ τούτου λύπην ἔχειν πῶς. εἰ γάρ τις εἴη τοιοῦτος οἷος πρὸς ἀλέας καὶ ψύχη καὶ τὰς τοιαύτας λύπας ὑπομενετικός, ὡς ὁ λόγος, ἀκινδύνους οὕσας, πρὸς δὲ τὸν θάνατον καὶ μαλακὸς καὶ περίφοβος, μὴ δι' ἄλλο τι πάθος ἀλλὰ δι' αὐτὴν τὴν φθοράν, ἄλλος δὲ πρὸς μὲν ἐκείνας μαλακός, πρὸς δὲ τὸν θάνατον ἀπαθής· ἐκεῖνος μὲν ἂν εἶναι δόξειε δειλός, οὗτος δ' ἀνδρεῖος. καὶ γὰρ κίνδυνος ἐπὶ τοῖς τοιοῦτοις λέγεται μόνοις τῶν φοβερῶν, ὅταν πλησίον ᾖ τὸ τῆς τοιαύτης φθορᾶς ποιητικόν. φαίνεται δὲ κίνδυνος, ὅταν πλησίον φαίνεται.

τὰ μὲν οὖν φοβερὰ, περὶ ὅσα φαμὲν εἶναι τὸν ἀνδρεῖον, εἴρηται δὴ ὅτι τὰ φαινόμενα ποιητικὰ λύπης τῆς φθαρτικῆς· ταῦτα μέντοι πλησίον τε φαινόμενα καὶ μὴ πόρρω, καὶ τοσαῦτα τῷ μεγέθει ὄντα ἢ φαινόμενα ὥστ' εἶναι σύμμετρα πρὸς ἄνθρωπον. ἔνια γὰρ ἀνάγκη παντὶ φαίνεσθαι ἀνθρώπῳ φοβερὰ καὶ διαταράττειν. οὐθὲν γὰρ κωλύει, ὥσπερ θερμὰ καὶ ψυχρά, καὶ τῶν ἄλλων δυνάμεων ἐνίας ὑπὲρ ἡμᾶς εἶναι καὶ τὰς τοῦ ἀνθρωπίνου σώματος ἕξεις· οὕτω καὶ τῶν περὶ τὴν ψυχὴν παθημάτων.

οἱ μὲν οὖν δειλοὶ καὶ θρασεῖς ἐπιψεύδονται διὰ τὰς ἕξεις· τῷ μὲν γὰρ δειλῷ τὰ τε μὴ φοβερὰ δοκεῖ φοβερὰ εἶναι καὶ τὰ ἡρέμα σφόδρα, τῷ δὲ θρασεῖ τὸ ἐναντίον τὰ τε φοβερὰ θαρραλέα καὶ τὰ

σφόδρα ἡρέμα, τῷ δ' ἀνδρείῳ τάληθ' ἡ μάλιστα. διόπερ οὐτ' εἴ τις ὑπομένοι τὰ φοβερὰ δι' ἄγνοιαν, ἀνδρεῖος, οἷον εἴ τις τοὺς κεραυνοὺς ὑπομένοι φερομένους διὰ μανίαν, οὐτ' εἴ γινώσκων ὅσος ὁ κίνδυνος, διὰ θυμόν, οἷον οἱ Κελτοὶ πρὸς τὰ κύματα ὅπλα ἀπαντῶσι λαβόντες, καὶ ὅλως ἡ βαρβαρική ἀνδρεία μετὰ θυμοῦ ἐστίν. ἔνιοι δὲ καὶ δι' ἄλλας ἡδονὰς ὑπομένουσιν. καὶ γὰρ ὁ θυμὸς ἡδονὴν ἔχει τινά· μετ' ἐλπίδος γάρ ἐστι τιμωρίας. ἀλλ' ὅμως οὐτ' εἴ διὰ ταύτην οὐτ' εἴ δι' ἄλλην ἡδονὴν ὑπομένει τις τὸν θάνατον ἢ φυγὴν μειζόνων λυπῶν, οὐδεὶς δικαίως <ἂν> ἀνδρεῖος λέγοιτο τούτων. εἴ γὰρ ἦν ἡδὺ τὸ ἀποθνήσκειν, πολλάκις ἂν δι' ἀκρασίαν ἀπέθνησκον οἱ ἀκόλαστοι, ὥσπερ καὶ νῦν αὐτοῦ μὲν τοῦ ἀποθνήσκειν οὐκ ὄντος ἡδέος, τῶν ποιητικῶν δ' αὐτοῦ, πολλοὶ δι' ἀκρασίαν περιπίπτουσιν εἰδότες, ὧν οὐθεὶς <ἂν> ἀνδρεῖος εἶναι δόξειεν, εἴ καὶ πάνυ ἐτοιμῶς ἀποθνήσκειν. οὐτ' εἴ φεύγοντες τὸ πονεῖν, ὅπερ πολλοὶ ποιοῦσιν, οὐδὲ τῶν τοιούτων οὐδεὶς ἀνδρεῖος, καθάπερ καὶ Ἀγάθων φησὶ

[1230a] “φαῦλοι βροτῶν γὰρ τοῦ πονεῖν ἡσώμενοι, θανεῖν ἐρῶσιν.”

ὥσπερ καὶ τὸν Χείρωνα μυθολογοῦσιν οἱ ποιηταὶ διὰ τὴν ἀπὸ τοῦ ἔλκους ὀδύνην εὐξασθαι ἀποθανεῖν ἀθάνατον ὄντα. παραπλησίως δὲ τούτοις καὶ ὅσοι δι' ἐμπειρίαν ὑπομένουσιν τοὺς κινδύνους, ὥνπερ τρόπον σχεδὸν οἱ πλεῖστοι τῶν στρατιωτικῶν ἀνθρώπων ὑπομένουσιν. αὐτὸ γὰρ τοῦναντίον ἔχει ἢ ὡς ᾤετο Σωκράτης, ἐπιστήμην οἰόμενος εἶναι τὴν ἀνδρείαν. οὐτε γὰρ διὰ τὸ εἰδέναι τὰ φοβερὰ θαρροῦσιν οἱ ἐπὶ τοὺς ἰστούς ἀναβαίνειν ἐπιστάμενοι, ἀλλ' ὅτι ἴσασι τὰς βοηθείας τῶν δεινῶν· οὐτε δι' ὃ θαρραλεώτερον ἀγωνίζονται, τοῦτο ἀνδρεία. καὶ γὰρ ἂν ἡ ἰσχὺς καὶ ὁ πλοῦτος κατὰ Θεογνίην ἀνδρεία εἶεν·

“πᾶς γὰρ ἀνὴρ πενίῃ δεδμημένος.” φανερώς <δ'> ἔνιοι δειλοὶ ὄντες ὅμως ὑπομένουσιν δι' ἐμπειρίαν· τοῦτο δέ, ὅτι οὐκ οἶονται κίνδυνον εἶναι· ἴσασι γὰρ τὰς βοηθείας. σημεῖον δέ· ὅταν γὰρ μὴ ἔχειν οἶωνται βοήθειαν, ἀλλ' ἤδη πλησίον ἢ τὸ δεινόν, οὐχ ὑπομένουσιν. ἀλλὰ πάντων τῶν τοιούτων ἀνδρείων οἱ διὰ τὴν αἰδῶ ὑπομένοντες μάλιστα φανεῖν <ἂν> ἀνδρεῖοι, καθάπερ καὶ Ὅμηρος τὸν Ἑκτορά φησιν ὑπομεῖναι τὸν κίνδυνον τὸν πρὸς τὸν Ἀχιλλέα·

“Ἑκτορα δ' αἰδῶς εἴλε.”

<καὶ>

“Πουλυδάμας μοι πρώτος ἐλεγχείην ἀναθήσει.”

καὶ ἐστὶν ἡ πολιτικὴ ἀνδρεία αὕτη. ἡ δ’ ἀληθὴς οὔτε αὕτη οὔτ’ ἐκείνων οὐδεμία, ἀλλὰ ὁμοία μὲν, ὥσπερ καὶ ἡ τῶν θηρίων, ἃ διὰ τὸν θυμὸν ὁμόσε τῇ πληγῇ φέρεται. οὔτε γὰρ ὅτι ἀδοξήσει, δεῖ μένειν φοβούμενους, οὔτε δι’ ὀργήν, οὔτε διὰ τὸ μὴ νομίζειν ἀποθανεῖσθαι, ἢ διὰ τὸ δυνάμεις ἔχειν φυλακτικάς· οὐδὲ γὰρ οἰήσεται οὕτω γε φοβερὸν εἶναι οὐθέν. ἀλλ’ ἐπειδὴ πᾶσα ἀρετὴ προαιρετική (τοῦτο δὲ πῶς λέγομεν, εἴρηται πρότερον, ὅτι ἕνεκά τινος πάντα αἰρεῖσθαι ποιεῖ, καὶ τοῦτό ἐστι τὸ οὗ ἕνεκα, τὸ καλόν), δῆλον ὅτι καὶ ἡ ἀνδρεία ἀρετὴ τις οὔσα ἕνεκά τινος ποιήσει τὰ φοβερά ὑπομένειν, ὥστ’ οὔτε δι’ ἄγνοίαν (ὀρθῶς γὰρ μᾶλλον ποιεῖ κρίνειν) οὔτε δι’ ἡδονήν, ἀλλ’ ὅτι καλόν, ἐπεὶ, ἂν γε μὴ καλὸν ἦ ἀλλὰ μανικόν, οὐχ ὑπομένει· αἰσχρὸν γάρ.

περὶ ποῖα μὲν οὖν ἐστὶν ἡ ἀνδρεία μεσότης καὶ τίνων καὶ διὰ τί, καὶ τὰ φοβερά τίνα δύναμιν ἔχει, σχεδὸν εἴρηται κατὰ τὴν παροῦσαν ἔφοδον ἱκανῶς· περὶ δὲ σωφροσύνης καὶ ἀκολασίας μετὰ ταῦτα διελέσθαι πειρατέον. λέγεται δ’ ὁ ἀκόλαστος πολλαχῶς. ὁ τε γὰρ μὴ κεκολασμένος πῶς μὴδ’ ἰατρευμένος, ὥσπερ ἄτμητος ὁ μὴ [1230b] τετμημένος, καὶ τούτων ὁ μὲν δυνατός, ὁ δ’ ἀδύνατος· ἄτμητον γὰρ τό τε μὴ δυνάμενον τμηθῆναι καὶ τὸ δυνατόν μὲν μὴ τετμημένον δέ. τὸν αὐτὸν δὲ τρόπον καὶ τὸ ἀκόλαστον. καὶ γὰρ τὸ μὴ πεφυκὸς δέχεσθαι κόλασιν, καὶ τὸ πεφυκὸς μὲν μὴ κεκολασμένον δὲ περὶ ἀμαρτίας, περὶ ἧς ὀρθοπραγεῖ ὁ σώφρων, ὥσπερ οἱ παῖδες· κατὰ ταύτην γὰρ ἀκόλαστοι λέγονται τὴν ἀκοκασίαν. ἔτι δ’ ἄλλον τρόπον οἱ δυσίατοι καὶ οἱ ἀνίατοι πάμπαν διὰ κολάσεως. πλεοναχῶς δὲ λεγομένης τῆς ἀκολασίας, ὅτι μὲν περὶ ἡδονάς τινας καὶ λύπας εἰσὶ, φανερόν, καὶ ὅτι ἐν τῷ περὶ ταύτας διακεῖσθαι πῶς καὶ ἀλλήλων διαφέρουσι καὶ τῶν ἄλλων· διεγράψαμεν δὲ πρότερον πῶς τὴν ἀκολασίαν ὀνομάζοντες μεταφέρομεν. τοὺς δὲ ἀκινήτως ἔχοντας δι’ ἀναισθησίαν πρὸς τὰς αὐτὰς ἡδονὰς οἱ μὲν καλοῦσιν ἀναισθήτους, οἱ δὲ ἄλλοις ὀνόμασι τοιούτους προσαγορεύουσιν. ἔστι δ’ οὐ πάνυ γνῶριμον τὸ πάθος οὐδ’ ἐπιπόλαιον διὰ τὸ πάντας ἐπὶ θάτερον ἀμαρτάνειν μᾶλλον καὶ πᾶσιν εἶναι σύμφυτον τὴν τῶν τοιούτων ἡδέων ἥτταν καὶ αἴσθησιν. μάλιστα δ’ εἰσὶ τοιοῦτοι, οἷους οἱ κωμωδοδιδάσκαλοι παράγουσιν ἀγροίκους, οἱ οὐδὲ τὰ μέτρια καὶ τὰ ἀναγκαῖα πλησιάζουσι τοῖς ἡδέσιν.

ἐπεὶ δ’ ὁ σώφρων ἐστὶ περὶ ἡδονάς, ἀνάγκη καὶ περὶ ἐπιθυμίας

τινὰς αὐτὸν εἶναι. δεῖ δὴ λαβεῖν περὶ τίνας. οὐ γὰρ περὶ πάσας οὐδὲ περὶ ἅπαντα τὰ ἡδέα ὁ σώφρων σώφρων ἐστίν, ἀλλὰ τῇ μὲν δόξῃ περὶ δύο τῶν αἰσθητῶν, περὶ τε τὸ γευστὸν καὶ τὸ ἀπτόν, τῇ δ' ἄληθείᾳ περὶ τὸ ἀπτόν· περὶ γὰρ τὴν διὰ τῆς ὄψεως ἡδονὴν τῶν καλῶν ἄνευ ἐπιθυμίας ἀφροδισίων, ἢ λύπην τῶν αἰσχυρῶν, καὶ περὶ τὴν διὰ τῆς ἀκοῆς τῶν εὐαρμόστων ἢ ἀναρμόστων, ἔτι δὲ πρὸς τὰς δι' ὀσφρήσεως, τὰς τε ἀπὸ εὐωδίας καὶ τὰς ἀπὸ δυσωδίας, οὐκ ἔστιν ὁ σώφρων. οὐδὲ γὰρ ἀκόλαστος οὐδεὶς λέγεται τῷ πάσχειν ἢ μὴ πάσχειν. εἰ γοῦν τις ἢ καλὸν ἀνδριάντα θεώμενος ἢ ἵππον ἢ ἄνθρωπον, ἢ ἀκροώμενος ἄδοντος, μὴ βούλοιο μήτε ἐσθίειν μήτε πίνειν μήτε ἀφροδισιάζειν, ἀλλὰ τὰ μὲν καλὰ θεωρεῖν τῶν δ' ἁδόντων ἀκούειν, οὐκ ἂν δόξειεν ἀκόλαστος εἶναι, ὥσπερ οὐδ' οἱ κηλούμενοι παρὰ ταῖς Σειρήσιν. ἀλλὰ περὶ τὰ δύο τῶν αἰσθητῶν ταῦτα, περὶ ἅπερ καὶ τᾶλλα θηρία μόνον τυγχάνει αἰσθητικῶς ἔχοντα, καὶ χαίροντα καὶ λυπούμενα, περὶ τὰ γευστὰ καὶ ἀπτὰ. περὶ δὲ τὰ τῶν ἄλλων αἰσθητῶν ἡδέα σχεδὸν ὁμοίως ἅπαντα [1231a] φαίνεται ἀναισθήτως διακεῖμενα, οἷον περὶ εὐαρμοστίαν ἢ κάλλος. οὐθὲν γάρ, ὃ τι καὶ ἄξιον λόγου, φαίνεται πάσχοντα αὐτῇ τῇ θεωρίᾳ τῶν καλῶν ἢ τῇ ἀκροάσει τῶν εὐαρμόστων, εἰ μὴ τί που συμβέβηκε τερατῶδες· ἀλλ' οὐδὲ πρὸς τὰ εὐώδη ἢ δυσώδη· καίτοι τὰς γε αἰσθήσεις ὀξυτέρας ἔχουσι πάσας. ἀλλὰ καὶ τῶν ὁσμῶν ταύταις χαίρουσιν ὅσαι κατὰ συμβεβηκὸς εὐφραίνουσιν, ἀλλὰ μὴ καθ' αὐτάς. λέγω δὲ «μὴ» καθ' αὐτάς, αἷς ἢ ἐλπίζοντες χαίρομεν ἢ μεμνημένοι, οἷον ὄσων καὶ ποτῶν (δι' ἐτέραν γὰρ ἡδονὴν ταύταις χαίρομεν, τὴν τοῦ φαγεῖν ἢ πιεῖν), καθ' αὐτάς δὲ οἷον αἱ τῶν ἀνθῶν εἰσίν. διὸ ἐμμελῶς ἔφη Στρατόνικος τὰς μὲν καλὸν ὄζειν τὰς δὲ ἡδύ. ἐπεὶ καὶ τῶν περὶ τὸ γευστὸν οὐ περὶ πᾶσαν ἡδονὴν ἐπτόηται τὰ θηρία, οὐδ' ὅσων τῷ ἄκρῳ τῆς γλώττης ἢ αἰσθήσεως, ἀλλ' ὅσων τῷ φάρυγγι, καὶ ἔοικεν ἀφ' ἡ μᾶλλον ἢ γεῦσει τὸ πάθος. διὸ οἱ ὀψοφάγοι οὐκ εὐχονται τὴν γλώτταν ἔχειν μακρὰν ἀλλὰ τὸν φάρυγγα γεράνου, ὥσπερ Φιλόξενος ὁ Ἐρύξιδος. ὥστε περὶ τὰ ἀπτόμενα, ὡς ἀπλῶς εἰπεῖν, θετέον τὴν ἀκολασίαν. ὁμοίως δὲ καὶ ὁ ἀκόλαστος περὶ τὰς τοιαύτας ἐστίν. οἶνοφλυγία γὰρ καὶ γαστριμαργία καὶ λαγνεία καὶ ὀψοφαγία καὶ πάντα τὰ τοιαῦτα περὶ τὰς εἰρημένας ἐστὶν αἰσθήσεις, εἰς ἅπερ μόρια ἢ ἀκολασία διαιρεῖται. περὶ δὲ τὰς δι' ὄψεως ἢ ἀκοῆς ἢ ὀσφρήσεως ἡδονὰς οὐθεὶς λέγεται ἀκόλαστος, ἐὰν ὑπερβάλλῃ, ἀλλ' ἄνευ ὀνειδούς τὰς ἀμαρτίας ψέγομεν ταύτας, καὶ ὅλως περὶ ὅσα

μη λέγονται ἐγκρατεῖς· οἱ δ' ἀκρατεῖς οὐκ εἰσὶν ἀκόλαστοι οὐδὲ σώφρονες.

ἀναίσθητος μὲν οὖν, ἢ ὅπως δεῖ ὀνομάζειν, ὁ οὕτως ἔχων ὥστε καὶ ἐλλείπειν ὅσων ἀνάγκη κοινωνεῖν ὡς ἐπὶ τὸ πολὺ πάντας καὶ χαίρειν· ὁ δ' ὑπερβάλλον ἀκόλαστος. πάντες γὰρ τούτοις φύσει τε χαίρουσι, καὶ ἐπιθυμίας λαμβάνουσι, καὶ οὐκ εἰσὶν οὐδὲ λέγονται ἀκόλαστοι (οὐ γὰρ ὑπερβάλλουσι τῷ χαίρειν μᾶλλον ἢ δεῖ τυγχάνοντες καὶ λυπεῖσθαι μᾶλλον ἢ δεῖ μὴ τυγχάνοντες), οὐδ' ἀνάλγητοι (οὐ γὰρ ἐλλείπουσι τῷ χαίρειν ἢ λυπεῖσθαι, ἀλλὰ μᾶλλον ὑπερβάλλουσιν).

ἐπεὶ δ' ἔστιν ὑπερβολὴ καὶ ἔλλειψις περὶ αὐτά, δηλὸν ὅτι καὶ μεσότης, καὶ βελτίστη αὕτη ἢ ἕξις, καὶ ἀμφοῖν ἐναντία. ὥστ' εἰ σωφροσύνη ἢ βελτίστη ἕξις, περὶ ἧ ὁ ἀκόλαστος, ἢ περὶ τὰ ἡδέα τὰ εἰρημένα τῶν αἰσθητῶν μεσότης σωφροσύνη ἂν εἴη, μεσότης οὕσα ἀκολασίας καὶ ἀναισθησίας· ἢ δ' ὑπερβολὴ ἀκολασία· [1231b] ἢ δ' ἔλλειψις ἥτοι ἀνώνυμος ἢ τοῖς εἰρημένοις ὀνόμασι προσαγορευομένη. ἀκριβέστερον δὲ περὶ τοῦ γένους τῶν ἡδονῶν ἔσται διαιρετέον ἐν τοῖς λεγομένοις ὕστερον περὶ ἐγκρατείας καὶ ἀκρασίας.

τὸν αὐτὸν δὲ τρόπον ληπτέον καὶ περὶ πραότητος καὶ χαλεπότητος· καὶ γὰρ τὸν πρῶτον περὶ λύπην τὴν ἀπὸ θυμοῦ γιγνομένην ὀρῶμεν ὄντα, τῷ πρὸς ταύτην ἔχειν πῶς. διεγράψαμεν δὲ καὶ ἀντεθήκαμεν τῷ ὀργίῳ καὶ χαλεπῷ καὶ ἀγρίῳ (πάντα γὰρ τὰ τοιαῦτα τῆς αὐτῆς ἐστὶ διαθέσεως) τὸν ἀνδραποδώδη καὶ τὸν ἀνόητον. σχεδὸν γὰρ ταῦτα μάλιστα καλοῦσι τοὺς μηδ' ἐφ' ὅσοις δεῖ κινουμένους τὸν θυμόν, ἀλλὰ προπηλακιζομένους εὐχερῶς καὶ ταπεινοὺς πρὸς τὰς ὀλιγωρίας. ἔστι γὰρ ἀντικείμενον τῷ μὲν ταχὺ τὸ μόλις, τῷ δ' ἡρέμα τὸ σφόδρα, τῷ δὲ πολὺν χρόνον τὸ ὀλίγον λυπεῖσθαι ταύτην τὴν λύπην ἣν καλοῦμεν θυμόν. ἐπεὶ δ' ὥσπερ καὶ ἐπὶ τῶν ἄλλων εἵπομεν, καὶ ἐνταῦθ' ἐστὶν ὑπερβολὴ καὶ ἔλλειψις (ὁ μὲν γὰρ χαλεπὸς τοιοῦτος ἐστίν, ὁ καὶ θάττον καὶ μᾶλλον πάσχων καὶ πλείω χρόνον καὶ ὅτ' οὐ δεῖ καὶ ὁποίοις οὐ δεῖ καὶ ἐπὶ πολλοῖς, ὁ δ' ἀνδραποδώδης τούναντίον), δηλὸν ὅτι ἔστι τις καὶ ὁ μέσος τῆς ἀνισότητος. ἐπεὶ οὖν ἡμαρτημένα ἀμφοτέραι αἱ ἕξεις ἐκείναι, φανερόν ὅτι ἐπιεικὴς ἢ μέση τούτων ἕξις· οὔτε γὰρ προτερεῖ οὐθ' ὑστερίζει οὔτε οἷς οὐ δεῖ ὀργίζεται οὔτε οἷς δεῖ οὐκ ὀργίζεται. ὥστ' ἐπεὶ καὶ πραότης ἢ βελτίστη ἕξις περὶ ταῦτα τὰ πάθη ἐστίν, εἴη καὶ ἡ

πραότης μεσότης τις, καὶ ὁ πρᾶος μέσος τοῦ χαλεποῦ καὶ τοῦ ἀνδραποδώδους.

ἔστι δὲ καὶ ἡ μεγαλοψυχία καὶ ἡ μεγαλοπρέπεια καὶ ἡ ἐλευθεριότης μεσότητες. ἡ μὲν ἐλευθεριότης περὶ χρημάτων κτήσιν καὶ ἀποβολήν. ὁ μὲν γὰρ κτήσεται μὲν πάσῃ μᾶλλον χαίρων ἢ δεῖ, ἀποβολῇ δὲ πάσῃ λυπούμενος μᾶλλον ἢ δεῖ ἀνελεύθερος, ὁ δ' ἀμφοτέρωθεν ἤττον ἢ δεῖ ἄσωτος, ὁ δ' ἄμφω ὡς δεῖ ἐλευθέριος. τοῦτο δὲ λέγω τὸ ὡς δεῖ, καὶ ἐπὶ τούτων καὶ ἐπὶ τῶν ἄλλων, τὸ ὡς ὁ λόγος ὁ ὀρθός. ἐπεὶ δ' ἐκεῖνοι μὲν εἰσιν ἐν ὑπερβολῇ καὶ ἐλλείπει, ὅπου δὲ ἔσχατα εἰσὶ, καὶ μέσον, καὶ τοῦτο βέλτιστον, ἐν δὲ περὶ ἕκαστον τῷ εἶδει τὸ βέλτιστον· ἀνάγκη καὶ τὴν ἐλευθεριότητα μεσότητα εἶναι ἀσωτίας καὶ ἀνελευθερίας περὶ χρημάτων κτήσιν καὶ ἀποβολήν. διχῶς δὲ τὰ χρήματα λέγομεν καὶ τὴν χρηματιστικὴν. ἡ μὲν γὰρ καθ' αὐτὸ χρήσις τοῦ κτήματος ἐστίν, [1232a] οἷον ὑποδήματος ἢ ἱματίου, ἡ δὲ κατὰ συμβεβηκὸς μὲν, οὐ μέντοι οὕτως ὡς ἂν εἴ τις σταθμῶ χρήσαιο τῷ ὑποδήματι, ἀλλ' οἷον ἡ πώλησις καὶ ἡ μίσθωσις· χρήται γὰρ ὑποδήματι. ὁ δὲ φιλάργυρος ὁ περὶ τὸ νόμισμά ἐστιν ἐσπουδακώς, τὸ δὲ νόμισμα τῆς κτήσεως ἀντὶ τῆς κατὰ συμβεβηκὸς χρήσεως ἐστίν· ὁ δ' ἀνελεύθερος ἂν εἴη καὶ ἄσωτος περὶ τὸν κατὰ συμβεβηκὸς τρόπον τοῦ χρηματισμοῦ, καὶ γὰρ ἐπὶ τοῦ κατὰ φύσιν χρηματισμοῦ τὴν αὐξήσιν διώκει· ὁ δ' ἄσωτος ἐλλείπει τῶν ἀναγκαίων· ὁ δ' ἐλευθέριος τὴν περιουσίαν δίδωσιν. αὐτῶν δὲ τούτων εἶδη λέγονται διαφέροντα τῷ μᾶλλον καὶ ἤττον περὶ μόρια, οἷον ἀνελεύθερος φειδωλὸς καὶ κίμβιξ καὶ αἰσχροκερδής, φειδωλὸς μὲν ἐν τῷ μὴ προΐεσθαι, αἰσχροκερδὴς δ' ἐν τῷ ὅτιοῦν προσίεσθαι, κίμβιξ δὲ ὁ σφόδρα περὶ μικρὰ διατεινόμενος, παραλογιστὴς δὲ καὶ ἀποστερητὴς ὁ ἄδικος κατ' ἀνελευθερίαν. καὶ τοῦ ἀσώτου ὡσαύτως λαφύκτης μὲν ὁ ἐν τῷ ἀτάκτως ἀναλίσκειν, ἀλόγιστος δὲ ὁ ἐν τῷ μὴ ὑπομένειν τὴν ἀπὸ λογισμοῦ λύπην.

περὶ δὲ μεγαλοψυχίας ἐκ τῶν τοῖς μεγαλοψύχοις ἀποδιδομένων δεῖ διορίσαι τὸ ἴδιον. ὥσπερ γὰρ καὶ τὰ ἄλλα <ἀ> κατὰ τὴν γειννίασιν καὶ ὁμοιότητα μέχρι τοῦ λανθάνει πόρρω προϊόντα, καὶ περὶ τὴν μεγαλοψυχίαν ταῦτο συμβέβηκεν. διὸ ἐνίοτε οἱ ἐναντίοι τοῦ αὐτοῦ ἀντιποιοῦνται, οἷον ὁ ἄσωτος τῷ ἐλευθερίῳ καὶ ὁ αὐθάδης τῷ σεμνῷ καὶ ὁ θρασὺς τῷ ἀνδρείῳ· εἰσὶ γὰρ καὶ περὶ ταῦτα καὶ ὅμοροι μέχρι τινός, ὥσπερ ὁ ἀνδρεῖος ὑπομενετικὸς κινδύνων καὶ ὁ θρασὺς, ἀλλ' ὁ μὲν ὧδε ὁ δ' ὧδε· ταῦτα δὲ διαφέρει πλεῖστον. λέγομεν δὲ τὸν

μεγαλόψυχον κατὰ τὴν τοῦ ὀνόματος προσηγορίαν, ὥσπερ ἐν μεγέθει τινὶ ψυχῆς καὶ δυνάμεως. ὥστε καὶ τῷ σεμνῷ καὶ τῷ μεγαλοπρεπεῖ ὅμοιος εἶναι δοκεῖ, ὅτε καὶ πάσαις ταῖς ἀρεταῖς ἀκολουθεῖν φαίνεται. καὶ γὰρ τὸ ὀρθῶς κρῖναι τὰ μεγάλα καὶ μικρὰ τῶν ἀγαθῶν ἐπαινετόν. δοκεῖ δὲ ταῦτ' εἶναι μεγάλα, ἃ διώκει ὁ τὴν κρατίστην ἔχων ἕξιν περὶ τὰ τοιαῦτ' εἶναι ἡδέα. ἡ δὲ μεγαλοψυχία κρατίστη· κρίνει δ' ἡ περὶ ἕκαστον ἀρετὴ τὸ μείζον καὶ τὸ ἔλαττον ὀρθῶς, ἅπερ ὁ φρόνιμος ἂν κελεύσειε καὶ ἡ ἀρετὴ, ὥστε ἔπεσθαι αὐτῇ πάσας τὰς ἀρετάς, ἢ αὐτὴν ἔπεσθαι πάσαις. - ἔτι δοκεῖ μεγαλοψύχου εἶναι τὸ καταφρονητικὸν εἶναι. ἐκάστη δ' ἀρετὴ καταφρονητικούς ποιεῖ [1232b] τῶν παρὰ τὸν λόγον μεγάλων, οἷον ἀνδρεία κινδύνων (μέγα γὰρ οἶεται εἶναι τῶν αἰσχυρῶν, καὶ πλῆθος οὐ πᾶν φοβερόν), καὶ σώφρων ἡδονῶν μεγάλων καὶ πολλῶν, καὶ ἐλευθέριος χρημάτων. μεγαλοψύχου δὲ δοκεῖ τοῦτο διὰ τὸ περὶ ὀλίγα σπουδάζειν, καὶ ταῦτα μεγάλα, καὶ οὐχ ὅτι δοκεῖ ἐτέρῳ τινί, καὶ μᾶλλον ἂν φροντίσειεν ἀνὴρ μεγαλόψυχος, τί δοκεῖ ἐνὶ σπουδαίῳ ἢ πολλοῖς τοῖς τυγχάνουσιν, ὥσπερ Ἀντιφῶν ἔφη πρὸς Ἀγάθωνα κατεψηφισμένος τὴν ἀπολογία ἐπαινέσαντα. καὶ τὸ ὀλίγων τοῦ μεγαλοψύχου μάλιστ' εἶναι πάθος ἴδιον. πάλιν περὶ τιμῆς καὶ τοῦ ζῆν καὶ πλούτου, περὶ ὧν σπουδάζειν δοκοῦσιν οἱ ἄνθρωποι, οὐθὲν φροντίζειν περὶ τῶν ἄλλων πλὴν περὶ τιμῆς. καὶ λυπηθήσονται ἂν ἀτιμαζόμενος καὶ ἀρχόμενος ὑπὸ ἀναξίου. καὶ χαίρει μάλιστα τυγχάνων. - οὕτω μὲν οὖν δόξειεν ἂν ἐναντίως ἔχειν· τῷ γὰρ εἶναι τε μάλιστα περὶ τιμὴν καὶ καταφρονητικὸν εἶναι τῶν πολλῶν [καὶ] δόξης οὐχ ὁμολογεῖσθαι. δεῖ δὴ τοῦτο διορίσαντας εἰπεῖν. ἔστι γὰρ τιμὴ καὶ μικρὰ καὶ μεγάλη διχῶς. ἡ γὰρ τῷ ὑπὸ πολλῶν τῶν τυχόντων ἢ τῷ ὑπὸ τῶν ἀξίων λόγου, καὶ πάλιν τῷ ἐπὶ τίνι ἢ τιμῇ διαφέρει. μεγάλη γὰρ οὐ τῷ πλήθει τῶν τιμώντων οὐδὲ τῷ ποιῶ μόνον, ἀλλὰ καὶ τῷ τιμίαν εἶναι· τῇ ἀληθείᾳ δὲ καὶ ἀρχαί καὶ τᾶλλα ἀγαθὰ τίμια καὶ ἄξια σπουδῆς ταῦτα ὅσα μεγάλα ἀληθῶς ἐστίν, ὥστε καὶ ἀρετὴ οὐδεμία ἄνευ μεγέθους· διὸ δοκοῦσι μεγαλοψύχους ποιεῖν ἐκάστη, περὶ ὃ ἐστὶν ἐκάστη αὐτῶν, ὥσπερ εἵπομεν. - ἀλλ' ὅμως ἐστὶ τις παρὰ τὰς ἄλλας ἀρετάς μία μεγαλοψυχία, ὥσπερ καὶ ἰδίᾳ μεγαλόψυχον τοῦτον λεκτέον τὸν ἔχοντα αὐτήν. ἐπεὶ δ' ἐστὶν ἓν αὐτῶν ἀγαθῶν τὰ μὲν τίμια τὰ δ' ὡς διωρίσθη πρότερον, τῶν τοιούτων ἀγαθῶν δὲ τὰ μὲν μεγάλα κατ' ἀλήθειαν τὰ δὲ μικρά, καὶ τούτων ἔνιοι ἄξιοι καὶ ἀξιοῦσιν αὐτούς, ἐν τούτοις ζητητέος ὁ μεγαλόψυχος.

τετραῶς δ' ἀνάγκη διαφέρειν. ἔστι μὲν γὰρ ἄξιον εἶναι μεγάλων καὶ ἀξιοῦν ἑαυτὸν τούτων, ἔστι δὲ μικρὰ καὶ ἄξιόν τινα τηλικούτων καὶ ἀξιοῦν ἑαυτὸν τούτων, ἔστι δ' ἀνάπαλιν πρὸς ἑκάτερα αὐτῶν· ὁ μὲν γὰρ ἂν εἴη τοιοῦτος οἷος ἄξιος ὢν μικρῶν μεγάλων ἀξιοῦν ἑαυτὸν τῶν ἐντίμων ἀγαθῶν, ὁ δὲ ἄξιος ὢν μεγάλων ἀξιοίῃ ἂν μικρῶν ἑαυτόν. ὁ μὲν οὖν ἄξιος μικρῶν, μεγάλων δ' ἀξίων ἑαυτὸν ψεκτός (ἀνόητον γὰρ καὶ οὐ καλὸν τὸ παρὰ τὴν ἀξίαν τυγχάνειν), ψεκτὸς δὲ καὶ ὅστις ἄξιος ὢν ὑπαρχόντων αὐτῷ τῶν τοιούτων μετέχειν μὴ ἀξιοῖ ἑαυτόν· [1233a] λείπεται δὲ ἐνταῦθα ἐναντίος τούτοις ἀμφοτέροις, ὅστις ὢν ἄξιος μεγάλων ἀξιοῖ αὐτὸς ἑαυτὸν τούτων, καὶ τοιοῦτός ἐστιν οἷος ἀξιοῦν ἑαυτόν. οὗτος ἐπαινετὸς καὶ μέσος τούτων. ἐπεὶ οὖν περὶ τιμῆς αἶρεσιν καὶ χρῆσιν καὶ τῶν ἄλλων ἀγαθῶν τῶν ἐντίμων ἀρίστη ἐστὶ διάθεσις ἡ μεγαλοψυχία, καὶ τοῦτ' ἀποδίδομεν, καὶ οὐ περὶ τὰ χρήσιμα, τῷ μεγαλοψύχῳ, ἅμα δὲ καὶ ἡ μεσότης αὕτη ἐπαινετωτάτη· δηλὸν ὅτι καὶ ἡ μεγαλοψυχία μεσότης ἂν εἴη, τῶν δ' ἐναντίων, ὥσπερ διεγράψαμεν, ἡ μὲν ἐπὶ τὸ ἀξιοῦν ἑαυτὸν ἀγαθῶν μεγάλων ἀνάξιον ὄντα χαυνότης (τοὺς τοιούτους γὰρ χαύνους λέγομεν, ὅσοι μεγάλων οἶονται ἄξιοι εἶναι οὐκ ὄντες), ἡ δὲ περὶ τὸ ἄξιον ὄντα μὴ ἀξιοῦν ἑαυτὸν μεγάλων μικροψυχία (μικροψύχου γὰρ εἶναι δοκεῖ, ὅστις ὑπαρχόντων δι' ἃ δικαίως ἂν ἡξιοῦτο, μὴ ἀξιοῖ μηθενὸς μεγάλου ἑαυτόν), ὥστ' ἀνάγκη καὶ τὴν μεγαλοψυχίαν εἶναι μεσότητα χαυνότητος καὶ μικροψυχίας. ὁ δὲ τέταρτος τῶν διορισθέντων οὔτε ἀμπαν ψεκτὸς οὔτε μεγαλόψυχος, περὶ οὐδὲν ἔχον· ὢν μέγεθος· οὔτε γὰρ ἄξιος οὔτε ἀξιοῖ μεγάλων, διὸ οὐκ ἐναντίος. καίτοι δόξειεν ἂν ἐναντίον εἶναι τῷ μεγάλων ἀξίῳ ὄντι μεγάλων τὸ μικρῶν ὄντα ἄξιον <μικρῶν> ἀξιοῦν ἑαυτόν. οὐκ ἔστι δ' ἐναντίος οὔτε τῷ μὴ μεμπτὸς εἶναι (ὥς γὰρ ὁ λόγος κελεύει, ἔχει)· καὶ ὁ αὐτός ἐστι τῇ φύσει τῷ μεγαλοψύχῳ (ὢν γὰρ ἄξιοι, τούτων ἀξιοῦσιν αὐτοὺς ἄμφω)· καὶ ὁ μὲν γένοιτ' ἂν μεγαλόψυχος (ἀξιώσει γὰρ ὢν ἐστιν ἄξιος), ὁ δὲ μικρόψυχος, ὃς ὑπαρχόντων αὐτῷ μεγάλων κατὰ τιμὴν ἀγαθῶν οὐκ ἀξιοῖ, τί ἂν ἐποίει, εἰ μικρῶν ἄξιος ἦν; εἰ γὰρ [ἂν] μεγάλων ἀξίων χαῦνος ἦν, ἢ ἐλαττόνων ἔτι. διὸ καὶ οὐθεὶς ἂν εἴποι μικρόψυχον, εἴ τις μέτοικος ὢν ἄρχειν μὴ ἀξιοῖ ἑαυτόν, ἀλλ' ὑπέικει· ἀλλ' εἴ τις εὐγενὴς ὢν καὶ ἡγούμενος μέγα εἶναι τὸ ἄρχειν.

ἔστι δὲ καὶ ὁ μεγαλοπρεπὴς οὐ περὶ τὴν τυχοῦσαν πρᾶξιν καὶ προαίρεσιν, ἀλλὰ τὴν δαπάνην, εἰ μή που κατὰ μεταφορὰν λέγομεν· ἄνευ δὲ δαπάνης μεγαλοπρέπεια οὐκ ἔστιν. τὸ μὲν γὰρ πρέπον ἐν

κόσμῳ ἐστίν, ὁ δὲ κόσμος οὐκ ἐκ τῶν τυχόντων ἀναλωμάτων, ἀλλ' ἐν ὑπερβολῇ τῶν ἀναγκαίων ἐστίν. ὁ δὴ ἐν μεγάλῃ δαπάνῃ τοῦ πρέποντος μεγέθους προαιρετικός, καὶ τῆς τοιαύτης μεσότητος καὶ ἐπὶ τῇ τοιαύτῃ ἡδονῇ ὀρεκτικός, μεγαλοπρεπής. ὁ δ' ἐπὶ τὸ μείζον καὶ παρὰ μέλος, ἀνώνυμος· οὐ μὴν ἀλλ' ἔχει τινὰ [1233b] γειννίασιν, οὓς καλοῦσί τινες ἀπειροκάλους καὶ σαλάκωνας. οἷον εἰ εἰς γάμον δαπανῶν τις τοῦ ἀγαπητοῦ, πλούσιος ὢν, δοκεῖ πρέπειν ἑαυτῷ τοιαύτην κατασκευὴν οἷον ἀγαθοδαιμονιστὰς ἐστιῶντι, οὗτος μὲν μικροπρεπής, ὁ δὲ τοιοῦτους δεχόμενος ἐκείνως μὴ δόξης χάριν μηδὲ δι' ἐξουσίαν ὅμοιος τῷ σαλάκωνι, ὁ δὲ κατ' ἀξίαν καὶ ὥς ὁ λόγος, μεγαλοπρεπής· τὸ γὰρ πρέπον κατ' ἀξίαν ἐστίν· οὐθὲν γὰρ πρέπει τῶν παρὰ τὴν ἀξίαν. δεῖ δὲ πρέπον εἶναι (καὶ γὰρ τοῦ πρέποντος κατ' ἀξίαν καὶ πρέπον) καὶ περὶ ὃ (οἷον περὶ οἰκέτου γάμον ἕτερον τὸ πρέπον καὶ περὶ ἐρωμένου) καὶ αὐτῷ, εἴπερ ἐπὶ τοσοῦτον ἢ τοιοῦτον, οἷον τὴν θεωρίαν οὐκ ᾤετο Θεμιστοκλεῖ πρέπειν, ἣν ἐποιήσατο Ὀλυμπίαζε, διὰ τὴν προϋπάρξασαν ταπεινότητα, ἀλλὰ Κίμωνι. ὁ δ' ὅπως ἔτυχεν ἔχων πρὸς τὴν ἀξίαν [ὁ] οὐθεις τούτων. καὶ ἐπ' ἐλευθεριότητος ὡσαύτως· ἔστι γὰρ τις οὗτ' ἐλευθέριος οὗτ' ἀνελεύθερος.

σχεδὸν δὲ καὶ τῶν ἄλλων ἕκαστα τῶν περὶ τὸ ἦθος ἐπαινετῶν καὶ ψεκτῶν τὰ μὲν ὑπερβολαὶ τὰ δ' ἐλλείψεις τὰ δὲ μεσότητές εἰσι παθητικά. - οἷον ὁ φθονερὸς καὶ ἐπιχαιρέκακος. καθ' ὅς γὰρ ἕξεις λέγονται, ὁ μὲν φθόνος τὸ λυπεῖσθαι ἐπὶ τοῖς κατ' ἀξίαν εὖ πράττουσιν ἐστίν, τὸ δὲ τοῦ ἐπιχαιρεκάκου πάθος ἐπὶ τὸ αὐτὸ ἀνώνυμον, ἀλλ' ὁ ἔχων δηλός, ἐπὶ τὸ χαίρειν ταῖς παρὰ τὴν ἀξίαν κακοπραγίαις. μέσος δὲ τούτων ὁ νεμεσητικός, καὶ ὁ ἐκάλουν οἱ ἀρχαῖοι τὴν νέμεσιν, τὸ λυπεῖσθαι μὲν ἐπὶ ταῖς παρὰ τὴν ἀξίαν κακοπραγίαις καὶ εὐπραγίαις, χαίρειν δ' ἐπὶ ταῖς ἀξίαις· διὸ καὶ θεὸν οἶονται εἶναι τὴν νέμεσιν. - αἰδῶς δὲ μεσότης ἀναισχυντίας καὶ καταπλήξεως· ὁ μὲν γὰρ μηδεμιᾶς φροντίζων δόξης ἀναισχυντος, ὁ δὲ πάσης ὁμοίως καταπλήξ, ὁ δὲ τῆς τῶν φαινομένων ἐπεικῶν αἰδήμων. - φιλία δὲ μεσότης ἔχθρας καὶ κολακείας· ὁ μὲν γὰρ εὐχερῶς ἅπαντα πρὸς τὰς ἐπιθυμίας ὁμιλῶν κόλαξ, ὁ δὲ πρὸς ἀπάσας ἀντικρούων ἀπεχθητικός, ὁ δὲ μὴ [τε] πρὸς ἅπασαν ἡδονὴν μὴτ' ἀκολουθῶν μὴτ' ἀντιτείνων, ἀλλὰ πρὸς τὸ φαινόμενον βέλτιστον, φίλος. - σεμνότης δὲ μεσότης αὐθαδείας καὶ ἀρεσκείας· ὁ μὲν γὰρ μηδὲν πρὸς ἕτερον ζῶν καταφρονητικὸς αὐθάδης, ὁ δὲ πάντα πρὸς

ἄλλον ἢ καὶ πάντων ἐλάττων ἄρεσκος, ὁ δὲ τὰ μὲν τὰ δὲ μή, καὶ πρὸς τοὺς ἀξίους οὕτως ἔχων σεμνός. - ὁ δὲ ἀληθὴς καὶ ἀπλοῦς, ὃν καλοῦσιν αὐθέκαστον, μέσος τοῦ εἴρωνος καὶ ἀλαζόνος. ὁ μὲν γὰρ ἐπὶ τὰ [1234a] χεῖρω καθ' αὐτοῦ ψευδόμενος μὴ ἀγνοῶν εἴρων, ὁ δ' ἐπὶ τὰ βελτίω ἀλαζών, ὁ δ' ὥς ἔχει, ἀληθὴς καὶ καθ' Ὅμηρον πεπνυμένος· καὶ ὅλως ὁ μὲν φιλαλήθης, ὁ δὲ φιλοψευδής. - ἔστι δὲ καὶ ἡ εὐτραπελία μεσότης, καὶ ὁ εὐτράπελος μέσος τοῦ ἀγροίκου καὶ δυστραπέλου καὶ τοῦ βωμολόχου. ὥσπερ γὰρ περὶ τροφήν ὁ σικχὸς τοῦ παμφάγου διαφέρει τῷ ὃ μὲν μηθὲν ἢ ὀλίγα καὶ χαλεπῶς προσίεσθαι, ὁ δὲ πάντα εὐχερῶς, οὕτω καὶ ὁ ἄγροικος ἔχει πρὸς τὸν φορτικὸν καὶ βωμολόχον· ὁ μὲν γὰρ οὐθὲν γελοῖον ἀλλὰ χαλεπῶς προσίεται, ὁ δὲ πάντα εὐχερῶς καὶ ἡδέως. δεῖ δ' οὐδέτερον, ἀλλὰ τὰ μὲν τὰ δὲ μή, καὶ κατὰ τὸν λόγον· οὗτος δ' εὐτράπελος. ἡ δ' ἀπόδειξις ἡ αὐτή· ἢ τε γὰρ εὐτραπελία ἡ τοιαύτη, καὶ μὴ ἦν μεταφέροντες λέγομεν, ἐπιεικεστάτη ἔξις, καὶ ἡ μεσότης ἐπαινετή, τὰ δ' ἄκρα ψεκτά. οὐσης δὲ διττῆς τῆς εὐτραπελίας (ἡ μὲν γὰρ ἐν τῷ χαίρειν ἐστὶ τῷ γελοίῳ καὶ τῷ εἰς αὐτόν, ἐὰν ἦ τοιονδί, ὣν ἐν καὶ τὸ σκῶμμα ἐστίν, ἡ δ' ἐν τῷ δύνασθαι τοιαῦτα πορίζεσθαι), ἕτεραι μὲν εἰσιν ἀλλήλων, ἀμφοτέραι μέντοι μεσότητες. καὶ γὰρ τὸν δυνάμενον τοιαῦτα πορίζεσθαι ἐφ' ὅσοις ἡσθήσεται <ὁ> εὖ κρίνων, κἂν εἰς αὐτὸν ἢ τὸ γελοῖον, μέσος ἔσται τοῦ φορτικοῦ καὶ τοῦ ψυχροῦ. ὁ δ' ὅρος οὗτος βελτίων ἢ τὸ <μὴ> λυπηρὸν εἶναι τὸ λεχθὲν τῷ σκωπτομένῳ ὄντι ὁποιοῦν· μᾶλλον γὰρ δεῖ τῷ ἐν μεσότητι ὄντι ἀρέσκειν· οὗτος γὰρ κρίνει εὖ.

πᾶσαι δ' αὐταὶ αἱ μεσότητες ἐπαινεταὶ μὲν, οὐκ εἰσὶ δ' ἀρεταί, οὐδ' αἱ ἐναντίαι κακίαι· ἄνευ προαιρέσεως γάρ. ταῦτα δὲ πάντ' ἐστὶν ἐν ταῖς τῶν παθημάτων διαιρέσεσιν· ἕκαστον γὰρ αὐτῶν πάθος τι ἐστίν. διὰ δὲ τὸ φυσικὰ εἶναι εἰς τὰς φυσικὰς συμβάλλεται ἀρετάς· ἔστι γάρ, ὥσπερ λεχθήσεται ἐν τοῖς ὕστερον, ἐκάστη πως ἀρετὴ καὶ φύσει καὶ ἄλλως μετὰ φρονήσεως. ὁ μὲν οὖν φθόνος εἰς ἀδικίαν συμβάλλεται (πρὸς γὰρ ἄλλον αἱ πράξεις αἱ ἀπ' αὐτοῦ) καὶ ἡ νέμεσις εἰς δικαιοσύνην, ἡ αἰδὼς εἰς σωφροσύνην, διὸ καὶ ὀρίζονται ἐν τῷ γένει τούτῳ τὴν σωφροσύνην· ὁ δ' ἀληθὴς καὶ ψευδὴς ὁ μὲν ἔμφρων, ὁ δ' ἄφρων.

ἔστι δ' ἐναντιώτερον τοῖς ἄκροις τὸ μέσον ἢ ἐκεῖνα [1234b] ἀλλήλοις, διότι τὸ μὲν μετ' οὐδετέρου γίνεται αὐτῶν, τὰ δὲ πολλάκις μετ' ἀλλήλων καὶ εἰσιν ἐνίοτε οἱ αὐτοὶ θρασυδείλοι, καὶ τὰ μὲν

ἄσωτοι τὰ δὲ ἀνελεύθεροι, καὶ ὅλως ἀνώμαλοι κακῶς. ὅταν μὲν γὰρ καλῶς ἀνώμαλοι ᾖσιν, οἱ μέσοι γίνονται· ἐν τῷ μέσῳ γὰρ ἐστὶ πῶς τὰ ἄκρα.

αἱ δὲ ἐναντιώσεις οὐ δοκοῦσιν ὑπάρχειν τοῖς ἄκροις πρὸς τὸ μέσον ὁμοίως ἀμφοτέραι, ἀλλ' ὅτε μὲν καθ' ὑπερβολὴν ὅτε δὲ κατ' ἔλλειψιν. αἷτια δὲ τὰ τε πρῶτα ῥηθέντα δύο, ὀλιγότης τε, οἶον τῶν πρὸς τὰ ἡδέα ἀναισθήτων, καὶ ὅτι ἐφ' ὃ ἀμαρτάνομεν μᾶλλον, τοῦτο ἐναντιώτερον εἶναι δοκεῖ· τὸ δὲ τρίτον, ὅτι τὸ ὁμοιότερον ἦττον ἐναντίον φαίνεται, οἶον πέπονθε τὸ θράσος πρὸς τὸ θάρσος καὶ ἀσωτία πρὸς ἐλευθεριότητα.

περὶ μὲν οὖν τῶν ἄλλων ἀρετῶν τῶν ἐπαινετῶν εἴρηται σχεδόν· περὶ δὲ δικαιοσύνης ἤδη λεκτέον.

Βιβλίο 7

περὶ φιλίας, τί ἐστὶ καὶ ποῖόν τι, καὶ τίς ὁ φίλος, καὶ πότερον ἡ φιλία μοναχῶς λέγεται ἢ πλεοναχῶς, καὶ εἰ πλεοναχῶς, πόσα ἐστίν, ἔτι δὲ πῶς χρηστέον τῷ φίλῳ καὶ τί τὸ δίκαιον τὸ φιλικόν, ἐπισκεπτέον οὐθενὸς ἤττον τῶν περὶ τὰ ἥθη καλῶν καὶ αἰρετῶν. τῆς τε γὰρ πολιτικῆς ἔργον εἶναι δοκεῖ μάλιστα ποιῆσαι φιλίαν, καὶ τὴν ἀρετὴν διὰ τοῦτό φασιν εἶναι χρήσιμον· οὐ γὰρ ἐνδέχεσθαι φίλους ἑαυτοῖς εἶναι τοὺς ἀδικουμένους ὑπ’ ἀλλήλων. ἔτι τὸ δίκαιον καὶ τὸ ἄδικον περὶ τοὺς φίλους εἶναι μάλιστα πάντες φαμέν, καὶ ὁ αὐτὸς δοκεῖ ἀνὴρ εἶναι καὶ ἀγαθὸς καὶ φίλος, καὶ φιλία ἠθικὴ τις εἶναι ἕξις, καὶ ἐάν τις βούληται ποιῆσαι ὥστε μὴ ἀδικεῖν, ἀλλ’ εἰς φίλους ποιῆσαι· οἱ γὰρ ἀληθινοὶ φίλοι οὐκ ἀδικοῦσιν. ἀλλὰ μὴν καὶ ἐὰν δίκαιοι ᾖσιν, οὐκ ἀδικήσουσιν· ἢ ταὐτὸν ἄρα ἢ ἐγγύς τι ἢ δικαιοσύνη καὶ ἡ φιλία. πρὸς δὲ τούτοις τῶν μεγίστων ἀγαθῶν τὸν φίλον εἶναι ὑπολαμβάνομεν, τὴν δὲ ἀφιλίαν καὶ τὴν ἐρημίαν δεινότατον, ὅτι ὁ βίος ἅπας καὶ ἡ ἐκούσιος ὁμιλία μετὰ τούτων· μετ’ οἰκείων γὰρ ἢ μετὰ συγγενῶν [1235a] ἢ μεθ’ ἐταίρων συνδιημερεύομεν, ἢ τέκνων ἢ γονέων ἢ γυναικός. καὶ τὰ ἴδια δίκαια τὰ πρὸς τοὺς φίλους ἐστὶν ἐφ’ ἡμῖν μόνον, τὰ δὲ πρὸς τοὺς ἄλλους νενομοθέτῃται, καὶ οὐκ ἐφ’ ἡμῖν.

ἀπορεῖται δὲ πολλὰ περὶ τῆς φιλίας, πρῶτον μὲν ὡς οἱ ἔξωθεν παραλαμβάνοντες καὶ ἐπὶ πλέον λέγοντες· δοκεῖ γὰρ τοῖς μὲν τὸ ὅμοιον τῷ ὁμοίῳ εἶναι φίλον, ὅθεν εἴρηται

“ὡς αἰεὶ τὸν ὅμοιον ἄγει θεὸς ὡς τὸν ὅμοιον·”

“καὶ γὰρ κολοῖς παρὰ κολοίων·”

“ἔγνω δὲ φῶρ τε φῶρα, καὶ λύκος λύκον.” οἱ δὲ φυσιολόγοι καὶ τὴν ὅλην φύσιν διακοσμοῦσιν ἀρχὴν λαβόντες τὸ τὸ ὅμοιον ἰέναι πρὸς τὸ ὅμοιον, διὸ Ἐμπεδοκλῆς καὶ τὴν κύν’ ἔφη καθῆσθαι ἐπὶ τῆς κεραμῖδος διὰ τὸ ἔχειν πλεῖστον ὅμοιον. οἱ μὲν οὖν οὕτω τὸ φίλον λέγουσιν· οἱ δὲ τὸ ἐναντίον τῷ ἐναντίῳ φασὶν εἶναι φίλον. τὸ μὲν γὰρ ἐρώμενον καὶ ἐπιθυμητὸν πᾶσιν εἶναι φίλον, ἐπιθυμεῖ δὲ οὐ τὸ ξηρὸν τοῦ ξηροῦ, ἀλλ’ ὑγροῦ, ὅθεν εἴρηται

“ἐρᾷ μὲν ὄμβρου γαῖα” καὶ τὸ

“μεταβολὴ πάντων γλυκύ.”

ἡ δὲ μεταβολὴ εἰς τὸναντίον. τὸ δ’ ὅμοιον ἐχθρὸν τῷ ὁμοίῳ· καὶ

γάρ

“κεραμεὺς κεραμεῖ κοτέει”, καὶ τὰ ἀπὸ τῶν αὐτῶν τρεφόμενα πολέμια ἀλλήλοις ζῶα. αὗται μὲν οὖν αἱ ὑπολήψεις τοσοῦτον διεστάσιν. αἱ μὲν γὰρ τὸ ὅμοιον φίλον, τὸ δ’ ἐναντίον πολέμιον,

“τῷ πλεονί δ’ αἰεὶ πολέμιον καθίσταται

τοῦλασσον, ἐχθρᾶς θ’ ἡμέρας κατάρχεται”, ἔτι δὲ καὶ οἱ τόποι κεχωρισμένοι τῶν ἐναντίων, ἡ δὲ φιλία δοκεῖ συνάγειν· οἱ δὲ τὰ ἐναντία φίλα, καὶ Ἡράκλειτος ἐπιτιμᾷ τῷ ποιήσαντι

“ὥς ἔρις ἔκ τε θεῶν καὶ ἀνθρώπων ἀπόλοιτο,” οὐ γὰρ ἂν εἶναι ἁρμονίαν μὴ ὄντος ὀξέος καὶ βαρέος, οὐδὲ τὰ ζῶα ἄνευ θήλεως καὶ ἄρρενος ἐναντίων ὄντων. - δύο μὲν αὗται δόξαι περὶ φιλίας εἰσὶ, λίαν τε καθόλου «καὶ» κεχωρισμέναι τοσοῦτον· ἄλλαι δὲ ἤδη ἐγγυτέρω καὶ οἰκεῖαι τῶν φαινομένων. τοῖς μὲν γὰρ οὐκ ἐνδέχεσθαι δοκεῖ τοὺς φαύλους εἶναι φίλους, ἀλλὰ μόνον τοὺς ἀγαθοὺς· τοῖς δ’ ἄτοπον εἰ μὴ φιλοῦσιν αἱ μητέρες τὰ τέκνα (φαίνεται δὲ καὶ ἐν τοῖς θηρίοις ἐνοῦσα φιλία· προαποθνήσκειν γοῦν αἰροῦνται τῶν τέκνων)· τοῖς δὲ τὸ χρήσιμον δοκεῖ φίλον εἶναι μόνον. σημεῖον δ’ ὅτι καὶ διώκουσι ταῦτα πάντες, τὰ δὲ ἄχρηστα καὶ αὐτοὶ αὐτῶν ἀποβάλλουσιν· ὥσπερ Σωκράτης ὁ γέρων ἔλεγε τὸν πτύελον καὶ τὰς τρίχας καὶ τοὺς ὄνυχας παραβάλλων, καὶ τὰ μόρια ὅτι ῥίπτοῦμεν τὰ ἄχρηστα, καὶ τέλος [1235b] τὸ σῶμα, ὅταν ἀποθάνῃ· ἄχρηστος γὰρ ὁ νεκρός. οἷς δὲ χρήσιμον, φυλάττουσιν, ὥσπερ ἐν Αἰγύπτῳ. - ταῦτα δὴ πάντα δοκεῖ μὲν ὑπεναντία ἀλλήλοις εἶναι. τό τε γὰρ «ὅμοιον» ἄχρηστον τῷ ὁμοίῳ, καὶ ἐναντιότης ὁμοιότητος ἀπέχει πλεῖστον, καὶ τὸ ἐναντίον ἀχρηστότατον τῷ ἐναντίῳ· φθαρτικὸν γὰρ τοῦ ἐναντίου τὸ ἐναντίον. - ἔτι δοκεῖ τοῖς μὲν ῥάδιον τὸ κτήσασθαι φίλον· τοῖς δὲ σπανιώτατον γινῶναι, καὶ οὐκ ἐνδέχεσθαι ἄνευ ἀτυχίας (τοῖς γὰρ εὖ πράττουσι βούλονται πάντες δοκεῖν φίλοι εἶναι)· οἱ δ’ οὐδὲ τοῖς συνδιαμένουσιν ἐν ταῖς ἀτυχίαις ἀξιοῦσι πιστεύειν, ὥς ἐξαπατῶντας καὶ προσποιουμένους, ἵνα κτήσωνται διὰ τῆς τῶν ἀτυχούντων ὁμιλίας πάλιν εὐτυχούντων φίλιαν.

ληπτέος δὴ τρόπος ὅστις ἡμῖν ἅμα τὰ τε δοκοῦντα περὶ τούτων μάλιστα ἀποδώσει, καὶ τὰς ἀπορίας λύσει καὶ τὰς ἐναντιώσεις. τοῦτο δ’ ἔσται, ἐὰν εὐλόγως φαίνεται τὰ ἐναντία δοκοῦντα· μάλιστα γὰρ ὁμολογούμενος ὁ τοιοῦτος ἔσται λόγος τοῖς φαινομένοις. συμβαίνει δὲ μένειν τὰς ἐναντιώσεις, ἐὰν ἔστι «μὲν» ὥς ἀληθές ἢ τὸ λεγόμενον, ἔστι δ’ ὥς οὐ. - ἔχει δ’ ἀπορίαν καὶ πότερον τὸ ἡδὺ ἢ τὸ ἀγαθὸν ἔστι

τὸ φιλούμενον. εἰ μὲν γὰρ φιλοῦμεν οὐ ἐπιθυμοῦμεν, καὶ μάλιστα ὁ ἔρως τοιοῦτον (οὐθεὶς γὰρ

“ἐραστὴς ὅστις οὐκ ἀεὶ φιλεῖ”), ἡ δὲ ἐπιθυμία τοῦ ἡδέος, ταύτη μὲν τὸ φιλούμενον τὸ ἡδὺ, εἰ δὲ ὁ βουλόμεθα, τὸ ἀγαθόν· ἔστι δ’ ἕτερον τὸ ἡδὺ καὶ τὸ ἀγαθόν.

περὶ δὴ τούτων καὶ τῶν ἄλλων τῶν συγγενῶν τούτοις πειρατέον διορίσαι, λαβοῦσιν ἀρχὴν τήνδε. τὸ γὰρ ὀρεκτὸν καὶ βουλευτὸν ἢ τὸ ἀγαθόν ἢ τὸ φαινόμενον ἀγαθόν. διὸ καὶ τὸ ἡδὺ ὀρεκτὸν· φαινόμενον γάρ τι ἀγαθόν. τοῖς μὲν γὰρ δοκεῖ, τοῖς δὲ φαίνεται καὶ μὴ δοκῇ. οὐ γὰρ ἐν ταύτῳ τῆς ψυχῆς ἡ φαντασία καὶ ἡ δόξα. ὅτι μέντοι φίλον καὶ τὸ ἀγαθόν καὶ τὸ ἡδὺ, δῆλον. τούτου δὲ διωρισμένου ληπτέον ὑπόθεσιν ἑτέραν. τῶν γὰρ ἀγαθῶν τὰ μὲν ἀπλῶς ἐστὶν ἀγαθὰ, τὰ δὲ τινί, ἀπλῶς δὲ οὐ. καὶ τὰ αὐτὰ ἀπλῶς ἀγαθὰ καὶ ἀπλῶς ἡδέα. τὰ μὲν γὰρ τῷ ὑγιαίνοντί φαμεν σώματι συμφέροντα ἀπλῶς εἶναι σώματι ἀγαθὰ, τὰ δὲ τῷ κάμνοντι οὐ, οἷον φαρμακείας καὶ τομάς. ὁμοίως δὲ καὶ ἡδέα ἀπλῶς σώματι τὰ τῷ ὑγιαίνοντι καὶ ὀλοκλήρῳ, οἷον τὸ ἐν τῷ φωτὶ ὄρᾶν καὶ οὐ τὸ ἐν τῷ σκότει· καίτοι τῷ ὀφθαλμιῶντι ἐναντίως. καὶ οἶνος ἡδίων οὐχ ὁ τῷ διεφθαρμένῳ τὴν γλῶτταν ὑπὸ οἰνοφλυγίας, ἐπεὶ οὔτε ὄξος παρεγγέουσιν, ἀλλὰ τῇ [1236a] ἀδιαφθόρῳ αἰσθήσει. ὁμοίως δὲ καὶ ἐπὶ ψυχῆς, καὶ οὐχ ἂ τοῖς παιδίοις καὶ τοῖς θηρίοις, ἀλλ’ ἂ τοῖς καθεστῶσιν. ἀμφοτέρων γοῦν μεμνημένοι ταῦθ’ αἰρούμεθα. ὥς δ’ ἔχει παιδίον καὶ θηρίον πρὸς ἄνθρωπον καθεστῶτα, οὕτως ἔχει ὁ φαῦλος καὶ ἄφρων πρὸς τὸν ἐπιεικῆ καὶ φρόνιμον. τούτοις δὲ ἡδέα τὰ κατὰ τὰς ἑξεις· ταῦτα δ’ ἐστὶ τὰ ἀγαθὰ καὶ τὰ καλά.

ἐπεὶ οὖν τὰ ἀγαθὰ πλεοναχῶς (τὸ μὲν γὰρ τῷ τοιόνδ’ εἶναι λέγομεν ἀγαθόν, τὸ δὲ τῷ ὠφέλιμον καὶ χρήσιμον), ἔτι δὲ τὸ ἡδὺ τὸ μὲν ἀπλῶς καὶ ἀγαθὸν ἀπλῶς, τὸ δὲ τινὶ καὶ φαινόμενον ἀγαθόν· ὥσπερ καὶ ἐπὶ τῶν ἀψύχων δι’ ἕκαστον τούτων ἐνδέχεται ἡμᾶς αἰρεῖσθαι τι καὶ φιλεῖν, οὕτω καὶ ἄνθρωπον. τὸν μὲν γὰρ <τῷ> τοιόνδε καὶ δι’ ἀρετὴν, τὸν δ’ ὅτι ὠφέλιμος καὶ χρήσιμος, τὸν δ’ ὅτι ἡδὺς καὶ δι’ ἡδονήν. φίλος δὴ γίνεται ὅταν φιλούμενος ἀντιφιλῇ, καὶ τοῦτο μὴ λανθάνη πως αὐτούς.

ἀνάγκη ἄρα τρία φιλίας εἶδη εἶναι, καὶ μήτε καθ’ ἓν ἀπάσας μὴδ’ ὥς εἶδη ἑνὸς γένους, μήτε πάνπαν λέγεσθαι ὁμωνύμως. πρὸς μίαν γὰρ τινα λέγονται καὶ πρώτην, ὥσπερ τὸ ἱατρικόν. καὶ <γὰρ> ψυχὴν ἱατρικὴν καὶ σῶμα λέγομεν καὶ ὄργανον καὶ ἔργον, ἀλλὰ

κυρίως τὸ πρῶτον. πρῶτον δ' οὗ λόγος ἐν ἡμῖν ὑπάρχει. οἷον ὄργανον ἰατρικόν, ᾧ ἂν ὁ ἰατρὸς χρῆσταιτο· ἐν δὲ τῷ τοῦ ἰατροῦ λόγῳ οὐκ ἔστιν ὁ τοῦ ὀργάνου. ζητεῖται μὲν οὖν πανταχοῦ τὸ πρῶτον· διὰ δὲ τὸ καθόλου εἶναι [τὸ] πρῶτον λαμβάνουσιν καὶ πρῶτον καθόλου, τοῦτο δ' ἐστὶ ψεῦδος. ὥστε καὶ περὶ τῆς φιλίας οὐ δύνανται πάντ' ἀποδιδόναι τὰ φαινόμενα. οὐ γὰρ ἐφαρμόττοντος ἐνὸς λόγου οὐκ οἴονται <τὰς> ἄλλας φιλίας εἶναι· αἱ δ' εἰσὶ μὲν, ἀλλ' οὐχ ὁμοίως εἰσίν· οἱ δ' ὅταν ἡ πρώτη μὴ ἐφαρμόττη, ὡς οὔσαν καθόλου ἄν, εἴπερ ἦν πρώτη, οὐδ' εἶναι φιλίας τὰς ἄλλας φασίν· ἔστι δὲ πολλὰ εἶδη φιλίας. τῶν γὰρ ῥηθέντων ἦν ἡδη, ἐπεὶ διώρισται τριχῶς λέγεσθαι τὴν φιλίαν. ἡ μὲν γὰρ διώρισται δι' ἀρετὴν, ἡ δὲ διὰ τὸ χρήσιμον, ἡ δὲ διὰ τὸ ἡδύ.

τούτων ἡ μὲν διὰ τὸ χρήσιμόν ἐστιν ἡ [διὰ] τῶν πλείστων φιλία (διὰ γὰρ τὸ χρήσιμοι εἶναι φιλοῦσιν ἀλλήλους, καὶ μέχρι τούτου, ὥσπερ ἡ παροιμία

“Γλαῦκ' ἐπίκουρος ἀνὴρ τὸν σοφὸν φίλον ἔσκε μάχεται,” καὶ

“οὐκέτι γινώσκουσιν Ἀθηναῖοι Μεγαρήας”), ἡ δὲ δι' ἡδονὴν τῶν νέων (τούτου γὰρ αἴσθησιν ἔχουσιν· διὸ εὐμετάβολος φιλία ἡ τῶν νέων· μεταβαλλόντων γὰρ τὰ ἦθη κατὰ τὰς [1236b] ἡλικίας μεταβάλλει καὶ τὸ ἡδύ), ἡ δὲ κατ' ἀρετὴν τῶν βελτίστων.

φανερὸν δ' ἐκ τούτων ὅτι ἡ πρώτη φιλία ἡ τῶν ἀγαθῶν ἐστιν ἀντιφιλία καὶ ἀντιπροαίρεσις πρὸς ἀλλήλους. φίλον μὲν γὰρ τὸ φιλούμενον τῷ φιλοῦντι, φίλος δὲ τῷ φιλουμένῳ καὶ ἀντιφιλῶν. αὕτη μὲν οὖν ἐν ἀνθρώποις μόνον ὑπάρχει φιλία (μόνον γὰρ αἰσθάνεται προαιρέσεως)· αἱ δ' ἄλλαι καὶ ἐν τοῖς θηρίοις, καὶ τὸ χρήσιμον ἐπὶ μικρόν τι φαίνεται ἐνυπάρχον καὶ πρὸς ἄνθρωπον τοῖς ἡμέροις καὶ πρὸς ἄλληλα, οἷον τὸν τροχίλον φησὶν Ἡρόδοτος τῷ κροκοδείλῳ, καὶ ὡς οἱ μάντις τὰς συνεδρείας καὶ διεδρείας λέγουσιν. καὶ οἱ φαῦλοι ἂν εἶεν φίλοι ἀλλήλοις καὶ διὰ τὸ χρήσιμον καὶ διὰ τὸ ἡδύ. οἱ δ' ὅτι ἡ πρώτη οὐχ ὑπάρχει αὐτοῖς, οὗ φασὶ φίλους εἶναι· ἀδικήσει γὰρ ὁ γε φαῦλος τὸν φαῦλον, οἱ δ' ἀδικούμενοι οὐ φιλοῦσι σφᾶς αὐτούς. οἱ δὲ φιλοῦσι μὲν, ἀλλ' οὐ τὴν πρώτην φιλίαν, ἐπεὶ τὰς γε ἑτέρας οὐθὲν κωλύει. δι' ἡδονὴν γὰρ ὑπομένουσιν ἀλλήλους βλαπτόμενοι, ὡς ἂν ὦσιν ἀκρατεῖς· οὐ δοκοῦσι δ' οὐδ' οἱ δι' ἡδονὴν φιλοῦντες ἀλλήλους φίλοι εἶναι, ὅταν κατ' ἀκρίβειαν ζητῶσιν, ὅτι οὐχ ἡ πρώτη. ἐκείνη μὲν γὰρ βέβαιος, αὕτη δὲ ἀβέβαιος. ἡ δ' ἐστὶ μὲν, ὥσπερ εἴρηται, φιλία, οὐκ ἐκείνη δέ, ἀλλ' ἀπ' ἐκείνης. τὸ μὲν

οὖν ἐκείνως μόνον λέγειν τὸν φίλον βιάζεσθαι τὰ φαινόμενα ἐστί, καὶ παράδοξα λέγειν ἀναγκαῖον· καθ' ἓνα δὲ λόγον πάσας ἀδύνατον. λείπεται τοίνυν οὕτως, ὅτι ἔστι μὲν ὡς μόνη <ῆ> πρώτη φιλία, ἔστι δὲ ὡς πᾶσαι, οὔτε ὡς ὁμῶνυμοι καὶ ὡς ἔτυχον ἔχουσai πρὸς ἑαυτάς, οὔτε καθ' ἓν εἶδος, ἀλλὰ μᾶλλον πρὸς ἓν.

ἐπεὶ δ' ἀπλῶς ἀγαθὸν καὶ ἀπλῶς ἡδὺ τὸ αὐτὸ καὶ ἅμα, ἂν μὴ τι ἐμποδίζῃ, ὁ δ' ἀληθινὸς φίλος καὶ ἀπλῶς ὁ πρῶτος ἐστίν, ἔστι δὲ τοιοῦτος ὁ δι' αὐτὸν αὐτὸς αἰρετός (ἀνάγκη δ' εἶναι τοιοῦτον· ὡς γὰρ βούλεται τις δι' αὐτὸν εἶναι τὰγαθὰ, ἀνάγκη καὶ αὐτὸν αἰρεῖσθαι εἶναι), ὁ δ' ἀληθινὸς φίλος καὶ ἡδύς ἐστιν ἀπλῶς· διὸ δοκεῖ καὶ ὁ ὁπωσοῦν φίλος ἡδύς. - ἔτι δὲ διοριστέον περὶ τοῦτου μᾶλλον· ἔχει ἐπίστασιν, πότερον γὰρ τὸ αὐτῷ ἀγαθὸν ἢ τὸ ἀπλῶς ἀγαθὸν φίλον, καὶ πότερον τὸ κατ' ἐνέργειαν φιλεῖν μεθ' ἡδονῆς, ὥστε καὶ τὸ φιλητὸν ἡδύ, ἢ οὔ. ἅμφω γὰρ εἰς ταῦτο συνακτέον· τὰ τε γὰρ μὴ ἀπλῶς ἀγαθὰ ἀλλὰ κακὰ ἀπλῶς τύχη φευκτά· καὶ τὸ μὴ αὐτῷ ἀγαθὸν οὐθὲν πρὸς αὐτόν, ἀλλὰ τοῦτ' ἐστίν ὃ ζητεῖται, τὰ ἀπλῶς ἀγαθὰ οὕτως εἶναι ἀγαθὰ. ἔστι γὰρ [1237a] αἰρετὸν μὲν τὸ ἀπλῶς ἀγαθόν, αὐτῷ δὲ τὸ αὐτῷ ἀγαθόν· ἃ δεῖ συμφωνῆσαι. καὶ τοῦτο ἡ ἀρετὴ ποιεῖ· καὶ ἡ πολιτικὴ ἐπὶ τούτῳ, ὅπως οἷς μῆπω ἐστὶ γένηται. εὐθέτως δὲ καὶ πρὸ ὁδοῦ ἄνθρωπος ὢν (φύσει γὰρ αὐτῷ ἀγαθὰ τὰ ἀπλῶς ἀγαθὰ), ὁμοίως δὲ καὶ ἀνὴρ ἀντὶ γυναικὸς καὶ εὐφυῆς ἀφυοῦς, διὰ τοῦ ἡδέος δὲ ἢ ὁδός· ἀνάγκη εἶναι τὰ καλὰ ἡδέα. ὅταν δὲ τοῦτο διαφωνῇ, οὐπω σπουδαῖον τελέως· ἐνδέχεται γὰρ ἐγγενέσθαι ἀκρασίαν· τῷ γὰρ διαφωνεῖν τὰγαθὸν τῷ ἡδεῖ ἐν τοῖς πάθεσιν ἀκρασία ἐστίν.

ὥστ' ἐπειδὴ ἡ πρώτη φιλία κατ' ἀρετὴν, ἔσονται καὶ αὐτοὶ ἀπλῶς ἀγαθοί. τοῦτο δ' οὐχ ὅτι χρήσιμοι, ἀλλ' ἄλλον τρόπον· διχῶς γὰρ ἔχει τὸ τῷ ἀγαθὸν καὶ ἀπλῶς ἀγαθόν. καὶ ὁμοίως ὥσπερ ἐπὶ τοῦ ὠφελίμου, καὶ ἐπὶ τῶν ἔξεων. ἄλλο γὰρ τὸ ἀπλῶς ὠφελίμον καὶ τὸ καλὸν τοιοῦτον γυμνάζεσθαι πρὸς τὸ φαρμακεύεσθαι. ὥστε καὶ ἡ ἔξις ἢ ἀνθρώπου ἀρετὴ. ἔστω γὰρ ὁ ἄνθρωπος τῶν φύσει σπουδαίων· ἢ γὰρ τοῦ φύσει σπουδαίου ἀρετὴ ἀπλῶς ἀγαθόν, ἢ δὲ τοῦ μὴ ἐκείνῳ. ὁμοίως δὲ ἔχει καὶ τὸ ἡδύ. ἐνταῦθα γὰρ ἐπιστατέον, καὶ σκεπτέον πότερόν ἐστιν ἄνευ ἡδονῆς φιλία, καὶ τί διαφέρει, καὶ ἐν ποτέρῳ ποτ' ἐστὶ τὸ φιλεῖν, [καὶ] πότερον ὅτι ἀγαθός, κἂν εἰ μὴ ἡδύς, ἀλλ' οὐ διὰ τοῦτο, διχῶς δὲ λεγομένου τοῦ φιλεῖν, πότερον ὅτι ἀγαθὸν τὸ κατ' ἐνέργειαν οὐκ ἄνευ ἡδονῆς φαίνεται. δῆλον δ' ὅτι

ὥσπερ ἐπὶ τῆς ἐπιστήμης αἱ πρόσφατοι θεωρίαι καὶ μαθήσεις αἰσθηταὶ μάλιστα τῷ ἡδεῖ, οὕτω καὶ αἱ τῶν συνήθων ἀναγνωρίσεις, καὶ ὁ λόγος ὁ αὐτὸς ἐπ' ἀμφοῖν. φύσει γοῦν τὸ ἀπλῶς ἀγαθὸν ἡδὺ ἀπλῶς, καὶ οἷς ἀγαθόν, τούτοις ἡδύ. διὸ εὐθύς τὰ ὅμοια ἀλλήλοις χαίρει, καὶ ἀνθρώπῳ ἡδιστον ἄνθρωπος. ὥστ' ἐπεὶ καὶ ἀτελεῖ, δηλονότι καὶ τελειωθέντι· ὁ δὲ σπουδαῖος τέλειος. εἰ δὲ τὸ κατ' ἐνέργειαν φιλεῖν μεθ' ἡδονῆς ἀντιπροαίρεσις τῆς ἀλλήλων γνωρίσεως, δηλονότι καὶ ὅλως ἢ φιλία ἢ πρώτη ἀντιπροαίρεσις τῶν ἀπλῶς ἀγαθῶν καὶ ἡδέων, ὅτι ἀγαθὰ καὶ ἡδέα. ἔστι δ' αὕτη ἡ φιλία ἕξις ἀφ' ἧς ἢ τοιαύτη προαίρεσις. τὸ γὰρ ἔργον αὐτῆς ἐνέργεια, αὕτη δ' οὐκ ἔξω, ἀλλ' ἐν αὐτῷ τῷ φιλοῦντι, δυνάμει δὲ πάσης ἔξω· ἢ γὰρ ἐν ἐτέρῳ ἢ <ἢ> ἑτερον. διὸ τὸ φιλεῖν χαίρειν, ἀλλ' οὐ τὸ φιλεῖσθαι ἐστίν. τὸ μὲν γὰρ φιλεῖσθαι φιλητοῦ ἐνέργεια, τὸ δὲ καὶ φιλίας, καὶ τὸ μὲν ἐν ἐμψύχῳ, τὸ δὲ καὶ ἐν ἀψύχῳ· φιλεῖται γὰρ καὶ τὰ ἄψυχα. ἐπεὶ δὲ τὸ φιλεῖν τὸ κατ' ἐνέργειαν τὸ φιλούμενον [1237b] [ὅ] ἐστὶ χρῆσθαι ἢ φιλούμενον, ὁ δὲ φίλος φιλούμενον τῷ φίλῳ ἢ φίλος, ἀλλὰ μὴ ἢ μουσικὸς ἢ ἢ ἱατρικὸς· ἡδονὴ τοίνυν ἢ ἀπ' αὐτοῦ, ἢ αὐτός, αὕτη φιλική. αὐτὸν γὰρ φιλεῖ, οὐχ ὅτι ἄλλος. ὥστ' ἂν μὴ χαίρῃ ἢ ἀγαθός, οὐχ ἢ πρώτη φιλία. οὐδὲ δεῖ ἐμποδίζειν οὐθὲν τῶν συμβεβηκότων μᾶλλον ἢ τὸ ἀγαθὸν εὐφραίνειν. τί γὰρ σφόδρα δυσώδης λείπεται; ἀγαπᾶται γὰρ τῷ εὐνοεῖν, συζῆ δὲ μή.

αὕτη μὲν οὖν ἢ πρώτη φιλία, ἣν πάντες ὁμολογοῦσιν· αἱ δ' ἄλλαι δι' αὐτὴν καὶ δοκοῦσι καὶ ἀμφισβητοῦνται. βέβαιον γάρ τι δοκεῖ ἢ φιλία· μόνη δ' αὕτη βέβαιος. τὸ γὰρ κεκριμένον βέβαιον, τὰ δὲ μὴ ταχὺ γινόμενα μηδὲ ῥαδίως [οὐ] ποιεῖ τὴν κρίσιν ὀρθήν. οὐκ ἔστι δ' ἄνευ πίστεως φιλία βέβαιος· ἢ δὲ πίστις οὐκ ἄνευ χρόνου. δεῖ γὰρ πείραν λαβεῖν, ὥσπερ λέγει καὶ Θεόγνης·

οὐ γὰρ ἂν εἰδείης ἀνδρὸς νόον οὐδὲ γυναικός,
πρὶν πειραθείης ὥσπερ ὑποζυγίου.

οὐδ' ἄνευ χρόνου φίλος, ἀλλὰ βούλονται φίλοι, καὶ μάλιστα λανθάνει ἢ τοιαύτη ἕξις ὡς φιλία. ὅταν γὰρ προθύμως ἔχῃ φίλοι εἶναι, διὰ τὸ πάνθ' ὑπηρετεῖν τὰ φιλικὰ ἀλλήλοις, οἶονται οὐ βούλεσθαι φίλοι, ἀλλ' εἶναι φίλοι. τὸ δ' ὥσπερ ἐπὶ τῶν ἄλλων συμβαίνει καὶ ἐπὶ τῆς φιλίας· οὐ γὰρ εἰ βούλονται ὑγιαίνειν, ὑγιαίνουσιν, ὥστ' οὐδ' εἰ φίλοι βούλονται, ἤδη καὶ φίλοι εἰσίν. σημεῖον δέ· εὐδιάβλητοι γὰρ οἱ διακείμενοι ἄνευ πείρας τοῦτον τὸν τρόπον· περὶ ὧν μὲν γὰρ πείραν δεδώκασιν ἀλλήλοις, οὐκ

εὐδιάβλητοι, περὶ ὧν δὲ μή, πεισθεῖεν ἂν ὅταν σύμβολα λέγωσιν οἱ διαβάλλοντες. ἅμα δὲ φανερόν ὅτι οὐδ' ἐν τοῖς φαύλοις αὕτη ἡ φιλία· ἄπιστος γὰρ ὁ φαῦλος καὶ κακοήθης πρὸς πάντας· αὐτῷ γὰρ μετρεῖ τοὺς ἄλλους. διὸ εὐεξαπατητότεροί εἰσιν οἱ ἀγαθοί, ἂν μὴ διὰ πείραν ἀπιστῶσιν. οἱ δὲ φαῦλοι αἰροῦνται τὰ φύσει ἀγαθὰ ἀντὶ τοῦ φίλου, καὶ οὐθεις φιλεῖ μᾶλλον ἄνθρωπον ἢ πράγματα. ὥστ' οὐ φίλοι. οὐ γὰρ γίνεται οὕτω κοινὰ τὰ φίλων· προσνέμεται γὰρ ὁ φίλος τοῖς πράγμασιν, οὐ τὰ πράγματα τοῖς φίλοις. οὐ γίνεται ἄρ' ἡ φιλία ἢ πρώτη ἐν πολλοῖς, ὅτι χαλεπὸν πολλῶν πείραν λαβεῖν· ἐκάστω γὰρ ἂν ἔδει συζῆσαι. οὐδὲ δὴ αἰρετέον ὁμοίως περὶ ἱματίου καὶ φίλου· καίτοι ἐν πᾶσι δοκεῖ τοῦ νοῦν ἔχοντος δυοῖν τὸ βέλτιον αἰρεῖσθαι, καὶ εἰ μὲν τῷ χειρόνι πάλαι ἐχρήτο, τῷ βελτίονι δὲ μηδέπω, τοῦθ' αἰρετέον, ἀλλ' οὐκ ἀντὶ τοῦ πάλαι φίλου τὸν ἀγνώτα εἰ βελτίων· [1238a] οὐ γάρ ἐστιν ἄνευ πείρας οὐδὲ μιᾶς ἡμέρας ὁ φίλος, ἀλλὰ χρόνου δεῖ. διὸ εἰς παροιμίαν ἐλήλυθεν ὁ μέδιμνος τῶν ἁλῶν· ἅμα δὲ δεῖ μὴ μόνον ἀπλῶς ἀγαθὸν εἶναι, ἀλλὰ καὶ σοί, εἰ δὴ φίλος ἔσται σοὶ φίλος. ἀγαθὸς μὲν γὰρ ἀπλῶς ἐστὶ τῷ ἀγαθὸς εἶναι, φίλος δὲ τῷ ἄλλῳ ἀγαθός, ἀπλῶς <δ'> ἀγαθὸς καὶ φίλος, ὅταν συμφωνήσῃ ταῦτ' ἄμφω, ὥστε ὁ ἐστὶν ἀπλῶς ἀγαθόν, τὸ τούτου ἄλλῳ, εἰ καὶ μὴ ἀπλῶς μὲν σπουδαίῳ, ἄλλῳ δ' ἀγαθός, ὅτι χρήσιμος. τὸ δὲ πολλοῖς ἅμα εἶναι φίλον καὶ τὸ φιλεῖν κωλύει· οὐ γὰρ οἶόν τε ἅμα πρὸς πολλοὺς ἐνεργεῖν.

ἐκ δὴ τούτων φανερόν ὅτι ὀρθῶς λέγεται ὅτι ἡ φιλία τῶν βεβαίων, ὥσπερ ἡ εὐδαιμονία τῶν αὐτάρκων. καὶ ὀρθῶς εἴρηται

“ἡ γὰρ φύσις βέβαιον, οὐ τὰ χρήματα.”

πολὺ δὲ κάλλιον εἰπεῖν ὅτι ἡ ἀρετὴ τῆς φύσεως, καὶ ὅτι χρόνος λέγεται δεικνύναι τὸν φιλούμενον, καὶ αἱ ἀτυχίαι μᾶλλον τῶν εὐτυχίων. τότε γὰρ δῆλον ὅτι κοινὰ <τὰ> τῶν φίλων (οὗτοι γὰρ μόνον ἀντὶ τῶν φύσει ἀγαθῶν καὶ φύσει κακῶν, περὶ ἃ αἱ εὐτυχίαι καὶ αἱ δυστυχίαι, αἰροῦνται μᾶλλον ἄνθρωπον ἢ τούτων τὰ μὲν εἶναι τὰ δὲ μὴ εἶναι)· ἡ δ' ἀτυχία δηλοῖ τοὺς μὴ ὄντως ὄντας φίλους, ἀλλὰ διὰ τὸ χρήσιμον τυχόντας. ὁ δὲ χρόνος δηλοῖ ἀμφοτέρους· οὐδὲ γὰρ ὁ χρήσιμος ταχὺ δηλός, ἀλλ' ὁ ἡδὺς μᾶλλον. πλὴν οὐδ' ὁ ἀπλῶς ἡδὺς ταχύ. ὅμοιοι γὰρ οἱ ἄνθρωποι τοῖς οἴνοις καὶ ἐδέσμασιν· ἐκείνων τε γὰρ τὸ μὲν ἡδὺ ταχὺ δηλοῖ, πλείω δὲ χρόνον γινόμενον ἀηδὲς καὶ οὐ γλυκύ, καὶ ἐπὶ τῶν ἀνθρώπων ὁμοίως. ἔστι γὰρ καὶ τὸ ἀπλῶς ἡδὺ τῷ τέλει ὀριστέον καὶ τῷ χρόνῳ. ὁμολογήσαιεν δ' ἂν καὶ οἱ πολλοί, ὅτι

ἐκ τῶν ἀποβαινόντων μόνον, ἀλλ' ὥσπερ ἐπὶ τοῦ πόματος καλοῦσι γλύκιον· τοῦτο γὰρ διὰ τὸ ἀποβαῖνον οὐχ ἡδύ, ἀλλὰ διὰ τὸ μὴ συνεχές, ἀλλὰ τὸ πρῶτον ἐξαπατᾷ.

ἡ μὲν οὖν πρώτη φιλία, καὶ δι' ἣν αἱ ἄλλαι λέγονται, ἡ κατ' ἀρετὴν ἐστὶ, καὶ δι' ἣν ἡδονὴν τὴν ἀρετῆς, ὥσπερ εἴρηται πρότερον· αἱ δ' ἄλλαι ἐγγίνονται φιλαίαι καὶ ἐν παισὶ καὶ θηρίοις καὶ τοῖς φαύλοις. ὁθεν λέγεται, “ἥλιξ ἥλικα τέρπει” καὶ

“κακὸς κακῷ <δὲ> συντέτηκεν ἡδονῇ.”

ἐνδέχεται γὰρ καὶ ἡδεῖς ἀλλήλοις εἶναι τοὺς φαύλους, οὐχ ἡ φαῦλοι ἢ μηδέτεροι, ἀλλ' οἷον ὠδικοὶ ἄμφω, ἡ ὁ μὲν φιλωδὸς ὁ δ' ὠδικὸς ἐστίν, καὶ ἡ πάντες ἔχουσιν ἀγαθὸν καὶ ταύτη συναρμόττουσιν ἀλλήλοις· ἔτι χρήσιμοι ἂν εἶεν ἀλλήλοις καὶ ὠφέλιμοι, οὐχ ἀπλῶς ἀλλὰ πρὸς τὴν [1238b] προαίρεσιν, ἡ <ἡ> οὐδέτεροι. ἐνδέχεται δὲ καὶ τὸν ἐπιεικῆ φαύλῳ εἶναι φίλον. καὶ γὰρ χρήσιμος ἂν εἴη πρὸς τὴν προαίρεσιν, ὁ μὲν φαῦλος πρὸς τὴν ὑπάρχουσαν τῷ σπουδαίῳ, ὁ δὲ τῷ μὲν ἀκρατεῖ πρὸς τὴν ὑπάρχουσαν, τῷ δὲ φαύλῳ πρὸς τὴν κατὰ φύσιν· καὶ βουλήσεται τὰ ἀγαθὰ, ἀπλῶς μὲν τὰ ἀπλῶς, τὰ δ' ἐκείνῳ ἐξ ὑποθέσεως, ἡ πενία συμφέρει ἢ νόσος, <καὶ> ταῦτα τῶν ἀπλῶς ἀγαθῶν ἕνεκα, ὥσπερ καὶ αὐτὸ τὸ φάρμακον πιεῖν· οὐ γὰρ βούλεται, ἀλλὰ τοῦδ' ἕνεκα βούλεται. ἔτι καθ' οὓς τρόπους καὶ ἀλλήλοις οἱ μὴ σπουδαῖοι εἶεν ἂν φίλοι. εἴη γὰρ ἂν ἡδὺς οὐχ ἡ φαῦλος, ἀλλ' ἡ τῶν κοινῶν τινος μετέχει, οἷον εἰ μουσικός. ἔτι ἡ ἓν τι πᾶσιν ἐπιεικές· διὸ ἐνιοὶ ὁμιλητικοὶ εἶεν ἂν καὶ σπουδαῖοι. ἡ ἡ προσαρμόττουσιν ἐκάστω· ἔχουσι γὰρ τι πάντες τοῦ ἀγαθοῦ.

τρία μὲν οὖν εἶδη ταῦτα φιλάς· ἐν πᾶσι δὲ τούτοις κατ' ἰσότητά πως λέγεται ἡ φιλία. καὶ γὰρ οἱ κατ' ἀρετὴν φίλοι ἐν ἰσότητί πως εἰσιν ἀρετῆς φίλοι ἀλλήλοις. ἄλλη δὲ διαφορὰ τούτων ἡ καθ' ὑπερβολήν, ὥσπερ θεοῦ ἀρετὴ πρὸς ἄνθρωπον. τοῦτο γὰρ ἕτερον εἶδος φιλάς, καὶ ὅλως ἄρχοντος καὶ ἀρχομένου, καθάπερ καὶ τὸ δίκαιον ἕτερον· κατ' ἀναλογίαν γὰρ ἴσον, κατ' ἀριθμὸν δ' οὐκ ἴσον. ἐν τούτῳ τῷ γένει πατὴρ πρὸς υἱὸν καὶ ὁ εὐεργέτης πρὸς τὸν εὐεργετηθέντα. αὐτῶν δὲ τούτων διαφοραὶ εἰσίν· ἄλλη πατὴρ πρὸς υἱὸν καὶ ἀνδρὸς πρὸς γυναῖκα, αὕτη μὲν ὡς ἄρχοντος καὶ ἀρχομένου, ἡ δὲ εὐεργέτου πρὸς εὐεργετηθέντα. ἐν ταύταις δὲ ἡ οὐκ ἔνεστιν ἡ οὐχ ὁμοίως τὸ ἀντιφιλεῖσθαι. γελοῖον γὰρ, εἴ τις ἐγκαλοίη τῷ θεῷ, ὅτι οὐχ ὁμοίως τὸ ἀντιφιλεῖσθαι ὡς φιλεῖται, ἡ τῷ ἄρχοντι καὶ

ἀρχομένῳ. φιλεῖσθαι γάρ, οὐ φιλεῖν, τοῦ ἄρχοντος, ἢ φιλεῖν ἄλλον τρόπον. καὶ ἡδονὴ διαφέρει οὐδὲν ἢ τε τοῦ αὐτάρκους ἐπὶ τῷ αὐτοῦ κτήματι ἢ παιδί, καὶ τοῦ ἐνδεοῦς ἐπὶ τῷ γινομένῳ. ὥς δ' αὐτως καὶ ἐπὶ τῶν διὰ τὴν χρῆσιν φίλων καὶ ἐπὶ τῶν δι' ἡδονὴν οἳ μὲν κατ' ἰσότητα εἰσὶν, οἳ δὲ καθ' ὑπεροχὴν. διὸ καὶ οἱ ἐκείνως οἰόμενοι ἐγκαλοῦσιν, ἐὰν μὴ ὁμοίως χρήσιμοι καὶ εὖ ποιῶσιν, καὶ ἐπὶ τῆς ἡδονῆς. δῆλον δ' ἐν τοῖς ἐρωτικοῖς· τοῦτο γὰρ αἴτιον τοῦ μάχεσθαι ἀλλήλοις πολλάκις. ἀγνοεῖ γὰρ ὁ ἐρῶν ὅτι οὐχ ὁ αὐτὸς λόγος αὐτοῖς ἐπὶ τὴν προθυμίαν. διὸ εὐρηκέναι νεῖκος ὁ ἐρώμενος· τοιαῦτ' ἂν οὐκ ἐρῶν λέγοι. οἳ δὲ νομίζουσι τὸν αὐτὸν εἶναι λόγον.

[1239a] ὥσπερ οὖν εἴρηται, τριῶν ὄντων εἰδὼν φιλίας, κατ' ἀρετὴν κατὰ τὸ χρήσιμον καὶ κατὰ τὸ ἡδύ, αὗται πάλιν διήρηνται εἰς δύο· αἱ μὲν γὰρ κατὰ τὸ ἴσον αἱ δὲ καθ' ὑπεροχὴν εἰσὶν. φιλίαι μὲν οὖν ἀμφοτέραι, φίλοι δ' οἱ κατὰ τὴν ἰσότητα· ἄτοπον γὰρ ἂν εἴη εἰ ἀνὴρ παιδίῳ φίλος, φιλεῖ δέ γε καὶ φιλεῖται. ἐνιαχοῦ δὲ φιλεῖσθαι μὲν δεῖ τὸν ὑπερέχοντα, ἐὰν δὲ φιλῇ, ὀνειδίζεται ὡς ἀνάξιον φίλων. τῇ γὰρ ἀξία τῶν φίλων μετρεῖται καὶ τι νῖσφ. τὰ μὲν οὖν δι' ἡλικίας ἔλλειψιν ἀνάξια ὁμοίως φιλεῖσθαι, τὰ δὲ κατ' ἀρετὴν ἢ γένος ἢ κατὰ ἄλλην τοιαύτην ὑπεροχὴν. αἰεὶ δὲ τὸν ὑπερέχοντα ἢ ἥττον ἢ μὴ φιλεῖν ἀξιοῦν, καὶ ἐν τῷ χρησίμῳ καὶ ἐν τῷ ἡδέϊ καὶ κατ' ἀρετὴν. ἐν μὲν οὖν ταῖς μικραῖς ὑπεροχαῖς εἰκότως γίνονται ἀμφισβητήσεις (τὸ γὰρ μικρὸν ἐνιαχοῦ οὐδὲν ἰσχύει, ὥσπερ ἐν ζύλου σταθμῷ, ἀλλ' ἐν χρυσίῳ· ἀλλὰ τὸ μικρὸν κακῶς κρίνουσιν· φαίνεται γὰρ τὸ μὲν οἰκεῖον ἀγαθὸν διὰ τὸ ἐγγὺς μέγα, τὸ δ' ἀλλότριον διὰ τὸ πόρρω μικρόν)· ὅταν δὲ ὑπερβολὴ ᾖ, οὐδ' αὐτοὶ ἐπιζητοῦσιν ὡς δεῖ ἢ ἀντιφιλεῖσθαι ἢ ὁμοίως ἀντιφιλεῖσθαι, οἷον εἴ τις ἀξιοῖ τὸν θεόν. φανερόν δὴ ὅτι φίλοι μὲν, ὅταν ἐν τῷ ἴσῳ, τὸ ἀντιφιλεῖν δ' ἔστιν ἄνευ τοῦ φίλους εἶναι. - δῆλον δὲ καὶ διὰ τί ζητοῦσι μᾶλλον οἱ ἄνθρωποι τὴν καθ' ὑπεροχὴν φιλίαν τῆς κατ' ἰσότητα· ἅμα γὰρ ὑπάρχει οὕτως αὐτοῖς τὸ τε φιλεῖσθαι καὶ ἡ ὑπεροχή. διὸ ὁ κόλαξ παρ' ἐνίοις ἐντιμότερος τοῦ φίλου· ἅμφω γὰρ φαίνεσθαι ποιεῖ ὑπάρχειν τῷ κολακευομένῳ. μάλιστα δ' οἱ φιλότιμοι τοιοῦτοι· τὸ γὰρ θαυμάζεσθαι ἐν ὑπεροχῇ. φύσει δὲ γίνονται οἳ μὲν φιλητικοὶ οἳ δὲ φιλότιμοι. φιλητικὸς δὲ ὁ τῷ φιλεῖν χαίρων μᾶλλον ἢ τῷ φιλεῖσθαι· ἐκεῖνος δὲ φιλότιμος μᾶλλον. ὁ μὲν οὖν χαίρων τῷ θαυμάζεσθαι καὶ φιλεῖσθαι τῆς ὑπεροχῆς φίλος· ὁ δὲ τῇ ἐν τῷ φιλεῖν ἡδονῇ ὁ φιλητικὸς. ἔνεστι γὰρ ἀνάγκη ἐνεργοῦντα· τὸ μὲν γὰρ φιλεῖσθαι

συμβεβηκός· ἔστι γὰρ λανθάνειν φιλούμενον, φιλοῦντα δ' οὐ. ἔστι δὲ καὶ κατὰ τὴν φιλίαν τὸ φιλεῖν μᾶλλον ἢ τὸ φιλεῖσθαι, τὸ δὲ φιλεῖσθαι κατὰ τὸ φιλητόν. σημεῖον δέ· ἔλοιτ' ἂν ὁ φίλος μᾶλλον, εἰ μὴ ἐνδέχοιτ' ἄμφω, γινώσκειν ἢ γινώσκεσθαι, οἷον ἐν ταῖς ὑποβολαῖς αἱ γυναῖκες ποιοῦσι, καὶ ἡ Ἀνδρομάχη ἢ Ἀντιφῶντος. καὶ γὰρ ἔοικε τὸ μὲν ἐθέλειν γινώσκεσθαι αὐτοῦ ἕνεκα, καὶ τοῦ πάσχειν τι ἀγαθὸν ἀλλὰ μὴ ποιεῖν, τὸ δὲ γινώσκειν τοῦ ποιεῖν καὶ τοῦ φιλεῖν ἕνεκα. διὸ καὶ [1239b] τοὺς ἐμμένοντας τῷ φιλεῖν πρὸς τοὺς τεθνεῶτας ἐπαινοῦμεν· γινώσκουσι γάρ, ἀλλ' οὐ γινώσκονται.

ὅτι μὲν οὖν πλείονες τρόποι φιλίας, καὶ πόσοι τρόποι, ὅτι τρεῖς, καὶ ὅτι τὸ φιλεῖσθαι καὶ ἀντιφιλεῖσθαι καὶ οἱ φίλοι διαφέρουσιν, οἳ τε κατ' ἰσότητα καὶ οἳ καθ' ὑπεροχήν, εἴρηται· ἐπεὶ δὲ τὸ φίλον λέγεται καὶ καθόλου μᾶλλον, ὥσπερ καὶ κατ' ἀρχὰς ἐλέχθη, ὑπὸ τῶν ἐξωθεν συμπαραλαμβάνοντων (οἳ μὲν γὰρ τὸ ὁμοῖον φασιν εἶναι φίλον, οἳ δὲ τὸ ἐναντίον), λεκτέον καὶ περὶ τούτων πῶς εἰσι πρὸς τὰς εἰρημένας φιλίας. ἀνάγεται δὲ τὸ μὲν ὁμοιον καὶ εἰς τὸ ἡδὺ καὶ εἰς τὸ ἀγαθόν. τό τε γὰρ ἀγαθὸν ἀπλοῦν, τὸ δὲ κακὸν πολύμορφον· καὶ ὁ ἀγαθὸς μὲν ὁμοῖος ἀεὶ καὶ οὐ μεταβάλλεται τὸ ἦθος, ὁ δὲ φαῦλος καὶ ὁ ἄφρων οὐθὲν ἔοικεν ἔωθεν καὶ ἐσπέρας. διὸ ἐὰν μὴ συμβάλλωσιν οἱ φαῦλοι, οὐ φίλοι ἐαυτοῖς, ἀλλὰ διίστανται· ἢ δ' οὐ βέβαιος φιλία οὐ φιλία. ὥστε οὕτως μὲν τὸ ὁμοιον φίλον, ὅτι <τὸ> ἀγαθὸν ὁμοιον, ἔστι δὲ ὡς καὶ κατὰ τὸ ἡδύ· τοῖς γὰρ ὁμοίοις ταῦθ' ἡδέα, καὶ ἕκαστον δὲ φύσει αὐτὸ αὐτῷ ἡδύ. διὸ καὶ φωναὶ καὶ αἱ ἔξεις καὶ συνημερεύσεις τοῖς ὁμογενέσιν ἡδισταὶ ἀλλήλοις, καὶ τοῖς ἄλλοις ζώοις· καὶ ταύτη ἐνδέχεται καὶ τοὺς φαύλους ἀλλήλους φιλεῖν.

κακὸς κακῷ δὲ συντέτηκεν ἡδονή. τὸ δ' ἐναντίον τῷ ἐναντίῳ φίλον ὡς τὸ χρήσιμον· αὐτὸ γὰρ αὐτῷ τὸ ὁμοιον ἄχρηστον. διὸ δεσπότης δούλου δεῖται καὶ δοῦλος δεσπότου, καὶ γυνὴ καὶ ἀνὴρ ἀλλήλων, καὶ ἡδὺ καὶ ἐπιθυμητὸν τὸ ἐναντίον ὡς χρήσιμον, καὶ οὐχ ὡς ἐν τέλει ἀλλ' ὡς πρὸς τὸ τέλος. ὅταν γὰρ τύχη οὗ ἐπιθυμεῖ, ἐν τῷ τέλει μὲν ἐστίν, οὐκ ὁρέγεται δὲ τοῦ ἐναντίου, οἷον τὸ θερμὸν τοῦ ψυχροῦ καὶ τὸ ξηρὸν τοῦ ὑγροῦ. ἔστι δέ πως καὶ ἡ τοῦ ἐναντίου φιλία τοῦ ἀγαθοῦ. ὁρέγεται γὰρ ἀλλήλων διὰ τὸ μέσον· ὡς σύμβολα γὰρ ὁρέγεται ἀλλήλων διὰ τὸ οὕτω γίνεσθαι ἐξ ἀμφοῖν ἐν μέσον. ἔτι κατὰ συμβεβηκός ἐστι τοῦ ἐναντίου, καθ' αὐτὸ δὲ τῆς μεσότητος. ὁρέγονται γὰρ οὐκ ἀλλήλων τὰναντία, ἀλλὰ τοῦ μέσου. ὑπερψυχθέντες γάρ, ἐὰν θερμανθῶσιν, εἰς τὸ μέσον καθίστανται, καὶ

ὑπερθερμανθέντες, ἐὰν ψυχθῶσιν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. εἰ δὲ μή, ἀεὶ ἐν ἐπιθυμίᾳ, οὐκ ἐν τοῖς μέσοις. ἀλλὰ χαίρει ὁ ἐν τῷ μέσῳ ἄνευ ἐπιθυμίας τοῖς φύσει ἡδέσιν, οἳ δὲ πᾶσι τοῖς ἐξιστάσιν τῆς φύσει ἔξεως. τοῦτο μὲν οὖν τὸ εἶδος καὶ ἐπὶ τῶν ἀψύχων ἐστίν· τὸ φιλεῖν δὲ γίνεται, [1240a] ὅταν ἢ ἐπὶ τῶν ἐμψύχων. διὸ ἐνίοτε ἀνομοίοις χαίρουσιν, οἷον αὐστηροὶ εὐτραπέλοις καὶ ὀξεῖς ῥαθύμοις. εἰς τὸ μέσον γὰρ καθίστανται ὑπ' ἀλλήλων. κατὰ συμβεβηκὸς οὖν, ὥσπερ ἐλέχθη, τὰ ἐναντία φίλα, καὶ διὰ τὸ ἀγαθόν.

πόσα μὲν οὖν εἶδη φιλίας, καὶ τίνες διαφοραὶ καθ' ἃς λέγονται οἱ τε φίλοι καὶ οἱ φιλοῦντες καὶ οἱ φιλούμενοι, καὶ οὕτως ὥστε φίλοι εἶναι καὶ ἄνευ τούτου, εἴρηται· περὶ δὲ αὐτὸν αὐτῷ φίλον εἶναι ἢ μή, πολλὴν ἔχει ἐπίσκεψιν. δοκεῖ γὰρ ἐνίοις μάλιστα ἕκαστος αὐτὸς αὐτῷ φίλος εἶναι, καὶ τούτῳ χρώμενοι κανόνι κρίνουσι τὴν πρὸς τοὺς ἄλλους φίλους φιλίαν· κατὰ δὲ τοὺς λόγους καὶ τὰ δοκοῦνθ' ὑπάρχειν τοῖς φίλοις τὰ μὲν ὑπεναντιοῦται, τὰ δ' ὅμοια φαίνεται ὄντα. ἔστι γάρ πως κατὰ ἀναλογίαν αὕτη ἡ φιλία, ἀπλῶς δ' οὐ. ἐν δυσὶ γὰρ διηρημένοις τὸ φιλεῖσθαι καὶ φιλεῖν· δι' ἃ μᾶλλον οὕτως αὐτὸς αὐτῷ φίλος, (ὥς) ἐπὶ τοῦ ἀκρατοῦς καὶ ἐγκρατοῦς εἴρηται πῶς ἐκὼν ἢ ἄκων, τῷ τὰ μέρη ἔχειν πως πρὸς ἄλληλα τὰ τῆς ψυχῆς, καὶ ὅμοιον τὰ τοιαῦτα πάντα, εἰ φίλος αὐτὸς αὐτῷ καὶ ἐχθρός, καὶ εἰ ἀδικεῖ τις αὐτὸς αὐτόν. πάντα γὰρ ἐν δυσὶ ταῦτα καὶ διηρημένοις· ἢ δὴ δύο πως καὶ ἡ ψυχὴ, ὑπάρχει πως ταῦτα, ἢ δ' οὐ διηρημένα, οὐχ ὑπάρχει.

ἀπὸ δὲ τῆς πρὸς αὐτὸν ἔξεως [ὥς] οἱ λοιποὶ τρόποι τοῦ φιλεῖν διωρισμένοι, καθ' οὓς ἐν τοῖς λόγοις ἐπισκοπεῖν εἰώθαμεν. δοκεῖ γὰρ φίλος εἶναι ὁ βουλόμενός τινι τὰγαθὰ ἢ οἷα οἶται ἀγαθὰ, μὴ δι' αὐτόν, ἀλλ' ἐκείνου ἔνεκα· ἄλλον δὲ τρόπον ᾧ τὸ εἶναι βούλεται δι' ἐκεῖνον καὶ μὴ δι' αὐτόν, κἂν εἰ μὴ διανέμων τὰγαθὰ, μὴ τῷ τὸ εἶναι τούτῳ ἂν δόξειε μάλιστα φιλεῖν· ἄλλον δὲ τρόπον ᾧ συζῆν αἰρεῖται δι' αὐτὴν τὴν ὁμιλίαν καὶ μὴ δι' ἕτερόν τι, οἷον οἱ πατέρες τὸ μὲν εἶναι τοῖς τέκνοις, συζῶσι δ' ἑτέροις. μάχεται δὲ ταῦτα πάντα πρὸς ἄλληλα. οἱ μὲν γὰρ ἂν μὴ τὸ ἑαυτοῖς, οἳ δὲ ἂν μὴ τὸ εἶναι, οἳ δὲ τὸ συζῆν, οὐκ οἶονται φιλεῖσθαι. ἔτι τὸ ἀλγοῦντι συναλγεῖν μὴ δι' ἕτερόν τι ἀγαπᾶν θήσομεν, οἷον οἱ δοῦλοι πρὸς τοὺς δεσπότας, ὅτι χαλεποὶ ἀλγοῦντες, ἀλλ' οὐ δι' αὐτούς, ὥσπερ αἱ μητέρες τοῖς τέκνοις καὶ οἱ συνωδίνοντες ὄρνιθες. βούλεται γὰρ μάλιστα γε οὐ μόνον συλλυπεῖσθαι ὁ φίλος τῷ φίλῳ, ἀλλὰ καὶ τὴν αὐτὴν λύπην,

οἷον διψῶντι συνδιψῆν, εἰ ἐνεδέχετο, ὅτι [μὴ] ἐγγύτατα. ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τοῦ χαίρειν· <τὸ γὰρ [1240b] χαίρειν> μὴ δι' ἕτερόν τι, ἀλλὰ δι' ἐκεῖνον, ὅτι χαίρει, φιλικόν. ἔτι τὰ τοιαῦτα λέγεται περὶ τῆς φιλίας, ὡς ἰσότης φιλότης, καὶ [μὴ] μίαν ψυχὴν εἶναι τοὺς ἀληθῶς φίλους. ἅπαντα ταῦτα ἐπαναφέρεται πρὸς τὸν ἕνα. καὶ γὰρ βούλεται τὰγαθὰ αὐτῷ τοῦτον τὸν τρόπον. οὐθεις γὰρ αὐτὸς αὐτὸν εὖ ποιεῖ διὰ τι ἕτερον, οὐδὲ χάριτος. οὐ δὲ λέγει ὅτι ἐποίησεν ἢ εἰς· δοκεῖ γὰρ φιλεῖσθαι βούλεσθαι ὁ δῆλον ποιῶν ὅτι φιλεῖ, ἀλλ' οὐ φιλεῖν. καὶ τὸ εἶναι μάλιστα καὶ τὸ συζῆν καὶ τὸ συγχαίρειν καὶ τὸ συναλγεῖν, καὶ μία δὴ ψυχὴ, καὶ τὸ μὴ δύνασθαι ἄνευ ἀλλήλων μηδὲ ζῆν, ἀλλὰ συναποθνήσκειν. οὕτω γὰρ ἔχει ὁ εἷς, καὶ ἴσως ὁμιλεῖ αὐτὸς αὐτῷ. - πάντα δὲ ταῦτα τῷ ἀγαθῷ ὑπάρχει πρὸς αὐτόν. ἐν γὰρ τῷ πονηρῷ διαφωνεῖ, οἷον ἐν τῷ ἀκρατεῖ. καὶ διὰ τοῦτο δοκεῖ καὶ ἐχθρόν ἐνδέχεσθαι αὐτὸν αὐτῷ εἶναι· ἢ δ' εἷς καὶ ἀδιαίρετος, ὁρεκτὸς αὐτὸς αὐτοῦ. τοιοῦτος ὁ ἀγαθὸς καὶ ὁ κατ' ἀρετὴν φίλος, ἐπεὶ ὁ γε μοχθηρὸς οὐχ εἷς ἀλλὰ πολλοί, καὶ τῆς αὐτῆς ἡμέρας ἕτερος καὶ ἔμπληκτος. ὥστε καὶ ἡ αὐτοῦ πρὸς αὐτόν φιλία ἀνάγεται πρὸς τὴν τοῦ ἀγαθοῦ. ὅτι γὰρ πῃ ὁμοιοῖ καὶ εἷς καὶ αὐτὸς αὐτῷ ἀγαθός, ταύτη αὐτὸς αὐτῷ φίλος καὶ ὁρεκτός· φύσει δὲ τοιοῦτος, ἀλλ' ὁ πονηρὸς παρὰ φύσιν. ὁ δ' ἀγαθὸς οὐθ' ἅμα λαιδορεῖται ἑαυτῷ, ὥσπερ ὁ ἀκρατής, οὔτε ὁ ὕστερος τῷ πρότερον, ὥσπερ ὁ μεταμελητικός, οὔτε ὁ ἔμπροσθεν τῷ ὕστερον, ὥσπερ ὁ ψεύστης. ὅλως τε εἰ δεῖ ὥσπερ οἱ σοφισταὶ διορίζουσιν, ὥσπερ τὸ Κορίσκος καὶ Κορίσκος σπουδαῖος. δῆλον γὰρ ὡς τὸ αὐτὸ πόσον σπουδαῖον αὐτῶν, ἐπεὶ ὅταν ἐγκαλέσωσιν αὐτοῖς, ἀποκτιννύσιν αὐτούς· ἀλλὰ δοκεῖ πᾶς αὐτὸς αὐτῷ ἀγαθός. ζητεῖ δὲ ὁ ἀπλῶς ὢν ἀγαθὸς εἶναι καὶ αὐτὸς αὐτῷ φίλος, ὥσπερ εἰρηται, ὅτι δύο ἔχει ἐν αὐτῷ ἃ φύσει βούλεται εἶναι φίλα καὶ διασπᾶσαι ἀδύνατον. διὸ ἐπ' ἀνθρώπου μὲν δοκεῖ ἕκαστος αὐτὸς αὐτῷ φίλος, ἐπὶ δὲ τῶν ἄλλων ζώων <οὐ>, οἷον ἵππος αὐτὸς αὐτῷ, οὐκ ἄρα φίλος. ἀλλ' οὐδὲ τὰ παιδιά, ἀλλ' ὅταν ἤδη ἔχη προαίρεσιν· ἤδη γὰρ τότε διαφωνεῖ ὁ νοῦς πρὸς τὴν ἐπιθυμίαν. - ἔοικε δ' ἡ φιλία ἢ πρὸς αὐτόν τῇ κατὰ συγγένειαν· οὐθέτερον γὰρ ἐφ' αὐτοῖς λῦσαι, ἀλλὰ κἂν διαφέρωνται, ὅμως οὗτοι μὲν ἔτι συγγενεῖς, ὁ δὲ ἔτι εἷς, ἕως ἂν ζῇ.

ποσαχῶς μὲν οὖν τὸ φιλεῖν λέγεται, καὶ ὅτι πᾶσαι αἱ φιλίαι ἀνάγονται πρὸς τὴν πρώτην, δῆλον ἐκ τῶν εἰρημένων· [1241a] οἰκεῖον δὲ τῇ σκέψει θεωρῆσαι καὶ περὶ ὁμονοίας καὶ εὐνοίας. δοκεῖ

γὰρ τοῖς μὲν εἶναι ταῦτά, τοῖς δ' οὐκ ἄνευ ἀλλήλων. ἔστι δ' ἡ εὖνοια τῆς φιλίας οὔτε πάμπαν ἕτερον οὔτε ταυτόν. διηρημένης γὰρ τῆς φιλίας κατὰ τρεῖς τρόπους, οὔτ' ἐν τῇ χρησίμῃ οὔτ' ἐν τῇ καθ' ἡδονὴν ἐστίν. εἴτε γὰρ ὅτι χρήσιμον, βούλεται αὐτῷ τὰγαθά, οὐ δι' ἐκεῖνον ἀλλὰ δι' αὐτὸν βούλουτ' ἄν, δοκεῖ δὲ ὥσπερ καὶ ἡ εὖνοια οὐκ αὐτοῦ εὖνοια τοῦ εὐνοϊζομένου εἶναι, ἀλλὰ τοῦ ᾧ εὐνοεῖ· εἰ δὲ ἦν ἐν τῇ τοῦ ἡδέος φιλίᾳ, κἂν τοῖς ἀψύχοις εὐνόουν. ὥστε δηλον ὅτι περὶ τὴν ἠθικὴν φιλίαν ἡ εὖνοια ἐστίν. ἀλλὰ τοῦ μὲν εὐνοοῦντος βούλεσθαι μόνον ἐστί, τοῦ δὲ φίλου καὶ πράττειν ἃ βούλεται. ἔστι γὰρ ἡ εὖνοια ἀρχὴ φιλίας· ὁ μὲν γὰρ φίλος πᾶς εὖνους, ὁ δ' εὖνους οὐ πᾶς φίλος. ἀρχομένῳ γὰρ ἔοικεν ὁ εὐνοῶν μόνον, διὸ ἀρχὴ φιλίας, ἀλλ' οὐ φιλία.

δοκοῦσι γὰρ οἱ τε φίλοι ὁμονοεῖν καὶ οἱ ὁμονοοῦντες φίλοι εἶναι. ἔστι δ' οὐ περὶ πάντα ἡ ὁμόνοια ἡ φιλική, ἀλλὰ περὶ τὰ πρακτὰ τοῖς ὁμονοοῦσι, καὶ ὅσα εἰς τὸ συζῆν συντείνει, οὔτε μόνον κατὰ διάνοιαν ἢ κατὰ ὄρεξιν (ἔστι γὰρ τάναντία τὸ κινεῖν ἐπιθυμεῖν, ὥσπερ ἐν τῷ ἀκρατεῖ διαφωνεῖ τοῦτο), οὐ δεῖ κατὰ τὴν προαίρεσιν ὁμονοεῖν καὶ κατὰ τὴν ἐπιθυμίαν. ἐπὶ δὲ τῶν ἀγαθῶν ἡ ὁμόνοια· οἱ γε φαῦλοι ταῦτα προαιρούμενοι καὶ ἐπιθυμοῦντες βλάπτουσιν ἀλλήλους. ἔοικε δὲ καὶ ἡ ὁμονοία οὐχ ἀπλῶς λέγεσθαι, ὥσπερ οὐδ' ἡ φιλία· ἀλλ' ἢ μὲν πρώτη καὶ φύσει σπουδαία, διὸ οὐκ ἔστι τοὺς φαύλους ὁμονοεῖν, ἑτέρα δὲ καθ' ἣν καὶ οἱ φαῦλοι ὁμονοοῦσιν, ὅταν τῶν αὐτῶν τὴν προαίρεσιν καὶ τὴν ἐπιθυμίαν ἔχωσιν. οὕτω δὲ δεῖ τῶν αὐτῶν ὀρέγεσθαι, ὥστε ἐνδέχεσθαι ἀμφοτέροις ὑπάρχειν οὐ ὀρέγονται. ἂν γὰρ τοιούτου ὀρέγωνται, ὃ μὴ ἐνδέχεται ἀμφοῖν, μαχοῦνται· οἱ ὁμονοοῦντες δ' οὐ μαχοῦνται. ἔστι δ' ἡ ὁμόνοια, ὅταν περὶ τοῦ ἄρχειν καὶ ἄρχεσθαι ἡ αὐτὴ προαίρεσις ᾖ, μὴ τοῦ ἐκάτερον, ἀλλὰ τοῦ τὸν αὐτόν. καὶ ἔστιν ἡ ὁμόνοια φιλία πολιτική.

περὶ μὲν οὖν ὁμονοίας καὶ εὐνοίας εἰρήσθω τοσαῦτα· ἀπορεῖται δὲ διὰ τί μᾶλλον φιλοῦσιν οἱ ποιήσαντες εὖ τοὺς παθόντας ἢ οἱ παθόντες εὖ τοὺς ποιήσαντας. δοκεῖ δὲ δίκαιον εἶναι τούναντίον. τοῦτο δ' ὑπολάβοι μὲν ἂν τις διὰ τὸ χρήσιμον καὶ τὸ αὐτῷ ὠφέλιμον συμβαίνειν· τῷ μὲν γὰρ ὀφείλεται, τὸν δ' ἀποδοῦναι δεῖ. οὐκ ἔστι δὲ τοῦτο μόνον, ἀλλὰ καὶ φυσικόν. ἢ γὰρ ἐνέργεια αἰρετώτερον, [1241b] τὸν αὐτὸν δὲ λόγον ἔχει τὸ ἔργον καὶ ἡ ἐνέργεια, ὁ δ' εὖ παθὼν ὥσπερ ἔργον τοῦ εὖ ποιήσαντος. διὸ καὶ ἐν τοῖς ζῴοις ἡ περὶ τὰ τέκνα σπουδὴ ἐστί, καὶ τοῦ γεννῆσαι καὶ <τὰ> γεννώμενα σφάζειν.

καὶ φιλοῦσι δὴ μᾶλλον οἱ πατέρες τὰ τέκνα (καὶ αἱ μητέρες τῶν πατέρων) ἢ φιλοῦνται· καὶ οὗτοι πάλιν τὰ αὐτῶν ἢ τοὺς γεννήσαντας, διὰ τὸ τὴν ἐνέργειαν εἶναι τὸ ἄριστον· καὶ αἱ μητέρες τῶν πατέρων, ὅτι μᾶλλον οἴονται αὐτῶν εἶναι ἔργον τὰ τέκνα· τὸ γὰρ ἔργον τῷ χαλεπῷ διορίζουσι, πλείω δὲ λυπεῖται περὶ τὴν γένεσιν μήτηρ.

καὶ περὶ μὲν φιλίας τῆς πρὸς αὐτὸν καὶ τῆς ἐν πλείοσι διωρίσθω τὸν τρόπον τοῦτον· δοκεῖ δὲ τό τε δίκαιον εἶναι ἴσον τι καὶ ἡ φιλία ἐν ἰσότητι, εἰ μὴ μάτην λέγεται ἰσότης [ἡ] φιλότης. αἱ δὲ πολιτεῖαι πᾶσαι δικαίου τι εἶδος· κοινωνία γάρ, τὸ δὲ κοινὸν πᾶν διὰ τοῦ δικαίου συνέστηκεν, ὥστε ὅσα εἶδη φιλίας, καὶ δικαίου καὶ κοινωνίας, καὶ πάντα ταῦτα σύνορα ἀλλήλοις, καὶ ἐγγὺς ἔχει τὰς διαφοράς. ἐπεὶ δ' ὁμοίως ἔχει ψυχὴ πρὸς σῶμα καὶ τεχνίτης πρὸς ὄργανον καὶ δεσπότης πρὸς δοῦλον, τούτων μὲν οὐκ ἔστι κοινωνία. οὐ γὰρ δύο' ἐστίν, ἀλλὰ τὸ μὲν ἐν, τὸ δὲ τοῦ ἐνός [οὐδέν]. οὐδὲ διαιρετὸν τὸ ἀγαθὸν ἐκατέρῳ, ἀλλὰ τὸ ἀμφοτέρων τοῦ ἐνός οὗ ἕνεκα ἐστίν. τό τε γὰρ σῶμά ἐστιν ὄργανον σύμφυτον, καὶ τοῦ δεσπότου ὁ δοῦλος ὥσπερ μόνιον καὶ ὄργανον ἀφαιρετόν, τὸ δ' ὄργανον ὥσπερ δοῦλος ἄψυχος. αἱ δ' ἄλλαι κοινωνίαι εἰσὶν [ἡ] μόνιον τῶν τῆς πόλεως κοινωνιῶν, οἷον ἡ τῶν φρατέρων ἢ τῶν ὀργίων, ἢ αἱ χρηματιστικαὶ ἔτι πολιτεῖαι. αἱ δὲ πολιτεῖαι πᾶσαι ἐν οἰκείois συνυπάρχουσι, καὶ αἱ ὀρθαὶ καὶ αἱ παρεκβάσεις (ἔστι γὰρ τὸ αὐτὸ ὥσπερ καὶ ἐπὶ τῶν ἁρμονιῶν καὶ τῶν ἐν ταῖς πολιτεῖαις)· βασιλικὴ μὲν ἢ τοῦ γεννήσαντος, ἀριστοκρατικὴ δ' ἢ ἀνδρὸς καὶ γυναικός, πολιτεία δ' ἢ τῶν ἀδελφῶν· παρέκβασις δὲ τούτων τυραννὶς ὀλιγαρχία δῆμος. καὶ τὰ δίκαια δὴ τοσαῦτα.

ἐπεὶ δὲ τὸ ἴσον τὸ μὲν κατ' ἀριθμὸν τὸ δὲ κατ' ἀναλογίαν, καὶ τοῦ δικαίου εἶδη ἔσται καὶ τῆς φιλίας καὶ τῆς κοινωνίας. κατ' ἀριθμὸν μὲν γὰρ ἡ «δημοκρατικὴ» κοινωνία καὶ ἡ ἐταιρικὴ φιλία, τῷ γὰρ αὐτῷ ὅρῳ μετρεῖται· κατ' ἀναλογίαν δὲ ἡ ἀριστοκρατικὴ ἀρίστη καὶ βασιλική. οὐ γὰρ ταῦτον δίκαιον τῷ ὑπερέχοντι καὶ ὑπερεχομένῳ, ἀλλὰ τὸ ἀνάλογον. καὶ ἡ φιλία δὲ ὁμοίως πατρὸς καὶ παιδός, καὶ ἐν ταῖς κοινωνίαις ὁ αὐτὸς τρόπος.

[1242a] λέγονται δὲ φιλίαι συγγενικὴ ἐταιρικὴ κοινωνικὴ ἢ λεγομένη πολιτικὴ. ἔστι μὲν συγγενικὴ πολλὰ ἔχουσα εἶδη, ἡ μὲν ὡς ἀδελφῶν, ἡ δ' ὡς πατρὸς καὶ υἱῶν (καὶ γὰρ κατ' ἀναλογίαν, οἷον ἡ πατρικὴ, καὶ κατ' ἀριθμόν, οἷον ἡ τῶν ἀδελφῶν· ἐγγὺς γὰρ αὕτη τῆς

εταιρική· ἐπιλαμβάνουσι γὰρ καὶ ἐνταῦθα πρέσβειον)· ἡ δὲ πολιτικὴ συνέστηκε μὲν κατὰ τὸ χρήσιμον καὶ μάλιστα. διὰ γὰρ τὸ μὴ αὐταρκεῖν δοκοῦσι συνελθεῖν, ἐπεὶ συνῆλθόν γ' ἂν καὶ τοῦ συζῆν χάριν. μόνη δ' ἡ πολιτικὴ καὶ ἡ παρ' αὐτὴν παρέκβασις οὐ μόνον φιλίαί, ἀλλὰ καὶ ὡς φίλοι κοινωνοῦσιν· αἱ δ' ἄλλαι καθ' ὑπεροχὴν. μάλιστα δὲ δίκαιον τὸ ἐν τῇ τῶν χρησίων φιλίᾳ, διὰ τὸ τοῦτ' εἶναι τὸ πολιτικὸν δίκαιον. ἄλλον γὰρ τρόπον συνῆλθον πρίων καὶ τέχνη, οὐχ ἔνεκα κοινοῦ τινος (οἷον γὰρ ὄργανον καὶ ψυχὴ) ἀλλὰ τοῦ χρωμένου ἔνεκεν. συμβαίνει δὲ καὶ τοῦτο ὄργανον ἐπιμελείας τυγχάνειν, ἥς δίκαιον πρὸς τὸ ἔργον· ἐκείνου γὰρ ἔνεκεν ἐστίν. καὶ τὸ τρυπάνω εἶναι διττόν, ὥν τὸ κυριώτερον ἡ ἐνέργεια, ἡ τρύπησις. καὶ ἐν τούτῳ τῷ εἶδει σῶμα καὶ δοῦλος, ὥσπερ εἴρηται πρότερον.

τὸ δὴ ζητεῖν πῶς δεῖ τῷ φίλῳ ὁμιλεῖν, τὸ ζητεῖν δίκαιόν τι ἐστίν. καὶ γὰρ ὅλως τὸ δίκαιον ἅπαν πρὸς φίλον. τό τε γὰρ δίκαιόν τισι καὶ κοινωνοῖς, καὶ ὁ φίλος κοινωνός, ὁ μὲν γένους, ὁ δὲ βίου. ὁ γὰρ ἄνθρωπος οὐ μόνον πολιτικὸν ἀλλὰ καὶ οἰκονομικὸν ζῶν, καὶ οὐχ ὥσπερ τᾷ ποτε συνδυάζεται καὶ τῷ τυχόντι [καὶ] θήλει καὶ ἄρρενι ἀλλ' αἱ διὰ δύμον αὐλικόν, ἀλλὰ κοινωνικὸν ἄνθρωπος ζῶν πρὸς οὓς φύσει συγγένεια ἐστίν· καὶ κοινωνία τοίνυν καὶ δίκαιόν τι, καὶ εἰ μὴ πόλις εἴη· οἰκία δ' ἐστὶ τις φιλία. δεσπότου μὲν οὖν καὶ δούλου ἥπερ καὶ τέχνης καὶ ὀργάνων καὶ ψυχῆς καὶ σώματος, αἱ δὲ τοιαῦται οὔτε φιλίαί οὔτε δικαιοσύναι, ἀλλ' ἀνάλογον, ὥσπερ καὶ τὸ ὑγιεινὸν οὐ δίκαιον, ἀλλ' ἀνάλογον· γυναικὸς δὲ καὶ ἀνδρὸς φιλία ὡς χρήσιμον καὶ κοινωνία· πατὴρ δὲ καὶ υἱοῦ ἡ αὐτὴ ἥπερ θεοῦ πρὸς ἄνθρωπον καὶ τοῦ εὖ ποιήσαντος πρὸς τὸν παθόντα καὶ ὅλως τοῦ φύσει ἄρχοντος πρὸς τὸν φύσει ἀρχόμενον· ἡ δὲ τῶν ἀδελφῶν πρὸς ἀλλήλους ἐταιρικὴ μάλιστα ἡ κατ' ἰσότητα.

“οὐ γάρ τι νόθος τῷδ' ἀπεδείχθη·

ἀμφοῖν δὲ πατήρ αὐτὸς ἐκλήθη

Ζεὺς ἐμὸς ἄρχων.” ταῦτα γὰρ ὡς τὸ ἴσον ζητούντων λέγεται. διὸ ἐν οἰκίᾳ [1242b] πρῶτον ἀρχαὶ καὶ πηγαὶ φιλίας καὶ πολιτείας καὶ δικαίου.

ἐπεὶ δὲ φιλίαί τρεῖς, κατ' ἀρετὴν, κατὰ τὸ χρήσιμον, κατὰ τὸ ἡδύ, τούτων δὲ ἐκάστης δύο διαφοραὶ (ἡ μὲν γὰρ καθ' ὑπεροχὴν ἡ δὲ κατ' ἰσότητά ἐστιν ἐκάστη αὐτῶν, τὸ δὲ δίκαιον τὸ περὶ αὐτὰς ἐκ τῶν ἀμφισβητησάντων δηλον), ἐν μὲν τῇ καθ' ὑπεροχὴν ἀξιοῦται τὸ ἀνάλογον, ἀλλ' οὐχ ὡσαύτως, ἀλλ' ὁ μὲν ὑπερέχων ἀνεστραμμένως

τὸ ἀνάλογον, ὥς αὐτὸς πρὸς τὸν ἐλάττω, οὕτω τὸ παρὰ τοῦ ἐλάττονος γινόμενον πρὸς τὸ παρ' αὐτοῦ, διακείμενος ὥσπερ ἄρχων πρὸς ἀρχόμενον· εἰ δὲ μὴ τοῦτο, ἀλλὰ τὸ ἴσον κατ' ἀριθμὸν ἀξιοῖ. καὶ γὰρ δὴ καὶ ἐπὶ τῶν ἄλλων κοινωνιῶν οὕτω συμβαίνει. ὅτε μὲν γὰρ ἀριθμῷ τοῦ ἴσου μετέχουσιν, ὅτε δὲ λόγῳ. εἰ μὲν γὰρ ἴσον ἀριθμῷ εἰσήμενον ἀργύριον, ἴσον καὶ τῷ ἴσῳ ἀριθμῷ διαλαμβάνουσιν, εἰ δὲ μὴ ἴσον, ἀνάλογον. ὁ δ' ὑπερέχόμενος τούναντίον στρέφει τὸ ἀνάλογον, καὶ κατὰ διάμετρον συζεύγνυσιν. δόξειε δ' ἂν οὕτως ἐλαττοῦσθαι ὁ ὑπέρχων καὶ λειτουργία ἢ φιλία καὶ ἡ κοινωνία. δεῖ ἄρα τινὲς ἐτέρῳ ἀνισάσαι καὶ ποιῆσαι ἀνάλογον. τοῦτο δ' ἐστὶν ἡ τιμὴ, ὅπερ καὶ τῷ ἄρχοντι φύσει καὶ θεῷ πρὸς τὸ ἀρχόμενον. δεῖ δὲ ἰσασθῆναι τὸ κέρδος πρὸς τὴν τιμὴν.

ἡ δὲ κατ' ἴσα φιλία ἐστὶν ἡ πολιτική. ἡ δὲ πολιτική ἐστι μὲν κατὰ τὸ χρήσιμον, καὶ ὥσπερ αἱ πόλεις ἀλλήλαις φίλαι, οὕτω καὶ οἱ πολῖται, καὶ ὁμοίως

“οὐκέτι γινώσκουσιν Ἀθηναῖοι Μεγαρήας”, καὶ οἱ πολῖται, ὅταν μὴ χρήσιμοι ἀλλήλοις, ἀλλ' ἐκ χειρὸς εἰς χεῖρα ἢ φιλία· ἐστὶ δὲ ἐνταῦθα καὶ ἄρχον καὶ ἀρχόμενον οὕτε τὸ φυσικὸν οὕτε τὸ βασιλικόν, ἀλλὰ τὸ ἐν τῷ μέρει, οὐδὲ τούτου ἕνεκα ὅπως εὖ ποιῇ ὁ θεός, ἀλλ' ἵνα ἴσον ᾖ τοῦ ἀγαθοῦ καὶ τῆς λειτουργίας. κατ' ἰσότητα δὴ βούλεται εἶναι ἡ πολιτικὴ φιλία. ἐστὶ δὲ τῆς χρησίμου φιλίας εἶδη δύο, ἡ μὲν νομικὴ ἡ δ' ἠθικὴ. βλέπει δ' ἡ μὲν πολιτικὴ εἰς τὸ ἴσον καὶ εἰς τὸ πρᾶγμα, ὥσπερ οἱ πωλοῦντες καὶ οἱ ὠνούμενοι. διὸ εἴρηται “μισθὸς ἀνδρὶ φίλῳ.”

ὅταν μὲν οὖν καθ' ὁμολογίαν <ἡ> ἡ πολιτικὴ αὕτη φιλία, [καὶ] νομικὴ· ὅταν δ' ἐπιτρέπωσιν αὐτοῖς, ἠθικὴ βούλεται εἶναι φιλία καὶ ἐταιρικὴ. διὸ μάλιστα ἐγκλημα ἐν ταύτῃ τῇ φιλίᾳ· αἴτιον δ' ὅτι παρὰ φύσιν. ἕτεροι γὰρ φίλια ἢ κατὰ τὸ χρήσιμον καὶ ἢ κατὰ τὴν ἀρετὴν· οἱ δ' ἀμφοτέρω βούλονται ἅμα ἔχειν, καὶ ὁμιλοῦσι μὲν τοῦ χρησίμου [1243a] ἕνεκα, ἠθικὴν δὲ ποιοῦσιν ὥς ἐπιεικεῖς, διὸ ὥς πιστεύοντες οὐ νομικὴν ποιοῦσιν. ὅλως μὲν γὰρ ἐν τῇ χρησίμῃ τῶν τριῶν πλεῖστα ἐγκλήματα (ἡ μὲν γὰρ ἀρετὴ ἀνέγκλητον, οἱ δ' ἡδέεις ἔχοντες καὶ δόντες ἀπαλλάττονται· οἱ δὲ χρήσιμοι οὐκ εὐθὺς διαλύονται, ἂν μὴ νομικῶς καὶ ἐταιρικῶς προσφέρωνται)· ὅμως δὲ τῆς χρησίμου ἢ νομικὴ ἀνέγκλητος. ἐστὶ δ' ἡ μὲν νομικὴ διάλυσις πρὸς νόμισμα (μετρεῖται γὰρ τούτῳ τὸ ἴσον), ἡ δ' ἠθικὴ ἐκούσιος. διὸ ἐνιαχοῦ νόμος ἐστὶ τοῖς οὕτως ὁμιλοῦσι φιλικῶς μὴ εἶναι δίκας τῶν ἐκουσίων

συναλλαγμάτων, ὁρθῶς· τοῖς γὰρ ἀγαθοῖς οὐ πέφυκε δίκαιον εἶναι, οἱ δ' ὥς ἀγαθοὶ καὶ πιστοὶ συναλλάττουσιν. ἔστι δὲ ἐν ταύτῃ τῇ φιλίᾳ τὰ ἐγκλήματα ἀμφιβάλλοντα αὐτοῖς ἀμφοτέρω, πῶς ἑκάτερος ἐγκαλεῖ, ὅταν ἠθικῶς ἀλλὰ μὴ νομικῶς πιστεῦσώσιν. καὶ ἔχει δὴ ἀπορίαν ποτέρως δεῖ κρίνειν τὸ δίκαιον, πότερα πρὸς τὸ πρᾶγμα βλέποντα τὸ ὑπηρετηθὲν, πόσον, ἢ ποῖον ἦν τῷ πεπονθότι. ἐνδέχεται γὰρ ὅπερ λέγει Θέογνις·

“σοὶ μὲν τοῦτο, θεά, σμικρὸν, ἐμοὶ δὲ μέγα.” ἐνδέχεται δὲ καὶ τοῦναντίον γενέσθαι, ὥσπερ ἐν τῷ λόγῳ, σοὶ μὲν παιδιὰν τοῦτ' εἶναι, ἐμοὶ δὲ θάνατον. ἐντεῦθεν δ' εἴρηται τὰ ἐγκλήματα. ὁ μὲν γὰρ ἀξιοῖ ἀντιπαθεῖν ὥς μέγα ὑπηρετήσας, ὅτι δεομένῳ ἐποίησιν, ἢ τι ἄλλο τοιοῦτο, λέγων πρὸς τὴν ἐκείνου ὠφέλειαν πόσον ἠδύνατο, ἀλλ' οὐ τί ἦν αὐτῷ· ὁ δὲ τοῦναντίον ὅσον ἐκείνῳ, ἀλλ' οὐχ ὅσον αὐτῷ. ὅτε δὲ καὶ μεταλαμβάνων καὶ ἀμφιβάλλει. ὁ μὲν γὰρ ὅσον αὐτῷ μικρὸν ἀπέβη, ὁ δ' ὅσον αὐτῷ μέγα ἐδύνατο, οἷον εἰ κινδυνεύσας δραχμῆς ἄξιον ὠφέλησεν, ὁ μὲν τὸ τοῦ κινδύνου μέγεθος ὁ δὲ τὸ τοῦ ἀργυρίου, ὥσπερ ἐν τῇ τῶν νομισμάτων ἀποδόσει. καὶ γὰρ ἐνταῦθα περὶ τούτων ἡ ἀμφισβήτησις· ὁ μὲν γὰρ ἀξιοῖ πῶς τότ' ἦν, ὁ δὲ πῶς νῦν, ἂν μὴ διείπωνται. ἡ μὲν οὖν πολιτικὴ βλέπει εἰς τὴν ὁμολογίαν καὶ εἰς τὸ πρᾶγμα, ἡ δ' ἠθικὴ εἰς τὴν προαίρεσιν. ὥστε καὶ δίκαιον τοῦτο μᾶλλον ἐστὶ, καὶ δικαιοσύνη φιλική. αἴτιον δὲ τοῦ μάχεσθαι, διότι καλλίων μὲν ἡ ἠθικὴ φιλία, ἀναγκαιοτέρα δὲ ἡ χρησίμη. οἱ δ' ἄρχονται μὲν ὥς οἱ ἠθικοὶ φίλοι καὶ δι' ἀρετὴν ὄντες· ὅταν δ' ἀντικρυς ἢ τι τῶν ἰδίων, δῆλοι γίνονται ὅτι ἕτεροι ἦσαν. ἐκ περιουσίας γὰρ διώκουσιν οἱ πολλοὶ τὰ καλόν· διὸ καὶ [1243b] τὴν καλλίῳ φιλίαν. ὥστε φανερόν πῶς διαιρετέον περὶ τούτων. εἰ μὲν γὰρ ἠθικοὶ φίλοι, εἰς τὴν προαίρεσιν βλεπτέον εἰ ἴση, καὶ οὐθὲν ἄλλο ἀξιώτεον θατέρῳ παρὰ θατέρου· εἰ δ' ὥς χρήσιμοι καὶ πολιτικοί, ὥς ἂν ἐλυσιτέλει ὁμολογοῦσιν· ἂν δ' ὁ μὲν φῇ ὥδε ὁ δὲ ἐκείνως, οὐ καλὸν μὲν ἀντιποιῆσαι, δεόν τοὺς καλοὺς λέγειν λόγους, ὁμοίως δὲ καὶ ἐπὶ θατέρου, ἀλλ' ἐπεὶ οὐ διείποντο ὥς ἠθικῶς, δεῖ κρίνειν τίνα, μὴδ' ὑποκρινόμενον μηδέτερον αὐτῶν ἐξαπατᾶν. ὥστε δεῖ στέργειν αὐτὸν τὴν τύχην. ὅτι δ' ἐστὶν ἡ ἠθικὴ κατὰ προαίρεσιν, δῆλον, ἐπεὶ κἂν εἰ μεγάλα παθὼν μὴ ἀποδῶῃ δι' ἀδυναμίαν, ἀλλ' ὥς ἠδύνατο, καλῶς· καὶ ὁ θεὸς ἀνέχεται κατὰ δύναμιν λαμβάνων τὰς θυσίας. ἀλλὰ τῷ πωλοῦντι οὐχ ἱκανῶς ἔξει, ἂν μὴ φήσῃ δύνασθαι πλέον δοῦναι, οὐδὲ τῷ δανείσαντι.

πολλά ἐγκλήματα γίνεται ἐν ταῖς φιλίαις τοῖς μὴ κατ' εὐθυωρίαν, καὶ τὸ δίκαιον ἰδεῖν οὐ ῥάδιον. χαλεπὸν γὰρ μετρηῆσαι ἐνὶ τῷδε τὸ μὴ κατ' εὐθυωρίαν, οἷον συμβαίνει ἐπὶ τῶν ἐρωτικῶν. ὁ μὲν γὰρ διώκει ὡς [τὸν] ἡδὺν ἐπὶ τὸ συζῆν, ὁ δ' ἐκείνους ἐνίοτε ὡς χρήσιμον· ὅταν δὲ παύσῃται τοῦ ἐρᾶν, ἄλλου γινομένου ἄλλος γίνεται, καὶ τότε λογίζονται παντὶ τινος, καὶ ὡς Πύθων καὶ Παμμένης διεφέροντο καὶ ὡς διδάσκαλος καὶ μαθητῆς (ἐπιστήμη γὰρ καὶ χρήματα οὐχ ἐνὶ μετρεῖται), καὶ ὡς Ἡρόδικος ὁ ἰατρὸς πρὸς τὸν ἀποδιδόντα μικρὸν τὸν μισθόν, καὶ ὡς ὁ κιθαρωδὸς καὶ ὁ βασιλεύς. ὁ μὲν γὰρ ὡς ἡδεῖ, ὁ δ' ὡς χρησίμῳ ὠμίλει· ὁ δ' ἐπεὶ ἔδει ἀποδιδόναι, αὐτὸν αὐτὸν ὡς ἡδὺν ἐποίησεν, καὶ ἔφη, ὥσπερ ἐκείνους ἄσαντα εὐφρᾶναι, οὕτω καὶ αὐτὸς ὑποσχόμενος ἐκείνῳ. ὅμως δὲ φανερόν καὶ ἐνταῦθα πῶς γνωριστέον· ἐνὶ μὲν γὰρ μετρητέον καὶ ἐνταῦθ', ἀλλ' οὐχ ὅρῳ, ἀλλὰ λόγῳ· τῷ ἀνάλογον γὰρ μετρητέον, ὥσπερ καὶ ἡ πολιτικὴ μετρεῖται κοινωνία. πῶς γὰρ κοινωνήσῃ γεωργῷ σκυτοτόμος, εἰ μὴ τῷ ἀνάλογον ἰσασθήσεται τὰ ἔργα; τοῖς δὲ μὴ κατ' εὐθυωρίαν τὸ ἀνάλογον μέτρον, οἷον εἰ ὁ μὲν σοφίαν δοῦναι ἐγκαλεῖ, ὁ δ' ἐκείνῳ ἀργύριον, τῇ σοφίᾳ πρὸς τὸ πλούσιον, εἴτα τί δοθὲν πρὸς ἐκάτερον. εἰ γὰρ ὁ μὲν τοῦ ἐλάττονος ἡμισυ ἔδωκεν, ὁ δὲ τοῦ μείζονος μὴ πολλοστὸν μέρος, δηλὸν ὅτι οὗτος ἀδικεῖ. ἔστι δὲ κἀνταῦθα ἐν ἀρχῇ ἀμφισβήτησις, ἃν φῇ ὁ μὲν ὡς χρησίμους συνελθεῖν αὐτούς, ὁ δὲ μή, ἀλλ' ὡς κατ' ἄλλην τινὰ φιλίαν.

[1244a] περὶ δὲ τοῦ ἀγαθοῦ καὶ κατ' ἀρετὴν φίλου, σκεπτέον πότερον δεῖ ἐκείνῳ τὰ χρήσιμα ὑπηρετεῖν καὶ βοηθεῖν ἢ τῷ ἀντιποιοῦντι καὶ δυναμένῳ. τοῦτο δὲ τὸ αὐτὸ πρόβλημα ἐστὶ, πότερον τὸν φίλον ἢ τὸν σπουδαῖον εὖ ποιητέον μᾶλλον. ἂν μὲν γὰρ <ὁ> φίλος καὶ σπουδαῖος, ἴσως οὐ λίαν χαλεπόν, ἂν μὴ τις τὸ μὲν αὐξήσῃ τὸ δὲ ταπεινώσῃ, φίλον μὲν σφόδρα ποιῶν, ἐπεικὴ δὲ ἡρέμα· εἰ δὲ μή, πολλὰ προβλήματα γίνεται, οἷον εἰ ὁ μὲν ἦν, οὐκ ἔσται δέ, ὁ δὲ ἔσται, οὐπω δέ, ἢ ὁ μὲν ἐγένετο, ἔστι δ' οὐ, ὁ δὲ ἔστιν, οὐκ ἦν δὲ οὐδὲ ἔσται, ἀλλ' ἐκεῖνο ἐργωδέστερον. μὴ γάρ τι λέγει Εὐριπίδης, ποιήσας

“λόγων δίκαιον μισθὸν ἂν λόγους φέροις,

ἔργον δ' ἐκεῖνος ἔργον <ὁς> παρέσχετο.”

καὶ οὐ πάντα δεῖ τῷ πατρί, ἀλλ' ἔστιν ἄλλ' ἃ δεῖ τῇ μητρί· καίτοι βελτίων ὁ πατήρ. οὐδὲ γὰρ τῷ Διὶ πάντα θύεται, οὐδ' ἔχει πάσας τὰς τιμὰς ἀλλὰ τινάς· ἴσως οὖν ἔστιν ἃ δεῖ τῷ χρησίμῳ, ἄλλα δὲ τῷ

ἀγαθῷ. οἷον οὐχ εἰ σῖτον δίδωσι καὶ τὰ ἀναγκαῖα, καὶ συζῆν τούτῳ δεῖ· οὐδ' ὧ τοίνυν τὸ συζῆν, τούτῳ ἂ μὴ οὗτος δίδωσιν, ἀλλὰ χρήσιμος. ἀλλ' οἱ τοῦτο ποιοῦντες τούτῳ πάντα τῷ ἐρωμένῳ διδόασιν οὐ δέον, οὐδενός εἰσιν ἄξιοι.

καὶ οἱ ἐν τοῖς λόγοις ὅροι τῆς φιλίας πάντες μὲν πῶς εἰσι φιλίας, ἀλλ' οὐ τῆς αὐτῆς. τῷ μὲν γὰρ χρησίμῳ τὸ βούλεσθαι τὰ κείνῳ ἀγαθὰ καὶ τῷ εὖ ποιήσαντι καὶ τῷ ὁποῖος δεῖ (οὐ γὰρ ἐπισημαίνει οὗτος ὁ ὀρισμὸς τῆς φιλίας), ἄλλῳ δὲ τὸ εἶναι καὶ ἄλλῳ τὸ συζῆν, τῷ δὲ καθ' ἡδονὴν τὸ συναλγεῖν καὶ συγχαίρειν· πάντες δ' οὗτοι οἱ ὅροι κατὰ φιλίαν μὲν λέγονται τινά, οὐ πρὸς μίαν δ' οὐδεῖς. διὸ πολλοὶ εἰσὶ, καὶ ἕκαστος μιᾶς εἶναι δοκεῖ φιλίας, οὐκ ὦν, οἷον ἡ τοῦ εἶναι προαίρεσις. καὶ γὰρ ὁ καθ' ὑπεροχὴν καὶ ποιήσας εὖ βούλεται τῷ ἔργῳ τῷ αὐτοῦ ὑπάρχειν, καὶ τῷ δόντι τὸ εἶναι δεῖ καὶ ἀνταποδιδόναι, ἀλλὰ συζῆν οὐ τούτῳ, ἀλλὰ τῷ ἡδεῖ.

ἀδικοῦσιν οἱ φίλοι ἀλλήλους ἐνιοι· τὰ γὰρ πράγματα μᾶλλον, ἀλλ' οὐ φιλοῦσι τὸν ἔχοντα· διὸ φιλεῖ κἀκείνους οἷον διότι ἡδὺς τὸν οἶνον εἴλετο, καὶ ὅτι χρήσιμος τὸν πλουτὸν εἴλετο· χρησιμώτερος γάρ. διὸ <οὐ> δεῖ ἀγανακτεῖν, ὥσπερ ἂν εἰ μᾶλλον εἴλετο ἀντὶ ἡττονος. οἱ δ' ἐγκαλοῦσιν· ἐκείνον γὰρ νῦν ζητοῦσι τὸν ἀγαθόν, πρότερον ζητήσαντες τὸν ἡδὺν ἢ τὸν χρήσιμον.

[1244b] σκεπτέον δὲ καὶ περὶ αὐτάρκειας καὶ φιλίας, πῶς ἔχουσι πρὸς τὰς ἀλλήλων δυνάμεις. ἀπορήσειε γὰρ ἂν τις πότερον, εἴ τις εἴη κατὰ πάντα αὐτάρκης, ἔσται τούτῳ φίλος. εἰ κατ' ἐνδειαν ζητεῖται φίλος καὶ ἔσται ἀγαθὸς αὐταρκέστατος, εἰ ὁ μετ' ἀρετῆς εὐδαίμων, τί ἂν δέοι φίλου; οὔτε γὰρ τῶν χρησίμων δεῖσθαι αὐτάρκους οὔτε τῶν εὐφρανούντων οὔτε τοῦ συζῆν· αὐτὸς γὰρ αὐτῷ ἱκανὸς συνεῖναι. μάλιστα δὲ τοῦτο φανερόν ἐπὶ θεοῦ· δῆλον γὰρ ὡς οὐδενὸς προσδεόμενος οὐδὲ φίλου δεήσεται, οὐδ' ἔσται αὐτῷ οὔτε μηθὲν δεσπότου. ὥστε καὶ ἄνθρωπος ὁ εὐδαιμονέστατος ἥκιστα δεήσεται φίλου, ἀλλ' ἢ καθ' ὅσον ἀδύνατον εἶναι αὐτάρκη. ἀνάγκη ἄρα ἐλαχίστους εἶναι φίλους τῷ ἄριστα ζῶντι, καὶ ἀεὶ ἐλάττους γίνεσθαι, καὶ μὴ σπουδάζειν ὅπως ὧσι φίλοι, ἀλλ' ὀλιγωρεῖν μὴ μόνον τῶν χρησίμων, ἀλλὰ καὶ εἰς τὸ συζῆν αἰρετῶν. ἀλλὰ μὴν καὶ τότε φανερόν ἂν εἶναι δόξειεν ὡς οὐ χρήσεως ἕνεκα ὁ φίλος οὐδ' ὠφελείας, ἀλλὰ δι' ἀρετὴν φίλος μόνος. ὅταν γὰρ μηθενὸς ἐνδεεῖς ὦμεν, τότε τοὺς συναπλουσομένους ζητοῦσι πάντες, καὶ τοὺς εὖ πεισομένους μᾶλλον ἢ τοὺς ποιήσοντας. ἀμείνω δ' ἔχομεν κρίσιν

αὐτάρκεις ὄντες ἢ μετ' ἐνδεΐας, ὅτε μάλιστα τῶν συζῆν ἀξίων δεόμεθα φίλων. περὶ δὲ τῆς ἀπορίας ταύτης σκεπτέον, μή ποτε τὸ μέν τι λέγεται καλῶς, τὸ δὲ λανθάνει διὰ τὴν παραβολήν. δηλὸν δὲ λαβοῦσι τί τὸ ζῆν τὸ κατ' ἐνέργειαν, καὶ ὡς τέλος. φανερόν οὖν ὅτι τὸ αἰσθάνεσθαι καὶ τὸ γνωρίζειν, ὥστε καὶ τὸ συζῆν τὸ συναισθάνεσθαι καὶ τὸ συγγνωρίζειν ἐστίν. ἔστι δὲ τὸ αὐτοῦ αἰσθάνεσθαι καὶ τὸ αὐτὸν γνωρίζειν αἰρετώτατον ἐκάστω, καὶ διὰ τοῦτο τοῦ ζῆν πᾶσιν ἔμφυτος ἡ ὄρεξις· τὸ γὰρ ζῆν δεῖ τιθέναι γινῶσιν τινά. εἰ οὖν τις ἀποτέμει καὶ ποιήσῃ τὸ γινώσκειν αὐτὸ καθ' αὐτὸ καὶ μὴ (ἀλλὰ τοῦτο μὲν λανθάνει, ὥσπερ ἐν τῷ λόγῳ γέγραπται, τῷ μέντοι πράγματι ἔστι μὴ λανθάνειν), οὐθὲν ἂν διαφέροι ἢ τὸ γινώσκειν ἄλλον ἀνθ' αὐτοῦ· τὸ δ' ὅμοιον τοῦ ζῆν ἀνθ' αὐτοῦ ἄλλον. εὐλόγως δὴ τὸ ἑαυτοῦ αἰσθάνεσθαι καὶ γνωρίζειν αἰρετώτερον. δεῖ γὰρ ἅμα συνθεῖναι δύο ἐν τῷ λόγῳ, ὅτι τε τὸ ζῆν [καὶ] αἰρετόν, καὶ ὅτι τὸ ἀγαθόν, καὶ ἐκ τούτων ὅτι τὸ αὐτὸ τοῖς ὑπάρχειν τὴν [1245a] τοιαύτην φύσιν. εἰ οὖν ἐστὶν ἀεὶ τῆς τοιαύτης συστοιχίας ἡ ἑτέρα ἐν τῇ τοῦ αἰρετοῦ τάξει, καὶ τὸ γνωστόν καὶ τὸ αἰσθητόν ἐστὶν ὡς ὅλως εἰπεῖν τῷ κοινωνεῖν τῆς ὀρισμένης φύσεως· ὥστε τὸ αὐτοῦ βούλεσθαι αἰσθάνεσθαι τὸ αὐτὸν εἶναι τοιονδὶ βούλεσθαι ἐστίν. ἐπεὶ οὖν οὐ κατ' αὐτοὺς ἐσμεν ἕκαστον τούτων, ἀλλὰ κατὰ μετάληψιν τῶν δυνάμεων ἐν τῷ αἰσθάνεσθαι ἢ γνωρίζειν (αἰσθανόμενος μὲν γὰρ αἰσθητὸς γίνεται ταύτῃ καὶ κατὰ τοῦτο, καθὰ πρότερον αἰσθάνεται, καὶ ἢ καὶ οὗ, γνωστός δὲ γινώσκων)· ὥστε διὰ τοῦτο καὶ ζῆν ἀεὶ βούλεται, ὅτι βούλεται ἀεὶ γνωρίζειν, τοῦτο δὲ ὅτι αὐτὸς εἶναι τὸ γνωστόν. τὸ δὴ συζῆν αἰρεῖσθαι δόξειε μὲν ἂν εἶναι σκοποῦμένοις πως εὖηθες (ἐπὶ τῶν κοινῶν πρῶτον καὶ τοῖς ἄλλοις ζώοις, οἷον τοῦ συνεσθίειν ἢ τοῦ συμπίνειν· τί γὰρ διαφέρει τὸ πλησίον οὔσι ταῦτα συμβαίνειν ἢ χωρίς, ἂν ἀφέλῃς τὸν λόγον; ἀλλὰ μὴν καὶ τοῦ λόγου κοινωνεῖν τοῦ τυχόντος ἕτερον τοιοῦτον· ἅμα τε οὔτε διδάσκειν οὔτε μανθάνειν τοῖς αὐταρκέσι φίλοις οἷόν τε· μανθάνων μὲν γὰρ αὐτὸς οὐκ ἔχει ὡς δεῖ, διδάσκοντος δ' ὁ φίλος, ἢ δ' ὁμοιότης φιλία)· ἀλλὰ μὴν φαίνεται γε, καὶ πάντες ἥδιον τῶν ἀγαθῶν μετὰ τῶν φίλων κοινωνοῦμεν, καθ' ὅσον ἐπιβάλλει ἕκαστον καὶ οὗ δύναται ἀρίστου, ἀλλὰ τούτων τῷ μὲν ἡδονῆς σωματικῆς, τῷ δὲ θεωρίας μουσικῆς, τῷ δὲ φιλοσοφίας. καὶ τὸ ἅμα δεῖ εἶναι τῷ φίλῳ. διό φησι “μόχθος οἱ τηλοῦ φίλοι”, ὥστ' οὐ δεῖ γενέσθαι ἀπ' ἀλλήλων τούτου γινομένου. ὅθεν καὶ ὁ ἔρως δοκεῖ φιλία ὅμοιον

ἀπορήσειε δ' ἂν τις, εἰ ἔστιν ἐκάστω [φίλῳ] χρήσασθαι καὶ ἐφ' ᾧ πέφυκε καὶ ἄλλως, καὶ τοῦτο ἢ «καθ'» αὐτὸ ἢ κατὰ συμβεβηκός, οἷον εἰ ὀφθαλμὸς ἰδεῖν ἢ καὶ ἄλλως παριδεῖν διαστρέψαντα, ὥστε δύο τὸ ἐν φανῆναι. αὐταὶ μὲν δὴ ἄμφω ὅτι μὲν ὀφθαλμός· ὅτι ἦν δ' ὀφθαλμῷ, ἄλλη δὲ κατὰ συμβεβηκός, οἷον εἰ ἦν ἀποδόσθαι ἢ φαγεῖν. ὁμοίως δὴ καὶ ἐπιστήμη· καὶ γὰρ ἀληθῶς καὶ ἀμαρτεῖν, οἷον ὅταν ἐκὼν μὴ ὀρθῶς γράψῃ, ὡς ἀγνοία δὴ νῦν χρῆσθαι, ὥσπερ μεταστρέψας τὴν χεῖρα· καὶ τῷ ποδὶ ποτε ὡς χειρὶ καὶ ταύτῃ ὡς ποδὶ χρῶνται «αἱ» ὀρχηστρίδες. εἰ δὴ πᾶσαι αἱ ἀρεταὶ ἐπιστῆμαι, εἴη ἂν καὶ τῇ δικαιοσύνῃ ὡς ἀδικία χρῆσθαι, ἀδικήσῃ ἄρα ἀπὸ δικαιοσύνης τὰ ἄδικα πράττων, ὥσπερ καὶ τὰ ἀγνοητικὰ ἀπὸ ἐπιστήμης· εἰ δὲ τοῦτ' ἀδύνατον, φανερόν [1246b] ὅτι οὐκ ἂν εἶεν ἐπιστῆμαι αἱ ἀρεταί. οὐδ' εἰ μὴ ἔστιν ἀγνοεῖν ἀπὸ ἐπιστήμης, ἀλλ' ἀμαρτάνειν μόνον, καὶ τὰ αὐτὰ «ἂ» καὶ ἀπὸ ἀγνοίας ποιεῖν, οὗ τι ἀπὸ δικαιοσύνης γε ὡς ἀπὸ ἀδικίας πράξει· ἀλλ' ἐπεὶ φρόνησις ἐπιστήμη καὶ ἀληθές τι, τὸ αὐτὸ ποιήσει κάκεινῃ· ἐνδέχοιτο γὰρ ἂν ἀφρόνως ἀπὸ φρονήσεως, καὶ ἀμαρτάνειν ταῦτά ἅπερ ὁ ἄφρων. εἰ δὲ ἀπλή ἦν ἐκάστου χρεία ἢ ἕκαστον, κἂν φρονίμως ἔπραττον οὕτω πράττοντες. ἐπὶ μὲν οὖν ταῖς ἄλλαις ἐπιστήμαις ἄλλη κυρία ποιεῖ τὴν στροφήν· αὐτῆς δὲ τῆς πασῶν κυρίας τίς; οὐ γὰρ ἔτι ἐπιστήμη γε [ἢ νοῦς]. ἀλλὰ μὴν οὐδ' ἀρετὴ. χρῆται γὰρ αὐτῇ. ἢ γὰρ τοῦ ἄρχοντος ἀρετὴ τῇ τοῦ ἀρχομένου χρῆται. τίς οὖν ἐστίν; ἢ ὥσπερ λέγεται ἀκρασία κακία τοῦ ἀλόγου τῆς ψυχῆς, καὶ ὡς ἀκόλαστος ὁ ἀκρατὴς ἔχων νοῦν; ἀλλ' εἰ δὴ, ἂν ἰσχυρὰ ἢ ἡ ἐπιθυμία, στρέψει καὶ λογιεῖται τάναντία ἢ σφι, δῆλον ὅτι, κἂν ἐν μὲν τούτῳ ἀρετὴ, ἐν δὲ τῷ λόγῳ ἀγνοία ἦ, ἕτεραι μεταποιοῦνται. ὥστε ἔσται δικαιοσύνη τὸ δικαίως χρῆσθαι καὶ κακῶς καὶ φρονήσῃ ἀφρόνως· ὥστε καὶ τάναντία. ἄτοπον γὰρ εἰ τὴν μὲν ἐν τῷ λογιστικῷ ἀρετὴν μοχθηρία ποτὲ ἐγγενομένη ἐν τῷ ἀλόγῳ στρέψει καὶ ποιήσει ἀγνοεῖν, ἢ δ' ἀρετὴ ἐν τῷ ἀλόγῳ ἀγνοίας ἐνούσης οὐ στρέψει ταύτην, καὶ ποιήσει φρονίμως κρίνειν καὶ τὰ δέοντα, καὶ πάλιν ἢ φρόνησις ἢ ἐν τῷ λογιστικῷ τὴν ἐν τῷ ἀλόγῳ ἀκολασίαν σωφρόνως πράττειν· ὅπερ δοκεῖ ἢ ἐγκράτεια. ὥστ' ἔσται καὶ [ἡ] ἀπὸ ἀγνοίας φρονίμως. ἔστι δὲ ταῦτα ἄτοπα, ἄλλως τε καὶ ἀπὸ ἀγνοίας χρῆσθαι φρονίμως, τοῦτο γὰρ ἐπὶ τῶν ἄλλων οὐδεμιᾶς

κατὰ μέρος μὲν οὖν περὶ ἐκάστης ἀρετῆς εἴρηται πρότερον· ἐπεὶ δὲ χωρὶς διείλομεν τὴν δύναμιν αὐτῶν, καὶ περὶ τῆς ἀρετῆς διαρθρωτέον τῆς ἐκ τούτων, ἣν ἐκαλοῦμεν ἡδὴ καλοκάγαθίαν. ὅτι μὲν οὖν ἀνάγκη τὸν ταύτης ἀληθῶς τευξόμενον τῆς προσηγορίας ἔχειν τὰς κατὰ μέρος ἀρετάς, φανερόν. οὐδὲ γὰρ ἐπὶ τῶν ἄλλων οὐθενὸς οἷόν τ' ἄλλως ἔχειν. οὐθεὶς γὰρ ὅλον μὲν τὸ σῶμα ὑγιαίνει, μέρος δ' οὐθέν, ἀλλ' ἀναγκαῖον πάντα ἢ τὰ πλεῖστα καὶ κυριώτατα τὸν αὐτὸν ἔχειν τρόπον τῷ ὅλῳ. ἔστι δὴ τὸ ἀγαθὸν εἶναι καὶ τὸ καλὸν κάγαθον οὐ μόνον κατὰ τὰ ὀνόματα, ἀλλὰ καθ' αὐτὰ ἔχοντα διαφοράν. τῶν γὰρ ἀγαθῶν πάντων τέλη ἐστίν, ἃ αὐτὰ αὐτῶν ἐνεκά ἐστιν αἰρετά. τούτων δὲ καλὰ, ὅσα δι' αὐτὰ ὄντα πάντα ἐπαινετὰ ἐστίν. ταῦτα γὰρ ἐστὶν ἀφ' ὧν αἱ τε πράξεις εἰσὶν ἐπαινεταὶ καὶ αὐτὰ ἐπαινετά, δικαιοσύνη καὶ αὐτὴ καὶ αἱ πράξεις, καὶ οἱ σώφρονες· ἐπαινετὴ γὰρ καὶ ἡ σωφροσύνη. ἀλλ' οὐχ ὑγίεια ἐπαινετόν· οὐδὲ γὰρ τὸ ἔργον· οὐδὲ τὸ ἰσχυρῶς· οὐδὲ γὰρ ἡ ἰσχύς. ἀλλ' ἀγαθὰ μὲν, ἐπαινετὰ δ' οὐ. ὁμοίως δὲ τοῦτο δῆλον καὶ ἐπὶ τῶν ἄλλων διὰ τῆς ἐπαγωγῆς. ἀγαθὸς μὲν οὖν ἐστὶν ὃ τὰ φύσει ἀγαθὰ ἐστὶν ἀγαθὰ. τὰ γὰρ περιμάχητα καὶ μέγιστα εἶναι δοκοῦντα ἀγαθὰ, τιμὴ καὶ πλοῦτος καὶ σῶματος ἀρεταὶ καὶ εὐτυχίαι καὶ δυνάμεις, ἀγαθὰ μὲν φύσει ἐστίν, ἐνδέχεται δ' εἶναι βλαβερά τισι διὰ τὰς ἑξείς. οὔτε γὰρ ἄφρων οὗτ' ἄδικος ἢ ἀκόλαστος ὧν οὐδὲν ἂν ὀνήσειε χρώμενος αὐτοῖς, ὥσπερ οὐδ' ὁ κάμνων τῇ τοῦ ὑγιαίνοντος τροφῇ χρώμενος οὐδ' ὁ ἀσθενὴς καὶ ἀνάπηρος τοῖς τοῦ ὑγιοῦς καὶ τοῖς τοῦ ὀλοκλήρου κόσμοις. καλὸς δὲ κάγαθός τῷ τῶν ἀγαθῶν τὰ καλὰ ὑπάρχειν αὐτῷ δι' αὐτὰ καὶ τῷ πρακτικῶς εἶναι τῶν καλῶν καὶ αὐτῶν ἐνεκα. καλὰ δ' ἐστὶν αἱ τε ἀρεταὶ καὶ τὰ ἔργα τὰ ἀπὸ τῆς ἀρετῆς. - ἔστι δὲ τις ἑξίς

Ἀφροσύνης δ' ἐστὶ τὸ κρίνειν κακῶς τὰ πράγματα, τὸ βουλευσασθαι κακῶς, τὸ ὁμιλῆσαι κακῶς, τὸ χρήσασθαι κακῶς τοῖς παροῦσιν ἀγαθοῖς, τὸ ψευδῶς δοξάζειν [1251a] περὶ τῶν εἰς τὸν βίον καλῶν καὶ ἀγαθῶν. παρακολουθεῖ δὲ τῇ ἀφροσύνῃ ἀπειρία, ἀμαθία, ἀκρασία, ἐπαριστερότης, ἀμνημοσύνη. ὀργιλότητος δ' ἐστὶν εἶδη τρία, ἀκροχολία πικρία βαρυθυμία. ἔστι δὲ τοῦ ὀργίλου μὴ δύνασθαι φέρειν μῆτε τὰς μικρὰς ὀλιγορήσεις μῆτε ἐλαττώσεις, εἶναι δὲ κολαστικὸν καὶ τιμωρητικὸν καὶ εὐκίνητον πρὸς ὀργὴν καὶ ὑπὸ ἔργου καὶ ὑπὸ λόγου τοῦ τυχόντος. ἀκολουθεῖ δὲ τῇ ὀργιλότητι τὸ παροξυντικὸν τοῦ ἥθους καὶ εὐμετάβολον, καὶ ἡ πικρολογία, καὶ τὸ ἐπὶ μικροῖς λυπεῖσθαι, καὶ τὸ ταῦτα πάσχειν ταχέως καὶ παρὰ βραχὺν καιρόν. δειλίας δ' ἐστὶ τὸ ὑπὸ τῶν τυχόντων φόβων εὐκίνητον εἶναι, καὶ μάλιστα τῶν περὶ θάνατον καὶ τὰς σωματικὰς πηρώσεις, καὶ τὸ ὑπολαμβάνειν κρεῖττον εἶναι ὅπως οὖν σωθῆναι ἢ τελευτῆσαι καλῶς. ἀκολουθεῖ δὲ τῇ δειλίᾳ μαλακία, ἀνανδρία, ἀπονία, φιλοψυχία. ὕπεστι δὲ τις εὐλάβεια καὶ τὸ ἀφιλόνηκον τοῦ ἥθους. ἀκολασίας δ' ἐστὶ τὸ αἰρεῖσθαι τὰς ἀπολαύσεις τῶν ἡδονῶν τῶν βλαβερῶν καὶ

αἰσχροῶν, καὶ τὸ ὑπολαμβάνειν εὐδαιμονεῖν μάλιστα τοὺς ἐν ταῖς τοιαύταις ἡδοναῖς ὄντας, καὶ τὸ φιλογέλοιον εἶναι καὶ τὸ φιλοσκώπτην καὶ φιλευτράπελον, καὶ τὸ ραδιουργὸν εἶναι ἐν τοῖς λόγοις καὶ ἐν τοῖς ἔργοις. ἀκολουθεῖ δὲ τῇ ἀκολασίᾳ ἀταξία, ἀναίδεια, ἀκοσμία, τρυφή, ῥαθυμία, ἀμέλεια, ὀλιγωρία, ἔκλυσις. ἀκρασίας δ' ἐστὶ τὸ κωλύοντος τοῦ λογισμοῦ τὰς ἀπολαύσεις τῶν ἡδονῶν αἰρεῖσθαι, καὶ τὸ ὑπολαμβάνοντα κρεῖττον εἶναι μὴ μετασχεῖν μὲν αὐτῶν, μετέχειν δὲ μηδὲν ἦττον, καὶ τὸ οἶσθαι μὲν δεῖν πράττειν καὶ τὰ καλὰ καὶ τὰ συμφέροντα, ἀφίστασθαι δὲ αὐτῶν διὰ τὰς ἡδονάς. ἀκολουθεῖ δὲ τῇ ἀκρασίᾳ μαλακία καὶ μεταμέλεια καὶ τὰ πλεῖστα ταῦτά ᾧ καὶ τῇ ἀκολασίᾳ.

ἀδικίας δ' ἐστὶν εἶδη τρία, ἀσέβεια πλεονεξία ὕβρις. ἀσέβεια μὲν ἢ περὶ θεοὺς πλημμέλεια καὶ περὶ δαίμονας ἢ καὶ περὶ τοὺς κατοικομένους, καὶ περὶ γονεῖς καὶ περὶ πατρίδα· πλεονεξία δὲ περὶ τὰ συμβόλαια, παρὰ τὴν ἀξίαν αἰρουμένη τὸ διάφορον· ὕβρις δέ, καθ' ἣν τὰς ἡδονὰς αὐτοῖς παρασκευάζουσιν, εἰς ὄνειδος ἀγαγόντες ἑτέρους, ὅθεν Εὐήνος περὶ αὐτῆς λέγει “ἦτις κερδαίνουσ’ οὐδὲν ὅμως ἀδικεῖ.” ἔστι δὲ τῆς ἀδικίας τὸ παραβαίνειν τὰ πάτρια ἔθνη καὶ τὰ νόμιμα, καὶ τὸ ἀπειθεῖν τοῖς νόμοις καὶ τοῖς ἄρχουσι, τὸ [1251b] ψεύδεσθαι, τὸ ἐπιорκεῖν, τὸ παραβαίνειν τὰς ὁμολογίας καὶ τὰς πίστεις. ἀκολουθεῖ δὲ τῇ ἀδικίᾳ συκοφαντία, ἀλαζονεία, φιλανθρωπία προσποίητος, κακοήθεια, πανουργία. ἀνελευθερίας δ' ἐστὶν εἶδη τρία, αἰσχροκερδία φειδωλία κιμβεία. αἰσχροκερδία μὲν, καθ' ἣν κερδαίνειν ζητοῦσι πανταχόθεν, καὶ τὸ κέρδος τῆς αἰσχύνης περὶ πλείονος ποιοῦνται· φειδωλία δ' ἐστὶ καθ' ἣν ἀδάπανοι γίνονται τῶν χρημάτων εἰς τὸ δέον· κιμβεία δ' ἐστὶ καθ' ἣν δαπανῶσι μὲν, κατὰ μικρὸν δὲ καὶ κακῶς, καὶ πλέον βλάπτονται τῷ μὴ κατὰ καιρὸν ποιεῖσθαι τὸ διάφορον. ἔστι δὲ τῆς ἀνελευθερίας τὸ περὶ πλείστου ποιεῖσθαι χρήματα, καὶ τὸ μηδὲν ὄνειδος ἡγεῖσθαι τῶν ποιούντων τὸ κέρδος, βίος θητικὸς καὶ δουλοπρεπὴς καὶ ῥυπαρός, φιλοτιμίας καὶ ἐλευθερίας ἀλλότριος. ἀκολουθεῖ δὲ τῇ ἀνελευθεριότητι μικρολογία, βαρυθυμία καὶ μικροψυχία, ταπεινότης, ἀμετρία, ἀγένεις, μισανθρωπία. μικροψυχίας δ' ἐστὶ τὸ μήτε τιμὴν μήτε ἀτιμίαν μήτε εὐτυχίαν μήτε ἀτυχίαν δύνασθαι φέρειν, ἀλλὰ τιμώμενον μὲν χαυνοῦσθαι, μικρὰ δὲ εὐτυχήσαντα ὑπεξαίρεσθαι, ἀτιμίαν δὲ μηδὲ τὴν ἐλαχίστην ἐνεγκεῖν δύνασθαι, ἀπότευγμα δ' ἄτην καὶ ἀτυχίαν κρίνειν μεγάλην, ὀδύρεσθαι δ' ἐπὶ πᾶσι καὶ δυσφορεῖν. ἔτι δὲ

τοιοῦτός ἐστιν ὁ μικρόψυχος οἷος πάντα τὰ ὀλιγορήματα καλεῖν ὕβριν καὶ ἀτιμίαν, καὶ τὰ δι' ἄγνοιαν ἢ λήθην γιγνόμενα. ἀκολουθεῖ δὲ τῇ μικροψυχίᾳ μικρολογία, μεμψιμοιρία, δυσελπιστία, ταπεινότης.

[1252a] Ἐπειδὴ πᾶσαν πόλιν ὁρῶμεν κοινωνίαν τινὰ οὔσαν καὶ πᾶσαν κοινωνίαν ἀγαθοῦ τινος ἔνεκεν συνεστηκυῖαν (τοῦ γὰρ εἶναι δοκοῦντος ἀγαθοῦ χάριν πάντα πράττουσι πάντες), δηλὸν ὡς πᾶσαι μὲν ἀγαθοῦ τινος στοχάζονται, μάλιστα δὲ καὶ τοῦ κυριωτάτου πάντων ἢ πασῶν κυριωτάτη καὶ πάσας περιέχουσα τὰς ἄλλας. αὕτη δ' ἐστὶν ἢ καλουμένη πόλις καὶ ἢ κοινωνία ἢ πολιτική. ὅσοι μὲν οὖν οἴονται πολιτικὸν καὶ βασιλικὸν καὶ οἰκονομικὸν καὶ δεσποτικὸν εἶναι τὸν αὐτὸν οὐ καλῶς λέγουσιν (πλήθει γὰρ καὶ ὀλιγότητι νομίζουσι διαφέρειν ἄλλ' οὐκ εἶδει τούτων ἕκαστον, οἷον ἂν μὲν ὀλίγων, δεσπότην, ἂν δὲ πλειόνων, οἰκονόμον, ἂν δ' ἔτι πλειόνων, πολιτικὸν ἢ βασιλικόν, ὡς οὐδὲν διαφέρουσιν μεγάλην οἰκίαν ἢ μικρὰν πόλιν· καὶ πολιτικὸν δὲ καὶ βασιλικόν, ὅταν μὲν αὐτὸς ἐφεστήκη, βασιλικόν, ὅταν δὲ κατὰ τοὺς λόγους τῆς ἐπιστήμης τῆς τοιαύτης κατὰ μέρος ἄρχων καὶ ἀρχόμενος, πολιτικόν· ταῦτα δ' οὐκ ἔστιν ἀληθῆ). δηλὸν δ' ἔσται τὸ λεγόμενον ἐπισκοποῦσι κατὰ τὴν ὑφηγημένην μέθοδον. ὥσπερ γὰρ ἐν τοῖς ἄλλοις τὸ σύνθετον μέχρι τῶν ἀσυνθέτων ἀνάγκη διαιρεῖν (ταῦτα γὰρ ἐλάχιστα μόρια τοῦ παντός), οὕτω καὶ πόλιν ἐξ ὧν σύγκειται σκοποῦντες ὁψόμεθα καὶ περὶ τούτων μᾶλλον, τί τε διαφέρουσιν ἀλλήλων καὶ εἴ τι τεχνικὸν ἐνδέχεται λαβεῖν περὶ ἕκαστον τῶν ρηθέντων.

Εἰ δὴ τις ἐξ ἀρχῆς τὰ πράγματα φυόμενα βλέψειεν, ὥσπερ ἐν τοῖς ἄλλοις, καὶ ἐν τούτοις κάλλιστ' ἂν οὕτω θεωρήσειεν. ἀνάγκη δὴ πρῶτον συνδυάζεσθαι τοὺς ἄνευ ἀλλήλων μὴ δυναμένους εἶναι, οἷον θῆλυ μὲν καὶ ἄρρεν τῆς γεννήσεως ἔνεκεν (καὶ τοῦτο οὐκ ἐκ προαιρέσεως, ἀλλ' ὥσπερ καὶ ἐν τοῖς ἄλλοις ζώοις καὶ φυτοῖς φυσικὸν τὸ ἐφίεσθαι, οἷον αὐτό, τοιοῦτον καταλιπεῖν ἕτερον), ἄρχον δὲ φύσει καὶ ἀρχόμενον διὰ τὴν σωτηρίαν. τὸ μὲν γὰρ δυνάμενον τῇ διανοίᾳ προορᾶν ἄρχον φύσει καὶ δεσπόζον φύσει, τὸ δὲ δυνάμενον [ταῦτα] τῷ σώματι πονεῖν ἀρχόμενον καὶ φύσει δοῦλον· διὸ δεσπότη καὶ δούλῳ ταῦτο συμφέρει. φύσει μὲν [1252b] οὖν διώρισται τὸ θῆλυ καὶ τὸ δοῦλον (οὐθὲν γὰρ ἢ φύσις ποιεῖ τοιοῦτον οἷον οἱ χαλκοτύποι τὴν Δελφικὴν μάχαιραν, πενιχρῶς, ἀλλ' ἐν πρὸς ἑν· οὕτω γὰρ ἂν ἀποτελοῖτο κάλλιστα τῶν ὀργάνων ἕκαστον, μὴ πολλοῖς ἔργοις ἀλλ' ἐνὶ δουλεῦον). ἐν δὲ τοῖς βαρβάροις τὸ θῆλυ καὶ τὸ δοῦλον τὴν

αὐτὴν ἔχει τάξιν. αἴτιον δ' ὅτι τὸ φύσει ἄρχον οὐκ ἔχουσιν, ἀλλὰ γίνεται ἡ κοινωνία αὐτῶν δούλης καὶ δούλου. διὸ φασιν οἱ ποιηταὶ “βαρβάρων δ' Ἑλληνας ἄρχειν εἰκός”, ὡς ταὐτὸ φύσει βάρβαρον καὶ δοῦλον ὄν. ἐκ μὲν οὖν τούτων τῶν δύο κοινωνιῶν οἰκία πρώτη, καὶ ὀρθῶς Ἡσίοδος εἶπε ποιήσας “οἶκον μὲν πρώτιστα γυναῖκά τε βοῦν τ' ἄροτῆρα”· ὁ γὰρ βοῦς ἀντ' οἰκέτου τοῖς πένησιν ἐστίν. ἡ μὲν οὖν εἰς πᾶσαν ἡμέραν συνεστηκυῖα κοινωνία κατὰ φύσιν οἶκός ἐστιν, οὗς Χαρῶνδας μὲν καλεῖ ὁμοσιπύους, Ἐπιμενίδης δὲ ὁ Κρής ὁμοκάπους· ἡ δ' ἐκ πλειόνων οἰκιῶν κοινωνία πρώτη χρήσεως ἔνεκεν μὴ ἐφημέρου κώμη. μάλιστα δὲ κατὰ φύσιν ἔοικεν ἡ κώμη ἀποικία οἰκίας εἶναι, οὗς καλοῦσιν τινες ὁμογάλακτας, παῖδας τε καὶ παίδων παῖδας. διὸ καὶ τὸ πρῶτον ἐβασιλεύοντο αἱ πόλεις, καὶ νῦν ἔτι τὰ ἔθνη· ἐκ βασιλευμένων γὰρ συνήλθον· πᾶσα γὰρ οἰκία βασιλεύεται ὑπὸ τοῦ πρεσβυτάτου, ὥστε καὶ αἱ ἀποικίαι, διὰ τὴν συγγένειαν. καὶ τοῦτ' ἐστίν ὃ λέγει Ὀμηρος “θεμιστεύει δὲ ἕκαστος παίδων ἡδ' ἀλόχων”. σποράδες γάρ· καὶ οὕτω τὸ ἀρχαῖον ᾧκουν. καὶ τοὺς θεοὺς δὲ διὰ τοῦτο πάντες φασὶ βασιλεύεσθαι, ὅτι καὶ αὐτοὶ οἱ μὲν ἔτι καὶ νῦν οἱ δὲ τὸ ἀρχαῖον ἐβασιλεύοντο, ὥσπερ δὲ καὶ τὰ εἶδη ἑαυτοῖς ἀφομοιοῦσιν οἱ ἄνθρωποι, οὕτω καὶ τοὺς βίους τῶν θεῶν.

ἡ δ' ἐκ πλειόνων κομῶν κοινωνία τέλειος πόλις, ἥδη πάσης ἔχουσα πέρας τῆς αὐταρκειᾶς ὡς ἔπος εἰπεῖν, γινομένη μὲν τοῦ ζῆν ἔνεκεν, οὕσα δὲ τοῦ εὖ ζῆν. διὸ πᾶσα πόλις φύσει ἐστίν, εἴπερ καὶ αἱ πρῶται κοινωνίαι. τέλος γὰρ αὕτη ἐκείνων, ἡ δὲ φύσις τέλος ἐστίν· οἷον γὰρ ἕκαστόν ἐστι τῆς γενέσεως τελεσθείσης, ταύτην φαμέν τὴν φύσιν εἶναι ἐκάστου, ὥσπερ ἀνθρώπου ἵππου οἰκίας. ἔτι τὸ οὗ ἔνεκα καὶ τὸ τέλος βέλτιστον. [1253a] ἡ δ' αὐτάρκεια καὶ τέλος καὶ βέλτιστον. ἐκ τούτων οὖν φανερόν ὅτι τῶν φύσει ἡ πόλις ἐστί, καὶ ὅτι ὁ ἄνθρωπος φύσει πολιτικὸν ζῷον, καὶ ὁ ἄπολις διὰ φύσιν καὶ οὐ διὰ τύχην ἥτοι φαῦλός ἐστιν, ἢ κρείττων ἢ ἄνθρωπος· ὥσπερ καὶ ὁ ὑφ' Ὀμήρου λοιδορηθεὶς “ἄφρητῳ ἀθέμιστος ἀνέστιος”· ἅμα γὰρ φύσει τοιοῦτος καὶ πολέμου ἐπιθυμητής, ἅτε περ ἄζυξ ὢν ὥσπερ ἐν πεττοῖς. διότι δὲ πολιτικὸν ὁ ἄνθρωπος ζῷον πάσης μελίττης καὶ παντὸς ἀγελαίου ζώου μᾶλλον, δῆλον. οὐθὲν γάρ, ὡς φαμέν, μάτην ἡ φύσις ποιεῖ· λόγον δὲ μόνον ἄνθρωπος ἔχει τῶν ζώων· ἡ μὲν οὖν φωνὴ τοῦ λυπηροῦ καὶ ἡδέος ἐστὶ σημεῖον, διὸ καὶ τοῖς ἄλλοις ὑπάρχει ζῳοῖς (μέχρι γὰρ τούτου ἡ φύσις αὐτῶν ἐλήλυθε, τοῦ ἔχειν αἰσθησιν λυπηροῦ καὶ ἡδέος καὶ ταῦτα σημαίνειν ἀλλήλοις), ὁ δὲ

λόγος ἐπὶ τῷ δηλοῦν ἐστὶ τὸ συμφέρον καὶ τὸ βλαβερόν, ὥστε καὶ τὸ δίκαιον καὶ τὸ ἄδικον· τοῦτο γὰρ πρὸς τὰ ἄλλα ζῶα τοῖς ἀνθρώποις ἴδιον, τὸ μόνον ἀγαθοῦ καὶ κακοῦ καὶ δικαίου καὶ ἀδίκου καὶ τῶν ἄλλων αἰσθησιν ἔχειν· ἡ δὲ τούτων κοινωνία ποιεῖ οἰκίαν καὶ πόλιν. καὶ πρότερον δὲ τῇ φύσει πόλις ἢ οἰκία καὶ ἕκαστος ἡμῶν ἐστίν. τὸ γὰρ ὅλον πρότερον ἀναγκαῖον εἶναι τοῦ μέρους· ἀναιρουμένου γὰρ τοῦ ὅλου οὐκ ἔσται πούς οὐδὲ χεῖρ, εἰ μὴ ὁμωνύμως, ὥσπερ εἴ τις λέγοι τὴν λιθίνην (διαφθαρεῖσα γὰρ ἔσται τοιαύτη), πάντα δὲ τῷ ἔργῳ ὥρισται καὶ τῇ δυνάμει, ὥστε μηκέτι τοιαῦτα ὄντα οὐ λεκτέον τὰ αὐτὰ εἶναι ἀλλ' ὁμώνυμα. ὅτι μὲν οὖν ἡ πόλις καὶ φύσει καὶ πρότερον ἢ ἕκαστος, δηλον· εἰ γὰρ μὴ αὐτάρκης ἕκαστος χωρισθεὶς, ὁμοίως τοῖς ἄλλοις μέρεσιν ἔξει πρὸς τὸ ὅλον, ὁ δὲ μὴ δυνάμενος κοινωνεῖν ἢ μηδὲν δεόμενος δι' αὐτάρκειαν οὐθὲν μέρος πόλεως, ὥστε ἢ θηρίον ἢ θεός.

φύσει μὲν οὖν ἡ ὁρμὴ ἐν πᾶσιν ἐπὶ τὴν τοιαύτην κοινωνίαν· ὁ δὲ πρῶτος συστήσας μεγίστων ἀγαθῶν αἴτιος. ὥσπερ γὰρ καὶ τελεωθεὶς βέλτιστον τῶν ζώων ἄνθρωπός ἐστιν, οὕτω καὶ χωρισθεὶς νόμου καὶ δίκης χεῖριστον πάντων. χαλεπωτάτη γὰρ ἀδικία ἔχουσα ὅπλα· ὁ δὲ ἄνθρωπος ὅπλα ἔχων φύεται φρονήσει καὶ ἀρετῇ, οἷς ἐπὶ τάναντία ἔστι χρῆσθαι μάλιστα. διὸ ἀνοσιώτατον καὶ ἀγριώτατον ἄνευ ἀρετῆς, καὶ πρὸς ἀφροδίσια καὶ ἐδωδὴν χεῖριστον. ἡ δὲ δικαιοσύνη πολιτικόν· ἡ γὰρ δίκη πολιτικῆς κοινωνίας τάξις ἐστίν, ἡ δὲ δικαιοσύνη τοῦ δικαίου κρίσις.

[1253b] Ἐπεὶ δὲ φανερόν ἐξ ὧν μορίων ἡ πόλις συνέστηκεν, ἀναγκαῖον πρῶτον περὶ οἰκονομίας εἰπεῖν· πᾶσα γὰρ σύγκειται πόλις ἐξ οἰκιῶν. οἰκονομίας δὲ μέρη ἐξ ὧν πάλιν οἰκία συνέστηκεν· οἰκία δὲ τέλειος ἐκ δούλων καὶ ἐλευθέρων. ἐπεὶ δ' ἐν τοῖς ἐλαχίστοις πρῶτον ἕκαστον ζητητέον, πρῶτα δὲ καὶ ἐλάχιστα μέρη οἰκίας δεσπότης καὶ δοῦλος, καὶ πόσις καὶ ἄλοχος, καὶ πατήρ καὶ τέκνα, περὶ τριῶν ἂν τούτων σκεπτέον εἴη τί ἕκαστον καὶ ποῖον δεῖ εἶναι. ταῦτα δ' ἐστὶ δεσποτικὴ καὶ γαμικὴ (ἀνώνυμον γὰρ ἡ γυναικὸς καὶ ἀνδρὸς σύζευξις) καὶ τρίτον τεκνοποιητικὴ (καὶ γὰρ αὕτη οὐκ ὠνόμασται ἰδίῳ ὀνόματι). ἔστωσαν δὴ αὗται <αἰ> τρεῖς ἃς εἵπομεν. ἔστι δέ τι μέρος ὃ δοκεῖ τοῖς μὲν εἶναι οἰκονομία, τοῖς δὲ μεγίστον μέρος αὐτῆς· ὅπως δ' ἔχει, θεωρητέον· λέγω δὲ περὶ τῆς καλουμένης χρηματιστικῆς. πρῶτον δὲ περὶ δεσπότου καὶ δούλου εἵπωμεν, ἵνα τά τε πρὸς τὴν ἀναγκαίαν χρεῖαν ἴδωμεν, κἂν εἴ τι πρὸς τὸ εἰδέναι περὶ

αὐτῶν δυναίμεθα λαβεῖν βέλτιον τῶν νῦν ὑπολαμβανομένων. τοῖς μὲν γὰρ δοκεῖ ἐπιστήμη τέ τις εἶναι ἢ δεσποτεία, καὶ ἡ αὐτὴ οἰκονομία καὶ δεσποτεία καὶ πολιτικὴ καὶ βασιλική, καθάπερ εἶπομεν ἀρχόμενοι· τοῖς δὲ παρὰ φύσιν τὸ δεσπόζειν (νόμῳ γὰρ τὸν μὲν δοῦλον εἶναι τὸν δ' ἐλεύθερον, φύσει δ' οὐθὲν διαφέρειν)· διόπερ οὐδὲ δίκαιον· βίαιον γάρ.

Ἐπεὶ οὖν ἡ κτήσις μέρος τῆς οἰκίας ἐστὶ καὶ ἡ κτητικὴ μέρος τῆς οἰκονομίας (ἄνευ γὰρ τῶν ἀναγκαίων ἀδύνατον καὶ ζῆν καὶ εὖ ζῆν), ὥσπερ δὴ ταῖς ὠρισμέναις τέχναις ἀναγκαῖον ἂν εἴη ὑπάρχειν τὰ οἰκεῖα ὄργανα, εἰ μέλλει ἀποτελεσθῆσθαι τὸ ἔργον, οὕτω καὶ τῷ οἰκονομικῷ. τῶν δ' ὀργάνων τὰ μὲν ἄψυχα τὰ δὲ ἔμψυχα (οἷον τῷ κυβερνήτῃ ὁ μὲν οἶαξ ἄψυχον ὁ δὲ πρῳρεὺς ἔμψυχον· ὁ γὰρ ὑπηρέτης ἐν ὀργάνῳ εἶδει ταῖς τέχναις ἐστίν)· οὕτω καὶ τὸ κτῆμα ὄργανον πρὸς ζωὴν ἐστὶ, καὶ ἡ κτήσις πλῆθος ὀργάνων ἐστὶ, καὶ ὁ δοῦλος κτῆμά τι ἔμψυχον, καὶ ὥσπερ ὄργανον πρὸ ὀργάνων πᾶς ὑπηρέτης. εἰ γὰρ ἡδύνατο ἕκαστον τῶν ὀργάνων κελευσθὲν ἢ προαισθανόμενον ἀποτελεῖν τὸ αὐτοῦ ἔργον, «καὶ» ὥσπερ τὰ Δαιδάλου φασὶν ἢ τοὺς τοῦ Ἡφαίστου τρίποδας, οὓς φησὶν ὁ ποιητὴς αὐτομάτους θεῖον δύεσθαι ἀγῶνα, οὕτως αἱ κερκίδες ἐκέρκιζον αὐταὶ καὶ τὰ πληκτρα ἐκισθάριζεν, οὐδὲν ἂν ἔδει οὔτε τοῖς ἀρχιτέκτοσιν [1254a] ὑπηρετῶν οὔτε τοῖς δεσπótαις δούλων. τὰ μὲν οὖν λεγόμενα ὄργανα ποιητικὰ ὀργανά ἐστι, τὸ δὲ κτῆμα πρακτικόν· ἀπὸ μὲν γὰρ τῆς κερκίδος ἕτερόν τι γίνεται παρὰ τὴν χρῆσιν αὐτῆς, ἀπὸ δὲ τῆς ἐσθῆτος καὶ τῆς κλίνης ἢ χρῆσις μόνον. ἔτι δ' ἐπεὶ διαφέρει ἡ ποίησις εἶδει καὶ ἡ πρᾶξις, καὶ δέονται ἀμφοτέραι ὀργάνων, ἀνάγκη καὶ ταῦτα τὴν αὐτὴν ἔχειν διαφοράν. ὁ δὲ βίος πρᾶξις, οὐ ποίησις, ἐστίν· διὸ καὶ ὁ δοῦλος ὑπηρέτης τῶν πρὸς τὴν πρᾶξιν. τὸ δὲ κτῆμα λέγεται ὥσπερ καὶ τὸ μόριον. τό τε γὰρ μόριον οὐ μόνον ἄλλου ἐστὶ μόριον, ἀλλὰ καὶ ὅλως ἄλλου· ὁμοίως δὲ καὶ τὸ κτῆμα. διὸ ὁ μὲν δεσπότης τοῦ δούλου δεσπότης μόνον, ἐκείνου δ' οὐκ ἔστιν· ὁ δὲ δοῦλος οὐ μόνον δεσπότητος δοῦλός ἐστιν, ἀλλὰ καὶ ὅλως ἐκείνου.

τίς μὲν οὖν ἡ φύσις τοῦ δούλου καὶ τίς ἡ δύναμις, ἐκ τούτων δῆλον· ὁ γὰρ μὴ αὐτοῦ φύσει ἀλλ' ἄλλου ἄνθρωπος ὢν, οὗτος φύσει δοῦλός ἐστιν, ἄλλου δ' ἐστὶν ἄνθρωπος ὃς ἂν κτῆμα ἢ ἄνθρωπος ὢν, κτῆμα δὲ ὄργανον πρακτικόν καὶ χωριστόν.

Πότερον δ' ἔστι τις φύσει τοιοῦτος ἢ οὐ, καὶ πότερον βέλτιον καὶ δίκαιόν τινι δουλεύειν ἢ οὐ, ἀλλὰ πᾶσα δουλεία παρὰ φύσιν ἐστὶ,

μετὰ ταῦτα σκεπτέον. οὐ χαλεπὸν δὲ καὶ τῷ λόγῳ θεωρῆσαι καὶ ἐκ τῶν γινομένων καταμαθεῖν. τὸ γὰρ ἄρχειν καὶ ἄρχεσθαι οὐ μόνον τῶν ἀναγκαίων ἀλλὰ καὶ τῶν συμφερόντων ἐστί, καὶ εὐθὺς ἐκ γενετῆς ἓνια διέστηκε τὰ μὲν ἐπὶ τὸ ἄρχεσθαι τὰ δ' ἐπὶ τὸ ἄρχειν. καὶ εἶδη πολλὰ καὶ ἀρχόντων καὶ ἀρχομένων ἔστιν (καὶ αἰεὶ βελτίων ἢ ἀρχῇ ἢ τῶν βελτιόνων ἀρχομένων, οἷον ἀνθρώπου ἢ θηρίου· τὸ γὰρ ἀποτελούμενον ὑπὸ τῶν βελτιόνων βέλτιον ἔργον· ὅπου δὲ τὸ μὲν ἄρχει τὸ δ' ἄρχεται, ἔστι τι τούτων ἔργον). ὅσα γὰρ ἐκ πλειόνων συνέστηκε καὶ γίνεται ἓν τι κοινόν, εἴτε ἐκ συνεχῶν εἴτε ἐκ διηρημένων, ἐν ἅπασιν ἐμφαίνεται τὸ ἄρχον καὶ τὸ ἀρχόμενον, καὶ τοῦτο ἐκ τῆς ἀπάσης φύσεως ἐνυπάρχει τοῖς ἐμψύχοις· καὶ γὰρ ἐν τοῖς μὴ μετέχουσι ζωῆς ἔστι τις ἀρχῇ, οἷον ἀρμονίας. ἀλλὰ ταῦτα μὲν ἴσως ἐξωτερικωτέρας ἐστί σκέψεως· τὸ δὲ ζῶον πρῶτον συνέστηκεν ἐκ ψυχῆς καὶ σώματος, ὧν τὸ μὲν ἄρχον ἐστὶ φύσει τὸ δ' ἀρχόμενον. δεῖ δὲ σκοπεῖν ἐν τοῖς κατὰ φύσιν ἔχουσι μᾶλλον τὸ φύσει, καὶ μὴ ἐν τοῖς διεφθαρμένοις· διὸ καὶ τὸν βέλτιστα διακείμενον καὶ κατὰ σῶμα καὶ κατὰ ψυχὴν ἄνθρωπον θεωρητέον, ἐν ᾧ τοῦτο δῆλον· τῶν γὰρ μοχθηρῶν ἢ [1254b] μοχθηρῶς ἐχόντων δόξειεν ἂν ἄρχειν πολλάκις τὸ σῶμα τῆς ψυχῆς διὰ τὸ φαύλως καὶ παρὰ φύσιν ἔχειν.

ἔστι δ' οὖν, ὥσπερ λέγομεν, πρῶτον ἐν ζῳῳ θεωρῆσαι καὶ δεσποτικὴν ἀρχὴν καὶ πολιτικὴν· ἡ μὲν γὰρ ψυχὴ τοῦ σώματος ἄρχει δεσποτικὴν ἀρχὴν, ὁ δὲ νοῦς τῆς ὀρέξεως πολιτικὴν ἢ βασιλικὴν· ἐν οἷς φανερόν ἐστιν ὅτι κατὰ φύσιν καὶ συμφέρον τὸ ἄρχεσθαι τῷ σώματι ὑπὸ τῆς ψυχῆς, καὶ τῷ παθητικῷ μορίῳ ὑπὸ τοῦ νοῦ καὶ τοῦ μορίου τοῦ λόγον ἔχοντος, τὸ δ' ἐξ ἴσου ἢ ἀνάπαλιν βλαβερὸν πᾶσιν. πάλιν ἐν ἀνθρώπῳ καὶ τοῖς ἄλλοις ζώοις ὡσαύτως· τὰ μὲν γὰρ ἡμερὰ τῶν ἀγρίων βελτίῳ τὴν φύσιν, τούτοις δὲ πᾶσι βέλτιον ἄρχεσθαι ὑπ' ἀνθρώπου· τυγχάνει γὰρ σωτηρίας οὕτως. ἔτι δὲ τὸ ἄρρεν πρὸς τὸ θῆλυ φύσει τὸ μὲν κρεῖττον τὸ δὲ χεῖρον, καὶ τὸ μὲν ἄρχον τὸ δ' ἀρχόμενον. τὸν αὐτὸν δὲ τρόπον ἀναγκαῖον εἶναι καὶ ἐπὶ πάντων ἀνθρώπων. ὅσοι μὲν οὖν τοσοῦτον διεστᾷσιν ὅσον ψυχὴ σώματος καὶ ἄνθρωπος θηρίου (διάκεινται δὲ τοῦτον τὸν τρόπον ὅσων ἐστὶν ἔργον ἢ τοῦ σώματος χρῆσις, καὶ τοῦτ' ἐστ' ἀπ' αὐτῶν βέλτιστον), οὗτοι μὲν εἰσι φύσει δοῦλοι, οἷς βελτιόν ἐστιν ἄρχεσθαι ταύτην τὴν ἀρχὴν, εἴπερ καὶ τοῖς εἰρημένοις. ἔστι γὰρ φύσει δοῦλος ὁ δυνάμενος ἄλλου εἶναι (διὸ καὶ ἄλλου ἐστίν), καὶ ὁ κοινωνῶν λόγου τοσοῦτον ὅσον αἰσθάνεσθαι ἀλλὰ μὴ ἔχειν. τὰ γὰρ ἄλλα ζῷα οὐ λόγῳ

[αἰσθανόμενα] ἀλλὰ παθήμασιν ὑπηρετεῖ. καὶ ἡ χρεῖα δὲ παραλλάττει μικρόν· ἡ γὰρ πρὸς τὰναγκαῖα τῷ σώματι βοήθεια γίνεται παρ' ἁμφοῖν, παρὰ τε τῶν δούλων καὶ παρὰ τῶν ἡμέρων ζώων. βούλεται μὲν οὖν ἡ φύσις καὶ τὰ σώματα διαφέροντα ποιεῖν τὰ τῶν ἐλευθέρων καὶ τῶν δούλων, τὰ μὲν ἰσχυρὰ πρὸς τὴν ἀναγκαίαν χρῆσιν, τὰ δ' ὀρθὰ καὶ ἄχρηστα πρὸς τὰς τοιαύτας ἐργασίας, ἀλλὰ χρήσιμα πρὸς πολιτικὸν βίον (οὗτος δὲ καὶ γίνεται διηρημένος εἰς τε τὴν πολεμικὴν χρεῖαν καὶ τὴν εἰρηνικὴν), συμβαίνει δὲ πολλάκις καὶ τούναντίον, τοὺς μὲν τὰ σώματα ἔχειν ἐλευθέρων τοὺς δὲ τὰς ψυχάς· ἐπεὶ τοῦτό γε φανερόν, ὥς εἰ τοσοῦτον γένοιτο διάφοροι τὸ σῶμα μόνον ὅσον αἱ τῶν θεῶν εἰκόνες, τοὺς ὑπολειπομένους πάντες φαῖεν ἂν ἀξίους εἶναι τούτοις δουλεύειν. εἰ δ' ἐπὶ τοῦ σώματος τοῦτ' ἀληθές, πολὺ δικαιότερον ἐπὶ τῆς ψυχῆς τοῦτο διωρίσθαι· ἀλλ' οὐχ ὁμοίως ῥάδιον ἰδεῖν τό τε τῆς ψυχῆς κάλλος καὶ τὸ τοῦ σώματος. ὅτι μὲν [1255a] τοῖνυν εἰσὶ φύσει τινὲς οἱ μὲν ἐλεύθεροι οἱ δὲ δοῦλοι, φανερόν, οἷς καὶ συμφέρει τὸ δουλεύειν καὶ δίκαιόν ἐστιν.

Ὅτι δὲ καὶ οἱ τάναντία φάσκοντες τρόπον τινὰ λέγουσιν ὀρθῶς, οὐ χαλεπὸν ἰδεῖν. διχῶς γὰρ λέγεται τὸ δουλεύειν καὶ ὁ δοῦλος. ἔστι γάρ τις καὶ κατὰ νόμον δοῦλος καὶ δουλεύων· ὁ γὰρ νόμος ὁμολογία τίς ἐστιν ἐν ἣ τὰ κατὰ πόλεμον κρατούμενα τῶν κρατούντων εἶναί φασιν. τοῦτο δὴ τὸ δίκαιον πολλοὶ τῶν ἐν τοῖς νόμοις ὥσπερ ῥήτορα γράφονται παρανόμων, ὥς δεινὸν <ὄν> εἰ τοῦ βιάσασθαι δυναμένου καὶ κατὰ δύναμιν κρείττονος ἔσται δοῦλον καὶ ἀρχόμενον τὸ βιασθέν. καὶ τοῖς μὲν οὕτως δοκεῖ τοῖς δ' ἐκείνως, καὶ τῶν σοφῶν. αἴτιον δὲ ταύτης τῆς ἀμφισβητήσεως, καὶ ὁ ποιεῖ τοὺς λόγους ἐπαλλάττειν, ὅτι τρόπον τινὰ ἀρετὴ τυγχάνουσα χορηγίας καὶ βιάζεσθαι δύναται μάλιστα, καὶ ἔστιν αἰεὶ τὸ κρατοῦν ἐν ὑπεροχῇ ἀγαθοῦ τινος, ὥστε δοκεῖν μὴ ἄνευ ἀρετῆς εἶναι τὴν βίαν, ἀλλὰ περὶ τοῦ δικαίου μόνον εἶναι τὴν ἀμφισβήτησιν (διὰ γὰρ τοῦτο τοῖς μὲν ἄνοια δοκεῖ τὸ δίκαιον εἶναι, τοῖς δ' αὐτὸ τοῦτο δίκαιον, τὸ τὸν κρείττονα ἄρχειν)· ἐπεὶ διαστάντων γε χωρὶς τούτων τῶν λόγων οὔτε ἰσχυρὸν οὐθὲν ἔχουσιν οὔτε πιθανὸν ἄτεροι λόγοι, ὥς οὐ δεῖ τὸ βέλτιον κατ' ἀρετὴν ἄρχειν καὶ δεσπόζειν. ὅλως δ' ἀντεχόμενοί τινες, ὥς οἴονται, δικαίου τινός (ὁ γὰρ νόμος δίκαιόν τι) τὴν κατὰ πόλεμον δουλείαν τιθέασι δικαίαν, ἅμα δ' οὐ φασιν· τὴν τε γὰρ ἀρχὴν ἐνδέχεται μὴ δικαίαν εἶναι τῶν πολέμων, καὶ τὸν ἀνάξιον δουλεύειν οὐδαμῶς ἂν φαίη τις δοῦλον εἶναι· εἰ δὲ μή, συμβήσεται

τοὺς εὐγενεστάτους εἶναι δοκοῦντας δούλους εἶναι καὶ ἐκ δούλων, εἰάν συμβῇπραθῆναι ληφθέντας. διόπερ αὐτοὺς οὐ βούλονται λέγειν δούλους, ἀλλὰ τοὺς βαρβάρους. καίτοι ὅταν τοῦτο λέγωσιν, οὐθὲν ἄλλο ζητοῦσιν ἢ τὸ φύσει δοῦλον ὅπερ ἐξ ἀρχῆς εἶπομεν· ἀνάγκη γὰρ εἶναί τινας φάναι τοὺς μὲν πανταχοῦ δούλους τοὺς δ' οὐδαμοῦ. τὸν αὐτὸν δὲ τρόπον καὶ περὶ εὐγενείας· αὐτοὺς μὲν γὰρ οὐ μόνον παρ' αὐτοῖς εὐγενεῖς ἀλλὰ πανταχοῦ νομίζουσιν, τοὺς δὲ βαρβάρους οἴκοι μόνον, ὡς ὃν τι τὸ μὲν ἀπλῶς εὐγενὲς καὶ ἐλεύθερον τὸ δ' οὐχ ἀπλῶς, ὥσπερ καὶ ἡ Θεοδέκτου Ἑλένη φησὶ

“θεῖων δ' ἀπ' ἀμφοῖν ἔκγονον ρίζωμάτων

τίς ἂν προσειπεῖν ἀξιώσειεν λάτριν;”

ὅταν δὲ τοῦτο λέγωσιν, οὐθενὶ ἀλλ' ἡ ἀρετῇ καὶ κακίᾳ διορίζουσι τὸ δοῦλον καὶ ἐλεύθερον, καὶ τοὺς εὐγενεῖς καὶ τοὺς [1255b] δυσγενεῖς. ἀξιοῦσι γάρ, ὥσπερ ἐξ ἀνθρώπου ἄνθρωπον καὶ ἐκ θηρίων γίνεσθαι θηρίον, οὕτω καὶ ἐξ ἀγαθῶν ἀγαθόν. ἡ δὲ φύσις βούλεται μὲν τοῦτο ποιεῖν πολλάκις, οὐ μέντοι δύναται.

ὅτι μὲν οὖν ἔχει τινὰ λόγον ἡ ἀμφισβήτησις, καὶ οὐκ ἀεὶ εἰσιν οἱ μὲν φύσει δοῦλοι οἱ δ' ἐλεύθεροι, δῆλον, καὶ ὅτι ἔν τισι διώρισται τὸ τοιοῦτον, ὧν συμφέρει τῷ μὲν τὸ δουλεύειν τῷ δὲ τὸ δεσπόζειν [καὶ δίκαιον], καὶ δεῖ τὸ μὲν ἄρχεσθαι τὸ δ' ἄρχειν ἣν πεφύκασιν ἀρχὴν ἄρχειν, ὥστε καὶ δεσπόζειν, τὸ δὲ κακῶς ἀσυμφόρως ἐστὶν ἀμφοῖν (τὸ γὰρ αὐτὸ συμφέρει τῷ μέρει καὶ τῷ ὅλῳ, καὶ σώματι καὶ ψυχῇ, ὁ δὲ δοῦλος μέρος τι τοῦ δεσπότου, οἷον ἔμψυχόν τι τοῦ σώματος κεχωρισμένον δὲ μέρος· διὸ καὶ συμφέρον ἐστὶ τι καὶ φιλία δούλῳ καὶ δεσπότῃ πρὸς ἀλλήλους τοῖς φύσει τούτων ἡξιωμένοις, τοῖς δὲ μὴ τοῦτον τὸν τρόπον, ἀλλὰ κατὰ νόμον καὶ βιασθεῖσι, τούναντίον).

Φανερόν δὲ καὶ ἐκ τούτων ὅτι οὐ ταυτόν ἐστι δεσποτεία καὶ πολιτική, οὐδὲ πᾶσαι ἀλλήλαις αἱ ἀρχαί, ὥσπερ τινὲς φασιν. ἡ μὲν γὰρ ἐλευθέρων φύσει ἡ δὲ δούλων ἐστίν, καὶ ἡ μὲν οἰκονομικὴ μοναρχία (μοναρχεῖται γὰρ πᾶς οἶκος), ἡ δὲ πολιτικὴ ἐλευθέρων καὶ ἴσων ἀρχή. ὁ μὲν οὖν δεσπότης οὐ λέγεται κατ' ἐπιστήμην, ἀλλὰ τῷ τοιόσδ' εἶναι, ὁμοίως δὲ καὶ ὁ δοῦλος καὶ ὁ ἐλεύθερος. ἐπιστήμη δ' ἂν εἴη καὶ δεσποτικὴ καὶ δουλική, δουλικὴ μὲν οἷαν περ ὁ ἐν Συρακούσαις ἐπαίδευεν· ἐκεῖ γὰρ λαμβάνων τις μισθὸν ἐδίδασκε τὰ ἐγκύκλια διακονήματα τοὺς παῖδας· εἴη δ' ἂν καὶ ἐπὶ πλεῖον τῶν τοιούτων μάθησις, οἷον ὀψοποικὴ καὶ τᾶλλα τὰ τοιαῦτα γένη τῆς

διακονίας. ἔστι γὰρ ἕτερα ἐτέρων τὰ μὲν ἐντιμότερα ἔργα τὰ δ' ἀναγκαιότερα, καὶ κατὰ τὴν παροιμίαν “δοῦλος πρὸ δούλου, δεσπότης πρὸ δεσπότου”. αἱ μὲν οὖν τοιαῦται πᾶσαι δουλικαὶ ἐπιστήμαί εἰσι· δεσποτικὴ δ' ἐπιστήμη ἐστὶν ἡ χρηστικὴ δούλων. ὁ γὰρ δεσπότης οὐκ ἐν τῷ κτᾶσθαι τοὺς δούλους, ἀλλ' ἐν τῷ χρῆσθαι δούλοις. ἔστι δ' αὕτη ἡ ἐπιστήμη οὐδὲν μέγα ἔχουσα οὐδὲ σεμνόν· ἃ γὰρ τὸν δοῦλον ἐπίστασθαι δεῖ ποιεῖν, ἐκείνον δεῖ ταῦτα ἐπίστασθαι ἐπιτάττειν. διὸ ὅσοις ἐξουσία μὴ αὐτοὺς κακοπαθεῖν, ἐπίτροπός <τις> λαμβάνει ταύτην τὴν τιμὴν, αὐτοὶ δὲ πολιτεύονται ἢ φιλοσοφοῦσιν. ἡ δὲ κτητικὴ ἕτερα ἀμφοτέρων τούτων, οἷον ἡ δικαία, πολεμικὴ τις οὖσα ἢ θηρευτικὴ. περὶ μὲν οὖν δούλου καὶ δεσπότου τοῦτον διωρίσθω τὸν τρόπον.

[1256a] Ὅλως δὲ περὶ πάσης κτήσεως καὶ χρηματιστικῆς θεωρήσωμεν κατὰ τὸν ὑφηγημένον τρόπον, ἐπεὶ καὶ ὁ δοῦλος τῆς κτήσεως μέρος τι ἦν. πρῶτον μὲν οὖν ἀπορήσειεν ἂν τις πότερον ἡ χρηματιστικὴ ἢ αὕτη τῇ οἰκονομικῇ ἐστὶν ἢ μέρος τι, ἢ ὑπηρετικὴ, καὶ εἰ ὑπηρετικὴ, πότερον ὥς ἡ κερκιδοποιικὴ τῇ ὑφαντικῇ ἢ ὥς ἡ χαλκουργικὴ τῇ ἀνδριαντοποιίᾳ (οὐ γὰρ ὡσαύτως ὑπηρετοῦσιν, ἀλλ' ἡ μὲν ὄργανα παρέχει, ἡ δὲ τὴν ὕλην· λέγω δὲ ὕλην τὸ ὑποκείμενον ἐξ οὗ τι ἀποτελεῖται ἔργον, οἷον ὑφάντη μὲν ἔρια ἀνδριαντοποιῶ δὲ χαλκόν). ὅτι μὲν οὖν οὐχ ἡ αὕτη ἡ οἰκονομικὴ τῇ χρηματιστικῇ, δῆλον (τῆς μὲν γὰρ τὸ πορίσασθαι, τῆς δὲ τὸ χρήσασθαι· τίς γὰρ ἔσται ἡ χρησομένη τοῖς κατὰ τὴν οἰκίαν παρὰ τὴν οἰκονομικήν;)· πότερον δὲ μέρος αὐτῆς ἐστὶ τι ἢ ἕτερον εἶδος, ἔχει διαμφισβήτησιν· εἰ γὰρ ἐστὶ τοῦ χρηματιστικοῦ θεωρῆσαι πόθεν χρήματα καὶ κτήσις ἔσται, ἢ γε κτήσις πολλὰ περιεῖληφε μέρη καὶ ὁ πλοῦτος, ὥστε πρῶτον ἡ γεωργικὴ πότερον μέρος τι τῆς χρηματιστικῆς ἢ ἕτερόν τι γένος, καὶ καθόλου ἡ περὶ τὴν τροφήν ἐπιμέλεια καὶ κτήσις; ἀλλὰ μὴν εἶδη γε πολλὰ τροφῆς, διὸ καὶ βίοι πολλοὶ καὶ τῶν ζώων καὶ τῶν ἀνθρώπων εἰσίν· οὐ γὰρ οἷόν τε ζῆν ἄνευ τροφῆς, ὥστε αἱ διαφοραὶ τῆς τροφῆς τοὺς βίους πεποιήκασι διαφέροντας τῶν ζώων. τῶν τε γὰρ θηρίων τὰ μὲν ἀγελαῖα τὰ δὲ σποραδικὰ ἐστίν, ὁποτέρως συμφέρει πρὸς τὴν τροφήν αὐτοῖς διὰ τὸ τὰ μὲν ζωοφάγα τὰ δὲ καρποφάγα τὰ δὲ παμφάγα αὐτῶν εἶναι, ὥστε πρὸς τὰς ῥαστώνας καὶ τὴν αἵρεσιν τὴν τούτων ἢ φύσις τοὺς βίους αὐτῶν διώρισεν, ἐπεὶ δ' οὐ ταῦτ' ἐκάστω ἡδὺ κατὰ φύσιν ἀλλὰ ἕτερα ἐτέροις, καὶ αὐτῶν τῶν ζωοφάγων καὶ τῶν καρποφάγων οἱ βίοι πρὸς ἄλληλα διεστᾶσιν·

ὁμοίως δὲ καὶ τῶν ἀνθρώπων. πολὺ γὰρ διαφέρουσιν οἱ τούτων βίοι. οἱ μὲν οὖν ἀργότατοι νομάδες εἰσὶν (ἢ γὰρ ἀπὸ τῶν ἡμέρων τροφὴ ζῶων ἄνευ πόνου γίνεται σχολάζουσιν· ἀναγκαίου δ' ὄντος μεταβάλλειν τοῖς κτήνεσι διὰ τὰς νομάς καὶ αὐτοὶ ἀναγκάζονται συνακολουθεῖν, ὥσπερ γεωργίαν ζῶσαν γεωργοῦντες)· οἱ δ' ἀπὸ θήρας ζῶσι, καὶ θήρας ἕτεροι ἐτέρας, οἷον οἱ μὲν ἀπὸ ληστείας, οἱ δ' ἀφ' ἀλιείας, ὅσοι λίμνας καὶ ἔλη καὶ ποταμοὺς ἢ θάλατταν τοιαύτην προσοικοῦσιν, οἱ δ' ἀπ' ὀρνίθων ἢ θηρίων ἀγρίων· τὸ δὲ πλεῖστον γένος τῶν ἀνθρώπων ἀπὸ τῆς γῆς ζῇ καὶ τῶν ἡμέρων καρπῶν.

οἱ μὲν οὖν βίοι τοσοῦτοι σχεδὸν εἰσιν, ὅσοι γε αὐτόφυτον ἔχουσι τὴν ἐργασίαν καὶ μὴ δι' ἀλλαγῆς καὶ καπηλείας [1256b] πορίζονται τὴν τροφήν, νομαδικὸς ληστρικὸς ἀλιευτικὸς θηρευτικὸς γεωργικὸς. οἱ δὲ καὶ μὴ γινύντες ἐκ τούτων ἡδέως ζῶσι, προσαναπληροῦντες τὸν ἐνδεέστερον βίον, ἢ τυγχάνει ἐλλείπων πρὸς τὸ αὐτάρκης εἶναι, οἷον οἱ μὲν νομαδικὸν ἅμα καὶ ληστρικόν, οἱ δὲ γεωργικὸν καὶ θηρευτικόν· ὁμοίως δὲ καὶ περὶ τοὺς ἄλλους· ὥς ἂν ἡ χρεια συναναγκάζῃ, τοῦτον τὸν τρόπον διάγουσιν. ἡ μὲν οὖν τοιαύτη κτήσις ὑπ' αὐτῆς φαίνεται τῆς φύσεως διδομένη πᾶσιν, ὥσπερ κατὰ τὴν πρώτην γένεσιν εὐθύς, οὕτω καὶ τελειωθείσιν. καὶ γὰρ κατὰ τὴν ἐξ ἀρχῆς γένεσιν τὰ μὲν συνεκτίκτει τῶν ζῶων τοσαύτην τροφήν ὥσθ' ἱκανὴν εἶναι μέχρις οὗ ἂν δύνηται αὐτὸ αὐτῷ πορίζειν τὸ γεννηθέν, οἷον ὅσα σκωληκοτοκεῖ ἢ ψοτοκεῖ· ὅσα δὲ ζωοτοκεῖ, τοῖς γεννωμένοις ἔχει τροφήν ἐν αὐτοῖς μέχρι τινός, τὴν τοῦ καλουμένου γάλακτος φύσιν. ὥστε ὁμοίως δῆλον ὅτι καὶ γενομένοις οἰητέον τὰ τε φυτὰ τῶν ζῶων ἕνεκεν εἶναι καὶ τὰ ἄλλα ζῶα τῶν ἀνθρώπων χάριν, τὰ μὲν ἡμερα καὶ διὰ τὴν χρῆσιν καὶ διὰ τὴν τροφήν, τῶν δ' ἀγρίων, εἰ μὴ πάντα, ἀλλὰ τὰ γε πλεῖστα τῆς τροφῆς καὶ ἄλλης βοηθείας ἕνεκεν, ἵνα καὶ ἐσθῆς καὶ ἄλλα ὄργανα γίνηται ἐξ αὐτῶν. εἰ οὖν ἡ φύσις μὴθὲν μήτε ἀτελὲς ποιεῖ μήτε μάτην, ἀναγκαῖον τῶν ἀνθρώπων ἕνεκεν αὐτὰ πάντα πεποιηκέναι τὴν φύσιν. διὸ καὶ ἡ πολεμικὴ φύσει κτητικὴ πως ἔσται (ἢ γὰρ θηρευτικὴ μέρος αὐτῆς), ἢ δεῖ χρῆσθαι πρὸς τε τὰ θηρία καὶ τῶν ἀνθρώπων ὅσοι πεφυκότες ἄρχεσθαι μὴ θέλουσιν, ὥς φύσει δίκαιον τοῦτον ὄντα τὸν πόλεμον.

ἐν μὲν οὖν εἶδος κτητικῆς κατὰ φύσιν τῆς οἰκονομικῆς μέρος ἐστίν, ὅτι δεῖ ἥτοι ὑπάρχειν ἢ πορίζειν αὐτὴν ὅπως ὑπάρχῃ ὧν ἔστι θησαυρισμὸς χρημάτων πρὸς ζωὴν ἀναγκαίων, καὶ χρησίμων εἰς κοινωνίαν πόλεως ἢ οἰκίας. καὶ ἔοικεν ὁ γ' ἀληθινὸς πλοῦτος ἐκ

τούτων εἶναι. ἡ γὰρ τῆς τοιαύτης κτήσεως αὐτάρκεια πρὸς ἀγαθὴν ζωὴν οὐκ ἄπειρός ἐστιν, ὥσπερ Σόλων φησὶ ποιήσας “πλούτου δ’ οὐθὲν τέρμα πεφασμένον ἀνδράσι κεῖται”. κεῖται γὰρ ὥσπερ καὶ ταῖς ἄλλαις τέχναις· οὐδὲν γὰρ ὄργανον ἄπειρον οὐδεμιᾶς ἐστὶ τέχνης οὔτε πλήθει οὔτε μεγέθει, ὁ δὲ πλοῦτος ὀργάνων πλήθός ἐστι οἰκονομικῶν καὶ πολιτικῶν. ὅτι μὲν τοίνυν ἐστὶ τις κτητικὴ κατὰ φύσιν τοῖς οἰκονόμοις καὶ τοῖς πολιτικοῖς, καὶ δι’ ἣν αἰτίαν, δηλον.

Ἔστι δὲ γένος ἄλλο κτητικῆς, ἣν μάλιστα καλοῦσι, καὶ δίκαιον αὐτὸ καλεῖν, χρηματιστικὴν, δι’ ἣν οὐδὲν δοκεῖ [1257a] πέρας εἶναι πλούτου καὶ κτήσεως· ἦν ὡς μίαν καὶ τὴν αὐτὴν τῇ λεχθείσῃ πολλοὶ νομίζουσι διὰ τὴν γειννᾶσιν· ἐστὶ δ’ οὔτε ἡ αὐτὴ τῇ εἰρημένῃ οὔτε πόρρῳ ἐκείνης. ἐστὶ δ’ ἡ μὲν φύσει ἡ δ’ οὐ φύσει αὐτῶν, ἀλλὰ δι’ ἐμπειρίας τινὸς καὶ τέχνης γίνεται μᾶλλον. λάβωμεν δὲ περὶ αὐτῆς τὴν ἀρχὴν ἐντεῦθεν. ἐκάστου γὰρ κτήματος διττὴ ἡ χρῆσις ἐστίν, ἀμφοτέραι δὲ καθ’ αὐτὸ μὲν ἄλλ’ οὐχ ὁμοίως καθ’ αὐτό, ἀλλ’ ἡ μὲν οἰκεῖα ἡ δ’ οὐκ οἰκεῖα τοῦ πράγματος, οἷον ὑποδήματος ἢ τε ὑπόδεσις καὶ ἡ μεταβλητικὴ. ἀμφοτέραι γὰρ ὑποδήματος χρήσεις· καὶ γὰρ ὁ ἀλλαττόμενος τῷ δεομένῳ ὑποδήματος ἀντὶ νομίσματος ἢ τροφῆς χρῆται τῷ ὑποδήματι ἢ ὑπόδημα, ἀλλ’ οὐ τὴν οἰκεῖαν χρῆσιν· οὐ γὰρ ἀλλαγῆς ἔνεκεν γέγονε. τὸν αὐτὸν δὲ τρόπον ἔχει καὶ περὶ τῶν ἄλλων κτημάτων. ἐστὶ γὰρ ἡ μεταβλητικὴ πάντων, ἀρξαμένη τὸ μὲν πρῶτον ἐκ τοῦ κατὰ φύσιν, τῷ τὰ μὲν πλείω τὰ δὲ ἐλάττω τῶν ἱκανῶν ἔχειν τοὺς ἀνθρώπους (ἢ καὶ δηλον ὅτι οὐκ ἐστὶ φύσει τῆς χρηματιστικῆς ἡ καπηλική· ὅσον γὰρ ἱκανὸν αὐτοῖς, ἀναγκαῖον ἦν ποιεῖσθαι τὴν ἀλλαγὴν). ἐν μὲν οὖν τῇ πρώτῃ κοινωνίᾳ (τοῦτο δ’ ἐστὶν οἰκία) φανερόν ὅτι οὐδὲν ἔστιν ἔργον αὐτῆς, ἀλλ’ ἤδη πλειόνων τῆς κοινωνίας οὔσης. οἱ μὲν γὰρ τῶν αὐτῶν ἐκοινωνοῦν πάντων, οἱ δὲ κεχωρισμένοι πολλῶν πάλιν καὶ ἐτέρων· ὧν κατὰ τὰς δεήσεις ἀναγκαῖον ποιεῖσθαι τὰς μεταδόσεις, καθάπερ ἔτι πολλὰ ποιεῖ καὶ τῶν βαρβαρικῶν ἐθνῶν, κατὰ τὴν ἀλλαγὴν. αὐτὰ γὰρ τὰ χρήσιμα πρὸς αὐτὰ καταλλάττονται, ἐπὶ πλέον δ’ οὐθέν, οἷον οἶνον πρὸς σῖτον διδόντες καὶ λαμβάνοντες, καὶ τῶν ἄλλων τῶν τοιούτων ἕκαστον. ἡ μὲν οὖν τοιαύτη μεταβλητικὴ οὔτε παρὰ φύσιν οὔτε χρηματιστικῆς ἐστὶν εἶδος οὐδὲν (εἰς ἀναπλήρωσιν γὰρ τῆς κατὰ φύσιν αὐταρκειᾶς ἦν)· ἐκ μέντοι ταύτης ἐγένετ’ ἐκείνη κατὰ λόγον. ξενικωτέρας γὰρ γενομένης τῆς βοηθείας τῷ εἰσάγεσθαι ὧν ἐνδεεῖς «ἦσαν» καὶ ἐκπέμπειν ὧν ἐπλεόναζον, ἐξ ἀνάγκης ἡ τοῦ

νομίσματος ἐπορίσθη χρήσις. οὐ γὰρ εὐβάστακτον ἕκαστον τῶν κατὰ φύσιν ἀναγκαίων· διὸ πρὸς τὰς ἀλλαγὰς τοιοῦτόν τι συνέθεντο πρὸς σφᾶς αὐτοὺς δίδοναι καὶ λαμβάνειν, ὃ τῶν χρησίμων αὐτὸ ὃν εἶχε τὴν χρεῖαν εὐμεταχείριστον πρὸς τὸ ζῆν, οἷον σίδηρος καὶ ἄργυρος κἂν εἴ τι τοιοῦτον ἕτερον, τὸ μὲν πρῶτον ἀπλῶς ὀρισθὲν μεγέθει καὶ σταθμῷ, τὸ δὲ τελευταῖον καὶ χαρακτηῖρα ἐπιβαλλόντων, ἵνα ἀπολύσῃ τῆς μετρήσεως αὐτούς· ὁ γὰρ χαρακτηρ ἐτέθη τοῦ ποσοῦ σημεῖον.

πορισθέντος [1257b] οὖν ἤδη νομίσματος ἐκ τῆς ἀναγκαίας ἀλλαγῆς θάτερον εἶδος τῆς χρηματιστικῆς ἐγένετο, τὸ καπηλικόν, τὸ μὲν πρῶτον ἀπλῶς ἴσως γινόμενον, εἴτα δι' ἐμπειρίας ἤδη τεχνικώτερον, πόθεν καὶ πῶς μεταβαλλόμενον πλεῖστον ποιήσει κέρδος. διὸ δοκεῖ ἡ χρηματιστικὴ μάλιστα περὶ τὸ νόμισμα εἶναι, καὶ ἔργον αὐτῆς τὸ δύνασθαι θεωρῆσαι πόθεν ἔσται πλῆθος χρημάτων· ποιητικὴ γὰρ ἐστὶ πλούτου καὶ χρημάτων. καὶ γὰρ τὸν πλοῦτον πολλάκις τιθέασιν νομίσματος πλῆθος, διὰ τὸ περὶ τοῦτ' εἶναι τὴν χρηματιστικὴν καὶ τὴν καπηλικήν. ὅτε δὲ πάλιν λῆρος εἶναι δοκεῖ τὸ νόμισμα καὶ νόμος παντάπασι, φύσει δ' οὐθέν, ὅτι μεταθεμένων τε τῶν χρωμένων οὐθενὸς ἄξιον οὐδὲ χρήσιμον πρὸς οὐδέν τῶν ἀναγκαίων ἐστὶ, καὶ νομίσματος πλουτῶν πολλάκις ἀπορήσει τῆς ἀναγκαίας τροφῆς· καίτοι ἄτοπον τοιοῦτον εἶναι πλοῦτον οὐ εὐπορῶν λιμῷ ἀπολείται, καθάπερ καὶ τὸν Μίδαν ἐκεῖνον μυθολογοῦσι διὰ τὴν ἀπληστίαν τῆς εὐχῆς πάντων αὐτῷ γιγνομένων τῶν παρατιθεμένων χρυσῶν. διὸ ζητοῦσιν ἕτερόν τι τὸν πλοῦτον καὶ τὴν χρηματιστικὴν, ὀρθῶς ζητοῦντες. ἔστι γὰρ ἑτέρα ἡ χρηματιστικὴ καὶ ὁ πλοῦτος ὁ κατὰ φύσιν, καὶ αὕτη μὲν οἰκονομικὴ, ἡ δὲ καπηλικὴ ποιητικὴ χρημάτων οὐ πάντως, ἀλλὰ διὰ χρημάτων μεταβολῆς. καὶ δοκεῖ περὶ τὸ νόμισμα αὕτη εἶναι· τὸ γὰρ νόμισμα στοιχεῖον καὶ πέρας τῆς ἀλλαγῆς ἐστίν. καὶ ἄπειρος δὴ οὗτος ὁ πλοῦτος, ὁ ἀπὸ ταύτης τῆς χρηματιστικῆς. ὥσπερ γὰρ ἡ ἰατρικὴ τοῦ ὑγιαίνειν εἰς ἄπειρόν ἐστι, καὶ ἐκάστη τῶν τεχνῶν τοῦ τέλους εἰς ἄπειρον (ὅτι μάλιστα γὰρ ἐκεῖνο βούλονται ποιεῖν), τῶν δὲ πρὸς τὸ τέλος οὐκ εἰς ἄπειρον (πέρας γὰρ τὸ τέλος πάσαις), οὕτω καὶ ταύτης τῆς χρηματιστικῆς οὐκ ἔστι τοῦ τέλους πέρας, τέλος δὲ ὁ τοιοῦτος πλοῦτος καὶ χρημάτων κτῆσις. τῆς δ' οἰκονομικῆς αὖ χρηματιστικῆς ἔστι πέρας· οὐ γὰρ τοῦτο τῆς οἰκονομικῆς ἔργον. διὸ τῇ μὲν φαίνεται ἀναγκαῖον εἶναι παντὸς πλούτου πέρας, ἐπὶ δὲ τῶν γιγνομένων

ὁρῶμεν συμβαῖνον τὸυναντίον· πάντες γὰρ εἰς ἄπειρον αὖξουσιν οἱ χρηματιζόμενοι τὸ νόμισμα. αἴτιον δὲ τὸ σύνεγγυς αὐτῶν. ἐπαλλάττει γὰρ ἡ χρῆσις, τοῦ αὐτοῦ οὔσα, ἐκατέρας τῆς χρηματιστικῆς. τῆς γὰρ αὐτῆς ἐστὶ κτήσεως χρῆσις, ἀλλ' οὐ κατὰ ταυτόν, ἀλλὰ τῆς μὲν ἕτερον τέλος, τῆς δ' ἡ αὖξησης. ὥστε δοκεῖ τισι τοῦτ' εἶναι τῆς οἰκονομικῆς ἔργον, καὶ διατελοῦσιν ἢ σῶζειν οἰόμενοι δεῖν ἢ αὖξιν τὴν τοῦ νομίσματος οὐσίαν εἰς ἄπειρον. αἴτιον δὲ ταύτης τῆς διαθέσεως τὸ σπουδάζειν περὶ τὸ ζῆν, ἀλλὰ [1258a] μὴ τὸ εὖ ζῆν· εἰς ἄπειρον οὖν ἐκείνης τῆς ἐπιθυμίας οὔσης, καὶ τῶν ποιητικῶν ἀπείρων ἐπιθυμοῦσιν. ὅσοι δὲ καὶ τοῦ εὖ ζῆν ἐπιβάλλονται τὸ πρὸς τὰς ἀπολαύσεις τὰς σωματικὰς ζητοῦσιν, ὥστ' ἐπεὶ καὶ τοῦτ' ἐν τῇ κτήσει φαίνεται ὑπάρχειν, πᾶσα ἡ διατριβὴ περὶ τὸν χρηματισμόν ἐστι, καὶ τὸ ἕτερον εἶδος τῆς χρηματιστικῆς διὰ τοῦτ' ἐλήλυθεν. ἐν ὑπερβολῇ γὰρ οὔσης τῆς ἀπολαύσεως, τὴν τῆς ἀπολαυστικῆς ὑπερβολῆς ποιητικὴν ζητοῦσιν· κἂν μὴ διὰ τῆς χρηματιστικῆς δύνωνται πορίζειν, δι' ἄλλης αἰτίας τοῦτο πειρῶνται, ἐκάστη χρώμενοι τῶν δυνάμεων οὐ κατὰ φύσιν. ἀνδρείας γὰρ οὐ χρήματα ποιεῖν ἐστὶν ἀλλὰ θάρσος, οὐδὲ στρατηγικῆς καὶ ἰατρικῆς, ἀλλὰ τῆς μὲν νίκην τῆς δ' ὑγίειαν. οἱ δὲ πάσας ποιοῦσι χρηματιστικάς, ὡς τοῦτο τέλος ὄν, πρὸς δὲ τὸ τέλος ἅπαντα δέον ἀπαντᾶν.

περὶ μὲν οὖν τῆς τε μὴ ἀναγκαίας χρηματιστικῆς, καὶ τίς, καὶ δι' αἰτίαν τίνα ἐν χρειᾷ ἐσμέν αὐτῆς, εἴρηται, καὶ περὶ τῆς ἀναγκαίας, ὅτι ἐτέρα μὲν αὐτῆς οἰκονομικὴ δὲ κατὰ φύσιν ἢ περὶ τὴν τροφήν, οὐχ ὥσπερ αὐτὴ ἄπειρος ἀλλὰ ἔχουσα ὅρον.

Δῆλον δὲ καὶ τὸ ἀπορούμενον ἐξ ἀρχῆς, πότερον τοῦ οἰκονομικοῦ καὶ πολιτικοῦ ἐστὶν ἡ χρηματιστικὴ ἢ οὐ, ἀλλὰ δεῖ τοῦτο μὲν ὑπάρχειν (ὥσπερ γὰρ καὶ ἀνθρώπους οὐ ποιεῖ ἡ πολιτικὴ, ἀλλὰ λαβοῦσα παρὰ τῆς φύσεως χρῆται αὐτοῖς, οὕτω καὶ <πρὸς> τροφήν τὴν φύσιν δεῖ παραδοῦναι γῆν ἢ θάλατταν ἢ ἄλλο τι), ἐκ δὲ τούτων, ὡς δεῖ ταῦτα διαθεῖναι προσήκει τὸν οἰκονόμον. οὐ γὰρ τῆς ὑφαντικῆς ἔρια ποιῆσαι, ἀλλὰ χρήσασθαι αὐτοῖς, καὶ γινῶναι δὲ τὸ ποῖον χρηστὸν καὶ ἐπιτήδειον, ἢ φαῦλον καὶ ἀνεπιτήδειον. καὶ γὰρ ἀπορήσειεν ἂν τις διὰ τί ἡ μὲν χρηματιστικὴ μόριον τῆς οἰκονομίας, ἡ δ' ἰατρικὴ οὐ μόριον· καίτοι δεῖ ὑγιαίνειν τοὺς κατὰ τὴν οἰκίαν, ὥσπερ ζῆν ἢ ἄλλο τι τῶν ἀναγκαίων. ἐπεὶ δὲ ἔστι μὲν ὡς τοῦ οἰκονόμου καὶ τοῦ ἄρχοντος καὶ περὶ ὑγείας ἰδεῖν, ἔστι δ' ὡς οὐ,

ἀλλὰ τοῦ ἱατροῦ, οὕτω καὶ περὶ τῶν χρημάτων ἔστι μὲν ὥς τοῦ οἰκονόμου, ἔστι δ' ὥς οὐ, ἀλλὰ τῆς ὑπηρετικῆς· μάλιστα δέ, καθάπερ εἴρηται πρότερον, δεῖ φύσει τοῦτο ὑπάρχειν. φύσεως γάρ ἐστιν ἔργον τροφήν τῷ γεννηθέντι παρέχειν· παντὶ γάρ, ἐξ οὗ γίνεται, τροφή τὸ λειπόμενόν ἐστι. διὸ κατὰ φύσιν ἐστὶν ἡ χρηματιστικὴ πᾶσιν ἀπὸ τῶν καρπῶν καὶ τῶν ζώων. διπλῆς δ' οὔσης αὐτῆς, ὥσπερ εἵπομεν, καὶ τῆς μὲν καπηλικῆς τῆς δ' οἰκονομικῆς, καὶ ταύτης μὲν ἀναγκαίας καὶ ἐπαινουμένης, τῆς [1258b] δὲ μεταβλητικῆς ψεγομένης δικαίως (οὐ γὰρ κατὰ φύσιν ἀλλ' ἀπ' ἀλλήλων ἐστίν), εὐλογώτατα μισεῖται ἡ ὀβολοστατικὴ διὰ τὸ ἀπ' αὐτοῦ τοῦ νομίσματος εἶναι τὴν κτῆσιν καὶ οὐκ ἐφ' ὅπερ ἐπορίσθη. μεταβολῆς γὰρ ἐγένετο χάριν, ὁ δὲ τόκος αὐτὸ ποιεῖ πλέον (ὅθεν καὶ τοῦνομα τοῦτ' εἴληφεν· ὅμοια γὰρ τὰ τικτόμενα τοῖς γεννῶσιν αὐτὰ ἐστίν, ὁ δὲ τόκος γίνεται νόμισμα ἐκ νομίσματος)· ὥστε καὶ μάλιστα παρὰ φύσιν οὗτος τῶν χρηματισμῶν ἐστίν.

Ἐπεὶ δὲ τὰ πρὸς τὴν γνῶσιν διωρίκαμεν ἱκανῶς, τὰ πρὸς τὴν χρῆσιν δεῖ διελθεῖν. πάντα δὲ τὰ τοιαῦτα τὴν μὲν θεωρίαν ἐλευθέραν ἔχει, τὴν δ' ἐμπειρίαν ἀναγκαίαν. ἔστι δὲ χρηματιστικῆς μέρη χρήσιμα· τὸ περὶ τὰ κτήματα ἐμπειρον εἶναι, ποῖα λυσιτελέστατα καὶ ποῦ καὶ πῶς, οἷον ἵππων κτῆσις ποῖα τις ἢ βοῶν ἢ προβάτων, ὁμοίως δὲ καὶ τῶν λοιπῶν ζώων (δεῖ γὰρ ἐμπειρον εἶναι πρὸς ἄλληλά τε τούτων τίνα λυσιτελέστατα, καὶ ποῖα ἐν ποίοις τόποις· ἄλλα γὰρ ἐν ἄλλαις εὐθηνεῖ χώραις), εἶτα περὶ γεωργίας, καὶ ταύτης ἤδη ψιλῆς τε καὶ πεφυτευμένης, καὶ μελιττουργίας, καὶ τῶν ἄλλων ζώων τῶν πλωτῶν ἢ πτηνῶν, ἀφ' ὧν ἔστι τυγχάνειν βοηθείας. τῆς μὲν οὖν οἰκειοτάτης χρηματιστικῆς ταῦτα μόρια καὶ πρώτης, τῆς δὲ μεταβλητικῆς μέγιστον μὲν ἐμπορία (καὶ ταύτης μέρη τρία, ναυκληρία φορηγία παράστασις· διαφέρει δὲ τούτων ἕτερα ἐτέρων τῷ τὰ μὲν ἀσφαλέστερα εἶναι, τὰ δὲ πλείω πορίζειν τὴν ἐπικαρπίαν), δεύτερον δὲ τοκισμός, τρίτον δὲ μισθαρνία (ταύτης δ' ἡ μὲν τῶν βαναύσων τεχνιτῶν, ἡ δὲ τῶν ἀτέχνων καὶ τῷ σώματι μόνῳ χρησίμων)· τρίτον δὲ εἶδος χρηματιστικῆς μεταξὺ ταύτης καὶ τῆς πρώτης (ἔχει γὰρ καὶ τῆς κατὰ φύσιν τι μέρος καὶ τῆς μεταβλητικῆς), ὅσα ἀπὸ γῆς καὶ τῶν ἀπὸ γῆς γιγνομένων, ἀκάρπων μὲν χρησίμων δέ, οἷον ὑλοτομία τε καὶ πᾶσα μεταλλευτικὴ. αὕτη δὲ πολλὰ ἤδη περιεῖλφε γένη· πολλὰ γὰρ εἶδη τῶν ἐκ γῆς μεταλλευομένων ἐστίν. περὶ ἐκάστου δὲ τούτων καθόλου μὲν εἴρηται καὶ νῦν, τὸ δὲ κατὰ

μέρος ἀκριβολογεῖσθαι χρήσιμον μὲν πρὸς τὰς ἐργασίας, φορτικὸν δὲ τὸ ἐνδιατρίβειν. εἰσὶ δὲ τεχνικώταται μὲν τῶν ἐργασιῶν ὅπου ἐλάχιστον τύχης, βαναυσόταται δ' ἐν αἷς τὰ σώματα λωβῶνται μάλιστα, δουλικώταται δὲ ὅπου τοῦ σώματος πλείσται χρήσεις, ἀγεννέσταται δὲ ὅπου ἐλάχιστον προσδεῖ ἀρετῆς.

ἐπεὶ δ' ἔστιν ἐνίοις γεγραμμένα περὶ τούτων, οἷον Χαρητίδῃ τῷ Παρίῳ καὶ [1259a] Ἀπολλοδώρῳ τῷ Λημνίῳ περὶ γεωργίας καὶ ψιλῆς καὶ πεφυτευμένης, ὁμοίως δὲ καὶ ἄλλοις περὶ ἄλλων, ταῦτα μὲν ἐκ τούτων θεωρεῖτω ὅτῳ ἐπιμελές· ἔτι δὲ καὶ τὰ λεγόμενα σποράδην, δι' ὧν ἐπιτετυχήκασιν ἔνιοι χρηματιζόμενοι, δεῖ συλλέγειν. πάντα γὰρ ὠφέλιμα ταῦτ' ἐστὶ τοῖς τιμῶσι τὴν χρηματιστικήν, οἷον καὶ τὸ Θάλεω τοῦ Μιλησίου· τοῦτο γὰρ ἐστὶ κατανόημά τι χρηματιστικόν, ἀλλ' ἐκεῖνῳ μὲν διὰ τὴν σοφίαν προσάπτουσι, τυγχάνει δὲ καθόλου τι ὄν. ὀνειδιζόντων γὰρ αὐτῷ διὰ τὴν πενίαν ὡς ἀνωφελοῦς τῆς φιλοσοφίας οὔσης, κατανοήσαντά φασιν αὐτὸν ἐλαιοῶν φορὰν ἐσομένην ἐκ τῆς ἀστρολογίας, ἔτι χειμῶνος ὄντος εὐπορήσαντα χρημάτων ὀλίγων ἀρραβῶνας διαδοῦναι τῶν ἐλαιουργίων τῶν τ' ἐν Μιλήτῳ καὶ Χίῳ πάντων, ὀλίγου μισθωσάμενον ἅτ' οὐθενὸς ἐπιβάλλοντος· ἐπειδὴ δ' ὁ καιρὸς ἦκε, πολλῶν ζητουμένων ἅμα καὶ ἐξαίφνης, ἐκμισθοῦντα ὄν τρόπον ἠβούλετο, πολλὰ χρήματα συλλέξαντα ἐπιδείξαι ὅτι ῥαδίον ἐστὶ πλουτεῖν τοῖς φιλοσόφοις, ἂν βούλωνται, ἀλλ' οὐ τοῦτ' ἐστὶ περὶ ὃ σπουδάζουσιν. Θαλῆς μὲν οὖν λέγεται τοῦτον τὸν τρόπον ἐπιδείξιν ποιήσασθαι τῆς σοφίας· ἔστι δ', ὥσπερ εἵπομεν, καθόλου τὸ τοιοῦτον χρηματιστικόν, ἐάν τις δύνηται μονοπωλίαν αὐτῷ κατασκευάζειν. διὸ καὶ τῶν πόλεων ἔνιοι τοῦτον ποιοῦνται τὸν πόρον, ὅταν ἀπορῶσι χρημάτων· μονοπωλίαν γὰρ τῶν ὠνίων ποιοῦσιν. ἐν Σικελίᾳ δὲ τις τεθέντος παρ' αὐτῷ νομίσματος συνεπρίατο πάντα τὸν σίδηρον ἐκ τῶν σιδηρείων, μετὰ δὲ ταῦτα ὡς ἀφίκοντο ἐκ τῶν ἐμπορίων οἱ ἔμποροι, ἐπώλει μόνος, οὐ πολλὴν ποιήσας ὑπερβολὴν τῆς τιμῆς· ἀλλ' ὅμως ἐπὶ τοῖς πεντήκοντα ταλάντοις ἐπέλαβεν ἑκατόν. τοῦτο μὲν οὖν Διονύσιος αἰσθόμενος τὰ μὲν χρήματα ἐκέλευσεν ἐκκομίσασθαι, μὴ μέντοι γε ἔτι μένειν ἐν Συρακούσαις, ὡς πόρους εὐρίσκοντα τοῖς αὐτοῦ πράγμασιν ἀσυμφόρους· τὸ μέντοι ὄραμα Θάλεω καὶ τοῦτο ταῦτόν ἐστιν· ἀμφοτέροι γὰρ ἑαυτοῖς ἐτέχνασαν γενέσθαι μονοπωλίαν. χρήσιμον δὲ γνωρίζειν ταῦτα καὶ τοῖς πολιτικοῖς. πολλὰς γὰρ πόλεσι δεῖ

χρηματισμοῦ καὶ τοιούτων πόρων, ὥσπερ οἰκία, μᾶλλον δέ· διόπερ τινὲς καὶ πολιτεύονται τῶν πολιτευομένων ταῦτα μόνον.

Ἐπεὶ δὲ τρία μέρη τῆς οἰκονομικῆς ἦν, ἐν μὲν δεσποτική, περὶ ἧς εἴρηται πρότερον, ἐν δὲ πατρική, τρίτον δὲ γαμική (καὶ γὰρ γυναικὸς ἄρχει καὶ τέκνων, ὡς ἐλευθέρων μὲν ἀμφοῖν, οὐ τὸν αὐτὸν δὲ τρόπον τῆς ἀρχῆς, ἀλλὰ [1259b] γυναικὸς μὲν πολιτικῶς τέκνων δὲ βασιλικῶς· τό τε γὰρ ἄρρεν φύσει τοῦ θήλεος ἡγεμονικώτερον, εἰ μὴ που συνέστηκε παρὰ φύσιν, καὶ τὸ πρεσβύτερον καὶ τέλειον τοῦ νεωτέρου καὶ ἀτελοῦς) - ἐν μὲν οὖν ταῖς πολιτικαῖς ἀρχαῖς ταῖς πλείσταις μεταβάλλει τὸ ἄρχον καὶ τὸ ἀρχόμενον (ἐξ ἴσου γὰρ εἶναι βούλεται τὴν φύσιν καὶ διαφέρειν μηδέν), ὅμως δέ, ὅταν τὸ μὲν ἄρχῃ τὸ δ' ἄρχηται, ζητεῖ διαφορὰν εἶναι καὶ σχήμασι καὶ λόγοις καὶ τιμαῖς, ὥσπερ καὶ Ἄμασις εἶπε τὸν περὶ τοῦ ποδανιπτῆρος λόγον· τὸ δ' ἄρρεν ἀεὶ πρὸς τὸ θῆλυ τοῦτον ἔχει τὸν τρόπον. ἡ δὲ τῶν τέκνων ἀρχὴ βασιλική· τὸ γὰρ γεννῆσαν καὶ κατὰ φιλίαν ἄρχον καὶ κατὰ πρεσβείαν ἐστίν, ὅπερ ἐστὶ βασιλικῆς εἶδος ἀρχῆς. διὸ καλῶς Ὅμηρος τὸν Δία προσηγόρευσε εἰπὼν “πατὴρ ἀνδρῶν τε θεῶν τε” τὸν βασιλέα τούτων ἀπάντων. φύσει γὰρ τὸν βασιλέα διαφέρειν μὲν δεῖ, τῷ γένει δ' εἶναι τὸν αὐτόν· ὅπερ πέπονθε τὸ πρεσβύτερον πρὸς τὸ νεώτερον καὶ ὁ γεννήσας πρὸς τὸ τέκνον.

Φανερόν τοίνυν ὅτι πλείων ἡ σπουδὴ τῆς οἰκονομίας περὶ τοὺς ἀνθρώπους ἢ περὶ τὴν τῶν ἀψύχων κτῆσιν, καὶ περὶ τὴν ἀρετὴν τούτων ἢ περὶ τὴν τῆς κτήσεως, ὃν καλοῦμεν πλοῦτον, καὶ τῶν ἐλευθέρων μᾶλλον ἢ δούλων. πρῶτον μὲν οὖν περὶ δούλων ἀπορήσειεν ἂν τις, πότερον ἔστιν ἀρετὴ τις δούλου παρὰ τὰς ὀργανικὰς καὶ διακονικὰς ἄλλῃ τιμιωτέρα τούτων, οἷον σωφροσύνη καὶ ἀνδρεία καὶ δικαιοσύνη καὶ ἐκάστη τῶν ἄλλων τῶν τοιούτων ἕξεων, ἢ οὐκ ἔστιν οὐδεμία παρὰ τὰς σωματικὰς ὑπηρεσίας (ἔχει γὰρ ἀπορίαν ἀμφοτέρως· εἴτε γὰρ ἔστιν, τί διοίσουσι τῶν ἐλευθέρων; εἴτε μὴ ἔστιν, ὄντων ἀνθρώπων καὶ λόγου κοινωνούντων ἄτοπον). σχεδὸν δὲ ταυτόν ἐστι τὸ ζητούμενον καὶ περὶ γυναικὸς καὶ παιδός, πότερα καὶ τούτων εἰσὶν ἀρεταί, καὶ δεῖ τὴν γυναῖκα εἶναι σώφρονα καὶ ἀνδρείαν καὶ δικαίαν, καὶ παῖς ἔστι καὶ ἀκόλαστος καὶ σώφρων, ἢ οὐ; καθόλου δὲ τοῦτ' ἐστὶν ἐπισκεπτέον περὶ ἀρχομένου φύσει καὶ ἄρχοντος, πότερον ἢ αὐτὴ ἀρετὴ ἢ ἕτερα. εἰ μὲν γὰρ δεῖ ἀμφοτέρους μετέχειν καλοκαγαθίας, διὰ τί τὸν μὲν ἄρχειν δεοί ἂν τὸν δὲ ἄρχεσθαι καθάπαξ; οὐδὲ γὰρ τῷ μᾶλλον καὶ ἥττον οἷόν τε διαφέρειν·

τὸ μὲν γὰρ ἄρχεσθαι καὶ ἄρχειν εἶδει διαφέρει, τὸ δὲ μᾶλλον καὶ ἥττον οὐδέν. εἰ δὲ τὸν μὲν δεῖ τὸν δὲ μὴ, θαυμαστόν. εἴτε γὰρ ὁ ἄρχων μὴ ἔσται σώφρων καὶ δίκαιος, πῶς ἄρξει καλῶς; εἴθ' ὁ ἀρχόμενος, πῶς ἀρχθήσεται [1260a] καλῶς; ἀκόλαστος γὰρ ὢν καὶ δειλὸς οὐδὲν ποιήσει τῶν προσηκόντων. φανερόν τοίνυν ὅτι ἀνάγκη μὲν μετέχειν ἀμφοτέρους ἀρετῆς, ταύτης δ' εἶναι διαφοράς, ὥσπερ καὶ τῶν φύσει ἀρχόντων. καὶ τοῦτο εὐθὺς ὑφήγηται «τὰ» περὶ τὴν ψυχὴν· ἐν ταύτῃ γὰρ ἐστὶ φύσει τὸ μὲν ἄρχον τὸ δ' ἀρχόμενον, ὢν ἐτέραν φαμέν εἶναι ἀρετὴν, οἷον τοῦ λόγον ἔχοντος καὶ τοῦ ἀλόγου. δῆλον τοίνυν ὅτι τὸν αὐτὸν τρόπον ἔχει καὶ ἐπὶ τῶν ἄλλων, ὥστε φύσει τὰ πλείω ἄρχοντα καὶ ἀρχόμενα. ἄλλον γὰρ τρόπον τὸ ἐλεύθερον τοῦ δούλου ἄρχει καὶ τὸ ἄρρεν τοῦ θήλεος καὶ ἀνὴρ παιδός, καὶ πᾶσιν ἐνυπάρχει μὲν τὰ μόρια τῆς ψυχῆς, ἀλλ' ἐνυπάρχει διαφερόντως. ὁ μὲν γὰρ δοῦλος ὅλως οὐκ ἔχει τὸ βουλευτικόν, τὸ δὲ θῆλυ ἔχει μὲν, ἀλλ' ἄκυρον, ὁ δὲ παῖς ἔχει μὲν, ἀλλ' ἀτελές. ὁμοίως τοίνυν ἀναγκαίως ἔχειν καὶ περὶ τὰς ἠθικὰς ἀρετὰς ὑποληπτέον, δεῖν μὲν μετέχειν πάντας, ἀλλ' οὐ τὸν αὐτὸν τρόπον, ἀλλ' ὅσον «ικανόν» ἐκάστω πρὸς τὸ αὐτοῦ ἔργον· διὸ τὸν μὲν ἄρχοντα τελείαν ἔχειν δεῖ τὴν ἠθικὴν ἀρετὴν (τὸ γὰρ ἔργον ἐστὶν ἀπλῶς τοῦ ἀρχιτέκτονος, ὁ δὲ λόγος ἀρχιτέκτων), τῶν δ' ἄλλων ἕκαστον ὅσον ἐπιβάλλει αὐτοῖς. ὥστε φανερόν ὅτι ἔστιν ἠθικὴ ἀρετὴ τῶν εἰρημένων πάντων, καὶ οὐχ ἡ αὐτὴ σωφροσύνη γυναικὸς καὶ ἀνδρός, οὐδ' ἀνδρεία καὶ δικαιοσύνη, καθάπερ ὤετο Σωκράτης, ἀλλ' ἡ μὲν ἀρχικὴ ἀνδρεία ἢ δ' ὑπηρετικὴ, ὁμοίως δ' ἔχει καὶ περὶ τὰς ἄλλας.

δῆλον δὲ τοῦτο καὶ κατὰ μέρος μᾶλλον ἐπισκοποῦσιν· καθόλου γὰρ οἱ λέγοντες ἐξαπατῶσιν ἑαυτοὺς ὅτι τὸ εὖ ἔχειν τὴν ψυχὴν ἀρετὴ, ἢ τὸ ὀρθοπραγεῖν, ἢ τι τῶν τοιούτων· πολὺ γὰρ ἄμεινον λέγουσιν οἱ ἐξαριθμοῦντες τὰς ἀρετάς, ὥσπερ Γοργίας, τῶν οὕτως ὀριζομένων. διὸ δεῖ, ὥσπερ ὁ ποιητὴς εἶρηκε περὶ γυναικός, οὕτω νομίζειν ἔχειν περὶ πάντων· “γυναικὶ κόσμον ἢ σιγὴ φέρει”, ἀλλ' ἀνδρὶ οὐκέτι τοῦτο. ἐπεὶ δ' ὁ παῖς ἀτελής, δῆλον ὅτι τούτου μὲν καὶ ἡ ἀρετὴ οὐκ αὐτοῦ πρὸς αὐτόν ἐστιν, ἀλλὰ πρὸς τὸ τέλος καὶ τὸν ἡγούμενον· ὁμοίως δὲ καὶ δούλου πρὸς δεσπότην. ἔθεμεν δὲ πρὸς τὰναγκαῖα χρήσιμον εἶναι τὸν δοῦλον, ὥστε δῆλον ὅτι καὶ ἀρετῆς δεῖται μικρᾶς, καὶ τοσαύτης ὅπως μῆτε δι' ἀκολασίαν μῆτε διὰ δειλίαν ἐλλείψῃ τῶν ἔργων. ἀπορήσειε δ' ἂν τις, τὸ νῦν εἰρημένον εἰ ἀληθές, ἄρα καὶ τοὺς τεχνίτας δεήσει ἔχειν ἀρετὴν· πολλάκις γὰρ δι'

ἀκολασίαν ἐλλείπουσι τῶν ἔργων. ἡ διαφέρει τοῦτο πλεῖστον; ὁ μὲν γὰρ δοῦλος κοινωνὸς ζωῆς, ὁ δὲ πορρώτερον, καὶ τοσοῦτον ἐπιβάλλει ἀρετῆς ὅσον περ καὶ δουλείας· ὁ γὰρ βάναντος τεχνίτης [1260b] ἀφωρισμένην τινὰ ἔχει δουλείαν, καὶ ὁ μὲν δοῦλος τῶν φύσει, σκυτοτόμος δ' οὐθείς, οὐδὲ τῶν ἄλλων τεχνιτῶν. φανερόν τοίνυν ὅτι τῆς τοιαύτης ἀρετῆς αἴτιον εἶναι δεῖ τῷ δούλῳ τὸν δεσπότην, ἀλλ' οὐ <τὸν> τὴν διδασκαλικὴν ἔχοντα τῶν ἔργων [δεσποτικήν]. διὸ λέγουσιν οὐ καλῶς οἱ λόγου τοὺς δούλους ἀποστεροῦντες καὶ φάσκοντες ἐπιτάξει χρῆσθαι μόνον· νουθετητέον γὰρ μᾶλλον τοὺς δούλους ἢ τοὺς παῖδας.

ἀλλὰ περὶ μὲν τούτων διωρίσθω τὸν τρόπον τοῦτον· περὶ δ' ἀνδρὸς καὶ γυναικός, καὶ τέκνων καὶ πατρός, τῆς τε περὶ ἕκαστον αὐτῶν ἀρετῆς καὶ τῆς πρὸς σφᾶς αὐτοὺς ὁμιλίας, τί τὸ καλῶς καὶ μὴ καλῶς ἐστὶ, καὶ πῶς δεῖ τὸ μὲν εὖ διώκειν τὸ δὲ κακῶς φεύγειν, ἐν τοῖς περὶ τὰς πολιτείας ἀναγκαῖον ἐπελθεῖν. ἐπεὶ γὰρ οἰκία μὲν πᾶσα μέρος πόλεως, ταῦτα δ' οἰκίας, τὴν δὲ τοῦ μέρους πρὸς τὴν τοῦ ὅλου δεῖ βλέπειν ἀρετὴν, ἀναγκαῖον πρὸς τὴν πολιτείαν βλέποντας παιδεύειν καὶ τοὺς παῖδας καὶ τὰς γυναῖκας, εἴπερ τι διαφέρει πρὸς τὸ τὴν πόλιν εἶναι σπουδαίαν καὶ <τὸ> τοὺς παῖδας εἶναι σπουδαίους καὶ τὰς γυναῖκας σπουδαίας. ἀναγκαῖον δὲ διαφέρειν· αἱ μὲν γὰρ γυναῖκες ἡμισυ μέρος τῶν ἐλευθέρων, ἐκ δὲ τῶν παίδων οἱ κοινωνοὶ γίνονται τῆς πολιτείας. ὥστ', ἐπεὶ περὶ μὲν τούτων διώρισται, περὶ δὲ τῶν λοιπῶν ἐν ἄλλοις λεκτέον, ἀφέντες ὡς τέλος ἔχοντας τοὺς νῦν λόγους, ἄλλην ἀρχὴν ποιησάμενοι λέγωμεν, καὶ πρῶτον ἐπισκεψώμεθα περὶ τῶν ἀποφνημαμένων περὶ τῆς πολιτείας τῆς ἀρίστης.

B

Ἐπεὶ δὲ προαιρούμεθα θεωρῆσαι περὶ τῆς κοινωνίας τῆς πολιτικῆς, τίς κρατίστη πασῶν τοῖς δυναμένοις ζῆν ὅτι μάλιστα κατ' εὐχὴν, δεῖ καὶ τὰς ἄλλας ἐπισκέψασθαι πολιτείας, αἷς τε χρῶνται τινες τῶν πόλεων τῶν εὐνομεῖσθαι λεγομένων, κὰν εἴ τινες ἕτεροι τυγχάνουσιν ὑπὸ τινῶν εἰρημέναι καὶ δοκοῦσαι καλῶς ἔχειν, ἵνα τό τ' ὀρθῶς ἔχον ὀφθῇ καὶ τὸ χρήσιμον, ἔτι δὲ τὸ ζητεῖν τι παρ' αὐτὰς ἕτερον μὴ δοκῇ πάντως εἶναι σοφίζεσθαι βουλομένων, ἀλλὰ διὰ τὸ μὴ καλῶς ἔχειν ταύτας τὰς νῦν ὑπαρχούσας, διὰ τοῦτο ταύτην δοκῶμεν ἐπιβαλέσθαι τὴν μέθοδον. ἀρχὴν δὲ πρῶτον ποιητέον ἥπερ πέφυκεν ἀρχὴ ταύτης τῆς σκέψεως. ἀνάγκη γὰρ ἦτοι πάντας πάντων κοινωνεῖν τοὺς πολίτας, ἢ μηδενός, ἢ τινῶν μὲν τινῶν δὲ μή. τὸ μὲν οὖν μηδενός κοινωνεῖν φανερόν ὡς ἀδύνατον (ἢ γὰρ πολιτεία κοινωνία τίς ἐστί, καὶ πρῶτον ἀνάγκη τοῦ τόπου κοινωνεῖν· ὁ μὲν γὰρ τόπος εἷς ὁ τῆς [1261a] μιᾶς πόλεως, οἱ δὲ πολῖται κοινωνοὶ τῆς μιᾶς πόλεως)· ἀλλὰ πότερον ὅσων ἐνδέχεται κοινωνῆσαι, πάντων βέλτιον κοινωνεῖν τὴν μέλλουσαν οἰκήσεσθαι πόλιν καλῶς, ἢ τινῶν μὲν τινῶν δ' οὐ βέλτιον; ἐνδέχεται γὰρ καὶ τέκνων καὶ γυναικῶν καὶ κτημάτων κοινωνεῖν τοὺς πολίτας ἀλλήλοις, ὥσπερ ἐν τῇ Πολιτεία τῇ Πλάτωνος· ἐκεῖ γὰρ ὁ Σωκράτης φησὶ δεῖν κοινὰ τὰ τέκνα καὶ τὰς γυναῖκας εἶναι καὶ τὰς κτήσεις. τοῦτο δὴ πότερον ὡς νῦν οὕτω βέλτιον ἔχειν, ἢ κατὰ τὸν ἐν τῇ Πολιτεία γεγραμμένον νόμον;

Ἔχει δὴ δυσχερείας ἄλλας τε πολλὰς τὸ πάντων εἶναι τὰς γυναῖκας κοινάς, καὶ δι' ἣν αἰτίαν φησὶ δεῖν νενομοθετησθαι τὸν τρόπον τοῦτον ὁ Σωκράτης, οὐ φαίνεται συμβαῖνον ἐκ τῶν λόγων. ἔτι δὲ πρὸς, τὸ τέλος ὃ φησι τῇ πόλει δεῖν ὑπάρχειν, ὡς μὲν εἴρηται νῦν, ἀδύνατον, πῶς δὲ δεῖ διελεῖν, οὐδὲν διώριται. λέγω δὲ τὸ μίαν εἶναι τὴν πόλιν ὡς ἄριστον ὃν ὅτι μάλιστα πᾶσαν· λαμβάνει γὰρ ταύτην <τὴν> ὑπόθεσιν ὁ Σωκράτης. καίτοι φανερόν ἐστιν ὡς προϋοῦσα καὶ γινομένη μία μᾶλλον οὐδὲ πόλις ἔσται· πλῆθος γάρ τι τὴν φύσιν ἐστὶν ἡ πόλις, γινομένη τε μία μᾶλλον οἰκία μὲν ἐκ πόλεως ἄνθρωπος δ' ἐξ οἰκίας ἔσται· μᾶλλον γὰρ μίαν τὴν οἰκίαν τῆς πόλεως φαίημεν ἂν, καὶ τὸν ἓνα τῆς οἰκίας· ὥστ' εἰ καὶ δυνατός τις εἴη τοῦτο δρᾶν, οὐ ποιητέον· ἀναιρήσει γὰρ τὴν πόλιν.

οὐ μόνον δ' ἐκ πλειόνων ἀνθρώπων ἐστὶν ἡ πόλις, ἀλλὰ καὶ ἐξ

εἶδει διαφερόντων. οὐ γὰρ γίνεται πόλις ἐξ ὁμοίων. ἕτερον γὰρ συμμαχία καὶ πόλις· τὸ μὲν γὰρ τῷ ποσῷ χρήσιμον, κἂν ἢ τὸ αὐτὸ τῷ εἶδει (βοηθείας γὰρ χάριν ἢ συμμαχία πέφυκεν), ὥσπερ ἂν εἰ σταθμὸς πλείον ἐλκύσειε (διοίσει δὲ τῷ τοιοῦτῳ καὶ πόλις ἔθνους, ὅταν μὴ κατὰ κώμας ὥσι κεχωρισμένοι τὸ πλῆθος, ἀλλ' οἷον Ἀρκάδες)· ἐξ ὧν δὲ δεῖ ἐν γενέσθαι, εἶδει διαφέρει. διόπερ τὸ ἴσον τὸ ἀντιπεπονηθὸς σφάζει τὰς πόλεις, ὥσπερ ἐν τοῖς Ἑθικοῖς εἴρηται πρότερον· ἐπεὶ καὶ ἐν τοῖς ἐλευθέροις καὶ ἴσοις ἀνάγκη τοῦτ' εἶναι· ἅμα γὰρ οὐχ οἷόν τε πάντας ἄρχειν, ἀλλ' ἢ κατ' ἐνιαυτὸν ἢ κατὰ τινα ἄλλην τάξιν [ἢ] χρόνου. καὶ συμβαίνει δὴ τὸν τρόπον τοῦτον ὥστε πάντας ἄρχειν, ὥσπερ ἂν εἰ μετεβαλλὼν οἱ σκυτεῖς καὶ οἱ τέκτονες καὶ μὴ αἰεὶ οἱ αὐτοὶ σκυτοτόμοι καὶ τέκτονες ἦσαν. ἐπεὶ δὲ βέλτιον οὕτως ἔχει καὶ τὰ περὶ τὴν κοινωνίαν τὴν πολιτικὴν, δηλὸν ὡς τοὺς αὐτοὺς αἰεὶ βέλτιον ἄρχειν, εἰ δυνατόν, ἐν οἷς δὲ μὴ δυνατόν διὰ τὸ τὴν [1261b] φύσιν ἴσους εἶναι πάντας, ἅμα δὲ καὶ δίκαιον, εἴτ' ἀγαθὸν εἴτε φαῦλον τὸ ἄρχειν. πάντας αὐτοῦ μετέχειν, τοῦτό γε μιμεῖται τὸ ἐν μέρει τοὺς ἴσους εἴκειν τό θ' ὁμοίους εἶναι ἐξω ἀρχῆς· οἱ μὲν γὰρ ἄρχουσιν οἱ δ' ἄρχονται κατὰ μέρος ὥσπερ ἂν ἄλλοι γενόμενοι. τὸν αὐτὸν δὴ τρόπον ἀρχόντων ἕτεροι ἐτέρας ἄρχουσιν ἀρχάς. φανερόν τοίνυν ἐκ τούτων ὡς οὔτε πέφυκε μίαν οὕτως εἶναι τὴν πόλιν ὥσπερ λέγουσί τινες, καὶ τὸ λεχθὲν ὡς μέγιστον ἀγαθὸν ἐν ταῖς πόλεσιν ὅτι τὰς πόλεις ἀναιρεῖ· καίτοι τό γε ἐκάστου ἀγαθὸν σφάζει ἕκαστον. ἔστι δὲ καὶ κατ' ἄλλον τρόπον φανερόν ὅτι τὸ λίαν ἐνοῦν ζητεῖν τὴν πόλιν οὐκ ἔστιν ἄμεινον. οἰκία μὲν γὰρ αὐταρκέστερον ἐνός, πόλις δ' οἰκίας, καὶ βούλεται γ' ἤδη τότε εἶναι πόλις ὅταν αὐτάρκη συμβαίῃ τὴν κοινωνίαν εἶναι τοῦ πλῆθους· εἴπερ οὖν αἰρετώτερον τὸ αὐταρκέστερον, καὶ τὸ ἥττον ἐν τοῦ μᾶλλον αἰρετώτερον.

Ἀλλὰ μὴν οὐδ' εἰ τοῦτο ἄριστόν ἐστι, τὸ μίαν ὅτι μάλιστα' εἶναι τὴν κοινωνίαν, οὐδὲ τοῦτο ἀποδείκνυσθαι φαίνεται κατὰ τὸν λόγον, ἐὰν πάντες ἅμα λέγωσι τὸ ἐμὸν καὶ τὸ μὴ ἐμὸν· τοῦτο γὰρ οἶται ὁ Σωκράτης σημεῖον εἶναι τοῦ τὴν πόλιν τελέως εἶναι μίαν. τὸ γὰρ πάντες διττόν. εἰ μὲν οὖν ὡς ἕκαστος, τάχ' ἂν εἴη μᾶλλον ὁ βούλεται ποιεῖν ὁ Σωκράτης (ἕκαστος γὰρ υἱὸν ἑαυτοῦ φήσει τὸν αὐτὸν καὶ γυναῖκα δὴ τὴν αὐτήν, καὶ περὶ τῆς οὐσίας καὶ περὶ ἐκάστου δὴ τῶν συμβαινόντων ὡσαύτως)· νῦν δ' οὐχ οὕτως φήσουσιν οἱ κοιναῖς χρώμενοι ταῖς γυναῖξιν καὶ τοῖς τέκνοις, ἀλλὰ πάντες μὲν, οὐχ ὡς

ἕκαστος δ' αὐτῶν, ὁμοίως δὲ καὶ τὴν οὐσίαν πάντες μὲν, οὐχ ὡς ἕκαστος δ' αὐτῶν. ὅτι μὲν τοίνυν παραλογισμός τις ἐστὶ τὸ λέγειν πάντας, φανερόν (τὸ γὰρ πάντες καὶ ἀμφοτέροι, καὶ περιττὰ καὶ ἄρτια, διὰ τὸ διττὸν καὶ ἐν τοῖς λόγοις ἐριστικούς ποιεῖ συλλογισμούς· διό ἐστὶ τὸ πάντας τὸ αὐτὸ λέγειν ὡδὶ μὲν καλὸν ἄλλ' οὐ δυνατόν, ὡδὶ δ' οὐδὲν ὁμονοητικόν)· πρὸς δὲ τούτοις ἐτέραν ἔχει βλάβην τὸ λεγόμενον. ἥκιστα γὰρ ἐπιμελείας τυγχάνει τὸ πλείστων κοινόν· τῶν γὰρ ἰδίων μάλιστα φροντίζουσιν, τῶν δὲ κοινῶν ἥττον, ἢ ὅσον ἐκάστῳ ἐπιβάλλει· πρὸς γὰρ τοῖς ἄλλοις ὡς ἐτέρου φροντίζοντος ὀλιγοροῦσι μᾶλλον, ὥσπερ ἐν ταῖς οἰκετικαῖς διακονίαις οἱ πολλοὶ θεράποντες ἐνίστε χεῖρον ὑπηρετοῦσι τῶν ἐλαττόνων. γίνονται δ' ἐκάστῳ χίλιοι τῶν πολιτῶν υἱοί, καὶ οὗτοι οὐχ ὡς ἐκάστου, ἀλλὰ τοῦ τυχόντος ὁ τυχὼν ὁμοίως ἐστὶν υἱός· ὥστε πάντες ὁμοίως ὀλιγορήσουσιν.

[1262a] ἔτι οὕτως ἕκαστος “ἐμός” λέγει τὸν εὖ πράττοντα τῶν πολιτῶν ἢ κακῶς, ὁπόστος τυγχάνει τὸν ἀριθμὸν ὧν, οἷον ἐμός ἢ τοῦ δεῖνος, τοῦτον τὸν τρόπον λέγων καθ' ἕκαστον τῶν χιλίων, ἢ ὅσων ἢ πόλις ἐστὶ, καὶ τοῦτο διστάζων· ἄδηλον γὰρ ὅ ἅ συνέβη γενέσθαι τέκνον καὶ σωθῆναι γενόμενον. καίτοι πότερον οὕτω κρεῖττον τὸ ἐμὸν λέγειν ἕκαστον, τὸ αὐτὸ [μὲν] προσαγορεύοντας δισχιλίων καὶ μυρίων, ἢ μᾶλλον ὡς νῦν ἐν ταῖς πόλεσι τὸ ἐμὸν λέγουσιν; ὁ μὲν γὰρ υἱὸν αὐτοῦ ὁ δὲ ἀδελφὸν αὐτοῦ προσαγορεύει τὸν αὐτόν, ὁ δ' ἀνεψιόν, ἢ κατ' ἄλλην τινὰ συγγένειαν [ἢ] πρὸς αἵματος ἢ κατ' οἰκειότητα καὶ κηδεῖαν αὐτοῦ πρῶτον ἢ τῶν αὐτοῦ, πρὸς δὲ τούτοις ἕτερος φράτορα φυλέτην. κρεῖττον γὰρ ἴδιον ἀνεψιὸν εἶναι ἢ τὸν τρόπον τοῦτον υἱόν. οὐ μὴν ἄλλ' οὐδὲ διαφυγεῖν δυνατόν τὸ μή τινας ὑπολαμβάνειν ἑαυτῶν ἀδελφούς τε καὶ παῖδας καὶ πατέρας καὶ μητέρας· κατὰ γὰρ τὰς ὁμοιότητας αἱ γίνονται τοῖς τέκνοις πρὸς τοὺς γεννήσαντας ἀναγκαῖον λαμβάνειν περὶ ἀλλήλων τὰς πίστεις. ὅπερ φασὶ καὶ συμβαίνειν τινὲς τῶν τὰς τῆς γῆς περιόδους πραγματευομένων· εἶναι γάρ τισι τῶν ἄνω Λιβύων κοινὰς τὰς γυναῖκας, τὰ μέντοι γινόμενα τέκνα διαιρεῖσθαι κατὰ τὰς ὁμοιότητας. εἰσὶ δὲ τινες καὶ γυναῖκες καὶ τῶν ἄλλων ζώων, οἷον ἵπποι καὶ βόες, αἱ σφόδρα πεφύκασιν ὅμοια ἀποδιδόναι τὰ τέκνα τοῖς γονεῦσιν, ὥσπερ ἢ ἐν Φαρσάλῳ κληθεῖσα Δικαία ἵππος.

Ἔτι δὲ καὶ τὰς τοιαύτας δυσχερείας οὐ ῥάδιον εὐλαβηθῆναι τοῖς ταύτην κατασκευάζουσι τὴν κοινωνίαν, οἷον αἰκίας καὶ φόνους

ἀκουσίους τοὺς δὲ ἐκουσίους, καὶ μάχας καὶ λοιδορίας· ὧν οὐδὲν ὁσιόν ἐστι γίνεσθαι πρὸς πατέρας καὶ μητέρας καὶ τοὺς μὴ πόρρω τῆς συγγενείας ὄντας, ὥσπερ πρὸς τοὺς ἄπωθεν· ἃ καὶ πλεῖον συμβαίνειν ἀναγκαῖον ἀγνοούντων ἢ γνωρίζοντων, καὶ γενομένων τῶν μὲν γνωριζομένων ἐνδέχεται τὰς νομιζομένας γίνεσθαι λύσεις, τῶν δὲ μὴ, οὐδεμίαν. ἄτοπον δὲ καὶ τὸ κοινούς ποιήσαντα τοὺς υἱούς τὸ συνεῖναι μόνον ἀφελεῖν τῶν ἐρώντων, τὸ δ' ἐρᾶν μὴ κωλύσαι, μηδὲ τὰς χρήσεις τὰς ἄλλας ἃς πατρὶ πρὸς υἱὸν εἶναι πάντων ἐστὶν ἀπρεπέστατον καὶ ἀδελφῷ πρὸς ἀδελφόν, ἐπεὶ καὶ τὸ ἐρᾶν μόνον. ἄτοπον δὲ καὶ τὸ τὴν συνουσίαν ἀφελεῖν δι' ἄλλην μὲν αἰτίαν μηδεμίαν, ὥς λίαν δὲ ἰσχυρᾶς τῆς ἡδονῆς γινομένης, ὅτι δ' ὁ μὲν πατὴρ ἢ υἱός, οἱ δ' ἀδελφοὶ ἀλλήλων, μηδὲν οἶεσθαι διαφέρειν.

ἔοικε δὲ μᾶλλον τοῖς γεωργοῖς εἶναι χρήσιμον τὸ κοινὰς εἶναι τὰς γυναῖκας καὶ τοὺς παῖδας [1262b] ἢ τοῖς φύλαξιν· ἦττον γὰρ ἔσται φιλία κοινῶν ὄντων τῶν τέκνων καὶ τῶν γυναικῶν, δεῖ δὲ τοιοῦτους εἶναι τοὺς ἀρχομένους πρὸς τὸ πειθαρχεῖν καὶ μὴ νεωτερίζειν. ὅλως δὲ συμβαίνειν ἀνάγκη τούναντίον διὰ τὸν τοιοῦτον νόμον ὧν προσήκει τοὺς ὀρθῶς κειμένους νόμους αἰτίους γίνεσθαι, καὶ δι' ἣν αἰτίαν ὁ Σωκράτης οὕτως οἶεται δεῖν τάττειν τὰ περὶ τὰ τέκνα καὶ τὰς γυναῖκας. φιλίαν τε γὰρ οἰόμεθα μέγιστον εἶναι τῶν ἀγαθῶν ταῖς πόλεσιν (οὕτως γὰρ ἂν ἦκιστα στασιάζοιεν), καὶ τὸ μίαν εἶναι τὴν πόλιν ἐπαινεῖ μάλισθ' ὁ Σωκράτης, ὁ καὶ δοκεῖ κάκεῖνος εἶναί φησι τῆς φιλίας ἔργον, καθάπερ ἐν τοῖς ἐρωτικοῖς λόγοις ἴσμεν λέγοντα τὸν Ἀριστοφάνην ὡς τῶν ἐρώντων διὰ τὸ σφόδρα φιλεῖν ἐπιθυμούντων συμφῦναι καὶ γενέσθαι ἐκ δύο ὄντων ἀμφοτέρους ἕνα· ἐνταῦθα μὲν οὖν ἀνάγκη ἀμφοτέρους ἐφθάρθαι ἢ τὸν ἕνα, ἐν δὲ τῇ πόλει τὴν φιλίαν ἀναγκαῖον ὑδαρῇ γίνεσθαι διὰ τὴν κοινωνίαν τὴν τοιαύτην, καὶ ἦκιστα λέγειν τὸν ἑμὸν ἢ υἱὸν πατέρα ἢ πατέρα υἱόν. ὥσπερ γὰρ μικρὸν γλυκὺ εἰς πολὺ ὕδωρ μειχθὲν ἀναίσθητον ποιεῖ τὴν κρᾶσιν, οὕτω συμβαίνει καὶ τὴν οἰκειότητα τὴν πρὸς ἀλλήλους τὴν ἀπὸ τῶν ὀνομάτων τούτων, διαφροντίζειν ἦκιστα ἀναγκαῖον ὃν ἐν τῇ πολιτείᾳ τῇ τοιαύτῃ ἢ πατέρα ὡς υἱὸν ἢ υἱὸν ὡς πατρός, ἢ ὡς ἀδελφούς ἀλλήλων. δύο γάρ ἐστιν ἃ μάλιστα ποιεῖ κήδεσθαι τοὺς ἀνθρώπους καὶ φιλεῖν, τό τε ἴδιον καὶ τὸ ἀγαπητόν· ὧν οὐδέτερον οἶόν τε ὑπάρχειν τοῖς οὕτω πολιτευομένοις. ἀλλὰ μὴν καὶ περὶ τοῦ μεταφέρειν τὰ γινόμενα τέκνα, τὰ μὲν ἐκ τῶν γεωργῶν καὶ τεχνιτῶν εἰς τοὺς φύλακας, τὰ δ' ἐκ τούτων εἰς ἐκείνους, πολλὴν

ἔχει ταραχὴν τίνα ἔσται τρόπον· καὶ γινώσκειν ἀναγκαῖον τοὺς διδόντας καὶ μεταφέροντας τίσι τίνας διδόασιν. ἔτι δὲ καὶ τὰ πάλαι λεχθέντα μᾶλλον ἐπὶ τούτων ἀναγκαῖον συμβαίνειν, οἷον αἰκίας ἔρωτας φόνους· οὐ γὰρ ἔτι προσαγορεύουσιν ἀδελφοὺς καὶ τέκνα καὶ πατέρας καὶ μητέρας τοὺς φύλακας οἳ τε εἰς τοὺς ἄλλους πολίτας δοθέντες καὶ πάλιν οἱ παρὰ τοῖς φύλαξι τοὺς ἄλλους πολίτας, ὥστ' εὐλαβεῖσθαι τῶν τοιούτων τι πράττειν διὰ τὴν συγγένειαν.

περὶ μὲν οὖν τῆς περὶ τὰ τέκνα καὶ τὰς γυναῖκας κοινωνίας διωρίσθω τὸν τρόπον τοῦτον.

Ἐχόμενον δὲ τούτων ἐστὶν ἐπισκέψασθαι περὶ τῆς κτήσεως, τίνα τρόπον δεῖ κατασκευάζεσθαι τοῖς μέλλουσι πολιτεῦεσθαι τὴν ἀρίστην πολιτείαν, πότερον κοινὴν ἢ μὴ κοινὴν εἶναι τὴν κτῆσιν. τοῦτο δ' ἂν τις καὶ χωρὶς σκέψαιτο ἀπὸ τῶν περὶ τὰ τέκνα καὶ τὰς γυναῖκας νενομοθετημένων, λέγω [1263a] δὲ τὰ περὶ τὴν κτῆσιν πότερον (κἂν ἢ ἐκεῖνα χωρὶς, καθ' ὃν νῦν τρόπον ἔχει πᾶσι) τὰς γε κτήσεις κοινὰς εἶναι βέλτιον, ἢ τὰς χρήσεις, οἷον τὰ μὲν γῆπεδα χωρὶς, τοὺς δὲ καρποὺς εἰς τὸ κοινὸν φέροντας ἀναλίσκειν (ὅπερ ἔνια ποιεῖ τῶν ἐθνῶν), ἢ τοὐναντίον τὴν μὲν γῆν κοινὴν εἶναι καὶ γεωργεῖν κοινῇ, τοὺς δὲ καρποὺς διαιρεῖσθαι πρὸς τὰς ἰδίας χρήσεις (λέγονται δέ τινες καὶ τοῦτον τὸν τρόπον κοινωνεῖν τῶν βαρβάρων), ἢ καὶ τὰ γῆπεδα καὶ τοὺς καρποὺς κοινούς. ἐτέρων μὲν οὖν ὄντων τῶν γεωργούντων ἄλλος ἂν εἴη τρόπος καὶ ῥάων, αὐτῶν δ' αὐτοῖς διαπονούντων τὰ περὶ τὰς κτήσεις πλείους ἂν παρέχοι δυσκολίας. καὶ γὰρ ἐν ταῖς ἀπολαύσεσι καὶ ἐν τοῖς ἔργοις μὴ γινομένων ἴσων ἄλλ' ἀνίσων ἀναγκαῖον ἐγκλήματα γίνεσθαι πρὸς τοὺς ἀπολαύοντας μὲν ἢ λαμβάνοντας πολλά, ὀλίγα δὲ πονοῦντας, τοῖς ἐλάττω μὲν λαμβάνουσι, πλείω δὲ πονοῦσιν. ὅλως δὲ τὸ συζῆν καὶ κοινωνεῖν τῶν ἀνθρωπικῶν πάντων χαλεπὸν, καὶ μάλιστα τῶν τοιούτων. δηλοῦσι δ' αἱ τῶν συναποδήμων κοινωνίαι· σχεδὸν γὰρ οἱ πλείστοι διαφέρονται, ἐκ τῶν ἐν ποσὶ καὶ ἐκ μικρῶν προσκρούοντες ἀλλήλοις. ἔτι δὲ τῶν θεραπόντων τούτοις μάλιστα προσκρούομεν οἷς πλεῖστα προσχρώμεθα πρὸς τὰς διακονίας τὰς ἐγκυκλίους.

τὸ μὲν οὖν κοινὰς εἶναι τὰς κτήσεις ταύτας τε καὶ ἄλλας τοιαύτας ἔχει δυσχερείας· ὃν δὲ νῦν τρόπον ἔχει, ἐπικοσμηθὲν ἔθεσι καὶ τάξει νόμων ὀρθῶν, οὐ μικρὸν ἂν διενέγκαι. ἔξει γὰρ τὸ ἐξ ἀμφοτέρων ἀγαθόν· λέγω δὲ τὸ ἐξ ἀμφοτέρων τὸ ἐκ τοῦ κοινὰς εἶναι τὰς κτήσεις καὶ τὸ ἐκ τοῦ ἰδίας. δεῖ γὰρ πῶς μὲν εἶναι κοινὰς, ὅλως δ'

ιδίας. αἱ μὲν γὰρ ἐπιμέλειαι διηρημέναι τὰ ἐγκλήματα πρὸς ἀλλήλους οὐ ποιήσουσιν, μᾶλλον δ' ἐπιδώσουσιν ὡς πρὸς ἴδιον ἐκάστου προσεδρεύοντος· δι' ἀρετὴν δ' ἔσται πρὸς τὸ χρῆσθαι, κατὰ τὴν παροιμίαν, κοινὰ τὰ φίλων. ἔστι δὲ καὶ νῦν τὸν τρόπον τοῦτον ἐν ἐνίαις πόλεσιν οὕτως ὑπογεγραμμένον, ὡς οὐκ ὄν ἀδύνατον, καὶ μάλιστα ἐν ταῖς καλῶς οἰκουμέναις τὰ μὲν ἔστι τὰ δὲ γένοιτ' ἂν· ἰδίαν γὰρ ἕκαστος τὴν κτήσιν ἔχων τὰ μὲν χρήσιμα ποιεῖ τοῖς φίλοις, τοῖς δὲ χρῆται κοινοῖς, οἷον καὶ ἐν Λακεδαίμονι τοῖς τε δούλοις χρῶνται τοῖς ἀλλήλων ὡς εἰπεῖν ἰδίους, ἔτι δ' ἵπποις καὶ κυσίν, κἂν δεηθῶσιν ἐφοδίων, [ἐν] τοῖς ἀγροῖς κατὰ τὴν χώραν. φανερόν τοίνυν ὅτι βέλτιον εἶναι μὲν ιδίας τὰς κτήσεις, τῇ δὲ χρήσει ποιεῖν κοινὰς· ὅπως δὲ γίνονται τοιοῦτοι, τοῦ νομοθέτου τοῦτ' ἔργον ἰδίον ἐστίν. ἔτι δὲ καὶ πρὸς ἡδονὴν ἀμύθητον ὅσον διαφέρει τὸ νομίζειν ἰδίον τι. μὴ γὰρ οὐ μάτην τὴν πρὸς [1263b] αὐτὸν αὐτὸς ἔχει φιλίαν ἕκαστος, ἀλλ' ἔστι τοῦτο φυσικόν. τὸ δὲ φίλαυτον εἶναι ψέγεται δικαίως· οὐκ ἔστι δὲ τοῦτο τὸ φιλεῖν ἑαυτόν, ἀλλὰ τὸ μᾶλλον ἢ δεῖ φιλεῖν, καθάπερ καὶ τὸ φιλοχρήματον, ἐπεὶ φιλοῦσί γε πάντες ὡς εἰπεῖν ἕκαστον τῶν τοιούτων. ἀλλὰ μὴν καὶ τὸ χαρίσασθαι καὶ βοηθῆσαι φίλοις ἢ ξένοις ἢ ἐταίροις ἡδιστον· ὃ γίνεται τῆς κτήσεως ιδίας οὔσης. ταῦτά τε δὴ οὐ συμβαίνει τοῖς λίαν ἐν ποιοῦσι τὴν πόλιν, καὶ πρὸς τούτοις ἀναιροῦσιν ἔργα δυοῖν ἀρεταῖν φανερώς, σωφροσύνης μὲν τὸ περὶ τὰς γυναῖκας (ἔργον γὰρ καλὸν ἀλλοτρίας οὔσης ἀπέχεσθαι διὰ σωφροσύνην), ἐλευθεριότητος δὲ τὸ περὶ τὰς κτήσεις· οὔτε γὰρ ἔσται φανερός ἐλευθέριος ὢν, οὔτε πράξει πρᾶξιν ἐλευθέριον οὐδεμίαν· ἐν τῇ γὰρ χρήσει τῶν κτημάτων τὸ τῆς ἐλευθεριότητος ἔργον ἐστίν.

εὐπρόσωπος μὲν οὖν ἡ τοιαύτη νομοθεσία καὶ φιλόανθρωπος ἂν εἶναι δόξειεν· ὁ γὰρ ἀκροώμενος ἄσμενος ἀποδέχεται, νομίζων ἔσεσθαι φιλίαν τινὰ θαυμαστὴν πᾶσι πρὸς ἅπαντας, ἄλλως τε καὶ ὅταν κατηγορῇ τις τῶν νῦν ὑπαρχόντων ἐν ταῖς πολιτείαις κακῶν ὡς γινομένων διὰ τὸ μὴ κοινὴν εἶναι τὴν οὐσίαν, λέγω δὲ δίκας τε πρὸς ἀλλήλους περὶ συμβολαίων καὶ ψευδομαρτυριῶν κρίσεις καὶ πλουσίων κολακείας· ὧν οὐδὲν γίνεται διὰ τὴν ἀκοινωνησίαν ἀλλὰ διὰ τὴν μοχθηρίαν, ἐπεὶ καὶ τοὺς κοινὰ κεκτημένους καὶ κοινωνοῦντας πολλῶ διαφερομένους μᾶλλον ὀρώμεν ἢ τοὺς χωρὶς τὰς οὐσίας ἔχοντας· ἀλλὰ θεωροῦμεν ὀλίγους τοὺς ἐκ τῶν κοινωνιῶν διαφερομένους, πρὸς πολλοὺς συμβάλλοντες τοὺς κεκτημένους ἰδίᾳ

τάς κτήσεις. ἔτι δὲ δίκαιον μὴ μόνον λέγειν ὅσων στερήσονται κακῶν κοινωνήσαντες, ἀλλὰ καὶ ὅσων ἀγαθῶν φαίνεται δ' εἶναι πάνπαν ἀδύνατος ὁ βίος.

αἴτιον δὲ τῷ Σωκράτει τῆς παρακρούσεως χρή νομίζειν τὴν ὑπόθεσιν οὐκ οὔσαν ὀρθήν. δεῖ μὲν γὰρ εἶναί πως μίαν καὶ τὴν οἰκίαν καὶ τὴν πόλιν, ἀλλ' οὐ πάντως. ἔστι μὲν γὰρ ὡς οὐκ ἔσται προϋούσα πόλις, ἔστι δ' ὡς ἔσται μὲν, ἐγγὺς δ' οὔσα τοῦ μὴ πόλις εἶναι χείρων πόλις, ὥσπερ κἂν εἴ τις τὴν συμφωνίαν ποιήσειεν ὁμοφωνίαν ἢ τὸν ῥυθμὸν βάσιν μίαν. ἀλλὰ δεῖ πληθος ὄν, ὥσπερ εἴρηται πρότερον, διὰ τὴν παιδείαν κοινὴν καὶ μίαν ποιεῖν· καὶ τόν γε μέλλοντα παιδείαν εἰσάγειν καὶ νομίζοντα διὰ ταύτης ἔσσεσθαι τὴν πόλιν σπουδαίαν ἄτοπον τοῖς τοιούτοις οἶεσθαι διορθοῦν, ἀλλὰ μὴ τοῖς ἔθεσι καὶ τῇ φιλοσοφίᾳ καὶ τοῖς νόμοις, ὥσπερ τὰ περὶ τὰς κτήσεις ἐν Λακεδαιμόνι καὶ Κρήτῃ τοῖς συσσιτίοις ὁ [1264a] νομοθέτης ἐκοίνωσε. δεῖ δὲ μὴδὲ τοῦτο αὐτὸ ἀγνοεῖν, ὅτι χρή προσέχειν τῷ πολλῷ χρόνῳ καὶ τοῖς πολλοῖς ἔτεσιν, ἐν οἷς οὐκ ἂν ἔλαθεν, εἰ ταῦτα καλῶς εἶχεν· πάντα γὰρ σχεδὸν εὑρηται μὲν, ἀλλὰ τὰ μὲν οὐ συνήκται, τοῖς δ' οὐ χρῶνται γινώσκοντες. μάλιστα δ' ἂν γένοιτο φανερόν εἴ τις τοῖς ἔργοις ἴδοι τὴν τοιαύτην πολιτείαν κατασκευαζομένην· οὐ γὰρ δυνήσεται μὴ μερίζων αὐτὰ καὶ χωρίζων ποιῆσαι τὴν πόλιν, τὰ μὲν εἰς συσσίτια τὰ δὲ εἰς φατρίας καὶ φυλάς. ὥστε οὐδὲν ἄλλο συμβήσεται νενομοθετημένον πλὴν μὴ γεωργεῖν τοὺς φύλακας· ὅπερ καὶ νῦν Λακεδαιμόνιοι ποιεῖν ἐπιχειροῦσιν.

οὐ μὴν ἀλλ' οὐδὲ ὁ τρόπος τῆς ὅλης πολιτείας τίς ἔσται τοῖς κοινωνοῦσιν, οὗτ' εἴρηκεν ὁ Σωκράτης οὔτε ῥάδιον εἰπεῖν. καίτοι σχεδὸν τό γε πληθος τῆς πόλεως τὸ τῶν ἄλλων πολιτῶν γίνεται πληθος, περὶ ὧν οὐδὲν διώρισται, πότερον καὶ τοῖς γεωργοῖς κοινὰς εἶναι δεῖ τὰς κτήσεις ἢ καθ' ἕκαστον ιδίας, ἔτι δὲ καὶ γυναῖκας καὶ παῖδας ιδίους ἢ κοινούς. εἰ μὲν γὰρ τὸν αὐτὸν τρόπον κοινὰ πάντα πάντων, τί διοίσουσιν οὗτοι ἐκείνων τῶν φυλάκων; ἢ τί πλεῖον τοῖς ὑπομένουσι τὴν ἀρχὴν αὐτῶν, ἢ τί μαθόντες ὑπομενοῦσι τὴν ἀρχήν, ἐὰν μὴ τι σοφίζονται τοιοῦτον οἷον Κρήτες; ἐκεῖνοι γὰρ τᾶλλα ταῦτα τοῖς δούλοις ἐφέντες μόνον ἀπειρήκασιν τὰ γυμνάσια καὶ τὴν τῶν ὅπλων κτήσιν. εἰ δέ, καθάπερ ἐν ταῖς ἄλλαις πόλεσι, καὶ παρ' ἐκείνοις ἔσται τὰ τοιαῦτα, τίς ὁ τρόπος ἔσται τῆς κοινωνίας; ἐν μιᾷ γὰρ πόλει δύο πόλεις ἀναγκαῖον εἶναι, καὶ ταύτας ὑπεναντίας ἀλλήλαις. ποιεῖ γὰρ τοὺς μὲν φύλακας οἷον φρουρούς, τοὺς δὲ

γεωργοὺς καὶ τοὺς τεχνίτας καὶ τοὺς ἄλλους πολίτας· ἐγκλήματα δὲ καὶ δίκαι, καὶ ὅσα ἄλλα ταῖς πόλεσιν ὑπάρχειν φησὶ κακά, πάνθ' ὑπάρξει καὶ τούτοις. καίτοι λέγει ὁ Σωκράτης ὡς οὐ πολλῶν δεῖσονται νομίμων διὰ τὴν παιδείαν, οἷον ἀστυνομικῶν καὶ ἀγορανομικῶν καὶ τῶν ἄλλων τῶν τοιούτων, ἀποδιδούς μόνον τὴν παιδείαν τοῖς φύλαξιν. ἔτι δὲ κυρίους ποιεῖ τῶν κτημάτων τοὺς γεωργοὺς <τοὺς> ἀποφορὰν φέροντας· ἀλλὰ πολὺ μᾶλλον εἰκὸς εἶναι χαλεποὺς καὶ φρονημάτων πλήρεις, ἢ τὰς παρ' ἐνίοις εἰλωτείας τε καὶ πενεστείας καὶ δουλείας. ἀλλὰ γὰρ εἴτ' ἀναγκαῖα ταῦθ' ὁμοίως εἴτε μὴ, νῦν γε οὐδὲν διώρισταί. καὶ περὶ τῶν ἐχομένων τίς ἢ τούτων τε πολιτεία καὶ παιδεία καὶ νόμοι τίνες. ἔστι δ' οὐθ' εὐρεῖν ῥάδιον, οὔτε τὸ διαφέρον μικρὸν τὸ ποιούς τινας εἶναι τούτους πρὸς τὸ σφύζεσθαι τὴν τῶν φυλάκων κοινωνίαν. ἀλλὰ [1264b] μὴν εἴ γε τὰς μὲν γυναῖκας ποιήσει κοινὰς τὰς δὲ κτήσεις ἰδίας, τίς οἰκονομήσει ὥσπερ τὰ ἐπὶ τῶν ἀγρῶν οἱ ἄνδρες αὐτῶν - κὰν εἰ κοινὰ αἱ κτήσεις καὶ αἱ τῶν γεωργῶν γυναῖκες; ἄτοπον δὲ καὶ τὸ ἐκ τῶν θηρίων ποιεῖσθαι τὴν παραβολήν, ὅτι δεῖ τὰ αὐτὰ ἐπιτηδεύειν τὰς γυναῖκας τοῖς ἀνδράσιν, οἷς οἰκονομίας οὐδὲν μέτεστιν.

ἐπισφαλὲς δὲ καὶ τοὺς ἄρχοντας ὡς καθίστησιν ὁ Σωκράτης. αἰεὶ γὰρ ποιεῖ τοὺς αὐτοὺς ἄρχοντας· τοῦτο δὲ στάσεως αἴτιον γίνεται καὶ παρὰ τοῖς μηδὲν ἀξίωμα κεκτημένοις, ἧ̃ που δῆθεν παρὰ γε θυμοειδέσι καὶ πολεμικοῖς ἀνδράσιν. ὅτι δ' ἀναγκαῖον αὐτῷ ποιεῖν τοὺς αὐτοὺς ἄρχοντας, φανερόν· οὐ γὰρ ὅτε μὲν ἄλλοις ὅτε δὲ ἄλλοις μέμικται ταῖς ψυχαῖς ὁ παρὰ τοῦ θεοῦ χρυσός, ἀλλ' αἰεὶ τοῖς αὐτοῖς. φησὶ δὲ τοῖς μὲν εὐθὺς γινομένοις μεῖζαι χρυσόν, τοῖς δ' ἄργυρον, χαλκὸν δὲ καὶ σίδηρον τοῖς τεχνίταις μέλλουσιν ἔσσεσθαι καὶ γεωργοῖς. ἔτι δὲ καὶ τὴν εὐδαιμονίαν ἀφαιρούμενος τῶν φυλάκων, ὅλην φησὶ δεῖν εὐδαιμόνα ποιεῖν τὴν πόλιν τὸν νομοθέτην. ἀδύνατον δὲ εὐδαιμονεῖν ὅλην, μὴ πάντων ἢ μὴ τῶν πλείστων μερῶν ἢ τινῶν ἐχόντων τὴν εὐδαιμονίαν. οὐ γὰρ τῶν αὐτῶν τὸ εὐδαιμονεῖν ὥνπερ τὸ ἄρτιον· τοῦτο μὲν γὰρ ἐνδέχεται τῷ ὄλῳ ὑπάρχειν, τῶν δὲ μερῶν μηδετέρῳ, τὸ δὲ εὐδαιμονεῖν ἀδύνατον. ἀλλὰ μὴν εἰ οἱ φύλακες μὴ εὐδαίμονες, τίνες ἕτεροι; οὐ γὰρ δὴ οἷ γε τεχνῖται καὶ τὸ πλῆθος τὸ τῶν βαναύσων. ἢ μὲν οὖν πολιτεία περὶ ἧς ὁ Σωκράτης εἴρηκεν ταύτας τε τὰς ἀπορίας ἔχει καὶ τούτων οὐκ ἐλάττους ἑτέρας.

Σχεδὸν δὲ παραπλησίως καὶ τὰ περὶ τοὺς Νόμους ἔχει τοὺς ὕστερον γραφέντας, διὸ καὶ περὶ τῆς ἐνταῦθα πολιτείας

ἐπισκέψασθαι μικρὰ βέλτιον. καὶ γὰρ ἐν τῇ Πολιτείᾳ περὶ ὀλίγων
πάμπαν διώρικεν ὁ Σωκράτης, περὶ τε γυναικῶν καὶ τέκνων
κοινωνίας, πῶς ἔχειν δεῖ, καὶ περὶ κτήσεως, καὶ τῆς πολιτείας τὴν
τάξιν (διαίρεται γὰρ εἰς δύο μέρη τὸ πλῆθος τῶν οἰκούντων, τὸ μὲν
εἰς τοὺς γεωργοὺς, τὸ δὲ εἰς τὸ προπολεμοῦν μέρος· τρίτον δ' ἐκ
τούτων τὸ βουλευόμενον καὶ κύριον τῆς πόλεως), περὶ δὲ τῶν
γεωργῶν καὶ τῶν τεχνιτῶν, πότερον οὐδεμιᾶς μεθέξουσιν ἢ τινος
ἀρχῆς, καὶ πότερον ὄπλα δεῖ κεκτῆσθαι καὶ τούτους καὶ συμπολεμεῖν
ἢ μὴ, περὶ τούτων οὐδὲν διώρικεν ὁ Σωκράτης, ἀλλὰ τὰς μὲν
γυναῖκας οἶται δεῖν συμπολεμεῖν καὶ παιδείας μετέχειν τῆς αὐτῆς
τοῖς φύλαξιν, τὰ δ' ἄλλα τοῖς ἐξωθεν πεπλήρωκε τὸν λόγον καὶ περὶ
τῆς παιδείας, ποίαν τινὰ δεῖ γίνεσθαι [1265a] τῶν φυλάκων. τῶν δὲ
Νόμων τὸ μὲν πλεῖστον μέρος νόμοι τυγχάνουσιν ὄντες, ὀλίγα δὲ
περὶ τῆς πολιτείας εἴρηκεν, καὶ ταύτην βουλόμενος κοινοτέραν
ποιεῖν ταῖς πόλεσι κατὰ μικρὸν περιάγει πάλιν πρὸς τὴν ἑτέραν
πολιτείαν. ἔξω γὰρ τῆς τῶν γυναικῶν κοινωνίας καὶ τῆς κτήσεως, τὰ
ἄλλα ταῦτ' ἀποδίδωσιν ἀμφοτέραις ταῖς πολιτείαις· καὶ γὰρ παιδεῖαν
τὴν αὐτὴν, καὶ τὸ τῶν ἔργων τῶν ἀναγκαίων ἀπεχομένους ζῆν, καὶ
περὶ συσσιτίων ὡσαύτως· πλὴν ἐν ταύτῃ φησὶ δεῖν εἶναι συσσίτια
καὶ γυναικῶν, καὶ τὴν μὲν χιλίων τῶν ὄπλα κεκτημένων, ταύτην δὲ
πεντακισχιλίων.

τὸ μὲν οὖν περιττὸν ἔχουσι πάντες οἱ τοῦ Σωκράτους λόγοι καὶ
τὸ κομψὸν καὶ τὸ καινοτόμον καὶ τὸ ζητητικόν, καλῶς δὲ πάντα ἴσως
χαλεπόν, ἐπεὶ καὶ τὸ νῦν εἰρημένον πλῆθος δεῖ μὴ λανθάνειν ὅτι
χώρας δεήσει τοῖς τοσούτοις Βαβυλωνίας ἢ τινος ἄλλης ἀπεράντου
τὸ πλῆθος, ἐξ ἧς ἀργοὶ πεντακισχίλιοι θρέψονται, καὶ περὶ τούτους
γυναικῶν καὶ θεραπόντων ἕτερος ὄχλος πολλαπλάσιος. δεῖ μὲν οὖν
ὑποτίθεσθαι κατ' εὐχὴν, μηδὲν μέντοι ἀδύνατον. λέγεται δ' ὥς δεῖ
τὸν νομοθέτην πρὸς δύο βλέποντα τιθέναι τοὺς νόμους, πρὸς τε τὴν
χώραν καὶ τοὺς ἀνθρώπους. ἔτι δὲ καλῶς ἔχει προσθεῖναι καὶ πρὸς
τοὺς γειτνιῶντας τόπους, πρῶτον μὲν εἰ δεῖ τὴν πόλιν ζῆν βίον
πολιτικόν, μὴ μονωτικόν (οὐ γὰρ μόνον ἀναγκαῖόν ἐστιν αὐτὴν
τοιούτοις χρῆσθαι πρὸς τὸν πόλεμον ὅπλοις ἢ χρήσιμα κατὰ τὴν
οἰκείαν χώραν ἐστίν, ἀλλὰ καὶ πρὸς τοὺς ἔξω τόπους)· εἰ δέ τις μὴ
τοιούτον ἀποδέχεται βίον, μήτε τὸν ἴδιον μήτε τὸν κοινὸν τῆς
πόλεως, ὅμως οὐδὲν ἦττον δεῖ φοβεροὺς εἶναι τοῖς πολεμίοις, μὴ
μόνον ἐλθοῦσιν εἰς τὴν χώραν ἀλλὰ καὶ ἀπελθοῦσιν.

καὶ τὸ πλῆθος δὲ τῆς κτήσεως ὁρᾶν δεῖ, μὴ ποτε βέλτιον ἐτέρως διορίσαι τῷ σαφῶς μᾶλλον. τοσαύτην γὰρ εἶναι φησι δεῖν ὥστε ζῆν σωφρόνως, ὥσπερ ἂν εἴ τις εἶπεν ὥστε ζῆν εὖ. τοῦτο γάρ ἐστι καθόλου μᾶλλον. ἔτι δ' ἔστι σωφρόνως μὲν ταλαιπώρως δὲ ζῆν, ἀλλὰ βελτίων ὅρος τὸ σωφρόνως καὶ ἐλευθερίως (χωρὶς γὰρ ἑκατέρῳ τῷ μὲν τὸ τρυφᾶν ἀκολουθήσει, τῷ δὲ τὸ ἐπιπόνως), ἐπεὶ μόναι γ' εἰσὶν ἔξεις αἰρεταὶ περὶ τὴν τῆς οὐσίας χρῆσιν αὐται, οἷον οὐσία πράως μὲν ἢ ἀνδρείως χρῆσθαι οὐκ ἔστιν, σωφρόνως δὲ καὶ ἐλευθερίως ἔστιν, ὥστε καὶ τὰς ἔξεις ἀναγκαῖον περὶ αὐτὴν εἶναι ταύτας. ἄτοπον δὲ καὶ τὸ τὰς κτήσεις ἰσάζοντα τὸ περὶ τὸ πλῆθος τῶν πολιτῶν μὴ κατασκευάζειν, ἀλλ' ἀφεῖναι τὴν τεκνοποιίαν ἀόριστον ὡς ἱκανῶς ἀνομαλισθησομένην εἰς τὸ αὐτὸ πλῆθος διὰ τὰς ἀτεκνίας ὁσωνοῦν γεννωμένων, [1265b] ὅτι δοκεῖ τοῦτο καὶ νῦν συμβαίνειν περὶ τὰς πόλεις. δεῖ δὲ τοῦτ' οὐχ ὁμοίως ἀκριβῶς ἔχειν περὶ τὰς πόλεις τότε καὶ νῦν· νῦν γὰρ οὐδεὶς ἀπορεῖ, διὰ τὸ μερίζεσθαι τὰς οὐσίας εἰς ὅποσονοῦν πλῆθος, τότε δὲ ἀδιαιρέτων οὐσῶν ἀνάγκη τοὺς παράζυγας μηδὲν ἔχειν, ἐάν τ' ἐλάττους ᾧσι τὸ πλῆθος ἐάν τε πλείους. μᾶλλον δὲ δεῖν ὑπολάβοι τις ἂν ὠρίσθαι τῆς οὐσίας τὴν τεκνοποιίαν, ὥστε ἀριθμοῦ τινὸς μὴ πλείονα γεννᾶν, τοῦτο δὲ τιθέναι τὸ πλῆθος ἀποβλέποντα πρὸς τὰς τύχας, ἂν συμβαίῃ τελευτᾶν τινὰς τῶν γεννηθέντων, καὶ πρὸς τὴν τῶν ἄλλων ἀτεκνίαν. τὸ δ' ἀφεῖσθαι, καθάπερ ἐν ταῖς πλείσταις πόλεσι, πενίας ἀναγκαῖον αἴτιον γίνεσθαι τοῖς πολίταις, ἡ δὲ πενία στάσιν ἐμποιεῖ καὶ κακουργίαν. Φείδων μὲν οὖν ὁ Κορίνθιος, ὦν νομοθέτης τῶν ἀρχαιοτάτων, τοὺς οἴκους ἴσους ᾤθη δεῖν διαμένειν καὶ τὸ πλῆθος τῶν πολιτῶν, καὶ εἰ τὸ πρῶτον τοὺς κλήρους ἀνίσους εἶχον πάντες κατὰ μέγεθος· ἐν δὲ τοῖς νόμοις τούτοις τοῦναντίον ἐστίν. ἀλλὰ περὶ μὲν τούτων πῶς οἴομεθα βέλτιον ἂν ἔχειν, λεκτέον ὕστερον· ἐλλέλειπται δ' ἐν τοῖς νόμοις τούτοις καὶ τὰ περὶ τοὺς ἄρχοντας πῶς ἔσσονται διαφέροντες τῶν ἀρχομένων. φησὶ γὰρ δεῖν, ὥσπερ ἐξ ἐτέρου τὸ στημόνιον ἐρίου γίνεται τῆς κρόκης, οὕτω καὶ τοὺς ἄρχοντας ἔχειν δεῖν πρὸς τοὺς ἀρχομένους. ἐπεὶ δὲ τὴν πᾶσαν οὐσίαν ἐφήσι γίνεσθαι μείζονα μέχρι πενταπλασίας, διὰ τί τοῦτ' οὐκ ἂν εἴη ἐπὶ τῆς γῆς μέχρι τινός; καὶ τὴν τῶν οἰκοπέδων δὲ διαίρεσιν δεῖ σκοπεῖν, μὴ ποτ' οὐ συμφέρει πρὸς οἰκονομίαν· δύο γὰρ οἰκόπεδα ἐκάστῳ ἔνειμε διελὼν χωρὶς, χαλεπὸν δὲ οἰκίας δύο οἰκεῖν.

ἡ δὲ σύνταξις ὅλη βούλεται μὲν εἶναι μήτε δημοκρατία μήτε

ὀλιγαρχία, μέση δὲ τούτων, ἦν καλοῦσι πολιτείαν· ἐκ γὰρ τῶν ὀπλιτευόντων ἐστίν. εἰ μὲν οὖν ὥς κοινοτάτην ταύτην κατασκευάζει ταῖς πόλεσι τῶν ἄλλων πολιτειῶν, καλῶς εἴρηκεν ἴσως· εἰ δ' ὥς ἀρίστην μετὰ τὴν πρώτην πολιτείαν, οὐ καλῶς. τάχα γὰρ τὴν τῶν Λακωνῶν ἂν τις ἐπαινέσειε μᾶλλον, ἢ κὰν ἄλλην τινὰ ἀριστοκρατικωτέραν. ἔνιοι μὲν οὖν λέγουσιν ὥς δεῖ τὴν ἀρίστην πολιτείαν ἐξ ἀπασῶν εἶναι τῶν πολιτειῶν μεμειγμένην, διὸ καὶ τὴν τῶν Λακεδαιμονίων ἐπαινοῦσιν (εἶναι γὰρ αὐτὴν οἱ μὲν ἐξ ὀλιγαρχίας καὶ μοναρχίας καὶ δημοκρατίας φασίν, λέγοντες τὴν μὲν βασιλείαν μοναρχίαν, τὴν δὲ τῶν γερόντων ἀρχὴν ὀλιγαρχίαν, δημοκρατεῖσθαι δὲ κατὰ τὴν τῶν ἐφόρων ἀρχὴν διὰ τὸ ἐκ τοῦ δήμου εἶναι τοὺς ἐφόρους· οἱ δὲ τὴν μὲν ἐφορείαν εἶναι τυραννίδα, δημοκρατεῖσθαι δὲ κατὰ τε τὰ συσσίτια καὶ τὸν ἄλλον βίον τὸν [1266a] καθ' ἡμέραν)· ἐν δὲ τοῖς νόμοις εἴρηται τούτοις ὥς δέον συγκεῖσθαι τὴν ἀρίστην πολιτείαν ἐκ δημοκρατίας καὶ τυραννίδος, ἃς ἢ τὸ παράπαν οὐκ ἂν τις θεῖη πολιτείας ἢ χειρίστας πασῶν. βέλτιον οὖν λέγουσιν οἱ πλείους μιγνύντες· ἡ γὰρ ἐκ πλειόνων συγκειμένη πολιτεία βελτίων. ἔπειτ' οὐδ' ἔχουσα φαίνεται μοναρχικὸν οὐδέν, ἀλλ' ὀλιγαρχικὰ καὶ δημοκρατικά· μᾶλλον δ' ἐγκλίνειν βούλεται πρὸς τὴν ὀλιγαρχίαν. δῆλον δὲ ἐκ τῆς τῶν ἀρχόντων καταστάσεως· τὸ μὲν γὰρ ἐξ αἰρετῶν κληρωτοὺς κοινὸν ἀμφοῖν, τὸ δὲ τοῖς μὲν εὐπορωτέροις ἐπάναγκες ἐκκλησιάζειν εἶναι καὶ φέρειν ἄρχοντας ἢ τι ποιεῖν ἄλλο τῶν πολιτικῶν, τοὺς δ' ἀφεῖσθαι, τοῦτο δ' ὀλιγαρχικόν, καὶ τὸ πειρᾶσθαι πλείους ἐκ τῶν εὐπόρων εἶναι τοὺς ἄρχοντας, καὶ τὰς μεγίστας ἐκ τῶν μεγίστων τιμημάτων. ὀλιγαρχικὴν δὲ ποιεῖ καὶ τὴν τῆς βουλῆς αἵρεσιν. αἰροῦνται μὲν γὰρ πάντες ἐπάναγκες ἄλλ' ἐκ τοῦ πρώτου τιμήματος, εἴτα πάλιν ἴσους ἐκ τοῦ δευτέρου· εἴτ' ἐκ τῶν τρίτων, πλὴν οὐ πᾶσιν ἐπάναγκες ἦν τοῖς ἐκ τῶν τρίτων ἢ τετάρτων, ἐκ δὲ [τοῦ τετάρτου] τῶν τετάρτων μόνοις ἐπάναγκες τοῖς πρώτοις καὶ τοῖς δευτέροις· εἴτ' ἐκ τούτων ἴσον ἀφ' ἐκάστου τιμήματος ἀποδειξάι φησι δεῖν ἀριθμόν. ἔσονται δὴ πλείους οἱ ἐκ τῶν μεγίστων τιμημάτων καὶ βελτίους διὰ τὸ ἐνίους μὴ αἰρεῖσθαι τῶν δημοτικῶν διὰ τὸ μὴ ἐπάναγκες. ὥς μὲν οὖν οὐκ ἐκ δημοκρατίας καὶ μοναρχίας δεῖ συνιστάναι τὴν τοιαύτην πολιτείαν, ἐκ τούτων φανερόν καὶ τῶν ὕστερον ῥηθησομένων, ὅταν ἐπιβάλλῃ περὶ τῆς τοιαύτης πολιτείας ἡ σκέψις· ἔχει δὲ καὶ περὶ τὴν αἵρεσιν τῶν ἀρχόντων τὸ ἐξ αἰρετῶν αἰρετοὺς ἐπικίνδυνον. εἰ γάρ

τινες συστήναι θέλουσι καὶ μέτριοι τὸ πλῆθος, αἰεὶ κατὰ τὴν τούτων αἰρεθήσονται βούλησιν. τὰ μὲν οὖν περὶ τὴν πολιτείαν τὴν ἐν τοῖς Νόμοις τοῦτον ἔχει τὸν τρόπον.

Εἰσὶ δὲ τινες πολιτεῖαι καὶ ἄλλαι, αἱ μὲν ιδιωτῶν αἱ δὲ φιλοσόφων καὶ πολιτικῶν, πᾶσαι δὲ τῶν καθεστηκυῶν καὶ καθ' ἃς πολιτεύονται νῦν ἐγγύτερόν εἰσι τούτων ἀμφοτέρων. οὐδεὶς γὰρ οὔτε τὴν περὶ τὰ τέκνα κοινότητα καὶ τὰς γυναῖκας ἄλλος κεκαινοτόμηκεν, οὔτε περὶ τὰ συσσίτια τῶν γυναικῶν, ἀλλ' ἀπὸ τῶν ἀναγκαίων ἄρχονται μᾶλλον. δοκεῖ γάρ τισι τὸ περὶ τὰς οὐσίας εἶναι μέγιστον τετάχθαι καλῶς· περὶ γὰρ τούτων ποιεῖσθαι φασι τὰς στάσεις πάντας. διὸ Φαλέας ὁ Χαλκηδόνιος τοῦτ' εἰσήνεγκε πρῶτος· φησὶ γὰρ δεῖν ἴσας εἶναι τὰς κτήσεις τῶν πολιτῶν. τοῦτο [1266b] δὲ κατοικιζομέναις μὲν εὐθὺς οὐ χαλεπὸν ᾤετο ποιεῖν, τὰς δ' ἤδη κατοικουμένας ἐργωδέστερον μὲν, ὅμως δὲ τάχιστ' ἂν ὁμαλισθῆναι τῷ τὰς προῖκας τοὺς μὲν πλουσίους διδόναι μὲν λαμβάνειν δὲ μή, τοὺς δὲ πένητας μὴ διδόναι μὲν λαμβάνειν δέ. Πλάτων δὲ τοὺς Νόμους γράφων μέχρι μὲν τινος ᾤετο δεῖν ἔαν, πλεῖον δὲ τοῦ πενταπλασίαν εἶναι τῆς ἐλαχίστης μηδενὶ τῶν πολιτῶν ἐξουσίαν εἶναι κτήσασθαι, καθάπερ εἴρηται καὶ πρότερον. δεῖ δὲ μηδὲ τοῦτο λανθάνειν τοὺς οὕτω νομοθετοῦντας, ὃ λανθάνει νῦν, ὅτι τὸ τῆς οὐσίας τάττοντας πλῆθος προσήκει καὶ τῶν τέκνων τὸ πλῆθος τάττειν· ἐὰν γὰρ ὑπεραίρη τῆς οὐσίας τὸ μέγεθος ὁ τῶν τέκνων ἀριθμὸς, ἀνάγκη τὸν γε νόμον λύεσθαι, καὶ χωρὶς τῆς λύσεως φαῦλον τὸ πολλοὺς ἐκ πλουσιῶν γίνεσθαι πένητας· ἔργον γὰρ μὴ νεωτεροποιοὺς εἶναι τοὺς τοιούτους. διότι μὲν οὖν ἔχει τινὰ δύναμιν εἰς τὴν πολιτικὴν κοινωνίαν ἢ τῆς οὐσίας ὁμαλότης, καὶ τῶν πάλαι τινὲς φαίνονται διεγνωκότες, οἷον καὶ Σόλων ἐνομοθέτησεν, καὶ παρ' ἄλλοις ἔστι νόμος ὃς κωλύει κτᾶσθαι γῆν ὀπόσῃν ἂν βούληταί τις, ὁμοίως δὲ καὶ τὴν οὐσίαν πωλεῖν οἱ νόμοι κωλύουσιν, ὥσπερ ἐν Λοκροῖς νόμος ἐστὶ μὴ πωλεῖν ἐὰν μὴ φανεράν ἀτυχίαν δείξῃ συμβεβηκυῖαν, ἔτι δὲ τοὺς παλαιοὺς κλήρους διασφάζειν (τοῦτο δὲ λυθὲν καὶ περὶ Λευκάδα δημοτικὴν ἐποίησε λίαν τὴν πολιτείαν αὐτῶν· οὐ γὰρ ἔτι συνέβαινεν ἀπὸ τῶν ὠρισμένων τιμημάτων εἰς τὰς ἀρχὰς βαδίζειν)· ἀλλ' ἔστι τὴν ἰσότητά μὲν ὑπάρχειν τῆς οὐσίας, ταύτην δ' ἢ λίαν εἶναι πολλήν, ὥστε τρυφᾶν, ἢ λίαν ὀλίγην, ὥστε ζῆν γλίσχρως. δῆλον οὖν ὡς οὐχ ἱκανὸν τὸ τὰς οὐσίας ἴσας ποιῆσαι τὸν νομοθέτην, ἀλλὰ τοῦ μέσου στοχαστέον. ἔτι δ' εἴ τις καὶ τὴν μετρίαν

τάξειεν οὐσίαν πᾶσιν, οὐδὲν ὄφελος· μᾶλλον γὰρ δεῖ τὰς ἐπιθυμίας ὀμαλίζειν ἢ τὰς οὐσίας, τοῦτο δ' οὐκ ἔστι μὴ παιδευομένοις ἱκανῶς ὑπὸ τῶν νόμων. ἀλλ' ἴσως ἂν εἴπειεν ὁ Φαλέας ὅτι ταῦτα τυγχάνει λέγων αὐτός· οἶται γὰρ δυοῖν τούτοις ἰσότητα δεῖν ὑπάρχειν ταῖς πόλεσιν, κτήσεως καὶ παιδείας. ἀλλὰ τὴν τε παιδείαν ἣτις ἔσται δεῖ λέγειν, καὶ τὸ μίαν εἶναι καὶ τὴν αὐτὴν οὐδὲν ὄφελος· ἔστι γὰρ τὴν αὐτὴν μὲν εἶναι καὶ μίαν, ἀλλὰ ταύτην εἶναι τοιαύτην ἐξ ἧς ἔσονται προαιρετικοὶ τοῦ πλεονεκτεῖν ἢ χρημάτων ἢ τιμῆς ἢ συναμφοτέρων.

ἔτι στασιάζουσιν οὐ μόνον διὰ τὴν ἀνισότητά της κτήσεως, ἀλλὰ καὶ διὰ τὴν τῶν τιμῶν, τὸνναντίον δὲ περὶ ἐκάτερον· οἱ μὲν γὰρ πολλοὶ διὰ τὸ περὶ τὰς κτήσεις ἄνισον, [1267a] οἱ δὲ χαρίεντες περὶ τῶν τιμῶν, ἐὰν ἴσαι· ὅθεν καὶ “ἐν δὲ ἡ τιμῇ ἡμὲν κακὸς ἡδὲ καὶ ἐσθλός”. οὐ μόνον δ' οἱ ἄνθρωποι διὰ τὰναγκαῖα ἀδικοῦσιν, ὣν ἅκος εἶναι νομίζει τὴν ἰσότητά της οὐσίας, ὥστε μὴ λωποδυτεῖν διὰ τὸ ῥιγοῦν ἢ πεινῆν, ἀλλὰ καὶ ὅπως χαίρωσι καὶ μὴ ἐπιθυμῶσιν· ἐὰν γὰρ μείζω ἔχωσιν ἐπιθυμίαν τῶν ἀναγκαίων, διὰ τὴν ταύτης ἰατρειάν ἀδικήσουσιν· οὐ τοίνυν διὰ ταύτην μόνον, ἀλλὰ καὶ ἄνευ ἐπιθυμιῶν, ἵνα χαίρωσι ταῖς ἄνευ λυπῶν ἡδοναῖς. τί οὖν ἅκος τῶν τριῶν τούτων; τοῖς μὲν οὐσία βραχεῖα καὶ ἐργασία, τοῖς δὲ σωφροσύνη· τρίτον δ', εἴ τινες βούλονται δι' αὐτῶν χαίρειν, οὐκ ἂν ἐπιζητοῖεν εἰ μὴ παρὰ φιλοσοφίας ἅκος. αἱ γὰρ ἄλλαι ἀνθρώπων δέονται· ἐπεὶ ἀδικουσί γε τὰ μέγιστα διὰ τὰς ὑπερβολάς, ἀλλ' οὐ διὰ τὰ ἀναγκαῖα (οἷον τυραννοῦσιν οὐχ ἵνα μὴ ῥιγῶσιν· διὸ καὶ αἱ τιμαὶ μεγάλαί, ἂν ἀποκτείνῃ τις οὐ κλέπτῃν ἀλλὰ τύραννον)· ὥστε πρὸς τὰς μικρὰς ἀδικίας βοηθητικὸς μόνον ὁ τρόπος τῆς Φαλέου πολιτείας. ἔτι τὰ πολλὰ βούλεται κατασκευάζειν ἐξ ὧν τὰ πρὸς αὐτοὺς πολιτεύονται καλῶς, δεῖ δὲ καὶ πρὸς τοὺς γεινιῶντας καὶ τοὺς ἔξωθεν πάντας. ἀναγκαῖον ἄρα τὴν πολιτείαν συντετάχθαι πρὸς τὴν πολεμικὴν ἰσχύν, περὶ ἧς ἐκεῖνος οὐδὲν εἶρηκεν. ὁμοίως δὲ καὶ περὶ τῆς κτήσεως. δεῖ γὰρ οὐ μόνον πρὸς τὰς πολιτικὰς χρήσεις ἱκανὴν ὑπάρχειν, ἀλλὰ καὶ πρὸς τοὺς ἔξωθεν κινδύνους· διόπερ οὔτε τοσοῦτον δεῖ πλῆθος ὑπάρχειν ὅσου οἱ πλησίον καὶ κρείττους ἐπιθυμήσουσιν, οἱ δὲ ἔχοντες ἀμύνειν οὐ δυνήσονται τοὺς ἐπιόντας, οὔθ' οὔτως ὀλίγην ὥστε μὴ δύνασθαι πόλεμον ὑπενεγκεῖν μηδὲ τῶν ἴσων καὶ τῶν ὁμοίων. ἐκεῖνος μὲν οὖν οὐδὲν διώρικεν, δεῖ δὲ τοῦτο μὴ λανθάνειν, ὅ τι συμφέρει πλῆθος οὐσίας. ἴσως οὖν ἄριστος ὅρος τὸ μὴ λυσιτελεῖν τοῖς κρείττοσι διὰ τὴν ὑπερβολὴν πολεμεῖν, ἀλλ' οὔτως

ὥς ἂν καὶ μὴ ἐχόντων τοσαύτην οὐσίαν. οἷον Εὐβουλος Αὐτοφραδάτου μέλλοντος Ἀταρνέα πολιορκεῖν ἐκέλευσεν αὐτόν, σκεψάμενον ἐν πόσῳ χρόνῳ λήψεται τὸ χωρίον, λογίσασθαι τοῦ χρόνου τούτου τὴν δαπάνην· ἐθέλειν γὰρ ἔλαττον τούτου λαβὼν ἐκλιπεῖν ἤδη τὸν Ἀταρνέα· ταῦτα δ' εἰπὼν ἐποίησε τὸν Αὐτοφραδάτην σύννουν γενόμενον παύσασθαι τῆς πολιορκίας.

ἔστι μὲν οὖν τι τῶν συμφερόντων τὸ τὰς οὐσίας ἴσας εἶναι τοῖς πολίταις πρὸς τὸ μὴ στασιάζειν πρὸς ἀλλήλους, οὐ μὴν μέγα οὐδὲν ὥς εἰπεῖν. καὶ γὰρ [ἂν] οἱ χαρίεντες ἀγανακτοῖεν ἂν ὥς οὐκ ἴσων ὄντες ἄξιοι, διὸ καὶ φαίνονται πολλάκις ἐπιτιθέμενοι καὶ στασιάζοντες· ἔτι δ' [1267b] ἡ πονηρία τῶν ἀνθρώπων ἄπληστον, καὶ τὸ πρῶτον μὲν ἱκανὸν διωβελία μόνον, ὅταν δ' ἤδη τοῦτ' ἦ πάτριον, αἰεὶ δέονται τοῦ πλείονος, ἕως εἰς ἄπειρον ἔλθωσιν. ἄπειρος γὰρ ἡ τῆς ἐπιθυμίας φύσις, ἥς πρὸς τὴν ἀναπλήρωσιν οἱ πολλοὶ ζῶσιν. τῶν οὖν τοιούτων ἀρχή, μᾶλλον τοῦ τὰς οὐσίας ὁμαλίζειν, τὸ τοὺς μὲν ἐπιεικεῖς τῇ φύσει τοιούτους παρασκευάζειν ὥστε μὴ βούλεσθαι πλεονεκτεῖν, τοὺς δὲ φαύλους ὥστε μὴ δύνασθαι· τοῦτο δ' ἐστίν, ἂν ἦττους τε ᾧσι καὶ μὴ ἀδικῶνται. οὐ καλῶς δὲ οὐδὲ τὴν ἰσότητά τῆς οὐσίας εἴρηκεν. περὶ γὰρ τὴν τῆς γῆς κτῆσιν ἰσάζει μόνον, ἔστι δὲ καὶ δούλων καὶ βοσκημάτων πλοῦτος καὶ νομίσματος, καὶ κατασκευὴ πολλὴ τῶν καλουμένων ἐπίπλων· ἡ πάντων οὖν τούτων ἰσότητά ζητητέον ἢ τάξιν τινὰ μετρίαν, ἢ πάντα ἐατέον. φαίνεται δ' ἐκ τῆς νομοθεσίας κατασκευάζων τὴν πόλιν μικράν, εἴ γ' οἱ τεχνῖται πάντες δημόσιοι ἔσονται καὶ μὴ πλήρωμά τι παρέξονται τῆς πόλεως. ἀλλ' εἶπερ δεῖ δημοσίους εἶναι τοὺς τὰ κοινὰ ἐργαζομένους, δεῖ (καθάπερ ἐν Ἐπιδάμνῳ τε, καὶ Διόφαντός ποτε κατεσκεύαζεν Ἀθήνησι) τοῦτον ἔχειν τὸν τρόπον. περὶ μὲν οὖν τῆς Φαλέου πολιτείας σχεδὸν ἐκ τούτων ἂν τις θεωρήσειεν, εἴ τι τυγχάνει καλῶς εἰρηκῶς ἢ μὴ καλῶς.

Ἰππόδαμος δὲ Εὐρυφῶντος Μιλήσιος (ὃς καὶ τὴν τῶν πόλεων διαίρεσιν εὗρε καὶ τὸν Πειραιᾶ κατέτεμεν, γενόμενος καὶ περὶ τὸν ἄλλον βίον περιττότερος διὰ φιλοτιμίαν οὕτως ὥστε δοκεῖν ἐνίοις ζῆν περιεργότερον τριχῶν τε πλήθει καὶ κόσμῳ πολυτελεῖ, ἔτι δὲ ἐσθῆτος εὐτελοῦς μὲν Ἀλεεινῆς δέ, οὐκ ἐν τῷ χειμῶνι μόνον ἀλλὰ καὶ περὶ τοὺς θερινοὺς χρόνους, λόγιος δὲ καὶ περὶ τὴν ὅλην φύσιν εἶναι βουλόμενος) πρῶτος τῶν μὴ πολιτευομένων ἐνεχείρησέ τι περὶ πολιτείας εἰπεῖν τῆς ἀρίστης. κατεσκεύαζε δὲ τὴν πόλιν τῷ πλήθει

μὲν μυριάνδρον, εἰς τρία δὲ μέρη διηρημένην· ἐποίει γὰρ ἓν μὲν μέρος τεχνίτας, ἓν δὲ γεωργούς, τρίτον δὲ τὸ προπολεμοῦν καὶ τὰ ὄπλα ἔχον. διήρει δ' εἰς τρία μέρη τὴν χώραν, τὴν μὲν ἱεράν τὴν δὲ δημοσίαν τὴν δ' ἰδίαν· ὅθεν μὲν τὰ νομιζόμενα ποιήσουσι πρὸς τοὺς θεούς, ἱεράν, ἀφ' ὧν δ' οἱ προπολεμοῦντες βιώσονται, κοινήν, τὴν δὲ τῶν γεωργῶν ἰδίαν. ὤφετο δ' εἶδη καὶ τῶν νόμων εἶναι τρία μόνον· περὶ ὧν γὰρ αἱ δίκαι γίνονται, τρία ταῦτ' εἶναι τὸν ἀριθμόν, ὕβριν βλάβην θάνατον. ἐνομοθέτει δὲ καὶ δικαστήριον ἓν τὸ κύριον, εἰς ὃ πάσας ἀνάγεσθαι δεῖν τὰς μὴ καλῶς κεκρίσθαι δοκούσας δίκας· τοῦτο δὲ κατεσκευάζεν ἐκ τινῶν γερόντων [1268a] αἰρετῶν. τὰς δὲ κρίσεις ἐν τοῖς δικαστηρίοις οὐ διὰ ψηφοφορίας ὤφετο γίνεσθαι δεῖν, ἀλλὰ φέρειν ἕκαστον πινάκιον, ἐν ᾧ γράφειν, εἰ καταδικάζοι ἀπλῶς, τὴν δίκην, εἰ δ' ἀπολύοι ἀπλῶς, κενόν, εἰ δὲ τὸ μὲν τὸ δὲ μὴ, τοῦτο διορίζειν. νῦν γὰρ οὐκ ὤφετο νενομοθετῆσθαι καλῶς· ἀναγκάζειν γὰρ ἐπιορκεῖν ἢ ταῦτα ἢ ταῦτα δικάζοντας. ἔτι δὲ νόμον ἐτίθει περὶ τῶν εὕρισκόντων τι τῇ πόλει συμφέρον, ὅπως τυγχάνωσι τιμῆς, καὶ τοῖς παισὶ τῶν ἐν τῷ πολέμῳ τελευτώντων ἐκ δημοσίου γίνεσθαι τὴν τροφήν, ὥς οὐπω τοῦτο παρ' ἄλλοις νενομοθετημένον (ἔστι δὲ καὶ ἐν Ἀθήναις οὗτος ὁ νόμος νῦν καὶ ἐν ἑτέραις τῶν πόλεων)· τοὺς δ' ἄρχοντας αἰρετοὺς ὑπὸ τοῦ δήμου εἶναι πάντας. δῆμον δ' ἐποίει τὰ τρία μέρη τῆς πόλεως· τοὺς δ' αἰρεθέντας ἐπιμελεῖσθαι κοινῶν καὶ ξενικῶν καὶ ὀρφανικῶν.

τὰ μὲν οὖν πλεῖστα καὶ τὰ μάλιστα ἀξιόλογα τῆς Ἱπποδάμου τάξεως ταῦτ' ἐστίν· ἀπορήσειε δ' ἂν τις πρῶτον μὲν τὴν διαίρεσιν τοῦ πλήθους τῶν πολιτῶν. οἳ τε γὰρ τεχνῖται καὶ οἱ γεωργοὶ καὶ οἱ τὰ ὄπλα ἔχοντες κοινωνοῦσι τῆς πολιτείας πάντες, οἱ μὲν γεωργοὶ οὐκ ἔχοντες ὄπλα, οἱ δὲ τεχνῖται οὔτε γῆν οὔτε ὄπλα, ὥστε γίνονται σχεδὸν δοῦλοι τῶν τὰ ὄπλα κεκτημένων. μετέχειν μὲν οὖν πασῶν τῶν τιμῶν ἀδύνατον (ἀνάγκη γὰρ ἐκ τῶν τὰ ὄπλα ἐχόντων καθίστασθαι καὶ στρατηγούς καὶ πολιτοφύλακας καὶ τὰς κυριωτάτας ἀρχὰς ὥς εἰπεῖν)· μὴ μετέχοντας δὲ τῆς πολιτείας πῶς οἷόν τε φιλικῶς ἔχειν πρὸς τὴν πολιτείαν; “ἀλλὰ δεῖ καὶ κρείττους εἶναι τοὺς τὰ ὄπλα γε κεκτημένους ἀμφοτέρων τῶν μερῶν”. τοῦτο δ' οὐ ράδιον μὴ πολλοὺς ὄντας· εἰ δὲ τοῦτ' ἔσται, τί δεῖ τοὺς ἄλλους μετέχειν τῆς πολιτείας καὶ κυρίου εἶναι τῆς τῶν ἀρχόντων καταστάσεως; ἔτι οἱ γεωργοὶ τί χρήσιμοι τῇ πόλει; τεχνίτας μὲν γὰρ ἀναγκαῖον εἶναι (πᾶσα γὰρ δεῖται πόλις τεχνιτῶν), καὶ δύνανται διαγίγνεσθαι

καθάπερ ἐν ταῖς ἄλλαις πόλεσιν ἀπὸ τῆς τέχνης· οἱ δὲ γεωργοὶ πορίζοντες μὲν τοῖς τὰ ὄπλα κεκτημένοις τὴν τροφὴν εὐλόγως ἂν ἦσαν τι τῆς πόλεως μέρος, νῦν δ' ἰδίαν ἔχουσιν καὶ ταύτην ἰδίᾳ γεωργήσουσιν. ἔτι δὲ τὴν κοινὴν, ἀφ' ἧς οἱ προπολεμοῦντες ἔξουσιν τὴν τροφὴν, εἰ μὲν αὐτοὶ γεωργήσουσιν, οὐκ ἂν εἴη τὸ μάχιμον ἕτερον καὶ τὸ γεωργοῦν, βούλεται δ' ὁ νομοθέτης· εἰ δ' ἕτεροὶ τινες ἔσονται τῶν τε τὰ ἴδια γεωγρούντων καὶ τῶν μαχίμων, τέταρτον αὖ μόνιον ἔσται τοῦτο τῆς πόλεως, οὐδενὸς μετέχον, ἀλλὰ ἀλλότριον τῆς πολιτείας· ἀλλὰ μὴν εἰ τις τοὺς αὐτοὺς θήσῃ τοὺς τε τὴν ἰδίαν καὶ τοὺς τὴν κοινὴν γεωγροῦντας, τό τε πλῆθος ἄπορον ἔσται τῶν καρπῶν ἐξ ὧν [1268b] ἕκαστος γεωργήσῃ δύο οἰκίας, καὶ τίνος ἔνεκεν οὐκ εὐθὺς ἀπὸ τῆς «αὐτῆς» γῆς καὶ τῶν αὐτῶν κλήρων αὐτοῖς τε τὴν τροφὴν λήψονται καὶ τοῖς μαχίμοις παρέξουσιν; ταῦτα δὴ πάντα πολλὴν ἔχει ταραχὴν. οὐ καλῶς δ' οὐδ' ὁ περὶ τῆς κρίσεως ἔχει νόμος, τὸ κρίνειν ἀξιοῦν διαιροῦντα, τῆς δίκης ἀπλῶς γεγραμμένης, καὶ γίνεσθαι τὸν δικαστὴν διαιτητὴν. τοῦτο δὲ ἐν μὲν τῇ διαίτῃ καὶ πλείοσιν ἐνδέχεται (κοινολογοῦνται γὰρ ἀλλήλοις περὶ τῆς κρίσεως), ἐν δὲ τοῖς δικαστηρίοις οὐκ ἔστιν, ἀλλὰ καὶ τοῖναντίον τούτου τῶν νομοθετῶν οἱ πολλοὶ παρασκευάζουσιν ὅπως οἱ δικασταὶ μὴ κοινολογῶνται πρὸς ἀλλήλους. ἔπειτα πῶς οὐκ ἔσται ταραχώδης ἡ κρίσις, ὅταν ὀφείλῃν μὲν ὁ δικαστὴς οἶηται, μὴ τοσοῦτον δ' ὅσον ὁ δικαζόμενος; ὁ μὲν γὰρ εἴκοσι μνᾶς, ὁ δὲ δικαστὴς κρίνει δέκα μνᾶς (ἢ ὁ μὲν πλεόν ὁ δ' ἔλασσον), ἄλλος δὲ πέντε, ὁ δὲ τέτταρας, καὶ τοῦτον δὴ τὸν τρόπον δῆλον ὅτι μεριοῦσιν· οἱ δὲ πάντα καταδικάσουσιν, οἱ δ' οὐδέν. τίς οὖν ὁ τρόπος ἔσται τῆς διαλογῆς τῶν ψήφων; ἔτι δ' οὐδὲν ἐπιорκεῖν ἀναγκάζει τὸν ἀπλῶς ἀποδικάσαντα ἢ καταδικάσαντα, εἴπερ ἀπλῶς τὸ ἐγκλημα γέγραπται, δικαίως· οὐ γὰρ μηδὲν ὀφείλῃν ὁ ἀποδικάσας κρίνει, ἀλλὰ τὰς εἴκοσι μνᾶς· ἀλλ' ἐκεῖνος ἤδη ἐπιорκεῖ, ὁ καταδικάσας, μὴ νομίζων ὀφείλῃν τὰς εἴκοσι μνᾶς.

περὶ δὲ τοῦ τοῖς εὐρίσκουσιν τι τῇ πόλει συμφέρον ὥς δεῖ γίνεσθαι τινα τιμὴν, οὐκ ἔστιν ἀσφαλὲς τὸ νομοθετεῖν, ἀλλ' εὐόφθαλμον ἀκοῦσαι μόνον· ἔχει γὰρ συκοφαντίας καὶ κινήσεις, ἂν τύχῃ, πολιτείας. ἐμπίπτει δ' εἰς ἄλλο πρόβλημα καὶ σκέψιν ἐτέραν· ἀποροῦσι γὰρ τινες πότερον βλαβερὸν ἢ συμφέρον ταῖς πόλεσι τὸ κινεῖν τοὺς πατρίους νόμους, ἂν ἢ τις ἄλλος βελτίων. διόπερ οὐ ῥάδιον τῷ λεχθέντι ταχὺ συγχωρεῖν, εἴπερ μὴ συμφέρεи κινεῖν,

ἐνδέχεται δ' εἰσηγεῖσθαι τινας νόμων λύσιν ἢ πολιτείας ὥς κοινὸν ἀγαθόν. ἐπεὶ δὲ πεποιήμεθα μνειάν, ἔτι μικρὰ περὶ αὐτοῦ διαστείλασθαι βέλτιον. ἔχει γάρ, ὥσπερ εἵπομεν, ἀπορίαν, καὶ δόξειεν ἂν βέλτιον εἶναι τὸ κινεῖν. ἐπὶ γοῦν τῶν ἄλλων ἐπιστημῶν τοῦτο συνενήνοχεν, οἷον ἰατρικὴ κινήθεῖσα παρὰ τὰ πάτρια καὶ γυμναστικὴ καὶ ὅλως αἱ τέχναι πᾶσαι καὶ αἱ δυνάμεις, ὥστ' ἐπεὶ μίαν τούτων θετέον καὶ τὴν πολιτικὴν, δῆλον ὅτι καὶ περὶ ταύτην ἀναγκαῖον ὁμοίως ἔχειν. σημεῖον δ' ἂν γεγονέναι φαίη τις ἐπ' αὐτῶν τῶν ἔργων· τοὺς γὰρ ἀρχαίους νόμους λίαν ἀπλοῦς εἶναι καὶ βαρβαρικοὺς, ἐσιδηροφοροῦντό τε γὰρ οἱ Ἕλληνες, καὶ τὰς γυναῖκας ἐωνοῦντο παρ' ἀλλήλων, ὅσα τε λοιπὰ τῶν ἀρχαίων ἐστὶ που νομίμων εὐήθη πάμπαν ἐστίν, [1269a] οἷον ἐν Κύμῃ περὶ τὰ φονικὰ νόμος ἔστιν, ἂν πληθὸς τι παράσχηται μαρτύρων ὁ διώκων τὸν φόνον τῶν αὐτοῦ συγγενῶν, ἔνοχον εἶναι τῷ φόνῳ τὸν φεύγοντα. ζητοῦσι δ' ὅλως οὐ τὸ πάτριον ἀλλὰ τὰγαθὸν πάντες· εἰκὸς τε τοὺς πρῶτους, εἴτε γηγενεῖς ἦσαν εἴτ' ἐκ φθορᾶς τινος ἐσώθησαν, ὁμοίους εἶναι καὶ τοὺς τυχόντας καὶ τοὺς ἀνοήτους, ὥσπερ καὶ λέγεται κατὰ τῶν γηγενῶν, ὥστε ἄτοπον τὸ μένειν ἐν τοῖς τούτων δόγμασιν. πρὸς δὲ τούτοις οὐδὲ τοὺς γεγραμμένους ἔαν ἀκινήτους βέλτιον. ὥσπερ γὰρ καὶ περὶ τὰς ἄλλας τέχνας, καὶ τὴν πολιτικὴν τάξιν ἀδύνατον ἀκριβῶς πάντα γραφεῖναι· καθόλου γὰρ ἀναγκαῖον γράφειν, αἱ δὲ πράξεις περὶ τῶν καθ' ἕκαστόν εἰσιν.

ἐκ μὲν οὖν τούτων φανερόν ὅτι κινήτεοι καὶ τινὲς καὶ ποτὲ τῶν νόμων εἰσὶν· ἄλλον δὲ τρόπον ἐπισκοποῦσιν εὐλαβείας ἂν δόξειεν εἶναι πολλῆς. ὅταν γὰρ ἦ τὸ μὲν βέλτιον μικρόν, τὸ δ' ἐθίζειν εὐχερῶς λύειν τοὺς νόμους φαῦλον, φανερόν ὥς ἐατέον ἐνίας ἀμαρτίας καὶ τῶν νομοθετῶν καὶ τῶν ἀρχόντων· οὐ γὰρ τοσοῦτον ὠφελήσεται κινήσας ὅσον βλαβήσεται τοῖς ἄρχουσιν ἀπειθεῖν ἐθισθεῖς. ψεῦδος δὲ καὶ τὸ παράδειγμα τὸ περὶ τῶν τεχνῶν· οὐ γὰρ ὅμοιον τὸ κινεῖν τέχνην καὶ νόμον· ὁ γὰρ νόμος ἰσχὺν οὐδεμίαν ἔχει πρὸς τὸ πείθεσθαι παρὰ τὸ ἔθος, τοῦτο δ' οὐ γίνεται εἰ μὴ διὰ χρόνου πληθός, ὥστε τὸ ῥαδίως μεταβάλλειν ἐκ τῶν ὑπαρχόντων νόμων εἰς ἑτέρους νόμους καινοὺς ἀσθενῇ ποιεῖν ἐστὶ τὴν τοῦ νόμου δύναμιν. ἔτι δ' εἰ καὶ κινήτεοι, πότερον πάντες καὶ ἐν πάσῃ πολιτείᾳ, ἢ οὐ; καὶ πότερον τῷ τυχόντι ἢ τισίν; ταῦτα γὰρ ἔχει μεγάλην διαφοράν. διὸ νῦν μὲν ἀφῶμεν ταύτην τὴν σκέψιν· ἄλλων γάρ ἐστι καιρῶν.

Περὶ δὲ τῆς Λακεδαιμονίων πολιτείας καὶ τῆς Κρητικῆς,

σχεδὸν δὲ καὶ περὶ τῶν ἄλλων πολιτειῶν, δύο εἰσὶν αἱ σκέψεις, μία μὲν εἴ τι καλῶς ἢ μὴ καλῶς πρὸς τὴν ἀρίστην νενομοθέτηται τάξιν, ἑτέρα δ' εἴ τι πρὸς τὴν ὑπόθεσιν καὶ τὸν τρόπον ὑπεναντίως τῆς προκειμένης αὐτοῖς πολιτείας. ὅτι μὲν οὖν δεῖ τῇ μελλούσῃ καλῶς πολιτεύεσθαι τὴν τῶν ἀναγκαίων ὑπάρχειν σχολήν, ὁμολογούμενόν ἐστιν· τίνα δὲ τρόπον ὑπάρχειν, οὐ ῥᾶδιον λαβεῖν. ἢ τε γὰρ Θετταλῶν πενεστεία πολλάκις ἐπέθετο τοῖς Θετταλοῖς, ὁμοίως δὲ καὶ τοῖς Λάκωσιν οἱ εἰλωτες (ὥσπερ γὰρ ἐφεδρεύοντες τοῖς ἀτυχήμασι διατελοῦσιν)· περὶ δὲ τοὺς Κρητάς οὐδέν πω τοιοῦτον συμβέβηκεν. αἴτιον δ' ἴσως τὸ τὰς γειτνιώσας [1269b] πόλεις, καίπερ πολεμούσας ἀλλήλαις, μηδεμίαν εἶναι σύμμαχον τοῖς ἀφισταμένοις διὰ τὸ μὴ συμφέρειν <ταῖς> καὶ αὐταῖς κεκτημέναις περιοίκους, τοῖς δὲ Λάκωσιν οἱ γειτνιώντες ἐχθροὶ πάντες ἦσαν, Ἀργεῖοι καὶ Μεσσήνιοι καὶ Ἀρκάδες· ἐπεὶ καὶ τοῖς Θετταλοῖς κατ' ἀρχὰς ἀφίσταντο διὰ τὸ πολεμεῖν ἔτι τοῖς προσχώροις, Ἀχαιοῖς καὶ Περραιβοῖς καὶ Μάγνησιν. ἔοικε δὲ καὶ εἰ μὴδὲν ἕτερον, ἀλλὰ τό γε τῆς ἐπιμελείας ἐργῶδες εἶναι, τίνα δεῖ πρὸς αὐτοὺς ὁμιλῆσαι τρόπον· ἀνιέμενοί τε γὰρ ὑβρίζουσι καὶ τῶν ἴσων ἀξιοῦσιν ἑαυτοὺς τοῖς κυρίοις, καὶ κακοπαθῶς ζῶντες ἐπιβουλεύουσι καὶ μισοῦσιν. δῆλον οὖν ὡς οὐκ ἐξευρίσκουσι τὸν βέλτιστον τρόπον οἷς τοῦτο συμβαίνει περὶ τὴν εἰλωτείαν.

ἔτι δ' ἡ περὶ τὰς γυναῖκας ἄνεσις καὶ πρὸς τὴν προαίρεσιν τῆς πολιτείας βλαβερά καὶ πρὸς εὐδαιμονίαν πόλεως. ὥσπερ γὰρ οἰκίας μέρος ἀνὴρ καὶ γυνή, δῆλον ὅτι καὶ πόλιν ἐγγὺς τοῦ δίχα διηρῆσθαι δεῖ νομίζειν εἰς τε τὸ τῶν ἀνδρῶν πλῆθος καὶ τὸ τῶν γυναικῶν, ὥστ' ἐν ὅσαις πολιτεαῖς φαύλως ἔχει τὸ περὶ τὰς γυναῖκας, τὸ ἡμισυ τῆς πόλεως εἶναι δεῖ νομίζειν ἀνομοθέτητον. ὅπερ ἐκεῖ συμβέβηκεν· ὅλην γὰρ τὴν πόλιν ὁ νομοθέτης εἶναι βουλόμενος καρτερικὴν, κατὰ μὲν τοὺς ἀνδρας φανερός ἐστι τοιοῦτος ὢν, ἐπὶ δὲ τῶν γυναικῶν ἐξημέληκεν· ζῶσι γὰρ ἀκολάστως πρὸς ἅπασαν ἀκολασίαν καὶ τρυφερῶς. ὥστ' ἀναγκαῖον ἐν τῇ τοιαύτῃ πολιτείᾳ τιμᾶσθαι τὸν πλοῦτον, ἄλλως τε κἂν τύχωσι γυναικοκρατούμενοι, καθάπερ τὰ πολλὰ τῶν στρατιωτικῶν καὶ πολεμικῶν γενῶν, ἔξω Κελτῶν ἢ κἂν εἴ τινες ἕτεροι φανερῶς τετιμήκασιν τὴν πρὸς τοὺς ἄρρενας συνουσίαν. ἔοικε γὰρ ὁ μυθολογήσας πρῶτος οὐκ ἀλόγως συζεῖσθαι τὸν Ἄρην πρὸς τὴν Ἀφροδίτην· ἢ γὰρ πρὸς τὴν τῶν ἀρρένων ὁμιλίαν ἢ πρὸς τὴν τῶν γυναικῶν φαίνονται κατοκώχιοι πάντες οἱ τοιοῦτοι. διὸ

παρὰ τοῖς Λάκωσι τοῦθ' ὑπῆρχεν, καὶ πολλὰ διωκεῖτο ὑπὸ τῶν γυναικῶν ἐπὶ τῆς ἀρχῆς αὐτῶν. καίτοι τί διαφέρει γυναῖκας ἄρχειν ἢ τοὺς ἄρχοντας ὑπὸ τῶν γυναικῶν ἄρχεσθαι; ταῦτό γὰρ συμβαίνει. χρησίμου δ' οὐσης τῆς θρασυτητος πρὸς οὐδέν τῶν ἐγκυκλίων, ἀλλ' εἶπερ, πρὸς τὸν πόλεμον, βλαβερώταται καὶ πρὸς ταῦθ' αἱ τῶν Λακῶνων ἦσαν. ἐδήλωσαν δ' ἐπὶ τῆς Θηβαίων ἐμβολῆς· χρήσιμοι μὲν γὰρ οὐδέν ἦσαν, ὥσπερ ἐν ἐτέραις πόλεσιν, θόρυβον δὲ παρεῖχον πλείω τῶν πολεμίων. ἐξ ἀρχῆς μὲν οὖν ἔοικε συμβεβηκέναι τοῖς Λάκωσιν εὐλόγως ἢ τῶν γυναικῶν [1270a] ἄνεσις. ἔξω γὰρ τῆς οἰκείας διὰ τὰς στρατείας ἀπεξενούντο πολὺν χρόνον, πολεμοῦντες τόν τε πρὸς Ἀργεῖους πόλεμον καὶ πάλιν τὸν πρὸς Ἀρκάδας καὶ Μεσηνίους· σχολάσαντες δὲ αὐτοὺς μὲν παρεῖχον τῷ νομοθέτῃ προωδοπεποιημένους διὰ τὸν στρατιωτικὸν βίον (πολλὰ γὰρ ἔχει μέρη τῆς ἀρετῆς), τὰς δὲ γυναῖκας φασὶ μὲν ἄγειν ἐπιχειρῆσαι τὸν Λυκοῦργον ὑπὸ τοὺς νόμους, ὥς δ' ἀντέκρουον, ἀποστῆναι πάλιν. αἰτίαι μὲν οὖν εἰσιν αὗται τῶν γενομένων, ὥστε δῆλον ὅτι καὶ ταύτης τῆς ἀμαρτίας· ἀλλ' ἡμεῖς οὐ τοῦτο σκοποῦμεν, τίνι δεῖ συγγνώμην ἔχειν ἢ μὴ ἔχειν, ἀλλὰ περὶ τοῦ ὀρθῶς καὶ μὴ ὀρθῶς. τὰ δὲ περὶ τὰς γυναῖκας ἔχοντα μὴ καλῶς ἔοικεν, ὥσπερ ἐλέχθη καὶ πρότερον, οὐ μόνον ἀπρέπειάν τινα ποιεῖν τῆς πολιτείας αὐτῆς καθ' αὐτήν, ἀλλὰ συμβάλλεσθαι τι πρὸς τὴν φιλοχρηματίαν. μετὰ γὰρ τὰ νῦν ρηθέντα τοῖς περὶ τὴν ἀνωμαλίαν τῆς κτήσεως ἐπιτιμήσειεν ἂν τις. τοῖς μὲν γὰρ αὐτῶν συμβέβηκε κεκτηθῆναι πολλὴν λίαν οὐσίαν, τοῖς δὲ πᾶμπαν μικράν· διόπερ εἰς ὀλίγους ἦκεν ἡ χώρα. τοῦτο δὲ καὶ διὰ τῶν νόμων τέτακται φαύλως· ὠνεῖσθαι μὲν γάρ, ἢ πωλεῖν τὴν ὑπάρχουσαν, ἐποίησεν οὐ καλόν, ὀρθῶς ποιήσας, διδόναι δὲ καὶ καταλείπειν ἐξουσίαν ἔδωκε τοῖς βουλομένοις· καίτοι ταῦτό συμβαίνειν ἀναγκαῖον ἐκείνως τε καὶ οὕτως. ἔστι δὲ καὶ τῶν γυναικῶν σχεδὸν τῆς πάσης χώρας τῶν πέντε μερῶν τὰ δύο, τῶν τ' ἐπικλήρων πολλῶν γινομένων, καὶ διὰ τὸ προΐκας διδόναι μεγάλας. καίτοι βέλτιον ἦν μηδεμίαν ἢ ὀλίγην ἢ καὶ μετρίαν τετάχθαι. νῦν δ' ἔξεστι δοῦναι τε τὴν ἐπικληρον ὅτῳ ἂν βούληται, κἂν ἀποθάνῃ μὴ διαθέμενος, ὃν ἂν καταλίπη κληρονόμον, οὗτος ᾧ ἂν θέλῃ δίδωσιν. τοιγαροῦν δυναμένης τῆς χώρας χιλίους ἱππεῖς τρέφειν καὶ πεντακοσίους, καὶ ὀπλίτας τρισμυρίους, οὐδὲ χίλιοι τὸ πλῆθος ἦσαν. γέγονε δὲ διὰ τῶν ἔργων αὐτῶν δῆλον ὅτι φαύλως αὐτοῖς εἶχε τὰ περὶ τὴν τάξιν ταύτην· μίαν γὰρ πληγὴν οὐχ ὑπήνεγκεν ἢ πόλις, ἀλλ'

ἀπώλετο διὰ τὴν ὀλιγανθρωπίαν. λέγουσι δ' ὥς ἐπὶ μὲν τῶν προτέρων βασιλέων μετεδίδοσαν τῆς πολιτείας, ὥστ' οὐ γίνεσθαι τότε ὀλιγανθρωπίαν, πολεμούντων πολὺν χρόνον, καὶ φασιν εἶναι ποτε τοῖς Σπαρτιάταις καὶ μυρίους· οὐ μὴν ἄλλ', εἴτ' ἐστὶν ἀληθὴ ταῦτα εἴτε μή, βέλτιον τὸ διὰ τῆς κτήσεως ὠμαλισμένης πληθύνει ἀνδρῶν τὴν πόλιν. ὑπεναντίος δὲ καὶ ὁ περὶ τὴν τεκνοποιίαν νόμος πρὸς ταύτην τὴν διόρθωσιν.

[1270b] βουλόμενος γὰρ ὁ νομοθέτης ὥς πλείστους εἶναι τοὺς Σπαρτιάτας, προάγεται τοὺς πολίτας ὅτι πλείστους ποιεῖσθαι παῖδας· ἔστι γὰρ αὐτοῖς νόμος τὸν μὲν γεννήσαντα τρεῖς υἱοὺς ἄφρουρον εἶναι, τὸν δὲ τέτταρας ἀτελῇ πάντων. καίτοι φανερόν ὅτι πολλῶν γινομένων, τῆς δὲ χώρας οὕτω διηρημένης, ἀναγκαῖον πολλοὺς γίνεσθαι πένητας.

ἀλλὰ μὴν καὶ τὰ περὶ τὴν ἐφορείαν ἔχει φαύλως. ἡ γὰρ ἀρχὴ κυρία μὲν αὐτῇ τῶν μεγίστων αὐτοῖς ἐστίν, γίνονται δ' ἐκ τοῦ δήμου παντός, ὥστε πολλάκις ἐμπίπτουσιν ἄνθρωποι σφόδρα πένητες εἰς τὸ ἀρχεῖον, οἱ διὰ τὴν ἀπορίαν ὦνιοι ἦσαν. ἐδήλωσαν δὲ πολλάκις μὲν καὶ πρότερον, καὶ νῦν δὲ ἐν τοῖς Ἀνδρίοις· διαφθαρέντες γὰρ ἀργυρίῳ τινές, ὅσον ἐφ' ἑαυτοῖς, ὅλην τὴν πόλιν ἀπώλεσαν, καὶ διὰ τὸ τὴν ἀρχὴν εἶναι λίαν μεγάλην καὶ ἰσοτύραννον δημαγωγεῖν αὐτοὺς ἠναγκάζοντο καὶ οἱ βασιλεῖς, ὥστε καὶ ταύτη συνεπιβλάπτεσθαι τὴν πολιτείαν· δημοκρατία γὰρ ἐξ ἀριστοκρατίας συνέβαινεν. συνέχει μὲν οὖν τὴν πολιτείαν τὸ ἀρχεῖον τοῦτο - ἡσυχάζει γὰρ ὁ δῆμος διὰ τὸ μετέχειν τῆς μεγίστης ἀρχῆς, ὥστ' εἴτε διὰ τὸν νομοθέτην εἴτε διὰ τύχην τοῦτο συμπεπτώκεν, συμφερόντως ἔχει τοῖς πράγμασιν· δεῖ γὰρ τὴν πολιτείαν τὴν μέλλουσαν σῶζεσθαι πάντα βούλεσθαι τὰ μέρη τῆς πόλεως εἶναι καὶ διαμένειν ταῦτά· οἱ μὲν οὖν βασιλεῖς διὰ τὴν αὐτῶν τιμὴν οὕτως ἔχουσιν, οἱ δὲ καλοὶ κάγαθοι διὰ τὴν γερουσίαν (ἄθλον γὰρ ἡ ἀρχὴ αὕτη τῆς ἀρετῆς ἐστίν), ὁ δὲ δῆμος διὰ τὴν ἐφορείαν (καθίσταται γὰρ ἐξ ἀπάντων) - ἀλλ' αἰρετὴν ἔδει τὴν ἀρχὴν εἶναι ταύτην ἐξ ἀπάντων μὲν, μὴ τὸν τρόπον δὲ τοῦτον ὃν νῦν (παιδαριώδης γὰρ ἐστὶ λίαν). ἔτι δὲ καὶ κρίσεών εἰσι μεγάλων κύριοι, ὄντες οἱ τυχόντες, διόπερ οὐκ αὐτογνώμονας βέλτιον κρίνειν ἀλλὰ κατὰ γράμματα καὶ τοὺς νόμους. ἔστι δὲ καὶ ἡ δίαίτα τῶν ἐφόρων οὐχ ὁμολογουμένη τῷ βουλήματι τῆς πόλεως· αὐτὴ μὲν γὰρ ἀνειμένη λίαν ἐστίν, ἐν δὲ τοῖς ἄλλοις μᾶλλον ὑπερβάλλει ἐπὶ τὸ σκληρόν, ὥστε μὴ δύνασθαι

καρτερεῖν ἀλλὰ λάθρα τὸν νόμον ἀποδιδράσκοντας ἀπολαύειν τῶν σωματικῶν ἡδονῶν.

ἔχει δὲ καὶ τὰ περὶ τὴν τῶν γερόντων ἀρχὴν οὐ καλῶς αὐτοῖς. ἐπιεικῶν μὲν γὰρ ὄντων καὶ πεπαιδευμένων ἱκανῶς πρὸς ἀνδραγαθίαν τάχ' ἂν εἴπειέ τις συμφέρειν τῇ πόλει, καίτοι τό γε διὰ βίου κυρίους εἶναι κρίσεων μεγάλων ἀμφισβητήσιμον (ἔστι γάρ, ὥσπερ καὶ σώματος, καὶ διανοίας [1271a] γῆρας). τὸν τρόπον δὲ τοῦτον πεπαιδευμένων ὥστε καὶ τὸν νομοθέτην αὐτὸν ἀπιστεῖν ὡς οὐκ ἀγαθοῖς ἀνδράσιν, οὐκ ἀσφαλές. φαίνονται δὲ καὶ καταδωροδοκούμενοι καὶ καταχαριζόμενοι πολλὰ τῶν κοινῶν οἱ κεκοινωνηκότες τῆς ἀρχῆς ταύτης. διόπερ βέλτιον αὐτοὺς μὴ ἀνευθύνους εἶναι· νῦν δ' εἰσὶν. δόξειε δ' ἂν ἡ τῶν ἐφόρων ἀρχὴ πάσας εὐθύνειν τὰς ἀρχάς· τοῦτο δὲ τῇ ἐφορείᾳ μέγα λίαν τὸ δῶρον, καὶ τὸν τρόπον οὐ τοῦτον λέγομεν διδόναι δεῖν τὰς εὐθύνας. ἔτι δὲ καὶ τὴν αἵρεσιν ἣν ποιοῦνται τῶν γερόντων κατὰ τε τὴν κρίσιν ἔστι παιδαριώδης, καὶ τὸ αὐτὸν αἰτεῖσθαι τὸν ἀξιωθησόμενον τῆς ἀρχῆς οὐκ ὀρθῶς ἔχει· δεῖ γὰρ καὶ βουλόμενον καὶ μὴ βουλόμενον ἄρχειν τὸν ἄξιον τῆς ἀρχῆς. νῦν δ' ὅπερ καὶ περὶ τὴν ἄλλην πολιτείαν ὁ νομοθέτης φαίνεται ποιῶν· φιλοτίμους γὰρ κατασκευάζων τοὺς πολίτας τοῦτῳ κέχρηται πρὸς τὴν αἵρεσιν τῶν γερόντων· οὐδεὶς γὰρ ἂν ἄρχειν αἰτήσαιτο μὴ φιλότιμος ὢν. καίτοι τῶν γ' ἀδικημάτων τῶν ἐκουσίων τὰ πλεῖστα συμβαίνει σχεδὸν διὰ φιλοτιμίαν καὶ διὰ φιλοχρηματίαν τοῖς ἀνθρώποις.

περὶ δὲ βασιλείας, εἰ μὲν βέλτιόν ἐστιν ὑπάρχειν ταῖς πόλεσιν ἢ μὴ βέλτιον, ἄλλος ἔστω λόγος· ἀλλὰ μὴν βέλτιόν γε μὴ καθάπερ νῦν, ἀλλὰ κατὰ τὸν αὐτοῦ βίον ἕκαστον κρίνεσθαι τῶν βασιλέων. ὅτι δ' ὁ νομοθέτης οὐδ' αὐτὸς οἶεται δύνασθαι ποιεῖν καλοὺς κάγαθούς, δῆλον· ἀπιστεῖ γοῦν ὡς οὐκ οὔσιν ἱκανῶς ἀγαθοῖς ἀνδράσιν· διόπερ ἐξέπεμπον συμπρεσβευτὰς τοὺς ἐχθρούς, καὶ σωτηρίαν ἐνόμιζον τῇ πόλει εἶναι τὸ στασιάζειν τοὺς βασιλεῖς. οὐ καλῶς δ' οὐδὲ περὶ τὰ συσσίτια τὰ καλούμενα φιδίτια νενομοθέτηται τῷ καταστήσαντι πρῶτον. ἔδει γὰρ ἀπὸ κοινοῦ μᾶλλον εἶναι τὴν σύνοδον, καθάπερ ἐν Κρήτῃ· παρὰ δὲ τοῖς Λάκωσιν ἕκαστον δεῖ φέρειν, καὶ σφόδρα πενήτων ἐνίων ὄντων καὶ τοῦτο τὸ ἀνάλωμα οὐ δυναμένων δαπανᾶν, ὥστε συμβαίνει τούναντίον τῷ νομοθέτῃ τῆς προαιρέσεως. βούλεται μὲν γὰρ δημοκρατικὸν εἶναι τὸ κατασκευάσμα τῶν συσσιτίων, γίνεται δ' ἥκιστα δημοκρατικὸν οὕτω νενομοθετημένον. μετέχειν

μὲν γὰρ οὐ ῥάδιον τοῖς λίαν πένησιν, ὅρος δὲ τῆς πολιτείας οὗτός ἐστιν αὐτοῖς ὁ πάτριος, τὸν μὴ δυνάμενον τοῦτο τὸ τέλος φέρειν μὴ μετέχειν αὐτῆς· τῷ δὲ περὶ τοὺς ναυάρχους νόμῳ καὶ ἕτεροί τινες ἐπιτετιμήκασιν, ὀρθῶς ἐπιτιμῶντες. στάσεως γὰρ γίνεται αἷτιος· ἐπὶ γὰρ τοῖς βασιλεῦσιν, οὔσι στρατηγοῖς ἀδίοις, ἡ ναυαρχία σχεδὸν ἑτέρα βασιλεία καθέστηκεν. καὶ ὧδὶ δὲ τῇ ὑποθέσει τοῦ νομοθέτου ἐπιτιμήσειεν [1271b] ἂν τις, ὅπερ καὶ Πλάτων ἐν τοῖς Νόμοις ἐπιτετίμηκεν· πρὸς γὰρ μέρος ἀρετῆς ἡ πᾶσα σύνταξις τῶν νόμων ἐστί, τὴν πολεμικὴν· αὕτη γὰρ χρησίμη πρὸς τὸ κρατεῖν. τοιγαροῦν ἐσφύζοντο μὲν πολεμοῦντες, ἀπώλλυντο δὲ ἄρξαντες διὰ τὸ μὴ ἐπίστασθαι σχολάζειν μηδὲ ἡσκηκέναι μηδεμίαν ἄσκησιν ἑτέραν κυριωτέραν τῆς πολεμικῆς. τούτου δὲ ἀμάρτημα οὐκ ἔλαττον· νομίζουσι μὲν γὰρ γίνεσθαι τὰγαθὰ τὰ περιμάχητα δι' ἀρετῆς μᾶλλον ἢ κακίας, καὶ τοῦτο μὲν καλῶς, ὅτι μέντοι ταῦτα κρείττω τῆς ἀρετῆς ὑπολαμβάνουσιν, οὐ καλῶς. φαύλως δ' ἔχει καὶ περὶ τὰ κοινὰ χρήματα τοῖς Σπαρτιάταις. οὔτε γὰρ ἐν τῷ κοινῷ τῆς πόλεως ἐστὶν οὐδὲν πολέμους μεγάλους ἀναγκαζομένοις πολεμεῖν, εἰσφέρουσί τε κακῶς· διὰ γὰρ τὸ τῶν Σπαρτιατῶν εἶναι τὴν πλείστην γῆν οὐκ ἐξετάζουσιν ἀλλήλων τὰς εἰσφοράς. ἀποβέβηκέ τε τοῦναντίον τῷ νομοθέτῃ τοῦ συμφέροντος· τὴν μὲν γὰρ πόλιν πεποίηκεν ἀχρήματον, τοὺς δ' ἰδιώτας φιλοχρημάτους. περὶ μὲν οὖν τῆς Λακεδαιμονίων πολιτείας ἐπὶ τοσοῦτον εἰρήσθω· ταῦτα γὰρ ἐστὶν ἅ μάλιστ' ἂν τις ἐπιτιμήσειεν.

Ἡ δὲ Κρητικὴ πολιτεία πάρεγγυς μὲν ἐστὶ ταύτης, ἔχει δὲ μικρὰ μὲν οὐ χεῖρον, τὸ δὲ πλεῖον ἥττον γλαφυρῶς. καὶ γὰρ ἔοικε καὶ λέγεται γε τὰ πλεῖστα μεμιμῆσθαι τὴν Κρητικὴν πολιτείαν ἢ τῶν Λακῶνων· τὰ δὲ πλεῖστα τῶν ἀρχαίων ἥττον διήρθρωται τῶν νεωτέρων. φασὶ γὰρ τὸν Λυκοῦργον, ὅτε τὴν ἐπιτροπείαν τὴν Χαρίλλου τοῦ βασιλέως καταλιπὼν ἀπεδήμησεν, τότε τὸν πλείστον διατρίψαι χρόνον περὶ Κρήτην διὰ τὴν συγγένειαν· ἄποικοι γὰρ οἱ Λύκτιοι τῶν Λακῶνων ἦσαν, κατέλαβον δ' οἱ πρὸς τὴν ἀποικίαν ἐλθόντες τὴν τάξιν τῶν νόμων ὑπάρχουσιν ἐν τοῖς τότε κατοικοῦσιν. διὸ καὶ νῦν οἱ περίοικοι τὸν αὐτὸν τρόπον χρῶνται αὐτοῖς, ὥς κατασκευάσαντος Μίνω πρώτου τὴν τάξιν τῶν νόμων. δοκεῖ δ' ἡ νῆσος καὶ πρὸς τὴν ἀρχὴν τὴν Ἑλληνικὴν πεφυκέναι καὶ κεῖσθαι καλῶς· πάσῃ γὰρ ἐπείκειται τῇ θαλάττῃ, σχεδὸν τῶν Ἑλλήνων ἰδρυμένων περὶ τὴν θάλατταν πάντων· ἀπέχει γὰρ τῇ μὲν τῆς

Πελοποννήσου μικρόν, τῇ δὲ τῆς Ἀσίας τοῦ περὶ Τριόπιον τόπου καὶ Ῥόδου. διὸ καὶ τὴν τῆς θαλάττης ἀρχὴν κατέσχευεν ὁ Μίνως, καὶ τὰς νήσους τὰς μὲν ἐχειρώσατο τὰς δ' ὥκισεν, τέλος δὲ ἐπιθέμενος τῇ Σικελίᾳ τὸν βίον ἐτελεύτησεν ἐκεῖ περὶ Καμικόν.

ἔχει δ' ἀνάλογον ἡ Κρητικὴ τάξις πρὸς τὴν Λακωνικὴν. γεωργοῦσί τε γὰρ τοῖς μὲν εἰλωτες [1272a] τοῖς δὲ Κρησὶν οἱ περίοικοι, καὶ συσσίτια παρ' ἀμφοτέροις ἔστιν, καὶ τό γε ἀρχαῖον ἐκάλουν οἱ Λάκωνες οὐ φιδίτια ἀλλὰ ἀνδρεῖα, καθάπερ οἱ Κρήτες, ἧ καὶ δῆλον ὅτι ἐκείθεν ἐλήλυθεν. ἔτι δὲ τῆς πολιτείας ἡ τάξις. οἱ μὲν γὰρ ἔφοροι τὴν αὐτὴν ἔχουσι δύναμιν τοῖς ἐν τῇ Κρίτῃ καλουμένοις κόσμοις, πλὴν οἱ μὲν ἔφοροι πέντε τὸν ἀριθμὸν οἱ δὲ κόσμοι δέκα εἰσίν· οἱ δὲ γέροντες τοῖς γέρουσιν, οὓς καλοῦσιν οἱ Κρήτες βουλὴν, ἴσοι· βασιλεία δὲ πρότερον μὲν ἦν, εἴτα κατέλυσαν οἱ Κρήτες, καὶ τὴν ἡγεμονίαν οἱ κόσμοι τὴν κατὰ πόλεμον ἔχουσιν· ἐκκλησίας δὲ μετέχουσι πάντες, κυρία δ' οὐδενός ἐστιν ἀλλ' ἡ συνεπιψηφίσαι τὰ δόξαντα τοῖς γέρουσι καὶ τοῖς κόσμοις.

τὰ μὲν οὖν τῶν συσσιτίων ἔχει βέλτιον τοῖς Κρησὶν ἢ τοῖς Λάκωσιν. ἐν μὲν γὰρ Λακεδαίμονι κατὰ κεφαλὴν ἕκαστος εἰσφέρει τὸ τεταγμένον, εἰ δὲ μή, μετέχειν νόμος κωλύει τῆς πολιτείας, καθάπερ εἴρηται καὶ πρότερον, ἐν δὲ Κρίτῃ κοινοτέρως· ἀπὸ πάντων γὰρ τῶν γινομένων καρπῶν τε καὶ βοσκημάτων δημοσίων, καὶ ἐκ τῶν φόρων οὓς φέρουσιν οἱ περίοικοι, τέτακται μέρος τὸ μὲν πρὸς τοὺς θεοὺς καὶ τὰς κοινὰς λειτουργίας, τὸ δὲ τοῖς συσσιτίοις, ὥστ' ἐκ κοινοῦ τρέφεσθαι πάντας, καὶ γυναῖκας καὶ παῖδας καὶ ἄνδρας· πρὸς δὲ τὴν ὀλιγοσιτίαν ὡς ὠφέλιμον πολλὰ πεφιλοσόφηκεν ὁ νομοθέτης, καὶ πρὸς τὴν διάζευξιν τῶν γυναικῶν, ἵνα μὴ πολυτεκνῶσι, τὴν πρὸς τοὺς ἄρρενας ποιήσας ὁμιλίαν, περὶ ἧς εἰ φαύλως ἢ μὴ φαύλως, ἕτερος ἔσται τοῦ διασκέψασθαι καιρός. ὅτι δὴ τὰ περὶ τὰ συσσίτια βέλτιον τέτακται τοῖς Κρησὶν ἢ τοῖς Λάκωσι, φανερόν· τὰ δὲ περὶ τοὺς κόσμους ἔτι χεῖρον τῶν ἐφόρων. ὁ μὲν γὰρ ἔχει κακὸν τὸ τῶν ἐφόρων ἀρχεῖον, ὑπάρχει καὶ τούτοις (γίνονται γὰρ οἱ τυχόντες), ὁ δ' ἐκεῖ συμφέρει πρὸς τὴν πολιτείαν, ἐνταῦθ' οὐκ ἔστιν. ἐκεῖ μὲν γάρ, διὰ τὸ τὴν αἵρεσιν ἐκ πάντων εἶναι, μετέχων ὁ δῆμος τῆς μεγίστης ἀρχῆς βούλεται μένειν τὴν πολιτείαν· ἐνταῦθα δ' οὐκ ἐξ πάντων αἰροῦνται τοὺς κόσμους ἀλλ' ἐκ τινῶν γενῶν, καὶ τοὺς γέροντας ἐκ τῶν κεκοσμηκότων, περὶ ὧν τοὺς αὐτοὺς ἂν τις εἴπειε λόγους καὶ περὶ τῶν ἐν Λακεδαίμονι γινομένων (τὸ γὰρ ἀνυπεύθυνον καὶ τὸ διὰ

βίου μεῖζόν ἐστι γέρας τῆς ἀξίας αὐτοῖς, καὶ τὸ μὴ κατὰ γράμματα ἄρχειν ἀλλ' αὐτογνώμονας ἐπισφαλές). τὸ δ' ἡσυχάζειν μὴ μετέχοντα τὸν δῆμον οὐδὲν σημεῖον τοῦ τετάχθαι καλῶς. οὐδὲν γὰρ λῆμμα ἔστι τοῖς κόσμοις ὥσπερ τοῖς ἐφόροις, πόρρω γ' [1272b] ἀποικοῦσιν ἐν νήσῳ τῶν διαφθερούντων.

ἦν δὲ ποιοῦνται τῆς ἀμαρτίας ταύτης ἱατρείαν, ἄτοπος καὶ οὐ πολιτικὴ ἀλλὰ δυναστευτικὴ. πολλάκις γὰρ ἐκβάλλουσι συστάντες τινὲς τοὺς κόσμους ἢ τῶν συναρχόντων αὐτῶν ἢ τῶν ιδιωτῶν· ἔξεστι δὲ καὶ μεταξὺ τοῖς κόσμοις ἀπειπεῖν τὴν ἀρχήν. ταῦτα δὴ πάντα βέλτιον γίνεσθαι κατὰ νόμον ἢ κατ' ἀνθρώπων βούλησιν· οὐ γὰρ ἀσφαλὴς ὁ κανὼν. πάντων δὲ φαυλότατον τὸ τῆς ἀκοσμίας τῶν δυνατῶν, ἦν καθιστᾷσι πολλάκις ὅταν μὴ δίκας βούλωνται δοῦναι· ἢ καὶ δῆλον ὡς ἔχει τι πολιτείας ἢ τάξης, ἀλλ' οὐ πολιτεία ἐστὶν ἀλλὰ δυναστεία μᾶλλον. εἰώθασι δὲ διαλαμβάνοντες τὸν δῆμον καὶ τοὺς φίλους ἀναρχίαν ποιεῖν καὶ στασιάζειν καὶ μάχεσθαι πρὸς ἀλλήλους· καίτοι τί διαφέρει τὸ τοιοῦτον ἢ διὰ τινος χρόνου μηκέτι πόλιν εἶναι τὴν τοιαύτην, ἀλλὰ λύεσθαι τὴν πολιτικὴν κοινωνίαν; ἔστι δ' ἐπικίνδυνος οὕτως ἔχουσα πόλεις, τῶν βουλομένων ἐπιτίθεσθαι καὶ δυναμένων. ἀλλὰ, καθάπερ εἴρηται, σφύζεται διὰ τὸν τόπον· ξενηλασίας γὰρ τὸ πόρρω πεποίηκεν. διὸ καὶ τὸ τῶν περιοίκων μένει τοῖς Κρησίν, οἱ δ' εἴλωτες ἀφίστανται πολλάκις. οὔτε γὰρ ἐξωτερικῆς ἀρχῆς κοινωνοῦσιν οἱ Κρήτες, νεωστί τε πόλεμος ξενικὸς διαβέβηκεν εἰς τὴν νῆσον, ὃς πεποίηκε φανεράν τὴν ἀσθένειαν τῶν ἐκεῖ νόμων. περὶ μὲν οὖν ταύτης εἰρήσθω τοσαῦθ' ἡμῖν τῆς πολιτείας.

Πολιτεύεσθαι δὲ δοκοῦσι καὶ Καρχηδόνιοι καλῶς καὶ πολλὰ περιττῶς πρὸς τοὺς ἄλλους, μάλιστα δ' ἔνια παραπλησίως τοῖς Λάκωσιν. αὐταὶ γὰρ αἱ τρεῖς πολιτεῖαι ἀλλήλαις τε σύνεγγύς πῶς εἰσι καὶ τῶν ἄλλων πολὺ διαφέρουσιν, ἢ τε Κρητικὴ καὶ ἡ Λακωνικὴ καὶ τρίτη τούτων ἡ τῶν Καρχηδονίων. καὶ πολλὰ τῶν τεταγμένων ἔχει παρ' αὐτοῖς καλῶς· σημεῖον δὲ πολιτείας συντεταγμένης τὸ τὸν δῆμον διαμένειν ἐν τῇ τάξει τῆς πολιτείας, καὶ μήτε στάσιν, ὃ τι καὶ ἄξιον εἰπεῖν, γεγενῆσθαι μήτε τύραννον. ἔχει δὲ παραπλήσια τῇ Λακωνικῇ πολιτεία τὰ μὲν συσσίτια τῶν ἐταιριῶν τοῖς φιδιτίοις, τὴν δὲ τῶν ἑκατὸν καὶ τεττάρων ἀρχὴν τοῖς ἐφόροις (πλὴν οὐ χεῖρον· οἱ μὲν γὰρ ἐκ τῶν τυχόντων εἰσὶ, ταύτην δ' αἰροῦνται τὴν ἀρχὴν ἀριστίνδην), τοὺς δὲ βασιλεῖς καὶ τὴν γερουσίαν ἀνάλογον τοῖς ἐκεῖ

βασιλεῦσι καὶ γέρουσιν· καὶ βέλτιον δὲ τοὺς βασιλεῖς μῆτε καθ' αὐτὸ εἶναι γένος μῆτε τοῦτο τὸ τυχόν, εἰ δέ τι διαφέρει, ἐκ τούτων αἰρετοὺς μᾶλλον ἢ καθ' ἡλικίαν. μεγάλων γὰρ κύριοι καθεστῶτες, ἂν εὐτελεῖς ὥσι [1273a] μεγάλα βλάπτουσι, καὶ ἔβλαψαν ἤδη τὴν πόλιν τὴν τῶν Λακεδαιμονίων.

τὰ μὲν οὖν πλεῖστα τῶν ἐπιτιμηθέντων ἂν διὰ τὰς παρεκβάσεις κοινὰ τυγχάνει πάσαις ὄντα ταῖς εἰρημέναις πολιτείαις· τῶν δὲ παρὰ τὴν ὑπόθεσιν τῆς ἀριστοκρατίας καὶ τῆς πολιτείας τὰ μὲν εἰς δῆμον ἐκκλίνει μᾶλλον, τὰ δ' εἰς ὀλιγαρχίαν. τοῦ μὲν γὰρ τὰ μὲν προσάγειν τὰ δὲ μὴ προσάγειν πρὸς τὸν δῆμον οἱ βασιλεῖς κύριοι μετὰ τῶν γερόντων, ἂν ὁμογνωμονῶσι πάντες, εἰ δὲ μὴ, καὶ τούτων ὁ δῆμος. ἃ δ' ἂν εἰσφέρωσιν οὗτοι, οὐ διακοῦσαι μόνον ἀποδιδόασι τῷ δήμῳ τὰ δόξαντα τοῖς ἄρχουσιν, ἀλλὰ κύριοι κρίνειν εἰσὶ καὶ τῷ βουλομένῳ τοῖς εἰσφερομένοις ἀντειπεῖν ἔξεστιν, ὅπερ ἐν ταῖς ἐτέραις πολιτείαις οὐκ ἔστιν. τὸ δὲ τὰς πενταρχίας κυρίας οὕσας πολλῶν καὶ μεγάλων ὑφ' αὐτῶν αἰρετὰς εἶναι, καὶ τὴν τῶν ἑκατὸν ταύτας αἰρεῖσθαι, τὴν μεγίστην ἀρχήν, ἔτι δὲ ταύτας πλείονα ἄρχειν χρόνον τῶν ἄλλων (καὶ γὰρ ἐξεληλυθότες ἄρχουσι καὶ μέλλοντες) ὀλιγαρχικόν, τὸ δὲ ἀμίσθους καὶ μὴ κληρωτὰς ἀριστοκρατικὸν θετέον, καὶ εἴ τι τοιοῦτον ἕτερον, καὶ τὸ τὰς δίκας ὑπὸ τῶν ἀρχείων δικάζεσθαι πάσας (καὶ μὴ ἄλλας ὑπ' ἄλλων, καθάπερ ἐν Λακεδαιμόνι). παρεκβαίνει δὲ τῆς ἀριστοκρατίας ἡ τάξις τῶν Καρχηδονίων μάλιστα πρὸς τὴν ὀλιγαρχίαν κατὰ τινα διάνοιαν ἢ συνδοκεῖ τοῖς πολλοῖς· οὐ γὰρ μόνον ἀριστίνδην ἀλλὰ καὶ πλουτίνδην οἶονται δεῖν αἰρεῖσθαι τοὺς ἄρχοντας· ἀδύνατον γὰρ τὸν ἀποροῦντα καλῶς ἄρχειν καὶ σχολάζειν. εἴπερ οὖν τὸ μὲν αἰρεῖσθαι πλουτίνδην ὀλιγαρχικόν τὸ δὲ κατ' ἀρετὴν ἀριστοκρατικόν, αὕτη τις ἂν εἴη τάξις τρίτη, καθ' ἣν περ συντέτακται [καί] τοῖς Καρχηδονίοις τὰ περὶ τὴν πολιτείαν· αἰροῦνται γὰρ εἰς δύο ταῦτα βλέποντες, καὶ μάλιστα τὰς μεγίστας, τοὺς τε βασιλεῖς καὶ τοὺς στρατηγούς.

δεῖ δὲ νομίζειν ἀμάρτημα νομοθέτου τὴν παρέκβασιν εἶναι τῆς ἀριστοκρατίας ταύτην. ἐξ ἀρχῆς γὰρ τοῦθ' ὅρᾱν ἐστὶ τῶν ἀναγκαιοτάτων, ὅπως οἱ βέλτιστοι δύνωνται σχολάζειν καὶ μηδὲν ἀσχημονεῖν, μὴ μόνον ἄρχοντες ἀλλὰ μηδ' ἰδιωτεύοντες. εἰ δὲ δεῖ βλέπειν καὶ πρὸς εὐπορίαν χάριν σχολῆς, φαῦλον τὸ τὰς μεγίστας ὦνητὰς εἶναι τῶν ἀρχῶν, τὴν τε βασιλείαν καὶ τὴν στρατηγίαν. ἐντιμον γὰρ ὁ νόμος οὗτος ποιεῖ τὸν πλοῦτον μᾶλλον τῆς ἀρετῆς, καὶ

τὴν πόλιν ὅλην φιλοχρήματον. ὅ τι δ' ἂν ὑπολάβῃ τίμιον εἶναι τὸ κύριον, ἀνάγκη καὶ τὴν τῶν ἄλλων πολιτῶν δόξαν ἀκολουθεῖν τούτοις. ὅπου δὲ μὴ μάλιστα ἀρετὴ τιμᾶται, ταύτην [1273b] οὐχ οἶόν τε βεβαίως ἀριστοκρατεῖσθαι τὴν πολιτείαν. ἐθίζεσθαι δ' εὖλογον κερδαίνειν τοὺς ὠνούμενους, ὅταν δαπανήσαντες ἄρχωσιν· ἄτοπον γὰρ εἰ πένης μὲν ὦν ἐπιεικὴς δὲ βουλήσεται κερδαίνειν, φαυλότερος δ' ὦν οὐ βουλήσεται δαπανήσας. διὸ δεῖ τοὺς δυναμένους ἄριστ' ἀργεῖν, τούτους ἄρχειν. βέλτιον δ', εἰ καὶ προεῖτο τὴν εὐπορίαν τῶν ἐπιεικῶν ὁ νομοθέτης, ἀλλὰ ἀρχόντων γε ἐπιμελεῖσθαι τῆς σχολῆς. φαῦλον δ' ἂν δόξειεν εἶναι καὶ τὸ πλείους ἀρχὰς τὸν αὐτὸν ἄρχειν· ὅπερ εὐδοκιμεῖ παρὰ τοῖς Καρχηδονίοις· ἐν γὰρ ὑφ' ἐνὸς ἔργον ἄριστ' ἀποτελεῖται. δεῖ δ' ὅπως γίνηται τοῦθ' ὁρᾶν τὸν νομοθέτην, καὶ μὴ προστάττειν τὸν αὐτὸν αὐλεῖν καὶ σκυτοτομεῖν. ὥσθ' ὅπου μὴ μικρὰ ἢ πόλις, πολιτικώτερον πλείονας μετέχει τῶν ἀρχῶν, καὶ δημοτικώτερον· κοινότερόν τε γὰρ καθάπερ εἶπομεν καὶ κάλλιον ἕκαστον ἀποτελεῖται τῶν αὐτῶν καὶ θᾶττον. δηλον δὲ τοῦτο ἐπὶ τῶν πολεμικῶν καὶ τῶν ναυτικῶν· ἐν τούτοις γὰρ ἀμφοτέροις διὰ πάντων ὡς εἶπεῖν διελήλυθε τὸ ἄρχειν καὶ τὸ ἄρχεσθαι. ὀλιγαρχικῆς δ' οὕσης τῆς πολιτείας ἄριστα <στάσιν> ἐκφεύγουσι τῷ πλουτεῖν αἰεὶ τι τοῦ δήμου μέρος, ἐκπέμποντες ἐπὶ τὰς πόλεις. τούτῳ γὰρ ἰῶνται καὶ ποιοῦσι μόνιμον τὴν πολιτείαν. ἀλλὰ τουτί ἐστι τύχης ἔργον, δεῖ δὲ ἀστασιάστους εἶναι διὰ τὸν νομοθέτην. νῦν δέ, ἂν ἀτυχία γένηται τις καὶ τὸ πλῆθος ἀποστῇ τῶν ἀρχομένων, οὐδὲν ἔστι φάρμακον διὰ τῶν νόμων τῆς ἡσυχίας. περὶ μὲν οὖν τῆς Λακεδαιμονίων πολιτείας καὶ Κρητικῆς καὶ τῆς Καρχηδονίων, αἵπερ δικαίως εὐδοκιμοῦσι, τοῦτον ἔχει τὸν τρόπον.

Τῶν δὲ ἀποφνημαμένων τι περὶ πολιτείας ἔνιοι μὲν οὐκ ἐκοινώνησαν πράξεων πολιτικῶν οὐδ' ὠντινωοῦν, ἀλλὰ διετέλεσαν ἰδιωτεύοντες τὸν βίον, περὶ ὧν εἴ τι ἀξιόλογον, εἴρηται σχεδὸν περὶ πάντων, ἔνιοι δὲ νομοθέται γεγόνασιν, οἱ μὲν ταῖς οἰκείαις πόλεσιν οἱ δὲ καὶ τῶν ὀθνείων τισί, πολιτευθέντες αὐτοί· καὶ τούτων οἱ μὲν νόμων ἐγένοντο δημιουργοὶ μόνον, οἱ δὲ καὶ πολιτείας, οἷον καὶ Λυκοῦργος καὶ Σόλων· οὗτοι γὰρ καὶ νόμους καὶ πολιτείας κατέστησαν. περὶ μὲν οὖν τῆς Λακεδαιμονίων εἴρηται, Σόλωνα δ' ἔνιοι μὲν οἶονται νομοθέτην γενέσθαι σπουδαῖον· ὀλιγαρχίαν τε γὰρ καταλῦσαι λίαν ἄκρατον οὔσαν, καὶ δουλεύοντα τὸν δήμον παῦσαι, καὶ δημοκρατίαν καταστήσαι τὴν πάτριον, μείξαντα καλῶς τὴν

πολιτείαν· εἶναι γὰρ τὴν μὲν ἐν Ἀρείῳ πάγῳ βουλὴν ὀλιγαρχικόν, τὸ δὲ τὰς ἀρχὰς αἰρετὰς ἀριστοκρατικόν, τὰ δὲ δικαστήρια δημοτικόν. ἔοικε δὲ Σόλων [1274a] ἐκεῖνα μὲν ὑπάρχοντα πρότερον οὐ καταλῦσαι, τὴν τε βουλὴν καὶ τὴν τῶν ἀρχῶν αἵρεσιν, τὸν δὲ δῆμον καταστήσαι, τὰ δικαστήρια ποιήσας ἐκ πάντων. διὸ καὶ μέμφονται τινες αὐτῷ· λῦσαι γὰρ θάτερα, κύριον ποιήσαντα τὸ δικαστήριον πάντων, κληρωτὸν ὄν. ἐπεὶ γὰρ τοῦτ' ἴσχυσεν, ὥσπερ τυράννῳ τῷ δήμῳ χαριζόμενοι τὴν πολιτείαν εἰς τὴν νῦν δημοκρατίαν μετέστησαν· καὶ τὴν μὲν ἐν Ἀρείῳ πάγῳ βουλὴν Ἐφιάλτης ἐκόλουσε καὶ Περικλῆς, τὰ δὲ δικαστήρια μισθοφόρα κατέστησε Περικλῆς, καὶ τοῦτον δὴ τὸν τρόπον ἕκαστος τῶν δημαγωγῶν προήγαγεν αὐξῶν εἰς τὴν νῦν δημοκρατίαν. φαίνεται δ' οὐ κατὰ τὴν Σόλωνος γενέσθαι τοῦτο προαίρεσιν, ἀλλὰ μᾶλλον ἀπὸ συμπτώματος (τῆς ναυαρχίας γὰρ ἐν τοῖς Μηδικοῖς ὁ δῆμος αἴτιος γενόμενος ἐφρονηματίσθη καὶ δημαγωγοὺς ἔλαβε φαύλους ἀντιπολιτευομένων τῶν ἐπιεικῶν), ἐπεὶ Σόλων γε ἔοικε τὴν ἀναγκαιοτάτην ἀποδιδόναι τῷ δήμῳ δύναμιν, τὸ τὰς ἀρχὰς αἰρεῖσθαι καὶ εὐθύνειν (μηδὲ γὰρ τούτου κύριος ὢν ὁ δῆμος δοῦλος ἂν εἴη καὶ πολέμιος), τὰς δ' ἀρχὰς ἐκ τῶν γνωρίμων καὶ τῶν εὐπόρων κατέστησε πάσας, ἐκ τῶν πεντακοσιομεδίμων καὶ ζευγитῶν καὶ τρίτου τέλους τῆς καλουμένης ἱππάδος· τὸ δὲ τέταρτον τὸ θητικόν, οἷς οὐδεμιᾷς ἀρχῇς μετῆν.

νομοθεταὶ δ' ἐγένοντο Ζάλευκός τε Λοκροῖς τοῖς ἐπιξεφυρίοις, καὶ Χαρώνδας ὁ Καταναῖος τοῖς αὐτοῦ πολίταις καὶ ταῖς ἄλλαις ταῖς Χαλκιδικαῖς πόλεσι ταῖς περὶ Ἰταλίαν καὶ Σικελίαν. πειρῶνται δὲ τινες καὶ συνάγειν ὡς Ὀνομακρίτου μὲν γενομένου πρώτου δεινοῦ περὶ νομοθεσίαν, γυμνασθῆναι δ' αὐτὸν ἐν Κρήτῃ, Λοκρὸν ὄντα καὶ ἐπιδημοῦντα, κατὰ τέχνην μαντικὴν· τούτου δὲ γενέσθαι Θάλητα ἐταῖρον, Θάλητος δ' ἀκροατὴν Λυκοῦργον καὶ Ζάλευκον, Ζαλεύκου δὲ Χαρώνδαν. ἀλλὰ ταῦτα μὲν λέγουσιν ἀσκεπτότερον τῶν χρόνων λέγοντες. ἐγένετο δὲ καὶ Φιλόλαος ὁ Κορίνθιος νομοθέτης Θηβαίοις. ἦν δ' ὁ Φιλόλαος τὸ μὲν γένος τῶν Βακχιαδῶν, ἐραστὴς δὲ γενόμενος Διοκλέους τοῦ νικήσαντος Ὀλυμπίασιν, ὡς ἐκεῖνος τὴν πόλιν ἔλιπε διαμισήσας τὸν ἔρωτα τὸν τῆς μητρὸς Ἀλκυόνης, ἀπῆλθεν εἰς Θήβας· κάκεῖ τὸν βίον ἐτελεύτησαν ἀμφοτέροι. καὶ νῦν ἔτι δεικνύουσι τοὺς τάφους αὐτῶν ἀλλήλοισι μὲν εὐσυνόπτους ὄντας, πρὸς δὲ τὴν τῶν Κορινθίων χώραν τὸν μὲν σύνοπτον τὸν δ' οὐ σύνοπτον· μυθολογοῦσι γὰρ αὐτοὺς οὕτω τάξασθαι τὴν ταφήν, τὸν

μὲν Διοκλέα διὰ τὴν ἀπέχθειαν τοῦ πάθους, ὅπως μὴ ἄποπτος ἔσται ἡ Κορινθία ἀπὸ τοῦ χώματος, τὸν δὲ Φιλόλαον ὅπως [1274b] ἄποπτος. ὤκησαν μὲν οὖν διὰ τὴν τοιαύτην αἰτίαν παρὰ τοῖς Θηβαίοις, νομοθέτης δ' αὐτοῖς ἐγένετο Φιλόλαος περὶ τ' ἄλλων τινῶν καὶ περὶ τῆς παιδοποιίας, οὓς καλοῦσιν ἐκεῖνοι νόμους θετικούς· καὶ τοῦτ' ἐστὶν ἰδίως ὑπ' ἐκείνου νενομοθετημένον, ὅπως ὁ ἀριθμὸς σφύζεται τῶν κλήρων. Χαρώνδου δ' ἴδιον μὲν οὐδέν ἐστι πλὴν αἱ δίκαι τῶν ψευδομαρτυριῶν (πρῶτος γὰρ ἐποίησε τὴν ἐπίσκηψιν), τῇ δ' ἀκριβεΐᾳ τῶν νόμων ἐστὶ γλαφυρότερος καὶ τῶν νῦν νομοθετῶν.

Φαλέου δ' ἴδιον ἡ τῶν οὐσιῶν ἀνομάλωσις, Πλάτωνος δ' ἡ τε τῶν γυναικῶν καὶ παιδῶν καὶ τῆς οὐσίας κοινότης καὶ τὰ συσσίτια τῶν γυναικῶν, ἔτι δ' ὁ περὶ τὴν μέθην νόμος, τὸ τοὺς νήφοντας συμποσιαρχεῖν, καὶ τὴν ἐν τοῖς πολεμικοῖς ἄσκησιν ὅπως ἀμφιδέξιοι γίνωνται κατὰ τὴν μελέτην, ὡς δέον μὴ τὴν μὲν χρήσιμον εἶναι τοῖν χεροῖν τὴν δὲ ἄχρηστον. Δράκοντος δὲ νόμοι μὲν εἰσὶ, πολιτεία δ' ὑπαρχούσῃ τοὺς νόμους ἔθηκεν· ἴδιον δ' ἐν τοῖς νόμοις οὐδὲν ἔστιν ὅ τι καὶ μνείας ἄξιον, πλὴν ἡ χαλεπότης διὰ τὸ τῆς ζημίας μέγεθος. ἐγένετο δὲ καὶ Πιττακὸς νόμων δημιουργὸς ἀλλ' οὐ πολιτείας· νόμος δ' ἴδιος αὐτοῦ τὸ τοὺς μεθύοντας, ἂν τι πταίσωσι, πλείω ζημίαν ἀποτίνειν τῶν νηφόντων· διὰ γὰρ τὸ πλείους ὑβρίζειν μεθύοντας ἢ νήφοντας οὐ πρὸς τὴν συγγνώμην ἀπέβλεψεν, ὅτι δεῖ μεθύουσιν ἔχειν μᾶλλον, ἀλλὰ πρὸς τὸ συμφέρον. ἐγένετο δὲ καὶ Ἀνδροδάμας Ῥηγῖνος νομοθέτης Χαλκιδεῦσι τοῖς ἐπὶ Θράκης, οὗ τὰ περὶ τε τὰ φονικὰ καὶ τὰς ἐπικλήρους ἐστίν· οὐ μὴν ἀλλὰ ἰδιόν γε οὐδὲν αὐτοῦ λέγειν ἔχοι τις ἄν. τὰ μὲν οὖν περὶ τὰς πολιτείας, τὰς τε κυρίας καὶ τὰς ὑπὸ τινῶν εἰρημένους, ἔστω τεθεωρημένα τὸν τρόπον τοῦτον.

Τῷ περὶ πολιτείας ἐπισκοποῦντι, καὶ τίς ἐκάστη καὶ ποία τις, σχεδὸν πρώτη σκέψις περὶ πόλεως ἰδεῖν, τί ποτέ ἐστιν ἡ πόλις. νῦν γὰρ ἀμφισβητοῦσιν, οἱ μὲν φάσκοντες τὴν πόλιν πεπραχέναι τὴν πρᾶξιν, οἱ δ' οὐ τὴν πόλιν ἀλλὰ τὴν ὀλιγαρχίαν ἢ τὸν τύραννον· τοῦ δὲ πολιτικοῦ καὶ τοῦ νομοθέτου πᾶσαν ὁρῶμεν τὴν πραγματείαν οὔσαν περὶ πόλιν, ἡ δὲ πολιτεία τῶν τὴν πόλιν οἰκούντων ἐστὶ τάξις τις. ἐπεὶ δ' ἡ πόλις τῶν συγκειμένων, καθάπερ ἄλλο τι τῶν ὅλων μὲν συνεστώτων δ' ἐκ πολλῶν μορίων, δῆλον ὅτι πρότερον ὁ πολίτης ζητητέος· ἡ γὰρ πόλις πολιτῶν τι πληθός ἐστιν.

[1275a] ὥστε τίνα χρὴ καλεῖν πολίτην καὶ τίς ὁ πολίτης ἐστὶ σκεπτέον. καὶ γὰρ ὁ πολίτης ἀμφισβητεῖται πολλάκις· οὐ γὰρ τὸν αὐτὸν ὁμολογοῦσι πάντες εἶναι πολίτην· ἔστι γὰρ τις ὃς ἐν δημοκρατίᾳ πολίτης ὢν ἐν ὀλιγαρχίᾳ πολλάκις οὐκ ἔστι πολίτης. τοὺς μὲν οὖν ἄλλως πως τυγχάνοντας ταύτης τῆς προσηγορίας, οἷον τοὺς ποιητοὺς πολίτας, ἀφετέον· ὁ δὲ πολίτης οὐ τῷ οἰκεῖν που πολίτης ἐστίν (καὶ γὰρ μέτοικοι καὶ δοῦλοι κοινωνοῦσι τῆς οἰκίσεως), οὐδ' οἱ τῶν δικαίων μετέχοντες οὕτως ὥστε καὶ δίκην ὑπέχειν καὶ δικάζεσθαι (τοῦτο γὰρ ὑπάρχει καὶ τοῖς ἀπὸ συμβόλων κοινωνοῦσιν [καὶ γὰρ ταῦτα τοῦτοις ὑπάρχει]· πολλαχοῦ μὲν οὖν οὐδὲ τούτων τελέως οἱ μέτοικοι μετέχουσιν, ἀλλὰ νέμειν ἀνάγκη προστάτην, ὥστε ἀτελῶς πως μετέχουσι τῆς τοιαύτης κοινωνίας), ἀλλὰ καθάπερ καὶ παῖδας τοὺς μήπω δι' ἡλικίαν ἐγγεγραμμένους καὶ τοὺς γέροντας τοὺς ἀφειμένους φατέον εἶναι μὲν πως πολίτας, οὐχ ἀπλῶς δὲ λίαν ἀλλὰ προστιθέντας τοὺς μὲν ἀτελεῖς τοὺς δὲ παρηκμακότες ἢ τι τοιοῦτον ἕτερον (οὐδὲν γὰρ διαφέρει· δῆλον γὰρ τὸ λεγόμενον). ζητοῦμεν γὰρ τὸν ἀπλῶς πολίτην καὶ μηδὲν ἔχοντα τοιοῦτον ἔγκλημα διορθώσεως δεόμενον, ἐπεὶ καὶ περὶ τῶν ἀτίμων καὶ φυγάδων ἔστι τὰ τοιαῦτα καὶ διαπορεῖν καὶ λύειν. πολίτης δ' ἀπλῶς οὐδενὶ τῶν ἄλλων ὀρίζεται μᾶλλον ἢ τῷ μετέχειν κρίσεως καὶ ἀρχῆς. τῶν δ' ἀρχῶν αἱ μὲν εἰσι διηρημέναι κατὰ χρόνον, ὥστ' ἐνίας μὲν ὅλως δις τὸν αὐτὸν οὐκ ἔξεστιν ἄρχειν, ἢ διὰ τινῶν ὠρισμένων χρόνων· ὁ δ' ἀόριστος, οἷον ὁ δικαστὴς καὶ <ὁ> ἐκκλησιαστής. τάχα μὲν οὖν ἂν φαίη τις οὐδ' ἄρχοντας εἶναι τοὺς τοιούτους, οὐδὲ μετέχειν διὰ ταῦτ' ἀρχῆς· καίτοι γελοῖον τοὺς κυριωτάτους

ἀποστερεῖν ἀρχῆς. ἀλλὰ διαφερέτω μηδέν· περὶ ὀνόματος γὰρ ὁ λόγος· ἀνώνυμον γὰρ τὸ κοινὸν ἐπὶ δικαστοῦ καὶ ἐκκλησιαστοῦ, τί δεῖ ταῦτ' ἄμφω καλεῖν. ἔστω δὴ διορισμοῦ χάριν ἀόριστος ἀρχή. τίθεμεν δὴ πολίτας τοὺς οὕτω μετέχοντας.

ὁ μὲν οὖν μάλιστ' ἂν ἐφαρμόσας ὀρισμὸς ἐπὶ πάντας τοὺς λεγομένους πολίτας σχεδὸν τοιοῦτός ἐστιν· δεῖ δὲ μὴ λανθάνειν ὅτι τῶν πραγμάτων ἐν οἷς τὰ ὑποκείμενα διαφέρει τῷ εἶδει, καὶ τὸ μὲν αὐτῶν ἐστὶ πρῶτον τὸ δὲ δεύτερον τὸ δ' ἐχόμενον, ἢ τὸ παράπαν οὐδὲν ἔστιν, ἢ τοιαῦτα, τὸ κοινόν, ἢ γλίσχρους. τὰς δὲ πολιτείας ὁρῶμεν εἶδει διαφερούσας ἀλλήλων, καὶ τὰς μὲν ὑστέρας τὰς δὲ [1275b] προτέρας οὕσας· τὰς γὰρ ἡμαρτημένας καὶ παρεκβεβηκυίας ἀναγκαῖον ὑστέρας εἶναι τῶν ἀναμαρτήτων (τὰς δὲ παρεκβεβηκυίας πῶς λέγομεν, ὕστερον ἔσται φανερόν). ὥστε καὶ τὸν πολίτην ἕτερον ἀναγκαῖον εἶναι τὸν καθ' ἐκάστην πολιτείαν. διόπερ ὁ λεχθεὶς ἐν μὲν δημοκρατίᾳ μάλιστ' ἐστὶ πολίτης, ἐν δὲ ταῖς ἄλλαις ἐνδέχεται μὲν, οὐ μὴν ἀναγκαῖον. «ἐν» ἐνίαις γὰρ οὐκ ἔστι δῆμος, οὐδ' ἐκκλησίαν νομίζουσιν ἀλλὰ συγκλήτους, καὶ τὰς δίκας δικάζουσι κατὰ μέρος, οἷον ἐν Λακεδαιμόνι τὰς τῶν συμβολαίων δικάζει τῶν ἐφόρων ἄλλος ἄλλας, οἱ δὲ γέροντες τὰς φονικάς, ἑτέρα δ' ἴσως ἀρχή τις ἑτέρας. τὸν αὐτὸν δὲ τρόπον καὶ περὶ Καρχηδόνα· πάσας γὰρ ἀρχαί τινες κρίνουσι τὰς δίκας. ἀλλ' ἔχει διόρθωσιν ὁ τοῦ πολίτου διορισμός. ἐν γὰρ ταῖς ἄλλαις πολιτείαις οὐχ ὁ ἀόριστος ἄρχων ἐκκλησιαστικὴς ἐστὶ καὶ δικαστής, ἀλλὰ ὁ κατὰ τὴν ἀρχὴν ὠρισμένος· τούτων γὰρ ἢ πᾶσιν ἢ τισὶν ἀποδέδεται τὸ βουλευέσθαι καὶ δικάζειν ἢ περὶ πάντων ἢ περὶ τινῶν. τίς μὲν οὖν ἐστὶν ὁ πολίτης, ἐκ τούτων φανερόν· ᾧ γὰρ ἐξουσία κοινωνεῖν ἀρχῆς βουλευτικῆς καὶ κριτικῆς, πολίτην ἤδη λέγομεν εἶναι ταύτης τῆς πόλεως, πόλιν δὲ τὸ τῶν τοιούτων πλῆθος ἱκανὸν πρὸς αὐτάρκειαν ζωῆς, ὡς ἀπλῶς εἶπεῖν.

Ὅρίζονται δὲ πρὸς τὴν χρῆσιν πολίτην τὸν ἐξ ἀμφοτέρων πολιτῶν καὶ μὴ θατέρου μόνον, οἷον πατρός ἢ μητρός, οἱ δὲ καὶ τοῦτ' ἐπὶ πλεον ζητοῦσιν, οἷον ἐπὶ πάππους δύο ἢ τρεῖς ἢ πλείους. οὕτω δὲ ὀριζομένων πολιτικῶς καὶ παχέως, ἀποροῦσί τινες τὸν τρίτον ἐκεῖνον ἢ τέταρτον, πῶς ἔσται πολίτης. Γοργίας μὲν οὖν ὁ Λεοντῖνος, τὰ μὲν ἴσως ἀπορῶν τὰ δ' εἰρωνευόμενος, ἔφη, καθάπερ ὄλμους εἶναι τοὺς ὑπὸ τῶν ὀλμοποιῶν πεποιημένους, οὕτω καὶ Λαρισαίους τοὺς ὑπὸ τῶν δημιουργῶν πεποιημένους· εἶναι γὰρ τινὰς λαριστοποιούς. ἔστι δ' ἀπλοῦν. εἰ γὰρ μετεῖχον κατὰ τὸν ῥηθέντα

διορισμὸν τῆς πολιτείας, ἦσαν πολῖται· καὶ γὰρ οὐδὲ δυνατόν ἐφαρμόττειν τὸ ἐκ πολίτου ἢ ἐκ πολίτιδος ἐπὶ τῶν πρώτων οἰκησάντων ἢ κτισάντων.

ἀλλ' ἴσως ἐκεῖνο μᾶλλον ἔχει ἀπορίαν, ὅσοι μετέσχον μεταβολῆς γενομένης πολιτείας, οἷον ᾠδ' Ἀθήνησιν ἐποίησε Κλεισθένης μετὰ τὴν τῶν τυράννων ἐκβολήν· πολλοὺς γὰρ ἐφυλέτευσε ξένους καὶ δούλους μετοίκους. τὸ δ' ἀμφισβήτημα πρὸς τούτους ἐστὶν οὐ τίς πολίτης, ἀλλὰ πότερον ἀδίκως ἢ δικαίως. καίτοι κἂν τοῦτό τις ἔτι προσαπορήσειεν, [1276a] ἄρ' εἰ μὴ δικαίως πολίτης, οὐ πολίτης, ὥς ταὐτὸ δυναμένου τοῦ τ' ἀδίκου καὶ τοῦ ψευδοῦς. ἐπεὶ δ' ὀρώμεν καὶ ἄρχοντάς τινας ἀδίκως, οὓς ἄρχειν μὲν φήσομεν ἀλλ' οὐ δικαίως, ὁ δὲ πολίτης ἀρχῇ τινὶ διωρισμένος ἐστίν (ὁ γὰρ κοινωνῶν τῆς τοιαύτης ἀρχῆς πολίτης ἐστίν, ὥς ἔφαμεν), δῆλον ὅτι πολίτας μὲν εἶναι φατέον καὶ τούτους· περὶ δὲ τοῦ δικαίως ἢ μὴ δικαίως συνάπτει πρὸς τὴν εἰρημένην πρότερον ἀμφισβήτησιν. ἀποροῦσι γάρ τινες πόθ' ἢ πόλις ἔπραξε καὶ πότε οὐχ ἢ πόλις, οἷον ὅταν ἐξ ὀλιγαρχίας ἢ τυραννίδος γένηται δημοκρατία (τότε γὰρ οὔτε τὰ συμβόλαια ἔνιοι βούλονται διαλύειν, ὥς οὐ τῆς πόλεως ἀλλὰ τοῦ τυράννου λαβόντος, οὔτ' ἄλλα πολλὰ τῶν τοιούτων, ὥς ἐνίας τῶν πολιτειῶν τῷ κρατεῖν οὔσας, ἀλλὰ οὐ διὰ τὸ κοινῇ συμφέρον)· εἴπερ οὖν καὶ δημοκρατοῦνται τινες κατὰ τὸν τρόπον τοῦτον, ὁμοίως τῆς πόλεως φατέον εἶναι ταύτης τὰς τῆς πολιτείας ταύτης πράξεις καὶ τὰς ἐκ τῆς ὀλιγαρχίας καὶ τῆς τυραννίδος. ἔοικε δ' οἰκεῖος ὁ λόγος εἶναι τῆς ἀπορίας ταύτης πως, πότε χρὴ λέγειν τὴν πόλιν εἶναι τὴν αὐτὴν ἢ μὴ τὴν αὐτὴν ἀλλ' ἑτέραν. ἢ μὲν οὖν ἐπιπολαιότατη τῆς ἀπορίας ζήτησις περὶ τὸν τόπον καὶ τοὺς ἀνθρώπους ἐστίν· ἐνδέχεται γὰρ διαζευχθῆναι τὸν τόπον καὶ τοὺς ἀνθρώπους, καὶ τοὺς μὲν ἕτερον τοὺς δ' ἕτερον οἰκῆσαι τόπον.

ταύτην μὲν οὖν πραοτέραν θετέον τὴν ἀπορίαν (πολλαχῶς γὰρ τῆς πόλεως λεγομένης, ἐστὶ πως εὐμάρεια τῆς τοιαύτης ζητήσεως)· ὁμοίως δὲ καὶ τῶν τὸν αὐτὸν κατοικούντων ἀνθρώπων πότε δεῖ νομίζειν μίαν εἶναι τὴν πόλιν; οὐ γὰρ δὴ τοῖς τεῖχεσιν· εἴη γὰρ ἂν Πελοποννήσῳ περιβαλεῖν ἓν τεῖχος. τοιαύτη δ' ἴσως ἐστὶ καὶ Βαβυλῶν καὶ πᾶσα ἥτις ἔχει περιγραφὴν μᾶλλον ἔθνους ἢ πόλεως· ἥς γέ φασιν ἐαλωκυίας τρίτην ἡμέραν οὐκ αἰσθέσθαι τι μέρος τῆς πόλεως.

ἀλλὰ περὶ μὲν ταύτης τῆς ἀπορίας εἰς ἄλλον καιρὸν χρήσιμος ἡ

σκέψις (περὶ γὰρ μεγέθους τῆς πόλεως, τό τε πόσον καὶ πότερον ἔθνος ἐν ἡ πλείω συμφέρει, δεῖ μὴ λανθάνειν τὸν πολιτικόν)· ἀλλὰ τῶν αὐτῶν κατοικούντων τὸν αὐτὸν τόπον, πότερον ἕως ἂν ἢ τὸ γένος ταῦτὸ τῶν κατοικούντων, τὴν αὐτὴν εἶναι φατέον πόλιν, καίπερ αἰεὶ τῶν μὲν φθειρομένων τῶν δὲ γινομένων, ὥσπερ καὶ ποταμοὺς εἰώθαμεν λέγειν τοὺς αὐτοὺς καὶ κρήνας τὰς αὐτάς, καίπερ αἰεὶ τοῦ μὲν ἐπιγινομένου νόματος τοῦ δ' ὑπεξιόντος, ἢ τοὺς μὲν ἀνθρώπους φατέον εἶναι τοὺς αὐτοὺς διὰ τὴν τοιαύτην αἰτίαν, τὴν δὲ [1276b] πόλιν ἐτέραν; εἴπερ γὰρ ἐστὶ κοινωνία τις ἢ πόλις, ἐστὶ δὲ κοινωνία πολιτῶν πολιτείας, γινομένης ἐτέρας τῷ εἶδει καὶ διαφορῶσης τῆς πολιτείας ἀναγκαῖον εἶναι δόξειεν ἂν καὶ τὴν πόλιν εἶναι μὴ τὴν αὐτὴν, ὥσπερ γε καὶ χορὸν ὅτε μὲν κωμικὸν ὅτε δὲ τραγικὸν ἕτερον εἶναί φαμεν, τῶν αὐτῶν πολλάκις ἀνθρώπων ὄντων, ὁμοίως δὲ καὶ πᾶσαν ἄλλην κοινωνίαν καὶ σύνθεσιν ἐτέραν, ἂν εἶδος ἕτερον ἢ τῆς συνθέσεως, οἷον ἀρμονίαν τῶν αὐτῶν φθόγγων ἐτέραν εἶναι λέγομεν, ἂν ὅτε μὲν ἢ Δωριος ὅτε δὲ Φρύγιος. εἰ δὴ τοῦτον ἔχει τὸν τρόπον, φανερόν ὅτι μάλιστα λεκτέον τὴν αὐτὴν πόλιν εἰς τὴν πολιτείαν βλέποντας· ὄνομα δὲ καλεῖν ἕτερον ἢ ταὐτὸν ἔξεστι καὶ τῶν αὐτῶν κατοικούντων αὐτὴν καὶ πάνπαν ἐτέρων ἀνθρώπων. εἰ δὲ δίκαιον διαλύειν ἢ μὴ διαλύειν, ὅταν εἰς ἐτέραν μεταβάλλῃ πολιτείαν ἢ πόλιν, λόγος ἕτερος.

Τῶν δὲ νῦν εἰρημένων ἐχόμενόν ἐστιν ἐπισκέψασθαι πότερον τὴν αὐτὴν ἀρετὴν ἀνδρὸς ἀγαθοῦ καὶ πολίτου σπουδαίου θετέον, ἢ μὴ τὴν αὐτὴν. ἀλλὰ μὴν εἴ γε τοῦτο τυχεῖν δεῖ ζητήσεως, τὴν τοῦ πολίτου τύπῳ τινὶ πρῶτον ληπτέον. ὥσπερ οὖν ὁ πλωτὴρ εἰς τις τῶν κοινωνῶν ἐστίν, οὕτω καὶ τὸν πολίτην φαμέν. τῶν δὲ πλωτῆρων καίπερ ἀνομοίων ὄντων τὴν δύναμιν (ὁ μὲν γάρ ἐστιν ἐρέτης, ὁ δὲ κυβερνήτης, ὁ δὲ πρῶρεὺς, ὁ δ' ἄλλην τιν' ἔχων τοιαύτην ἐπωνυμίαν) δῆλον ὥς ὁ μὲν ἀκριβέστατος ἐκάστου λόγος ἴδιος ἐστὶ τῆς ἀρετῆς, ὁμοίως δὲ καὶ κοινός τις ἐφαρμόσει πᾶσιν. ἢ γὰρ σωτηρία τῆς ναυτιλίας ἔργον ἐστὶν αὐτῶν πάντων· τούτου γὰρ ἕκαστος ὀρέγεται τῶν πλωτῆρων. ὁμοίως τοίνυν καὶ τῶν πολιτῶν, καίπερ ἀνομοίων ὄντων, ἢ σωτηρία τῆς κοινωνίας ἔργον ἐστί, κοινωνία δ' ἐστὶν ἢ πολιτεία· διὸ τὴν ἀρετὴν ἀναγκαῖον εἶναι τοῦ πολίτου πρὸς τὴν πολιτείαν. εἴπερ οὖν ἐστὶ πλείω πολιτείας εἶδη, δῆλον ὥς οὐκ ἐνδέχεται τοῦ σπουδαίου πολίτου μίαν ἀρετὴν εἶναι, τὴν τελείαν· τὸν δ' ἀγαθὸν ἄνδρα φαμέν κατὰ μίαν ἀρετὴν εἶναι, τὴν

τελείαν.

ὅτι μὲν οὖν ἐνδέχεται πολίτην ὄντα σπουδαῖον μὴ κεκτῆσθαι τὴν ἀρετὴν καθ' ἣν σπουδαῖος ἀνὴρ, φανερόν· οὐ μὴν ἀλλὰ καὶ κατ' ἄλλον τρόπον ἔστι διαποροῦντας ἐπελθεῖν τὸν αὐτὸν λόγον περὶ τῆς ἀρίστης πολιτείας. εἰ γὰρ ἀδύνατον ἐξ ἀπάντων σπουδαίων ὄντων εἶναι πόλιν, δεῖ γ' ἕκαστον τὸ καθ' αὐτὸν ἔργον εὖ ποιεῖν, τοῦτο δὲ ἀπ' ἀρετῆς· ἐπεὶ δὲ ἀδύνατον ὁμοίους εἶναι πάντας τοὺς πολίτας, οὐκ ἂν [1277a] εἴη μία ἀρετὴ πολίτου καὶ ἀνδρὸς ἀγαθοῦ. τὴν μὲν γὰρ τοῦ σπουδαίου πολίτου δεῖ πᾶσιν ὑπάρχειν (οὕτω γὰρ ἀρίστην ἀναγκαῖον εἶναι τὴν πόλιν), τὴν δὲ τοῦ ἀνδρὸς τοῦ ἀγαθοῦ ἀδύνατον, εἰ μὴ πάντας ἀναγκαῖον ἀγαθοὺς εἶναι τοὺς ἐν τῇ σπουδαίᾳ πόλει πολίτας. ἔτι ἐπεὶ ἐξ ἀνομοίων ἢ πόλεις, ὥσπερ ζῶον εὐθὺς ἐκ ψυχῆς καὶ σώματος, καὶ ψυχῇ ἐκ λόγου καὶ ὀρέξεως, καὶ οἰκία ἐξ ἀνδρὸς καὶ γυναικός, καὶ κτῆσις ἐκ δεσπότου καὶ δούλου, τὸν αὐτὸν τρόπον καὶ πόλεις ἐξ ἀπάντων τε τούτων καὶ πρὸς τούτοις ἐξ ἄλλων ἀνομοίων συνέστηκεν εἰδὼν, ἀνάγκη μὴ μίαν εἶναι τὴν τῶν πολιτῶν πάντων ἀρετὴν, ὥσπερ οὐδὲ τῶν χορευτῶν κορυφαίου καὶ παραστάτου.

διότι μὲν τοίνυν ἀπλῶς οὐχ ἡ αὕτη, φανερόν ἐκ τούτων· ἀλλ' ἄρα ἔσται τινὸς ἡ αὕτη ἀρετὴ πολίτου τε σπουδαίου καὶ ἀνδρὸς σπουδαίου; φαμέν δὴ τὸν ἄρχοντα τὸν σπουδαῖον ἀγαθὸν εἶναι καὶ φρόνιμον, τὸν δὲ πολίτην οὐκ ἀναγκαῖον εἶναι φρόνιμον. καὶ τὴν παιδείαν δ' εὐθὺς ἐτέραν εἶναι λέγουσί τινες ἄρχοντος, ὥσπερ καὶ φαίνονται οἱ τῶν βασιλέων υἱεῖς ἵππικὴν καὶ πολεμικὴν παιδευόμενοι, καὶ Εὐριπίδης φησὶ “μή μοι τὰ κόμπῃ” ... ἀλλ' ὧν πόλει δεῖ”, ὡς οὐσάν τινα ἄρχοντος παιδείαν. εἰ δὲ ἡ αὕτη ἀρετὴ ἄρχοντός τε ἀγαθοῦ καὶ ἀνδρὸς ἀγαθοῦ, πολίτης δ' ἐστὶ καὶ ὁ ἀρχόμενος, οὐχ ἡ αὕτη ἀπλῶς ἂν εἴη πολίτου καὶ ἀνδρός, τινὸς μέντοι πολίτου· οὐ γὰρ ἡ αὕτη ἄρχοντος καὶ πολίτου, καὶ διὰ τοῦτ' ἴσως Ἰάσων ἔφη πεινῆν ὅτε μὴ τυραννοῖ, ὡς οὐκ ἐπιστάμενος ιδιώτης εἶναι.

ἀλλὰ μὴν ἐπαινεῖται γε τὸ δύνασθαι ἄρχειν καὶ ἄρχεσθαι, καὶ πολίτου <δοκεῖ> δοκίμου ἢ ἀρετῇ εἶναι τὸ δύνασθαι καὶ ἄρχειν καὶ ἄρχεσθαι καλῶς. εἰ οὖν τὴν μὲν τοῦ ἀγαθοῦ ἀνδρὸς τίθεμεν ἀρχικὴν, τὴν δὲ τοῦ πολίτου ἄμφω, οὐκ ἂν εἴη ἄμφω ἐπαινετὰ ὁμοίως. ἐπεὶ οὖν ποτε δοκεῖ ἕτερα, καὶ οὐ ταῦτ' αὖτε τὸν ἄρχοντα μανθάνειν καὶ τὸν ἀρχόμενον, τὸν δὲ πολίτην ἀμφοτέρ' ἐπίστασθαι καὶ μετέχειν ἀμφοῖν, τούντεῦθεν ἂν κατίδοι τις. ἔστι γὰρ ἀρχὴ δεσποτική· ταύτην δὲ τὴν περὶ τὰ ἀναγκαῖα λέγομεν, ἃ ποιεῖν ἐπίστασθαι τὸν ἄρχοντα

οὐκ ἀναγκαῖον, ἀλλὰ χρῆσθαι μᾶλλον· θάτερον δὲ καὶ ἀνδραποδῶδες. λέγω δὲ θάτερον τὸ δύνασθαι καὶ ὑπηρετεῖν τὰς διακονικὰς πράξεις. δούλου δ' εἶδη πλείω λέγομεν· αἱ γὰρ ἐργασίαι πλείους. ὧν ἓν μέρος κατέχουσιν οἱ χειρνήτες· οὗτοι δ' εἰσὶν, ὥσπερ σημαίνει καὶ τοῦνομ' αὐτό, οἱ ζῶντες ἀπὸ [1277b] τῶν χειρῶν, ἐν οἷς ὁ βάνουσος τεχνίτης ἐστίν. διὸ παρ' ἐνίοις οὐ μετεῖχον οἱ δημιουργοὶ τὸ παλαιὸν ἀρχῶν, πρὶν δῆμον γενέσθαι τὸν ἔσχατον. τὰ μὲν οὖν ἔργα τῶν ἀρχομένων οὕτως οὐ δεῖ τὸν ἀγαθὸν [οὐδὲ τὸν] πολιτικὸν οὐδὲ τὸν πολίτην τὸν ἀγαθὸν μανθάνειν, εἰ μὴ ποτε χρείας χάριν αὐτῷ πρὸς αὐτόν· οὐ γὰρ ἔτι συμβαίνει γίνεσθαι τὸν μὲν δεσπότην τὸν δὲ δούλον.

ἀλλ' ἔστι τις ἀρχὴ καθ' ἣν ἄρχει τῶν ὁμοίων τῷ γένει καὶ τῶν ἐλευθέρων. ταύτην γὰρ λέγομεν εἶναι τὴν πολιτικὴν ἀρχήν, ἣν δεῖ τὸν ἄρχοντα ἀρχόμενον μαθεῖν, οἷον ἱππαρχεῖν ἱππαρχηθέντα, στρατηγεῖν στρατηγηθέντα καὶ ταξιαρχήσαντα καὶ λοχαγήσαντα. διὸ λέγεται καὶ τοῦτο καλῶς, ὥς οὐκ ἔστιν εὖ ἄρξαι μὴ ἀρχθέντα. τούτων δὲ ἀρετὴ μὲν ἑτέρα, δεῖ δὲ τὸν πολίτην τὸν ἀγαθὸν ἐπίστασθαι καὶ δύνασθαι καὶ ἄρχεσθαι καὶ ἄρχειν, καὶ αὕτη ἀρετὴ πολίτου, τὸ τὴν τῶν ἐλευθέρων ἀρχὴν ἐπίστασθαι ἐπ' ἀμφοτέρα. καὶ ἀνδρὸς δὲ ἀγαθοῦ ἅμω, καὶ εἰ ἕτερον εἶδος σωφροσύνης καὶ δικαιοσύνης ἀρχικῆς. καὶ γὰρ ἀρχομένου μὲν ἐλευθέρου δὲ δήλον ὅτι οὐ μία ἂν εἴη τοῦ ἀγαθοῦ ἀρετὴ, οἷον δικαιοσύνη, ἀλλ' εἶδη ἔχουσα καθ' ἃ ἄρξει καὶ ἄρξεται, ὥσπερ ἀνδρὸς καὶ γυναικὸς ἑτέρα σωφροσύνη καὶ ἀνδρεία (δόξαι γὰρ ἂν εἶναι δειλὸς ἀνὴρ, εἰ οὕτως ἀνδρείος εἴη ὥσπερ γυνὴ ἀνδρεία, καὶ γυνὴ λάλος, εἰ οὕτω κοσμία εἴη ὥσπερ ὁ ἀνὴρ ὁ ἀγαθός· ἐπεὶ καὶ οἰκονομία ἑτέρα ἀνδρὸς καὶ γυναικός· τοῦ μὲν γὰρ κτᾶσθαι τῆς δὲ φυλάττειν ἔργον ἐστίν). ἡ δὲ φρόνησις ἄρχοντος ἴδιος ἀρετὴ μόνη. τὰς γὰρ ἄλλας ἔοικεν ἀναγκαῖον εἶναι κοινὰς καὶ τῶν ἀρχομένων καὶ τῶν ἀρχόντων, ἀρχομένου δέ γε οὐκ ἔστιν ἀρετὴ φρόνησις, ἀλλὰ δόξα ἀληθής· ὥσπερ αὐλοποιὸς γὰρ ὁ ἀρχόμενος, ὁ δ' ἄρχων αὐλητὴς ὁ χρώμενος. πότερον μὲν οὖν ἡ αὕτη ἀρετὴ ἀνδρὸς ἀγαθοῦ καὶ πολίτου σπουδαίου ἢ ἑτέρα, καὶ πῶς ἡ αὕτη καὶ πῶς ἑτέρα, φανερόν ἐκ τούτων.

Περὶ δὲ τὸν πολίτην ἔτι λείπεται τις τῶν ἀποριῶν. ὥς ἀληθῶς γὰρ πότερον πολίτης ἐστὶν ὃ κοινωνεῖν ἔξεστιν ἀρχῆς, ἢ καὶ τοὺς βαναύσους πολίτας θετέον; εἰ μὲν οὖν καὶ τούτους θετέον οἷς μὴ μέτεστιν ἀρχῶν, οὐχ οἷόν τε παντὸς εἶναι πολίτου τὴν τοιαύτην

ἀρετὴν (οὗτος γὰρ πολίτης)· εἰ δὲ μηδεὶς τῶν τοιούτων πολίτης, ἐν τίνι μέρει θετέος ἕκαστος; οὐδὲ γὰρ μέτοικος οὐδὲ ξένος. ἢ διὰ γε τοῦτον τὸν λόγον [1278a] οὐδὲν φήσομεν συμβαίνειν ἄτοπον; οὐδὲ γὰρ οἱ δοῦλοι τῶν εἰρημένων οὐδέν, οὐδ’ οἱ ἀπελεύθεροι. τοῦτο γὰρ ἀληθές, ὥς οὐ πάντας θετέον πολίτας ὧν ἄνευ οὐκ ἂν εἴη πόλις, ἐπεὶ οὐδ’ οἱ παῖδες ὡσαύτως πολῖται καὶ οἱ ἄνδρες, ἀλλ’ οἱ μὲν ἀπλῶς οἱ δ’ ἐξ ὑποθέσεως· πολῖται μὲν γὰρ εἰσιν, ἀλλ’ ἀτελεῖς. ἐν μὲν οὖν τοῖς ἀρχαίοις χρόνοις παρ’ ἐνίοις ἦν δοῦλον τὸ βάνουσον ἢ ξενικόν, διόπερ οἱ πολλοὶ τοιοῦτοι καὶ νῦν· ἢ δὲ βελτίστη πόλις οὐ ποιήσει βάνουσον πολίτην. εἰ δὲ καὶ οὗτος πολίτης, ἀλλὰ πολίτου ἀρετὴν ἦν εἵπομεν λεκτέον οὐ παντός, οὐδ’ ἐλευθέρου μόνον, ἀλλ’ ὅσοι τῶν ἔργων εἰσιν ἀφειμένοι τῶν ἀναγκαίων. τῶν δ’ ἀναγκαίων οἱ μὲν ἐνὶ λειτουργοῦντες τὰ τοιαῦτα δοῦλοι, οἱ δὲ κοινοὶ βάνουσοι καὶ θῆτες. φανερόν δ’ ἐντεῦθεν μικρὸν ἐπισκεψαμένοις πῶς ἔχει περὶ αὐτῶν· αὐτὸ γὰρ [φανέν] τὸ λεχθέν ποιεῖ δηλόν. ἐπεὶ γὰρ πλείους εἰσιν αἱ πολιτεῖαι, καὶ εἶδη πολίτου ἀναγκαῖον εἶναι πλείω, καὶ μάλιστα τοῦ ἀρχομένου πολίτου, ὥστ’ ἐν μὲν τινὶ πολιτείᾳ τὸν βάνουσον ἀναγκαῖον εἶναι καὶ τὸν θῆτα πολίτας, ἐν τισὶ δ’ ἀδύνατον, οἷον εἴ τις ἐστὶν ἣν καλοῦσιν ἀριστοκρατικὴν καὶ ἐν ἣ κατ’ ἀρετὴν αἱ τιμαὶ δίδονται καὶ κατ’ ἀξίαν· οὐ γὰρ οἷόν τ’ ἐπιτηδεῦσαι τὰ τῆς ἀρετῆς ζῶντα βίον βάνουσον ἢ θητικόν. ἐν δὲ ταῖς ὀλιγαρχίαις θῆτα μὲν οὐκ ἐνδέχεται εἶναι πολίτην (ἀπὸ τιμημάτων γὰρ μακρῶν αἱ μεθέξεις τῶν ἀρχῶν), βάνουσον δὲ ἐνδέχεται· πλουτοῦσι γὰρ καὶ οἱ πολλοὶ τῶν τεχνιτῶν. ἐν Θήβαις δὲ νόμος ἦν τὸν δέκα ἐτῶν μὴ ἀπεσχημένον τῆς ἀγορᾶς μὴ μετέχειν ἀρχῆς. ἐν πολλαῖς δὲ πολιτείαις προσεφέλκει τινὰς καὶ τῶν ξένων ὁ νόμος· ὁ γὰρ ἐκ πολίτιδος ἐν τισὶ δημοκρατίαις πολίτης ἐστίν, τὸν αὐτὸν δὲ τρόπον ἔχει καὶ τὰ περὶ τοὺς νόθους παρὰ πολλοῖς. οὐ μὴν ἀλλ’ ἐπεὶ δι’ ἔνδειαν τῶν γνησίων πολιτῶν ποιοῦνται πολίτας τοὺς τοιούτους (διὰ γὰρ ὀλιγανθρωπίαν οὕτω χρῶνται τοῖς νόμοις), εὐποροῦντες δὴ ὄχλου κατὰ μικρὸν παραιροῦνται τοὺς ἐκ δούλου πρῶτον ἢ δούλης, εἶτα τοὺς ἀπὸ γυναικῶν, τέλος δὲ μόνον τοὺς ἐξ ἀμφοῖν ἀστῶν πολίτας ποιοῦσιν.

ὅτι μὲν οὖν εἶδη πλείω πολίτου, φανερόν ἐκ τούτων, καὶ ὅτι λέγεται μάλιστα πολίτης ὁ μετέχων τῶν τιμῶν, ὥσπερ καὶ Ὅμηρος ἐποίησεν “ὥς εἴ τιν’ ἀτίμητον μετανάστην”· ὥσπερ μέτοικος γὰρ ἐστὶν ὁ τῶν τιμῶν μὴ μετέχων. ἀλλ’ ὅπου τὸ τοιοῦτον ἐπικεκρυμμένον ἐστίν, ἀπάτης χάριν τῶν συνοικούντων ἐστίν.

πότερον μὲν οὖν ἑτέραν ἢ τὴν αὐτὴν θετέον, [1278b] καθ' ἣν ἀνὴρ ἀγαθὸς ἐστὶ καὶ πολίτης σπουδαῖος, δῆλον ἐκ τῶν εἰρημένων, ὅτι τινὸς μὲν πόλεως ὁ αὐτὸς τινὸς δ' ἕτερος, κακείνος οὐ πᾶς ἄλλ' ὁ πολιτικὸς καὶ κύριος ἢ δυνάμενος εἶναι κύριος, ἢ καθ' αὐτὸν ἢ μετ' ἄλλων, τῆς τῶν κοινῶν ἐπιμελείας.

Ἐπεὶ δὲ ταῦτα διώρισται, τὸ μετὰ ταῦτα σκεπτέον, πότερον μίαν θετέον πολιτείαν ἢ πλείους, κἂν εἰ πλείους, τίνες καὶ πόσαι, καὶ διαφοραὶ τίνες αὐτῶν εἰσιν. ἔστι δὲ πολιτεία πόλεως τάξις τῶν τε ἄλλων ἀρχῶν καὶ μάλιστα τῆς κυρίας πάντων. κύριον μὲν γὰρ πανταχοῦ τὸ πολίτευμα τῆς πόλεως, πολίτευμα δ' ἐστὶν ἡ πολιτεία. λέγω δ' οἷον ἐν μὲν ταῖς δημοκρατίαις κύριος ὁ δῆμος, οἱ δ' ὀλίγοι τοῦναντίον ἐν ταῖς ὀλιγαρχίαις, φαμὲν δὲ καὶ πολιτείαν ἑτέραν εἶναι τούτων. τὸν αὐτὸν δὲ τοῦτον ἐροῦμεν λόγον καὶ περὶ τῶν ἄλλων. ὑποθετέον δὴ πρῶτον τίνος χάριν συνέστηκε πόλις, καὶ τῆς ἀρχῆς εἶδη πόσα τῆς περὶ ἄνθρωπον καὶ τὴν κοινωνίαν τῆς ζωῆς. εἴρηται δὴ κατὰ τοὺς πρώτους λόγους, ἐν οἷς περὶ οἰκονομίας διωρίσθη καὶ δεσποτείας, καὶ ὅτι φύσει μὲν ἐστὶν ἄνθρωπος ζῶν πολιτικόν. διὸ καὶ μηδὲν δεόμενοι τῆς παρὰ ἀλλήλων βοηθείας οὐκ ἔλαττον ὀρέγονται τοῦ συζῆν· οὐ μὴν ἀλλὰ καὶ τὸ κοινῇ συμφέρον συνάγει, καθ' ὅσον ἐπιβάλλει μέρος ἐκάστω τοῦ ζῆν καλῶς. μάλιστα μὲν οὖν τοῦτ' ἐστὶ τέλος, καὶ κοινῇ πᾶσι καὶ χωρὶς· συνέρχονται δὲ καὶ τοῦ ζῆν ἕνεκεν αὐτοῦ καὶ συνέχουσι τὴν πολιτικὴν κοινωνίαν. ἴσως γὰρ ἔνεστί τι τοῦ καλοῦ μόνον καὶ κατὰ τὸ ζῆν αὐτὸ μόνον, ἂν μὴ τοῖς χαλεποῖς κατὰ τὸν βίον ὑπερβάλῃ λίαν. δῆλον δ' ὡς καρτεροῦσι πολλὴν κακοπάθειαν οἱ πολλοὶ τῶν ἀνθρώπων γλιχόμενοι τοῦ ζῆν, ὡς ἐνούσης τινὸς εὐημερίας ἐν αὐτῷ καὶ γλυκύτητος φυσικῆς.

ἀλλὰ μὴν καὶ τῆς ἀρχῆς γε τοὺς λεγομένους τρόπους ῥάδιον διελεῖν· καὶ γὰρ ἐν τοῖς ἐξωτερικοῖς λόγοις διοριζόμεθα περὶ αὐτῶν πολλάκις. ἡ μὲν γὰρ δεσποτεία, καίπερ ὄντος κατ' ἀλήθειαν τῷ τε φύσει δούλῳ καὶ τῷ φύσει δεσπότῃ ταῦτο συμφέροντος, ὅμως ἄρχει πρὸς τὸ τοῦ δεσπότου συμφέρον οὐδὲν ἥττον, πρὸς δὲ τὸ τοῦ δούλου κατὰ συμβεβηκὸς (οὐ γὰρ ἐνδέχεται φθειρομένου τοῦ δούλου σφύζεσθαι τὴν δεσποτείαν)· ἡ δὲ τέκνων ἀρχὴ καὶ γυναικὸς καὶ τῆς οἰκίας πάσης, ἣν δὴ καλοῦμεν οἰκονομικὴν, ἥτοι τῶν ἀρχομένων χάριν ἐστὶν ἢ κοινοῦ τινὸς ἀμφοῖν, καθ' αὐτὸ μὲν τῶν ἀρχομένων, ὥσπερ ὁρῶμεν καὶ τὰς ἄλλας [1279a] τέχνας, οἷον ἰατρικὴν καὶ γυμναστικὴν, κατὰ συμβεβηκὸς δὲ κἂν αὐτῶν εἶεν. οὐδὲν γὰρ κωλύει

τὸν παιδοτρίβην ἓνα τῶν γυμναζομένων ἐνίот' εἶναι καὶ αὐτόν, ὥσπερ ὁ κυβερνήτης εἰς ἐστὶν αἰεὶ τῶν πλωτήρων· ὁ μὲν οὖν παιδοτρίβης ἢ κυβερνήτης σκοπεῖ τὸ τῶν ἀρχομένων ἀγαθόν, ὅταν δὲ τούτων εἰς γένηται καὶ αὐτός, κατὰ συμβεβηκὸς μετέχει τῆς ὠφελείας. ὁ μὲν γὰρ πλωτήρ, ὁ δὲ τῶν γυμναζομένων εἰς γίνεται, παιδοτρίβης ὢν. διὸ καὶ τὰς πολιτικὰς ἀρχάς, ὅταν ἢ κατ' ἰσότητά τῶν πολιτῶν συνεστηκυῖα καὶ καθ' ὁμοιότητα, κατὰ μέρος ἀξιοῦσιν ἄρχειν, πρότερον μὲν, ἢ πέφυκεν, ἀξιοῦντες ἐν μέρει λειτουργεῖν, καὶ σκοπεῖν τινα πάλιν τὸ αὐτοῦ ἀγαθόν, ὥσπερ πρότερον αὐτὸς ἄρχων ἐσκόπει τὸ ἐκείνου συμφέρον· νῦν δὲ διὰ τὰς ὠφελείας τὰς ἀπὸ τῶν κοινῶν καὶ τὰς ἐκ τῆς ἀρχῆς βούλονται συνεχῶς ἄρχειν, οἷον εἰ συνέβαινεν ὑγιαίνειν αἰεὶ τοῖς ἄρχουσι νοσακεροῖς οὖσιν. καὶ γὰρ ἂν οὕτως ἴσως ἐδίωκον τὰς ἀρχάς. φανερόν τοίνυν ὥς ὅσαι μὲν πολιτεῖαι τὸ κοινῇ συμφέρον σκοποῦσιν, αὗται μὲν ὀρθαὶ τυγχάνουσιν οὖσαι κατὰ τὸ ἀπλῶς δίκαιον, ὅσαι δὲ τὸ σφέτερον μόνον τῶν ἀρχόντων, ἡμαρτημέναι πᾶσαι καὶ παρεκβάσεις τῶν ὀρθῶν πολιτειῶν· δεσποτικαὶ γάρ, ἢ δὲ πόλις κοινωνία τῶν ἐλευθέρων ἐστίν.

Διωρισμένων δὲ τούτων ἐχόμενόν ἐστι τὰς πολιτείας ἐπισκέψασθαι, πόσαι τὸν ἀριθμὸν καὶ τίνες εἰσὶ, καὶ πρῶτον τὰς ὀρθὰς αὐτῶν· καὶ γὰρ αἱ παρεκβάσεις ἔσονται φανεραὶ τούτων διορισθεῖσων. ἐπεὶ δὲ πολιτεία μὲν καὶ πολίτευμα σημαίνει ταυτόν, πολίτευμα δ' ἐστὶ τὸ κύριον τῶν πόλεων, ἀνάγκη δ' εἶναι κύριον ἢ ἓνα ἢ ὀλίγους ἢ τοὺς πολλούς, ὅταν μὲν ὁ εἷς ἢ οἱ ὀλίγοι ἢ οἱ πολλοὶ πρὸς τὸ κοινὸν συμφέρον ἄρχωσι, ταύτας μὲν ὀρθὰς ἀναγκαῖον εἶναι τὰς πολιτείας, τὰς δὲ πρὸς τὸ ἴδιον ἢ τοῦ ἐνὸς ἢ τῶν ὀλίγων ἢ τοῦ πλήθους παρεκβάσεις. ἢ γὰρ οὐ πολίτας φατέον εἶναι τοὺς <μὴ> μετέχοντας, ἢ δεῖ κοινωνεῖν τοῦ συμφέροντος. καλεῖν δ' εἰώθαμεν τῶν μὲν μοναρχιῶν τὴν πρὸς τὸ κοινὸν ἀποβλέπουσαν συμφέρον βασιλείαν, τὴν δὲ τῶν ὀλίγων μὲν πλειόνων δ' ἐνὸς ἀριστοκρατίαν (ἢ διὰ τὸ τοὺς ἀρίστους ἄρχειν, ἢ διὰ τὸ πρὸς τὸ ἄριστον τῇ πόλει καὶ τοῖς κοινωνοῦσιν αὐτῆς), ὅταν δὲ τὸ πλῆθος πρὸς τὸ κοινὸν πολιτεύηται συμφέρον, καλεῖται τὸ κοινὸν ὄνομα πασῶν τῶν πολιτειῶν, πολιτεία. (συμβαίνει δ' εὐλόγως· ἓνα μὲν γὰρ διαφέρειν κατ' ἀρετὴν ἢ ὀλίγους ἐνδέχεται, πλείους δ' ἤδη χαλεπὸν [1279b] ἡκριβῶσθαι πρὸς πᾶσαν ἀρετὴν, ἀλλὰ μάλιστα τὴν πολεμικὴν· αὕτη γὰρ ἐν πλήθει γίγνεται· διόπερ κατὰ ταύτην τὴν πολιτείαν

κυριώτατον τὸ προπολεμοῦν καὶ μετέχουσιν αὐτῆς οἱ κεκτημένοι τὰ ὄπλα.) παρεκβάσεις δὲ τῶν εἰρημένων τυραννὶς μὲν βασιλείας, ὀλιγαρχία δὲ ἀριστοκρατίας, δημοκρατία δὲ πολιτείας. ἡ μὲν γὰρ τυραννὶς ἐστὶ μοναρχία πρὸς τὸ συμφέρον τὸ τοῦ μοναρχοῦντος, ἡ δ' ὀλιγαρχία πρὸς τὸ τῶν εὐπόρων, ἡ δὲ δημοκρατία πρὸς τὸ συμφέρον τὸ τῶν ἀπόρων· πρὸς δὲ τὸ τῷ κοινῷ λυσιτελοῦν οὐδεμία αὐτῶν.

Δεῖ δὲ μικρῷ διὰ μακροτέρων εἰπεῖν τίς ἐκάστη τούτων τῶν πολιτειῶν ἐστίν· καὶ γὰρ ἔχει τινὰς ἀπορίας, τῷ δὲ περὶ ἐκάστην μέθοδον φιλοσοφοῦντι καὶ μὴ μόνον ἀποβλέποντι πρὸς τὸ πράττειν οἰκεῖόν ἐστὶ τὸ μὴ παρορᾶν μηδέ τι καταλείπειν, ἀλλὰ δηλοῦν τὴν περὶ ἕκαστον ἀλήθειαν. ἐστὶ δὲ τυραννὶς μὲν μοναρχία, καθάπερ εἴρηται, δεσποτική τῆς πολιτικῆς κοινωνίας, ὀλιγαρχία δ' ὅταν ὥσι κύριοι τῆς πολιτείας οἱ τὰς οὐσίας ἔχοντες, δημοκρατία δὲ τούναντίον ὅταν οἱ μὴ κεκτημένοι πλῆθος οὐσίας ἀλλ' ἄποροι. πρώτη δ' ἀπορία πρὸς τὸν διορισμὸν ἐστίν. εἰ γὰρ εἶεν οἱ πλείους, ὄντες εὖποροι, κύριοι τῆς πόλεως, δημοκρατία δ' ἐστὶν ὅταν ἡ κύριον τὸ πλῆθος - ὁμοίως δὲ πάλιν κἂν εἴ που συμβαίνει τοὺς ἀπόρους ἐλάττους μὲν εἶναι τῶν εὐπόρων, κρείττους δ' ὄντας κυρίους εἶναι τῆς πολιτείας, ὅπου δ' ὀλίγον κύριον πλῆθος, ὀλιγαρχίαν εἶναι φασιν - οὐκ ἂν καλῶς δόξειεν διωρίσθαι περὶ τῶν πολιτειῶν.

ἀλλὰ μὴν κἂν τις συνθεῖς τῇ μὲν εὐπορίᾳ τὴν ὀλιγότητα τῇ δ' ἀπορίᾳ τὸ πλῆθος οὕτω προσαγορεύῃ τὰς πολιτείας, ὀλιγαρχίαν μὲν ἐν ἡ τὰς ἀρχὰς ἔχουσιν οἱ εὖποροι, ὀλίγοι τὸ πλῆθος ὄντες, δημοκρατίαν δὲ ἐν ἡ οἱ ἄποροι, πολλοὶ τὸ πλῆθος ὄντες, ἄλλην ἀπορίαν ἔχει. τίνας γὰρ ἐροῦμεν τὰς ἄρτι λεχθείσας πολιτείας, τὴν ἐν ἡ πλείους «οἱ» εὖποροι καὶ ἐν ἡ ἐλάττους οἱ ἄποροι, κύριοι δ' ἑκάτεροι τῶν πολιτειῶν, εἴπερ μηδεμία ἄλλη πολιτεία παρὰ τὰς εἰρημένας ἐστίν; ἔοικε τοίνυν ὁ λόγος ποιεῖν δῆλον ὅτι τὸ μὲν ὀλίγους ἢ πολλοὺς εἶναι κυρίους συμβεβηκός ἐστίν, τὸ μὲν ταῖς ὀλιγαρχίαις τὸ δὲ ταῖς δημοκρατίαις, διὰ τὸ τοὺς μὲν εὐπόρους ὀλίγους, πολλοὺς δ' εἶναι τοὺς ἀπόρους πανταχοῦ (διὸ καὶ οὐ συμβαίνει τὰς ῥηθείσας αἰτίας «αἰτίας» γίνεσθαι διαφορᾶς), ᾧ δὲ διαφέρουσιν ἡ τε δημοκρατία καὶ ἡ ὀλιγαρχία ἀλλήλων πενία καὶ πλοῦτός [1280a] ἐστίν, καὶ ἀναγκαῖον μὲν, ὅπου ἂν ἄρχωσι διὰ πλοῦτον, ἂν τ' ἐλάττους ἂν τε πλείους, εἶναι ταύτην ὀλιγαρχίαν, ὅπου δ' οἱ ἄποροι, δημοκρατίαν, ἀλλὰ συμβαίνει, καθάπερ εἵπομεν,

τοὺς μὲν ὀλίγους εἶναι τοὺς δὲ πολλούς. εὐποροῦσι μὲν γὰρ ὀλίγοι, τῆς δὲ ἐλευθερίας μετέχουσι πάντες· δι' ἧς αἰτίας ἀμφισβητοῦσιν ἀμφοτέρω τῆς πολιτείας.

Ληπτέον δὲ πρῶτον τίνας ὅρους λέγουσι τῆς ὀλιγαρχίας καὶ δημοκρατίας, καὶ τί τὸ δίκαιον τό τε ὀλιγαρχικὸν καὶ δημοκρατικόν. πάντες γὰρ ἄπτονται δικαίου τινός, ἀλλὰ μέχρι τινὸς προέρχονται, καὶ λέγουσιν οὐ πᾶν τὸ κυρίως δίκαιον. οἷον δοκεῖ ἴσον τὸ δίκαιον εἶναι, καὶ ἔστιν, ἀλλ' οὐ πᾶσιν ἀλλὰ τοῖς ἴσοις· καὶ τὸ ἄνισον δοκεῖ δίκαιον εἶναι, καὶ γὰρ ἔστιν, ἀλλ' οὐ πᾶσιν ἀλλὰ τοῖς ἀνίσοις· οἱ δὲ τοῦτ' ἀφαιροῦσι, τὸ οἷς, καὶ κρίνουσι κακῶς. τὸ δ' αἴτιον ὅτι περὶ αὐτῶν ἡ κρίσις· σχεδὸν δ' οἱ πλεῖστοι φαῦλοι κριταὶ περὶ τῶν οἰκείων. ὥστ' ἐπεὶ τὸ δίκαιον τισίν, καὶ διήρηται τὸν αὐτὸν τρόπον ἐπὶ τε τῶν πραγμάτων καὶ οἷς, καθάπερ εἴρηται πρότερον ἐν τοῖς Ἡθικοῖς, τὴν μὲν τοῦ πράγματος ἰσότητα ὁμολογοῦσι, τὴν δὲ οἷς ἀμφισβητοῦσι, μάλιστα μὲν διὰ τὸ λεχθὲν ἄρτι, διότι κρίνουσι τὰ περὶ αὐτοὺς κακῶς, ἔπειτα δὲ καὶ διὰ τὸ λέγειν μέχρι τινὸς ἑκατέρους δίκαιόν τι νομίζουσι δίκαιον λέγειν ἀπλῶς. οἱ μὲν γὰρ ἂν κατὰ τι ἄνισοι ᾖσιν, οἷον χρήμασιν, ὅλως οἶονται ἄνισοι εἶναι, οἱ δ' ἂν κατὰ τι ἴσοι, οἷον ἐλευθερίᾳ, ὅλως ἴσοι.

τὸ δὲ κυριώτατον οὐ λέγουσιν. εἰ μὲν γὰρ τῶν κτημάτων χάριν ἐκοινώνησαν καὶ συνῆλθον, τοσοῦτον μετέχουσι τῆς πόλεως ὅσον περ καὶ τῆς κτήσεως, ὥσθ' ὁ τῶν ὀλιγαρχικῶν λόγος δόξειεν ἂν ἰσχύειν (οὐ γὰρ εἶναι δίκαιον ἴσον μετέχειν τῶν ἑκατὸν μνῶν τὸν εἰσενέγκαντα μίαν μνᾶν τῷ δόντι τὸ λοιπὸν πᾶν, οὔτε τῶν ἐξ ἀρχῆς οὔτε τῶν ἐπιγινομένων)· εἰ δὲ μήτε τοῦ ζῆν μόνον ἔνεκεν ἀλλὰ μᾶλλον τοῦ εὖ ζῆν (καὶ γὰρ ἂν δούλων καὶ τῶν ἄλλων ζώων ἦν πόλις· νῦν δ' οὐκ ἔστι, διὰ τὸ μὴ μετέχειν εὐδαιμονίας μηδὲ τοῦ ζῆν κατὰ προαίρεσιν), μήτε συμμαχίας ἔνεκεν, ὅπως ὑπὸ μηδενὸς ἀδικῶνται, μήτε διὰ τὰς ἀλλαγὰς καὶ τὴν χρῆσιν τὴν πρὸς ἀλλήλους - καὶ γὰρ ἂν Τυρρηνοὶ καὶ Καρχηδόνιοι, καὶ πάντες οἷς ἔστι σύμβολα πρὸς ἀλλήλους, ὥς μᾶς ἂν πολῖται πόλεως ἦσαν· εἰσὶ γοῦν αὐτοῖς συνθήκαι περὶ τῶν εἰσαγωγίμων καὶ σύμβολα περὶ τοῦ μὴ ἀδικεῖν καὶ γραφαὶ περὶ συμμαχίας. ἀλλ' οὐτ' ἀρχαὶ πᾶσιν ἐπὶ [1280b] τούτοις κοινὰ καθεστᾶσιν, ἀλλ' ἕτεραι παρ' ἑκατέροις, οὔτε τοῦ ποίους τινὰς εἶναι δεῖ φροντίζουσιν ἄτεροι τοὺς ἑτέρους, οὐδ' ὅπως μηδεὶς ἄδικος ἔσται τῶν ὑπὸ τὰς συνθήκας μηδὲ μοχθηρίαν ἔξει μηδεμίαν, ἀλλὰ μόνον ὅπως μηδὲν ἀδικήσουσιν ἀλλήλους. περὶ δ'

ἀρετῆς καὶ κακίας πολιτικῆς διασκοποῦσιν ὅσοι φροντίζουσιν εὐνομίας. ἥ καὶ φανερόν ὅτι δεῖ περὶ ἀρετῆς ἐπιμελὲς εἶναι τῇ γ' ὡς ἀληθῶς ὀνομαζομένη πόλει, μὴ λόγου χάριν. γίγνεται γὰρ ἡ κοινωνία συμμαχία τῶν ἄλλων τότῳ διαφέρουσα μόνον, τῶν ἄπωθεν συμμαχιῶν, καὶ ὁ νόμος συνθήκη καί, καθάπερ ἔφη Λυκόφρων ὁ σοφιστής, ἐγγυητὴς ἀλλήλοις τῶν δικαίων, ἀλλ' οὐχ οἷος ποιεῖν ἀγαθοὺς καὶ δικαίους τοὺς πολίτας. ὅτι δὲ τοῦτον ἔχει τὸν τρόπον, φανερόν. εἰ γάρ τις καὶ συναγάγοι τοὺς τόπους εἰς ἓν, ὥστε ἅπτεσθαι τὴν Μεγαρέων πόλιν καὶ Κορινθίων τοῖς τείχεσιν, ὅμως οὐ μία πόλις· οὐδ' εἰ πρὸς ἀλλήλους ἐπιγαμίας ποιήσαιντο· καίτοι τοῦτο τῶν ιδίων ταῖς πόλεσι κοινωνημάτων ἐστίν. ὁμοίως δ' οὐδ' εἴ τινες οἰκοῖεν χωρὶς μὲν, μὴ μέντοι τοσοῦτον ἄπωθεν ὥστε μὴ κοινωνεῖν, ἀλλ' εἴησαν αὐτοῖς νόμοι τοῦ μὴ σφᾶς αὐτοὺς ἀδικεῖν περὶ τὰς μεταδόσεις, οἷον εἰ ὁ μὲν εἴη τέκτων ὁ δὲ γεωργὸς ὁ δὲ σκυτοτόμος ὁ δ' ἄλλο τι τοιοῦτον, καὶ τὸ πλῆθος εἶεν μύριοι, μὴ μέντοι κοινωνοῖεν ἄλλου μηδενὸς ἢ τῶν τοιούτων, οἷον ἀλλαγῆς καὶ συμμαχίας, οὐδ' οὕτω πω πόλις.

διὰ τίνα δὴ ποτ' αἰτίαν; οὐ γὰρ δὴ διὰ τὸ μὴ σύνεγγυς τῆς κοινωνίας. εἰ γὰρ καὶ συνέλθοιεν οὕτω κοινωνοῦντες (ἕκαστος μέντοι χρᾶτο τῇ ἰδίᾳ οἰκίᾳ ὥσπερ πόλει) καὶ σφίσιν αὐτοῖς ὡς ἐπιμαχίας οὔσης βοηθοῦντες ἐπὶ τοὺς ἀδικοῦντας μόνον, οὐδ' οὕτως ἂν εἶναι δόξειεν πόλις τοῖς ἀκριβῶς θεωροῦσιν, εἴπερ ὁμοίως ὁμιλοῖεν συνελθόντες καὶ χωρὶς. φανερόν τοίνυν ὅτι ἡ πόλις οὐκ ἔστι κοινωνία τόπου, καὶ τοῦ μὴ ἀδικεῖν σφᾶς αὐτοὺς καὶ τῆς μεταδόσεως χάριν· ἀλλὰ ταῦτα μὲν ἀναγκαῖον ὑπάρχειν, εἴπερ ἔσται πόλις, οὐ μὴν οὐδ' ὑπαρχόντων τούτων ἀπάντων ἤδη πόλις, ἀλλ' ἡ τοῦ εὖ ζῆν κοινωνία καὶ ταῖς οἰκίαις καὶ τοῖς γένεσι, ζωῆς τελείας χάριν καὶ αὐτάρκους. οὐκ ἔσται μέντοι τοῦτο μὴ τὸν αὐτὸν καὶ ἓνα κατοικοῦντων τόπον καὶ χρωμένων ἐπιγαμίαις. διὸ κηδεῖαί τ' ἐγένοντο κατὰ τὰς πόλεις καὶ φατρίαὶ καὶ θυσίαι καὶ διαγωγαὶ τοῦ συζῆν. τὸ δὲ τοιοῦτον φιλίας ἔργον· ἡ γὰρ τοῦ συζῆν προαίρεσις φιλία. τέλος μὲν οὖν πόλεως τὸ εὖ ζῆν, ταῦτα δὲ τοῦ τέλους χάριν. πόλις δὲ ἡ γενῶν καὶ κωμῶν [1281a] κοινωνία ζωῆς τελείας καὶ αὐτάρκους. τοῦτο δ' ἐστίν, ὡς φαμέν, τὸ ζῆν εὐδαιμόνως καὶ καλῶς. τῶν καλῶν ἄρα πράξεων χάριν θετέον εἶναι τὴν πολιτικὴν κοινωνίαν ἀλλ' οὐ τοῦ συζῆν. διόπερ ὅσοι συμβάλλονται πλεῖστον εἰς τὴν τοιαύτην κοινωνίαν, τούτοις τῆς πόλεως μέτεστι πλεῖον ἢ τοῖς κατὰ

μὲν ἐλευθερίαν καὶ γένος ἴσοις ἢ μείζοσι κατὰ δὲ τὴν πολιτικὴν ἀρετὴν ἀνίσοις, ἢ τοῖς κατὰ πλοῦτον ὑπερέχουσι κατ' ἀρετὴν δ' ὑπερεχομένοις. ὅτι μὲν οὖν πάντες οἱ περὶ τῶν πολιτειῶν ἀμφισβητοῦντες μέρος τι τοῦ δικαίου λέγουσι, φανερόν ἐκ τῶν εἰρημένων.

Ἔχει δ' ἀπορίαν τί δεῖ τὸ κύριον εἶναι τῆς πόλεως. ἢ γάρ τοι τὸ πλῆθος, ἢ τοὺς πλουσίους, ἢ τοὺς ἐπιεικεῖς, ἢ τὸν βέλτιστον ἓνα πάντων, ἢ τύραννον. ἀλλὰ ταῦτα πάντα ἔχειν φαίνεται δυσκολίαν. τί γάρ; ἂν οἱ πένητες διὰ τὸ πλείους εἶναι διανεμῶνται τὰ τῶν πλουσίων, τοῦτ' οὐκ ἄδικόν ἐστιν; “ἔδοξε γὰρ νῆ Δία τῷ κυρίῳ δικαίως.” τὴν οὖν ἀδικίαν τί χρὴ λέγειν τὴν ἐσχάτην; πάλιν τε πάντων ληφθέντων, οἱ πλείους τὰ τῶν ἐλαττόνων ἂν διανεμῶνται, φανερόν ὅτι φθείρουσι τὴν πόλιν. ἀλλὰ μὴν οὐχ ἢ γ' ἀρετὴ φθείρει τὸ ἔχον αὐτήν, οὐδὲ τὸ δίκαιον πόλεως φθαρτικόν· ὥστε δηλόν ὅτι καὶ τὸν νόμον τοῦτον οὐχ οἶόν τ' εἶναι δίκαιον. ἔτι καὶ τὰς πράξεις ὅσας ὁ τύραννος ἔπραξεν ἀναγκαῖον εἶναι πάσας δικαίας· βιάζεται γὰρ ὢν κρείττων, ὥσπερ καὶ τὸ πλῆθος τοὺς πλουσίους. ἀλλ' ἄρα τοὺς ἐλάττους δίκαιον ἄρχειν καὶ τοὺς πλουσίους; ἂν οὖν κἀκεῖνοι ταῦτα ποιῶσι καὶ διαρπάζωσι καὶ τὰ κτήματα ἀφαιρῶνται τοῦ πλῆθους, τοῦτ' ἐστὶ δίκαιον· καὶ θάτερον ἄρα. ταῦτα μὲν τοίνυν ὅτι πάντα φαῦλα καὶ οὐ δίκαια, φανερόν· ἀλλὰ τοὺς ἐπιεικεῖς ἄρχειν δεῖ καὶ κυρίους εἶναι πάντων; οὐκοῦν ἀνάγκη τοὺς ἄλλους ἀτίμους εἶναι πάντας, μὴ τιμωμένους ταῖς πολιτικαῖς ἀρχαῖς· τιμὰς γὰρ λέγομεν εἶναι τὰς ἀρχάς, ἀρχόντων δ' αἰεὶ τῶν αὐτῶν ἀναγκαῖον εἶναι τοὺς ἄλλους ἀτίμους. ἀλλ' ἓνα τὸν σπουδαιότατον ἄρχειν βέλτιον; ἀλλ' ἔτι τοῦτο ὀλιγαρχικώτερον· οἱ γὰρ ἄτιμοι πλείους. ἀλλ' ἴσως φαίη τις ἂν τὸ κύριον ὅλως ἄνθρωπον εἶναι ἀλλὰ μὴ νόμον φαῦλον, ἔχοντά γε τὰ συμβαίνοντα πάθη περὶ τὴν ψυχὴν. ἂν οὖν ἢ νόμος μὲν ὀλιγαρχικὸς δὲ ἢ δημοκρατικὸς, τί διοίσει περὶ τῶν ἡπορημένων; συμβήσεται γὰρ ὁμοίως τὰ λεχθέντα πρότερον. Περὶ μὲν οὖν τῶν ἄλλων ἔστω τις ἕτερος λόγος· ὅτι δὲ δεῖ κύριον εἶναι μᾶλλον τὸ πλῆθος ἢ τοὺς ἀρίστους μὲν ὀλίγους δέ, δόξειεν ἂν λέγεσθαι καὶ τιν' ἔχειν ἀπορίαν τάχα δὲ καὶ ἀλήθειαν. τοὺς γὰρ πολλούς, ὧν ἕκαστός ἐστιν [1281b] οὐ σπουδαῖος ἀνὴρ, ὅμως ἐνδέχεται συνελθόντας εἶναι βελτίους ἐκείνων, οὐχ ὥς ἕκαστον ἀλλ' ὥς σύμπαντας, οἷον τὰ συμφορητὰ δεῖπνα τῶν ἐκ μιᾶς δαπάνης χορηγηθέντων· πολλῶν γὰρ ὄντων ἕκαστον μόνον ἔχειν ἀρετῆς καὶ φρονήσεως, καὶ γίνεσθαι

συνελθόντων, ὥσπερ ἓνα ἄνθρωπον τὸ πλῆθος, πολύποδα καὶ πολύχειρα καὶ πολλὰς ἔχοντ' αἰσθήσεις, οὕτω καὶ περὶ τὰ ἦθη καὶ τὴν διάνοιαν. διὸ καὶ κρίνουσιν ἄμεινον οἱ πολλοὶ καὶ τὰ τῆς μουσικῆς ἔργα καὶ τὰ τῶν ποιητῶν· ἄλλοι γὰρ ἄλλο τι μόνιον, πάντα δὲ πάντες. ἀλλὰ τούτῳ διαφέρουσιν οἱ σπουδαῖοι τῶν ἀνδρῶν ἐκάστου τῶν πολλῶν, ὥσπερ καὶ τῶν μὴ καλῶν τοὺς καλοὺς φασι, καὶ τὰ γεγραμμένα διὰ τέχνης τῶν ἀληθινῶν, τῷ συνῆχθαι τὰ διεσπαρμένα χωρὶς εἰς ἓν, ἐπεὶ κεχωρισμένων γε κάλλιον ἔχειν τοῦ γεγραμμένου τουδὶ μὲν τὸν ὀφθαλμὸν ἑτέρου δὲ τινος ἕτερον μόνιον.

εἰ μὲν οὖν περὶ πάντα δῆμον καὶ περὶ πᾶν πλῆθος ἐνδέχεται ταύτην εἶναι τὴν διαφορὰν τῶν πολλῶν πρὸς τοὺς ὀλίγους σπουδαίους, ἄδηλον, ἴσως δὲ νῆ Δία δῆλον ὅτι περὶ ἐνίων ἀδύνατον (ὁ γὰρ αὐτὸς κἂν ἐπὶ τῶν θηρίων ἀρμόσειε λόγος· καίτοι τί διαφέρουσιν ἔνιοι τῶν θηρίων ὡς ἔπος εἶπεν;)· ἀλλὰ περὶ τὸ πλῆθος οὐδὲν εἶναι κωλύει τὸ λεχθὲν ἀληθές. διὸ καὶ τὴν πρότερον εἰρημένην ἀπορίαν λύσειεν ἂν τις διὰ τούτων καὶ τὴν ἐχομένην αὐτῆς, τίνων δεῖ κυρίους εἶναι τοὺς ἐλευθέρους καὶ τὸ πλῆθος τῶν πολιτῶν. τοιοῦτοι δ' εἰσὶν ὅσοι μήτε πλούσιοι μήτε ἀξίωμα ἔχουσιν ἀρετῆς μηδὲ ἓν. τὸ μὲν γὰρ μετέχειν αὐτοὺς τῶν ἀρχῶν τῶν μεγίστων οὐκ ἀσφαλές (διὰ τε γὰρ ἀδικίαν καὶ δι' ἀφροσύνην τὰ μὲν ἀδικεῖν ἀνάγκη τὰ δ' ἁμαρτάνειν αὐτούς)· τὸ δὲ μὴ μεταδιδόναι μηδὲ μετέχειν φοβερὸν (ὅταν γὰρ ἄτιμοι πολλοὶ καὶ πένητες ὑπάρχωσι, πολεμίων ἀναγκαῖον εἶναι πλήρη τὴν πόλιν ταύτην). λείπεται δὴ τοῦ βουλευέσθαι καὶ κρίνειν μετέχειν αὐτούς. διόπερ καὶ Σόλων καὶ τῶν ἄλλων τινὲς νομοθετῶν τάττουσιν ἐπὶ τε τὰς ἀρχαιρεσίας καὶ τὰς εὐθύνas τῶν ἀρχόντων, ἄρχειν δὲ κατὰ μόνas οὐκ ἔῴsιν. πάντες μὲν γὰρ ἔχουσι συνελθόντες ἱκανὴν αἴσθησιν, καὶ μὴ γινόμενοι τοῖς βελτίοσι τὰς πόλεις ὠφελοῦσιν, καθάπερ ἢ μὴ καθαρὰ τροφή μετὰ τῆς καθαρᾶς τὴν πᾶσαν ποιεῖ χρησιμωτέραν τῆς ὀλίγης· χωρὶς δ' ἕκαστος ἀτελεῖς περὶ τὸ κρίνειν ἐστίν.

ἔχει δ' ἡ τάξις αὕτη τῆς πολιτείας ἀπορίαν πρώτην μὲν ὅτι δόξειεν ἂν τοῦ αὐτοῦ εἶναι τὸ κρίναι τίς ὀρθῶς ἰατρευκεν, οὔτερ καὶ τὸ ἰατρεῦσαι καὶ ποιῆσαι ὑγιᾶ τὸν κάμνοντα τῆς νόσου τῆς παρούσης· οὗτος δ' ἐστὶν ὁ ἰατρός. ὁμοίως δὲ τοῦτο καὶ [1282a] περὶ τὰς ἄλλας ἐμπειρίας καὶ τέχνας. ὥσπερ οὖν ἰατρὸν δεῖ διδόναι τὰς εὐθύνas ἐν ἰατροῖς, οὕτω καὶ τοὺς ἄλλους ἐν τοῖς ὁμοίοις. ἰατρός δ' ὁ τε δημιουργὰς καὶ ὁ ἀρχιτεκτονικὸς καὶ τρίτος ὁ πεπαιδευμένος περὶ

τὴν τέχνην (εἰσὶ γὰρ τινες τοιοῦτοι καὶ περὶ πάσας ὡς εἰπεῖν τὰς τέχνας)· ἀποδίδομεν δὲ τὸ κρίνειν οὐδὲν ἦττον τοῖς πεπαιδευμένοις ἢ τοῖς εἰδόσιν. ἔπειτα καὶ περὶ τὴν αἵρεσιν τὸν αὐτὸν ἂν δόξειεν ἔχειν τρόπον. καὶ γὰρ τὸ ἐλέσθαι ὀρθῶς τῶν εἰδότεων ἔργον ἐστίν, οἷον γεωμέτρην τε τῶν γεωμετρικῶν καὶ κυβερνήτην τῶν κυβερνητικῶν. εἰ γὰρ καὶ περὶ ἐνίων ἔργων καὶ τεχνῶν μετέχουσι καὶ τῶν ἰδιωτῶν τινες, ἀλλ' οὐ τι τῶν εἰδότεων γε μᾶλλον. ὥστε κατὰ μὲν τοῦτον τὸν λόγον οὐκ ἂν εἴη τὸ πληθος ποιητέον κύριον οὔτε τῶν ἀρχαιρεσιῶν οὔτε τῶν εὐθυνῶν. ἀλλ' ἴσως οὐ πάντα ταῦτα λέγεται καλῶς διὰ τε τὸν πάλαι λόγον, ἂν ἦ τὸ πληθος μὴ λίαν ἀνδραποδῶδες (ἐστὶ γὰρ ἕκαστος μὲν χεῖρων κριτῆς τῶν εἰδότεων, ἅπαντες δὲ συνελθόντες ἢ βελτίους ἢ οὐ χείρους), καὶ ὅτι περὶ ἐνίων οὔτε μόνον ὁ ποιήσας οὐτ' ἄριστ' ἂν κρίνειεν, ὅσων τᾶργα γινώσκουσι καὶ οἱ μὴ ἔχοντες τὴν τέχνην, οἷον οἰκίαν οὐ μόνον ἐστὶ γνῶναι τοῦ ποιήσαντος, ἀλλὰ καὶ βέλτιον ὁ χρώμενος αὐτῇ κρινεῖ (χρηται δ' ὁ οἰκονόμος), καὶ πηδάλιον κυβερνήτης τέκτονος, καὶ θοίνην ὁ δαιτυμὼν ἀλλ' οὐχ ὁ μάγειρος.

ταύτην μὲν οὖν τὴν ἀπορίαν τάχα δόξειέ τις ἂν οὕτω λύειν ἱκανῶς· ἄλλη δ' ἐστὶν ἐχομένη ταύτης. δοκεῖ γὰρ ἄτοπον εἶναι τὸ μειζόνων εἶναι κυρίους τοὺς φαύλους τῶν ἐπιεικῶν, αἱ δ' εὐθυναὶ καὶ αἱ τῶν ἀρχῶν αἰρέσεις εἰσὶ μέγιστον· ἃς ἐν ἐνίαις πολιτείαις, ὥσπερ εἴρηται, τοῖς δήμοις ἀποδιδόασιν· ἡ γὰρ ἐκκλησία κυρία πάντων τῶν τοιούτων ἐστίν. καίτοι τῆς μὲν ἐκκλησίας μετέχουσι καὶ βουλευοῦσι καὶ δικάζουσιν ἀπὸ μικρῶν τιμημάτων καὶ τῆς τυχοῦσης ἡλικίας, ταμιεύουσι δὲ καὶ στρατηγοῦσι καὶ τὰς μεγίστας ἀρχὰς ἄρχουσιν ἀπὸ μεγάλων. ὁμοίως δὲ τις ἂν λύσειε καὶ ταύτην τὴν ἀπορίαν. ἴσως γὰρ ἔχει καὶ ταῦτ' ὀρθῶς. οὐ γὰρ ὁ δικαστὴς οὐδ' ὁ βουλευτὴς οὐδ' ὁ ἐκκλησιαστὴς ἄρχων ἐστίν, ἀλλὰ τὸ δικαστήριον καὶ ἡ βουλὴ καὶ ὁ δῆμος· τῶν δὲ ῥηθέντων ἕκαστος μῦριον ἐστὶ τούτων (λέγω δὲ [μῦριον] τὸν βουλευτὴν καὶ τὸν ἐκκλησιαστήν καὶ τὸν δικαστήν)· ὥστε δικαίως κύριον μειζόνων τὸ πληθος· ἐκ γὰρ πολλῶν ὁ δῆμος καὶ ἡ βουλὴ καὶ τὸ δικαστήριον. καὶ τὸ τίμημα δὲ πλεῖον τὸ πάντων τούτων ἢ τὸ τῶν καθ' ἓνα καὶ κατ' ὀλίγους μεγάλας ἀρχὰς ἀρχόντων. ταῦτα μὲν οὖν διωρίσθω [1282b] τοῦτον τὸν τρόπον· ἡ δὲ πρώτη λεχθεῖσα ἀπορία ποιεῖ φανερόν οὐδὲν οὕτως ἕτερον ὡς ὅτι δεῖ τοὺς νόμους εἶναι κυρίους κειμένους ὀρθῶς, τὸν ἄρχοντα δέ, ἂν τε εἷς ἂν τε πλείους ᾖσι, περὶ τούτων εἶναι κυρίους περὶ ὅσων ἐξαδυνατοῦσιν

οἱ νόμοι λέγειν ἀκριβῶς διὰ τὸ μὴ ῥάδιον εἶναι καθόλου διορίσαι περὶ πάντων. ὁποίους μέντοι τινὰς εἶναι δεῖ τοὺς ὀρθῶς κειμένους νόμους, οὐδέν πω δηλόν, ἀλλ' ἔτι μένει τὸ πάλοι διαπορηθέν. ἅμα γὰρ καὶ ὁμοίως ταῖς πολιτείαις ἀνάγκη καὶ τοὺς νόμους φαύλους ἢ σπουδαίους εἶναι, καὶ δικαίους ἢ ἀδίκους. πλὴν τοῦτό γε φανερόν, ὅτι δεῖ πρὸς τὴν πολιτείαν κεῖσθαι τοὺς νόμους. ἀλλὰ μὴν εἰ τοῦτο, δηλόν ὅτι τοὺς μὲν κατὰ τὰς ὀρθὰς πολιτείας ἀναγκαῖον εἶναι δικαίους τοὺς δὲ κατὰ τὰς παρεκβεβηκυίας οὐ δικαίους.

Ἐπεὶ δ' ἐν πάσαις μὲν ταῖς ἐπιστήμαις καὶ τέχναις ἀγαθὸν τὸ τέλος, μέγιστον δὲ καὶ μάλιστα ἐν τῇ κυριωτάτῃ πασῶν, αὕτη δ' ἐστὶν ἡ πολιτικὴ δύναμις, ἔστι δὲ πολιτικὸν ἀγαθὸν τὸ δίκαιον, τοῦτο δ' ἐστὶ τὸ κοινῇ συμφέρον, δοκεῖ δὲ πᾶσιν ἴσον τι τὸ δίκαιον εἶναι, καὶ μέχρι γέ τινος ὁμολογοῦσι τοῖς κατὰ φιλοσοφίαν λόγοις, ἐν οἷς διώρισται περὶ τῶν ἠθικῶν (τὶ γὰρ καὶ τισὶ τὸ δίκαιον, καὶ δεῖν τοῖς ἴσοις ἴσον εἶναι φασιν), ποίων δὴ ισότης ἐστὶ καὶ ποίων ἀνισότης, δεῖ μὴ λανθάνειν. ἔχει γὰρ τοῦτ' ἀπορίαν καὶ φιλοσοφίαν πολιτικὴν. ἴσως γὰρ ἂν φαίη τις κατὰ παντὸς ὑπεροχὴν ἀγαθοῦ δεῖν ἀνίσως νενεμῆσθαι τὰς ἀρχάς, εἰ πάντα τὰ λοιπὰ μηδὲν διαφέρειεν ἀλλ' ὅμοιοι τυγχάνοιεν ὄντες· τοῖς γὰρ διαφέρουσιν ἕτερον εἶναι τὸ δίκαιον καὶ τὸ κατ' ἀξίαν. ἀλλὰ μὴν εἰ τοῦτ' ἀληθές, ἔσται καὶ κατὰ χρῶμα καὶ κατὰ μέγεθος καὶ καθ' ὅτιοῦν τῶν ἀγαθῶν πλεονεξία τις τῶν πολιτικῶν δικαίων τοῖς ὑπερέχουσιν. ἢ τοῦτο ἐπιτόλαιον τὸ ψεῦδος; φανερόν δ' ἐπὶ τῶν ἄλλων ἐπιστημῶν καὶ δυνάμεων· τῶν γὰρ ὁμοίων αὐλητῶν τὴν τέχνην οὐ δοτέον πλεονεξίαν τῶν αὐλῶν τοῖς εὐγενεστέροις (οὐδὲν γὰρ αὐλήσουσι βέλτιον), δεῖ δὲ τῷ κατὰ τὸ ἔργον ὑπερέχοντι διδόναι καὶ τῶν ὀργάνων τὴν ὑπεροχὴν. εἰ δὲ μήπω δηλόν τὸ λεγόμενον, ἔτι μᾶλλον αὐτὸ προαγαγοῦσιν ἔσται φανερόν. εἰ γὰρ εἴη τις ὑπερέχων μὲν κατὰ τὴν αὐλητικὴν, πολὺ δ' ἐλλείπων κατ' εὐγένειαν ἢ κάλλος, εἰ καὶ μεῖζον ἕκαστον ἐκείνων ἀγαθόν ἐστι τῆς αὐλητικῆς (λέγω δὲ τὴν τ' εὐγένειαν καὶ τὸ κάλλος), καὶ κατὰ τὴν ἀναλογίαν ὑπερέχουσι πλεον τῆς αὐλητικῆς ἢ ἐκεῖνος κατὰ τὴν αὐλητικὴν, ὅμως τούτῳ δοτέον τοὺς διαφέροντας [1283a] τῶν αὐλῶν. δεῖ γὰρ εἰς τὸ ἔργον συμβάλλεσθαι τὴν ὑπεροχὴν καὶ τοῦ πλούτου καὶ τῆς εὐγενείας, συμβάλλονται δ' οὐδέν.

ἔτι κατὰ γε τοῦτον τὸν λόγον πᾶν ἀγαθὸν πρὸς πᾶν ἂν εἴη συμβλητόν. εἰ γὰρ ἐνάμιλλον τὸ τί μέγεθος, καὶ ὅλως ἂν τὸ μέγεθος ἐνάμιλλον εἴη καὶ πρὸς πλοῦτον καὶ πρὸς ἐλευθερίαν· ὥστ' εἰ πλεῖον

ὁδὶ διαφέρει κατὰ μέγεθος ἢ ὁδὶ κατ' ἀρετὴν, <εἰ> καὶ [πλεῖον] ὑπερέχει ὅλως ἀρετὴ μεγέθους, εἴη ἂν συμβλητὰ πάντα. τοσόνδε γὰρ [μέγεθος] εἰ κρεῖττον τοσοῦδε, τοσόνδε δῆλον ὡς ἴσον. ἐπεὶ δὲ τοῦτ' ἀδύνατον, δῆλον ὡς καὶ ἐπὶ τῶν πολιτικῶν εὐλόγως οὐ κατὰ πᾶσαν ἀνισότητ' ἀμφισβητοῦσι τῶν ἀρχῶν (εἰ γὰρ οἱ μὲν βραδεῖς οἱ δὲ ταχεῖς, οὐδὲν διὰ τοῦτο δεῖ τοὺς μὲν πλεῖον τοὺς δ' ἔλαττον ἔχειν, ἀλλ' ἐν τοῖς γυμνικοῖς ἀγῶσιν ἢ τούτων διαφορὰ λαμβάνει τὴν τιμὴν)· ἀλλ' ἐξ ὧν πόλις συνέστηκεν, ἐν τούτοις ἀναγκαῖον ποιεῖσθαι τὴν ἀμφισβήτησιν. διόπερ εὐλόγως ἀντιποιοῦνται τῆς τιμῆς οἱ εὐγενεῖς καὶ ἐλεύθεροι καὶ πλούσιοι. δεῖ γὰρ ἐλευθέρους τ' εἶναι καὶ τίμημα φέροντας (οὐ γὰρ ἂν εἴη πόλις ἐξ ἀπόρων πάντων, ὥσπερ οὐδ' ἐκ δούλων)· ἀλλὰ μὴν εἰ δεῖ τούτων, δῆλον ὅτι καὶ δικαιοσύνης καὶ τῆς πολιτικῆς ἀρετῆς. οὐδὲ γὰρ ἄνευ τούτων οἰκεῖσθαι πόλιν δυνατόν· πλὴν ἄνευ μὲν τῶν προτέρων ἀδύνατον εἶναι πόλιν, ἄνευ δὲ τούτων οἰκεῖσθαι καλῶς.

Πρὸς μὲν οὖν τὸ πόλιν εἶναι δόξειεν ἂν ἢ πάντα ἢ ἐνία γε τούτων ὀρθῶς ἀμφισβητεῖν, πρὸς μέντοι ζωὴν ἀγαθὴν ἢ παιδεία καὶ ἢ ἀρετὴ μάλιστα δικαίως ἂν ἀμφισβητοίησαν, καθάπερ εἴρηται καὶ πρότερον. ἐπεὶ δ' οὔτε πάντων ἴσον ἔχειν δεῖ τοὺς ἴσους ἔν τι μόνον ὄντας, οὔτε ἄνισον τοὺς ἀνίσους καθ' ἓν, ἀνάγκη πάσας εἶναι τὰς τοιαύτας πολιτείας περεκβάσεις. εἴρηται μὲν οὖν καὶ πρότερον ὅτι διαμφισβητοῦσι τρόπον τινὰ δικαίως πάντες, ἀπλῶς δ' οὐ πάντες δικαίως· οἱ πλούσιοι μὲν ὅτι πλεῖον μέτεστι τῆς χώρας αὐτοῖς, ἢ δὲ χώρα κοινόν, ἔτι πρὸς τὰ συμβόλαια πιστοὶ μᾶλλον ὡς ἐπὶ τὸ πλεόν· οἱ δὲ ἐλεύθεροι καὶ εὐγενεῖς ὡς ἐγγὺς ἀλλήλων (πολίται γὰρ μᾶλλον οἱ γενναιότεροι τῶν ἀγεννῶν, ἢ δ' εὐγένεια παρ' ἐκάστοις οἴκοι τίμιος)· ἔτι διότι βελτίους εἰκὸς τοὺς ἐκ βελτιόνων, εὐγένεια γὰρ ἐστὶν ἀρετὴ γένους· ὁμοίως δὲ φήσομεν δικαίως καὶ τὴν ἀρετὴν ἀμφισβητεῖν, κοινωνικὴν γὰρ ἀρετὴν εἶναί φαμεν τὴν δικαιοσύνην, ἢ πάσας ἀναγκαῖον ἀκολουθεῖν τὰς ἄλλας· ἀλλὰ μὴν καὶ οἱ πλείους πρὸς τοὺς ἐλάττους, καὶ γὰρ κρεῖττους καὶ πλουσιώτεροι καὶ βελτίους εἰσὶν, ὡς λαμβανομένων τῶν πλειόνων πρὸς τοὺς ἐλάττους.

ἄρ' οὖν [1283b] εἰ πάντες εἶεν ἐν μιᾷ πόλει, λέγω δ' οἶον οἷ τ' ἀγαθοὶ καὶ οἱ πλούσιοι καὶ <οἱ> εὐγενεῖς, ἔτι δὲ πλῆθος ἄλλο τι πολιτικόν, πότερον ἀμφισβήτησις ἔσται τίνας ἄρχειν δεῖ, ἢ οὐκ ἔσται; καθ' ἐκάστην μὲν οὖν πολιτείαν τῶν εἰρημένων ἀναμφισβήτητος ἢ κρίσις τίνας ἄρχειν δεῖ (τοῖς γὰρ κυρίους

γὰρ οὐ μόνον συμφέρει τοῖς τυράννοις, οὐδὲ μόνον οἱ τύραννοι
ποιοῦσιν, ἀλλ' ὁμοίως ἔχει καὶ περὶ τὰς ὀλιγαρχίας καὶ τὰς
δημοκρατίας· ὁ γὰρ ὀστρακισμὸς τὴν αὐτὴν ἔχει δύναμιν τρόπον
τινὰ τῷ κολοῦειν τοὺς ὑπερέχοντας καὶ φυγαδεύειν. τὸ δ' αὐτὸ καὶ
περὶ τὰς πόλεις καὶ τὰ ἔθνη ποιοῦσιν οἱ κύριοι τῆς δυνάμεως, οἷον
Ἀθηναῖοι μὲν περὶ Σαμίους καὶ Χίους καὶ Λεσβίους (ἐπεὶ γὰρ θᾶπτον
ἐγκρατῶς ἔσχον τὴν ἀρχήν, ἐταπείνωσαν αὐτοὺς παρὰ τὰς
συνθήκας), ὁ δὲ Περσῶν [1284b] βασιλεὺς Μήδους καὶ
Βαβυλωνίους καὶ τῶν ἄλλων τοὺς πεφρονηματισμένους διὰ τὸ
γενέσθαι ποτ' ἐπ' ἀρχῆς ἐπέκοπτε πολλάκις.

τὸ δὲ πρόβλημα καθόλου περὶ πάσας ἐστὶ τὰς πολιτείας, καὶ
τὰς ὀρθάς· αἱ μὲν γὰρ παρεκβεβηκυῖαι πρὸς τὸ ἴδιον ἀποσκοποῦσαι

τοῦτο δρῶσιν, οὐ μὴν ἀλλὰ περὶ τὰς τὸ κοινὸν ἀγαθὸν ἐπισκοπούσας τὸν αὐτὸν ἔχει τρόπον. δῆλον δὲ τοῦτο καὶ ἐπὶ τῶν ἄλλων τεχνῶν καὶ ἐπιστημῶν· οὔτε γὰρ γραφεὺς ἐάσειεν ἂν τὸν ὑπερβάλλοντα πόδα τῆς συμμετρίας ἔχειν τὸ ζῶον, οὐδ' εἰ διαφέροι τὸ κάλλος, οὔτε ναυπηγὸς πρύμναν ἢ τῶν ἄλλων τι μορίων τῶν τῆς νεῶς, οὐδὲ δὴ χοροδιδάσκαλος τὸν μεῖζον καὶ κάλλιον τοῦ παντὸς χοροῦ φθειγγόμενον ἐάσει συγχορεύειν. ὥστε διὰ τοῦτο μὲν οὐδὲν κωλύει τοὺς μονάρχους συμφωνεῖν ταῖς πόλεσιν, εἰ τῆς οἰκείας ἀρχῆς ὠφελίμου ταῖς πόλεσιν οὔσης τοῦτο δρῶσιν. διὸ κατὰ τὰς ὁμολογουμένας ὑπεροχὰς ἔχει τι δίκαιον πολιτικὸν ὁ λόγος ὁ περὶ τὸν ὁστρακισμόν. βέλτιον μὲν οὖν τὸν νομοθέτην ἐξ ἀρχῆς οὕτω συστήσαι τὴν πολιτείαν ὥστε μὴ δεῖσθαι τοιαύτης ἰατρείας· δεῦτερος δὲ πλοῦς, ἂν συμβῇ, πειρᾶσθαι τοιούτῳ τινὶ διορθώματι διορθοῦν. ὅπερ οὐκ ἐγίγνετο περὶ τὰς πόλεις· οὐ γὰρ ἔβλεπον πρὸς τὸ τῆς πολιτείας τῆς οἰκείας συμφέρον, ἀλλὰ στασιαστικῶς ἐχρῶντο τοῖς ὁστρακισμοῖς. ἐν μὲν οὖν ταῖς παρεκβεβηκυῖαις πολιτείαις ὅτι μὲν ἰδίᾳ συμφέρει καὶ δίκαιόν ἐστι, φανερόν, ἴσως δὲ καὶ ὅτι οὐχ ἀπλῶς δίκαιον, καὶ τοῦτο φανερόν· ἀλλ' ἐπὶ τῆς ἀρίστης πολιτείας ἔχει πολλὴν ἀπορίαν, οὐ κατὰ τῶν ἄλλων ἀγαθῶν τὴν ὑπεροχὴν, οἷον ἰσχύος καὶ πλούτου καὶ πολυφιλίας, ἀλλὰ ἂν τις γένηται διαφέρων κατ' ἀρετὴν, τί χρὴ ποιεῖν; οὐ γὰρ δὴ φαῖεν ἂν δεῖν ἐκβάλλειν καὶ μεθιστάναι τὸν τοιοῦτον· ἀλλὰ μὴν οὐδ' ἄρχειν γε τοῦ τοιούτου· παραπλήσιον γὰρ κἂν εἰ τοῦ Διὸς ἄρχειν ἀξιοῖεν, μερίζοντες τὰς ἀρχάς. λείπεται τοίνυν, ὅπερ ἔοικε πεφυκέναι, πείθεσθαι τῷ τοιούτῳ πάντας ἀσμένως, ὥστε βασιλέας εἶναι τοὺς τοιούτους αἰδίους ἐν ταῖς πόλεσιν.

Ἴσως δὲ καλῶς ἔχει μετὰ τοὺς εἰρημένους λόγους μεταβῆναι καὶ σκέψασθαι περὶ βασιλείας· φαμὲν γὰρ τῶν ὀρθῶν πολιτειῶν μίαν εἶναι ταύτην. σκεπτέον δὲ πότερον συμφέρει τῇ μελλούσῃ καλῶς οἰκήσεσθαι καὶ πόλει καὶ χώρᾳ βασιλεύεσθαι, ἢ οὐ, ἀλλ' ἄλλη τις πολιτεία μᾶλλον, ἢ τισὶ μὲν συμφέρει τισὶ δ' οὐ συμφέρει. δεῖ δὴ πρῶτον διελέσθαι πότερον ἔν τι γένος ἔστιν αὐτῆς ἢ πλείους [1285a] ἔχει διαφοράς. ῥάδιον δὴ τοῦτό γε καταμαθεῖν, ὅτι πλείω τε γένη περιέχει καὶ τῆς ἀρχῆς ὁ τρόπος ἐστὶν οὐχ εἷς πασῶν. ἢ γὰρ ἐν τῇ Λακωνικῇ πολιτείᾳ δοκεῖ μὲν εἶναι βασιλεία μάλιστα τῶν κατὰ νόμον, οὐκ ἔστι δὲ κυρία πάντων, ἀλλ' ὅταν ἐξέλθῃ τὴν χώραν ἡγεμών ἐστὶ τῶν πρὸς τὸν πόλεμον· ἔτι δὲ τὰ πρὸς τοὺς θεοὺς

ἀποδέδοται τοῖς βασιλεῦσιν. αὕτη μὲν οὖν ἡ βασιλεία οἷον στρατηγία τις αὐτοκρατόρων καὶ αἰδιός ἐστιν· κτείνει γὰρ οὐ κύριος, εἰ μὴ ἔνεκα δειλίας, καθάπερ ἐπὶ τῶν ἀρχαίων ἐν ταῖς πολεμικαῖς ἐξόδοις, ἐν χειρὸς νόμῳ. δηλοῖ δ' Ὅμηρος· ὁ γὰρ Ἀγαμέμνων κακῶς μὲν ἀκούων ἠνείχετο ἐν ταῖς ἐκκλησίαις, ἐξελθόντων δὲ καὶ κτείνει κύριος ἦν· λέγει γοῦν “ὄν δέ κ' ἐγὼν ἀπάνευθε μάχης ..., οὐ οἱ ἄρκιον ἐσσεῖται φυγέειν κύνας ἢ δ' οἰωνούς· παρ γὰρ ἐμοὶ θάνατος”.

ἐν μὲν οὖν τοῦτ' εἶδος βασιλείας, στρατηγία διὰ βίου, τούτων δ' αἱ μὲν κατὰ γένος εἰσὶν αἱ δ' αἰρεταί· παρὰ ταύτην δ' ἄλλο μοναρχίας εἶδος, οἷαι παρ' ἐνίοις εἰσὶ βασιλεῖαι τῶν βαρβάρων. ἔχουσι δ' αὖται τὴν δύναμιν πᾶσαι παραπλησίαν τυραννίσιν, εἰσὶ δὲ κατὰ νόμον καὶ πάτριαι· διὰ γὰρ τὸ δουλικώτεροι εἶναι τὰ ἦθη φύσει οἱ μὲν βάρβαροι τῶν Ἑλλήνων, οἱ δὲ περὶ τὴν Ἀσίαν τῶν περὶ τὴν Εὐρώπην, ὑπομένουσι τὴν δεσποτικὴν ἀρχὴν οὐδὲν δυσχεραίνοντες. τυραννικαὶ μὲν οὖν διὰ τὸ τοιοῦτόν εἰσιν, ἀσφαλεῖς δὲ διὰ τὸ πάτριαι καὶ κατὰ νόμον εἶναι. καὶ ἡ φυλακὴ δὲ βασιλικὴ καὶ οὐ τυραννικὴ διὰ τὴν αὐτὴν αἰτίαν. οἱ γὰρ πολῖται φυλάττουσιν ὅπλοις τοὺς βασιλεῖς, τοὺς δὲ τυράννους ξενικόν· οἱ μὲν γὰρ κατὰ νόμον καὶ ἐκόντων οἱ δ' ἀκόντων ἄρχουσιν, ὥσθ' οἱ μὲν παρὰ τῶν πολιτῶν οἱ δ' ἐπὶ τοὺς πολίτας ἔχουσι τὴν φυλακὴν.

δύο μὲν οὖν εἶδη ταῦτα μοναρχίας, ἕτερον δ' ὅπερ ἦν ἐν τοῖς ἀρχαίοις Ἑλλήσιν, οὓς καλοῦσιν αἰσυμνήτας. ἔστι δὲ τοῦθ' ὥς ἀπλῶς εἰπεῖν αἰρετὴ τυραννίς, διαφέρουσα δὲ τῆς βαρβαρικῆς οὐ τῷ μὴ κατὰ νόμον ἀλλὰ τῷ μὴ πάτριος εἶναι μόνον. ἦρχον δ' οἱ μὲν διὰ βίου τὴν ἀρχὴν ταύτην, οἱ δὲ μέχρι τινῶν ὠρισμένων χρόνων ἢ πράξεων, οἷον εἵλοντό ποτε Μυτιληναῖοι Πιπτακὸν πρὸς τοὺς φυγάδας ὧν προειστήκεσαν Ἀντιμενίδης καὶ Ἀλκαῖος ὁ ποιητής. δηλοῖ δ' Ἀλκαῖος ὅτι τύραννον εἵλοντο τὸν Πιπτακὸν ἐν τινὶ τῶν σκολιῶν μελῶν· ἐπιτιμᾷ γὰρ ὅτι “τὸν κακοπάτριδα Πίπτακον πόλιος τᾶς ἀχόλῳ καὶ [1285b] βαρυδαίμονος ἐστάσαντο τύραννον μέγ' ἐπαινέοντες ἀόλλεες”.

αὗται μὲν οὖν εἰσὶ τε καὶ ἦσαν διὰ μὲν τὸ δεσποτικαὶ εἶναι τυραννικαί, διὰ δὲ τὸ αἰρεταὶ καὶ ἐκόντων βασιλικά· τέταρτον δ' εἶδος μοναρχίας βασιλικῆς αἱ κατὰ τοὺς ἥρωικούς χρόνους ἐκούσiai τε καὶ πάτριαι γιγνόμεναι κατὰ νόμον. διὰ γὰρ τὸ τοὺς πρώτους γενέσθαι τοῦ πλήθους εὐεργέτας κατὰ τέχνας ἢ πόλεμον, ἢ διὰ τὸ συναγαγεῖν ἢ πορίσαι χώραν, ἐγίγνοντο βασιλεῖς ἐκόντων καὶ τοῖς

παραλαμβάνουσι πάτριοι. κύριοι δ' ἦσαν τῆς τε κατὰ πόλεμον ἡγεμονίας καὶ τῶν θυσιῶν, ὅσαι μὴ ἱερατικάι, καὶ πρὸς τούτοις τὰς δίκας ἔκρινον. τοῦτο δ' ἐποίουν οἱ μὲν οὐκ ὀμνύοντες οἱ δ' ὀμνύοντες· ὁ δ' ὄρκος ἦν τοῦ σκήπτρου ἐπανάτασις. οἱ μὲν οὖν ἐπὶ τῶν ἀρχαίων χρόνων καὶ τὰ κατὰ πόλιν καὶ τὰ ἔνδημα καὶ τὰ ὑπερόρια συνεχῶς ἦρχον· ὕστερον δὲ τὰ μὲν αὐτῶν παριέντων τῶν βασιλέων, τὰ δὲ τῶν ὄχλων παραιρουμένων, ἐν μὲν ταῖς ἄλλαις πόλεσιν αἱ θυσαί κατελείφθησαν τοῖς βασιλεῦσι μόνον, ὅπου δ' ἄξιον εἰπεῖν εἶναι βασιλείαν, ἐν τοῖς ὑπερορίοις τῶν πολεμικῶν τὴν ἡγεμονίαν μόνον εἶχον.

Βασιλείας μὲν οὖν εἶδη ταῦτα, τέτταρα τὸν ἀριθμόν, μία μὲν ἡ περὶ τοὺς ἡρωικοὺς χρόνους (αὕτη δ' ἦν ἐκόντων μὲν, ἐπὶ τισὶ δ' ὠρισμένοις· στρατηγός τε γὰρ ἦν καὶ δικαστὴς ὁ βασιλεὺς, καὶ τῶν πρὸς τοὺς θεοὺς κύριος), δευτέρα δ' ἡ βαρβαρική (αὕτη δ' ἐστὶν ἐκ γένους ἀρχὴ δεσποτική κατὰ νόμον), τρίτη δὲ ἦν αἰσυμνητεῖαν προσαγορεύουσιν (αὕτη δ' ἐστὶν αἰρετὴ τυραννίς), τετάρτη δ' ἡ Λακωνικὴ τούτων (αὕτη δ' ἐστὶν ὡς εἰπεῖν ἀπλῶς στρατηγία κατὰ γένος αἰδίδιος). αὗται μὲν οὖν τοῦτον τὸν τρόπον διαφέρουσιν ἀλλήλων· ἐμπτον δ' εἶδος βασιλείας, ὅταν ἡ πάντων κύριος εἷς ὢν, ὥσπερ ἕκαστον ἔθνος καὶ πόλις ἐκάστη τῶν κοινῶν, τεταγμένη κατὰ τὴν οἰκονομικήν. ὥσπερ γὰρ ἡ οἰκονομικὴ βασιλεία τις οἰκίας ἐστίν, οὕτως ἡ βασιλεία πόλεως καὶ ἔθνους ἐνὸς ἢ πλειόνων οἰκονομία. Σχεδὸν δὲ δύο ἐστὶν ὡς εἰπεῖν εἶδη βασιλείας περὶ ὧν σκεπτέον, αὕτη τε καὶ ἡ Λακωνικὴ· τῶν γὰρ ἄλλων αἱ πολλαὶ μεταξὺ τούτων εἰσὶν· ἐλαττόνων μὲν γὰρ κύριοι τῆς παμβασιλείας, πλειόνων δ' εἰσὶ τῆς Λακωνικῆς. ὥστε τὸ σκέμμα σχεδὸν περὶ δυοῖν ἐστίν, ἐν μὲν πότερον συμφέρει ταῖς πόλεσι στρατηγὸν αἰδίδιον εἶναι, καὶ τοῦτον ἢ κατὰ γένος ἢ κατὰ μέρος, [1286a] ἢ οὐ συμφέρει, ἐν δὲ πότερον ἔνα συμφέρει κύριον εἶναι πάντων, ἢ οὐ συμφέρει. τὸ μὲν οὖν περὶ τῆς τοιαύτης στρατηγίας ἐπισκοπεῖν νόμων ἔχει μᾶλλον εἶδος ἢ πολιτείας (ἐν ἀπάσαις γὰρ ἐνδέχεται γίνεσθαι τοῦτο ταῖς πολιτείαις), ὥστ' ἀφείσθω τὴν πρώτην· ὁ δὲ λοιπὸς τρόπος τῆς βασιλείας πολιτείας εἰδός ἐστίν, ὥστε περὶ τούτου δεῖ θεωρῆσαι καὶ τὰς ἀπορίας ἐπιδραμεῖν τὰς ἐνούσας. ἀρχὴ δ' ἐστὶ τῆς ζητήσεως αὕτη, πότερον συμφέρει μᾶλλον ὑπὸ τοῦ ἀρίστου ἀνδρὸς ἄρχεσθαι ἢ ὑπὸ τῶν ἀρίστων νόμων.

δοκοῦσι δὲ τοῖς νομίζουσι συμφέρειν βασιλεύεσθαι τὸ

καθόλου μόνον οἱ νόμοι λέγειν, ἀλλ' οὐ πρὸς τὰ προσπίπτοντα ἐπιτάττειν, ὥστ' ἐν ὁποιοῦν τέχνῃ τὸ κατὰ γράμματ' ἄρχειν ἡλίθιον· καὶ εὖ πῶς ἐν Αἰγύπτῳ μετὰ τὴν τετρήμερον κινεῖν ἐξεστὶ τοῖς ἰατροῖς (ἐὰν δὲ πρότερον, ἐπὶ τῷ αὐτοῦ κινδύνῳ). φανερόν τοίνυν ὡς οὐκ ἔστιν ἡ κατὰ γράμματα καὶ νόμους ἀρίστη πολιτεία, διὰ τὴν αὐτὴν αἰτίαν. ἀλλὰ μὴν κάκεῖνον δεῖ ὑπάρχειν τὸν λόγον, τὸν καθόλου, τοῖς ἄρχουσιν. κρεῖττον δ' ὅ μὴ πρόσσεστι τὸ παθητικὸν ὅλως ἢ ὅ συμφυές· τῷ μὲν οὖν νόμῳ τοῦτο οὐχ ὑπάρχει, ψυχὴν δ' ἀνθρωπίνην ἀνάγκη τοῦτ' ἔχειν πᾶσαν. ἀλλ' ἴσως ἂν φαίη τις ὡς ἀντὶ τούτου βουλευέσεται περὶ τῶν καθ' ἕκαστα κάλλιον. ὅτι μὲν τοίνυν ἀνάγκη νομοθέτην αὐτὸν εἶναι, δῆλον, καὶ κεῖσθαι νόμους, ἀλλὰ μὴ κυρίους ἢ παρεκβαίνουσιν, ἐπεὶ περὶ τῶν γ' ἄλλων εἶναι δεῖ κυρίους· ὅσα δὲ μὴ δυνατὸν τὸν νόμον κρίνειν ἢ ὅλως ἢ εὖ, πότερον ἓνα τὸν ἄριστον δεῖ ἄρχειν ἢ πάντας; καὶ γὰρ νῦν συνιόντες δικάζουσι καὶ βουλευόνται καὶ κρίνουσιν, αὐταὶ δ' αἱ κρίσεις εἰσὶ πᾶσαι περὶ τῶν καθ' ἕκαστον. καθ' ἓνα μὲν οὖν συμβαλλόμενος ὅστισοῦν ἴσως χεῖρων· ἀλλ' ἔστιν ἡ πόλις ἐκ πολλῶν, ὥσπερ ἐστίασις συμφορητὸς καλλίων μιᾶς καὶ ἀπλῆς· διὰ τοῦτο καὶ κρίνει ἄμεινον ὄχλος πολλὰ ἢ εἷς ὅστισοῦν.

ἔτι μᾶλλον ἀδιάφθορον τὸ πολὺ - καθάπερ ὕδωρ τὸ πλεῖον, οὕτω καὶ τὸ πλῆθος τῶν ὀλίγων ἀδιαφθορώτερον· τοῦ δ' ἐνὸς ὑπ' ὀργῆς κρατηθέντος ἢ τινος ἐτέρου πάθους τοιούτου ἀναγκαῖον διεφθάρθαι τὴν κρίσιν, ἐκεῖ δ' ἔργον ἅμα πάντας ὀργισθῆναι καὶ ἁμαρτεῖν. ἔστω δὲ τὸ πλῆθος οἱ ἐλεύθεροι, μηδὲν παρὰ τὸν νόμον πράττοντες ἀλλ' ἢ περὶ ὧν ἐκλείπειν ἀναγκαῖον αὐτόν. εἰ δὲ δὴ τοῦτο μὴ ῥάδιον ἐν πολλοῖς, ἀλλ' εἰ πλείους εἶεν ἀγαθοὶ καὶ ἄνδρες καὶ πολῖται, πότερον ὁ εἷς ἀδιαφθορώτερος ἄρχων, ἢ μᾶλλον οἱ πλείους μὲν τὸν ἀριθμὸν ἀγαθοὶ [1286b] δὲ πάντες; ἢ δῆλον ὡς οἱ πλείους; “ἀλλ' οἱ μὲν στασιάζουσιν ὁ δὲ εἷς ἀστασίαστος.” ἀλλὰ πρὸς τοῦτ' ἀντιθετέον ἴσως ὅτι σπουδαῖοι τὴν ψυχὴν, ὥσπερ κάκεῖνος ὁ εἷς. εἰ δὴ τὴν μὲν τῶν πλειόνων ἀρχὴν ἀγαθῶν δ' ἀνδρῶν πάντων ἀριστοκρατίαν θετέον, τὴν δὲ τοῦ ἐνὸς βασιλείαν, αἰρετώτερον ἂν εἴη ταῖς πόλεσιν ἀριστοκρατία βασιλείας, καὶ μετὰ δυνάμεως καὶ χωρὶς δυνάμεως οὔσης τῆς ἀρχῆς, ἂν ἢ λαβεῖν πλείους ὁμοίους. καὶ διὰ τοῦτ' ἴσως ἐβασιλεύοντο πρότερον, ὅτι σπάνιον ἦν εὐρεῖν ἄνδρας πολὺ διαφέροντας κατ' ἀρετὴν, ἄλλως τε καὶ τότε μικρὰς οἰκοῦντας πόλεις. ἔτι δ' ἀπ' εὐεργεσίας καθίστασαν τοὺς βασιλεῖς,

ὅπερ ἐστὶν ἔργον τῶν ἀγαθῶν ἀνδρῶν. ἐπεὶ δὲ συνέβαινε γίνεσθαι πολλοὺς ὁμοίους πρὸς ἀρετὴν, οὐκέτι ὑπέμενον ἀλλ' ἐζήτουν κοινόν τι καὶ πολιτείαν καθίστασαν. ἐπεὶ δὲ χεῖρους γιγνώμενοι ἐχρηματίζοντο ἀπὸ τῶν κοινῶν, ἐντεῦθεν ποθεν εὐλογον γενέσθαι τὰς ὀλιγαρχίας· ἐντιμον γὰρ ἐποίησαν τὸν πλοῦτον. ἐκ δὲ τούτων πρῶτον εἰς τυραννίδας μετέβαλλον, ἐκ δὲ τῶν τυραννίδων εἰς δημοκρατίαν· αἰεὶ γὰρ εἰς ἐλάττους ἄγοντες δι' αἰσχροκέρδειαν ἰσχυρότερον τὸ πλῆθος κατέστησαν, ὥστ' ἐπιθέσθαι καὶ γενέσθαι δημοκρατίας. ἐπεὶ δὲ καὶ μείζους εἶναι συμβέβηκε τὰς πόλεις, ἴσως οὐδὲ ράδιον ἔτι γίνεσθαι πολιτείαν ἐτέραν παρὰ δημοκρατίαν.

εἰ δὲ δὴ τις ἄριστον θείη τὸ βασιλεύεσθαι ταῖς πόλεσιν, πῶς ἔξει τὰ περὶ τῶν τέκνων; πότερον καὶ τὸ γένος δεῖ βασιλεύειν; ἀλλὰ γιγνομένων ὁποιοὶ τινες ἔτυχον, βλαβερόν. “ἀλλ' οὐ παραδώσει κύριος ὦν τοῖς τέκνοις.” ἀλλ' οὐκ ἔτι τοῦτο ράδιον πιστεῦσαι· χαλεπὸν γάρ, καὶ μείζονος ἀρετῆς ἢ κατ' ἀνθρωπίνην φύσιν. ἔχει δ' ἀπορίαν καὶ περὶ τῆς δυνάμεως, πότερον ἔχειν δεῖ τὸν μέλλοντα βασιλεύειν ἰσχύν τινα περὶ αὐτόν, ἢ δυνήσεται βιάζεσθαι τοὺς μὴ βουλομένους πειθαρχεῖν, ἢ πῶς ἐνδέχεται τὴν ἀρχὴν διοικεῖν; εἰ γὰρ καὶ κατὰ νόμον εἴη κύριος, μὴδὲν πράττων κατὰ τὴν αὐτοῦ βούλησιν παρὰ τὸν νόμον, ὅμως ἀναγκαῖον ὑπάρχειν αὐτῷ δύναμιν ἢ φυλάξει τοὺς νόμους. τάχα μὲν οὖν τὰ περὶ τὸν βασιλέα τὸν τοιοῦτον οὐ χαλεπὸν διορίσαι· δεῖ γὰρ αὐτὸν μὲν ἔχειν ἰσχύν, εἶναι δὲ τοσαύτην τὴν ἰσχύν ὥστε ἐκάστου μὲν καὶ ἐνὸς καὶ συμπλειόνων κρείττω τοῦ δὲ πλῆθους ἥττω «καθεστάναι», καθάπερ οἱ τ' ἀρχαῖοι τὰς φυλακὰς ἐδίδοσαν, ὅτε καθισταῖεν τινα τῆς πόλεως ὃν ἐκάλουν αἰσυμνήτην ἢ τύραννον, καὶ Διονυσίῳ τις, ὅτ' ἤτει τοὺς φύλακας, συνεβούλευε τοῖς Συρακουσίοις δίδόναι τοσοῦτους τοὺς φύλακας.

[1287a] Περὶ δὲ τοῦ βασιλέως τοῦ κατὰ τὴν αὐτοῦ βούλησιν πάντα πράττοντος ὃ τε λόγος ἐφέστηκε νῦν καὶ ποιητέον τὴν σκέψιν. ὁ μὲν γὰρ κατὰ νόμον λεγόμενος βασιλεὺς οὐκ ἔστιν εἶδος, καθάπερ εἵπομεν, πολιτείας (ἐν πάσαις γὰρ ὑπάρχειν ἐνδέχεται στρατηγίαν αἰδίδιον, οἷον ἐν δημοκρατίᾳ καὶ ἀριστοκρατίᾳ, καὶ πολλοὶ ποιοῦσιν ἓνα κύριον τῆς διοικήσεως· τοιαύτη γὰρ ἀρχὴ τις ἔστι καὶ περὶ Ἐπίδαμνον, καὶ περὶ Ὀποῦντα δὲ κατὰ τι μέρος ἔλαττον)· περὶ δὲ τῆς παμβασιλείας καλουμένης (αὕτη δ' ἐστὶ καθ' ἣν ἄρχει πάντα κατὰ τὴν ἑαυτοῦ βούλησιν ὁ βασιλεὺς) δοκεῖ [δέ] τισιν οὐδὲ κατὰ φύσιν εἶναι τὸ κύριον ἓνα πάντων εἶναι τῶν πολιτῶν, ὅπου συνέστηκεν ἐξ

ἀλλὰ μὴν οὐδὲ ῥόδιον ἐφορᾶν πολλὰ τὸν ἓνα· δεήσει ἄρα πλείονας εἶναι τοὺς ὑπ' αὐτοῦ καθισταμένους ἄρχοντας, ὥστε τί διαφέρει τοῦτο ἐξ ἀρχῆς εὐθὺς ὑπάρχειν ἢ τὸν ἓνα καταστῆσαι τοῦτον τὸν τρόπον; ἔτι, ὃ καὶ πρότερον εἰρημένον ἐστίν, εἴπερ ὁ

μάλιστα δὲ δοκοῦσιν εἶναι δύο, καθάπερ ἐπὶ τῶν πνευμάτων λέγεται τὰ μὲν βόρεια τὰ δὲ νότια, τὰ δ' ἄλλα τούτων παρεκβάσεις, οὕτω καὶ τῶν πολιτειῶν δύο, δῆμος καὶ ὀλιγαρχία. τὴν γὰρ ἀριστοκρατίαν τῆς ὀλιγαρχίας εἶδος τιθέασιν ὥς οὔσαν ὀλιγαρχίαν τινά, καὶ τὴν καλουμένην πολιτείαν δημοκρατίας, ὥσπερ ἐν τοῖς πνεύμασι τὸν μὲν ζέφυρον τοῦ βορέου, τοῦ δὲ νότου τὸν εὐρον. ὁμοίως δ' ἔχει καὶ περὶ τὰς ἀρμονίας, ὥς φασὶ τινες· καὶ γὰρ ἐκεῖ τίθενται εἶδη δύο, τὴν δωριστὶ καὶ τὴν φρυγιστί, τὰ δ' ἄλλα συντάγματα τὰ μὲν Δώρια τὰ δὲ Φρύγια καλοῦσιν. μάλιστα μὲν οὖν εἰώθασιν οὕτως ὑπολαμβάνειν περὶ τῶν πολιτειῶν· ἀληθέστερον δὲ καὶ βέλτιον ὥς ἡμεῖς διείλομεν, δυοῖν ἢ μιᾷς οὔσης τῆς καλῶς συνεστηκυίας τὰς ἄλλας εἶναι παρεκβάσεις, τὰς μὲν τῆς εὐ κεκραμένης ἀρμονίας τὰς δὲ τῆς ἀρίστης πολιτείας, ὀλιγαρχικὰς μὲν τὰς συντονωτέρας καὶ δεσποτικωτέρας, τὰς δ' ἀνειμένας καὶ μαλακὰς δημοτικάς.

Οὐ δεῖ δὲ τιθέναι δημοκρατίαν, καθάπερ εἰώθασί τινες νῦν, ἀπλῶς οὕτως, ὅπου κύριον τὸ πλῆθος (καὶ γὰρ ἐν ταῖς ὀλιγαρχίαις καὶ πανταχοῦ τὸ πλεόν μέρος κύριον), οὐδ' ὀλιγαρχίαν, ὅπου κύριοι ὀλίγοι τῆς πολιτείας. εἰ γὰρ εἴησαν οἱ πάντες χίλιοι καὶ τριακόσιοι, καὶ τούτων οἱ χίλιοι πλούσιοι, καὶ μὴ μεταδιδοῖεν ἀρχῆς τοῖς τριακοσίοις καὶ πένησιν ἐλευθέροις οὔσι καὶ τᾶλλα ὁμοίοις, οὐθεὶς ἂν φαίη δημοκρατεῖσθαι τούτους· ὁμοίως δὲ καὶ εἰ πένητες ὀλίγοι μὲν εἶεν, κρείττους δὲ τῶν εὐπόρων πλειόνων ὄντων, οὐδεὶς ἂν ὀλιγαρχίαν προσαγορεύσειεν οὐδὲ τὴν τοιαύτην, εἰ τοῖς ἄλλοις οὔσι πλουσίοις μὴ μετεῖη τῶν τιμῶν. μᾶλλον τοίνυν λεκτέον ὅτι [1290b] δῆμος μὲν ἐστὶν ὅταν οἱ ἐλεύθεροι κύριοι ᾖσιν, ὀλιγαρχία δ' ὅταν οἱ πλούσιοι, ἀλλὰ συμβαίνει τοὺς μὲν πολλοὺς εἶναι τοὺς δ' ὀλίγους· ἐλεύθεροι μὲν γὰρ πολλοί, πλούσιοι δ' ὀλίγοι. καὶ γὰρ ἂν εἰ κατὰ μέγεθος διενέμοντο τὰς ἀρχάς, ὥσπερ ἐν Αἰθιοπία φασὶ τινες, ἢ κατὰ κάλλος, ὀλιγαρχία ἦν ἂν· ὀλίγον γὰρ τὸ πλῆθος καὶ τὸ τῶν καλῶν καὶ τὸ τῶν μεγάλων. οὐ μὴν ἀλλ' οὐδὲ τούτοις μόνον ἱκανῶς ἔχει διωρίσθαι τὰς πολιτείας ταύτας· ἀλλ' ἐπεὶ πλείονα μόρια καὶ τοῦ

δήμου καὶ τῆς ὀλιγαρχίας εἰσὶν, ἔτι διαληπτέον ὥς οὐτ' ἂν οἱ ἐλεύθεροι ὀλίγοι ὄντες πλειόνων καὶ μὴ ἐλευθέρων ἄρχωσι, δῆμος, οἷον ἐν Ἀπολλωνία τῇ ἐν τῷ Ἰονίῳ καὶ ἐν Θήρᾳ (ἐν τούτων γὰρ ἑκατέρᾳ τῶν πόλεων ἐν ταῖς τιμαῖς ἦσαν οἱ διαφέροντες κατ' εὐγένειαν καὶ πρῶτοι κατασχόντες τὰς ἀποικίας, ὀλίγοι ὄντες, πολλῶν), οὔτε ἂν οἱ πλούσιοι διὰ τὸ κατὰ πλῆθος ὑπερέχειν, ὀλιγαρχία, οἷον ἐν Κολοφῶνι τὸ παλαιόν (ἐκεῖ γὰρ ἐκέκτητο μακρὰν οὐσίαν οἱ πλείους πρὶν γενέσθαι τὸν πόλεμον τὸν πρὸς Λυδοῦς), ἀλλ' ἔστι δημοκρατία μὲν ὅταν οἱ ἐλεύθεροι καὶ ἄποροι πλείους ὄντες κύριοι τῆς ἀρχῆς ᾧσιν, ὀλιγαρχία δ' ὅταν οἱ πλούσιοι καὶ εὐγενέστεροι ὀλίγοι ὄντες.

δούλην· αὐτάρκης γὰρ ἡ πόλις, τὸ δὲ δοῦλον οὐκ αὐταρκες. διόπερ ἐν τῇ Πολιτείᾳ κομψῶς τοῦτο, οὐχ ἱκανῶς δὲ εἴρηται. φησὶ γὰρ ὁ Σωκράτης ἐκ τεττάρων τῶν ἀναγκαιοτάτων πόλιν συγκεῖσθαι, λέγει δὲ τούτους ὑφάντην καὶ γεωργὸν καὶ σκυτοτόμον καὶ οἰκοδόμον· πάλιν δὲ προστίθουσιν, ὥς οὐκ αὐτάρκων τούτων, χαλκέα καὶ τοὺς ἐπὶ τοῖς ἀναγκαίοις βοσκήμασιν, ἔτι δ' ἔμπορόν τε καὶ κάπηλον· καὶ ταῦτα πάντα γίνεται πλήρωμα τῆς πρώτης πόλεως, ὥς τῶν ἀναγκαίων τε χάριν πᾶσαν πόλιν συνεστηκυῖαν, ἀλλ' οὐ τοῦ καλοῦ μᾶλλον, ἴσον τε δεομένην σκυτέων τε καὶ γεωργῶν. τὸ δὲ προπολεμοῦν οὐ πρότερον ἀποδίδωσι μέρος πρὶν ἢ τῆς χώρας αὐξομένης καὶ τῆς τῶν πλησίον ἀπτομένης εἰς πόλεμον καταστῶσιν. ἀλλὰ μὴν καὶ ἐν τοῖς τέτταρσι καὶ τοῖς ὅποσοις οὖν κοινωνοῖς ἀναγκαῖον εἶναι τινα τὸν ἀποδώσοντα καὶ κρινοῦντα τὸ δίκαιον. εἴπερ οὖν καὶ ψυχὴν ἂν τις θεῖη ζῶον μόνον μᾶλλον ἢ σῶμα, καὶ πόλεων τὰ τοιαῦτα μᾶλλον θετέον τῶν εἰς τὴν ἀναγκαίαν χρῆσιν συντεινόντων, τὸ πολεμικὸν καὶ τὸ μετέχον δικαιοσύνης δικαστικῆς, πρὸς δὲ τοῦτοις τὸ βουλευόμενον, ὅπερ ἐστὶ συνέσεως πολιτικῆς ἔργον. καὶ ταῦτ' εἴτε κεχωρισμένως ὑπάρχει τισὶν εἴτε τοῖς αὐτοῖς, οὐθὲν διαφέρει πρὸς τὸν λόγον· καὶ γὰρ ὀπλιτεύειν καὶ γεωργεῖν συμβαίνει τοῖς αὐτοῖς πολλάκις. ὥστε εἴπερ καὶ ταῦτα καὶ ἐκεῖνα θετέα μόρια τῆς πόλεως, φανερόν ὅτι τό γε ὀπλιτικὸν ἀναγκαῖον ἐστὶ μόνον τῆς πόλεως.

ἔβδομον δὲ τὸ ταῖς οὐσίαις λειτουργοῦν, ὃ καλοῦμεν εὐπόρους. ὄγδοον δὲ τὸ δημιουργικὸν καὶ τὸ περὶ τὰς ἀρχὰς λειτουργοῦν, εἴπερ ἄνευ ἀρχόντων ἀδύνατον εἶναι πόλιν. ἀναγκαῖον οὖν εἶναι τινὰς τοὺς δυναμένους ἄρχειν καὶ λειτουργοῦντας ἢ συνεχῶς ἢ κατὰ μέρος τῇ πόλει ταύτῃ τὴν λειτουργίαν. λοιπὰ δὲ περὶ ὧν τυγχάνομεν διωρικότες ἀρτίως, τὸ βουλευόμενον καὶ κρίνον περὶ τῶν δικαίων τοῖς ἀμφισβητοῦσιν. εἴπερ οὖν ταῦτα δεῖ γενέσθαι ταῖς πόλεσι, καὶ καλῶς γενέσθαι καὶ δικαίως, [1291b] ἀναγκαῖον καὶ μετέχοντας εἶναι τινὰς ἀρετῆς τῶν πολιτῶν. τὰς μὲν οὖν ἄλλας δυνάμεις τοῖς αὐτοῖς ὑπάρχειν ἐνδέχεσθαι δοκεῖ πολλοῖς, οἷον τοὺς αὐτοὺς εἶναι τοὺς προπολεμοῦντας καὶ γεωργοῦντας καὶ τεχνίτας, ἔτι δὲ τοὺς βουλευομένους τε καὶ κρίνοντας· ἀντιποιοῦνται δὲ καὶ τῆς ἀρετῆς πάντες, καὶ τὰς πλείστας ἀρχὰς ἄρχειν οἶονται δύνασθαι· ἀλλὰ πένεσθαι καὶ πλουτεῖν τοὺς αὐτοὺς ἀδύνατον. διὸ ταῦτα μέρη μάλιστα εἶναι δοκεῖ πόλεως, οἱ εὖποροι καὶ οἱ ἄποροι. ἔτι δὲ διὰ τὸ

ὥς ἐπὶ τὸ πολὺ τοὺς μὲν ὀλίγους εἶναι τοὺς δὲ πολλοὺς ταῦτα ἐναντία μέρη φαίνεται τῶν τῆς πόλεως μορίων. ὥστε καὶ τὰς πολιτείας κατὰ τὰς ὑπεροχὰς τούτων καθιστᾶσι, καὶ δύο πολιτεῖαι δοκοῦσιν εἶναι, δημοκρατία καὶ ὀλιγαρχία.

ὅτι μὲν οὖν εἰσι πολιτεῖαι πλείους, καὶ διὰ τίνας αἰτίας, εἴρηται πρότερον· ὅτι δὲ ἔστι καὶ δημοκρατίας εἶδη πλείω καὶ ὀλιγαρχίας, λέγωμεν. φανερόν δὲ τοῦτο καὶ ἐκ τῶν εἰρημένων. εἶδη γὰρ πλείω τοῦ τε δήμου καὶ τῶν λεγομένων γνωρίμων ἔστιν, οἷον δήμου μὲν εἶδη ἓν μὲν οἱ γεωργοί, ἕτερον δὲ τὸ περὶ τὰς τέχνας, ἄλλο δὲ τὸ ἀγοραῖον τὸ περὶ ὦνῆν καὶ πρᾶσιν διατρίβον, ἄλλο δὲ τὸ περὶ τὴν θάλατταν, καὶ τούτου τὸ μὲν πολεμικὸν τὸ δὲ χρηματιστικὸν τὸ δὲ πορθμευτικὸν τὸ δ' ἀλειυτικόν (πολλαχοῦ γὰρ ἕκαστα τούτων πολυόχλα, οἷον ἀλιεῖς μὲν ἐν Τάραντι καὶ Βυζαντίῳ, τριηρικὸν δὲ Ἀθήνησιν, ἐμπορικὸν δὲ ἐν Αἰγίνῃ καὶ Χίῳ, πορθμικὸν <δ> ἐν Τενέδῳ), πρὸς δὲ τούτοις τὸ χερνητικὸν καὶ τὸ μικρὰν ἔχον οὐσίαν ὥστε μὴ δύνασθαι σχολάζειν, ἔτι τὸ μὴ ἐξ ἀμφοτέρων [πολιτῶν] ἐλευθέρων, κἂν εἴ τι τοιοῦτον ἕτερον πλήθους εἶδος· τῶν δὲ γνωρίμων πλοῦτος εὐγένεια ἀρετὴ παιδεῖα καὶ τὰ τούτοις λεγόμενα κατὰ τὴν αὐτὴν διαφοράν.

δημοκρατία μὲν οὖν ἔστι πρώτη μὲν ἢ λεγομένη μάλιστα κατὰ τὸ ἴσον. ἴσον γάρ φησιν ὁ νόμος ὁ τῆς τοιαύτης δημοκρατίας τὸ μὴδὲν μᾶλλον ὑπερέχειν τοὺς ἀπόρους ἢ τοὺς εὐπόρους, μὴδὲ κυρίους εἶναι ὁποτέρουσοῦν, ἀλλ' ὁμοίους ἀμφοτέρους. εἴπερ γὰρ ἐλευθερία μάλιστ' ἔστιν ἐν δημοκρατίᾳ, καθάπερ ὑπολαμβάνουσί τινες, καὶ ἰσότης, οὕτως ἂν εἴη μάλιστα, κοινωνούτων ἀπάντων μάλιστα τῆς πολιτείας ὁμοίως. ἐπεὶ δὲ πλείων ὁ δῆμος, κύριον δὲ τὸ δόξαν τοῖς πλείοσιν, ἀνάγκη δημοκρατίαν εἶναι ταύτην. ἐν μὲν οὖν εἶδος δημοκρατίας τοῦτο· ἄλλο δὲ τὸ τὰς ἀρχὰς ἀπὸ τιμημάτων εἶναι, βραχέων δὲ τούτων ὄντων· δεῖ δὲ τῷ κτωμένῳ ἐξουσίαν εἶναι μετέχειν καὶ τὸν ἀποβάλλοντα μὴ μετέχειν. [1292a] ἕτερον εἶδος δημοκρατίας τὸ μετέχειν ἅπαντας τοὺς πολίτας ὅσοι ἀνυπεύθυνοι, ἄρχειν δὲ τὸν νόμον· ἕτερον δὲ εἶδος δημοκρατίας τὸ παντὶ μετεῖναι τῶν ἀρχῶν, ἐὰν μόνον ἦ πολίτης, ἄρχειν δὲ τὸν νόμον· ἕτερον δὲ εἶδος δημοκρατίας τᾶλλα μὲν εἶναι ταῦτά, κύριον δ' εἶναι τὸ πλῆθος καὶ μὴ τὸν νόμον. τοῦτο δὲ γίνεται ὅταν τὰ ψηφίσματα κύρια ἦ ἀλλὰ μὴ ὁ νόμος· συμβαίνει δὲ τοῦτο διὰ τοὺς δημαγωγούς. ἐν μὲν γὰρ ταῖς κατὰ νόμον δημοκρατουμέναις οὐ γίνεται δημαγωγός, ἀλλ' οἱ

βέλτιστοι τῶν πολιτῶν εἰσιν ἐν προεδρίᾳ· ὅπου δ' οἱ νόμοι μὴ εἰσι κύριοι, ἐνταῦθα γίνονται δημαγωγοί. μόναρχος γὰρ ὁ δῆμος γίνεται, σύνθετος εἷς ἐκ πολλῶν· οἱ γὰρ πολλοὶ κύριοί εἰσιν οὐχ ὥς ἕκαστος ἀλλὰ πάντες. Ὅμηρος δὲ ποίαν λέγει οὐκ ἀγαθὸν εἶναι πολυκοιρανίην, πότερον ταύτην ἢ ὅταν πλείους ᾧσιν οἱ ἄρχοντες ὥς ἕκαστος, ἄδηλον. ὁ δ' οὖν τοιοῦτος δῆμος, ἅτε μόναρχος ὢν, ζητεῖ μοναρχεῖν διὰ τὸ μὴ ἄρχεσθαι ὑπὸ νόμου, καὶ γίνεται δεσποτικός, ὥστε οἱ κόλακες ἐντιμοί, καὶ ἔστιν ὁ τοιοῦτος δῆμος ἀνάλογον τῶν μοναρχιῶν τῇ τυραννίδι. διὸ καὶ τὸ ἦθος τὸ αὐτό, καὶ ἄμφω δεσποτικὰ τῶν βελτιόνων, καὶ τὰ ψηφίσματα ὥσπερ ἐκεῖ τὰ ἐπιτάγματα, καὶ ὁ δημαγωγὸς καὶ ὁ κόλαξ οἱ αὐτοὶ καὶ ἀνάλογον. καὶ μάλιστα δ' ἑκάτεροι παρ' ἑκατέροις ἰσχύουσιν, οἱ μὲν κόλακες παρὰ τοῖς τυράννοις, οἱ δὲ δημαγωγοὶ παρὰ τοῖς δήμοις τοῖς τοιούτοις. αἵτιοι δὲ εἰσι τοῦ εἶναι τὰ ψηφίσματα κύρια ἀλλὰ μὴ τοὺς νόμους οὗτοι, πάντα ἀνάγοντες εἰς τὸν δῆμον· συμβαίνει γὰρ αὐτοῖς γίνεσθαι μεγάλοις διὰ τὸ τὸν μὲν δῆμον πάντων εἶναι κύριον, τῆς δὲ τοῦ δήμου δόξης τούτους· πείθεται γὰρ τὸ πλῆθος τούτοις. ἔτι δ' οἱ ταῖς ἀρχαῖς ἐγκαλοῦντες τὸν δῆμόν φασι δεῖν κρίνειν, ὁ δὲ ἀσμένως δέχεται τὴν πρόκλησιν· ὥστε καταλύονται πᾶσαι αἱ ἀρχαί. εὐλόγως δὲ ἂν δόξειεν ἐπιτιμᾶν ὁ φάσκων τὴν τοιαύτην εἶναι δημοκρατίαν οὐ πολιτείαν. ὅπου γὰρ μὴ νόμοι ἄρχουσιν, οὐκ ἔστι πολιτεία. δεῖ γὰρ τὸν μὲν νόμον ἄρχειν πάντων <τῶν καθόλου>, τῶν δὲ καθ' ἕκαστα τὰς ἀρχάς, καὶ ταύτην πολιτείαν κρίνειν. ὥστ' εἴπερ ἐστὶ δημοκρατία μία τῶν πολιτειῶν, φανερόν ὥς ἡ τοιαύτη κατάστασις, ἐν ἣ ψηφίσμασι πάντα διοικεῖται, οὐδὲ δημοκρατία κυρίως· οὐθὲν γὰρ ἐνδέχεται ψήφισμα εἶναι καθόλου. τὰ μὲν οὖν τῆς δημοκρατίας εἶδη διωρίσθω τὸν τρόπον τοῦτον.

Ὀλιγαρχίας δὲ εἶδη ἐν μὲν τὸ ἀπὸ τιμημάτων εἶναι τὰς ἀρχὰς τηλικούτων ὥστε τοὺς ἀπόρους μὴ μετέχειν, πλείους ὄντας, ἐξεῖναι δὲ τῷ κτωμένῳ μετέχειν τῆς πολιτείας, ἄλλο [1292b] δέ, ὅταν ἀπὸ τιμημάτων μακρῶν ᾧσιν αἱ ἀρχαὶ καὶ αἰρῶνται αὐτοὶ τοὺς ἐλλείποντας (ἂν μὲν οὖν ἐκ πάντων τούτων τοῦτο ποιῶσι, δοκεῖ τοῦτ' εἶναι μᾶλλον ἀριστοκρατικόν, ἐὰν δὲ ἐκ τινῶν ἀφορισμένων, ὀλιγαρχικόν)· ἕτερον εἶδος ὀλιγαρχίας, ὅταν παῖς ἀντὶ πατρὸς εἰσὶν, τέταρτον δ', ὅταν ὑπάρχη τε τὸ νῦν λεχθὲν καὶ ἀρχὴ μὴ ὁ νόμος ἀλλ' οἱ ἄρχοντες. καὶ ἔστιν ἀντίστροφος αὕτη ἐν ταῖς ὀλιγαρχίαις ὥσπερ ἡ τυραννὶς ἐν ταῖς μοναρχίαις, καὶ περὶ ἧς τελευταίας εἵπαμεν

δημοκρατίας ἐν ταῖς δημοκρατίαις· καὶ καλοῦσι δὴ τὴν τοιαύτην ὀλιγαρχίαν δυναστείαν.

ὀλιγαρχίας μὲν οὖν εἶδη τοσαῦτα καὶ δημοκρατίας· οὐ δεῖ δὲ λανθάνειν ὅτι πολλαχοῦ συμβέβηκεν ὥστε τὴν μὲν πολιτείαν τὴν κατὰ τοὺς νόμους μὴ δημοτικὴν εἶναι, διὰ δὲ τὸ ἔθος καὶ τὴν ἀγωγὴν πολιτεύεσθαι δημοτικῶς, ὁμοίως δὲ πάλιν παρ' ἄλλοις τὴν μὲν κατὰ τοὺς νόμους εἶναι πολιτείαν δημοτικωτέραν, τῇ δ' ἀγωγῇ καὶ τοῖς ἔθεσιν ὀλιγαρχεῖσθαι μᾶλλον. συμβαίνει δὲ τοῦτο μάλιστα μετὰ τὰς μεταβολὰς τῶν πολιτειῶν· οὐ γὰρ εὐθὺς μεταβαίνουσιν, ἀλλὰ ἀγαπῶσι τὰ πρῶτα μικρὰ πλεονεκτοῦντες παρ' ἀλλήλων, ὥσθ' οἱ μὲν νόμοι διαμένουσιν οἱ προϋπάρχοντες, κρατοῦσι δ' οἱ μεταβαλόντες τὴν πολιτείαν.

Ὅτι δ' ἔστι τοσαῦτα εἶδη δημοκρατίας καὶ ὀλιγαρχίας, ἐξ αὐτῶν τῶν εἰρημένων φανερόν ἐστιν. ἀνάγκη γὰρ ἢ πάντα τὰ εἰρημένα μέρη τοῦ δήμου κοινωνεῖν τῆς πολιτείας, ἢ τὰ μὲν τὰ δὲ μή. ὅταν μὲν οὖν τὸ γεωργικὸν καὶ τὸ κεκτημένον μετρίαν οὐσίαν κύριον ἢ τῆς πολιτείας, πολιτεύονται κατὰ νόμους (ἔχουσι γὰρ ἐργαζόμενοι ζῆν, οὐ δύνανται δὲ σχολάζειν, ὥστε τὸν νόμον ἐπιστήσαντες ἐκκλησιάζουσι τὰς ἀναγκαίας ἐκκλησίας), τοῖς δὲ ἄλλοις μετέχειν ἔξεστιν ὅταν κτήσωνται τὸ τίμημα τὸ διωρισμένον ὑπὸ τῶν νόμων· διὸ πᾶσι τοῖς κτησαμένοις ἔξεστι μετέχειν· ὅλως μὲν γὰρ τὸ μὲν μὴ ἐξεῖναι πᾶσιν ὀλιγαρχικόν, τὸ δὲ δὴ ἐξεῖναι σχολάζειν ἀδύνατον μὴ προσόδων οὐσῶν.† τοῦτο μὲν οὖν εἶδος ἐν δημοκρατίας διὰ ταύτας τὰς αἰτίας· ἕτερον δὲ εἶδος διὰ τὴν ἐχομένην διαίρεσιν· ἔστι γὰρ καὶ πᾶσιν ἐξεῖναι τοῖς ἀνυπευθύνοις κατὰ τὸ γένος, μετέχειν μέντοι <τούς> δυναμένους σχολάζειν· διόπερ ἐν τῇ τοιαύτῃ δημοκρατίᾳ οἱ νόμοι ἄρχουσι, διὰ τὸ μὴ εἶναι πρόσοδον. τρίτον δ' εἶδος τὸ πᾶσιν ἐξεῖναι, ὅσοι ἂν ἐλεύθεροι ᾖσι, μετέχειν τῆς πολιτείας, μὴ μέντοι μετέχειν διὰ τὴν προειρημένην αἰτίαν, ὥστ' ἀναγκαῖον καὶ ἐν ταύτῃ ἄρχειν τὸν νόμον. τέταρτον δὲ εἶδος δημοκρατίας [1293a] ἢ τελευταία τοῖς χρόνοις ἐν ταῖς πόλεσι γεγεννημένη. διὰ γὰρ τὸ μείζους γεγονέναι πολὺ τὰς πόλεις τῶν ἐξ ὑπαρχῆς καὶ προσόδων ὑπάρχειν εὐπορίας, μετέχουσι μὲν πάντες τῆς πολιτείας διὰ τὴν ὑπεροχὴν τοῦ πλήθους, κοινωνοῦσι δὲ καὶ πολιτεύονται διὰ τὸ δύνασθαι σχολάζειν καὶ τοὺς ἀπόρους, λαμβάνοντας μισθόν. καὶ μάλιστα δὲ σχολάζει τὸ τοιοῦτον πλῆθος· οὐ γὰρ ἐμποδίζει αὐτοὺς οὐθέν ἢ τῶν ἰδίων ἐπιμέλεια, τοὺς δὲ πλουσίους ἐμποδίζει, ὥστε πολλάκις οὐ

κοινωνοῦσι τῆς ἐκκλησίας οὐδὲ τοῦ δικάζειν. διὸ γίνεται τὸ τῶν ἀπόρων πλῆθος κύριον τῆς πολιτείας, ἀλλ' οὐχ οἱ νόμοι.

τὰ μὲν οὖν τῆς δημοκρατίας εἶδη τοσαῦτα καὶ τοιαῦτα διὰ ταύτας τὰς ἀνάγκας ἐστίν, τάδε δὲ τῆς ὀλιγαρχίας· ὅταν μὲν πλείους ἔχωσιν οὐσίαν, ἐλάττω δὲ καὶ μὴ πολλὴν λίαν, τὸ τῆς πρώτης ὀλιγαρχίας εἶδος ἐστίν· ποιοῦσι γὰρ ἐξουσίαν μετέχειν τῷ κτωμένῳ, καὶ διὰ τὸ πλῆθος εἶναι τῶν μετεχόντων τοῦ πολιτεύματος ἀνάγκη μὴ τοὺς ἀνθρώπους ἀλλὰ τὸν νόμον εἶναι κύριον (ὅσῳ γὰρ ἂν πλεῖον ἀπέχωσι τῆς μοναρχίας, καὶ μήτε τοσαύτην ἔχωσιν οὐσίαν ὥστε σχολάζειν ἀμελοῦντες, μήθ' οὕτως ὀλίγην ὥστε τρέφεσθαι ἀπὸ τῆς πόλεως, ἀνάγκη τὸν νόμον ἀξιοῦν αὐτοῖς ἄρχειν, ἀλλὰ μὴ αὐτούς)· ἐὰν δὲ ἡ ἐλάττωσι ᾧσιν οἱ τὰς οὐσίας ἔχοντες ἢ οἱ τὸ πρότερον, πλείῳ δέ, τὸ τῆς δευτέρας ὀλιγαρχίας γίνεται εἶδος· μᾶλλον γὰρ ἰσχύοντες πλεονεκτεῖν ἀξιοῦσιν, διὸ αὐτοὶ μὲν αἰροῦνται ἐκ τῶν ἄλλων τοὺς εἰς τὸ πολίτευμα βαδίζοντας, διὰ δὲ τὸ μήπω οὕτως ἰσχυροὶ εἶναι ὥστ' ἄνευ νόμου ἄρχειν τὸν νόμον τίθενται τοιοῦτον. ἐὰν δ' ἐπιτείνωσι τῷ ἐλάττωσι ὄντες μείζονα οὐσία ἔχειν, ἢ τρίτη ἐπίδοσις γίνεται τῆς ὀλιγαρχίας, τὸ δι' αὐτῶν μὲν τὰς ἀρχὰς ἔχειν, κατὰ νόμον δὲ τὸν κελεύοντα τῶν τελευτώντων διαδέχεσθαι τοὺς υἱεῖς. ὅταν δὲ ἤδη πολὺ ὑπερτείνωσι ταῖς οὐσίαις καὶ ταῖς πολυφιλίαις, ἐγγὺς ἢ τοιαύτη δυναστεία μοναρχίας ἐστίν, καὶ κύριοι γίνονται οἱ ἄνθρωποι, ἀλλ' οὐχ ὁ νόμος· καὶ τὸ τέταρτον εἶδος τῆς ὀλιγαρχίας τοῦτ' ἐστίν, ἀντίστροφον τῷ τελευταίῳ τῆς δημοκρατίας.

Ἔτι δ' εἰσὶ δύο πολιτεῖαι παρὰ δημοκρατίαν τε καὶ ὀλιγαρχίαν, ὧν τὴν μὲν ἐτέραν λέγουσιν τε πάντες καὶ εἴρηται τῶν τεττάρων πολιτειῶν εἶδος ἓν (λέγουσιν δὲ τέτταρας μοναρχίαν ὀλιγαρχίαν δημοκρατίαν, τέταρτον δὲ τὴν καλουμένην ἀριστοκρατίαν)· πέμπτη δ' ἐστίν ἢ προσαγορεύεται τὸ κοινὸν ὄνομα πασῶν (πολιτείαν γὰρ καλοῦσιν), ἀλλὰ διὰ τὸ μὴ πολλάκις γίνεσθαι λανθάνει τοὺς πειρωμένους ἀριθμεῖν τὰ τῶν πολιτειῶν εἶδη, καὶ χρῶνται ταῖς τέτταρσι μόνον [1293b] (ὥσπερ Πλάτων) ἐν ταῖς πολιτείαις. ἀριστοκρατίαν μὲν οὖν καλῶς ἔχει καλεῖν περὶ ἧς διήλθομεν ἐν τοῖς πρώτοις λόγοις (τὴν γὰρ ἐκ τῶν ἀρίστων ἀπλῶς κατ' ἀρετὴν πολιτείαν καὶ μὴ πρὸς ὑπόθεσιν τινα ἀγαθῶν ἀνδρῶν μόνην δίκαιον προσαγορεύειν ἀριστοκρατίαν· ἐν μόνῃ γὰρ ἀπλῶς ὁ αὐτὸς ἀνὴρ καὶ πολίτης ἀγαθός ἐστιν, οἱ δ' ἐν ταῖς ἄλλαις ἀγαθοὶ πρὸς τὴν πολιτείαν εἰσὶ τὴν αὐτῶν)· οὐ μὴν ἀλλ' εἰσὶ τινες αἱ πρὸς τε τὰς

ὀλιγαρχουμένας ἔχουσι διαφορὰς καὶ καλοῦνται ἀριστοκρατίαι καὶ πρὸς τὴν καλουμένην πολιτείαν. ὅπου γὰρ μὴ μόνον πλουτίνδην ἀλλὰ καὶ ἀριστίνδην αἰροῦνται τὰς ἀρχάς, αὕτη ἡ πολιτεία διαφέρει τε ἀμφοῖν καὶ ἀριστοκρατικῇ καλεῖται. καὶ γὰρ ἐν ταῖς μὴ ποιουμέναις κοινὴν ἐπιμέλειαν ἀρετῆς εἰσὶν ὅμως τινὲς οἱ εὐδοκιμοῦντες καὶ δοκοῦντες εἶναι ἐπιεικεῖς. ὅπου οὖν ἡ πολιτεία βλέπει εἰς τε πλοῦτον καὶ ἀρετὴν καὶ δῆμον, οἷον ἐν Καρχηδόνι, αὕτη ἀριστοκρατικὴ ἐστίν, καὶ ἐν αἷς εἰς τὰ δύο μόνον, οἷον ἡ Λακεδαιμονίων, εἰς τε ἀρετὴν καὶ δῆμον, καὶ ἔστι μίξις τῶν δύο τούτων, δημοκρατίας τε καὶ ἀρετῆς. ἀριστοκρατίας μὲν οὖν παρὰ τὴν πρώτην τὴν ἀρίστην πολιτείαν ταῦτα δύο εἶδη, καὶ τρίτον ὅσαι τῆς καλουμένης πολιτείας ῥέπουσι πρὸς τὴν ὀλιγαρχίαν μᾶλλον.

Λοιπὸν δ' ἐστὶν ἡμῖν περὶ τῆς ὀνομαζομένης πολιτείας εἰπεῖν καὶ περὶ τυραννίδος. ἐτάξαμεν δ' οὕτως οὐκ οὔσαν οὔτε ταύτην παρέκβασιν οὔτε τὰς ἄρτι ῥηθείσας ἀριστοκρατίας, ὅτι τὸ μὲν ἀληθὲς πᾶσαι διημαρτήκασιν τῆς ὀρθοτάτης πολιτείας, ἔπειτα καταριθμοῦνται μετὰ τούτων εἰσὶ τ' αὐτῶν αὗται παρεκβάσεις ὥσπερ ἐν τοῖς κατ' ἀρχὴν εἶπομεν. τελευταῖον δὲ περὶ τυραννίδος εὐλογόν ἐστι ποιήσασθαι μνειάν διὰ τὸ πασῶν ἥκιστα ταύτην εἶναι πολιτείαν, ἡμῖν δὲ τὴν μέθοδον εἶναι περὶ πολιτείας. δι' ἣν μὲν οὖν αἰτίαν τέτακται τὸν τρόπον τοῦτον, εἴρηται· νῦν δὲ δεικτέον ἡμῖν περὶ πολιτείας. φανερωτέρα γὰρ ἡ δύναμις αὐτῆς διωρισμένων τῶν περὶ ὀλιγαρχίας καὶ δημοκρατίας. ἔστι γὰρ ἡ πολιτεία ὥς ἀπλῶς εἰπεῖν μίξις ὀλιγαρχίας καὶ δημοκρατίας. εἰώθασιν δὲ καλεῖν τὰς μὲν ἀποκλινούσας [ὥς] πρὸς τὴν δημοκρατίαν πολιτείας, τὰς δὲ πρὸς τὴν ὀλιγαρχίαν μᾶλλον ἀριστοκρατίας διὰ τὸ μᾶλλον ἀκολουθεῖν παιδείαν καὶ εὐγένειαν τοῖς εὐπορωτέροις. ἔτι δὲ δοκοῦσιν ἔχειν οἱ εὐποροὶ ὧν ἕνεκεν οἱ ἀδικοῦντες ἀδικοῦσιν· ὅθεν καὶ καλοὺς κἀγαθοὺς καὶ γνωρίμους τούτους προσαγορεύουσιν. ἐπεὶ οὖν ἡ ἀριστοκρατία βούλεται τὴν ὑπεροχὴν ἀπονέμειν τοῖς ἀρίστοις τῶν πολιτῶν, καὶ τὰς ὀλιγαρχίας εἶναί φασιν ἐκ τῶν καλῶν κἀγαθῶν μᾶλλον. δοκεῖ [1294a] δ' εἶναι τῶν ἀδυνάτων τὸ εὐνομεῖσθαι τὴν μὴ ἀριστοκρατουμένην πόλιν ἀλλὰ πονηροκρατουμένην, ὁμοίως δὲ καὶ ἀριστοκρατεῖσθαι τὴν μὴ εὐνομουμένην. οὐκ ἔστι δὲ εὐνομία τὸ εὐ κεῖσθαι τοὺς νόμους, μὴ πείθεσθαι δέ. διὸ μίαν μὲν εὐνομίαν ὑποληπτέον εἶναι τὸ πείθεσθαι τοῖς κειμένοις νόμοις, ἑτέραν δὲ τὸ καλῶς κεῖσθαι τοὺς νόμους οἷς ἐμμένουσιν (ἔστι γὰρ πείθεσθαι καὶ

κακῶς κειμένοις). τοῦτο δὲ ἐνδέχεται διχῶς· ἢ γὰρ τοῖς ἀρίστοις τῶν ἐνδεχομένων αὐτοῖς, ἢ τοῖς ἀπλῶς ἀρίστοις.

δοκεῖ δὲ ἀριστοκρατία μὲν εἶναι μάλιστα τὸ τὰς τιμὰς νενεμησθαι κατ' ἀρετὴν (ἀριστοκρατίας μὲν γὰρ ὅρος ἀρετῆ, ὀλιγαρχίας δὲ πλοῦτος, δήμου δ' ἐλευθερία). τὸ δ' ὅτι ἂν δόξη τοῖς πλείοσιν, ἐν πάσαις ὑπάρχει· καὶ γὰρ ἐν ὀλιγαρχίᾳ καὶ ἐν ἀριστοκρατίᾳ καὶ ἐν δήμοις, ὅτι ἂν δόξη τῷ πλείονι μέρει τῶν μετεχόντων τῆς πολιτείας, τοῦτ' ἐστὶ κύριον. ἐν μὲν οὖν ταῖς πλείσταις πόλεσι τὸ τῆς πολιτείας εἶδος «κακῶς» καλεῖται· μόνον γὰρ ἢ μίξις στοχάζεται τῶν εὐπόρων καὶ τῶν ἀπόρων, πλούτου καὶ ἐλευθερίας· σχεδὸν γὰρ παρὰ τοῖς πλείστοις οἱ εὐποροὶ τῶν καλῶν κάγαθων δοκοῦσι κατέχειν χώραν· ἐπεὶ δὲ τρία ἐστὶ τὰ ἀμφισβητοῦντα τῆς ἰσότητος τῆς πολιτείας, ἐλευθερία πλοῦτος ἀρετῆ (τὸ γὰρ τέταρτον, ὃ καλοῦσιν εὐγένειαν, ἀκολουθεῖ τοῖς δυσὶν· ἢ γὰρ εὐγένειά ἐστιν ἀρχαῖος πλοῦτος καὶ ἀρετῆ), φανερόν ὅτι τὴν μὲν τοῖν δυοῖν μίξιν, τῶν εὐπόρων καὶ τῶν ἀπόρων, πολιτείαν λεκτέον, τὴν δὲ τῶν τριῶν ἀριστοκρατίαν μάλιστα τῶν ἄλλων παρὰ τὴν ἀληθινὴν καὶ πρώτην. ὅτι μὲν οὖν ἔστι καὶ ἕτερα πολιτείας εἶδη παρὰ μοναρχίαν τε καὶ δημοκρατίαν καὶ ὀλιγαρχίαν, εἴρηται, καὶ ποῖα ταῦτα, καὶ τί διαφέρουσιν ἀλλήλων αἱ τ' ἀριστοκρατίαι καὶ αἱ πολιτεῖαι τῆς ἀριστοκρατίας, καὶ ὅτι οὐ πόρρω αὐταὶ ἀλλήλων, φανερόν.

Τίνα δὲ τρόπον γίνεται παρὰ δημοκρατίαν καὶ ὀλιγαρχίαν ἡ καλουμένη πολιτεία, καὶ πῶς αὐτὴν δεῖ καθιστάναι, λέγωμεν ἐφεξῆς τοῖς εἰρημένοις. ἅμα δὲ δῆλον ἔσται καὶ οἷς ὀρίζονται τὴν δημοκρατίαν καὶ τὴν ὀλιγαρχίαν· ληπτέον γὰρ τὴν τούτων διαίρεσιν, εἴτα ἐκ τούτων ἀφ' ἐκατέρας ὥσπερ σύμβολον λαμβάνοντας συνθετέον. εἰσὶ δὲ ὅροι τρεῖς τῆς συνθέσεως καὶ μίξεως. ἢ γὰρ ἀμφοτέρα ληπτέον ἃ ἐκάτεροι νομοθετοῦσιν, οἷον περὶ τοῦ δικάζειν (ἐν μὲν γὰρ ταῖς ὀλιγαρχίαις τοῖς εὐπόροις ζημίαν τάττουσιν ἂν μὴ δικάζωσι, τοῖς δ' ἀπόροις οὐδένα μισθόν, ἐν δὲ ταῖς δημοκρατίαις τοῖς μὲν ἀπόροις μισθόν, τοῖς δ' εὐπόροις οὐδεμίαν ζημίαν· κοινὸν δὲ καὶ μέσον τούτων ἀμφοτέρα ταῦτα, διὸ καὶ [1294b] πολιτικόν, μέμεικται γὰρ ἐξ ἀμφοῖν)· εἷς μὲν οὖν οὗτος τοῦ συνδυασμοῦ τρόπος, ἕτερος δὲ τὸ «τὸ» μέσον λαμβάνειν ὧν ἐκάτεροι τάττουσιν, οἷον ἐκκλησιάζειν οἱ μὲν ἀπὸ τιμήματος οὐθενὸς ἢ μικροῦ πάμπαν, οἱ δ' ἀπὸ μακροῦ τιμήματος, κοινὸν δὲ γε οὐδέτερον, ἀλλὰ τὸ μέσον ἐκατέρου τίμημα τούτων. τρίτον δ' ἐκ δυοῖν ταγμάτοι, τὰ μὲν ἐκ τοῦ

ὀλιγαρχικοῦ νόμου τὰ δ' ἐκ τοῦ δημοκρατικοῦ. λέγω δ' οἷον δοκεῖ δημοκρατικὸν μὲν εἶναι τὸ κληρωτὰς εἶναι τὰς ἀρχάς, τὸ δ' αἰρετὰς ὀλιγαρχικόν, καὶ δημοκρατικὸν μὲν τὸ μὴ ἀπὸ τιμήματος, ὀλιγαρχικὸν δὲ τὸ ἀπὸ τιμήματος· ἀριστοκρατικὸν τοίνυν καὶ πολιτικὸν τὸ ἐξ ἐκατέρας ἐκάτερον λαβεῖν, ἐκ μὲν τῆς ὀλιγαρχίας τὸ αἰρετὰς ποιεῖν τὰς ἀρχάς, ἐκ δὲ τῆς δημοκρατίας τὸ μὴ ἀπὸ τιμήματος.

ὁ μὲν οὖν τρόπος τῆς μίξεως οὗτος· τοῦ δ' εὖ μεμεῖχθαι δημοκρατίαν καὶ ὀλιγαρχίαν ὅρος, ὅταν ἐνδέχεται λέγειν τὴν αὐτὴν πολιτείαν δημοκρατίαν καὶ ὀλιγαρχίαν. δῆλον γὰρ ὅτι τοῦτο πάσχουσιν οἱ λέγοντες διὰ τὸ μεμεῖχθαι καλῶς· πέπονθε δὲ τοῦτο καὶ τὸ μέσον, ἐμφαίνεται γὰρ ἐκάτερον ἐν αὐτῷ τῶν ἄκρων· ὅπερ συμβαίνει περὶ τὴν Λακεδαιμονίων πολιτείαν. πολλοὶ γὰρ ἐγχειροῦσι λέγειν ὡς δημοκρατίας οὔσης διὰ τὸ δημοκρατικὰ πολλὰ τὴν τάξιν ἔχειν, οἷον πρῶτον τὸ περὶ τὴν τροφὴν τῶν παίδων (ὁμοίως γὰρ οἱ τῶν πλουσίων τρέφονται τοῖς τῶν πενήτων, καὶ παιδεύονται τὸν τρόπον τοῦτον ὃν ἂν δύναιτο καὶ τῶν πενήτων οἱ παῖδες), ὁμοίως δὲ καὶ ἐπὶ τῆς ἐχομένης ἡλικίας, καὶ ὅταν ἄνδρες γένωνται, τὸν αὐτὸν τρόπον (οὐθὲν γὰρ διάδηλος ὁ πλούσιος καὶ ὁ πένης οὕτω) τὰ περὶ τὴν τροφὴν ταῦτα πᾶσιν ἐν τοῖς συσσιτίοις, καὶ τὴν ἐσθῆτα οἱ πλούσιοι τοιαύτην οἷαν ἂν τις παρασκευάσαι δύναιτο καὶ τῶν πενήτων ὅστισοῦν· ἔτι τὸ δύο τὰς μεγίστας ἀρχάς τὴν μὲν αἰρεῖσθαι τὸν δῆμον, τῆς δὲ μετέχειν (τοὺς μὲν γὰρ γέροντας αἰροῦνται, τῆς δ' ἐφορείας μετέχουσιν)· οἱ δ' ὀλιγαρχίαν διὰ τὸ πολλὰ ἔχειν ὀλιγαρχικά, οἷον τὸ πάσας αἰρετὰς εἶναι καὶ μηδεμίαν κληρωτὴν, καὶ ὀλίγους εἶναι κυρίους θανάτου καὶ φυγῆς, καὶ ἄλλα τοιαῦτα πολλά. δεῖ δ' ἐν τῇ πολιτείᾳ τῇ μεμειγμένη καλῶς ἀμφοτέρω δοκεῖν εἶναι καὶ μηδέτερον, καὶ σφῆζεσθαι δι' αὐτῆς καὶ μὴ ἔξωθεν, καὶ δι' αὐτῆς μὴ τῷ πλείους [ἐξωθεν] εἶναι τοὺς βουλομένους (εἴη γὰρ ἂν καὶ πονηρὰ πολιτεία τοῦθ' ὑπάρχον) ἀλλὰ τῷ μὴδ' ἂν βούλεσθαι πολιτείαν ἑτέραν μὴτὲν τῶν τῆς πόλεως μορίων ὅλως. τίνα μὲν οὖν τρόπον δεῖ καθιστάναι πολιτείαν, ὁμοίως δὲ καὶ τὰς ὀνομαζομένας ἀριστοκρατίας, νῦν εἴρηται.

[1295a] Περὶ δὲ τυραννίδος ἦν ἡμῖν λοιπὸν εἰπεῖν, οὐχ ὡς ἐνούσης πολυλογίας περὶ αὐτήν, ἀλλ' ὅπως λάβῃ τῆς μεθόδου τὸ μέρος, ἐπεὶ καὶ ταύτην τίθεμεν τῶν πολιτειῶν τι μέρος. περὶ μὲν οὖν βασιλείας διωρίσαμεν ἐν τοῖς πρώτοις λόγοις, ἐν οἷς περὶ τῆς

μάλιστα λεγομένης βασιλείας ἐποιοούμεθα τὴν σκέψιν, πότερον ἀσύμφορος ἢ συμφέρει ταῖς πόλεσιν, καὶ τίνα καὶ πόθεν δεῖ καθιστάναι, καὶ πῶς· τυραννίδος δ' εἶδη δύο μὲν διείλομεν ἐν οἷς περὶ βασιλείας ἐπεσκοποῦμεν, διὰ τὸ τὴν δύναμιν ἐπαλλάττειν πῶς αὐτῶν καὶ πρὸς τὴν βασιλείαν, διὰ τὸ κατὰ νόμον εἶναι ἀμφοτέρας ταύτας τὰς ἀρχάς (ἐν τε γὰρ τῶν βαρβάρων τισὶν αἰροῦνται αὐτοκράτορας μονάρχους, καὶ τὸ παλαιὸν ἐν τοῖς ἀρχαίοις Ἑλλήσιν ἐγίγνοντό τινες μοναρχοὶ τὸν τρόπον τοῦτον, οὓς ἐκάλουν αἰσυμνήτας), ἔχουσι δέ τινες πρὸς ἀλλήλας αὐταὶ διαφοράς, ἦσαν δὲ διὰ μὲν τὸ κατὰ νόμον βασιλικαὶ καὶ διὰ τὸ μοναρχεῖν ἐκόντων, τυραννικαὶ δὲ διὰ τὸ δεσποτικῶς ἄρχειν κατὰ τὴν αὐτῶν γνώμην· τρίτον δὲ εἶδος τυραννίδος, ἥπερ μάλιστ' εἶναι δοκεῖ τυραννίς, ἀντίστροφος οὖσα τῇ παμβασιλείᾳ. τοιαύτην δ' ἀναγκαῖον εἶναι τυραννίδα τὴν μοναρχίαν ἣτις ἀνυπεύθυνος ἄρχει τῶν ὁμοίων καὶ βελτιόνων πάντων πρὸς τὸ σφέτερον αὐτῆς συμφέρον, ἀλλὰ μὴ πρὸς τὸ τῶν ἀρχομένων. διόπερ ἀκούσιος· οὐθεὶς γὰρ ἐκὼν ὑπομένει τῶν ἐλευθέρων τὴν τοιαύτην ἀρχήν. τυραννίδος μὲν οὖν εἶδη ταῦτα καὶ τοσαῦτα διὰ τὰς εἰρημένας αἰτίας.

Τίς δ' ἀρίστη πολιτεία καὶ τίς ἄριστος βίος ταῖς πλείσταις πόλεσι καὶ τοῖς πλείστοις τῶν ἀνθρώπων, μήτε πρὸς ἀρετὴν συγκρίνουσι τὴν ὑπὲρ τοὺς ἰδιώτας, μήτε πρὸς παιδείαν ἢ φύσεως δεῖται καὶ χορηγίας τυχηρᾶς, μήτε πρὸς πολιτείαν τὴν κατ' εὐχὴν γινομένην, ἀλλὰ βίον τε τὸν τοῖς πλείστοις κοινωνῆσαι δυνατὸν καὶ πολιτείαν ἣς τὰς πλείστας πόλεις ἐνδέχεται μετασχεῖν; καὶ γὰρ ἄς καλοῦσιν ἀριστοκρατίας, περὶ ὧν νῦν εἵπομεν, τὰ μὲν ἐξωτέρῳ πίπτουσι ταῖς πλείσταις τῶν πόλεων, τὰ δὲ γειτνιῶσι τῇ καλουμένῃ πολιτείᾳ (διὸ περὶ ἀμφοῖν ὡς μιᾶς λεκτέον). ἡ δὲ δὴ κρίσις περὶ ἀπάντων τούτων ἐκ τῶν αὐτῶν στοιχείων ἐστίν. εἰ γὰρ καλῶς ἐν τοῖς ἠθικοῖς εἴρηται τὸ τὸν εὐδαίμονα βίον εἶναι τὸν κατ' ἀρετὴν ἀνεμπόδιστον, μεσότητα δὲ τὴν ἀρετὴν, τὸν μέσον ἀναγκαῖον εἶναι βίον βέλτιστον, <τὸ> τῆς ἐκάστοις ἐνδεχομένης τυχεῖν μεσότητος· τοὺς δὲ αὐτοὺς τούτους ὅρους ἀναγκαῖον εἶναι καὶ πόλεως ἀρετῆς καὶ κακίας καὶ πολιτείας· ἡ γὰρ πολιτεία [1295b] βίος τίς ἐστὶ πόλεως. ἐν ἀπάσαις δὴ ταῖς πόλεσιν ἔστι τρία μέρη τῆς πόλεως, οἱ μὲν εὖποροι σφόδρα, οἱ δὲ ἄποροι σφόδρα, οἱ δὲ τρίτοι οἱ μέσοι τούτων. ἐπεὶ τοίνυν ὁμολογεῖται τὸ μέτριον ἄριστον καὶ τὸ μέσον, φανερόν ὅτι καὶ τῶν εὐτυχημάτων ἡ κτήσις ἡ μέση βελτίστη πάντων.

ῥάστη γὰρ τῷ λόγῳ πειθαρχεῖν, ὑπέρκαλον δὲ ἢ ὑπερίσχυρον ἢ ὑπερευγενῆ ἢ ὑπερπλούσιον <ὄντα>, ἢ τάναντία τούτοις, ὑπέρπτωχον ἢ ὑπερασθενῆ ἢ σφόδρα ἄτιμον, χαλεπὸν τῷ λόγῳ ἀκολουθεῖν· γίνονται γὰρ οἱ μὲν ὕβρισταὶ καὶ μεγαλοπόνηροι μᾶλλον, οἱ δὲ κακοῦργοι καὶ μικροπόνηροι λίαν, τῶν δ' ἀδικημάτων τὰ μὲν γίνεταί δι' ὕβριν τὰ δὲ διὰ κακουργίαν. ἔτι δὲ ἥκισθ' οὗτοι φυγαρχοῦσι καὶ σπουδαρχιῶσι· ταῦτα δ' ἀμφοτέρω βλαβερὰ ταῖς πόλεσιν. πρὸς δὲ τούτοις οἱ μὲν ἐν ὑπεροχαῖς εὐτυχημάτων ὄντες, ἰσχύος καὶ πλούτου καὶ φίλων καὶ τῶν ἄλλων τῶν τοιούτων, ἄρχεσθαι οὔτε βούλονται οὔτε ἐπίστανται (καὶ τοῦτ' εὐθὺς οἴκοθεν ὑπάρχει παισὶν οὖσιν· διὰ γὰρ τὴν τρυφὴν οὐδ' ἐν τοῖς διδασκαλείοις ἄρχεσθαι σύνηθες αὐτοῖς), οἱ δὲ καθ' ὑπερβολὴν ἐν ἐνδείᾳ τούτων ταπεινοὶ λίαν. ὥσθ' οἱ μὲν ἄρχειν οὐκ ἐπίστανται, ἀλλ' ἄρχεσθαι δουλικὴν ἀρχήν, οἱ δ' ἄρχεσθαι μὲν οὐδεμίαν ἀρχήν, ἄρχειν δὲ δεσποτικὴν ἀρχήν. γίνεται οὖν δούλων καὶ δεσποτῶν πόλεις, ἀλλ' οὐκ ἐλευθέρων, καὶ τῶν μὲν φθονούντων τῶν δὲ καταφρονούντων· ἂ πλεῖστον ἀπέχει φιλίας καὶ κοινωνίας πολιτικῆς· ἡ γὰρ κοινωνία φιλικόν· οὐδὲ γὰρ ὁδοῦ βούλονται κοινωνεῖν τοῖς ἐχθροῖς. βούλεται δέ γε ἡ πόλις ἐξ ἴσων εἶναι καὶ ὁμοίων ὅτι μάλιστα, τοῦτο δ' ὑπάρχει μάλιστα τοῖς μέσοις. ὥστ' ἀναγκαῖον ἄριστα πολιτεύεσθαι ταύτην τὴν πόλιν <ἥ> ἐστὶν ἐξ ὧν φαμεν φύσει τὴν σύστασιν εἶναι τῆς πόλεως. καὶ σφύζονται δ' ἐν ταῖς πόλεσιν οὗτοι μάλιστα τῶν πολιτῶν. οὔτε γὰρ αὐτοὶ τῶν ἀλλοτρίων, ὥσπερ οἱ πένητες, ἐπιθυμοῦσιν, οὔτε τῆς τούτων ἕτεροι, καθάπερ τῆς τῶν πλουσίων οἱ πένητες ἐπιθυμοῦσιν· καὶ διὰ τὸ μὴτ' ἐπιβουλεύεσθαι μὴτ' ἐπιβουλεύειν ἀκινδύνως διάγουσιν. διὰ τοῦτο καλῶς ἠῤῥατο Φωκυλίδης “πολλὰ μέσοισιν ἄριστα· μέσος θέλω ἐν πόλει εἶναι.”

δῆλον ἄρα ὅτι καὶ ἡ κοινωνία ἡ πολιτικὴ ἀρίστη ἢ διὰ τῶν μέσων, καὶ τὰς τοιαύτας ἐνδέχεται εὖ πολιτεύεσθαι πόλεις ἐν αἷς δὴ πολὺ τὸ μέσον καὶ κρεῖττον, μάλιστα μὲν ἀμφοῖν, εἰ δὲ μὴ, θατέρου μέρους· προστιθέμενον γὰρ ποιεῖ ῥοπήν καὶ κωλύει γίνεσθαι τὰς ἐναντίας ὑπερβολάς. διόπερ εὐτυχία μεγίστη τοὺς πολιτευομένους οὐσίαν ἔχειν μέσην καὶ ἱκανήν, [1296a] ὥς ὅπου οἱ μὲν πολλὰ σφόδρα κέκτηνται οἱ δὲ μηθέν, ἢ δῆμος ἔσχατος γίνεταί ἢ ὀλιγαρχία ἄκρατος, ἢ τυραννὶς δι' ἀμφοτέρας τὰς ὑπερβολάς· καὶ γὰρ ἐκ δημοκρατίας τῆς νεανικωτάτης καὶ ἐξ ὀλιγαρχίας γίνεταί τυραννίς, ἐκ δὲ τῶν μέσων καὶ τῶν σύνεγγυς πολὺ ἥττον. τὴν δ' αἰτίαν ὕστερον

ἐν τοῖς περὶ τὰς μεταβολὰς τῶν πολιτειῶν ἐροῦμεν. ὅτι δ' ἡ μέση βελτίστη, φανερόν· μόνη γὰρ ἀστασίαστος· ὅπου γὰρ πολὺ τὸ διὰ μέσου, ἥκιστα στάσεις καὶ διαστάσεις γίνονται τῶν πολιτῶν. καὶ αἱ μεγάλαι πόλεις ἀστασιαστότεραι διὰ τὴν αὐτὴν αἰτίαν, ὅτι πολὺ τὸ μέσον· ἐν δὲ ταῖς μικραῖς ῥαδίον τε διαλαβεῖν εἰς δύο πάντας, ὥστε μὴθὲν καταλιπεῖν μέσον, καὶ πάντες σχεδὸν ἄποροι ἢ εὐποροὶ εἰσι. καὶ αἱ δημοκρατίαι δὲ ἀσφαλέστεραι τῶν �λιγαρχιῶν εἰσι καὶ πολυχρονιώτεραι διὰ τοὺς μέσους (πλείους τε γὰρ εἰσι καὶ μᾶλλον μετέχουσι τῶν τιμῶν ἐν ταῖς δημοκρατίαις ἢ ταῖς ὀλιγαρχίαις), ἐπεὶ ὅταν ἄνευ τούτων τῷ πλήθει ὑπερτείνωσιν οἱ ἄποροι, κακοπραγία γίνεται καὶ ἀπόλλυνται ταχέως. σημεῖον δὲ δεῖ νομίζειν καὶ τὸ τοὺς βελτίστους νομοθέτας εἶναι τῶν μέσων πολιτῶν· Σόλων τε γὰρ ἦν τούτων (δηλοῖ δ' ἐκ τῆς ποιήσεως) καὶ Λυκοῦργος (οὐ γὰρ ἦν βασιλεύς) καὶ Χαρώνδας καὶ σχεδὸν οἱ πλείστοι τῶν ἄλλων.

φανερόν δ' ἐκ τούτων καὶ διότι αἱ πλείσται πολιτεῖαι αἱ μὲν δημοκρατικαὶ εἰσιν αἱ δ' ὀλιγαρχικαί. διὰ γὰρ τὸ ἐν ταύταις πολλάκις ὀλίγον εἶναι τὸ μέσον, αἰεὶ ὁπότεροι ἂν ὑπερέχωσιν, εἴθ' οἱ τὰς οὐσίας ἔχοντες εἴθ' ὁ δῆμος, οἱ τὸ μέσον ἐκβαίνοντες καθ' αὐτοὺς ἄγουσι τὴν πολιτείαν, ὥστε ἡ δῆμος γίγνεται ἡ ὀλιγαρχία. πρὸς δὲ τούτοις διὰ τὸ στάσεις γίνεσθαι καὶ μάχας πρὸς ἀλλήλους τῷ δήμῳ καὶ τοῖς εὐπόροις, ὁποτέροις ἂν μᾶλλον συμβῇ κρατῆσαι τῶν ἐναντίων, οὐ καθιστᾷσι κοινὴν πολιτείαν οὐδ' ἴσην, ἀλλὰ τῆς νίκης ἄθλον τὴν ὑπεροχὴν τῆς πολιτείας λαμβάνουσιν, καὶ οἱ μὲν δημοκρατίαν οἱ δ' ὀλιγαρχίαν ποιοῦσιν. ἔτι δὲ καὶ τῶν ἐν ἡγεμονίᾳ γενομένων τῆς Ἑλλάδος πρὸς τὴν παρ' αὐτοῖς ἐκάτεροι πολιτείαν ἀποβλέποντες οἱ μὲν δημοκρατίας ἐν ταῖς πόλεσιν καθίστασαν οἱ δ' ὀλιγαρχίας, οὐ πρὸς τὸ τῶν πόλεων συμφέρον σκοποῦντες ἀλλὰ πρὸς τὸ σφέτερον αὐτῶν, ὥστε διὰ ταύτας τὰς αἰτίας ἡ μηδέποτε τὴν μέσην γίνεσθαι πολιτείαν ἡ ὀλιγάκις καὶ παρ' ὀλίγοις· εἷς γὰρ ἀνὴρ συνεπίσθη μόνος τῶν πρότερον ἐφ' ἡγεμονίᾳ γενομένων ταύτην ἀποδοῦναι τὴν τάξιν, ἥδη δὲ καὶ τοῖς ἐν ταῖς πόλεσιν ἔθος [1296b] καθέστηκε μὴδὲ βούλεσθαι τὸ ἴσον, ἀλλ' ἢ ἄρχειν ζητεῖν ἢ κρατουμένους ὑπομένειν. τίς μὲν οὖν ἀρίστη πολιτεία, καὶ διὰ τίν' αἰτίαν, ἐκ τούτων φανερόν· τῶν δ' ἄλλων πολιτειῶν, ἐπειδὴ πλείους δημοκρατίας καὶ πλείους ὀλιγαρχίας φαμὲν εἶναι, ποίαν πρώτην θετέον καὶ δευτέραν καὶ τοῦτον δὴ τὸν τρόπον ἐχομένην τῷ τὴν μὲν εἶναι βελτίῳ τὴν δὲ χειρῷ, διωρισμένης τῆς ἀρίστης οὐ χαλεπὸν

ιδεῖν. αἰεὶ γὰρ ἀναγκαῖον εἶναι βελτίω τὴν ἐγγύτατα ταύτης, χεῖρω δὲ τὴν ἀφεστηκυῖαν τοῦ μέσου πλεῖον, ἂν μὴ πρὸς ὑπόθεσιν κρίνη τις. λέγω δὲ τὸ πρὸς ὑπόθεσιν, ὅτι πολλάκις, οὔσης ἄλλης πολιτείας αἰρετωτέρας, ἐνίοις οὐδὲν κωλύει συμφέρειν ἑτέραν μᾶλλον εἶναι πολιτείαν.

Τίς δὲ πολιτεία τίσι καὶ ποία συμφέρει ποίοις, ἐχόμενόν ἐστι τῶν εἰρημένων διελθεῖν. ληπτέον δὴ πρῶτον περὶ πασῶν καθόλου ταυτόν· δεῖ γὰρ κρεῖττον εἶναι τὸ βουλόμενον μέρος τῆς πόλεως τοῦ μὴ βουλομένου μένειν τὴν πολιτείαν. ἔστι δὲ πᾶσα πόλις ἕκ τε τοῦ ποιοῦ καὶ ποσοῦ. λέγω δὲ ποιὸν μὲν ἐλευθερίαν πλοῦτον παιδείαν εὐγένειαν, ποσὸν δὲ τὴν τοῦ πλήθους ὑπεροχὴν. ἐνδέχεται δὲ τὸ μὲν ποιὸν ὑπάρχειν ἑτέρῳ μέρει τῆς πόλεως, ἐξ ὧν συνέστηκε μερῶν ἢ πόλις, ἄλλῳ δὲ μέρει τὸ ποσόν, οἷον πλείους τὸν ἀριθμὸν εἶναι τῶν γενναίων τοὺς ἀγεννεῖς ἢ τῶν πλουσίων τοὺς ἀπόρους, μὴ μέντοι τοσοῦτον ὑπερέχειν τῷ ποσῷ ὅσον λείπεται τῷ ποιῷ. διὸ ταῦτα πρὸς ἀλλήλα συγκριτέον. ὅπου μὲν οὖν ὑπερέχει τὸ τῶν ἀπόρων πλῆθος τὴν εἰρημένην ἀναλογίαν, ἐνταῦθα πέφυκεν εἶναι δημοκρατίαν, καὶ ἕκαστον εἶδος δημοκρατίας κατὰ τὴν ὑπεροχὴν τοῦ δήμου ἐκάστου, οἷον ἔαν μὲν τὸ τῶν γεωργῶν ὑπερτείνῃ πλῆθος, τὴν πρώτην δημοκρατίαν, ἔαν δὲ τὸ τῶν βαναύσων καὶ μισθαρνούντων, τὴν τελευταίαν, ὁμοίως δὲ καὶ τὰς ἄλλας τὰς μεταξὺ τούτων· ὅπου δὲ τὸ τῶν εὐπόρων καὶ γνωρίμων μᾶλλον ὑπερτείνει τῷ ποιῷ ἢ λείπεται τῷ ποσῷ, ἐνταῦθα ὀλιγαρχίαν, καὶ τῆς ὀλιγαρχίας τὸν αὐτὸν τρόπον ἕκαστον εἶδος κατὰ τὴν ὑπεροχὴν τοῦ ὀλιγαρχικοῦ πλήθους.

δεῖ δ' αἰεὶ τὸν νομοθέτην ἐν τῇ πολιτεία προσλαμβάνειν τοὺς μέσους· ἂν τε γὰρ ὀλιγαρχικοὺς τοὺς νόμους τιθῇ, στοχάζεσθαι χρὴ τῶν μέσων, ἔαν τε δημοκρατικούς, προσάγεσθαι τοῖς νόμοις τούτους. ὅπου δὲ τὸ τῶν μέσων ὑπερτείνει πλῆθος ἢ συναμφοτέρων τῶν ἄκρων ἢ καὶ θατέρου μόνον, ἐνταῦθ' ἐνδέχεται πολιτείαν εἶναι μόνιμον. οὐθὲν γὰρ φοβερὸν μὴ [1297a] ποτε συμφωνήσωσιν οἱ πλούσιοι τοῖς πένησιν ἐπὶ τούτους· οὐδέποτε γὰρ ἄτεροι βουλήσονται δουλεύειν τοῖς ἐτέροις, κοινοτέραν δ', ἂν ζητῶσιν, οὐδεμίαν εὐρήσουσιν ἄλλην ταύτης. ἐν μέρει γὰρ ἄρχειν οὐκ ἂν ὑπομείνειαν διὰ τὴν ἀπιστίαν τὴν πρὸς ἀλλήλους· πανταχοῦ δὲ πιστότατος ὁ διαιτητής, διαιτητής δ' ὁ μέσος. ὅσῳ δ' ἂν ἄμεινον ἢ πολιτεία μειχθῇ, τοσοῦτω μονιμωτέρα. διαμαρτάνουσι δὲ πολλοὶ καὶ τῶν τὰς ἀριστοκρατικὰς βουλομένων ποιεῖν πολιτείας, οὐ μόνον ἐν

τῷ πλεῖον νέμειν τοῖς εὐπόροις, ἀλλὰ καὶ ἐν τῷ παρακρούεσθαι τὸν δῆμον. ἀνάγκη γὰρ χρόνῳ ποτὲ ἐκ τῶν ψευδῶν ἀγαθῶν ἀληθὲς συμβῆναι κακόν· αἱ γὰρ πλεονεξίαι τῶν πλουσίων ἀπολλύουσι μᾶλλον τὴν πολιτείαν ἢ αἱ τοῦ δήμου.

Ἔστι δ' ὅσα προφάσεως χάριν ἐν ταῖς πολιτείαις σοφίζονται πρὸς τὸν δῆμον πέντε τὸν ἀριθμόν, περὶ ἐκκλησίαν, περὶ τὰς ἀρχάς, περὶ δικαστήρια, περὶ ὅπλιν, περὶ γυμνασίαν· περὶ ἐκκλησίαν μὲν τὸ ἐξεῖναι ἐκκλησιάζειν πᾶσι, ζημίαν δὲ ἐπικεῖσθαι τοῖς εὐπόροις ἐὰν μὴ ἐκκλησιάζωσιν, ἢ μόνοις ἢ μείζω πολλῶ, περὶ δὲ τὰς ἀρχάς τὸ τοῖς μὲν ἔχουσι τίμημα μὴ ἐξεῖναι ἐξόμνυσθαι, τοῖς δ' ἀπόροις ἐξεῖναι, καὶ περὶ τὰ δικαστήρια τοῖς μὲν εὐπόροις εἶναι ζημίαν ἂν μὴ δικάζωσι, τοῖς δ' ἀπόροις ἄδειαν, ἢ τοῖς μὲν μεγάλην τοῖς δὲ μικράν, ὥσπερ ἐν τοῖς Χαρώνδου νόμοις. ἐνιαχοῦ δ' ἔξεστι μὲν πᾶσιν ἀπογραψαμένοις ἐκκλησιάζειν καὶ δικάζειν, ἐὰν δὲ ἀπογραψάμενοι μὴτ' ἐκκλησιάζωσι μῆτε δικάζωσιν, ἐπὶκείνται μεγάλαι ζημίαι τούτοις, ἵνα διὰ μὲν τὴν ζημίαν φεύγωσι τὸ ἀπογράφεσθαι, διὰ δὲ τὸ μὴ ἀπογράφεσθαι μὴ δικάζωσι μὴδ' ἐκκλησιάζωσιν. τὸν αὐτὸν δὲ τρόπον καὶ περὶ τοῦ ὅπλα κεκτηῖσθαι καὶ τοῦ γυμνάζεσθαι νομοθετοῦσιν. τοῖς μὲν γὰρ ἀπόροις ἔξεστι μὴ κεκτηῖσθαι, τοῖς δ' εὐπόροις ἐπιζήμιον μὴ κεκτημένοις, κἂν μὴ γυμνάζωνται, τοῖς μὲν οὐδεμία ζημία, τοῖς δ' εὐπόροις ἐπιζήμιον, ὅπως οἱ μὲν διὰ τὴν ζημίαν μετέχωσιν, οἱ δὲ διὰ τὸ μὴ φοβεῖσθαι μὴ μετέχωσιν. ταῦτα μὲν οὖν ὀλιγαρχικὰ σοφίσματα τῆς νομοθεσίας· ἐν δὲ ταῖς δημοκρατίαις πρὸς ταῦτ' ἀντισοφίζονται. τοῖς μὲν γὰρ ἀπόροις μισθὸν πορίζουσιν ἐκκλησιάζουσι καὶ δικάζουσιν, τοῖς δ' εὐπόροις οὐδεμίαν τάττουσι ζημίαν. ὥστε φανερόν ὅτι εἴ τις βούλεται μιγνύναι δικαίως, δεῖ τὰ παρ' ἑκατέροις συνάγειν καὶ τοῖς μὲν μισθὸν πορίζειν τοῖς δὲ ζημίαν· οὕτω γὰρ ἂν κοινονοῖεν ἅπαντες, ἐκείνως δ' ἡ πολιτεία γίγνεται [1297b] τῶν ἐτέρων μόνον. δεῖ δὲ τὴν πολιτείαν εἶναι μὲν ἐκ τῶν τὰ ὅπλα ἐχόντων μόνον· τοῦ δὲ τιμήματος τὸ πλῆθος ἀπλῶς μὲν ὀρισμένους οὐκ ἔστιν εἰπεῖν τοσοῦτον <δεῖν> ὑπάρχειν, ἀλλὰ σκεψαμένους τὸ πόσον ἐπιβάλλει μακρότατον ὥστε τοὺς μετέχοντας τῆς πολιτείας εἶναι πλείους τῶν μὴ μετεχόντων, τοῦτο τάττειν. ἐθέλουσι γὰρ οἱ πένητες καὶ μὴ μετέχοντες τῶν τιμῶν ἡσυχίαν ἔχειν, ἐὰν μῆτε ὑβρίζη τις αὐτοὺς μῆτε ἀφαιρῇται μὴτὲν τῆς οὐσίας. ἀλλὰ τοῦτο οὐ ῥάδιον· οὐ γὰρ αἰεὶ συμβαίνει χαρίεντας εἶναι τοὺς μετέχοντας τοῦ πολιτεύματος. καὶ εἰώθασι δέ, ὅταν πόλεμος ᾗ,

ὀκνεῖν, ἂν μὴ λαμβάνωσι τροφήν, ἄποροι δὲ ὧσιν· ἐὰν δὲ πορίζη τις τροφήν, βούλονται πολεμεῖν.

ἔστι δὲ ἡ πολιτεία παρ' ἐνίοις οὐ μόνον ἐκ τῶν ὀπλιτευόντων ἀλλὰ καὶ ἐκ τῶν ὠπλιτευκόντων· ἐν Μαλιεῦσι δὲ ἡ μὲν πολιτεία ἦν ἐκ τούτων, τὰς δὲ ἀρχὰς ἡρῶντο ἐκ τῶν στρατευομένων. καὶ ἡ πρώτη δὲ πολιτεία ἐν τοῖς Ἑλλήσιν ἐγένετο μετὰ τὰς βασιλείας ἐκ τῶν πολεμούντων, ἡ μὲν ἐξ ἀρχῆς ἐκ τῶν ἱππέων (τὴν γὰρ ἰσχὺν καὶ τὴν ὑπεροχὴν ἐν τοῖς ἱππεῦσιν ὁ πόλεμος εἶχεν· ἄνευ μὲν γὰρ συντάξεως ἄχρηστον τὸ ὀπλιτικόν, αἱ δὲ περὶ τῶν τοιούτων ἐμπειρίαι καὶ τάξεις ἐν τοῖς ἀρχαίοις οὐχ ὑπῆρχον, ὥστ' ἐν τοῖς ἱππεῦσιν εἶναι τὴν ἰσχύን), αὐξανομένων δὲ τῶν πόλεων καὶ τῶν ἐν τοῖς ὅπλοις ἰσχυσάντων μᾶλλον πλείους μετεῖχον τῆς πολιτείας· διόπερ ἅς νῦν καλοῦμεν πολιτείας, οἱ πρότερον ἐκάλουν δημοκρατίας· ἦσαν δὲ αἱ ἀρχαῖαι πολιτεῖαι εὐλόγως ὀλιγαρχικαὶ καὶ βασιλικαί. δι' ὀλιγανθρωπίαν γὰρ οὐκ εἶχον πολὺ τὸ μέσον, ὥστ' ὀλίγοι τε ὄντες τὸ πλῆθος καὶ κατὰ τὴν σύνταξιν φαῦλοι ὑπέμενον τὸ ἄρχεσθαι. διὰ τίνα μὲν οὖν εἰσιν αἰτίαν αἱ πολιτεῖαι πλείους, καὶ διὰ τί παρὰ τὰς λεγομένας ἕτεραι (δημοκρατία τε γὰρ οὐ μία τὸν ἀριθμὸν ἔστι, καὶ τῶν ἄλλων ὁμοίως), ἔτι δὲ τίνες αἱ διαφοραὶ καὶ διὰ τίνα αἰτίαν συμβαίνει, πρὸς δὲ τούτοις τίς ἀρίστη τῶν πολιτειῶν ὡς ἐπὶ τὸ πλεῖστον εἰπεῖν, καὶ τῶν ἄλλων ποία ποίους ἀρμόττει τῶν πολιτειῶν, εἴρηται.

Πάλιν δὲ καὶ κοινῇ καὶ χωρὶς περὶ ἐκάστης λέγωμεν περὶ τῶν ἐφεξῆς, λαβόντες ἀρχὴν τὴν προσήκουσαν αὐτῶν. ἔστι δὴ τρία μέρη τῶν πολιτειῶν πασῶν, περὶ ὧν δεῖ θεωρεῖν τὸν σπουδαῖον νομοθέτην ἐκάστη τὸ συμφέρον· ὧν ἐχόντων καλῶς ἀνάγκη τὴν πολιτείαν ἔχειν καλῶς, καὶ τὰς πολιτείας ἀλλήλων διαφέρειν ἐν τῷ διαφέρειν ἕκαστον τούτων. ἔστι δὲ τῶν τριῶν τούτων ἓν μὲν τί τὸ βουλευόμενον [1298a] περὶ τῶν κοινῶν, δεύτερον δὲ τὸ περὶ τὰς ἀρχάς (τοῦτο δ' ἔστι τίνας δεῖ καὶ τίνων εἶναι κυρίας, καὶ ποίαν τινὰ δεῖ γίνεσθαι τὴν αἵρεσιν αὐτῶν), τρίτον δὲ τί τὸ δικάζον. κύριον δ' ἔστι τὸ βουλευόμενον περὶ πολέμου καὶ εἰρήνης, καὶ συμμαχίας καὶ διαλύσεως, καὶ περὶ νόμων, καὶ περὶ θανάτου καὶ φυγῆς καὶ δημεύσεως, καὶ περὶ ἀρχῶν αἰρέσεως καὶ τῶν εὐθυνῶν. ἀναγκαῖον δ' ἦτοι πᾶσι τοῖς πολίταις ἀποδίδοσθαι πάσας ταύτας τὰς κρίσεις ἢ τισὶ πάσας (οἷον ἀρχῇ τινὶ μᾶ ἢ πλείοσιν, ἢ ἑτέραις ἑτέρας) ἢ τινὰς μὲν αὐτῶν πᾶσι τινὰς δὲ τισίν.

τὸ μὲν οὖν πάντα καὶ περὶ ἀπάντων δημοτικόν· τὴν τοιαύτην

γὰρ ἰσότητα ζητεῖ ὁ δῆμος. εἰσὶ δὲ οἱ τρόποι τοῦ πάντας πλείους, εἷς μὲν τὸ κατὰ μέρος ἀλλὰ μὴ πάντας ἀθρόους (ὥσπερ ἐν τῇ πολιτείᾳ τῇ Τηλεκλέους ἐστὶ τοῦ Μιλησίου· καὶ ἐν ἄλλαις δὲ πολιτείαις βουλευόνται αἱ συναρχαίαι συνιοῦσαι, εἰς δὲ τὰς ἀρχὰς βαδίζουσι πάντες κατὰ μέρος ἐκ τῶν φυλῶν καὶ τῶν μορίων τῶν ἐλαχίστων παντελῶς, ἕως ἄν διεξέλθῃ διὰ πάντων), συνιέναι δὲ μόνον περὶ τε νόμων θέσεως καὶ τῶν περὶ τῆς πολιτείας, καὶ τὰ παραγγελλόμενα ἀκουσομένους ὑπὸ τῶν ἀρχόντων· ἄλλος δὲ τρόπος τὸ πάντας ἀθρόους, συνιέναι δὲ μόνον πρὸς τε τὰς ἀρχαιρεσίας [αἵρησομένους] καὶ πρὸς τὰς νομοθεσίας καὶ περὶ πολέμου καὶ εἰρήνης καὶ πρὸς εὐθύνας, τὰ δ' ἄλλα τὰς ἀρχὰς βουλευέσθαι τὰς ἐφ' ἐκάστοις τεταγμένας, αἵρετὰς οὔσας ἐξ ἀπάντων ἢ κληρωτάς· ἄλλος δὲ τρόπος τὸ περὶ τὰς ἀρχὰς καὶ τὰς εὐθύνας ἀπαντᾶν τοὺς πολίτας, καὶ περὶ πολέμου βουλευσομένους καὶ συμμαχίας, τὰ δ' ἄλλα τὰς ἀρχὰς διοικεῖν αἵρετὰς οὔσας, ὅσας ἐνδέχεται, τοιαῦται δ' εἰσὶν ὅσας ἄρχειν ἀναγκαῖον τοὺς ἐπισταμένους· τέταρτος δὲ τρόπος τὸ πάντας περὶ πάντων βουλευέσθαι συνιόντας, τὰς δ' ἀρχὰς περὶ μηθενὸς κρίνειν ἀλλὰ μόνον προανακρίνειν, ὅνπερ ἡ τελευταία δημοκρατία νῦν διοικεῖται τρόπον, ἣν ἀνάλογόν φαμεν εἶναι ὀλιγαρχία τε δυναστευτικῇ καὶ μοναρχία τυραννικῇ. οὗτοι μὲν οὖν οἱ τρόποι δημοκρατικοὶ πάντες, τὸ δὲ τινὰς περὶ πάντων ὀλιγαρχικόν. ἔχει δὲ καὶ τοῦτο διαφορὰς πλείους. ὅταν μὲν γὰρ ἀπὸ τιμημάτων μετριωτέρων αἵρετοί τε ᾧσι καὶ πλείους διὰ τὴν μετριότητα τοῦ τιμήματος, καὶ περὶ ᾧν ὁ νόμος ἀπαγορεύει μὴ κινῶσιν ἀλλ' ἀκολουθῶσι, καὶ ἐξῇ κτωμένῳ τὸ τίμημα μετέχειν, ὀλιγαρχία μὲν πολιτικὴ δὲ ἐστὶν ἢ τοιαύτη διὰ τὸ μετριάζειν· ὅταν δὲ μὴ πάντες τοῦ βουλευέσθαι [1298b] μετέχωσιν ἀλλ' αἵρετοί, κατὰ νόμον δ' ἄρχωσιν ὥσπερ καὶ πρότερον, ὀλιγαρχικόν· ὅταν δὲ καὶ αἰρῶνται αὐτοὶ αὐτοὺς οἱ κύριοι τοῦ βουλευέσθαι, καὶ ὅταν παῖς ἀντὶ πατρὸς εἰσὶ καὶ κύριοι τῶν νόμων ᾧσιν, ὀλιγαρχικωτάτην ἀναγκαῖον εἶναι τὴν τάξιν ταύτην. ὅταν δὲ τινῶν τινές, οἷον πολέμου μὲν καὶ εἰρήνης καὶ εὐθυνῶν πάντες, τῶν δὲ ἄλλων ἄρχοντες, καὶ οὗτοι αἵρετοί, μὴ κληρωτοί, ἀριστοκρατία ἢ πολιτεία. ἐὰν δ' ἐνίων μὲν αἵρετοί ἐνίων δὲ κληρωτοί, καὶ κληρωτοὶ ἢ ἀπλῶς ἢ ἐκ προκρίτων, ἢ κοινῇ αἵρετοὶ καὶ κληρωτοί, τὰ μὲν πολιτείας ἀριστοκρατικῆς ἐστὶ τούτων, τὰ δὲ πολιτείας αὐτῆς.

διήρηται μὲν οὖν τὸ βουλευόμενον πρὸς τὰς πολιτείας τοῦτον

τὸν τρόπον, καὶ διοικεῖ ἐκάστη πολιτεία κατὰ τὸν εἰρημένον διορισμόν· συμφέρει δὲ δημοκρατία [τε] τῇ μάλιστ' εἶναι δοκούση δημοκρατία νῦν (λέγω δὲ τοιαύτην ἐν ἣ κύριος ὁ δῆμος καὶ τῶν νόμων ἐστίν) πρὸς τὸ βουλευέσθαι βέλτιον τὸ αὐτὸ ποιεῖν ὅπερ ἐπὶ τῶν δικαστηρίων ἐν ταῖς ὀλιγαρχίαις (τάττουσι γὰρ ζημίαν τοῖς οὓς βούλονται δικάζειν, ἵνα δικάζωσιν, οἱ δὲ δημοτικοὶ μισθὸν τοῖς ἀπόροις), τοῦτο δὴ καὶ περὶ τὰς ἐκκλησίας ποιεῖν (βουλευέσονται γὰρ βέλτιον κοινῇ βουλευόμενοι πάντες, ὁ μὲν δῆμος μετὰ τῶν γνωρίμων, οὗτοι δὲ μετὰ τοῦ πλήθους), συμφέρει δὲ καὶ τὸ αἰρετοὺς εἶναι τοὺς βουλευομένους, ἢ κληρωτοὺς ἴσους ἐκ τῶν μορίων, συμφέρει δέ, κἂν ὑπερβάλλωσι πολὺ κατὰ τὸ πλῆθος οἱ δημοτικοὶ τῶν πολιτῶν, ἢ μὴ πᾶσι διδόναι μισθόν, ἀλλ' ὅσοι σύμμετροι πρὸς τὸ τῶν γνωρίμων πλῆθος, ἢ ἀποκληροῦν τοὺς πλείους· ἐν δὲ ταῖς ὀλιγαρχίαις ἢ προσαιρεῖσθαι τινὰς ἐκ τοῦ πλήθους, ἢ κατασκευάσαντας ἄρχεῖον οἶον ἐν ἐνίαις πολιτείαις ἐστὶν οὓς καλοῦσι προβούλους καὶ νομοφύλακας, [καὶ] περὶ τούτων χρηματίζειν περὶ ὧν ἂν οὗτοι προβουλευώσιν (οὕτω γὰρ μεθέξει ὁ δῆμος τοῦ βουλευέσθαι, καὶ λύειν οὐθὲν δυνήσεται τῶν περὶ τὴν πολιτείαν), ἔτι ἢ ταῦτ' ἀψηφίζεσθαι τὸν δῆμον ἢ μηθὲν ἐναντίον τοῖς εἰσφερομένοις, ἢ τῆς συμβουλῆς μὲν μεταδιδόναι πᾶσι, βουλευέσθαι δὲ τοὺς ἄρχοντας. καὶ τὸ ἀντικείμενον δὲ τοῦ ἐν ταῖς πολιτείαις γιγνομένου δεῖ ποιεῖν. ἀποψηφιζόμενον μὲν γὰρ κύριον δεῖ ποιεῖν τὸ πλῆθος, καταψηφιζόμενον δὲ μὴ κύριον, ἀλλ' ἐπαναγέσθω πάλιν ἐπὶ τοὺς ἄρχοντας. ἐν γὰρ ταῖς πολιτείαις ἀνεστραμμένως ποιοῦσιν· οἱ γὰρ ὀλίγοι ἀποψηφισάμενοι μὲν κύριοι, καταψηφισάμενοι δὲ οὐ κύριοι, ἀλλ' ἐπανάγεται εἰς τοὺς πλείους [1299a] αἰεὶ. περὶ μὲν οὖν τοῦ βουλευομένου καὶ τοῦ κυρίου [δεῖ] τῆς πολιτείας τοῦτον διωρίσθω τὸν τρόπον.

Ἐχομένη δὲ τούτων ἐστὶν ἡ περὶ τὰς ἀρχὰς διαίρεσις. ἔχει γὰρ καὶ τοῦτο τὸ μόνιον τῆς πολιτείας πολλὰς διαφοράς, πόσαι τε ἀρχαί, καὶ κύριαί τινων, καὶ περὶ χρόνου, πόσος ἐκάστης ἀρχῆς (οἱ μὲν γὰρ ἑξαμήνους, οἱ δὲ δι' ἐλάττονος, οἱ δ' ἐνιαυσίας, οἱ δὲ πολυχρονιωτέρας ποιοῦσι τὰς ἀρχάς), καὶ πότερον εἶναι δεῖ τὰς ἀρχὰς αἰδίους ἢ πολυχρονίους ἢ μηδέτερον ἀλλὰ πλεονάκεις τοὺς αὐτούς, ἢ μὴ τὸν αὐτὸν δις ἀλλ' ἅπαξ μόνον, ἔτι δὲ περὶ τὴν κατάστασιν τῶν ἀρχῶν, ἐκ τίνων δεῖ γίνεσθαι καὶ ὑπὸ τίνων καὶ πῶς. περὶ πάντων γὰρ τούτων δεῖ δύνασθαι διελεῖν κατὰ πόσους ἐνδέχεται

γενέσθαι τρόπους, κάπεται προσαρμόσαι ὁποίαις <αἱ> ποιαὶ πολιτείαις συμφέρουσιν. ἔστι δὲ οὐδὲ τοῦτο διορίσαι ῥάδιον, ποίας δεῖ καλεῖν ἀρχάς· πολλῶν γὰρ ἐπιστατῶν ἢ πολιτικῇ κοινωνίᾳ δεῖται, διόπερ <οὐ> πάντας οὔτε τοὺς αἰρετοὺς οὔτε τοὺς κληρωτοὺς ἄρχοντας θετέον, οἷον τοὺς ἱερεῖς πρῶτον (τοῦτο γὰρ ἕτερόν τι παρὰ τὰς πολιτικὰς ἀρχὰς θετέον)· ἔτι δὲ καὶ χορηγοὶ καὶ κήρυκες [δ'] αἰροῦνται καὶ πρεσβευταί. εἰσὶ δὲ αἱ μὲν πολιτικαὶ τῶν ἐπιμελειῶν, ἡ πάντων τῶν πολιτῶν πρὸς τινα πρᾶξιν, οἷον στρατηγὸς στρατευομένων, ἡ κατὰ μέρος, οἷον ὁ γυναικονόμος ἢ παιδονόμος· αἱ δ' οἰκονομικαὶ (πολλάκις γὰρ αἰροῦνται σιτομέτρας)· αἱ δ' ὑπηρετικαὶ καὶ πρὸς ἅς, ἂν εὐπορῶσι, τάττουσι δούλους. μάλιστα δ' ὡς ἀπλῶς εἰπεῖν ἀρχὰς λεκτέον ταύτας ὅσαις ἀποδέδοται βουλευσασθαί τε περὶ τινῶν καὶ κρῖναι καὶ ἐπιτάξαι, καὶ μάλιστα τοῦτο· τὸ γὰρ ἐπιτάττειν ἀρχικώτερόν ἐστιν. ἀλλὰ ταῦτα διαφέρει πρὸς μὲν τὰς χρήσεις οὐδὲν ὡς εἰπεῖν (οὐ γάρ πω κρίσις γέγονεν ἀμφισβητούντων περὶ τοῦ ὀνόματος), ἔχει δέ τιν' ἄλλην διανοητικὴν πραγματείαν.

ποῖαι δ' ἀρχαὶ καὶ πόσαι ἀναγκαῖαι εἰ ἔσται πόλις, καὶ ποῖαι ἀναγκαῖαι μὲν οὐ, χρήσιμοι δὲ πρὸς σπουδαίαν πολιτείαν, μᾶλλον ἢ τις ἀπορήσειε πρὸς ἅπασάν τε δὴ πολιτείαν καὶ δὴ καὶ τὰς μικρὰς πόλεις. ἐν μὲν γὰρ δὴ ταῖς μεγάλαις ἐνδέχεται τε καὶ δεῖ μίαν τετάχθαι πρὸς ἓν ἔργον (πολλοὺς τε γὰρ εἰς τὰ ἀρχεῖα ἐνδέχεται βαδίζειν διὰ τὸ πολλοὺς εἶναι τοὺς πολίτας, ὥστε τὰς μὲν διαλείπειν πολὺν χρόνον τὰς δ' ἅπαξ ἄρχειν, καὶ βέλτιον ἕκαστον ἔργον τυγχάνει τῆς ἐπιμελείας μονοπραγματουύσης [1299b] ἢ πολυπραγματουύσης)· ἐν δὲ ταῖς μικραῖς ἀνάγκη συνάγειν εἰς ὀλίγους πολλὰς ἀρχὰς (διὰ γὰρ ὀλιγανθρωπίαν οὐ ῥαδίον ἐστὶ πολλοὺς ἐν ταῖς ἀρχαῖς εἶναι· τίνες γὰρ οἱ τούτοις ἔσονται διαδεξόμενοι πάλιν;). δέονται δ' ἐνίοτε τῶν αὐτῶν ἀρχῶν καὶ νόμων αἱ μικραὶ ταῖς μεγάλαις· πλὴν αἱ μὲν δέονται πολλάκις τῶν αὐτῶν, ταῖς δ' ἐν πολλῷ χρόνῳ τοῦτο συμβαίνει, διόπερ οὐθὲν κωλύει πολλὰς ἐπιμελείας ἅμα προστάττειν (οὐ γὰρ ἐμποδιοῦσιν ἀλλήλαις), καὶ πρὸς τὴν ὀλιγανθρωπίαν ἀναγκαῖον τὰ ἀρχεῖα οἷον ὀβελισκολύχνια ποιεῖν. ἐὰν οὖν ἔχωμεν λέγειν πόσας ἀναγκαῖον ὑπάρχειν πάσῃ πόλει, καὶ πόσας οὐκ ἀναγκαῖον μὲν δεῖ δ' ὑπάρχειν, ῥᾶον ἢ τις εἰδὼς ταῦτα συνάγοι ποίας ἀρμόττει συνάγειν ἀρχὰς εἰς μίαν ἀρχήν. ἀρμόττει δὲ καὶ τοῦτο μὴ λεληθῆναι, ποίων δεῖ κατὰ τόπον ἀρχεῖα πολλὰ ἐπιμελεῖσθαι καὶ

ποίων πανταχοῦ μίαν ἀρχὴν εἶναι κυρίαν, οἷον εὐκοσμίας πότερον ἐν ἀγορᾷ μὲν ἀγορανόμον, ἄλλον δὲ κατ' ἄλλον τόπον, ἢ πανταχοῦ τὸν αὐτόν· καὶ πότερον κατὰ τὸ πρᾶγμα δεῖ διαιρεῖν ἢ κατὰ τοὺς ἀνθρώπους, λέγω δ' οἷον ἓνα τῆς εὐκοσμίας, ἢ παίδων ἄλλον καὶ γυναικῶν· καὶ κατὰ τὰς πολιτείας δέ, πότερον διαφέρει καθ' ἐκάστην καὶ τὸ τῶν ἀρχῶν γένος ἢ οὐθέν, οἷον ἐν δημοκρατίᾳ καὶ ὀλιγαρχίᾳ καὶ ἀριστοκρατίᾳ καὶ μοναρχίᾳ πότερον αἱ αὐταὶ μὲν εἰσιν ἀρχαὶ κύριαι, οὐκ ἐξ ἴσων δ' οὐδ' ἐξ ὁμοίων, ἀλλ' ἐτέρων ἐν ἐτέραις, οἷον ἐν μὲν ταῖς ἀριστοκρατίαις ἐκ πεπαιδευμένων, ἐν δὲ ταῖς ὀλιγαρχίαις ἐκ τῶν πλουσίων, ἐν δὲ ταῖς δημοκρατίαις ἐκ τῶν ἐλευθέρων, ἢ τυγχάνουσι μὲν τινες οὖσαι καὶ κατ' αὐτὰς τὰς διαφορὰς τῶν ἀρχῶν, ἔστι δ' ὅπου συμφέρουσιν αἱ αὐταὶ καὶ ὅπου διαφέρουσαι (ἐνθα μὲν γὰρ ἀρμόττει μεγάλας ἐνθα δ' εἶναι μικρὰς τὰς αὐτάς).

οὐ μὴν ἀλλὰ καὶ ἰδιαί τινες εἰσίν, οἷον ἢ τῶν προβούλων· αὕτη γὰρ οὐ δημοκρατική. βουλὴ δὲ δημοτικόν· δεῖ μὲν γὰρ εἶναι τι τοιοῦτον ᾧ ἐπιμελὲς ἔσται τοῦ δήμου προβουλεύειν, ὅπως ἀσχυλῶν ἔσται, τοῦτο δ', ἐὰν ὀλίγοι τὸν ἀριθμὸν ᾧσιν, ὀλιγαρχικόν· τοὺς δὲ προβούλους ὀλίγους ἀναγκαῖον εἶναι τὸ πλῆθος, ὥστ' ὀλιγαρχικόν. ἀλλ' ὅπου ἄμφω αὐταὶ αἱ ἀρχαί, οἱ πρόβουλοι καθεστᾶσιν ἐπὶ τοῖς βουλευταῖς· ὁ μὲν γὰρ βουλευτῆς δημοτικόν, ὁ δὲ πρόβουλος ὀλιγαρχικόν. καταλύεται δὲ καὶ τῆς βουλῆς ἡ δύναμις ἐν ταῖς τοιαύταις δημοκρατίαις ἐν [1300a] αἷς αὐτὸς συνίων ὁ δῆμος χρηματίζει περὶ πάντων. τοῦτο δὲ συμβαίνειν εἶωθεν ὅταν εὐπορία τις ἢ [ἡ] μισθοῦ τοῖς ἐκκλησιάζουσιν· σχολάζοντες γὰρ συλλέγονται τε πολλάκις καὶ ἅπαντα αὐτοὶ κρίνουσιν. παιδονόμος δὲ καὶ γυναικονόμος, καὶ εἴ τις ἄλλος ἀρχῶν κύριός ἐστι τοιαύτης ἐπιμελείας, ἀριστοκρατικόν, δημοκρατικόν δ' οὐ (πῶς γὰρ οἷόν τε κωλύειν ἐξιέναι τὰς τῶν ἀπόρων;), οὐδ' ὀλιγαρχικόν (τρυφῶσι γὰρ αἱ τῶν ὀλιγαρχούντων).

ἀλλὰ περὶ μὲν τούτων ἐπὶ τοσοῦτον εἰρήσθω νῦν, περὶ δὲ τὰς τῶν ἀρχῶν καταστάσεις πειρατέον ἐξ ἀρχῆς διελθεῖν. εἰσὶ δ' αἱ διαφοραὶ ἐν τρισὶν ὅροις, ὧν συντιθεμένων ἀναγκαῖον πάντας εἰληφθαι τοὺς τρόπους. ἔστι δὲ τῶν τριῶν τούτων ἐν μὲν τίνες οἱ καθιστάντες τὰς ἀρχάς, δεῦτερον δὲ ἐκ τίνων, λοιπὸν δὲ τίνα τρόπον. ἐκάστου δὲ τῶν τριῶν τούτων διαφοραὶ τρεῖς εἰσιν. ἢ γὰρ πάντες οἱ πολῖται καθιστᾶσιν ἢ τινές, καὶ ἢ ἐκ πάντων ἢ ἐκ τινῶν ἀφωρισμένων (οἷον ἢ τιμῆματι ἢ γένει ἢ ἀρετῇ ἢ τινι τοιούτῳ ἄλλῳ,

ὥσπερ ἐν Μεγάροις ἐκ τῶν συγκατελθόντων καὶ συμμαχεσασμένων πρὸς τὸν δῆμον)· καὶ ταῦτα ἢ αἰρέσει ἢ κλήρῳ (πάλιν ταῦτα συνδυαζόμενα, λέγω δὲ τὰς μὲν τινὲς τὰς δὲ πάντες, καὶ τὰς μὲν ἐκ πάντων τὰς δ' ἐκ τινῶν, καὶ τὰς μὲν αἰρέσει τὰς δὲ κλήρῳ).

τούτων δ' ἐκάστης ἔσονται τῆς διαφορᾶς τρόποι ἕξ. ἢ γὰρ πάντες ἐκ πάντων αἰρέσει, ἢ πάντες ἐκ πάντων κλήρῳ «ἢ πάντες ἐκ τινῶν αἰρέσει ἢ πάντες ἐκ τινῶν κλήρῳ» (καί, εἰ ἐξ ἀπάντων, ἢ ὡς ἀνὰ μέρος, οἷον κατὰ φυλὰς καὶ δήμους καὶ φατρίας, ἕως ἂν διέλθῃ διὰ πάντων τῶν πολιτῶν, ἢ ἀεὶ ἐξ ἀπάντων), ἢ καὶ τὰ μὲν οὕτως τὰ δὲ ἐκείνως· πάλιν εἰ τινὲς οἱ καθιστάντες, ἢ ἐκ πάντων αἰρέσει ἢ ἐκ πάντων κλήρῳ, ἢ ἐκ τινῶν αἰρέσει ἢ ἐκ τινῶν κλήρῳ, ἢ τὰ μὲν οὕτως τὰ δὲ ἐκείνως, λέγω δὲ τὰ μὲν ἐκ πάντων αἰρέσει τὰ δὲ κληρῷ «καὶ τὰ μὲν ἐκ τινῶν αἰρέσει τὰ δὲ κληρῷ»· ὥστε δώδεκα οἱ τρόποι γίνονται χωρὶς τῶν δύο συνδυασμῶν. τούτων δ' αἱ μὲν τρεῖς καταστάσεις δημοτικαί, τὸ πάντα ἐκ πάντων αἰρέσει ἢ κλήρῳ [γίνεσθαι] ἢ ἀμφοῖν, τὰς μὲν κλήρῳ τὰς δ' αἰρέσει τῶν ἀρχῶν· τὸ δὲ μὴ πάντα ἅμα μὲν καθιστάναι, ἐξ ἀπάντων δ' ἢ ἐκ τινῶν ἢ κλήρῳ ἢ αἰρέσει ἢ ἀμφοῖν, ἢ τὰς μὲν ἐκ πάντων τὰς δ' ἐκ τινῶν, «ἢ κληρῷ ἢ αἰρέσει ἢ» ἀμφοῖν (τὸ δὲ ἀμφοῖν λέγω τὰς μὲν κλήρῳ τὰς δ' αἰρέσει) πολιτικόν, καὶ τὸ τινὰς ἐκ πάντων ἢ αἰρέσει καθιστάναι ἢ κλήρῳ ἢ ἀμφοῖν) τὰς μὲν κλήρῳ τὰς δ' αἰρέσει ὀλιγαρχικόν (ὀλιγαρχικώτερον δὲ [καὶ] τὸ ἐξ ἀμφοῖν). τὸ δὲ τὰς μὲν ἐκ πάντων τὰς δ' ἐκ τινῶν πολιτικόν ἀριστοκρατικῶς, [1300b] ἢ τὰς μὲν αἰρέσει τὰς δὲ κληρῷ, τὸ δὲ τινὰς ἐκ τινῶν «αἰρέσει» ὀλιγαρχικόν καὶ τὸ τινὰς ἐκ τινῶν κλήρῳ (μὴ γινομένου δ', ὁμοίως), καὶ τὸ τινὰς ἐκ τινῶν ἀμφοῖν. τὸ δὲ τινὰς ἐξ ἀπάντων τό τε ἐκ τινῶν αἰρέσει πάντα ἀριστοκρατικόν. οἱ μὲν οὖν τρόποι τῶν περὶ τὰς ἀρχὰς τοσοῦτοι τὸν ἀριθμὸν εἰσι, καὶ διήρηνται κατὰ τὰς πολιτείας οὕτως· τίνα δὲ τίσι συμφέρει καὶ πῶς δεῖ γίνεσθαι τὰς καταστάσεις, ἅμα ταῖς δυνάμεσι τῶν ἀρχῶν καὶ τίνες εἰσὶν ἔσται φανερόν. λέγω δὲ δύναμιν ἀρχῆς οἷον τὴν κυρίαν τῶν προσόδων καὶ τὴν κυρίαν τῆς φυλακῆς· ἄλλο γὰρ εἶδος δυνάμεως οἷον στρατηγίας καὶ τῆς τῶν περὶ τὴν ἀγορὰν συμβολαίων κυρίας.

Λοιπὸν δὲ τῶν τριῶν τὸ δικαστικόν εἰπεῖν. ληπτέον δὲ καὶ τούτων τοὺς τρόπους κατὰ τὴν αὐτὴν ὑπόθεσιν. ἔστι δὲ διαφορὰ τῶν δικαστηρίων ἐν τρισὶν ὅροις, ἐξ ὧν τε καὶ περὶ ὧν καὶ πῶς. λέγω δὲ ἐξ ὧν μὲν, πότερον ἐκ πάντων ἢ ἐκ τινῶν· περὶ ὧν δέ, πόσα εἶδη δικαστηρίων· τὸ δὲ πῶς, πότερον κλήρῳ ἢ αἰρέσει. πρῶτον οὖν

διαίρεισθω πόσα εἶδη δικαστηρίων. ἔστι δὲ τὸν ἀριθμὸν ὀκτώ, ἐν μὲν εὐθυντικόν, ἄλλο δὲ εἴ τίς τι τῶν κοινῶν ἀδικεῖ, ἕτερον ὅσα εἰς τὴν πολιτείαν φέρει, τέταρτον καὶ ἄρχουσι καὶ ιδιώταις ὅσα περὶ ζημιώσεων ἀμφισβητοῦσιν, πέμπτον τὸ περὶ τῶν ἰδίων συναλλαγμάτων καὶ ἐχόντων μέγεθος, καὶ παρὰ ταῦτα τό τε φονικὸν καὶ τὸ ξενικόν (φονικοῦ μὲν οὖν εἶδη, ἂν τ' ἐν τοῖς αὐτοῖς δικασταῖς ἂν τ' ἐν ἄλλοις, περὶ τε τῶν ἐκ προνοίας καὶ περὶ τῶν ἀκουσίων, καὶ ὅσα ὁμολογεῖται μὲν, ἀμφισβητεῖται δὲ περὶ τοῦ δικαίου, τέταρτον δὲ ὅσα τοῖς φεύγουσι φόνου ἐπὶ καθόδῳ ἐπιφέρεται, οἷον Ἀθήνησι λέγεται καὶ τὸ ἐν Φρεαττοῖ δικαστήριον· συμβαίνει δὲ τὰ τοιαῦτα ἐν τῷ παντὶ χρόνῳ ὀλίγα καὶ ἐν ταῖς μεγάλαις πόλεσιν· τοῦ δὲ ξενικοῦ ἐν μὲν ξένοις πρὸς ξένους, ἄλλο <δὲ> ξένοις πρὸς ἀστούς), ἔτι δὲ παρὰ πάντα ταῦτα περὶ τῶν μικρῶν συναλλαγμάτων, ὅσα δραχμιαῖα καὶ πεντάδραχμα καὶ μικρῷ πλείονος. δεῖ μὲν γὰρ καὶ περὶ τούτων γίνεσθαι κρίσιν, οὐκ ἐμπίπτει δὲ εἰς δικαστῶν πληθός.

ἀλλὰ περὶ μὲν τούτων ἀφείσθω καὶ τῶν φονικῶν καὶ τῶν ξενικῶν, περὶ δὲ τῶν πολιτικῶν λέγωμεν, περὶ ὧν μὴ γινομένων καλῶς διαστάσεις γίνονται καὶ τῶν πολιτειῶν αἱ κινήσεις. ἀνάγκη δ' ἥτοι πάντας περὶ πάντων κρίνειν τῶν διηρημένων αἰρέσει ἢ κλήρῳ, ἢ πάντας περὶ πάντων τὰ μὲν κλήρῳ τὰ δ' αἰρέσει, ἢ περὶ ἐνίων τῶν αὐτῶν τοὺς μὲν κλήρῳ τοὺς δ' [1301a] αἰρετούς. οὗτοι μὲν οὖν οἱ τρόποι τέτταρες τὸν ἀριθμὸν· τοσοῦτοι δ' ἕτεροι καὶ οἱ κατὰ μέρος. πάλιν γὰρ ἐκ τινῶν καὶ οἱ δικάζοντες περὶ πάντων αἰρέσει, ἢ ἐκ τινῶν περὶ πάντων κλήρῳ, ἢ τὰ μὲν κλήρῳ τὰ δὲ αἰρέσει, ἢ ἓνια δικαστήρια περὶ τῶν αὐτῶν ἐκ κληρωτῶν καὶ αἰρετῶν. οὗτοι μὲν οὖν, ὥσπερ ἐλέχθησαν, οἱ τρόποι <οἱ ἀντίστροφοι> τοῖς εἰρημένοις· ἔτι δὲ τὰ αὐτὰ συνδυαζόμενα, λέγω δ' οἷον τὰ μὲν ἐκ πάντων τὰ δ' ἐκ τινῶν τὰ δ' ἐξ ἀμφοῖν (οἷον εἰ τοῦ αὐτοῦ δικαστηρίου εἶεν οἱ μὲν ἐκ πάντων οἱ δ' ἐκ τινῶν), καὶ ἢ κλήρῳ ἢ αἰρέσει ἢ ἀμφοῖν. ὅσους μὲν οὖν ἐνδέχεται τρόπους εἶναι τὰ δικαστήρια, εἴρηται· τούτων δὲ τὰ μὲν πρῶτα δημοτικά, ὅσα ἐκ πάντων [ἢ] περὶ πάντων, τὰ δὲ δευτέρα ὀλιγαρχικά, ὅσα ἐκ τινῶν περὶ πάντων, τὰ δὲ τρίτα ἀριστοκρατικά καὶ πολιτικά, ὅσα τὰ μὲν ἐκ πάντων τὰ δ' ἐκ τινῶν.

Ε

Περὶ μὲν οὖν τῶν ἄλλων ὧν προειλόμεθα σχεδὸν εἴρηται περὶ πάντων· ἐκ τίνων δὲ μεταβάλλουσιν αἱ πολιτεῖαι καὶ πόσων καὶ ποίων, καὶ τίνες ἐκάστης πολιτείας φθοραί, καὶ ἐκ ποίων εἰς ποίας μάλιστα μεθίστανται, ἔτι δὲ σωτηρίαι τίνες καὶ κοινῇ καὶ χωρὶς ἐκάστης εἰσίν, ἔτι δὲ διὰ τίνων ἂν μάλιστα σφύζοιτο τῶν πολιτειῶν ἐκάστη, σκεπτέον ἐφεξῆς τοῖς εἰρημένοις.

δεῖ δὲ πρῶτον ὑπολαβεῖν τὴν ἀρχήν, ὅτι πολλαὶ γεγένηται πολιτεῖαι πάντων μὲν ὁμολογούντων τὸ δίκαιον καὶ τὸ κατ' ἀναλογίαν ἴσον, τούτου δ' ἁμαρτανόντων, ὥσπερ εἴρηται καὶ πρότερον. δῆμος μὲν γὰρ ἐγένετο ἐκ τοῦ ἴσους ὅτιοι ὄντας οἶεσθαι ἀπλῶς ἴσους εἶναι (ὅτι γὰρ ἐλεύθεροι πάντες ὁμοίως, ἀπλῶς ἴσοι εἶναι νομίζουσιν), ὀλιγαρχία δὲ ἐκ τοῦ ἀνίσους ἔν τι ὄντας ὅλως εἶναι ἀνίσους ὑπολαμβάνειν (κατ' οὐσίαν γὰρ ἄνισοι ὄντες ἀπλῶς ἄνισοι ὑπολαμβάνουσιν εἶναι). εἴτα οἱ μὲν ὡς ἴσοι ὄντες πάντων τῶν ἴσων ἀξιοῦσι μετέχειν· οἱ δ' ὡς ἄνισοι ὄντες πλεονεκτεῖν ζητοῦσιν, τὸ γὰρ πλεῖον ἄνισον. ἔχουσι μὲν οὖν τι πᾶσαι δίκαιον, ἡμαρτημένοι δ' ἀπλῶς εἰσιν. καὶ διὰ ταύτην τὴν αἰτίαν, ὅταν μὴ κατὰ τὴν ὑπόληψιν ἦν ἐκάτεροι τυγχάνουσιν ἔχοντες μετέχωσι τῆς πολιτείας, στασιάζουσιν. πάντων δὲ δικαιοτάτα μὲν ἂν στασιάζοιεν, ἥκιστα δὲ τοῦτο πράττουσιν, οἱ κατ' ἀρετὴν διαφέροντες· μάλιστα [1301b] γὰρ εὐλογον ἀνίσους ἀπλῶς εἶναι τούτους μόνον. εἰσὶ δέ τινες οἱ κατὰ γένος ὑπερέχοντες οὐκ ἀξιοῦσι τῶν ἴσων αὐτοὺς διὰ τὴν ἀνισότητα ταύτην· εὐγενεῖς γὰρ εἶναι δοκοῦσιν οἷς ὑπάρχει προγόνων ἀρετὴ καὶ πλοῦτος.

ἀρχαὶ μὲν οὖν ὡς εἶπεῖν αὐταὶ καὶ πηγαὶ τῶν στάσεών εἰσιν, ὅθεν στασιάζουσιν· διὸ καὶ αἱ μεταβολαὶ γίνονται διχῶς· ὅτε μὲν γὰρ πρὸς τὴν πολιτείαν, ὅπως ἐκ τῆς καθεστηκυίας ἄλλην μεταστήσωσιν, οἷον ἐκ δημοκρατίας ὀλιγαρχίαν ἢ δημοκρατίαν ἐξ ὀλιγαρχίας, ἢ πολιτείαν καὶ ἀριστοκρατίαν ἐκ τούτων, ἢ ταύτας ἐξ ἐκείνων, ὅτε δ' οὐ πρὸς τὴν καθεστηκυίαν πολιτείαν, ἀλλὰ τὴν μὲν κατάστασιν προαιροῦνται τὴν αὐτήν, δι' αὐτῶν δ' εἶναι βούλονται ταύτην, οἷον τὴν ὀλιγαρχίαν ἢ τὴν μοναρχίαν· ἔτι περὶ τοῦ μᾶλλον καὶ ἥττον, οἷον ἢ ὀλιγαρχίαν οὖσαν εἰς τὸ μᾶλλον ὀλιγαρχεῖσθαι ἢ εἰς τὸ ἥττον, ἢ δημοκρατίαν οὖσαν εἰς τὸ μᾶλλον δημοκρατεῖσθαι ἢ εἰς τὸ ἥττον,

ὁμοίως δὲ καὶ ἐπὶ τῶν λοιπῶν πολιτειῶν, ἢ ἵνα ἐπιταθῶσιν ἢ ἀνεθῶσιν· ἔτι πρὸς τὸ μέρος τι κινῆσαι τῆς πολιτείας, οἷον ἀρχὴν τινα καταστήσαι ἢ ἀνελεῖν, ὥσπερ ἐν Λακεδαιμονίᾳ φασὶ Λύσανδρόν τινες ἐπιχειρῆσαι καταλῦσαι τὴν βασιλείαν καὶ Πausανίαν τὸν βασιλέα τὴν ἐφορείαν, καὶ ἐν Ἐπιδάμνῳ δὲ μετέβαλεν ἡ πολιτεία κατὰ μόριον (ἀντὶ γὰρ τῶν φυλάρχων βουλὴν ἐποίησαν, εἰς δὲ τὴν ἡλιαίαν ἐπάναγκές ἐστιν ἔτι τῶν ἐν τῷ πολιτεύματι βαδίζειν τὰς ἀρχάς, ὅταν ἐπιψηφίζεται ἀρχὴ τις, ὀλιγαρχικὸν δὲ καὶ ὁ ἀρχῶν ὁ εἷς ἦν ἐν τῇ πολιτείᾳ ταύτῃ). πανταχοῦ γὰρ διὰ τὸ ἄνισον ἢ στάσις, οὐ μὴν εἰ τοῖς ἀνίσοις ὑπάρχει ἀνάλογον (αἰδῖος γὰρ βασιλεία ἄνισος, ἐὰν ᾗ ἐν ἴσοις)· ὅλως γὰρ τὸ ἴσον ζητοῦντες στασιάζουσιν. ἔστι δὲ διττὸν τὸ ἴσον· τὸ μὲν γὰρ ἀριθμῷ τὸ δὲ κατ' ἀξίαν ἐστίν. λέγω δὲ ἀριθμῷ μὲν τὸ πληθεῖ ἢ μεγέθει ταὐτὸ καὶ ἴσον, κατ' ἀξίαν δὲ τὸ τῷ λόγῳ, οἷον ὑπερέχει κατ' ἀριθμὸν μὲν ἴσῳ τὰ τρία τοῖν δυοῖν καὶ ταῦτα τοῦ ενός, λόγῳ δὲ τὰ τέτταρα τοῖν δυοῖν καὶ ταῦτα τοῦ ενός· ἴσον γὰρ μέρος τὰ δύο τῶν τεττάρων καὶ τὸ ἐν τοῖν δυοῖν· ἅμφω γὰρ ἡμίση. ὁμολογοῦντες δὲ τὸ ἀπλῶς εἶναι δίκαιον τὸ κατ' ἀξίαν, διαφέρονται, καθάπερ ἐλέχθη πρότερον, οἱ μὲν ὅτι, ἐὰν κατὰ τὴν ἴσιν, ὅλως ἴσοι νομίζουσιν εἶναι, οἱ δ' ὅτι, ἐὰν κατὰ τὴν ἄνισιν, πάντων ἀνίσων ἀξιοῦσιν ἑαυτούς. διὸ καὶ μάλιστα δύο γίνονται πολιτεῖαι, δῆμος καὶ ὀλιγαρχία· εὐγένεια γὰρ καὶ ἀρετὴ [1302a] ἐν ὀλίγοις, ταῦτα δ' ἐν πλείοσιν· εὐγενεῖς γὰρ καὶ ἀγαθοὶ οὐδαμοῦ ἑκατόν, εὐποροὶ δὲ καὶ ἄποροι πολλοὶ πολλαχοῦ. τὸ δὲ ἀπλῶς πάντῃ καθ' ἑκατέραν τετάχθαι τὴν ἰσότητα φαῦλον. φανερόν δ' ἐκ τοῦ συμβαίνοντος· οὐδεμία γὰρ μόνιμος ἐκ τῶν τοιούτων πολιτειῶν. τούτου δ' αἴτιον ὅτι ἀδύνατον ἀπὸ τοῦ πρώτου καὶ τοῦ ἐν ἀρχῇ ἡμαρτημένου μὴ ἀπαντᾶν εἰς τὸ τέλος κακόν τι. διὸ δεῖ τὰ μὲν ἀριθμητικὴ ἰσότητι χρῆσθαι, τὰ δὲ τῇ κατ' ἀξίαν.

ὁμῶς δὲ ἀσφαλεστέρα καὶ ἀστασίαστος μάλλον ἡ δημοκρατία τῆς ὀλιγαρχίας. ἐν μὲν γὰρ ταῖς ὀλιγαρχίαις ἐγγίνονται δύο, ἢ τε πρὸς ἀλλήλους στάσις καὶ ἔτι ἢ πρὸς τὸν δῆμον, ἐν δὲ ταῖς δημοκρατίαις ἢ πρὸς τὴν ὀλιγαρχίαν μόνον, αὐτῷ δὲ πρὸς αὐτόν, ὃ τι καὶ ἄξιον εἰπεῖν, οὐκ ἐγγίνεται τῷ δήμῳ στάσις· ἔτι δὲ ἢ ἐκ τῶν μέσων πολιτεία ἐγγυτέρω τοῦ δήμου ἢ ἢ τῶν ὀλίγων· ἥπερ ἐστὶν ἀσφαλεστάτη τῶν τοιούτων πολιτειῶν.

Ἐπεὶ δὲ σκοποῦμεν ἐκ τίνων αἱ τε στάσεις γίνονται καὶ αἱ μεταβολαὶ περὶ τὰς πολιτείας, ληπτέον καθόλου πρῶτον τὰς ἀρχάς

καὶ τὰς αἰτίας αὐτῶν. εἰσὶ δὴ σχεδὸν ὡς εἰπεῖν τρεῖς τὸν ἀριθμὸν, ἃς διοριστέον καθ' αὐτὰς τύπῳ πρῶτον. δεῖ γὰρ λαβεῖν πῶς τε ἔχοντες στασιάζουσι καὶ τίνων ἔνεκεν, καὶ τρίτον τίνες ἀρχαὶ γίνονται τῶν πολιτικῶν ταραχῶν καὶ τῶν πρὸς ἀλλήλους στάσεων. τοῦ μὲν οὖν αὐτοὺς ἔχειν πῶς πρὸς τὴν μεταβολὴν αἰτίαν καθόλου μάλιστα θετέον περὶ ἧς ἤδη τυγχάνομεν εἰρηκότες. οἱ μὲν γὰρ ἰσότητος ἐφιέμενοι στασιάζουσιν ἂν νομίζωσιν ἔλαττον ἔχειν ὄντες ἴσοι τοῖς πλεονεκτοῦσιν, οἱ δὲ τῆς ἀνισότητος καὶ τῆς ὑπεροχῆς ἂν ὑπολαμβάνωσιν ὄντες ἄνισοι μὴ πλεόν ἔχειν ἀλλ' ἴσον ἢ ἔλαττον (τούτων δ' ἔστι μὲν ὀρέγεσθαι δικαίως, ἔστι δὲ καὶ ἀδίκως)· ἐλάττους τε γὰρ ὄντες ὅπως ἴσοι ὥσι στασιάζουσι, καὶ ἴσοι ὄντες ὅπως μείζους. πῶς μὲν οὖν ἔχοντες στασιάζουσιν, εἴρηται· περὶ ὧν δὲ στασιάζουσιν ἐστὶ κέρδος καὶ τιμὴ καὶ τὰναντία τούτοις. καὶ γὰρ ἀτιμίαν φεύγοντες καὶ ζημίαν, ἢ ὑπὲρ αὐτῶν ἢ τῶν φίλων, στασιάζουσιν ἐν ταῖς πόλεσιν. αἱ δ' αἰτίαι καὶ ἀρχαὶ τῶν κινήσεων, ὅθεν αὐτοὶ τε διατίθενται τὸν εἰρημένον τρόπον καὶ περὶ τῶν λεχθέντων, ἔστι μὲν ὡς τὸν ἀριθμὸν ἐπτά τυγχάνουσιν οὖσαι, ἔστι δ' ὡς πλείους. ὧν δύο μὲν ἐστὶ ταῦτά τοις εἰρημένοις, ἀλλ' οὐχ ὡσαύτως· διὰ κέρδος γὰρ καὶ διὰ τιμὴν παροξύνονται πρὸς ἀλλήλους οὐχ ἵνα κτήσωνται σφίσιν αὐτοῖς, ὥσπερ εἴρηται πρότερον, ἀλλ' ἐτέρους [1302b] ὀρῶντες τοὺς μὲν δικαίως τοὺς δ' ἀδίκως πλεονεκτοῦντας τούτων· ἔτι διὰ ὕβριν, διὰ φόβον, διὰ ὑπεροχὴν, διὰ καταφρόνησιν, διὰ αὔξησιν τὴν παρὰ τὸ ἀνάλογον· ἔτι δὲ ἄλλον τρόπον δι' ἐριθειάν, δι' ὀλιγωρίαν, διὰ μικρότητα, διὰ ἀνομοιότητα. Τούτων δὲ ὕβρις μὲν καὶ κέρδος τίνα ἔχουσι δύναμιν καὶ πῶς αἴτια, σχεδὸν ἐστὶ φανερόν· ὑβρίζόντων τε γὰρ τῶν ἐν ταῖς ἀρχαῖς καὶ πλεονεκτούντων στασιάζουσι καὶ πρὸς ἀλλήλους καὶ πρὸς τὰς πολιτείας τὰς διδούσας τὴν ἐξουσίαν· ἡ δὲ πλεονεξία γίνεται ὅτε μὲν ἀπὸ τῶν ἰδίων ὅτε δὲ ἀπὸ τῶν κοινῶν. - δῆλον δὲ καὶ ἡ τιμὴ, καὶ τί δύναται καὶ πῶς αἰτία στάσεως· καὶ γὰρ αὐτοὶ ἀτιμαζόμενοι καὶ ἄλλους ὀρῶντες τιμωμένους στασιάζουσιν· ταῦτα δὲ ἀδίκως μὲν γίνεται ὅταν παρὰ τὴν ἀξίαν ἢ τιμῶνται τινες ἢ ἀτιμάζονται, δικαίως δὲ ὅταν κατὰ τὴν ἀξίαν. - δι' ὑπεροχὴν δέ, ὅταν τις ἢ τῇ δυνάμει μείζων (ἢ εἷς ἢ πλείους) ἢ κατὰ τὴν πόλιν καὶ τὴν δύναμιν τοῦ πολιτεύματος· γίνεσθαι γὰρ εἶωθεν ἐκ τῶν τοιούτων μοναρχία ἢ δυναστεία· διὸ ἐνιαχοῦ εἰώθασιν ὀστρακίζειν, οἷον ἐν Ἀργεὶ καὶ Ἀθήνησιν· καίτοι βέλτιον ἐξ ἀρχῆς ὀρᾶν ὅπως μὴ ἐνέσονται

τοσοῦτον ὑπερέχοντες, ἢ ἐάσαντας γενέσθαι ἰᾶσθαι ὕστερον. - διὰ δὲ φόβον στασιάζουσιν οἱ τε ἡδικοκότες, δεδιότες μὴ δῶσι δίκην, καὶ οἱ μέλλοντες ἀδικεῖσθαι, βουλόμενοι φθάσαι πρὶν ἀδικηθῆναι, ὥσπερ ἐν Ῥόδῳ συνέστησαν οἱ γνώριμοι ἐπὶ τὸν δῆμον διὰ τὰς ἐπιφερομένας δίκας. - διὰ καταφρόνησιν δὲ καὶ στασιάζουσι καὶ ἐπιτίθενται, οἷον ἐν τε ταῖς ὀλιγαρχίαις, ὅταν πλείους ᾧσιν οἱ μὴ μετέχοντες τῆς πολιτείας (κρείττους γὰρ οἶονται εἶναι), καὶ ἐν ταῖς δημοκρατίαις οἱ εὐποροὶ καταφρονήσαντες τῆς ἀταξίας καὶ ἀναρχίας, οἷον καὶ ἐν Θήβαις μετὰ τὴν ἐν Οἰνοφύτοις μάχην κακῶς πολιτευομένων ἢ δημοκρατία διεφθάρη, καὶ ἡ Μεγαρέων δι' ἀταξίαν καὶ ἀναρχίαν ἡττηθέντων, καὶ ἐν Συρακούσαις πρὸ τῆς Γέλωνος τυραννίδος, καὶ ἐν Ῥόδῳ ὁ δῆμος πρὸ τῆς ἐπαναστάσεως.

γίνονται δὲ καὶ δι' αὐξήσιν τὴν παρὰ τὸ ἀνάλογον μεταβολαὶ τῶν πολιτειῶν. ὥσπερ γὰρ σῶμα ἐκ μερῶν σύγκειται καὶ δεῖ αὐξάνεσθαι ἀνάλογον ἵνα μένη ἢ συμμετρία, εἰ δὲ μή, φθείρεται, ὅταν ὁ μὲν πούς τεττάρων πηχῶν ᾗ τὸ δ' ἄλλο σῶμα δυοῖν σπιθαμαῖν, ἐνίοτε δὲ καὶ εἰς ἄλλου ζώου μεταβάλοι μορφήν, εἰ μὴ μόνον κατὰ τὸ ποσὸν ἀλλὰ καὶ κατὰ τὸ ποιὸν αὐξάνοιτο παρὰ τὸ ἀνάλογον, οὕτω καὶ πόλις σύγκειται [1303a] ἐκ μερῶν, ὧν πολλάκις λανθάνει τι αὐξανόμενον, οἷον τὸ τῶν ἀπόρων πλῆθος ἐν ταῖς δημοκρατίαις καὶ πολιτείαις. συμβαίνει δ' ἐνίοτε τοῦτο καὶ διὰ τύχας, οἷον ἐν Τάραντι ἡττηθέντων καὶ ἀπολομένων πολλῶν γνωρίμων ὑπὸ τῶν Ἰαπύγων μικρὸν ὕστερον τῶν Μηδικῶν δημοκρατία ἐγένετο ἐκ πολιτείας, καὶ ἐν Ἀργεὶ τῶν ἐν τῇ ἐβδόμῃ ἀπολομένων ὑπὸ Κλεομένους τοῦ Λάκωνος ἠναγκάσθησαν παραδέξασθαι τῶν περιοίκων τινάς, καὶ ἐν Ἀθήναις ἀτυχοῦντων πεζῇ οἱ γνώριμοι ἐλάττους ἐγένοντο διὰ τὸ ἐκ καταλόγου στρατεύεσθαι ὑπὸ τὸν Λακωνικὸν πόλεμον. συμβαίνει δὲ τοῦτο καὶ ἐν ταῖς δημοκρατίαις, ἥττον δέ· πλειόνων γὰρ τῶν εὐπόρων γινομένων ἢ τῶν οὐσιῶν αὐξανομένων μεταβάλλουσιν εἰς ὀλιγαρχίας καὶ δυναστείας. - μεταβάλλουσι δ' αἱ πολιτεῖαι καὶ ἄνευ στάσεως διὰ τε τὰς ἐριθείας, ὥσπερ ἐν Ἡραίᾳ (ἐξ αἰρετῶν γὰρ διὰ τοῦτο ἐποίησαν κληρωτάς, ὅτι ἡροῦντο τοὺς ἐριθευομένους), καὶ δι' ὀλιγωρίαν, ὅταν ἐάσωσιν εἰς τὰς ἀρχὰς τὰς κυρίας παριέναι τοὺς μὴ τῇ πολιτεῖᾳ φίλους, ὥσπερ ἐν Ὠρεῶν κατελύθη ἡ ὀλιγαρχία τῶν ἀρχόντων γενομένου Ἡρακλεοδώρου, ὃς ἐξ ὀλιγαρχίας πολιτείαν καὶ δημοκρατίαν κατεσκεύασεν. - ἔτι διὰ τὸ παρὰ μικρόν. λέγω δὲ παρὰ μικρόν, ὅτι

πολλάκις λανθάνει μεγάλη γινομένη μετάβασις τῶν νομίμων, ὅταν παρορῶσι τὸ μικρόν, ὥσπερ ἐν Ἀμβρακίᾳ μικρὸν ἦν τὸ τίμημα, τέλος δ' <ἀπ'> οὐθενὸς ἤρχον, ὡς ἐγγίζον ἢ μῆθ' ἐν διαφέρον τοῦ μῆθ' ἐν τῷ μικρόν.

στασιωτικὸν δὲ καὶ τὸ μὴ ὁμόφυλον, ἕως ἂν συμπνεύσῃ· ὥσπερ γὰρ οὐδ' ἐκ τοῦ τυχόντος πλήθους πόλις γίγνεται, οὕτως οὐδ' ἐν τῷ τυχόντι χρόνῳ· διὸ ὅσοι ἤδη συνοίκους ἐδέξαντο ἢ ἐποίκους, οἱ πλεῖστοι διεστασίασαν· οἷον Τροιζηνίοις Ἀχαιοὶ συνώκησαν Σύβαριν, εἴτα πλείους οἱ Ἀχαιοὶ γενόμενοι ἐξέβαλον τοὺς Τροιζηνίους, ὅθεν τὸ ἄγος συνέβη τοῖς Συβαρίταις· καὶ ἐν Θουρίοις Συβαρίταις τοῖς συνοικήσασιν (πλεονεκτεῖν γὰρ ἀξιοῦντες ὡς σφετέρως τῆς χώρας ἐξέπεσον)· καὶ Βυζαντίοις οἱ ἐποίκοι ἐπιβουλεύοντες φωραθέντες ἐξέπεσον διὰ μάχης· καὶ Ἀντισσαῖοι τοὺς Χίων φυγάδας εἰσδεξάμενοι διὰ μάχης ἐξέβαλον· Ζαγκλαῖοι δὲ Σαμίους ὑποδεξάμενοι ἐξέπεσον αὐτοῖς· καὶ Ἀπολλωνιάται οἱ ἐν τῷ Εὐξείνῳ πόντῳ ἐποίκους ἐπαγαγόμενοι ἐστασίασαν· καὶ Συρακούσιοι μετὰ τὰ τυραννικὰ τοὺς ξένους [1303b] καὶ τοὺς μισθοφόρους πολίτας ποιησάμενοι ἐστασίασαν καὶ εἰς μάχην ἦλθον· καὶ Ἀμφιπολίται δεξάμενοι Χαλκιδέων ἐποίκους ἐξέπεσον ὑπὸ τούτων οἱ πλεῖστοι αὐτῶν. στασιάζουσι δ' ἐν μὲν ταῖς ὀλιγαρχίαις οἱ πολλοὶ ὡς ἀδικούμενοι, ὅτι οὐ μετέχουσι τῶν ἴσων, καθάπερ εἴρηται πρότερον, ἴσοι ὄντες, ἐν δὲ ταῖς δημοκρατίαις οἱ γνώριμοι, ὅτι μετέχουσι τῶν ἴσων οὐκ ἴσοι ὄντες. στασιάζουσι δὲ ἐνίοτε αἱ πόλεις καὶ διὰ τοὺς τόπους, ὅταν μὴ εὐφυῶς ἔχῃ ἡ χώρα πρὸς τὸ μίαν εἶναι πόλιν, οἷον ἐν Κλαζομεναῖς οἱ ἐπὶ Χυτῷ πρὸς τοὺς ἐν νήσῳ, καὶ Κολοφώνιοι καὶ Νοτιεῖς· καὶ Ἀθήνησιν οὐχ ὁμοίως εἰσὶν ἀλλὰ μᾶλλον δημοτικοὶ οἱ τὸν Πειραιᾶ οἰκοῦντες τῶν τῷ ἄστει. ὥσπερ γὰρ ἐν τοῖς πολέμοις αἱ διαβάσεις τῶν ὀχετῶν, καὶ τῶν πάντων σμικρῶν, διασπῶσι τὰς φάλαγγας, οὕτως ἔοικε πᾶσα διαφορὰ ποιεῖν διάστασιν. μεγίστη μὲν οὖν ἴσως διάστασις ἀρετῇ καὶ μοχθηρίᾳ, εἴτα πλοῦτος καὶ πενία, καὶ οὕτως δὴ ἕτερα ἕτερας μᾶλλον, ὧν μία καὶ ἡ εἰρημένη ἐστὶ. Γίγνονται μὲν οὖν αἱ στάσεις οὐ περὶ μικρῶν ἀλλ' ἐκ μικρῶν, στασιάζουσι δὲ περὶ μεγάλων. μάλιστα δὲ καὶ αἱ μικραὶ ἰσχύουσιν, ὅταν ἐν τοῖς κυρίοις γένωνται, οἷον συνέβη καὶ ἐν Συρακούσαις ἐν τοῖς ἀρχαίοις χρόνοις. μετέβαλε γὰρ ἡ πολιτεία ἐκ δύο νεανίσκων στασιασάντων <τῶν> ἐν ταῖς ἀρχαῖς ὄντων, περὶ ἐρωτικὴν αἰτίαν. θατέρου γὰρ ἀποδημοῦντος ἐταῖρος ὢν τις τὸν

ἐρώμενον αὐτοῦ ὑπεποιήσατο, πάλιν δ' ἐκεῖνος τούτῳ χαλεπήνας τὴν γυναῖκα αὐτοῦ ἀνέπεισεν ὥς αὐτὸν ἐλθεῖν· ὅθεν προσλαμβάνοντες τοὺς ἐν τῷ πολιτεύματι διεστασίασαν πάντας. διόπερ ἀρχομένων εὐλαβεῖσθαι δεῖ τῶν τοιούτων, καὶ διαλύειν τὰς τῶν ἡγεμόνων καὶ δυναμένων στάσεις· ἐν ἀρχῇ γὰρ γίνεται τὸ ἀμάρτημα, ἢ δ' ἀρχὴ λέγεται ἡμῖς εἶναι παντός, ὥστε καὶ τὸ ἐν αὐτῇ μικρὸν ἀμάρτημα ἀνάλογόν ἐστι πρὸς τὰ ἐν τοῖς ἄλλοις μέρεσιν. ὅλως δὲ αἱ τῶν γνωρίμων στάσεις συναπολαύειν ποιοῦσι καὶ τὴν ὅλην πόλιν, οἷον ἐν Ἑστιάᾳ συνέβη μετὰ τὰ Μηδικά, δύο ἀδελφῶν περὶ τῆς πατρώας νομῆς διενεχθέντων· ὁ μὲν γὰρ ἀπορώτερος, ὥς οὐκ ἀποφαίνοντος τὴν οὐσίαν οὐδὲ τὸν θησαυρὸν ὃν εὔρεν ὁ πατήρ, προσήγετο τοὺς δημοτικούς, ὁ δ' ἕτερος ἔχων οὐσίαν πολλὴν τοὺς εὐπόρους, καὶ ἐν Δελφοῖς ἐκ κηδείας γενομένης διαφορᾶς ἀρχὴ πασῶν ἐγένετο τῶν στάσεων τῶν [1304a] ὕστερον· ὁ μὲν γὰρ οἰωνισάμενός τι σύμπτωμα, ὥς ἦλθεν ἐπὶ τὴν νύμφην, οὐ λαβὼν ἀπῆλθεν, οἱ δ' ὥς ὑβρισθέντες ἐνέβαλον τῶν ἱερῶν χρημάτων θύοντος, κᾶπειτα ὥς ἱερόσυλον ἀπέκτειναν. καὶ περὶ Μυτιλήνην δὲ ἐξ ἐπικλήρων στάσεως γενομένης πολλῶν ἐγένετο ἀρχὴ κακῶν καὶ τοῦ πολέμου τοῦ πρὸς Ἀθηναίους, ἐν ᾧ Πάχης ἔλαβε τὴν πόλιν αὐτῶν· Τιμοφάνους γὰρ τῶν εὐπόρων τινὸς καταλιπόντος δύο θυγατέρας, ὁ περιωσθεὶς καὶ οὐ λαβὼν τοῖς υἱέσιν αὐτοῦ Δέξανδρος ἥρξε τῆς στάσεως καὶ τοὺς Ἀθηναίους παρώξυνε, πρόξενος ὢν τῆς πόλεως. καὶ ἐν Φωκεῦσιν ἐξ ἐπικλήρου στάσεως γενομένης περὶ Μνασέαν τὸν Μνάσωνος πατέρα καὶ Εὐθυκράτη τὸν Ὀνομάρχου, ἡ στάσις αὕτη ἀρχὴ τοῦ ἱεροῦ πολέμου κατέστη τοῖς Φωκεῦσιν. μετέβαλε δὲ καὶ ἐν Ἐπιδάμῳ ἡ πολιτεία ἐκ γαμικῶν· ὑπομνηστευσάμενος γὰρ τις, ὥς ἐξημίωσεν αὐτὸν ὁ τοῦ ὑπομνηστευθέντος πατήρ, γενόμενος τῶν ἀρχόντων, ἄτερος συμπαρέλαβε τοὺς ἐκτὸς τῆς πολιτείας ὥς ἐπηρεασθεῖς.

μεταβάλλουσι δὲ καὶ εἰς ὀλιγαρχίαν καὶ εἰς δῆμον καὶ εἰς πολιτείαν ἐκ τοῦ εὐδοκιμῆσαι τι ἢ αὐξηθῆναι ἢ ἀρχεῖον ἢ μόριον τῆς πόλεως, οἷον ἢ ἐν Ἀρείῳ πάγῳ βουλὴ εὐδοκιμήσασα ἐν τοῖς Μηδικοῖς ἔδοξε συντονωτέραν ποιῆσαι τὴν πολιτείαν, καὶ πάλιν ὁ ναυτικός ὄχλος γενόμενος αἴτιος τῆς περὶ Σαλαμίνα νίκης καὶ διὰ ταύτης τῆς ἡγεμονίας διὰ τὴν κατὰ θάλατταν δύναμιν τὴν δημοκρατίαν ἰσχυροτέραν ἐποίησεν, καὶ ἐν Ἀργεὶ οἱ γνώριμοι εὐδοκίμησαντες περὶ τὴν ἐν Μαντινείᾳ μάχην τὴν πρὸς

Λακεδαιμονίους ἐπεχείρησαν καταλύειν τὸν δῆμον, καὶ ἐν Συρακούσαις ὁ δῆμος αἴτιος γενόμενος τῆς νίκης τοῦ πολέμου τοῦ πρὸς Ἀθηναίους ἐκ πολιτείας εἰς δημοκρατίαν μετέβαλεν, καὶ ἐν Χαλκίδι Φόξον τὸν τύραννον μετὰ τῶν γνωρίμων ὁ δῆμος ἀνελὼν εὐθὺς εἶχετο τῆς πολιτείας, καὶ ἐν Ἀμβρακίᾳ πάλιν ὡσαύτως Περίανδρον συνεκβαλὼν τοῖς ἐπιθεμένοις ὁ δῆμος τὸν τύραννον εἰς ἑαυτὸν περιέστησε τὴν πολιτείαν. καὶ ὅλως δὴ δεῖ τοῦτο μὴ λανθάνειν, ὥς οἱ δυνάμεως αἴτιοι γενόμενοι, καὶ ἰδιῶται καὶ ἀρχαὶ καὶ φυλαὶ καὶ ὅλως μέρος καὶ πλῆθος ὁποιοῦν, στάσιν κινοῦσιν· ἢ γὰρ οἱ τούτοις φθονοῦντες τιμωμένοις ἄρχουσι τῆς στάσεως, ἢ οὗτοι διὰ τὴν ὑπεροχὴν οὐ θέλουσι μένειν ἐπὶ τῶν ἴσων. κινοῦνται δ' αἱ πολιτεῖαι καὶ ὅταν τάναντία εἶναι δοκοῦντα μέρη τῆς πόλεως ἰσάζῃ [1304b] ἀλλήλοις, οἷον οἱ πλούσιοι καὶ ὁ δῆμος, μέσον δ' ἢ μὴθὲν ἢ μικρὸν πάμπαν· ἂν γὰρ πολὺ ὑπερέχῃ ὅποτερονοῦν τῶν μερῶν, πρὸς τὸ φανερώς κρεῖττον τὸ λοιπὸν οὐ θέλει κινδυνεύειν. διὸ καὶ οἱ κατ' ἀρετὴν διαφέροντες οὐ ποιοῦσι στάσιν ὥς εἶπειν· ὀλίγοι γὰρ γίνονται πρὸς πολλούς. καθόλου μὲν οὖν περὶ πάσας τὰς πολιτείας αἱ ἀρχαὶ καὶ αἰτίαι τῶν στάσεων καὶ τῶν μεταβολῶν τοῦτον ἔχουσι τὸν τρόπον· κινοῦσι δὲ τὰς πολιτείας ὅτε μὲν διὰ βίας ὅτε δὲ δι' ἀπάτης, διὰ βίας μὲν ἢ εὐθὺς ἐξ ἀρχῆς ἢ ὕστερον ἀναγκάζοντες. καὶ γὰρ ἡ ἀπάτη διττή. ὅτε μὲν γὰρ ἐξαπατήσαντες τὸ πρῶτον ἐκόντων μεταβάλλουσι τὴν πολιτείαν, εἰθ' ὕστερον βίᾳ κατέχουσιν ἀκόντων, οἷον ἐπὶ τῶν Τετρακοσίων τὸν δῆμον ἐξηπάτησαν φάσκοντες τὸν βασιλέα χρήματα παρέξειν πρὸς τὸν πόλεμον τὸν πρὸς Λακεδαιμονίους, ψευσάμενοι δὲ κατέχειν ἐπειρῶντο τὴν πολιτείαν· ὅτε δὲ ἐξ ἀρχῆς τε πείσαντες καὶ ὕστερον πάλιν πεισθέντων ἐκόντων ἄρχουσιν αὐτῶν. ἀπλῶς μὲν οὖν περὶ πάσας τὰς πολιτείας ἐκ τῶν εἰρημένων συμβέβηκε γίνεσθαι τὰς μεταβολάς.

Καθ' ἕκαστον δ' εἶδος πολιτείας ἐκ τούτων μερίζοντας τὰ συμβαίνοντα δεῖ θεωρεῖν. αἱ μὲν οὖν δημοκρατίαι μάλιστα μεταβάλλουσι διὰ τὴν τῶν δημαγωγῶν ἀσέλγειαν· τὰ μὲν γὰρ ἰδίᾳ συκοφαντοῦντες τοὺς τὰς οὐσίας ἔχοντας συστρέφουσιν αὐτούς (συνάγει γὰρ καὶ τοὺς ἐχθίστους ὁ κοινὸς φόβος), τὰ δὲ κοινῇ τὸ πλῆθος ἐπάγοντες. καὶ τοῦτο ἐπὶ πολλῶν ἂν τις ἴδοι γιγνόμενον οὕτω. καὶ γὰρ ἐν Κῷ ἡ δημοκρατία μετέβαλε πονηρῶν ἐγγενομένων δημαγωγῶν (οἱ γὰρ γνώριμοι συνέστησαν)· καὶ ἐν Ῥόδῳ· μισθοφορὰν τε γὰρ οἱ δημαγωγοὶ ἐπόριζον, καὶ ἐκώλυον ἀποδιδόναι

τὰ ὀφειλόμενα τοῖς τριηράρχοις, οἱ δὲ διὰ τὰς ἐπιφερομένας δίκας ἠναγκάσθησαν συστάντες καταλῦσαι τὸν δῆμον. κατελύθη δὲ καὶ ἐν Ἡρακλείᾳ ὁ δῆμος μετὰ τὸν ἀποικισμὸν εὐθὺς διὰ τοὺς δημαγωγούς· ἀδικούμενοι γὰρ ὑπ' αὐτῶν οἱ γνώριμοι ἐξέπιπτον, ἔπειτα ἀθροισθέντες οἱ ἐκπίπτοντες καὶ κατελθόντες κατέλυσαν τὸν δῆμον. παραπλησίως δὲ καὶ ἡ ἐν Μεγάροις κατελύθη δημοκρατία· οἱ γὰρ δημαγωγοί, ἵνα χρήματα ἔχωσι δημεύειν, ἐξέβαλον πολλοὺς τῶν γνωρίμων, ἕως πολλοὺς ἐποίησαν τοὺς φεύγοντας, οἱ δὲ κατιόντες ἐνίκησαν μαχόμενοι τὸν δῆμον καὶ κατέστησαν τὴν ὀλιγαρχίαν. συνέβη δὲ ταῦτόν καὶ περὶ [1305a] Κύμην ἐπὶ τῆς δημοκρατίας ἢν κατέλυσε Θρασύμαχος. σχεδὸν δὲ καὶ ἐπὶ τῶν ἄλλων ἂν τις ἴδοι θεωρῶν τὰς μεταβολὰς τοῦτον ἐχούσας τὸν τρόπον. ὅτε μὲν γάρ, ἵνα χαρίζονται, ἀδικοῦντες τοὺς γνωρίμους συνιστᾶσιν, ἢ τὰς οὐσίας ἀναδάστους ποιοῦντες ἢ τὰς προσόδους ταῖς λειτουργίαις, ὅτε δὲ διαβάλλοντες, ἴν' ἔχωσι δημεύειν τὰ κτήματα τῶν πλουσίων.

ἐπὶ δὲ τῶν ἀρχαίων, ὅτε γένοιτο ὁ αὐτὸς δημαγωγὸς καὶ στρατηγός, εἰς τυραννίδα μετέβαλλον· σχεδὸν γὰρ οἱ πλεῖστοι τῶν ἀρχαίων τυράννων ἐκ δημαγωγῶν γεγόνασιν. αἴτιον δὲ τοῦ τότε μὲν γίνεσθαι νῦν δὲ μὴ, ὅτι τότε μὲν οἱ δημαγωγοὶ ἦσαν ἐκ τῶν στρατηγούντων (οὐ γὰρ πῶ δεινοὶ ἦσαν λέγειν), νῦν δὲ τῆς ῥητορικῆς ἠϋξημένης οἱ δυνάμενοι λέγειν δημαγωγοῦσι μὲν, δι' ἀπειρίαν δὲ τῶν πολεμικῶν οὐκ ἐπιτίθενται, πλὴν εἴ που βραχὺ τι γέγονε τοιοῦτον. ἐγίγνοντο δὲ τυραννίδες πρότερον μᾶλλον ἢ νῦν καὶ διὰ τὸ μεγάλας ἀρχὰς ἐγχειρίζεσθαι τισιν, ὥσπερ ἐν Μιλήτῳ ἐκ τῆς πρυτανείας (πολλῶν γὰρ ἦν καὶ μεγάλων κύριος ὁ πρύτανις). ἔτι δὲ διὰ τὸ μὴ μεγάλας εἶναι τότε τὰς πόλεις, ἀλλ' ἐπὶ τῶν ἀγρῶν οἰκεῖν τὸν δῆμον ἄσυχλον ὄντα πρὸς τοῖς ἔργοις, οἱ προστάται τοῦ δήμου, ὅτε πολεμικοὶ γένοιτο, τυραννίδι ἐπετίθεντο. πάντες δὲ τοῦτο ἔδρων ὑπὸ τοῦ δήμου πιστευθέντες, ἢ δὲ πίστις ἦν ἢ ἀπέχθεια ἢ πρὸς τοὺς πλουσίους, οἷον Ἀθήνησί τε Πεισίστρατος στασιάσας πρὸς τοὺς πεδιακοὺς, καὶ Θεαγένης ἐν Μεγάροις τῶν εὐπόρων τὰ κτήνη ἀποσφάξας, λαβὼν παρὰ τὸν ποταμὸν ἐπινέμοντας, καὶ Διονύσιος κατηγορῶν Δαφναίου καὶ τῶν πλουσίων ἠξιώθη τῆς τυραννίδος, διὰ τὴν ἔχθραν πιστευθεὶς ὡς δημοτικὸς ὢν. μεταβάλλουσι δὲ καὶ ἐκ τῆς πατρίας δημοκρατίας εἰς τὴν νεωτάτην· ὅπου γὰρ αἱρεταὶ μὲν αἱ ἀρχαί, μὴ ἀπὸ τιμημάτων δέ, αἱρεῖται δὲ ὁ δῆμος, δημαγωγοῦντες οἱ σπουδαρχιῶντες εἰς τοῦτο καθιστᾶσιν ὥστε κύριον εἶναι τὸν δῆμον

καὶ τῶν νόμων. ἄκος δὲ τοῦ μὴ γίνεσθαι ἢ τοῦ γίνεσθαι ἤττον τὸ τὰς φυλὰς φέρειν τοὺς ἄρχοντας, ἀλλὰ μὴ πάντα τὸν δῆμον. τῶν μὲν οὖν δημοκρατιῶν αἱ μεταβολαὶ γίνονται πᾶσαι σχεδὸν διὰ ταύτας τὰς αἰτίας.

Αἱ δ' ὀλιγαρχίαι μεταβάλλουσι [διὰ] δύο μάλιστα τρόπους τοὺς φανερωτάτους. ἓνα μὲν ἐὰν ἀδικῶσι τὸ πλῆθος· πᾶς γὰρ ἱκανὸς γίνεται προστάτης, μάλιστα δ' ὅταν ἐξ αὐτῆς συμβῇ τῆς ὀλιγαρχίας γίνεσθαι τὸν ἡγεμόνα, καθάπερ ἐν Νάξῳ Λύγδαμις, ὃς καὶ ἐτυράννησεν ὕστερον τῶν [1305b] Ναξίων. ἔχει δὲ καὶ ἡ ἐξ ἄλλων ἀρχὴ στάσεως διαφορὰς. ὅτε μὲν γὰρ ἐξ αὐτῶν τῶν εὐπόρων, οὐ τῶν ὄντων δ' ἐν ταῖς ἀρχαῖς, γίνεται κατάλυσις, ὅταν ὀλίγοι σφόδρα ὦσιν οἱ ἐν ταῖς τιμαῖς, οἷον ἐν Μασσαλία καὶ ἐν Ἰστροφ καὶ ἐν Ἡρακλείᾳ καὶ ἐν ἄλλαις πόλεσι συμβέβηκεν· οἱ γὰρ μὴ μετέχοντες τῶν ἀρχῶν ἐκίνουν, ἕως μετέλαβον οἱ πρεσβύτεροι πρότερον τῶν ἀδελφῶν, ὕστερον δ' οἱ νεώτεροι πάλιν· οὐ γὰρ ἄρχουσιν ἐνιαχοῦ μὲν ἅμα πατήρ τε καὶ υἱός, ἐνιαχοῦ δὲ ὁ πρεσβύτερος καὶ ὁ νεώτερος ἀδελφός· καὶ ἔνθα μὲν πολιτικώτερα ἐγένετο ἡ ὀλιγαρχία, ἐν Ἰστροφ δ' εἰς δῆμον ἀπετελευτήσεν, ἐν Ἡρακλείᾳ δ' ἐξ ἐλαττόνων εἰς ἐξακοσίους ἦλθεν· μετέβαλε δὲ καὶ ἐν Κνίδῳ ἡ ὀλιγαρχία στασιασάντων τῶν γνωρίμων αὐτῶν πρὸς αὐτοὺς διὰ τὸ ὀλίγους μετέχειν καί, καθάπερ εἴρηται, εἰ πατήρ, υἱὸν μὴ μετέχειν, μηδ' εἰ πλείους ἀδελφοί, ἀλλ' ἢ τὸν πρεσβυτάτον· ἐπιλαβόμενος γὰρ στασιαζόντων ὁ δῆμος, καὶ λαβὼν προστάτην ἐκ τῶν γνωρίμων, ἐπιθέμενος ἐκράτησεν, ἀσθενὲς γὰρ τὸ στασιάζον· καὶ ἐν Ἐρυθραῖς δὲ ἐπὶ τῆς τῶν Βασιλιδῶν ὀλιγαρχίας ἐν τοῖς ἀρχαίοις χρόνοις, καίπερ καλῶς ἐπιμελομένων τῶν ἐν τῇ πολιτείᾳ, ὅμως διὰ τὸ ὑπ' ὀλίγων ἄρχεσθαι ἀγανακτῶν ὁ δῆμος μετέβαλε τὴν πολιτείαν.

κινεῶνται δ' αἱ ὀλιγαρχίαι ἐξ αὐτῶν καὶ διὰ φιλονεικίαν δημαγωγούντων (ἡ δημαγωγία δὲ διττή, ἡ μὲν ἐν αὐτοῖς τοῖς ὀλίγοις - ἐγγίγνεται γὰρ δημαγωγὸς κἂν πάνυ ὀλίγοι ὦσιν, οἷον ἐν τοῖς Τριάκοντα Ἀθήνησιν οἱ περὶ Χαρικλέα ἴσχυσαν τοὺς Τριάκοντα δημαγωγούντες, καὶ ἐν τοῖς Τετρακοσίοις οἱ περὶ Φρύνιχον τὸν αὐτὸν τρόπον - ἡ ὅταν τὸν ὄχλον δημαγωγῶσιν οἱ ἐν τῇ ὀλιγαρχίᾳ ὄντες, οἷον ἐν Λαρίσῃ οἱ πολιτοφύλακες διὰ τὸ αἰρεῖσθαι αὐτοὺς τὸν ὄχλον ἐδημαγωγούν, καὶ ἐν ὅσαις ὀλιγαρχίαις οὐχ οὗτοι αἰροῦνται τὰς ἀρχὰς ἐξ ὧν οἱ ἄρχοντές εἰσιν, ἀλλ' αἱ μὲν ἀρχαὶ ἐκ τιμημάτων μεγάλων εἰσὶν ἢ ἐταιριῶν, αἰροῦνται δ' οἱ ὀπλίται ἢ ὁ δῆμος, ὅπερ ἐν

Ἀβύδῳ συνέβαινεν, καὶ ὅπου τὰ δικαστήρια μὴ ἐκ τοῦ πολιτεύματός ἐστι - δημαγωγοῦντες γὰρ πρὸς τὰς κρίσεις μεταβάλλουσι τὴν πολιτείαν, ὅπερ καὶ ἐν Ἡρακλείᾳ ἐγένετο τῇ ἐν τῷ Πόντῳ - ἔτι δ' ὅταν ἔνιοι εἰς ἐλάττους ἔλκωσι τὴν ὀλιγαρχίαν· οἱ γὰρ τὸ ἴσον ζητοῦντες ἀναγκάζονται βοηθὸν ἐπαγαγέσθαι τὸν δῆμον). γίνονται δὲ μεταβολαὶ τῆς ὀλιγαρχίας καὶ ὅταν ἀναλώσωσι τὰ ἴδια ζῶντες ἀσελγῶς· καὶ γὰρ οἱ τοιοῦτοι καινοτομεῖν ζητοῦσι, καὶ ἡ τυραννίδι ἐπιτίθενται αὐτοὶ ἢ [1306a] κατασκευάζουσιν ἕτερον (ὥσπερ Ἴππαρχος Διονύσιον ἐν Συρακούσαις, καὶ ἐν Ἀμφιπόλει ὃ ὄνομα ἦν Κλεότιμος τοὺς ἐποίκους τοὺς Χαλκιδέων ἤγαγε, καὶ ἐλθόντων διεστασίασεν αὐτοὺς πρὸς τοὺς εὐπόρους, καὶ ἐν Αἰγίνῃ ὁ τὴν πρᾶξιν τὴν πρὸς Χάρητα πράξας ἐνεχείρησε μεταβαλεῖν τὴν πολιτείαν διὰ τοιαύτην αἰτίαν). ὅτε μὲν οὖν εὐθὺς ἐπιχειροῦσί τι κινεῖν, ὅτε δὲ κλέπτουσι τὰ κοινά, ὅθεν στασιάζουσιν ἢ οὗτοι πρὸς αὐτοὺς ἢ οἱ πρὸς τούτους μαχόμενοι κλέπτοντας, ὅπερ ἐν Ἀπολλωνίᾳ συνέβη τῇ ἐν τῷ Πόντῳ. ὁμοιοῦσα δὲ ὀλιγαρχία οὐκ εὐδιάφορος ἐξ αὐτῆς. σημεῖον δὲ ἡ ἐν Φαρσάλῳ πολιτεία· ἐκεῖνοι γὰρ ὀλίγοι ὄντες πολλῶν κύριοι εἰσι διὰ τὸ χρῆσθαι σφίσιν αὐτοῖς καλῶς.

καταλύονται δὲ καὶ ὅταν ἐν τῇ ὀλιγαρχίᾳ ἐτέραν ὀλιγαρχίαν ἐμποιῶσιν. τοῦτο δ' ἐστὶν ὅταν τοῦ παντὸς πολιτεύματος ὀλίγου ὄντος τῶν μεγίστων ἀρχῶν μὴ μετέχωσιν οἱ ὀλίγοι πάντες, ὅπερ ἐν Ἡλίδι συνέβη ποτέ· τῆς πολιτείας γὰρ δι' ὀλίγων οὔσης τῶν γερόντων ὀλίγοι πάμπαν ἐγίνοντο διὰ τὸ αἰδίου εἶναι ἐνενήκοντα ὄντας, τὴν δ' αἴρεσιν δυναστευτικὴν εἶναι καὶ ὁμοίαν τῇ τῶν ἐν Λακεδαιμόνι γερόντων. γίγνεται δὲ μεταβολὴ τῶν ὀλιγαρχιῶν καὶ ἐν πολέμῳ καὶ ἐν εἰρήνῃ, ἐν μὲν πολέμῳ διὰ τὴν πρὸς τὸν δῆμον ἀπιστίαν στρατιώταις ἀναγκαζομένων χρῆσθαι (ὃ γὰρ ἂν ἐγχειρίσωσιν, οὗτος πολλάκις γίνεται τύραννος, ὥσπερ ἐν Κορίνθῳ Τιμοφάνης· ἂν δὲ πλείους, οὗτοι αὐτοῖς περιποιοῦνται δυναστείαν· ὅτε δὲ ταῦτα δεδιότες μεταδιδόασιν τῷ πλήθει τῆς πολιτείας διὰ τὸ ἀναγκάζεσθαι τῷ δήμῳ χρῆσθαι). ἐν δὲ τῇ εἰρήνῃ διὰ τὴν ἀπιστίαν τὴν πρὸς ἀλλήλους ἐγχειρίζουσι τὴν φυλακὴν στρατιώταις καὶ ἄρχοντι μεσιδίῳ, ὃς ἐνίοτε γίνεται κύριος ἀμφοτέρων, ὅπερ συνέβη ἐν Λαρίσῃ ἐπὶ τῆς τῶν Ἀλευαδῶν ἀρχῆς τῶν περὶ Σῆμον, καὶ ἐν Ἀβύδῳ ἐπὶ τῶν ἐταυριῶν ὧν ἦν μία ἡ Ἰφιάδου.

γίνονται δὲ στάσεις καὶ ἐκ τοῦ περιωθεῖσθαι ἐτέρους ὑφ' ἐτέρων τῶν ἐν τῇ ὀλιγαρχίᾳ αὐτῶν καὶ καταστασιάζεσθαι κατὰ

γάμους ἢ δίκας, οἷον ἐκ γαμικῆς μὲν αἰτίας αἱ εἰρημέναι πρότερον (καὶ τὴν ἐν Ἑρετρίᾳ δ' ὀλιγαρχίαν τὴν τῶν ἱππέων Διαγόρας κατέλυσεν ἀδικηθεὶς περὶ γάμον), ἐκ δὲ δικαστηρίου κρίσεως ἢ ἐν Ἡρακλείᾳ στάσις ἐγένετο καὶ <ἡ> ἐν Θήβαις, ἐπ' αἰτία μοιχείας δικαίως μὲν στασιαστικῶς δὲ ποιησαμένων τὴν κόλασιν τῶν μὲν ἐν Ἡρακλείᾳ κατ' Εὐρυτίωνος, [1306b] τῶν δ' ἐν Θήβαις κατ' Ἀρχίου (ἐφιλονείκησαν γὰρ αὐτοῖς οἱ ἐχθροὶ ὥστε δεθῆναι ἐν ἀγορᾷ ἐν τῷ κύφῳ). πολλοὶ δὲ καὶ διὰ τὸ ἄγαν δεσποτικὰς εἶναι τὰς ὀλιγαρχίας ὑπὸ τῶν ἐν τῇ πολιτείᾳ τινῶν δυσχερανάντων κατελύθησαν, ὥσπερ ἢ ἐν Κνίδῳ καὶ ἢ ἐν Χίῳ ὀλιγαρχία. γίνονται δὲ καὶ ἀπὸ συμπτώματος μεταβολαὶ καὶ τῆς καλουμένης πολιτείας καὶ τῶν ὀλιγαρχιῶν ἐν ὅσαις ἀπὸ τιμήματος βουλευούσι καὶ δικάζουσι καὶ τὰς ἄλλας ἀρχὰς ἄρχουσιν. πολλάκις γὰρ ὅταν ταχθῇ πρῶτον τίμημα πρὸς τοὺς παρόντας καιροὺς, ὥστε μετέχειν ἐν μὲν τῇ ὀλιγαρχίᾳ ὀλίγους ἐν δὲ τῇ πολιτείᾳ τοὺς μέσους, εὐετηρίας γιγνομένης δι' εἰρήνην ἢ δι' ἄλλην τιν' εὐτυχίαν συμβαίνει πολλαπλασίου γίνεσθαι τιμήματος ἀξίας τὰς αὐτὰς κτήσεις, ὥστε πάντας πάντων μετέχειν, ὅτε μὲν ἐκ προσαγωγῆς καὶ κατὰ μικρὸν γινομένης τῆς μεταβολῆς καὶ λανθανούσης, ὅτε δὲ καὶ θάπτον. αἱ μὲν οὖν ὀλιγαρχίαι μεταβάλλουσι καὶ στασιάζουσι διὰ τοιαύτας αἰτίας (ὅλως δὲ καὶ αἱ δημοκρατίαι καὶ αἱ ὀλιγαρχίαι ἐξίστανται ἐνίοτε οὐκ εἰς τὰς ἐναντίας πολιτείας ἀλλ' εἰς τὰς ἐν τῷ αὐτῷ γένει, οἷον ἐκ τῶν ἐννόμων δημοκρατιῶν καὶ ὀλιγαρχιῶν εἰς τὰς κυρίους καὶ ἐκ τούτων εἰς ἐκεῖνας).

Ἐν δὲ ταῖς ἀριστοκρατίαις γίνονται αἱ στάσεις αἱ μὲν διὰ τὸ ὀλίγους τῶν τιμῶν μετέχειν, ὅπερ εἴρηται κινεῖν καὶ τὰς ὀλιγαρχίας, διὰ τὸ καὶ τὴν ἀριστοκρατίαν ὀλιγαρχίαν εἶναι πῶς (ἐν ἀμφοτέραις γὰρ ὀλίγοι οἱ ἄρχοντες, οὐ μέντοι διὰ ταυτὸν ὀλίγοι). ἐπεὶ δοκεῖ γε διὰ ταῦτα καὶ ἡ ἀριστοκρατία ὀλιγαρχία εἶναι. μάλιστα δὲ τοῦτο συμβαίνειν ἀναγκαῖον ὅταν ἦ τι πλῆθος τῶν πεφρονηματισμένων ὡς ὁμοίων κατ' ἀρετὴν, οἷον ἐν Λακεδαιμόνι οἱ λεγόμενοι Παρθενίαι (ἐκ τῶν ὁμοίων γὰρ ἦσαν), οὓς φωράσαντες ἐπιβουλεύσαντας ἀπέστειλαν Τάραντος οἰκιστάς, ἢ ὅταν τινὲς ἀτιμάζωνται μεγάλοι ὄντες καὶ μηθενὸς ἥττους κατ' ἀρετὴν ὑπὸ τινῶν ἐντιμωτέρων, οἷον Λύσανδρος ὑπὸ τῶν βασιλέων, ἢ ὅταν ἀνδρώδης τις ὢν μὴ μετέχη τῶν τιμῶν, οἷον Κινάδων ὁ τὴν ἐπ' Ἀγησιλάου συστήσας ἐπίθεσιν ἐπὶ τοὺς Σπαρτιάτας· ἔτι ὅταν οἱ μὲν ἀπορῶσι λίαν οἱ δ' εὐπορῶσιν

(καὶ μάλιστα ἐν τοῖς πολέμοις τοῦτο γίνεται· συνέβη δὲ καὶ τοῦτο ἐν Λακεδαιμόνι ὑπὸ τὸν Μεσηνιακὸν πόλεμον· δῆλον δὲ [καὶ] τοῦτο ἐκ τῆς Турταίου ποιήσεως τῆς καλουμένης [1307a] Εὐνομίας· θλιβόμενοι γάρ τινες διὰ τὸν πόλεμον ἠξιοῦν ἀνάδαστον ποιεῖν τὴν χώραν)· ἔτι ἐάν τις μέγας ἦ καὶ δυνάμενος ἔτι μείζων εἶναι, ἵνα μοναρχῇ, ὥσπερ ἐν Λακεδαιμόνι δοκεῖ Πausanίας ὁ στρατηγήσας κατὰ τὸν Μηδικὸν πόλεμον, καὶ ἐν Καρχηδόνι Ἄννων.

λύονται δὲ μάλιστα αἱ τε πολιτεῖαι καὶ αἱ ἀριστοκρατίαι διὰ τὴν ἐν αὐτῇ τῇ πολιτείᾳ τοῦ δικαίου παρέκβασιν. ἀρχὴ γὰρ τὸ μὴ μεμεῖχθαι καλῶς ἐν μὲν τῇ πολιτείᾳ δημοκρατίαν καὶ ὀλιγαρχίαν, ἐν δὲ τῇ ἀριστοκρατίᾳ ταῦτά τε καὶ τὴν ἀρετὴν, μάλιστα δὲ τὰ δύο· λέγω δὲ τὰ δύο δῆμον καὶ ὀλιγαρχίαν. ταῦτα γὰρ αἱ πολιτεῖαι τε πειρῶνται μιγνύναι καὶ αἱ πολλαὶ τῶν καλουμένων ἀριστοκρατιῶν. διαφέρουσι γὰρ τῶν ὀνομαζομένων πολιτειῶν αἱ ἀριστοκρατίαι τούτῳ, καὶ διὰ τοῦτ' εἰσὶν αἱ μὲν ἥττον αἱ δὲ μᾶλλον μόνιμοι αὐτῶν· τὰς γὰρ ἀποκλινούσας μᾶλλον πρὸς τὴν ὀλιγαρχίαν ἀριστοκρατίας καλοῦσιν, τὰς δὲ πρὸς τὸ πλῆθος πολιτείας· διόπερ ἀσφαλέστεραι αἱ τοιαῦται τῶν ἐτέρων εἰσὶν· κρεῖττον γὰρ τὸ πλεῖον, καὶ μᾶλλον ἀγαπῶσιν ἴσον ἔχοντες, οἱ δ' ἐν ταῖς εὐπορίαις, ἂν ἡ πολιτεία διδῷ τὴν ὑπεροχήν, ὑβρίζειν ζητοῦσι καὶ πλεονεκτεῖν. ὅλως δ' ἐφ' ὁπότερον ἂν ἐγκλίνη ἡ πολιτεία, ἐπὶ ταῦτα μεθίσταται ἐκατέρων τὸ σφέτερον αὐξανόντων, οἷον ἡ μὲν πολιτεία εἰς δῆμον, ἀριστοκρατία δ' εἰς ὀλιγαρχίαν· ἢ εἰς τάναντία, οἷον ἡ μὲν ἀριστοκρατία εἰς δῆμον (ὥς ἀδικούμενοι γὰρ περισπῶσιν εἰς τοῦναντίον οἱ ἀπορώτεροι), αἱ δὲ πολιτεῖαι εἰς ὀλιγαρχίαν (μόνον γὰρ μόνιμον τὸ κατ' ἀξίαν ἴσον καὶ τὸ ἔχειν τὰ αὐτῶν)· συνέβη δὲ τὸ εἰρημένον ἐν Θουρίοις. διὰ μὲν γὰρ τὸ ἀπὸ πλείονος τιμήματος εἶναι τὰς ἀρχὰς εἰς ἑλαττον μετέβη καὶ εἰς ἀρχεῖα πλείω, διὰ δὲ τὸ τὴν χώραν ὅλην τοὺς γνωρίμους συγκτήσασθαι παρὰ τὸν νόμον (ἢ γὰρ πολιτεία ὀλιγαρχικωτέρα ἦν, ὥστε ἐδύναντο πλεονεκτεῖν) ὁ [δὲ] δῆμος γυμνασθεὶς ἐν τῷ πολέμῳ τῶν φρουρῶν ἐγένετο κρεῖττων, ἕως ἀφείσαν τῆς χώρας ὅσοι πλείω ἦσαν ἔχοντες.

ἔτι διὰ τὸ πάσας τὰς ἀριστοκρατικὰς πολιτείας ὀλιγαρχικὰς εἶναι μᾶλλον πλεονεκτοῦσιν οἱ γνώριμοι, οἷον καὶ ἐν Λακεδαιμόνι εἰς ὀλίγους αἱ οὐσίαι ἔρχονται· καὶ ἔξεστι ποιεῖν ὅ τι ἂν θέλωσι τοῖς γνωρίμοις μᾶλλον, καὶ κηδεύειν ὅτῳ θέλουσιν, διὸ καὶ ἡ Λοκρῶν πόλις ἀπώλετο ἐκ τῆς πρὸς Διονύσιον κηδείας, ὃ ἐν δημοκρατίᾳ οὐκ

ἂν ἐγένετο, οὐδ' ἂν ἐν ἀριστοκρατίᾳ εὖ μεμειγμένη. μάλιστα δὲ λανθάνουσιν αἱ [1307b] ἀριστοκραταὶ μεταβάλλουσαι τῷ λύεσθαι κατὰ μικρόν, ὅπερ εἴρηται ἐν τοῖς πρότερον καθόλου κατὰ πασῶν τῶν πολιτειῶν, ὅτι αἴτιον τῶν μεταβολῶν καὶ τὸ μικρόν ἐστιν· ὅταν γάρ τι προῶνται τῶν πρὸς τὴν πολιτείαν, μετὰ τοῦτο καὶ ἄλλο μικρῷ μεῖζον εὐχερέστερον κινουῖσιν, ἕως ἂν πάντα κινήσωσι τὸν κόσμον. συνέβη δὲ τοῦτο καὶ ἐπὶ τῆς Θουρίων πολιτείας. νόμου γὰρ ὄντος διὰ πέντε ἐτῶν στρατηγεῖν, γενόμενοι τινες πολεμικοὶ τῶν νεωτέρων καὶ παρὰ τῷ πλήθει τῶν φρουρῶν εὐδοκιμοῦντες, καταφρονήσαντες τῶν ἐν τοῖς πράγμασι καὶ νομίζοντες ῥαδίως κατασχῆσιν, τοῦτον τὸν νόμον λύειν ἐπεχείρησαν πρῶτον, ὥστ' ἐξεῖναι τοὺς αὐτοὺς συνεχῶς στρατηγεῖν, ὁρῶντες τὸν δῆμον αὐτοὺς χειροτονήσοντα προθύμως. οἱ δ' ἐπὶ τούτῳ τεταγμένοι τῶν ἀρχόντων, οἱ καλούμενοι σύμβουλοι, ὁρμήσαντες τὸ πρῶτον ἐναντιοῦσθαι συνεπίσθησαν, ὑπολαμβάνοντες τοῦτον κινήσαντας τὸν νόμον ἐάσειν τὴν ἄλλην πολιτείαν, ὕστερον δὲ βουλόμενοι κωλύειν ἄλλων κινουμένων οὐκέτι πλέον ἐποιοῦν οὐθέν, ἀλλὰ μετέβαλεν ἡ τάξις πᾶσα τῆς πολιτείας εἰς δυναστείαν τῶν ἐπιχειρησάντων νεωτερίζειν.

πᾶσαι δ' αἱ πολιτεῖαι λύνονται ὅτε μὲν ἐξ αὐτῶν ὅτε δ' ἔξωθεν, ὅταν ἐναντία πολιτεία ἢ ἡ πλησίον ἢ πόρρω μὲν ἔχουσα δὲ δύναμιν. ὅπερ συνέβαινεν ἐπ' Ἀθηναίων καὶ Λακεδαιμονίων· οἱ μὲν γὰρ Ἀθηναῖοι πανταχοῦ τὰς ὀλιγαρχίας, οἱ δὲ Λάκωνες τοὺς δήμους κατέλυον. ὅθεν μὲν οὖν αἱ μεταβολαὶ γίνονται τῶν πολιτειῶν καὶ αἱ στάσεις, εἴρηται σχεδόν.

Περὶ δὲ σωτηρίας καὶ κοινῇ καὶ χωρὶς ἐκάστης πολιτείας ἐχόμενόν ἐστιν εἰπεῖν. πρῶτον μὲν οὖν δῆλον ὅτι, εἴπερ ἔχομεν δι' ὧν φθείρονται αἱ πολιτεῖαι, ἔχομεν καὶ δι' ὧν σφύζονται· τῶν γὰρ ἐναντίων τάναντία ποιητικά, φθορὰ δὲ σωτηρία ἐναντίον. ἐν μὲν οὖν ταῖς εὖ κεκραμέναις πολιτείαις ὥσπερ ἄλλο τι δεῖ τηρεῖν ὅπως μὴθὲν παρανομῶσι, καὶ μάλιστα τὸ μικρόν φυλάττειν· λανθάνει γὰρ παραδουμένη ἡ παρανομία, ὥσπερ τὰς οὐσίας τὸ μικρόν δαπάνημα ἀναιρεῖ πολλάκις γινόμενον. λανθάνει δὲ ἡ δαπάνη διὰ τὸ μὴ ἄθροα γίνεσθαι· παραλογίζεται γὰρ ἡ διάνοια ὑπ' αὐτῶν, ὥσπερ ὁ σοφιστικὸς λόγος “εἰ ἕκαστον μικρόν, καὶ πάντα”· τοῦτο δ' ἐστὶ μὲν ὧς, ἐστὶ δ' ὡς οὐ· τὸ γὰρ ὅλον καὶ τὰ πάντα οὐ μικρόν, ἀλλὰ σύγκειται ἐκ μικρῶν.

μίαν μὲν οὖν φυλακὴν ταύτην πρὸς τὴν ἀρχὴν δεῖ ποιεῖσθαι·

ἔπειτα μὴ πιστεύειν τοῖς σοφίσματος χάριν [1308a] πρὸς τὸ πλῆθος συγκειμένοις, ἐξελέγχεται γὰρ ὑπὸ τῶν ἔργων (ποῖα δὲ λέγομεν τῶν πολιτειῶν σοφίσματα, πρότερον εἴρηται). ἔτι δ' ὁρᾶν ὅτι ἔνιαι μένουσιν οὐ μόνον ἀριστοκραταὶ ἀλλὰ καὶ ὀλιγαρχαὶ οὐ διὰ τὸ ἀσφαλεῖς εἶναι τὰς πολιτείας, ἀλλὰ διὰ τὸ εὖ χρῆσθαι τοὺς ἐν ταῖς ἀρχαῖς γινομένους καὶ τοῖς ἔξω τῆς πολιτείας καὶ τοῖς ἐν τῷ πολιτεύματι, τοὺς μὲν μὴ μετέχοντας τῷ μὴ ἀδικεῖν καὶ τῷ τοὺς ἡγεμονικοὺς αὐτῶν εἰσάγειν εἰς τὴν πολιτείαν καὶ τοὺς μὲν φιλοτίμους μὴ ἀδικεῖν εἰς ἀτιμίαν τοὺς δὲ πολλοὺς εἰς κέρδος, πρὸς αὐτοὺς δὲ καὶ τοὺς μετέχοντας τῷ χρῆσθαι ἀλλήλοις δημοτικῶς. ὁ γὰρ ἐπὶ τοῦ πλήθους ζητοῦσιν οἱ δημοτικοί, τὸ ἴσον, τοῦτ' ἐπὶ τῶν ὁμοίων οὐ μόνον δίκαιον ἀλλὰ καὶ συμφέρον ἐστίν. διὸ ἐὰν πλείους ὦσιν ἐν τῷ πολιτεύματι, πολλὰ συμφέρει τῶν δημοτικῶν νομοθετημάτων, οἷον τὸ ἐξαμήνους τὰς ἀρχὰς εἶναι, ἵνα πάντες οἱ ὅμοιοι μετέχωσιν· ἔστι γὰρ ὥσπερ δῆμος ἤδη οἱ ὅμοιοι (διὸ καὶ ἐν τούτοις ἐγγίγνονται δημαγωγοὶ πολλάκις, ὥσπερ εἴρηται πρότερον), ἔπειθ' ἦττον εἰς δυναστείας ἐμπίπτουσιν αἱ ὀλιγαρχαὶ καὶ ἀριστοκραταὶ (οὐ γὰρ ὁμοίως ῥάδιον κακοურγῆσαι ὀλίγον χρόνον ἄρχοντας καὶ πολὺν, ἐπεὶ διὰ τοῦτο ἐν ταῖς ὀλιγαρχίαις καὶ δημοκραταῖς γίνονται τυραννίδες· ἡ γὰρ οἱ μέγιστοι ἐν ἑκατέρᾳ ἐπιτίθενται τυραννίδι, ἔνθα μὲν οἱ δημαγωγοὶ ἔνθα δ' οἱ δυνάσται, ἡ οἱ τὰς μεγίστας ἔχοντες ἀρχάς, ὅταν πολὺν χρόνον ἄρχωσιν).

σώζονται δ' αἱ πολιτεῖαι οὐ μόνον διὰ τὸ πόρρω εἶναι τῶν διαφθειρόντων, ἀλλ' ἐνίοτε καὶ διὰ τὸ ἐγγύς· φοβούμενοι γὰρ διὰ χειρῶν ἔχουσι μᾶλλον τὴν πολιτείαν. ὥστε δεῖ τοὺς τῆς πολιτείας φροντίζοντας φόβους παρασκευάζειν, ἵνα φυλάττωσι καὶ μὴ καταλύωσιν ὥσπερ νυκτερινὴν φυλακὴν τὴν τῆς πολιτείας τήρησιν, καὶ τὸ πόρρω ἐγγύς ποιεῖν. ἔτι τὰς τῶν γνωρίμων φιλονεικίας καὶ στάσεις καὶ διὰ τῶν νόμων πειρᾶσθαι δεῖ φυλάττειν, καὶ τοὺς ἔξω τῆς φιλονεικίας ὄντας πρὶν παρελθῆναι καὶ αὐτούς, ὡς τὸ ἐν ἀρχῇ γινόμενον κακὸν γνῶναι οὐ τοῦ τυχόντος ἀλλὰ πολιτικοῦ ἀνδρός. πρὸς δὲ τὴν διὰ τὰ τιμήματα γινομένην μεταβολὴν ἐξ ὀλιγαρχίας καὶ πολιτείας, ὅταν συμβαίνει τοῦτο μενόντων μὲν τῶν αὐτῶν τιμημάτων εὐπορίας δὲ νομίσματος γινομένης, συμφέρει τοῦ τιμήματος ἐπισκοπεῖν τοῦ κοινοῦ τὸ πλῆθος πρὸς τὸ παρελθόν, ἐν ὅσαις μὲν πόλεσι τιμῶνται κατ' ἐνιαυτόν, κατὰ τοῦτον τὸν χρόνον, [1308b] ἐν δὲ ταῖς μείζοσι διὰ τριετηρίδος ἢ πενταετηρίδος, κἂν ἡ

πολλαπλάσιον ἢ πολλοστημόριον τοῦ πρότερον, ἐν ᾧ αἱ τιμήσεις κατέστησαν τῆς πολιτείας, νόμον εἶναι καὶ τὰ τιμήματα ἐπιτείνειν ἢ ἀνιέναι, ἐὰν μὲν ὑπερβάλλῃ, ἐπιτείνοντας κατὰ τὴν πολλαπλασίωσιν, ἐὰν δ' ἐλλείπῃ, ἀνιέντας καὶ ἐλάττω ποιοῦντας τὴν τίμησιν. ἐν μὲν γὰρ ταῖς ὀλιγαρχίαις καὶ ταῖς πολιτείαις, μὴ ποιοῦντων [μὲν] οὕτως ἔνθα μὲν ὀλιγαρχίαν ἔνθα δὲ δυναστείαν γίνεσθαι συμβαίνει, ἐκείνως δὲ ἐκ μὲν πολιτείας δημοκρατίαν, ἐκ δ' ὀλιγαρχίας πολιτείαν ἢ δῆμον.

κοινὸν δὲ καὶ ἐν δῆμῳ καὶ ὀλιγαρχίᾳ καὶ ἐν μοναρχίᾳ καὶ πάσῃ πολιτείᾳ μήτ' αὐξάνειν λίαν μηθένα παρὰ τὴν συμμετρίαν, ἀλλὰ μᾶλλον πειρᾶσθαι μικρὰς καὶ πολυχρονίους διδόναι τιμὰς ἢ βραχὺ μεγάλας (διαφθείρονται γάρ, καὶ φέρειν οὐ παντὸς ἀνδρὸς εὐτυχίαν), εἰ δὲ μή, μή τοί γ' ἀθρόας δόντας ἀφαιρεῖσθαι πάλιν ἀθρόας, ἀλλ' ἐκ προσαγωγῆς· καὶ μάλιστα μὲν πειρᾶσθαι τοῖς νόμοις οὕτω ῥυθμίζειν ὥστε μηδένα ἐγγίγνεσθαι πολὺ ὑπερέχοντα δυνάμει μήτε φίλων μήτε χρημάτων, εἰ δὲ μή, ἀποδημητικὰς ποιεῖσθαι τὰς παραστάσεις αὐτῶν. ἐπεὶ δὲ καὶ διὰ τοὺς ἰδίους βίους νεωτερίζουσιν, δεῖ ἐμποιεῖν ἀρχὴν τινα τὴν ἐποψομένην τοὺς ζῶντας ἀσυμφόρως πρὸς τὴν πολιτείαν, ἐν μὲν δημοκρατίᾳ πρὸς τὴν δημοκρατίαν, ἐν δὲ ὀλιγαρχίᾳ πρὸς τὴν ὀλιγαρχίαν, ὁμοίως δὲ καὶ τῶν ἄλλων πολιτειῶν ἐκάστη· καὶ τὸ εὐημεροῦν δὲ τῆς πόλεως ἀνὰ μέρος φυλάττεσθαι διὰ τὰς αὐτὰς αἰτίας· τούτου δ' ἄκος τὸ αἰεὶ τοῖς ἀντικειμένοις μορίοις ἐγχειρίζειν τὰς πράξεις καὶ τὰς ἀρχάς (λέγω δ' ἀντικεῖσθαι τοὺς ἐπιεικεῖς τῷ πλήθει, καὶ τοὺς ἀπόρους τοῖς εὐπόροις), καὶ τὸ πειρᾶσθαι ἢ συμμιγνύναι τὸ τῶν ἀπόρων πλῆθος καὶ τὸ τῶν εὐπόρων ἢ τὸ μέσον αὐξάνειν (τοῦτο γὰρ διαλύει τὰς διὰ τὴν ἀνισότητα στάσεις). μέγιστον δὲ ἐν πάσῃ πολιτείᾳ τὸ καὶ τοῖς νόμοις καὶ τῇ ἄλλῃ οἰκονομίᾳ οὕτω τετάχθαι ὥστε μὴ εἶναι τὰς ἀρχὰς κερδαίνειν.

τοῦτο δὲ μάλιστα ἐν ταῖς ὀλιγαρχικαῖς δεῖ τηρεῖν. οὐ γὰρ οὕτως ἀγανακτοῦσιν εἰργόμενοι τοῦ ἄρχειν οἱ πολλοί, ἀλλὰ καὶ χαίρουσιν ἐὰν τις ἐξ αὐτῶν πρὸς τοῖς ἰδίοις σχολάζειν, ὥστ' ἐὰν οἶωνται τὰ κοινὰ κλέπτειν τοὺς ἄρχοντας, τότε γ' ἀμφοτέρω λυπεῖ, τό τε τῶν τιμῶν μὴ μετέχειν καὶ τὸ τῶν κερδῶν· μοναχῶς δὲ καὶ ἐνδέχεται ἅμα εἶναι δημοκρατίαν καὶ ἀριστοκρατίαν, εἰ τοῦτο κατασκευάσειέ τις. ἐνδέχοιτο γὰρ ἂν καὶ τοὺς [1309a] γνωρίμους καὶ τὸ πλῆθος ἔχειν ἂ βούλονται ἀμφοτέρους. τὸ μὲν γὰρ ἐξεῖναι πᾶσιν ἄρχειν δημοκρατικόν, τὸ δὲ τοὺς γνωρίμους εἶναι ἐν ταῖς ἀρχαῖς

ἀριστοκρατικόν, τοῦτο δ' ἔσται ὅταν μὴ ἦ κερδαίνειν ἀπὸ τῶν ἀρχῶν· οἱ γὰρ ἄποροι οὐ βουλήσονται ἄρχειν τῷ μηδὲν κερδαίνειν, ἀλλὰ πρὸς τοῖς ἰδίοις εἶναι μᾶλλον, οἱ δὲ εὐποροὶ δυνήσονται διὰ τὸ μηδενὸς προσδεῖσθαι τῶν κοινῶν· ὥστε συμβήσεται τοῖς μὲν ἀπόροις γίγνεσθαι εὐπόροις διὰ τὸ διατρίβειν πρὸς τοῖς ἔργοις, τοῖς δὲ γνωρίμοις μὴ ἄρχεσθαι ὑπὸ τῶν τυχόντων. τοῦ μὲν οὖν μὴ κλέπτεσθαι τὰ κοινὰ ἢ παράδοσις γιγνέσθω τῶν χρημάτων παρόντων πάντων τῶν πολιτῶν, καὶ ἀντίγραφα κατὰ φατρίας καὶ λόχους καὶ φυλάς τιθέσθωσαν· τοῦ δὲ ἀκερδῶς ἄρχειν τιμὰς εἶναι δεῖ νενομοθετημένας τοῖς εὐδοκιμοῦσιν. δεῖ δ' ἐν μὲν ταῖς δημοκρατίαις τῶν εὐπόρων φεῖδεσθαι, μὴ μόνον τῷ τὰς κτήσεις μὴ ποιεῖν ἀναδάστους, ἀλλὰ μηδὲ τοὺς καρπούς, ὃ ἐν ἐνίαις τῶν πολιτειῶν λανθάνει γιγνόμενον, βέλτιον δὲ καὶ βουλομένους κωλύειν λειτουργεῖν τὰς δαπανηράς μὲν μὴ χρησίμους δὲ λειτουργίας, οἷον χορηγίας καὶ λαμπαδαρχίας καὶ ὅσαι ἄλλαι τοιαῦται· ἐν δ' ὀλιγαρχία τῶν ἀπόρων ἐπιμέλειαν ποιεῖσθαι πολλήν, καὶ τὰς ἀρχὰς ἀφ' ὧν λήμματα «ἔστι» τούτοις ἀπονέμειν, κἂν τις ὑβρίσῃ τῶν εὐπόρων εἰς τούτους, μείζω τὰ ἐπιτίμια εἶναι ἢ ἂν σφῶν αὐτῶν, καὶ τὰς κληρονομίας μὴ κατὰ δόσιν εἶναι ἀλλὰ κατὰ γένος, μηδὲ πλειόνων ἢ μιᾶς τὸν αὐτὸν κληρονομεῖν. οὕτω γὰρ ἂν ὁμαλότεραι αἱ οὐσίαι εἶεν καὶ τῶν ἀπόρων εἰς εὐπορίαν ἂν καθίσταιντο πλείους. συμφέρει δὲ καὶ ἐν δημοκρατίᾳ καὶ ἐν ὀλιγαρχίᾳ τῶν ἄλλων ἢ ἰσότητα ἢ προεδρίαν νέμειν τοῖς ἥττον κοινωνοῦσι τῆς πολιτείας, ἐν μὲν δήμῳ τοῖς εὐπόροις, ἐν δ' ὀλιγαρχίᾳ τοῖς ἀπόροις, πλὴν ὅσαι ἀρχαὶ κύριαι τῆς πολιτείας, ταύτας δὲ τοῖς ἐκ τῆς πολιτείας ἐγχειρίζειν μόνοις ἢ πλείοσιν.

Τρία δέ τινα χρή ἔχειν τοὺς μέλλοντας ἄρξειν τὰς κυρίας ἀρχάς, πρῶτον μὲν φιλίαν πρὸς τὴν καθεστῶσαν πολιτείαν, ἔπειτα δύναμιν μεγίστην τῶν ἔργων τῆς ἀρχῆς, τρίτον δ' ἀρετὴν καὶ δικαιοσύνην ἐν ἐκάστη πολιτείᾳ τὴν πρὸς τὴν πολιτείαν (εἰ γὰρ μὴ ταῦτόν τὸ δίκαιον κατὰ πάσας τὰς πολιτείας, ἀνάγκη καὶ τῆς δικαιοσύνης εἶναι διαφοράς). ἔχει δ' ἀπορίαν, ὅταν μὴ συμβαίῃ ταῦτα πάντα περὶ τὸν αὐτόν, πῶς χρή ποιεῖσθαι τὴν αἵρεσιν· [1309b] οἷον εἰ στρατηγικὸς μὲν τις εἴη, πονηρὸς δὲ καὶ μὴ τῇ πολιτείᾳ φίλος, ὁ δὲ δίκαιος καὶ φίλος, πῶς δεῖ ποιεῖσθαι τὴν αἵρεσιν; ἔοικε δὲ δεῖν βλέπειν εἰς δύο, τίνος πλεῖον μετέχουσι πάντες καὶ τίνος ἔλαττον· διὸ ἐν στρατηγίᾳ μὲν εἰς τὴν ἐμπειρίαν μᾶλλον τῆς ἀρετῆς (ἔλαττον γὰρ

στρατηγίας μετέχουσι, τῆς δ' ἐπιεικείας πλεῖον), ἐν δὲ φυλακῇ καὶ ταμείᾳ τάναντία (πλείονος γὰρ ἀρετῆς δεῖται ἢ ὅσιν οἱ πολλοὶ ἔχουσιν, ἢ δὲ ἐπιστήμη κοινὴ πᾶσιν).

ἀπορήσειε δ' ἂν τις, ἂν δύναιμι ὑπάρχει καὶ τῇ πολιτείᾳ φιλία, τί δεῖ τῆς ἀρετῆς; ποιήσει γὰρ τὰ συμφέροντα καὶ τὰ δύο. ἢ ὅτι ἐνδέχεται τοὺς τὰ δύο ταῦτα ἔχοντας ἀκρατεῖς εἶναι, ὥστε καθάπερ καὶ αὐτοῖς οὐχ ὑπηρετοῦσιν εἰδότες καὶ φιλοῦντες αὐτούς, οὕτω καὶ πρὸς τὸ κοινὸν οὐθὲν κωλύει ἔχειν ἐνίους; ἀπλῶς δέ, ὅσα ἐν τοῖς νόμοις ὡς συμφέροντα λέγομεν ταῖς πολιτείαις, ἅπαντα ταῦτα σφῶζει τὰς πολιτείας, καὶ τὸ πολλάκις εἰρημένον μέγιστον στοιχεῖον, τὸ τηρεῖν ὅπως κρεῖττον ἔσται τὸ βουλούμενον τὴν πολιτείαν πλήθος τοῦ μὴ βουλομένου. παρὰ πάντα δὲ ταῦτα δεῖ μὴ λανθάνειν, ὃ νῦν λανθάνει τὰς παρεκβεβηκυίας πολιτείας, τὸ μέσον· πολλὰ γὰρ τῶν δοκούντων δημοτικῶν λύει τὰς δημοκρατίας καὶ τῶν ὀλιγαρχικῶν τὰς ὀλιγαρχίας. οἱ δ' οἰόμενοι ταύτην εἶναι μίαν ἀρετὴν ἔλκουσιν εἰς τὴν ὑπερβολήν, ἀγνοοῦντες ὅτι, καθάπερ ρῖς ἔστι παρεκβεβηκυῖα μὲν τὴν εὐθύτητα τὴν καλλίστην πρὸς τὸ γρυπὸν ἢ τὸ σιμόν, ἀλλ' ὅμως ἔτι καλὴ καὶ χάριν ἔχουσα πρὸς τὴν ὄψιν, οὐ μὴν ἀλλ' ἐὰν ἐπιτείνῃ τις ἔτι μᾶλλον εἰς τὴν ὑπερβολήν, πρῶτον μὲν ἀποβαλεῖ τὴν μετριότητα τοῦ μορίου, τέλος δ' οὕτως ὥστε μηδὲ ρῖνα ποιήσει φαίνεσθαι διὰ τὴν ὑπεροχὴν καὶ τὴν ἔλλειψιν τῶν ἐναντίων, τὸν αὐτὸν δὲ τρόπον ἔχει καὶ περὶ τῶν ἄλλων μορίων, συμβαίνει δὴ τοῦτο καὶ περὶ τὰς [ἄλλας] πολιτείας. καὶ γὰρ ὀλιγαρχίαν καὶ δημοκρατίαν ἔστιν ὥστ' ἔχειν ἱκανῶς, καίπερ ἐξεστηκυίας τῆς βελτίστης τάξεως· ἐὰν δέ τις ἐπιτείνῃ μᾶλλον ἐκατέραν αὐτῶν, πρῶτον μὲν χεῖρω ποιήσει τὴν πολιτείαν, τέλος δ' οὐδὲ πολιτείαν. διὸ δεῖ τοῦτο μὴ ἀγνοεῖν τὸν νομοθέτην καὶ τὸν πολιτικόν, ποῖα σφῶζει τῶν δημοτικῶν καὶ ποῖα φθείρει τὴν δημοκρατίαν, καὶ ποῖα τῶν ὀλιγαρχικῶν τὴν ὀλιγαρχίαν. οὐδετέραν μὲν γὰρ ἐνδέχεται αὐτῶν εἶναι καὶ διαμένειν ἄνευ τῶν εὐπόρων καὶ τοῦ πλήθους, ἀλλ' ὅταν ὁμαλότης γένηται τῆς οὐσίας ἄλλην ἀνάγκη εἶναι ταύτην τὴν πολιτείαν, [1310a] ὥστε φθείροντες τοῖς καθ' ὑπεροχὴν νόμοις φθεύρουσι τὰς πολιτείας.

ἁμαρτάνουσι δὲ καὶ ἐν ταῖς δημοκρατίαις καὶ ἐν ταῖς ὀλιγαρχίαις, ἐν μὲν ταῖς δημοκρατίαις οἱ δημαγωγοί, ὅπου τὸ πλήθος κύριον τῶν νόμων (δύο γὰρ ποιοῦσιν αἰεὶ τὴν πόλιν, μαχόμενοι τοῖς εὐπόροις, δεῖ δὲ τοῦναντίον αἰεὶ δοκεῖν λέγειν ὑπὲρ τῶν εὐπόρων), ἐν

δὲ ταῖς ὀλιγαρχίαις ὑπὲρ τοῦ δήμου τοὺς ὀλιγαρχικούς, καὶ τοὺς ὄρκους ἐναντίους ἢ νῦν ὁμνῦναι τοὺς ὀλιγαρχικούς· νῦν μὲν γὰρ ἐν ἐνίαις ὁμνύουσι “καὶ τῷ δήμῳ κακόνους ἔσομαι καὶ βουλευσῶ ὃ τι ἂν ἔχω κακόν”, χρῆ δὲ καὶ ὑπολαμβάνειν καὶ ὑποκρίνεσθαι τοὺναντίον, ἐπισημαινομένους ἐν τοῖς ὄρκοις ὅτι “οὐκ ἀδικήσω τὸν δῆμον”.

μέγιστον δὲ πάντων τῶν εἰρημένων πρὸς τὸ διαμένειν τὰς πολιτείας, οὗ νῦν ὀλιγοροῦσι πάντες, τὸ παιδεύεσθαι πρὸς τὰς πολιτείας. ὄφελος γὰρ οὐθὲν τῶν ὠφελιμωτάτων νόμων καὶ συνδεδοξασμένων ὑπὸ πάντων τῶν πολιτευομένων, εἰ μὴ ἔσονται εἰθισμένοι καὶ πεπαιδευμένοι ἐν τῇ πολιτείᾳ, εἰ μὲν οἱ νόμοι δημοτικοί, δημοτικῶς, εἰ δ’ ὀλιγαρχικοί, ὀλιγαρχικῶς. εἴπερ γὰρ ἔστιν ἐφ’ ἐνὸς ἀκρασία, ἔστι καὶ ἐπὶ πόλεως, ἔστι δὲ τὸ πεπαιδεῦσθαι πρὸς τὴν πολιτείαν οὐ τοῦτο, τὸ ποιεῖν οἷς χαίρουσιν οἱ ὀλιγαρχοῦντες ἢ οἱ δημοκρατίαν βουλόμενοι, ἀλλ’ οἷς δυνήσονται οἱ μὲν ὀλιγαρχεῖν οἱ δὲ δημοκρατεῖσθαι. νῦν δ’ ἐν μὲν ταῖς ὀλιγαρχίαις οἱ τῶν ἀρχόντων υἱοὶ τρυφῶσιν, οἱ δὲ τῶν ἀπόρων γίνονται γεγυμνασμένοι καὶ πεπονηκότες, ὥστε καὶ βούλονται μᾶλλον καὶ δύνανται νεωτερίζειν· ἐν δὲ ταῖς δημοκρατίαις ταῖς μάλιστα εἶναι δοκούσαις δημοκρατικαῖς τοὺναντίον τοῦ συμφέροντος καθέστηκεν, αἴτιον δὲ τούτου ὅτι κακῶς ὀρίζονται τὸ ἐλεύθερον. δύο γὰρ ἐστὶν οἷς ἡ δημοκρατία δοκεῖ ὠρίσθαι, τῷ τὸ πλεῖον εἶναι κύριον καὶ τῇ ἐλευθερίᾳ· τὸ μὲν γὰρ ἴσον δίκαιον δοκεῖ εἶναι, ἴσον δ’ ὃ τι ἂν δόξη τῷ πλήθει, τοῦτ’ εἶναι κύριον, ἐλεύθερον δὲ [καὶ ἴσον] τὸ ὃ τι ἂν βούληται τις ποιεῖν· ὥστε ζῆ ἐν ταῖς τοιαύταις δημοκρατίαις ἕκαστος ὥς βούλεται, καὶ εἰς ὃ χρήζων, ὥς φησὶν Εὐριπίδης· τοῦτο δ’ ἐστὶ φαῦλον· οὐ γὰρ δεῖ οἶεσθαι δουλείαν εἶναι τὸ ζῆν πρὸς τὴν πολιτείαν, ἀλλὰ σωτηρίαν. ἐξ ὧν μὲν οὖν αἱ πολιτεῖαι μεταβάλλουσι καὶ φθείρονται, καὶ διὰ τίνων σφύζονται καὶ διαμένουσιν, ὥς ἀπλῶς εἰπεῖν τοσαῦτά ἐστιν.

Λέιπεται δ’ ἐπελθεῖν καὶ περὶ μοναρχίας, ἐξ ὧν τε φθίρεται καὶ δι’ ὧν σφύζεσθαι πέφυκεν. σχεδὸν δὲ παραπλήσια [1310b] τοῖς εἰρημένοις περὶ τὰς πολιτείας ἐστὶ καὶ τὰ συμβαίνοντα περὶ τὰς βασιλείας καὶ τὰς τυραννίδας. ἡ μὲν γὰρ βασιλεία κατὰ τὴν ἀριστοκρατίαν ἐστίν, ἡ δὲ τυραννὶς ἐξ ὀλιγαρχίας τῆς ὑστάτης σύγκειται καὶ δημοκρατίας· διὸ δὴ καὶ βλαβερωτάτῃ τοῖς ἀρχομένοις ἐστίν, ἅτε ἐκ δυοῖν συγκεκριμένη κακῶν καὶ τὰς παρεκβάσεις καὶ τὰς

ἀμαρτίας ἔχουσα τὰς παρ' ἀμφοτέρων τῶν πολιτειῶν. ὑπάρχει δ' ἡ γένεσις εὐθὺς ἐξ ἐναντίων ἑκατέρα τῶν μοναρχιῶν· ἡ μὲν γὰρ βασιλεία πρὸς βοήθειαν τὴν ἐπὶ τὸν δῆμον τοῖς ἐπιεικέσι γέγονεν, καὶ καθίσταται βασιλεὺς ἐκ τῶν ἐπιεικῶν καθ' ὑπεροχὴν ἀρετῆς ἢ πράξεων τῶν ἀπὸ τῆς ἀρετῆς, ἢ καθ' ὑπεροχὴν τοιούτου γένους, ὁ δὲ τύραννος ἐκ τοῦ δήμου καὶ τοῦ πλήθους ἐπὶ τοὺς γνωρίμους, ὅπως ὁ δῆμος ἀδικῆται μὴδὲν ὑπ' αὐτῶν. φανερόν δ' ἐκ τῶν συμβεβηκότων. σχεδὸν γὰρ οἱ πλεῖστοι τῶν τυράννων γεγόνασιν ἐκ δημαγωγῶν ὥς εἰπεῖν, πιστευθέντες ἐκ τοῦ διαβάλλειν τοὺς γνωρίμους. αἱ μὲν γὰρ τοῦτον τὸν τρόπον κατέστησαν τῶν τυραννίδων, ἥδη τῶν πόλεων ηὑξημένων, αἱ δὲ πρὸ τούτων ἐκ τῶν βασιλέων παρεκβαινόντων τὰ πάτρια καὶ δεσποτικωτέρας ἀρχῆς ὀρεγομένων, αἱ δὲ ἐκ τῶν αἰρετῶν ἐπὶ τὰς κυρίας ἀρχάς (τὸ γὰρ ἀρχαῖον οἱ δῆμοι καθίστασαν πολυχρονίους τὰς δημιουργίας καὶ τὰς θεωρίας), αἱ δ' ἐκ τῶν ὀλιγαρχιῶν, αἰρουμένων ἓνα τινὰ κύριον ἐπὶ τὰς μεγίστας ἀρχάς. πᾶσι γὰρ ὑπῆρχε τοῖς τρόποις τούτοις τὸ κατεργάζεσθαι ῥαδίως, εἰ μόνον βουλευθεῖεν, διὰ τὸ δύναμιν προϋπάρχειν τοῖς μὲν βασιλικῆς ἀρχῆς τοῖς δὲ τὴν τῆς τιμῆς· οἷον Φεῖδων μὲν περὶ Ἄργος καὶ ἕτεροι τύραννοι κατέστησαν βασιλείας ὑπαρχούσης, οἱ δὲ περὶ τὴν Ἰωνίαν καὶ Φάλαρις ἐκ τῶν τιμῶν, Παναίτιος δ' ἐν Λεοντίνοις καὶ Κύψελος ἐν Κορίνθῳ καὶ Πεισίστρατος Ἀθήνησι καὶ Διονύσιος ἐν Συρακούσαις καὶ ἕτεροι τὸν αὐτὸν τρόπον ἐκ δημαγωγίας. καθάπερ οὖν εἵπομεν, ἡ βασιλεία τέτακται κατὰ τὴν ἀριστοκρατίαν. κατ' ἀξίαν γὰρ ἐστίν, ἢ κατ' ἰδίαν ἀρετὴν ἢ κατὰ γένος, ἢ κατ' εὐεργεσίας, ἢ κατὰ ταῦτά τε καὶ δύναμιν. ἅπαντες γὰρ εὐεργετήσαντες ἢ δυνάμενοι τὰς πόλεις ἢ τὰ ἔθνη εὐεργετεῖν ἐτύγγανον τῆς τιμῆς ταύτης, οἱ μὲν κατὰ πόλεμον κωλύσαντες δουλεύειν, ὥσπερ Κόδρος, οἱ δ' ἐλευθερώσαντες, ὥσπερ Κῦρος, ἢ κτίσαντες ἢ κτησάμενοι χώραν, ὥσπερ οἱ Λακεδαιμονίων βασιλεῖς καὶ Μακεδόνων καὶ Μολοττῶν. βούλεται δ' ὁ βασιλεὺς εἶναι φύλαξ, ὅπως οἱ [1311a] μὲν κεκτημένοι τὰς οὐσίας μὴθὲν ἄδικον πάσχωσιν, ὁ δὲ δῆμος μὴ ὑβρίζηται μὴθὲν· ἡ δὲ τυραννὶς, ὥσπερ εἴρηται πολλάκις, πρὸς οὐδὲν ἀποβλέπει κοινόν, εἰ μὴ τῆς ἰδίας ὠφελείας χάριν. ἔστι δὲ σκοπὸς τυραννικὸς μὲν τὸ ἡδύ, βασιλικὸς δὲ τὸ καλόν. διὸ καὶ τῶν πλεονεκτημάτων τὰ μὲν χρημάτων τυραννικά, τὰ δ' εἰς τιμὴν βασιλικά μᾶλλον· καὶ φυλακὴ βασιλικὴ μὲν πολιτικὴ, τυραννικὴ δὲ διὰ ξένων.

ὅτι δ' ἡ τυραννὶς ἔχει κακὰ καὶ τὰ τῆς δημοκρατίας καὶ τὰ τῆς ὀλιγαρχίας, φανερόν· ἐκ μὲν ὀλιγαρχίας τὸ τὸ τέλος εἶναι πλοῦτον (οὕτω γὰρ καὶ διαμένειν ἀναγκαῖον μόνως τήν τε φυλακὴν καὶ τὴν τρυφὴν), καὶ τὸ τῷ πλήθει μὴδὲν πιστεύειν (διὸ καὶ τὴν παραίρεσιν ποιοῦνται τῶν ὅπλων), καὶ τὸ κακοῦν τὸν ὄχλον καὶ τὸ ἐκ τοῦ ἄστεως ἀπελαύνειν καὶ διοικίζειν ἀμφοτέρων κοινόν, καὶ τῆς ὀλιγαρχίας καὶ τῆς τυραννίδος· ἐκ δημοκρατίας δὲ τὸ πολεμεῖν τοῖς γνωρίμοις καὶ διαφθείρειν λάθρα καὶ φανερώς καὶ φυγαδεύειν ὡς ἀντιτέχνους καὶ πρὸς τὴν ἀρχὴν ἐμποδίου. ἐκ γὰρ τούτων συμβαίνει γίνεσθαι καὶ τὰς ἐπιβουλὰς, τῶν μὲν ἄρχειν αὐτῶν βουλομένων, τῶν δὲ μὴ δουλεύειν. ὅθεν καὶ τὸ Περιάνδρου πρὸς Θρασύβουλον συμβούλευμά ἐστιν, ἡ τῶν ὑπερέχοντων σταχύων κόλουσις, ὡς δέον αἰεὶ τοὺς ὑπερέχοντας τῶν πολιτῶν ἀναιρεῖν. καθάπερ οὖν σχεδὸν ἐλέχθη, τὰς αὐτὰς ἀρχὰς δεῖ νομίζειν περὶ τε τὰς πολιτείας εἶναι τῶν μεταβολῶν καὶ περὶ τὰς μοναρχίας· διὰ τε γὰρ ἀδικίαν καὶ διὰ φόβον καὶ διὰ καταφρόνησιν ἐπιτίθενται πολλοὶ τῶν ἀρχομένων ταῖς μοναρχίαις (τῆς δὲ ἀδικίας μάλιστα δι' ὕβριν), ἐνίστε δὲ καὶ διὰ τὴν τῶν ιδίων στέρησιν.

ἔστι δὲ καὶ τὰ τέλη ταῦτά, καθάπερ κάκεϊ, καὶ περὶ τὰς τυραννίδας καὶ τὰς βασιλείας· μέγεθος γὰρ ὑπάρχει πλούτου καὶ τιμῆς τοῖς μονάρχοις, ὧν ἐφίενται πάντες. τῶν δ' ἐπιθέσεων αἱ μὲν ἐπὶ τὸ σῶμα γίνονται τῶν ἀρχόντων, αἱ δ' ἐπὶ τὴν ἀρχήν. αἱ μὲν οὖν δι' ὕβριν ἐπὶ τὸ σῶμα. τῆς δ' ὕβρεως οὐσης πολυμεροῦς, ἕκαστον αὐτῶν αἴτιον γίγνεται τῆς ὀργῆς· τῶν δ' ὀργιζομένων σχεδὸν οἱ πλεῖστοι τιμωρίας χάριν ἐπιτίθενται, ἀλλ' οὐχ ὑπεροχῆς. οἷον ἡ μὲν τῶν Πεισιστρατιδῶν διὰ τὸ προπηλακίσει μὲν τὴν Ἀρμοδίου ἀδελφὴν ἐπηρεάσαι δ' Ἀρμόδιον (ὁ μὲν γὰρ Ἀρμόδιος διὰ τὴν ἀδελφὴν, ὁ δὲ Ἀριστογείτων διὰ τὸν Ἀρμόδιον), ἐπεβούλευσαν δὲ καὶ Περιάνδρῳ τῷ ἐν Ἀμβρακίᾳ τυράννῳ διὰ τὸ συμπίνοντα μετὰ [1311b] τῶν παιδικῶν ἐρωτῆσαι αὐτὸν εἰ ἤδη ἐξ αὐτοῦ κύει· ἡ δὲ Φιλίππου ὑπὸ Πausανίου διὰ τὸ ἐᾶσαι ὑβρισθῆναι αὐτὸν ὑπὸ τῶν περὶ Ἄτταλον, καὶ ἡ Ἀμύντου τοῦ μικροῦ ὑπὸ Δέρδα διὰ τὸ καυχῆσασθαι εἰς τὴν ἡλικίαν αὐτοῦ, καὶ ἡ τοῦ εὐνούχου Εὐαγόρα τῷ Κυπρίῳ· διὰ γὰρ τὴν γυναῖκα παρελέσθαι τὸν υἱὸν αὐτοῦ ἀπέκτεινεν ὡς ὑβρισμένος. πολλαὶ δ' ἐπιθέσεις γεγέννηται καὶ διὰ τὸ εἰς τὸ σῶμα αἰσχῦναι τῶν μονάρχων τινάς. οἷον καὶ ἡ Κραταίου εἰς Ἀρχέλαον· αἰεὶ γὰρ βαρέως εἶχε πρὸς τὴν ὁμιλίαν, ὥστε ἱκανὴ καὶ

ἐλάττων ἄν) ἐγένετο πρόφασις - ἥ διότι τῶν θυγατέρων οὐδεμίαν ἔδωκεν ὁμολογήσας αὐτῷ, ἀλλὰ τὴν μὲν προτέραν, κατεχόμενος ὑπὸ πολέμου πρὸς Σίρραν καὶ Ἀρράβαιον, ἔδωκε τῷ βασιλεῖ τῷ τῆς Ἑλιμείας, τὴν δὲ νεωτέραν τῷ υἱεῖ Ἀμύντᾳ, οἰόμενος οὕτως ἂν ἐκεῖνον ἥκιστα διαφέρεσθαι καὶ τὸν ἐκ τῆς Κλεοπάτρας· ἀλλὰ τῆς γε ἀλλοτριότητος ὑπῆρχεν ἀρχὴ τὸ βαρέως φέρειν πρὸς τὴν ἀφροδισιαστικὴν χάριν. συνεπέθετο δὲ καὶ Ἑλλανοκράτης ὁ Λαρισαῖος διὰ τὴν αὐτὴν αἰτίαν· ὥς γὰρ χρώμενος αὐτοῦ τῇ ἡλικίᾳ οὐ κατῆγεν ὑποσχόμενος, δι' ὕβριν καὶ οὐ δι' ἐρωτικὴν ἐπιθυμίαν ᾤετο εἶναι τὴν γεγεννημένην ὁμιλίαν. Πύθων δὲ καὶ Ἡρακλείδης οἱ Αἰνιοὶ Κότυν διέφθειραν τῷ πατρὶ τιμωροῦντες, Ἀδάμας δ' ἀπέστη Κότυος διὰ τὸ ἐκτμηθῆναι παῖς ὢν ὑπ' αὐτοῦ, ὥς ὕβρισμένος.

πολλοὶ δὲ καὶ διὰ τὸ εἰς τὸ σῶμα αἰκισθῆναι πληγαῖς ὀργισθέντες οἱ μὲν διέφθειραν, οἱ δ' ἐνεχείρισαν ὥς ὕβρισθέντες, καὶ τῶν περὶ τὰς ἀρχὰς καὶ βασιλικὰς δυναστείας. οἷον ἐν Μυτιλήνῃ τοὺς Πενθιλίδας Μεγακλῆς περιόντας καὶ τύποντας ταῖς κορύναις ἐπιθέμενος μετὰ τῶν φίλων ἀνεῖλεν, καὶ ὕστερον Σμέρδης Πενθίλον πληγὰς λαβὼν καὶ παρὰ τῆς γυναικὸς ἐξελκυσθεὶς διέφθειρεν. καὶ τῆς Ἀρχελαοῦ δ' ἐπιθέσεως Δεκάμνιχος ἡγεμὼν ἐγένετο, παροξύνων τοὺς ἐπιθεμένους πρῶτος· αἴτιον δὲ τῆς ὀργῆς ὅτι αὐτὸν ἐξέδωκε μαστιγῶσαι Εὐριπίδῃ τῷ ποιητῇ· ὁ δ' Εὐριπίδης ἐχαλέπαιεν εἰπόντος τι αὐτοῦ εἰς δυσωδίαν τοῦ στόματος. καὶ ἄλλοι δὲ πολλοὶ διὰ τοιαύτας αἰτίας οἱ μὲν ἀνηρέθησαν οἱ δ' ἐπεβουλευθήσαν. ὁμοίως δὲ καὶ διὰ φόβον· ἐν γὰρ τι τοῦτο τῶν αἰτίων ἦν, ὥσπερ καὶ περὶ τὰς πολιτείας καὶ τὰς μοναρχίας· οἷον Ξέρξην Ἀρταπάνης φοβούμενος τὴν διαβολὴν τὴν περὶ Δαρεῖον, ὅτι ἐκρέμασεν οὐ κελεύσαντος Ξέρξου, ἀλλ' οἰόμενος συγγνώσεσθαι ὥς ἀμνημονοῦντα διὰ τὸ δειπνεῖν. αἱ δὲ διὰ [1312a] καταφρόνησιν, ὥσπερ Σαρδανάπαλλον ἰδὼν τις ξαίνοντα μετὰ τῶν γυναικῶν (εἰ ἀληθὴ ταῦτα οἱ μυθολογοῦντες λέγουσιν· εἰ δὲ μὴ ἐπ' ἐκεῖνου, ἀλλ' ἐπ' ἄλλου γε ἂν γένοιτο τοῦτο ἀληθές), καὶ Διονυσίῳ τῷ ὑστέρῳ Δίων ἐπέθετο διὰ τὸ καταφρονεῖν, ὁρῶν τούς τε πολίτας οὕτως ἔχοντας καὶ αὐτὸν ἀεὶ μεθύοντα. καὶ τῶν φίλων δὲ τινες ἐπιτίθενται διὰ καταφρόνησιν· διὰ γὰρ τὸ πιστεύεσθαι καταφρονοῦσιν ὥς λήσοντες. καὶ οἱ οἰόμενοι δύνασθαι κατασχεῖν τὴν ἀρχὴν τρόπον τινὰ διὰ τὸ καταφρονεῖν ἐπιτίθενται· ὥς δυνάμενοι γὰρ καὶ καταφρονοῦντες τοῦ κινδύνου διὰ τὴν δύναμιν ἐπιχειροῦσι ῥαδίως,

ὥσπερ οἱ στρατηγοῦντες τοῖς μονάρχοις, οἷον Κῦρος Ἀστυάγει καὶ τοῦ βίου καταφρονῶν καὶ τῆς δυνάμεως διὰ τὸ τὴν μὲν δύναμιν ἐξηργηκέναι αὐτὸν δὲ τρυφᾶν, καὶ Σεύθης ὁ Θρᾷξ Ἀμαδόκῳ στρατηγὸς ὤν. οἱ δὲ καὶ διὰ πλείω τούτων ἐπιτίθενται, οἷον καὶ καταφρονοῦντες καὶ διὰ κέρδος, ὥσπερ Ἀριοβαρζάνη Μιθριδάτης (μάλιστα δὲ διὰ ταύτην τὴν αἰτίαν ἐγχειροῦσιν οἱ τὴν φύσιν μὲν θρασεῖς, τιμὴν δ' ἔχοντες πολεμικὴν παρὰ τοῖς μονάρχοις· ἀνδρεία γὰρ δύναμιν ἔχουσα θράσος ἐστίν), δι' ἅς ἀμφοτέρας, ὡς ῥαδίως κρατήσοντες, ποιοῦνται τὰς ἐπιθέσεις.

τῶν δὲ διὰ φιλοτιμίαν ἐπιτιθεμένων ἕτερος τρόπος ἔστι τῆς αἰτίας παρὰ τοὺς εἰρημένους πρότερον. οὐ γὰρ ὥσπερ ἔνιοι τοῖς τυράννοις ἐπιχειροῦσιν ὀρῶντες κέρδη τε μεγάλα καὶ τιμὰς μεγάλας οὐσας αὐτοῖς, οὕτω καὶ τῶν διὰ φιλοτιμίαν ἐπιτιθεμένων ἕκαστος προαιρεῖται κινδυνεύειν· ἀλλ' ἐκεῖνοι μὲν διὰ τὴν εἰρημένην αἰτίαν, οὗτοι δ' ὥσπερ κἂν ἄλλης τινὸς γενομένης πράξεως περιττῆς καὶ δι' ἣν ὀνομαστοὶ γίνονται καὶ γνώριμοι τοῖς ἄλλοις, οὕτω καὶ τοῖς μονάρχοις ἐγχειροῦσιν, οὐ κτήσασθαι βουλόμενοι μοναρχίαν ἀλλὰ δόξαν. οὐ μὴν ἀλλ' ἐλάχιστοί γε τὸν ἀριθμὸν εἰσιν οἱ διὰ ταύτην τὴν αἰτίαν ὀρμῶντες· ὑποκεῖσθαι γὰρ δεῖ τὸ τοῦ σωθῆναι μηδὲν φροντίζειν, ἂν μὴ μέλλῃ κατασχῆσιν τὴν πρᾶξιν. οἷς ἀκολουθεῖν μὲν δεῖ τὴν Δίωκος ὑπόληψιν, οὐ ῥάδιον δ' αὐτὴν ἐγγενέσθαι πολλοῖς· ἐκεῖνος γὰρ μετ' ὀλίγων ἐστράτευσεν ἐπὶ Διονύσιον οὕτως ἔχειν φάσκων ὡς, ὅποι περ ἂν δύνηται προελθεῖν, ἱκανὸν αὐτῷ τοσοῦτον μετασχεῖν τῆς πράξεως, οἷον εἰ μικρὸν ἐπιβάντα τῆς γῆς εὐθὺς συμβαίῃ τελευτῆσαι, τοῦτον καλῶς ἔχειν αὐτῷ τὸν θάνατον.

φθείρεται δὲ τυραννὶς ἓνα μὲν τρόπον, ὥσπερ καὶ τῶν ἄλλων ἐκάστη πολιτειῶν, ἔξωθεν, [1312b] ἐὰν ἐναντία τις ᾗ πολιτεία κρείττων (τὸ μὲν γὰρ βούλεσθαι δῆλον ὡς ὑπάρξει διὰ τὴν ἐναντιότητα τῆς προαιρέσεως· ἃ δὲ βούλονται, δυνάμενοι πράττουσι πάντες), ἐναντία δ' αἱ πολιτεῖαι, δῆμος μὲν τυραννίδι καθ' Ἡσίοδον ὡς κεραμεὺς κεραμεῖ (καὶ γὰρ ἡ δημοκρατία ἡ τελευταία τυραννὶς ἐστίν), βασιλεία δὲ καὶ ἀριστοκρατία διὰ τὴν ἐναντιότητα τῆς πολιτείας (διὸ Λακεδαιμόνιοι πλείστας κατέλυσαν τυραννίδας καὶ Συρακούσιοι κατὰ τὸν χρόνον ὃν ἐπολιτεύοντο καλῶς)· ἓνα δ' ἐξ αὐτῆς, ὅταν οἱ μετέχοντες στασιάζωσιν, ὥσπερ ἡ τῶν περὶ Γέλωνα καὶ νῦν ἡ τῶν περὶ Διονύσιον, ἡ μὲν Γέλωνος Θρασυβούλου τοῦ Ἰέρωνος ἀδελφοῦ τὸν υἱὸν τοῦ Γέλωνος δημαγωγοῦντος καὶ πρὸς

ἡδονὰς ὁρμῶντος, ἵν' αὐτὸς ἄρχῃ, τῶν δὲ οἰκείων συστάντων, ἵνα μὴ τυραννὶς ὅλως καταλυθῇ ἀλλὰ Θρασύβουλος - οἱ δὲ συστάντες αὐτῶν, ὡς καιρὸν ἔχοντες, ἐξέβαλον ἅπαντας αὐτούς· Διονύσιον δὲ Δίων στρατεύσας, κηδεστὴς ὢν καὶ προσλαβὼν τὸν δῆμον, ἐκείνον ἐκβαλὼν διεφθάρη. δύο δὲ οὐσῶν αἰτιῶν δι' ἃς μάλιστ' ἐπιτίθενται ταῖς τυραννίσιν, μίσους καὶ καταφρονήσεως, θάτερον μὲν αἰεὶ τούτων ὑπάρχει τοῖς τυράννοις, τὸ μῖσος, ἐκ δὲ τοῦ καταφρονεῖσθαι πολλαὶ γίνονται τῶν καταλύσεων. σημεῖον δέ· τῶν μὲν γὰρ κτησαμένων οἱ πλεῖστοι καὶ διεφύλαξαν τὰς ἀρχάς, οἱ δὲ παραλαβόντες εὐθύς ὡς εἰπεῖν ἀπολλύασιν πάντες. ἀπολαυστικῶς γὰρ ζῶντες εὐκαταφρόνητοί τε γίνονται καὶ πολλοὺς καιροὺς παραδιδόασιν τοῖς ἐπιτιθεμένοις. μόνον δέ τι τοῦ μίσους καὶ τὴν ὀργὴν δεῖ τιθέναι· τρόπον γάρ τινα τῶν αὐτῶν αἰτία γίνεται πράξεων. πολλάκις δὲ καὶ πρακτικώτερον τοῦ μίσους· συντονώτερον γὰρ ἐπιτίθενται διὰ τὸ μὴ χρῆσθαι λογισμῷ τὸ πάθος (μάλιστα δὲ συμβαίνει τοῖς θυμοῖς ἀκολουθεῖν διὰ τὴν ὕβριν, δι' ἣν αἰτίαν ἢ τε τῶν Πεισιστρατιδῶν κατελύθη τυραννὶς καὶ πολλὰ τῶν ἄλλων), ἀλλὰ μᾶλλον τὸ μῖσος· ἡ μὲν γὰρ ὀργὴ μετὰ λύπης πάρεστιν, ὥστε οὐ ῥάδιον λογίζεσθαι, ἡ δ' ἔχθρα ἄνευ λύπης.

ὥς δὲ ἐν κεφαλαίοις εἰπεῖν, ὅσας αἰτίας εἰρήκαμεν τῆς τε ὀλιγαρχίας τῆς ἀκράτου καὶ τελευταίας καὶ τῆς δημοκρατίας τῆς ἐσχάτης, τοσαύτας καὶ τῆς τυραννίδος θετέον· καὶ γὰρ αὗται τυγχάνουσιν οὔσαι διαιρεταὶ τυραννίδες. βασιλεία δ' ὑπὸ μὲν τῶν ἔξωθεν ἥκιστα φθείρεται, διὸ καὶ πολυχρόνιος ἐστίν· ἐξ αὐτῆς δ' αἱ πλεῖσται φθοραὶ συμβαίνουσιν. φθείρεται δὲ κατὰ δύο τρόπους, ἓνα μὲν [1313a] στασιασάντων τῶν μετεχόντων τῆς βασιλείας, ἄλλον δὲ τρόπον τυραννικώτερον πειρωμένων διοικεῖν, ὅταν εἶναι κύριοι πλειόνων ἀξιῶσι καὶ παρὰ τὸν νόμον. οὐ γίνονται δ' ἔτι βασιλεῖαι νῦν, ἀλλ' ἂν περ γίνωνται, μοναρχαὶ καὶ τυραννίδες μᾶλλον, διὰ τὸ τὴν βασιλείαν ἐκούσιον μὲν ἀρχὴν εἶναι, μειζόνων δὲ κυρίαν, πολλοὺς δ' εἶναι τοὺς ὁμοίους, καὶ μηδένα διαφέροντα τοσοῦτον ὥστε ἀπαρτίζειν πρὸς τὸ μέγεθος καὶ τὸ ἀξίωμα τῆς ἀρχῆς. ὥστε διὰ μὲν τοῦτο ἐκόντες οὐχ ὑπομένουσιν· ἂν δὲ δι' ἀπάτης ἄρξῃ τις ἢ βίας, ἥδη δοκεῖ τοῦτο εἶναι τυραννίς. ἐν δὲ ταῖς κατὰ γένος βασιλείαις τιθέναι δεῖ τῆς φθορᾶς αἰτίαν πρὸς ταῖς εἰρημέναις καὶ τὸ γίνεσθαι πολλοὺς εὐκαταφρονήτους, καὶ τὸ δύναμιν μὴ κεκτημένους τυραννικὴν ἀλλὰ βασιλικὴν τιμὴν ὑβρίζειν· ῥαδίᾳ γὰρ ἐγίνετο ἡ κατάλυσις· μὴ βουλομένων γὰρ εὐθύς οὐκ ἔσται βασιλεύς, ἀλλὰ

τύραννος καὶ μὴ βουλομένων. φθείρονται μὲν οὖν αἱ μοναρχίαι διὰ ταύτας καὶ τοιαύτας ἐτέρας αἰτίας.

Σώζονται δὲ δηλονότι ὡς ἀπλῶς μὲν εἰπεῖν ἐκ τῶν ἐναντίων, ὡς δὲ καθ' ἕκαστον τῷ τὰς μὲν βασιλείας ἄγειν ἐπὶ τὸ μετριώτερον. ὅσῳ γὰρ ἂν ἐλαττόνων ὦσι κύριοι, πλείω χρόνον ἀναγκαῖον μένειν πᾶσαν τὴν ἀρχήν· αὐτοὶ τε γὰρ ἦττον γίνονται δεσποτικοὶ καὶ τοῖς ἠθεσιν ἴσοι μᾶλλον, καὶ ὑπὸ τῶν ἀρχομένων φθονοῦνται ἦττον. διὰ γὰρ τοῦτο καὶ ἡ περὶ Μολοττοὺς πολὺν χρόνον βασιλεία διέμεινεν, καὶ ἡ Λακεδαιμονίων διὰ τὸ ἐξ ἀρχῆς τε εἰς δύο μέρη διαιρεθῆναι τὴν ἀρχήν, καὶ πάλιν Θεοπόμπου μετριάσαντος τοῖς τε ἄλλοις καὶ τὴν τῶν ἐφόρων ἀρχὴν ἐπικαταστήσαντος· τῆς γὰρ δυνάμεως ἀφελὼν ἠΰξησε τῷ χρόνῳ τὴν βασιλείαν, ὥστε τρόπον τινὰ ἐποίησεν οὐκ ἐλάττον' ἀλλὰ μείζον' αὐτήν. ὅπερ καὶ πρὸς τὴν γυναῖκα ἀποκρίνασθαι φασιν αὐτόν, εἰποῦσαν εἰ μὴδὲν αἰσχύνεται τὴν βασιλείαν ἐλάττω παραδιδούς τοῖς υἱέσιν ἢ παρὰ τοῦ πατρὸς παρέλαβεν· “οὐ δῆτα” φάναι· “παραδίδωμι γὰρ πολυχρονιωτέραν.”

αἱ δὲ τυραννίδες σώζονται κατὰ δύο τρόπους τοὺς ἐναντιωτάτους, ὧν ἅτερός ἐστιν ὁ παραδεδομένος καὶ καθ' ὃν διοικοῦσιν οἱ πλεῖστοι τῶν τυράννων τὴν ἀρχήν. τούτων δὲ τὰ πολλὰ φασι καταστήσαι Περίανδρον τὸν Κορίνθιον· πολλὰ δὲ καὶ παρὰ τῆς Περσῶν ἀρχῆς ἔστι τοιαῦτα λαβεῖν. ἔστι δὲ τὰ τε πάλαι λεχθέντα πρὸς σωτηρίαν, ὡς οἷόν τε, τῆς τυραννίδος, τὸ τοὺς ὑπερέχοντας κολοῦειν καὶ τοὺς φρονηματίας ἀναιρεῖν, καὶ μήτε συσσίτια ἔαν μήτε ἐταιρίαν [1313b] μήτε παιδείαν μήτε ἄλλο μηθέν τοιοῦτον, ἀλλὰ πάντα φυλάττειν ὅθεν εἴωθε γίγνεσθαι δύο, φρόνημά τε καὶ πίστις, καὶ μήτε σχολὰς μήτε ἄλλους συλλόγους ἐπιτρέπειν γίγνεσθαι σχολαστικούς, καὶ πάντα ποιεῖν ἐξ ὧν ὅτι μάλιστα ἀγνώτες ἀλλήλοις ἔσονται πάντες (ἢ γὰρ γνῶσις πίστιν ποιεῖ μᾶλλον πρὸς ἀλλήλους)· καὶ τὸ τοὺς ἐπιδημοῦντας αἰεὶ φανεροὺς εἶναι καὶ διατρίβειν περὶ θύρας (οὕτω γὰρ ἂν ἥκιστα λανθάνοιεν τί πράττουσι, καὶ φρονεῖν ἂν ἐθίζοντο μικρὸν αἰεὶ δουλεύοντες)· καὶ τᾶλλα ὅσα τοιαῦτα Περσικὰ καὶ βάρβαρα τυραννικά ἐστιν (πάντα γὰρ ταῦτὸν δύναται)· καὶ τὸ μὴ λανθάνειν πειρᾶσθαι ὅσα τυγχάνει τις λέγων ἢ πράττων τῶν ἀρχομένων, ἀλλ' εἶναι κατασκόπους, οἷον περὶ Συρακούσας αἱ ποταγωγίδες καλούμεναι, καὶ οὓς ὠτακουστάς ἐξέπεμπεν Ἰέρων, ὅπου τις εἴη συνουσία καὶ σύλλογος (παρρησιάζονται τε γὰρ ἦττον, φοβούμενοι τοὺς τοιοῦτους, κἂν παρρησιάζωνται, λανθάνουσιν

ἤττον)· καὶ τὸ διαβάλλειν ἀλλήλοις καὶ συγκρούειν καὶ φίλους φίλοις καὶ τὸν δῆμον τοῖς γνωρίμοις καὶ τοὺς πλουσίους ἑαυτοῖς. καὶ τὸ πένητας ποιεῖν τοὺς ἀρχομένους τυραννικόν, ὅπως ἢ τε φυλακὴ τρέφεται καὶ πρὸς τῷ καθ' ἡμέραν ὄντες ἄσχολοι ὧσιν ἐπιβουλεύειν. παράδειγμα δὲ τούτου αἱ τε πυραμίδες αἱ περὶ Αἴγυπτον καὶ τὰ ἀναθήματα τῶν Κυψελιδῶν καὶ τοῦ Ὀλυμπίου ἡ οἰκοδόμησις ὑπὸ τῶν Πεισιστρατιδῶν, καὶ τῶν περὶ Σάμον ἔργων τὰ Πολυκράτεια (πάντα γὰρ ταῦτα δύνανται ταυτόν, ἀσχολίαν καὶ πενίαν τῶν ἀρχομένων)· καὶ ἡ εἰσφορὰ τῶν τελῶν, οἷον ἐν Συρακούσαις (ἐν πέντε γὰρ ἔτεσιν ἐπὶ Διονυσίου τὴν οὐσίαν ἅπασαν εἰσηνηγοῦναι συνέβαινεν). ἔστι δὲ καὶ πολεμοποιὸς ὁ τύραννος, ὅπως δὴ ἄσχολοί τε ὧσι καὶ ἡγεμόνος ἐν χρεῖα διατελῶσιν ὄντες. καὶ ἡ μὲν βασιλεία σφύζεται διὰ τῶν φίλων, τυραννικὸν δὲ τὸ μάλιστ' ἀπιστεῖν τοῖς φίλοις, ὥς βουλομένων μὲν πάντων, δυναμένων δὲ μάλιστα τούτων.

καὶ τὰ περὶ τὴν δημοκρατίαν δὲ γιγνόμενα τὴν τελευταίαν τυραννικὰ πάντα, γυναικοκρατία τε περὶ τὰς οἰκίας, ἵν' ἐξαγγέλλωσι κατὰ τῶν ἀνδρῶν, καὶ δούλων ἄνεσις διὰ τὴν αὐτὴν αἰτίαν· οὔτε γὰρ ἐπιβουλεύουσιν οἱ δοῦλοι καὶ αἱ γυναῖκες τοῖς τυράννοις, εὐημεροῦντάς τε ἀναγκαῖον εὖνους εἶναι καὶ ταῖς τυραννίσιν καὶ ταῖς δημοκρατίαις· καὶ γὰρ ὁ δῆμος εἶναι βούλεται μόναρχος. διὸ καὶ ὁ κόλαξ παρ' ἀμφοτέροις ἔντιμος, παρὰ μὲν τοῖς δήμοις ὁ δημαγωγὸς (ἔστι γὰρ ὁ δημαγωγὸς τοῦ δήμου κόλαξ), παρὰ δὲ τοῖς τυράννοις οἱ ταπεινῶς ὁμιλοῦντες, [1314a] ὅπερ ἐστὶν ἔργον κολακείας. καὶ γὰρ διὰ τοῦτο πονηρόφιλον ἢ τυραννίς· κολακευόμενοι γὰρ χαίρουσιν, τοῦτο δ' οὐδ' ἂν εἷς ποιήσῃε φρόνημα ἔχων ἐλεύθερον, ἀλλὰ φιλοῦσιν οἱ ἐπιεικεῖς, ἢ οὐ κολακεύουσιν. καὶ χρήσιμοι οἱ πονηροὶ εἰς τὰ πονηρά· ἤλω γὰρ ὁ ἥλος, ὥσπερ ἡ παροιμία. καὶ τὸ μηδενὶ χαίρειν σεμνῶ μηδ' ἐλευθέρῳ τυραννικόν (αὐτὸν γὰρ εἶναι μόνον ἀξιοῖ τοιοῦτον ὁ τύραννος, ὁ δ' ἀντισεμνυνόμενος καὶ ἐλευθεριάζων ἀφαιρεῖται τὴν ὑπεροχὴν καὶ τὸ δεσποτικὸν τῆς τυραννίδος· μισοῦσιν οὖν ὥσπερ καταλύοντας τὴν ἀρχήν)· καὶ τὸ χρῆσθαι συσσίτοις καὶ συνημερευταῖς ξενικοῖς μᾶλλον ἢ πολιτικοῖς τυραννικόν, ὥς τοὺς μὲν πολεμίους τοὺς δ' οὐκ ἀντιποιοιουμένους - ταῦτα καὶ τὰ τοιαῦτα τυραννικὰ μὲν καὶ σωτήρια τῆς ἀρχῆς, οὐθὲν δ' ἐλλείπει μοχθηρίας. ἔστι δ' ὥς εἰπεῖν πάντα ταῦτα περιειλημμένα τρισὶν εἶδεσιν. στοχάζεται γὰρ ἡ τυραννὶς τριῶν, ἐνὸς μὲν τοῦ μικρὰ φρονεῖν τοὺς ἀρχομένους (οὐθενὶ γὰρ ἂν μικρόψυχος

ἐπιβουλεύσειεν), δευτέρου δὲ τοῦ διαπιστεῖν ἀλλήλοις (οὐ καταλύεται γὰρ πρότερον τυραννὶς πρὶν ἢ πιστεῦσώσι τινες ἑαυτοῖς· διὸ καὶ τοῖς ἐπιεικέσι πολεμοῦσιν ὡς βλαβεροῖς πρὸς τὴν ἀρχὴν οὐ μόνον διὰ τὸ μὴ ἀξιοῦν ἄρχεσθαι δεσποτικῶς, ἀλλὰ καὶ διὰ τὸ πιστοὺς καὶ ἑαυτοῖς καὶ τοῖς ἄλλοις εἶναι καὶ μὴ καταγορεύειν μήτε ἑαυτῶν μήτε τῶν ἄλλων)· τρίτον δ' ἀδυναμία τῶν πραγμάτων (οὐθεὶς γὰρ ἐπιχειρεῖ τοῖς ἀδυνάτοις, ὥστε οὐδὲ τυραννίδα καταλύειν μὴ δυνάμεως ὑπαρχούσης). εἰς οὓς μὲν οὖν ὅρους ἀνάγεται τὰ βουλευμάτων τῶν τυράννων, οὗτοι τρεῖς τυγχάνουσιν ὄντες· πάντα γὰρ ἀναγάγοι τις ἂν τὰ τυραννικὰ πρὸς ταύτας τὰς ὑποθέσεις, τὰ μὲν ὅπως μὴ πιστεύωσιν ἀλλήλοις, τὰ δ' ὅπως μὴ δύνωνται, τὰ δ' ὅπως μικρὸν φρονῶσιν.

ὁ μὲν οὖν εἷς τρόπος δι' οὗ γίνγεται σωτηρία ταῖς τυραννίσιν τοιοῦτός ἐστιν· ὁ δ' ἕτερος σχεδὸν ἐξ ἐναντίας ἔχει τοῖς εἰρημένοις τὴν ἐπιμέλειαν. ἔστι δὲ λαβεῖν αὐτὸν ἐκ τῆς φθορᾶς τῆς τῶν βασιλειῶν. ὥσπερ γὰρ τῆς βασιλείας εἷς τρόπος τῆς φθορᾶς τὸ ποιεῖν τὴν ἀρχὴν τυραννικωτέραν, οὕτω τῆς τυραννίδος σωτηρία τὸ ποιεῖν αὐτὴν βασιλικωτέραν, ἐν φυλάττοντα μόνον, τὴν δύναμιν, ὅπως ἄρχῃ μὴ μόνον βουλομένων ἀλλὰ καὶ μὴ βουλομένων. προϊέμενος γὰρ καὶ τοῦτο προϊέται καὶ τὸ τυραννεῖν. ἀλλὰ τοῦτο μὲν ὥσπερ ὑπόθεσιν δεῖ μένειν, τὰ δ' ἄλλα τὰ μὲν ποιεῖν τὰ δὲ δοκεῖν ὑποκρινόμενον τὸν βασιλικὸν καλῶς, πρῶτον μὲν δοκεῖν [1314b] φροντίζειν τῶν κοινῶν, μήτε δαπανῶντα <εἰς> δωρεὰς τοιαύτας ἐφ' αἷς τὰ πλήθη χαλεπαίνουσιν, ὅταν ἀπ' αὐτῶν μὲν λαμβάνωσιν ἐργαζομένων καὶ πονούντων γλίσχρως, διδῶσι δ' ἐταίραις καὶ ξένοις καὶ τεχνίταις ἀφθόνως, λόγον τε ἀποδιδόντα τῶν λαμβανομένων καὶ δαπανωμένων, ὅπερ ἤδη πεποιήκασιν τινες τῶν τυράννων (οὕτω γὰρ ἂν τις διοικῶν οἰκονόμος ἀλλ' οὐ τύραννος εἶναι δόξειεν· οὐ δεῖ δὲ φοβεῖσθαι μὴ ποτε ἀπορήσῃ χρημάτων κύριος ὢν τῆς πόλεως· ἀλλὰ τοῖς γ' ἐκτοπίζουσι τυράννοις ἀπὸ τῆς οἰκείας καὶ συμφέρει τοῦτο μᾶλλον ἢ καταλιπεῖν ἀθροίσαντας· ἦττον γὰρ ἂν οἱ φυλάττοντες ἐπιτιθεῖντο τοῖς πράγμασιν, εἰσὶ δὲ φοβερώτεροι τῶν τυράννων τοῖς ἀποδημοῦσιν οἱ φυλάττοντες τῶν πολιτῶν· οἱ μὲν γὰρ συναποδημοῦσιν, οἱ δὲ ὑπομένουσιν)· ἔπειτα τὰς εἰσφορὰς καὶ τὰς λειτουργίας δεῖ φαίνεσθαι τῆς τε οἰκονομίας ἕνεκα συνάγοντα, καὶ ποτε δεηθῇ χρῆσθαι πρὸς τοὺς πολεμικοὺς καιροῦς, ὅλως τε αὐτὸν παρασκευάζειν φύλακα καὶ ταμίαν ὡς κοινῶν ἀλλὰ μὴ ὡς ιδίῳ· καὶ

φαίνεσθαι μὴ χαλεπὸν ἀλλὰ σεμνόν, ἔτι δὲ τοιοῦτον ὥστε μὴ φοβεῖσθαι τοὺς ἐντυγχάνοντας ἀλλὰ μᾶλλον αἰδεῖσθαι· τούτου μέντοι τυγχάνειν οὐ ῥάδιον ὄντα εὐκαταφρόνητον, διὸ δεῖ καὶ μὴ τῶν ἄλλων ἀρετῶν ἐπιμέλειαν ποιῆται, ἀλλὰ τῆς πολεμικῆς, καὶ δόξαν ἐμποιεῖν περὶ αὐτοῦ τοιαύτην· ἔτι δὲ μὴ μόνον αὐτὸν φαίνεσθαι μηδένα τῶν ἀρχομένων ὑβρίζοντα, μήτε νέον μήτε νέαν, ἀλλὰ μηδ' ἄλλον μηδένα τῶν περὶ αὐτόν, ὁμοίως δὲ καὶ τὰς οἰκείας ἔχειν γυναικας πρὸς τὰς ἄλλας, ὥς καὶ διὰ γυναικῶν ὕβρεις πολλαὶ τυραννίδες ἀπολώλασιν· περὶ τε τὰς ἀπολαύσεις τὰς σωματικὰς τοῦναντίον ποιεῖν ἢ νῦν τινες τῶν τυράννων ποιοῦσιν (οὐ γὰρ μόνον εὐθὺς ἔωθεν τοῦτο δρῶσιν, καὶ συνεχῶς πολλὰς ἡμέρας, ἀλλὰ καὶ φαίνεσθαι τοῖς ἄλλοις βούλονται τοῦτο πράττοντες, ἴν' ὥς εὐδαίμονας καὶ μακαρίους θαυμάσωσιν), ἀλλὰ μάλιστα μὲν μετριάζειν τοῖς τοιούτοις, εἰ δὲ μή, τό γε φαίνεσθαι τοῖς ἄλλοις διαφεύγειν (οὔτε γὰρ εὐεπίθετος οὔτ' εὐκαταφρόνητος ὁ νήφων, ἀλλ' ὁ μεθύων, οὐδ' ὁ ἄγρυπνος, ἀλλ' ὁ καθεύδων)· τοῦναντίον τε ποιητέον τῶν πάλαι λεχθέντων σχεδὸν πάντων (κατασκευάζειν γὰρ δεῖ καὶ κοσμεῖν τὴν πόλιν ὥς ἐπίτροπον ὄντα καὶ μὴ τύραννον)· ἔτι δὲ τὰ πρὸς τοὺς θεοὺς φαίνεσθαι ἀεὶ σπουδάζοντα διαφερόντως (ἥττον τε γὰρ φοβοῦνται τὸ παθεῖν τι παράνομον ὑπὸ τῶν τοιούτων, [1315a] ἐὰν δεισιδαίμονα νομίζωσιν εἶναι τὸν ἄρχοντα καὶ φροντίζειν τῶν θεῶν, καὶ ἐπιβουλεύουσιν ἥττον ὥς συμμάχους ἔχοντι καὶ τοὺς θεοὺς), δεῖ δὲ ἄνευ ἀβελτερίας φαίνεσθαι τοιοῦτον· τοὺς τε ἀγαθοὺς περὶ τι γιγνομένους τιμᾶν οὕτως ὥστε μὴ νομίζειν ἂν ποτε τιμηθῆναι μᾶλλον ὑπὸ τῶν πολιτῶν αὐτονόμων ὄντων, καὶ τὰς μὲν τοιαύτας τιμὰς ἀπονέμειν αὐτόν, τὰς δὲ κολάσεις δι' ἐτέρων ἀρχόντων καὶ δικαστηρίων. κοινὴ δὲ φυλακὴ πάσης μοναρχίας τὸ μηθένα ποιεῖν ἓνα μέγαν, ἀλλ' εἴπερ, πλείους (τηρήσουσι γὰρ ἀλλήλους), ἐὰν δ' ἄρα τινὰ δέῃ ποιῆσαι μέγαν, μὴ τοι τό γε ἦθος θρασύν (ἐπιθετικώτατον γὰρ τὸ τοιοῦτον ἦθος περὶ πάσας τὰς πράξεις), καὶ τῆς δυνάμεώς τινα δοκῇ παραλύειν, ἐκ προσαγωγῆς τοῦτο δρᾶν καὶ μὴ πᾶσαν ἀθρόον ἀφαιρεῖσθαι τὴν ἐξουσίαν. ἔτι δὲ πάσης μὲν ὕβρεως εἵργεσθαι, παρὰ πάσας δὲ δυεῖν, τῆς τε εἰς τὰ σώματα [κολάσεως] καὶ τῆς εἰς τὴν ἡλικίαν. μάλιστα δὲ ταύτην ποιητέον τὴν εὐλάβειαν περὶ τοὺς φιλοτίμους· τὴν μὲν γὰρ εἰς τὰ χρήματα ὀλιγωρίαν οἱ φιλοχρήματοι φέρουσι βαρέως, τὴν δ' [εἰς] ἀτιμίαν οἱ τε φιλότιμοι καὶ οἱ ἐπεικεῖς τῶν ἀνθρώπων. διόπερ ἢ μὴ

χρησθαι δεῖ τοῖς τοιούτοις, ἢ τὰς μὲν κολάσεις πατρικῶς φαίνεσθαι ποιούμενον καὶ μὴ δι' ὀλιγορίαν, τὰς δὲ πρὸς τὴν ἡλικίαν ὁμιλίας δι' ἐρωτικὰς αἰτίας ἀλλὰ μὴ δι' ἐξουσίαν, ὅλως δὲ τὰς δοκούσας ἀτιμίας ἐξωνεῖσθαι μείζοσι τιμαῖς. τῶν δ' ἐπιχειρούντων ἐπὶ τὴν τοῦ σώματος διαφθορὰν οὗτοι φοβερώτατοι καὶ δέονται πλείστης φυλακῆς ὅσοι μὴ προαιροῦνται περιποιεῖσθαι τὸ ζῆν διαφθείραντες. διὸ μάλιστα εὐλαβεῖσθαι δεῖ τοὺς ὑβρίζεσθαι νομίζοντας ἢ αὐτοὺς ἢ ὧν κηδόμενοι τυγχάνουσιν· ἀφειδῶς γὰρ ἑαυτῶν ἔχουσιν οἱ διὰ θυμὸν ἐπιχειροῦντες, καθάπερ καὶ Ἡράκλειτος εἶπε, χαλεπὸν φάσκων εἶναι θυμῷ μάχεσθαι, ψυχῇς γὰρ ὠνεῖσθαι.

ἐπεὶ δ' αἱ πόλεις ἐκ δύο συνεστήκασι μορίων, ἕκ τε τῶν ἀπόρων ἀνθρώπων καὶ τῶν εὐπόρων, μάλιστα μὲν ἀμφοτέρους ὑπολαμβάνειν δεῖ σώζεσθαι διὰ τὴν ἀρχήν, καὶ τοὺς ἐτέρους ὑπὸ τῶν ἐτέρων ἀδικεῖσθαι μηδέν, ὁπότεροι δ' ἂν ὧσι κρείττους, τούτους ἰδίους μάλιστα ποιεῖσθαι τῆς ἀρχῆς, ὥς, ἂν ὑπάρξη τοῦτο τοῖς πράγμασιν, οὔτε δούλων ἐλευθέρωσιν ἀνάγκη ποιεῖσθαι τὸν τύραννον οὔτε ὅπλων παραίρεσιν· ἱκανὸν γὰρ θάτερον μέρος πρὸς τῇ δυνάμει προστιθέμενον ὥστε κρείττους εἶναι τῶν ἐπιτιθεμένων. περίεργον δὲ τὸ λέγειν καθ' ἕκαστον τῶν τοιούτων· ὁ γὰρ σκοπὸς φανερός, ὅτι δεῖ μὴ τυραννικὸν [1315b] ἀλλ' οἰκονόμον καὶ βασιλικὸν εἶναι φαίνεσθαι τοῖς ἀρχομένοις καὶ μὴ σφετεριστὴν ἀλλ' ἐπίτροπον, καὶ τὰς μετριότητος τοῦ βίου διώκειν, μὴ τὰς ὑπερβολάς, ἔτι δὲ τοὺς μὲν γνωρίμους καθομιλεῖν, τοὺς δὲ πολλοὺς δημαγωγεῖν. ἐκ γὰρ τούτων ἀναγκαῖον οὐ μόνον τὴν ἀρχὴν εἶναι καλλίω καὶ ζηλωτοτέραν τῷ βελτιόνων ἄρχειν καὶ μὴ τεταπεινωμένων μηδὲ μισούμενον καὶ φοβούμενον διατελεῖν, ἀλλὰ καὶ τὴν ἀρχὴν εἶναι πολυχρονιωτέραν, ἔτι δ' αὐτὸν διακεῖσθαι κατὰ τὸ ἦθος ἥτοι καλῶς πρὸς ἀρετὴν ἢ ἡμίχρηστον ὄντα, καὶ μὴ πονηρὸν ἀλλ' ἡμιπόνηρον.

Καίτοι πασῶν ὀλιγοχροنيώταται τῶν πολιτειῶν εἰσιν ὀλιγαρχία καὶ τυραννίς. πλεῖστον γὰρ ἐγένετο χρόνον ἢ περὶ Σικυῶνα τυραννίς, ἢ τῶν Ὀρθαγόρου παίδων καὶ αὐτοῦ Ὀρθαγόρου· ἔτη δ' αὕτη διέμεινεν ἑκατόν. τούτου δ' αἴτιον ὅτι τοῖς ἀρχομένοις ἐχρῶντο μετρίως καὶ πολλὰ τοῖς νόμοις ἐδούλευον, καὶ διὰ τὸ πολεμικὸς γενέσθαι Κλεισθένης οὐκ ἦν εὐκαταφρόνητος, καὶ τὰ πολλὰ ταῖς ἐπιμελείαις ἐδημαγῶγουν. λέγεται γοῦν Κλεισθένης τὸν ἀποκρίναντα τῆς νίκης αὐτὸν ὥς ἐστεφάνωσεν· ἔνιοι δ' εἰκόνα φασὶν εἶναι τοῦ κρίναντος οὕτως τὸν ἀνδριάντα τὸν ἐν τῇ ἀγορᾷ καθήμενον. φασὶ δὲ

καὶ Πεισίστρατον ὑπομεῖναι ποτε προσκληθέντα δίκην εἰς Ἄρειον πάγον. δευτέρα δὲ περὶ Κόρινθον ἢ τῶν Κυψελιδῶν· καὶ γὰρ αὕτη διετέλεσεν ἔτη τρία καὶ ἐβδομήκοντα καὶ ἑξ μῆνας· Κύψελος μὲν γὰρ ἐτυράννησεν ἔτη τριάκοντα, Περίανδρος δὲ τετταράκοντα καὶ ἥμισυ, Ψαμμίτιχος δ' ὁ Γόργου τρία ἔτη. τὰ δ' αἰτία ταῦτα καὶ ταύτης· ὁ μὲν γὰρ Κύψελος δημαγωγὸς ἦν καὶ κατὰ τὴν ἀρχὴν διετέλεσεν ἀδορυφόρητος, Περίανδρος δ' ἐγένετο μὲν τυραννικός, ἀλλὰ πολεμικός. τρίτη δ' ἡ τῶν Πεισιστρατιδῶν Ἀθήνησιν. οὐκ ἐγένετο δὲ συνεχής· δις γὰρ ἔφυγε Πεισίστρατος τυραννῶν· ὥστ' ἐν ἔτεσι τριάκοντα καὶ τρισὶν ἑπτακαίδεκα ἔτη τούτων ἐτυράννησεν, ὀκτωκαίδεκα δὲ οἱ παῖδες, ὥστε τὰ πάντα ἐγένετο ἔτη τριάκοντα καὶ πέντε. τῶν δὲ λοιπῶν ἢ περὶ Ἰέρωνα καὶ Γέλωνα περὶ Συρακούσας. ἔτη δ' οὐδ' αὕτη πολλὰ διέμεινεν, ἀλλὰ τὰ σύμπαντα δυεῖν δέοντα εἴκοσι· Γέλων μὲν γὰρ ἑπτὰ τυραννήσας τῷ ὀγδόῳ τὸν βίον ἐτελεύτησεν, δέκα δ' Ἰέρων, Θρασύβουλος δὲ τῷ ἑνδεκάτῳ μηνὶ ἐξέπεσεν. αἱ δὲ πολλαὶ τῶν τυραννίδων ὀλιγοχρόνιαι πᾶσαι γεγόνασι παντελῶς.

τὰ μὲν οὖν περὶ τὰς πολιτείας καὶ τὰ περὶ τὰς μοναρχίας, ἐξ ὧν τε φθείρονται καὶ πάλιν σφύζονται, σχεδὸν [1316a] εἴρηται περὶ πάντων. ἐν δὲ τῇ Πολιτείᾳ λέγεται μὲν περὶ τῶν μεταβολῶν ὑπὸ τοῦ Σωκράτους, οὐ μέντοι λέγεται καλῶς. τῆς τε γὰρ ἀρίστης πολιτείας καὶ πρώτης οὕσης οὐ λέγει τὴν μεταβολὴν ἰδίως. φησὶ γὰρ αἴτιον εἶναι τὸ μὴ μένειν μηθὲν ἀλλ' ἐν τινι περιόδῳ μεταβάλλειν, ἀρχὴν δ' εἶναι τούτων “ὧν ἐπίτριτος πυθμὴν πεμπάδι συζυγεῖς δύο ἀρμονίας παρέχεται”, λέγων ὅταν ὁ τοῦ διαγράμματος ἀριθμὸς τούτου γένηται στερεός, ὡς τῆς φύσεώς ποτε φυοῦσης φαύλους καὶ κρείττους τῆς παιδείας, τοῦτο μὲν οὖν αὐτὸ λέγων ἴσως οὐ κακῶς (ἐνδέχεται γὰρ εἶναι τινὰς οὓς παιδευθῆναι καὶ γενέσθαι σπουδαίους ἄνδρας ἀδύνατον), ἀλλ' αὕτη τί ἂν ἴδιος εἴη μεταβολὴ τῆς ὑπ' ἐκείνου λεγομένης ἀρίστης πολιτείας μᾶλλον ἢ τῶν ἄλλων πασῶν καὶ τῶν γιγνομένων πάντων; καὶ διὰ γε τὸν χρόνον, δι' ὃν λέγει πάντα μεταβάλλειν, καὶ τὰ μὴ ἅμα ἀρξάμενα γίνεσθαι ἅμα μεταβάλλει, οἷον εἰ τῇ προτέρᾳ ἡμέρᾳ ἐγένετο τῆς τροπῆς, ἅμα ἄρα μεταβάλλει; πρὸς δὲ τούτοις διὰ τίν' αἰτίαν ἐκ ταύτης εἰς τὴν Λακωνικὴν μεταβάλλει; πλεονάκις γὰρ εἰς τὴν ἐναντίαν μεταβάλλουσι πᾶσαι αἱ πολιτεῖαι ἢ τὴν σύνεγγυς. ὁ δ' αὐτὸς λόγος καὶ περὶ τῶν ἄλλων μεταβολῶν. ἐκ γὰρ τῆς Λακωνικῆς, φησί, μεταβάλλει εἰς τὴν

ὀλιγαρχίαν, ἐκ δὲ ταύτης εἰς δημοκρατίαν, εἰς τυραννίδα δὲ ἐκ δημοκρατίας. καίτοι καὶ ἀνάπαλιν μεταβάλλουσιν, οἷον ἐκ δήμου εἰς ὀλιγαρχίαν, καὶ μᾶλλον ἢ εἰς μοναρχίαν.

ἔτι δὲ τυραννίδος οὐ λέγει οὗτ' εἰ ἔσται μεταβολὴ οὗτ', εἰ [μὴ] ἔσται, διὰ τίν' αἰτίαν καὶ εἰς ποίαν πολιτείαν, τούτου δ' αἴτιον ὅτι οὐ ῥαδίως ἂν εἶχε λέγειν· ἀόριστον γάρ, ἐπεὶ κατ' ἐκείνον δεῖ εἰς τὴν πρώτην καὶ τὴν ἀρίστην· οὕτω γὰρ ἂν ἐγίνετο συνεχὲς καὶ κύκλος. ἀλλὰ μεταβάλλει καὶ εἰς τυραννίδα τυραννίς, ὥσπερ ἡ Σικυῶνος ἐκ τῆς Μύρωνος εἰς τὴν Κλεισθένους, καὶ εἰς ὀλιγαρχίαν, ὥσπερ ἡ ἐν Χαλκίδι ἡ Ἀντιλέοντος, καὶ εἰς δημοκρατίαν, ὥσπερ ἡ τῶν Γέλωνος ἐν Συρακούσαις, καὶ εἰς ἀριστοκρατίαν, ὥσπερ ἡ Χαρίλλου ἐν Λακεδαιμόνι, καὶ ἡ ἐν Καρχηδόνι. καὶ εἰς τυραννίδα μεταβάλλει ἐξ ὀλιγαρχίας, ὥσπερ ἐν Σικελίᾳ σχεδὸν αἱ πλεῖσται τῶν ἀρχαίων, ἐν Λεοντίνοις εἰς τὴν Παναιτίου τυραννίδα καὶ ἐν Γέλα εἰς τὴν Κλεάνδρου καὶ ἐν Ῥηγίῳ εἰς τὴν Ἀναξιάου καὶ ἐν ἄλλαις πολλαῖς πόλεσιν ὡσαύτως. ἄτοπον δὲ καὶ τὸ οἶεσθαι εἰς ὀλιγαρχίαν διὰ τοῦτο μεταβάλλειν ὅτι φιλοχρήματοι καὶ χρηματισταὶ οἱ [1316b] ἐν ταῖς ἀρχαῖς, ἀλλ' οὐχ ὅτι οἱ πολὺ ὑπερέχοντες ταῖς οὐσίαις οὐ δίκαιον οἴονται εἶναι ἴσον μετέχειν τῆς πόλεως τοὺς κεκτημένους μὴθὲν τοῖς κεκτημένοις· ἐν πολλαῖς τε ὀλιγαρχίαις οὐκ ἔξεστι χρηματίζεσθαι, ἀλλὰ νόμοι εἰσὶν οἱ κωλύοντες, ἐν Καρχηδόνι δὲ δημοκρατουμένη χρηματίζονται καὶ οὐπω μεταβεβλήκασιν.

ἄτοπον δὲ καὶ τὸ φάναι δύο πόλεις εἶναι τὴν ὀλιγαρχικὴν, πλουσίων καὶ πενήτων. τί γὰρ αὕτη μᾶλλον τῆς Λακωνικῆς πέπονθεν ἢ ὅποιασοῦν ἄλλης, οὗ μὴ πάντες κέκτηνται ἴσα ἢ μὴ πάντες ὁμοίως εἰσὶν ἀγαθοὶ ἄνδρες; οὐδενὸς δὲ πενεστέρου γενομένου ἢ πρότερον οὐδὲν ἦττον μεταβάλλουσιν εἰς δῆμον ἐξ ὀλιγαρχίας, ἂν γένωνται πλείους οἱ ἄποροι, καὶ ἐκ δήμου εἰς ὀλιγαρχίαν, ἐὰν κρεῖττον ἢ τοῦ πλήθους τὸ εὖπορον καὶ οἱ μὲν ἀμελῶσιν οἱ δὲ προσέχωσι τὸν νοῦν. πολλῶν τε οὐσῶν αἰτιῶν δι' ὧν γίνονται αἱ μεταβολαί, οὐ λέγει ἀλλ' ἡ μίαν, ὅτι ἀσωτευόμενοι <καὶ> κατατοκιζόμενοι γίνονται πένητες, ὡς ἐξ ἀρχῆς πλουσίων ὄντων πάντων ἢ τῶν πλείστων. τοῦτο δ' ἐστὶ ψεῦδος· ἀλλ' ὅταν μὲν τῶν ἡγεμόνων τινὲς ἀπολέσωσι τὰς οὐσίας, καινοτομοῦσιν, ὅταν δὲ τῶν ἄλλων, οὐθὲν γίνεταί δεινόν, καὶ μεταβάλλουσιν οὐθὲν μᾶλλον οὐδὲ τότε εἰς δῆμον ἢ εἰς ἄλλην πολιτείαν. ἔτι δὲ κἂν τιμῶν μὴ μετέχωσιν, κἂν ἀδικῶνται ἢ ὑβρίζωνται, στασιάζουσι καὶ μεταβάλλουσιν τὰς πολιτείας, κἂν μὴ

καταδαπανήσωσι τὴν οὐσίαν, διὰ τὸ ἐξεῖναι ὅ τι ἂν βούλωνται ποιεῖν· οὗ αἰτίαν τὴν ἄγαν ἐλευθερίαν εἶναί φησιν. πλειόνων δ' οὐσῶν ὀλιγαρχιῶν καὶ δημοκρατιῶν, ὡς μιᾶς οὔσης ἑκατέρας λέγει τὰς μεταβολὰς ὁ Σωκράτης.

Πόσαι μὲν οὖν διαφοραὶ καὶ τίνες τοῦ τε βουλευτικοῦ καὶ κυρίου τῆς πολιτείας καὶ τῆς περὶ τὰς ἀρχὰς τάξεως καὶ περὶ δικαστηρίων, καὶ ποία πρὸς ποίαν συντέτακται πολιτείαν, ἔτι δὲ περὶ φθορᾶς τε καὶ σωτηρίας τῶν πολιτειῶν, ἐκ ποίων τε γίνεται καὶ διὰ τίνας αἰτίας, εἴρηται πρότερον· ἐπεὶ δὲ τετύχηκεν εἶδη πλείω δημοκρατίας ὄντα καὶ τῶν ἄλλων ὁμοίως πολιτειῶν, ἅμα τε περὶ ἐκείνων εἴ τι λοιπόν, οὐ χεῖρον ἐπισκέψασθαι, καὶ τὸν οἰκεῖον καὶ τὸν συμφέροντα τρόπον ἀποδοῦναι πρὸς ἐκάστην. ἔτι δὲ καὶ τὰς συναγωγὰς αὐτῶν τῶν εἰρημένων ἐπισκεπτέον πάντων [1317a] τῶν τρόπων· ταῦτα γὰρ συνδυαζόμενα ποιεῖ τὰς πολιτείας ἐπαλλάττειν, ὥστε ἀριστοκρατίας τε ὀλιγαρχικὰς εἶναι καὶ πολιτείας δημοκρατικωτέρας. λέγω δὲ τοὺς συνδυασμοὺς οὓς δεῖ μὲν ἐπισκοπεῖν, οὐκ ἐσκεμμένοι δ' εἰσὶ νῦν, οἷον ἂν τὸ μὲν βουλευόμενον καὶ τὸ περὶ τὰς ἀρχαιρεσίας ὀλιγαρχικῶς ἢ συντεταγμένον, τὰ δὲ περὶ τὰ δικαστήρια ἀριστοκρατικῶς, ἢ ταῦτα μὲν καὶ τὸ περὶ τὸ βουλευόμενον ὀλιγαρχικῶς, ἀριστοκρατικῶς δὲ τὸ περὶ τὰς ἀρχαιρεσίας, ἢ κατ' ἄλλον τινὰ τρόπον μὴ πάντα συντεθῇ τὰ τῆς πολιτείας οἰκεῖα.

ποία μὲν οὖν δημοκρατία πρὸς ποίαν ἀρμόττει πόλιν, ὡσαύτως δὲ καὶ ποία τῶν ὀλιγαρχιῶν ποίῳ πλήθει, καὶ τῶν λοιπῶν δὲ πολιτειῶν τίς συμφέρει τίσιν, εἴρηται πρότερον· ὅμως δ' ἐπεὶ δεῖ γενέσθαι δῆλον μὴ μόνον ποία τούτων τῶν πολιτειῶν ἀρίστη ταῖς πόλεσιν, ἀλλὰ καὶ πῶς δεῖ κατασκευάζειν καὶ ταύτας καὶ τὰς ἄλλας, ἐπέλθωμεν συντόμως. καὶ πρῶτον περὶ δημοκρατίας εἰπώμεν· ἅμα γὰρ καὶ περὶ τῆς ἀντικειμένης πολιτείας φανερόν, αὕτη δ' ἐστὶν ἣν καλοῦσιν τινες ὀλιγαρχίαν. ληπτέον δὲ πρὸς ταύτην τὴν μέθοδον πάντα τὰ δημοτικὰ καὶ τὰ δοκοῦντα ταῖς δημοκρατίαις ἀκολουθεῖν· ἐκ γὰρ τούτων συντιθεμένων τὰ τῆς δημοκρατίας εἶδη γίνεσθαι συμβαίνει, καὶ πλείους δημοκρατίας μιᾶς εἶναι καὶ διαφόρους. δύο γάρ εἰσιν αἰτίαι δι' ἃσπερ αἱ δημοκρατίαι πλείους εἰσὶ, πρῶτον μὲν ἡ λεχθεῖσα πρότερον, ὅτι διάφοροι οἱ δῆμοι (γίνεται γὰρ τὸ μὲν γεωργικὸν πλῆθος, τὸ δὲ βάνανυσον καὶ θητικόν· ὧν τοῦ πρώτου τῷ δευτέρῳ προσλαμβάνομένου, καὶ τοῦ τρίτου πάλιν τοῖς ἀμφοτέροις, οὐ μόνον διαφέρει τῷ βελτίῳ καὶ χεῖρῳ γίνεσθαι τὴν δημοκρατίαν,

ἀλλὰ καὶ τῷ μὴ τὴν αὐτήν), δευτέρα δὲ περὶ ἧς νῦν λέγομεν. τὰ γὰρ ταῖς δημοκρατίαις ἀκολουθοῦντα καὶ δοκοῦντ' εἶναι τῆς πολιτείας οἰκεῖα ταύτης ποιεῖ συντιθέμενα τὰς δημοκρατίας ἐτέρας· τῇ μὲν γὰρ ἐλάττω, τῇ δ' ἀκολουθήσει πλείονα, τῇ δ' ἅπαντα ταῦτα. χρήσιμον δ' ἕκαστον αὐτῶν γνωρίζειν πρὸς τε τὸ κατασκευάζειν ἢ ἂν τις αὐτῶν τύχῃ βουλόμενος, καὶ πρὸς τὰς διορθώσεις. ζητοῦσι μὲν γὰρ οἱ τὰς πολιτείας καθιστάντες ἅπαντα τὰ οἰκεῖα συναγαγεῖν πρὸς τὴν ὑπόθεσιν, ἀμαρτάνουσι δὲ τοῦτο ποιοῦντες, καθάπερ ἐν τοῖς περὶ τὰς φθορᾶς καὶ τὰς σωτηρίας τῶν πολιτειῶν εἴρηται πρότερον. νυνὶ δὲ τὰ ἀξιώματα καὶ τὰ ἦθη καὶ ὧν ἐφίενται λέγωμεν.

Ὑποθέσεις μὲν οὖν τῆς δημοκρατικῆς πολιτείας ἐλευθερία (τοῦτο γὰρ λέγειν εἰώθασιν, ὥς ἐν μόνῃ τῇ πολιτείᾳ [1317b] ταύτῃ μετέχοντας ἐλευθερίας· τούτου γὰρ στοχάζεσθαι φασὶ πᾶσαν δημοκρατίαν)· ἐλευθερίας δὲ ἐν μὲν τὸ ἐν μέρει ἄρχεσθαι καὶ ἄρχειν. καὶ γὰρ τὸ δίκαιον τὸ δημοτικὸν τὸ ἴσον ἔχειν ἐστὶ κατὰ ἀριθμὸν ἀλλὰ μὴ κατ' ἀξίαν, τούτου δ' ὄντος τοῦ δικαίου τὸ πλῆθος ἀναγκαῖον εἶναι κύριον, καὶ ὃ τι ἂν δόξῃ τοῖς πλείοσι, τοῦτ' εἶναι τέλος καὶ τοῦτ' εἶναι τὸ δίκαιον· φασὶ γὰρ δεῖν ἴσον ἔχειν ἕκαστον τῶν πολιτῶν· ὥστε ἐν ταῖς δημοκρατίαις συμβαίνει κυριωτέρους εἶναι τοὺς ἀπόρους τῶν εὐπόρων· πλείους γὰρ εἰσι, κύριον δὲ τὸ τοῖς πλείοσι δόξαν. ἐν μὲν οὖν τῆς ἐλευθερίας σημεῖον τοῦτο, ὃν τίθενται πάντες οἱ δημοτικοὶ τῆς πολιτείας ὅρον· ἐν δὲ τὸ ζῆν ὥς βούλεται τις. τοῦτο γὰρ τῆς ἐλευθερίας ἔργον εἶναι φασιν, εἴπερ τοῦ δουλεύοντος τὸ ζῆν μὴ ὥς βούλεται. τῆς μὲν οὖν δημοκρατίας ὅρος οὗτος δεύτερος· ἐντεῦθεν δ' ἐλήλυθε τὸ μὴ ἄρχεσθαι, μάλιστα μὲν ὑπὸ μηθενός, εἰ δὲ μὴ, κατὰ μέρος, καὶ συμβάλλεται ταύτῃ πρὸς τὴν ἐλευθερίαν τὴν κατὰ τὸ ἴσον.

τούτων δ' ὑποκειμένων καὶ τοιαύτης οὔσης τῆς ἀρχῆς τὰ τοιαῦτα δημοτικά· τὸ αἰρεῖσθαι τὰς ἀρχὰς πάντας ἐκ πάντων, τὸ ἄρχειν πάντας μὲν ἐκάστου ἕκαστον δ' ἐν μέρει πάντων, τὸ κληρωτὰς εἶναι τὰς ἀρχὰς ἢ πάσας ἢ ὅσαι μὴ ἐμπειρίας δέονται καὶ τέχνης, τὸ μὴ ἀπὸ τιμήματος μηθενός εἶναι τὰς ἀρχὰς ἢ ὅτι μικροτάτου, τὸ μὴ δις τὸν αὐτὸν ἄρχειν μηδεμίαν ἢ ὀλιγάκις ἢ ὀλίγας ἔξω τῶν κατὰ πόλεμον, τὸ ὀλιγοχρονίους εἶναι τὰς ἀρχὰς ἢ πάσας ἢ ὅσας ἐνδέχεται, τὸ δικάζειν πάντας καὶ ἐκ πάντων καὶ περὶ πάντων, ἢ περὶ τῶν πλείστων καὶ τῶν μεγίστων καὶ τῶν κυριωτάτων, οἷον περὶ εὐθυνῶν καὶ πολιτείας καὶ τῶν ἰδίων συναλλαγμάτων, τὸ τὴν

Τὸ δὲ μετὰ τοῦτο ἀπορεῖται πῶς ἔξουσι τὸ ἴσον, πότερον δεῖ τὰ τιμήματα διελεῖν, χιλίοις τὰ τῶν πεντακοσίων, καὶ τοὺς χιλίους ἴσον δύνασθαι τοῖς πεντακοσίοις, ἢ οὐχ οὕτω δεῖ τιθέναι τὴν κατὰ τοῦτο ἰσότητα, ἀλλὰ διελεῖν μὲν οὕτως, ἔπειτα ἐκ τῶν πεντακοσίων ἴσους λαβόντα καὶ ἐκ τῶν χιλίων, τούτους κυρίους εἶναι τῶν αἰρέσεων καὶ τῶν δικαστηρίων. πότερον οὖν αὕτη ἢ πολιτεία δικαιωτάτη κατὰ τὸ δημοτικὸν δίκαιον, ἢ μᾶλλον ἢ κατὰ τὸ πλῆθος; φασὶ γὰρ οἱ δημοτικοὶ τοῦτο δίκαιον ὅτι ἂν δόξῃ τοῖς πλείοσιν, οἱ δ' ὀλιγαρχικοὶ ὅτι ἂν δόξῃ τῇ πλείονι οὐσίᾳ· κατὰ πλῆθος γὰρ οὐσίας φασὶ κρίνεσθαι δεῖν. ἔχει δ' ἀμφοτέρω ἀνισότητα καὶ ἀδικίαν· εἰ μὲν γὰρ ὅτι ἂν οἱ ὀλίγοι, τυραννίς (καὶ γὰρ ἐὰν εἷς ἔχῃ πλείω τῶν ἄλλων εὐπόρων, κατὰ τὸ ὀλιγαρχικὸν δίκαιον ἄρχειν δίκαιος μόνος), εἰ δ' ὅτι ἂν οἱ πλείους κατ' ἀριθμόν, ἀδικήσουσι δημεύοντες τὰ τῶν πλουσίων καὶ ἐλαττόνων, καθάπερ εἴρηται πρότερον.

τίς ἂν οὖν εἴη ἰσότης ἣν ὁμολογήσουσιν ἀμφοτέροι, σκεπτέον ἐξ ὧν ὀρίζονται δικαίων ἀμφοτέροι. λέγουσι γὰρ ὡς ὅτι ἂν δόξῃ τοῖς πλείοσι τῶν πολιτῶν, τοῦτ' εἶναι δεῖ κύριον· ἔστω δὴ τοῦτο, μὴ

μέντοι πάντως, ἀλλ' ἐπειδὴ δύο μέρη τετύχηκεν ἐξ ὧν ἡ πόλις, πλούσιοι καὶ πένητες, ὅ τι ἂν ἀμφοτέροις δόξη ἢ τοῖς πλείοσι, τοῦτο κύριον ἔστω, ἐὰν δὲ τὰναντία δόξη, ὅ τι ἂν οἱ πλείους καὶ ὧν τὸ τίμημα πλείον· οἷον, εἰ οἱ μὲν δέκα οἱ δὲ εἴκοσιν, ἔδοξε δὲ τῶν μὲν πλουσίων τοῖς ἐξ τῶν δ' ἀπορωτέρων τοῖς πεντεκαίδεκα, προσγεγένηται τοῖς μὲν πένησι τέτταρες τῶν πλουσίων, τοῖς δὲ πλουσίοις πέντε τῶν πενήτων· ὁποτέρων οὖν τὸ τίμημα ὑπερτείνει συναριθμουμένων ἀμφοτέρων ἑκατέροις, τοῦτο κύριον. ἐὰν δὲ ἴσοι συμπέσωσι, κοινὴν εἶναι ταύτην νομιστέον ἀπορίαν ὥσπερ νῦν ἐὰν δίχα ἡ ἐκκλησία γένηται ἢ τὸ δικαστήριον· ἢ [1318b] γὰρ ἀποκληρωτέον ἢ ἄλλο τι τοιοῦτον ποιητέον. ἀλλὰ περὶ μὲν τοῦ ἴσου καὶ τοῦ δικαίου, κἄν ἢ πάνυ χαλεπὸν εὑρεῖν τὴν ἀλήθειαν περὶ αὐτῶν, ὅμως ῥᾶον τυχεῖν ἢ συμπεῖσαι τοὺς δυναμένους πλεονεκτεῖν· αἰεὶ γὰρ ζητοῦσι τὸ ἴσον καὶ τὸ δίκαιον οἱ ἥττους, οἱ δὲ κρατοῦντες οὐδὲν φροντίζουσιν

Δημοκρατιῶν δ' οὐσῶν τεττάρων βελτίστη μὲν ἡ πρώτη τάξει, καθάπερ ἐν τοῖς πρὸ τούτων ἐλέχθη λόγοις· ἔστι δὲ καὶ ἀρχαιοτάτη πασῶν αὕτη. λέγω δὲ πρώτην ὥσπερ ἂν τις διέλοι τοὺς δήμους. βέλτιστος γὰρ δήμος ὁ γεωργικός ἐστιν, ὥστε καὶ ποιεῖν ἐνδέχεται δημοκρατίαν ὅπου ζῇ τὸ πλῆθος ἀπὸ γεωργίας ἢ νομῆς. διὰ μὲν γὰρ τὸ μὴ πολλὴν οὐσίαν ἔχειν ἄσχυλος, ὥστε μὴ πολλάκις ἐκκλησιάζειν διὰ δὲ τὸ [μὴ] ἔχειν τὰνακαῖα πρὸς τοῖς ἔργοις διατρίβουσι καὶ τῶν ἀλλοτρίων οὐκ ἐπιθυμοῦσιν, ἀλλ' ἥδιον αὐτοῖς τὸ ἐργάζεσθαι τοῦ πολιτεύεσθαι καὶ ἄρχειν, ὅπου ἂν μὴ ἢ λήμματα μεγάλα ἀπὸ τῶν ἀρχῶν. οἱ γὰρ πολλοὶ μᾶλλον ὀρέγονται τοῦ κέρδους ἢ τῆς τιμῆς. σημεῖον δέ· καὶ γὰρ τὰς ἀρχαίας τυραννίδας ὑπέμενον καὶ τὰς ὀλιγαρχίας ὑπομένουσιν, ἐὰν τις αὐτοὺς ἐργάζεσθαι μὴ κωλύῃ μηδ' ἀφαιρῇται μηθέν· ταχέως γὰρ οἱ μὲν πλουτοῦσιν αὐτῶν οἱ δ' οὐκ ἀποροῦσιν. ἔτι δὲ τὸ κυρίου εἶναι τοῦ ἐλέσθαι καὶ εὐθύνειν ἀναπληροῖ τὴν ἔνδειαν, εἰ τι φιλοτιμίας ἔχουσιν, ἐπεὶ παρ' ἐνίοις δήμοις, κἄν μὴ μετέχωσι τῆς αἰρέσεως τῶν ἀρχῶν ἀλλὰ τινες αἰρετοὶ κατὰ μέρος ἐκ πάντων, ὥσπερ ἐν Μαντινείᾳ, τοῦ δὲ βουλευέσθαι κύριοι ὧσιν, ἱκανῶς ἔχει τοῖς πολλοῖς· καὶ δεῖ νομίζειν καὶ τοῦτ' εἶναι σχῆμά τι δημοκρατίας, ὥσπερ ἐν Μαντινείᾳ ποτ' ἦν. διὸ δὴ καὶ συμφέρον ἐστὶ τῇ πρότερον ῥηθείᾳ δημοκρατία καὶ ὑπάρχειν εἶωθεν, αἰρεῖσθαι μὲν τὰς ἀρχὰς καὶ εὐθύνειν καὶ δικάζειν πάντας, ἄρχειν δὲ τὰς μεγίστας αἰρετοὺς καὶ ἀπὸ τιμημάτων, τὰς μείζους ἀπὸ

μειζόνων, ἥ καὶ ἀπὸ τιμημάτων μὲν μηδεμίαν, ἀλλὰ τοὺς δυναμένους. ἀνάγκη δὲ πολιτευομένους οὕτω πολιτεύεσθαι τε καλῶς (αἱ γὰρ ἀρχαὶ αἰεὶ διὰ τῶν βελτίστων ἔσονται, τοῦ δήμου βουλομένου καὶ τοῖς ἐπιεικέσιν οὐ φθονοῦντος), καὶ τοῖς ἐπιεικέσι καὶ γνωρίμοις ἀρκοῦσαν εἶναι ταύτην τὴν τάξιν· ἄρξονται γὰρ οὐχ ὑπ' ἄλλων χειρόνων, καὶ ἄρξουσι δικαίως διὰ τὸ τῶν εὐθυνῶν εἶναι κυρίους ἐτέρους. τὸ γὰρ ἐπανακρέμασθαι, καὶ μὴ πᾶν ἐξεῖναι ποιεῖν ὅ τι ἂν δόξη, συμφέρον ἐστίν· ἡ γὰρ ἐξουσία τοῦ πράττειν ὅ τι ἂν ἐθέλῃ τις οὐ δύναται φυλάττειν τὸ ἐν [1319a] ἐκάστω τῶν ἀνθρώπων φαῦλον. ὥστε ἀναγκαῖον συμβαίνειν ὅπερ ἐστὶν ὠφελιμώτατον ἐν ταῖς πολιτείαις, ἄρχειν τοὺς ἐπιεικεῖς ἀναμαρτήτους ὄντας, μηδὲν ἐλαττουμένου τοῦ πλήθους.

ὅτι μὲν οὖν αὕτη τῶν δημοκρατιῶν ἀρίστη, φανερόν, καὶ διὰ τίν' αἰτίαν, ὅτι διὰ τὸ ποιόν τινα εἶναι τὸν δῆμον· πρὸς δὲ τὸ κατασκευάζειν γεωργικὸν τὸν δῆμον τῶν τε νόμων τινὲς τῶν παρὰ τοῖς πολλοῖς κειμένων τὸ ἀρχαῖον χρήσιμοι πάντως, ἢ τὸ ὅλως μὴ ἐξεῖναι κεκτῆσθαι πλείω γῆν μέτρου τινὸς ἢ ἀπὸ τινος τόπου πρὸς τὸ ἄστει καὶ τὴν πόλιν (ἦν δὲ τό γε ἀρχαῖον ἐν πολλαῖς πόλεσι νενομοθετημένον μηδὲ πωλεῖν ἐξεῖναι τοὺς πρώτους κλήρους· ἔστι δὲ καὶ ὃν λέγουσιν Ὁξύλου νόμον εἶναι τοιοῦτόν τι δυνάμενος, τὸ μὴ δανείζειν εἰς τι μέρος τῆς ὑπαρχούσης ἐκάστω γῆς), νῦν δὲ δεῖ διορθοῦν καὶ τῷ Ἀφυταίων νόμῳ, πρὸς γὰρ ὃ λέγομέν ἐστι χρήσιμος· ἐκεῖνοι γάρ, καίπερ ὄντες πολλοὶ κεκτημένοι δὲ γῆν ὀλίγην, ὅμως πάντες γεωργοῦσιν· τιμῶνται γὰρ οὐχ ὅλας τὰς κτήσεις, ἀλλὰ κατὰ τηλικαῦτα μόρια διαιροῦντες ὥστ' ἔχειν ὑπερβάλλειν ταῖς τιμήσεσι καὶ τοὺς πένητας.

μετὰ δὲ τὸ γεωργικὸν πλῆθος βέλτιστος δῆμός ἐστιν ὅπου νομεῖς εἰσι καὶ ζῶσιν ἀπὸ βοσκημάτων· πολλὰ γὰρ ἔχει τῇ γεωργίᾳ παραπλησίως, καὶ τὰ πρὸς τὰς πολεμικὰς πράξεις μάλισθ' οὗτοι γεγυμνασμένοι τὰς ἐξέεις καὶ χρήσιμοι τὰ σώματα καὶ δυνάμενοι θυραυλεῖν. τὰ δ' ἄλλα πλήθη πάντα σχεδόν, ἐξ ὧν αἱ λοιπαὶ δημοκραταὶ συνεστᾶσι, πολλῶ φαυλότερα τούτων· ὁ γὰρ βίος φαῦλος, καὶ οὐθὲν ἔργον μετ' ἀρετῆς ὧν μεταχειρίζεται τὸ πλῆθος τό τε τῶν βαναύσων καὶ τὸ τῶν ἀγοραίων ἀνθρώπων καὶ τὸ θητικόν, ἔτι δὲ διὰ τὸ περὶ τὴν ἀγορὰν καὶ τὸ ἄστει κυλίεσθαι πᾶν τὸ τοιοῦτον γένος ὡς εἰπεῖν ῥαδίως ἐκκλησιάζει· οἱ δὲ γεωργοῦντες διὰ τὸ διεσπάρθαι κατὰ τὴν χώραν οὕτ' ἀπαντῶσιν οὕθ' ὁμοίως δέονται τῆς

συνόδου ταύτης. ὅπου δὲ καὶ συμβαίνει τὴν χώραν τὴν θέσιν ἔχειν τοιαύτην ὥστε [τὴν χώραν] πολὺ τῆς πόλεως ἀπηρτῆσθαι, ῥάδιον καὶ δημοκρατίαν ποιεῖσθαι χρηστὴν καὶ πολιτείαν· ἀναγκάζεται γὰρ τὸ πλῆθος ἐπὶ τῶν ἀγρῶν ποιεῖσθαι τὰς ἀποικίας, ὥστε δεῖ, καὶ ἀγοραῖος ὄχλος ἢ, μὴ ποιεῖν ἐν ταῖς δημοκρατίαις ἐκκλησίας ἄνευ τοῦ κατὰ τὴν χώραν πλήθους. πῶς μὲν οὖν δεῖ κατασκευάζειν τὴν βελτίστην καὶ πρώτην δημοκρατίαν, εἴρηται· φανερόν δὲ καὶ πῶς τὰς ἄλλας. ἐπομένως γὰρ δεῖ παρεκβαίνειν [1319b] καὶ τὸ χεῖρον ἀεὶ πλῆθος χωρίζειν. τὴν δὲ τελευταίαν, διὰ τὸ πάντας κοινωνεῖν, οὔτε πάσης ἐστὶ πόλεως φέρειν, οὔτε ῥάδιον διαμένειν μὴ τοῖς νόμοις καὶ τοῖς ἔθεσιν εὖ συγκειμένην (ἃ δὲ φθεῖρειν συμβαίνει καὶ ταύτην καὶ τὰς ἄλλας πολιτείας, εἴρηται πρότερον τὰ πλείστα σχεδόν). πρὸς δὲ τὸ καθιστάναι ταύτην τὴν δημοκρατίαν καὶ τὸν δῆμον ποιεῖν ἰσχυρόν εἰώθασιν οἱ προεστώτες προσλαμβάνειν ὥς πλείστους καὶ ποιεῖν πολίτας μὴ μόνον τοὺς γνησίους ἀλλὰ καὶ τοὺς νόθους καὶ τοὺς ἐξ ὁποτέρου οὖν πολίτου, λέγω δὲ οἷον πατρός ἢ μητρός· ἅπαν γὰρ οἰκεῖον τοῦτο τῷ τοιούτῳ δῆμῳ μᾶλλον. εἰώθασι μὲν οὖν οἱ δημαγωγοὶ κατασκευάζειν οὕτω, δεῖ μέντοι προσλαμβάνειν μέχρι ἂν ὑπερτείνῃ τὸ πλῆθος τῶν γνωρίμων καὶ τῶν μέσων, καὶ τούτου μὴ πέρα προβαίνειν· ὑπερβάλλοντες γὰρ ἀτακτοτέραν τε ποιοῦσι τὴν πολιτείαν, καὶ τοὺς γνωρίμους πρὸς τὸ χαλεπῶς ὑπομένειν τὴν δημοκρατίαν παροξύνουσι μᾶλλον, ὅπερ συνέβη τῆς στάσεως αἴτιον γενέσθαι περὶ Κυρήνην· ὀλίγον μὲν γὰρ πονηρὸν παρορᾶται, πολὺ δὲ γινόμενον ἐν ὀφθαλμοῖς μᾶλλον ἐστίν. ἔτι δὲ καὶ τὰ τοιαῦτα κατασκευάσματα χρήσιμα πρὸς τὴν δημοκρατίαν τὴν τοιαύτην, οἷς Κλεισθένης τε Ἀθήνησιν ἐχρήσατο βουλόμενος αὐξῆσαι τὴν δημοκρατίαν, καὶ περὶ Κυρήνην οἱ τὸν δῆμον καθιστάντες. φυλαί τε γὰρ ἕτεραι ποιηταὶ πλείους καὶ φατρίαι, καὶ τὰ τῶν ἰδίων ἱερῶν συνακτέον εἰς ὀλίγα καὶ κοινά, καὶ πάντα σοφιστέον ὅπως ἂν ὅτι μάλιστα ἀναμειχθῶσι πάντες ἀλλήλοις, αἱ δὲ συνήθειαι διαζευχθῶσιν αἱ πρότερον. ἔτι δὲ καὶ τὰ τυραννικὰ κατασκευάσματα δημοτικὰ δοκεῖ πάντα, λέγω δ' οἷον ἀναρχία τε δούλων (αὕτη δ' ἂν εἴη μέχρι τοῦ συμφέρουσα) καὶ γυναικῶν καὶ παίδων, καὶ τὸ ζῆν ὅπως τις βούλεται παρορᾶν· πολὺ γὰρ ἔσται τὸ τῇ τοιαύτῃ πολιτείᾳ βοηθοῦν· ἥδιον γὰρ τοῖς πολλοῖς τὸ ζῆν ἀτάκτως ἢ τὸ σωφρόνως.

Ἔστι δ' [ἔργον] τοῦ νομοθέτου καὶ τῶν βουλομένων συνιστάναι τινὰ τοιαύτην πολιτείαν οὐ τὸ καταστήσαι μέγιστον

ἔργον οὐδὲ μόνον, ἀλλ' ὅπως σῶζεται μᾶλλον· μίαν γὰρ ἢ δύο ἢ τρεῖς ἡμέρας οὐ χαλεπὸν μεῖναι πολιτευομένους ὅπως οὖν. διὸ δεῖ, περὶ ὧν τεθεώρηται πρότερον, τίνες σωτηρία καὶ φθορα τῶν πολιτειῶν, ἐκ τούτων πειρᾶσθαι κατασκευάζειν τὴν ἀσφάλειαν, εὐλαβουμένους μὲν τὰ φθείροντα, τιθεμένους δὲ τοιοῦτους νόμους, καὶ τοὺς ἀγράφους καὶ τοὺς γεγραμμένους, [1320a] οἱ περιλήφονται μάλιστα τὰ σῶζοντα τὰς πολιτείας, καὶ μὴ νομίζειν τοῦτ' εἶναι δημοτικὸν μὴδ' ὀλιγαρχικὸν ὃ ποιήσει τὴν πόλιν ὅτι μάλιστα δημοκρατεῖσθαι ἢ ὀλιγαρχεῖσθαι, ἀλλ' ὃ πλείστον χρόνον. οἱ δὲ νῦν δημαγωγοὶ χαριζόμενοι τοῖς δήμοις πολλὰ δημεύουσι διὰ τῶν δικαστηρίων. διὸ δεῖ πρὸς ταῦτα ἀντιπράττειν τοὺς κηδομένους τῆς πολιτείας, νομοθετοῦντας μὴδὲν εἶναι δημόσιον τῶν καταδικαζομένων καὶ φερόμενον πρὸς τὸ κοινόν, ἀλλ' ἱερόν· οἱ μὲν γὰρ ἀδικοῦντες οὐθὲν ἥττον εὐλαβεῖς ἔσονται (ζημιώσονται γὰρ ὁμοίως), ὃ δ' ὄχλος ἥττον καταψηφιεῖται τῶν κρινομένων, λήψεσθαι μὴδὲν μέλλων. ἔτι δὲ τὰς γινομένας δημοσίας δίκας ὥς ὀλιγίστας αἰεὶ ποιεῖν, μεγάλοις ἐπιτιμίαις τοὺς εἰκῇ γραφομένους κωλύοντας· οὐ γὰρ τοὺς δημοτικούς ἀλλὰ τοὺς γνωρίμους εἰώθασιν εἰσάγειν, δεῖ δὲ τῇ πολιτείᾳ πάντας μάλιστα μὲν εὖνους εἶναι τοὺς πολίτας, εἰ δὲ μή, μὴ τοί γε ὥς πολεμίους νομίζειν τοὺς κυρίους.

ἐπεὶ δ' αἱ τελευταῖαι δημοκρατίαι πολυάνθρωποί τέ εἰσι καὶ χαλεπὸν ἐκκλησιάζειν ἀμίσθους, τοῦτο δ' ὅπου πρόσοδοι μὴ τυγχάνουσιν οὔσαι πολέμιον τοῖς γνωρίμοις (ἀπὸ τε γὰρ εἰσφορᾶς καὶ δημεύσεως ἀναγκαῖον γίνεσθαι καὶ δικαστηρίων φαύλων, ἃ πολλὰς ἤδη δημοκρατίας ἀνέτρεψεν), ὅπου μὲν οὖν πρόσοδοι μὴ τυγχάνουσιν οὔσαι, δεῖ ποιεῖν ὀλίγας ἐκκλησίας, καὶ δικαστήρια πολλῶν μὲν ὀλίγας δ' ἡμέρας (τοῦτο γὰρ φέρει μὲν καὶ πρὸς τὸ μὴ φοβεῖσθαι τοὺς πλουσίους τὰς δαπάνας, ἐὰν οἱ μὲν εὐποροὶ μὴ λαμβάνωσι δικαστικόν, οἱ δ' ἄποροι, φέρει δὲ καὶ πρὸς τὸ κρίνεσθαι τὰς δίκας πολὺ βέλτιον· οἱ γὰρ εὐποροὶ πολλὰς μὲν ἡμέρας οὐκ ἐθέλουσιν ἀπὸ τῶν ἰδίων ἀπεῖναι, βραχὺν δὲ χρόνον ἐθέλουσιν), ὅπου δ' εἰσὶ πρόσοδοι, μὴ ποιεῖν ὃ νῦν οἱ δημαγωγοὶ ποιοῦσιν (τὰ γὰρ περιόντα νέμουσιν· λαμβάνουσι δὲ ἅμα καὶ πάλιν δέονται τῶν αὐτῶν· ὃ τετρημένος γὰρ ἐστὶ πίθος ἢ τοιαύτη βοήθεια τοῖς ἀπόροις). ἀλλὰ δεῖ τὸν ἀληθινῶς δημοτικὸν ὁρᾶν ὅπως τὸ πλῆθος μὴ λίαν ἄπορον ᾗ· τοῦτο γὰρ αἷτιον τοῦ μοχθηρὰν εἶναι τὴν δημοκρατίαν. τεχναστὲον οὖν ὅπως ἂν εὐπορία γένοιτο χρόνιος. ἐπεὶ

δὲ συμφέρει τοῦτο καὶ τοῖς εὐπόροις, τὰ μὲν ἀπὸ τῶν προσόδων γινόμενα συναθροίζοντας ἄθροα χρή διανέμειν τοῖς ἀπόροις, μάλιστα μὲν εἴ τις δύναται τοσοῦτον ἀθροίζειν ὅσον εἰς γηδίου κτήσιν, εἰ δὲ μή, πρὸς ἀφορμὴν ἐμπορίας καὶ [1320b] γεωργίας, καί, εἰ μὴ πᾶσι δυνατόν, ἀλλὰ κατὰ φυλὰς ἢ τι μέρος ἕτερον ἐν μέρει διανέμειν, ἐν δὲ τούτῳ πρὸς τὰς ἀναγκαίας συνόδους τοὺς εὐπόρους εἰσφέρειν τὸν μισθόν, ἀφειμένους τῶν ματαίων λειτουργιῶν. τοιοῦτον δὲ τινα τρόπον Καρχηδόνιοι πολιτευόμενοι φίλον κέκτηνται τὸν δῆμον· αἰ γάρ τινας ἐκπέμποντες τοῦ δήμου πρὸς τὰς περιοικίδας ποιοῦσιν εὐπόρους. χαριέντων δ' ἐστὶ καὶ νοῦν ἐχόντων γνωρίμων καὶ διαλαμβάνοντας τοὺς ἀπόρους ἀφορμὰς διδόντας τρέπειν ἐπ' ἐργασίας. καλῶς δ' ἔχει μιμεῖσθαι καὶ τὰ Ταραντίνων. ἐκεῖνοι γὰρ κοινὰ ποιοῦντες τὰ κτήματα τοῖς ἀπόροις ἐπὶ τὴν χρῆσιν εὖνουν παρασκευάζουσι τὸ πλῆθος· ἔτι δὲ τὰς ἀρχὰς πάσας ἐποίησαν διττάς, τὰς μὲν αἰρετάς τὰς δὲ κληρωτάς, τὰς μὲν κληρωτάς ὅπως ὁ δῆμος αὐτῶν μετέχῃ, τὰς δ' αἰρετάς ἵνα πολιτεύωνται βέλτιον. ἔστι δὲ τοῦτο ποιῆσαι. καὶ τῆς αὐτῆς ἀρχῆς μερίζοντας τοὺς μὲν κληρωτοὺς τοὺς δ' αἰρετούς. πῶς μὲν οὖν δεῖ τὰς δημοκρατίας κατασκευάζειν, εἴρηται.

Σχεδὸν δὲ καὶ περὶ τὰς ὀλιγαρχίας πῶς δεῖ φανερόν ἐκ τούτων. ἐκ τῶν ἐναντίων γὰρ δεῖ συνάγειν ἐκάστην ὀλιγαρχίαν, πρὸς τὴν ἐναντίαν δημοκρατίαν ἀναλογιζόμενον, τὴν μὲν εὐκρατον μάλιστα τῶν ὀλιγαρχιῶν καὶ πρώτην - αὕτη δ' ἐστὶν ἡ σύνεγγυς τῇ καλουμένῃ πολιτεία, «ἐν» ἢ δεῖ τὰ τιμήματα διαιρεῖν, τὰ μὲν ἐλάττω τὰ δὲ μείζω ποιοῦντας, ἐλάττω μὲν ἀφ' ὧν τῶν ἀναγκαίων μεθέξουσιν ἀρχῶν, μείζω δ' ἀφ' ὧν τῶν κυριωτέρων· τῷ τε κτωμένῳ τὸ τίμημα μετέχειν ἐξεῖναι τῆς πολιτείας, τοσοῦτου εἰσαγομένου τοῦ δήμου πλῆθους διὰ τοῦ τιμήματος μεθ' οὗ κρείττονες ἔσονται τῶν μὴ μετεχόντων· αἰ δὲ δεῖ παραλαμβάνειν ἐκ τοῦ βελτίονος δήμου τοὺς κοινωνοὺς. ὁμοίως δὲ καὶ τὴν ἐχομένην ὀλιγαρχίαν ἐπιτείνοντας δεῖ μικρὸν κατασκευάζειν. τῇ δ' ἀντικειμένη τῇ τελευταία δημοκρατία, τῇ δυναστικωτάτῃ καὶ τυραννικωτάτῃ τῶν ὀλιγαρχιῶν, ὅσῳ περ χειρίστη, τοσοῦτῳ δεῖ πλείονος φυλακῆς. ὥσπερ γὰρ τὰ μὲν εὖ σώματα διακείμενα πρὸς ὑγίειαν καὶ πλοῖα τὰ πρὸς ναυτιλίαν καλῶς ἔχοντα τοῖς πλωτῆρσιν ἐπιδέχεται πλείους ἀμαρτίας ὥστε μὴ φθίρεισθαι δι' αὐτάς, τὰ δὲ νοσερῶς ἔχοντα τῶν σωμάτων καὶ τὰ τῶν πλοίων ἐκλελυμένα καὶ πλωτῆρων τετυχηκότα φαύλων οὐδὲ τὰς

μικρὰς δύναται φέρειν ἀμαρτίας, οὕτω καὶ τῶν πολιτειῶν αἱ χεῖριςται πλείστης δέονται [1321a] φυλακῆς. τὰς μὲν οὖν δημοκρατίας ὅλως ἢ πολυανθρωπία σφάζει (τοῦτο γὰρ ἀντίκειται πρὸς τὸ δίκαιον τὸ κατὰ τὴν ἀξίαν)· τὴν δ' ὀλιγαρχίαν δῆλον ὅτι τοῦναντίον ἀπὸ τῆς εὐταξίας δεῖ τυγχάνειν τῆς σωτηρίας.

Ἐπεὶ δὲ τέτταρα μὲν ἔστι μέρη μάλιστα τοῦ πλήθους, γεωργικὸν βαναυσικὸν ἀγοραῖον θητικόν, τέτταρα δὲ τὰ χρήσιμα πρὸς πόλεμον, ἵππικὸν ὀπλιτικὸν ψιλὸν ναυτικόν, ὅπου μὲν συμβέβηκε τὴν χώραν εἶναι ἱππασίμον, ἐνταῦθα μὲν εὐφυῶς ἔχει κατασκευάζειν τὴν ὀλιγαρχίαν ἰσχυράν (ἢ γὰρ σωτηρία τοῖς οἰκοῦσι διὰ ταύτης ἐστὶ τῆς δυνάμεως, αἱ δ' ἵπποτροφίαι τῶν μακρὰς οὐσίας κεκτημένων εἰσίν), ὅπου δ' ὀπλιτικὴν, τὴν ἐχομένην ὀλιγαρχίαν (τὸ γὰρ ὀπλιτικὸν τῶν εὐπόρων ἐστὶ μᾶλλον ἢ τῶν ἀπόρων), ἢ δὲ ψιλὴ δύναμις καὶ ναυτικὴ δημοτικὴ πάμπαν. νῦν μὲν οὖν ὅπου τοιοῦτον πολὺ πλῆθος ἔστιν, ὅταν διαστῶσι, πολλάκις ἀγωνίζονται χεῖρον· δεῖ δὲ πρὸς τοῦτο φάρμακον παρὰ τῶν πολεμικῶν λαμβάνειν στρατηγῶν, οἱ συνδυάζουσι πρὸς τὴν ἵππικὴν δύναμιν καὶ τὴν ὀπλιτικὴν τὴν ἀρμόττουσαν τῶν ψιλῶν. ταύτη δ' ἐπικρατοῦσιν ἐν ταῖς διαστάσεσιν οἱ δῆμοι τῶν εὐπόρων· ψιλοὶ γὰρ ὄντες πρὸς ἵππικὴν καὶ ὀπλιτικὴν ἀγωνίζονται ῥαδίως.

τὸ μὲν οὖν ἐκ τούτων καθιστάναι ταύτην τὴν δύναμιν ἐφ' ἑαυτούς ἐστι καθιστάναι, δεῖ δὲ διηρημένης τῆς ἡλικίας, καὶ τῶν μὲν ὄντων πρεσβυτέρων τῶν δὲ νέων, ἔτι μὲν ὄντας νέους τοὺς αὐτῶν υἱεῖς διδάσκεισθαι τὰς κούφας καὶ τὰς ψιλὰς ἐργασίας, ἐκκεκριμένους δὲ ἐκ παίδων ἀθλητὰς εἶναι αὐτοὺς τῶν ἔργων· τὴν δὲ μετάδοσιν γίνεσθαι τῷ πλήθει τοῦ πολιτεύματος ἥτοι καθάπερ εἴρηται πρότερον, τοῖς τὸ τίμημα κτωμένοις, ἢ καθάπερ Θηβαίοις, ἀποσχομένοις χρόνον τινὰ τῶν βαναύσων ἔργων, ἢ καθάπερ ἐν Μασσαλίᾳ κρίσιν ποιουμένους τῶν ἀξίων τῶν ἐν τῷ πολιτεύματι καὶ τῶν ἔξωθεν. ἔτι δὲ καὶ ταῖς ἀρχαῖς ταῖς κυριωτάταις, ἃς δεῖ τοὺς ἐν τῇ πολιτείᾳ κατέχειν, δεῖ προσκεῖσθαι λειτουργίας, ἵν' ἐκὼν ὁ δῆμος μὴ μετέχη καὶ συγγνώμην ἔχη τοῖς ἄρχουσιν ὥς μισθὸν πολὺν διδοῦσι τῆς ἀρχῆς. ἀρμόττει δὲ θυσίας τε εἰσιόντας ποιεῖσθαι μεγαλοπρεπεῖς καὶ κατασκευάζειν τι τῶν κοινῶν, ἵνα τῶν περὶ τὰς ἐστιάσεις μετέχων ὁ δῆμος καὶ τὴν πόλιν ὁρῶν κοσμουμένην τὰ μὲν ἀναθήμασι τὰ δὲ οἰκοδομήμασιν ἄσμενος ὁρᾷ μένουσαν τὴν πολιτείαν· συμβήσεται δὲ καὶ τοῖς γνωρίμοις εἶναι μνημεῖα τῆς δαπάνης. ἀλλὰ

τοῦτο νῦν οἱ περὶ τὰς ὀλιγαρχίας οὐ ποιοῦσιν, ἀλλὰ τοῦναντίον· τὰ λήμματα γὰρ ζητοῦσιν οὐχ ἥττον ἢ τὴν τιμὴν. διόπερ εὖ ἔχει λέγειν [1321b] ταύτας εἶναι δημοκρατίας μικράς. πῶς μὲν οὖν χρή καθιστάναι τὰς δημοκρατίας καὶ τὰς ὀλιγαρχίας, διωρίσθω τὸν τρόπον τοῦτον.

Ἀκόλουθον δὲ τοῖς εἰρημένοις ἐστὶ τὸ διηρηῆσθαι καλῶς τὰ περὶ τὰς ἀρχάς, πόσαι καὶ τίνες καὶ τίνων, καθάπερ εἴρηται καὶ πρότερον. τῶν μὲν γὰρ ἀναγκαίων ἀρχῶν χωρὶς ἀδύνατον εἶναι πόλιν, τῶν δὲ πρὸς εὐταξίαν καὶ κόσμον ἀδύνατον οἰκεῖσθαι καλῶς. ἔτι δ' ἀναγκαῖον ἐν μὲν ταῖς μικραῖς ἐλάττους εἶναι τὰς ἀρχάς, ἐν δὲ ταῖς μεγάλαις πλείους, ὥσπερ τυγχάνει πρότερον εἰρημένον· ποίας οὖν ἀρμόττει συνάγειν καὶ ποίας χωρίζειν, δεῖ μὴ λανθάνειν. πρώτη μὲν οὖν ἐπιμέλεια τῶν ἀναγκαίων ἢ περὶ τὴν ἀγοράν, ἐφ' ἣ δεῖ τινα ἀρχὴν εἶναι τὴν ἐφορῶσαν περὶ τε τὰ συμβόλαια καὶ τὴν εὐκοσμίαν· σχεδὸν γὰρ ἀναγκαῖον πάσαις ταῖς πόλεσι τὰ μὲν ὠνεῖσθαι τὰ δὲ πωλεῖν πρὸς τὴν ἀλλήλων ἀναγκαίαν χρεῖαν, καὶ τοῦτ' ἐστὶν ὑπογυιότατον πρὸς αὐτάρκειαν, δι' ἣν δοκοῦσιν εἰς μίαν πολιτείαν συνελθεῖν. ἑτέρα δὲ ἐπιμέλεια ταύτης ἐχομένη καὶ σύνεγγυς ἢ τῶν περὶ τὸ ἄστυ δημοσίων καὶ ιδίων, ὅπως εὐκοσμία ἦ, καὶ τῶν πιπτόντων οἰκοδομημάτων καὶ ὁδῶν σωτηρία καὶ διόρθωσις, καὶ τῶν ὀρίων τῶν πρὸς ἀλλήλους, ὅπως ἀνεγκλήτως ἔχωσιν, καὶ ὅσα τούτοις ἄλλα τῆς ἐπιμελείας ὁμοιότροπα. καλοῦσι δ' ἀστυνομίαν οἱ πλεῖστοι τὴν τοιαύτην ἀρχήν, ἔχει δὲ μόρια πλείω τὸν ἀριθμόν, ὢν ἑτέρους ἐφ' ἑτέρα καθιστᾷσιν ἐν ταῖς πολυανθρωποτέραις πόλεσιν, οἷον τειχοποιούς καὶ κρηνῶν ἐπιμελητὰς καὶ λιμένων φύλακας. ἄλλη δ' ἀναγκαία τε καὶ παραπλησία ταύτῃ· περὶ τῶν αὐτῶν μὲν γάρ, ἀλλὰ περὶ τὴν χώραν ἐστὶ καὶ [τὰ] περὶ τὰ ἔξω τοῦ ἄστεως· καλοῦσι δὲ τοὺς ἄρχοντας τούτους οἱ μὲν ἀγρονόμους οἱ δ' ὑλωρούς. αὗται μὲν οὖν ἐπιμέλειαί εἰσι τούτων τρεῖς, ἄλλη δ' ἀρχὴ πρὸς ἣν αἱ πρόσοδοι τῶν κοινῶν ἀναφέρονται, παρ' ὧν φυλαττόντων μερίζονται πρὸς ἐκάστην διοίκησιν· καλοῦσι δ' ἀποδέκτας τούτους καὶ ταμίαις. ἑτέρα δ' ἀρχὴ πρὸς ἣν ἀναγράφεσθαι δεῖ τὰ τε ἴδια συμβόλαια καὶ τὰς κρίσεις [ἐκ] τῶν δικαστηρίων· παρὰ δὲ ταῖς αὐτοῖς τούτοις καὶ τὰς γραφὰς τῶν δικῶν γίνεσθαι δεῖ καὶ τὰς εἰσαγωγάς. ἐνιαχοῦ μὲν οὖν μερίζουσι καὶ ταύτην εἰς πλείους, ἔστι δ' <οὗ> μία κυρία τούτων πάντων· καλοῦνται δὲ ἱερομνήμονες καὶ ἐπιστάται καὶ μνήμονες καὶ τούτοις ἄλλα ὀνόματα σύνεγγυς.

μετὰ δὲ ταύτην ἐχομένη μὲν ἀναγκαιοτάτῃ δὲ σχεδὸν καὶ χαλεπωτάτῃ τῶν ἀρχῶν ἐστὶν ἡ περὶ τὰς πράξεις τῶν καταδικασθέντων καὶ τῶν προτιθεμένων [1322a] κατὰ τὰς ἐγγραφὰς καὶ περὶ τὰς φυλακὰς τῶν σωμάτων. χαλεπὴ μὲν οὖν ἐστὶ διὰ τὸ πολλήν ἔχειν ἀπέχθειαν, ὥστε ὅπου μὴ μεγάλη ἐστὶ κερδαίνειν, οὐτ' ἄρχειν ὑπομένουσιν αὐτήν οὐθ' ὑπομείναντες ἐθέλουσι πράττειν κατὰ τοὺς νόμους· ἀναγκαία δ' ἐστίν, ὅτι οὐδὲν ὄφελος γίνεσθαι μὲν δίκας περὶ τῶν δικαίων, ταύτας δὲ μὴ λαμβάνειν τέλος, ὥστ' εἰ μὴ γιγνομένων κοινωνεῖν ἀδύνατον ἀλλήλοις, καὶ πράξεων μὴ γιγνομένων. διὸ βέλτιον μὴ μίαν εἶναι ταύτην τὴν ἀρχήν, ἀλλ' ἄλλους ἐξ ἄλλων δικαστηρίων, καὶ περὶ τὰς προθέσεις τῶν ἀναγεγραμμένων ὡσαύτως πειρᾶσθαι διαιρεῖν, ἔτι δ' ἔνια πράττεσθαι καὶ τὰς ἀρχὰς τὰς τε ἄλλας καὶ τὰς τῶν ἔνων μᾶλλον τὰς νέας, καὶ τὰς τῶν ἐνεστώτων ἐτέρας καταδικασάσης ἐτέραν εἶναι τὴν πραττομένην, οἷον ἀστυνόμους τὰς παρὰ τῶν ἀγορανόμων, τὰς δὲ παρὰ τούτων ἐτέρους. ὅσῳ γὰρ ἂν ἐλάττων ἀπέχθεια ἐνῇ τοῖς πραττομένοις, τοσοῦτ' ἂν μᾶλλον λήψονται τέλος αἱ πράξεις· τὸ μὲν οὖν τοὺς αὐτοὺς εἶναι τοὺς καταδικάσαντας καὶ πραττομένους ἀπέχθειαν ἔχει διπλὴν, τὸ δὲ περὶ πάντων τοὺς αὐτοὺς <ποιεῖ αὐτοὺς> πολεμίους πᾶσιν. πολλαχοῦ δὲ δὴ διήρηται καὶ ἡ φυλάττουσα πρὸς τὴν πραττομένην, οἷον Ἀθήνησιν <ἡ> τῶν Ἑνδεκα καλουμένων. διὸ βέλτιον καὶ ταύτην χωρίζειν, καὶ τὸ <αὐτὸ> σόφισμα ζητεῖν καὶ περὶ ταύτην. ἀναγκαία μὲν γάρ ἐστὶν οὐχ ἥττον τῆς εἰρημένης, συμβαίνει δὲ τοὺς μὲν ἐπιεικεῖς φεύγειν μάλιστα ταύτην τὴν ἀρχήν, τοὺς δὲ μοχθηροὺς οὐκ ἀσφαλὲς ποιεῖν κυρίους· αὐτοὶ γὰρ δέονται φυλακῆς μᾶλλον ἢ φυλάττειν ἄλλους δύνανται. διὸ δεῖ μὴ μίαν ἀποτεταγμένην ἀρχὴν εἶναι πρὸς αὐτοὺς, μηδὲ συνεχῶς τὴν αὐτήν, ἀλλὰ τῶν τε νέων, ὅπου τις ἐφήβων ἢ φρουρῶν ἔστι τάξις, καὶ τῶν ἀρχῶν δεῖ κατὰ μέρη ποιεῖσθαι τὴν ἐπιμέλειαν ἐτέρους.

ταύτας μὲν οὖν τὰς ἀρχὰς ὡς ἀναγκαιοτάτας θετέον εἶναι πρώτας, μετὰ δὲ ταύτας τὰς ἀναγκαίας μὲν οὐθὲν ἥττον, ἐν σχήματι δὲ μείζονι τεταγμένας· καὶ γὰρ ἐμπειρίας καὶ πίστεως δέονται πολλῆς. τοιαῦται δ' εἶεν ἂν αἱ τε περὶ τὴν φυλακὴν τῆς πόλεως, καὶ ὅσαι τάττονται πρὸς τὰς πολεμικὰς χρείας. δεῖ δὲ καὶ ἐν εἰρήνῃ καὶ ἐν πολέμῳ πυλῶν τε καὶ τειχῶν φυλακῆς ὁμοίως ἐπιμελητὰς εἶναι καὶ ἐξετάσεως καὶ συντάξεως τῶν πολιτῶν. ἔνθα μὲν οὖν ἐπὶ πᾶσι τούτοις ἀρχαὶ πλείους εἰσὶν, ἔνθα δ' ἐλάττους, οἷον ἐν ταῖς μικραῖς

πόλεσι μία περί πάντων. καλοῦσι δὲ στρατηγούς καὶ πολεμάρχους [1322b] τοὺς τοιούτους. ἔτι δὲ κἂν ὥσιν ἱππεῖς ἢ ψιλοὶ ἢ τοξόται ἢ ναυτικόν, καὶ ἐπὶ τούτων ἐκάστων ἐνίοτε καθίσταται ἀρχή, αἱ καλοῦνται ναυαρχαὶ καὶ ἱππαρχαὶ καὶ ταξιάρχαι, καὶ κατὰ μέρος δὲ αἱ ὑπὸ ταύτας τριηραρχαὶ καὶ λοχαγαὶ καὶ φυλαρχαὶ καὶ ὅσα τούτων μόρια. τὸ δὲ πᾶν ἔν τι τούτου ἐστὶν εἶδος, ἐπιμελείας πολεμικῶν.

περὶ μὲν οὖν ταύτην τὴν ἀρχὴν ἔχει τὸν τρόπον τοῦτον· ἐπεὶ δὲ ἔναιαι τῶν ἀρχῶν, εἰ καὶ μὴ πᾶσαι, διαχειρίζουσι πολλὰ τῶν κοινῶν, ἀναγκαῖον ἑτέραν εἶναι τὴν ληψομένην λογισμὸν καὶ προσευθυνοῦσαν, αὐτὴν μὴθὲν διαχειρίζουσιν ἕτερον· καλοῦσι δὲ τούτους οἱ μὲν εὐθύνους οἱ δὲ λογιστὰς οἱ δ' ἐξεταστὰς οἱ δὲ συνηγόρους. παρὰ πάσας δὲ ταύτας τὰς ἀρχὰς ἢ μάλιστα κυρία πάντων ἐστίν· ἡ γὰρ αὐτὴ πολλάκις ἔχει τὸ τέλος καὶ τὴν εἰσφορὰν ἢ προκάθεται τοῦ πλήθους, ὅπου κύριός ἐστιν ὁ δῆμος· δεῖ γὰρ εἶναι τὸ συνάγον τὸ κύριον τῆς πολιτείας. καλεῖται δὲ ἔνθα μὲν πρόβουλοι διὰ τὸ προβουλεύειν, ὅπου δὲ πλήθός ἐστι, βουλὴ μᾶλλον. αἱ μὲν οὖν πολιτικαὶ τῶν ἀρχῶν σχεδὸν τοσαῦταί τινές εἰσιν· ἄλλο δ' εἶδος ἐπιμελείας ἢ περὶ τοὺς θεοὺς, οἷον ἱερεῖς τε καὶ ἐπιμεληταὶ τῶν περὶ τὰ ἱερὰ τοῦ σφῶζεσθαι τε τὰ ὑπάρχοντα καὶ ἀνορθοῦσθαι τὰ πίπτοντα τῶν οἰκοδομημάτων καὶ τῶν ἄλλων ὅσα τέτακται πρὸς τοὺς θεοὺς. συμβαίνει δὲ τὴν ἐπιμέλειαν ταύτην ἐνιαχοῦ μὲν εἶναι μίαν, οἷον ἐν ταῖς μικραῖς πόλεσιν, ἐνιαχοῦ δὲ πολλὰς καὶ κεχωρισμένας τῆς ἱερωσύνης, οἷον ἱεροποιοὺς καὶ ναοφύλακας καὶ ταμίας τῶν ἱερῶν χρημάτων. ἐχομένη δὲ ταύτης ἢ πρὸς τὰς θυσίας ἀφωρισμένη τὰς κοινὰς πάσας, ὅσας μὴ τοῖς ἱερεῦσιν ἀποδίδωσιν ὁ νόμος, ἀλλ' ἀπὸ τῆς κοινῆς ἐστίας ἔχουσι τὴν τιμὴν· καλοῦσι δ' οἱ μὲν ἄρχοντας τούτους οἱ δὲ βασιλεῖς οἱ δὲ πρυτάνεις.

αἱ μὲν οὖν ἀναγκαῖαι ἐπιμέλειαί εἰσι περὶ τούτων, ὥς εἰπεῖν συγκεφαλαιωσαμένους, περὶ τε τὰ δαιμόνια καὶ τὰ πολεμικὰ καὶ περὶ τὰς προσόδους καὶ τὰ ἀναλίσκόμενα, καὶ περὶ ἀγορὰν καὶ περὶ τὸ ἄστυ καὶ λιμένας καὶ τὴν χώραν, ἔτι περὶ τὰ δικαστήρια, καὶ συναλλαγμάτων ἀναγραφὰς καὶ πράξεις καὶ φυλακὰς καὶ ἐπιλογισμούς τε καὶ ἐξετάσεις καὶ προσευθύνας τῶν ἀρχόντων, καὶ τέλος αἱ περὶ τὸ βουλευόμενόν εἰσι «περὶ» τῶν κοινῶν· ἴδια δὲ ταῖς σχολαστικωτέραις καὶ μᾶλλον εὐημερούσαις πόλεσιν, ἔτι δὲ φροντισούσαις εὐκοσμίας, γυναικονομία νομοφυλακία παιδονομία

[1323a] γυμνασιαρχία, πρὸς δὲ τούτοις περὶ ἀγῶνας ἐπιμέλεια γυμνικοῦς καὶ Διονυσιακοῦς, κἂν εἴ τινας ἑτέρας συμβαίνει τοιαύτας γίνεσθαι θεωρίας. τούτων δ' ἔναι φανερώς εἰσιν οὐ δημοτικαὶ τῶν ἀρχῶν, οἷον γυναικονομία καὶ παιδονομία· τοῖς γὰρ ἀπόροις ἀνάγκη χρῆσθαι καὶ γυναιξὶ καὶ παισὶν ὥσπερ ἀκολούθοις διὰ τὴν ἀδουλίαν. τριῶν δ' οὐσῶν ἀρχῶν καθ' ἃς αἰροῦνται τινες ἀρχὰς τὰς κυρίου, νομοφυλάκων προβούλων βουλῆς, οἱ μὲν νομοφύλακες ἀριστοκρατικόν, ὀλιγαρχικόν δ' οἱ πρόβουλοι, βουλὴ δὲ δημοτικόν. περὶ μὲν οὖν τῶν ἀρχῶν, ὥς ἐν τύπῳ, σχεδὸν εἴρηται περὶ πασῶν.

Η

Περὶ δὲ πολιτείας ἀρίστης τὸν μέλλοντα ποιήσασθαι τὴν προσήκουσαν ζήτησιν ἀνάγκη διορίσασθαι πρῶτον τίς αἰρετώτατος βίος. ἀδήλου γὰρ ὄντος τούτου καὶ τὴν ἀρίστην ἀναγκαῖον ἄδηλον εἶναι πολιτείαν· ἄριστα γὰρ πράττειν προσήκει τοὺς ἄριστα πολιτευομένους ἐκ τῶν ὑπαρχόντων αὐτοῖς, ἐὰν μὴ τι γίγνηται παράλογον. διὸ δεῖ πρῶτον ὁμολογεῖσθαι τίς ὁ πᾶσιν ὡς εἰπεῖν αἰρετώτατος βίος, μετὰ δὲ τοῦτο πότερον κοινῇ καὶ χωρὶς ὁ αὐτὸς ἢ ἕτερος. νομίσαντας οὖν ἱκανῶς πολλὰ λέγεσθαι καὶ τῶν ἐν τοῖς ἐξωτερικοῖς λόγοις περὶ τῆς ἀρίστης ζωῆς, καὶ νῦν χρηστέον αὐτοῖς. ὡς ἀληθῶς γὰρ πρὸς γε μίαν διαίρεσιν οὐδεὶς ἀμφισβητήσειεν ἂν ὡς οὐ, τριῶν οὐσῶν μερίδων, τῶν τε ἐκτὸς καὶ τῶν ἐν τῷ σώματι καὶ τῶν ἐν τῇ ψυχῇ, πάντα ταῦτα ὑπάρχειν τοῖς μακαρίοις χρή. οὐδεὶς γὰρ ἂν φαίη μακάριον τὸν μηθὲν μόριον ἔχοντα ἀνδρείας μηδὲ σωφροσύνης μηδὲ δικαιοσύνης μηδὲ φρονήσεως, ἀλλὰ δεδιότα μὲν τὰς παραπετομένας μυίας, ἀπεχόμενον δὲ μηθενός, ἂν ἐπιθυμήσῃ τοῦ φαγεῖν ἢ πιεῖν, τῶν ἐσχάτων, ἔνεκα δὲ τεταρτημορίου διαφθείροντα τοὺς φιλτάτους φίλους, ὁμοίως δὲ καὶ τὰ περὶ τὴν διάνοιαν οὕτως ἄφρονα καὶ διεψευσμένον ὥσπερ τι παιδίον ἢ μαινόμενον. ἀλλὰ ταῦτα μὲν λεγόμενα ὥσπερ πάντες ἂν συγχωρήσειαν, διαφέρονται δ' ἐν τῷ ποσῷ καὶ ταῖς ὑπεροχαῖς. τῆς μὲν γὰρ ἀρετῆς ἔχειν ἱκανὸν εἶναι νομίζουσιν ὅποσονοῦν, πλούτου δὲ καὶ χρημάτων καὶ δυνάμεως καὶ δόξης καὶ πάντων τῶν τοιούτων εἰς ἄπειρον ζητοῦσι τὴν ὑπερβολήν. ἡμεῖς δὲ αὐτοῖς ἐροῦμεν ὅτι ῥάδιον μὲν περὶ τούτων καὶ διὰ τῶν ἔργων λαμβάνειν τὴν πίστιν, ὁρῶντας ὅτι κτῶνται καὶ φυλάττουσιν οὐ τὰς ἀρετὰς τοῖς ἐκτὸς ἀλλ' ἐκεῖνα ταύταις, [1323b] καὶ τὸ ζῆν εὐδαιμόνως, εἴτ' ἐν τῷ χαίρειν ἐστὶν εἴτ' ἐν ἀρετῇ τοῖς ἀνθρώποις εἴτ' ἐν ἀμφοῖν, ὅτι μᾶλλον ὑπάρχει τοῖς τὸ ἥθος μὲν καὶ τὴν διάνοιαν κεκοσμημένοις εἰς ὑπερβολήν, περὶ δὲ τὴν ἔξω κτῆσιν τῶν ἀγαθῶν μετριάζουσιν, ἢ τοῖς ἐκεῖνα μὲν κεκτημένοις πλείω τῶν χρησίμων, ἐν δὲ τούτοις ἐλλείπουσιν· οὐ μὴν ἀλλὰ καὶ κατὰ τὸν λόγον σκοποῦμένοις εὐσύνοπτόν ἐστιν. τὰ μὲν γὰρ ἐκτὸς ἔχει πέρας, ὥσπερ ὄργανόν τι, πᾶν τε τὸ χρήσιμον εἰς τι· ὣν τὴν ὑπερβολὴν ἢ βλάβειν ἀναγκαῖον ἢ μηθὲν ὄφελος εἶναι τοῖς ἔχουσιν, τῶν δὲ περὶ ψυχὴν ἕκαστον

ἀγαθῶν, ὅσῳ περ ἂν ὑπερβάλλῃ, τοσούτῳ μᾶλλον χρήσιμον εἶναι, εἰ δεῖ καὶ τούτοις ἐπιλέγειν μὴ μόνον τὸ καλὸν ἀλλὰ καὶ τὸ χρήσιμον. ὅλως τε δηλὸν ὡς ἀκολουθεῖν φήσομεν τὴν διάθεσιν τὴν ἀρίστην ἐκάστου πράγματος πρὸς ἄλληλα κατὰ τὴν ὑπεροχὴν ἣν περ εἴληχε ταῦτα ὧν φαμεν αὐτὰς εἶναι διαθέσεις [ταύτας]. ὥστ' εἴπερ ἐστὶν ἡ ψυχὴ καὶ τῆς κτήσεως καὶ τοῦ σώματος τιμιώτερον καὶ ἀπλῶς καὶ ἡμῖν, ἀνάγκη καὶ τὴν διάθεσιν τὴν ἀρίστην ἐκάστου ἀνάλογον τούτων ἔχειν. ἔτι δὲ τῆς ψυχῆς ἕνεκεν ταῦτα πέφυκεν αἰρετὰ καὶ δεῖ πάντας αἰρεῖσθαι τοὺς εὖ φρονοῦντας, ἀλλ' οὐκ ἐκείνων ἕνεκεν τὴν ψυχὴν.

ὅτι μὲν οὖν ἐκάστῳ τῆς εὐδαιμονίας ἐπιβάλλει τοσοῦτον ὅσον περ ἀρετῆς καὶ φρονήσεως καὶ τοῦ πράττειν κατὰ ταύτας, ἔστω συνωμολογημένον ἡμῖν, μάρτυρι τῷ θεῷ χρωμένοις, ὃς εὐδαίμων μὲν ἐστὶ καὶ μακάριος, δι' οὐθὲν δὲ τῶν ἐξωτερικῶν ἀγαθῶν ἀλλὰ δι' αὐτὸν αὐτὸς καὶ τῷ ποιός τις εἶναι τὴν φύσιν, ἐπεὶ καὶ τὴν εὐτυχίαν τῆς εὐδαιμονίας διὰ ταῦτ' ἀναγκαῖον ἐτέραν εἶναι (τῶν μὲν γὰρ ἐκτὸς ἀγαθῶν τῆς ψυχῆς αἴτιον ταυτόματον καὶ ἡ τύχη, δίκαιος δ' οὐδεὶς οὐδὲ σώφρων ἀπὸ τύχης οὐδὲ διὰ τὴν τύχην ἐστίν)· ἐχόμενον δ' ἐστὶ καὶ τῶν αὐτῶν λόγων δεόμενον καὶ πόλιν εὐδαίμονα τὴν ἀρίστην εἶναι καὶ πράττουσαν καλῶς. ἀδύνατον δὲ καλῶς πράττειν τοῖς μὴ τὰ καλὰ πράττουσιν· οὐθὲν δὲ καλὸν ἔργον οὔτ' ἀνδρὸς οὔτε πόλεως χωρὶς ἀρετῆς καὶ φρονήσεως· ἀνδρεία δὲ πόλεως καὶ δικαιοσύνη καὶ φρόνησις «καὶ σωφροσύνη» τὴν αὐτὴν ἔχει δύναμιν καὶ μορφήν ὧν μετασχὼν ἕκαστος τῶν ἀνθρώπων λέγεται «ἀνδρεῖος καὶ» δίκαιος καὶ φρόνιμος καὶ σώφρων. ἀλλὰ γὰρ ταῦτα μὲν ἐπὶ τοσοῦτον ἔστω πεφροισμασμένα τῷ λόγῳ· οὔτε γὰρ μὴ θιγγάνειν αὐτῶν δυνατόν, οὔτε πάντας τοὺς οἰκείους ἐπεξελθεῖν ἐνδέχεται λόγους, ἐτέρας γὰρ ἐστὶν ἔργον σχολῆς ταῦτα· νῦν δὲ ὑποκείσθω τοσοῦτον, ὅτι βίος μὲν ἄριστος, καὶ χωρὶς ἐκάστῳ καὶ κοινῇ ταῖς πόλεσιν, ὁ μετ' ἀρετῆς κεχορηγημένης [1324a] ἐπὶ τοσοῦτον ὥστε μετέχειν τῶν κατ' ἀρετὴν πράξεων, πρὸς δὲ τοὺς ἀμφισβητοῦντας, ἐάσαντας ἐπὶ τῆς νῦν μεθόδου, διασκεπτέον ὕστερον, εἴ τις τοῖς εἰρημένοις τυγχάνει μὴ πειθόμενος.

Πότερον δὲ τὴν εὐδαιμονίαν τὴν αὐτὴν εἶναι φατέον ἐνός τε ἐκάστου τῶν ἀνθρώπων καὶ πόλεως ἢ μὴ τὴν αὐτὴν, λοιπὸν ἐστὶν εἰπεῖν. φανερόν δὲ καὶ τοῦτο. πάντες γὰρ ἂν ὁμολογήσειαν εἶναι τὴν αὐτὴν. ὅσοι γὰρ ἐν πλούτῳ τὸ ζῆν εὖ τίθενται ἐφ' ἐνός, οὗτοι καὶ τὴν

πόλιν ὅλην, ἐὰν ἡ πλουσία, μακαρίζουσιν· ὅσοι τε τὸν τυραννικὸν βίον μάλιστα τιμῶσιν, οὗτοι καὶ πόλιν τὴν πλείστων ἄρχουσαν εὐδαιμονεστάτην ἂν εἶναι φαῖεν· εἴ τέ τις τὸν ἓνα δι' ἀρετὴν ἀποδέχεται, καὶ πόλιν εὐδαιμονεστέραν φήσει τὴν σπουδαιότεραν. ἀλλὰ ταῦτ' ἤδη δύο ἐστὶν ἃ δεῖται σκέψεως, ἐν μὲν πότερος αἰρετώτερος βίος, ὁ διὰ τοῦ συμπολιτεύεσθαι καὶ κοινωνεῖν πόλεως ἢ μᾶλλον ὁ ξενικὸς καὶ τῆς πολιτικῆς κοινωνίας ἀπολελυμένος, ἔτι δὲ τίνα πολιτείαν θετέον καὶ ποίαν διάθεσιν πόλεως ἀρίστην, εἴτε πᾶσιν ὄντος αἰρετοῦ <τοῦ> κοινωνεῖν πόλεως εἴτε καὶ τισὶ μὲν μὴ τοῖς δὲ πλείστοις. ἐπεὶ δὲ τῆς πολιτικῆς διανοίας καὶ θεωρίας τοῦτ' ἐστὶν ἔργον, ἀλλ' οὐ τὸ περὶ ἕκαστον αἰρετόν, ἡμεῖς δὲ ταύτην προηρήμεθα νῦν τὴν σκέψιν, ἐκεῖνο μὲν πάρεργον ἂν εἴη, τοῦτο δὲ ἔργον τῆς μεθόδου ταύτης. ὅτι μὲν οὖν ἀναγκαῖον εἶναι πολιτείαν ἀρίστην ταύτην <τὴν> τάξιν καθ' ἣν κἂν ὅστισοῦν ἄριστα πράττοι καὶ ζῶη μακαρίως, φανερόν ἐστιν· ἀμφισβητεῖται δὲ παρ' αὐτῶν τῶν ὁμολογούντων τὸν μετ' ἀρετῆς εἶναι βίον αἰρετώτατον πότερον ὁ πολιτικὸς καὶ πρακτικὸς βίος αἰρετὸς ἢ μᾶλλον ὁ πάντων τῶν ἐκτὸς ἀπολελυμένος, οἷον θεωρητικὸς τις, ὃν μόνον τινὲς φασιν εἶναι φιλοσόφου. σχεδὸν γὰρ τούτους τοὺς δύο βίους τῶν ἀνθρώπων οἱ φιλοτιμιότατοι πρὸς ἀρετὴν φαίνονται προαιρούμενοι, καὶ τῶν προτέρων καὶ τῶν νῦν· λέγω δὲ δύο τὸν τε πολιτικὸν καὶ τὸν φιλόσοφον. διαφέρει δὲ οὐ μικρὸν ποτέως ἔχει τὸ ἀληθές· ἀνάγκη γὰρ τὸν γε εὖ φρονούντα πρὸς τὸν βελτίω σκοπὸν συντάττεσθαι, καὶ τῶν ἀνθρώπων ἕκαστον καὶ κοινῇ τὴν πολιτείαν. νομίζουσι δ' οἱ μὲν τὸ τῶν πέλας ἄρχειν δεσποτικῶς μὲν γιγνόμενον μετ' ἀδικίας τινὸς εἶναι τῆς μεγίστης, πολιτικῶς δὲ τὸ μὲν ἄδικον οὐκ ἔχειν, ἐμπόδιον δὲ ἔχειν τῇ περὶ αὐτὸν εὐημερίᾳ· τούτων δ' ὥσπερ ἐξ ἐναντίας ἕτεροι τυγχάνουσι δοξάζοντες· μόνον γὰρ ἀνδρὸς τὸν πρακτικὸν εἶναι βίον καὶ πολιτικόν· ἀφ' ἐκάστης γὰρ ἀρετῆς οὐκ εἶναι πράξεις μᾶλλον τοῖς ιδιώταις [1324b] ἢ τοῖς τὰ κοινὰ πράττουσι καὶ πολιτευομένοις. οἱ μὲν οὖν οὕτως ὑπολαμβάνουσιν, οἱ δὲ τὸν δεσποτικὸν καὶ τυραννικὸν τρόπον τῆς πολιτείας εἶναι μόνον εὐδαιμόνιᾳ φασιν. παρ' ἐνίοις δ' οὗτος καὶ τῶν νόμων καὶ τῆς πολιτείας ὅρος, ὅπως δεσπόζωσι τῶν πέλας. διὸ καὶ τῶν πλείστων νομίμων χύδην ὡς εἰπεῖν κειμένων παρὰ τοῖς πλείστοις, ὅμως εἴ πού τι πρὸς ἐν οἱ νόμοι βλέπουσι, τοῦ κρατεῖν στοχάζονται πάντες, ὥσπερ ἐν Λακεδαιμόνι καὶ Κρήτῃ πρὸς τοὺς πολέμους συντέτακται σχεδὸν ἢ τε παιδεία καὶ

τὸ τῶν νόμων πλῆθος· ἔτι δ' ἐν τοῖς ἔθνεσι πᾶσι τοῖς δυναμένοις πλεονεκτεῖν ἢ τοιαύτη τετίμηται δύναμις, οἷον ἐν Σκύθαις καὶ Πέρσαις καὶ Θραξὶ καὶ Κελτοῖς. ἐν ἐνίοις γὰρ καὶ νόμοι τινές εἰσι παροξύνοντες πρὸς τὴν ἀρετὴν ταύτην, καθάπερ ἐν Καρχηδόνι φασὶ τὸν ἐκ τῶν κρίκων κόσμον λαμβάνειν ὅσας ἂν στρατεύσωνται στρατείας· ἣν δέ ποτε καὶ περὶ Μακεδονίαν νόμος τὸν μηθένα ἀπεκταγκότα πολέμιον ἄνδρα περιεζῶσθαι τὴν φορβειάν· ἐν δὲ Σκύθαις οὐκ ἐξῆν πίνειν ἐν ἐορτῇ τινι σκύφον περιφερόμενον τῷ μηθένα ἀπεκταγκότι πολέμιον· ἐν δὲ τοῖς Ἰβηρσιν, ἔθνει πολεμικῷ, τοσοῦτους τὸν ἀριθμὸν ὀβελίσκους καταπηγνύουσι περὶ τὸν τάφον ὅσους ἂν διαφθεῖρη τῶν πολεμίων· καὶ ἕτερα δὴ παρ' ἐτέροις ἔστι τοιαῦτα πολλὰ, τὰ μὲν νόμοις κατελιμμένα τὰ δὲ ἔθεσιν.

καίτοι δόξειεν ἂν ἄγαν ἄτοπον ἴσως εἶναι τοῖς βουλομένοις ἐπισκοπεῖν, εἰ τοῦτ' ἐστὶν ἔργον τοῦ πολιτικοῦ, τὸ δύνασθαι θεωρεῖν ὅπως ἄρχῃ καὶ δεσπόζῃ τῶν πλησίον, καὶ βουλομένων καὶ μὴ βουλομένων. πῶς γὰρ ἂν εἴη τοῦτο πολιτικὸν ἢ νομοθετικόν, ὃ γε μὴδὲ νόμιμόν ἐστιν; οὐ νόμιμον δὲ τὸ μὴ μόνον δικαίως ἀλλὰ καὶ ἀδίκως ἄρχειν, κρατεῖν δ' ἔστι καὶ μὴ δικαίως. ἀλλὰ μὴν οὐδ' ἐν ταῖς ἄλλαις ἐπιστήμαις τοῦτο ὀρῶμεν· οὔτε γὰρ τοῦ ἱατροῦ οὔτε τοῦ κυβερνήτου ἔργον ἐστὶ τὸ ἢ πεῖσαι ἢ βιάσασθαι τοῦ μὲν τοὺς θεραπευομένους τοῦ δὲ τοὺς πλωτῆρας. ἀλλ' εἰκόασιν οἱ πολλοὶ τὴν δεσποτικὴν πολιτικὴν οἶεσθαι εἶναι, καὶ ὅπερ αὐτοῖς ἕκαστοι οὐ φασιν εἶναι δίκαιον οὐδὲ συμφέρον, τοῦτ' οὐκ αἰσχύνονται πρὸς τοὺς ἄλλους ἀσκοῦντες· αὐτοὶ μὲν γὰρ παρ' αὐτοῖς τὸ δικαίως ἄρχειν ζητοῦσι, πρὸς δὲ τοὺς ἄλλους οὐδὲν μέλει τῶν δικαίων. ἄτοπον δὲ εἰ μὴ φύσει τὸ μὲν δεσποστόν ἐστι τὸ δὲ οὐ δεσποστόν, ὥστε εἴπερ ἔχει τὸν τρόπον τοῦτον, οὐ δεῖ πάντων πειρᾶσθαι δεσπόζειν, ἀλλὰ τῶν δεσποστῶν, ὥσπερ οὐδὲ θηρεύειν ἐπὶ θοίνην ἢ θυσίαν ἀνθρώπους, ἀλλὰ τὸ πρὸς τοῦτο θηρευτόν· ἔστι δὲ θηρευτόν ὃ ἂν ἄγριον ἢ ἐδεστόν ζῶον. ἀλλὰ μὴν εἴη γ' ἂν καὶ [1325a] καθ' ἑαυτὴν μία πόλις εὐδαίμων, ἢ πολιτεύεται δηλονότι καλῶς, εἴπερ ἐνδέχεται πόλιν οἰκεῖσθαι που καθ' ἑαυτὴν νόμοις χρωμένῃ σπουδαίοις, ἧς τῆς πολιτείας ἢ σύνταξις οὐ πρὸς πόλεμον οὐδὲ πρὸς τὸ κρατεῖν ἔσται τῶν πολεμίων· μὴθὲν γὰρ ὑπαρχέτω τοιοῦτον. δῆλον ἄρα ὅτι πάσας τὰς πρὸς τὸν πόλεμον ἐπιμελείας καλὰς μὲν θετέον, οὐχ ὥς τέλος δὲ πάντων ἀκρότατον, ἀλλ' ἐκείνου χάριν ταύτας. τοῦ δὲ νομοθέτου τοῦ σπουδαίου ἐστὶ τὸ θεάσασθαι πόλιν καὶ γένος ἀνθρώπων καὶ πᾶσαν

ἄλλην κοινωνίαν, ζωῆς ἀγαθῆς πῶς μεθεξουσιν καὶ τῆς ἐνδεχομένης αὐτοῖς εὐδαιμονίας. διοίσει μέντοι τῶν ταπτομένων ἔνια νομίμων· καὶ τοῦτο τῆς νομοθετικῆς ἐστὶν ἰδεῖν, ἐάν τινες ὑπάρχωσι γειννῶντες, ποῖα πρὸς ποίους ἀσκητέον καὶ πῶς τοῖς καθήκουσι πρὸς ἐκάστους χρηστέον. ἀλλὰ τοῦτο μὲν κἂν ὕστερον τύχοι τῆς προσηκούσης σκέψεως, πρὸς τί τέλος δεῖ τὴν ἀρίστην πολιτείαν συντείνειν·

καίτοι τάχ' ἂν ὑπολάβοι τις τούτων οὕτω διωρισμένων ὅτι τὸ κύριον εἶναι πάντων ἄριστον· οὕτω γὰρ ἂν πλείστων καὶ καλλίστων κύριος εἴη πράξεων. ὥστε οὐ δεῖ τὸν δυνάμενον ἄρχειν παριέναι τῷ πλησίον, ἀλλὰ μᾶλλον ἀφαιρεῖσθαι, καὶ μήτε πατέρα παίδων μήτε παῖδας πατρὸς μήθ' ὅλως φίλον φίλου μηθένα ὑπόλογον «ἔχειν» μηδὲ πρὸς τοῦτο φροντίζειν· τὸ γὰρ ἄριστον αἰρετώτατον, τὸ δ' εὖ πράττειν ἄριστον. τοῦτο μὲν οὖν ἀληθῶς ἴσως λέγουσιν, εἴπερ [1325b] ὑπάρξει τοῖς ἀποστεροῦσι καὶ βιαζομένοις τὸ τῶν ὄντων αἰρετώτατον· ἀλλ' ἴσως οὐχ οἷόν τε ὑπάρχειν, ἀλλ' ὑποτίθενται τοῦτο ψεῦδος. οὐ γὰρ ἔτι καλὰς τὰς πράξεις ἐνδέχεται εἶναι τῷ μὴ διαφέροντι τοσοῦτον ὅσον ἀνὴρ γυναικὸς ἢ πατὴρ τέκνων ἢ δεσπότης δούλων· ὥστε ὁ παραβαίνων οὐθὲν ἂν τηλικούτον κατορθώσειεν ὕστερον ὅσον ἤδη παρεκβέβηκε τῆς ἀρετῆς. τοῖς γὰρ

ὁμοίοις τὸ καλὸν καὶ τὸ δίκαιον ἐν τῷ «ἐν» μέρει, τοῦτο γὰρ ἴσον καὶ ὁμοιον· τὸ δὲ μὴ ἴσον τοῖς ἴσοις καὶ τὸ μὴ ὁμοιον τοῖς ὁμοίοις παρὰ φύσιν, οὐδὲν δὲ τῶν παρὰ φύσιν καλόν. διὸ καὶ ἄλλος τις ἢ κρείττων κατ' ἀρετὴν καὶ κατὰ δύναμιν τὴν πρακτικὴν τῶν ἀρίστων, τούτῳ καλὸν ἀκολουθεῖν καὶ τούτῳ πείθεσθαι δίκαιον. δεῖ δ' οὐ μόνον ἀρετὴν ἀλλὰ καὶ δύναμιν ὑπάρχειν, καθ' ἣν ἔσται πρακτικός. ἀλλ' εἰ ταῦτα λέγεται καλῶς καὶ τὴν εὐδαιμονίαν εὐπραγίαν θετέον, καὶ κοινῇ πάσης πόλεως ἂν εἴη καὶ καθ' ἕκαστον ἄριστος βίος ὁ πρακτικός. ἀλλὰ τὸν πρακτικὸν οὐκ ἀναγκαῖον εἶναι πρὸς ἐτέρους, καθάπερ οἴονταί τινες, οὐδὲ τὰς διανοίας εἶναι μόνας ταύτας πρακτικάς, τὰς τῶν ἀποβαινόντων χάριν γιγνομένης ἐκ τοῦ πράττειν, ἀλλὰ πολὺ μᾶλλον τὰς αὐτοτελεῖς καὶ τὰς αὐτῶν ἔνεκεν θεωρίας καὶ διανοήσεις· ἡ γὰρ εὐπραξία τέλος, ὥστε καὶ πρᾶξις τις. μάλιστα δὲ καὶ πράττειν λέγομεν κυρίως καὶ τῶν ἐξωτερικῶν πράξεων τοὺς ταῖς διανοαίς ἀρχιτέκτονας. ἀλλὰ μὴν οὐδ' ἀπρακτεῖν ἀναγκαῖον τὰς καθ' αὐτὰς πόλεις ἰδρυμένας καὶ ζῆν οὕτω προηρημένας· ἐνδέχεται γὰρ κατὰ μέρη καὶ τοῦτο συμβαίνειν· πολλοὶ γὰρ κοινωναὶ πρὸς ἄλληλα τοῖς μέρεσι τῆς πόλεως εἰσιν. ὁμοίως δὲ τοῦτο ὑπάρχει καὶ καθ' ἐνὸς ὅτουοῦν τῶν ἀνθρώπων· σχολῇ γὰρ ἂν ὁ θεὸς ἔχοι καλῶς καὶ πᾶς ὁ κόσμος, οἷς οὐκ εἰσὶν ἐξωτερικαὶ πράξεις παρὰ τὰς οἰκείας τὰς αὐτῶν. ὅτι μὲν οὖν τὸν αὐτὸν βίον ἀναγκαῖον εἶναι τὸν ἄριστον ἐκάστῳ τε τῶν ἀνθρώπων καὶ κοινῇ ταῖς πόλεσι καὶ τοῖς ἀνθρώποις, φανερόν ἐστιν.

Ἐπεὶ δὲ πεφροίμιασται τὰ νῦν εἰρημένα περὶ αὐτῶν, καὶ περὶ τὰς ἄλλας πολιτείας ἡμῖν τεθεώρηται πρότερον, ἀρχὴ τῶν λοιπῶν εἰπεῖν πρῶτον ποίας τινὰς δεῖ τὰς ὑποθέσεις εἶναι περὶ τῆς μελλούσης κατ' εὐχὴν συνεστάναι πόλεως. οὐ γὰρ οἷόν τε πολιτείαν γενέσθαι τὴν ἀρίστην ἄνευ συμμέτρου χορηγίας. διὸ δεῖ πολλὰ προϋποτεθεῖσθαι καθάπερ εὐχομένους, εἶναι μέντοι μὴτὲν τούτων ἀδύνατον· λέγω δὲ οἷον περὶ τε πλήθους πολιτῶν καὶ χώρας. ὥσπερ γὰρ καὶ τοῖς ἄλλοις δημιουργοῖς, οἷον ὑφάντη καὶ ναυπηγῷ, δεῖ τὴν [1326a] ὕλην ὑπάρχειν ἐπιτηδεῖαν οὕσαν πρὸς τὴν ἐργασίαν (ὅσῳ γὰρ ἂν αὕτη τυγχάνη παρεσκευασμένη βέλτιον, ἀνάγκη καὶ τὸ γιγνόμενον ὑπὸ τῆς τέχνης εἶναι κάλλιον), οὕτω καὶ τῷ πολιτικῷ καὶ τῷ νομοθέτῃ δεῖ τὴν οἰκείαν ὕλην ὑπάρχειν ἐπιτηδεῖως ἔχουσαν.

ἔστι δὲ πολιτικῆς χορηγίας πρῶτον τό τε πλῆθος τῶν ἀνθρώπων, πόσους τε καὶ ποίους τινὰς ὑπάρχειν δεῖ φύσει, καὶ κατὰ

τὴν χώραν ὡσαύτως, πόσῃν τε εἶναι καὶ ποίαν τινὰ ταύτην. οἴονται μὲν οὖν οἱ πλεῖστοι προσήκειν μεγάλην εἶναι τὴν εὐδαίμονα πόλιν· εἰ δὲ τοῦτ' ἀληθές, ἀγνοοῦσι ποία μεγάλη καὶ ποία μικρά πόλις. κατ' ἀριθμοῦ γὰρ πλῆθος τῶν ἐνοικούντων κρίνουσι τὴν μεγάλην, δεῖ δὲ μᾶλλον μὴ εἰς τὸ πλῆθος εἰς δὲ δύναμιν ἀποβλέπειν. ἔστι γάρ τι καὶ πόλεως ἔργον, ὥστε τὴν δυναμένην τοῦτο μάλιστα ἀποτελεῖν, ταύτην οἰητέον εἶναι μεγίστην, οἷον Ἱπποκράτην οὐκ ἄνθρωπον ἀλλ' ἰατρὸν εἶναι μείζω φήσειεν ἢ τις τοῦ διαφέροντος κατὰ τὸ μέγεθος τοῦ σώματος. οὐ μὴν ἀλλὰ κἂν εἰ δεῖ κρίνειν πρὸς τὸ πλῆθος ἀποβλέποντας, οὐ κατὰ τὸ τυχὸν πλῆθος τοῦτο ποιητέον (ἀναγκαῖον γὰρ ἐν ταῖς πόλεσιν ἴσως ὑπάρχειν καὶ δούλων ἀριθμὸν πολλῶν καὶ μετοίκων καὶ ξένων), ἀλλ' ὅσοι πόλεώς εἰσι μέρος καὶ ἐξ ὧν συνίσταται πόλις οἰκείων μορίων· ἡ γὰρ τούτων ὑπεροχὴ τοῦ πλήθους μεγάλης πόλεως σημεῖον, ἐξ ἧς δὲ βάνανσοι μὲν ἐξέρχονται πολλοὶ τὸν ἀριθμὸν ὀπλῖται δὲ ὀλίγοι, ταύτην ἀδύνατον εἶναι μεγάλην· οὐ γὰρ ταῦτ' ὅντιν ἡ πόλις καὶ πολυάνθρωπος.

ἀλλὰ μὴν καὶ τοῦτό γε ἐκ τῶν ἔργων φανερόν, ὅτι χαλεπόν, ἴσως δ' ἀδύνατον, εὐνομεῖσθαι τὴν λίαν πολυάνθρωπον· τῶν γοῦν δοκουσῶν πολιτεύεσθαι καλῶς οὐδεμίαν ὁρῶμεν οὔσαν ἀνειμένην πρὸς τὸ πλῆθος. τοῦτο δὲ δῆλον καὶ διὰ τῆς τῶν λόγων πίστεως. ὁ τε γὰρ νόμος τάξις τίς ἐστὶ, καὶ τὴν εὐνομίαν ἀναγκαῖον εὐταξίαν εἶναι, ὁ δὲ λίαν ὑπερβάλλον ἀριθμὸς οὐ δύναται μετέχειν τάξεως· θείας γὰρ δὴ τοῦτο δυνάμεως ἔργον, ἥτις καὶ τόδε συνέχει τὸ πᾶν· ἐπεὶ τό γε καλὸν ἐν πλήθει καὶ μεγέθει εἶωθε γίνεσθαι. διὸ καὶ πόλιν ἢ μετὰ μεγέθους ὁ λεχθεὶς ὅρος ὑπάρχει, ταύτην εἶναι καλλίστην ἀναγκαῖον. ἀλλ' ἔστι τι καὶ πόλεως μεγέθους μέτρον, ὥσπερ καὶ τῶν ἄλλων πάντων, ζώων φυτῶν ὀργάνων· καὶ γὰρ τούτων ἕκαστον οὔτε λίαν μικρὸν οὔτε κατὰ μέγεθος ὑπερβάλλον ἔξει τὴν αὐτοῦ δύναμιν, ἀλλ' ὅτε μὲν ὅλως ἐστερημένον ἔσται τῆς φύσεως ὅτε δὲ φαύλως ἔχον, οἷον πλοῖον σπιθαμιαῖον μὲν οὐκ ἔσται πλοῖον ὅλως, οὐδὲ δυοῖν σταδίον, εἰς δὲ τὸ μέγεθος ἐλθὼν ὅτε μὲν διὰ σμικρότητα φαύλην ποιήσει τὴν ναυτιλίαν, ὅτε δὲ διὰ τὴν ὑπερβολὴν· ὁμοίως δὲ καὶ πόλις ἢ μὲν ἐξ ὀλίγων λίαν οὐκ αὐτάρκης (ἡ δὲ πόλις αὐτάρκης), ἢ δὲ ἐκ πολλῶν ἄγαν ἐν μὲν τοῖς ἀναγκαίοις αὐτάρκης ὥσπερ ἔθνος, ἀλλ' οὐ πόλις· πολιτείαν γὰρ οὐ ῥάδιον ὑπάρχειν· τίς γὰρ στρατηγὸς ἔσται τοῦ λίαν ὑπερβάλλοντος πλήθους, ἢ τίς κῆρυξ μὴ Στεντόρειος; διὸ πρῶτην μὲν εἶναι πόλιν ἀναγκαῖον τὴν ἐκ τοσούτου πλήθους ὁ

πρῶτον πλῆθος αὐταρκες πρὸς τὸ εὖ ζῆν ἔστι κατὰ τὴν πολιτικὴν κοινωνίαν· ἐνδέχεται δὲ καὶ τὴν ταύτης ὑπερβάλλουσιν κατὰ πλῆθος εἶναι μείζω πόλιν, ἀλλὰ τοῦτ' οὐκ ἔστιν, ὥσπερ εἵπομεν, ἀόριστον. τίς δ' ἔστιν ὁ τῆς ὑπερβολῆς ὅρος, ἐκ τῶν ἔργων ἰδεῖν ῥάδιον. εἰσὶ γὰρ αἱ πράξεις τῆς πόλεως τῶν μὲν ἀρχόντων τῶν δ' ἀρχομένων, ἄρχοντος δ' ἐπίταξις καὶ κρίσις ἔργον· πρὸς δὲ τὸ κρίνειν περὶ τῶν δικαίων καὶ πρὸς τὸ τὰς ἀρχὰς διανέμειν κατ' ἀξίαν ἀναγκαῖον γνωρίζειν ἀλλήλους, ποῖοι τινές εἰσι, τοὺς πολίτας, ὡς ὅπου τοῦτο μὴ συμβαίνει γίνεσθαι, φαύλως ἀνάγκη γίνεσθαι τὰ περὶ τὰς ἀρχὰς καὶ τὰς κρίσεις. περὶ ἀμφοτέρω γὰρ οὐ δίκαιον αὐτοσχεδιάζειν, ὅπερ ἐν τῇ πολυανθρωπίᾳ τῇ λίαν ὑπάρχει φανερώς. ἔτι δὲ ξένοις καὶ μετοίκους ῥάδιον μεταλαμβάνειν τῆς πολιτείας· οὐ γὰρ χαλεπὸν τὸ λανθάνειν διὰ τὴν ὑπερβολὴν τοῦ πλῆθους. δῆλον τοίνυν ὡς οὗτός ἐστι πόλεως ὅρος ἄριστος, ἡ μεγίστη τοῦ πλῆθους ὑπερβολὴ πρὸς αὐτάρκειαν ζωῆς εὐσύνοπτος. περὶ μὲν οὖν μεγέθους πόλεως διωρίσθω τὸν τρόπον τοῦτον.

Παραπλησίως δὲ καὶ τὰ περὶ τῆς χώρας ἔχει. περὶ μὲν γὰρ τοῦ ποίαν τινά, δῆλον ὅτι τὴν αὐταρκεστάτην πᾶς τις ἂν ἐπαινέσειεν (τοιαύτην δ' ἀναγκαῖον εἶναι τὴν παντοφόρον· τὸ γὰρ πάντα ὑπάρχειν καὶ δεῖσθαι μηθενὸς αὐταρκες)· πλῆθει δὲ καὶ μεγέθει τοσαύτην ὥστε δύνασθαι τοὺς οἰκοῦντας ζῆν σχολάζοντας ἐλευθερίως ἅμα καὶ σωφρόνως. τοῦτον δὲ τὸν ὅρον εἰ καλῶς ἢ μὴ καλῶς λέγομεν, ὕστερον ἐπισκεπτέον ἀκριβέστερον, ὅταν ὅλως περὶ κτήσεως καὶ τῆς περὶ τὴν οὐσίαν εὐπορίας συμβαίνει ποιεῖσθαι μνησίαν, πῶς δεῖ καὶ τίνα τρόπον ἔχειν πρὸς τὴν χρῆσιν αὐτῆς· πολλαὶ γὰρ περὶ τὴν σκέψιν ταύτην εἰσὶν ἀμφισβητήσεις διὰ τοὺς ἔλκοντας ἐφ' ἑκατέραν τοῦ βίου τὴν ὑπερβολήν, τοὺς μὲν ἐπὶ τὴν γλίσχρότητα τοὺς δὲ ἐπὶ τὴν τρυφήν. τὸ δ' εἶδος τῆς χώρας οὐ χαλεπὸν εἰπεῖν (δεῖ δ' ἔνια πείθεσθαι καὶ τοῖς περὶ τὴν στρατηγίαν ἐμπείροις), ὅτι χρὴ τοῖς μὲν πολεμίοις εἶναι δυσέμβολον αὐτοῖς δ' εὐέξοδον.

[1327a] ἔτι δ' ὥσπερ τὸ πλῆθος τὸ τῶν ἀνθρώπων εὐσύνοπτον ἔφαμεν εἶναι δεῖν, οὕτω καὶ τὴν χώραν· τὸ δ' εὐσύνοπτον τὸ εὐβοήθητον εἶναι τὴν χώραν ἔστιν. τῆς δὲ πόλεως τὴν θέσιν εἰ χρὴ ποιεῖν κατ' εὐχὴν, πρὸς τε τὴν θάλατταν προσήκει κεῖσθαι καλῶς πρὸς τε τὴν χώραν. εἷς μὲν <οὖν> ὁ λεχθεὶς ὅρος (δεῖ γὰρ πρὸς τὰς ἐκβοηθείας κοινὴν εἶναι τῶν τόπων ἀπάντων)· ὁ δὲ λοιπὸς πρὸς τὰς τῶν γινομένων καρπῶν παραπομπάς, ἔτι δὲ τῆς περὶ ξύλα ὕλης, καὶ

εἴ τινα ἄλλην ἐργασίαν ἢ χώρα τυγχάνοι κεκτημένη τοιαύτην εὐπαρακόμιστον.

Περὶ δὲ τῆς πρὸς τὴν θάλατταν κοινωνίας, πότερον ὠφέλιμος ταῖς εὐνομουμέναις πόλεσιν ἢ βλαβερὰ, πολλὰ τυγχάνουσιν ἀμφισβητοῦντες· τό τε γὰρ ἐπιξενοῦσθαί τινας ἐν ἄλλοις τεθραμμένους νόμοις ἀσύμφορον εἶναί φασι πρὸς τὴν εὐνομίαν, καὶ τὴν πολυανθρωπίαν· γίνεσθαι μὲν γὰρ ἐκ τοῦ χρῆσθαι τῇ θαλάττῃ διαπέμποντας καὶ δεχομένους ἐμπόρων πλῆθος, ὑπεναντίαν δ' εἶναι πρὸς τὸ πολιτεῦσθαι καλῶς. ὅτι μὲν οὖν, εἰ ταῦτα μὴ συμβαίνει, βέλτιον καὶ πρὸς ἀσφάλειαν καὶ πρὸς εὐπορίαν τῶν ἀναγκαίων μετέχειν τὴν πόλιν καὶ τὴν χώραν τῆς θαλάττης, οὐκ ἄδηλον. καὶ γὰρ πρὸς τὸ ῥᾶον φέρειν τοὺς πολέμους εὐβοηθήτους εἶναι δεῖ κατ' ἀμφοτέρα τοὺς σωθησομένους, καὶ κατὰ γῆν καὶ κατὰ θάλατταν, καὶ [πρὸς] τὸ βλάψαι τοὺς ἐπιτιθεμένους, εἰ μὴ κατ' ἄμφω δυνατόν, ἀλλὰ κατὰ θάτερον ὑπάρξει μᾶλλον ἀμφοτέρων μετέχουσιν. ὅσα τ' ἂν μὴ τυγχάνη παρ' αὐτοῖς ὄντα, δέξασθαι ταῦτα, καὶ τὰ πλεονάζοντα τῶν γιγνομένων ἐκπέμψασθαι τῶν ἀναγκαίων ἐστίν. αὐτῇ γὰρ ἐμπορικὴν, ἀλλ' οὐ τοῖς ἄλλοις, δεῖ εἶναι τὴν πόλιν· οἱ δὲ παρέχοντες σφᾶς αὐτοὺς πᾶσιν ἀγορὰν προσόδου χάριν ταῦτα πράττουσιν· ἦν δὲ μὴ δεῖ πόλιν τοιαύτης μετέχειν πλεονεξίας, οὐδ' ἐμπόριον δεῖ κεκτῆσθαι τοιοῦτον. ἐπεὶ δὲ καὶ νῦν ὁρῶμεν πολλαῖς ὑπάρχοντα καὶ χώραις καὶ πόλεσιν ἐπίνεια καὶ λιμένας εὐφυῶς κείμενα πρὸς τὴν πόλιν, ὥστε μήτε τὸ αὐτὸ νέμειν ἄστὶ μήτε πόρρω λίαν, ἀλλὰ κρατεῖσθαι τείχεσι καὶ τοιούτοις ἄλλοις ἐρύμασι, φανερόν ὥς εἰ μὲν ἀγαθόν τι συμβαίνει γίνεσθαι διὰ τῆς κοινωνίας αὐτῶν, ὑπάρξει τῇ πόλει τοῦτο τὸ ἀγαθόν, εἰ δέ τι βλαβερόν, φυλάξασθαι ῥάδιον τοῖς νόμοις φράζοντας καὶ διορίζοντας τίνας οὐ δεῖ καὶ τίνας ἐπιμίσγεσθαι δεῖ πρὸς ἀλλήλους.

περὶ δὲ τῆς ναυτικῆς δυνάμεως, ὅτι μὲν βέλτιστον ὑπάρχειν μέχρι τινὸς πλήθους, οὐκ ἄδηλον (οὐ γὰρ [1327b] μόνον αὐτοῖς ἀλλὰ καὶ τῶν πλησίον τισὶ δεῖ καὶ φοβεροὺς εἶναι καὶ δύνασθαι βοηθεῖν, ὥσπερ κατὰ γῆν, καὶ κατὰ θάλατταν)· περὶ δὲ πλήθους ἤδη καὶ μεγέθους τῆς δυνάμεως ταύτης πρὸς τὸν βίον ἀποσκεπτέον τῆς πόλεως. εἰ μὲν γὰρ ἡγεμονικὸν καὶ πολιτικὸν ζήσεται βίον, ἀναγκαῖον καὶ ταύτην τὴν δύναμιν ὑπάρχειν πρὸς τὰς πράξεις σύμμετρον. τὴν δὲ πολυανθρωπίαν τὴν γιγνομένην περὶ τὸν ναυτικὸν ὄχλον οὐκ ἀναγκαῖον ὑπάρχειν ταῖς πόλεσιν· οὐθὲν γὰρ αὐτοὺς

μέρος εἶναι δεῖ τῆς πόλεως. τὸ μὲν γὰρ ἐπιβατικὸν ἐλεύθερον καὶ τῶν περὶ τὴν πόλιν ἐστίν, ὃ κύριόν ἐστι καὶ κρατεῖ τῆς ναυτιλίας· πλήθους δὲ ὑπάρχοντος περιοίκων καὶ τῶν τὴν χώραν γεωργούντων, ἀφθονίαν ἀναγκαῖον εἶναι καὶ ναυτῶν. ὁρῶμεν δὲ τοῦτο καὶ νῦν ὑπάρχον τισίν, οἷον τῇ πόλει τῶν Ἑρακλεωτῶν· πολλὰς γὰρ ἐκπληροῦσι τριήρεις, κεκτημένοι τῷ μεγέθει πόλιν ἐτέρων ἐμμελεστέραν.

περὶ μὲν οὖν χώρας καὶ λιμένων καὶ πόλεων καὶ θαλάττης καὶ περὶ τῆς ναυτικῆς δυνάμεως ἔστω διωρισμένα τὸν τρόπον τοῦτον· περὶ δὲ τοῦ πολιτικοῦ πλήθους, τίνα μὲν ὅρον ὑπάρχειν χρή, πρότερον εἵπομεν, ποίους δὲ τινὰς τὴν φύσιν εἶναι δεῖ, νῦν λέγωμεν. σχεδὸν δὴ κατανοήσκειεν ἂν τις τοῦτό γε, βλέψας ἐπὶ τε τὰς πόλεις τὰς εὐδοκιμούσας τῶν Ἑλλήνων καὶ πρὸς πᾶσαν τὴν οἰκουμένην, ὥς διείληπται τοῖς ἔθνεσιν. τὰ μὲν γὰρ ἐν τοῖς ψυχροῖς τόποις ἔθνη καὶ τὰ περὶ τὴν Εὐρώπην θυμοῦ μὲν ἐστὶ πλήρη, διανοίας δὲ ἐνδεέστερα καὶ τέχνης, διόπερ ἐλεύθερα μὲν διατελεῖ μᾶλλον, ἀπολίτευτα δὲ καὶ τῶν πλησίον ἄρχειν οὐ δυνάμενα· τὰ δὲ περὶ τὴν Ἀσίαν διανοητικὰ μὲν καὶ τεχνικὰ τὴν ψυχὴν, ἄθυμα δέ, διόπερ ἀρχόμενα καὶ δουλεύοντα διατελεῖ· τὸ δὲ τῶν Ἑλλήνων γένος, ὥσπερ μεσεύει κατὰ τοὺς τόπους, οὕτως ἀμφοῖν μετέχει. καὶ γὰρ ἐνθυμον καὶ διανοητικόν ἐστίν· διόπερ ἐλεύθερόν τε διατελεῖ καὶ βέλτιστα πολιτευόμενον καὶ δυνάμενον ἄρχειν πάντων, μιᾶς τυγχάνον πολιτείας. τὴν αὐτὴν δ' ἔχει διαφορὰν καὶ τὰ τῶν Ἑλλήνων ἔθνη πρὸς ἄλληλα· τὰ μὲν γὰρ ἔχει τὴν φύσιν μονόκωλον, τὰ δὲ εὖ κέκρται πρὸς ἀμφοτέρας τὰς δυνάμεις ταύτας. φανερόν τοίνυν ὅτι δεῖ διανοητικούς τε εἶναι καὶ θυμοειδεῖς τὴν φύσιν τοὺς μέλλοντας εὐαγώγους ἔσεσθαι τῷ νομοθέτῃ πρὸς τὴν ἀρετὴν. ὅπερ γὰρ φασὶ τινες δεῖν ὑπάρχειν τοῖς φύλαξι, τὸ φιλητικούς μὲν εἶναι τῶν γνωρίμων πρὸς δὲ τοὺς ἀγνώτας ἀγρίους, ὃ θυμός ἐστιν ὃ ποιῶν τὸ φιλητικόν· αὕτη γὰρ ἐστὶν ἡ τῆς ψυχῆς [1328a] δύναμις ἣ φιλοῦμεν. σημεῖον δέ· πρὸς γὰρ τοὺς συνήθεις καὶ φίλους ὃ θυμὸς αἵρεται μᾶλλον ἢ πρὸς τοὺς ἀγνώτας, ὀλιγωρεῖσθαι νομίσας. διὸ καὶ Ἀρχίλοχος προσηκόντως τοῖς φίλοις ἐγκαλῶν διαλέγεται πρὸς τὸν θυμόν·

σὺ γὰρ δὴ παρὰ φίλων ἀπάγχαι.

καὶ τὸ ἄρχον δὲ καὶ τὸ ἐλεύθερον ἀπὸ τῆς δυνάμεως ταύτης ὑπάρχει πᾶσιν· ἀρχικὸν γὰρ καὶ ἀήττητον ὃ θυμός. οὐ καλῶς δ' ἔχει λέγειν χαλεποὺς εἶναι πρὸς τοὺς ἀγνώτας· πρὸς οὐθένα γὰρ εἶναι χρή τοιοῦτον, οὐδέ εἰσιν οἱ μεγαλόψυχοι τὴν φύσιν ἄγριοι, πλὴν πρὸς

τοὺς ἀδικοῦντας. τοῦτο δὲ μᾶλλον ἔτι πρὸς τοὺς συνήθεις πάσχουσιν, ὅπερ εἴρηται πρότερον, ἂν ἀδικεῖσθαι νομίσωσιν. καὶ τοῦτο συμβαίνει κατὰ λόγον· παρ’ οἷς γὰρ ὀφείλεσθαι τὴν εὐεργεσίαν ὑπολαμβάνουσι, πρὸς τῷ βλάβει καὶ ταύτης ἀποστερεῖσθαι νομίζουσιν· ὅθεν εἴρηται “χαλεποὶ πόλεμοι γὰρ ἀδελφῶν” καὶ “οἱ τοι πέρα στέρξαντες, οἶδε καὶ πέρα μισοῦσιν”.

περὶ μὲν οὖν τῶν πολιτευομένων, πόσους τε ὑπάρχειν δεῖ καὶ ποίους τινὰς τὴν φύσιν, ἔτι δὲ τὴν χώραν πόσῃν τέ τινα καὶ ποίαν τινά, διώρισται σχεδόν (οὐ γὰρ τὴν αὐτὴν ἀκρίβειαν δεῖ ζητεῖν ἐπὶ τῶν λόγων καὶ τῶν γιγνομένων διὰ τῆς αἰσθήσεως). Ἐπεὶ δ’ ὥσπερ τῶν ἄλλων τῶν κατὰ φύσιν συνεστώτων οὐ ταυτὰ ἐστὶ μόρια τῆς ὅλης συστάσεως ὧν ἄνευ τὸ ὅλον οὐκ ἂν εἴη, δηλὸν ὡς οὐδὲ πόλεως μέρη θετέον ὅσα ταῖς πόλεσιν ἀναγκαῖον ὑπάρχειν, οὐδ’ ἄλλης κοινωνίας οὐδεμιᾶς ἐξ ἧς ἔν τι τὸ γένος (ἐν γάρ τι καὶ κοινὸν εἶναι δεῖ καὶ ταυτὸ τοῖς κοινωνοῖς, ἂν τε ἴσον ἂν τε ἄνισον μεταλαμβάνωσιν)· οἷον εἴτε τροφή τοῦτό ἐστιν εἴτε χώρας πλῆθος εἴτ’ ἄλλο τι τῶν τοιούτων ἐστίν. ὅταν δ’ ἡ τὸ μὲν τούτου ἔνεκεν τὸ δ’ οὗ ἔνεκεν, οὐθέν [ἐν] γε τούτοις κοινὸν ἀλλ’ ἡ τῷ μὲν ποιῆσαι τῷ δὲ λαβεῖν· λέγω δ’ οἷον ὀργάνῳ τε παντὶ πρὸς τὸ γιγνόμενον ἔργον καὶ τοῖς δημιουργοῖς· οἰκία γὰρ πρὸς οἰκοδόμον οὐθέν ἐστὶν ὃ γίγνεται κοινόν, ἀλλ’ ἔστι τῆς οἰκίας χάριν ἢ τῶν οἰκοδόμων τέχνη. διὸ κτήσεως μὲν δεῖ ταῖς πόλεσιν, οὐδὲν δ’ ἐστὶν ἢ κτήσις μέρος τῆς πόλεως· πολλὰ δ’ ἔμψυχα μέρη τῆς κτήσεως ἐστίν· ἡ δὲ πόλις κοινωνία τίς ἐστὶ τῶν ὁμοίων, ἔνεκεν δὲ ζωῆς τῆς ἐνδεχομένης ἀρίστης. ἐπεὶ δ’ ἐστὶν εὐδαιμονία τὸ ἄριστον, αὕτη δὲ ἀρετῆς ἐνέργεια καὶ χρῆσις τις τέλειος, συμβέβηκε δὲ οὕτως ὥστε τοὺς μὲν ἐνδέχεσθαι μετέχειν αὐτῆς τοὺς δὲ μικρὸν ἢ μηδέν, δηλὸν ὡς τοῦτ’ αἴτιον τοῦ γίνεσθαι πόλεως εἶδη καὶ διαφορὰς καὶ πολιτείας πλείους· ἄλλον γὰρ τρόπον καὶ δι’ [1328b] ἄλλων ἕκαστοι τοῦτο θηρεύοντες τοὺς τε βίους ἐτέρους ποιοῦνται καὶ τὰς πολιτείας. ἐπισκεπτέον δὲ καὶ πόσα ταυτὶ ἐστὶν ὧν ἄνευ πόλις οὐκ ἂν εἴη· καὶ γὰρ ἃ λέγομεν εἶναι μέρη πόλεως ἐν τούτοις ἂν εἴη ἀναγκαῖον ὑπάρχειν. ληπτέον τοίνυν τῶν ἔργων τὸν ἀριθμόν· ἐκ τούτων γὰρ ἔσται δηλὸν. πρῶτον μὲν οὖν ὑπάρχειν δεῖ τροφήν, ἔπειτα τέχνας (πολλῶν γὰρ ὀργάνων δεῖται τὸ ζῆν), τρίτον δὲ ὅπλα (τοὺς γὰρ κοινωνοῦντας ἀναγκαῖον καὶ ἐν αὐτοῖς ἔχειν ὅπλα πρὸς τε τὴν ἀρχήν, τῶν ἀπειθούντων χάριν, καὶ πρὸς τοὺς ἐξωθεν ἀδικεῖν

ἐπιχειροῦντας), ἔτι χρημάτων τινὰ εὐπορίαν, ὅπως ἔχωσι καὶ πρὸς τὰς καθ' αὐτοὺς χρείας καὶ πρὸς <τὰς> πολεμικάς, πέμπτον δὲ καὶ πρῶτον τὴν περὶ τὸ θεῖον ἐπιμέλειαν, ἣν καλοῦσιν ἱερατείαν, ἔκτον δὲ τὸν ἀριθμὸν καὶ πάντων ἀναγκαιοτάτον κρίσιν περὶ τῶν συμφερόντων καὶ τῶν δικαίων τῶν πρὸς ἀλλήλους. τὰ μὲν οὖν ἔργα ταῦτ' ἐστὶν ὧν δεῖται πᾶσα πόλις ὡς εἰπεῖν (ἡ γὰρ πόλις πληθὸς ἐστὶν οὐ τὸ τυχόν ἀλλὰ πρὸς ζωὴν αὐτάρκες, ὥς φαμεν, ἐὰν δέ τι τυγχάνῃ τούτων ἐκλείπον, ἀδύνατον ἀπλῶς αὐτάρκη τὴν κοινωνίαν εἶναι ταύτην)· ἀνάγκη τοίνυν κατὰ τὰς ἐργασίας ταύτας συνεστάναι πόλιν· δεῖ ἄρα γεωργῶν τ' εἶναι πληθός, οἱ παρασκευάσουσι τὴν τροφήν, καὶ τεχνίτας, καὶ τὸ μάχιμον, καὶ τὸ εὐπορον, καὶ ἱερεῖς, καὶ κριτὰς τῶν ἀναγκαίων καὶ συμφερόντων.

Διωρισμένων δὲ τούτων λοιπὸν σκέψασθαι πότερον πᾶσι κοινωνητέον πάντων τούτων (ἐνδέχεται γὰρ τοὺς αὐτοὺς ἅπαντας εἶναι καὶ γεωργοὺς καὶ τεχνίτας καὶ τοὺς βουλευομένους καὶ δικάζοντας), ἢ καθ' ἕκαστον ἔργον τῶν εἰρημένων ἄλλους ὑποθετέον, ἢ τὰ μὲν ἴδια τὰ δὲ κοινὰ τούτων ἐξ ἀνάγκης ἐστίν. οὐκ ἐν πάσῃ δὲ ταὐτὸ πολιτεία. καθάπερ γὰρ εἵπομεν, ἐνδέχεται καὶ πάντας κοινωνεῖν πάντων καὶ μὴ πάντας πάντων ἀλλὰ τινὰς τινῶν. ταῦτα γὰρ καὶ ποιεῖ τὰς πολιτείας ἐτέρας· ἐν μὲν γὰρ ταῖς δημοκρατίαις μετέχουσι πάντες πάντων, ἐν δὲ ταῖς ὀλιγαρχίαις τούναντίον. ἐπεὶ δὲ τυγχάνομεν σκοποῦντες περὶ τῆς ἀρίστης πολιτείας, αὕτη δ' ἐστὶ καθ' ἣν ἡ πόλις ἂν εἴῃ μάλιστ' εὐδαίμων, τὴν δ' εὐδαιμονίαν ὅτι χωρὶς ἀρετῆς ἀδύνατον ὑπάρχειν εἴρηται πρότερον, φανερόν ἐκ τούτων ὡς ἐν τῇ κάλλιστα πολιτευομένῃ πόλει καὶ τῇ κεκτημένῃ δικαίους ἄνδρας ἀπλῶς, ἀλλὰ μὴ πρὸς τὴν ὑπόθεσιν, οὔτε βάνανσον βίον οὔτ' ἀγοραῖον δεῖ ζῆν τοὺς πολίτας (ἀγεννὴς γὰρ ὁ τοιοῦτος βίος καὶ πρὸς ἀρετὴν ὑπεναντίος), οὐδὲ δὴ γεωργοὺς εἶναι τοὺς μέλλοντας [1329a] ἔσσεσθαι (δεῖ γὰρ σχολῆς καὶ πρὸς τὴν γένεσιν τῆς ἀρετῆς καὶ πρὸς τὰς πράξεις τὰς πολιτικάς).

ἐπεὶ δὲ καὶ τὸ πολεμικὸν καὶ τὸ βουλευόμενον περὶ τῶν συμφερόντων καὶ κρῖνον περὶ τῶν δικαίων ἐνυπάρχει καὶ μέρη φαίνεται τῆς πόλεως μάλιστα ὄντα, πότερον <ἐτέροις> ἕτερα καὶ ταῦτα θετέον ἢ τοῖς αὐτοῖς ἀποδοτέον ἅμφω; φανερόν δὲ καὶ τοῦτο, διότι τρόπον μὲν τινὰ τοῖς αὐτοῖς τρόπον δὲ τινὰ καὶ ἐτέροις. ἢ μὲν γὰρ ἐτέρας ἀκμῆς ἐκάτερον τῶν ἔργων, καὶ τὸ μὲν δεῖται φρονήσεως τὸ δὲ δυνάμεως, ἐτέροις· ἢ δὲ τῶν ἀδυνάτων ἐστὶ τοὺς δυναμένους

βιάζεσθαι καὶ κωλύειν, τούτους ὑπομένειν ἀρχομένους αἰεί, ταύτη δὲ τοῖς αὐτοῖς. οἱ γὰρ τῶν ὅπλων κύριοι καὶ <τοῦ> μένειν ἢ μὴ μένειν κύριοι τὴν πολιτείαν. λείπεται τοίνυν τοῖς αὐτοῖς μὲν ἀμφοτέρα ἀποδιδόναι τὴν πολιτείαν ταῦτα, μὴ ἅμα δέ, ἀλλ' ὥσπερ πέφυκεν ἡ μὲν δύναμις ἐν νεωτέροις, ἡ δὲ φρόνησις ἐν πρεσβυτέροις εἶναι· οὐκοῦν οὕτως ἀμφοῖν νενεμησθαι συμφέρει καὶ δίκαιόν ἐστιν· ἔχει γὰρ αὕτη ἡ διαίρεσις τὸ κατ' ἀξίαν. ἀλλὰ μὴν καὶ τὰς κτήσεις δεῖ εἶναι περὶ τούτους. ἀναγκαῖον γὰρ εὐπορίαν ὑπάρχειν τοῖς πολίταις, πολῖται δὲ οὗτοι. τὸ γὰρ βάνανσον οὐ μετέχει τῆς πόλεως, οὐδ' ἄλλο οὐθὲν γένος ὃ μὴ τῆς ἀρετῆς δημιουργόν ἐστιν. τοῦτο δὲ δῆλον ἐκ τῆς ὑποθέσεως· τὸ μὲν γὰρ εὐδαιμονεῖν ἀναγκαῖον ὑπάρχειν μετὰ τῆς ἀρετῆς, εὐδαιμόνα δὲ πόλιν οὐκ εἰς μέρος τι βλέψαντας δεῖ λέγειν αὐτῆς, ἀλλ' εἰς πάντας τοὺς πολίτας. φανερόν δὲ καὶ ὅτι δεῖ τὰς κτήσεις εἶναι τούτων, εἴπερ ἀναγκαῖον εἶναι τοὺς γεωργοὺς δούλους ἢ βαρβάρους [ἢ] περιοίκους. λοιπὸν δ' ἐκ τῶν καταριθμηθέντων τὸ τῶν ἱερέων γένος. φανερά δὲ καὶ ἡ τούτων τάξις. οὔτε γὰρ γεωργὸν οὔτε βάνανσον ἱερέα καταστατέον (ὑπὸ γὰρ τῶν πολιτῶν πρέπει τιμᾶσθαι τοὺς θεοὺς)· ἐπεὶ δὲ διήρηται τὸ πολιτικὸν εἰς δύο μέρη, τοῦτ' ἐστὶ τό τε ὀπλιτικὸν καὶ τὸ βουλευτικόν, πρέπει δὲ τὴν τε θεραπείαν ἀποδιδόναι τοῖς θεοῖς καὶ [τὴν] ἀνάπαυσιν ἔχειν [περὶ αὐτοὺς] τοὺς διὰ τὸν χρόνον ἀπειρηκότας, τούτοις ἂν εἴη τὰς <περὶ αὐτοὺς> ἱερωσύνας ἀποδοτέον.

ὣν μὲν τοίνυν ἄνευ πόλιν οὐ συνίσταται καὶ ὅσα μέρη πόλεως, εἴρηται (γεωργοὺς μὲν γὰρ καὶ τεχνίτας καὶ πᾶν τὸ θητικὸν ἀναγκαῖον ὑπάρχειν ταῖς πόλεσιν, μέρη δὲ τῆς πόλεως τό τε ὀπλιτικὸν καὶ βουλευτικόν), καὶ κεχώριται δὴ τούτων ἕκαστον, τὸ μὲν αἰεὶ τὸ δὲ κατὰ μέρος.

Ἔοικε δὲ οὐ νῦν οὐδὲ νεωστὶ τοῦτ' εἶναι γνώριμον τοῖς περὶ πολιτείας φιλοσοφοῦσιν, ὅτι δεῖ διηρῆσθαι χωρὶς κατὰ γένη [1329b] τὴν πόλιν καὶ τό τε μάχιμον ἕτερον εἶναι καὶ τὸ γεωργοῦν. ἐν Αἰγύπτῳ τε γὰρ ἔχει τὸν τρόπον τοῦτον ἔτι καὶ νῦν, τὰ τε περὶ τὴν Κρήτην, τὰ μὲν οὖν περὶ Αἴγυπτον Σεσώστριος, ὡς φασιν, οὕτω νομοθετήσαντος, Μίνω δὲ τὰ περὶ Κρήτην. ἀρχαία δὲ ἔοικεν εἶναι καὶ τῶν συσσιτίων ἡ τάξις, τὰ μὲν περὶ Κρήτην γενόμενα περὶ τὴν Μίνω βασιλείαν, τὰ δὲ περὶ τὴν Ἰταλίαν πολλῶ παλαιότερα τούτων. φασὶ γὰρ οἱ λόγιοι τῶν ἐκεῖ κατοικούντων Ἰταλὸν τινα γενέσθαι βασιλέα τῆς Οἰνωτρίας, ἀφ' οὗ τό τε ὄνομα μεταβαλόντας Ἰταλοὺς

ἀντ' Οἰνωτρῶν κληθῆναι καὶ τὴν ἀκτὴν ταύτην τῆς Εὐρώπης Ἰταλίαν τοῦνομα λαβεῖν, ὅση τετύχηκεν ἐντὸς οὔσα τοῦ κόλπου τοῦ Σκυλλητικοῦ καὶ τοῦ Λαμητικοῦ· ἀπέχει δὲ ταῦτα ἀπ' ἀλλήλων ὁδὸν ἡμισείας ἡμέρας. τοῦτον δὴ λέγουσι τὸν Ἰταλὸν νομάδας τοὺς Οἰνωτροὺς ὄντας ποιῆσαι γεωργούς, καὶ νόμους ἄλλους τε αὐτοῖς θέσθαι καὶ τὰ συσσίτια καταστήσαι πρῶτον· διὸ καὶ νῦν ἔτι τῶν ἀπ' ἐκείνου τινὲς χρῶνται τοῖς συσσιτίοις καὶ τῶν νόμων ἐνίοις. ὥκουν δὲ τὸ μὲν πρὸς τὴν Τυρρηνίαν Ὀπικοὶ καὶ πρότερον καὶ νῦν καλούμενοι τὴν ἐπωνυμίαν Αὔσονες, τὸ δὲ πρὸς τὴν Ἰαπυγίαν καὶ τὸν Ἰόνιον Χῶνες, τὴν καλουμένην Σιριτίν· ἦσαν δὲ καὶ οἱ Χῶνες Οἰνωτροὶ τὸ γένος. ἡ μὲν οὖν τῶν συσσιτίων τάξις ἐντεῦθεν γέγονε πρῶτον, ὁ δὲ χωρισμὸς ὁ κατὰ γένος τοῦ πολιτικοῦ πλήθους ἐξ Αἰγύπτου· πολὺ γὰρ ὑπερτείνει τοῖς χρόνοις τὴν Μίνω βασιλείαν ἢ Σεσώστριος. σχεδὸν μὲν οὖν καὶ τὰ ἄλλα δεῖ νομίζειν εὐρῆσθαι πολλάκις ἐν τῷ πολλῷ χρόνῳ, μᾶλλον δ' ἀπειράκις. τὰ μὲν γὰρ ἀναγκαῖα τὴν χρεῖαν διδάσκειν εἰκὸς αὐτὴν, τὰ δ' εἰς εὐσχημοσύνην καὶ περιουσίαν ὑπαρχόντων ἤδη τούτων εὐλογον λαμβάνειν τὴν αὐξησιν· ὥστε καὶ τὰ περὶ τὰς πολιτείας οἶεσθαι δεῖ τὸν αὐτὸν ἔχειν τρόπον. ὅτι δὲ πάντα ἀρχαῖα, σημεῖον τὰ περὶ Αἰγυπτὸν ἐστίν· οὗτοι γὰρ ἀρχαιότατοι μὲν δοκοῦσιν εἶναι, νόμων δὲ τετυχέκασιν «ἀεὶ» καὶ τάξεως πολιτικῆς. διὸ δεῖ τοῖς μὲν εὐρημένοις ἱκανῶς χρῆσθαι, τὰ δὲ παραλελειμμένα πειρᾶσθαι ζητεῖν.

ὅτι μὲν οὖν δεῖ τὴν χώραν εἶναι τῶν ὅπλα κεκτημένων καὶ τῶν τῆς πολιτείας μετεχόντων, εἴρηται πρότερον, καὶ διότι τοὺς γεωργοῦντας αὐτῶν ἐτέρους εἶναι δεῖ, καὶ πόσῃν τινὰ χρήναι καὶ ποίαν εἶναι τὴν χώραν· περὶ δὲ τῆς διανομῆς καὶ τῶν γεωργούντων, τίνας καὶ ποίους εἶναι χρήναι, λεκτέον πρῶτον, ἐπειδὴ οὔτε κοινὴν φάμεν εἶναι δεῖν τὴν [1330a] κτῆσιν ὥσπερ τινὲς εἰρήκασιν, ἀλλὰ τῇ χρήσει φιλικῶς γινομένη κοινήν, οὐτ' ἀπορεῖν οὐθένα τῶν πολιτῶν τροφῆς. περὶ συσσιτίων τε συνδοκεῖ πᾶσι χρήσιμον εἶναι ταῖς εὖ κατεσκευασμέναις πόλεσιν ὑπάρχειν· δι' ἣν δ' αἰτίαν συνδοκεῖ καὶ ἡμῖν, ὕστερον ἐροῦμεν. δεῖ δὲ τούτων κοινωνεῖν πάντας τοὺς πολίτας, οὐ ράδιον δὲ τοὺς ἀπόρους ἀπὸ τῶν ἰδίων τε εἰσφέρειν τὸ συντεταγμένον καὶ διοικεῖν τὴν ἄλλην οἰκίαν. ἔτι δὲ τὰ πρὸς τοὺς θεοὺς δαπανήματα κοινὰ πάσης τῆς πόλεως ἐστίν. ἀναγκαῖον τοίνυν εἰς δύο μέρη διηρῆσθαι τὴν χώραν, καὶ τὴν μὲν εἶναι κοινήν τὴν δὲ τῶν ἰδιωτῶν, καὶ τούτων ἑκατέραν διηρῆσθαι δίχα πάλιν, τῆς μὲν

κοινῆς τὸ μὲν ἕτερον μέρος εἰς τὰς πρὸς τοὺς θεοὺς λειτουργίας τὸ δὲ ἕτερον εἰς τὴν τῶν συσσιτίων δαπάνην, τῆς δὲ τῶν ιδιωτῶν τὸ ἕτερον μέρος [τὸ] πρὸς τὰς ἐσχατίας, τὸ δὲ ἕτερον πρὸς πόλιν, ἵνα δύο κλήρων ἐκάστῳ νεμηθέντων ἀμφοτέρων τῶν τόπων πάντες μετέχωσιν. τό τε γὰρ ἴσον οὕτως ἔχει καὶ τὸ δίκαιον καὶ τὸ πρὸς τοὺς ἀστυγείτονας πολέμους ὁμονοητικώτερον. ὅπου γὰρ μὴ τοῦτον ἔχει τὸν τρόπον, οἱ μὲν ὀλιγοροῦσι τῆς πρὸς τοὺς ὁμόρους ἔχθρας, οἱ δὲ λίαν φροντίζουσι καὶ παρὰ τὸ καλόν. διὸ παρ' ἐνίοις νόμος ἐστὶ τοὺς γειτνιῶντας τοῖς ὁμόροις μὴ συμμετέχειν βουλῆς <περὶ> τῶν πρὸς αὐτοὺς πολέμων, ὥς διὰ τὸ ἴδιον οὐκ ἂν δυναμένους βουλευσασθαι καλῶς. τὴν μὲν οὖν χώραν ἀνάγκη διηρηθῆαι τὸν τρόπον τοῦτον διὰ τὰς προειρημένας αἰτίας· τοὺς δὲ γεωργήσοντας μάλιστα μὲν, εἰ δεῖ κατ' εὐχὴν, δούλους εἶναι, μήτε ὁμοφύλων πάντων <ὄντων> μήτε θυμοειδῶν (οὕτω γὰρ ἂν πρὸς τε τὴν ἐργασίαν εἶεν χρήσιμοι καὶ πρὸς τὸ μηδὲν νεωτερίζειν ἀσφαλεῖς), δεύτερον δὲ βαρβάρους περιοίκους παραπλησίους τοῖς εἰρημένοις τὴν φύσιν, τούτων δὲ τοὺς μὲν ἐν τοῖς ἰδίοις εἶναι ἰδίους τῶν κεκτημένων τὰς οὐσίας, τοὺς δ' ἐπὶ τῇ κοινῇ γῇ κοινούς. τίνα δὲ δεῖ τρόπον χρῆσθαι δούλοις, καὶ διότι βέλτιον πᾶσι τοῖς δούλοις ἄθλον προκεῖσθαι τὴν ἐλευθερίαν, ὕστερον ἐροῦμεν.

Τὴν δὲ πόλιν ὅτι μὲν δεῖ κοινὴν εἶναι τῆς ἡπείρου τε καὶ τῆς θαλάττης καὶ τῆς χώρας ἀπάσης ὁμοίως ἐκ τῶν ἐνδεχομένων, εἴρηται πρότερον· αὐτῆς δὲ προσάντη εἶναι τὴν θέσιν εὐχεσθαι δεῖ κατ' εὐχὴν, πρὸς τέτταρα βλέποντας· πρῶτον μὲν ὥς ἀναγκαῖον πρὸς ὑγίειαν (αἱ τε γὰρ πρὸς ἕω τὴν ἐγκλισιν ἔχουσαι καὶ πρὸς τὰ πνεύματα τὰ πνέοντα ἀπὸ τῆς ἀνατολῆς ὑγιεινότεραι, δεύτερον δ' <αἱ> κατὰ βορέαν· εὐχείμεροι γὰρ αὗται μᾶλλον)· τῶν δὲ λοιπῶν [1330b] πρὸς τὸ τὰς πολιτικὰς πράξεις καὶ πολεμικὰς καλῶς ἔχειν. πρὸς μὲν οὖν τὰς πολεμικὰς αὐτοῖς μὲν εὐέξοδον εἶναι χρή, τοῖς δ' ἐναντίοις δυσπρόσοδον καὶ δυσπερίληπτον, ὑδάτων τε καὶ ναμάτων μάλιστα μὲν ὑπάρχειν πλῆθος οἰκεῖον, εἰ δὲ μή, τοῦτό γε εὗρηται διὰ τοῦ κατασκευάζειν ὑποδοχὰς ὁμβρίοις ὕδασιν ἀφθόνους καὶ μεγάλας, ὥστε μηδέποτε ὑπολείπειν εἰργομένους τῆς χώρας διὰ πόλεμον· ἐπεὶ δὲ δεῖ περὶ ὑγείας φροντίζειν τῶν ἐνοικούντων, τοῦτο δ' ἐστὶν ἐν τῷ κεῖσθαι τὸν τόπον ἐν τε τοιοῦτῳ καὶ πρὸς τοιοῦτον καλῶς, δεύτερον δὲ ὕδασιν ὑγιεινοῖς χρῆσθαι, καὶ τούτου τὴν ἐπιμέλειαν ἔχειν μὴ παρέργως. οἷς γὰρ πλείστοις χρώμεθα πρὸς τὸ

σῶμα καὶ πλειστάκις, ταῦτα πλεῖστον συμβάλλεται πρὸς τὴν ὑγίειαν· ἡ δὲ τῶν ὑδάτων καὶ τοῦ πνεύματος δύναμις τοιαύτην ἔχει τὴν φύσιν. διόπερ ἐν ταῖς εὖ φρονούσαις δεῖ διωρίσθαι πόλεσιν, ἐὰν μὴ πάνθ' ὅμοια μὴδ' ἀφθονία τοιούτων ἢ ναμάτων, χωρὶς τὰ τε εἰς τροφήν ὕδατα καὶ τὰ πρὸς τὴν ἄλλην χρεῖαν.

περὶ δὲ τόπων ἐρυμνῶν οὐ πάσαις ὁμοίως ἔχει τὸ συμφέρον ταῖς πολιτείαις· οἷον ἀκρόπολις ὀλιγαρχικὸν καὶ μοναρχικόν, δημοκρατικὸν δ' ὁμαλότης, ἀριστοκρατικὸν δὲ οὐδέτερον, ἀλλὰ μᾶλλον ἰσχυροὶ τόποι πλείους. ἡ δὲ τῶν ἰδίων οἰκίσεων διάθεσις ἡδίων μὲν νομίζεται καὶ χρησιμωτέρα πρὸς τὰς ἄλλας πράξεις, ἂν εὐτομος ἦ καὶ κατὰ τὸν νεώτερον καὶ τὸν Ἱπποδάμειον τρόπον, πρὸς δὲ τὰς πολεμικὰς ἀσφαλείας τούναντίον ὥς εἶχον κατὰ τὸν ἀρχαῖον χρόνον· δυσείσοδος γὰρ ἐκείνη τοῖς ξενικοῖς καὶ δυσεξερεύνητος [τοῖς] ἐπιτιθεμένοις. διὸ δεῖ τούτων ἀμφοτέρων μετέχειν (ἐνδέχεται γάρ, ἂν τις οὕτως κατασκευάζῃ καθάπερ ἐν τοῖς γεωργίαις ἃς καλοῦσιν τινες τῶν ἀμπέλων συστάδας), καὶ τὴν μὲν ὅλην μὴ ποιεῖν πόλιν εὐτομον, κατὰ μέρη δὲ καὶ τόπους· οὕτω γὰρ καὶ πρὸς ἀσφάλειαν καὶ πρὸς κόσμον ἔξει καλῶς.

περὶ δὲ τειχῶν, οἱ μὴ φάσκοντες δεῖν ἔχειν τὰς τῆς ἀρετῆς ἀντιπαινουμένας πόλεις λίαν ἀρχαίως ὑπολαμβάνουσιν, καὶ ταῦθ' ὁρῶντες ἐλεγχόμενας ἔργῳ τὰς ἐκείνως καλλωπισαμένας. ἔστι δὲ πρὸς μὲν τοὺς ὁμοίους καὶ μὴ πολὺ τῷ πλήθει διαφέροντας οὐ καλὸν τὸ πειρᾶσθαι σφῆζεσθαι διὰ τῆς τῶν τειχῶν ἐρυμνότητος· ἐπεὶ δὲ καὶ συμβαίνει ἐνδέχεται πλείω τὴν ὑπεροχὴν γίνεσθαι τῶν ἐπιόντων καὶ τῆς ἀνθρωπίνης καὶ τῆς ἐν τοῖς ὀλίγοις ἀρετῆς, εἰ δεῖ σφῆζεσθαι καὶ μὴ πάσχειν κακῶς μὴδὲ ὑβρίζεσθαι, τὴν ἀσφαλεστάτην ἐρυμνότητα τῶν τειχῶν οἰητέον εἶναι πολεμικωτάτην, [1331a] ἄλλως τε καὶ νῦν εὐρημένων τῶν περὶ τὰ βέλη καὶ τὰς μηχανὰς εἰς ἀκρίβειαν πρὸς τὰς πολιορκίας. ὅμοιον γὰρ τὸ τεῖχη μὴ περιβάλλειν ταῖς πόλεσιν ἀξιοῦν καὶ τὸ τὴν χώραν εὐέμβολον ζητεῖν καὶ περιαιρεῖν τοὺς ὀρεινοὺς τόπους, ὁμοίως δὲ καὶ ταῖς οἰκίσεσι ταῖς ἰδίαις μὴ περιβάλλειν τοίχους ὥς ἀνάνδρων ἐσομένων τῶν κατοικούντων. ἀλλὰ μὴν οὐδὲ τοῦτό γε δεῖ λανθάνειν, ὅτι τοῖς μὲν περιβεβλημένοις τεῖχη περὶ τὴν πόλιν ἔξεστιν ἀμφοτέρως χρῆσθαι ταῖς πόλεσιν, καὶ ὥς ἐχούσαις τεῖχη καὶ ὥς μὴ ἐχούσαις, τοῖς δὲ μὴ κεκτημένοις οὐκ ἔξεστιν. εἰ δὴ τοῦτον ἔχει τὸν τρόπον, οὐχ ὅτι τεῖχη μόνον περιβλητέον, ἀλλὰ καὶ τούτων ἐπιμελητέον, ὅπως καὶ πρὸς

κόσμον ἔχη τῇ πόλει πρεπόντως καὶ πρὸς τὰς πολεμικὰς χρείας, τὰς τε ἄλλας καὶ τὰς νῦν ἐπεξευρημένας. ὥσπερ γὰρ τοῖς ἐπιτιθεμένοις ἐπιμελές ἐστι δι' ὧν τρόπων πλεονεκτήσουσιν, οὕτω τὰ μὲν εὖρηται τὰ δὲ δεῖ ζητεῖν καὶ φιλοσοφεῖν καὶ τοὺς φυλαττομένους· ἀρχὴν γὰρ οὐδ' ἐπιχειροῦσιν ἐπιτίθεσθαι τοῖς εὖ παρεσκευασμένοις.

Ἐπεὶ δὲ δεῖ τὸ μὲν πλῆθος τῶν πολιτῶν ἐν συσσιτίοις κατανεμεῖσθαι, τὰ δὲ τεῖχη διειληφθαι φυλακτηρίοις καὶ πύργοις κατὰ τόπους ἐπικαίρους, δῆλον ὡς ταῦτα προκαλεῖται παρασκευάζειν ἔνια τῶν συσσιτίων ἐν τούτοις τοῖς φυλακτηρίοις. καὶ ταῦτα μὲν δὴ τοῦτον ἂν τις διακοσμήσειε τὸν τρόπον· τὰς δὲ τοῖς θείοις ἀποδοδομένας οἰκήσεις καὶ τὰ κυριώτατα τῶν ἀρχείων συσσίτια ἀρμόττει τόπον ἐπιτήδειόν τε ἔχειν καὶ τὸν αὐτόν, ὅσα μὴ τῶν ἱερῶν ὁ νόμος ἀφορίζει χωρὶς ἢ τι μαντεῖον ἄλλο πυθόχρηστον. εἴη δ' ἂν τοιοῦτος ὁ τόπος ὅστις ἐπιφάνειάν τε ἔχει πρὸς τὴν τῆς θέσεως ἀρετὴν ἱκανῶς καὶ πρὸς τὰ γεινιῶντα μέρη τῆς πόλεως ἐρυμνοτέρως. πρέπει δ' ὑπὸ μὲν τοῦτον τὸν τόπον τοιαύτης ἀγορᾶς εἶναι κατασκευὴν οἷαν καὶ περὶ Θετταλίαν νομίζουσιν, ἣν ἐλευθέραν καλοῦσιν, αὕτη δ' ἐστὶν ἣν δεῖ καθαρὰν εἶναι τῶν ὀνίων πάντων, καὶ μήτε βάναισον μήτε γεωργὸν μήτ' ἄλλον μηδένα τοιοῦτον παραβάλλειν μὴ καλούμενον ὑπὸ τῶν ἀρχόντων. εἴη δ' ἂν εὐχαρὶς ὁ τόπος, εἰ καὶ τὰ γυμνάσια τῶν πρεσβυτέρων ἔχοι τὴν τάξιν ἐνταῦθα· πρέπει γὰρ διηρηθῆναι κατὰ τὰς ἡλικίας καὶ τοῦτον τὸν κόσμον, καὶ παρὰ μὲν τοῖς νεωτέροις ἄρχοντάς τινας διατρίβειν, τοὺς δὲ πρεσβυτέρους παρὰ τοῖς ἄρχουσιν· ἡ γὰρ ἐν ὀφθαλμοῖς τῶν ἀρχόντων παρουσία μάλιστα ἐμποιεῖ τὴν ἀληθινὴν αἰδῶ καὶ τὸν τῶν ἐλευθέρων [1331b] φόβον. τὴν δὲ τῶν ὀνίων ἀγορὰν ἐτέραν τε δεῖ ταύτης εἶναι καὶ χωρὶς, ἔχουσιν τόπον εὐσυνάγωγον τοῖς τε ἀπὸ τῆς θαλάττης πεμπομένοις καὶ τοῖς ἀπὸ τῆς χώρας πᾶσιν.

ἐπεὶ δὲ τὸ προεστὸς διαιρεῖται τῆς πόλεως εἰς ἱερεῖς καὶ ἄρχοντας, πρέπει καὶ τῶν ἱερέων συσσίτια περὶ τὴν τῶν ἱερῶν οἰκοδομημάτων ἔχειν τὴν τάξιν. τῶν δ' ἀρχείων ὅσα περὶ τὰ συμβόλαια ποιεῖται τὴν ἐπιμέλειαν, περὶ τε γραφὰς δικῶν καὶ τὰς κλήσεις καὶ τὴν ἄλλην τὴν τοιαύτην διοίκησιν, ἔτι δὲ περὶ τὴν ἀγορανομίαν καὶ τὴν καλουμένην ἀστυνομίαν, πρὸς ἀγορᾶ μὲν δεῖ καὶ συνόδῳ τινὶ κοινῇ κατεσκευάσθαι, τοιοῦτος δ' ὁ περὶ τὴν ἀναγκαίαν ἀγορὰν ἐστὶ τόπος· ἐνσχολάζειν μὲν γὰρ τὴν ἄνω τίθεμεν, ταύτην δὲ πρὸς τὰς ἀναγκαίας πράξεις. νεμεῖσθαι δὲ χρὴ τὴν

εἰρημένην τάξιν καὶ τὰ περὶ τὴν χώραν· καὶ γὰρ ἐκεῖ τοῖς ἄρχουσιν οὕς καλοῦσιν οἱ μὲν ὑλωροὺς οἱ δὲ ἀγρονόμους καὶ φυλακτῆρια καὶ συσσίτια πρὸς φυλακὴν ἀναγκαῖον ὑπάρχειν, ἔτι δὲ ἱερὰ κατὰ τὴν χώραν εἶναι νενεμημένα, τὰ μὲν θεοῖς τὰ δὲ ἥρωσιν. ἀλλὰ τὸ διατρίβειν νῦν ἀκριβολογουμένους καὶ λέγοντας περὶ τῶν τοιούτων ἀργόν ἐστιν· οὐ γὰρ χαλεπὸν ἐστὶ τὰ τοιαῦτα νοῆσαι, ἀλλὰ ποιῆσαι μᾶλλον· τὸ μὲν γὰρ λέγειν εὐχῆς ἔργον ἐστὶ, τὸ δὲ συμβῆναι τύχης. διὸ περὶ μὲν τῶν τοιούτων τό γε ἐπὶ πλεῖον ἀφείσθω τὰ νῦν.

Περὶ δὲ τῆς πολιτείας αὐτῆς, ἐκ τίνων καὶ ποίων δεῖ συνεστάναι τὴν μέλλουσαν ἔσεσθαι πόλιν μακαρίαν καὶ πολιτεύσεσθαι καλῶς, λεκτέον. ἐπεὶ δὲ δύο ἐστὶν ἐν οἷς γίνεταί τὸ εὖ πᾶσι, τούτοις δ' ἐστὶν ἓν μὲν ἐν τῷ τὸν σκοπὸν κεῖσθαι καὶ τὸ τέλος τῶν πράξεων ὀρθῶς, ἓν δὲ τὰς πρὸς τὸ τέλος φερούσας πράξεις εὐρίσκειν (ἐνδέχεται γὰρ ταῦτα καὶ διαφωνεῖν ἀλλήλοις καὶ συμφωνεῖν· ἐνίστε γὰρ ὁ μὲν σκοπὸς ἔκκειται καλῶς, ἐν δὲ τῷ πράττειν τοῦ τυχεῖν αὐτοῦ διαμαρτάνουσιν, ὅτε δὲ τῶν μὲν πρὸς τὸ τέλος πάντων ἐπιτυγχάνουσιν, ἀλλὰ τὸ τέλος ἔθεντο φαῦλον, ὅτε δὲ ἑκατέρου διαμαρτάνουσιν, οἷον περὶ ἰατρικὴν· οὔτε γὰρ ποῖόν τι δεῖ τὸ ὑγιαῖνον εἶναι σῶμα κρίνουσιν ἐνίστε καλῶς, οὔτε πρὸς τὸν ὑποκείμενον αὐτοῖς ὄρον τυγχάνουσι τῶν ποιητικῶν· δεῖ δ' ἐν ταῖς τέχναις καὶ ἐπιστήμαις ταῦτα ἀμφοτέρωστε κρατεῖσθαι, τὸ τέλος καὶ τὰς εἰς τὸ τέλος πράξεις), ὅτι μὲν οὖν τοῦ τε εὖ ζῆν καὶ τῆς εὐδαιμονίας ἐφίενται πάντες, φανερόν, ἀλλὰ τούτων τοῖς μὲν ἐξουσία τυγχάνει τοῖς δὲ οὐ, διὰ τινὰ τύχην ἢ φύσιν (δεῖται γὰρ καὶ χορηγίας [1332a] τινὸς τὸ ζῆν καλῶς, τούτου δὲ ἐλάττονος μὲν τοῖς ἄμεινον διακειμένοις, πλείονος δὲ τοῖς χεῖρον), οἱ δ' εὐθὺς οὐκ ὀρθῶς ζητοῦσι τὴν εὐδαιμονίαν, ἐξουσίας ὑπαρχούσης. ἐπεὶ δὲ τὸ προκειμένον ἐστὶ τὴν ἀρίστην πολιτείαν ἰδεῖν, αὕτη δ' ἐστὶ καθ' ἣν ἄριστ' ἂν πολιτεύοιτο πόλις, ἄριστα δ' ἂν πολιτεύοιτο καθ' ἣν εὐδαιμονεῖν μάλιστα ἐνδέχεται τὴν πόλιν, δῆλον ὅτι τὴν εὐδαιμονίαν δεῖ, τί ἐστὶ, μὴ λανθάνειν.

φαμέν δὲ (καὶ διωρίσμεθα ἐν τοῖς Ἠθικοῖς, εἴ τι τῶν λόγων ἐκείνων ὄφελος) ἐνέργειαν εἶναι καὶ χρῆσιν ἀρετῆς τελείαν, καὶ ταύτην οὐκ ἐξ ὑποθέσεως ἀλλ' ἀπλῶς. λέγω δ' ἐξ ὑποθέσεως τ' ἀναγκαῖα, τὸ δ' ἀπλῶς τὸ καλῶς· οἷον τὰ περὶ τὰς δικαίας πράξεις· αἱ <γὰρ> δίκαιαι τιμωρίαι καὶ κολάσεις ἀπ' ἀρετῆς μὲν εἰσιν, ἀναγκαῖαι δέ, καὶ τὸ καλῶς ἀναγκαῖως ἔχουσιν (αἰρετώτερον μὲν γὰρ

μηδενὸς δεῖσθαι τῶν τοιούτων μήτε τὸν ἄνδρα μήτε τὴν πόλιν), αἱ δ' ἐπὶ τὰς τιμὰς καὶ τὰς εὐπορίας ἀπλῶς εἰσι κάλλισται πράξεις. τὸ μὲν γὰρ ἕτερον κακοῦ τινος ἀναίρεσίς ἐστιν, αἱ τοιαῦται δὲ πράξεις τούναντίον· κατασκευαὶ γὰρ ἀγαθῶν εἰσι καὶ γεννήσεις. χρήσαιτο δ' ἂν ὁ σπουδαῖος ἀνὴρ καὶ πενία καὶ νόσῳ καὶ ταῖς ἄλλαις τύχαις ταῖς φαύλαις καλῶς· ἀλλὰ τὸ μακάριον ἐν τοῖς ἐναντίοις ἐστίν (καὶ γὰρ τοῦτο διώριται κατὰ τοὺς ἠθικοὺς λόγους, ὅτι τοιοῦτός ἐστιν ὁ σπουδαῖος, ὃ διὰ τὴν ἀρετὴν [τὰ] ἀγαθὰ ἐστὶ τὰ ἀπλῶς ἀγαθὰ, δηλον δ' ὅτι καὶ τὰς χρήσεις ἀναγκαῖον σπουδαίας καὶ καλὰς εἶναι ταύτας ἀπλῶς)· διὸ καὶ νομίζουσιν ἄνθρωποι τῆς εὐδαιμονίας αἷτια τὰ ἐκτὸς εἶναι τῶν ἀγαθῶν, ὥσπερ εἰ τοῦ κιθαρίζειν λαμπρὸν καὶ καλῶς αἰτιῶντο τὴν λύραν μᾶλλον τῆς τέχνης.

ἀναγκαῖον τοίνυν ἐκ τῶν εἰρημένων τὰ μὲν ὑπάρχειν, τὰ δὲ παρασκευάσαι τὸν νομοθέτην. διὸ κατ' εὐχὴν εὐχόμεθα τῇ τῆς πόλεως συστάσει ὧν ἡ τύχη κυρία (κυρίαν γὰρ ὑπάρχειν τίθεμεν)· τὸ δὲ σπουδαίαν εἶναι τὴν πόλιν οὐκέτι τύχης ἔργον ἀλλ' ἐπιστήμης καὶ προαιρέσεως. ἀλλὰ μὴν σπουδαία γε πόλις ἐστὶ τῷ τοὺς πολίτας τοὺς μετέχοντας τῆς πολιτείας εἶναι σπουδαίους· ἡμῖν δὲ πάντες οἱ πολῖται μετέχουσι τῆς πολιτείας. τοῦτ' ἄρα σκεπτέον, πῶς ἀνὴρ γίνεται σπουδαῖος. καὶ γὰρ εἰ πάντας ἐνδέχεται σπουδαίους εἶναι, μὴ καθ' ἕκαστον δὲ τῶν πολιτῶν, οὕτως αἰρετώτερον· ἀκολουθεῖ γὰρ τῷ καθ' ἕκαστον καὶ τὸ πάντα. ἀλλὰ μὴν ἀγαθοὶ γε καὶ σπουδαῖοι γίνονται διὰ τριῶν. τὰ τρία δὲ ταῦτά ἐστι φύσις ἔθος λόγος. καὶ γὰρ φῦναι δεῖ πρῶτον, οἷον ἄνθρωπον ἀλλὰ μὴ τῶν ἄλλων τι ζῶον· οὕτω καὶ ποιόν τινα τὸ σῶμα καὶ τὴν ψυχὴν. ἔνια δὲ οὐθὲν ὄφελος [1332b] φῦναι· τὰ γὰρ ἔθη μεταβαλεῖν ποιεῖ· ἔνια γὰρ εἴσι, διὰ τῆς φύσεως ἐπαμφοτερίζοντα, διὰ τῶν ἐθῶν ἐπὶ τὸ χεῖρον καὶ τὸ βέλτιον. τὰ μὲν οὖν ἄλλα τῶν ζῶων μάλιστα μὲν τῇ φύσει ζῆ, μικρὰ δ' ἔνια καὶ τοῖς ἔθεσιν, ἄνθρωπος δὲ καὶ λόγῳ· μόνος γὰρ ἔχει λόγον· ὥστε δεῖ ταῦτα συμφωνεῖν ἀλλήλοις. πολλὰ γὰρ παρὰ τοὺς ἐθισμοὺς καὶ τὴν φύσιν πράττουσι διὰ τὸν λόγον, ἐὰν πεισθῶσιν ἄλλως ἔχειν βέλτιον. τὴν μὲν τοίνυν φύσιν οἷους εἶναι δεῖ τοὺς μέλλοντας εὐχειρώτους ἔσεσθαι τῷ νομοθέτῃ, διωρίσμεθα πρότερον· τὸ δὲ λοιπὸν ἔργον ἤδη παιδείας. τὰ μὲν γὰρ ἐθιζόμενοι μανθάνουσι τὰ δ' ἀκούοντες.

Ἐπεὶ δὲ πᾶσα πολιτικὴ κοινωνία συνέστηκεν ἐξ ἀρχόντων καὶ ἀρχομένων, τοῦτο δὴ σκεπτέον, εἰ ἐτέρους εἶναι δεῖ τοὺς ἄρχοντας καὶ τοὺς ἀρχομένους ἢ τοὺς αὐτοὺς διὰ βίου· δηλον γὰρ ὥς

ἀκολουθεῖν δεήσει καὶ τὴν παιδείαν κατὰ τὴν διαίρεσιν ταύτην. εἰ μὲν τοίνυν εἶησαν τοσοῦτον διαφέροντες ἄτεροι τῶν ἄλλων ὅσον τοὺς θεοὺς καὶ τοὺς ἥρωας ἡγούμεθα τῶν ἀνθρώπων διαφέρειν, εὐθύς πρῶτον κατὰ τὸ σῶμα πολλὴν ἔχοντας ὑπερβολήν, εἶτα κατὰ τὴν ψυχὴν, ὥστε ἀναμφισβήτητον εἶναι καὶ φανεράν τὴν ὑπεροχὴν τοῖς ἀρχομένοις τὴν τῶν ἀρχόντων, δῆλον ὅτι βέλτιον αἰετὸς τοὺς αὐτοὺς τοὺς μὲν ἄρχειν τοὺς δ' ἄρχεσθαι καθάπαξ· ἐπεὶ δὲ τοῦτ' οὐ ῥάδιον λαβεῖν οὐδ' ἔστιν ὥσπερ ἐν Ἰνδοῖς φησι Σκύλαξ εἶναι τοὺς βασιλέας τοσοῦτον διαφέροντας τῶν ἀρχομένων, φανερόν ὅτι διὰ πολλὰς αἰτίας ἀναγκαῖον πάντας ὁμοίως κοινωνεῖν τοῦ κατὰ μέρος ἄρχειν καὶ ἄρχεσθαι. τό τε γὰρ ἴσον ταῦτόν τοις ὁμοίοις, καὶ χαλεπὸν μένειν τὴν πολιτείαν τὴν συνεστηκυῖαν παρὰ τὸ δίκαιον. μετὰ γὰρ τῶν ἀρχομένων ὑπάρχουσι νεωτερίζειν βουλόμενοι πάντες οἱ κατὰ τὴν χώραν, τοσοῦτους τε εἶναι τοὺς ἐν τῷ πολιτεύματι τὸ πλῆθος ὥστ' εἶναι κρείττους πάντων τούτων ἐν τι τῶν ἀδυνάτων ἐστίν. ἀλλὰ μὴν ὅτι γε δεῖ τοὺς ἄρχοντας διαφέρειν τῶν ἀρχομένων, ἀναμφισβήτητον. πῶς οὖν ταῦτ' ἔσται καὶ πῶς μεθέξουσιν, δεῖ σκέψασθαι τὸν νομοθέτην. εἴρηται δὲ πρότερον περὶ αὐτοῦ. ἡ γὰρ φύσις δέδωκε τὴν αἴρεσιν, ποιήσασα αὐτὸ τὸ γένει ταῦτόν τὸ μὲν νεώτερον τὸ δὲ πρεσβύτερον, ὣν τοῖς μὲν ἄρχεσθαι πρέπει τοῖς δ' ἄρχειν· ἀγανακτεῖ δὲ οὐδεὶς καθ' ἡλικίαν ἀρχόμενος, οὐδὲ νομίζει εἶναι κρείττων, ἄλλως τε καὶ μέλλον ἀντιλαμβάνειν τοῦτον τὸν ἔρανον ὅταν τύχη τῆς ἱκνουμένης ἡλικίας.

ἔστι μὲν ἄρα ὡς τοὺς αὐτοὺς ἄρχειν καὶ ἄρχεσθαι φατέον, ἔστι δὲ ὡς ἐτέρους. ὥστε καὶ τὴν [1333a] παιδείαν ἔστιν ὡς τὴν αὐτὴν ἀναγκαῖον, ἔστι δ' ὡς ἐτέραν εἶναι. τὸν [τε] γὰρ μέλλοντα καλῶς ἄρχειν ἀρχθῆναι φασὶ δεῖν πρῶτον. (ἔστι δὲ ἀρχή, καθάπερ ἐν τοῖς πρώτοις εἴρηται λόγοις, ἡ μὲν τοῦ ἄρχοντος χάριν ἡ δὲ τοῦ ἀρχομένου. τούτων δὲ τὴν μὲν δεσποτικὴν εἶναι φαμεν, τὴν δὲ τῶν ἐλευθέρων. διαφέρει δ' ἕναι τῶν ἐπιταττομένων οὐ τοῖς ἔργοις ἀλλὰ τῷ τίνος ἕνεκα. διὸ πολλὰ τῶν εἶναι δοκούντων διακονικῶν ἔργων καὶ τῶν νέων τοῖς ἐλευθέροις καλὸν διακονεῖν· πρὸς γὰρ τὸ καλὸν καὶ τὸ μὴ καλὸν οὐχ οὕτω διαφέρουσιν αἱ πράξεις καθ' αὐτὰς ὡς ἐν τῷ τέλει καὶ τῷ τίνος ἕνεκεν.) ἐπεὶ δὲ πολίτου καὶ ἄρχοντος τὴν αὐτὴν ἀρετὴν εἶναι φαμεν καὶ τοῦ ἀρίστου ἀνδρός, τὸν δ' αὐτὸν ἀρχόμενόν τε δεῖν γίγνεσθαι πρότερον καὶ ἄρχοντα ὕστερον, τοῦτ' ἂν εἴη τῷ νομοθέτῃ πραγματευτέον, ὅπως ἄνδρες ἀγαθοὶ γίνωνται,

καὶ διὰ τίνων ἐπιτηδευμάτων, καὶ τί τὸ τέλος τῆς ἀρίστης ζωῆς.

διήρηται δὲ δύο μέρη τῆς ψυχῆς, ὧν τὸ μὲν ἔχει λόγον καθ' αὐτό, τὸ δ' οὐκ ἔχει μὲν καθ' αὐτό, λόγῳ δ' ὑπακούειν δυνάμενον· ὧν φαμεν τὰς ἀρετὰς εἶναι καθ' ἃς ἀνὴρ ἀγαθὸς λέγεται πως. τούτων δὲ ἐν ποτέρῳ μᾶλλον τὸ τέλος, τοῖς μὲν οὕτω διαιροῦσιν ὥς ἡμεῖς φαμεν οὐκ ἄδηλον πῶς λεκτέον. αἰεὶ γὰρ τὸ χεῖρον τοῦ βελτιονός ἐστιν ἔνεκεν, καὶ τοῦτο φανερόν ὁμοίως ἐν τε τοῖς κατὰ τέχνην καὶ τοῖς κατὰ φύσιν· βέλτιον δὲ τὸ λόγον ἔχον. διήρηταί τε διχῇ, καθ' ὅνπερ εἰώθαμεν τρόπον διαιρεῖν· ὁ μὲν γὰρ πρακτικὸς ἐστὶ λόγος ὁ δὲ θεωρητικὸς. ὡσαύτως οὖν ἀνάγκη διηρηθῆσαι καὶ τοῦτο τὸ μέρος δηλονότι. καὶ τὰς πράξεις δ' ἀνάλογον ἐροῦμεν ἔχειν, καὶ δεῖ τὰς τοῦ φύσει βελτιονοῦς αἰρετωτέρας εἶναι τοῖς δυναμένοις τυγχάνειν ἢ πασῶν ἢ τοῖν δυοῖν· αἰεὶ γὰρ ἐκάστῳ τοῦθ' αἰρετώτατον οὗ τυχεῖν ἐστὶν ἀκροτάτου. διήρηται δὲ καὶ πᾶς ὁ βίος εἰς ἀσχολίαν καὶ σχολήν καὶ εἰς πόλεμον καὶ εἰρήνην, καὶ τῶν πρακτῶν τὰ μὲν [εἰς τὰ] ἀναγκαῖα καὶ χρήσιμα τὰ δὲ [εἰς τὰ] καλὰ. περὶ ὧν ἀνάγκη τὴν αὐτὴν αἵρεσιν εἶναι καὶ τοῖς τῆς ψυχῆς μέρεσι καὶ ταῖς πράξεσιν αὐτῶν, πόλεμον μὲν εἰρήνης χάριν, ἀσχολίαν δὲ σχολῆς, τὰ δ' ἀναγκαῖα καὶ χρήσιμα τῶν καλῶν ἔνεκεν. πρὸς πάντα μὲν τοίνυν τῷ πολιτικῷ βλέποντι νομοθετητέον, καὶ κατὰ τὰ μέρη τῆς ψυχῆς καὶ κατὰ τὰς πράξεις αὐτῶν, μᾶλλον δὲ πρὸς τὰ βελτίω καὶ τὰ τέλη. τὸν αὐτὸν δὲ τρόπον καὶ περὶ τοὺς βίους καὶ τὰς τῶν πραγμάτων αἰρέσεις· δεῖ μὲν γὰρ ἀσχολεῖν δύνασθαι καὶ πολεμεῖν, [1333b] μᾶλλον δ' εἰρήνην ἄγειν καὶ σχολάζειν, καὶ τὰ ἀναγκαῖα καὶ τὰ χρήσιμα δὲ πράττειν, τὰ δὲ καλὰ δεῖ μᾶλλον. ὥστε πρὸς τούτους τοὺς σκοποὺς καὶ παῖδας ἐτι ὄντας παιδευτέον καὶ τὰς ἄλλας ἡλικίας, ὅσαι δέονται παιδείας.

οἱ δὲ νῦν ἄριστα δοκοῦντες πολιτεύεσθαι τῶν Ἑλλήνων, καὶ τῶν νομοθετῶν οἱ ταύτας καταστήσαντες τὰς πολιτείας, οὔτε πρὸς τὸ βέλτιστον τέλος φαίνονται συντάξαντες τὰ περὶ τὰς πολιτείας οὔτε πρὸς πάσας τὰς ἀρετὰς τοὺς νόμους καὶ τὴν παιδείαν, ἀλλὰ φορτικῶς ἀπέκλιναν πρὸς τὰς χρησίμους εἶναι δοκούσας καὶ πλεονεκτικωτέρας. παραπλησίως δὲ τούτοις καὶ τῶν ὕστερόν τινες γραψάντων ἀπεφήναντο τὴν αὐτὴν δόξαν· ἐπαινοῦντες γὰρ τὴν Λακεδαιμονίων πολιτείαν ἄγανται τοῦ νομοθέτου τὸν σκοπόν, ὅτι πάντα πρὸς τὸ κρατεῖν καὶ πρὸς πόλεμον ἐνομοθέτησεν. ἃ καὶ κατὰ τὸν λόγον ἐστὶν εὐέλεγκτα καὶ τοῖς ἔργοις ἐξελήλεγκται νῦν. ὥσπερ γὰρ οἱ πλεῖστοι τῶν ἀνθρώπων ζηλοῦσι τὸ πολλῶν δεσπόζειν, ὅτι

πολλή χορηγία γίνεται τῶν εὐτυχημάτων, οὕτω καὶ Θίβρων ἀγάμενος φαίνεται τὸν τῶν Λακῶνων νομοθέτην, καὶ τῶν ἄλλων ἕκαστος τῶν γραφόντων περὶ <τῆς> πολιτείας αὐτῶν, ὅτι διὰ τὸ γεγυμνάσθαι πρὸς τοὺς κινδύνους πολλῶν ἤρχον· καίτοι δηλὸν ὡς ἐπειδὴ νῦν γε οὐκέτι ὑπάρχει τοῖς Λάκωσι τὸ ἄρχειν, οὐκ εὐδαίμονες, οὐδ' ὁ νομοθέτης ἀγαθός. ἔτι δὲ τοῦτο γελοῖον, εἰ μένοντες ἐν τοῖς νόμοις αὐτοῦ, καὶ μηδενὸς ἐμποδίζοντος πρὸς τὸ χρῆσθαι τοῖς νόμοις, ἀποβεβλήκασι τὸ ζῆν καλῶς. οὐκ ὀρθῶς δ' ὑπολαμβάνουσιν οὐδὲ περὶ τῆς ἀρχῆς ἣν δεῖ τιμῶντα φαίνεσθαι τὸν νομοθέτην· τοῦ γὰρ δεσποτικῶς ἄρχειν ἢ τῶν ἐλευθέρων ἀρχὴ καλλίων καὶ μᾶλλον μετ' ἀρετῆς. ἔτι δὲ οὐ διὰ τοῦτο δεῖ τὴν πόλιν εὐδαίμονα νομίζειν καὶ τὸν νομοθέτην ἐπαινεῖν, ὅτι κρατεῖν ἡσκησεν ἐπὶ τὸ τῶν πέλας ἄρχειν· ταῦτα γὰρ μεγάλην ἔχει βλάβην. δηλὸν γὰρ ὅτι καὶ τῶν πολιτῶν τῷ δυναμένῳ τοῦτο πειρατέον διώκειν, ὅπως δύνηται τῆς οἰκείας πόλεως ἄρχειν· ὅπερ ἐγκαλοῦσιν οἱ Λάκωνες Πausanias τῷ βασιλεῖ, καίπερ ἔχοντι τηλικαύτην τιμῇν.

οὔτε δὴ πολιτικὸς τῶν τοιούτων λόγων καὶ νόμων οὐθεὶς οὔτε ὠφέλιμος οὔτε ἀληθής ἐστιν. ταῦτα γὰρ ἄριστα καὶ ἰδίᾳ καὶ κοινῇ, τὸν <τε> νομοθέτην ἐμποιεῖν δεῖ ταῦτα ταῖς ψυχαῖς τῶν ἀνθρώπων· τὴν τε τῶν πολεμικῶν ἄσκησιν οὐ τούτου χάριν δεῖ μελετᾶν, ἵνα καταδουλώσωνται τοὺς ἀναξίους, ἀλλ' ἵνα πρῶτον μὲν αὐτοὶ μὴ δουλεύσωσιν ἑτέροις, ἔπειτα ὅπως ζητῶσι τὴν ἡγεμονίαν τῆς [1334a] ὠφελείας ἔνεκα τῶν ἀρχομένων, ἀλλὰ μὴ πάντων δεσποτείας· τρίτον δὲ τὸ δεσπόζειν τῶν ἀξίων δουλεύειν. ὅτι δὲ δεῖ τὸν νομοθέτην μᾶλλον σπουδάζειν ὅπως καὶ τὴν περὶ τὰ πολεμικὰ καὶ τὴν ἄλλην νομοθεσίαν τοῦ σχολάζειν ἔνεκεν τάξῃ καὶ τῆς εἰρήνης, μαρτυρεῖ τὰ γιγνόμενα τοῖς λόγοις. αἱ γὰρ πλεῖσται τῶν τοιούτων πόλεων πολεμοῦσαι μὲν σφάζονται, κατακτησάμεναι δὲ τὴν ἀρχὴν ἀπόλλυνται. τὴν γὰρ βαφὴν ἀνιᾶσιν, ὥσπερ ὁ σίδηρος, εἰρήνην ἄγοντες. αἴτιος δ' ὁ νομοθέτης οὐ παιδεύσας δύνασθαι σχολάζειν.

Ἐπεὶ δὲ τὸ αὐτὸ τέλος εἶναι φαίνεται καὶ κοινῇ καὶ ἰδίᾳ τοῖς ἀνθρώποις, καὶ τὸν αὐτὸν ὅρον ἀναγκαῖον εἶναι τῷ τε ἀρίστῳ ἀνδρὶ καὶ τῇ ἀρίστῃ πολιτείᾳ, φανερόν ὅτι δεῖ τὰς εἰς τὴν σχολὴν ἀρετὰς ὑπάρχειν· τέλος γάρ, ὥσπερ εἴρηται πολλάκις, εἰρήνη μὲν πολέμου σχολὴ δ' ἀσχολίας. χρήσιμοι δὲ τῶν ἀρετῶν εἰσι πρὸς τὴν σχολὴν καὶ διαγωγὴν ὧν τε ἐν τῇ σχολῇ τὸ ἔργον καὶ ὧν ἐν τῇ ἀσχολίᾳ. δεῖ γὰρ πολλὰ τῶν ἀναγκαίων ὑπάρχειν ὅπως ἐξῇ σχολάζειν· διὸ σώφρονα

τὴν πόλιν εἶναι προσήκει καὶ ἀνδρείαν καὶ καρτερικὴν· κατὰ γὰρ τὴν παροιμίαν, οὐ σχολὴ δούλοις, οἱ δὲ μὴ δυνάμενοι κινδυνεύειν ἀνδρείως δοῦλοι τῶν ἐπιόντων εἰσίν. ἀνδρείας μὲν οὖν καὶ καρτερίας δεῖ πρὸς τὴν ἀσχολίαν, φιλοσοφίας δὲ πρὸς τὴν σχολήν, σωφροσύνης δὲ καὶ δικαιοσύνης ἐν ἀμφοτέροις τοῖς χρόνοις, καὶ μᾶλλον εἰρήνην ἄγουσι καὶ σχολάζουσιν· ὁ μὲν γὰρ πόλεμος ἀναγκάζει δικαίους εἶναι καὶ σωφρονεῖν, ἡ δὲ τῆς εὐτυχίας ἀπόλαυσις καὶ τὸ σχολάζειν μετ’ εἰρήνης ὕβριστάς ποιεῖ μᾶλλον. πολλῆς οὖν δεῖ δικαιοσύνης καὶ πολλῆς σωφροσύνης «μετέχειν» τοὺς ἄριστα δοκοῦντας πράττειν καὶ πάντων τῶν μακαριζομένων ἀπολαύοντας, οἷον εἰ τινές εἰσιν, ὥσπερ οἱ ποιηταὶ φασιν, ἐν μακάρων νήσοις· μάλιστα γὰρ οὗτοι δεήσονται φιλοσοφίας καὶ σωφροσύνης καὶ δικαιοσύνης, ὅσῳ μᾶλλον σχολάζουσιν ἐν ἀφθονίᾳ τῶν τοιούτων ἀγαθῶν. διότι μὲν οὖν τὴν μέλλουσαν εὐδαιμονήσειν καὶ σπουδαίαν ἔσσεσθαι πόλιν τούτων δεῖ τῶν ἀρετῶν μετέχειν, φανερόν. αἰσχροῦ γὰρ ὄντος «τοῦ» μὴ δύνασθαι χρῆσθαι τοῖς ἀγαθοῖς, ἔτι μᾶλλον τὸ μὴ δύνασθαι ἐν τῷ σχολάζειν χρῆσθαι, ἀλλ’ ἀσχολοῦντας μὲν καὶ πολεμοῦντας φαίνεσθαι ἀγαθοὺς, εἰρήνην δ’ ἄγοντας καὶ σχολάζοντας ἀνδραποδώδεις. διὸ δεῖ μὴ καθάπερ ἡ Λακεδαιμονίων πόλις τὴν ἀρετὴν ἀσκεῖν. ἐκεῖνοι μὲν γὰρ οὐ ταύτῃ διαφέρουσι τῶν ἄλλων, [1334b] τῷ μὴ νομίζειν ταῦτα τοῖς ἄλλοις μέγιστα τῶν ἀγαθῶν, ἀλλὰ τῷ γίνεσθαι ταῦτα μᾶλλον διὰ τινὸς ἀρετῆς· ἐπεὶ δὲ μειζῶ τε ἀγαθὰ ταῦτα καὶ τὴν ἀπόλαυσιν τὴν τούτων ἢ τὴν τῶν ἀρετῶν . καὶ ὅτι δι’ αὐτήν, φανερόν ἐκ τούτων· πῶς δὲ καὶ διὰ τίνων ἔσται, τοῦτο δὴ θεωρητέον.

τυγχάνομεν δὴ διηρημένοι πρότερον ὅτι φύσεως καὶ ἔθους καὶ λόγου δεῖ. τούτων δὲ ποίους μὲν τινες εἶναι χρὴ τὴν φύσιν, διώρισται πρότερον, λοιπὸν δὲ θεωρῆσαι πότερον παιδευτέοι τῷ λόγῳ πρότερον ἢ τοῖς ἔθεσιν. ταῦτα γὰρ δεῖ πρὸς ἄλληλα συμφωνεῖν συμφωνίαν τὴν ἀρίστην· ἐνδέχεται γὰρ διημαρτηκέναι τὸν λόγον τῆς βελτίστης ὑποθέσεως, καὶ διὰ τῶν ἐθῶν ὁμοίως ἥχθαι. φανερόν δὴ τοῦτό γε πρῶτον μὲν, καθάπερ ἐν τοῖς ἄλλοις, ὥς ἡ γένεσις ἀπ’ ἀρχῆς ἐστὶ, καὶ τὸ τέλος ἀπὸ τινος ἀρχῆς «ἀρχῇ» ἄλλου τέλους, ὁ δὲ λόγος ἡμῖν καὶ ὁ νοῦς τῆς φύσεως τέλος, ὥστε πρὸς τούτους τὴν γένεσιν καὶ τὴν τῶν ἐθῶν δεῖ παρασκευάζειν μελέτην· ἔπειτα ὥσπερ ψυχὴ καὶ σῶμα δύο ἐστίν, οὕτω καὶ τῆς ψυχῆς ὁρῶμεν δύο μέρη, τὸ τε ἄλογον καὶ τὸ λόγον ἔχον, καὶ τὰς ἑξεις τὰς τούτων δύο τὸν

ἀριθμόν, ὧν τὸ μὲν ἐστὶν ὄρεξις τὸ δὲ νοῦς, ὥσπερ δὲ τὸ σῶμα πρότερον τῇ γενέσει τῆς ψυχῆς, οὕτω καὶ τὸ ἄλογον τοῦ λόγον ἔχοντος. φανερόν δὲ καὶ τοῦτο· θυμὸς γὰρ καὶ βούλησις, ἔτι δὲ ἐπιθυμία, καὶ γενομένοις εὐθὺς ὑπάρχει τοῖς παιδίοις, ὁ δὲ λογισμὸς καὶ ὁ νοῦς προϋοῦσιν ἐγγίγνεσθαι πέφυκεν. διὸ πρῶτον μὲν τοῦ σώματος τὴν ἐπιμέλειαν ἀναγκαῖον εἶναι προτέραν ἢ τὴν τῆς ψυχῆς, ἔπειτα τὴν τῆς ὀρέξεως, ἔνεκα μέντοι τοῦ νοῦ τὴν τῆς ὀρέξεως, τὴν δὲ τοῦ σώματος τῆς ψυχῆς.

Εἴπερ οὖν ἀπ' ἀρχῆς τὸν νομοθέτην ὁρᾶν δεῖ ὅπως βέλτιστα τὰ σώματα γένηται τῶν τρεφομένων, πρῶτον μὲν ἐπιμελητέον περὶ τὴν σύζευξιν, πότε καὶ ποίους τινὰς ὄντας χρή ποιεῖσθαι πρὸς ἀλλήλους τὴν γαμικὴν ὁμιλίαν. δεῖ δ' ἀποβλέποντα νομοθετεῖν ταύτην τὴν κοινωνίαν πρὸς αὐτοὺς τε καὶ τὸν τοῦ ζῆν χρόνον, ἵνα συγκαταβαίνωσι ταῖς ἡλικίαις ἐπὶ τὸν αὐτὸν καιρὸν καὶ μὴ διαφωνῶσιν αἱ δυνάμεις τοῦ μὲν ἔτι δυναμένου γεννᾶν τῆς δὲ μὴ δυναμένης, ἢ ταύτης μὲν τοῦ δ' ἀνδρὸς μή (ταῦτα γὰρ ποιεῖ καὶ στάσεις πρὸς ἀλλήλους καὶ διαφοράς). ἔπειτα καὶ πρὸς τὴν τῶν τέκνων διαδοχὴν, δεῖ γὰρ οὔτε λίαν ὑπολείπεσθαι ταῖς ἡλικίαις τὰ τέκνα τῶν πατέρων (ἀνόνητος γὰρ τοῖς μὲν πρεσβυτέροις ἡ χάρις παρὰ τῶν τέκνων, ἡ δὲ παρὰ τῶν [1335a] πατέρων βοήθεια τοῖς τέκνοις), οὔτε λίαν πάρεγγυς εἶναι (πολλὴν γὰρ ἔχει δυσχέριαν· ἢ τε γὰρ αἰδῶς ἦττον ὑπάρχει τοῖς τοιοῦτοις, ὥσπερ ἡλικιώταις, καὶ περὶ τὴν οἰκονομίαν ἐγκληματικὸν τὸ πάρεγγυς). ἔτι δ', ὅθεν ἀρχόμενοι δεῦρο μετέβημεν, ὅπως τὰ σώματα τῶν γεννωμένων ὑπάρχη πρὸς τὴν τοῦ νομοθέτου βούλησιν.

σχεδὸν δὴ πάντα ταῦτα συμβαίνει κατὰ μίαν ἐπιμέλειαν. ἐπεὶ γὰρ ὥρισται τέλος τῆς γεννήσεως ὡς ἐπὶ τὸ πλεῖστον εἰπεῖν ἀνδράσι μὲν ὁ τῶν ἐβδομήκοντα ἐτῶν ἀριθμὸς ἔσχατος, πεντήκοντα δὲ γυναιξί, δεῖ τὴν ἀρχὴν τῆς συζεύξεως κατὰ τὴν ἡλικίαν εἰς τοὺς χρόνους καταβαίνειν τούτους. ἔστι δ' ὁ τῶν νέων συνδυασμὸς φαῦλος πρὸς τὴν τεκνοποιίαν· ἐν γὰρ πᾶσι ζῷοις ἀτελεῖ τὰ τῶν νέων ἔκγονα, καὶ θηλυτόκα μᾶλλον καὶ μικρὰ τὴν μορφήν, ὥστ' ἀναγκαῖον ταῦτό τοῦτο συμβαίνειν καὶ ἐπὶ τῶν ἀνθρώπων. τεκμήριον δέ· ἐν ὅσαις γὰρ τῶν πόλεων ἐπιχωριάζει τὸ νέους συζευγνύειν καὶ νέας, ἀτελεῖς καὶ μικροὶ τὰ σώματά εισιν. ἔτι δὲ ἐν τοῖς τόκοις αἱ νέαι πονοῦσί τε μᾶλλον καὶ διαφθείρονται πλείους· διὸ καὶ τὸν χρησμὸν γενέσθαι τινές φασι διὰ τοιαύτην αἰτίαν τοῖς Τροϊζηνίοις, ὡς πολλῶν

διαφθειρομένων διὰ τὸ γαμίσκεσθαι τὰς νεωτέρας, ἀλλ' οὐ πρὸς τὴν τῶν καρπῶν κομιδὴν. ἔτι δὲ καὶ πρὸς σωφροσύνην συμφέρει τὰς ἐκδόσεις ποιεῖσθαι πρεσβυτέραις· ἀκολαστότεραι γὰρ εἶναι δοκοῦσι νέαι χρησάμεναι ταῖς συνουσίαις. καὶ τὰ τῶν ἀρρένων δὲ σώματα βλάπτεσθαι δοκεῖ πρὸς τὴν αὕξησιν, ἐὰν ἔτι τοῦ σπέρματος αὐξανομένου ποιῶνται τὴν συνουσίαν· καὶ γὰρ τούτου τις ὠρισμένος χρόνος, ὃν οὐχ ὑπερβαίνει πληθὺν ἔτι, «ἢ μικρόν»· διὸ τὰς μὲν ἀρμόττει περὶ τὴν τῶν ὀκτωκαίδεκα ἐτῶν ἡλικίαν συζευγνύναι, τοὺς δ' ἐπὶ τὰ καὶ τριάκοντα [ἢ μικρόν]. ἐν τοσοῦτῳ γὰρ ἀκμάζουσιν τε τοῖς σώμασιν «ἢ» σύζευξις ἔσται, καὶ πρὸς τὴν παῦλαν τῆς τεκνοποιίας συγκαταβήσεται τοῖς χρόνοις εὐκαίρως· ἔτι δὲ ἡ διαδοχὴ τῶν τέκνων τοῖς μὲν ἀρχομένοις ἔσται τῆς ἀκμῆς, ἐὰν γίγηται κατὰ λόγον εὐθὺς ἢ γένεσις, τοῖς δὲ ἤδη καταλελυμένης τῆς ἡλικίας πρὸς τὸν τῶν ἑβδομήκοντα ἐτῶν ἀριθμόν.

περὶ μὲν οὖν τοῦ πότε δεῖ ποιεῖσθαι τὴν σύζευξιν εἴρηται, τοῖς δὲ περὶ τὴν ὥραν χρόνοις δεῖ χρῆσθαι οἷς οἱ πολλοὶ χρῶνται, καλῶς καὶ νῦν ὀρίσαντες χειμῶνος τὴν συναυλίαν ποιεῖσθαι ταύτην. δεῖ δὲ καὶ αὐτοὺς ἤδη θεωρεῖν πρὸς τὴν τεκνοποιίαν τὰ τε παρὰ τῶν ἱατρῶν λεγόμενα καὶ τὰ παρὰ τῶν φυσικῶν· οἳ τε γὰρ ἱατροὶ τοὺς καιροὺς τῶν σωμάτων ἱκανῶς λέγουσι, [1335b] καὶ περὶ τῶν πνευμάτων οἱ φυσικοί, τὰ βόρεια τῶν νοτίων ἐπαινοῦντες μᾶλλον. ποῖον δέ τινων τῶν σωμάτων ὑπαρχόντων μάλιστ' ἂν ὄφελος εἴη τοῖς γεννωμένοις, ἐπιστήσασιν μὲν μᾶλλον λεκτέον ἐν τοῖς περὶ τῆς παιδονομίας, τύπῳ δὲ ἱκανὸν εἰπεῖν καὶ νῦν. οὔτε γὰρ ἡ τῶν ἀθλητῶν χρήσιμος ἔξις πρὸς πολιτικὴν εὐεξίαν οὐδὲ πρὸς ὑγίειαν καὶ τεκνοποιίαν, οὔτε ἡ θεραπευτικὴ καὶ κακοπονητικὴ λίσαν, ἀλλ' ἡ μέση τούτων. πεπονημένην μὲν οὖν ἔχειν δεῖ τὴν ἔξιν, πεπονημένην δὲ πόνοις μὴ βιαίους, μηδὲ πρὸς ἓν μόνον, ὥσπερ ἡ τῶν ἀθλητῶν ἔξις, ἀλλὰ πρὸς τὰς τῶν ἐλευθερίων πράξεις. ὁμοίως δὲ δεῖ ταῦτα ὑπάρχειν ἀνδράσι καὶ γυναιξίν.

χρὴ δὲ καὶ τὰς ἐγκύους ἐπιμελεῖσθαι τῶν σωμάτων, μὴ ῥαθυμούσας μηδ' ἀραιᾷ τροφῇ χρωμένας. τοῦτο δὲ ῥάδιον τῷ νομοθέτῃ ποιῆσαι προστάζαντι καθ' ἡμέραν τινὰ ποιεῖσθαι πορείαν πρὸς θεῶν ἀποθεραπείαν τῶν εἰληχότων τὴν περὶ τῆς γενέσεως τιμὴν. τὴν μέντοι διάνοιαν τούναντίον τῶν σωμάτων ῥαθυμοτέρως ἀρμόττει διάγειν· ἀπολαύοντα γὰρ φαίνεται τὰ γεννώμενα τῆς ἐχούσης ὥσπερ τὰ φυόμενα τῆς γῆς. περὶ δὲ ἀποθέσεως καὶ τροφῆς

τῶν γιγνομένων ἔστω νόμος μηδὲν πεπηρωμένον τρέφειν, διὰ δὲ πλῆθος τέκνων ἢ τάξις τῶν ἐθνῶν κελεύει μηθὲν ἀποτίθεσθαι τῶν γιγνομένων· ὀρίσθηναι δὲ δεῖ τῆς τεκνοποιίας τὸ πλῆθος, ἐὰν δέ τις γίγνηται παρὰ ταῦτα συνδυασθέντων, πρὶν αἰσθῆσιν ἐγγενέσθαι καὶ ζωὴν ἐμποιεῖσθαι δεῖ τὴν ἄμβλωσιν· τὸ γὰρ ὅσιον καὶ τὸ μὴ διωρισμένον τῇ αἰσθήσει καὶ τῷ ζῆν ἔσται. ἐπεὶ δ' ἡ μὲν ἀρχὴ τῆς ἡλικίας ἀνδρὶ καὶ γυναικὶ διώρισταί, πότε ἄρχεσθαι χρὴ τῆς συζεύξεως, καὶ πόσον χρόνον λειτουργεῖν ἀρμόττει πρὸς τεκνοποιίαν ὀρίσθω. τὰ γὰρ τῶν πρεσβυτέρων ἔκγονα, καθάπερ τὰ τῶν νεωτέρων, ἀτελεῖ γίγνεται καὶ τοῖς σώμασι καὶ ταῖς διανοίαις, τὰ δὲ τῶν γεγηρακότων ἀσθενῇ· διὸ κατὰ τὴν τῆς διανοίας ἀκμὴν. αὕτη δ' ἐστὶν ἐν τοῖς πλείστοις ἥνπερ τῶν ποιητῶν τινες εἰρήκασιν οἱ μετροῦντες ταῖς ἐβδομάσι τὴν ἡλικίαν, περὶ τὸν χρόνον τὸν τῶν πεντήκοντα ἐτῶν. ὥστε τέτταρσιν ἢ πέντε ἔτεσιν ὑπερβάλλοντα τὴν ἡλικίαν ταύτην ἀφεῖσθαι δεῖ τῆς εἰς τὸ φανερόν γεννήσεως· τὸ δὲ λοιπὸν ὑγείας χάριν ἢ τινος ἄλλης τοιαύτης αἰτίας φαίνεσθαι δεῖ ποιουμένους τὴν ὁμιλίαν. περὶ δὲ τῆς πρὸς ἄλλην ἢ πρὸς ἄλλον, ἔστω μὲν ἀπλῶς μὴ καλὸν ἀπτόμενον φαίνεσθαι μηδαμῇ μηδαμῶς, ὅταν «ἀνὴρ» ἢ καὶ προσαγορευθῇ πόσις· περὶ δὲ τὸν χρόνον τὸν τῆς τεκνοποιίας [1336a] ἐὰν τις φαίνεται τοιοῦτόν τι δρῶν, ἀτιμία ζημιούσθω πρεπούση πρὸς τὴν ἁμαρτίαν.

Γενομένων δὲ τῶν τέκνων οἶεσθαι «δεῖ» μεγάλην εἶναι διαφορὰν πρὸς τὴν τῶν σωμάτων δύναμιν τὴν τροφήν, ὅποια τις ἂν ᾗ. φαίνεται δὲ διὰ τε τῶν ἄλλων ζώων ἐπισκοποῦσι, καὶ διὰ τῶν ἐθνῶν οἷς ἐπιμελές ἐστὶν εἰσάγειν τὴν πολεμικὴν ἑξίν, ἢ τοῦ γάλακτος πλήθουσα τροφή μάλιστ' οἰκεία τοῖς σώμασιν, «ἢ» αἰοινοτέρα δὲ διὰ τὰ νοσήματα. ἔτι δὲ καὶ κινήσεις ὅσας ἐνδέχεται ποιεῖσθαι τηλικούτων συμφέρεи. πρὸς δὲ τὸ μὴ διαστρέφεσθαι τὰ μέλη δι' ἀπαλότητα χρῶνται καὶ νῦν ἔνια τῶν ἐθνῶν ὀργάνοις τισὶ μηχανικοῖς, ἃ τὸ σῶμα ποιεῖ τῶν τοιούτων ἀστραβές. συμφέρεи δ' εὐθύς καὶ πρὸς τὰ ψυχὴ συνεθίζειν ἐκ μικρῶν παίδων· τοῦτο γὰρ καὶ πρὸς ὑγίειαν καὶ πρὸς πολεμικὰς πράξεις εὐχρηστότατον. διὸ παρὰ πολλοῖς ἐστὶ τῶν βαρβάρων ἔθος τοῖς μὲν εἰς ποταμὸν ἀποβάπτειν τὰ γιγνόμενα ψυχρόν, τοῖς δὲ σκέπασμα μικρὸν ἀμπίσχειν, οἷον Κελτοῖς. πάντα γὰρ ὅσα δυνατὸν ἐθίζειν, εὐθύς ἀρχομένων βέλτιον ἐθίζειν μὲν, ἐκ προσαγωγῆς δ' ἐθίζειν· εὐφυὴς δ' ἡ τῶν παίδων ἑξίς διὰ θερμότητα πρὸς τὴν τῶν ψυχρῶν ἄσκησιν.

περὶ μὲν οὖν τὴν πρώτην συμφέρει ποιεῖσθαι τὴν ἐπιμέλειαν τοιαύτην τε καὶ τὴν ταύτη παραπλησίαν· τὴν δ' ἐχομένην ταύτης ἡλικίαν μέχρι πέντε ἐτῶν, ἣν οὔτε πω πρὸς μάθησιν καλῶς ἔχει προσάγειν οὐδεμίαν οὔτε πρὸς ἀναγκαίους πόνους, ὅπως μὴ τὴν αὐξήσιν ἐμποδίζωσιν, δεῖ τοσαύτης τυγχάνειν κινήσεως ὥστε διαφεύγειν τὴν ἀργίαν τῶν σωμάτων· ἣν χρὴ παρασκευάζειν καὶ δι' ἄλλων πράξεων καὶ διὰ τῆς παιδείας. δεῖ δὲ καὶ τὰς παιδιάς εἶναι μῆτε ἀνελευθέρους μῆτε ἐπιπόνους μῆτε ἀνειμένας. καὶ περὶ λόγων δὲ καὶ μύθων, ποίους τινὰς ἀκούειν δεῖ τοὺς τηλικούτους, ἐπιμελὲς ἔστω τοῖς ἄρχουσιν οὓς καλοῦσι παιδονόμους. πάντα γὰρ δεῖ τὰ τοιαῦτα προοδοποιεῖν πρὸς τὰς ὕστερον διατριβάς· διὸ τὰς παιδιάς εἶναι δεῖ τὰς πολλὰς μιμήσεις τῶν ὕστερον σπουδαζομένων. τὰς δὲ διατάσεις τῶν παίδων καὶ τοὺς κλαυθμοὺς οὐκ ὀρθῶς ἀπαγορεύουσιν οἱ κωλύοντες ἐν τοῖς νόμοις· συμφέρουσι γὰρ πρὸς αὐξήσιν· γίγνεται γὰρ τρόπον τινὰ γυμνασία τοῖς σώμασιν· ἡ γὰρ τοῦ πνεύματος κάθεξις ποιεῖ τὴν ἰσχὺν τοῖς πονοῦσιν, ὃ συμβαίνει καὶ τοῖς παιδίοις διατεινομένοις.

ἐπισκεπτέον δὲ τοῖς παιδονόμοις τὴν τούτων διαγωγὴν, τὴν τ' ἄλλην καὶ ὅπως ὅτι ἥκιστα μετὰ δούλων ἔσται. ταύτην γὰρ τὴν ἡλικίαν, [1336b] καὶ μέχρι τῶν ἑπτὰ ἐτῶν, ἀναγκαῖον οἴκοι τὴν τροφὴν ἔχειν. εὐλογον οὖν ἀπολαύειν ἀπὸ τῶν ἀκουσμάτων καὶ τῶν ὁραμάτων ἀνελευθερίαν καὶ τηλικούτους ὄντας. ὅλως μὲν οὖν αἰσχρολογίαν ἐκ τῆς πόλεως, ὥσπερ ἄλλο τι, δεῖ τὸν νομοθέτην ἐξορίζειν (ἐκ τοῦ γὰρ εὐχερῶς λέγειν ὅτι οὖν τῶν αἰσchrῶν γίνεται καὶ τὸ ποιεῖν σύνεγγυς)· μάλιστα μὲν οὖν ἐκ τῶν νέων, ὅπως μῆτε λέγωσι μῆτε ἀκούωσι μηδὲν τοιοῦτον· ἐὰν δὲ τις φαίνεται τι λέγων ἢ πράττων τῶν ἀπηγορευμένων, τὸν μὲν ἐλεύθερον μήπω δὲ κατακλίσεως ἡξιωμένον ἐν τοῖς συσσιτίοις ἀτιμίαις κολάζειν καὶ πληγαῖς, τὸν δὲ πρεσβύτερον τῆς ἡλικίας ταύτης ἀτιμίαις ἀνελευθέρους ἀνδραποδωδίας χάριν. ἐπεὶ δὲ τὸ λέγειν τι τῶν τοιούτων ἐξορίζομεν, φανερόν ὅτι καὶ τὸ θεωρεῖν ἢ γραφὰς ἢ λόγους ἀσχήμονας. ἐπιμελὲς μὲν οὖν ἔστω τοῖς ἄρχουσι μηθέν, μῆτε ἄγαλμα μῆτε γραφὴν, εἶναι τοιούτων πράξεων μίμησιν, εἰ μὴ παρά τισι θεοῖς τοιούτοις οἷς καὶ τὸν τωθασμὸν ἀποδίδωσιν ὁ νόμος. πρὸς δὲ τούτοις ἀφήσιν ὁ νόμος τοὺς τὴν ἡλικίαν ἔχοντας [ἔτι] τὴν ἰκνουμένην καὶ ὑπὲρ αὐτῶν καὶ τέκνων καὶ γυναικῶν τιμαλφεῖν τοὺς θεοὺς· τοὺς δὲ νεωτέρους οὐτ' ἰάμβων οὔτε κωμωδίας θεατὰς θετέον, πρὶν ἢ τὴν

ἡλικίαν λάβωσιν ἐν ἣ καὶ κατακλίσεως ὑπάρξει κοινωνεῖν ἤδη καὶ μέθης, καὶ τῆς ἀπὸ τῶν τοιούτων γιγνομένης βλάβης ἀπαθεῖς ἡ παιδεία ποιήσει πάντως.

νῦν μὲν οὖν ἐν παραδρομῇ τοῦτον πεποιήμεθα τὸν λόγον· ὕστερον δ' ἐπιστήσαντας δεῖ διορίσαι μᾶλλον, εἴτε μὴ δεῖ πρῶτον εἴτε δεῖ διαπορήσαντας, καὶ πῶς δεῖ· κατὰ δὲ τὸν παρόντα καιρὸν ἐμνήσθημεν ὅσον ἀναγκαῖον. ἴσως γὰρ οὐ κακῶς ἔλεγε τὸ τοιοῦτον Θεόδωρος ὁ τῆς τραγωδίας ὑποκριτής· οὐθενὶ γὰρ πώποτε παρήκεν ἑαυτοῦ προεισάγειν, οὐδὲ τῶν εὐτελῶν ὑποκριτῶν, ὡς οἰκειουμένων τῶν θεατῶν ταῖς πρώταις ἀκοαῖς· συμβαίνει δὲ ταῦτ' οὗτο καὶ πρὸς τὰς τῶν ἀνθρώπων ὁμιλίας καὶ πρὸς τὰς τῶν πραγμάτων· πάντα γὰρ στέργομεν τὰ πρῶτα μᾶλλον. διὸ δεῖ τοῖς νέοις πάντα ποιεῖν ξένα τὰ φαῦλα, μάλιστα δ' αὐτῶν ὅσα ἔχει ἡ μοχθηρίαν ἢ δυσμένειαν. διελθόντων δὲ τῶν πέντε ἐτῶν τὰ δύο μέχρι τῶν ἑπτὰ δεῖ θεωροῦς ἤδη γίγνεσθαι τῶν μαθήσεων ἃς δεήσει μανθάνειν αὐτοῦς. δύο δ' εἰσὶν ἡλικίαι πρὸς ἃς ἀναγκαῖον διηρησθαι τὴν παιδείαν, πρὸς τὴν ἀπὸ τῶν ἑπτὰ μέχρι ἡβῆς καὶ πάλιν πρὸς τὴν ἀφ' ἡβῆς μέχρι τῶν ἑνὸς καὶ εἴκοσιν ἐτῶν. οἱ γὰρ ταῖς ἑβδομάσι διαιροῦντες τὰς ἡλικίας ὡς ἐπὶ τὸ πολὺ λέγουσιν οὐ [1337a] κακῶς, δεῖ δὲ τῇ διαιρέσει τῆς φύσεως ἐπακολουθεῖν· πᾶσα γὰρ τέχνη καὶ παιδεία τὸ προσλεῖπον βούλεται τῆς φύσεως ἀναπληροῦν. πρῶτον μὲν οὖν σκεπτέον εἰ ποιητέον τάξιν τινὰ περὶ τοὺς παῖδας, ἔπειτα πότερον συμφέρει κοινῇ ποιεῖσθαι τὴν ἐπιμέλειαν αὐτῶν ἢ κατ' ἴδιον τρόπον (ὃ γίγνεται καὶ νῦν ἐν ταῖς πλείσταις τῶν πόλεων), τρίτον δὲ ποίαν τινὰ δεῖ ταύτην <εἶναι>.

ἽΟτι μὲν οὖν τῷ νομοθέτῃ μάλιστα πραγματευτέον περὶ τὴν τῶν νέων παιδείαν, οὐδεὶς ἂν ἀμφισβητήσῃ· καὶ γὰρ ἐν ταῖς πόλεσιν οὐ γιγνόμενον τοῦτο βλέπτει τὰς πολιτείας· δεῖ γὰρ πρὸς ἐκάστην παιδεύεσθαι· τὸ γὰρ ἦθος τῆς πολιτείας ἐκάστης τὸ οἰκεῖον καὶ φυλάττειν εἴωθε τὴν πολιτείαν καὶ καθίστησιν ἐξ ἀρχῆς, οἷον τὸ μὲν δημοκρατικὸν δημοκρατίαν τὸ δ' ὀλιγαρχικὸν ὀλιγαρχίαν· αἰεὶ δὲ τὸ βέλτιον ἦθος βελτίονος αἴτιον πολιτείας. ἔτι δὲ πρὸς πάσας δυνάμεις καὶ τέχνας ἔστιν ἃ δεῖ προπαιδεύεσθαι καὶ προεθίζεσθαι πρὸς τὰς ἐκάστων ἐργασίας, ὥστε δῆλον ὅτι καὶ πρὸς τὰς τῆς ἀρετῆς πράξεις· ἐπεὶ δ' ἐν τῷ τέλος τῇ πόλει πάση, φανερόν ὅτι καὶ τὴν παιδείαν μίαν καὶ τὴν αὐτὴν ἀναγκαῖον εἶναι πάντων, καὶ ταύτης τὴν ἐπιμέλειαν εἶναι κοινὴν καὶ μὴ κατ' ἰδίαν, ὃν τρόπον νῦν ἕκαστος ἐπιμελεῖται τῶν αὐτοῦ τέκνων ἰδίᾳ τε καὶ μάθησιν ἰδίαν, ἣν ἂν δόξη, διδάσκων. δεῖ δὲ τῶν κοινῶν κοινὴν ποιεῖσθαι καὶ τὴν ἄσκησιν. ἅμα δὲ οὐδὲ χρὴ νομίζειν αὐτὸν αὐτοῦ τίνα εἶναι τῶν πολιτῶν, ἀλλὰ πάντας τῆς πόλεως, μόνιον γὰρ ἕκαστος τῆς πόλεως· ἢ δ' ἐπιμέλεια πέφυκεν ἐκάστου μορίου βλέπειν πρὸς τὴν τοῦ ὅλου ἐπιμέλειαν. ἐπαινέσειε δ' ἂν τις κατὰ τοῦτο Λακεδαιμονίους· καὶ γὰρ πλείστην ποιοῦνται σπουδὴν περὶ τοὺς παῖδας καὶ κοινῇ ταύτην.

ἽΟτι μὲν οὖν νομοθετητέον περὶ παιδείας καὶ ταύτην κοινὴν ποιητέον, φανερόν· τίς δ' ἔσται ἡ παιδεία καὶ πῶς χρὴ παιδεύεσθαι, δεῖ μὴ λανθάνειν. νῦν γὰρ ἀμφισβητεῖται περὶ τῶν ἔργων. οὐ γὰρ ταῦτά πάντες ὑπολαμβάνουσι δεῖν μανθάνειν τοὺς νέους οὔτε πρὸς ἀρετὴν οὔτε πρὸς τὸν βίον τὸν ἄριστον, οὐδὲ φανερόν πότερον πρὸς τὴν διάνοιαν πρέπει μᾶλλον ἢ πρὸς τὸ τῆς ψυχῆς ἦθος· ἐκ τε τῆς ἐμποδῶν παιδείας ταραχώδους ἢ σκέψις καὶ δῆλον οὐδὲν πότερον ἄσκεῖν δεῖ τὰ χρήσιμα πρὸς τὸν βίον ἢ τὰ τείνοντα πρὸς ἀρετὴν ἢ τὰ περιττά (πάντα γὰρ εἵληφε ταῦτα κριτάς [1337b] τίνας)· περὶ τε τῶν πρὸς ἀρετὴν οὐθέν ἐστιν ὁμολογούμενον (καὶ γὰρ τὴν ἀρετὴν οὐ τὴν αὐτὴν εὐθὺς πάντες τιμῶσιν, ὥστ' εὐλόγως διαφέρονται καὶ πρὸς τὴν ἄσκησιν αὐτῆς). ὅτι μὲν οὖν τὰ ἀναγκαῖα δεῖ διδάσκεσθαι τῶν χρησίμων, οὐκ ἄδηλον· ὅτι δὲ οὐ πάντα, διηρημένων τῶν τε ἐλευθερίων ἔργων καὶ τῶν ἀνελευθερίων φανερόν, «καὶ» ὅτι τῶν τοιούτων δεῖ μετέχειν ὅσα τῶν χρησίμων ποιήσει τὸν μετέχοντα μὴ

βάνανυσον. βάνανυσον δ' ἔργον εἶναι δεῖ τοῦτο νομίζειν καὶ τέχνην ταύτην καὶ μάθησιν, ὅσαι πρὸς τὰς χρήσεις καὶ τὰς πράξεις τὰς τῆς ἀρετῆς ἄχρηστον ἀπεργάζονται τὸ σῶμα τῶν ἐλευθέρων [ἢ τὴν ψυχὴν] ἢ τὴν διάνοιαν. διὸ τὰς τε τοιαύτας τέχνας ὅσαι τὸ σῶμα παρασκευάζουσι χεῖρον διακεῖσθαι βαναύσους καλοῦμεν, καὶ τὰς μισθαρνικὰς ἐργασίας· ἄσχολον γὰρ ποιοῦσι τὴν διάνοιαν καὶ ταπεινὴν. ἔστι δὲ καὶ τῶν ἐλευθερίων ἐπιστημῶν μέχρι μὲν τινὸς ἐνίων μετέχειν οὐκ ἀνελεύθερον, τὸ δὲ προσεδρεύειν λίαν πρὸς ἀκρίβειαν ἔνοχον ταῖς εἰρημέναις βλάβαις. ἔχει δὲ πολλὴν διαφορὰν καὶ τὸ τίνας ἔνεκεν πράττει τις ἢ μανθάνει· τὸ μὲν γὰρ αὐτοῦ χάριν ἢ φίλων ἢ δι' ἀρετὴν οὐκ ἀνελεύθερον, ὁ δὲ αὐτὸ τοῦτο πράττων δι' ἄλλους πολλάκις θητικὸν καὶ δουλικὸν δόξειεν ἂν πράττειν.

αἱ μὲν οὖν καταβεβλημέναι νῦν μαθήσεις, καθάπερ ἐλέχθη πρότερον, ἐπαμφοτερίζουσιν· ἔστι δὲ τέτταρα σχεδὸν ἃ παιδεύειν εἰώθασι, γράμματα καὶ γυμναστικὴν καὶ μουσικὴν καὶ τέταρτον ἔνιοι γραφικὴν, τὴν μὲν γραμματικὴν καὶ γραφικὴν ὡς χρησίμους πρὸς τὸν βίον οὖσας καὶ πολυχρήστους, τὴν δὲ γυμναστικὴν ὡς συντείνουσαν πρὸς ἀνδρείαν· τὴν δὲ μουσικὴν ἤδη διαπορήσειεν ἂν τις. νῦν μὲν γὰρ ὡς ἡδονῆς χάριν οἱ πλεῖστοι μετέχουσιν αὐτῆς· οἱ δ' ἐξ ἀρχῆς ἔταξαν ἐν παιδείᾳ διὰ τὸ τὴν φύσιν αὐτὴν ζητεῖν, ὅπερ πολλάκις εἴρηται, μὴ μόνον ἀσχολεῖν ὀρθῶς ἀλλὰ καὶ σχολάζειν δύνασθαι καλῶς. αὕτη γὰρ ἀρχὴ πάντων μία· καὶ πάλιν εἴπωμεν περὶ αὐτῆς. εἰ δ' ἄμφω μὲν δεῖ, μᾶλλον δὲ αἰρετὸν τὸ σχολάζειν τῆς ἀσχολίας καὶ τέλος, ζητητέον ὅ τι δεῖ ποιοῦντας σχολάζειν. οὐ γὰρ δὴ παίζοντας· τέλος γὰρ ἀναγκαῖον εἶναι τοῦ βίου τὴν παιδιὰν ἡμῖν. εἰ δὲ τοῦτο ἀδύνατον, καὶ μᾶλλον ἐν ταῖς ἀσχολίαις χρηστέον ταῖς παιδιαῖς (ὁ γὰρ πονῶν δεῖται τῆς ἀναπαύσεως, ἡ δὲ παιδιὰ χάριν ἀναπαύσεως ἐστίν· τὸ δ' ἀσχολεῖν συμβαίνει μετὰ πόνου καὶ συντονίας), διὰ τοῦτο δεῖ παιδιὰς εἰσάγεσθαι καιροφυλακοῦντας τὴν χρῆσιν, ὡς προσάγοντας φαρμακείας χάριν. ἄνεσις γὰρ ἡ τοιαύτη κίνησις τῆς ψυχῆς, [1338a] καὶ διὰ τὴν ἡδονὴν ἀνάπαυσις. τὸ δὲ σχολάζειν ἔχειν αὐτὸ δοκεῖ τὴν ἡδονὴν καὶ τὴν εὐδαιμονίαν καὶ τὸ ζῆν μακαρίως. τοῦτο δ' οὐ τοῖς ἀσχολοῦσιν ὑπάρχει ἀλλὰ τοῖς σχολάζουσιν· ὁ μὲν γὰρ ἀσχολῶν ἔνεκα τινος ἀσχολεῖ τέλους ὡς οὐχ ὑπάρχοντος, ἡ δ' εὐδαιμονία τέλος ἐστίν, ἣν οὐ μετὰ λύπης ἀλλὰ μεθ' ἡδονῆς οἶονται πάντες εἶναι. ταύτην μέντοι τὴν ἡδονὴν οὐκέτι τὴν αὐτὴν τιθέασιν, ἀλλὰ καθ' ἑαυτοὺς ἕκαστος καὶ τὴν ἑξὶν τὴν

αὐτῶν, ὁ δ' ἄριστος τὴν ἀρίστην καὶ τὴν ἀπὸ τῶν καλλίστων. ὥστε φανερόν ὅτι δεῖ καὶ πρὸς τὴν ἐν τῇ διαγωγῇ σχολὴν μαθάνειν ἅττα καὶ παιδεύεσθαι, καὶ ταῦτα μὲν τὰ παιδεύματα καὶ ταύτας τὰς μαθήσεις ἑαυτῶν εἶναι χάριν, τὰς δὲ πρὸς τὴν ἀσχολίαν ὡς ἀναγκαίης καὶ χάριν ἄλλων. διὸ καὶ τὴν μουσικὴν οἱ πρότερον εἰς παιδείαν ἔταξαν οὐχ ὡς ἀναγκαῖον (οὐδὲν γὰρ ἔχει τοιοῦτον), οὐδ' ὡς χρήσιμον (ὥσπερ τὰ γράμματα πρὸς χρηματισμὸν καὶ πρὸς οἰκονομίαν καὶ πρὸς μάθησιν καὶ πρὸς πολιτικὰς πράξεις πολλὰς, δοκεῖ δὲ καὶ γραφικὴ χρήσιμος εἶναι πρὸς τὸ κρίνειν τὰ τῶν τεχνιτῶν ἔργα κάλλιον), οὐδ' αὖ καθάπερ ἡ γυμναστικὴ πρὸς ὑγίειαν καὶ ἀλκὴν (οὐδέτερον γὰρ τούτων ὀρῶμεν γιγνόμενον ἐκ τῆς μουσικῆς)· λείπεται τοίνυν πρὸς τὴν ἐν τῇ σχολῇ διαγωγὴν, εἰς ὅπερ καὶ φαίνονται παράγοντες αὐτήν. ἦν γὰρ οἶονταὶ διαγωγὴν εἶναι τῶν ἐλευθέρων, ἐν ταύτῃ τάττουσιν. διόπερ Ὅμηρος οὕτως ἐποίησεν

ἀλλ' οἷον μὲν ἐστι καλεῖν ἐπὶ δαῖτα θαλερίν,

καὶ οὕτω προειπὼν ἐτέρους τινὰς “οἱ καλέουσιν ἁοιδόν” φησίν, “ὁ κεν τέρπησιν ἅπαντας”. καὶ ἐν ἄλλοις δὲ φησιν <ὁ> Ὀδυσσεὺς ταύτην ἀρίστην εἶναι διαγωγὴν, ὅταν εὐφραينوμένων τῶν ἀνθρώπων “δαιτυμόνες δ' ἀνὰ δώματ' ἀκουάζωνται ἁοιδοῦ ἤμενοι ἐξείης”.

ὅτι μὲν τοίνυν ἔστι παιδεία τις ἣν οὐχ ὡς χρησίμην παιδευτέον τοὺς υἱεῖς οὐδ' ὡς ἀναγκαίαν ἀλλ' ὡς ἐλευθέριον καὶ καλὴν, φανερόν ἐστιν· πότερον δὲ μία τὸν ἀριθμὸν ἢ πλείους, καὶ τίνες αὗται καὶ πῶς, ὕστερον λεκτέον περὶ αὐτῶν. νῦν δὲ τοσοῦτον ἡμῖν εἶναι πρὸ ὁδοῦ γέγονεν, ὅτι καὶ παρὰ τῶν ἀρχαίων ἔχομέν τινα μαρτυρίαν ἐκ τῶν καταβεβλημένων παιδευμάτων· ἡ γὰρ μουσικὴ τοῦτο ποιεῖ δῆλον. ἔτι δὲ καὶ τῶν χρησίμων ὅτι δεῖ τινα παιδεύεσθαι τοὺς παῖδας οὐ μόνον διὰ τὸ χρήσιμον, οἷον τὴν τῶν γραμμάτων μάθησιν, ἀλλὰ καὶ διὰ τὸ πολλὰς ἐνδέχεσθαι γίνεσθαι δι' αὐτῶν μαθήσεις ἐτέρας, ὁμοίως δὲ καὶ τὴν γραφικὴν οὐχ ἵνα ἐν τοῖς ἰδίῳ ὠνίοις μὴ διαμαρτάνωσιν ἀλλ' ὥσιν ἀνεξαπάτητοι πρὸς τὴν τῶν σκευῶν [1338b] ὠνήν τε καὶ πρᾶσιν, μᾶλλον δ' ὅτι ποιεῖ θεωρητικὸν τοῦ περὶ τὰ σώματα κάλλους. τὸ δὲ ζητεῖν πανταχοῦ τὸ χρήσιμον ἥκιστα ἀρμόττει τοῖς μεγαλοψύχοις καὶ τοῖς ἐλευθερίοις. ἐπεὶ δὲ φανερόν <τὸ> πρότερον τοῖς ἔθεσιν ἢ τῷ λόγῳ παιδευτέον εἶναι, καὶ περὶ τὸ σῶμα πρότερον ἢ τὴν διάνοιαν, δῆλον ἐκ τούτων ὅτι παραδοτέον τοὺς παῖδας γυμναστικῇ καὶ παιδοτριβικῇ· τούτων γὰρ ἡ μὲν ποιὰν τινα ποιεῖ τὴν ἔξιν τοῦ σώματος, ἡ δὲ τὰ ἔργα.

Νῦν μὲν οὖν αἱ μάλιστα δοκοῦσαι τῶν πόλεων ἐπιμελεῖσθαι τῶν παίδων αἱ μὲν ἀθλητικὴν ἔξιν ἐμποιοῦσι, λωβώμεναι τὰ τε εἶδη καὶ τὴν αὔξησιν τῶν σωμάτων, οἱ δὲ Λάκωνες ταύτην μὲν οὐχ ἥμαρτον τὴν ἀμαρτίαν, θηριώδεις δ' ἀπεργάζονται τοῖς πόνοις, ὡς τοῦτο πρὸς ἀνδρείαν μάλιστα συμφέρον. καίτοι, καθάπερ εἴρηται πολλάκις, οὔτε πρὸς μίαν οὔτε πρὸς μάλιστα ταύτην βλέποντα ποιητέον τὴν ἐπιμέλειαν· εἰ δὲ καὶ πρὸς ταύτην, οὐδὲ τοῦτο ἐξευρίσκουσιν. οὔτε γὰρ ἐν τοῖς ἄλλοις ζώοις οὔτε ἐπὶ τῶν ἐθνῶν ὀρῶμεν τὴν ἀνδρείαν ἀκολουθοῦσαν τοῖς ἀγριωτάτοις, ἀλλὰ μᾶλλον τοῖς ἡμερωτέροις καὶ λεοντώδεσιν ἦθεσιν. πολλὰ δ' ἔστι τῶν ἐθνῶν ἃ πρὸς τὸ κτείνειν καὶ πρὸς τὴν ἀνθρωποφαγίαν εὐχερῶς ἔχει, καθάπερ τῶν περὶ τὸν Πόντον Ἀχαιοί τε καὶ Ἡνίοχοι καὶ τῶν ἡπειρωτικῶν ἐθνῶν ἕτερα, τὰ μὲν ὁμοίως τούτοις τὰ δὲ μᾶλλον, ἃ ληστρικὰ μὲν ἐστίν, ἀνδρείας δ' οὐ μετειλήφασιν. ἔτι δ' αὐτοὺς τοὺς Λάκωνας ἴσμεν, ἕως μὲν αὐτοὶ προσήδρευον ταῖς φιλοπονίαις, ὑπερέχοντας τῶν ἄλλων, νῦν δὲ κὰν τοῖς γυμνικοῖς ἀγῶσι κὰν τοῖς πολεμικοῖς λειπομένους ἐτέρων· οὐ γὰρ τῷ τοὺς νέους γυμνάζειν τὸν τρόπον τοῦτον διέφερον, ἀλλὰ τῷ μόνους μὴ πρὸς ἀσκοῦντας ἀσκεῖν. ὥστε τὸ καλὸν ἄλλ' οὐ τὸ θηριώδες δεῖ πρωταγωνιστεῖν· οὐδὲ γὰρ λύκος οὐδ' «οὐδὲν» τῶν ἄλλων θηρίων ἀγωνίσαιτο ἂν οὐθένα καλὸν κίνδυνον, ἀλλὰ μᾶλλον ἀνὴρ ἀγαθός, οἱ δὲ λίαν εἰς ταῦτα ἀνέντες τοὺς παῖδας, καὶ τῶν ἀναγκαίων ἀπαιδαγωγήτους ποιήσαντες, βαναύσους κατεργάζονται κατὰ γε τὸ ἀληθές, πρὸς ἓν τε μόνον ἔργον τῆς πολιτικῆς χρησίμους ποιήσαντες, καὶ πρὸς τοῦτο χεῖρον, ὥς φησιν ὁ λόγος, ἐτέρων. δεῖ δὲ οὐκ ἐκ τῶν προτέρων ἔργων κρίνειν, ἀλλ' ἐκ τῶν νῦν· ἀνταγωνιστὰς γὰρ τῆς παιδείας νῦν ἔχουσι, πρότερον δ' οὐκ εἶχον.

ὅτι μὲν οὖν χρηστὸν τῇ γυμναστικῇ, καὶ πῶς χρηστὸν, ὁμολογούμενόν ἐστιν (μέχρι μὲν γὰρ ἥβης κουφότερα γυμνάσια προσοιστέον, τὴν βίαιον τροφήν καὶ τοὺς πρὸς ἀνάγκην πόνους ἀπείργοντας, ἵνα μὴθὲν ἐμπόδιον ᾖ πρὸς τὴν αὔξησιν· σημεῖον γὰρ οὐ [1339a] μικρὸν ὅτι δύνανται τοῦτο παρασκευάζειν, ἐν γὰρ τοῖς Ὀλυμπιονίκαις δύο τις ἂν ἢ τρεῖς εὖροι τοὺς αὐτοὺς νενικηκότας ἄνδρας τε καὶ παῖδας, διὰ τὸ νέους ἀσκοῦντας ἀφαιρεῖσθαι τὴν δύναμιν ὑπὸ τῶν ἀναγκαίων γυμνασίων· ὅταν δ' ἀφ' ἥβης ἔτη τρία πρὸς τοῖς ἄλλοις μαθήμασι γένωνται, τότε ἀρμόττει καὶ τοῖς πόνοις καὶ ταῖς ἀναγκοφαγίαις καταλαμβάνειν τὴν ἐχομένην ἡλικίαν· ἅμα

Περὶ δὲ μουσικῆς ἓνια μὲν διηπορήκαμεν τῷ λόγῳ καὶ πρότερον, καλῶς δ' ἔχει καὶ νῦν ἀναλαβόντας αὐτὰ προαγαγεῖν, ἵνα ὥσπερ ἐνδόσιμον γένηται τοῖς λόγοις οὓς ἂν τις εἴπειεν ἀποφαινόμενος περὶ αὐτῆς. οὔτε γὰρ τίνα ἔχει δύναμιν ῥάδιον περὶ αὐτῆς διελεῖν, οὔτε τίνος δεῖ χάριν μετέχειν αὐτῆς, πότερον παιδιᾶς ἔνεκα καὶ ἀναπαύσεως, καθάπερ ὕπνου καὶ μέθης (ταῦτα γὰρ καθ' αὐτὰ μὲν οὐδὲ τῶν σπουδαίων, ἀλλ' ἡδέα, καὶ ἅμα παύει μέριμναν, ὥς φησιν Εὐριπίδης· διὸ καὶ τάττουσιν αὐτὴν καὶ χρῶνται πᾶσι τούτοις ὁμοίως, ὕπνῳ καὶ μέθῃ καὶ μουσικῇ· τιθέασι δὲ καὶ τὴν ὄρχησιν ἐν τούτοις), ἢ μᾶλλον οἰητέον πρὸς ἀρετὴν τι τείνειν τὴν μουσικὴν, ὥς δυναμένην, καθάπερ ἡ γυμναστικὴ τὸ σῶμα ποιόν τι παρασκευάζει, καὶ τὴν μουσικὴν τὸ ἦθος ποιόν τι ποιεῖν, ἐθίζουσιν ἀδύνασθαι χαίρειν ὀρθῶς, ἢ πρὸς διαγωγὴν τι συμβάλλεται καὶ πρὸς φρόνησιν (καὶ γὰρ τοῦτο τρίτον θετέον τῶν εἰρημένων). ὅτι μὲν οὖν δεῖ τοὺς νέους μὴ παιδιᾶς ἔνεκα παιδεύειν, οὐκ ἄδηλον (οὐ γὰρ παίζουσι μανθάνοντες· μετὰ λύπης γὰρ ἢ μάθησις)· ἀλλὰ μὴν οὐδὲ διαγωγὴν γε παισὶν ἀρμόττει καὶ ταῖς ἡλικίαις ἀποδιδόναι ταῖς τοιαύταις (οὐθενὶ γὰρ ἀτελεῖ προσήκει τέλος). ἀλλ' ἴσως ἂν δόξειεν ἢ τῶν παίδων σπουδὴ παιδιᾶς εἶναι χάριν ἀνδράσι γενομένοις καὶ τελειωθείσιν. ἀλλ' εἰ τοῦτ' ἐστὶ τοιοῦτον, τίνος ἂν ἔνεκα δέοι μανθάνειν αὐτούς, ἀλλὰ μή, καθάπερ οἱ τῶν Περσῶν καὶ Μήδων βασιλεῖς, δι' ἄλλων αὐτὸ ποιούντων μεταλαμβάνειν τῆς ἡδονῆς καὶ τῆς μαθήσεως; καὶ γὰρ ἀναγκαῖον βέλτιον ἀπεργάζεσθαι τοὺς αὐτὸ τοῦτο πεποιημένους ἔργον καὶ τέχνην τῶν τοσοῦτον χρόνον ἐπιμελουμένων ὅσον πρὸς μάθησιν μόνον. εἰ δὲ δεῖ τὰ τοιαῦτα διαπονεῖν αὐτούς, καὶ περὶ τὴν τῶν ὧσων πραγματείαν αὐτούς ἂν δέοι παρασκευάζειν· ἀλλ' ἄτοπον. τὴν δ' αὐτὴν ἀπορίαν ἔχει καὶ εἰ δύναται τὰ ἦθη βελτίῳ ποιεῖν· ταῦτα γὰρ τί δεῖ μανθάνειν αὐτούς, ἀλλ' [1339b] οὐχ ἐτέρων ἀκούοντας ὀρθῶς τε χαίρειν καὶ ἀδύνασθαι κρίνειν, ὥσπερ οἱ Λάκωνες; ἐκεῖνοι γὰρ οὐ μανθάνοντες ὅμως δύνανται κρίνειν ὀρθῶς, ὥς φασι, τὰ χρηστὰ καὶ τὰ μὴ χρηστὰ τῶν μελῶν. ὁ δ' αὐτὸς λόγος καὶ εἰ πρὸς εὐημερίαν καὶ διαγωγὴν ἐλευθέριον χρηστέον αὐτῇ· τί δεῖ μανθάνειν αὐτούς, ἀλλ' οὐχ ἐτέρων χρωμένων ἀπολαύειν; σκοπεῖν δ' ἕξεται τὴν ὑπόληψιν ἣν

ἔχομεν περὶ τῶν θεῶν· οὐ γὰρ ὁ Ζεὺς αὐτὸς ἀείδει καὶ κιθαρίζει τοῖς ποιηταῖς, ἀλλὰ καὶ βαναύσους καλοῦμεν τοὺς τοιούτους καὶ τὸ πράττειν οὐκ ἀνδρὸς μὴ μεθύοντος ἢ παίζοντος.

ἄλλ’ ἴσως περὶ μὲν τούτων ὕστερον ἐπισκεπτέον· ἡ δὲ πρώτη ζήτησίς ἐστι πότερον οὐ θετέον εἰς παιδεῖαν τὴν μουσικὴν ἢ θετέον, καὶ τί δύναται τῶν διαπορηθέντων τριῶν, πότερον παιδεῖαν ἢ παιδιὰν ἢ διαγωγὴν. εὐλόγως δ’ εἰς πάντα τάττεται καὶ φαίνεται μετέχειν. ἡ τε γὰρ παιδιὰ χάριν ἀναπαύσεώς ἐστι, τὴν δ’ ἀνάπαυσιν ἀναγκαῖον ἡδεῖαν εἶναι (τῆς γὰρ διὰ τῶν πόνων λύπης ἰατρεία τίς ἐστιν), καὶ τὴν διαγωγὴν ὁμολογουμένως δεῖ μὴ μόνον ἔχειν τὸ καλὸν ἀλλὰ καὶ τὴν ἡδονήν (τὸ γὰρ εὐδαιμονεῖν ἐξ ἀμφοτέρων τούτων ἐστίν)· τὴν δὲ μουσικὴν πάντες εἶναι φαμεν τῶν ἡδίστων, καὶ ψιλὴν οὖσαν καὶ μετὰ μελωδίας (φησὶ γοῦν καὶ Μουσαῖος εἶναι ‘βροτοῖς ἡδιστον ἀείδειν’· διὸ καὶ εἰς τὰς συνουσίας καὶ διαγωγὰς εὐλόγως παραλαμβάνουσιν αὐτὴν ὡς δυναμένην εὐφραίνειν), ὥστε καὶ ἐντεῦθεν ἂν τις ὑπολάβοι παιδεύεσθαι δεῖν αὐτὴν τοὺς νεωτέρους. ὅσα γὰρ ἀβλαβῆ τῶν ἡδέων, οὐ μόνον ἀρμόττει πρὸς τὸ τέλος ἀλλὰ καὶ πρὸς τὴν ἀνάπαυσιν· ἐπεὶ δ’ ἐν μὲν τῷ τέλει συμβαίνει τοῖς ἀνθρώποις ὀλιγάκις γίνεσθαι, πολλάκις δὲ ἀναπαύονται καὶ χρῶνται ταῖς παιδιαῖς οὐχ ὅσον ἐπὶ πλεον ἀλλὰ καὶ διὰ τὴν ἡδονήν, χρήσιμον ἂν εἴη διαναπαύειν ἐν ταῖς ἀπὸ ταύτης ἡδοναῖς.

συμβέβηκε δὲ τοῖς ἀνθρώποις ποιεῖσθαι τὰς παιδιάς τέλος· ἔχει γὰρ ἴσως ἡδονήν τινα καὶ τὸ τέλος, ἀλλ’ οὐ τὴν τυχοῦσαν, ζητοῦντες δὲ ταύτην λαμβάνουσιν ὡς ταύτην ἐκείνην, διὰ τὸ τῷ τέλει τῶν πράξεων ἔχειν ὁμοίωμα τι. τό τε γὰρ τέλος οὐθενὸς τῶν ἐσομένων χάριν αἰρετόν, καὶ αἱ τοιαῦται τῶν ἡδονῶν οὐθενός εἰσι τῶν ἐσομένων ἔνεκεν, ἀλλὰ τῶν γεγονότων, οἷον πόνων καὶ λύπης. δι’ ἣν μὲν οὖν αἰτίαν ζητοῦσι τὴν εὐδαιμονίαν γίνεσθαι διὰ τούτων τῶν ἡδονῶν, ταύτην εἰκότως ἂν τις ὑπολάβοι τὴν αἰτίαν· περὶ δὲ τοῦ κοινωνεῖν τῆς μουσικῆς, <ὅτι> οὐ διὰ ταύτην μόνην, ἀλλὰ καὶ διὰ τὸ χρήσιμον εἶναι πρὸς τὰς ἀναπαύσεις, ὡς ἔοικεν. οὐ μὴν ἀλλὰ ζητητέον μή ποτε [1340a] τοῦτο μὲν συμβέβηκε, τιμιωτέρα δ’ αὐτῆς ἡ φύσις ἐστὶν ἢ κατὰ τὴν εἰρημένην χρεῖαν, καὶ δεῖ μὴ μόνον τῆς κοινῆς ἡδονῆς μετέχειν ἀπ’ αὐτῆς, ἥς ἔχουσι πάντες αἰσθησιν (ἔχει γὰρ ἡ μουσικὴ τιν’ ἡδονὴν φυσικὴν, διὸ πάσαις ἡλικίαις καὶ πᾶσιν ἡθεσιν ἢ χρῆσις αὐτῆς ἐστὶ προσφιλέης), ἀλλ’ ὅρᾱν εἴ πῃ καὶ πρὸς τὸ ἥθος συντείνει καὶ πρὸς τὴν ψυχὴν. τοῦτο δ’ ἂν εἴη δῆλον, εἰ ποιοί

τινες τὰ ἦθη γιγνόμεθα δι' αὐτῆς. ἀλλὰ μὴν ὅτι γιγνόμεθα ποιοῖ
τινες, φανερόν διὰ πολλῶν μὲν καὶ ἐτέρων, οὐχ ἥκιστα δὲ καὶ διὰ
τῶν Ὀλύμπου μελῶν· ταῦτα γὰρ ὁμολογουμένως ποιεῖ τὰς ψυχὰς
ἐνθουσιαστικὰς, ὁ δ' ἐνθουσιασμός τοῦ περὶ τὴν ψυχὴν ἦθους πάθος
ἐστίν. ἔτι δὲ ἀκροώμενοι τῶν μιμήσεων γίνονται πάντες συμπαθεῖς,
καὶ χωρὶς τῶν ρυθμῶν καὶ τῶν μελῶν αὐτῶν.

ἐπεὶ δὲ συμβέβηκεν εἶναι τὴν μουσικὴν τῶν ἡδέων, τὴν δ'

μανθάνειν καὶ συνεθίζεσθαι μὴθὲν οὕτως ὥς τὸ κρίνειν ὀρθῶς καὶ τὸ

τῶν λόγων ἐξ αὐτῶν τῶν ἔργων). τὸν αὐτὸν δὲ τρόπον ἔχει καὶ τὰ περὶ τοὺς ρυθμούς (οἱ μὲν γὰρ ἦθος ἔχουσι στασιμώτερον οἱ δὲ κινητικόν, καὶ τούτων οἱ μὲν φορτικωτέρας ἔχουσι τὰς κινήσεις οἱ δὲ ἐλευθεριωτέρας). ἐκ μὲν οὖν τούτων φανερόν ὅτι δύναται ποιοῦν τι τὸ τῆς ψυχῆς ἦθος ἢ μουσικὴ παρασκευάζειν, εἰ δὲ τοῦτο δύναται ποιεῖν, δηλὸν ὅτι προσακτέον καὶ παιδευτέον ἐν αὐτῇ τοὺς νέους. ἔστι δὲ ἀρμόττουσα πρὸς τὴν φύσιν τὴν τηλικαύτην ἡ διδασκαλία τῆς μουσικῆς· οἱ μὲν γὰρ νέοι διὰ τὴν ἡλικίαν ἀνήδυντον οὐθὲν ὑπομένουσιν ἐκόντες, ἡ δὲ μουσικὴ φύσει τῶν ἡδυσμάτων ἐστίν. καὶ τις ἔοικε συγγένεια ταῖς ἀρμονίαις καὶ τοῖς ρυθμοῖς εἶναι· διὸ πολλοὶ φασὶ τῶν σοφῶν οἱ μὲν ἀρμονίαν εἶναι τὴν ψυχὴν, οἱ δ' ἔχειν ἀρμονίαν.

Πότερον δὲ δεῖ μανθάνειν αὐτοὺς ἄδοντάς τε καὶ χειρουργοῦντας ἢ μὴ, καθάπερ ἠπορήθη πρότερον, νῦν λεκτέον οὐκ ἄδηλον δὴ ὅτι πολλὴν ἔχει διαφορὰν πρὸς τὸ γίνεσθαι ποιούς τινας, ἐάν τις αὐτὸς κοινωνῇ τῶν ἔργων· ἐν γὰρ τι τῶν ἀδυνάτων ἢ χαλεπῶν ἐστὶ μὴ κοινωνήσαντας τῶν ἔργων κριτὰς γενέσθαι σπουδαίους, ἅμα δὲ καὶ δεῖ τοὺς παῖδας ἔχειν τινὰ διατριβήν, καὶ τὴν Ἀρχύτου πλαταγὴν οἶεσθαι γενέσθαι καλῶς, ἣν διδόασιν τοῖς παιδίοις, ὅπως χρώμενοι ταύτῃ μηδὲν καταγνύωσι τῶν κατὰ τὴν οἰκίαν· οὐ γὰρ δύναται τὸ νέον ἡσυχάζειν. αὕτη μὲν οὖν ἐστὶ τοῖς νηπίοις ἀρμόττουσα τῶν παιδίων, ἡ δὲ παιδεία πλαταγὴ τοῖς μείζοσι τῶν νέων. ὅτι μὲν οὖν παιδευτέον τὴν μουσικὴν οὕτως ὥστε καὶ κοινωνεῖν τῶν ἔργων, φανερόν ἐκ τῶν τοιούτων· τὸ δὲ πρέπον καὶ τὸ μὴ πρέπον ταῖς ἡλικίαις οὐ χαλεπὸν διορίσαι, καὶ λῦσαι πρὸς τοὺς φάσκοντας βάνανσον εἶναι τὴν ἐπιμέλειαν. πρῶτον μὲν γάρ, ἐπεὶ τοῦ κρίνειν χάριν μετέχειν δεῖ τῶν ἔργων, διὰ τοῦτο χρὴ νέους μὲν ὄντας χρῆσθαι τοῖς ἔργοις, πρεσβυτέρους δὲ γενομένους τῶν μὲν ἔργων ἀφείσθαι, δύνασθαι δὲ τὰ καλὰ κρίνειν καὶ χαίρειν ὀρθῶς διὰ τὴν μάθησιν τὴν γενομένην ἐν τῇ νεότητι· περὶ δὲ τῆς ἐπιτιμήσεως ἦν τινες ἐπιτιμῶσιν ὥς ποιούσης τῆς μουσικῆς βαναύσους, οὐ χαλεπὸν λῦσαι σκεψαμένους μέχρι τε πόσου τῶν ἔργων κοινωνητέον τοῖς πρὸς ἀρετὴν [1341a] παιδευομένοις πολιτικὴν, καὶ ποίων μελῶν καὶ ποίων ρυθμῶν κοινωνητέον, ἔτι δὲ ἐν ποίοις ὀργάνοις τὴν μάθησιν ποιητέον, καὶ γὰρ τοῦτο διαφέρειν εἰκός. ἐν τούτοις γὰρ ἡ λύσις ἐστὶ τῆς ἐπιτιμήσεως· οὐδὲν γὰρ κωλύει τρόπους τινὰς τῆς μουσικῆς ἀπεργάζεσθαι τὸ λεχθέν. φανερόν τοίνυν ὅτι δεῖ τὴν μάθησιν αὐτῆς

μήτε ἐμποδίζειν πρὸς τὰς ὕστερον πράξεις, μήτε τὸ σῶμα ποιεῖν βάνανυσον καὶ ἄχρηστον πρὸς τὰς πολεμικὰς καὶ πολιτικὰς ἀσκήσεις, πρὸς μὲν τὰς μαθήσεις ἤδη, πρὸς δὲ τὰς χρήσεις ὕστερον.

συμβαίνει δ' ἂν περὶ τὴν μάθησιν, εἰ μήτε τὰ πρὸς τοὺς ἀγῶνας τοὺς τεχνικοὺς συντείνοντα διαπονοῖεν, μήτε τὰ θαυμάσια καὶ περιττὰ τῶν ἔργων, ἃ νῦν ἐλήλυθεν εἰς τοὺς ἀγῶνας ἐκ δὲ τῶν ἀγώνων εἰς τὴν παιδείαν, ἀλλὰ τὰ «μὴ» τοιαῦτα μέχρι περ ἂν δύνωνται χαίρειν τοῖς καλοῖς μέλεσι καὶ ῥυθμοῖς, καὶ μὴ μόνον τῷ κοινῷ τῆς μουσικῆς, ὥσπερ καὶ τῶν ἄλλων ἓνια ζῶων, ἔτι δὲ καὶ πληθος ἀνδραπόδων καὶ παιδίων. δῆλον δὲ ἐκ τούτων καὶ ποίοις ὀργάνοις χρηστέον. οὔτε γὰρ αὐλοὺς εἰς παιδείαν ἀκτέον οὔτ' ἄλλο τι τεχνικὸν ὄργανον, οἷον κιθάραν κἂν εἴ τι τοιοῦτον ἕτερον ἔστιν, ἀλλ' ὅσα ποιήσει τούτων ἀκροατὰς ἀγαθοὺς ἢ τῆς μουσικῆς παιδείας ἢ τῆς ἄλλης· ἔτι δὲ οὐκ ἔστιν ὁ αὐλὸς ἠθικὸν ἀλλὰ μᾶλλον ὀργιαστικόν, ὥστε πρὸς τοὺς τοιούτους αὐτῷ καιροὺς χρηστέον ἐν οἷς ἡ θεωρία κάθαρσιν μᾶλλον δύναται ἢ μάθησιν. προσθῶμεν δὲ ὅτι συμβέβηκεν ἐναντίον αὐτῷ πρὸς παιδείαν καὶ τὸ κωλύειν τῷ λόγῳ χρῆσθαι τὴν αὐλησιν. διὸ καλῶς ἀπεδοκίμασαν οἱ πρότερον αὐτοῦ τὴν χρῆσιν ἐκ τῶν νέων καὶ τῶν ἐλευθέρων, καίπερ χρησάμενοι τὸ πρῶτον αὐτῷ. σχολαστικώτεροι γὰρ γιγνόμενοι διὰ τὰς εὐπορίας καὶ μεγαλοψυχότεροι πρὸς τὴν ἀρετὴν, ἔτι τε «καὶ» πρότερον καὶ μετὰ τὰ Μηδικὰ φρονηματισθέντες ἐκ τῶν ἔργων, πάσης ἥπτοντο μαθήσεως, οὐδὲν διακρίνοντες ἀλλ' ἐπιζητοῦντες. διὸ καὶ τὴν αὐλητικὴν ἤγαγον πρὸς τὰς μαθήσεις. καὶ γὰρ ἐν Λακεδαιμονίᾳ τις χορηγὸς αὐτὸς ἠύλησε τῷ χορῷ, καὶ περὶ Ἀθῆνας οὕτως ἐπεχωρίασεν ὥστε σχεδὸν οἱ πολλοὶ τῶν ἐλευθέρων μετεῖχον αὐτῆς· δῆλον δὲ ἐκ τοῦ πίνακος ὃν ἀνέθηκε Θράσιππος Ἐκφαντίδῃ χορηγήσας. ὕστερον δ' ἀπεδοκιμάσθη διὰ τῆς πείρας αὐτῆς, βέλτιον δυναμένων κρίνειν τὸ πρὸς ἀρετὴν καὶ τὸ μὴ πρὸς ἀρετὴν συντεῖνον· ὁμοίως δὲ καὶ πολλὰ τῶν ὀργάνων τῶν ἀρχαίων, οἷον πηκτίδες καὶ βάρβιτοι καὶ τὰ πρὸς ἡδονὴν συντείνοντα τοῖς ἀκούουσι τῶν χρωμένων, ἐπτάγωνα καὶ τρίγωνα καὶ [1341b] σαμβῦκαι, καὶ πάντα τὰ δεόμενα χειρουργικῆς ἐπιστήμης. εὐλόγως δ' ἔχει καὶ τὸ περὶ τῶν αὐλῶν ὑπὸ τῶν ἀρχαίων μεμυθολογημένον. φασὶ γὰρ διὴ τὴν Ἀθηνᾶν εὐροῦσαν ἀποβαλεῖν τοὺς αὐλοὺς. οὐ κακῶς μὲν οὖν ἔχει φάναι καὶ διὰ τὴν ἀσχημοσύνην τοῦ προσώπου τοῦτο ποιῆσαι δυσχεράνασαν τὴν θεόν· οὐ μὴν ἀλλὰ μᾶλλον εἰκὸς ὅτι πρὸς τὴν διάνοιαν οὐθέν ἐστιν ἡ παιδεία τῆς

αὐλήσεως, τῇ δὲ Ἀθηνᾶ τὴν ἐπιστήμην περιτίθεμεν καὶ τὴν τέχνην. ἐπεὶ δὲ τῶν τε ὀργάνων καὶ τῆς ἐργασίας ἀποδοκιμάζομεν τὴν τεχνικὴν παιδείαν (τεχνικὴν δὲ τίθεμεν τὴν πρὸς τοὺς ἀγῶνας· ἐν ταύτῃ γὰρ ὁ πρᾶττων οὐ τῆς αὐτοῦ μεταχειρίζεται χάριν ἀρετῆς, ἀλλὰ τῆς τῶν ἀκούοντων ἡδονῆς, καὶ ταύτης φορτικῆς, διόπερ οὐ τῶν ἐλευθέρων κρίνομεν εἶναι τὴν ἐργασίαν, ἀλλὰ θητικωτέραν· καὶ βαναύσους δὴ συμβαίνει γίγνεσθαι· πονηρὸς γὰρ ὁ σκοπὸς πρὸς ὃν ποιοῦνται τὸ τέλος· ὁ γὰρ θεατῆς φορτικὸς ὢν μεταβάλλειν εἴωθε τὴν μουσικὴν, ὥστε καὶ τοὺς τεχνίτας τοὺς πρὸς αὐτὸν μελετῶντας αὐτούς τε ποιούς τινας ποιεῖ καὶ τὰ σώματα διὰ τὰς κινήσεις), σκεπτέον ἔτι περὶ τε τὰς ἁρμονίας καὶ τοὺς ῥυθμούς, καὶ πρὸς παιδείαν πότερον πάσαις χρηστέον ταῖς ἁρμονίαις καὶ πᾶσι τοῖς ῥυθμοῖς ἢ διαιρετέον, ἔπειτα τοῖς πρὸς παιδείαν διαπονοῦσι πότερον τὸν αὐτὸν διορισμὸν θήσομεν ἢ [τρίτον] δεῖ τινα ἕτερον. ἐπεὶ δὴ τὴν μὲν μουσικὴν ὀρῶμεν διὰ μελοποιίας καὶ ῥυθμῶν οὖσαν, τούτων δ' ἐκάτερον οὐ δεῖ λεληθῆναι τίνα δύναμιν ἔχει πρὸς παιδείαν, καὶ πότερον προαιρετέον μᾶλλον τὴν εὐμελῆ μουσικὴν ἢ τὴν εὐρυθμον, νομίσαντες οὖν πολλὰ καλῶς λέγειν περὶ τούτων τῶν τε νῦν μουσικῶν ἐνίους καὶ τῶν ἐκ φιλοσοφίας ὅσοι τυγχάνουσιν ἐμπείρως ἔχοντες τῆς περὶ τὴν μουσικὴν παιδείας, τὴν μὲν καθ' ἕκαστον ἀκριβολογίαν ἀποδώσομεν ζητεῖν τοῖς βουλομένοις παρ' ἐκείνων, νῦν δὲ νομικῶς διέλωμεν, τοὺς τύπους μόνον εἰπόντες περὶ αὐτῶν.

ἐπεὶ δὲ τὴν διαίρεσιν ἀποδεχόμεθα τῶν μελῶν ὡς διαιρουσί τινες τῶν ἐν φιλοσοφίᾳ, τὰ μὲν ἠθικὰ τὰ δὲ πρακτικὰ τὰ δ' ἐνθουσιαστικὰ τιθέντες, καὶ τῶν ἁρμονιῶν τὴν φύσιν <τὴν> πρὸς ἕκαστα τούτων οἰκείαν, ἄλλην πρὸς ἄλλο μέλος, τιθέασι, φαμέν δ' οὐ μιᾶς ἕνεκεν ὠφελείας τῇ μουσικῇ χρῆσθαι δεῖν ἀλλὰ καὶ πλειόνων χάριν (καὶ γὰρ παιδείας ἕνεκεν καὶ καθάρσεως - τί δὲ λέγομεν τὴν κάθαρσιν, νῦν μὲν ἀπλῶς, πάλιν δ' ἐν τοῖς περὶ ποιητικῆς ἐροῦμεν σαφέστερον - τρίτον δὲ πρὸς διαγωγὴν πρὸς ἄνεσιν τε καὶ πρὸς τὴν τῆς συντονίας ἀνάπαυσιν), [1342a] φανερόν ὅτι χρηστέον μὲν πάσαις ταῖς ἁρμονίαις, οὐ τὸν αὐτὸν δὲ τρόπον πάσαις χρηστέον, ἀλλὰ πρὸς μὲν τὴν παιδείαν ταῖς ἠθικωτάταις, πρὸς δὲ ἀκρόασιν ἐτέρων χειρουργούντων καὶ ταῖς πρακτικαῖς καὶ ταῖς ἐνθουσιαστικαῖς. ὁ γὰρ περὶ ἐνίας συμβαίνει πάθος ψυχᾶς ἰσχυρῶς, τοῦτο ἐν πάσαις ὑπάρχει, τῷ δὲ ἥττον διαφέρει καὶ τῷ μᾶλλον, οἷον ἔλεος καὶ φόβος, ἔτι δ' ἐνθουσιασμός· καὶ γὰρ ὑπὸ ταύτης τῆς

κινήσεως κατοκώχιμοί τινές εἰσιν, ἐκ τῶν δ' ἱερῶν μελῶν ὀρῶμεν τούτους, ὅταν χρήσονται τοῖς ἐξοργιάζουσι τὴν ψυχὴν μέλεσι, καθισταμένους ὥσπερ ἰατρείας τυχόντας καὶ καθάρσεως· ταῦτο δὴ τοῦτο ἀναγκαῖον ἀσχεῖν καὶ τοὺς ἐλεήμονας καὶ τοὺς φοβητικούς καὶ τοὺς ὄλως παθητικούς, τοὺς δ' ἄλλους καθ' ὅσον ἐπιβάλλει τῶν τοιούτων ἐκάστῳ, καὶ πᾶσι γίνεσθαι τινα κάθαρσιν καὶ κουφίζεσθαι μεθ' ἡδονῆς. ὁμοίως δὲ καὶ τὰ μέλη τὰ πρακτικὰ παρέχει χαρὰν ἀβλαβῇ τοῖς ἀνθρώποις· διὸ ταῖς μὲν τοιαύταις ἀρμονίαις καὶ τοῖς τοιούτοις μέλεσιν ἐατέον <χρῆσθαι> τοὺς τὴν θεατρικὴν μουσικὴν μεταχειριζομένους ἀγωνιστάς· ἐπεὶ δ' ὁ θεατὴς διττός, ὁ μὲν ἐλεύθερος καὶ πεπαιδευμένος, ὁ δὲ φορτικός ἐκ βαναύσων καὶ θητῶν καὶ ἄλλων τοιούτων συγκείμενος, ἀποδοτέον ἀγῶνας καὶ θεωρίας καὶ τοῖς τοιούτοις πρὸς ἀνάπαυσιν· εἰσὶ δὲ ὥσπερ αὐτῶν αἱ ψυχαὶ παρεστραμμέναι τῆς κατὰ φύσιν ἕξεως - οὕτω καὶ τῶν ἀρμονιῶν παρεκβάσεις εἰσὶ καὶ τῶν μελῶν τὰ σύντονα καὶ παρακεχρωσμένα, ποιεῖ δὲ τὴν ἡδονὴν ἐκάστοις τὸ κατὰ φύσιν οἰκεῖον, διόπερ ἀποδοτέον ἐξουσίαν τοῖς ἀγωνιζομένοις πρὸς τὸν θεατὴν τὸν τοιοῦτον τοιούτῳ τινὶ χρῆσθαι τῷ γένει τῆς μουσικῆς. πρὸς δὲ παιδείαν, ὥσπερ εἴρηται, τοῖς ἡθικοῖς τῶν μελῶν χρηστέον καὶ ταῖς ἀρμονίαις ταῖς τοιαύταις. τοιαύτη δ' ἡ δωριστί, καθάπερ εἵπομεν πρότερον· δέχεσθαι δὲ δεῖ καὶ τινα ἄλλην ἡμῖν δοκιμάζωσιν οἱ κοινωνοὶ τῆς ἐν φιλοσοφίᾳ διατριβῆς καὶ τῆς περὶ τὴν μουσικὴν παιδείας. ὁ δ' ἐν τῇ Πολιτείᾳ Σωκράτης οὐ καλῶς τὴν φρυγιστὴ μόνην καταλείπει μετὰ τῆς δωριστί, καὶ ταῦτα ἀποδοκιμάσας [1342b] τῶν ὀργάνων τὸν αὐλόν. ἔχει γὰρ τὴν αὐτὴν δύναμιν ἢ φρυγιστὴ τῶν ἀρμονιῶν ἢνπερ αὐλὸς ἐν τοῖς ὀργάνοις· ἄμφω γὰρ ὀργιαστικά καὶ παθητικά· [δηλοῖ δ' ἡ ποίησις]. πᾶσα γὰρ βακχεία καὶ πᾶσα ἡ τοιαύτη κίνησις μάλιστα τῶν ὀργάνων ἐστὶν ἐν τοῖς αὐλοῖς, τῶν δ' ἀρμονιῶν ἐν τοῖς φρυγιστὴ μέλεσι λαμβάνει ταῦτα τὸ πρέπον. <δηλοῖ δ' ἡ ποίησις,> οἷον ὁ διθύραμβος ὁμολογουμένως εἶναι δοκεῖ Φρύγιον. καὶ τούτου πολλὰ παραδείγματα λέγουσιν οἱ περὶ τὴν σύνεσιν ταύτην, ἄλλα τε καὶ ὅτι Φιλόξενος ἐγχειρήσας ἐν τῇ δωριστὴ ποιῆσαι [διθύραμβον] τοὺς Μυσοὺς οὐχ οἴός τ' ἦν, ἀλλ' ὑπὸ τῆς φύσεως αὐτῆς ἐξέπεσεν εἰς τὴν φρυγιστὴ τὴν προσήκουσαν ἀρμονίαν πάλιν. περὶ δὲ τῆς δωριστί πάντες ὁμολογοῦσιν ὡς στασιμωτάτης οὔσης καὶ μάλιστα ἦθος ἐχούσης ἀνδρεῖον. ἔτι δὲ ἐπεὶ τὸ μέσον μὲν τῶν ὑπερβολῶν ἐπαινοῦμεν καὶ χρῆναι διώκειν φαμέν, ἢ δὲ δωριστὴ

ταύτην ἔχει τὴν φύσιν πρὸς τὰς ἄλλας ἀρμονίας, φανερόν ὅτι τὰ Δώρα μέλη πρέπει παιδεύεσθαι μᾶλλον τοῖς νεωτέροις.

εἰσὶ δὲ δύο σκοποί, τό τε δυνατόν καὶ τὸ πρόπον· καὶ γὰρ τὰ δυνατόα δεῖ μεταχειρίζεσθαι μᾶλλον καὶ τὰ πρόποντα ἐκάστους. ἔστι δὲ καὶ ταῦτα ὠρισμένα ταῖς ἡλικίαις, οἷον τοῖς ἀπειρηκόσι διὰ χρόνον οὐ ῥάδιον ἄδειν τὰς συντόνους ἀρμονίας, ἀλλὰ τὰς ἀνειμένας ἢ φύσις ὑποβάλλει τοῖς τηλικούτοις. διὸ καλῶς ἐπιτιμῶσι καὶ τοῦτο Σωκράτει τῶν περὶ τὴν μουσικὴν τινες, ὅτι τὰς ἀνειμένας ἀρμονίας ἀποδοκιμάσειεν εἰς τὴν παιδείαν, οὐ κατὰ τὴν τῆς μέθης δύναμιν, ὡς μεθυστικὰς λαμβάνων αὐτάς (βακχευτικὸν γὰρ ἢ γε μέθη ποιεῖ μᾶλλον), ἀλλ' ἀπειρηκυίας. ὥστε καὶ πρὸς τὴν ἐσομένην ἡλικίαν, τὴν τῶν πρεσβυτέρων, δεῖ καὶ τῶν τοιούτων ἀρμονιῶν ἄπτεσθαι καὶ τῶν μελῶν τῶν τοιούτων, ἔτι δ' εἴ τίς ἐστὶ τοιαύτη τῶν ἀρμονιῶν ἢ πρέπει τῇ τῶν παίδων ἡλικίᾳ διὰ τὸ δύνασθαι κόσμον τ' ἔχειν ἅμα καὶ παιδείαν, οἷον ἡ λυδιστὶ φαίνεται πεπονθέναι μάλιστα τῶν ἀρμονιῶν. δηλὸν «οὖν» ὅτι τούτους ὄρους τρεῖς ποιητέον εἰς τὴν παιδείαν, τό τε μέσον καὶ τὸ δυνατόν καὶ τὸ πρόπον.

ΟΙΚΟΝΟΜΙΚΟΣ ΠΡΩΤΟΣ

[1343a] Ἡ οἰκονομικὴ καὶ <ή> πολιτικὴ διαφέρει οὐ μόνον τοσοῦτον ὅσον οἰκία καὶ πόλις (ταῦτα μὲν γὰρ αὐταῖς ἐστὶ τὰ ὑποκείμενα), ἀλλὰ καὶ ὅτι ἡ μὲν πολιτικὴ ἐκ πολλῶν ἀρχόντων ἐστίν, ἡ οἰκονομικὴ δὲ μοναρχία.

Ἔναι μὲν οὖν τῶν τεχνῶν διήρηνται, καὶ οὐ τῆς αὐτῆς ἐστὶ ποιῆσαι καὶ χρήσασθαι τῷ ποιηθέντι, ὥσπερ λύρα καὶ αὐλοῖς· τῆς δὲ πολιτικῆς ἐστὶ καὶ πόλιν ἐξ ἀρχῆς συστήσασθαι καὶ ὑπαρχούσῃ χρήσασθαι καλῶς· ὥστε δῆλον ὅτι καὶ τῆς οἰκονομικῆς ἂν εἴη καὶ κτήσασθαι οἶκον καὶ χρήσασθαι αὐτῷ.

Πόλις μὲν οὖν οἰκιῶν πληθὸς ἐστὶ καὶ χώρας καὶ κτημάτων αὐταρκες πρὸς τὸ εὖ ζῆν. Φανερόν δέ· ὅταν γὰρ μὴ δυνατοὶ ὥσι τούτου τυγχάνειν, διαλύεται καὶ ἡ κοινωνία. Ἔτι δὲ ἔνεκα τούτου συνέρχονται. Οὗ δὲ ἔνεκα ἕκαστόν ἐστι καὶ γέγονε, καὶ ἡ οὐσία αὐτοῦ τυγχάνει αὕτη οὕσα· ὥστε δῆλον ὅτι πρότερον γενέσει ἡ οἰκονομικὴ <τῆς> πολιτικῆς ἐστὶ. Καὶ γὰρ τὸ ἔργον· μόριον γὰρ οἰκία πόλεώς ἐστι.

Σκεπτέον οὖν περὶ τῆς οἰκονομικῆς καὶ τί τὸ ἔργον αὐτῆς.

Μέρη δὲ οἰκίας ἀνθρωπός τε καὶ κτῆσις ἐστίν. Ἐπεὶ δὲ πρῶτον ἐν τοῖς ἐλαχίστοις ἡ Φύσις ἐκάστου θεωρεῖται, καὶ περὶ οἰκίας ἂν ὁμοίως ἔχοι. Ὡστε καθ' Ἡσίοδον δέοι ἂν ὑπάρχειν

οἶκον μὲν πρώτιστα γυναῖκά τε βοῦν τ' ἀροτῆρα.

Τὸ μὲν γὰρ τῆς τροφῆς πρῶτον, τὸ δὲ τῶν ἐλευθέρων <δεύτερον>· ὥστε δέοι ἂν τὰ περὶ τὴν τῆς γυναικὸς ὁμιλίαν οἰκονομήσασθαι καλῶς· τοῦτο δὲ ἐστὶν ὅποιαν τινὰ δεῖ ταύτην εἶναι παρασκευάσαι.

Κτήσεως δὲ πρώτη ἐπιμέλεια ἡ κατὰ φύσιν. Κατὰ φύσιν δὲ γεωργικὴ προτέρα, καὶ δευτέραι ὅσαι ἀπὸ τῆς γῆς, οἷον μεταλλευτικὴ καὶ εἴ τις ἄλλη τοιαύτη. Ἡ δὲ γεωργικὴ μάλιστα, ὅτι δικαία· οὐ γὰρ ἀπ' ἀνθρώπων, οὐθ' ἐκόντων, ὥσπερ καπηλεία καὶ αἱ μισθαρνικαί, οὐτ' ἀκόντων, ὥσπερ αἱ πολεμικαί. Ἔτι δὲ καὶ τῶν κατὰ φύσιν· φύσει [1343b] γὰρ ἀπὸ τῆς μητρὸς ἡ τροφή πᾶσιν ἐστίν, ὥστε καὶ τοῖς ἀνθρώποις ἀπὸ τῆς γῆς.

Πρὸς δὲ τούτοις καὶ πρὸς ἀνδρείαν συμβάλλεται μέγала· οὐ γὰρ ὥσπερ αἱ βάνηυσοι τὰ σώματα ἀχρεῖα ποιοῦσιν, ἀλλὰ δυνάμενα

θυραυλεῖν καὶ πονεῖν· ἔτι δὲ δυνάμενα κινδυνεύειν πρὸς τοὺς πολεμίους· μόνων γὰρ τούτων τὰ κτήματα ἔξω τῶν ἐρυμάτων ἐστίν.

Τῶν δὲ περὶ τοὺς ἀνθρώπους ἡ κατὰ γυναῖκα πρώτη ἐπιμέλεια. Κοινωνία γὰρ φύσει τῷ θήλει καὶ τῷ ἄρρενι μάλιστά ἐστιν. Ὑπόκειται γὰρ ἡμῖν ἐν ἄλλοις ὅτι πολλὰ τοιαῦτα ἡ φύσις ἐφίεται ἀπεργάζεσθαι, ὥσπερ καὶ τῶν ζώων ἕκαστον· ἀδύνατον δὲ τὸ θῆλυ ἄνευ τοῦ ἄρρενος ἢ τὸ ἄρρεν ἄνευ τοῦ θήλεος ἀποτελεῖν τοῦτο· ὥστ' ἐξ ἀνάγκης αὐτῶν ἡ κοινωνία συνέστηκεν.

Ἐν μὲν οὖν τοῖς ἄλλοις ζώοις ἀλόγως τοῦτο ὑπάρχει, καὶ ἐφ' ὅσον μετέχουσι τῆς φύσεως, ἐπὶ τοσοῦτον, καὶ τεκνοποιίας μόνον χάριν· ἐν δὲ τοῖς ἡμέροις καὶ φρονιμωτέροις διήρθρωται μᾶλλον (φαίνονται γὰρ μᾶλλον βοήθειαι γινόμεναι καὶ εὐνοιαὶ καὶ συνεργίαι ἀλλήλοις)· ἐν ἀνθρώπῳ δὲ μάλιστα, ὅτι οὐ μόνον τοῦ εἶναι, ἀλλὰ καὶ τοῦ εἶναι συνεργὰ ἀλλήλοις τὸ θῆλυ καὶ τὸ ἄρρεν ἐστί. Καὶ ἡ τῶν τέκνων κτήσις οὐ λειτουργίας ἕνεκεν τῇ φύσει μόνον οὕσα τυγχάνει, ἀλλὰ καὶ ὠφελείας· ἃ γὰρ ἂν δυνάμενοι εἰς ἀδυνάτους πονήσωσι, πάλιν κομίζονται παρὰ δυναμένων ἀδυνατοῦντες ἐν τῷ γήρῳ.

Ἄμα δὲ καὶ ἡ φύσις ἀναπληροῖ ταύτη τῇ περιόδῳ τὸ αἰεὶ εἶναι, ἐπεὶ κατ' ἀριθμὸν οὐ δύναται, ἀλλὰ κατὰ τὸ εἶδος. Οὕτω προφικονόμηται ὑπὸ τοῦ θεοῦ ἑκατέρου ἡ φύσις, τοῦ τε ἀνδρὸς καὶ τῆς γυναικός, πρὸς τὴν κοινωνίαν· διείληπται γὰρ τῷ μὴ ἐπὶ ταῦτα πάντα χρήσιμον ἔχειν τὴν δύναμιν, ἀλλ' ἕνια μὲν ἐπὶ τὰναντία, εἰς ταῦτόν δὲ συντείνοντα· τὸ μὲν γὰρ ἰσχυρότερον, τὸ δ' ἀσθενέστερον ἐποίησεν, ἵνα [1344a] τὸ μὲν φυλακτικώτερον ἢ διὰ τὸν φόβον, τὸ δ' ἀμυντικώτερον διὰ τὴν ἀνδρείαν, καὶ τὸ μὲν πορίζῃ τὰ ἔξωθεν, τὸ δὲ σφύζῃ τὰ ἔνδον· καὶ πρὸς τὴν ἐργασίαν τὸ μὲν δυνάμενον ἐδραῖον εἶναι, πρὸς δὲ τὰς ἔξωθεν θυραυλίας ἀσθενές, τὸ δὲ πρὸς μὲν τὰς ἡσυχίας χειρόν, πρὸς δὲ τὰς κινήσεις ὑγιεινόν· καὶ περὶ τέκνων τὴν μὲν γένεσιν κοινήν, τὴν δὲ ὠφέλειαν ἴδιον· τῶν μὲν γὰρ τὸ θρέψαι, τῶν δὲ τὸ παιδεῦσαί ἐστιν.

Πρῶτον μὲν οὖν [νόμοι πρὸς γυναῖκα] [καὶ] τὸ μὴ ἀδικεῖν· οὕτως γὰρ ἂν οὐδ' αὐτὸς ἀδικοῖτο. Τοῦθ' ὑφηγεῖται δὲ [δ] καὶ ὁ κοινὸς νόμος· καθάπερ οἱ Πυθαγόρειοι λέγουσιν, ὥσπερ ἰκέτιν καὶ ἀφ' ἐστίας ἡγμένην ὡς ἥκιστα δεῖν [δοκεῖν] ἀδικεῖν· ἀδικία δὲ ἀνδρὸς αἰ θύραζε συνουσίαι γιγνώμεναι.

Περὶ δὲ ὁμιλίας μήθ' ὥστε «παρόντος» δεῖσθαι μήθ' ὡς ἀπόντος ἀδυνατεῖν [ἡσυχάζειν], ἀλλ' οὕτως ἐθίζειν ὥστε ἱκανῶς

ἔχειν παρόντος καὶ μὴ παρόντος. Εὖ δ' ἔχει καὶ τὸ τοῦ Ἡσιόδου.

παρθενικὴν δὲ γαμεῖν, ἵνα ἡθεα κεδνὰ διδάξῃς.

Αἱ γὰρ ἀνομοιότητες τῶν ἡθῶν ἥκιστα φιλικόν.

Περὶ δὲ κοσμήσεως, ὥσπερ οὐδὲ τὰ ἥθη δεῖ ἀλαζονευομένους ἀλλήλοις πλησιάζειν, οὕτως οὐδὲ τὰ σώματα. Ἡ δὲ διὰ τῆς κοσμήσεως οὐδὲν διαφέρει οὐσ' ἐστὶ τῆς τῶν τραγωδῶν ἐν τῇ σκευῇ πρὸς ἀλλήλους ὁμιλία.

Τῶν δὲ κτημάτων πρῶτον μὲν καὶ ἀναγκαϊότατον τὸ βέλτιστον καὶ οἰκονομικώτατον· τοῦτο δὲ ἦν ἄνθρωπος. Διὸ δεῖ πρῶτον δούλους παρασκευάζεσθαι σπουδαίους. Δούλων δὲ εἶδη δύο, ἐπίτροπος καὶ ἐργάτης. Ἐπεὶ δὲ ὁρῶμεν ὅτι αἱ παιδεῖαι ποιοῦς τινὰς ποιοῦσι τοὺς νέους, ἀναγκαῖον καὶ παρασκευασάμενον τρέφειν οἷς τὰ ἐλευθέρια τῶν ἔργων προστακτέον.

Ὅμιλία δὲ πρὸς δούλους ὥς μήτε ὑβρίζειν ἔαν μήτε ἀνιέναι· καὶ τοῖς μὲν ἐλευθεριωτέροις τιμῆς μεταδιδόναι, τοῖς δ' ἐργάταις τροφῆς πληθος. Καὶ ἐπειδὴ ἡ τοῦ οἴνου πόσις καὶ τοὺς ἐλευθέρους ὑβριστὰς ποιεῖ, καὶ πολλὰ ἔθνη ἀπέχεται καὶ τῶν ἐλευθέρων, οἷον Καρχηδόνιοι ἐπὶ στρατιᾷς, φανερόν ὅτι τούτου ἢ μηδὲν ἢ ὀλιγάκις μεταδοτέον.

Ὅντων δὲ τριῶν, ἔργου καὶ κολάσεως καὶ τροφῆς, τὸ μὲν μήτε κολάζεσθαι, μήτ' ἐργάζεσθαι, τροφήν δ' ἔχειν ὕβριν [1344b] ἐμποιεῖ· τὸ δὲ ἔργα μὲν ἔχειν καὶ κολάσεις, τροφήν δὲ μὴ, βίαιον καὶ ἀδυναμίαν ποιεῖ. Λείπεται δὴ ἔργα παρέχειν καὶ τροφήν ἱκανήν· ἀμίσθων γὰρ οὐχ οἷόν τε ἄρχειν, δούλῳ δὲ μισθὸς τροφή. Ὡσπερ δὲ καὶ τοῖς ἄλλοις ὅταν μὴ γίγνηται τοῖς βελτίοσι βέλτιον μηδὲ ἄθλα ἢ ἀρετῆς καὶ κακίας, γίνονται χεῖρους, οὕτω καὶ περὶ οἰκέτας.

Διόπερ δεῖ ποιεῖσθαι σκέπιν καὶ διανέμειν τε καὶ ἀνιέναι κατ' ἀξίαν ἕκαστα, καὶ τροφήν καὶ ἐσθῆτα καὶ ἀργίαν καὶ κολάσεις λόγῳ καὶ ἔργῳ, μιμουμένους τὴν τῶν ἰατρῶν δύναμιν ἐν φαρμάκου λόγῳ, προσθεωροῦντας ὅτι ἡ τροφή οὐ φάρμακον διὰ τὸ συνεχές.

Γένη δὲ ἂν εἴη πρὸς τὰ ἔργα βέλτιστα <τὰ> μήτε δειλὰ μήτε ἀνδρεῖα ἄγαν. Ἀμφοτέρω γὰρ ἀδικοῦσι. Καὶ γὰρ οἱ ἄγαν δειλοὶ οὐχ ὑπομένουσι καὶ οἱ θυμοειδεῖς οὐκ εὖαρχοι. Χρὴ δὲ καὶ τέλος ὀρίσθαι πᾶσι· δίκαιον γὰρ καὶ συμφέρον τὴν ἐλευθερίαν κεῖσθαι ἄθλον. Βούλονται γὰρ πονεῖν, ὅταν ἢ ἄθλον καὶ ὁ χρόνος ὀρισμένος. Δεῖ δὲ καὶ ἐξομηρεύειν ταῖς τεκνοποιίαις· καὶ μὴ κτᾶσθαι ὁμοεθνεῖς πολλούς, ὥσπερ καὶ ἐν ταῖς πόλεσιν· καὶ τὰς θυσίας καὶ τὰς

ἀπολαύσεις μᾶλλον τῶν δούλων ἔνεκα ποιεῖσθαι ἢ τῶν ἐλευθέρων· πλείονα γὰρ ἔχουσιν οὗτοι οὐπὲρ ἔνεκα τὰ τοιαῦτα ἐνομίσθη.

Εἶδη δὲ τοῦ οἰκονόμου τέτταρα <καθ'> ἃ δεῖ ἔχειν περὶ τὰ χρήματα. Καὶ γὰρ τὸ κτᾶσθαι δυνατόν χρή εἶναι, καὶ φυλάττειν (εἰ δὲ μή, οὐδὲν ὄφελος τοῦ κτᾶσθαι· τῷ γὰρ ἡθμῶ ἀντλεῖν τοῦτ' ἔστι, καὶ ὁ λεγόμενος τετρημένος πίθος)· ἔτι δὲ καὶ εἶναι κοσμητικὸν τῶν ὑπαρχόντων καὶ χρηστικόν· τούτων γὰρ ἔνεκα κάκεινων δεόμεθα.

Διηρῆσθαι δὲ δεῖ τούτων ἕκαστον, καὶ πλείω τὰ κάρπιμα εἶναι τῶν ἀκάρπων, καὶ τὰς ἐργασίας οὕτω νενεμῆσθαι ὅπως μὴ ἅμα κινδυνεύσωσιν ἅπασαι. Πρὸς δὲ φυλακὴν τοῖς τε Περσικοῖς συμφέρει χρῆσθαι καὶ τοῖς Λακωνικοῖς. Καὶ ἡ Ἀττικὴ δὲ οἰκονομία χρήσιμος· ἀποδιδόμενοι γὰρ ὠνοῦνται, καὶ ἡ τοῦ ταμείου θέσις οὐκ ἔστιν ἐν ταῖς μικροτέραις οἰκονομίαις.

Περσικὰ δὲ ἦν τὸ πάντα ἐπιτάττειν καὶ <τὸ> πάντ' ἐφορᾶν αὐτόν, καθ' ὃ ἔλεγε Δίων περὶ Διονυσίου· οὐδεὶς γὰρ ἐπιμελεῖται ὁμοίως τῶν ἀλλοτρίων καὶ τῶν οἰκείων, ὥστε ὅσα [1345a] ἐνδέχεται, δι' ἑαυτοῦ ποιεῖσθαι χρή τὴν ἐπιμέλειαν. Καὶ τὸ τοῦ Πέρσου καὶ τὸ τοῦ Λίβυος ἀπόφθεγμα εὖ ἂν ἔχοι. Ὁ μὲν γὰρ ἐρωτηθεὶς τί μάλιστα ἵππον πιαίνει, “ὁ τοῦ δεσπότης ὀφθαλμός” ἔφη· ὁ δὲ Λίβυς ἐρωτηθεὶς ποία κόπρος ἀρίστη, “τὰ τοῦ δεσπότης ἵχνη” ἔφη.

Ἐπισκεπτέον οὖν τὰ μὲν αὐτόν, τὰ δὲ τὴν γυναῖκα, ὡς ἑκατέροις διαιρεῖται τὰ ἔργα τῆς οἰκονομίας. Καὶ τοῦτο ποιητέον ἐν μικραῖς οἰκονομίαις ὀλιγάκις, ἐν δ' ἐπιτροπευομέναις πολλάκις. Οὐ γὰρ οἷόν τε μὴ καλῶς ὑποδεικνύντος καλῶς μιμεῖσθαι, οὔτ' ἐν τοῖς ἄλλοις, οὔτ' ἐν ἐπιτροπείᾳ, ὡς ἀδύνατον <ἂν> μὴ ἐπιμελῶν δεσποτῶν ἐπιμελεῖς εἶναι τοὺς ἐφεστῶτας.

Ἐπεὶ δὲ ταῦτα καὶ καλὰ πρὸς ἀρετὴν καὶ ὠφέλιμα πρὸς οἰκονομίαν, ἐγείρεσθαι χρή πρότερον δεσπότης οἰκετῶν καὶ καθεύδειν ὕστερον· καὶ μηδέποτε ἀφύλακτον <τὴν> οἰκίαν εἶναι, ὥσπερ πόλιν· ὅσα τε δεῖ ποιεῖν μήτε νυκτὸς μήτε ἡμέρας παριέναι· τό τε διανίστασθαι νύκτωρ· τοῦτο γὰρ καὶ πρὸς ὑγίειαν καὶ οἰκονομίαν καὶ φιλοσοφίαν χρήσιμον.

Ἐν μὲν οὖν ταῖς μικραῖς κτήσεσιν ὁ Ἀττικὸς τρόπος τῆς διαθέσεως τῶν ἐπικαρπιῶν χρήσιμος· ἐν δὲ ταῖς μεγάλαις, διαμερισθέντων καὶ τῶν πρὸς ἐνιαυτὸν καὶ τῶν κατὰ μῆνα δαπανωμένων, ὁμοίως δὲ καὶ περὶ σκευῶν χρήσεως τῶν καθ' ἡμέραν καὶ τῶν ὀλιγάκις, ταῦτα παραδοτέον τοῖς ἐφεστῶσιν. Ἐπὶ τούτοις καὶ

τὴν ἐπίσκεψιν αὐτῶν διὰ τινος χρόνου ποιητέον, ἵνα μὴ λανθάνῃ τὸ σφζόμενον καὶ τὸ ἐλλεῖπον.

Οἰκίαν δὲ πρὸς τε τὰ κτήματα ἀποβλέποντα κατασκευαστέον καὶ πρὸς ὑγίειαν καὶ πρὸς εὐημερίαν αὐτῶν. Λέγω δὲ κτήματα μὲν, οἶον καρποῖς καὶ ἐσθῆτι ποία συμφέρει, καὶ τῶν καρπῶν ποία ξηροῖς καὶ ποία ὑγροῖς, καὶ τῶν ἄλλων κτημάτων ποία ἐμψύχοις καὶ ποία ἀψύχοις, καὶ δούλοις καὶ ἐλευθέροις, καὶ γυναιξὶ καὶ ἀνδράσι, καὶ ξένοις καὶ ἄστοις. Καὶ πρὸς εὐημερίαν δὲ καὶ πρὸς ὑγίειαν δεῖ εἶναι εὖπνουν μὲν τοῦ θέρους, εὐήλιον δὲ τοῦ χειμῶνος. Εἴη δ' ἂν [ἡ] τοιαύτη κατάβορρος οὕσα καὶ μὴ ἰσοπλατῆς.

Δοκεῖ δὲ καὶ ἐν ταῖς μεγάλαις οἰκονομίαις χρήσιμος εἶναι θυρωρὸς ὃς ἂν ᾗ ἄχρηστος τῶν ἄλλων ἔργων, πρὸς τὴν σωτηρίαν τῶν εἰσφερομένων [1345b] καὶ ἐκφερομένων. Πρὸς εὐχρηστίαν δὲ σκευῶν τὸ Λακωνικόν· χρή γὰρ ἓν ἕκαστον ἐν τῇ αὐτοῦ χώρᾳ κεῖσθαι· οὕτω γὰρ ἂν ἔτοιμον ὄν οὐ ζητοῖτο.

ΟΙΚΟΝΟΜΙΚΟΣ ΔΕΥΤΕΡΟΣ

Τὸν οἰκονομεῖν μέλλοντά τι κατὰ τρόπον τῶν τε τόπων, περὶ οὓς ἂν πραγματεύηται, μὴ ἀπείρως ἔχειν, καὶ τῇ φύσει εὐφυῇ εἶναι καὶ τῇ προαιρέσει φιλόπονόν τε καὶ δίκαιον· ὃ τι γὰρ ἂν ἀπῇ τούτων τῶν μερῶν, πολλὰ διαμαρτήσεται περὶ τὴν πραγματείαν ἣν μεταχειρίζεται. Οἰκονομίαι δέ εἰσι τέτταρες, ὥς ἐν τύπῳ διελέσθαι (τὰς γὰρ ἄλλας εἰς τοῦτο ἐμπιπτούσας εὐρήσομεν)· βασιλική, σατραπική, πολιτική, ιδιωτική.

Τούτων δὲ μεγίστη μὲν καὶ ἀπλουστάτη ἡ βασιλική, <...>, ποικιλωτάτη δὲ καὶ ῥάστη ἡ πολιτική, ἐλαχίστη δὲ καὶ ποικιλωτάτη ἡ ιδιωτική. Ἐπικοινωνεῖν μὲν τὰ πολλὰ ἀλλήλαις ἀναγκαῖόν ἐστιν· ὅσα δὲ μάλιστα δι' αὐτῶν ἐκάστη συμβαίνει, ταῦτα ἐπισκεπτέον ἡμῖν ἐστιν. Πρῶτον μὲν τοίνυν τὴν βασιλικὴν ἴδωμεν. Ἔστι δὲ αὕτη δυναμένη μὲν τὸ καθόλου, εἶδη δὲ ἔχουσα τέτταρα· περὶ <τὸ> νόμισμα, περὶ τὰ ἐξαγώγιμα, περὶ τὰ εἰσαγώγιμα, περὶ τὰ ἀναλώματα.

Τούτων δὲ ἕκαστον. Περὶ μὲν τὸ νόμισμα λέγω ποῖον καὶ πότε [τίμιον ἢ εὖωνον] ποιητέον· περὶ δὲ τὰ ἐξαγώγιμα καὶ εἰσαγώγιμα πότε καὶ τίνα παρὰ τῶν σατραπῶν ἐν τῇ ταγῇ ἐκλαβόντι αὐτῷ λυσιτελήσει διατίθεσθαι· περὶ δὲ τὰ ἀναλώματα τίνα περιαιρετέον καὶ πότε, καὶ πότερον δοτέον νόμισμα εἰς τὰς δαπάνας ἢ ἀντι νομίσματος ὄνια.

Δεύτερον δὲ τὴν σατραπικὴν. Ἔστι δὲ ταύτης εἶδη ἐξ τῶν προσόδων [ἀπὸ γῆς, ἀπὸ τῶν ἐν τῇ χώρᾳ ιδίων γινομένων, ἀπὸ ἐμπορίων, ἀπὸ τελῶν, ἀπὸ βοσκημάτων, ἀπὸ τῶν ἄλλων]. Αὐτῶν δὲ τούτων πρώτη μὲν καὶ κρατίστη ἡ ἀπὸ τῆς γῆς· αὕτη δὲ ἐστὶν ἣν οἱ μὲν ἐκφόριον, οἱ δὲ δεκάτην προσαγορεύουσιν. Δεύτερα δὲ ἡ ἀπὸ τῶν ιδίων γινομένη, οὗ μὲν χρυσίον, οὗ δὲ ἀργύριον, οὗ δὲ χαλκός, οὗ δὲ ὅποσα δύναται γίνεσθαι. Τρίτη δὲ καὶ ἡ ἀπὸ [1346a] τῶν ἐμπορίων. Τετάρτη δὲ καὶ ἡ ἀπὸ τῶν κατὰ γῆν τε καὶ ἀγοραίων τελῶν γινομένη. Πέμπτη δὲ ἡ ἀπὸ τῶν βοσκημάτων, ἐπικαρπία τε καὶ δεκάτη καλουμένη. Ἑκτη δὲ ἡ ἀπὸ τῶν ἀνθρώπων, ἐπικεφάλαιόν τε καὶ χειρωναξίον προσαγορευομένη.

Τρίτον δὲ τὴν πολιτικὴν. Ταύτης δὲ κρατίστη μὲν πρόσοδος ἡ ἀπὸ τῶν ιδίων ἐν τῇ χώρᾳ γινομένη. Εἴτα ἡ ἀπὸ τῶν ἐμπορίων καὶ

διαγωγῶν. Εἴτα ἡ ἀπὸ τῶν ἐγκυκλίων.

Τέταρτον δὲ καὶ τελευταῖον τὴν ἰδιωτικὴν. Αὕτη δὲ ἐστὶν ἀνώματος μὲν διὰ τὸ δεῖν μὴ πρὸς ἓνα σκοπὸν οἰκονομεῖν, ἐλαχίστη δὲ διὰ τὸ καὶ τὰς προσόδους καὶ τὰ ἀναλώματα βραχέα γίνεσθαι. Αὐτῆς δὲ ταύτης κρατίστη μὲν πρόσδοδος ἡ ἀπὸ γῆς γινομένη. Δευτέρα δὲ ἡ ἀπὸ τῶν ἄλλων ἐγκυκλημάτων. Τρίτη δὲ ἡ ἀπὸ ἀργυρίου. Χωρὶς δὲ τούτων ὁ πάσαις μὲν ἐπικοινωνεῖται ταῖς οἰκονομίαις (καὶ προσήκει σκοπεῖν αὐτὸ μὴ παρέργως), μάλιστα δὲ ταύτῃ, τὸ τὰναλώματα μὴ μείζω τῶν προσόδων γίνεσθαι.

Ἐπεὶ τοίνυν τὰς διαίρέσεις εἰρήκαμεν, μετὰ τοῦτο πάλιν νοητέον ἡμῖν ἡ σατραπεία, περὶ ἣν ἂν πραγματευόμεθα, ἢ πόλις, πότερον ἂν πάντα ἄρτι διειλόμεθα ἢ τὰ μέγιστα τούτων δυνατὴ φέρειν ἐστί· «εἰ δ' ἐστί,» τούτοις χρηστέον. Μετὰ δὲ τοῦτο ποῖαι τῶν προσόδων ἢ τὸ παράπαν οὐκ εἰσὶ, δυναταὶ δ' εἰσὶ γενέσθαι, ἢ μικραὶ νῦν οὔσαι μείζους οἶαί [τινες] <τε> κατασκευασθῆναι, ἢ τῶν ἀναλωμάτων τῶν νῦν ἀναλουμένων τίνα τε καὶ πόσα περιαιρεθέντα <τὰ> ὅλα μὴθὲν βλάψει.

Τὰ μὲν οὖν περὶ τὰς οἰκονομίας τε καὶ τὰ μέρη τὰ τούτων εἰρήκαμεν· ὅσα δὲ τινες τῶν πρότερον πεπράγασιν εἰς πόρον χρημάτων, εἰ <τε> τεχνικῶς τι διώκησαν, ἃ ὑπελαμβάνομεν ἀξιόλογα αὐτῶν εἶναι, συναγῆγάμεν. Οὐδὲ γὰρ ταύτην τὴν ἱστορίαν ἀχρεῖον ὑπολαμβάνομεν εἶναι. Ἔστι γὰρ ὅτε τούτων ἐφαρμόσει τι οἷς ἂν αὐτὸς πραγματεύῃ.

Κύψελος [ὁ] Κορίνθιος εὐξάμενος τῷ Δίῃ, ἐὰν κύριος γένηται τῆς πόλεως, τὰ ὄντα Κορινθίους πάντα ἀναθήσειν, [1346b] ἐκέλευσεν αὐτοὺς ἀπογράψασθαι. Απογραψαμένων δὲ τούτων τὸ δέκατον μέρος παρὰ ἐκάστου ἔλαβε, τοῖς δὲ λοιποῖς ἐκέλευσεν ἐργάζεσθαι. Περιελθόντος δὲ τοῦ ἐνιαυτοῦ τὸ αὐτὸ τοῦτο ἐποίησεν, ὥστε συνέβαινεν ἐν δέκα ἔτεσι κεῖνόν τε ἅπαντα ἔχειν ἅπερ ἀνιέρωσε, τοὺς τε Κορινθίους ἕτερα κεκτῆσθαι.

Λύγδαμις Νάξιος ἐκβαλὼν φυγάδας, ἐπειδὴ τὰ κτήματα αὐτῶν οὐθεὶς ἠθέλησεν ἄλλ' ἢ βραχέος ἀγοράζειν, αὐτοῖς τοῖς φυγάσιν ἀπέδοτο· τὰ τε ἀναθήματα, ὅσα ἦν αὐτῶν ἐν τισιν ἐργαστηρίοις ἡμίεργα ἀνακείμενα, ἐπώλει τοῖς τε φυγάσι καὶ τῶν ἄλλων τῷ βουλομένῳ ὥστ' ἐπιγραφῆναι τὸ τοῦ πριαμένου ὄνομα.

Βυζάντιοι δὲ δεηθέντες χρημάτων τὰ τεμένη τὰ δημόσια ἀπέδοντο, τὰ μὲν κάρπιμα χρόνον τινά, τὰ δὲ ἄκαρπα ἀεννάως· τὰ τε

θιασωτικά καὶ τὰ πατριωτικά ὡσαύτως· καὶ ὅσα ἐν χωρίοις ἰδιωτικοῖς ἦν· ὠνοῦντο γὰρ πολλοῦ ὧν ἦν καὶ τὸ ἄλλο κτῆμα· τοῖς δὲ θιασώταις ἕτερα χωρία, τὰ δημόσια ὅσα ἦν περὶ τὸ γυμνάσιον ἢ τὴν ἀγορὰν ἢ τὸν λιμένα· τοὺς τε τόπους τοὺς ἀγοραίους ἐν οἷς ἐπώλει τίς τι· καὶ τῆς θαλάττης τὴν ἀλιείαν· καὶ τὴν τῶν ἁλῶν ἀλατοπωλίαν· τῶν τ' ἐργαζομένων θαυματοποιῶν καὶ μάντεων καὶ φαρμακοπωλῶν καὶ τῶν ἄλλων τῶν τοιουτοτρόπων (<...), τὸ τρίτον δὲ μέρος τοῦ ἐργαζομένου ἀποτελεῖν ἔταξαν· τῶν τε νομισμάτων τὴν καταλλαγὴν ἀπέδοντο μιᾷ τραπέζῃ, ἑτέρῳ δὲ οὐκ ἦν οὐθενὶ οὔτε ἀποδοσθαι ἑτέρῳ οὔτε πρίασθαι παρ' ἑτέρου· εἰ δὲ μή, στέρησις ἦν.

Ὅντος δὲ νόμου αὐτοῖς μὴ εἶναι πολίτην ὅς ἂν μὴ ἐξ ἀστῶν ἀμφοτέρων ἦ, χρημάτων δεηθέντες ἐψηφίσαντο τὸν ἐξ ἐνὸς ὄντα ἀστοῦ καταβαλόντα μναῖς τριάκοντα εἶναι πολίτην.

Ἐν σιτοδείᾳ δὲ γενόμενοι καὶ ἀποροῦντες χρημάτων κατήγαγον τὰ πλοῖα τὰ ἐκ τοῦ Πόντου. Χρόνου δὲ γενομένου τῶν ἐμπόρων ἀγανακτούντων, ἐτέλουν αὐτοῖς τόκους ἐπιδεκάτους, τοῖς δ' ὠνούμενοις τι ἔταξαν χωρὶς τῆς τιμῆς διδόναι τὸ ἐπιδέκατον.

[1347a] Μετοίκων δὲ τινων ἐπιδεδανεικῶτων ἐπὶ κτήμασιν, οὐκ οὔσης αὐτοῖς ἐγκτήσεως, ἐψηφίσαντο τὸ τρίτον μέρος εἰσφέροντα τοῦ δανείου τὸν βουλόμενον κυρίως ἔχειν τὸ κτῆμα.

Ἰππίας Ἀθηναῖος τὰ ὑπερέχοντα τῶν ὑπερῶν εἰς τὰς δημοσίας ὁδοὺς καὶ τοὺς ἀναβαθμοὺς καὶ τὰ προφράγματα καὶ τὰς θύρας τὰς ἀνοιγομένας ἔξω ἐπώλησεν· ὠνοῦντο οὖν ὧν ἦν τὰ κτήματα καὶ συνελέγη χρήματα οὕτω συχνά.

Τό τε νόμισμα τὸ ὃν Ἀθηναῖοις ἀδόκιμον ἐποίησε, τάξας δὲ τιμὴν ἐκέλευσε πρὸς αὐτὸν ἀνακομίζειν. Συνελθόντων δὲ ἐπὶ τῷ κόψαι ἕτερον χαρακτῆρα, ἐξέδωκε τὸ αὐτὸ ἀργύριον.

Ὅσοι τε τριηραρχεῖν ἢ φυλαρχεῖν ἢ χορηγεῖν ἢ τινα εἰς ἑτέραν λειτουργίαν τοιαύτην ἥμελλον δαπανᾶν, τίμημα τάξας μέτριον ἐκέλευσε τὸν βουλόμενον ἀποτείσαντα τοῦτο ἐγγράφεσθαι εἰς τοὺς λελειτουργηκότας.

Τῇ τε ἱερείᾳ τῇ τῆς Ἀθηνᾶς τῆς ἐν ἀκροπόλει ὑπὲρ τοῦ ἀποθανόντος φέρειν χοίνικα κριθῶν καὶ πυρῶν ἑτέραν καὶ ὀβολόν, καὶ ὅτῳ ἂν παιδάριον γένηται, τὸ αὐτὸ τοῦτο.

Ἀθηναῖοι δὲ οἱ ἐν Ποτιδαίᾳ οἰκοῦντες δεόμενοι χρημάτων εἰς τὸν πόλεμον ἀπογράψασθαι ἅπασιν συνέταξαν τὰς οὐσίας, μὴ ἀθρόας εἰς τὸν αὐτοῦ δῆμον ἕκαστον, ἀλλὰ κατὰ κτῆμα ἐν ᾧ τόπῳ ἕκαστον

εἷη, ἵνα οἱ πένητες δύνωνται ὑποτιμᾶσθαι· ὅτῳ δὲ μὴ ᾔην κτῆμα μηθέν, τὸ σῶμα διμναῖον τιμήσασθαι. Ἀπὸ τούτων οὖν εἰσέφερον τὸ ἐπιγραφὲν ἕκαστος.

Σωσίπολις Ἀντισσαῖος, δεηθείσης τῆς πόλεως χρημάτων, εἰθισμένων δὲ αὐτῶν λαμπρῶς ἄγειν Διονύσια, ἐν οἷς ἄλλα τε πολλὰ ἀνήλiskon ἐξ ἐνιαυτοῦ παρασκευάζοντες καὶ ἱερεῖα πολυτελῆ, ὑπογούου δὲ οὔσης ταύτης τῆς ἐορτῆς, ἔπεισεν αὐτοὺς τῷ μὲν Διονύσῳ εὖξασθαι ἐς νέωτα ἀποδώσειν διπλάσια, ταῦτα δὲ συναγαγόντας ἀποδόσθαι. Συνελέγη οὖν αὐτοῖς χρήματα οὐκ ὀλίγα πρὸς τὴν χρεῖαν.

Λαμψακηνοὶ δὲ προσδοκίμων οὐσῶν τριηρῶν πολλῶν πρὸς αὐτούς, ὄντος «τοῦ» μεδίμνου τῶν ἀλφίτων τετραδράχμου, προσέταξαν τοῖς ἀγοραίοις πωλεῖν ἐξάδραχμον, καὶ τοῦ ἐλαίου τὸν χοᾶ ὄντα δραχμῶν «τριῶν» τεττάρων καὶ τριωβόλου, τοῦ τε οἴνου καὶ τῶν ἄλλων ὡσαύτως. Τὴν μὲν οὖν [1347b] ἀρχαίαν τιμὴν ἐλάμβανεν ὁ ιδιώτης, τὸ δὲ πλεόν ἡ πόλις, καὶ εὐπόρησε χρημάτων.

Ἡρακλεῶται πέμποντες ναῦς τετταράκοντα ἐπὶ τοὺς ἐν Βοσπόρῳ τυράννους, οὐκ εὐπορούμενοι χρημάτων, παρὰ τῶν ἐμπόρων συνηγόρασαν τόν τε σῆτον πάντα καὶ τὸ ἔλαιον καὶ τὸν οἶνον καὶ τὴν ἄλλην ἀγοράν, χρόνου δισταμένου ἐν ᾧ ἔμελλον ἀποδώσειν τὴν τιμὴν. Τοῖς δὲ δὴ ἐμπόροις καλῶς εἶχε μὴ κοτυλίζειν, ἀλλ' ἀθρόα τὰ φορτία πεπραῖσθαι. Ἐκεῖνοί τε διαδόντες διμήνου μισθὸν παρήγον [ἀλλὰ] τὴν ἀγοράν ἐν ὀλκάσιν, ἄνδρα «τε» ταμίαν ἐπέστησαν ἐφ' ἐκάστη τῶν νεῶν. Ἀφικομένων δ' εἰς τὴν πολεμίαν αὐτῶν ἠγόραζον οἱ στρατιῶται παρὰ τούτων ἅπαντα. Πρώτερον «οὖν» συλλεγέντι ἀργυρίῳ ἐδίδοσαν οἱ στρατηγοὶ πάλιν τὸν μισθόν, ὥστε συνέβαινε ταῦτό [τὸ] ἀργύριον δίδοσθαι ἕως εἰς οἶκον ἀπῆλθον.

Λακεδαιμόνιοι Σαμίων δεηθέντων χρήματα αὐτοῖς εἰς τὴν κάθοδον δοῦναι, ἐψηφίσαντο μίαν ἡμέραν καὶ αὐτοὺς καὶ τοὺς οἰκέτας καὶ τὰ ὑποζύγια νηστεῦσαι, ὅσον δὲ ἐδαπάνα ἕκαστος, τοσοῦτον δοῦναι τοῖς Σαμίοις.

Χαλκηδόνιοι δέ, ξένων ἐν τῇ πόλει συχνῶν παρ' αὐτοῖς γινομένων, ὀφείλοντες αὐτοῖς μισθὸν οὐκ ἠδύναντο διαλῦσαι. Ἀνηγγεῖλαν οὖν, εἴ τις τῶν πολιτῶν ἢ μετοίκων σῦλον ἔχει κατὰ πόλεως ἢ ιδιώτου καὶ βούλεται λαβεῖν, ἀπογράψασθαι. Ἀπογραψαμένων δὲ συχνῶν, τὰ πλοῖα τὰ πλέοντα εἰς τὸν Πόντον ἐσύλων μετὰ προφάσεως εὐλόγου. Ἔταξαν δὲ χρόνον ἐν ᾧ λόγον

ὕπερ αὐτῶν ἔφασαν ποιήσασθαι. Συλλεγέντων δὲ χρημάτων συχνῶν, τοὺς μὲν στρατιώτας ἀπήλλαξαν, ὕπερ δὲ τῶν σύλων διεδικάσαντο. Τοῖς δὲ μὴ δικαίως συληθεῖσιν ἢ πόλις ἀπὸ τῶν προσόδων ἀπεδίδου.

Κυζικηνοὶ δὲ στασιάσαντες πρὸς ἀλλήλους, ἐπικρατήσαντος τοῦ δήμου, τῶν δὲ πλουσίων συνειλημμένων, ὀφείλοντες χρήματα στρατιώταις ἐψηφίσαντο μὴ θανατῶσαι τοὺς συνειλημμένους, ἀλλὰ χρήματα πραξαμένους φυγαδεῦσαι.

Χῖοι δέ, νόμου ὄντος αὐτοῖς ἀπογράψασθαι τὰ χρέα εἰς τὸ δημόσιον, δεηθέντες χρημάτων ἐψηφίσαντο τοὺς [1348a] ὀφείλοντας μὲν ἀποδοῦναι τῇ πόλει τὰ δάνεια, τὴν δὲ πόλιν ἐκ τῶν προσόδων τοὺς τόκους τοῖς δεδανεικόσι καταφέρειν, ἕως ἂν καὶ τὸ ἀρχαῖον εὐπορήσωσιν.

Μαύσωλος ὁ Καρίας τύραννος, πέμποντος βασιλέως πρὸς αὐτὸν ἐπὶ τῷ τοὺς φόρους δοῦναι, συναγαγὼν τοὺς εὐπορωτάτους ἐν τῇ χώρᾳ ἔλεγεν ὅτι ὁ βασιλεὺς αἰτεῖ τοὺς φόρους, αὐτὸς δὲ οὐκ εὐπορεῖται. Κατασκευαστοὶ δ' ἄνδρες αὐτῷ εὐθέως ἐπηγγέλλοντο ὅσον εἰσοίσει ἕκαστος. Τούτων δὲ τοῦτο πραξάντων, οἱ εὐπορώτεροι τὰ μὲν αἰσχυρόμενοι, τὰ δὲ φοβούμενοι πολλῶ τούτων πλείω ἐπηγγέλλοντο καὶ εἰσέφερον.

Πάλιν <δὲ> δεηθεὶς χρημάτων ἐξεκκλησιάσας τοῖς Μυλασσεῦσιν, ἔλεγεν ὅτι μητρόπολις οὕσα ἢ πόλις αὐτοῦ αὕτη ἀτείχιστός ἐστιν, ὁ δὲ βασιλεὺς ἐπ' αὐτὸν στρατεύει. Ἐκέλευσεν οὖν τοὺς Μυλασσεῖς φέρειν ἕκαστον ὅτι πλεῖστα χρήματα, φάσκων αὐτοὺς τοῖς νῦν εἰσενεχθεῖσι καὶ τὰ λοιπὰ σῶζειν. Εἰσενεχθέντων δὲ πολλῶν τὰ μὲν χρήματα εἶχε, τὸ δὲ τεῖχος οὐκ ἔφη τὸν θεὸν <εἶν> ἐν τῷ παρόντι οἰκοδομεῖν.

Κόνδαλος Μανσώλου ὑπαρχος, ὁπότε διαπορευομένῳ αὐτῷ διὰ τῆς χώρας προσενέγκοι τις πρόβατον ἢ ὕν ἢ μόσχον, ἀπογραψάμενος τὸν δόντα καὶ τὸν χρόνον, ἀπαγαγόντα εἰς οἶκον ἐκέλευε τρέφειν ἕως ἂν ἐπανέλθοι· ὁπότε δὲ δοκοίῃ χρόνος ἱκανὸς εἶναι, αὐτό τε τὸ τραφέν καὶ τὴν ἐπικαρπῖαν λογισάμενος ἀπῆτει.

Τῶν τε δένδρων τὰ ὑπερέχοντα ἢ πίπτοντα εἰς τὰς ὁδοὺς τὰς βασιλικὰς ἐπῶλει <...> τὰς ἐπικαρπίας.

Τῶν δὲ στρατιωτῶν εἴ τις τελευτήσῃ, διαπύλιον ἀπῆτει δραχμὴν τοῦ σώματος· ἅμα τε οὖν ἐντεῦθεν καὶ ἀργύριον ἐλάμβανεν, ἅμα τε οἱ ἡγεμόνες οὐ παρεκρούοντο αὐτόν, πότε τετελεύτηκεν ὁ στρατιώτης.

Τούς τε Λυκίους ὁρῶν ἀγαπῶντας τὸ τρίχωμα φορεῖν, ἔφησε γράμματα ἡκεῖν παρὰ βασιλέως κόμας ἀποστεῖλαι εἰς προκόμια· προστετάχθαι οὖν αὐτῷ ὑπὸ Μανσώλου ἀποκεῖραι αὐτούς. Ἐφησεν οὖν, εἰ βούλονται ἐπικεφάλαιον τακτὸν αὐτῷ δοῦναι, μεταπέμψασθαι ἐκ τῆς Ἑλλάδος κόμην· οἱ δὲ ἀσμένως ἔδοσαν ὃ ἦτει, καὶ συνελέγη χρήματα πολλὰ ἀπὸ ὄχλου πολλοῦ.

Ἀριστοτέλης Ῥόδιος ἄρχων Φωκαίας, ἀπορῶν χρημάτων, ὁρῶν στάσεις οὓσας δύο τῶν Φωκαίων, λόγους ἐποιήσατο [1348b] πρὸς τὴν ἐτέραν στάσιν ἐν ἀπορρήτοις, φάσκων αὐτῷ διδόναι χρήματα τοὺς ἐτέρους ἐφ' ᾧ αὐτοῖς τὰ πράγματα ἐγκλιῖναι, αὐτὸς δὲ μᾶλλον βούλεσθαι παρὰ τούτων λαβεῖν καὶ τὰ περὶ τὴν πόλιν τούτοις διοικεῖν παραδοῦναι. Ἀκούσαντες δὲ ταῦτα εὐθέως τὰ χρήματα οἱ παρόντες πορίσαντες ὅσα ἐκέλευσεν ἔδωκαν· ὁ δὲ τοῖς ἐτέροις πάλιν ἔδειξεν ἃ εἰληφὼς εἶη παρὰ τῶν ἐτέρων· οἱ δὲ καὶ αὐτοὶ ἔφασαν οὐκ ἐλάττω δώσειν. Λαβὼν δὲ παρ' ἀμφοτέρων κατήλλαξεν αὐτοὺς πρὸς ἀλλήλους.

Τοῖς τε πολίταις κατιδὼν οὓσας δίκας πολλὰς καὶ μεγάλας, ἐκ πολλοῦ χρόνου ἀδικίας οὔσης διὰ πολέμου, δικαστήριον καθίσας προεῖπεν, ὅσοι ἂν μὴ δικάσωνται χρόνον ὃν προέθηκε, μηκέτι ἔσεσθαι ὑπὲρ τῶν προτέρων ἐγκλημάτων κρίσεις. Τότε δὴ παράβολον πολλῶν δικῶν <...> καὶ τὰς ἐκκλήτους μετ' ἐπιτιμίων ἐφ' αὐτὸν ποιούμενος καὶ παρ' ἐκατέρων ἀργύριον δι' ἐτέρων λαμβάνων, συνήγαγεν οὐκ ὀλίγα χρήματα.

Κλαζομένιοι δ' ἐν σιτοδείᾳ ὄντες χρημάτων τε ἀποροῦντες ἐψηφίσαντο παρ' οἷς ἔλαιόν ἐστι τῶν ιδιωτῶν, δανεῖσαι τῇ πόλει ἐπὶ τόκῳ· γίνεται δὲ πολὺς οὗτος ὁ καρπὸς ἐν τῇ χώρᾳ αὐτῶν. Δανεισάντων δὲ μισθωσάμενοι πλοῖα ἀπέστειλαν εἰς τὰ ἐμπόρια, ὅθεν αὐτοῖς ἦκε σῖτος, ὑποθήκης γενομένης τῆς τοῦ ἐλαίου τιμῆς.

Ὅφειλοντές <τε> στρατιώταις μισθὸν εἴκοσι τάλαντα καὶ οὐ δυνάμενοι, τόκον ἔφερον τοῖς ἡγεμόσι τέτταρα τάλαντα τοῦ ἐνιαυτοῦ· ἐπεὶ δὲ τοῦ μὲν ἀρχαίου ἀπέκοπτον οὐθέν, ἀεὶ δὲ μάτην ἔδαπάνων, νόμισμα ἔκοψαν σιδηροῦν εἰς ἀργυρίου λόγον εἴκοσι ταλάντων, εἶτα διδόντες τοῖς εὐπορωτάτοις ἐν τῇ πόλει κατὰ λόγον ἐκάστω ἀργύριον παρ' ἐκείνων ἔλαβον ἴσον. Οἳ τε οὖν ιδιωταὶ εἶχον εἰς τὰς καθ' ἡμέραν χρείας ἀναλίσκειν καὶ ἡ πόλις τοῦ χρέους ἀπηλλάγη. Δεύτερον δὲ ἐκ τῶν προσόδων ἐκείνοις τὸν τε τόκον <ὄν> κατέφερον ἀεὶ διαιροῦντες ἐκάστω πρὸς μέρος διεδίδοσαν, τοὺς δὲ

σιδηροῦς ἐκομίζοντο.

Σηλυβριανοὶ δὲ δεηθέντες χρημάτων, νόμου ὄντος αὐτοῖς σίτου μὴ ἐξαγωγὴν «εἶναι», [ἐν] λιμοῦ γενομένου, ἐκείνοις δὲ ὑπάρχοντος σίτου παλαιοῦ, ἐψηφίσαντο τῇ πόλει παραδοῦναι τοὺς ἰδιώτας τὸν σῖτον τῆς τεταγμένης τιμῆς, ὑπολειπόμενον ἕκαστον [1349a] ἐνιαυτοῦ τροφήν· εἶτα ἐξαγωγὴν ἔδωκαν τῷ βουλομένῳ, τάξαντες τιμὴν ἣν ἐδόκει καλῶς ἔχειν αὐτοῖς.

Ἀβυδηνοὶ δέ, διὰ στασιασμόν τῆς χώρας ἀργοῦ γενομένης καὶ τῶν μετοίκων οὐ προῖεμένων αὐτοῖς οὐδὲν διὰ τὸ καὶ ἔτι ὀφείλειν, ἐψηφίσαντο τὸν βουλόμενον τοῖς γεωργοῖς δανεῖζειν ὡς ἐργάσωνται, ὡς πρῶτοις αὐτοῖς ἐσομένης τῆς κομιδῆς ἐκ τοῦ καρποῦ, τοῖς δὲ ἄλλοις ἐκ τῶν λειπομένων.

Ἐφέσιοι δεηθέντες χρημάτων νόμον ἔθεντο μὴ φορεῖν χρυσὸν τὰς γυναῖκας, ὅσον δὲ νῦν ἔχουσι δανεῖσαι τῇ πόλει· τῶν τε κίωνων τῶν ἐν τῷ νεῷ τάξαντες ἀργύριον ὃ δεῖ καταβαλεῖν εἰὼν ἐπιγράφεσθαι τὸ ὄνομα τοῦ δόντος τὸ ἀργύριον ὡς ἀνατεθεικότος.

Διονύσιος Συρακούσιος βουλόμενος χρήματα συναγαγεῖν, ἐκκλησίαν ποιήσας ἔφησεν ἑωρακέναι τὴν Δήμητραν, καὶ κελεύειν τὸν τῶν γυναικῶν κόσμον εἰς τὸ ἱερὸν ἀποκομίζειν· αὐτὸς μὲν οὖν τῶν παρ' αὐτῷ γυναικῶν τὸν κόσμον τοῦτο πεποιηκέναι, ἡξίου δὲ καὶ τοὺς ἄλλους, μὴ τι μήνιμα παρὰ τῆς θεοῦ γένηται· τὸν δὲ μὴ τοῦτο ποιήσαντα ἔνοχον ἔφησεν ἱεροσυλίας ἔσεσθαι. Ἀνενεγκάντων δὲ πάντων ἃ εἶχον διὰ τε τὴν θεὸν καὶ δι' ἐκεῖνον, θύσας τῇ θεῷ τὸν κόσμον ἀπηνέγκατο ὡς παρὰ τῆς θεοῦ δεδανεισμένος. Προελθόντος δὲ χρόνου καὶ τῶν γυναικῶν πάλιν φορουσῶν, ἐκέλευσε τὴν βουλομένην χρυσοφορεῖν τάγμα τι ἀνατιθέναι ἐν τῷ ἱερῷ.

Τριηρεῖς τε ναυπηγεῖσθαι μέλλων ἦδει ὅτι δεήσοιτο χρημάτων. Ἐκκλησίαν οὖν συναγαγὼν ἔφη πόλιν αὐτῷ τινα προδίδοσθαι, εἰς ἣν δεῖσθαι χρημάτων, ἡξίου τε αὐτῷ τοὺς πολίτας εἰσενέγκαι δύο στατῆρας ἕκαστον· οἱ δ' εἰσήνεγκαν. Διαλιπὼν δὲ δύο ἢ τρεῖς ἡμέρας, ὡς διημαρτηκὼς τῆς πράξεως, ἐπαινέσας αὐτοὺς ἀπέδωκεν ἑκάστῳ ὃ εἰσήνεγκαν. Ποιήσας δὲ τοῦτο ἀνεκτήσατο τοὺς πολίτας. Εἶτα πάλιν, οἰόμενοι ἀπολήψεσθαι, εἰσήνεγκαν· ὃ δὲ λαβὼν εἶχεν εἰς τὴν ναυπηγίαν.

Οὐκ εὐπορῶν δὲ ἀργυρίου νόμισμα ἔκοψε καττιτέρου, καὶ συναγαγὼν ἐκκλησίαν πολλὰ τοῦ κεκομμένου νομίσματος ὑπερεῖπεν· οἱ δὲ ἐψηφίσαντο καὶ μὴ βουλόμενοι ἕκαστος ὃ ἂν εἴλετο

ἔχειν ὡς ἀργυροῦν ἀλλὰ μὴ καττιτέρινον.

Πάλιν τε [1349b] δεηθεὶς χρημάτων ἡξίου τοὺς πολίτας εἰσενεγκεῖν αὐτῷ· οἱ δ' οὐκ ἔφασαν ἔχειν. Ἐξενέγκας οὖν τὰ σκεύη τὰ παρ' αὐτοῦ ἐπώλει, ὡς δὴ δι' ἀπορίαν τοῦτο ποιῶν· ἀγοραζόντων δὲ Συρακουσίων, ἀπεγράφετο τί ἕκαστος ἀγοράσειεν· ἐπεὶ δὲ τὴν τιμὴν κατέβαλον, ἐκέλευσε τὸ σκεῦος ἀναφέρειν ἕκαστον ὃ ἡγόρασεν.

Τῶν τε πολιτῶν διὰ τὰς εἰσφοράς οὐ τρεφόντων βοσκήματα, εἶπεν ὅτι ἱκανὰ ἦν αὐτῷ πρὸς τοσοῦτον· τοὺς οὖν νῦν τι κτησαμένους ἀτελεῖς ἔσεσθαι. Πολλῶν δὲ ταχὺ κτησαμένων πολλὰ βοσκήματα ὡς ἀτελῆ ἐξόντων, ἐπεὶ καιρὸν ᾤετο εἶναι, τιμήσασθαι κελεύσας ἐπέβαλε τέλος. Οἱ οὖν πολῖται ἀγανακτήσαντες ἐπὶ τῷ ἐξηπατῆσθαι, σφάζοντες ἐπώλουν. Ὡς δὲ πρὸς τοῦτο ἔταξε σφάζεσθαι ὅσα δεῖ τῆς ἡμέρας, οἱ δὲ πάλιν ἱερόθυτα ἐποιοῦν· ὃ δὲ ἀπέειπε θῆλυ μὴ θύειν.

Πάλιν τε δεηθεὶς χρημάτων ἐκέλευσεν ἀπογράψασθαι [χρημάτων] πρὸς αὐτὸν ὅσοι οἰκοὶ εἰσιν ὀρφανικοί. Απογραψαμένων δὲ ἄλλων τὰ τούτων χρήματα ἀπεχρᾶτο ἕως ἕκαστος εἰς ἡλικίαν ἔλθοι.

Ῥηγίων τε καταλαβόν, ἐκκλησίαν συναγαγὼν εἶπε διότι δικαίως μὲν ἂν ἐξανδραποδισθεῖεν ὑπ' αὐτοῦ, νῦν μέντοι τὰ εἰς τὸν πόλεμον ἀνηλωμένα χρήματα κομισάμενος καὶ ὑπὲρ ἐκάστου σώματος τρεῖς μναῖς ἀφήσειν αὐτούς. Οἱ δὲ Ῥηγῖνοι ὅσα ποτ' ἦν αὐτοῖς ἀποκεκρυμμένα ἐμφανῆ ἐποιοῦν καὶ οἱ ἄποροι παρὰ τῶν εὐπορωτέρων καὶ παρὰ τῶν ξένων δανειζόμενοι ἐπόρισαν ἃ ἐκέλευσε χρήματα. Λαβὼν δὲ ταῦτα παρ' αὐτῶν τά τε σώματα πάντα οὐδὲν ἤττον ἀπέδοτο τά τε σκεύη, ἃ τότε ἦν ἀποκεκρυμμένα, ἐμφανῆ ἅπαντα ἔλαβε.

Δανεισάμενός τε παρὰ τῶν πολιτῶν χρήματα ἐπ' ἀποδόσει, ὡς ἀπῆτουν αὐτόν, ἐκέλευσεν ἀναφέρειν ὅσον ἔχει τις ἀργύριον πρὸς αὐτόν· εἰ δὲ μὴ, θάνατον ἔταξε τὸ ἐπιτίμιον. Ἀνενεχθέντος δὲ τοῦ ἀργυρίου, ἐπικόψας χαρακτῆρα ἐξέδωκε τὴν δραχμὴν δύο δυναμένην δραχμὰς καὶ τό τε ὀφειλόμενον πρότερον <...> ἀνήνεγκαν πρὸς αὐτόν.

Εἰς Τυρρηγίαν τε πλεύσας ναυσὶν ἑκατόν,

ἔλαβεν ἐκ τοῦ τῆς Λευκοθέας ἱεροῦ χρυσίον τε καὶ ἀργύριον πολὺ καὶ τὸν ἄλλον κόσμον οὐκ ὀλίγον. Εἰδὼς δὲ ὅτι καὶ οἱ ναῦται πολλὰ ἔχουσιν, κήρυγμα ἐποιήσατο τὰ ἡμίσεα [1350a] ὧν ἔχει ἕκαστος

ἀναφέρειν πρὸς αὐτόν, τὰ δ' ἡμίσεια ἔχειν τὸν λαβόντα· τῷ δὲ μὴ ἀνενέγκαντι θάνατον ἔταξε τὸ ἐπιτίμιον. Ὑπολαβόντες δὲ οἱ ναῦται ἀνενεγκόντες τὰ ἡμίσεια τὰ κατάλοιπα ἔχειν, ἀδεῶς ἀνήνεγκαν· ὃ δ' ἐπεὶ ἐκεῖνα ἔλαβεν, ἐκέλευσε πάλιν τὰ ἡμίσεια ἀναφέρειν.

Μενδαῖοι δὲ τὰ μὲν ἀπὸ λιμένων καὶ τῶν ἄλλων τελῶν αὐτοῖς προσπορευόμενα [ἐχρῶντο] εἰς διοίκησιν τῆς πόλεως, τὰ δὲ ἀπὸ τῆς γῆς καὶ οἰκιῶν τέλη οὐκ ἔπραττον, ἀλλ' ἀνέγραφον τοὺς ἔχοντας· ὁπότε δὲ δεηθεῖεν χρημάτων, ἀπεδίδουσιν ὥς ὀφείλοντες· ἐκέρδαινον οὖν τὸν παρεληλυθότα χρόνον ἀτόκοις τοῖς χρήμασιν ἀποκεχρημένοι.

Πολεμοῦντες <δὲ> πρὸς Ὀλυνθίους καὶ δεόμενοι χρημάτων, ὄντων αὐτοῖς ἀνδραπόδων, ἐψηφίσαντο καταλειπομένου ἐνὶ ἐκάστῳ θήλεος καὶ ἄρρενος τὰ ἄλλα ἀποδόσθαι τῇ πόλει ὥς ἐκδανεῖσαι τοὺς ἰδιώτας χρήματα.†

Καλλίστρατος <Ἀθηναῖος>, ἐν Μακεδονίᾳ πωλουμένου τοῦ ἐλλιμενίου ὥς ἐπὶ τὸ πολὺ εἴκοσι ταλάντων, ἐποίησεν εὐρεῖν τὸ διπλάσιον· κατιδὼν γὰρ ὠνουμένους τοὺς εὐπορωτέρους αἰεὶ διὰ τὸ δεῖν ταλαντιαίους καθιστάναι τοὺς ἐγγύους τῶν εἴκοσι ταλάντων, προεκήρυξεν ὠνεῖσθαι τὸν βουλόμενον καὶ τοὺς ἐγγύους καθιστάναι τοῦ τρίτου μέρους καὶ καθ' ὅποσον ἕκαστος δύνηται πείθειν. Τιμόθεος Ἀθηναῖος πολεμῶν πρὸς Ὀλυνθίους καὶ ἀπορούμενος ἀργυρίου, κόψας χαλκὸν διεδίδου τοῖς στρατιώταις. Ἀγανακτούντων δὲ τῶν στρατιωτῶν ἔφη αὐτοῖς τοὺς ἐμπόρους τε καὶ ἀγοραίους ἅπαντα ὥσαύτως πωλήσειν. Τοῖς δ' ἐμπόροις προεῖπεν ὃν ἂν τις λάβῃ χαλκόν, τούτου πάλιν ἀγοράζειν τὰ τ' ἐκ τῆς χώρας ὦνια καὶ τὰ ἐκ τῶν λειῶν ἀγόμενα· ὃς δ' ἂν περιλειφθῇ αὐτοῖς χαλκός, πρὸς αὐτὸν ἀναφέροντας ἀργύριον λαμβάνειν.

Περὶ Κέρκυραν δὲ πολεμῶν καὶ ἀπόρως διακείμενος καὶ τῶν στρατιωτῶν αἰτούντων τοὺς μισθοὺς καὶ ἀπειθούντων αὐτῷ καὶ πρὸς τοὺς ὑπεναντίους φασκόντων ἀποπορεύεσθαι, ἐκκλησίαν συναγαγὼν ἔφησεν οὐ δύνασθαι διὰ τοὺς χειμῶνας παραγενέσθαι αὐτῷ ἀργύριον, ἐπεὶ τοσαύτην εἶναι περὶ αὐτὸν εὐπορίαν, ὥστε τὴν προδεδομένην τριμήνου σιταρχίαν δωρεὰν αὐτοῖς διδόναι· οἱ [1350b] δὲ ὑπολαβόντες οὐκ ἂν ποτε προέσθαι τοσαῦτα χρήματα τὸν Τιμόθεον αὐτοῖς εἰ μὴ τῇ ἀληθείᾳ προσδόκιμα ἦν τὰ χρήματα πρὸς αὐτόν, ἡσυχίαν εἶχον ὑπὲρ τῶν μισθῶν ἕως ἐκεῖνος διφκήσατο ἃ ἐβούλετο.

Σάμον δὲ πολιορκῶν τοὺς καρποὺς καὶ τὰ ἐπὶ τῶν ἀγρῶν ἀπεδίδοτο αὐτοῖς τοῖς Σαμίοις, ὥστε εὐπόρησε χρημάτων εἰς μισθοὺς τοῖς στρατιώταις.

Τῶν τε ἐπιτηδείων ἐπεὶ σπάνις ἦν ἐν τῷ στρατοπέδῳ διὰ τοὺς εἰσαφικνουμένους, ἀπηγόρευσε μὴ πωλεῖν σῖτον ἀλληλεσμένον μηδὲ μέτρον ἔλαττον ἢ μέδιμνον, μηδὲ τῶν ὑγρῶν μηθὲν ἔλαττον ἢ μετρητήν. Οἱ μὲν οὖν ταξίαρχοί τε καὶ λοχαγοὶ ἀγοράζοντες ἀθρόα διεδίδοσαν τοῖς στρατιώταις, οἱ δὲ εἰσαφικνούμενοι ἤγον αὐτοῖς τὰ ἐπιτήδεια· ὁπότε δὲ ἀπαλλάττειντο, εἴ τι περίλοιπον εἶη αὐτοῖς, ἐπώλουν, ὥστε συνέβαινεν εὐπορεῖσθαι τοὺς στρατιώτας τῶν ἐπιτηδείων.

Δατάμης Πέρσης ἔχων στρατιώτας τὰ μὲν καθ' ἡμέραν πορίζειν ἐδύνατο ἐκ τῆς πολεμίας αὐτοῖς, νόμισμα δὲ οὐκ ἔχων διδόναι, ἀπαιτούμενος δὲ χρόνου γενομένου οὗ ὥφειλε, τεχνάζει τοιόνδε. Ἐκκλησίαν συναγαγὼν ἔφη οὐκ ἀπορεῖσθαι χρημάτων, ἀλλ' εἶναι αὐτῷ ἐν χωρίῳ τινί, λέγων ἐν ᾧ εἶη, καὶ ἀναζεύξας ἐβάδιζεν ἐπ' αὐτό. Εἶτα, ὡς ἐγγὺς τοῦ χωρίου ἐγένετο, προελθὼν εἰς αὐτὸ ἔλαβεν ἐκ τῶν ἐνόντων ἱερῶν ὅσος ἐνῆν κοῖλος ἄργυρος· εἶτ' ἐπισκευάσας τὰς ἡμιόνας ὡς ἀγούσας ἀργύριον παραφαινούσας τε ταῦτα ἐβάδιζεν. Ἰδόντες δὲ οἱ στρατιῶται καὶ νομίσαντες ἅπαντα εἶναι ἄργυρον τὰ ἀγόμενα, ἐθάρρησαν ὡς κομιούμενοι τὸν μισθόν. Ὁ δὲ ἔφη δεῖν εἰς Ἀμισὸν ἐλθόντας ἐπισημῆνασθαι· ἦν δ' εἰς τὴν Ἀμισὸν ὁδὸς πολλῶν τε ἡμερῶν καὶ χειμέριος. Τὸν δὴ χρόνον τοῦτον ἀπεχρᾶτο τῷ στρατοπέδῳ τὰ ἐπιτήδεια μόνον διδούς.

Τοὺς <τε> τεχνίτας τοὺς ἐν τῷ στρατοπέδῳ αὐτὸς εἶχε καὶ τοὺς καπήλους τοὺς μεταβαλλομένους τι· ἄλλω δὲ οὐκ ἦν οὐθενὶ οὐθεν τούτων ποιεῖν.

Χαβρίας Ἀθηναῖος Ταῷ τῷ Αἰγυπτίων βασιλεῖ ἐκστρατεύοντι καὶ δεομένῳ χρημάτων συνεβούλευε τῶν τε ἱερῶν τινα καὶ τῶν ἱερέων τὸ πλῆθος φάναι πρὸς τοὺς ἱερεῖς δεῖν παραλυθῆναι διὰ τὴν δαπάνην. Ἀκούσαντες δὲ [1351a] οἱ ἱερεῖς καὶ τὸ ἱερὸν παρ' αὐτοῖς ἕκαστοι βουλόμενοι εἶναι καὶ εἶναι αὐτοὶ ἱερεῖς, ἐδίδοσαν χρήματα. Ἐπεὶ δὲ παρὰ πάντων εὐλήφει, προστάζει αὐτοῖς ἐκέλευσεν εἰς μὲν τὸ ἱερὸν καὶ εἰς αὐτὸν τῆς δαπάνης ἥς πρότερον ἐποιοῦντο τὸ δέκατον μέρος ποιεῖσθαι, τὰ δὲ λοιπὰ αὐτῷ δανείσαι ἕως <ὁ> πόλεμος ὁ πρὸς βασιλέα διαλυθῇ. Ἀπ' οἰκίας δὲ ἐκάστης κελεύσαι ἅπαντας εἰσενέγκαι τάξαντα ὁ δεῖ, καὶ ἀπὸ τοῦ σώματος ὡσαύτως. Τοῦ <δὲ>

σίτου τοῦ πωλουμένου χωρὶς τῆς τιμῆς διδόναι τὸν πωλοῦντα καὶ ὀνούμενον ἀπὸ τῆς ἀρτάβης τὸν ὀβολόν. Ἀπὸ <τε> τῶν πλοίων καὶ ἐργαστηρίων καὶ τῶν ἄλλην τινὰ ἐργασίαν παρεχόντων τῆς ἐργασίας μέρος τὸ δέκατον κελεῦσαι ἀποτελεῖν.

Ἐκστρατεύειν δ' αὐτῷ μέλλοντι ἐκ τῆς χώρας, εἴ τίς τι ἔχει ἄσημον ἀργύριον ἢ χρυσίον, κελεῦσαι ἐνέγκαι πρὸς αὐτόν· ἐνεγκάντων δὲ τῶν πλείστων, ἐκέλευσε τοῦτ' αὖ ἐκείνον χρᾶσθαι, τοὺς δὲ δανείσαντας συστήσαι τοῖς νομάρχαις ὥστ' ἐκ τῶν φόρων αὐτοῖς ἀποδοῦναι.

Ἰφικράτης Ἀθηναῖος, Κότυς συναγαγόντος στρατιώτας, ἐπόρισεν αὐτῷ χρήματα τρόπον τοιοῦτον. Ἐκέλευσε τῶν ἀνθρώπων ὧν ἦρχε προστάξει κατασπεῖραι αὐτῷ γῆν τριῶν μεδίμων· τούτου δὲ πραχθέντος συνελέγη σίτου πολὺ πλῆθος. Καταγαγὼν οὖν ἐπὶ τὰ ἐμπόρια ἀπέδοτο καὶ εὐπόρησε χρημάτων.

Κότυς Θοῤῃξ παρὰ Περινθίων ἐδανείζετο χρήματα εἰς τοὺς στρατιώτας [συναγαγεῖν], οἱ δὲ Περίνθιοι οὐκ ἐδίδοσαν αὐτῷ. Ἠξίωσεν οὖν αὐτοὺς ἄνδρας γε τῶν πολιτῶν φρουροὺς δοῦναι εἰς χωρία τινά, ἵνα τοῖς ἐκεῖ στρατιώταις νῦν φρουροῦσι σχῇ ἀποχρήσασθαι. Οἱ δὲ τοῦτο ταχέως ἐποίησαν, οἰόμενοι τῶν χωρίων κύριοι ἔσεσθαι. Ὁ δὲ Κότυς τοὺς ἀποσταλέντας εἰς φυλακὴν ποιήσας τὰ χρήματα αὐτοὺς ἐκέλευσεν ἀποσταλέντας, ἃ ἐδανείζετο παρ' αὐτῶν, κομίσασθαι. Μέντωρ Ῥόδιος Ἑρμείαν συλλαβὼν καὶ τὰ χωρία αὐτοῦ κατασχὼν τοὺς ἐπιμελητὰς εἶασε κατὰ χώραν τοὺς ὑπὸ τοῦ Ἑρμείου καθεστηκότας. Ἐπεὶ δὲ ἐθάρρησάν τε ἅπαντες καί, εἴ τί ποτ' ἦν αὐτοῖς ἀποκεκρυμμένον ἢ ὑπεκκείμενον, μεθ' αὐτῶν εἶχον, συλλαβὼν αὐτοὺς πάντα παρείλετο ἃ εἶχον.

[1351b] Μέμνων Ῥόδιος κυριεύσας Λαμψάκου δεθηθεὶς χρημάτων ἐπέγραψε τοῖς πλουσιωτάτοις αὐτῶν πλῆθος τι ἀργυρίου, τούτοις δὲ τὴν κομιδὴν ἔσεσθαι παρὰ τῶν ἄλλων πολιτῶν ἔφησεν. Ἐπεὶ δὲ οἱ ἄλλοι πολῖται εἰσήνεγκαν, ἐκέλευσε καὶ ταῦτα αὐτῷ δανείσαι [ἐν χρόνῳ] διεπάμενος ἐν ᾧ πάλιν αὐτοῖς ἀποδώσει.

Πάλιν τε δεθηθεὶς χρημάτων ἡξίωσεν αὐτοὺς εἰσενέγκαι, κομίσασθαι δὲ ἐκ τῶν προσόδων· οἱ δ' εἰσήνεγκαν ὥς διὰ ταχέων αὐτοῖς ἐσομένης τῆς κομιδῆς. Ἐπεὶ δὲ καὶ αἱ καταβολαὶ τῶν προσόδων παρήσαν, ἔφησεν ἐπ' αὐτῷ χρεῖαν εἶναι καὶ τούτων, ἐκείνοις δὲ ὕστερον ἀποδώσειν σὺν τόκῳ.

Τῶν τε στρατευομένων παρ' αὐτῷ παρηρεῖτο τὰς σιταρχίας καὶ

τοὺς μισθοὺς ἕξ ἡμερῶν τὸν ἐνιαυτόν, φάσκων ταύταις ταῖς ἡμέραις οὔτε φυλακὴν αὐτοῖς οὐδεμίαν οὔτε πορείαν οὔτε δαπάνην ποιῆσθαι, τὰς ἐξαιρεσίμους λέγων.

Τὸν τε πρὸ τοῦ χρόνον διδοὺς τοῖς στρατιώταις τῇ δευτέρᾳ τῆς νουμηνίας τὴν σιταρχίαν, τῷ μὲν πρώτῳ μηνὶ παρέβη τρεῖς ἡμέρας, τῷ δ' ἐχομένῳ πέντε. Τοῦτον δὲ τὸν τρόπον προῆγεν, ἕως εἰς τὴν τριακάδα ἦλθεν.

Χαρίδημος Ὀρεΐτης ἔχων τῆς Αἰολίδος τινὰ χωρία, ἐπιστρατεύοντος ἐπ' αὐτὸν Ἀρταβάζου, χρημάτων ἐδεῖτο εἰς τοὺς στρατιώτας. Τὸ μὲν οὖν πρῶτον εἰσέφερον αὐτῷ, εἴτα οὐκέτι ἔφασαν ἔχειν. Ὁ δὲ Χαρίδημος, ὃ ᾧετο χωρίον εὐπορώτατον εἶναι, ἐκέλευσεν [καί] εἴ τι νόμισμα ἔχουσιν ἢ τι ἄλλο σκευὸς ἀξιόλογον, εἰς ἕτερον χωρίον ἀποστέλλειν, παραπομπὴν δὲ δώσειν· ἅμα δὲ καὶ αὐτὸς τοῦτο ποιῶν φανερὸς ἦν. Πεισθέντων δὲ τῶν ἀνθρώπων, προαγαγὼν αὐτοὺς τῆς πόλεως μικρὸν καὶ ἐρευνήσας ἃ εἶχον, ἔλαβεν ὅσων ἐδεῖτο, ἐκείνους δὲ πάλιν εἰς τὸ χωρίον ἀπῆγεν.

Κήρυγμά τε ποιησάμενος ἐν ταῖς πόλεσιν ὧν ἦρχε, μηδένα μηδὲν ὄπλον κεκτηῖσθαι ἐν τῇ οἰκίᾳ, εἰ δὲ μή, ἀποτείσειν ἀργύριον ὃ ἐπεκήρυξεν, ἡμέλει καὶ οὐδεμίαν ἐπιστροφὴν ἐποιεῖτο. Τῶν δὲ ἀνθρώπων οἰομένων τὸ κήρυγμα μάτην αὐτὸν πεποιῆσθαι, εἶχον ἃ ἔτυχον ἕκαστοι κεκτημένοι κατὰ χώραν. Ὁ δ' ἐρευναν ἐξαίφνης ποιησάμενος τῶν οἰκιῶν, παρ' οἷς εὗρεν ὄπλον τι, ἐπράττετο τὸ ἐπιτίμιον.

Φιλόξενός τις Μακεδὼν Καρίας σατραπεύων δεηθεὶς χρημάτων Διονύσια ἔφασκε μέλλειν ἄγειν καὶ χοραγοὺς [1352a] προέγραψε τῶν Καρῶν τοὺς εὐπορωτάτους καὶ προσέταττεν αὐτοῖς ἃ δεῖ παρασκευάζειν. Ὁρῶν δ' αὐτοὺς δυσχεραίνοντας ὑποπέμπων τινὰς ἡρώτα τί βούλονται δόντες ἀπαλλαγῆναι τῆς λειτουργίας. Οἱ δὲ πολλῷ πλεόν ἢ ὅσον ᾧοντο ἀναλώσειν ἔφασαν δώσειν τοῦ μὴ ὀχλεῖσθαι καὶ ἀπὸ τῶν ἰδίων ἀπεῖναι. Ὁ δὲ παρὰ τούτων λαβὼν ὃ ἐδίδοσαν, ἐτέρους κατέγραψεν, ἕως ἔλαβε παρὰ τοῦτο, ὃ ἡβούλετο, καὶ προσόν. παρ' ἐκάστης†

Εὐαίσης Σύρος Αἰγύπτου σατραπεύων, ἀφίστασθαι μελλόντων τῶν νομαρχῶν ἀπ' αὐτοῦ αἰσθόμενος, καλέσας αὐτοὺς εἰς τὰ βασίλεια ἐκρέμασεν ἅπαντας, πρὸς δὲ τοὺς οἰκείους ἐκέλευσε λέγειν ὅτι ἐν φυλακῇ εἰσιν. Ἐκαστος οὖν τῶν οἰκείων ἔπραττον ὑπὲρ ἐκάστου καὶ χρημάτων ἐξεωνοῦντο τοὺς συνειλημμένους. Ὁ δὲ

διομολογησάμενος ὑπὲρ ἑκάστου καὶ λαβὼν τὰ ὁμολογηθέντα ἀπέδωκεν ἑκάστοις τὸν νεκρόν.

Κλεομένης Ἀλεξανδρεὺς Αἰγύπτου σατραπεύων, λιμοῦ γενομένου ἐν μὲν τοῖς ἄλλοις τόποις σφόδρα, ἐν Αἰγύπτῳ δὲ μετρίως, ἀπέκλεισε τὴν ἐξαγωγήν τοῦ σίτου. Τῶν δὲ νομαρχῶν φασκόντων οὐ δυνήσεσθαι τοὺς φόρους ἀποδοῦναι τῷ μὴ ἐξάγεσθαι τὸν σῖτον, ἐξαγωγήν μὲν ἐποίησε, τέλος δὲ πολλὸ τῷ σίτῳ ἐπέβαλεν, ὥστε συνέβαινεν αὐτῷ εἰ μὴ <...> ἐξαγομένου ὀλίγου πολλὸ τέλος λαμβάνειν, αὐτοὺς τε [νομάρχας] πεπαῦσθαι τῆς προφάσεως.

Διαπλέοντος δ' αὐτοῦ τὸν νομόν, οὗ ἔστι θεὸς ὁ κροκοδείλιος, ἡρπάσθη τις τῶν παίδων αὐτοῦ. Καλέσας οὖν τοὺς ἱερεῖς ἔφη πρότερος ἀδικηθεὶς ἀμύνεσθαι τοὺς κροκοδείλους, καὶ προσέταξε θηρεύειν αὐτούς. Οἱ δὲ ἱερεῖς, ἵνα μὴ ὁ θεὸς αὐτῶν καταφρονηθῇ, συναγαγόντες ὅσον ἡδύναντο χρυσίον ἔδοσαν αὐτῷ καὶ οὕτως ἐπαύσατο.

Ἀλεξάνδρου <τε> τοῦ βασιλέως ἐντειλαμένου αὐτῷ οἰκίσαι πόλιν πρὸς τῇ Φάρῳ καὶ τὸ ἐμπόριον τὸ πρότερον ὄν ἐπὶ τοῦ Κανώβου ἐνταῦθα ποιῆσαι, καταπλεύσας εἰς τὸν Κάνωβον πρὸς τοὺς ἱερεῖς καὶ τοὺς κτήματα ἔχοντας ἐκεῖ ἐπὶ τούτῳ ἦκειν ἔφη ὥστε μετοικίσαι αὐτούς. Οἱ <δὲ> ἱερεῖς καὶ οἱ κάτοικοι εἰσενέγκαντες χρήματα ἔδωκαν ἵν' ἑᾶ κατὰ χώραν αὐτοῖς τὸ ἐμπόριον. Ὁ δὲ λαβὼν τότε μὲν ἀπηλλάγη, εἶτα δὲ καταπλεύσας, ἐπεὶ ἦν εὐτρεπῇ αὐτῷ τὰ πρὸς τὴν οἰκοδομίαν, [1352b] ἥτει αὐτοὺς χρήματα ὑπερβάλλων τῷ πλήθει· τοῦτο γὰρ αὐτῷ τὸ διάφορον εἶναι, τὸ αὐτοῦ εἶναι τὸ ἐμπόριον καὶ μὴ ἐκεῖ. Ἐπεὶ δ' οὐκ ἂν ἔφασαν δύνασθαι δοῦναι, μετώκισεν αὐτούς.

Ἀποστείλας τέ τινα ἐπ' ἀγοράσματα καὶ αἰσθόμενος ὅτι εὐώνων ἐπιτετύχηκεν, αὐτῷ δὲ μέλλει ἐκτετιμημένα λογίζεσθαι, πρὸς τοὺς συνήθεις τοῦ ἀγοραστοῦ ἔλεγεν ὅτι ἀκηκοὼς εἶη τὰ ἀγοράσματα αὐτὸν ὑπερτίμια ἡγορακέναι· αὐτὸς οὖν [οὐ] προσέξειν· καὶ ἅμα τὴν ἀβελτερίαν αὐτοῦ ἐλοιδόρει μετ' ὀργῆς προσποιητοῦ. Οἱ δὲ ταῦτα ἀκούοντες οὐκ ἔφασαν δεῖν πιστεῦναι αὐτὸν τοῖς λέγουσί τι κατ' ἐκείνου, ἕως αὐτὸς παραγενόμενος τὸν λόγον αὐτῷ δῶ. Ἀφικομένου δὲ τοῦ ἀγοραστοῦ ἀπήγγειλαν αὐτῷ τὰ παρὰ τοῦ Κλεομένου· ὃ δ' ἐκείνοις τε βουλόμενος ἐνδείξασθαι καὶ τῷ Κλεομένει, ἀνήνεγκε τὰς τιμὰς ὥνπερ ἦν ἡγορακῶς.

Τοῦ τε σίτου πωλουμένου ἐν τῇ χώρᾳ δεκαδράχμου, καλέσας

τοὺς ἐργαζομένους ἠρώτησε πῶς βούλονται αὐτῷ ἐργάζεσθαι· οἱ δ' ἔφασαν ἐλάττονος ἢ ὅσου ἂν τοῖς ἐμπόροις ἐπώλουν. Ὁ δ' ἐκείνους μὲν ἐκέλευσεν αὐτῷ παραδιδόναι ὅσουπερ ἐπώλουν τοῖς ἄλλοις, αὐτὸς δὲ τάξας τριάκοντα καὶ δύο δραχμὰς τοῦ σίτου τιμὴν οὕτως ἐπώλει.

Τοὺς τε ἱερεῖς καλέσας ἔφησε πολὺ τὸ ἀνάλωμα ἐν τῇ χώρᾳ γίνεσθαι εἰς τὰ ἱερά· δεῖν οὖν καὶ τῶν ἱερῶν τινα καὶ τῶν ἱερέων τὸ πλῆθος καταλυθῆναι. Οἱ δὲ ἱερεῖς καὶ ἰδίᾳ ἕκαστος καὶ κοινῇ τὰ ἱερά χρήματα ἐδίδοσαν, οἰόμενοι τε αὐτὸν τῇ ἀληθείᾳ τοῦτο ποιεῖν, καὶ ἕκαστος βουλόμενος τό τε ἱερὸν τὸ αὐτοῦ εἶναι κατὰ χώραν καὐτὸς ἱερεῦς.

Ἀντιμένης Ῥόδιος ἡμιόλιος, γενομένου Ἀλεξάνδρου περὶ Βαβυλῶνα, ἐπόρισε χρήματα ὧδε. Νόμου ὄντος ἐν Βαβυλωνίᾳ παλαιοῦ δεκάτην εἶναι τῶν εἰσαγομένων, χρωμένου δὲ αὐτῷ οὐθενός, τηρήσας τοὺς τε σατράπας ἅπαντας προσδοκίμους ὄντας καὶ στρατιώτας οὐκ ὀλίγους [τε] καὶ πρέσβεις καὶ τεχνίτας κλητοὺς ἄλλους τοὺς ἄγοντας καὶ ἰδίᾳ ἀποδημοῦντας, καὶ δῶρα πολλὰ ἀναγόμενα, τὴν δεκάτην ἔπραττε κατὰ τὸν νόμον τὸν κείμενον.

Πάλιν τε πορίζων τὰνδράποδα τὰ ἐπὶ στρατοπέδῳ ὄντα ἐκέλευσε τὸν βουλόμενον ἀπογράφεσθαι ὁπόσου θέλει, τελεῖν δὲ τοῦ ἐνιαυτοῦ ὀκτῶ δραχμὰς ἀποτίσαι, ἂν δὲ ἀποδρᾷ τὸ ἀνδράποδον, κομίζεσθαι τὴν τιμὴν [1353a] ἧς ἀνεγράψατο. Ἀπογραφέντων οὖν πολλῶν ἀνδραπόδων οὐκ ὀλίγον συνετέλει ἀργύριον. Εἰ δέ τι ἀποδραΐῃ ἀνδράποδον, ἐκέλευε τὸν σατράπην τῆς <...> ἐν ἧ ἔστι τὸ στρατόπεδον, ἀνασφᾶναι <ἢ> τὴν τιμὴν τῷ κυρίῳ ἀποδοῦναι.

Ὀφέλας Ὀλύνθιος καταστήσας ἐπιμελητὴν εἰς τὸν νομὸν τὸν Ἀθριβίτην, ἐπεὶ προσελθόντες αὐτῷ οἱ νομάρχαι οἱ ἐκ τοῦ τόπου τούτου ἔφασαν βούλεσθαι πλείω αὐτοὶ πολὺ φέρειν, τὸν δ' ἐπιμελητὴν τὸν νῦν καθεστηκότα ἀπαλλάξαι αὐτὸν ἡξίου, ἐπερωτήσας αὐτοὺς εἰ δυνήσονται συντελεῖν ἅπερ ἐπαγγέλλονται, φησάντων αὐτῶν, τὸν μὲν ἐπιμελητὴν κατὰ χώραν εἶα, τοὺς δὲ φόρους πράττεσθαι ἐκέλευεν οὓς αὐτοὶ ὑπετιμήσαντο. Οὔτε οὖν ὃν κατέστησεν ἀτιμάσαι ἐδόκει οὗτ' ἐκείνοις πλείους φόρους ἐπιβαλεῖν ἢ αὐτοὶ ἐτάξαντο, χρήματα δὲ πολλαπλάσια αὐτὸς ἐλάμβανεν.

Πυθοκλῆς Ἀθηναῖος Ἀθηναίοις συνεβούλευσε τὸν μόλυβδον τὸν ἐκ τῶν Λαυρείων παραλαμβάνειν παρὰ τῶν ιδιωτῶν τὴν πόλιν, ὥσπερ ἐπώλουν, δίδραχμον, εἶτα τάξαντας αὐτοὺς τιμὴν ἐξαδράχμου

οὕτω πωλεῖν. Χαβρίας· πληρωμάτων τε κατειλεγμένων εἰς ἑκατὸν καὶ εἴκοσι ναῦς, τῷ δὲ Ταῷ ἐξήκοντα μόνον οὐσῶν χρείας, προστάξει τοῖς ἐκ τῶν ἐξήκοντα νεῶν αὐτοῦ τῶν ὑπομενουσῶν τοὺς πλέοντας εἰς δίμηνον σιτηρεσιάσαι ἢ αὐτοὺς πλέειν. Οἱ δὲ βουλόμενοι ἐπὶ τῶν ιδίων εἶναι ἔδωκαν ἃ προσέταξεν. Ἀντιμένης· τοὺς τε θησαυροὺς τοὺς παρὰ τὰς ὁδοὺς τὰς βασιλικὰς ἀναπληροῦν ἐκέλευε τοὺς σατράπας κατὰ τὸν νόμον τὸν τῆς χώρας· ὁπότε δὲ διαπορεύοιτο στρατόπεδον ἢ ἕτερος ὄχλος ἄνευ τοῦ βασιλέως, πέμψας τινὰ παρ' αὐτοῦ ἐπώλει τὰ ἐκ τῶν θησαυρῶν.

[1353b] Κλεομένης· προσπορευομένης τε τῆς νουμηνίας καὶ δέον τοῖς στρατιώταις σιταρχίαν δοῦναι, κατέπλευσεν ἐξεπίτηδες· προσπορευομένου δὲ τοῦ μηνὸς ἀναπλεύσας διέδωκε τὴν σιταρχίαν, εἴτα τοῦ εἰσιόντος μηνὸς διέλιπεν ἕως τῆς νουμηνίας. Οἱ μὲν οὖν στρατιῶται διὰ τὸ νεωστὶ εἰληφέναι τὴν σιταρχίαν ἡσυχίαν εἶχον, ἐκεῖνος δὲ παραλλάξας ἓνα μῆνα παρὰ τὸν ἐνιαυτὸν ἀφήρει μισθὸν ἀεὶ μηνός. Σταβέλβιος ὁ Μυσῶν στρατιώταις μισθὸν συγκαλέσας ἔφησεν αὐτῷ τῶν μὲν ιδιωτῶν οὐδεμίαν χρεῖαν εἶναι, τῶν δὲ ἡγεμόνων, ὅταν <δὲ> δέηται στρατιωτῶν, ἐκείνων ἐκάστω δούς ἀργύριον ἀποστέλλειν ἐπὶ ξενολογίαν, τοὺς τε μισθοὺς οὓς δεῖ ἐκείνοις δοῦναι, τοῖς ἡγεμόσιν ἂν ἥδιον διδόναι· ἐκέλευσεν οὖν αὐτοὺς ἀποστέλλειν ἕκαστον τοὺς αὐτῶν καταλόγους ἐκ τῆς χώρας.

Τῶν δὲ ἡγεμόνων ὑπολαβόντων χρηματισμὸν αὐτοῖς ἔσεσθαι, ἀπέστειλαν τοὺς στρατιώτας, καθάπερ ἐκεῖνος προσέταξε. Διαλιπὼν δὲ ὀλίγον χρόνον καὶ συναγαγὼν αὐτοὺς οὔτε αὐλητὴν ἄνευ χοροῦ οὔτε ἡγεμόνας ἄνευ ιδιωτῶν οὐδὲν ἔφη χρησίμους εἶναι· ἐκέλευεν οὖν αὐτοὺς ἀπαλλάττεσθαι ἐκ τῆς χώρας.

Διονύσιος· τὰ <τε> ἱερὰ περιπορευόμενος, εἰ μὲν τράπεζαν ἴδοι παρακειμένην χρυσὴν ἢ ἀργυρᾶν, ἀγαθοῦ δαίμονος κελεύσας ἐγγεῖαι ἐκέλευεν ἀφαιρεῖν· ὅσα δὲ τῶν ἀγαλμάτων φιάλην εἶχε προτετακότα, εἶπας ἂν ὅτι δέχομαι, ἐξαιρεῖν ἐκέλευε, [τὰ ἱμάτια] τὰ τε χρυσᾶ [καὶ τοὺς στεφάνους] περιήρει τῶν ἀγαλμάτων φάσκων αὐτὸς καὶ κουφότερα καὶ εὐωδέστερα δοῦναι· εἴτα ἱμάτια μὲν λευκά, στεφάνους δὲ λευκίνοὺς περιετίθει.

[1354a] Ἡ ῥητορική ἐστιν ἀντίστροφος τῇ διαλεκτικῇ· ἀμφοτέραι γὰρ περὶ τοιούτων τινῶν εἰσιν ἃ κοινὰ τρόπον τινὰ πάντων ἐστὶ γνωρίζειν καὶ οὐδεμιᾶς ἐπιστήμης ἀφωρισμένης· διὸ καὶ πάντες τρόπον τινὰ μετέχουσιν ἀμφοῖν· πάντες γὰρ μέχρι τινὸς καὶ ἐξετάζειν καὶ ὑπέχειν λόγον καὶ ἀπολογεῖσθαι καὶ κατηγορεῖν ἐγχειροῦσιν. τῶν μὲν οὖν πολλῶν οἱ μὲν εἰκῇ ταῦτα δρῶσιν, οἱ δὲ διὰ συνήθειαν ἀπὸ ἕξεως· ἐπεὶ δ' ἀμφοτέρως ἐνδέχεται, δηλὸν ὅτι εἴη ἂν αὐτὰ καὶ ὁδῷ ποιεῖν· δι' ὃ γὰρ ἐπιτυχάνουσιν οἱ τε διὰ συνήθειαν καὶ οἱ ἀπὸ τοῦ αὐτομάτου τὴν αἰτίαν θεωρεῖν ἐνδέχεται, τὸ δὲ τοιοῦτον ἤδη πάντες ἂν ὁμολογήσαιεν τέχνης ἔργον εἶναι. νῦν μὲν οὖν οἱ τὰς τέχνας τῶν λόγων συντιθέντες οὐδὲν ὥς εἰπεῖν πεπορίκασιν αὐτῆς μόριον (αἱ γὰρ πίστεις ἔντεχνόν εἰσι μόνον, τὰ δ' ἄλλα προσθηκαί), οἱ δὲ περὶ μὲν ἐνθυμημάτων οὐδὲν λέγουσιν, ὅπερ ἐστὶ σῶμα τῆς πίστεως, περὶ δὲ τῶν ἔξω τοῦ πράγματος τὰ πλεῖστα πραγματεύονται· διαβολὴ γὰρ καὶ ἔλεος καὶ ὀργή καὶ τὰ τοιαῦτα πάθη τῆς ψυχῆς οὐ περὶ τοῦ πράγματός ἐστιν, ἀλλὰ πρὸς τὸν δικαστὴν· ὥστ' εἰ περὶ πάσας ἦν τὰς κρίσεις καθάπερ ἐν ἐνίαις γε νῦν ἐστὶ τῶν πόλεων καὶ μάλιστα ταῖς εὐνομουμέναις, οὐδὲν ἂν εἶχον ὃ τι λέγωσιν· ἅπαντες γὰρ οἱ μὲν οἶονται δεῖν οὕτω τοὺς νόμους ἀγορεύειν, οἱ δὲ καὶ χρῶνται καὶ κωλύουσιν ἔξω τοῦ πράγματος λέγειν, καθάπερ καὶ ἐν Ἀρείῳ πάγῳ, ὀρθῶς τοῦτο νομίζοντες· οὐ γὰρ δεῖ τὸν δικαστὴν διαστρέφειν εἰς ὀργὴν προάγοντας ἢ φθόνον ἢ ἔλεον· ὅμοιον γὰρ κἂν εἴ τις ᾧ μέλλει χρῆσθαι κανόνι, τοῦτον ποιήσῃε στρεβλόν. ἔτι δὲ φανερόν ὅτι τοῦ μὲν ἀμφισβητοῦντος οὐδὲν ἐστὶν ἔξω τοῦ δεῖξαι τὸ πρᾶγμα ὅτι ἔστιν ἢ οὐκ ἔστιν, ἢ γέγονεν ἢ οὐ γέγονεν· εἰ δὲ μέγα ἢ μικρόν, ἢ δίκαιον ἢ ἄδικον, ὅσα μὴ ὁ νομοθέτης διώρικεν, αὐτὸν δὴ πού τὸν δικαστὴν δεῖ γινώσκειν καὶ οὐ μανθάνειν παρὰ τῶν ἀμφισβητούντων.

μάλιστα μὲν οὖν προσήκει τοὺς ὀρθῶς κειμένους νόμους, ὅσα ἐνδέχεται, πάντα διορίζειν αὐτούς, καὶ ὅτι ἐλάχιστα καταλείπειν ἐπὶ τοῖς κρίνουσι, πρῶτον μὲν ὅτι ἓνα λαβεῖν καὶ ὀλίγους ῥᾶον ἢ πολλοὺς [1354b] εὖ φρονούντας καὶ δυναμένους νομοθετεῖν καὶ δικάζειν· ἔπειθ' αἱ μὲν νομοθεσίαι ἐκ πολλοῦ χρόνου σκεψαμένων γίνονται, αἱ δὲ κρίσεις ἐξ ὑπογυίου, ὥστε χαλεπὸν ἀποδιδόναι τὸ δίκαιον καὶ τὸ συμφέρον καλῶς τοὺς κρίνοντας. τὸ δὲ πάντων

μέγιστον, ὅτι ἡ μὲν τοῦ νομοθέτου κρίσις οὐ κατὰ μέρος, ἀλλὰ περὶ μελλόντων τε καὶ καθόλου ἐστίν, ὁ δ' ἐκκλησιαστῆς καὶ δικαστῆς ἤδη περὶ παρόντων καὶ ἀφωρισμένων κρίνουσιν· πρὸς οὓς καὶ τὸ φιλεῖν ἤδη καὶ τὸ μισεῖν καὶ τὸ ἴδιον συμφέρον συνήρτηται πολλάκις, ὥστε μηκέτι δύνασθαι θεωρεῖν ἱκανῶς τὸ ἀληθές, ἀλλ' ἐπισκοτεῖν τῇ κρίσει τὸ ἴδιον ἢ δὴ ἢ λυπηρόν. περὶ μὲν οὖν τῶν ἄλλων, ὥσπερ λέγομεν, δεῖ ὡς ἐλαχίστων ποιεῖν κύριον τὸν κριτὴν, περὶ δὲ τοῦ γεγονέναι ἢ μὴ γεγονέναι, ἢ ἔσεσθαι ἢ μὴ ἔσεσθαι, ἢ εἶναι ἢ μὴ εἶναι, ἀνάγκη ἐπὶ τοῖς κριταῖς καταλείπειν· οὐ γὰρ δυνατόν ταῦτα τὸν νομοθέτην προῖδεῖν. εἰ δὲ ταῦθ' οὕτως ἔχει, φανερόν ὅτι τὰ ἔξω τοῦ πράγματος τεχνολογοῦσιν ὅσοι τὰλλα διορίζουσιν, οἷον τί δεῖ τὸ προοίμιον ἢ τὴν διήγησιν ἔχειν, καὶ τῶν ἄλλων ἕκαστον μορίων· οὐδὲν γὰρ ἐν αὐτοῖς ἄλλο πραγματεύονται πλὴν ὅπως τὸν κριτὴν ποιόν τινα ποιήσωσιν, περὶ δὲ τῶν ἐντέχνων πίστεων οὐδὲν δεικνύουσιν, τοῦτο δ' ἐστὶν ὅθεν ἂν τις γένοιτο ἐνθυμηματικός. διὰ γὰρ τοῦτο τῆς αὐτῆς οὔσης μεθόδου περὶ τὰ δημηγορικὰ καὶ δικανικά, καὶ καλλίωνος καὶ πολιτικωτέρας τῆς δημηγορικῆς πραγματείας οὔσης ἢ τῆς περὶ τὰ συναλλάγματα, περὶ μὲν ἐκείνης οὐδὲν λέγουσι, περὶ δὲ τοῦ δικάζεσθαι πάντες πειρῶνται τεχνολογεῖν, ὅτι ἥττον ἐστὶ πρὸ ἔργου τὰ ἔξω τοῦ πράγματος λέγειν ἐν τοῖς δημηγορικοῖς καὶ ἥττον ἐστὶ κακοῦργον ἢ δημηγορία δικολογίας, ὅτι κοινότερον. ἐνταῦθα μὲν γὰρ ὁ κριτὴς περὶ οἰκείων κρίνει, ὥστ' οὐδὲν ἄλλο δεῖ πλὴν ἀποδείξαι ὅτι οὕτως ἔχει ὥς φησιν ὁ συμβουλευών· ἐν δὲ τοῖς δικανικοῖς οὐχ ἱκανὸν τοῦτο, ἀλλὰ πρὸ ἔργου ἐστὶν ἀναλαβεῖν τὸν ἀκροατὴν· περὶ ἀλλοτριῶν γὰρ ἡ κρίσις, ὥστε πρὸς τὸ αὐτῶν σκοπούμενοι καὶ πρὸς χάριν ἀκροώμενοι διδόασιν τοῖς ἀμφισβητοῦσιν, [1355a] ἀλλ' οὐ κρίνουσιν. διὸ καὶ πολλαχοῦ, ὥσπερ πρότερον εἶπον, ὁ νόμος κωλύει λέγειν ἔξω τοῦ πράγματος· ἐκεῖ δ' αὐτοὶ οἱ κριταὶ τοῦτο τηροῦσιν ἱκανῶς. ἐπεὶ δὲ φανερόν ἐστιν ὅτι ἡ μὲν ἐντεχνος μέθοδος περὶ τὰς πίστεις ἐστίν, ἡ δὲ πίστις ἀπόδειξις τις (τότε γὰρ πιστεύομεν μάλιστα ὅταν ἀποδεδείχθαι ὑπολάβωμεν), ἐστὶ δ' ἀπόδειξις ῥητορικὴ ἐνθύμημα, καὶ ἐστὶ τοῦτο ὡς εἶπεῖν ἀπλῶς κυριώτατον τῶν πίστεων, τὸ δ' ἐνθύμημα συλλογισμὸς τις, περὶ δὲ συλλογισμοῦ ὁμοίως ἅπαντος τῆς διαλεκτικῆς ἐστὶν ἰδεῖν, ἢ αὐτῆς ὅλης ἢ μέρους τινός, δηλὸν ὅτι ὁ μάλιστα τοῦτο δυνάμενος θεωρεῖν, ἐκ τίνων καὶ πῶς γίνεται συλλογισμὸς, οὗτος καὶ ἐνθυμηματικὸς ἂν εἴη μάλιστα, προσλαβὼν

περὶ ποῖά τέ ἐστι τὸ ἐνθύμημα καὶ τίνας ἔχει διαφορὰς πρὸς τοὺς λογικοὺς συλλογισμούς. τό τε γὰρ ἀληθὲς καὶ τὸ ὅμοιον τῷ ἀληθεῖ τῆς αὐτῆς ἐστι δυνάμεως ἰδεῖν, ἅμα δὲ καὶ οἱ ἄνθρωποι πρὸς τὸ ἀληθὲς πεφύκασιν ἱκανῶς καὶ τὰ πλείω τυγχάνουσι τῆς ἀληθείας· διὸ πρὸς τὰ ἐνδοξα στοχαστικῶς ἔχειν τοῦ ὁμοίως ἔχοντος καὶ πρὸς τὴν ἀλήθειάν ἐστιν.

ὅτι μὲν οὖν τὰ ἔξω τοῦ πράγματος οἱ ἄλλοι τεχνολογοῦσι, καὶ διότι μᾶλλον ἀπονενεύκασι πρὸς τὸ δικολογεῖν, φανερόν· χρήσιμος δέ ἐστιν ἡ ῥητορικὴ διὰ τε τὸ φύσει εἶναι κρεῖττω τάληθῃ καὶ τὰ δίκαια τῶν ἐναντίων, ὥστε ἐὰν μὴ κατὰ τὸ προσήκον αἱ κρίσεις γίνωνται, ἀνάγκη δι' αὐτῶν ἡττᾶσθαι, τοῦτο δ' ἐστὶν ἄξιον ἐπιτιμήσεως, ἔτι δὲ πρὸς ἐνίους οὐδ' εἰ τὴν ἀκριβεστάτην ἔχοιμεν ἐπιστήμην, ῥάδιον ἀπ' ἐκείνης πεῖσαι λέγοντας· διδασκαλίας γάρ ἐστιν ὁ κατὰ τὴν ἐπιστήμην λόγος, τοῦτο δὲ ἀδύνατον, ἀλλ' ἀνάγκη διὰ τῶν κοινῶν ποιεῖσθαι τὰς πίστεις καὶ τοὺς λόγους, ὥσπερ καὶ ἐν τοῖς Τοπικοῖς ἐλέγομεν περὶ τῆς πρὸς τοὺς πολλοὺς ἐντεύξεως. ἔτι δὲ τάναντία δεῖ δύνασθαι πείθειν, καθάπερ καὶ ἐν τοῖς συλλογισμοῖς, οὐχ ὅπως ἀμφοτέρα πράττωμεν (οὐ γὰρ δεῖ τὰ φαῦλα πείθειν), ἀλλ' ἵνα μὴ λανθάνῃ πῶς ἔχει, καὶ ὅπως ἄλλου χρωμένου τοῖς λόγοις μὴ δικαίως αὐτοὶ λύειν ἔχωμεν. τῶν μὲν οὖν ἄλλων τεχνῶν οὐδεμία τάναντία συλλογίζεται, ἡ δὲ διαλεκτικὴ καὶ ἡ ῥητορικὴ μόναι τοῦτο ποιοῦσιν· ὁμοίως γάρ εἰσιν ἀμφοτέραι τῶν ἐναντίων. τὰ μέντοι ὑποκείμενα πράγματα οὐχ ὁμοίως ἔχει, ἀλλ' ἀεὶ τάληθῃ καὶ τὰ βελτίῳ τῇ φύσει εὐσυλλογιστότερα καὶ πιθανώτερα ὡς ἀπλῶς εἰπεῖν. πρὸς δὲ τούτοις ἄτοπον εἰ τῷ σώματι μὲν αἰσχρὸν μὴ δύνασθαι [1355b] βοηθεῖν ἑαυτῷ, λόγῳ δ' οὐκ αἰσχρὸν· ὁ μᾶλλον ἰδιὸν ἐστὶν ἀνθρώπου τῆς τοῦ σώματος χρείας. εἰ δ' ὅτι μεγάλα βλάβειεν ἂν ὁ χρώμενος ἀδίκως τῇ τοιαύτῃ δυνάμει τῶν λόγων, τοῦτό γε κοινόν ἐστι κατὰ πάντων τῶν ἀγαθῶν πλὴν ἀρετῆς, καὶ μάλιστα κατὰ τῶν χρησιμωτάτων, οἷον ἰσχύος ὑγείας πλούτου στρατηγίας· τούτοις γὰρ ἂν τις ὠφελήσειεν τὰ μέγιστα χρώμενος δικαίως καὶ βλάβειεν ἀδίκως.

ὅτι μὲν οὖν οὐκ ἐστὶν οὐθενός τινος γένους ἀφωρισμένου ἡ ῥητορικὴ, ἀλλὰ καθάπερ ἡ διαλεκτικὴ, καὶ ὅτι χρήσιμος, φανερόν, καὶ ὅτι οὐ τὸ πεῖσαι ἔργον αὐτῆς, ἀλλὰ τὸ ἰδεῖν τὰ ὑπάρχοντα πιθανὰ περὶ ἑκαστον, καθάπερ καὶ ἐν ταῖς ἄλλαις τέχναις πάσαις (οὐδὲ γὰρ ἱατρικῆς τὸ ὑγιᾶ ποιῆσαι, ἀλλὰ μέχρι οὗ ἐνδέχεται, μέχρι τούτου

προαγαγεῖν· ἔστιν γὰρ καὶ τοὺς ἀδυνάτους μεταλαβεῖν ὑγείας ὅμως θεραπεῦσαι καλῶς)· πρὸς δὲ τούτοις ὅτι τῆς αὐτῆς τό τε πιθανόν καὶ τὸ φαινόμενον ἰδεῖν πιθανόν, ὥσπερ καὶ ἐπὶ τῆς διαλεκτικῆς συλλογισμόν τε καὶ φαινόμενον συλλογισμόν· ἡ γὰρ σοφιστικὴ οὐκ ἐν τῇ δυνάμει ἀλλ' ἐν τῇ προαιρέσει· πλὴν ἐνταῦθα μὲν ἔσται ὁ μὲν κατὰ τὴν ἐπιστήμην ὁ δὲ κατὰ τὴν προαίρεσιν ῥήτωρ, ἐκεῖ δὲ σοφιστὴς μὲν κατὰ τὴν προαίρεσιν, διαλεκτικὸς δὲ οὐ κατὰ τὴν προαίρεσιν ἀλλὰ κατὰ τὴν δύναμιν.

περὶ δὲ αὐτῆς ἤδη τῆς μεθόδου πειρώμεθα λέγειν, πῶς τε καὶ ἐκ τίνων δυνησόμεθα τυγχάνειν τῶν προκειμένων. πάλιν οὖν οἷον ἐξ ὑπαρχῆς ὀρισάμενοι αὐτὴν τίς ἐστί, λέγωμεν τὰ λοιπά.

Ἔστω δὴ ἡ ῥητορικὴ δύναμις περὶ ἕκαστον τοῦ θεωρῆσαι τὸ ἐνδεχόμενον πιθανόν. τοῦτο γὰρ οὐδεμιᾶς ἐτέρας ἐστὶ τέχνης ἔργον· τῶν γὰρ ἄλλων ἐκάστη περὶ τὸ αὐτῇ ὑποκείμενόν ἐστιν διδασκαλικὴ καὶ πειστικὴ, οἷον ἰατρικὴ περὶ ὑγιεινῶν καὶ νοσερῶν, καὶ γεωμετρία περὶ τὰ συμβεβηκότα πάθη τοῖς μεγέθεσι, καὶ ἀριθμητικὴ περὶ ἀριθμῶν, ὁμοίως δὲ καὶ αἱ λοιπαὶ τῶν τεχνῶν καὶ ἐπιστημῶν· ἡ δὲ ῥητορικὴ περὶ τοῦ δοθέντος ὡς εἰπεῖν δοκεῖ δύνασθαι θεωρεῖν τὸ πιθανόν, διὸ καὶ φαμεν αὐτὴν οὐ περὶ τι γένος ἴδιον ἀφωρισμένον ἔχειν τὸ τεχνικόν.

τῶν δὲ πίστεων αἱ μὲν ἄτεχνοί εἰσιν αἱ δ' ἔντεχνοι. ἄτεχνα δὲ λέγω ὅσα μὴ δι' ἡμῶν πεπóρισται ἀλλὰ προὔπηρχεν, οἷον μάρτυρες βάσανοι συγγραφαὶ καὶ ὅσα τοιαῦτα, ἔντεχνα δὲ ὅσα διὰ τῆς μεθόδου καὶ δι' ἡμῶν κατασκευασθῆναι δυνατόν, ὥστε δεῖ τούτων τοῖς μὲν χρῆσασθαι, τὰ δὲ εὐρεῖν.

[1356a] τῶν δὲ διὰ τοῦ λόγου ποριζομένων πίστεων τρία εἶδη ἔστιν· αἱ μὲν γὰρ εἰσιν ἐν τῷ ἦθει τοῦ λέγοντος, αἱ δὲ ἐν τῷ τὸν ἀκροατὴν διαθεῖναι πῶς, αἱ δὲ ἐν αὐτῷ τῷ λόγῳ διὰ τοῦ δεικνύναι ἢ φαίνεσθαι δεικνύναι. διὰ μὲν οὖν τοῦ ἦθους, ὅταν οὕτω λεχθῇ ὁ λόγος ὥστε ἀξιόπιστον ποιῆσαι τὸν λέγοντα· τοῖς γὰρ ἐπιεικέσι πιστεύομεν μᾶλλον καὶ θᾶπτον, περὶ πάντων μὲν ἀπλῶς, ἐν οἷς δὲ τὸ ἀκριβὲς μὴ ἔστιν ἀλλὰ τὸ ἀμφιδοξεῖν, καὶ παντελῶς. δεῖ δὲ καὶ τοῦτο συμβαίνειν διὰ τοῦ λόγου, ἀλλὰ μὴ διὰ τοῦ προδοδεοξάσθαι ποιόν τινα εἶναι τὸν λέγοντα· οὐ γάρ, ὥσπερ ἔνιοι τῶν τεχνολογούντων, <οὐ> τίθεμεν ἐν τῇ τέχνῃ καὶ τὴν ἐπιείκειαν τοῦ λέγοντος, ὡς οὐδὲν συμβαλλομένην πρὸς τὸ πιθανόν, ἀλλὰ σχεδὸν ὡς εἰπεῖν κυριωτάτην ἔχει πίστιν τὸ ἦθος.

διὰ δὲ τῶν ἀκροατῶν, ὅταν εἰς πάθος ὑπὸ τοῦ λόγου προαχθῶσιν· οὐ γὰρ ὁμοίως ἀποδίδομεν τὰς κρίσεις λυπούμενοι καὶ χαίροντες, ἢ φιλοῦντες καὶ μισοῦντες· πρὸς ὃ καὶ μόνον πειρᾶσθαι φάμεν πραγματεύεσθαι τοὺς νῦν τεχνολογοῦντας. περὶ μὲν οὖν τούτων δηλωθήσεται καθ' ἕκαστον, ὅταν περὶ τῶν παθῶν λέγωμεν, διὰ δὲ τοῦ λόγου πιστεύουσιν, ὅταν ἀληθὲς ἢ φαινόμενον δείξωμεν ἐκ τῶν περὶ ἕκαστα πιθανῶν.

ἐπεὶ δ' αἱ πίστεις διὰ τούτων εἰσὶ, φανερόν ὅτι ταύτας ἐστὶ λαβεῖν τοῦ συλλογίσασθαι δυναμένου καὶ τοῦ θεωρῆσαι περὶ τὰ ἦθη καὶ περὶ τὰς ἀρετὰς καὶ τρίτον [τοῦ] περὶ τὰ πάθη, τί τε ἕκαστόν ἐστιν τῶν παθῶν καὶ ποῖόν τι, καὶ ἐκ τίνων ἐγγίνεται καὶ πῶς, ὥστε συμβαίνει τὴν ῥητορικὴν οἷον παραφυές τι τῆς διαλεκτικῆς εἶναι καὶ τῆς περὶ τὰ ἦθη πραγματείας, ἣν δίκαιόν ἐστι προσαγορεύειν πολιτικὴν. διὸ καὶ ὑποδύεται ὑπὸ τὸ σχῆμα τὸ τῆς πολιτικῆς ἢ ῥητορικῆς καὶ οἱ ἀντιποιοῦμενοι ταύτης τὰ μὲν δι' ἀπαιδευσίαν, τὰ δὲ δι' ἀλαζονείαν, τὰ δὲ καὶ δι' ἄλλας αἰτίας ἀνθρωπικάς· ἔστι γὰρ μῶριόν τι τῆς διαλεκτικῆς καὶ ὁμοίωμα, καθάπερ καὶ ἀρχόμενοι εἵπομεν· περὶ οὐδενὸς γὰρ ὠρισμένου οὐδετέρᾳ αὐτῶν ἐστὶν ἐπιστήμη πῶς ἔχει, ἀλλὰ δυνάμεις τινὲς τοῦ πορίσαι λόγους.

περὶ μὲν οὖν τῆς δυνάμεως αὐτῶν, καὶ πῶς ἔχουσι πρὸς ἀλλήλας, εἴρηται σχεδὸν ἱκανῶς· τῶν δὲ διὰ τοῦ δεικνύναι ἢ φαίνεσθαι δεικνύναι, καθάπερ καὶ ἐν τοῖς διαλεκτικοῖς [1356b] τὸ μὲν ἐπαγωγή ἐστίν, τὸ δὲ συλλογισμός, τὸ δὲ φαινόμενος συλλογισμός, καὶ ἐνταῦθα ὁμοίως· ἔστιν γὰρ τὸ μὲν παράδειγμα ἐπαγωγή, τὸ δ' ἐνθύμημα συλλογισμός, τὸ δὲ φαινόμενον ἐνθύμημα φαινόμενος συλλογισμός. καλῶ δ' ἐνθύμημα μὲν ῥητορικὸν συλλογισμόν, παράδειγμα δὲ ἐπαγωγὴν ῥητορικὴν. πάντες δὲ τὰς πίστεις ποιοῦνται διὰ τοῦ δεικνύναι ἢ παραδείγματα λέγοντες ἢ ἐνθυμήματα, καὶ παρὰ ταῦτα οὐδέν· ὥστ' εἴπερ καὶ ὅλως ἀνάγκη ἢ συλλογιζόμενον ἢ ἐπάγοντα δεικνύναι ὅτιοῦν [ἢ ὄντινοῦν] (δῆλον δ' ἡμῖν τοῦτο ἐκ τῶν Ἀναλυτικῶν), ἀναγκαῖον ἐκάτερον αὐτῶν ἑκατέρῳ τούτων τὸ αὐτὸ εἶναι.

τίς δ' ἐστὶν διαφορὰ παραδείγματος καὶ ἐνθυμήματος, φανερόν ἐκ τῶν Τοπικῶν (ἐκεῖ γὰρ περὶ συλλογισμοῦ καὶ ἐπαγωγῆς εἴρηται πρότερον), ὅτι τὸ μὲν ἐπὶ πολλῶν καὶ ὁμοίων δείκνυσθαι ὅτι οὕτως ἔχει ἐκεῖ μὲν ἐπαγωγή ἐστὶν ἐνταῦθα δὲ παράδειγμα, τὸ δὲ τινῶν ὄντων ἕτερόν τι διὰ ταῦτα συμβαίνειν παρὰ ταῦτα τῷ ταῦτα εἶναι ἢ

καθόλου ἢ ὥς ἐπὶ τὸ πολὺ ἐκεῖ μὲν συλλογισμὸς ἐνταῦθα δὲ ἐνθύμημα καλεῖται. φανερόν δὲ καὶ ὅτι ἑκάτερον ἔχει ἀγαθὸν τὸ εἶδος τῆς ῥητορείας· καθάπερ γὰρ καὶ ἐν τοῖς μεθοδικοῖς εἴρηται, καὶ ἐν τούτοις ὁμοίως ἔχει· εἰσὶν γὰρ αἱ μὲν παραδειγματώδεις ῥητορεῖαι αἱ δὲ ἐνθυμηματικάι, καὶ ῥήτορες ὁμοίως οἱ μὲν παραδειγματώδεις οἱ δὲ ἐνθυμηματικοί. πιθανοὶ μὲν οὖν οὐχ ἦττον οἱ λόγοι οἱ διὰ τῶν παραδειγμάτων, θορυβοῦνται δὲ μᾶλλον οἱ ἐνθυμηματικοί· τὴν δ' αἰτίαν [αὐτῶν], καὶ πῶς ἑκατέρῳ χρηστέον, ἐροῦμεν ὕστερον· νῦν δὲ περὶ αὐτῶν τούτων μᾶλλον διορίσωμεν καθαρῶς.

ἐπεὶ γὰρ τὸ πιθανὸν τινὶ πιθανόν ἐστι, καὶ τὸ μὲν εὐθὺς ὑπάρχει δι' αὐτὸ πιθανὸν καὶ πιστὸν τὸ δὲ τῷ δείκνυσθαι δοκεῖν διὰ τοιούτων, οὐδεμία δὲ τέχνη σκοπεῖ τὸ καθ' ἕκαστον, οἷον ἡ ἰατρικὴ τί Σωκράτει τὸ ὑγιεινὸν ἐστὶν ἢ Καλλία, ἀλλὰ τί τῷ τοιῷδε ἢ τοῖς τοιοῖσδε (τοῦτο γὰρ ἔντεχνον, τὸ δὲ καθ' ἕκαστον ἄπειρον καὶ οὐκ ἐπιστητόν), οὐδὲ ἡ ῥητορικὴ τὸ καθ' ἕκαστον ἐνδοξον θεωρήσει, οἷον Σωκράτει ἢ Ἰππία, ἀλλὰ τὸ τοιοισδί, καθάπερ καὶ ἡ διαλεκτικὴ. καὶ γὰρ ἐκείνη συλλογίζεται οὐκ ἐξ ὧν ἔτυχεν (φαίνεται γὰρ ἅττα καὶ τοῖς παραληροῦσιν), ἀλλ' ἐκείνη μὲν ἐκ τῶν λόγου δεομένων, ἡ δὲ ῥητορικὴ ἐκ [1357a] τῶν ἤδη βουλευέσθαι εἰωθότων. ἐστὶν δὲ τὸ ἔργον αὐτῆς περὶ τε τοιούτων περὶ ὧν βουλευόμεθα καὶ τέχνας μὴ ἔχοντες, καὶ ἐν τοῖς τοιούτοις ἀκροαταῖς οἱ οὐ δύνανται διὰ πολλῶν συνορᾶν οὐδὲ λογίζεσθαι πόρρωθεν. βουλευόμεθα δὲ περὶ τῶν φαινομένων ἐνδέχεσθαι ἀμφοτέρως ἔχειν· περὶ γὰρ τῶν ἀδυνάτων ἄλλως ἢ γενέσθαι ἢ ἔσεσθαι ἢ ἔχειν οὐδεὶς βουλεύεται οὕτως ὑπολαμβάνων· οὐδὲν γὰρ πλέον.

ἐνδέχεται δὲ συλλογίζεσθαι καὶ συνάγειν τὰ μὲν ἐκ συλλελογισμένων πρότερον, τὰ δ' ἐξ ἀσυλλογίστων μὲν, δεομένων δὲ συλλογισμοῦ διὰ τὸ μὴ εἶναι ἐνδοξα, ἀνάγκη δὲ τούτων τὸ μὲν μὴ εἶναι εὐεπακολούθητον διὰ τὸ μῆκος (ὁ γὰρ κριτὴς ὑπόκειται εἶναι ἀπλοῦς), τὰ δὲ μὴ πιθανὰ διὰ τὸ μὴ ἐξ ὁμολογουμένων εἶναι μηδ' ἐνδόξων, ὥστ' ἀναγκαῖον τό τε ἐνθύμημα εἶναι καὶ τὸ παράδειγμα περὶ τε τῶν ἐνδεχομένων ὥς τὰ πολλὰ ἔχειν ἄλλως, τὸ μὲν παράδειγμα ἐπαγωγὴν τὸ δ' ἐνθύμημα συλλογισμόν, καὶ ἐξ ὀλίγων τε καὶ πολλάκις ἐλαττόνων ἢ ἐξ ὧν ὁ πρῶτος συλλογισμός· ἐὰν γὰρ ἦ τι τούτων γνώριμον, οὐδὲ δεῖ λέγειν· αὐτὸς γὰρ τοῦτο προστίθῃσιν ὁ ἀκροατής, οἷον ὅτι Δωριεὺς στεφανίτην ἀγῶνα νενίκηκεν· ἱκανὸν γὰρ εἶπεῖν ὅτι Ὀλύμπια νενίκηκεν, τὸ δ' ὅτι στεφανίτης τὰ Ὀλύμπια

οὐδὲ δεῖ προσθεῖναι· γινώσκουσι γὰρ πάντες.

ἐπεὶ δ' ἐστὶν ὀλίγα μὲν τῶν ἀναγκαίων ἐξ ὧν οἱ ῥητορικοὶ συλλογισμοὶ εἰσι (τὰ γὰρ πολλὰ περὶ ὧν αἱ κρίσεις καὶ αἱ σκέψεις ἐνδέχεται καὶ ἄλλως ἔχειν· περὶ ὧν μὲν γὰρ πράττουσι βουλευόμενοι καὶ σκοποῦσι, τὰ δὲ πραττόμενα πάντα τοιοῦτου γένους ἐστί, καὶ οὐδὲν ὡς ἔπος εἰπεῖν ἐξ ἀνάγκης τούτων, τὰ δ' ὡς ἐπὶ τὸ πολὺ συμβαίνοντα καὶ ἐνδεχόμενα ἐκ τοιούτων ἀνάγκη ἐτέρων συλλογίζεσθαι, τὰ δ' ἀναγκαῖα ἐξ ἀναγκαίων· δηλον δ' ἡμῖν καὶ τοῦτο ἐκ τῶν Ἀναλυτικῶν), φανερόν ὅτι ἐξ ὧν τὰ ἐνθυμήματα λέγεται, τὰ μὲν ἀναγκαῖα ἔσται, τὰ δὲ πλεῖστα ὡς ἐπὶ τὸ πολὺ, τὰ δ' ἐνθυμήματα ἐξ εἰκότων καὶ ἐκ σημείων, ὥστε ἀνάγκη τούτων ἐκάτερον ἐκατέρῳ ταῦτο εἶναι.

τὸ μὲν γὰρ εἰκὸς ἐστὶ τὸ ὡς ἐπὶ τὸ πολὺ γινόμενον, οὐχ ἀπλῶς δὲ καθάπερ ὀρίζονται τινες, ἀλλὰ τὸ περὶ τὰ ἐνδεχόμενα ἄλλως ἔχειν, οὕτως ἔχον πρὸς ἐκεῖνο πρὸς ὃ εἰκὸς [1357b] ὡς τὸ καθόλου πρὸς τὸ κατὰ μέρος· τῶν δὲ σημείων τὸ μὲν οὕτως ἔχει ὡς τῶν καθ' ἕκαστόν τι πρὸς τὸ καθόλου, τὸ δὲ ὡς τῶν καθόλου τι πρὸς τὸ κατὰ μέρος. τούτων δὲ τὸ μὲν ἀναγκαῖον τεκμήριον, τὸ δὲ μὴ ἀναγκαῖον ἀνώνυμόν ἐστι κατὰ τὴν διαφοράν. ἀναγκαῖα μὲν οὖν λέγω ἐξ ὧν γίνεται συλλογισμός· διὸ καὶ τεκμήριον τὸ τοιοῦτον τῶν σημείων ἐστίν· ὅταν γὰρ μὴ ἐνδέχεσθαι οἴωνται λῦσαι τὸ λεχθέν, τότε φέρειν οἴονται τεκμήριον ὡς δεδειγμένον καὶ πεπερασμένον· τὸ γὰρ τέκμαρ καὶ πέρας ταυτόν ἐστι κατὰ τὴν ἀρχαίαν γλῶτταν. ἔστιν δὲ τῶν σημείων τὸ μὲν ὡς τὸ καθ' ἕκαστον πρὸς τὸ καθόλου ὧδε, οἷον εἴ τις εἶπειεν σημεῖον εἶναι ὅτι οἱ σοφοὶ δίκαιοι, Σωκράτης γὰρ σοφὸς ἦν καὶ δίκαιος. τοῦτο μὲν οὖν σημεῖον, λυτὸν δέ, κἂν ἀληθὲς ἦ τὸ εἰρημένον (ἀσυλλόγιστον γὰρ), τὸ δέ, οἷον εἴ τις εἶπειεν σημεῖον ὅτι νοσεῖ, πυρέττει γάρ, ἢ τέτοκεν, ὅτι γάλα ἔχει, ἀναγκαῖον. ὅπερ τῶν σημείων τεκμήριον μόνον ἐστίν· μόνον γάρ, ἂν ἀληθὲς ἦ, ἄλυτόν ἐστιν. τὸ δὲ ὡς τὸ καθόλου πρὸς τὸ κατὰ μέρος ἔχον, οἷον εἴ τις εἶπειεν ὅτι πυρέττει σημεῖον εἶναι, πυκνὸν γὰρ ἀναπνεῖ. λυτὸν δὲ καὶ τοῦτο, κἂν ἀληθὲς ἦ· ἐνδέχεται γὰρ καὶ μὴ πυρέττοντα πνευστιᾶν.

τί μὲν οὖν εἰκὸς ἐστὶ καὶ τί σημεῖον καὶ τεκμήριον, καὶ τί διαφέρουσιν, εἴρηται μὲν καὶ νῦν, μᾶλλον δὲ φανερώς καὶ περὶ τούτων, καὶ διὰ τίν' αἰτίαν τὰ μὲν ἀσυλλόγιστα ἐστὶ τὰ δὲ συλλελογισμένα, ἐν τοῖς Ἀναλυτικοῖς διώριστα περὶ αὐτῶν.

παράδειγμα δὲ ὅτι μὲν ἐστὶν ἐπαγωγή καὶ περὶ ποῖα ἐπαγωγή,

εἴρηται· ἔστι δὲ οὔτε ὥς μέρος πρὸς ὅλον οὔθ' ὥς ὅλον πρὸς μέρος οὔθ' ὥς ὅλον πρὸς ὅλον, ἀλλ' ὥς μέρος πρὸς μέρος, ὅμοιον πρὸς ὅμοιον - ὅταν ἄμφω μὲν ἦ ὑπὸ τὸ αὐτὸ γένος, γνωριμώτερον δὲ θάτερον ἢ θατέρου, παράδειγμά ἐστιν· οἷον ὅτι ἐπεβούλευε τυραννίδι Διονύσιος αἰτῶν τὴν φυλακὴν· καὶ γὰρ Πεισίστρατος πρότερον ἐπιβουλεύων ἤτει φυλακὴν καὶ λαβὼν ἐτυράννησε, καὶ Θεαγένης ἐν Μεγάροις· καὶ ἄλλοι ὅσους ἴσασι, παράδειγμα πάντες γίνονται τοῦ Διονυσίου, ὃν οὐκ ἴσασιν πῶς εἰ διὰ τοῦτο αἰτεῖ. πάντα δὲ ταῦτα ὑπὸ τὸ αὐτὸ καθόλου, ὅτι ὁ ἐπιβουλεύων τυραννίδι φυλακὴν αἰτεῖ.

[1358a] ἐξ ὧν μὲν οὖν λέγονται αἱ δοκοῦσαι εἶναι πίστεις ἀποδεικτικά, εἴρηται. τῶν δὲ ἐνθυμημάτων μεγίστη διαφορὰ καὶ μάλιστα λεληθυῖα σχεδὸν παρὰ πᾶσιν ἐστὶν ἥπερ καὶ περὶ τὴν διαλεκτικὴν μέθοδον τῶν συλλογισμῶν· τὰ μὲν γὰρ αὐτῶν ἐστὶ κατὰ τὴν ῥητορικὴν ὥσπερ καὶ κατὰ τὴν διαλεκτικὴν μέθοδον τῶν συλλογισμῶν, τὰ δὲ κατ' ἄλλας τέχνας καὶ δυνάμεις, τὰς μὲν οὕσας τὰς δ' οὐπὼ κατειλημμένας· διὸ καὶ λανθάνουσιν τε τοὺς ἀκροατὰς καὶ [μᾶλλον] ἀπτόμενοι κατὰ τρόπον μεταβαίνουσιν ἐξ αὐτῶν. μᾶλλον δὲ σαφὲς ἔσται τὸ λεγόμενον διὰ πλειόνων ῥηθέν. λέγω γὰρ διαλεκτικούς τε καὶ ῥητορικούς συλλογισμούς εἶναι περὶ ὧν τοὺς τόπους λέγομεν· οὗτοι δ' εἰσὶν οἱ κοινοὶ περὶ δικαίων καὶ φυσικῶν καὶ περὶ πολιτικῶν καὶ περὶ πολλῶν διαφερόντων εἶδει, οἷον ὁ τοῦ μᾶλλον καὶ ἥττον τόπος· οὐδὲν γὰρ μᾶλλον ἔσται ἐκ τούτου συλλογίσασθαι ἢ ἐνθύμημα εἰπεῖν περὶ δικαίων ἢ περὶ φυσικῶν ἢ περὶ ὁτουοῦν· καίτοι ταῦτα εἶδει διαφέρει. ἴδια δὲ ὅσα ἐκ τῶν περὶ ἕκαστον εἶδος καὶ γένος προτάσεών ἐστιν, οἷον περὶ φυσικῶν εἰσι προτάσεις ἐξ ὧν οὔτε ἐνθύμημα οὔτε συλλογισμὸς ἔστι περὶ τῶν ἠθικῶν, καὶ περὶ τούτων ἄλλαι ἐξ ὧν οὐκ ἔσται περὶ τῶν φυσικῶν· ὁμοίως δὲ τοῦτ' ἔχει ἐπὶ πάντων. κάκεῖνα μὲν οὐ ποιήσῃ περὶ οὐδὲν γένος ἔμφρονα· περὶ οὐδὲν γὰρ ὑποκείμενόν ἐστιν· ταῦτα δὲ ὅσῳ τις ἂν βέλτιον ἐκλέγῃται [τὰς προτάσεις], λήσῃ ποιήσας ἄλλην ἐπιστήμην τῆς διαλεκτικῆς καὶ ῥητορικῆς· ἂν γὰρ ἐντύχη ἀρχαῖς, οὐκέτι διαλεκτικὴ οὐδὲ ῥητορικὴ ἀλλ' ἐκείνη ἔσται ἣς ἔχει τὰς ἀρχάς. ἔστι δὲ τὰ πλείστα τῶν ἐνθυμημάτων ἐκ τούτων τῶν εἰδῶν λεγόμενα, τῶν κατὰ μέρος καὶ ιδίων, ἐκ δὲ τῶν κοινῶν ἐλάττω. καθάπερ οὖν καὶ ἐν τοῖς Τοπικοῖς, καὶ ἐνταῦθα διαιρετέον τῶν ἐνθυμημάτων τά τε εἶδη καὶ τοὺς τόπους ἐξ ὧν ληπτέον. λέγω δ' εἶδη

μὲν τὰς καθ' ἕκαστον γένος ἰδίας προτάσεις, τόπους δὲ τοὺς κοινούς ὁμοίως πάντων. πρότερον οὖν εἴπωμεν περὶ τῶν εἰδῶν· πρῶτον δὲ λάβωμεν τὰ γένη τῆς ῥητορικῆς, ὅπως διελόμενοι πόσα ἐστίν, περὶ τούτων χωρὶς λαμβάνωμεν τὰ στοιχεῖα καὶ τὰς προτάσεις.

Ἔστιν δὲ τῆς ῥητορικῆς εἶδη τρία τὸν ἀριθμόν· τοσοῦτοι γὰρ καὶ οἱ ἀκροαταὶ τῶν λόγων ὑπάρχουσιν ὄντες. σύγκειται μὲν γὰρ ἐκ τριῶν ὁ λόγος, ἐκ τε τοῦ λέγοντος καὶ [1358b] περὶ οὗ λέγει καὶ πρὸς ὄν, καὶ τὸ τέλος πρὸς τοῦτόν ἐστιν, λέγω δὲ τὸν ἀκροατήν. ἀνάγκη δὲ τὸν ἀκροατὴν ἢ θεωρὸν εἶναι ἢ κριτὴν, κριτὴν δὲ ἢ τῶν γεγενημένων ἢ τῶν μελλόντων. ἔστιν δ' ὁ μὲν περὶ τῶν μελλόντων κρίνων ὁ ἐκκλησιαστής, ὁ δὲ περὶ τῶν γεγενημένων [οἶον] ὁ δικαστής, ὁ δὲ περὶ τῆς δυνάμεως ὁ θεωρός, ὥστ' ἐξ ἀνάγκης ἂν εἴη τρία γένη τῶν λόγων τῶν ῥητορικῶν, συμβουλευτικόν, δικανικόν, ἐπιδεικτικόν.

συμβουλῆς δὲ τὸ μὲν προτροπή, τὸ δὲ ἀποτροπή· αἰεὶ γὰρ καὶ οἱ ἰδία συμβουλευόντες καὶ οἱ κοινῇ δημηγοροῦντες τούτων θάτερον ποιοῦσιν. δίκης δὲ τὸ μὲν κατηγορία, τὸ δ' ἀπολογία· τούτων γὰρ ὁποτερονοῦν ποιεῖν ἀνάγκη τοὺς ἀμφισβητοῦντας. ἐπιδεικτικοῦ δὲ τὸ μὲν ἔπαινος τὸ δὲ ψόγος. χρόνοι δὲ ἐκάστου τούτων εἰσὶ τῷ μὲν συμβουλευόντι ὁ μέλλων (περὶ γὰρ τῶν ἐσομένων συμβουλευεῖ ἢ προτρέπων ἢ ἀποτρέπων), τῷ δὲ δικαζομένῳ ὁ γενόμενος (περὶ γὰρ τῶν πεπραγμένων αἰεὶ ὁ μὲν κατηγορεῖ, ὁ δὲ ἀπολογεῖται), τῷ δ' ἐπιδεικτικῷ κυριώτατος μὲν ὁ παρών (κατὰ γὰρ τὰ ὑπάρχοντα ἐπαινοῦσιν ἢ ψέγουσιν πάντες), προσχρῶνται δὲ πολλάκις καὶ τὰ γενόμενα ἀναμνησκόντες καὶ τὰ μέλλοντα προεικάζοντες. τέλος δὲ ἐκάστοις τούτων ἕτερόν ἐστι, καὶ τρισὶν οὗσι τρία, τῷ μὲν συμβουλευόντι τὸ συμφέρον καὶ βλαβερόν· ὁ μὲν γὰρ προτρέπων ὡς βέλτιον συμβουλευεῖ, ὁ δὲ ἀποτρέπων ὡς χείρονος ἀποτρέπει, τὰ δ' ἄλλα πρὸς τοῦτο συμπαραλαμβάνει, ἢ δίκαιον ἢ ἄδικον, ἢ καλὸν ἢ αἰσχρόν· τοῖς δὲ δικαζομένοις τὸ δίκαιον καὶ τὸ ἄδικον, τὰ δ' ἄλλα καὶ οὗτοι συμπαραλαμβάνουσι πρὸς ταῦτα· τοῖς δ' ἐπαινοῦσιν καὶ ψέγουσιν τὸ καλὸν καὶ τὸ αἰσχρόν, τὰ δ' ἄλλα καὶ οὗτοι πρὸς ταῦτα ἐπαναφέρουσιν.

σημεῖον δ' ὅτι τὸ εἰρημένον ἐκάστοις τέλος· περὶ μὲν γὰρ τῶν ἄλλων ἐνίστε οὐκ ἂν ἀμφισβητήσαιεν, οἶον ὁ δικαζόμενος ὡς οὐ γέγονεν ἢ οὐκ ἔβλαψεν· ὅτι δ' ἀδικεῖ οὐδέποτε ἂν ὁμολογήσαιεν· οὐδὲν γὰρ ἂν ἔδει δίκης. ὁμοίως δὲ καὶ οἱ συμβουλευόντες τὰ μὲν

ἄλλα πολλάκις προίενται, ὥς δὲ ἀσύμφορα συμβουλευουσιν ἢ ἀπ' ὠφελίμων ἀποτρέπουσιν οὐκ ἂν ὁμολογήσαιεν· ὥς δ' [οὐκ] ἄδικον τοὺς ἀστυγείτονας καταδουλοῦσθαι καὶ τοὺς μηδὲν ἀδικούντας, πολλάκις οὐδὲν φροντίζουσιν. ὁμοίως δὲ καὶ οἱ ἐπαινοῦντες καὶ οἱ ψέγοντες οὐ σκοποῦσιν [1359a] εἰ συμφέροντα ἔπραξεν ἢ βλαβερὰ, ἀλλὰ καὶ ἐν ἐπαίνῳ πολλάκις τιθέασιν ὅτι ὀλιγορήσας τοῦ αὐτῷ λυσιτελοῦντος ἔπραξεν ὃ τι καλόν, οἷον Ἀχιλλεῖα ἐπαινοῦσιν ὅτι ἐβοήθησε τῷ ἐταίρῳ Πατρόκλῳ εἰδὼς ὅτι δεῖ αὐτὸν ἀποθανεῖν ἐξὸν ζῆν. τούτῳ δὲ ὁ μὲν τοιοῦτος θάνατος κάλλιον, τὸ δὲ ζῆν συμφέρον.

φανερὸν δὲ ἐκ τῶν εἰρημένων ὅτι ἀνάγκη περὶ τούτων ἔχειν πρῶτον τὰς προτάσεις· τὰ γὰρ τεκμήρια καὶ τὰ εἰκότα καὶ τὰ σημεῖα προτάσεις εἰσὶν ῥητορικαί· ὅλως μὲν γὰρ συλλογισμὸς ἐκ προτάσεων ἐστίν, τὸ δ' ἐνθύμημα συλλογισμὸς ἐστὶ συνεστηκὼς ἐκ τῶν εἰρημένων προτάσεων.

ἐπεὶ δὲ οὔτεπραχθῆναι οἷόν τε οὔτε πεπρᾶχθαι τὰ ἀδύνατα ἀλλὰ τὰ δυνατά, οὐδὲ τὰ μὴ γενόμενα ἢ μὴ ἐσόμενα [οὐχ] οἷόν τε τὰ μὲν πεπρᾶχθαι, τὰ δὲπραχθήσεσθαι, ἀναγκαῖον καὶ τῷ συμβουλευόντι καὶ τῷ δικαζομένῳ καὶ τῷ ἐπιδεικτικῷ ἔχειν προτάσεις περὶ δυνατοῦ καὶ ἀδυνάτου, καὶ εἰ γέγονεν ἢ μὴ, καὶ εἰ ἔσται ἢ μὴ. ἔτι δὲ ἐπεὶ ἅπαντες, καὶ ἐπαινοῦντες καὶ ψέγοντες, καὶ προτρέποντες καὶ ἀποτρέποντες, καὶ κατηγοροῦντες καὶ ἀπολογούμενοι, οὐ μόνον τὰ εἰρημένα δεικνύναι πειρῶνται, ἀλλὰ καὶ ὅτι μέγα ἢ μικρὸν τὸ ἀγαθὸν ἢ τὸ κακόν, ἢ τὸ καλόν ἢ τὸ αἰσχρόν, ἢ τὸ δίκαιον ἢ τὸ ἄδικον, ἢ καθ' αὐτὰ λέγοντες ἢ πρὸς ἄλληλα ἀντιπαραβάλλοντες, δηλὸν ὅτι δέοι ἂν καὶ περὶ μεγέθους καὶ μικρότητος καὶ τοῦ μείζονος καὶ τοῦ ἐλάττονος προτάσεις ἔχειν, καὶ καθόλου καὶ περὶ ἐκάστου, οἷον τί μείζον ἀγαθὸν ἢ ἐλάττον ἢ ἀδίκημα ἢ δικαίωμα· ὁμοίως δὲ καὶ περὶ τῶν ἄλλων.

περὶ ὧν μὲν οὖν ἐξ ἀνάγκης δεῖ λαβεῖν τὰς προτάσεις, εἴρηται· μετὰ δὲ ταῦτα διαιρετέον ἰδίᾳ περὶ ἐκάστου τούτων, οἷον περὶ ὧν συμβουλή καὶ περὶ ὧν οἱ ἐπιδεικτικοὶ λόγοι, τρίτον δὲ περὶ ὧν αἱ δίκαι.

Πρῶτον μὲν οὖν ληπτέον περὶ ποῖα ἀγαθὰ ἢ κακὰ ὁ συμβουλευὼν συμβουλεύει, ἐπειδὴ οὐ περὶ ἅπαντα ἀλλ' ὅσα ἐνδέχεται καὶ γενέσθαι καὶ μὴ, ὅσα δὲ ἐξ ἀνάγκης ἢ ἔστιν ἢ ἔσται, ἢ ἀδύνατον ἢ εἶναι ἢ γενέσθαι, περὶ δὲ τούτων οὐκ ἔστι συμβουλή. οὐδὲ δὴ περὶ τῶν ἐνδεχομένων ἀπάντων· ἔστιν γὰρ καὶ φύσει ἔνια

καὶ ἀπὸ τύχης γινόμενα ἀγαθὰ τῶν ἐνδεχομένων καὶ γίνεσθαι καὶ μὴ, περὶ ὧν οὐδὲν πρὸ ἔργου τὸ συμβουλευεῖν· ἀλλὰ δηλὸν ὅτι περὶ ὅσων ἐστὶν τὸ βουλευέσθαι. τοιαῦτα δ' ἐστὶν ὅσα πέφυκεν ἀνάγεσθαι εἰς ἡμᾶς, καὶ ὧν ἡ ἀρχὴ τῆς γενέσεως ἐφ' ἡμῖν ἐστίν· μέχρι γὰρ τούτου [1359b] σκοποῦμεν, ἕως ἂν εὕρωμεν εἰ ἡμῖν δυνατὰ ἢ ἀδύνατα πρᾶξαι.

καθ' ἕκαστον μὲν οὖν ἀκριβῶς διαριθμήσασθαι καὶ διαλαβεῖν εἰς εἶδη περὶ ὧν εἰώθασι χρηματίζειν, ἔτι δ' ὅσον ἐνδέχεται περὶ αὐτῶν διορίσαι κατὰ τὴν ἀλήθειαν, οὐ δεῖ κατὰ τὸν παρόντα καιρὸν ζητεῖν διὰ τὸ μήτε τῆς ῥητορικῆς εἶναι τέχνης, ἀλλ' ἐμφρονεστερας καὶ μᾶλλον ἀληθινῆς, πολλῶ τε πλείω δεδόσθαι καὶ νῦν αὐτῇ τῶν οἰκείων θεωρημάτων· ὅπερ γὰρ καὶ πρότερον εἰρηκότες τυγχάνομεν ἀληθές ἐστιν, ὅτι ἡ ῥητορικὴ σύγκειται μὲν ἐκ τε τῆς ἀναλυτικῆς ἐπιστήμης καὶ τῆς περὶ τὰ ἥθη πολιτικῆς, ὁμοία δ' ἐστὶν τὰ μὲν τῇ διαλεκτικῇ τὰ δὲ τοῖς σοφιστικοῖς λόγοις. ὅσῳ δ' ἂν τις ἢ τὴν διαλεκτικὴν ἢ ταύτην μὴ καθάπερ ἂν δυνάμεις ἀλλ' ἐπιστήμης πειρᾶται κατασκευάζειν, λήσεται τὴν φύσιν αὐτῶν ἀφανίσας τῷ μεταβαίνειν ἐπισκευάζων εἰς ἐπιστήμης ὑποκειμένων τινῶν πραγμάτων, ἀλλὰ μὴ μόνον λόγων. ὅμως δὲ ὅσα πρὸ ἔργου μὲν ἐστὶ διελεῖν, ἔτι δ' ὑπολείπει σκέψιν τῇ πολιτικῇ ἐπιστήμῃ, εἰπώμεν καὶ νῦν.

σχεδὸν γάρ, περὶ ὧν βουλευόνται πάντες καὶ περὶ ὧν ἀγορεύουσιν οἱ συμβουλευόντες, τὰ μέγιστα τυγχάνει πέντε τὸν ἀριθμὸν ὄντα· ταῦτα δ' ἐστὶν περὶ τε πόρων, καὶ πολέμου καὶ εἰρήνης, ἔτι δὲ περὶ φυλακῆς τῆς χώρας, καὶ τῶν εἰσαγομένων καὶ ἐξαγομένων, καὶ νομοθεσίας· ὥστε περὶ μὲν πόρων τὸν μέλλοντα συμβουλευεῖν δέοι ἂν τὰς προσόδους τῆς πόλεως εἰδέναι τίνες καὶ πόσαι, ὅπως εἴτε τις παραλείπεται προστεθῇ καὶ εἴ τις ἐλάττων αὐξηθῇ, ἔτι δὲ τὰς δαπάνας τῆς πόλεως ἀπάσας, ὅπως εἴ τις περίεργος ἀφαιρεθῇ καὶ εἴ τις μείζων ἐλάττων γένηται· οὐ γὰρ μόνον πρὸς τὰ ὑπάρχοντα προστιθέντες πλουσιώτεροι γίνονται, ἀλλὰ καὶ ἀφαιροῦντες τῶν δαπανημάτων. ταῦτα δ' οὐ μόνον ἐκ τῆς περὶ τὰ ἴδια ἐμπειρίας ἐνδέχεται συνορᾶν, ἀλλ' ἀναγκαῖον καὶ τῶν παρὰ τοῖς ἄλλοις εὐρημένων ἱστορικῶν εἶναι πρὸς τὴν περὶ τούτων συμβουλήν.

περὶ δὲ πολέμου καὶ εἰρήνης τὴν δύναμιν εἰδέναι τῆς πόλεως, ὁπόση τε ὑπάρχει ἤδη καὶ πόσῃ ἐνδέχεται ὑπάρξει, καὶ ποία τις ἢ τε ὑπάρχουσά ἐστιν καὶ ἥτις ἐνδέχεται προσγενέσθαι, ἔτι δὲ πολέμους

πῶς καὶ τίνας πεπολέμηκεν. οὐ μόνον δὲ τῆς οἰκείας πόλεως ἀλλὰ καὶ τῶν ὁμόρων ταῦτα ἀναγκαῖον εἰδέναι, καὶ πρὸς οὓς ἐπίδοξον πολεμεῖν, ὅπως πρὸς μὲν τοὺς κρείττους εἰρηνεύηται, [1360a] πρὸς δὲ τοὺς ἥττους ἐφ' αὐτοῖς ἢ τὸ πολεμεῖν, καὶ τὰς δυνάμεις, πότερον ὅμοιαι ἢ ἀνόμοιαι· ἔστιν γὰρ καὶ ταύτη πλεονεκτεῖν ἢ ἐλαττοῦσθαι. ἀναγκαῖον δὲ καὶ πρὸς ταῦτα μὴ μόνον τοὺς οἰκείους πολέμους θεωρηκέναι ἀλλὰ καὶ τοὺς τῶν ἄλλων, πῶς ἀποβαίνουσιν· ἀπὸ γὰρ τῶν ὁμοίων τὰ ὅμοια γίνεσθαι πέφυκεν.

ἔτι δὲ περὶ φυλακῆς τῆς χώρας μὴ λανθάνειν πῶς φυλάττεται, ἀλλὰ καὶ τὸ πλῆθος εἰδέναι τῆς φυλακῆς καὶ τὸ εἶδος καὶ τοὺς τόπους τῶν φυλακτηρίων (τοῦτο δ' ἀδύνατον μὴ ἔμπειρον ὄντα τῆς χώρας), ἴν' εἴ τ' ἐλάττων ἢ φυλακὴ προστεθῇ καὶ εἴ τις περίεργος ἀφαιρεθῇ καὶ τοὺς ἐπιτηδεῖους τόπους τηρῶσι μᾶλλον.

ἔτι δὲ περὶ τροφῆς, πόσης [δαπάνης] ἱκανὴ τῇ πόλει καὶ ποία, ἢ αὐτοῦ τε γιγνομένη καὶ ἡ εἰσαγωγίμος, καὶ τίνων τ' ἐξαγωγῆς δέονται καὶ τίνων «καὶ παρὰ τίνων» εἰσαγωγῆς, ἵνα πρὸς τούτους καὶ συνθῇ καὶ συμβολαὶ γίνωνται· πρὸς δύο γὰρ διαφυλάττειν ἀναγκαῖον ἀνεγκλήτους τοὺς πολίτας, πρὸς τε τοὺς κρείττους καὶ πρὸς τοὺς εἰς ταῦτα χρησίμους.

εἰς δ' ἀσφάλειαν ἅπαντα μὲν ταῦτα ἀναγκαῖον δύνασθαι θεωρεῖν, οὐκ ἐλάχιστον δὲ περὶ νομοθεσίας ἐπαίειν· ἐν γὰρ τοῖς νόμοις ἐστὶν ἡ σωτηρία τῆς πόλεως, ὥστ' ἀναγκαῖον εἰδέναι πόσα τέ ἐστὶ πολιτειῶν εἶδη, καὶ ποῖα συμφέρει ἐκάστη, καὶ ὑπὸ τίνων φθείρεσθαι πέφυκεν καὶ οἰκείων τῆς πολιτείας καὶ ἐναντίων. λέγω δὲ τὸ ὑπὸ οἰκείων φθείρεσθαι, ὅτι ἔξω τῆς βελτίστης πολιτείας αἱ ἄλλαι πᾶσαι καὶ ἀνιέμεναι καὶ ἐπιτεινόμεναι φθίρονται, οἷον δημοκρατία οὐ μόνον ἀνιεμένη ἀσθενεστέρα γίγνεται ὥστε τέλος ἡξει εἰς ὀλιγαρχίαν, ἀλλὰ καὶ ἐπιτεινομένη σφόδρα· ὥσπερ καὶ ἡ γρυπότης καὶ ἡ σιμότης οὐ μόνον ἀνιέμενα ἔρχεται εἰς τὸ μέσον, ἀλλὰ καὶ σφόδρα γρυπαὶ γινόμενα ἢ σιμὰ οὕτως διατίθεται ὥστε μηδὲ μυκτῆρα δοκεῖν εἶναι. χρήσιμον δὲ πρὸς τὰς νομοθεσίας τὸ μὴ μόνον ἐπαίειν τίς πολιτεία συμφέρει, ἐκ τῶν παρεληλυθότων θεωροῦντα, ἀλλὰ καὶ τὰς παρὰ τοῖς ἄλλοις εἰδέναι, αἱ ποῖαι τοῖς ποίοις ἀρμόττουσιν· ὥστε δῆλον ὅτι πρὸς μὲν τὴν νομοθεσίαν αἱ τῆς γῆς περίοδοι χρήσιμοι (ἐντεῦθεν γὰρ λαβεῖν ἔστιν τοὺς τῶν ἐθνῶν νόμους), πρὸς δὲ τὰς πολιτικὰς συμβουλάς αἱ τῶν περὶ τὰς πράξεις γραφόντων ἱστορίαι· ἅπαντα δὲ ταῦτα πολιτικῆς ἀλλ' οὐ ρητορικῆς ἔργον ἐστίν.

περὶ ὧν μὲν οὖν ἔχειν δεῖ <τὰς προτάσεις> τὸν μέλλοντα [1360b] συμβουλευεῖν, τὰ μέγιστα τοσαῦτά ἐστιν· ἐξ ὧν δὲ δεῖ καὶ περὶ τούτων καὶ περὶ τῶν ἄλλων προτρέπειν ἢ ἀποτρέπειν λέγωμεν πάλιν.

Σχεδὸν δὲ καὶ ἰδίᾳ ἐκάστω καὶ κοινῇ πᾶσι σκοπός τις ἔστιν οὗ στοχαζόμενοι καὶ αἰροῦνται καὶ φεύγουσιν· καὶ τοῦτ' ἐστὶν ἐν κεφαλαίῳ εἰπεῖν ἢ τ' εὐδαιμονία καὶ τὰ μόρια αὐτῆς· ὥστε παραδείγματος χάριν λάβωμεν τί ἐστὶν ὡς ἀπλῶς εἰπεῖν ἢ εὐδαιμονία, καὶ ἐκ τίνων τὰ μόρια ταύτης· περὶ γὰρ ταύτης καὶ τῶν εἰς ταύτην συντεινόντων καὶ τῶν ἐναντίων ταύτῃ αἱ τε προτροπαὶ καὶ αἱ ἀποτροπαὶ πᾶσαί εἰσιν· τὰ μὲν γὰρ παρασκευάζοντα ταύτην ἢ τῶν μορίων τι, ἢ μεῖζον ἀντ' ἐλάττονος ποιοῦντα, δεῖ πράττειν, τὰ δὲ φθείροντα ἢ ἐμποδίζοντα ἢ τὰ ἐναντία ποιοῦντα μὴ πράττειν.

ἔστω δὴ εὐδαιμονία εὐπραξία μετ' ἀρετῆς, ἢ αὐτάρκεια ζωῆς, ἢ ὁ βίος ὁ μετὰ ἀσφαλείας ἡδιστος, ἢ εὐθενία κτημάτων καὶ σωμάτων μετὰ δυνάμεως φυλακτικῆς τε καὶ πρακτικῆς τούτων· σχεδὸν γὰρ τούτων ἐν ἡ πλείῳ τὴν εὐδαιμονίαν ὁμολογοῦσιν εἶναι ἅπαντες.

εἰ δὴ ἐστὶν ἡ εὐδαιμονία τοιοῦτον, ἀνάγκη αὐτῆς εἶναι μέρη εὐγένειαν, πολυφιλίαν, χρηστοφιλίαν, πλοῦτον, εὐτεκνίαν, πολυτεκνίαν, εὐγηρίαν· ἔτι τὰς τοῦ σώματος ἀρετάς (οἷον ὑγίειαν, κάλλος, ἰσχύν, μέγεθος, δύναμιν ἀγωνιστικὴν), δόξαν, τιμὴν, εὐτυχίαν, ἀρετὴν [ἢ καὶ τὰ μέρη αὐτῆς φρόνησιν, ἀνδρείαν, δικαιοσύνην, σωφροσύνην]· οὕτω γὰρ ἂν αὐταρκέστατός <τις> εἴη, εἰ ὑπάρχοι αὐτῷ τὰ τ' ἐν αὐτῷ καὶ τὰ ἐκτὸς ἀγαθὰ· οὐ γὰρ ἔστιν ἄλλα παρὰ ταῦτα. ἔστι δ' ἐν αὐτῷ μὲν τὰ περὶ ψυχὴν καὶ τὰ ἐν σώματι, ἔξω δὲ εὐγένεια καὶ φίλοι καὶ χρήματα καὶ τιμὴ, ἔτι δὲ προσήκειν οἰόμεθα δυνάμεις ὑπάρχειν καὶ τύχην· οὕτω γὰρ ἀσφαλέστατος ὁ βίος. λάβωμεν τοίνυν ὁμοίως καὶ τούτων ἕκαστον τί ἐστὶν.

εὐγένεια μὲν οὖν ἐστὶν ἔθνη μὲν καὶ πόλεις τὸ αὐτόχθονας ἢ ἀρχαίους εἶναι, καὶ ἡγεμόνας τοὺς πρώτους ἐπιφανεῖς, καὶ πολλοὺς ἐπιφανεῖς γεγονέναι ἐξ αὐτῶν ἐπὶ τοῖς ζηλουμένοις· ἰδίᾳ δὲ εὐγένεια ἢ ἀπ' ἀνδρῶν ἢ ἀπὸ γυναικῶν, καὶ γνησιότης ἀπ' ἀμφοῖν, καί, ὥσπερ ἐπὶ πόλεως, <τὸ> τοὺς τε πρώτους γνωρίμους ἢ ἐπ' ἀρετῇ ἢ πλούτῳ ἢ ἄλλῳ τῷ τῶν τιμωμένων εἶναι, καὶ πολλοὺς ἐπιφανεῖς ἐκ τοῦ γένους καὶ ἄνδρας καὶ γυναῖκας καὶ νέους καὶ πρεσβυτέρους.

εὐτεκνία δὲ καὶ πολυτεκνία οὐκ ἄδηλα. ἔστιν δὲ τῷ κοινῷ

[1361a] μὲν [εὐτεκνία], νεότης ἂν ἢ πολλή καὶ ἀγαθή, ἀγαθή δὲ κατ' ἀρετὴν σώματος, οἷον μέγεθος, κάλλος, ἰσχύν, δύναμιν ἀγωνιστικὴν· ψυχῆς δὲ σωφροσύνη καὶ ἀνδρεία νέου ἀρεταί· ἰδίᾳ δὲ εὐτεκνία καὶ πολυτεκνία τὸ τὰ ἴδια τέκνα πολλὰ καὶ τοιαῦτα εἶναι, καὶ θήλεα καὶ ἄρρενα· θηλειῶν δὲ ἀρετὴ σώματος μὲν κάλλος καὶ μέγεθος, ψυχῆς δὲ σωφροσύνη καὶ φιλεργία ἄνευ ἀνελευθερίας. ὁμοίως δὲ καὶ ἰδίᾳ καὶ κοινῇ, καὶ κατ' ἄνδρας καὶ κατὰ γυναῖκας, δεῖ ζητεῖν ἕκαστον ὑπάρχειν τῶν τοιούτων· ὅσοις γὰρ τὰ κατὰ γυναῖκας φαῦλα ὥσπερ Λακεδαιμονίοις, σχεδὸν κατὰ τὸ ἥμισυ οὐκ εὐδαιμονοῦσιν.

πλούτου δὲ μέρη νομίσματος πλῆθος <καὶ> γῆς, χωρίων κτῆσις πλήθει καὶ μεγέθει καὶ κάλλει διαφερόντων, ἔτι δὲ ἐπίπλων κτῆσις καὶ ἀνδραπόδων καὶ βοσκημάτων πλήθει καὶ κάλλει διαφερόντων, ταῦτα δὲ πάντα <οἰκεῖα> καὶ ἀσφαλῆ καὶ ἐλευθέρια καὶ χρήσιμα. ἔστιν δὲ χρήσιμα μὲν μᾶλλον τὰ κάρπιμα, ἐλευθέρια δὲ τὰ πρὸς ἀπόλαυσιν (κάρπιμα δὲ λέγω ἅφ' ὧν αἱ πρόσοδοι, ἀπολαυστικά δὲ ἅφ' ὧν μηδὲν παρὰ τὴν χρῆσιν γίνεταί ὅ τι καὶ ἄξιον). ὅρος δὲ ἀσφαλείας μὲν τὸ ἐνταῦθα καὶ οὕτω κεκτῆσθαι ὥστ' ἐφ' αὐτῷ εἶναι τὴν χρῆσιν αὐτῶν, τοῦ δὲ οἰκεῖα εἶναι ἢ μὴ ὅταν ἐφ' αὐτῷ ἢ ἀπαλλοτριῶσαι· λέγω δὲ ἀπαλλοτριῶσιν δόσιν καὶ πρᾶσιν. ὅλως δὲ τὸ πλουτεῖν ἐστὶν ἐν τῷ χρῆσθαι μᾶλλον ἢ ἐν τῷ κεκτῆσθαι· καὶ γὰρ ἡ ἐνέργειά ἐστι τῶν τοιούτων καὶ ἡ χρῆσις πλοῦτος.

εὐδοξία δ' ἐστὶν τὸ ὑπὸ πάντων σπουδαῖον ὑπολαμβάνεσθαι ἢ τοιοῦτόν τι ἔχειν οὗ πάντες ἐφίενται ἢ οἱ πολλοὶ ἢ οἱ ἀγαθοὶ ἢ οἱ φρόνιμοι.

τιμὴ δ' ἐστὶν μὲν σημεῖον εὐεργετικῆς εὐδοξίας, τιμῶνται δὲ δικαίως μὲν καὶ μάλιστα οἱ εὐεργετηκότες, οὐ μὴν ἀλλὰ τιμᾶται καὶ ὁ δυνάμενος εὐεργετεῖν· εὐεργεσία δὲ ἢ εἰς σωτηρίαν καὶ ὅσα αἷτια τοῦ εἶναι, ἢ εἰς πλοῦτον, ἢ εἰς τι τῶν ἄλλων ἀγαθῶν, ὧν μὴ ῥαδία ἢ κτῆσις ἢ ὅλως ἢ ἐνταῦθα ἢ τότε· πολλοὶ γὰρ διὰ μικρὰ δοκοῦντα τιμῆς τυγχάνουσιν, ἀλλ' οἱ τόποι καὶ οἱ καιροὶ αἷτιοι. μέρη δὲ τιμῆς θυσίαι, μνημαὶ ἐν μέτροις καὶ ἄνευ μέτρων, γέρα, τεμένη, προεδρίαι, τάφοι, εἰκόνες, τροφαὶ δημόσιαι, τὰ βαρβαρικά, οἷον προσκυνήσεις καὶ ἐκστάσεις, δῶρα τὰ παρ' ἐκάστοις τίμια. καὶ γὰρ τὸ δῶρόν ἐστι κτήματος δόσις καὶ τιμῆς σημεῖον, διὸ καὶ οἱ φιλοχρήματοι καὶ οἱ φιλότιμοι ἐφίενται αὐτῶν· ἀμφοτέροις [1361b] γὰρ ἔχει ὧν δέονται· καὶ γὰρ κτῆμά ἐστιν οὗ ἐφίενται οἱ φιλοχρήματοι, καὶ τιμὴν ἔχει οὗ οἱ φιλότιμοι.

σώματος δὲ ἀρετὴ ὑγίεια, αὕτη δὲ οὕτως ὥστε ἀνόσους εἶναι χρωμένους τοῖς σώμασιν· πολλοὶ γὰρ ὑγιαίνουν, ὥσπερ Ἡρόδικος λέγεται, οὓς οὐδεὶς ἂν εὐδαιμονίσαιε τῆς ὑγείας διὰ τὸ πάντων ἀπέχεσθαι τῶν ἀνθρωπίνων ἢ τῶν πλείστων. κάλλος δὲ ἕτερον καθ' ἐκάστην ἡλικίαν ἐστίν. νέου μὲν οὖν κάλλος τὸ πρὸς τοὺς πόνους χρήσιμον ἔχειν τὸ σῶμα τοὺς τε πρὸς δρόμον καὶ πρὸς βίαν, ἡδὺν ὄντα ἰδεῖν πρὸς ἀπόλαυσιν· διὸ οἱ πένταθλοι κάλλιστοι, ὅτι πρὸς βίαν καὶ πρὸς τάχος ἅμα πεφύκασιν· ἀκμάζοντος δὲ πρὸς μὲν πόνους τοὺς πολεμικοὺς, ἡδὺν δ' εἶναι δοκεῖν μετὰ φοβερότητος· γέροντος δὲ πρὸς μὲν πόνους τοὺς ἀναγκαίους ἱκανόν, ἄλυπον δὲ διὰ τὸ μηδὲν ἔχειν ὣν τὸ γῆρας λωβᾶται. ἰσχύς δ' ἐστὶ μὲν δύναμις τοῦ κινεῖν ἕτερον ὡς βούλεται, ἀνάγκη δὲ κινεῖν ἕτερον ἢ ἔλκοντα ἢ ὠθοῦντα ἢ αἶροντα ἢ πιέζοντα ἢ συνθλίβοντα, ὥστε ὁ ἰσχυρὸς ἢ πᾶσιν ἢ τούτων τισὶν ἐστὶν ἰσχυρὸς. μεγέθους δὲ ἀρετὴ τὸ ὑπάρχειν κατὰ μήκος καὶ βάθος καὶ πλάτος τῶν πολλῶν τοσοῦτῳ μείζον' ὥστε μὴ βραδυτέρας ποιεῖν τὰς κινήσεις διὰ τὴν ὑπερβολήν. ἀγωνιστικὴ δὲ σώματος ἀρετὴ σύγκειται ἐκ μεγέθους καὶ ἰσχύος καὶ τάχους (καὶ γὰρ ὁ ταχὺς ἰσχυρὸς ἐστίν)· ὁ γὰρ δυνάμενος τὰ σκέλη ῥίπτειν πῶς καὶ κινεῖν ταχὺ καὶ πόρρω δρομικός, ὁ δὲ θλίβειν καὶ κατέχειν παλαιστικός, ὁ δὲ ὥσαι τῇ πληγῇ πυκτικός, ὁ δ' ἀμφοτέροις τούτοις παγκρατιαστικός, ὁ δὲ πᾶσι πένταθλος. εὐγηρία δ' ἐστὶ βραδυτῆς γήρωσ μετ' ἄλυπίας· οὔτε γὰρ εἰ ταχὺ γηράσκει, εὐγηρως, οὔτ' εἰ μόγις μὲν λυπηρῶς δέ. ἔστιν δὲ καὶ ἐκ τῶν τοῦ σώματος ἀρετῶν καὶ «ἐκ» τύχης· μὴ ἄνοσος γὰρ ὢν μηδὲ ἰσχυρὸς οὐκ ἔσται ἀπαθὴς οὐδ' ἄλυπος, καὶ πολυχρόνιος οὐκ ἄνευ τύχης διαμείνειεν ἂν. ἔστιν δὲ τις καὶ χωρὶς ἰσχύος καὶ ὑγείας ἄλλη δύναμις μακροβιότητος· πολλοὶ γὰρ ἄνευ τῶν τοῦ σώματος ἀρετῶν μακρόβιοί εἰσιν· ἀλλ' οὐδὲν ἢ ἀκριβολογία χρήσιμος ἢ περὶ τούτων εἰς τὰ νῦν.

πολυφιλία δὲ καὶ χρηστοφιλία οὐκ ἄδηλα, τοῦ φίλου ὀρισμένου, ὅτι ἔστιν ὁ τοιοῦτος φίλος ὅστις ἃ οἶεται ἀγαθὰ εἶναι ἐκείνῳ, πρακτικός ἐστὶν αὐτῶν δι' ἐκείνον. ᾧ δὲ πολλοὶ τοιοῦτοι, πολύφίλος, ᾧ δὲ καὶ ἐπιεικεῖς ἄνδρες, χρηστόφίλος.

εὐτυχία δὲ ἐστίν, ὣν ἡ τύχη ἀγαθῶν αἰτία, ταῦτα [1362a] γίνεσθαι καὶ ὑπάρχειν ἢ πάντα ἢ τὰ πλεῖστα ἢ τὰ μέγιστα. αἰτία δ' ἐστὶν ἡ τύχη ἐνίων μὲν καὶ ὣν αἱ τέχναι, πολλῶν δὲ καὶ ἀτέχνων, οἷον ὅσων ἡ φύσις (ἐνδέχεται δὲ καὶ παρὰ φύσιν εἶναι)· ὑγείας μὲν γὰρ τέχνη αἰτία, κάλλους δὲ καὶ μεγέθους φύσις. ὅλως δὲ τὰ τοιαῦτα

τῶν ἀγαθῶν ἐστὶν ἀπὸ τύχης ἐφ' οἷς ἐστὶν ὁ φθόνος. ἔστιν δὲ καὶ τῶν παρὰ λόγον ἀγαθῶν αἰτία τύχη, οἷον εἰ οἱ ἄλλοι ἀδελφοὶ αἰσχροί, ὁ δὲ καλός, ἢ οἱ ἄλλοι μὴ εἶδον τὸν θησαυρόν, ὁ δ' εὔρεν, ἢ εἰ τοῦ πλησίον ἔτυχεν τὸ βέλος, τούτου δὲ μὴ, ἢ εἰ μὴ ἦλθε μόνος, ἀεὶ φοιτῶν, οἱ δὲ ἅπαξ ἐλθόντες διεφθάρησαν· πάντα γὰρ τὰ τοιαῦτα εὐτυχήματα δοκεῖ εἶναι.

περὶ δὲ ἀρετῆς ἐπέπερ οἰκειότατος ὁ περὶ τοὺς ἐπαίνους τόπος, ὅταν περὶ ἐπαίνου ποιῶμεθα τὸν λόγον, τότε διοριστέον.

Ὡν μὲν οὖν δεῖ στοχάζεσθαι προτρέποντα ὡς ἐσομένων ἢ ὑπαρχόντων, καὶ ὧν ἀποτρέποντα, φανερόν· τὰ γὰρ ἐναντία τούτων ἐστίν. ἐπεὶ δὲ πρόκειται τῷ συμβουλευόντι σκοπὸς τὸ συμφέρον (βουλευόνται γὰρ οὐ περὶ τοῦ τέλους, ἀλλὰ περὶ τῶν πρὸς τὸ τέλος, ταῦτα δ' ἐστὶ τὰ συμφέροντα κατὰ τὰς πράξεις, τὸ δὲ συμφέρον ἀγαθόν), ληπτέον ἂν εἴη τὰ στοιχεῖα περὶ ἀγαθοῦ καὶ συμφέροντος ἀπλῶς.

ἔστω δὴ ἀγαθὸν ὃ ἂν αὐτὸ ἑαυτοῦ ἔνεκα ἢ αἰρετόν, καὶ οὗ ἔνεκα ἄλλο αἰρούμεθα, καὶ οὗ ἐφίεται πάντα, ἢ πάντα τὰ αἰσθησιν ἔχοντα ἢ νοῦν ἢ εἰ λάβοι νοῦν, καὶ ὅσα ὁ νοῦς ἂν ἐκάστω ἀποδοίη, καὶ ὅσα ὁ περὶ ἑκαστον νοῦς ἀποδίδωσιν ἐκάστω· τοῦτό <γάρ> ἐστὶν ἐκάστω ἀγαθόν, καὶ οὗ παρόντος εὖ διάκειται καὶ αὐτάρκως ἔχει, καὶ τὸ αὐταρκες, καὶ τὸ ποιητικὸν ἢ φυλακτικὸν τῶν τοιούτων, καὶ ᾧ ἀκολουθεῖ τὰ τοιαῦτα, καὶ τὰ κωλυτικὰ τῶν ἐναντίων καὶ τὰ φθαρτικά. ἀκολουθεῖ δὲ διχῶς (ἢ γὰρ ἅμα ἢ ὕστερον, οἷον τῷ μὲν μανθάνειν τὸ ἐπίστασθαι ὕστερον, τῷ δὲ ὑγιαίνειν τὸ ζῆν ἅμα), καὶ τὰ ποιητικὰ τριχῶς, τὰ μὲν ὡς τὸ ὑγιαίνειν ὑγιείας, τὰ δὲ ὡς σιτία ὑγιείας, τὰ δὲ ὡς τὸ γυμνάζεσθαι, ὅτι ὡς ἐπὶ τὸ πολὺ ποιεῖ ὑγίειαν. τούτων δὲ κειμένων ἀνάγκη τάς τε λήψεις τῶν ἀγαθῶν ἀγαθὰς εἶναι καὶ τὰς τῶν κακῶν ἀποβολάς· ἀκολουθεῖ γὰρ τῷ μὲν τὸ μὴ ἔχειν τὸ κακὸν ἅμα, τῷ δὲ τὸ ἔχειν τὸ ἀγαθὸν ὕστερον. καὶ ἢ ἀντ' ἐλάττονος ἀγαθοῦ μείζονος λῆψις καὶ ἀντὶ μείζονος κακοῦ ἐλάττονος· [1362b] ᾧ γὰρ ὑπερέχει τὸ μείζον τοῦ ἐλάττονος, τούτῳ γίνεται τοῦ μὲν λῆψις τοῦ δ' ἀποβολή. καὶ τὰς ἀρετὰς δὲ ἀνάγκη ἀγαθὸν εἶναι (κατὰ γὰρ ταύτας εὖ τε διάκεινται οἱ ἔχοντες, καὶ ποιητικαὶ τῶν ἀγαθῶν εἰσι καὶ πρακτικά· περὶ ἐκάστης δὲ καὶ τίς καὶ ποία χωρὶς ῥητέον), καὶ τὴν ἡδονὴν ἀγαθὸν εἶναι· πάντα γὰρ ἐφίεται τὰ ζῶα αὐτῆς τῇ φύσει· ὥστε καὶ τὰ ἡδέα καὶ τὰ καλὰ ἀνάγκη ἀγαθὰ εἶναι· τὰ μὲν γὰρ ἡδονῆς ποιητικά, τῶν δὲ καλῶν τὰ μὲν ἡδέα τὰ δὲ αὐτὰ καθ' ἑαυτὰ

αίρετά ἐστιν.

ὥς δὲ καθ' ἓν εἰπεῖν, ἀνάγκη ἀγαθὰ εἶναι τάδε. εὐδαιμονία· καὶ γὰρ καθ' αὐτὸ αἰρετὸν καὶ αὐταρκες, καὶ ἔνεκα αὐτῆς τᾶλλα αἰρούμεθα. δικαιοσύνη, ἀνδρεία, σωφροσύνη, μεγαλοψυχία, μεγαλοπρέπεια, καὶ αἱ ἄλλαι αἱ τοιαῦται ἕξεις· ἀρεταὶ γὰρ ψυχῆς. καὶ ὑγίεια καὶ κάλλος καὶ τὰ τοιαῦτα· ἀρεταὶ γὰρ σώματος καὶ ποιητικὰ πολλῶν, οἷον ὑγίεια καὶ ἡδονῆς καὶ τοῦ ζῆν, διὸ καὶ ἄριστον δοκεῖ εἶναι, ὅτι δύο τῶν τοῖς πολλοῖς τιμιωτάτων αἰτιόν ἐστιν, ἡδονῆς καὶ τοῦ ζῆν. πλοῦτος· ἀρετὴ γὰρ κτήσεως καὶ ποιητικὸν πολλῶν. φίλος καὶ φιλία· καὶ γὰρ καθ' αὐτὸν αἰρετὸς ὁ φίλος καὶ ποιητικὸς πολλῶν. τιμὴ, δόξα· καὶ γὰρ ἡδέα καὶ ποιητικὰ πολλῶν, καὶ ἀκολουθεῖ αὐταῖς ὥς ἐπὶ τὸ πολὺ τὸ ὑπάρχειν ἐφ' οἷς τιμῶνται. δύναμις τοῦ λέγειν, τοῦ πράττειν· ποιητικὰ γὰρ πάντα τὰ τοιαῦτα ἀγαθῶν. ἔτι εὐφυΐα, μνήμη, εὐμάθεια, ἀγχίνωια, πάντα τὰ τοιαῦτα· ποιητικά γὰρ αὐταὶ ἀγαθῶν αἱ δυνάμεις εἰσίν. ὁμοίως δὲ καὶ αἱ ἐπιστῆμαι πᾶσαι καὶ αἱ τέχναι. καὶ τὸ ζῆν· εἰ γὰρ μηδὲν ἄλλο ἔποιτο ἀγαθόν, καθ' αὐτὸ αἰρετόν ἐστιν. καὶ τὸ δίκαιον· συμφέρον γάρ τι κοινῇ ἐστιν.

ταῦτα μὲν οὖν σχεδὸν τὰ ὁμολογούμενα ἀγαθὰ ἐστιν· ἐν δὲ τοῖς ἀμφισβητησίμοις ἐκ τῶνδε οἱ συλλογισμοί. ὅ τὸ ἐναντίον κακόν, τοῦτ' ἀγαθόν. καὶ οὗ τὸ ἐναντίον τοῖς ἐχθροῖς συμφέρει· οἷον εἰ τὸ δειλοὺς εἶναι μάλιστα συμφέρει τοῖς ἐχθροῖς, δηλὸν ὅτι ἀνδρεία μάλιστα ὠφέλιμον τοῖς πολίταις. καὶ ὅλως ὁ οἱ ἐχθροὶ βούλονται ἢ ἐφ' ᾧ χαίρουσι, τούναντίον τούτου ὠφέλιμον φαίνεται· διὸ εἴρηται ἢ κεν γηθῆσαι Πρίαμος.

ἔστι δ' οὐκ ἀεὶ τοῦτο, ἀλλ' ὥς ἐπὶ τὸ πολὺ· οὐδὲν γὰρ κωλύει ἐνίστε ταῦτο συμφέρειν τοῖς ἐναντίοις· ὅθεν λέγεται ὥς τὰ [1363a] κακὰ συνάγει τοὺς ἀνθρώπους, ὅταν ἢ ταῦτο βλαβερὸν ἀμφοῖν. καὶ οὗ μὴ ἔστιν ὑπερβολή, τοῦτο ἀγαθόν, ὃ δ' ἂν ἢ μείζον ἢ δεῖ, κακόν. καὶ οὗ ἔνεκα πολλὰ πεπόνηται ἢ δεδαπάνηται· φαινόμενον γὰρ ἀγαθὸν ἦδη, καὶ ὥς τέλος τὸ τοιοῦτον ὑπολαμβάνεται, καὶ τέλος πολλῶν, τὸ δὲ τέλος ἀγαθόν. ὅθεν ταῦτ' εἴρηται “καὶ δὲ κεν εὐχολὴν Πρίαμῳ” καὶ “αἰσχρόν τοι δηρόν τε μένειν”. καὶ ἡ παροιμία δὲ τὸ ἐπὶ θύραις τὴν ὑδρίαν. καὶ οὗ <οἱ> πολλοὶ ἐφίενται, καὶ τὸ περιμάχητον φαινόμενον· οὗ γὰρ πάντες ἐφίενται, τοῦτο ἀγαθὸν ἦν, οἱ δὲ πολλοὶ ὥσπερ πάντες φαίνονται. καὶ τὸ ἐπαινετόν· οὐδεὶς γὰρ τὸ μὴ ἀγαθὸν ἐπαινεῖ. καὶ ὁ οἱ ἐχθροὶ καὶ οἱ φαῦλοι ἐπαινοῦσιν· ὥσπερ γὰρ πάντες ἦδη ὁμολογοῦσιν, εἰ καὶ οἱ κακῶς πεπονθότες· διὰ γὰρ τὸ φανερόν

ὁμολογοῖεν ἄν, ὥσπερ καὶ φαῦλοι οὓς οἱ φίλοι ψέγουσι καὶ [ἀγαθοὶ] οὓς οἱ ἐχθροὶ μὴ ψέγουσιν (διὸ λελοιδωρῆσθαι ὑπέλαβον Κορίνθιοι ὑπὸ Σιμωνίδου ποιήσαντος

Κορινθίοις δ' οὐ μέμφεται τὸ Ἰλιον).

καὶ ὁ τῶν φρονίμων τις ἢ τῶν ἀγαθῶν ἀνδρῶν ἢ γυναικῶν προέκρινεν, οἷον Ὀδυσσεύα Ἀθηνᾶ καὶ Ἑλένην Θησεὺς καὶ Ἀλέξανδρον αἱ θεαὶ καὶ Ἀχιλλεὺς Ὅμηρος. καὶ ὅλως τὰ προαιρετὰ· προαιροῦνται δὲ πράττειν τὰ τε εἰρημένα καὶ τὰ τοῖς ἐχθροῖς κακὰ καὶ τὰ τοῖς φίλοις ἀγαθὰ καὶ τὰ δυνατὰ· ταῦτα δὲ διχῶς ἐστίν, τὰ τε γενόμενα ἂν καὶ τὰ ῥαδίως γιγνόμενα· ῥάδια δὲ ὅσα ἢ ἄνευ λύπης ἢ ἐν ὀλίγῳ χρόνῳ· τὸ γὰρ χαλεπὸν ὀρίζεται ἢ λύπη ἢ πλήθει χρόνου. καὶ ἐὰν ὡς βούλονται· βούλονται δὲ ἢ μηδὲν κακὸν ἢ ἔλαττον τοῦ ἀγαθοῦ (τοῦτο δὲ ἔσται, ἐὰν ἢ λανθάνῃ ἢ ἡ τιμωρία μικρὰ ᾖ). καὶ τὰ ἴδια, καὶ ἃ μηδεῖς, καὶ τὰ περιττά· τιμὴ γὰρ οὕτω μᾶλλον. καὶ τὰ ἀρμόττοντα αὐτοῖς· τοιαῦτα δὲ τὰ τε προσήκοντα κατὰ γένος καὶ δύναμιν, καὶ ὧν ἐλλείπειν οἶονται καὶ ἂν μικρὰ ᾖ· οὐδὲν γὰρ ἥττον προαιροῦνται ταῦτα πράττειν. καὶ τὰ εὐκατέργαστα. δυνατὰ γὰρ καὶ ῥάδια· εὐκατέργαστα δὲ ἃ πάντες ἢ οἱ πολλοὶ ἢ οἱ ὅμοιοι ἢ οἱ ἥττους κατάρθωσαν. καὶ ἃ χαριοῦνται τοῖς φίλοις, ἢ ἃ ἀπεχθήσονται τοῖς ἐχθροῖς. καὶ ὅσα οὓς θαυμάζουσιν προαιροῦνται πράττειν. καὶ πρὸς ἃ εὐφυεῖς εἰσιν καὶ ἔμπειροι· ῥᾶον γὰρ κατορθώσουσιν οἶονται. καὶ ἃ μηδεῖς φαῦλος· ἐπαινετὰ γὰρ μᾶλλον. καὶ ὧν ἐπιθυμοῦντες τυγχάνουσιν, οὐ γὰρ μόνον ἡδὺ ἀλλὰ καὶ βέλτιον φαίνεται. καὶ μάλιστα [1363b] ἕκαστοι πρὸς ἃ φιλοτοιοῦνται, οἷον οἱ φιλόνικοι εἰ νίκη ἔσται, οἱ φιλότιμοι εἰ τιμὴ, οἱ φιλοχρήματοι εἰ χρήματα, καὶ οἱ ἄλλοι ὡσαύτως. περὶ μὲν οὖν ἀγαθοῦ καὶ τοῦ συμφέροντος ἐκ τούτων ληπτέον τὰς πίστεις.

Ἐπεὶ δὲ πολλάκις ὁμολογοῦντες ἄμφω συμφέρειν περὶ τοῦ μᾶλλον ἀμφισβητοῦσιν, ἐφεξῆς ἂν εἴη λεκτέον περὶ τοῦ μεΐζονος ἀγαθοῦ καὶ τοῦ μᾶλλον συμφέροντος. ἔστω δὴ ὑπερέχον μὲν τὸ τοσοῦτον καὶ ἔτι, ὑπερεχόμενον δὲ τὸ ἐνυπάρχον, καὶ μεΐζον μὲν αἰεὶ καὶ πλεῖον πρὸς ἔλαττον, μέγα δὲ καὶ μικρὸν καὶ πολὺ καὶ ὀλίγον πρὸς τὸ τῶν πολλῶν μέγεθος, καὶ ὑπερέχον μὲν τὸ μέγα, τὸ δὲ μικρὸν ἐλλείπον, καὶ πολὺ καὶ ὀλίγον ὡσαύτως.

ἐπεὶ οὖν ἀγαθὸν λέγομεν τό τε αὐτὸ αὐτοῦ ἕνεκα καὶ μὴ ἄλλου αἰρετόν, καὶ οὗ πάντ' ἐφίεται, καὶ ὁ νοῦν ἂν καὶ φρόνησιν λαβόντα ἔλοιτο, καὶ τὸ ποιητικὸν καὶ τὸ φυλακτικόν, ἢ ᾧ ἔπεται τὰ τοιαῦτα,

[τὸ δ' οὐ ἔνεκα τὸ τέλος ἐστίν,] τέλος δέ ἐστιν οὐ ἔνεκα τὰ ἄλλα, αὐτῷ δὲ ἀγαθὸν τὸ πρὸς αὐτὸν ταῦτα πεπονθός, ἀνάγκη τὰ γε πλείω τοῦ ἐνὸς καὶ τῶν ἐλαττόνων, συναριθμουμένου τοῦ ἐνὸς ἢ τῶν ἐλαττόνων, μείζον ἀγαθὸν εἶναι· ὑπερέχει γάρ, τὸ δὲ ἐνυπάρχον ὑπερέχεται. καὶ ἐὰν τὸ μέγιστον τοῦ μεγίστου ὑπερέχη, καὶ αὐτὰ αὐτῶν· καὶ ὅσα αὐτὰ αὐτῶν, καὶ τὸ μέγιστον τοῦ μεγίστου· οἷον εἰ ὁ μέγιστος ἀνὴρ γυναικὸς τῆς μεγίστης μείζων, καὶ ὅλως οἱ ἄνδρες τῶν γυναικῶν μείζους, καὶ εἰ οἱ ἄνδρες ὅλως τῶν γυναικῶν μείζους, καὶ ἀνὴρ ὁ μέγιστος τῆς μεγίστης γυναικὸς μείζων· ἀνάλογον γὰρ ἔχουσιν αἱ ὑπεροχαὶ τῶν γενῶν καὶ τῶν μεγίστων ἐν αὐτοῖς, καὶ ὅταν τόδε μὲν τῷδε ἔπῃται, ἐκεῖνο δὲ τούτῳ μὴ, ἔπῃται δὲ ἢ τῷ ἅμα ἢ τῷ ἐφεξῆς ἢ τῇ δυνάμει· ἐνυπάρχει γὰρ ἢ χρησὶς ἢ τοῦ ἐπομένου ἐν τῇ θατέρου. ἔπεται δὲ ἅμα μὲν τῷ ὑγιαίνειν τὸ ζῆν, τούτῳ δὲ ἐκεῖνο οὐ, ὕστερον δὲ τῷ μανθάνειν τὸ ἐπίστασθαι, δυνάμει δὲ τῷ ἱεροσυλεῖν τὸ ἀποστερεῖν· ὁ γὰρ ἱεροσυλήσας κἂν ἀποστερήσειεν. καὶ τὰ ὑπερέχοντα τοῦ αὐτοῦ μείζονι μείζω· ἀνάγκη γὰρ ὑπερέχειν καὶ τοῦ μείονι. καὶ τὰ μείζονος ἀγαθοῦ ποιητικὰ μείζω· τοῦτο γὰρ ἦν τὸ μείζονος ποιητικῷ εἶναι. καὶ οὐ τὸ ποιητικὸν μείζον, ὡσαύτως· εἰ γὰρ τὸ ὑγιεινὸν αἰρετώτερον τοῦ ἡδέος καὶ μείζον ἀγαθόν, καὶ ἡ ὑγίεια τῆς ἡδονῆς μείζων. καὶ [1364a] αἰρετώτερον τὸ καθ' αὐτὸ τοῦ μὴ καθ' αὐτό, οἷον ἰσχὺς ὑγιεινοῦ· τὸ μὲν γὰρ οὐχ αὐτοῦ ἔνεκα, τὸ δὲ αὐτοῦ, ὅπερ ἦν τὸ ἀγαθόν. κἂν ἢ τὸ μὲν τέλος, τὸ δὲ μὴ τέλος· τὸ μὲν γὰρ ἄλλου ἔνεκα, τὸ δὲ αὐτοῦ, οἷον τὸ γυμνάζεσθαι τοῦ εὖ ἔχειν τὸ σῶμα. καὶ τὸ ἥττον προσδεόμενον θατέρου [ἢ] ἐτέρων· αὐταρκέστερον γάρ· ἥττον δὲ προσδεῖται τὸ ἐλαττόνων ἢ ραόνων προσδεόμενον. καὶ ὅταν τόδε μὲν ἄνευ τοῦδε μὴ ἦ, ἢ μὴ δυνατόν ἢ γενέσθαι, θάτερον δὲ ἄνευ τούτου, αὐταρκέστερον [δὲ] τὸ μὴ δεόμενον, ὥστε φαίνεται μείζον ἀγαθόν. κἂν ἢ ἀρχή, τὸ δὲ μὴ ἀρχή, κἂν ἢ αἴτιον, τὸ δ' οὐκ αἴτιον, διὰ τὸ αὐτό· ἄνευ γὰρ αἰτίου καὶ ἀρχῆς ἀδύνατον εἶναι ἢ γενέσθαι. καὶ δυοῖν ἀρχαῖν τὸ ἀπὸ τῆς μείζονος ἀρχῆς μείζον, καὶ δυοῖν αἰτίοιν τὸ ἀπὸ τοῦ μείζονος αἰτίου μείζον. καὶ ἀνάπαλιν δὲ δυοῖν ἀρχαῖν ἢ τοῦ μείζονος ἀρχή μείζων, καὶ δυοῖν αἰτίοιν τὸ τοῦ μείζονος αἴτιον μείζον. δηλὸν οὖν ἐκ τῶν εἰρημένων ὅτι ἀμφοτέρως μείζον ἔστιν φαίνεσθαι· καὶ γὰρ εἰ ἀρχή, τὸ δὲ μὴ ἀρχή, δόξει μείζον εἶναι, καὶ εἰ μὴ ἀρχή, τὸ δὲ ἀρχή· τὸ γὰρ τέλος μείζον καὶ οὐχ ἢ ἀρχή, ὥσπερ ὁ Λεωδάμας κατηγορῶν ἔφη Καλλιστράτου τὸν βουλευσάντα τοῦ πράξαντος μᾶλλον ἀδικεῖν· οὐ

γὰρ ἂν πραχθῆναι μὴ βουλευσάντος· πάλιν δὲ καὶ Χαβρίου, τὸν πράξαντα τοῦ βουλευσάντος· οὐ γὰρ ἂν γενέσθαι, εἰ μὴ ἦν ὁ πράζων· τούτου γὰρ ἔνεκα ἐπιβουλεύειν, ὅπως πράξωσιν. καὶ τὸ σπανιώτερον τοῦ ἀφθόνου, οἷον χρυσὸς σιδήρου, ἀχρηστότερος ὢν· μείζον γὰρ ἢ κτήσις διὰ τὸ χαλεπωτέρα εἶναι. (ἄλλον δὲ τρόπον τὸ ἀφθονον τοῦ σπανίου, ὅτι ἡ χρῆσις ὑπερέχει· τὸ γὰρ πολλάκις τοῦ ὀλιγάκις ὑπερέχει, ὅθεν λέγεται

ἄριστον μὲν ὕδωρ.)

καὶ ὅλως τὸ χαλεπωτέρον τοῦ ῥάονος· σπανιώτερον γάρ. ἄλλον δὲ τρόπον τὸ ῥῶν τοῦ χαλεπωτέρου· ἔχει γὰρ ὡς βουλόμεθα. καὶ ὃ τὸ ἐναντίον μείζον, καὶ οὗ ἡ στέρησις μείζων. καὶ ἀρετὴ μὴ κακίας καὶ κακία μὴ ἀρετῆς μείζων· τὰ μὲν γὰρ τέλη, τὰ δ' οὐ τέλη. καὶ ὧν τὰ ἔργα καλλίω ἢ αἰσχίω, μείζω αὐτά, καὶ ὧν αἱ κακίαι καὶ αἱ ἀρεταὶ μείζους, καὶ τὰ ἔργα μείζω, ἐπεὶ περ ὡς τὰ αἷτια καὶ αἱ ἀρχαί, καὶ τὰ ἀποβαίνοντα, καὶ ὡς τὰ ἀποβαίνοντα, καὶ τὰ αἷτια καὶ αἱ ἀρχαί. καὶ ὧν ἡ ὑπεροχὴ αἰρετωτέρα ἢ καλλίων, οἷον τὸ ἀκριβῶς ὁρᾶν αἰρετώτερον τοῦ ὁσφραίνεσθαι (καὶ γὰρ ὅψις [1364b] ὁσφρήσεως), καὶ τὸ φιλειταιρώτερον εἶναι τοῦ φιλοχρηματώτερον [μᾶλλον] κάλλιον, ὥστε καὶ φιλειταιρία φιλοχρηματίας. καὶ ἀντικειμένως δὲ τῶν βελτιόνων αἱ ὑπερβολαὶ βελτίους καὶ <αἱ> καλλιόνων καλλίους. καὶ ὧν αἱ ἐπιθυμίαι καλλίους ἢ βελτίους· αἱ γὰρ μείζους ὁρέξεις μειζόνων εἰσίν. καὶ τῶν καλλιόνων δὲ ἢ βελτιόνων αἱ ἐπιθυμίαι βελτίους καὶ καλλίους διὰ τὸ αὐτό. καὶ ὧν αἱ ἐπιστήμαι καλλίους ἢ σπουδαιότεραι, καὶ τὰ πράγματα καλλίω καὶ σπουδαιότερα· ὡς γὰρ ἔχει ἡ ἐπιστήμη, καὶ τὸ ἀληθές· κελεύει δὲ τὸ αὐτῆς ἐκάστη. καὶ τῶν σπουδαιωτέρων δὲ καὶ καλλιόνων αἱ ἐπιστήμαι ἀνάλογον διὰ τὸ αὐτό. καὶ ὁ κρίνειαν ἂν ἢ κεκρίκασιν οἱ φρόνιμοι ἢ πάντες ἢ οἱ πολλοὶ ἢ οἱ πλείους ἢ οἱ κράτιστοι ἀγαθὸν μείζον, ἀνάγκη οὕτως ἔχειν, ἢ ἀπλῶς ἢ ἢ κατὰ τὴν φρόνησιν ἐκριναν. ἔστι δὲ τοῦτο κοινὸν καὶ κατὰ τῶν ἄλλων· καὶ γὰρ τί καὶ ποσὸν καὶ ποιὸν οὕτως ἔχει ὡς ἂν ἡ ἐπιστήμη καὶ ἡ φρόνησις εἴποι. ἀλλ' ἐπ' ἀγαθῶν εἰρήκαμεν· ὥριςται γὰρ ἀγαθὸν εἶναι ὁ λαβὼν [τὰ πράγματα] φρόνησιν ἔλοιτ' ἂν ἕκαστον· δηλὸν οὖν ὅτι καὶ μείζον ὁ μᾶλλον ἢ φρόνησις λέγει. καὶ τὸ τοῖς βελτίοισιν ὑπάρχον, ἢ ἀπλῶς ἢ ἢ βελτίους, οἷον ἡ ἀνδρεία ἰσχύος. καὶ ὁ ἔλοιτ' ἂν ὁ βελτίων, ἢ ἀπλῶς ἢ ἢ βελτίων, οἷον τὸ ἀδικεῖσθαι μᾶλλον ἢ ἀδικεῖν· τοῦτο γὰρ ὁ δικαιοτέρος ἂν ἔλοιτο. καὶ τὸ ἥδιον τοῦ ἡττον ἡδέος· τὴν γὰρ ἡδονὴν πάντα διώκει, καὶ αὐτοῦ

καὶ τὰ πολυχρονιώτερα τῶν ὀλιγοχρονιωτέρων καὶ τὰ βεβαιότερα τῶν ἀβεβαιοτέρων· ὑπερέχει γὰρ ἡ χρῆσις τῶν μὲν τῷ χρόνῳ τῶν δὲ τῇ βουλήσει· ὅταν γὰρ βούλονται, ὑπάρχει μᾶλλον ἢ τοῦ βεβαίου. καὶ ὡς ἂν ἐν τῶν συστοίχων καὶ τῶν ὁμοίων πτώσεων, καὶ τᾶλλ' ἀκολουθεῖ, οἷον εἰ τὸ ἀνδρείως κάλλιον καὶ αἰρετώτερον τοῦ σωφρόνως, καὶ ἀνδρεία σωφροσύνης αἰρετωτέρα καὶ τὸ ἀνδρεῖον εἶναι τοῦ σωφρονεῖν. καὶ ὁ πάντες αἰροῦνται τοῦ μὴ ὁ πάντες. καὶ ὁ οἱ πλείους ἢ ὁ οἱ ἐλάττους· [1365a] ἀγαθὸν γὰρ ἦν οὗ πάντες ἐφίενται, ὥστε καὶ μείζον οὗ μᾶλλον. καὶ ὁ οἱ ἀμφισβητοῦντες ἢ οἱ ἐχθροί, ἢ οἱ κρίνοντες ἢ οὓς οὗτοι κρίνουσιν· τὸ μὲν γὰρ ὡς ἂν εἰ πάντες φαίεν ἐστί, τὸ δὲ οἱ κύριοι καὶ οἱ εἰδότες. καὶ ὅτε μὲν οὗ πάντες μετέχουσι μείζον· ἀτιμία γὰρ τὸ μὴ μετέχειν· ὅτε δὲ οὗ μηδεὶς ἢ οὗ ὀλίγοι· σπανιώτερον γάρ. καὶ τὰ ἐπαινετώτερα· καλλίῳ γάρ. καὶ ὧν αἱ τιμαὶ μείζους, ὡσαύτως· ἢ γὰρ τιμὴ ὥσπερ ἀξία τίς ἐστίν. καὶ ὧν αἱ ζημίαι μείζους. καὶ τὰ τῶν ὁμολογουμένων ἢ φαινομένων μεγάλων μείζω. καὶ διαιρούμενα δὲ εἰς τὰ μέρη τὰ αὐτὰ μείζω φαίνεται. πλεῖον γὰρ ὑπερέχειν φαίνεται, ὅθεν καὶ ὁ ποιητὴς φησι πεῖσαι τὸν Μελέαγρον ἀναστῆναι

καὶ ὁ Ἰφικράτης αὐτὸν ἐνεκωμίαζε λέγων ἐξ ὧν ὑπῆρξεν ταῦτα.

καὶ τὸ αὐτοφυὲς τοῦ ἐπικτήτου· χαλεπώτερον γάρ. ὅθεν καὶ ὁ ποιητὴς φησιν “αὐτοδίδακτος δ’ εἰμί.” καὶ τὸ μεγάλου μέγιστον μέρος, οἷον Περικλῆς τὸν ἐπιτάφιον λέγων, τὴν νεότητα ἐκ τῆς πόλεως ἀνηρῆσθαι ὥσπερ τὸ ἔαρ ἐκ τοῦ ἐνιαυτοῦ εἰ ἐξαιρεθείη. καὶ τὰ ἐν χρεῖα μεῖζονι χρήσιμα, οἷον τὰ ἐν γῆρα καὶ νόσοις. καὶ δυοῖν τὸ ἐγγύτερον τοῦ τέλους. καὶ τὸ αὐτῷ τοῦ ἀπλῶς. καὶ τὸ δυνατόν τοῦ ἀδυνάτου· τὸ μὲν γὰρ αὐτῷ, τὸ δ’ οὐ. καὶ τὰ ἐν τέλει τοῦ βίου· τέλη γὰρ μᾶλλον τὰ πρὸς τῷ τέλει. καὶ [1365b] τὰ πρὸς ἀλήθειαν τῶν πρὸς δόξαν· ὅρος δὲ τοῦ πρὸς δόξαν, ὃ λανθάνειν μέλλων οὐκ ἂν ἔλοιτο· διὸ καὶ τὸ εὖ πάσχειν τοῦ εὖ ποιεῖν δόξειεν ἂν αἰρετώτερον εἶναι· τὸ μὲν γὰρ κἂν λανθάνῃ αἰρήσεται, ποιεῖν δ’ εὖ λανθάνων οὐ δοκεῖ ἂν ἐλέσθαι. καὶ ὅσα εἶναι μᾶλλον ἢ δοκεῖν βούλονται· πρὸς ἀλήθειαν γὰρ μᾶλλον· διὸ καὶ τὴν δικαιοσύνην φασὶ μικρὸν εἶναι, ὅτι δοκεῖν ἢ εἶναι αἰρετώτερον· τὸ δὲ ὑγιαίνειν οὐ. καὶ τὸ πρὸς πολλὰ χρησιμώτερον, οἷον τὸ πρὸς τὸ ζῆν καὶ εὖ ζῆν καὶ τὴν ἡδονὴν καὶ τὸ πράττειν τὰ καλὰ· διὸ ὁ πλοῦτος καὶ ἡ ὑγίεια μέγιστα δοκεῖ εἶναι· ἅπαντα γὰρ ἔχει ταῦτα. καὶ τὸ ἀλυπότερον καὶ μεθ’ ἡδονῆς· πλείω γὰρ ἐνός, ὅτι ὑπάρχει καὶ ἡ ἡδονὴ [ἀγαθὸν] καὶ ἡ ἀλυπία. καὶ δυοῖν ὁ τῷ αὐτῷ προστιθέμενον μεῖζον τὸ ὅλον ποιεῖ. καὶ ἃ μὴ λανθάνει παρόντα ἢ ἃ λανθάνει· πρὸς ἀλήθειαν γὰρ τείνει ταῦτα· διὸ τὸ πλουτεῖν φανείη ἂν μεῖζον ἀγαθὸν τοῦ δοκεῖν. καὶ τὸ ἀγαπητόν, καὶ τοῖς μὲν μόνον <ὄν> τοῖς δὲ μετ’ ἄλλων· διὸ καὶ οὐκ ἴση ζημία, ἂν τις τὸν ἑτερόφθαλμον τυφλώσῃ καὶ τὸν δὴ ἔχοντα· ἀγαπητὸν γὰρ ἀφήρηται. ἐκ τίνων μὲν οὖν δεῖ τὰς πίστεις φέρειν ἐν τῷ προτρέπειν καὶ ἀποτρέπειν, σχεδὸν εἴρηται.

Μέγιστον δὲ καὶ κυριώτατον πάντων πρὸς τὸ δύνασθαι πείθειν καὶ καλῶς συμβουλεύειν <τὸ> τὰς πολιτείας ἀπάσας λαβεῖν καὶ τὰ ἐκάστης ἦθῃ καὶ νόμιμα καὶ συμφέροντα διελεῖν. πείθονται γὰρ ἅπαντες τῷ συμφέροντι, συμφέρει δὲ τὸ σῶζον τὴν πολιτείαν. ἔτι δὲ κυρία μὲν ἐστὶν ἡ τοῦ κυρίου ἀπόφανσις, τὰ δὲ κύρια διήρηται κατὰ τὰς πολιτείας· ὅσαι γὰρ αἱ πολιτεῖαι, τοσαῦτα καὶ τὰ κύρια ἐστίν. εἰσὶν δὲ πολιτεῖαι τέτταρες, δημοκρατία, ὀλιγαρχία, ἀριστοκρατία, μοναρχία, ὥστε τὸ μὲν κύριον καὶ τὸ κρῖνον τούτων τι ἂν εἴη μόνιον ἢ ὅλον τούτων.

ἔστιν δὲ δημοκρατία μὲν πολιτεία ἐν ἣ κλήρῳ διανέμονται τὰς ἀρχάς, ὀλιγαρχία δὲ ἐν ἣ οἱ ἀπὸ τιμημάτων, ἀριστοκρατία δὲ ἐν ἣ κατὰ τὴν παιδείαν· παιδείαν δὲ λέγω τὴν ὑπὸ τοῦ νόμου κειμένην. οἱ

γὰρ ἐμμεμενηκότες ἐν τοῖς νομίμοις ἐν τῇ ἀριστοκρατίᾳ ἄρχουσιν. ἀνάγκη δὲ τούτους φαίνεσθαι ἀρίστους, ὅθεν καὶ τοῦνομα εἴληφεν τοῦτο. μοναρχία δ' ἐστὶν κατὰ [1366a] τοῦνομα ἐν ἣ εἷς ἀπάντων κύριός ἐστιν· τούτων δὲ ἡ μὲν κατὰ τάξιν τινὰ βασιλεία, ἡ δ' ἀόριστος τυραννίς. τὸ δὴ τέλος ἐκάστης πολιτείας οὐ δεῖ λανθάνειν· αἰροῦνται γὰρ τὰ πρὸς τὸ τέλος. ἔστι δὲ δημοκρατίας μὲν τέλος ἐλευθερία, ὀλιγαρχίας δὲ πλοῦτος, ἀριστοκρατίας δὲ τὰ περὶ παιδείαν καὶ τὰ νόμιμα, τυραννίδος δὲ φυλακή. δῆλον οὖν ὅτι τὰ πρὸς τὸ τέλος ἐκάστης ἦθη καὶ νόμιμα καὶ συμφέροντα διαιρετέον, εἴπερ αἰροῦνται πρὸς τοῦτο ἐπαναφέροντες. ἐπεὶ δὲ οὐ μόνον αἱ πίστεις γίνονται δι' ἀποδεικτικοῦ λόγου, ἀλλὰ καὶ δι' ἠθικοῦ (τῷ γὰρ ποιόν τινα φαίνεσθαι τὸν λέγοντα πιστεύομεν, τοῦτο δ' ἐστὶν ἂν ἀγαθὸς φαίνεται ἢ εὖνους ἢ ἄμφω), δεοί ἂν τὰ ἦθη τῶν πολιτειῶν ἐκάστης ἔχειν ἡμᾶς· τὸ μὲν γὰρ ἐκάστης ἦθος πιθανώτατον ἀνάγκη πρὸς ἐκάστην εἶναι. ταῦτα δὲ ληφθήσεται διὰ τῶν αὐτῶν· τὰ μὲν γὰρ ἦθη φανερά κατὰ τὴν προαίρεσιν, ἡ δὲ προαίρεσις ἀναφέρεται πρὸς τὸ τέλος.

ὣν μὲν οὖν δεῖ ὀρέγεσθαι προτρέποντας ὡς ἐσομένων ἢ ὄντων, καὶ ἐκ τίνων δεῖ τὰς περὶ τοῦ συμφέροντος πίστεις λαμβάνειν, ἔτι δὲ τῶν περὶ τὰς πολιτείας ἡθῶν καὶ νομίμων διὰ τίνων τε καὶ πῶς εὐπορήσομεν, ἐφ' ὅσον ἦν τῷ παρόντι καιρῷ σύμμετρον, εἴρηται· διηκριβῶται γὰρ ἐν τοῖς Πολιτικοῖς περὶ τούτων.

μετὰ δὲ ταῦτα λέγωμεν περὶ ἀρετῆς καὶ κακίας καὶ καλοῦ καὶ αἰσχροῦ· οὗτοι γὰρ σκοποὶ τῷ ἐπαινοῦντι καὶ ψέγοντι· συμβήσεται γὰρ ἅμα περὶ τούτων λέγοντας κάκεῖνα δηλοῦν ἐξ ὧν ποιοὶ τινες ὑποληφθησόμεθα κατὰ τὸ ἦθος, ἥπερ ἦν δευτέρα πίστις· ἐκ τῶν αὐτῶν γὰρ ἡμᾶς τε καὶ ἄλλον ἀξιόπιστον δυνησόμεθα ποιεῖν πρὸς ἀρετὴν. ἐπεὶ δὲ συμβαίνει καὶ χωρὶς σπουδῆς καὶ μετὰ σπουδῆς ἐπαινεῖν πολλάκις οὐ μόνον ἄνθρωπον ἢ θεὸν ἀλλὰ καὶ ἄψυχα καὶ τῶν ἄλλων ζώων τὸ τυχόν, τὸν αὐτὸν τρόπον καὶ περὶ τούτων ληπτέον τὰς προτάσεις, ὥστε ὅσον παραδείγματος χάριν εἴπωμεν καὶ περὶ τούτων.

καλὸν μὲν οὖν ἐστὶν ὃ ἂν δι' αὐτὸ αἰρετὸν ὃν ἐπαινετὸν ἦ, ἢ ὃ ἂν ἀγαθὸν ὃν ἡδὺ ἦ, ὅτι ἀγαθόν· εἰ δὲ τοῦτό ἐστι τὸ καλόν, ἀνάγκη τὴν ἀρετὴν καλὸν εἶναι· ἀγαθὸν γὰρ ὃν ἐπαινετὸν ἐστὶν. ἀρετὴ δ' ἐστὶ μὲν δύναμις ὡς δοκεῖ ποριστικὴ ἀγαθῶν καὶ φυλακτικὴ, καὶ δύναμις εὐεργετικὴ πολλῶν καὶ μεγάλων, καὶ πάντων [1366b] περὶ

πάντα· μέρη δὲ ἀρετῆς δικαιοσύνη, ἀνδρεία, σωφροσύνη, μεγαλοπρέπεια, μεγαλοψυχία, ἐλευθεριότης, φρόνησις, σοφία. ἀνάγκη δὲ μεγίστας εἶναι ἀρετὰς τὰς τοῖς ἄλλοις χρησιμωτάτας, εἴπερ ἐστὶν ἡ ἀρετὴ δύναμις εὐεργετική, «καὶ» διὰ τοῦτο τοὺς δικαίους καὶ ἀνδρείους μάλιστα τιμῶσιν· ἡ μὲν γὰρ ἐν πολέμῳ, ἡ δὲ καὶ ἐν πολέμῳ καὶ ἐν εἰρήνῃ χρήσιμος ἄλλοις. εἴτα ἐλευθεριότης· προΐενται γὰρ καὶ οὐκ ἀνταγωνίζονται περὶ τῶν χρημάτων, ὧν μάλιστα ἐφίενται ἄλλοι. ἔστι δὲ δικαιοσύνη μὲν ἀρετὴ δι' ἣν τὰ αὐτῶν ἕκαστοι ἔχουσι, καὶ ὡς ὁ νόμος· ἀδικία δὲ δι' ἣν τὰ ἀλλότρια, οὐχ ὡς ὁ νόμος. ἀνδρεία δὲ δι' ἣν πρακτικοὶ εἰσι τῶν καλῶν ἔργων ἐν τοῖς κινδύνοις, καὶ ὡς ὁ νόμος κελεύει, καὶ ὑπηρετικοὶ τῷ νόμῳ· δειλία δὲ τοῦναντίον. σωφροσύνη δὲ ἀρετὴ δι' ἣν πρὸς τὰς ἡδονὰς τὰς τοῦ σώματος οὕτως ἔχουσιν ὡς ὁ νόμος κελεύει· ἀκολασία δὲ τοῦναντίον. ἐλευθεριότης δὲ περὶ χρήματα εὐποιοιτική, ἀνελευθερία δὲ τοῦναντίον. μεγαλοψυχία δὲ ἀρετὴ μεγάλων ποιητικῆ εὐεργετημάτων [μικροψυχία δὲ τοῦναντίον], μεγαλοπρέπεια δὲ ἀρετὴ ἐν δαπανήμασι μεγέθους ποιητικῆ, μικροψυχία δὲ καὶ μικροπρέπεια τάναντία. φρόνησις δ' ἐστὶν ἀρετὴ διανοίας καθ' ἣν εὖ βουλευέσθαι δύνανται περὶ ἀγαθῶν καὶ κακῶν τῶν εἰρημένων εἰς εὐδαιμονίαν.

περὶ μὲν οὖν ἀρετῆς καὶ κακίας καθόλου καὶ περὶ τῶν μορίων εἴρηται κατὰ τὸν ἐνεστώτα καιρὸν ἱκανῶς, περὶ δὲ τῶν ἄλλων οὐ χαλεπὸν ἰδεῖν· φανερόν γὰρ ὅτι ἀνάγκη τὰ τε ποιητικὰ τῆς ἀρετῆς εἶναι καλὰ (πρὸς ἀρετὴν γάρ) καὶ τὰ ἀπ' ἀρετῆς γινόμενα, τοιαῦτα δὲ τὰ τε σημεῖα τῆς ἀρετῆς καὶ τὰ ἔργα· ἐπεὶ δὲ τὰ σημεῖα καὶ τὰ τοιαῦτα ἃ ἐστὶν ἀγαθοῦ ἔργα ἢ πάθη καλὰ, ἀνάγκη ὅσα τε ἀνδρείας ἔργα ἢ σημεῖα ἀνδρείας ἢ ἀνδρείως πέπρακται καλὰ εἶναι, καὶ τὰ δίκαια καὶ τὰ δικαίως ἔργα (πάθη δὲ οὐ· ἐν μόνῃ γὰρ ταύτῃ τῶν ἀρετῶν οὐκ αἰεὶ τὸ δικαίως καλόν, ἀλλ' ἐπὶ τοῦ ζημιουῖσθαι αἰσχρὸν τὸ δικαίως μᾶλλον ἢ τὸ ἀδίκως), καὶ κατὰ τὰς ἄλλας δὲ ἀρετὰς ὡσαύτως. καὶ ἐφ' ὅσοις τὰ ἄθλα τιμῇ, καλὰ. καὶ ἐφ' ὅσοις τιμῇ μᾶλλον ἢ χρήματα. καὶ ὅσα μὴ αὐτοῦ ἕνεκα πράττει τις τῶν αἰρετῶν, καὶ τὰ ἀπλῶς ἀγαθὰ, ὅσα τε ὑπὲρ πατρίδος τις ἐποίησεν παριδὼν τὸ αὐτοῦ, καὶ τὰ τῇ φύσει ἀγαθὰ, καὶ ἃ μὴ αὐτῷ [1367a] ἀγαθὰ· αὐτοῦ γὰρ ἕνεκα τὰ τοιαῦτα. καὶ ὅσα τεθνεῶτι ἐνδέχεται ὑπάρχειν μᾶλλον ἢ ζῶντι· τὸ γὰρ αὐτοῦ ἕνεκα μᾶλλον ἔχει τὰ ζῶντι. καὶ ὅσα ἔργα τῶν ἄλλων ἕνεκα· ἥττον γὰρ αὐτοῦ. καὶ ὅσαι εὐπραγίαι περὶ ἄλλους ἀλλὰ

καὶ περὶ ὧν ἀγωνιῶσι μὴ φοβούμενοι· περὶ γὰρ τῶν πρὸς δόξαν φερόντων ἀγαθῶν τοῦτο πάσχουσιν. καὶ αἱ τῶν φύσει σπουδαιοτέρων ἀρεταὶ καλλίους καὶ τὰ ἔργα, οἷον ἀνδρὸς ἢ γυναικός. καὶ αἱ ἀπολαυστικαὶ ἄλλοις μᾶλλον ἢ αὐτοῖς· διὸ τὸ δίκαιον καὶ ἡ δικαιοσύνη καλόν. καὶ τὸ τοὺς ἐχθροὺς τιμωρεῖσθαι καὶ μὴ καταλλάττεσθαι· τό τε γὰρ ἀνταποδιδόναι δίκαιον, τὸ δὲ δίκαιον καλόν, καὶ ἀνδρεῖον τὸ μὴ ἡττᾶσθαι. καὶ νίκη καὶ τιμὴ τῶν καλῶν· αἰρετά τε γὰρ ἄκαρπα ὄντα, καὶ ὑπεροχὴν ἀρετῆς δηλοῖ. καὶ τὰ μνημονευτά, καὶ τὰ μᾶλλον μᾶλλον. καὶ ἃ μὴ ζῶντι ἔπεται, καὶ οἷς τιμὴ ἀκολουθεῖ, καὶ τὰ περιττά, καὶ τὰ μόνῳ ὑπάρχοντα, καλλίῳ· εὐμνημονευτότερα γάρ. καὶ κτήματα ἄκαρπα· ἐλευθεριώτερα γάρ. καὶ τὰ παρ' ἐκάστοις δὲ ἴδια καλά, καὶ ὅσα σημειᾷ ἐστὶν τῶν παρ' ἐκάστοις ἐπαινουμένων, οἷον ἐν Λακεδαιμόνι κομᾶν καλόν· ἐλευθέρου γὰρ σημεῖον· οὐ γὰρ ἐστὶν κομῶντα ῥάδιον οὐδὲν ποιεῖν ἔργον θητικόν. καὶ τὸ μηδεμίαν ἐργάζεσθαι βάνανυσον τέχνην· ἐλευθέρου γὰρ τὸ μὴ πρὸς ἄλλον ζῆν. ληπτέον δὲ καὶ τὰ σύνεγγυς τοῖς ὑπάρχουσιν ὡς ταῦτα ὄντα καὶ πρὸς ἔπαινον καὶ πρὸς ψόγον, οἷον τὸν εὐλαβῆ ψυχρὸν καὶ ἐπίβουλον καὶ τὸν ἡλίθιον χρηστὸν ἢ τὸν ἀνάληγον πρᾶον, καὶ ἕκαστον δ' ἐκ τῶν παρακολουθούντων ἀεὶ κατὰ τὸ βέλτιστον, οἷον τὸν ὀργίλον καὶ τὸν μανικὸν ἀπλοῦν καὶ τὸν αὐθάδη [1367b] μεγαλοπρεπῆ καὶ σεμνόν, καὶ τοὺς ἐν ταῖς ὑπερβολαῖς ὡς ἐν ταῖς ἀρεταῖς ὄντας, οἷον τὸν θρασὺν ἀνδρεῖον καὶ τὸν ἄσωτον ἐλευθέριον· δόξει τε γὰρ τοῖς πολλοῖς, καὶ ἅμα παραλογιστικὸν [ἐκ] τῆς αἰτίας. εἰ γὰρ οὐ μὴ ἀνάγκη κινδυνευτικός, πολλῶ μᾶλλον ἢ δόξειεν ὅπου καλόν, καὶ εἰ προαιτικός τοῖς τυχοῦσι, καὶ τοῖς φίλοις· ὑπερβολὴ γὰρ ἀρετῆς τὸ πάντας εὖ ποιεῖν. σκοπεῖν δὲ καὶ παρ' οἷς ὁ ἔπαινος· ὥσπερ γὰρ ὁ Σωκράτης ἔλεγεν, οὐ

χαλεπὸν Ἀθηναίους ἐν Ἀθηναίοις ἐπαινεῖν. δεῖ δὲ τὸ παρ' ἐκάστοις τίμιον ὃν λέγειν ὡς ὑπάρχει, οἷον ἐν Σκύθαις ἢ Λάκωσιν ἢ φιλοσόφοις, καὶ ὅλως δὲ τὸ τίμιον ἄγειν εἰς τὸ καλόν, ἐπεὶπερ γε δοκεῖ γειννᾶν. καὶ ὅσα κατὰ τὸ προσῆκον, οἷον εἰ ἄξια τῶν προγόνων καὶ τῶν προϋπερηγμένων· εὐδαιμονικὸν γὰρ καὶ καλὸν καὶ τὸ προσεπικτᾶσθαι τιμὴν. καὶ εἰ παρὰ τὸ προσῆκον ἐπὶ δὲ τὸ βέλτιον καὶ τὸ κάλλιον, οἷον εἰ εὐτυχῶν μὲν μέτριος, ἀτυχῶν δὲ μεγαλόψυχος, ἢ μείζων γιγνόμενος βελτίων καὶ καταλλακτικώτερος. τοιοῦτον δὲ τὸ τοῦ Ἰφικράτους, “ἐξ οἴων εἰς οἴα”, καὶ τὸ τοῦ Ὀλυμπιονίκου

πρόσθε μὲν ἄμφ' ὥμοισιν ἔχων τραχεῖαν,
καὶ τὸ τοῦ Σιμωνίδου

ἢ πατρός τε καὶ ἀνδρὸς ἀδελφῶν τ' οὕσα τυράννων.

ἐπεὶ δ' ἐκ τῶν πράξεων ὁ ἔπαινος, ἴδιον δὲ τοῦ σπουδαίου τὸ κατὰ προαίρεσιν, πειρατέον δεικνύειν πράττοντα κατὰ προαίρεσιν, χρήσιμον δὲ τὸ πολλάκις φαίνεσθαι πεπραχότα· διὸ καὶ τὰ συμπτώματα καὶ τὰ ἀπὸ τύχης ὡς ἐν προαιρέσει ληπτέον· ἂν γὰρ πολλὰ καὶ ὅμοια προφέρηται, σημεῖον ἀρετῆς εἶναι δόξει καὶ προαιρέσεως.

ἔστιν δ' ἔπαινος λόγος ἐμφανίζων μέγεθος ἀρετῆς. δεῖ οὖν τὰς πράξεις ἐπιδεικνύειν ὡς τοιαῦται. τὸ δ' ἐγκώμιον τῶν ἔργων ἐστίν (τὰ δὲ κύκλω εἰς πίστιν, οἷον εὐγένεια καὶ παιδεία· εἰκὸς γὰρ ἐξ ἀγαθῶν ἀγαθοὺς καὶ τὸν οὕτω τραφέντα τοιοῦτον εἶναι), διὸ καὶ ἐγκωμιάζομεν πράξαντας. τὰ δ' ἔργα σημεῖα τῆς ἑξέως ἐστίν, ἐπεὶ ἐπαινοῖμεν ἂν καὶ μὴ πεπραγότα, εἰ πιστεῦοιμεν εἶναι τοιοῦτον. μακαρισμὸς δὲ καὶ εὐδαιμονισμὸς αὐτοῖς μὲν ταυτὰ, τούτοις δ' οὐ ταυτὰ, ἀλλ' ὥσπερ ἡ εὐδαιμονία τὴν ἀρετὴν, καὶ ὁ εὐδαιμονισμὸς περιέχει ταῦτα.

ἔχει δὲ κοινὸν εἶδος ὁ ἔπαινος καὶ αἱ συμβουλαί. ἃ γὰρ ἐν τῷ συμβουλευεῖν ὑπόθοιο ἂν, ταῦτα μετατεθέντα [1368a] τῇ λέξει ἐγκώμια γίνονται. ἐπεὶ οὖν ἔχομεν ἃ δεῖ πράττειν καὶ ποῖόν τινα εἶναι δεῖ, ταῦτα ὡς ὑποθήκας λέγοντας τῇ λέξει μετατιθέμεναι δεῖ καὶ στρέφειν, οἷον ὅτι οὐ δεῖ μέγα φρονεῖν ἐπὶ τοῖς διὰ τύχην ἀλλὰ τοῖς δι' αὐτόν. οὕτω μὲν οὖν λεχθὲν ὑποθήκην δύναται, ὡδὶ δ' ἔπαινον “μέγα φρονῶν οὐκ ἐπὶ τοῖς διὰ τύχην ὑπάρχουσιν ἀλλὰ τοῖς δι' αὐτόν”. ὥστε ὅταν ἐπαινεῖν βούλῃ, ὅρα τί ἂν ὑπόθοιο· καὶ ὅταν ὑποθέσθαι, ὅρα τί ἂν ἐπαινέσεις. ἡ δὲ λέξις ἐστὶ ἀντικειμένη ἐξ

ἀνάγκης ὅταν τὸ μὲν κωλῦον τὸ δὲ μὴ κωλῦον μετατεθῇ.

χρηστέον δὲ καὶ τῶν αὐξητικῶν πολλοῖς, οἷον εἰ μόνος ἢ πρῶτος ἢ μετ' ὀλίγων ἢ καὶ [ὁ] μάλιστα πεποίηκεν· ἅπαντα γὰρ ταῦτα καλά. καὶ τῷ ἐκ τῶν χρόνων καὶ τῶν καιρῶν· τούτῳ δ' εἰ παρὰ τὸ προσῆκον. καὶ εἰ πολλάκις τὸ αὐτὸ κατώρθωκεν· μέγα γὰρ καὶ οὐκ ἀπὸ τύχης ἀλλὰ δι' αὐτοῦ ἂν δόξειεν. καὶ εἰ τὰ προτρέποντα καὶ τιμῶντα διὰ τοῦτον εὖρηται καὶ κατεσκευάσθη, καὶ εἰς τοῦτον πρῶτον ἐγκώμιον ἐποιήθη, οἷον εἰς Ἱππόλοχον, καὶ «εἰς» Ἀρμόδιον καὶ Ἀριστογείτονα τὸ ἐν ἀγορᾷ σταθῆναι· ὁμοίως δὲ καὶ ἐπὶ τῶν ἐναντίων. κἂν μὴ καθ' αὐτὸν εὐπορήσῃ, πρὸς ἄλλους ἀντιπαραβάλλειν, ὅπερ Ἰσοκράτης ἐποίει διὰ τὴν ἀσυνήθειαν τοῦ δικολογεῖν. δεῖ δὲ πρὸς ἐνδόξους συγκρίνειν· αὐξητικὸν γὰρ καὶ καλόν, εἰ σπουδαίων βελτίων. πίπτει δ' εὐλόγως ἡ αὕξησις εἰς τοὺς ἐπαίνους· ἐν ὑπεροχῇ γάρ ἐστιν, ἢ δ' ὑπεροχῇ τῶν καλῶν· διὸ κἂν μὴ πρὸς τοὺς ἐνδόξους, ἀλλὰ πρὸς τοὺς ἄλλους δεῖ παραβάλλειν, ἐπεὶ περ ἡ ὑπεροχὴ δοκεῖ μηνύειν ἀρετὴν. ὅλως δὲ τῶν κοινῶν εἰδῶν ἅπασιν τοῖς λόγοις ἢ μὲν αὕξησις ἐπιτηδαιοτάτη τοῖς ἐπιδεικτικοῖς (τὰς γὰρ πράξεις ὁμολογουμένας λαμβάνουσιν, ὥστε λοιπὸν μέγεθος περιθεῖναι καὶ ἄλλος)· τὰ δὲ παραδείγματα τοῖς συμβουλευτικοῖς (ἐκ γὰρ τῶν προγεγονότων τὰ μέλλοντα καταμαντευόμενοι κρίνομεν)· τὰ δ' ἐνθυμήματα τοῖς δικανικοῖς (αἰτίαν γὰρ καὶ ἀπόδειξιν μάλιστα δέχεται τὸ γεγονὸς διὰ τὸ ἀσαφές).

ἐκ τίνων μὲν οὖν οἱ ἔπαινοι καὶ οἱ ψόγοι λέγονται σχεδὸν πάντες, καὶ πρὸς ποῖα δεῖ βλέποντας ἐπαινεῖν καὶ ψέγειν, καὶ ἐκ τίνων τὰ ἐγκώμια γίνεταί καὶ τὰ ὀνειδή, ταῦτ' ἐστίν· ἐχομένων γὰρ τούτων τὰ ἐναντία τούτοις φανερά· ὁ γὰρ ψόγος ἐκ τῶν ἐναντίων ἐστίν.

[1368b] Περὶ δὲ κατηγορίας καὶ ἀπολογίας, ἐκ πόσων καὶ ποίων ποιῆσθαι δεῖ τοὺς συλλογισμούς, ἐχόμενον ἂν εἶη λέγειν. δεῖ δὴ λαβεῖν τρία, ἐν μὲν τίνων καὶ πόσων ἔνεκα ἀδικοῦσι, δεύτερον δὲ πῶς αὐτοὶ διακείμενοι, τρίτον δὲ τοὺς ποίους καὶ πῶς ἔχοντας. διορισάμενοι οὖν τὸ ἀδικεῖν λέγωμεν ἐξῆς.

ἔστω δὴ τὸ ἀδικεῖν τὸ βλάπτειν ἐκόντα παρὰ τὸν νόμον. νόμος δ' ἐστίν ὁ μὲν ἴδιος ὁ δὲ κοινός· λέγω δὲ ἴδιον μὲν καθ' ὃν γεγραμμένον πολιτεύονται, κοινὸν δὲ ὅσα ἄγραφα παρὰ πᾶσιν ὁμολογεῖσθαι δοκεῖ. ἐκόντες δὲ ποιοῦσιν ὅσα εἰδότες καὶ μὴ ἀναγκαζόμενοι. ὅσα μὲν οὖν εἰδότες, οὐ πάντα προαιρούμενοι, ὅσα

δὲ προαιρούμενοι, εἰδότες ἅπαντα· οὐδεὶς γὰρ ὁ προαιρεῖται ἀγνοεῖ. δι' ἃ δὲ προαιροῦνται βλάπτειν καὶ φαῦλα ποιεῖν παρὰ τὸν νόμον κακία ἐστὶν καὶ ἀκρασία· ἐὰν γάρ τινες ἔχωσιν μοχθηρίαν ἢ μίαν ἢ πλείους, περὶ τοῦτο ὁ μοχθηροὶ τυγχάνουσιν ὄντες καὶ ἄδικοί εἰσιν· οἷον ὁ μὲν ἀνελεύθερος περὶ χρήματα, ὁ δ' ἀκόλαστος περὶ τὰς τοῦ σώματος ἡδονάς, ὁ δὲ μαλακὸς περὶ τὰ ῥάθυμα, ὁ δὲ δειλὸς περὶ τοὺς κινδύνους (τοὺς γὰρ συγκινδυνεύοντας ἐγκαταλιμπάνουσι διὰ τὸν φόβον), ὁ δὲ φιλότιμος διὰ τιμὴν, ὁ δ' ὀξύθυμος δι' ὀργήν, ὁ δὲ φιλόνικος διὰ νίκην, ὁ δὲ πικρὸς διὰ τιμωρίαν, ὁ δ' ἄφρων διὰ τὸ ἀπατᾶσθαι περὶ τὸ δίκαιον καὶ ἄδικον, ὁ δ' ἀναίσχυντος δι' ὀλιγωρίαν δόξης· ὁμοίως δὲ καὶ τῶν ἄλλων ἕκαστος περὶ ἕκαστον τῶν ὑποκειμένων.

ἀλλὰ περὶ μὲν τούτων δῆλον, τὰ μὲν ἐκ τῶν περὶ τὰς ἀρετὰς εἰρημένων, τὰ δ' ἐκ τῶν περὶ τὰ πάθη ῥητισσομένων· λοιπὸν δ' εἰπεῖν τίνος ἔνεκα καὶ πῶς ἔχοντες ἄδικοῦσι καὶ τίνας.

πρῶτον μὲν οὖν διελώμεθα τίνων ὀρεγόμενοι καὶ ποῖα φεύγοντες ἐγχειροῦσιν ἀδικεῖν· δῆλον γὰρ ὡς τῷ μὲν κατηγοροῦντι πόσα καὶ ποῖα τούτων ὑπάρχει τῷ ἀντιδίκῳ σκεπτέον, ὧν ἐφίεμενοι πάντες τοὺς πλησίον ἀδικοῦσι, τῷ δὲ ἀπολογουμένῳ ποῖα καὶ πόσα τούτων οὐχ ὑπάρχει. πάντες δὴ πάντα πράττουσι τὰ μὲν οὐ δι' αὐτοὺς τὰ δὲ δι' αὐτούς. τῶν μὲν οὖν μὴ δι' αὐτοὺς τὰ μὲν διὰ τύχην πράττουσι τὰ δ' ἐξ ἀνάγκης, τῶν δ' ἐξ ἀνάγκης τὰ μὲν βίᾳ τὰ δὲ φύσει, ὥστε πάντα ὅσα μὴ δι' αὐτοὺς πράττουσι, τὰ μὲν ἀπὸ τύχης τὰ δὲ φύσει τὰ δὲ βίᾳ. ὅσα δὲ δι' αὐτούς, καὶ ὧν [1369a] αὐτοὶ αἴτιοι, τὰ μὲν δι' ἔθος τὰ δὲ δι' ὄρεξιν, τὰ μὲν διὰ λογιστικὴν ὄρεξιν τὰ δὲ δι' ἄλογον· ἔστιν δ' ἢ μὲν βούλησις ἀγαθοῦ ὄρεξις (οὐδεὶς γὰρ βούλεται ἄλλ' ἢ ὅταν οἰηθῇ εἶναι ἀγαθόν), ἄλογοι δ' ὀρέξεις ὀργὴ καὶ ἐπιθυμία· ὥστε πάντα ὅσα πράττουσιν ἀνάγκη πράττειν δι' αἰτίας ἐπτά, διὰ τύχην, διὰ φύσιν, διὰ βίαν, δι' ἔθος, διὰ λογισμόν, διὰ θυμόν, δι' ἐπιθυμίαν. τὸ δὲ προσδιαιρεῖσθαι καθ' ἡλικίαν ἢ ἑξεῖς ἢ ἄλλ' ἅττα τὰ πραττόμενα περίεργον· εἰ γὰρ συμβέβηκεν τοῖς νέοις ὀργίλοις εἶναι ἢ ἐπιθυμητικοῖς, οὐ διὰ τὴν νεότητα πράττουσι τὰ τοιαῦτα ἀλλὰ δι' ὀργήν καὶ ἐπιθυμίαν. οὐδὲ διὰ πλοῦτον καὶ πενίαν, ἀλλὰ συμβέβηκε τοῖς μὲν πένησι διὰ τὴν ἔνδειαν ἐπιθυμεῖν χρημάτων, τοῖς δὲ πλουσίοις διὰ τὴν ἐξουσίαν ἐπιθυμεῖν τῶν μὴ ἀναγκαίων ἡδονῶν· ἀλλὰ πράξουσι καὶ οὗτοι οὐ διὰ πλοῦτον καὶ πενίαν ἀλλὰ διὰ τὴν ἐπιθυμίαν. ὁμοίως δὲ καὶ οἱ δίκαιοι καὶ οἱ

ἄδικοι, καὶ οἱ ἄλλοι οἱ λεγόμενοι κατὰ τὰς ἕξεις πράττειν, διὰ ταῦτα πράξουσιν· ἢ γὰρ διὰ λογισμὸν ἢ διὰ πάθος· ἀλλ' οἱ μὲν διὰ ἡθῆ καὶ πάθη χρηστά, οἱ δὲ διὰ τάναντία. συμβαίνει μέντοι ταῖς μὲν τοιαύταις ἕξεσι τὰ τοιαῦτα ἀκολουθεῖν, ταῖς δὲ τοιαῖσδε τὰ τοιάδε· εὐθύς γὰρ ἴσως τῷ μὲν σῶφρονι διὰ τὸ σῶφρονα εἶναι δόξαί τε καὶ ἐπιθυμίας χρησταὶ ἐπακολουθοῦσι περὶ τῶν ἡδέων, τῷ δ' ἀκολάστῳ αἱ ἐναντίαι περὶ τῶν αὐτῶν τούτων· διὸ τὰς μὲν τοιαύτας διαιρέσεις ἐατέον, σκεπτέον δὲ ποῖα ποίοις εἴωθεν ἔπεσθαι· εἰ μὲν γὰρ λευκὸς ἢ μέλας, ἢ μέγας ἢ μικρός, οὐδὲν τέτακται τῶν τοιούτων ἀκολουθεῖν, εἰ δὲ νέος ἢ πρεσβύτης, ἢ δίκαιος ἢ ἄδικος, ἡδὴ διαφέρει· καὶ ὅλως ὅσα τῶν συμβαινόντων ποιεῖ διαφέρειν τὰ ἡθῆ τῶν ἀνθρώπων, οἷον πλουτεῖν δοκῶν ἑαυτῷ ἢ πένεσθαι διοίσει τι, καὶ εὐτυχεῖν ἢ ἀτυχεῖν. ταῦτα μὲν οὖν ὕστερον ἐροῦμεν, νῦν δὲ περὶ τῶν λοιπῶν εἰπωμεν πρῶτον.

ἔστι δ' ἀπὸ τύχης μὲν τὰ τοιαῦτα γιγνόμενα, ὅσων ἢ τε αἰτία ἀόριστος καὶ μὴ ἔνεκά του γίγνεται καὶ μήτε ἀεὶ μήτε ὥς ἐπὶ τὸ πολὺ μήτε τεταγμένως (δῆλον δ' ἐκ τοῦ ὀρίσμου τῆς τύχης περὶ τούτων), φύσει δὲ ὅσων ἢ τ' αἰτία [1369b] ἐν αὐτοῖς καὶ τεταγμένη· ἢ γὰρ ἀεὶ ἢ ὥς ἐπὶ τὸ πολὺ ὡσαύτως ἀποβαίνει. τὰ γὰρ παρὰ φύσιν οὐδὲν δεῖ ἀκριβολογεῖσθαι πότερα κατὰ φύσιν ἢ τινα ἄλλην αἰτίαν γίγνεται· δόξειε δ' ἂν καὶ ἡ τύχη αἰτία εἶναι τῶν τοιούτων. βία δὲ ὅσα παρ' ἐπιθυμίαν ἢ τοὺς λογισμοὺς γίγνεται [δι'] αὐτῶν τῶν πραττόντων. ἔθει δὲ ὅσα διὰ τὸ πολλάκις πεποιηκέναι ποιοῦσιν. διὰ λογισμὸν δὲ τὰ δοκοῦντα συμφέρειν ἐκ τῶν εἰρημένων ἀγαθῶν ἢ ὥς τέλος ἢ ὥς πρὸς τὸ τέλος, ὅταν διὰ τὸ συμφέρειν πράττηται· ἕνια γὰρ καὶ οἱ ἀκόλαστοι συμφέροντα πράττουσιν, ἀλλ' οὐ διὰ τὸ συμφέρειν ἀλλὰ δι' ἡδονήν. διὰ θυμὸν δὲ καὶ ὀργήν τὰ τιμωρητικά. διαφέρει δὲ τιμωρία καὶ κόλασις· ἡ μὲν γὰρ κόλασις τοῦ πάσχοντος ἔνεκά ἐστιν, ἡ δὲ τιμωρία τοῦ ποιοῦντος, ἵνα πληρωθῇ. τί μὲν οὖν ἐστὶν ἡ ὀργή, δῆλον ἔσται ἐν τοῖς περὶ τῶν παθῶν. δι' ἐπιθυμίαν δὲ πράττεται ὅσα φαίνεται ἡδέα. ἔστιν δὲ καὶ τὸ σύνηθες καὶ τὸ ἐθιστὸν ἐν τοῖς ἡδέσιν· πολλὰ γὰρ καὶ τῶν φύσει μὴ ἡδέων, ὅταν συνεθισθῶσιν, ἡδέως ποιοῦσιν· ὥστε συλλαβόντι εἰπεῖν, ὅσα δι' αὐτοὺς πράττουσιν ἅπαντ' ἐστὶν ἢ ἀγαθὰ ἢ φαινόμενα ἀγαθὰ, ἢ ἡδέα ἢ φαινόμενα ἡδέα. ἐπεὶ δ' ὅσα δι' αὐτοὺς ἐκόντες πράττουσιν, οὐχ ἐκόντες δὲ ὅσα μὴ δι' αὐτούς, πάντ' ἂν εἴη ὅσα ἐκόντες πράττουσιν ἢ ἀγαθὰ ἢ φαινόμενα ἀγαθὰ, ἢ ἡδέα ἢ φαινόμενα ἡδέα· τίθιμι γὰρ καὶ τὴν τῶν

κακῶν ἢ φαινομένων κακῶν ἢ ἀπαλλαγὴν ἢ ἀντὶ μείζονος ἐλάττονος
μετάληψιν ἐν τοῖς ἀγαθοῖς (αἰρετὰ γάρ πως), καὶ τὴν τῶν λυπηρῶν ἢ
φαινομένων <λυπηρῶν> ἢ ἀπαλλαγὴν ἢ μετάληψιν ἀντὶ μειζόνων
ἐλαττόνων ἐν τοῖς ἡδέσιν ὡσαύτως. ληπτέον ἄρα τὰ συμφέροντα καὶ
τὰ ἡδέα, πόσα καὶ ποῖα. περὶ μὲν οὖν τοῦ συμφέροντος ἐν τοῖς
συμβουλευτικοῖς εἴρηται πρότερον, περὶ δὲ τοῦ ἡδέος εἵπωμεν νῦν.
δεῖ δὲ νομίζειν ἱκανοὺς εἶναι τοὺς ὅρους ἐὰν ᾧσι περὶ ἐκάστου μήτε
ἀσαφεῖς μήτε ἀκριβεῖς.

Ὑποκείσθω δὴ ἡμῖν εἶναι τὴν ἡδονὴν κίνησιν τινα τῆς ψυχῆς

τὰς δ' ἐπιμελείας καὶ τὰς σπουδὰς καὶ τὰς συντονίας λυπηράς·
ἀναγκαῖα γὰρ καὶ βίαια ταῦτα, ἐὰν μὴ ἐθισθῶσιν· οὕτω δὲ τὸ ἔθος

ὅς τε πολὺ γλυκίων μέλιτος καταλειβομένοιο

ὥς φάτο, τοῖσι δὲ πᾶσιν ὕφ' ἱμερον ὥρσε γόοιο.

καὶ τὸ τιμωρεῖσθαι ἡδύ. οὐ γὰρ τὸ μὴ τυγχάνειν λυπηρόν, τὸ τυγχάνειν ἡδύ· οἱ δ' ὀργιζόμενοι λυποῦνται ἀνυπερβλήτως μὴ τιμωρούμενοι, ἐλπίζοντες δὲ χαίρουσιν. καὶ τὸ νικᾶν ἡδύ, οὐ μόνον τοῖς φιλονίκους ἀλλὰ πᾶσιν· φαντασία γὰρ ὑπεροχῆς γίγνεται, οὗ

πάντες ἔχουσιν ἐπιθυμίαν ἢ ἡρέμα ἢ μάλα. ἐπεὶ δὲ τὸ νικᾶν ἡδύ, ἀνάγκη καὶ τὰς παιδιὰς ἡδείας εἶναι τὰς [1371a] μαχητικὰς καὶ τὰς ἐριστικὰς (πολλάκις γὰρ ἐν ταύταις γίγνεται τὸ νικᾶν), καὶ ἀστραγαλίσσεις καὶ σφαιρίσεις καὶ κυβείας καὶ πεττείας. καὶ περὶ τὰς ἐσπουδασμένας δὲ παιδιὰς ὁμοίως· αἱ μὲν γὰρ ἡδεῖαι γίνονται ἂν τις ᾗ συνήθης, αἱ δ' εὐθὺς ἡδεῖαι, οἷον κυνηγία καὶ πᾶσα θηρευτική· ὅπου γὰρ ἄμιλλα, ἐνταῦθα καὶ νίκη ἔστιν· διὸ καὶ ἡ δικανική καὶ ἡ ἐριστική ἡδέα τοῖς εἰθισμένοις καὶ δυναμένοις. καὶ τιμὴ καὶ εὐδοξία τῶν ἡδίστων διὰ τὸ γίνεσθαι φαντασίαν ἐκάστῳ ὅτι τοιοῦτος οἷος ὁ σπουδαῖος, καὶ μᾶλλον ὅταν φῶσιν οὓς οἶται ἀληθεύειν. τοιοῦτοι δ' οἱ ἐγγὺς μᾶλλον τῶν πόρρω, καὶ οἱ συνήθεις καὶ οἱ πολῖται τῶν ἄπωθεν, καὶ οἱ ὄντες τῶν μελλόντων, καὶ οἱ φρόνιμοι ἀφρόνων, καὶ πολλοὶ ὀλίγων· μᾶλλον γὰρ εἰκὸς ἀληθεύειν τοὺς εἰρημένους τῶν ἐναντίων· ἐπεὶ ὧν τις πολὺ καταφρονεῖ, ὥσπερ παιδίων ἢ θηρίων, οὐδὲν μέλει τῆς τούτων τιμῆς ἢ τῆς δόξης αὐτῆς γε τῆς δόξης χάριν, ἀλλ' εἴπερ, δι' ἄλλο τι. καὶ ὁ φίλος τῶν ἡδέων· τό τε γὰρ φιλεῖν ἡδύ (οὐδεὶς γὰρ φίλοινος μὴ χαίρων οἶνω) καὶ τὸ φιλεῖσθαι ἡδύ· φαντασία γὰρ καὶ ἐνταῦθα τοῦ ὑπάρχειν αὐτῷ τὸ ἀγαθὸν εἶναι, οὗ πάντες ἐπιθυμοῦσιν οἱ αἰσθανόμενοι· τὸ δὲ φιλεῖσθαι ἀγαπᾶσθαι ἔστιν αὐτὸν δι' αὐτόν. καὶ τὸ θαυμάζεσθαι ἡδὺ διὰ <τὸ> αὐτὸ τῷ τιμᾶσθαι. καὶ τὸ κολακεύεσθαι καὶ ὁ κόλαξ ἡδέα· φαινόμενος γὰρ θαυμαστής καὶ φαινόμενος φίλος ὁ κόλαξ ἔστιν. καὶ τὸ ταυτὰ πράττειν πολλάκις ἡδύ· τὸ γὰρ σύνηθες ἡδὺ ἦν. καὶ τὸ μεταβάλλειν ἡδύ· εἰς φύσιν γὰρ γίγνεται <τὸ> μεταβάλλειν· τὸ γὰρ αὐτὸ ἀεὶ ὑπερβολὴν ποιεῖ τῆς καθεστῶσης ἕξεως, ὅθεν εἴρηται

μεταβολὴ πάντων γλυκύ.

διὰ τοῦτο γὰρ καὶ τὰ διὰ χρόνου ἡδέα ἐστίν, καὶ ἄνθρωποι καὶ πράγματα· μεταβολὴ γὰρ ἐκ τοῦ παρόντος ἐστίν, ἅμα δὲ καὶ σπάνιον τὸ διὰ χρόνου. καὶ τὸ μανθάνειν καὶ τὸ θαυμάζειν ἡδὺ ὡς ἐπὶ τὸ πολὺ· ἐν μὲν γὰρ τῷ θαυμάζειν τὸ ἐπιθυμεῖν μαθεῖν ἔστιν, ὥστε τὸ θαυμαστὸν ἐπιθυμητόν, ἐν δὲ τῷ μανθάνειν <τὸ> εἰς τὸ κατὰ φύσιν καθίστασθαι. καὶ τὸ εὖ ποιεῖν καὶ τὸ εὖ πάσχειν τῶν ἡδέων· τὸ μὲν γὰρ εὖ πάσχειν τυγχάνειν [1371b] ὧν ἐπιθυμοῦσι, τὸ δὲ εὖ ποιεῖν ἔχειν καὶ ὑπερέχειν, ὧν ἀμφοτέρων ἐφίενται. διὰ δὲ τὸ ἡδὺ εἶναι τὸ εὐποιοιτικόν, καὶ τὸ ἐπανορθοῦν ἡδὺ τοῖς ἀνθρώποις ἐστίν τοὺς πλησίον, καὶ τὸ τὰ ἐλλιπῆ ἐπιτελεῖν. ἐπεὶ δὲ τὸ μανθάνειν τε ἡδὺ καὶ τὸ θαυμάζειν, καὶ τὰ τοιάδε ἀνάγκη ἡδέα εἶναι, οἷον τό τε

μιμούμενον, ὥσπερ γραφικὴ καὶ ἀνδριαντοποιία καὶ ποιητικὴ, καὶ πᾶν ὃ ἂν εὖ μεμιμημένον ᾖ, κἂν ᾗ μὴ ἡδὺ αὐτὸ τὸ μεμιμημένον· οὐ γὰρ ἐπὶ τούτῳ χαίρει, ἀλλὰ συλλογισμὸς ἔστιν ὅτι τοῦτο ἐκεῖνο, ὥστε μανθάνειν τι συμβαίνει. καὶ αἱ περιπέτειαι καὶ τὸ παρὰ μικρὸν σῶζεσθαι ἐκ τῶν κινδύνων· πάντα γὰρ θαυμαστὰ ταῦτα. καὶ ἐπεὶ τὸ κατὰ φύσιν ἡδύ, τὰ συγγενῇ δὲ κατὰ φύσιν ἀλλήλοις ἐστίν, πάντα τὰ συγγενῇ καὶ ὅμοια ἡδέα ὡς ἐπὶ τὸ πολὺ, οἷον ἄνθρωπος ἀνθρώπῳ καὶ ἵππος ἵππῳ καὶ νέος νέῳ, ὅθεν καὶ αἱ παροιμίαι εἴρηνται, [ὡς] “ἥλιξ ἥλικα τέρπει”, καὶ “ὡς αἰεὶ τὸν ὁμοῖον”, καὶ “ἔγνω δὲ θῆρ θῆρα”, “καὶ γὰρ κολοῖδς παρὰ κολοῖόν”, καὶ ὅσα ἄλλα τοιαῦτα.

ἐπεὶ δὲ τὸ ὅμοιον καὶ τὸ συγγενὲς ἑαυτῷ ἡδὺ ἅπαν, μάλιστα δὲ αὐτὸς πρὸς ἑαυτὸν ἕκαστος τοῦτο πέπονθεν, ἀνάγκη πάντας φιλαύτους εἶναι ἢ μᾶλλον ἢ ἥττον· πάντα γὰρ τὰ τοιαῦτα ὑπάρχει πρὸς αὐτὸν μάλιστα. ἐπεὶ δὲ φίλαυτοὶ πάντες, καὶ τὰ αὐτῶν ἀνάγκη ἡδέα εἶναι πᾶσιν, οἷον ἔργα καὶ λόγους· διὸ καὶ φιλοκόλακες ὡς ἐπὶ τὸ πολὺ καὶ φιλερασταὶ καὶ φιλόμαιμοι καὶ φιλότεκνοι· αὐτῶν γὰρ ἔργον τὰ τέκνα. καὶ τὸ τὰ ἐλλιπῇ ἐπιτελεῖν ἡδύ· αὐτῶν γὰρ ἔργον ἡδὴ γίγνεται. καὶ ἐπεὶ τὸ ἄρχειν ἡδιστον, καὶ τὸ σοφὸν δοκεῖν εἶναι ἡδύ· ἀρχικὸν γὰρ τὸ φρονεῖν, ἔστιν δ’ ἡ σοφία πολλῶν καὶ θαυμαστῶν ἐπιστήμη. ἔτι ἐπεὶ φιλότιμοι ὡς ἐπὶ τὸ πολὺ, ἀνάγκη καὶ τὸ ἐπιτιμᾶν τοῖς πέλας ἡδὺ εἶναι καὶ τὸ ἄρχειν, καὶ τὸ ἐν ᾧ δοκεῖ βέλτιστος αὐτὸς αὐτοῦ εἶναι, ἐνταῦθα διατρίβειν, ὥσπερ καὶ ὁ ποιητὴς φησι κατὰ τοῦτ’ ἐπείγει,

νέμων ἐκάστης ἡμέρας πλεῖστον μέρος,

ἵν’ αὐτὸς αὐτοῦ τυγχάνει βέλτιστος ὢν.

ὁμοίως δὲ καὶ ἐπεὶ ἡ παιδιὰ τῶν ἡδέων καὶ πᾶσα ἄνεσις, καὶ ὁ γέλως τῶν ἡδέων, ἀνάγκη καὶ τὰ γελοῖα ἡδέα εἶναι, καὶ [1372a] ἀνθρώπους καὶ λόγους καὶ ἔργα· διώρισται δὲ περὶ γελοίων χωρὶς ἐν τοῖς περὶ ποιητικῆς. περὶ μὲν οὖν ἡδέων εἰρήσθω ταῦτα, τὰ δὲ λυπηρὰ ἐκ τῶν ἐναντίων τούτοις φανερά.

ἀδικοῖ τινα τῶν ὀρισμένων, ὁ δὲ μὴ στρατευόμενος τὸ κοινόν.

ἀπάντων δὴ τῶν ἀδικημάτων διηρημένων, καὶ τῶν μὲν ὄντων πρὸς τὸ κοινὸν τῶν δὲ πρὸς ἄλλον ἢ πρὸς ἄλλους, ἀναλαβόντες τί ἐστὶν τὸ ἀδικεῖσθαι λέγωμεν. ἔστι δὴ τὸ ἀδικεῖσθαι τὸ ὑπὸ ἐκόντος τὰ ἄδικα πάσχειν· τὸ γὰρ ἀδικεῖν ὀρίζεται πρότερον ἐκούσιον εἶναι. ἐπεὶ δ' ἀνάγκη τὸν ἀδικούμενον βλάπτεσθαι καὶ ἐκουσίως βλάπτεσθαι, αἱ μὲν βλάβαι ἐκ τῶν πρότερον φανεραὶ εἰσιν· τὰ γὰρ ἀγαθὰ καὶ τὰ κακὰ εἴρηται καθ' αὐτὰ πρότερον καὶ τὰ ἐκούσια, ὅτι ἔστιν ὅσα εἰδότες, ὥστ' ἀνάγκη πάντα τὰ ἐγκλήματα ἢ πρὸς τὸ κοινὸν ἢ πρὸς τὸ ἴδιον εἶναι, καὶ ἢ ἀγνοοῦντος καὶ ἄκοντος ἢ ἐκόντος καὶ εἰδότες, καὶ τούτων τὰ μὲν προελομένου τὰ δὲ διὰ πάθος. περὶ μὲν οὖν θυμοῦ ρηθήσεται ἐν τοῖς περὶ τὰ πάθη, ποῖα δὲ προαιροῦνται καὶ πῶς ἔχοντες εἴρηται πρότερον. ἐπεὶ δ' ὁμολογοῦντες πολλάκις [1374a] πεπραχέναι ἢ τὸ ἐπίγραμμα οὐχ ὁμολογοῦσιν ἢ περὶ ὃ τὸ ἐπίγραμμα, οἷον λαβεῖν μὲν ἄλλ' οὐ κλέψαι, καὶ πατάξαι πρότερον ἄλλ' οὐχ ὑβρίσαι, καὶ συγγενέσθαι ἄλλ' οὐ μοιχεῦσαι, ἢ κλέψαι μὲν ἄλλ' οὐχ ἱεροσυλῆσαι (οὐ γὰρ θεοῦ τι), ἢ ἐπεργάσασθαι μὲν ἄλλ' οὐ δημοσίαν, ἢ διειλέχθαι μὲν τοῖς πολεμίοις ἄλλ' οὐ προδοῦναι, διὰ ταῦτα δέοι ἂν καὶ περὶ τούτων διωρίσθαι, τί κλοπὴ, τί ὕβρις, τί μοιχεία, ὅπως ἔάν τε ὑπάρχειν ἔάν τε μὴ ὑπάρχειν βουλώμεθα δεικνύειν ἔχωμεν ἐμφανίζειν τὸ δίκαιον. ἔστι δὲ πάντα τὰ τοιαῦτα περὶ τοῦ ἁδικον εἶναι καὶ φαῦλον ἢ μὴ ἁδικον [ή] ἀμφοισβήτησις· ἐν γὰρ τῇ προαιρέσει ἢ μοχθηρία καὶ τὸ ἀδικεῖν, τὰ δὲ τοιαῦτα τῶν ὀνομάτων προσσημαίνει τὴν προαίρεσιν, οἷον ὕβρις καὶ κλοπὴ· οὐ γὰρ εἰ ἐπάταξεν πάντως ὕβρισεν, ἀλλ' εἰ ἔνεκά του, οἷον τοῦ ἀτιμάσαι ἐκείνον ἢ αὐτὸς ἡσθῆναι. οὐδὲ πάντως, εἰ λάθρα ἔλαβεν, ἔκλεψεν, ἀλλ' εἰ ἐπὶ βλάβῃ <τούτου ἀφ' οὗ ἔλαβε> καὶ σφετερισμῷ ἑαυτοῦ. ὁμοίως δὲ καὶ περὶ τῶν ἄλλων ἔχει ὥσπερ καὶ περὶ τούτων.

ἐπεὶ δὲ τῶν δικαίων καὶ τῶν ἀδίκων ἦν δύο εἶδη (τὰ μὲν γὰρ γεγραμμένα τὰ δ' ἄγραφα), περὶ ὧν μὲν οἱ νόμοι ἀγορεύουσιν εἴρηται, τῶν δ' ἀγράφων δύο ἔστιν εἶδη· ταῦτα δ' ἐστὶν τὰ μὲν καθ' ὑπερβολὴν ἀρετῆς καὶ κακίας, ἐφ' οἷς ὀνειδῆ καὶ ἔπαινοι καὶ ἀτιμιαί, καὶ τιμαὶ καὶ δωρεαί (οἷον τὸ χάριν ἔχειν τῷ ποιήσαντι εὖ καὶ ἀντευποιεῖν τὸν εὖ ποιήσαντα, καὶ βοηθητικὸν εἶναι τοῖς φίλοις, καὶ ὅσα ἄλλα τοιαῦτα), τὰ δὲ τοῦ ἰδίου νόμου καὶ γεγραμμένου ἔλλειμμα. τὸ γὰρ ἐπιεικὲς δοκεῖ δίκαιον εἶναι, ἔστιν δὲ ἐπιεικὲς τὸ παρὰ τὸν γεγραμμένον νόμον δίκαιον. συμβαίνει δὲ τοῦτο τὰ μὲν

ἐκόντων τὰ δὲ ἀκόντων τῶν νομοθετῶν, ἀκόντων μὲν ὅταν λάθῃ, ἐκόντων δ' ὅταν μὴ δύνωνται διορίσαι, ἀλλ' ἀναγκαῖον μὲν ἢ καθόλου εἰπεῖν, μὴ ἢ δέ, ἀλλ' ὡς ἐπὶ τὸ πολὺ, καὶ ὅσα μὴ ῥάδιον διορίσαι δι' ἀπειρίαν, οἷον τὸ τρῶσαι σιδήρῳ πηλίκῳ καὶ ποῖῳ τινί· ὑπολείπει γὰρ ἂν ὁ αἰὼν διαριθμοῦντα. ἂν οὖν ἢ ἀόριστον, δέῃ δὲ νομοθετῆσαι, ἀνάγκη ἀπλῶς εἰπεῖν, ὥστε κἂν δακτύλιον ἔχων ἐπάρηται τὴν χεῖρα ἢ πατάξῃ, κατὰ μὲν τὸν γεγραμμένον νόμον ἔνοχός ἐστι καὶ ἀδικεῖ, [1374b] κατὰ δὲ τὸ ἀληθὲς οὐκ ἀδικεῖ, καὶ τὸ ἐπιεικὲς τοῦτό ἐστιν. εἰ δὲ ἐστὶ τὸ εἰρημένον τὸ ἐπιεικὲς, φανερόν ποῖά ἐστι τὰ ἐπιεικῇ καὶ οὐκ ἐπιεικῇ, καὶ ποῖοι οὐκ ἐπιεικεῖς ἄνθρωποι· ἐφ' οἷς τε γὰρ δεῖ συγγνώμην ἔχειν, ἐπιεικῇ ταῦτα, καὶ τὸ τὰ ἀμαρτήματα καὶ τὰ ἀδικήματα μὴ τοῦ ἴσου ἀξιῶν, μηδὲ τὰ ἀμαρτήματα καὶ τὰ ἀτυχήματα· [ἔστιν] ἀτυχήματα μὲν <γὰρ> ὅσα παράλογα καὶ μὴ ἀπὸ μοχθηρίας, ἀμαρτήματα δὲ ὅσα μὴ παράλογα καὶ μὴ ἀπὸ πονηρίας, ἀδικήματα δὲ ὅσα μήτε παράλογα ἀπὸ πονηρίας τέ ἐστιν· τὰ γὰρ δι' ἐπιθυμίαν ἀπὸ πονηρίας. καὶ τὸ τοῖς ἀνθρωπίνοις συγγινώσκειν ἐπιεικὲς. καὶ τὸ μὴ πρὸς τὸν νόμον ἀλλὰ πρὸς τὸν νομοθέτην, καὶ μὴ πρὸς τὸν λόγον ἀλλὰ πρὸς τὴν διάνοιαν τοῦ νομοθέτου σκοπεῖν, καὶ μὴ πρὸς τὴν πρᾶξιν ἀλλὰ πρὸς τὴν προαίρεσιν, καὶ μὴ πρὸς τὸ μέρος ἀλλὰ πρὸς τὸ ὅλον, μηδὲ ποῖός τις νῦν, ἀλλὰ ποῖός τις ἦν ἀεὶ ἢ ὡς ἐπὶ τὸ πολὺ. καὶ τὸ μνημονεύειν μᾶλλον ὧν ἔπαθεν ἀγαθῶν ἢ κακῶν, καὶ ἀγαθῶν ὧν ἔπαθε μᾶλλον ἢ <ῶν> ἐποίησεν. καὶ τὸ ἀνέχεσθαι ἀδικούμενον. καὶ τὸ μᾶλλον λόγῳ ἐθέλγειν κρίνεσθαι ἢ ἔργῳ. καὶ τὸ εἰς δίκαιον μᾶλλον ἢ εἰς δίκην βούλεσθαι ἰέναι· ὁ γὰρ διαιτητὴς τὸ ἐπιεικὲς ὀρᾷ, ὁ δὲ δικαστὴς τὸν νόμον· καὶ τούτου ἕνεκα διαιτητὴς εὐρέθῃ, ὅπως τὸ ἐπιεικὲς ἰσχύῃ.

περὶ μὲν οὖν τῶν ἐπιεικῶν διωρίσθω τὸν τρόπον τοῦτον.

Ἀδίκημα δὲ μείζον, ὅσῳ ἂν ἀπὸ μείζονος ἢ ἀδικίας· διὸ τὰ ἐλάχιστα μέγιστα, οἷον ὁ Μελανώπου Καλλίστρατος κατηγορεῖ, ὅτι παρελογίσατο τρία ἡμιωβέλια ἱερὰ τοὺς ναοποιούς· ἐπὶ δικαιοσύνης δὲ τοῦναντίον. ἔστιν δὲ ταῦτα ἐκ τοῦ ἐνυπάρχειν τῇ δυνάμει· ὁ γὰρ τρία ἡμιωβέλια ἱερὰ κλέψας κἂν ὅτιοῦν ἀδικήσειεν. ὅτε μὲν δὴ οὕτω τὸ μείζον, ὅτε δ' ἐκ τοῦ βλάβους κρίνεται. καὶ οὗ μὴ ἔστιν ἴση τιμωρία, ἀλλὰ πᾶσα ἐλάττων. καὶ οὗ μὴ ἔστιν ἴσας· χαλεπὸν γὰρ καὶ ἀδύνατον. καὶ οὗ μὴ ἔστιν δίκην λαβεῖν τὸν παθόντα· ἀνίατον γάρ· ἢ γὰρ δίκη καὶ κόλασις καὶ ἴσας. καὶ εἰ ὁ παθὼν καὶ ἀδικηθεὶς αὐτὸς αὐτὸν μεγάλως ἐκόλασεν· ἔτι γὰρ μείζονι ὁ ποιήσας δίκαιος

νήπιος ὃς πατέρα κτείνας υἱοὺς καταλείπει.

πρόσφατοι δὲ ὅσοι γνώριμοί τι κεκρίκασιν· χρήσιμοι γὰρ αἱ τούτων κρίσεις τοῖς περὶ τῶν αὐτῶν ἀμφισβητοῦσιν, οἷον Εὐβουλος ἐν τοῖς δικαστηρίοις ἐχρήσατο κατὰ Χάρητος ὃ Πλάτων εἶπε πρὸς Ἀρχίβιον, ὅτι ἐπιδέδωκεν ἐν τῇ πόλει τὸ ὁμολογεῖν πονηροὺς εἶναι.

καὶ οἱ μετέχοντες τοῦ κινδύνου, ἂν δόξωσι ψεύδεσθαι. οἱ μὲν οὖν τοιοῦτοι τούτων μόνον μάρτυρές εἰσιν, εἰ γέγονεν ἢ μὴ, εἰ ἔστιν ἢ μὴ, περὶ δὲ τοῦ ποῖον οὐ μάρτυρες, οἷον εἰ δίκαιον ἢ ἄδικον, εἰ συμφέρον ἢ ἀσύμφορον· οἱ δ' ἄπωθεν περὶ τούτων πιστότεροι, πιστότατοι δ' οἱ παλαιοί· ἀδιάφθοροι γάρ.

πιστώματα δὲ περὶ μαρτυριῶν μάρτυρας μὲν μὴ ἔχοντι, ὅτι ἐκ τῶν εἰκότων δεῖ κρίνειν καὶ τοῦτ' ἐστὶ τὸ “γνώμη τῇ ἀρίστη”, καὶ ὅτι οὐκ ἔστιν ἐξαπατῆσαι τὰ εἰκότα ἐπὶ ἀργυρίῳ, καὶ ὅτι οὐχ ἀλίσκεται τὰ εἰκότα ψευδομαρτυριῶν· ἔχοντι δὲ πρὸς μὴ ἔχοντα, ὅτι οὐχ ὑπόδικα τὰ εἰκότα, καὶ ὅτι οὐδὲν ἂν ἔδει μαρτυριῶν, εἰ ἐκ τῶν λόγων ἱκανὸν ἦν θεωρῆσαι.

εἰσὶ δὲ αἱ μαρτυρίαι αἱ μὲν περὶ αὐτοῦ αἱ δὲ περὶ τοῦ ἀμφισβητοῦντος, καὶ αἱ μὲν περὶ τοῦ πράγματος αἱ δὲ περὶ τοῦ ἥθους, ὥστε φανερόν ὅτι οὐδέποτε' ἔστιν ἀπορῆσαι μαρτυρίας χρησίμης· εἰ μὴ γὰρ κατὰ τοῦ πράγματος ἢ αὐτῷ ὁμολογουμένης ἢ τῷ ἀμφισβητοῦντι ἐναντίας, ἀλλὰ περὶ τοῦ ἥθους ἢ αὐτοῦ εἰς ἐπιείκειαν ἢ τοῦ ἀμφισβητοῦντος εἰς φανυλότητα. τὰ δ' ἄλλα περὶ μάρτυρος, ἢ φίλου ἢ ἐχθροῦ ἢ μεταξύ, ἢ εὐδοκιμοῦντος ἢ ἀδοξοῦντος ἢ μεταξύ, καὶ ὅσαι ἄλλαι τοιαῦται διαφοραί, ἐκ τῶν αὐτῶν τόπων λεκτέον ἐξ οἷων περ καὶ τὰ ἐνθυμήματα λέγομεν.

περὶ δὲ τῶν συνθηκῶν τοσαύτη τῶν λόγων χρῆσις ἐστὶν ὅσον αὖξιν ἢ καθαιρεῖν, ἢ πιστὰς ποιεῖν ἢ ἀπίστους - ἐὰν [1376b] μὲν αὐτῷ ὑπάρχωσι, πιστὰς καὶ κυρίας, ἐπὶ δὲ τοῦ ἀμφισβητοῦντος τούναντίον. πρὸς μὲν οὖν τὸ πιστὰς ἢ ἀπίστους κατασκευάζειν οὐδὲν διαφέρει τῆς περὶ τοὺς μάρτυρας πραγματείας· ὅποιοι γὰρ ἂν τινες ᾧσιν οἱ ἐπιγεγραμμένοι ἢ φυλάττοντες, τοιούτως αἱ συνθῆκαι πισταὶ εἰσιν. ὁμολογουμένης δ' εἶναι τῆς συνθήκης, οἰκείας μὲν οὕσης αὐξητέον· ἢ γὰρ συνθήκη νόμος ἐστὶν ἴδιος καὶ κατὰ μέρος, καὶ αἱ μὲν συνθῆκαι οὐ ποιοῦσι τὸν νόμον κύριον, οἱ δὲ νόμοι τὰς κατὰ νόμους συνθήκας, καὶ ὅλως αὐτὸς ὁ νόμος συνθήκη τίς ἐστὶν, ὥστε ὅστις ἀπιστεῖ ἢ ἀναιρεῖ συνθήκην τοὺς νόμους ἀναιρεῖ. ἔτι δὲ πράττεται τὰ πολλὰ τῶν συναλλαγμάτων καὶ τὰ ἐκούσια κατὰ συνθήκας, ὥστε ἀκύρων γιγνομένων ἀναιρεῖται ἢ πρὸς ἀλλήλους χρεῖα τῶν ἀνθρώπων. καὶ τᾶλλα δὲ ὅσα ἀρμόττει ἐπιπολῆς ἰδεῖν ἔστιν. ἂν δ' ἐναντία ᾗ, καὶ μετὰ τῶν ἀμφισβητούντων, πρῶτον μὲν, ἅπερ ἂν τις πρὸς νόμον ἐναντίον μαχέσαιτο, ταῦτα ἀρμόττει· ἄτοπον γὰρ εἰ τοῖς μὲν νόμοις, ἂν μὴ ὀρθῶς κείμενοι ᾧσιν ἄλλ' ἐξαμάρτωσιν

οἱ τιθέμενοι, οὐκ οἰόμεθα δεῖν πείθεσθαι, ταῖς δὲ συνθήκαις ἀναγκαῖον. εἴτα ὅτι τοῦ δικαίου ἐστὶ βραβευτὴς ὁ δικαστής· οὐκ οὖν τοῦτο σκεπτέον, ἀλλ' ὥς δικαιότερον· καὶ τὸ μὲν δίκαιον οὐκ ἔστιν μεταστρέψαι οὔτ' ἀπάτῃ οὔτ' ἀνάγκῃ (πεφυκὸς γάρ ἐστιν), συνθήκαι δὲ γίνονται καὶ ἐξαπατηθέντων καὶ ἀναγκασθέντων. πρὸς δὲ τούτοις σκοπεῖν εἰ ἐναντία ἐστὶ τινι τῶν γεγραμμένων νόμων ἢ τῶν κοινῶν, καὶ τῶν γεγραμμένων ἢ τοῖς οἰκείοις ἢ τοῖς ἀλλοτρίοις, ἔπειτα εἰ ἢ ἄλλαις συνθήκαις ὑστέραις ἢ προτέραις· ἢ γὰρ αἱ ὕστεραι κύριαι, ἄκυροι δ' αἱ πρότεραι, ἢ αἱ πρότεραι ὀρθαί, αἱ δ' ὕστεραι ἡπατήκασιν, ὁποτέρως ἂν ᾖ χρήσιμον. ἔτι δὲ τὸ συμφέρον ὁρᾶν, εἴ που ἐναντιοῦται τοῖς κριταῖς, καὶ ὅσα ἄλλα τοιαῦτα· καὶ γὰρ ταῦτα εὐθεώρητα ὁμοίως.

αἱ δὲ βάσανοι μαρτυρίαι τινές εἰσιν, ἔχειν δὲ δοκοῦσι τὸ πιστόν, ὅτι ἀνάγκη τις πρόσεστιν. οὐκ οὖν χαλεπὸν οὐδὲ περὶ τούτων εἰπεῖν τὰ ἐνδεχόμενα, ἐξ ὧν ἐάν τε ὑπάρχωσιν οἰκεῖται αὖξιν ἔστιν, ὅτι ἀληθεῖς μόναι τῶν μαρτυριῶν εἰσιν [1377a] αὗται, ἐάν τε ὑπεναντία ὥσι καὶ μετὰ τοῦ ἀμφισβητοῦντος, διαλύει ἂν τις τάληθῇ λέγων καθ' ὅλου τοῦ γένους τῶν βασάνων· οὐδὲν γὰρ ἤττον ἀναγκαζόμενοι τὰ ψευδῇ λέγουσιν ἢ τάληθῇ, καὶ διακαρτεροῦντες μὴ λέγειν τάληθῇ, καὶ ῥαδίως καταψευδόμενοι ὥς παυσόμενοι θᾶπτον. δεῖ δὲ ἔχειν ἐπαναφέρειν ἐπὶ τοιαῦτα γεγενημένα παραδείγματα ἃ ἴσασιν οἱ κρίνοντες. δεῖ δὲ λέγειν ὥς οὐκ εἰσιν ἀληθεῖς αἱ βάσανοι· πολλοὶ μὲν γὰρ παχύφρονες [οἱ] καὶ λιθόδερμοι καὶ ταῖς ψυχαῖς ὄντες δυνατοὶ γενναίως ἐγκαρτεροῦσι ταῖς ἀνάγκαις, οἱ δὲ δειλοὶ καὶ εὐλαβεῖς πρὸ τοῦ τὰς ἀνάγκας ἰδεῖν αὐτῶν καταθαρροῦσιν, ὥστε οὐδὲν ἔστι πιστόν ἐν βασάνοις.

περὶ δ' ὄρκων τετραχῶς ἔστι διελεῖν· ἢ γὰρ δίδωσι καὶ λαμβάνει, ἢ οὐδέτερον, ἢ τὸ μὲν τὸ δ' οὐ, καὶ τούτων ἢ δίδωσιν μὲν οὐ λαμβάνει δέ, ἢ λαμβάνει μὲν δίδωσιν δὲ οὐ. ἔτι ἄλλως παρὰ ταῦτα, εἰ ὁμώμοσται οὗτος ὑπ' αὐτοῦ ἢ ὑπ' ἐκείνου.

οὐ δίδωσιν μὲν οὖν, ὅτι ῥαδίως ἐπιорκοῦσιν, καὶ ὅτι ὁ μὲν ὁμόσας οὐκ ἀποδίδωσιν, τοὺς δὲ μὴ ὁμόσαντος οἶεται καταδικάσειν, καὶ [ὥς] οὗτος ὁ κίνδυνος κρείττων, ὁ ἐν τοῖς δικασταῖς· τοῖς μὲν γὰρ πιστεύει τῷ δ' οὐ.

οὐ λαμβάνει δ', ὅτι ἀντὶ χρημάτων ὄρκος, καὶ ὅτι εἰ ἦν φαῦλος, κατωμόσατο ἄν· κρεῖττον γὰρ ἂν <ἦν> ἕνεκά του φαῦλον εἶναι ἢ μηδενός· ὁμόσας μὲν οὖν ἔξει, μὴ ὁμόσας δ' οὐ· οὕτως δὲ δι' ἀρετὴν

ἂν εἴη, ἀλλ' οὐ δι' ἐπιπορκίαν, τὸ μή. καὶ τὸ τοῦ Ξενοφάνους ἀρμόττει, ὅτι “οὐκ ἴση πρόκλησις αὕτη τὰσεβεῖ πρὸς εὐσεβῇ”, ἀλλ' ὁμοία καὶ εἰ ἰσχυρὸς ἀσθενῇ πατάξαι ἢ πληγῇναι προκαλέσαιτο.

εἰ δὲ λαμβάνει, ὅτι πιστεύει αὐτῷ, ἐκείνῳ δ' οὐ. καὶ τὸ τοῦ Ξενοφάνους μεταστρέψαντα φατέον οὕτως ἴσον εἶναι ἂν ὁ μὲν ἀσεβῆς διδῷ, ὁ δ' εὐσεβῆς ὁμνύη· δεινόν τε τὸ μὴ θέλιν αὐτόν, ὑπὲρ ὧν ἐκείνους ἀξιοῖ ὁμόσαντας δικάζειν.

εἰ δὲ δίδωσιν, ὅτι εὐσεβὲς τὸ θέλιν τοῖς θεοῖς ἐπιτρέπειν, καὶ ὅτι οὐδὲν δεῖ αὐτόν ἄλλων δικαστῶν δεῖσθαι (αὐτοῖς γὰρ δίδωσι κρίσιν), καὶ ὅτι ἄτοπον τὸ μὴ θέλιν ὁμνύναι περὶ ὧν ἄλλους ἀξιοῦσιν ὁμνύναι.

ἐπεὶ δὲ καθ' ἕκαστον δῆλον ὅπως λεκτέον, καὶ συνδυαζομένων πῶς λεκτέον δῆλον, οἷον εἰ αὐτὸς μὲν θέλει λαμβάνειν διδόναι δὲ μή, καὶ εἰ δίδωσι μὲν λαμβάνειν δὲ μὴ θέλει, καὶ εἰ λαμβάνειν καὶ διδόναι [1377b] θέλει εἴτε μηδέτερον· ἐκ γὰρ τῶν εἰρημένων ἀνάγκη συγκεῖσθαι, ὥστε καὶ τοὺς λόγους συγκεῖσθαι ἐκ τῶν εἰρημένων.

ἐὰν δὲ ἡ γεγενημένος ὑφ' αὐτοῦ καὶ ἐναντίος, ὅτι οὐκ ἐπιπορκία· ἐκούσιον γὰρ τὸ ἀδικεῖν, τὸ δ' ἐπιπορκεῖν ἀδικεῖν ἐστί, τὰ δὲ βία καὶ ἀπάτη ἀκούσια. ἐνταῦθα οὖν συνακτέον καὶ τὸ ἐπιπορκεῖν, ὅτι ἐστί τὸ τῇ διανοίᾳ ἀλλ' οὐ τῷ στόματι. ἐὰν δὲ τῷ ἀντιδίκῳ ἡ ὑπεναντίος καὶ ὁμωμοσμένος, ὅτι πάντα ἀναιρεῖ μὴ ἐμμένων οἷς ὥμοσεν· διὰ γὰρ τοῦτο καὶ τοῖς νόμοις χρῶνται ὁμόσαντες. καὶ “ὑμᾶς μὲν ἀξιοῦσιν ἐμμένειν οἷς ὁμόσαντες δικάζετε, αὐτοὶ δὲ οὐκ ἐμμένουσιν”. καὶ ὅσα ἂν ἄλλα αὖξων τις εἴπειεν. περὶ μὲν οὖν τῶν ἀτέχνων πίστεων εἰρήσθω τοσαῦτα.

B

Ἐκ τίνων μὲν οὖν δεῖ καὶ προτρέπειν καὶ ἀποτρέπειν, καὶ ἐπαινεῖν καὶ ψέγειν, καὶ κατηγορεῖν καὶ ἀπολογεῖσθαι, καὶ ποῖαι δόξαι καὶ προτάσεις χρήσιμοι πρὸς τὰς τούτων πίστεις, ταῦτ' ἐστίν· περὶ γὰρ τούτων καὶ ἐκ τούτων τὰ ἐνθυμήματα, ὥς περὶ ἕκαστον εἰπεῖν ἰδίᾳ τὸ γένος τῶν λόγων.

ἐπεὶ δὲ ἔνεκα κρίσεώς ἐστιν ἡ ῥητορική (καὶ γὰρ τὰς συμβουλὰς κρίνουσι καὶ ἡ δίκη κρίσις ἐστίν), ἀνάγκη μὴ μόνον πρὸς τὸν λόγον ὄρᾶν, ὅπως ἀποδεικτικὸς ἔσται καὶ πιστός, ἀλλὰ καὶ αὐτὸν ποιόν τινα καὶ τὸν κριτὴν κατασκευάζειν· πολὺ γὰρ διαφέρει πρὸς πίστιν, μάλιστα μὲν ἐν ταῖς συμβουλαῖς, εἴτα καὶ ἐν ταῖς δίκαις, τό τε ποιόν τινα φαίνεσθαι τὸν λέγοντα καὶ τὸ πρὸς αὐτοὺς ὑπολαμβάνειν πως διακεῖσθαι αὐτόν, πρὸς δὲ τούτοις ἐὰν καὶ αὐτοὶ διακείμενοί πως τυγχάνωσιν. τὸ μὲν οὖν ποιόν τινα φαίνεσθαι τὸν λέγοντα χρησιμώτερον εἰς τὰς συμβουλὰς ἐστίν, τὸ δὲ διακεῖσθαι πως τὸν ἀκροατὴν εἰς τὰς δίκας· οὐ γὰρ ταῦτ' ἀφαίρεται φιλοῦσι καὶ μισοῦσιν, οὐδ' ὀργιζομένοις καὶ πράως ἔχουσιν, ἀλλ' ἢ τὸ παράπαν ἕτερα ἢ [1378a] κατὰ μέγεθος ἕτερα· τῷ μὲν γὰρ φιλοῦντι περὶ οὗ ποιεῖται τὴν κρίσιν ἢ οὐκ ἀδικεῖν ἢ μικρὰ δοκεῖ ἀδικεῖν, τῷ δὲ μισοῦντι τούναντίον· καὶ τῷ μὲν ἐπιθυμοῦντι καὶ εὐέλπιδι ὄντι, ἐὰν ᾗ τὸ ἐσόμενον ἡδύ, καὶ ἔσσεσθαι καὶ ἀγαθὸν ἔσσεσθαι φαίνεται, τῷ δ' ἀπαθεῖ <ἢ> καὶ δυσχεραίνοντι τούναντίον.

τοῦ μὲν οὖν αὐτοὺς εἶναι πιστοὺς τοὺς λέγοντας τρία ἐστὶ τὰ αἷτια· τοσαῦτα γὰρ ἐστὶ δι' ἃ πιστεύομεν ἔξω τῶν ἀποδείξεων. ἔστι δὲ ταῦτα φρόνησις καὶ ἀρετὴ καὶ εὖνοια· διαψεύδονται γὰρ περὶ ὧν λέγουσιν ἢ συμβουλεύουσιν ἢ δι' ἅπαντα ταῦτα ἢ διὰ τούτων τι· ἢ γὰρ δι' ἀφροσύνην οὐκ ὀρθῶς δοξάζουσιν, ἢ δοξάζοντες ὀρθῶς διὰ μοχθηρίαν οὐ τὰ δοκοῦντα λέγουσιν, ἢ φρόνιμοι μὲν καὶ ἐπιεικεῖς εἰσιν ἀλλ' οὐκ εὖνοι, διόπερ ἐνδέχεται μὴ τὰ βέλτιστα συμβουλεύειν γινώσκοντας, καὶ παρὰ ταῦτα οὐδέν. ἀνάγκη ἄρα τὸν ἅπαντα δοκοῦντα ταῦτ' ἔχειν εἶναι τοῖς ἀκροωμένοις πιστόν. ὅθεν μὲν οὖν φρόνιμοι καὶ σπουδαῖοι φανεῖεν ἄν, ἐκ τῶν περὶ τὰς ἀρετὰς διηρημένων ληπτέον· ἐκ γὰρ τῶν αὐτῶν κἂν ἕτερόν τις κἂν ἑαυτὸν κατασκευάσειε τοιοῦτον· περὶ δ' εὐνοίας καὶ φιλίας ἐν τοῖς περὶ τὰ πάθη λεκτέον.

ἔστι δὲ τὰ πάθη δι' ὅσα μεταβάλλοντες διαφέρουσι πρὸς τὰς κρίσεις οἷς ἔπεται λύπη καὶ ἡδονή, οἷον ὀργή ἔλεος φόβος καὶ ὅσα ἄλλα τοιαῦτα, καὶ τὰ τούτοις ἐναντία. δεῖ δὲ διαιρεῖν περὶ ἕκαστον εἰς τρία, λέγω δ' οἷον περὶ ὀργῆς πῶς τε διακείμενοι ὀργίλοι εἰσὶ, καὶ τίσιν εἰώθασιν ὀργίζεσθαι, καὶ ἐπὶ ποίοις· εἰ γὰρ τὸ μὲν ἔν ἡ τὰ δύο ἔχοιμεν τούτων, ἅπαντα δὲ μὴ, ἀδύνατον ἂν εἴη τὴν ὀργὴν ἐμποιεῖν· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ὥσπερ οὖν καὶ ἐπὶ τῶν προειρημένων διεγράψαμεν τὰς προτάσεις, οὕτω καὶ περὶ τούτων ποιήσωμεν καὶ διέλωμεν τὸν εἰρημένον τρόπον.

Ἔστω δὴ ὀργὴ ὀρεξις μετὰ λύπης τιμωρίας [φαινομένης] διὰ φαινομένην ὀλιγωρίαν εἰς αὐτὸν ἢ <τι> τῶν αὐτοῦ, τοῦ ὀλιγωρεῖν μὴ προσήκοντος. εἰ δὴ τοῦτ' ἐστὶν ἡ ὀργή, ἀνάγκη τὸν ὀργιζόμενον ὀργίζεσθαι ἀεὶ τῶν καθ' ἕκαστόν τι, οἷον Κλέωνι ἀλλ' οὐκ ἀνθρώπῳ, καὶ ὅτι αὐτὸν ἢ τῶν αὐτοῦ τί [1378b] πεποίηκεν ἢ ἡμέλλεν, καὶ πάσῃ ὀργῇ ἔπεσθαί τινα ἡδονήν, τὴν ἀπὸ τῆς ἐλπίδος τοῦ τιμωρήσασθαι· ἡδὺ μὲν γὰρ τὸ οἶεσθαι τεύξεσθαι ὧν ἐφίεται, οὐδεὶς δὲ τῶν φαινομένων ἀδυνάτων ἐφίεται αὐτῷ, ὁ δὲ ὀργιζόμενος ἐφίεται δυνατῶν αὐτῷ. διὸ καλῶς εἴρηται περὶ θυμοῦ·

ὅς τε πολὺ γλυκίων μέλιτος καταλειβομένοιο

ἀνδρῶν ἐν στήθεσσι ἀέξεται·

ἀκολουθεῖ γὰρ καὶ ἡδονή τις διὰ τε τοῦτο καὶ διότι διατρίβουσιν ἐν τῷ τιμωρεῖσθαι τῇ διανοίᾳ· ἡ οὖν τότε γινομένη φαντασία ἡδονὴν ἐμποιεῖ, ὥσπερ ἡ τῶν ἐνυπνίων.

ἐπεὶ δὲ ἡ ὀλιγωρία ἐστὶν ἐνέργεια δόξης περὶ τὸ μηδενὸς ἄξιον φαινόμενον (καὶ γὰρ τὰ κακὰ καὶ τὰγαθὰ ἄξια οἰόμεθα σπουδῆς εἶναι, καὶ τὰ συντείνοντα πρὸς αὐτά· ὅσα δὲ μηδέν τι ἢ μικρόν, οὐδενὸς ἄξια ὑπολαμβάνομεν), τρία ἐστὶν εἶδη ὀλιγωρίας, καταφρόνησίς τε καὶ ἐπηρεασμὸς καὶ ὕβρις· ὁ τε γὰρ καταφρονῶν ὀλιγωρεῖ (ὅσα γὰρ οἶονται μηδενὸς ἄξια, τούτων καταφρονοῦσιν, τῶν δὲ μηδενὸς ἄξιων ὀλιγοροῦσιν), καὶ ὁ ἐπηρεάζων φαίνεται ὀλιγωρεῖν. ἔστι γὰρ ὁ ἐπηρεασμὸς ἐμποδισμὸς ταῖς βουλήσεσιν μὴ ἵνα τι αὐτῷ ἀλλ' ἵνα μὴ ἐκείνῳ· ἐπεὶ οὖν οὐχ ἵνα αὐτῷ τι, ὀλιγωρεῖ· δηλὸν γὰρ ὅτι οὔτε βλάψειν ὑπολαμβάνει, ἐφοβεῖτο γὰρ ἂν καὶ οὐκ ὀλιγώρει, οὗτ' ὠφελῆσαι ἂν οὐδὲν ἄξιον λόγου, ἐφρόντιζε γὰρ ἂν ὥστε φίλος εἶναι· καὶ ὁ ὑβρίζων δὲ ὀλιγωρεῖ· ἔστι γὰρ ὕβρις τὸ πράττειν καὶ λέγειν ἐφ' οἷς αἰσχύνῃ ἔστι τῷ πάσχοντι, μὴ ἵνα τι γίγνηται αὐτῷ ἄλλο ἢ ὅ τι ἐγένετο, ἀλλ' ὅπως ἡσθῇ· οἱ γὰρ

ἀντιποιοῦντες οὐχ ὑβρίζουσιν ἀλλὰ τιμωροῦνται. αἴτιον δὲ τῆς ἡδονῆς τοῖς ὑβρίζουσιν, ὅτι οἶονται κακῶς δρῶντες αὐτοὶ ὑπερέχειν μᾶλλον (διὸ οἱ νέοι καὶ οἱ πλούσιοι ὑβρισταί· ὑπερέχειν γὰρ οἶονται ὑβρίζοντες)· ὕβρεως δὲ ἀτιμία, ὃ δ' ἀτιμάζων ὀλιγωρεῖ· τὸ γὰρ μηδενὸς ἄξιον οὐδεμίαν ἔχει τιμὴν, οὔτε ἀγαθοῦ οὔτε κακοῦ· διὸ λέγει ὀργιζόμενος ὁ Ἀχιλλεὺς

ἡτίμησεν· ἐλὼν γὰρ ἔχει γέρας αὐτὸς

καὶ

ὥς εἴ τιν' ἀτίμητον μετανάστην,

ὥς διὰ ταῦτα ὀργιζόμενος. προσήκειν δὲ οἶονται πολυωρεῖσθαι ὑπὸ τῶν ἡττόνων κατὰ γένος, κατὰ δύναμιν, κατ' ἄρετήν, [1379a] καὶ ὅλως ἐν ᾧ ἂν αὐτὸς ὑπερέχη πολύ, οἷον ἐν χρήμασιν ὁ πλούσιος πένητος καὶ ἐν τῷ λέγειν ῥητορικὸς ἀδυνάτου εἰπεῖν καὶ ἄρχων ἄρχομένου καὶ ἄρχειν ἄξιος [οἰόμενος] τοῦ ἄρχεσθαι ἀξίου· διὸ εἴρηται

φανερὸν οὖν ἐκ τούτων ἤδη πῶς τε ἔχοντες ὀργίζονται αὐτοὶ καὶ τίσιν καὶ διὰ ποῖα. αὐτοὶ μὲν γάρ, ὅταν λυπῶνται· ἐφίεται γάρ τινος ὁ λυπούμενος· ἐάν τε οὖν κατ' εὐθυωρίαν ὀτιοῦν ἀντικρούση τις, οἷον τῷ διψῶντι πρὸς τὸ πιεῖν, ἐάν τε μὴ, ὁμοίως ταὐτὸ φαίνεται ποιεῖν· καὶ ἐάν τε ἀντιπράττη τις ἐάν τε μὴ συμπράττη ἐάν τε ἄλλο τι ἐνοχλῇ οὕτως ἔχοντα, πᾶσιν ὀργίζεται· διὸ κάμνοντες, πενόμενοι, <πολεμοῦντες> ἐρῶντες, διψῶντες, ὅλως ἐπιθυμοῦντες καὶ μὴ κατορθοῦντες ὀργίλοι εἰσὶ καὶ εὐπαρόρμητοι, μάλιστα μὲν πρὸς τοὺς τοῦ παρόντος ὀλιγωροῦντας, οἷον κάμνων μὲν τοῖς πρὸς τὴν νόσον, πενόμενος δὲ τοῖς πρὸς τὴν πενίαν, πολεμῶν δὲ τοῖς πρὸς τὸν πόλεμον, ἐρῶν δὲ τοῖς πρὸς τὸν ἔρωτα, ὁμοίως δὲ καὶ τοῖς ἄλλοις <εἰ δὲ μὴ, κἂν ὀτιοῦν ἄλλο ὀλιγορῇ τις>· προσοδοποιεῖται γὰρ ἕκαστος πρὸς τὴν ἐκάστου ὀργὴν ὑπὸ τοῦ ὑπάρχοντος πάθους· ἔτι δ' ἐάν τάναντία τύχῃ προσδεχόμενος· λυπεῖ γὰρ μᾶλλον τὸ πολὺ παρὰ δόξαν, ὥσπερ καὶ τέρπει τὸ πολὺ παρὰ δόξαν, ἐάν γένηται ὁ βούλεται· διὸ καὶ ὥραι καὶ χρόνοι καὶ διαθέσεις καὶ ἡλικίαι ἐκ

τούτων φανεραί, ποῖαι εὐκίνητοι πρὸς ὀργὴν καὶ ποῦ καὶ πότε, καὶ ὅτε μᾶλλον ἐν τούτοις εἰσὶ, μᾶλλον καὶ εὐκίνητοι.

αὐτοὶ μὲν οὖν οὕτως ἔχοντες εὐκίνητοι πρὸς ὀργήν, ὀργίζονται δὲ τοῖς τε καταγελῶσι καὶ χλευάζουσιν καὶ σκώπτουσιν (ὕβριζουσι γάρ), καὶ τοῖς τὰ τοιαῦτα βλάπτουσιν ὅσα ὕβρεως σημεῖα· ἀνάγκη δὲ τοιαῦτα εἶναι ἃ μήτε ἀντί τινος μήτ' ὠφέλιμα τοῖς ποιοῦσιν· ἤδη γὰρ δοκεῖ δι' ὕβριν. καὶ τοῖς κακῶς λέγουσι καὶ καταφρονοῦσι περὶ ὧν αὐτοὶ μάλιστα σπουδάζουσιν, οἷον οἱ ἐπὶ φιλοσοφίᾳ φιλοτιμούμενοι ἐάν τις εἰς τὴν φιλοσοφίαν, οἱ δ' ἐπὶ τῇ ιδέᾳ ἐάν τις εἰς τὴν ιδέαν, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ταῦτα δὲ πολλῶ μᾶλλον, ἐὰν ὑποπτεύσωσι μὴ ὑπάρχειν αὐτοῖς, ἢ ὅλως ἢ μὴ ἰσχυρῶς, ἢ [1379b] μὴ δοκεῖν· ἐπειδὴν γὰρ σφόδρα οἶωνται ὑπερέχειν ἐν τούτοις ἐν οἷς σκώπτονται, οὐ φροντίζουσιν. καὶ τοῖς φίλοις μᾶλλον ἢ τοῖς μὴ φίλοις· οἶονται γὰρ προσήκειν μᾶλλον πάσχειν εὖ ὑπ' αὐτῶν ἢ μή. καὶ τοῖς εἰθισμένους τιμᾶν ἢ φροντίζειν, ἐὰν πάλιν μὴ οὕτως ὁμιλῶσιν· καὶ γὰρ ὑπὸ τούτων οἶονται καταφρονεῖσθαι· ταῦτα γὰρ ἂν ποιεῖν. καὶ τοῖς μὴ ἀντιποιοῦσιν εὖ μηδὲ τὴν ἴσην ἀνταποδιδούσιν. καὶ τοῖς τάναντία ποιοῦσιν αὐτοῖς, ἐὰν ἥττους ᾖσιν. καταφρονεῖν γὰρ πάντες οἱ τοιοῦτοι φαίνονται, καὶ οἱ μὲν ὡς ἡττόνων οἱ δ' ὡς παρὰ ἡττόνων. καὶ τοῖς ἐν μηδενὶ λόγῳ οὔσιν, ἂν τι ὀλιγορῶσι, μᾶλλον· ὑπόκειται γὰρ ἡ ὀργὴ τῆς ὀλιγορίας πρὸς τοὺς μὴ προσήκοντας, προσήκει δὲ τοῖς ἥττοσι μὴ ὀλιγορεῖν· τοῖς δὲ φίλοις, ἐάν τε μὴ εὖ λέγωσιν ἢ ποιῶσιν, καὶ ἔτι μᾶλλον ἐὰν τάναντία, καὶ ἐὰν μὴ αἰσθάνωνται δεομένων, ὥσπερ ὁ Ἀντιφῶντος Πλήξιππος τῷ Μελεάγρῳ· ὀλιγορίας γὰρ τὸ μὴ αἰσθάνεσθαι σημεῖον· ὧν γὰρ φροντίζομεν οὐ λανθάνει. καὶ τοῖς ἐπιχαίρουσι ταῖς ἀτυχίαις καὶ ὅλως εὐθυμουμένοις ἐν ταῖς αὐτῶν ἀτυχίαις· ἢ γὰρ ἐχθροῦ ἢ ὀλιγορουῆτος σημεῖον. καὶ τοῖς μὴ φροντίζουσιν ἐὰν λυπήσωσιν· διὸ καὶ τοῖς κακὰ ἀγγέλλουσιν ὀργίζονται. καὶ τοῖς ἢ ἀκούουσι περὶ αὐτῶν ἢ θεωμένοις τὰ αὐτῶν φαῦλα· ὅμοιοι γὰρ εἰσιν ἢ ὀλιγοροῦσιν ἢ ἐχθροῖς· οἱ γὰρ φίλοι συναλγοῦσιν, θεώμενοι δὲ τὰ οἰκεῖα φαῦλα πάντες ἀλγοῦσιν. ἔτι τοῖς ὀλιγοροῦσι πρὸς πέντε, πρὸς οὓς φιλοτιμοῦνται, [πρὸς] οὓς θαυμάζουσιν, ὑφ' ὧν βούλονται θαυμάζεσθαι, ἢ οὓς αἰσχύνονται, ἢ ἐν τοῖς αἰσχυνομένοις αὐτοῦς· ἂν τις ἐν τούτοις ὀλιγορῇ, ὀργίζονται μᾶλλον. καὶ τοῖς εἰς τὰ τοιαῦτα ὀλιγοροῦσιν ὑπὲρ ὧν αὐτοῖς αἰσχρὸν μὴ βοηθεῖν, οἷον γονεῖς, τέκνα, γυναικας, ἀρχομένους. καὶ τοῖς χάριν μὴ ἀποδιδούσιν· παρὰ τὸ

προσηκον γὰρ ἡ ὀλιγωρία. καὶ τοῖς εἰρωνευομένοις πρὸς σπουδάζοντας· καταφρονητικὸν γὰρ ἡ εἰρωνεία. καὶ τοῖς τῶν ἄλλων εὐποητικοῖς, ἐὰν μὴ καὶ αὐτῶν· καὶ γὰρ τοῦτο καταφρονητικόν, τὸ μὴ ἀξιοῦν, ὧν πάντας, καὶ αὐτόν. ποιητικὸν δ' ὀργῆς καὶ ἡ λήθη, οἶον καὶ ἡ τῶν ὀνομάτων, οὕτως οὕσα περὶ μικρόν· ὀλιγωρίας γὰρ δοκεῖ καὶ ἡ λήθη σημεῖον εἶναι· δι' ἀμέλειαν μὲν γὰρ ἡ λήθη γίγνεται, ἡ δ' ἀμέλεια ὀλιγωρία τίς ἐστιν.

Τίνας δὲ φιλοῦσι καὶ μισοῦσι, καὶ διὰ τί, τὴν φιλίαν καὶ τὸ φιλεῖν ὀρισάμενοι λέγωμεν. ἔστω δὴ τὸ φιλεῖν τὸ βούλεσθαι τινι ἃ οἶεται ἀγαθὰ, ἐκείνου ἕνεκα ἀλλὰ μὴ αὐτοῦ, καὶ τὸ [1381a] κατὰ

δύναμιν πρακτικὸν εἶναι τούτων. φίλος δέ ἐστιν ὁ φιλῶν καὶ ἀντιφιλούμενος· οἶονται δὲ φίλοι εἶναι οἱ οὕτως ἔχειν οἰόμενοι πρὸς ἀλλήλους. τούτων δὲ ὑποκειμένων ἀνάγκη φίλον εἶναι τὸν συνηδόμενον τοῖς ἀγαθοῖς καὶ συναλγοῦντα τοῖς λυπηροῖς μὴ διὰ τι ἕτερον ἀλλὰ δι' ἐκεῖνον· γιγνομένων γὰρ ὧν βούλονται χαίρουσιν πάντες, τῶν ἐναντίων δὲ λυποῦνται, ὥστε τῆς βουλήσεως σημεῖον αἱ λῦπαι καὶ αἱ ἡδοναί. καὶ οἷς δὴ ταῦτά ἀγαθὰ καὶ κακά, καὶ οἱ τοῖς αὐτοῖς φίλοι καὶ οἱ τοῖς αὐτοῖς ἐχθροί· ταῦτά γὰρ τούτοις βούλεσθαι ἀνάγκη, ὥστε ἅπερ αὐτῷ καὶ ἄλλῳ βουλόμενος τούτῳ φαίνεται φίλος εἶναι. καὶ τοὺς πεποιηκότας εὖ φιλοῦσιν, ἢ αὐτοὺς ἢ ὧν κήδονται, ἢ εἰ μεγάλα, ἢ εἰ προθύμως, ἢ εἰ ἐν τοιούτοις καιροῖς, καὶ αὐτῶν ἕνεκα, ἢ οὓς ἂν οἶωνται βούλεσθαι ποιεῖν εὖ. καὶ τοὺς τῶν φίλων φίλους καὶ φιλοῦντας οὓς αὐτοὶ φιλοῦσιν. καὶ τοὺς φιλουμένους ὑπὸ τῶν φιλουμένων αὐτοῖς. καὶ τοὺς τοῖς αὐτοῖς ἐχθροὺς καὶ μισοῦντας οὓς αὐτοὶ μισοῦσιν, καὶ τοὺς μισουμένους ὑπὸ τῶν αὐτοῖς μισουμένων· πᾶσιν γὰρ τούτοις τὰ αὐτὰ ἀγαθὰ φαίνεται εἶναι καὶ αὐτοῖς, ὥστε βούλεσθαι τὰ αὐτοῖς ἀγαθὰ, ὅπερ ἦν τοῦ φίλου. ἔτι τοὺς εὐποιοητικούς εἰς χρήματα καὶ εἰς σωτηρίαν· διὸ τοὺς ἐλευθερίους καὶ ἀνδρείους τιμῶσι καὶ τοὺς δικαίους· τοιούτους δ' ὑπολαμβάνουσι τοὺς μὴ ἀφ' ἐτέρων ζῶντας· τοιοῦτοι δ' οἱ ἀπὸ τοῦ ἐργάζεσθαι, καὶ τούτων οἱ ἀπὸ γεωργίας, καὶ τῶν ἄλλων οἱ αὐτουργοὶ μάλιστα. καὶ τοὺς σώφρονας, ὅτι οὐκ ἄδικοι. καὶ τοὺς ἀπράγμονας διὰ τὸ αὐτό. καὶ οἷς βουλόμεθα φίλοι εἶναι, ἂν φαίνωνται βουλόμενοι· εἰσὶ δὲ τοιοῦτοι οἱ τ' ἀγαθοὶ κατ' ἀρετὴν καὶ οἱ εὐδόκιμοι ἢ ἐν ἅπασιν ἢ ἐν τοῖς βελτίστοις ἢ ἐν τοῖς θαυμάζομένοις ὑφ' αὐτῶν ἢ ἐν τοῖς θαυμάζουσιν αὐτούς. ἔτι τοὺς ἡδεῖς συνδιαγαγεῖν καὶ συνδιημερεῦσαι· τοιοῦτοι δ' οἱ εὐκολοὶ καὶ μὴ ἐλεγκτικοὶ τῶν ἁμαρτανομένων καὶ μὴ φιλόνικοι μηδὲ δυσέριδες (πάντες γὰρ οἱ τοιοῦτοι μαχητικοί, οἱ δὲ μαχόμενοι τάναντία φαίνονται βούλεσθαι), καὶ οἱ ἐπιδέξιοι καὶ τῷ τωθάσαι καὶ τῷ ὑπομεῖναι· ἐπὶ ταῦτό γὰρ ἀμφοτέρως σπεύδουσι τῷ πλησίον, δυνάμενοί τε σκώπτεσθαι καὶ ἐμμελῶς σκώπτοντες. καὶ τοὺς ἐπαινοῦντας τὰ ὑπάρχοντα ἀγαθὰ, καὶ τούτων μάλιστα ἃ φοβοῦνται μὴ ὑπάρχειν [1381b] αὐτοῖς. καὶ τοὺς καθαρείους περὶ ὧσιν, περὶ ἀμπεχόνην, περὶ ὅλον τὸν βίον. καὶ τοὺς μὴ ὄνειδιστὰς μήτε τῶν ἁμαρτημάτων μήτε τῶν εὐεργετημάτων· ἀμφοτέροι γὰρ ἐλεγκτικοί. καὶ τοὺς μὴ μνησικακοῦντας, μηδὲ φυλακτικούς τῶν ἐγκλημάτων,

ἀλλ' εὐκαταλλάκτους· οἷους γὰρ ἂν ὑπολαμβάνωσιν εἶναι πρὸς τοὺς ἄλλους, καὶ πρὸς αὐτοὺς οἷονται. καὶ τοὺς μὴ κακολόγους μηδὲ εἰδότας μήτε τὰ τῶν πλησίον κακὰ μήτε τὰ αὐτῶν, ἀλλὰ τὰγαθὰ· ὁ γὰρ ἀγαθὸς ταῦτα δρᾷ. καὶ τοὺς μὴ ἀντιτείνοντας τοῖς ὀργιζομένοις ἢ σπουδάζουσιν· μαχητικοὶ γὰρ οἱ τοιοῦτοι. καὶ τοὺς πρὸς αὐτοὺς σπουδαίως πως ἔχοντας, οἷον θαυμάζοντας αὐτοὺς καὶ σπουδαίους ὑπολαμβάνοντας καὶ χαίροντας αὐτοῖς, καὶ ταῦτα μάλιστα πεπονθότας περὶ ἃ μάλιστα βούλονται αὐτοὶ ἢ θαυμάζεσθαι ἢ σπουδαῖοι δοκεῖν εἶναι ἢ ἡδεῖς. καὶ τοὺς ὁμοίους καὶ ταῦτ' ἐπιτηδεύοντας, ἐὰν μὴ παρενοχλῶσι μηδ' ἀπὸ ταυτοῦ ἢ ὁ βίος· γίγνεται γὰρ οὕτω τὸ “κεραμεὺς κεραμεῖ”. καὶ τοὺς τῶν αὐτῶν ἐπιθυμοῦντας, ὧν ἐνδέχεται ἅμα μετέχειν αὐτούς· εἰ δὲ μή, ταῦτ' οὐτω συμβαίνει. καὶ πρὸς οὓς οὕτως ἔχουσιν ὥστε μὴ αἰσχύνεσθαι τὰ πρὸς δόξαν, μὴ καταφρονοῦντες. καὶ πρὸς οὓς αἰσχύνονται τὰ πρὸς ἀλήθειαν. καὶ πρὸς οὓς φιλοτιμοῦνται, ἢ ὑφ' ὧν ζηλοῦσθαι βούλονται καὶ μὴ φθονεῖσθαι, τούτους ἢ φιλοῦσιν ἢ βούλονται φίλοι εἶναι. καὶ οἷς ἂν τὰγαθὰ συμπράττωσιν, ἐὰν μὴ μέλλῃ αὐτοῖς ἔσεσθαι μείζω κακὰ. καὶ οἱ ὁμοίως καὶ τοὺς ἀπόντας καὶ τοὺς παρόντας φιλοῦσιν· διὸ καὶ τοὺς περὶ τοὺς τεθνεῶτας τοιοῦτους πάντες φιλοῦσιν. καὶ ὅλως τοὺς σφόδρα φιλοφίλους καὶ μὴ ἐγκαταλείποντας· μάλιστα γὰρ φιλοῦσι τῶν ἀγαθῶν τοὺς φιλεῖν ἀγαθοὺς. καὶ τοὺς μὴ πλαττομένους πρὸς αὐτούς· τοιοῦτοι δὲ οἱ καὶ τὰ φαῦλα τὰ ἑαυτῶν λέγοντες· εἴρηται γὰρ ὅτι πρὸς τοὺς φίλους τὰ πρὸς δόξαν οὐκ αἰσχυνόμεθα· εἰ οὖν ὁ αἰσχυνόμενος μὴ φιλεῖ, ὁ μὴ αἰσχυνόμενος φιλοῦντι ἔοικεν. καὶ τοὺς μὴ φοβερούς, καὶ οὓς θαρροῦμεν· οὐδεὶς γὰρ ὃν φοβεῖται φιλεῖ.

εἶδη δὲ φιλίας ἐταιρεία οἰκειότης συγγένεια καὶ ὅσα τοιαῦτα. ποιητικά δὲ φιλίας χάρις καὶ τὸ μὴ δεηθέντος ποιῆσαι καὶ τὸ ποιήσαντα μὴ δηλῶσαι· αὐτοῦ γὰρ οὕτως ἔνεκα φαίνεται καὶ οὐ διὰ τι ἕτερον.

[1382a] περὶ δ' ἔχθρας καὶ τοῦ μισεῖν φανερόν ὥς ἐκ τῶν ἐναντίων ἔστι θεωρεῖν. ποιητικά δὲ ἔχθρας ὀργή, ἐπηρεασμός, διαβολή. ὀργή μὲν οὖν ἔστιν ἐκ τῶν πρὸς αὐτόν, ἔχθρα δὲ καὶ ἄνευ τοῦ πρὸς αὐτόν· ἂν γὰρ ὑπολαμβάνωμεν εἶναι τοιόνδε, μισοῦμεν. καὶ ἢ μὲν ὀργὴ ἀεὶ περὶ τὰ καθ' ἕκαστα, οἷον Καλλία ἢ Σωκράτει, τὸ δὲ μῖσος καὶ πρὸς τὰ γένη· τὸν γὰρ κλέπτην μισεῖ καὶ τὸν συκοφάντην ἅπας. καὶ τὸ μὲν ἱατὸν χρόνῳ, τὸ δ' ἀνίατον. καὶ τὸ μὲν λύπης

ἔφεσις, τὸ δὲ κακοῦ· αἰσθεσθαι γὰρ βούλεται ὁ ὀργιζόμενος, τῷ δ' οὐδὲν διαφέρει. ἔστι δὲ τὰ μὲν λυπηρὰ αἰσθητὰ πάντα, τὰ δὲ μάλιστα κακὰ ἥκιστα αἰσθητά, ἀδικία καὶ ἀφροσύνη· οὐδὲν γὰρ λυπεῖ ἢ παρουσία τῆς κακίας. καὶ τὸ μὲν μετὰ λύπης, τὸ δ' οὐ μετὰ λύπης· ὁ μὲν γὰρ ὀργιζόμενος λυπεῖται, ὁ δὲ μισῶν οὐ. καὶ ὁ μὲν πολλῶν ἄν γενομένων ἐλεήσειεν, ὁ δ' οὐδενός· ὁ μὲν γὰρ ἀντιπαθεῖν βούλεται ὃ ὀργίζεται, ὁ δὲ μὴ εἶναι.

φανερὸν οὖν ἐν τούτων ὅτι ἐνδέχεται ἐχθροὺς καὶ φίλους καὶ ὄντας ἀποδεικνύειν καὶ μὴ ὄντας ποιεῖν καὶ φάσκοντας διαλύειν, καὶ δι' ὀργὴν ἢ δι' ἔχθραν ἀμφισβητοῦντας ἐφ' ὁποτέραν ἂν προαιρῇται τις ἄγειν.

Ποῖα δὲ φοβοῦνται καὶ τίνας καὶ πῶς ἔχοντες, ὧδ' ἔσται φανερόν. ἔστω δὴ ὁ φόβος λύπη τις ἢ ταραχὴ ἐκ φαντασίας μέλλοντος κακοῦ φθαρτικοῦ ἢ λυπηροῦ· οὐ γὰρ πάντα τὰ κακὰ φοβοῦνται, οἷον εἰ ἔσται ἄδικος ἢ βραδύς, ἀλλ' ὅσα λύπας μεγάλας ἢ φθορὰς δύναται, καὶ ταῦτα ἐὰν μὴ πόρρω ἀλλὰ σύνεγγυς φαίνεται ὥστε μέλλειν. τὰ γὰρ πόρρω σφόδρα οὐ φοβοῦνται· ἴσασι γὰρ πάντες ὅτι ἀποθανοῦνται, ἀλλ' ὅτι οὐκ ἐγγύς, οὐδὲν φροντίζουσιν. εἰ δὴ ὁ φόβος τοῦτ' ἐστίν, ἀνάγκη τὰ τοιαῦτα φοβερὰ εἶναι ὅσα φαίνεται δύναμιν ἔχειν μεγάλην τοῦ φθεῖρειν ἢ βλάπτειν βλάβας εἰς λύπην μεγάλην συντεινούσας· διὸ καὶ τὰ σημεῖα τῶν τοιούτων φοβερὰ· ἐγγύς γὰρ φαίνεται τὸ φοβερόν· τοῦτο γὰρ ἐστὶ κίνδυνος, φοβεροῦ πλησιασμός.

τοιαῦτα δὲ ἔχθρα τε καὶ ὀργὴ δυναμένων ποιεῖν τι (δῆλον γὰρ ὅτι βούλονται τε καὶ δύνανται, ὥστε ἐγγύς εἰσιν τοῦ ποιεῖν), καὶ ἀδικία δύναμιν ἔχουσα· τῷ προαιρεῖσθαι γὰρ ὁ [1382b] ἄδικος ἄδικος. καὶ ἀρετὴ ὑβριζομένη δύναμιν ἔχουσα (δῆλον γὰρ ὅτι προαιρεῖται μὲν ὅταν ὑβρίζηται, αἰεὶ, δύναται δὲ νῦν), καὶ φόβος τῶν δυναμένων τι ποιῆσαι· ἐν παρασκευῇ γὰρ ἀνάγκη εἶναι καὶ τὸν τοιοῦτον· ἐπεὶ δ' οἱ πολλοὶ χεῖρους καὶ ἥττους τοῦ κερδαίνειν καὶ δειλοὶ ἐν τοῖς κινδύνοις, φοβερόν ὥς ἐπὶ τὸ πολὺ τὸ ἐπ' ἄλλῳ αὐτὸν εἶναι, ὥστε οἱ συνειδότες πεποιηκότες τι δεινὸν φοβεροὶ ἢ κατειπεῖν ἢ ἐγκαταλιπεῖν. καὶ οἱ δυνάμενοι ἀδικεῖν τοῖς δυναμένοις ἀδικεῖσθαι· ὥς γὰρ ἐπὶ τὸ πολὺ ἀδικοῦσιν οἱ ἄνθρωποι ὅταν δύνωνται. καὶ οἱ ἡδικημένοι ἢ νομίζοντες ἀδικεῖσθαι· αἰεὶ γὰρ τηροῦσι καιρόν. καὶ οἱ ἡδικηκότες, ἂν δύναμιν ἔχωσι, φοβεροί, δεδιότες τὸ ἀντιπαθεῖν· ὑπέκειτο γὰρ τὸ τοιοῦτο φοβερόν. καὶ οἱ τῶν αὐτῶν ἀνταγωνισταί,

ὅσα μὴ ἐνδέχεται ἅμα ὑπάρχειν ἀμφοῖν· ἀεὶ γὰρ πολέμοισι πρὸς τοὺς τοιούτους. καὶ οἱ τοῖς κρείττοσιν αὐτῶν φοβεροί· μᾶλλον γὰρ ἂν δύναιτο βλάπτειν αὐτούς, εἰ καὶ τοὺς κρείττους. καὶ οὖς φοβοῦνται οἱ κρείττους αὐτῶν, διὰ ταῦτό. καὶ οἱ τοὺς κρείττους αὐτῶν ἀνηρηκότες, καὶ οἱ τοῖς ἥττοσιν αὐτῶν ἐπιτιθέμενοι· ἡ γὰρ ἤδη φοβεροὶ ἢ αὐξηθέντες. καὶ τῶν ἡδικημένων καὶ ἐχθρῶν ἢ ἀντιπάλων οὐχ οἱ ὀξύθυμοι καὶ παρρησιαστικοί, ἀλλὰ οἱ πρᾶοι καὶ εἴρωνες καὶ πανοῦργοι· ἄδελφοι γὰρ εἰ ἐγγύς, ὥστε οὐδέποτε φανεροὶ ὅτι πόρρω. πάντα δὲ τὰ φοβερὰ φοβερώτερα ὅσα ἀμαρτάνουσιν ἐπανορθώσασθαι μὴ ἐνδέχεται, ἀλλ' ἢ ὅλως ἀδύνατα, ἢ μὴ ἐπ' αὐτοῖς ἀλλ' ἐπὶ τοῖς ἐναντίοις. καὶ ὧν βοήθεια μὴ εἰσιν ἢ μὴ ῥάδιαι. ὥς δ' ἀπλῶς εἰπεῖν, φοβερά ἐστιν ὅσα ἐφ' ἐτέρων γιγνόμενα ἢ μέλλοντα ἐλεεινά ἐστιν.

τὰ μὲν οὖν φοβερὰ καὶ ἃ φοβοῦνται σχεδὸν ὥς εἰπεῖν τὰ μέγιστα ταῦτ' ἐστίν, ὥς δὲ διακείμενοι αὐτοὶ φοβοῦνται, νῦν λέγωμεν. εἰ δὴ ἐστιν ὁ φόβος μετὰ προσδοκίας τινὸς τοῦ πείσεσθαι τι φθαρτικὸν πάθος, φανερόν ὅτι οὐδεὶς φοβεῖται τῶν οἰομένων μηδὲν ἂν παθεῖν, οὐδὲ ταῦτα ἃ μὴ οἶονται «ἂν» παθεῖν οὐδὲ τούτους ὑφ' ὧν μὴ οἶονται, οὐδὲ τότε ὅτε μὴ οἶονται. ἀνάγκη τοίνυν φοβεῖσθαι τοὺς οἰομένους τι παθεῖν ἂν, καὶ τοὺς ὑπὸ τούτων καὶ ταῦτα καὶ τότε. οὐκ οἶονται δὲ παθεῖν [1383a] ἂν οὔτε οἱ ἐν εὐτυχίαις μεγάλαις ὄντες καὶ δοκοῦντες (διὸ ὑβρίζουσι καὶ ὀλίγωροι καὶ θρασεῖς, ποιεῖ δὲ τοιούτους πλοῦτος ἰσχύς πολυφιλία δύναμις), οὔτε οἱ ἤδη πεπονθέναι πάντα νομίζοντες τὰ δεινὰ καὶ ἀπεψυγμένοι πρὸς τὸ μέλλον, ὥσπερ οἱ ἀποτυμπανιζόμενοι ἤδη· ἀλλὰ δεῖ τινα ἐλπίδα ὑπεῖναι σωτηρίας, περὶ οὗ ἄγωνιῶσιν. σημεῖον δέ· ὁ γὰρ φόβος βουλευτικούς ποιεῖ, καίτοι οὐδεὶς βουλεύεται περὶ τῶν ἀνελπίστων· ὥστε δεῖ τοιούτους παρασκευάζειν, ὅταν ἡ βέλτιον τὸ φοβεῖσθαι αὐτούς, ὅτι τοιοῦτοί εἰσιν οἷον παθεῖν (καὶ γὰρ ἄλλοι μείζους ἔπαθον), καὶ τοὺς τοιούτους δεικνύναι πάσχοντας ἢ πεπονθότας, καὶ ὑπὸ τοιούτων ὑφ' ὧν οὐκ ᾔοντο, καὶ ταῦτα «ἂ» καὶ τότε ὅτε οὐκ ᾔοντο.

ἐπεὶ δὲ περὶ φόβου φανερόν τί ἐστιν, καὶ τῶν φοβερῶν, καὶ ὥς ἕκαστοι ἔχοντες δεδίασι, φανερόν ἐκ τούτων καὶ τὸ θαρρεῖν τί ἐστι, καὶ περὶ ποῖα θαρραλέοι εἰσὶ καὶ πῶς διακείμενοι θαρραλέοι εἰσίν· τό τε γὰρ θάρσος τὸ ἐναντίον τῷ «φόβῳ, καὶ τὸ θαρραλέον τῷ» φοβερῷ, ὥστε μετὰ φαντασίας ἢ ἐλπίς τῶν σωτηρίων ὥς ἐγγύς ὄντων, τῶν δὲ φοβερῶν «ὥς» ἢ μὴ ὄντων ἢ πόρρω ὄντων. ἔστι δὲ θαρραλέα τά τε

δεινὰ πόρρω ὄντα καὶ τὰ σωτήρια ἐγγύς, καὶ ἐπανορθώσεις ἂν ὥσι καὶ βοήθειαι πολλαὶ ἢ μεγάλαι ἢ ἅμφω, καὶ μήτε ἡδικημένοι μήτε ἡδικηκότες ὥσιν, ἀνταγωνισταί τε ἢ μὴ ὥσιν ὅλως, ἢ μὴ ἔχωσιν δύναμιν, ἢ δύναμιν ἔχοντες ὥσι φίλοι ἢ πεποιηκότες εὖ ἢ πεπονθότες, ἢ ἂν πλείους ὥσιν οἷς ταυτὰ συμφέρει, ἢ κρείττους, ἢ ἅμφω.

αὐτοὶ δ' οὕτως ἔχοντες θαρραλέοι εἰσίν, ἂν πολλὰ κατωρθωκέναι οἶωνται καὶ μὴ πεπονθέναι, ἢ ἐὰν πολλάκις ἐληλυθότες εἰς τὰ δεινὰ καὶ διαπεφευγότες ὥσι· διχῶς γὰρ ἀπαθεῖς γίνονται οἱ ἄνθρωποι, ἢ τῷ μὴ πεπειῖσθαι ἢ τῷ βοηθείας ἔχειν, ὥσπερ ἐν τοῖς κατὰ θάλατταν κινδύνοις οἱ τε ἄπειροι χειμῶνος θαρροῦσι τὰ μέλλοντα καὶ οἱ βοηθείας ἔχοντες διὰ τὴν ἐμπειρίαν. καὶ ὅταν τοῖς ὁμοίοις φοβερὸν μὴ ᾖ, μηδὲ τοῖς ἥττοσι καὶ ὧν κρείττους οἶονται εἶναι· οἶονται δὲ ὧν κεκρατήκασιν ἢ αὐτῶν ἢ τῶν κρείττόνων ἢ τῶν ὁμοίων. καὶ ἂν ὑπάρχειν αὐτοῖς οἶωνται πλείω καὶ μείζω, οἷς ὑπερέχοντες φοβεροὶ εἰσιν· [1383b] ταῦτα δὲ ἐστὶ πλῆθος χρημάτων καὶ ἰσχύς σωμάτων καὶ φίλων καὶ χώρας καὶ τῶν πρὸς πόλεμον παρασκευῶν, ἢ πασῶν ἢ τῶν μεγίστων. καὶ ἐὰν μὴ ἡδικηκότες ὥσιν μηδένα ἢ μὴ πολλοὺς ἢ μὴ τούτους παρ' ὧν φοβοῦνται, καὶ ὅλως ἂν τὰ πρὸς τοὺς θεοὺς αὐτοῖς καλῶς ἔχη, τά τε ἄλλα καὶ τὰ ἀπὸ σημείων καὶ λογίων· θαρραλέον γὰρ ἡ ὀργή, τὸ δὲ μὴ ἀδικεῖν ἀλλ' ἀδικεῖσθαι ὀργῆς ποιητικόν, τὸ δὲ θεῖον ὑπολαμβάνεται βοηθεῖν τοῖς ἀδικουμένοις. καὶ ὅταν ἐπιχειροῦντες ἢ μηδὲν ἂν παθεῖν [μηδὲ πείσεσθαι] ἢ κατορθώσιν οἶωνται. καὶ περὶ μὲν τῶν φοβερῶν καὶ θαρραλέων εἴρηται.

Ποῖα δ' αἰσχύνονται καὶ ἀναισχυντοῦσιν, καὶ πρὸς τίνας καὶ πῶς ἔχοντες, ἐκ τῶνδε δῆλον. ἔστω δὴ αἰσχύνη λύπη τις ἢ ταραχὴ περὶ τὰ εἰς ἀδοξίαν φαινόμενα φέρειν τῶν κακῶν, ἢ παρόντων ἢ γεγονότων ἢ μελλόντων, ἢ δ' ἀναισχυντία ὀλιγωρία τις καὶ ἀπάθεια περὶ τὰ αὐτὰ ταῦτα. εἰ δὴ ἐστὶν αἰσχύνη ἢ ὀρισθεῖσα, ἀνάγκη αἰσχύνεσθαι ἐπὶ τοῖς τοιούτοις τῶν κακῶν ὅσα αἰσχρὰ δοκεῖ εἶναι ἢ αὐτῷ ἢ ὧν φροντίζει· τοιαῦτα δ' ἐστὶν ὅσα ἀπὸ κακίας ἔργα ἐστίν, οἷον τὸ ἀποβαλεῖν ἀσπίδα ἢ φυγεῖν· ἀπὸ δειλίας γάρ. καὶ τὸ ἀποστερῆσαι παρακαταθήκην [ἢ ἀδικῆσαι]· ἀπὸ ἀδικίας γάρ. καὶ τὸ συγγενέσθαι αἷς οὐ δεῖ ἢ οὐ δεῖ ἢ ὅτε οὐ δεῖ· ἀπὸ ἀκολασίας γάρ. καὶ τὸ κερδαίνειν ἀπὸ μικρῶν ἢ αἰσchrῶν ἢ ἀπὸ ἀδυνάτων, οἷον πενήτων ἢ τεθνεώτων, ὅθεν καὶ ἡ παροιμία τὸ ἀπὸ νεκροῦ φέρειν·

περὶ μὲν οὖν αἰσχύνῃς ταῦτα· περὶ δὲ ἀναισχυντίας δῆλον ὡς ἐκ τῶν ἐναντίων εὐπορήσομεν.

Τίσιν δὲ χάριν ἔχουσι καὶ ἐπὶ τίσιν καὶ πῶς αὐτοὶ ἔχοντες, ὀρισσάμενοις τὴν χάριν δῆλον ἔσται. ἔστω δὴ χάρις, καθ' ἣν ὁ ἔχων λέγεται χάριν ἔχειν, ὑπουργία τῷ δεομένῳ μὴ ἀντί τινος, μὴδ' ἵνα τι αὐτῷ τῷ ὑπουργοῦντι ἀλλ' ἵνα τι ἐκείνῳ· μεγάλη δὲ ἂν ἦ σφόδρα δεόμενος, ἢ μεγάλων καὶ χαλεπῶν, ἢ ἐν καιροῖς τοιούτοις, ἢ μόνος ἢ πρῶτος ἢ μάλιστα. δεήσεις δὲ εἰσιν αἱ ὀρέξεις, καὶ τούτων μάλιστα αἱ μετὰ λύπης τοῦ μὴ γιγνομένου. τοιαῦται δὲ αἱ ἐπιθυμίαι, οἷον ἔρως, καὶ αἱ ἐν ταῖς τοῦ σώματος κακώσεσιν καὶ ἐν κινδύνοις· καὶ γὰρ ὁ κινδυνεύων ἐπιθυμεῖ καὶ ὁ λυπούμενος· διὸ οἱ ἐν πενίᾳ παριστάμενοι καὶ φυγαῖς, κἂν μικρὰ ὑπηρετήσωσιν, διὰ τὸ μέγεθος τῆς δεήσεως καὶ τὸν καιρὸν κεχαρισμένοι, οἷον ὁ ἐν Λυκείῳ τὸν φορμὸν δούς. ἀνάγκη οὖν μάλιστα μὲν εἰς ταῦτα ἔχειν τὴν ὑπουργίαν, εἰ δὲ μή, εἰς ἴσα ἢ μείζω· ὥστε ἐπεὶ φανερόν καὶ οἷς καὶ ἐφ' οἷς γίγνεται χάρις καὶ πῶς ἔχουσι, δῆλον ὅτι ἐκ τούτων παρασκευαστέον, τοὺς μὲν δεικνύντας ἢ ὄντας ἢ γεγενημένους ἐν τοιαύτῃ λύπῃ καὶ δεήσει, τοὺς δὲ ὑπηρετηκότας ἐν τοιαύτῃ χρεῖᾳ τοιοῦτόν τι ἢ ὑπηρετοῦντας. φανερόν δὲ καὶ ὅθεν ἀφαιρεῖσθαι ἐνδέχεται τὴν χάριν καὶ ποιεῖν [1385b] ἀχαρίστους· ἢ γὰρ ὅτι αὐτῶν ἕνεκα ὑπηρετοῦσιν ἢ ὑπηρετήσαν (τοῦτο δ' οὐκ ἦν χάρις), ἢ ὅτι ἀπὸ τύχης συνέπεσεν ἢ συνηναγκάσθησαν, ἢ ὅτι ἀπέδωκαν ἀλλ' οὐκ ἔδωκαν, εἴτε εἰδότες εἴτε μὴ· ἀμφοτέρως γὰρ τὸ ἀντί τινος, ὥστε οὐδ' οὕτως ἂν εἴη χάρις. καὶ περὶ ἀπάσας τὰς κατηγορίας σκεπτέον· ἢ γὰρ χάρις ἐστὶν ἢ ὅτι τοδὶ ἢ τοσονδε ἢ τοιόνδε ἢ πότε ἢ ποῦ.

σημεῖον δὲ εἰ ἔλαττον μὴ ὑπηρετήσαν, καὶ εἰ τοῖς ἐχθροῖς ἢ ταῦτα ἢ ἴσα ἢ μείζω· δηλον γὰρ ὅτι οὐδὲ ταῦτα ἡμῶν ἔνεκα. ἢ εἰ φαῦλα εἰδώς· οὐδεὶς γὰρ ὁμολογεῖ δεῖσθαι φαύλων.

Καὶ περὶ μὲν τοῦ χαρίζεσθαι καὶ ἀχαριστεῖν εἴρηται· ποῖα δ' ἔλεεινὰ καὶ τίνας ἔλεοῦσι, καὶ πῶς αὐτοὶ ἔχοντες, λέγωμεν. ἔστω δὴ ἔλεος λύπη τις ἐπὶ φαινομένῳ κακῷ φθαρτικῷ ἢ λυπηρῷ τοῦ ἀναξίου τυγχάνειν, ὃ κὰν αὐτὸς προσδοκῆσειεν ἂν παθεῖν ἢ τῶν αὐτοῦ τινα, καὶ τοῦτο ὅταν πλησίον φαίνεται· δηλον γὰρ ὅτι ἀνάγκη τὸν μέλλοντα ἐλεήσκειν ὑπάρχειν τοιοῦτον οἶον οἶεσθαι παθεῖν ἂν τι κακὸν ἢ αὐτὸν ἢ τῶν αὐτοῦ τινα, καὶ τοιοῦτο κακὸν οἶον εἴρηται ἐν τῷ ὄρῳ ἢ ὅμοιον ἢ παραπλήσιον· διὸ οὔτε οἱ παντελῶς ἀπολωλότες ἔλεοῦσιν (οὐδὲν γὰρ ἂν ἔτι παθεῖν οἶονται· πεπόνθασι γάρ), οὔτε οἱ ὑπερευδαιμονεῖν οἰόμενοι, ἀλλ' ὑβρίζουσιν· εἰ γὰρ ἅπαντα οἶονται ὑπάρχειν τὰγαθὰ, δηλον ὅτι καὶ τὸ μὴ ἐνδέχεσθαι παθεῖν μηδὲν κακόν· καὶ γὰρ τοῦτο τῶν ἀγαθῶν. εἰσὶ δὲ τοιοῦτοι οἶοι νομίζειν παθεῖν ἂν, οἳ τε πεπονθότες ἤδη καὶ διαπεφευγότες, καὶ οἱ πρεσβύτεροι καὶ διὰ τὸ φρονεῖν καὶ δι' ἐμπειρίαν, καὶ οἱ ἀσθενεῖς, καὶ οἱ δειλότεροι μᾶλλον, καὶ οἱ πεπαιδευμένοι· εὐλόγιστοι γάρ. καὶ οἷς ὑπάρχουσι γονεῖς ἢ τέκνα ἢ γυναῖκες· αὐτοῦ τε γὰρ ταῦτα, καὶ οἷα παθεῖν τὰ εἰρημένα. καὶ οἱ μήτε ἐν ἀνδρείας πάθει ὄντες, οἷον ἐν ὀργῇ ἢ θάρρει (ἀλόγιστα γὰρ τοῦ ἐσομένου ταῦτα), μήτε ἐν ὑβριστικῇ διαθέσει (καὶ γὰρ οὗτοι ἀλόγιστοι τοῦ πείσεσθαι τι), ἀλλ' οἱ μεταξὺ τούτων, μήτ' αὖ φοβούμενοι σφόδρα· οὐ γὰρ ἔλεοῦσιν οἱ ἐκπεπληγμένοι, διὰ τὸ εἶναι πρὸς τῷ οἰκείῳ πάθει. κὰν οἶωνταί τινας εἶναι τῶν ἐπιεικῶν· ὁ γὰρ μηδένα οἰόμενος [1386a] πάντας οἰήσεται ἀξίους εἶναι κακοῦ. καὶ ὅλως δὴ ὅταν ἔχη οὕτως ὥστ' ἀναμνησθῆναι τοιαῦτα συμβεβηκότα ἢ αὐτῷ ἢ <τῷ> τῶν αὐτοῦ, ἢ ἐλπίσαι γενέσθαι αὐτῷ ἢ τῷ τῶν αὐτοῦ.

ὥς μὲν οὖν ἔχοντες ἔλεοῦσιν εἴρηται, ἃ δ' ἔλεοῦσιν ἐκ τοῦ ὀρισμοῦ δηλον· ὅσα τε γὰρ τῶν λυπηρῶν καὶ ὀδυνηρῶν φθαρτικά, πάντα ἐλεεινά, καὶ ὅσα ἀναιρετικά, καὶ ὅσων ἡ τύχη αἰτία κακῶν μέγεθος ἐχόντων. ἔστι δὲ ὀδυνηρὰ μὲν καὶ φθαρτικά θάνατοι καὶ αἰκία σωμάτων καὶ κακώσεις καὶ γῆρας καὶ νόσοι καὶ τροφῆς ἔνδεια, ὧν δ' ἡ τύχη αἰτία κακῶν ἀφιλία, ὀλιγοφιλία (διὸ καὶ τὸ διασπᾶσθαι ἀπὸ φίλων καὶ συνήθων ἐλεεινόν), αἰσχος, ἀσθένεια, ἀναπηρία, καὶ τὸ ὅθεν προσῆκεν ἀγαθόν τι ὑπάρξαι κακόν τι συμβῆναι, καὶ τὸ πολλάκις τοιοῦτον, καὶ τὸ πεπονθότος γενέσθαι τι

ἀγαθόν, οἷον Διοπεῖθαι τὰ παρὰ βασιλέως τεθνεῶτι κατεπέμφθη, καὶ τὸ ἢ μηδὲν γεγενῆσθαι ἀγαθόν ἢ γενομένων μὴ εἶναι ἀπόλαυσιν.

ἐφ' οἷς μὲν οὖν ἐλεοῦσι, ταῦτα καὶ τὰ τοιαῦτά ἐστιν· ἐλεοῦσι δὲ τοὺς τε γνωρίμους, ἂν μὴ σφόδρα ἐγγὺς ὣσιν οἰκειότητι (περὶ δὲ τούτους ὥσπερ περὶ αὐτοὺς μέλλοντας ἔχουσιν· διὸ καὶ ὁ Ἀμάσιος ἐπὶ μὲν τῷ υἱεῖ ἀγομένῳ ἐπὶ τὸ ἀποθανεῖν οὐκ ἐδάκρυσεν, ὡς φασίν, ἐπὶ δὲ τῷ φίλῳ προσαιτοῦντι· τοῦτο μὲν γὰρ ἐλεεινόν, ἐκεῖνο δὲ δεινόν· τὸ γὰρ δεινὸν ἕτερον τοῦ ἐλεεινοῦ καὶ ἐκκρουστικὸν τοῦ ἐλέου καὶ πολλάκις τῷ ἐναντίῳ χρήσιμον· «οὐ γὰρ» ἔτι ἐλεοῦσιν ἐγγὺς αὐτοῖς τοῦ δεινοῦ ὄντος), καὶ τοὺς ὁμοίους ἐλεοῦσιν κατὰ ἡλικίαν, κατὰ ἡθῆ, κατὰ ἕξεις, κατὰ ἀξιώματα, κατὰ γένῃ· ἐν πᾶσι γὰρ τούτοις μᾶλλον φαίνεται καὶ αὐτῷ ἂν ὑπάρξει· ὅλως γὰρ καὶ ἐνταῦθα δεῖ λαβεῖν ὅτι ὅσα ἐφ' αὐτῶν φοβοῦνται, ταῦτα ἐπ' ἄλλων γιγνόμενα ἐλεοῦσιν. ἐπεὶ δ' ἐγγὺς φαινόμενα τὰ πάθη ἐλεεινά ἐστιν, τὰ δὲ μυριοστὸν ἔτος γενόμενα ἢ ἐσόμενα οὔτε ἐλπίζοντες οὔτε μεμνημένοι ἢ ὅλως οὐκ ἐλεοῦσιν ἢ οὐχ ὁμοίως, ἀνάγκη τοὺς συναπεργαζομένους σχήμασι καὶ φωναῖς καὶ ἐσθῆσι καὶ ὅλως ὑποκρίσει ἐλεεινότερους εἶναι (ἐγγὺς γὰρ ποιοῦσι φαίνεσθαι τὸ κακόν, πρὸ ὁμμάτων ποιοῦντες ἢ ὡς μέλλοντα ἢ ὡς γεγονότα· καὶ τὰ γεγονότα ἄρτι ἢ μέλλοντα [1386b] διὰ ταχέων ἐλεεινότερα), «καὶ» διὰ τοῦτο καὶ τὰ σημεῖα, οἷον ἐσθῆτάς τε τῶν πεπονθότων καὶ ὅσα τοιαῦτα, καὶ τὰς πράξεις καὶ λόγους καὶ ὅσα ἄλλα τῶν ἐν τῷ πάθει ὄντων, οἷον ἤδη τελευτώντων. καὶ μάλιστα τὸ σπουδαίους εἶναι ἐν τοῖς τοιούτοις καιροῖς ὄντας ἐλεεινόν· ἅπαντα γὰρ ταῦτα διὰ τὸ ἐγγὺς φαίνεσθαι μᾶλλον ποιεῖ τὸν ἔλεον, καὶ ὡς ἀναξίου ὄντος καὶ ἐν ὀφθαλμοῖς φαινομένου τοῦ πάθους.

Ἀντίκειται δὲ τῷ ἐλεεῖν μάλιστα μὲν ὁ καλοῦσι νεμεσᾶν· τῷ γὰρ λυπεῖσθαι ἐπὶ ταῖς ἀναξίαις κακοπραγίαις ἀντικείμενόν ἐστι τρόπον τινὰ καὶ ἀπὸ τοῦ αὐτοῦ ἡθους τὸ λυπεῖσθαι ἐπὶ ταῖς ἀναξίαις εὐπραγίαις. καὶ ἄμφω τὰ πάθη ἡθους χρηστοῦ· δεῖ γὰρ ἐπὶ μὲν τοῖς ἀναξίως πράττουσι κακῶς συνάχθεσθαι καὶ ἐλεεῖν, τοῖς δὲ εὖ νεμεσᾶν· ἄδικον γὰρ τὸ παρὰ τὴν ἀξίαν γιγνόμενον· διὸ καὶ τοῖς θεοῖς ἀποδίδομεν τὸ νεμεσᾶν.

δόξειε δ' ἂν καὶ ὁ φθόνος τῷ ἐλεεῖν τὸν αὐτὸν ἀντικεῖσθαι τρόπον, ὡς σύνεγγυς ὢν καὶ ταὐτὸν τῷ νεμεσᾶν, ἔστι δ' ἕτερον· λύπη μὲν γὰρ παραχώδης καὶ ὁ φθόνος ἐστὶν καὶ ἐπὶ εὐπραγία, ἀλλ' οὐ τοῦ ἀναξίου ἀλλὰ τοῦ ἴσου καὶ ὁμοίου. τὸ δὲ μὴ ὅτι αὐτῷ τι

συμβήσεται ἕτερον, ἀλλὰ δι' αὐτὸν τὸν πλησίον, ἅπασιν ὁμοίως δεῖ ὑπάρχειν· οὐ γὰρ ἔτι ἔσται τὸ μὲν φθόνος, τὸ δὲ νέμεσις, ἀλλὰ φόβος, ἐὰν διὰ τοῦτο ἡ λύπη ὑπάρχῃ καὶ ἡ ταραχή, ὅτι αὐτῷ τι ἔσται φαῦλον ἀπὸ τῆς ἐκείνου εὐπραξίας.

φανερὸν δ' ὅτι ἀκολουθήσει καὶ τὰ ἐναντία πάθῃ τούτοις· ὁ μὲν γὰρ λυπούμενος ἐπὶ τοῖς ἀναξίως κακοπραγοῦσιν ἡσθήσεται ἢ ἄλυπος ἔσται ἐπὶ τοῖς ἐναντίως κακοπραγοῦσιν, οἷον τοὺς πατραλοίας καὶ μαιφόνους, ὅταν τύχῃσι τιμωρίας, οὐδεὶς ἂν λυπηθεῖν χρηστός· δεῖ γὰρ χαίρειν ἐπὶ τοῖς τοιούτοις, ὥς δ' αὐτως καὶ ἐπὶ τοῖς εὖ πράττουσι κατ' ἀξίαν· ἄμφοι γὰρ δίκαια, καὶ ποιεῖ χαίρειν τὸν ἐπιεικῆ· ἀνάγκη γὰρ ἐλπίζειν ὑπάρξαι ἂν ἄπερ τῷ ὁμοίῳ, καὶ αὐτῷ. καὶ ἔστιν τοῦ αὐτοῦ ἡθους ἅπαντα ταῦτα, τὰ δ' ἐναντία τοῦ ἐναντίου· ὁ γὰρ αὐτός ἐστιν ἐπιχαιρέκακος καὶ [1387a] φθονερός· ἐφ' ᾧ γὰρ τις λυπεῖται γιγνομένῳ καὶ ὑπάρχοντι, ἀναγκαῖον τοῦτον ἐπὶ τῇ στερήσει καὶ τῇ φθορᾷ τῇ τούτου χαίρειν· διὸ κωλυτικὰ μὲν ἐλέου πάντα ταῦτ' ἐστί, διαφέρει δὲ διὰ τὰς εἰρημένας αἰτίας, ὥστε πρὸς τὸ μὴ ἐλεεινὰ ποιεῖν ἅπαντα ὁμοίως χρήσιμα.

πρῶτον μὲν οὖν περὶ τοῦ νεμεσᾶν λέγωμεν, τίσιν τε νεμεσῶσι καὶ ἐπὶ τίσι καὶ πῶς ἔχοντες αὐτοί, εἴτα μετὰ ταῦτα περὶ τῶν ἄλλων. φανερὸν δ' ἐκ τῶν εἰρημένων· εἰ γὰρ ἐστὶ τὸ νεμεσᾶν λυπεῖσθαι ἐπὶ τῷ φαινομένῳ ἀναξίως εὐπραγεῖν, πρῶτον μὲν δῆλον ὅτι οὐχ οἷόν τ' ἐπὶ πᾶσι τοῖς ἀγαθοῖς νεμεσᾶν· οὐ γὰρ εἰ δίκαιος ἢ ἀνδρεῖος, ἢ εἰ ἀρετὴν λήψεται, νεμεσήσει τούτῳ (οὐδὲ γὰρ ἔλεοι ἐπὶ τοῖς ἐναντίοις τούτων εἰσίν), ἀλλὰ ἐπὶ πλούτῳ καὶ δυνάμει καὶ τοῖς τοιούτοις, ὅσων ὥς ἀπλῶς εἰπεῖν ἄξιοι εἰσιν οἱ ἀγαθοὶ καὶ οἱ τὰ φύσει ἔχοντες ἀγαθὰ, οἷον εὐγένειαν καὶ κάλλος καὶ ὅσα τοιαῦτα. ἐπεὶ δὲ τὸ ἀρχαῖον ἐγγύς τι φαίνεται τοῦ φύσει, ἀνάγκη τοῖς ταῦτ' ἔχουσιν ἀγαθόν, ἐὰν νεωστὶ ἔχοντες τυγχάνωσι καὶ διὰ τοῦτο εὐπραγῶσι, μᾶλλον νεμεσᾶν· μᾶλλον γὰρ λυποῦσιν οἱ νεωστὶ πλουτοῦντες τῶν πάλαι καὶ διὰ γένος· ὁμοίως δὲ καὶ ἄρχοντες καὶ δυνάμενοι καὶ πολύφιλοι καὶ εὐτεκνοὶ καὶ ὅτιοῦν τῶν τοιούτων. καὶ ἂν διὰ ταῦτα ἄλλο τι ἀγαθὸν γίγνηται αὐτοῖς, ὡσαύτως· καὶ γὰρ ἐνταῦθα μᾶλλον λυποῦσιν οἱ νεόπλουτοι ἄρχοντες διὰ τὸν πλοῦτον ἢ οἱ ἀρχαίοπλουτοι. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. αἴτιον δ' ὅτι οἱ μὲν δοκοῦσι τὰ αὐτῶν ἔχειν οἱ δ' οὐ· τὸ γὰρ αἰεὶ οὕτω φαινόμενον ἔχειν ἀληθὲς δοκεῖ, ὥστε οἱ ἕτεροι οὐ τὰ αὐτῶν ἔχειν. καὶ ἐπεὶ ἕκαστον τῶν ἀγαθῶν οὐ τοῦ τυχόντος

ἄξιον, ἀλλὰ τις ἔστιν ἀναλογία καὶ τι ἀρμόττον, οἷον ὅπλων κάλλος οὐ τῷ δικαίῳ ἀρμόττει ἀλλὰ τῷ ἀνδρείῳ, καὶ γάμοι διαφέροντες οὐ τοῖς νεωστὶ πλουσίοις ἀλλὰ τοῖς εὐγενέσιν· ἂν οὖν ἀγαθὸς ὢν μὴ τοῦ ἀρμόττοντος τυγχάνῃ, νεμεσητόν. καὶ <τὸ> τὸν ἥττω τῷ κρείττονι ἀμφισβητεῖν, μάλιστα μὲν οὖν τοὺς ἐν τῷ αὐτῷ, ὅθεν καὶ τοῦτ' εἴρηται,

Αἶαντος δ' ἀλέεινε μάχην Τελαμωνιάδαο·

Ζεὺς γὰρ οἱ νεμέσασχ', ὅτ' ἀμείνوني φωτὶ μάχοιτο·

[1387b] εἰ δὲ μὴ, κἂν ὅπως οὖν ὁ ἥττων τῷ κρείττονι, οἷον εἰ ὁ μουσικὸς τῷ δικαίῳ· βέλτιον γὰρ ἢ δικαιοσύνη τῆς μουσικῆς.

οἷς μὲν οὖν νεμεσῶσι καὶ διὰ τί, ἐκ τούτων δῆλον· ταῦτα γὰρ καὶ τὰ τοιαῦτά ἐστιν. αὐτοὶ δὲ νεμεσητικοὶ εἰσιν, ἐὰν ἄξιοι τυγχάνωσιν ὄντες τῶν μεγίστων ἀγαθῶν καὶ ταῦτα κεκτημένοι· τὸ γὰρ τῶν ὁμοίων ἡξιῶσθαι τοὺς μὴ ὁμοίους οὐ δίκαιον. δεύτερον δέ, ἂν ὄντες ἀγαθοὶ καὶ σπουδαῖοι τυγχάνωσιν· κρίνουσί τε γὰρ εὖ, καὶ τὰ ἄδικα μισοῦσι. καὶ ἐὰν φιλότιμοι καὶ ὀρεγόμενοί τινων πραγμάτων, καὶ μάλιστ' <ἂν> περὶ ταῦτα φιλότιμοι ᾧσιν ὢν ἕτεροι ἀνάξιοι ὄντες τυγχάνουσιν. καὶ ὅπως οἱ ἀξιοῦντες αὐτοὶ αὐτοὺς ᾧν ἐτέρους μὴ ἀξιοῦσι, νεμεσητικοὶ τούτοις καὶ τούτων· διὸ καὶ οἱ ἀνδραποδώδεις καὶ φαῦλοι καὶ ἀφιλότιμοι οὐ νεμεσητικοί· οὐδὲν γὰρ ἔστιν οὗ ἑαυτοὺς οἶονται ἀξίους εἶναι.

φανερὸν δ' ἐκ τούτων ἐπὶ ποίοις ἀτυχοῦσι καὶ κακοπραγοῦσιν ἢ μὴ τυγχάνουσι χαίρειν ἢ ἀλύπως ἔχειν δεῖ· ἐκ γὰρ τῶν εἰρημένων τὰ ἀντικείμενά ἐστι δῆλα, ὥστ' ἐὰν τοὺς τε κριτὰς τοιούτους παρασκευάσῃ ὁ λόγος, καὶ τοὺς ἀξιοῦντας ἐλεεῖσθαι, καὶ ἐφ' οἷς ἐλεεῖσθαι, δεῖξῃ ἀναξίους ὄντας τυγχάνειν ἀξίους δὲ μὴ τυγχάνειν, ἀδύνατον ἐλεεῖν.

Δῆλον δὲ καὶ ἐπὶ τίσι φθονοῦσι καὶ τίσι καὶ πῶς ἔχοντες, εἴπερ ἔστιν ὁ φθόνος λύπη τις ἐπὶ εὐπραγίᾳ φαινομένη τῶν εἰρημένων ἀγαθῶν περὶ τοὺς ὁμοίους, μὴ ἵνα τι αὐτῷ, ἀλλὰ δι' ἐκείνους· φθονήσουσι μὲν γὰρ οἱ τοιοῦτοι οἷς εἰσὶ τινες ὅμοιοι ἢ φαίνονται· ὁμοίους δὲ λέγω κατὰ γένος, κατὰ συγγένειαν, καθ' ἡλικίας, κατὰ ἔξεις, κατὰ δόξαν, κατὰ τὰ ὑπάρχοντα. καὶ οἷς μικρὸν ἐλλείπει τοῦ μὴ πάντα ὑπάρχειν (διὸ οἱ μεγάλα πράττοντες καὶ οἱ εὐτυχοῦντες φθονεροὶ εἰσιν)· πάντα γὰρ οἶονται τὰ αὐτῶν φέρειν. καὶ οἱ τιμώμενοι ἐπὶ τινι διαφερόντως, καὶ μάλιστα ἐπὶ σοφίᾳ ἢ εὐδαιμονίᾳ. καὶ οἱ φιλότιμοι φθονερώτεροι τῶν ἀφιλοτίμων. καὶ οἱ δοξόσοφοι·

φιλότιμοι γὰρ ἐπὶ σοφίᾳ. καὶ ὅλως οἱ φιλόδοξοι περὶ τι φθονεροὶ περὶ τοῦτο. καὶ οἱ μικρόψυχοι· πάντα γὰρ μεγάλα δοκεῖ αὐτοῖς εἶναι. ἐφ' οἷς δὲ φθονοῦσι, τὰ μὲν ἀγαθὰ εἴρηται· [1388a] ἐφ' οἷς γὰρ φιλοδοξοῦσι καὶ φιλοτιμοῦνται ἔργοις ἢ κτήμασι καὶ ὀρέγονται δόξης, καὶ ὅσα εὐτυχήματά ἐστιν, σχεδὸν περὶ πάντα φθόνος ἔστι, καὶ μάλιστα ὧν αὐτοὶ ἢ ὀρέγονται ἢ οἶονται δεῖν αὐτοὺς ἔχειν, ἢ ὧν τῇ κτήσει μικρῷ ὑπερέχουσιν ἢ μικρῷ ἐλλείπουσιν. φανερόν δὲ καὶ οἷς φθονοῦσιν· ἅμα γὰρ εἴρηται· τοῖς γὰρ ἐγγὺς καὶ χρόνῳ καὶ τόπῳ καὶ ἡλικίᾳ καὶ δόξῃ φθονοῦσιν· ὅθεν εἴρηται

τὸ συγγενὲς γὰρ καὶ φθονεῖν ἐπίσταται.

καὶ πρὸς οὓς φιλοτιμοῦνται· φιλοτιμοῦνται γὰρ πρὸς τοὺς εἰρημένους, πρὸς δὲ τοὺς μυριοστὸν ἔτος ὄντας ἢ πρὸς τοὺς ἐσομένους ἢ τεθνεῶτας οὐδεῖς, οὐδὲ πρὸς τοὺς ἐφ' Ἑρακλείαις στήλαις. οὐδ' ὧν πολὺ οἶονται παρ' αὐτοῖς ἢ παρὰ τοῖς ἄλλοις λείπεσθαι, οὐδ' ὧν πολὺ ὑπερέχειν, ὡσαύτως καὶ πρὸς τούτους καὶ περὶ τὰ τοιαῦτα. ἐπεὶ δὲ πρὸς τοὺς ἀνταγωνιστὰς καὶ ἀντεραστὰς καὶ ὅλως τοὺς τῶν αὐτῶν ἐφιεμένους φιλοτιμοῦνται, ἀνάγκη μάλιστα τούτοις φθονεῖν, διόπερ εἴρηται

καὶ κεραμεὺς κεραμεῖ.

καὶ ὧν ἢ κεκτημένων ἢ κατορθούντων ὄνειδος αὐτοῖς (εἰσὶν δὲ καὶ οὗτοι <οἱ> ἐγγὺς καὶ ὅμοιοι)· δηλὸν γὰρ ὅτι παρ' αὐτοὺς οὐ τυγχάνουσι τοῦ ἀγαθοῦ, ὥστε τοῦτο λυποῦν ποιεῖ τὸν φθόνον. καὶ τοῖς ἢ ἔχουσι ταῦτα ἢ κεκτημένοις ὅσα αὐτοῖς προσῆκεν ἢ ἐκέκτηντό ποτε· διὸ πρεσβύτεροί τε νεωτέροις καὶ οἱ πολλὰ δαπανήσαντες εἰς ταῦτό τοις ὀλίγα φθονοῦσιν. καὶ τοῖς ταχὺ οἱ ἢ μόλις τυχόντες ἢ μὴ τυχόντες φθονοῦσιν. δηλὸν δὲ καὶ ἐφ' οἷς χαίρουσιν οἱ τοιοῦτοι καὶ ἐπὶ τίσι καὶ πῶς ἔχοντες· ὥς γὰρ ἔχοντες λυποῦνται, οὕτως ἔχοντες ἐπὶ τοῖς ἐναντίοις ἡσθήσονται. ὥστε ἂν αὐτοὶ μὲν παρασκευασθῶσιν οὕτως ἔχειν, οἱ δ' ἐλεεῖσθαι ἢ τυγχάνειν τινὸς ἀγαθοῦ ἀξιοῦντες ὧσιν οἷοι οἱ εἰρημένοι, δηλὸν ὡς οὐ τεύζονται ἐλέου παρὰ τῶν κυρίων.

Πῶς δὲ ἔχοντες ζηλοῦσι καὶ τὰ ποῖα καὶ ἐπὶ τίσιν, ἐνθένδ' ἐστὶ δηλόν· εἰ γάρ ἐστιν ζηλος λύπη τις ἐπὶ φαινομένη παρουσίᾳ ἀγαθῶν ἐντίμων καὶ ἐνδεχομένων αὐτῷ λαβεῖν περὶ τοὺς ὁμοίους τῇ φύσει, οὐχ ὅτι ἄλλω ἄλλ' ὅτι οὐχὶ καὶ αὐτῷ ἔστιν (διὸ καὶ ἐπικεῖς ἐστὶν ὁ ζηλος καὶ ἐπικῶν, τὸ δὲ φθονεῖν φαῦλον καὶ φαύλων· ὁ μὲν γὰρ αὐτὸν παρασκευάζει διὰ τὸν ζηλον τυγχάνειν τῶν ἀγαθῶν, ὁ δὲ τὸν πλησίον μὴ ἔχειν διὰ τὸν φθόνον), ἀνάγκη δὴ ζηλωτικούς μὲν εἶναι

τοὺς [1388b] ἀξιοῦντας αὐτοὺς ἀγαθῶν ὧν μὴ ἔχουσιν, <ἐνδεχομένων αὐτοῖς λαβεῖν>· οὐδεὶς γὰρ ἀξιοῖ τὰ φαινόμενα ἀδύνατα (διὸ οἱ νέοι καὶ οἱ μεγαλόψυχοι τοιοῦτοι). καὶ οἷς ὑπάρχει τοιαῦτα ἀγαθὰ ἅ τῶν ἐντίμων ἄξιά ἐστιν ἀνδρῶν· ἔστι δὲ ταῦτα πλοῦτος καὶ πολυφιλία καὶ ἀρχαὶ καὶ ὅσα τοιαῦτα· ὥς γὰρ προσήκον αὐτοῖς ἀγαθοῖς εἶναι, οἷα προσήκει τοῖς ἀγαθῶς ἔχουσι, ζηλοῦσι τὰ τοιαῦτα τῶν ἀγαθῶν. καὶ οὕς οἱ ἄλλοι ἀξιοῦσιν. καὶ ὧν πρόγονοι ἢ συγγενεῖς ἢ οἰκεῖοι ἢ τὸ ἔθνος ἢ ἡ πόλις ἔντιμοι, ζηλωτικοὶ περὶ ταῦτα· οἰκεῖα γὰρ οἶονται αὐτοῖς εἶναι, καὶ ἄξιοι <εἶναι> τούτων. εἰ δ' ἐστὶν ζηλωτὰ τὰ ἔντιμα ἀγαθὰ, ἀνάγκη τὰς τε ἀρετὰς εἶναι τοιαύτας, καὶ ὅσα τοῖς ἄλλοις ὠφέλιμα καὶ εὐεργετικά (τιμῶσι γὰρ τοὺς εὐεργετοῦντας καὶ τοὺς ἀγαθοὺς), καὶ ὅσων ἀγαθῶν ἀπόλαυσις τοῖς πλησίον ἔστιν, οἷον πλοῦτος καὶ κάλλος μᾶλλον ὑγιείας. φανερόν δὲ καὶ οἱ ζηλωτοὶ τίνες· οἱ γὰρ ταῦτα καὶ τὰ τοιαῦτα κεκτημένοι ζηλωτοί· ἔστι δὲ ταῦτα τὰ εἰρημένα, οἷον ἀνδρεία σοφία ἀρχή (οἱ γὰρ ἄρχοντες πολλοὺς δύνανται εὖ ποιεῖν), στρατηγοί, ῥήτορες, πάντες οἱ τὰ τοιαῦτα δυνάμενοι. καὶ οἷς πολλοὶ ὅμοιοι βούλονται εἶναι, ἢ πολλοὶ γνῶριμοι, ἢ φίλοι πολλοί, ἢ οὕς πολλοὶ θαυμάζουσιν, ἢ οὕς αὐτοὶ θαυμάζουσιν. καὶ ὧν ἔπαινοι καὶ ἐγκώμια λέγονται ἢ ὑπὸ ποιητῶν ἢ ὑπὸ λογογράφων. καταφρονοῦσιν δὲ τῶν ἐναντίων· ἐναντίον γὰρ ζῆλῳ καταφρόνησις ἐστὶ, καὶ τῷ ζηλοῦν τὸ καταφρονεῖν. ἀνάγκη δὲ τοὺς οὕτως ἔχοντας ὥστε ζηλωσαί τινας ἢ ζηλοῦσθαι καταφρονητικούς εἶναι τούτων τε καὶ ἐπὶ τούτοις ὅσοι τὰ ἐναντία κακὰ ἔχουσι τῶν ἀγαθῶν τῶν ζηλωτῶν· διὸ πολλάκις καταφρονοῦσιν τῶν εὐτυχούντων, ὅταν ἄνευ τῶν ἐντίμων ἀγαθῶν ὑπάρχη αὐτοῖς ἡ τύχη.

δι' ὧν μὲν οὖν τὰ πάθη ἐγγίγνεται καὶ διαλύεται, ἐξ ὧν αἱ πίστεις γίνονται περὶ αὐτῶν, εἴρηται.

τὰ δὲ ἦθη ποῖοι τινες κατὰ τὰ πάθη καὶ τὰς ἕξεις καὶ τὰς ἡλικίας καὶ τὰς τύχας, διέλθωμεν μετὰ ταῦτα. λέγω δὲ πάθη μὲν ὀργὴν ἐπιθυμίαν καὶ τὰ τοιαῦτα περὶ ὧν εἰρήκαμεν [πρότερον], ἕξεις δὲ ἀρετὰς καὶ κακίας, εἴρηται δὲ περὶ τούτων πρότερον, καὶ ποῖα προαιροῦνται ἕκαστοι, καὶ ποῶν πρακτικοί. ἡλικία δὲ εἰσι νεότης καὶ ἀκμὴ καὶ γῆρας. τύχην δὲ [1389a] λέγω εὐγένειαν καὶ πλοῦτον καὶ δυνάμεις καὶ τὰναντία τούτοις καὶ ὅλως εὐτυχίαν καὶ δυστυχίαν.

οἱ μὲν οὖν νέοι τὰ ἦθη εἰσὶν ἐπιθυμητικοί, καὶ οἷοι ποιεῖν ὧν ἂν ἐπιθυμήσωσι. καὶ τῶν περὶ τὸ σῶμα ἐπιθυμιῶν μάλιστα

ἀκολουθητικοί εἰσι τῇ περὶ τὰ ἀφροδίσια καὶ ἀκρατεῖς ταύτης, εὐμετάβολοι δὲ καὶ ἀψίκороι πρὸς τὰς ἐπιθυμίας, καὶ σφόδρα μὲν ἐπιθυμοῦσι ταχέως δὲ παύονται (ὀξεῖαι γὰρ αἱ βουλήσεις καὶ οὐ μεγάλαι, ὥσπερ αἱ τῶν καμνόντων δίψαι καὶ πείναι), καὶ θυμικοὶ καὶ ὀξύθυμοι καὶ οἷοι ἀκολουθεῖν τῇ ὀργῇ. καὶ ἥττους εἰσὶ τοῦ θυμοῦ· διὰ γὰρ φιλοτιμίαν οὐκ ἀνέχονται ὀλιγωρούμενοι, ἀλλ' ἀγανακτοῦσιν ἂν οἶωνται ἀδικεῖσθαι. καὶ φιλότιμοι μὲν εἰσιν, μᾶλλον δὲ φιλόνικοι (ὑπεροχῆς γὰρ ἐπιθυμεῖ ἡ νεότης, ἡ δὲ νίκη ὑπεροχὴ τις), καὶ ἅμφω ταῦτα μᾶλλον ἢ φιλοχρήματοι (φιλοχρήματοι δὲ ἥκιστα διὰ τὸ μήπω ἐνδείας πεπειραῖσθαι, ὥσπερ τὸ Πιττακοῦ ἔχει ἀπόφθεγμα εἰς Ἀμφιάραιον), καὶ οὐ κακοήθεις ἀλλ' εὐήθεις διὰ τὸ μήπω τεθεωρηκέναι πολλὰς πονηρίας, καὶ εὐπιστοὶ διὰ τὸ μήπω πολλὰ ἐξηπατῆσθαι, καὶ εὐέλπιδες· ὥσπερ γὰρ οἱ οἰνωμένοι, οὕτω διάθερμοί εἰσιν οἱ νέοι ὑπὸ τῆς φύσεως· ἅμα δὲ καὶ διὰ τὸ μὴ πολλὰ ἀποτετυχηκέναι. καὶ ζῶσι τὰ πλεῖστα ἐλπίδι· ἡ μὲν γὰρ ἐλπίς τοῦ μέλλοντός ἐστιν ἡ δὲ μνήμη τοῦ παροιχομένου, τοῖς δὲ νέοις τὸ μὲν μέλλον πολὺ τὸ δὲ παρεληλυθὸς βραχύ· τῇ γὰρ πρώτῃ ἡμέρᾳ μεμνησθαι μὲν οὐδὲν οἷόν τε, ἐλπίζειν δὲ πάντα. καὶ εὐεξαπάτητοί εἰσι διὰ τὸ εἰρημένον (ἐλπίζουσι γὰρ ῥαδίως), καὶ ἀνδρειότεροι (θυμώδεις γὰρ καὶ εὐέλπιδες, ὧν τὸ μὲν μὴ φοβεῖσθαι τὸ δὲ θαρρεῖν ποιεῖ· οὔτε γὰρ ὀργιζόμενος οὐδεὶς φοβεῖται, τό τε ἐλπίζειν ἀγαθόν τι θαρραλέον ἐστίν), καὶ αἰσχυνηλοὶ (οὐ γὰρ πω καλὰ ἕτερα ὑπολαμβάνουσιν, ἀλλὰ πεπαιδεύονται ὑπὸ τοῦ νόμου μόνον), καὶ μεγαλόψυχοι (οὐ γὰρ ὑπὸ τοῦ βίου πω τεταπείνωνται, ἀλλὰ τῶν ἀναγκαίων ἄπειροί εἰσιν, καὶ τὸ ἀξιοῦν αὐτὸν μεγάλων μεγαλοψυχία· τοῦτο δ' εὐέλπιδος). καὶ μᾶλλον αἰροῦνται πράττειν τὰ καλὰ τῶν συμφερόντων· τῇ γὰρ ἦθει ζῶσι μᾶλλον ἢ τῇ λογισμῷ, ἔστι δὲ ὁ μὲν λογισμὸς τοῦ συμφέροντος ἡ δὲ ἀρετὴ τοῦ καλοῦ. καὶ φιλόφιλοι καὶ φιλέταιροι μᾶλλον τῶν [1389b] ἄλλων ἡλικιῶν διὰ τὸ χαίρειν τῷ συζῆν καὶ μήπω πρὸς τὸ συμφέρον κρίνειν μηδέν, ὥστε μηδὲ τοὺς φίλους. καὶ ἅπαντα ἐπὶ τὸ μᾶλλον καὶ σφοδρότερον ἀμαρτάνουσι, παρὰ τὸ Χιλώνειον (πάντα γὰρ ἄγαν πράττουσιν· φιλοῦσι γὰρ ἄγαν καὶ μισοῦσιν ἄγαν καὶ τᾶλλα πάντα ὁμοίως), καὶ εἰδέναι ἅπαντα οἶονται καὶ δισχυρίζονται (τοῦτο γὰρ αἰτίον ἐστίν καὶ τοῦ πάντα ἄγαν), καὶ τὰ ἀδικήματα ἀδικοῦσιν εἰς ὕβριν, οὐ κακουργίαν. καὶ ἐλεητικοὶ διὰ τὸ πάντας χρηστοὺς καὶ βελτίους ὑπολαμβάνειν (τῇ γὰρ αὐτῶν ἀκακία τοὺς πέλας μετροῦσιν, ὥστε

ἀνάξια πάσχειν ὑπολαμβάνουσιν αὐτούς), καὶ φιλογέλωτες, διὸ καὶ φιλευτράπελοι· ἡ γὰρ εὐτραπελία πεπαιδευμένη ὕβρις ἐστίν.

Τὸ μὲν οὖν τῶν νέων τοιοῦτόν ἐστιν ἦθος, οἱ δὲ πρεσβύτεροι καὶ παρηκμακότες σχεδὸν ἐκ τῶν ἐναντίων τούτοις τὰ πλεῖστα ἔχουσιν ἦθη· διὰ γὰρ τὸ πολλὰ ἔτη βεβιωκέναι καὶ πλείω ἐξηπατῆσθαι καὶ ἐξημαρτηκέναι, καὶ τὰ πλείω φαῦλα εἶναι τῶν πραγμάτων, οὔτε διαβεβαιοῦνται οὐδέν, ἡττόν τε ἄγανται πάντα ἢ δεῖ. καὶ οἶονται, ἴσασι δ' οὐδέν, καὶ ἀμφιδοξοῦντες προστιθέασιν ἀεὶ τὸ ἴσως καὶ τάχα, καὶ πάντα λέγουσιν οὕτως, παγίως δ' οὐδέν. καὶ κακοήθεις εἰσίν· ἔστι γὰρ κακοήθεια τὸ ἐπὶ τὸ χεῖρον ὑπολαμβάνειν πάντα. ἔτι δὲ καχύποπτοί εἰσι διὰ τὴν ἀπιστίαν, ἄπιστοι δὲ δι' ἐμπειρίαν. καὶ οὔτε φιλοῦσιν σφόδρα οὔτε μισοῦσι διὰ ταῦτα, ἀλλὰ κατὰ τὴν Βίαντος ὑποθήκην καὶ φιλοῦσιν ὡς μισήσοντες καὶ μισοῦσιν ὡς φιλήσοντες. καὶ μικρόψυχοι διὰ τὸ τεταπεινώσθαι ὑπὸ τοῦ βίου· οὐδενὸς γὰρ μεγάλου οὐδὲ περιττοῦ ἀλλὰ τῶν πρὸς τὸν βίον ἐπιθυμοῦσι. καὶ ἀνελεύθεροι· ἐν γάρ τι τῶν ἀναγκαίων ἡ οὐσία, ἅμα δὲ καὶ διὰ τὴν ἐμπειρίαν ἴσασιν ὡς χαλεπὸν τὸ κτήσασθαι καὶ ῥάδιον τὸ ἀποβαλεῖν. καὶ δειλοὶ καὶ πάντα προφοβητικοί· ἐναντίως γὰρ διάκεινται τοῖς νέοις· κατεψυγμένοι γάρ εἰσιν, οἱ δὲ θερμοί, ὥστε προωδοπεποίηκε τὸ γῆρας τῇ δειλίᾳ· καὶ γὰρ ὁ φόβος κατὰψυξίς τις ἐστίν. καὶ φιλόζωοι, καὶ μᾶλλον ἐπὶ τῇ τελευταίᾳ ἡμέρᾳ διὰ τὸ τοῦ ἀπόντος εἶναι τὴν ἐπιθυμίαν, καὶ οὗ ἐνδεεῖς, τούτου μάλιστα ἐπιθυμεῖν. καὶ φίλαντοι μᾶλλον ἢ δεῖ· μικροψυχία γὰρ τις καὶ αὕτη. καὶ πρὸς τὸ συμφέρον ζῶσιν, ἀλλ' οὐ πρὸς τὸ καλόν, μᾶλλον ἢ δεῖ, διὰ τὸ φίλαντοι εἶναι· τὸ μὲν γὰρ [1390a] συμφέρον αὐτῷ ἀγαθόν ἐστι, τὸ δὲ καλὸν ἀπλῶς. καὶ ἀναίσχυντοι μᾶλλον ἢ αἰσχυντηλοί· διὰ γὰρ τὸ μὴ φροντίζειν ὁμοίως τοῦ καλοῦ καὶ τοῦ συμφέροντος ὀλιγωροῦσι τοῦ δοκεῖν. καὶ δυσέλπιδες διὰ τὴν ἐμπειρίαν (τὰ γὰρ πλείω τῶν γιγνομένων φαῦλά ἐστιν· ἀποβαίνει γὰρ τὰ πολλὰ ἐπὶ τὸ χεῖρον), καὶ ἔτι διὰ τὴν δειλίαν. καὶ ζῶσι τῇ μνήμῃ μᾶλλον ἢ τῇ ἐλπίδι· τοῦ γὰρ βίου τὸ μὲν λοιπὸν ὀλίγον τὸ δὲ παρεληλυθὸς πολὺ, ἔστι δὲ ἡ μὲν ἐλπίς τοῦ μέλλοντος ἡ δὲ μνήμη τῶν παροιχομένων· ὅπερ αἴτιον καὶ τῆς ἀδολεσχίας αὐτοῖς· διατελοῦσι γὰρ τὰ γενόμενα λέγοντες· ἀναμνησκόμενοι γὰρ ἡδονται. καὶ οἱ θυμοὶ ὀξεῖς μὲν ἀσθενεῖς δὲ εἰσιν, καὶ αἱ ἐπιθυμίαι αἱ μὲν ἐκλελοίπασιν αἱ δὲ ἀσθενεῖς εἰσιν, ὥστε οὐτ' ἐπιθυμητικοὶ οὔτε πρακτικοὶ κατὰ τὰς ἐπιθυμίας, ἀλλὰ κατὰ τὸ κέρδος· διὸ σωφρονικοὶ

φαίνονται οἱ τηλικούτοι· αἱ τε γὰρ ἐπιθυμίαι ἀνείκασι καὶ δουλεύουσι τῷ κέρδει. καὶ μᾶλλον ζῶσι κατὰ λογισμὸν ἢ κατὰ τὸ ἦθος· ὁ μὲν γὰρ λογισμὸς τοῦ συμφέροντος τὸ δ' ἦθος τῆς ἀρετῆς ἐστίν. καὶ τὰδικήματα ἀδικοῦσιν εἰς κακουργίαν, οὐκ εἰς ὕβριν. ἐλεητικοὶ δὲ καὶ οἱ γέροντές εἰσιν, ἀλλ' οὐ διὰ ταῦτα τοῖς νέοις· οἱ μὲν γὰρ διὰ φιλανθρωπίαν, οἱ δὲ δι' ἀσθένειαν· πάντα γὰρ οἴονται ἐγγὺς εἶναι αὐτοῖς παθεῖν, τοῦτο δ' ἦν ἐλεητικόν· ὅθεν ὀδυρτικοὶ εἰσι, καὶ οὐκ εὐτράπελοι οὐδὲ φιλογέλοιοι· ἐναντίον γὰρ τὸ ὀδυρτικὸν τῷ φιλογέλῳτι.

τῶν μὲν οὖν νέων καὶ τῶν πρεσβυτέρων τὰ ἦθη τοιαῦτα, ὥστ' ἐπεὶ ἀποδέχονται πάντες τοὺς τῷ σφετέρῳ ἦθει λεγομένους λόγους καὶ τοὺς ὁμοίους, οὐκ ἄδηλον πῶς χρώμενοι τοῖς λόγοις τοιοῦτοι φανοῦνται καὶ αὐτοὶ καὶ οἱ λόγοι.

Οἱ δ' ἀκμάζοντες φανερόν ὅτι μεταξὺ τούτων τὸ ἦθος ἔσονται ἐκατέρων, ἀφαιροῦντες τὴν ὑπερβολήν, καὶ οὔτε σφόδρα θαρροῦντες (θρασύτης γὰρ τὸ τοιοῦτον) οὔτε λίαν φοβούμενοι, καλῶς δὲ πρὸς ἅμφω ἔχοντες, οὔτε πᾶσι πιστεύοντες οὔτε πᾶσιν ἀπιστοῦντες, ἀλλὰ κατὰ τὸ ἀληθές κρίνοντες μᾶλλον, καὶ οὔτε πρὸς τὸ καλὸν ζῶντες μόνον οὔτε πρὸς τὸ συμφέρον [1390b] ἀλλὰ πρὸς ἅμφω, καὶ οὔτε πρὸς φειδῶ οὔτε πρὸς ἀσωτίαν ἀλλὰ πρὸς τὸ ἀρμόττον, ὁμοίως δὲ καὶ πρὸς θυμὸν καὶ πρὸς ἐπιθυμίαν, καὶ σῶφρονες μετ' ἀνδρείας καὶ ἀνδρεῖοι μετὰ σωφροσύνης. ἐν γὰρ τοῖς νέοις καὶ τοῖς γέρουσι διήρηται ταῦτα· εἰσὶν γὰρ οἱ μὲν νέοι ἀνδρεῖοι καὶ ἀκόλαστοι, οἱ δὲ πρεσβύτεροι σῶφρονες καὶ δειλοί. ὥς δὲ καθόλου εἰπεῖν, ὅσα μὲν διήρηνται ἢ νεότης καὶ τὸ γῆρας τῶν ὠφελίμων, ταῦτα ἅμφω ἔχουσιν, ὅσα δὲ ὑπερβάλλουσιν ἢ ἐλλείπουσιν, τούτων τὸ μέτριον καὶ τὸ ἀρμόττον. ἀκμάζει δὲ τὸ μὲν σῶμα ἀπὸ τῶν τριάκοντα ἐτῶν μέχρι τῶν πέντε καὶ τριάκοντα, ἢ δὲ ψυχὴ περὶ τὰ ἐνὸς δεῖν πεντήκοντα.

περὶ μὲν οὖν νεότητος καὶ γήρως καὶ ἀκμῆς, ποίων ἡθῶν ἕκαστόν ἐστιν, εἰρήσθω τοσαῦτα.

Περὶ δὲ τῶν ἀπὸ τύχης γινομένων ἀγαθῶν, δι' ὅσα αὐτῶν καὶ τὰ ἦθη ποιά ἄττα συμβαίνει τοῖς ἀνθρώποις, λέγωμεν ἐφεξῆς. εὐγενείας μὲν οὖν ἡθὸς ἐστὶ τὸ φιλοτιμότερον εἶναι τὸν κεκτημένον αὐτήν· ἅπαντες γάρ, ὅταν ὑπάρχη τι, πρὸς τοῦτο σωρεύειν εἰώθασιν, ἢ δ' εὐγένεια ἐντιμότης προγόνων ἐστίν. καὶ καταφρονητικὸν καὶ τῶν ὁμοίων ἐστὶν τοῖς προγόνοις αὐτῶν, διότι πόρρω ταῦτα μᾶλλον ἢ

ἐγγὺς γιγνόμενα ἐντιμότερα καὶ εὐαλαζόνευτα. ἔστι δὲ εὐγενὲς μὲν κατὰ τὴν τοῦ γένους ἀρετὴν, γενναῖον δὲ κατὰ τὸ μὴ ἐξίστασθαι τῆς φύσεως· ὅπερ ὡς ἐπὶ τὸ πολὺ οὐ συμβαίνει τοῖς εὐγενέσιν, ἀλλ' εἰσὶν οἱ πολλοὶ εὐτελεῖς· φορὰ γὰρ τίς ἐστιν ἐν τοῖς γένεσιν ἀνδρῶν ὥσπερ ἐν τοῖς κατὰ τὰς χώρας γιγνομένοις, καὶ ἐνίοτε ἂν ἢ ἀγαθὸν τὸ γένος, ἐγγίνονται διὰ τινος χρόνου ἄνδρες περιττοί, κᾶπειτα πάλιν ἀναδίδωσιν. ἐξίσταται δὲ τὰ μὲν εὐφυᾶ γένη εἰς μανικώτερα ἦθη, οἷον οἱ ἀπ' Ἀλκιβιάδου καὶ οἱ ἀπὸ Διονυσίου τοῦ προτέρου, τὰ δὲ στάσιμα εἰς ἀβελτερίαν καὶ νωθρότητα, οἷον οἱ ἀπὸ Κίμωνος καὶ Περικλέους καὶ Σωκράτους.

Τῷ δὲ πλούτῳ ἃ ἔπεται ἦθη, ἐπιπολῆς ἔστιν ἰδεῖν ἅπασιν· ὕβρισταί γὰρ καὶ ὑπερήφανοι, πάσχοντές τι ὑπὸ τῆς κτήσεως τοῦ πλούτου (ὥσπερ γὰρ ἔχοντες ἅπαντα τὰγαθὰ οὕτω διάκεινται· [1391a] ὁ δὲ πλοῦτος οἷον τιμὴ τις τῆς ἀξίας τῶν ἄλλων, διὸ φαίνεται ὧνια ἅπαντα εἶναι αὐτοῦ), καὶ τρυφεροὶ καὶ σαλάκωνες, τρυφεροὶ μὲν διὰ τὴν τροφὴν καὶ τὴν ἔνδειξιν τῆς εὐδαιμονίας, σαλάκωνες δὲ καὶ σόλοικοι διὰ τὸ πάντας εἰωθῆναι διατρίβειν περὶ τὸ ἐρώμενον καὶ θαυμαζόμενον ὑπ' αὐτῶν. καὶ τὸ οἶεσθαι ζηλοῦν τοὺς ἄλλους ἃ καὶ αὐτοί. ἅμα δὲ καὶ εἰκότως τοῦτο πάσχουσιν (πολλοὶ γὰρ εἰσιν οἱ δεόμενοι τῶν ἐχόντων· ὅθεν καὶ τὸ Σιμωνίδου εἴρηται περὶ τῶν σοφῶν καὶ πλουσίων πρὸς τὴν γυναῖκα τὴν Ἰέρωνος ἐρομένην πότερον γενέσθαι κρεῖττον πλούσιον ἢ σοφόν· “πλούσιον” εἰπεῖν· τοὺς σοφοὺς γὰρ ἔφη ὁρᾶν ἐπὶ ταῖς τῶν πλουσίων θύραις διατρίβοντας), καὶ τὸ οἶεσθαι ἀξίους εἶναι ἄρχειν· ἔχειν γὰρ οἴονται ὧν ἔνεκεν ἄρχειν ἄξιον. καὶ ὡς ἐν κεφαλαίῳ, ἀνοήτου εὐδαίμονος ἦθος (ἡθος) πλούτου ἐστίν. διαφέρει δὲ τοῖς νεωστὶ κεκτημένοις καὶ τοῖς πάλαι τὰ ἦθη τῷ ἅπαντα μᾶλλον καὶ φαυλότερα τὰ κακὰ ἔχειν τοὺς νεοπλούτους (ὥσπερ γὰρ ἀπαιδευσία πλούτου ἐστὶ τὸ νεόπλουτον εἶναι), καὶ ἀδικήματα ἀδικοῦσιν οὐ κακουργικά, ἀλλὰ τὰ μὲν ὕβριστικά, τὰ δὲ ἀκρατευτικά, οἷον εἰς αἰκίαν καὶ μοιχείαν.

Ὅμοιως δὲ καὶ περὶ δυνάμεως σχεδὸν τὰ πλεῖστα φανερά ἐστιν ἦθη. τὰ μὲν γὰρ τὰ αὐτὰ ἔχει δύνამιν τῷ πλούτῳ τὰ δὲ βελτίῳ· φιλοτιμότεροι γὰρ καὶ ἀνδρωδέστεροί εἰσιν τὰ ἦθη οἱ δυνάμενοι τῶν πλουσίων διὰ τὸ ἐφίεσθαι ἔργων ὅσα ἐξουσία αὐτοῖς πράττειν διὰ τὴν δύναμιν, καὶ σπουδαστικώτεροι διὰ τὸ ἐν ἐπιμελείᾳ εἶναι, ἀναγκαζόμενοι σκοπεῖν τὰ περὶ τὴν δύναμιν, καὶ σεμνότεροι ἢ βαρύτεροι· ποιεῖ γὰρ σεμνοτέρους τὸ ἀξίωμα, διὸ μετριάξουσιν, ἔστι

δὲ ἡ σεμνότης μαλακὴ καὶ εὐσχήμων βαρύτης· κἂν ἀδικῶσιν, οὐ μικραδικηταί εἰσιν ἀλλὰ μεγαλάδικοι.

ἡ δ' εὐτυχία κατὰ μόριά τε τῶν εἰρημένων ἔχει τὰ ἥθη (εἰς γὰρ ταῦτα συντείνουσιν αἱ μέγισται δοκοῦσαι εἶναι εὐτυχίαι), καὶ ἔτι εἰς εὐτεκνίαν καὶ τὰ κατὰ τὸ σῶμα ἀγαθὰ παρασκευάζει ἡ εὐτυχία πλεονεκτεῖν. ὑπερηφανώτεροι μὲν οὖν καὶ [1391b] ἀλογιστότεροι διὰ τὴν εὐτυχίαν εἰσίν, ἐν δὲ ἀκολουθεῖ βέλτιστον ἦθος τῇ εὐτυχίᾳ, ὅτι φιλόθεοί εἰσι καὶ ἔχουσιν πρὸς τὸ θεῖον πῶς, πιστεύοντες διὰ τὰ γιγνόμενα ἀπὸ τῆς τύχης.

περὶ μὲν οὖν τῶν καθ' ἡλικίαν καὶ τύχην ἡθῶν εἴρηται· τὰ γὰρ ἐναντία τῶν εἰρημένων ἐκ τῶν ἐναντίων φανερά ἐστιν, οἷον πένητος καὶ ἀτυχοῦς ἦθος καὶ ἀδυνάτου.

Ἐπεὶ δὲ ἡ τῶν πιθανῶν λόγων χρήσις πρὸς κρίσιν ἐστί (περὶ ὧν γὰρ ἴσμεν καὶ κεκρίκαμεν οὐδὲν ἔτι δεῖ λόγου), ἔστι δ' ἐάν τε πρὸς ἓνα τις τῷ λόγῳ χρώμενος προτρέπη ἢ ἀποτρέπη, οἷον οἱ νοουθετοῦντες ποιοῦσιν ἢ πείθοντες (οὐδὲν γὰρ ἤττον κριτῆς ὁ εἷς· ὃν γὰρ δεῖ πείσαι, οὗτός ἐστιν ὡς εἰπεῖν ἀπλῶς κριτῆς), ἐάν τε πρὸς ἀμφισβητοῦντας, ἐάν τε πρὸς ὑπόθεσιν λέγῃ τις, ὁμοίως (τῷ γὰρ λόγῳ ἀνάγκη χρῆσθαι καὶ ἀναιρεῖν τὰ ἐναντία, πρὸς ᾧ ὥσπερ ἀμφισβητοῦντα τὸν λόγον ποιεῖται), ὡσαύτως δὲ καὶ ἐν τοῖς ἐπιδεικτικοῖς (ὥσπερ γὰρ πρὸς κριτὴν τὸν θεωρὸν ὁ λόγος συνέστηκεν, ὅλως δὲ μόνος ἐστὶν ἀπλῶς κριτῆς ἐν τοῖς πολιτικοῖς ἀγῶσιν ὁ τὰ ζητούμενα κρίνων· τὰ τε γὰρ ἀμφισβητούμενα ζητεῖται πῶς ἔχει, καὶ περὶ ὧν βουλευόνται), περὶ δὲ τῶν κατὰ τὰς πολιτείας ἡθῶν ἐν τοῖς συμβουλευτικοῖς εἴρηται πρότερον - ὥστε διωρισμένον ἂν εἶη πῶς τε καὶ διὰ τίνων τοὺς λόγους ἠθικὸς ποιητέον.

ἐπεὶ δὲ περὶ ἕκαστον μὲν γένος τῶν λόγων ἕτερον ἦν τὸ τέλος, περὶ ἀπάντων δ' αὐτῶν εἰλημμέναι δόξαι καὶ προτάσεις εἰσὶν ἐξ ὧν τὰς πίστεις φέρουσιν καὶ συμβουλευόντες καὶ ἐπιδεικνύμενοι καὶ ἀμφισβητοῦντες, ἔτι δὲ ἐξ ὧν ἠθικοὺς τοὺς λόγους ἐνδέχεται ποιεῖν, καὶ περὶ τούτων διώρισταί, λοιπὸν ἡμῖν διελθεῖν περὶ τῶν κοινῶν. πᾶσι γὰρ ἀναγκαῖον τῷ περὶ τοῦ δυνατοῦ καὶ ἀδυνάτου προσχρῆσθαι ἐν τοῖς λόγοις, καὶ τοὺς μὲν ὡς ἔσται τοὺς δὲ ὡς γέγονε πειρᾶσθαι δεικνύναι. ἔτι δὲ <τὸ> περὶ μεγέθους κοινὸν ἀπάντων ἐστὶ τῶν λόγων· χρῶνται γὰρ πάντες τῷ μειοῦν καὶ αὐξεῖν καὶ συμβουλευόντες καὶ ἐπαινοῦντες ἢ ψέγοντες καὶ κατηγοροῦντες ἢ ἀπολογούμενοι. [1392a] τούτων δὲ διορισθέντων περὶ τῶν ἐνθυμημάτων κοινῇ

πειραθῶμεν εἰπεῖν, εἴ τι ἔχομεν, καὶ περὶ παραδειγμάτων, ὅπως τὰ λοιπὰ προσθέντες ἀποδῶμεν τὴν ἐξ ἀρχῆς πρόθεσιν. ἔστιν δὲ τῶν κοινῶν τὸ μὲν αὖξιν οἰκειότατον τοῖς ἐπιδεικτικοῖς, ὥσπερ εἴρηται, τὸ δὲ γεγονὸς τοῖς δικανικοῖς (περὶ τούτων γὰρ ἡ κρίσις), τὸ δὲ δυνατόν καὶ ἐσόμενον τοῖς συμβουλευτικοῖς.

Πρῶτον μὲν οὖν περὶ δυνατοῦ καὶ ἀδυνάτου λέγωμεν. ἂν δὴ τὸ ἐναντίον ἢ δυνατόν ἢ εἶναι ἢ γενέσθαι, καὶ τὸ ἐναντίον δόξειεν ἂν εἶναι δυνατόν, οἷον εἰ δυνατόν ἄνθρωπον ὑγιασθῆναι, καὶ νοσῆσαι· ἢ γὰρ αὕτῃ δύναμις τῶν ἐναντίων ἢ ἐναντία. καὶ εἰ τὸ ὅμοιον δυνατόν, καὶ τὸ ὅμοιον· καὶ εἰ τὸ χαλεπώτερον δυνατόν, καὶ τὸ ῥᾶον· καὶ εἰ τὸ σπουδαῖον καὶ καλὸν γενέσθαι δυνατόν, καὶ ὅλως δυνατόν γενέσθαι· χαλεπώτερον γὰρ καλὴν οἰκίαν ἢ οἰκίαν εἶναι. καὶ οὐ ἡ ἀρχὴ δύναται γενέσθαι, καὶ τὸ τέλος· οὐδὲν γὰρ γίγνεται οὐδ' ἄρχεται γίγνεσθαι τῶν ἀδυνάτων, οἷον τὸ σύμμετρον τὴν διάμετρον εἶναι οὐτ' ἂν ἄρξαιτο γίγνεσθαι οὔτε γίγνεται. καὶ οὐ τὸ τέλος, καὶ ἡ ἀρχὴ δυνατή· ἅπαντα γὰρ ἐξ ἀρχῆς γίγνεται. καὶ εἰ τὸ ὕστερον τῇ οὐσίᾳ ἢ τῇ γενέσει δυνατόν γενέσθαι, καὶ τὸ πρότερον, οἷον εἰ ἄνδρα γενέσθαι δυνατόν, καὶ παῖδα (πρότερον γὰρ ἐκεῖνο γίγνεται), καὶ εἰ παῖδα, καὶ ἄνδρα (καὶ ἀρχὴ γὰρ ἐκείνη). καὶ ὧν ἡ ἔρως ἢ ἐπιθυμία φύσει ἐστίν· οὐδεὶς γὰρ ἀδυνάτων ἐρᾷ οὐδὲ ἐπιθυμεῖ ὥς ἐπὶ τὸ πολὺ. καὶ ὧν ἐπιστῆμαί εἰσι καὶ τέχνη, δυνατόν ταῦτα καὶ εἶναι καὶ γίγνεσθαι. καὶ ὅσων ἡ ἀρχὴ τῆς γενέσεως ἐν τούτοις ἐστὶν ἃ ἡμεῖς ἀναγκάσαιμεν ἂν ἢ πείσαιμεν· ταῦτα δ' ἐστὶν ὧν κρείττους ἢ κύριοι ἢ φίλοι. καὶ ὧν τὰ μέρη δυνατόν, καὶ τὸ ὅλον, καὶ ὧν τὸ ὅλον δυνατόν, καὶ τὰ μέρη ὥς ἐπὶ τὸ πολὺ· εἰ γὰρ πρόσχισμα καὶ κεφαλὴ καὶ χιτῶν δύναται γενέσθαι, καὶ ὑποδήματα δυνατόν γενέσθαι, καὶ εἰ ὑποδήματα, καὶ πρόσχισμα καὶ κεφαλὴ καὶ χιτῶν. καὶ εἰ τὸ [1392b] γένος ὅλον τῶν δυνατῶν γενέσθαι, καὶ τὸ εἶδος, καὶ εἰ τὸ εἶδος, καὶ τὸ γένος, οἷον εἰ πλοῖον γενέσθαι δυνατόν, καὶ τριήρη, καὶ εἰ τριήρη, καὶ πλοῖον. καὶ εἰ θάτερον τῶν πρὸς ἄλληλα πεφυκότων, καὶ θάτερον, οἷον εἰ διπλάσιον, καὶ ἡμισυ, καὶ εἰ ἡμισυ, διπλάσιον. καὶ εἰ ἄνευ τέχνης καὶ παρασκευῆς δυνατόν γίγνεσθαι, μᾶλλον διὰ τέχνης καὶ ἐπιμελείας δυνατόν, ὅθεν καὶ Ἀγάθωνι εἴρηται

καὶ μὴν τὰ μὲν γε τῆς τέχνης πράσσειν, τὰ δὲ

ἡμῖν ἀνάγκη καὶ τύχη προσγίγνεται.

καὶ εἰ τοῖς χείροσι καὶ ἥττοσι καὶ ἀφρονεστέροις δυνατόν, καὶ τοῖς ἐναντίοις μᾶλλον, ὥσπερ καὶ Ἰσοκράτης ἔφη δεινὸν εἶναι εἰ ὁ μὲν

Εὐθυνοῦς ἔμαθεν, αὐτὸς δὲ μὴ δυνήσεται εὐρεῖν. περὶ δὲ ἀδυνάτου δῆλον ὅτι ἐκ τῶν ἐναντίων τοῖς εἰρημένοις ὑπάρχει.

εἰ δὲ γέγονεν, ἐκ τῶνδε σκεπτέον. πρῶτον μὲν γάρ, εἰ τὸ ἦττον γίνεσθαι πεφυκὸς γέγονεν, γεγονὸς ἂν εἴη καὶ τὸ μᾶλλον. καὶ εἰ τὸ ὕστερον εἰωθὸς γίνεσθαι γέγονεν, καὶ τὸ πρότερον γέγονεν, οἷον εἰ ἐπιέλησται, καὶ ἔμαθέ ποτε τοῦτο. καὶ εἰ ἐδύνατο καὶ ἐβούλετο, πέπραχε· πάντες γάρ, ὅταν δυνάμενοι βουλευθῶσι, πράττουσιν· ἐμποδὼν γὰρ οὐδέν. ἔτι εἰ ἐβούλετο καὶ μηδὲν τῶν ἔξω ἐκώλυεν, καὶ εἰ ἐδύνατο καὶ ὠργίζετο, καὶ εἰ ἐδύνατο καὶ ἐπεθύμει· ὥς γὰρ ἐπὶ τὸ πολὺ ὧν ὀρέγονται, ἂν δύνωνται, ποιοῦσιν, οἱ μὲν φαῦλοι δι' ἀκρασίαν, οἱ δ' ἐπεικεῖς ὅτι τῶν ἐπεικῶν ἐπιθυμοῦσιν. καὶ εἰ ἔμελλε [γίνεσθαι], καὶ ποιεῖν· εἰκὸς γὰρ τὸν μέλλοντα καὶ ποιῆσαι. καὶ εἰ γέγονεν ὅσα ἢ πέφυκε πρὸ ἐκείνου ἢ ἔνεκα ἐκείνου, οἷον εἰ ἥστραψε, καὶ ἐβρόντησεν, καὶ εἰ ἐπείρασε, καὶ ἔπραξεν. καὶ εἰ ὅσα ὕστερον πέφυκε γίνεσθαι ἢ οὐ ἔνεκα γίνεσθαι γέγονε, καὶ τὸ πρότερον καὶ τὸ τούτου ἔνεκα γέγονεν, οἷον εἰ ἐβρόντησε, καὶ ἥστραψεν, καὶ εἰ ἔπραξεν, ἐπείρασεν. ἔστι δὲ τούτων ἀπάντων τὰ μὲν ἐξ ἀνάγκης τὰ δ' ὥς ἐπὶ τὸ πολὺ οὕτως ἔχοντα. περὶ δὲ τοῦ μὴ γεγονέναι φανερόν ὅτι ἐκ τῶν ἐναντίων τοῖς εἰρημένοις.

[1393a] καὶ περὶ τοῦ ἐσομένου ἐκ τῶν αὐτῶν δῆλον· τό τε γὰρ ἐν δυνάμει καὶ ἐν βουλήσει ὄν ἔσται, καὶ τὰ ἐν ἐπιθυμίᾳ καὶ ὀργῇ καὶ λογισμῷ μετὰ δυνάμεως ὄντα, ταῦτα καὶ ἐν ὀρμῇ τοῦ ποιεῖν ἢ μελλήσει ἔσται· ὥς γὰρ ἐπὶ τὸ πολὺ γίνεσθαι μᾶλλον τὰ μέλλοντα ἢ τὰ μὴ μέλλοντα. καὶ εἰ προέγονε ὅσα πρότερον πέφυκε γίνεσθαι, οἷον εἰ συννεφεῖ, εἰκὸς ὕσαι. καὶ εἰ τὸ ἔνεκα τούτου γέγονε, καὶ τοῦτο εἰκὸς γενέσθαι, οἷον εἰ θεμέλιος, καὶ οἰκία.

περὶ δὲ μεγέθους καὶ μικρότητος τῶν πραγμάτων καὶ μείζονός τε καὶ ἐλάττονος καὶ ὅλως μεγάλων καὶ μικρῶν ἐκ τῶν προειρημένων ἡμῖν ἔστιν φανερόν. εἴρηται γὰρ ἐν τοῖς συμβουλευτικοῖς περὶ τε μεγέθους ἀγαθῶν καὶ περὶ τοῦ μείζονος ἀπλῶς καὶ ἐλάττονος, ὥστε ἐπεὶ καθ' ἕκαστον τῶν λόγων τὸ προκείμενον τέλος ἀγαθόν ἔστιν, οἷον τὸ συμφέρον καὶ τὸ καλὸν καὶ τὸ δίκαιον, φανερόν ὅτι δι' ἐκείνων ληπτέον τὰς αὐξήσεις πᾶσιν. τὸ δὲ παρὰ ταῦτα ἔτι ζητεῖν περὶ μεγέθους ἀπλῶς καὶ ὑπεροχῆς κενολογεῖν ἔστιν· κυριώτερα γὰρ ἔστιν πρὸς τὴν χρεῖαν τῶν καθόλου τὰ καθ' ἕκαστα τῶν πραγμάτων.

περὶ μὲν οὖν δυνατοῦ καὶ ἀδυνάτου, καὶ πότερον γέγονεν ἢ οὐ

γέγονεν καὶ ἔσται ἢ οὐκ ἔσται, ἔτι δὲ περὶ μεγέθους καὶ μικρότητος τῶν πραγμάτων, εἰρήσθω ταῦτα.

Λοιπὸν δὲ περὶ τῶν κοινῶν πίστεων ἅπασιν εἰπεῖν, ἐπείπερ εἴρηται περὶ τῶν ιδίων. εἰσὶ δ' αἱ κοιναὶ πίστεις δύο τῷ γενεῖ, παράδειγμα καὶ ἐνθύμημα· ἡ γὰρ γνώμη μέρος ἐνθυμήματός ἐστιν. πρῶτον μὲν οὖν περὶ παραδείγματος λέγωμεν· ὅμοιον γὰρ ἐπαγωγὴ τὸ παράδειγμα, ἡ δ' ἐπαγωγὴ ἀρχή.

παραδειγμάτων δὲ εἶδη δύο· ἓν μὲν γὰρ ἐστὶν παραδείγματος εἶδος τὸ λέγειν πράγματα προγενομένα, ἓν δὲ τὸ αὐτὸν ποιεῖν. τούτου δὲ ἓν μὲν παραβολὴ ἓν δὲ λόγοι, οἷον οἱ Αἰσώπειοι καὶ Λιβυκοί.

ἔστιν δὲ τὸ μὲν πράγματα λέγειν τοιόνδε τι, ὥσπερ εἴ τις λέγοι ὅτι δεῖ πρὸς βασιλέα παρασκευάζεσθαι καὶ μὴ ἔαν Αἴγυπτον χειρώσασθαι· καὶ γὰρ πρότερον Δαρεῖος [1393b] οὐ πρότερον διέβη πρὶν Αἴγυπτον ἔλαβεν, λαβὼν δὲ διέβη, καὶ πάλιν Ξέρξης οὐ πρότερον ἐπεχείρησεν πρὶν ἔλαβεν, λαβὼν δὲ διέβη, ὥστε καὶ οὗτος ἔαν λάβῃ, διαβήσεται, διὸ οὐκ ἐπιτρεπτόν.

παραβολὴ δὲ τὰ Σωκρατικά, οἷον εἴ τις λέγοι ὅτι οὐ δεῖ κληρωτοὺς ἄρχειν· ὅμοιον γὰρ ὥσπερ ἂν εἴ τις τοὺς ἀθλητὰς κληροίῃ μὴ οἱ δύνανται ἀγωνίζεσθαι ἀλλ' οἱ ἂν λάχωσιν, ἢ τῶν πλωτῆρων ὄντινα δεῖ κυβερνᾶν κληρώσειεν, ὥς δέον τὸν λαχόντα ἀλλὰ μὴ τὸν ἐπιστάμενον.

λόγος δέ, οἷος ὁ Στησιχόρου περὶ Φαλάριδος καὶ <ὁ> Αἰσώπου ὑπὲρ τοῦ δημαγωγοῦ. Στησίχορος μὲν γὰρ ἐλομένων στρατηγὸν αὐτοκράτορα τῶν Ἱμεραίων Φάλαριν καὶ μελλόντων φυλακὴν διδόναι τοῦ σώματος, τᾶλλα διαλεχθεὶς εἶπεν αὐτοῖς λόγον ὥς ἵππος κατεῖχε λειμῶνα μόνος, ἐλθόντος δ' ἐλάφου καὶ διαφθείροντος τὴν νομὴν βουλόμενος τιμωρήσασθαι τὸν ἔλαφον ἡρώτα τινὰ ἄνθρωπον εἰ δύναιτ' ἂν μετ' αὐτοῦ τιμωρήσασθαι τὸν ἔλαφον, ὁ δ' ἔφησεν, ἔαν λάβῃ χαλινὸν καὶ αὐτὸς ἀναβῇ ἐπ' αὐτὸν ἔχων ἀκόντια· συνομολογήσας δὲ καὶ ἀναβάντος ἀντὶ τοῦ τιμωρήσασθαι αὐτὸς ἐδούλευσε τῷ ἀνθρώπῳ. “οὐτῷ δὲ καὶ ὑμεῖς”, ἔφη, “ὁρᾶτε μὴ βουλόμενοι τοὺς πολεμίους τιμωρήσασθαι τὸ αὐτὸ πάθητε τῷ ἵππῳ· τὸν μὲν γὰρ χαλινὸν ἔχετε ἤδη, ἐλόμενοι στρατηγὸν αὐτοκράτορα· ἔαν δὲ φυλακὴν δῶτε καὶ ἀναβῆναι ἐάσητε, δουλεύσετε ἤδη Φαλάριδι”. Αἴσωπος δὲ ἐν Σάμῳ δημηγορῶν κρινομένου δημαγωγοῦ περὶ θανάτου ἔφη ἀλώπεκα διαβαίνουσιν ποταμὸν ἀπωσθῆναι εἰς

φάραγγα, οὐ δυναμένην δὲ ἐκβῆναι πολὺν χρόνον κακοπαθεῖν καὶ κυνοραιστάς πολλοὺς ἔχεσθαι αὐτῆς, ἐχῖνον δὲ πλανώμενον, ὥς εἶδεν αὐτήν, κατοικτεῖραντα ἐρωτᾶν εἰ ἀφέλοι αὐτῆς τοὺς κυνοραιστάς, τὴν δὲ οὐκ ἔαν· ἐρομένου δὲ διὰ τί, “ὅτι οὗτοι μὲν” φάναι “ἤδη μου πλήρεις εἰσὶ καὶ ὀλίγον ἔλκουσιν αἷμα, ἐὰν δὲ τούτους ἀφέλητε, ἕτεροι ἐλθόντες πεινῶντες ἐκπιοῦνταί μου τὸ λοιπὸν αἷμα”. “ἀτὰρ καὶ ὑμᾶς, ἄνδρες Σάμιοι, οὗτος μὲν οὐδὲν ἔτι βλάβει (πλούσιος γὰρ ἐστίν), ἐὰν δὲ τοῦτον ἀποκτείνετε, ἕτεροι [1394a] ἤξουσιν πένητες, οἱ ὑμᾶς ἀναλώσουσι τὰ λοιπὰ κλέπτοντες.”

εἰσὶ δ’ οἱ λόγοι δημηγορικοί, καὶ ἔχουσιν ἀγαθὸν τοῦτο, ὅτι πράγματα μὲν εὐρεῖν ὅμοια γεγενημένα χαλεπὸν, λόγους δὲ ῥᾶον· ποιῆσαι γὰρ δεῖ ὥσπερ καὶ παραβολάς, ἂν τις δύνηται τὸ ὅμοιον ὁρᾶν, ὅπερ ῥᾶόν ἐστιν ἐκ φιλοσοφίας. ῥᾶω μὲν οὖν πορίσασθαι τὰ διὰ τῶν λόγων, χρησιμώτερα δὲ πρὸς τὸ βουλευσασθαι τὰ διὰ τῶν πραγμάτων· ὅμοια γὰρ ὥς ἐπὶ τὸ πολὺ τὰ μέλλοντα τοῖς γεγονόσιν.

δεῖ δὲ χρῆσθαι τοῖς παραδείγμασι οὐκ ἔχοντα μὲν ἐνθυμήματα ὥς ἀποδείξεσιν (ἢ γὰρ πίστις διὰ τούτων), ἔχοντα δὲ ὥς μαρτυρίαις, ἐπιλόγῳ χρώμενον τοῖς ἐνθυμήμασιν· προτιθέμενα μὲν γὰρ ἔοικεν ἐπαγωγῇ, τοῖς δὲ ῥητορικοῖς οὐκ οἰκεῖον ἐπαγωγὴ πλὴν ἐν ὀλίγοις, ἐπιλεγόμενα δὲ μαρτυρίαις, ὁ δὲ μάρτυς πανταχοῦ πιθανός· διὸ καὶ προτιθέντι μὲν ἀνάγκη πολλὰ λέγειν, ἐπιλέγοντι δὲ καὶ ἐν ἱκανόν· μάρτυς γὰρ χρηστός καὶ εἰς χρήσιμος.

πόσα μὲν οὖν εἶδη παραδειγμάτων, καὶ πῶς αὐτοῖς καὶ πότε χρηστέον, εἴρηται.

Περὶ δὲ γνωμολογίας, ῥηθέντος τί ἐστὶν γνώμη μάλιστ’ ἂν γένοιτο φανερόν περὶ ποίων τε καὶ πότε καὶ τίσιν ἀρμόττει χρῆσθαι τῷ γνωμολογεῖν ἐν τοῖς λόγοις. ἔστι δὴ γνώμη ἀπόφανσις, οὐ μέντοι οὔτε περὶ τῶν καθ’ ἕκαστον, οἷον ποῖός τις Ἰφικράτης, ἀλλὰ καθόλου, οὔτε περὶ πάντων, οἷον ὅτι τὸ εὐθὺ τῷ καμπύλῳ ἐναντίον, ἀλλὰ περὶ ὧν αἱ πράξεις εἰσὶ, καὶ ἂν αἰρετὰ ἢ φευκτά ἐστὶ πρὸς τὸ πράττειν, ὥστ’ ἐπεὶ τὸ ἐνθύμημα ὁ περὶ τοιούτων συλλογισμός ἐστιν, σχεδὸν τὰ συμπεράσματα τῶν ἐνθυμημάτων καὶ αἱ ἀρχαὶ ἀφαιρεθέντος τοῦ συλλογισμοῦ γινώμαί εἰσιν, οἷον

χρὴ δ’ οὐ ποθ’ ὅστις ἀρτίφρων πέφυκ’ ἀνήρ

παῖδας περισσῶς ἐκδιδάσκεσθαι σοφούς.

τοῦτο μὲν οὖν γνώμη· προστεθείσης δὲ τῆς αἰτίας καὶ τοῦ διὰ τί ἐνθύμημά ἐστιν τὸ ἅπαν, οἷον

χωρίς γὰρ ἄλλης ἥς ἔχουσιν ἀργίας,
φθόνον παρ' ἀστῶν ἀλφάνουσι δυσμενῇ,

[1394b] καὶ τὸ

οὐκ ἔστιν ὅστις πάντ' ἀνὴρ εὐδαιμονεῖ,
καὶ τὸ

οὐκ ἔστιν ἀνδρῶν ὅστις ἔστ' ἐλεύθερος
γνώμη, πρὸς δὲ τῷ ἐχομένῳ ἐνθύμημα,
ἢ χρημάτων γὰρ δοῦλός ἐστιν ἢ τύχης.

εἰ δὴ ἔστιν γνώμη τὸ εἰρημένον, ἀνάγκη τέτταρα εἶδη εἶναι
γνώμης· ἢ γὰρ μετ' ἐπιλόγου ἔσται ἢ ἄνευ ἐπιλόγου. ἀποδείξεως μὲν
οὖν δεόμεναί εἰσιν ὅσαι παράδοξόν τι λέγουσιν ἢ ἀμφισβητούμενον·
ὅσαι δὲ μηδὲν παράδοξον, ἄνευ ἐπιλόγου. τούτων δ' ἀνάγκη τὰς μὲν
διὰ τὸ προεγνῶσθαι μηδὲν δεῖσθαι ἐπιλόγου, οἷον

ἀνδρὶ δ' ὑγιαίνειν ἄριστόν ἐστιν, ὥς γ' ἐμὶν δοκεῖ

(φαίνεται μὲν γὰρ τοῖς πολλοῖς οὕτω), τὰς δ' ἅμα λεγομένας
δήλας εἶναι ἐπιβλέψασιν, οἷον

οὐδεὶς ἐραστὴς ὅστις οὐκ ἀεὶ φιλεῖ.

τῶν δὲ μετ' ἐπιλόγου αἱ μὲν ἐνθυμήματος μέρος εἰσὶν, ὥσπερ
χρὴ δ' οὐ ποθ' ὅστις ἀρτίφρων,

αἱ δ' ἐνθυμηματικαὶ μὲν, οὐκ ἐνθυμήματος δὲ μέρος· αἵπερ καὶ
μάλιστα εὐδοκίμοῦσιν. εἰσὶν δ' αὖται ἐν ὅσαις ἐμφαίνεται τοῦ
λεγομένου τὸ αἷτιον, οἷον ἐν τῷ

ἀθάνατον ὀργὴν μὴ φύλασσε θνητὸς ὢν·

τὸ μὲν γὰρ φάναι “μὴ δεῖν φυλάττειν” γνώμη, τὸ δὲ προσκείμενον
“θνητὸν ὄντα” τὸ διὰ τί. ὁμοίως δὲ καὶ

θανατὰ χρὴ τὸν θανατόν, οὐκ ἀθάνατα τὸν θανατὸν φρονεῖν.

φανερὸν οὖν ἐκ τῶν εἰρημένων πόσα τε εἶδη γνώμης, καὶ περὶ
ποῖον ἕκαστον ἀρμόττει· περὶ μὲν γὰρ τῶν ἀμφισβητουμένων ἢ
παραδόξων μὴ ἄνευ ἐπιλόγου, ἀλλ' ἢ προθέντα τὸν ἐπίλογον γνώμη
χρησθαι τῷ συμπεράσματι (οἷον εἰ τις εἴποι “ἐγὼ μὲν οὖν, ἐπειδὴ
οὔτε φθονεῖσθαι δεῖ οὔτ' ἀργὸν εἶναι, οὐ φημι χρῆναι παιδεύεσθαι”),
ἢ τοῦτο προειπὸντα ἐπειπεῖν τὰ ἔμπροσθεν· περὶ δὲ τῶν μὴ
παραδόξων ἀδήλων δὲ προστιθέντα τὸ διότι στρογγυλώτατα.
ἀρμόττει δ' ἐν τοῖς τοιούτοις καὶ τὰ Λακωνικὰ ἀποφθέγματα καὶ τὰ
αἰνιγματώδη, οἷον εἰ [1395a] τις λέγει ὅπερ Στησίχορος ἐν Λοκροῖς
εἶπεν, ὅτι οὐ δεῖ ὕβριστὰς εἶναι, ὅπως μὴ οἱ τέττιγες χαμόθεν ἄδωσιν.

ἀρμόττει δὲ γνωμολογεῖν ἡλικία μὲν πρεσβυτέρων, περὶ δὲ

τούτων ὧν ἔμπειρός τις ἐστίν, ὥστε τὸ μὲν μὴ τηλικοῦτον ὄντα γνωμολογεῖν ἀπρεπὲς ὥσπερ καὶ τὸ μυθολογεῖν, περὶ δὲ ὧν ἄπειρος, ἡλίθιον καὶ ἀπαίδευτον. σημεῖον δὲ ἱκανόν· οἱ γὰρ ἀγροῖκοι μάλιστα γνωμοτύποι εἰσὶ καὶ ῥαδίως ἀποφαίνονται.

καθόλου δὲ μὴ ὄντος καθόλου εἰπεῖν μάλιστα ἀρμόττει ἐν σχετλιασμῷ καὶ δεινώσει, καὶ ἐν τούτοις ἢ ἀρχόμενον ἢ ἀποδείξαντα. χρῆσθαι δὲ δεῖ καὶ ταῖς τεθρυλημέναις καὶ κοιναῖς γνώμαις, ἐὰν ὧσι χρήσιμοι· διὰ γὰρ τὸ εἶναι κοιναί, ὡς ὁμολογούντων πάντων, ὀρθῶς ἔχειν δοκοῦσιν, οἷον παρακαλοῦντι ἐπὶ τὸ κινδυνεύειν μὴ θυσαμένους

ξυνὸς Ἐνυάλιος,

καὶ ἐπὶ τὸ ἀναιρεῖν τῶν ἐχθρῶν τὰ τέκνα καὶ μηδὲν ἀδικοῦντα νήπιος ὅς πατέρα κτείνας παῖδας καταλείπει.

ἔτι ἔνναι τῶν παροιμιῶν καὶ γνώμαι εἰσιν, οἷον παροιμία “Ἀττικὸς πάροιχος”. δεῖ δὲ τὰς γνώμας λέγειν καὶ παρὰ τὰ δεδημοσιευμένα (λέγω δὲ δεδημοσιευμένα οἷον τὸ “γνώθι σαυτὸν” καὶ τὸ “μηδὲν ἄγαν”), ὅταν ἢ τὸ ἥθος φαίνεσθαι μέλλῃ βέλτιον ἢ παθητικῶς εἰρημένη. ἔστι δὲ παθητικὴ μὲν οἷον εἴ τις ὀργιζόμενος φαίη ψεῦδος εἶναι ὡς δεῖ γινώσκειν αὐτόν· οὗτος γοῦν εἰ ἐγίγνωσκεν ἑαυτόν, οὐκ ἂν ποτε στρατηγεῖν ἠξίωσεν· τὸ δὲ ἥθος βέλτιον, ὅτι οὐ δεῖ, ὥσπερ φασίν, φιλεῖν ὡς μισήσοντας, ἀλλὰ μᾶλλον μισεῖν ὡς φιλήσοντας. δεῖ δὲ τῇ λέξει τὴν προαίρεσιν συνδηλοῦν, εἰ δὲ μή, τὴν αἰτίαν ἐπιλέγειν, οἷον οὕτως εἰπόντα, ὅτι “δεῖ δὲ φιλεῖν οὐχ ὥσπερ φασίν, ἀλλ’ ὡς ἀεὶ φιλήσοντα· ἐπιβούλου γὰρ θάτερον”, ἢ ὧδε, “οὐκ ἀρέσκει δέ μοι τὸ λεγόμενον· δεῖ γὰρ τὸν ἀληθινὸν φίλον ὡς φιλήσοντα ἀεὶ φιλεῖν”, καὶ “οὐδὲ τὸ μηδὲν ἄγαν· δεῖ γὰρ τοὺς γε κακοὺς ἄγαν μισεῖν”.

[1395b] ἔχουσι δ’ εἰς τοὺς λόγους βοήθειαν μεγάλην μίαν μὲν διὰ τὴν φορτικότητα τῶν ἀκροατῶν· χαίρουσι γὰρ ἐὰν τις καθόλου λέγων ἐπιτύχῃ τῶν δοξῶν ἃς ἐκεῖνοι κατὰ μέρος ἔχουσιν. ὁ δὲ λέγω δῆλον ἔσται ὧδε, ἅμα δὲ καὶ πῶς δεῖ αὐτὰς θηρεῦειν. ἢ μὲν γὰρ γνώμη, ὥσπερ εἴρηται, ἀπόφανσις καθόλου ἐστίν, χαίρουσι δὲ καθόλου λεγομένου ὁ κατὰ μέρος προὑπολαμβάνοντες τυγχάνουσι· οἷον εἴ τις γείτοσι τύχοι κεχρημένος ἢ τέκνοις φαύλοις, ἀποδέξαιτ’ ἂν τοῦ εἰπόντος ὅτι οὐδὲν γειτονίας χαλεπώτερον ἢ ὅτι οὐδὲν

ἡλιθιώτερον τεκνοποιίας, ὥστε δεῖ στοχάζεσθαι ποῖα τυγχάνουσι προὔπολαμβάνοντες, εἴθ' οὕτως περὶ τούτων καθόλου λέγειν. ταύτην τε δὴ ἔχει μίαν χρῆσιν τὸ γνωμολογεῖν, καὶ ἑτέραν κρείττω· ἠθικοὺς γὰρ ποιεῖ τοὺς λόγους. ἦθος δὲ ἔχουσιν οἱ λόγοι ἐν ὅσοις δῆλη ἡ προαίρεσις· αἱ δὲ γνῶμαι πᾶσαι τοῦτο ποιοῦσιν διὰ τὸ ἀποφαίνεσθαι τὸν τὴν γνώμην λέγοντα καθόλου περὶ τῶν προαιρέσεων, ὥστε, ἂν χρησταὶ ᾧσιν αἱ γνῶμαι, καὶ χρηστοθήη φαίνεσθαι ποιοῦσι τὸν λέγοντα.

περὶ μὲν οὖν γνώμης, καὶ τί ἐστὶ καὶ πόσα εἶδη ταύτης καὶ πῶς χρηστέον αὐτῇ καὶ τίνα ὠφέλειαν ἔχει, εἰρήσθω ταῦτα.

Περὶ δ' ἐνθυμημάτων καθόλου τε εἵπωμεν τίνα τρόπον δεῖ ζητεῖν, καὶ μετὰ ταῦτα τοὺς τόπους· ἄλλο γὰρ εἶδος ἐκάτερον τούτων ἐστίν. ὅτι μὲν οὖν τὸ ἐνθύμημα συλλογισμός ἐστίν, εἴρηται πρότερον, καὶ πῶς συλλογισμός, καὶ τί διαφέρει τῶν διαλεκτικῶν· οὔτε γὰρ πόρρωθεν οὔτε πάντα δεῖ λαμβάνοντας συνάγειν· τὸ μὲν γὰρ ἀσαφές διὰ τὸ μῆκος, τὸ δὲ ἀδολεσχία διὰ τὸ φανερά λέγειν. τοῦτο γὰρ αἴτιον καὶ τοῦ πιθανωτέρους εἶναι τοὺς ἀπαιδεύτους τῶν πεπαιδευμένων ἐν τοῖς ὄχλοις, ὥσπερ φασὶν οἱ ποιηταὶ τοὺς ἀπαιδεύτους παρ' ὄγλῳ μουσικωτέρως λέγειν· οἱ μὲν γὰρ τὰ κοινὰ καὶ καθόλου λέγουσιν, οἱ δ' ἐξ ὧν ἴσασι, καὶ τὰ ἐγγύς· ὥστ' οὐκ ἐξ ἀπάντων τῶν δοκούντων ἀλλ' ἐκ τῶν ὀρισμένων λεκτέον, οἷον ἡ τοῖς κρίνουσιν [1396a] ἡ οὖς ἀποδέχονται, καὶ τοῦτο διότι οὕτως φαίνεται δῆλον εἶναι ἅπασιν ἢ τοῖς πλείστοις· καὶ μὴ μόνον συνάγειν ἐκ τῶν ἀναγκαίων, ἀλλὰ καὶ ἐκ τῶν ὡς ἐπὶ τὸ πολὺ.

πρῶτον μὲν οὖν δεῖ λαβεῖν ὅτι περὶ οὗ δεῖ λέγειν καὶ συλλογίζεσθαι εἴτε πολιτικῷ συλλογισμῷ εἴθ' ὅποιω, ἀναγκαῖον κατὰ τοῦτου ἔχειν τὰ ὑπάρχοντα, ἢ πάντα ἢ ἔνια· μηδὲν γὰρ ἔχων ἐξ οὐδενὸς ἂν ἔχοις συνάγειν. λέγω δ' οἷον πῶς ἂν δυναίμεθα συμβουλεύειν Ἀθηναίους εἰ πολεμητέον ἢ μὴ πολεμητέον, μὴ ἔχοντες τίς ἢ δύναμις αὐτῶν, πότερον ναυτικὴ ἢ πεζικὴ ἢ ἄμφω, καὶ αὕτη πόσις, καὶ πρόσοδοι τίνες ἢ φίλοι καὶ ἐχθροί, εἴτα τίνας πολέμους πεπολεμήκασιν καὶ πῶς, καὶ τᾶλλα τὰ τοιαῦτα· ἢ ἐπαινεῖν, εἰ μὴ ἔχοιμεν τὴν ἐν Σαλαμῖνι ναυμαχίαν ἢ τὴν ἐν Μαραθῶνι μάχην ἢ τὰ ὑπὸ τῶν Ἡρακλειδῶν πραχθέντα ἢ ἄλλο τι τῶν τοιούτων. ἐκ γὰρ τῶν ὑπαρχόντων ἢ δοκούντων ὑπάρχειν καλῶν ἐπαινοῦσι πάντες. ὁμοίως δὲ καὶ ψέγουσιν ἐκ τῶν ἐναντίων, σκοποῦντες τί ὑπάρχει τοιοῦτον αὐτοῖς ἢ δοκεῖ ὑπάρχειν, οἷον ὅτι τοὺς Ἑλληνας κατεδουλώσαντο,

καὶ τοὺς πρὸς τὸν βάρβαρον συμμαχεσαμένους καὶ ἀριστεύσαντας ἠνδραποδίσαντο, Αἰγινήτας καὶ Ποτιδαιάτας, καὶ ὅσα ἄλλα τοιαῦτα, [καὶ] εἴ τι ἄλλο τοιοῦτον ἀμάρτημα ὑπάρχει αὐτοῖς. ὥς δ' αὐτως καὶ οἱ κατηγοροῦντες καὶ οἱ ἀπολογούμενοι ἐκ τῶν ὑπαρχόντων σκοποῦμενοι κατηγοροῦσι καὶ ἀπολογοῦνται.

οὐδὲν δὲ διαφέρει περὶ Ἀθηναίων ἢ Λακεδαιμονίων, ἢ ἀνθρώπου ἢ θεοῦ, τὸ αὐτὸ τοῦτο δρᾶν· καὶ γὰρ συμβουλευόντα τῷ Ἀχιλλεῖ, καὶ ἐπαινοῦντα καὶ ψέγοντα, καὶ κατηγοροῦντα καὶ ἀπολογούμενον ὑπὲρ αὐτοῦ, τὰ ὑπάρχοντα ἢ δοκοῦντα ὑπάρχειν ληπτέον, ἔν' ἐκ τούτων λέγωμεν, ἐπαινοῦντες ἢ ψέγοντες εἴ τι καλὸν ἢ αἰσχρὸν ὑπάρχει, κατηγοροῦντες δ' ἢ ἀπολογούμενοι εἴ τι δίκαιον ἢ ἄδικον, συμβουλευόντες δ' εἴ τι συμφέρον ἢ βλαβερόν. ὁμοίως δὲ τούτοις καὶ περὶ πράγματος ὁτουοῦν, οἷον περὶ δικαιοσύνης, εἰ ἀγαθὸν ἢ μὴ ἀγαθόν, ἐκ τῶν ὑπαρχόντων τῇ δικαιοσύνῃ καὶ τῷ ἀγαθῷ· ὥστ' ἐπειδὴ καὶ πάντες οὕτω φαίνονται ἀποδεικνύντες, ἔάν τε ἀκριβέστερον ἔάν τε μαλακώτερον συλλογίζονται [1396b] (οὐ γὰρ ἐξ ἀπάντων λαμβάνουσιν ἄλλ' ἐκ τῶν περὶ ἕκαστον ὑπαρχόντων), καὶ διὰ τοῦ λόγου δῆλον ὅτι ἀδύνατον ἄλλως δεικνύναι, φανερόν ὅτι ἀναγκαῖον, ὥσπερ ἐν τοῖς Τοπικοῖς, πρῶτον περὶ ἕκαστον ἔχειν ἐξελεγεμένα περὶ τῶν ἐνδεχομένων καὶ τῶν ἐπικαιροτάτων, περὶ δὲ τῶν ἐξ ὑπογυίου γιγνομένων ζητεῖν τὸν αὐτὸν τρόπον, ἀποβλέποντα μὴ εἰς ἀόριστα ἄλλ' εἰς τὰ ὑπάρχοντα περὶ ὧν ὁ λόγος, καὶ περιγράφοντα ὃ τι πλεῖστα καὶ ἐγγύτατα τοῦ πράγματος· ὅσῳ μὲν γὰρ ἂν πλείω ἔχη τῶν ὑπαρχόντων, τοσοῦτω ῥᾶον δεικνύναι, ὅσῳ δ' ἐγγύτερον, τοσοῦτω οἰκειότερα καὶ ἤττον κοινά. λέγω δὲ κοινὰ μὲν τὸ ἐπαινεῖν τὸν Ἀχιλλέα ὅτι ἄνθρωπος καὶ ὅτι τῶν ἡμιθέων καὶ ὅτι ἐπὶ τὸ Ἴλιον ἐστρατεύσατο· ταῦτα γὰρ καὶ ἄλλοις ὑπάρχει πολλοῖς, ὥστε οὐδὲν μᾶλλον ὁ τοιοῦτος τὸν Ἀχιλλέα ἐπαινεῖ ἢ Διομήδην· ἴδια δὲ ἂ μηδενὶ ἄλλῳ συμβέβηκεν ἢ τῷ Ἀχιλλεῖ, οἷον τὸ ἀποκτεῖναι τὸν Ἑκτορα τὸν ἄριστον τῶν Τρώων καὶ τὸν Κύκνον, ὃς ἐκώλυσε ἅπαντας ἀποβαίνειν ἄτρωτος ὢν, καὶ ὅτι νεώτατος καὶ οὐκ ἔνορκος ὢν ἐστράτευσεν, καὶ ὅσα ἄλλα τοιαῦτα.

εἰς μὲν οὖν τρόπος τῆς ἐκλογῆς πρῶτος οὗτος ὁ τοπικός,

τὰ δὲ στοιχεῖα τῶν ἐνθυμημάτων λέγωμεν· στοιχεῖον δὲ λέγω καὶ τόπον ἐνθυμήματος τὸ αὐτό. πρῶτον δὲ εἵπωμεν περὶ ὧν ἀναγκαῖον εἰπεῖν πρῶτον. ἔστιν γὰρ τῶν ἐνθυμημάτων εἶδη δύο· τὰ μὲν γὰρ δεικτικά ἐστιν ὅτι ἔστιν ἢ οὐκ ἔστιν, τὰ δ' ἐλεγκτικά, καὶ διαφέρει

ὥσπερ ἐν τοῖς διαλεκτικοῖς ἔλεγχος καὶ συλλογισμός. ἔστι δὲ τὸ μὲν δεικτικὸν ἐνθύμημα τὸ ἐξ ὁμολογουμένων συνάγειν, τὸ δὲ ἐλεγκτικὸν τὸ τὰ ἀνομολογούμενα συνάγειν.

σχεδὸν μὲν οὖν ἡμῖν περὶ ἕκαστον τῶν εἰδῶν τῶν χρησίμων καὶ ἀναγκαίων ἔχονται οἱ τόποι· ἐξειλεγμένοι γὰρ αἱ προτάσεις περὶ ἕκαστόν εἰσιν, ὥστε ἐξ ὧν δεῖ φέρειν τὰ ἐνθυμήματα τόπων περὶ ἀγαθοῦ ἢ κακοῦ, ἢ καλοῦ ἢ αἰσχροῦ, ἢ δικαίου ἢ ἀδίκου, καὶ περὶ τῶν ἡθῶν καὶ παθημάτων καὶ ἕξεων ὡσαύτως, εἰλημμένοι ἡμῖν ὑπάρχουσι πρότερον οἱ τόποι.

[1397a] ἔτι δὲ ἄλλον τρόπον καθόλου περὶ ἀπάντων λάβωμεν, καὶ λέγωμεν παρασημαίνόμενοι τοὺς ἐλεγκτικούς καὶ τοὺς ἀποδεικτικούς, καὶ τοὺς τῶν φαινομένων ἐνθυμημάτων, οὐκ ὄντων δὲ ἐνθυμημάτων, ἐπεὶ περ οὐδὲ συλλογισμῶν. δηλωθέντων δὲ τούτων περὶ τῶν λύσεων καὶ ἐνστάσεων διορίσωμεν, πόθεν δεῖ πρὸς τὰ ἐνθυμήματα φέρειν.

Ἔστι δὲ εἷς μὲν τόπος τῶν δεικτικῶν ἐκ τῶν ἐναντίων· δεῖ γὰρ σκοπεῖν εἰ τῷ ἐναντίῳ τὸ ἐναντίον ὑπάρχει, ἀναιροῦντα μὲν εἰ μὴ ὑπάρχει, κατασκευάζοντα δὲ εἰ ὑπάρχει, οἷον ὅτι τὸ σωφρονεῖν ἀγαθόν· τὸ γὰρ ἀκολασταίνειν βλαβερόν. ἢ ὡς ἐν τῷ Μεσσηνιακῷ· “εἰ γὰρ ὁ πόλεμος αἴτιος τῶν παρόντων κακῶν, μετὰ τῆς εἰρήνης δεῖ ἐπανορθώσασθαι”.

εἰ περ γὰρ οὐδὲ τοῖς κακῶς δεδρακόσιν
ἀκουσίως δίκαιον εἰς ὀργὴν πεσεῖν,
οὐδ’ ἂν ἀναγκασθεῖς τις εὖ δράσῃ τινά,
προσῆκον εἶναι τῷδ’ ὀφείλεσθαι χάριν.
ἀλλ’ εἰ περ ἔστιν ἐν βροτοῖς ψευδηγορεῖν
πιθανά, νομίζειν χρή σε καὶ τοῦναντίον,
ἄπιστ’ ἀληθῆ πολλὰ συμβαίνειν βροτοῖς.

ἄλλος ἐκ τῶν ὁμοίων πτώσεων· ὁμοίως γὰρ δεῖ ὑπάρχειν ἢ μὴ ὑπάρχειν, οἷον ὅτι τὸ δίκαιον οὐ πᾶν ἀγαθόν· καὶ γὰρ ἂν τὸ δικαίως, νῦν δ’ οὐχ αἰρετόν τὸ δικαίως ἀποθανεῖν.

ἄλλος ἐκ τῶν πρὸς ἄλληλα· εἰ γὰρ θατέρῳ ὑπάρχει τὸ καλῶς ἢ δικαίως ποιῆσαι, θατέρῳ τὸ πεπονθέναι, καὶ εἰ <τὸ> κελεῦσαι, καὶ τὸ πεποιηκέναι, οἷον ὡς ὁ τελώνης Διομέδων περὶ τῶν τελῶν, “εἰ γὰρ μὴδ’ ὑμῖν αἰσχροὺς τὸ πωλεῖν, οὐδ’ ἡμῖν τὸ ὠνεῖσθαι”. καὶ εἰ τῷ πεπονθότι τὸ καλῶς ἢ δικαίως ὑπάρχει, καὶ τῷ ποιήσαντι. ἔστι δ’ ἐν τούτῳ παραλογίσασθαι· εἰ γὰρ δικαίως ἔπαθόν τι, [δικαίως

πέπονθεν,] ἀλλ' ἴσως οὐχ ὑπὸ σοῦ· διὸ δεῖ σκοπεῖν χωρὶς εἰ ἄξιος ὁ παθὼν παθεῖν καὶ ὁ [1397b] ποιήσας ποιῆσαι, εἴτα χρῆσθαι ὁποτέρως ἀρμόττει· ἐνίοτε γὰρ διαφωνεῖ τὸ τοιοῦτον καὶ οὐδὲν κωλύει, ὥσπερ ἐν τῷ Ἀλκμαίῳ τῷ Θεοδόκτου “μητέρα δὲ τὴν σὴν οὐ τις ἐστύγει βροτῶν;” φησὶ δὲ ἀποκρινόμενος “ἀλλὰ διαλαβόντα χρὴ σκοπεῖν”· ἐρομένης δὲ τῆς Ἀλφεισιβοίας πῶς, ὑπολαβὼν φησιν τὴν μὲν θανεῖν ἔκριναν, ἐμὲ δὲ μὴ κτανεῖν.

καὶ ἡ περὶ Δημοσθένους δίκη καὶ τῶν ἀποκτεινάντων Νικάνορα· ἐπεὶ γὰρ δικαίως ἐκρίθησαν ἀποκτείνειν, δικαίως ἔδοξεν ἀποθανεῖν. καὶ περὶ τοῦ Θήβησιν ἀποθανόντος, περὶ οὗ κελεύει κρίνεσθαι εἰ δίκαιος ἦν ἀποθανεῖν, ὥς οὐκ ἄδικον ὂν τὸ ἀποκτείνειν τὸν δικαίως ἀποθανόντα.

ἄλλος ἐκ τοῦ μᾶλλον καὶ ἥττον, οἷον “εἰ μὴδ' οἱ θεοὶ πάντα ἴσασιν, σχολῇ οἱ γε ἄνθρωποι”· τοῦτο γὰρ ἐστὶν “εἰ ὃ μᾶλλον ἂν ὑπάρχοι μὴ ὑπάρχει, δῆλον ὅτι οὐδ' ὃ ἥττον”. τὸ δ' ὅτι τοὺς πλησίον τύπτει ὅς γε καὶ τὸν πατέρα ἐκ τοῦ “εἰ τὸ ἥττον <ὑπάρχον> ὑπάρχει, καὶ τὸ μᾶλλον ὑπάρχει”· τοὺς γὰρ πατέρας ἥττον τύπτουσιν ἢ τοὺς πλησίον· ἢ δὴ οὕτως γε ἢ εἰ ὃ μᾶλλον ὑπάρχει μὴ ὑπάρχει, ἢ εἰ ὃ ἥττον ὑπάρχει <ὑπάρχει>, ὁπότερον δεῖ δεῖξαι, εἴθ' ὅτι ὑπάρχει εἴθ' ὅτι οὐ. ἔτι εἰ μήτε μᾶλλον μήτε ἥττον, ὅθεν εἴρηται

καὶ σὸς μὲν οἰκτρὸς παῖδας ἀπολέσας πατὴρ·

Οἰνεὺς δ' ἄρ' οὐχὶ [τὸν Ἑλλάδος] κλεινὸν ἀπολέσας γόνον;

καὶ ὅτι, εἰ μὴδὲ Θησεὺς ἠδίκησεν, οὐδ' Ἀλέξανδρος, καὶ εἰ μὴδ' οἱ Τυνδαρίδαι, οὐδ' Ἀλέξανδρος, καὶ εἰ Πάτροκλον Ἑκτώρ, καὶ Ἀχιλλέα Ἀλέξανδρος. καὶ εἰ μὴδ' ἄλλοι τεχνῖται φαῦλοι, οὐδ' οἱ φιλόσοφοι. καὶ εἰ μὴδ' οἱ στρατηγοὶ φαῦλοι ὅτι θανατοῦνται πολλάκις, οὐδ' οἱ σοφισταί. καὶ ὅτι “εἰ δεῖ τὸν ἰδιώτην τῆς ὑμετέρας δόξης ἐπιμελεῖσθαι, καὶ ὑμᾶς τῆς τῶν Ἑλλήνων”.

ἄλλος ἐκ τοῦ χρόνον σκοπεῖν, οἷον ὡς Ἴφικράτης ἐν τῇ πρὸς Ἀρμόδιον, ὅτι “εἰ πρὶν ποιῆσαι ἡξίου τῆς εἰκόνης τυχεῖν ἐὰν ποιήσω, ἔδοτε ἄν· ποιήσαντι δ' ἄρ' οὐ δώσετε; μὴ τοίνυν μέλλοντες μὲν ὑπισχνεῖσθε, παθόντες δ' ἀφαιρεῖσθε”. καὶ πάλιν πρὸς τὸ Θηβαίους διέναι Φίλιππον εἰς [1398a] τὴν Ἀττικὴν, ὅτι εἰ πρὶν βοηθῆσαι εἰς Φωκεῖς ἡξίου, ὑπέσχοντο ἄν· ἄτοπον οὖν εἰ διότι προεῖτο καὶ ἐπίστευσεν μὴ διήσουσιν.

ἄλλος ἐκ τῶν εἰρημένων καθ' αὐτοῦ πρὸς τὸν εἰπόντα, οἷον ἐν τῷ Τεύκρῳ. διαφέρει δὲ ὁ τρόπος ὃ ἐχρήσατο Ἴφικράτης πρὸς

Ἀριστοφῶντα, ἐπερόμενος εἰ προδοίῃ ἂν τὰς ναῦς ἐπὶ χρήμασιν· οὐ φάσκοντος δέ, εἴτα εἶπεν “σὺ μὲν ὦν Ἀριστοφῶν οὐκ ἂν προδοίης, ἐγὼ δ’ ὦν Ἴφικράτης;” δεῖ δὲ ὑπάρχειν μᾶλλον ἂν δοκοῦντα ἀδικῆσαι ἐκεῖνον· εἰ δὲ μή, γελοῖον ἂν φανείη, <οἶον> εἰ πρὸς Ἀριστείδην κατηγοροῦντα τοῦτό τις [ἂν] εἶπειν ἄλλος πρὸς ἀπιστίαν τοῦ κατηγοροῦ· ὅλως γὰρ βούλεται ὁ κατηγορῶν βελτίων εἶναι τοῦ φεύγοντος· τοῦτ’ οὖν ἐξελέγγειν δεῖ. καθόλου δὲ ἄτοπός ἐστιν, ὅταν τις ἐπιτιμᾷ ἄλλοις ἢ αὐτὸς ποιεῖ ἢ ποιήσειεν ἂν, ἢ προτρέπη ποιεῖν ἢ αὐτὸς μὴ ποιεῖ μηδὲ ποιήσειεν ἂν.

ἄλλος ἐξ ὀρισμοῦ, οἶον τί τὸ δαιμόνιον ἐστιν· “ἄρα θεὸς ἢ θεοῦ ἔργον; καίτοι ὅστις οἶεται θεοῦ ἔργον εἶναι, τοῦτον ἀνάγκη οἶεσθαι καὶ θεοὺς εἶναι.” καὶ ὡς Ἴφικράτης, ὅτι γενναιότατος ὁ βέλτιστος· καὶ γὰρ Ἀρμοδίῳ καὶ Ἀριστογείτονι οὐδὲν πρότερον ὑπῆρχεν γενναῖον πρὶν γενναῖόν τι πρᾶξαι. καὶ ὅτι συγγενέστερος αὐτός· “τὰ γοῦν ἔργα συγγενέστερά ἐστι τὰ ἐμὰ τοῖς Ἀρμοδίου καὶ Ἀριστογείτονος ἢ τὰ σά”. καὶ ὡς ἐν τῷ Ἀλεξάνδρῳ ὅτι πάντες ἂν ὁμολογήσειαν τοὺς μὴ κοσμίους οὐχ ἑνὸς σώματος ἀγαπᾶν ἀπόλαυσιν. καὶ δι’ ὃ Σωκράτης οὐκ ἔφη βαδίζειν ὡς Ἀρχέλαον· ὕβριν γὰρ ἔφη εἶναι τὸ μὴ δύνασθαι ἀμύνασθαι ὁμοίως καὶ εὖ παθόντας ὥσπερ καὶ κακῶς. πάντες γὰρ οὗτοι ὀρισάμενοι καὶ λαβόντες τὸ τί ἐστὶ συλλογίζονται περὶ ὧν λέγουσιν.

ἄλλος ἐκ τοῦ ποσαχῶς, οἶον ἐν τοῖς Τοπικοῖς περὶ τοῦ ὀρθῶς.

ἄλλος ἐκ διαιρέσεως, οἶον εἰ πάντες τριῶν ἔνεκεν ἀδικοῦσιν (ἢ τοῦδε γὰρ ἔνεκα ἢ τοῦδε ἢ τοῦδε), καὶ διὰ μὲν τὰ δύο ἀδύνατον, διὰ δὲ τὸ τρίτον οὐδ’ αὐτοῖ φασιν.

ἄλλος ἐξ ἐπαγωγῆς, οἶον ἐκ τῆς Πεπαρηθίας, ὅτι περὶ [1398b] τῶν τέκνων αἱ γυναῖκες πανταχοῦ διορίζουσι τάληθές· τοῦτο μὲν γὰρ Ἀθήνησι Μαντία τῷ ῥήτορι ἀμφισβητοῦντι πρὸς τὸν υἱὸν ἀπέφηνεν ἢ μήτηρ, τοῦτο δὲ Θήβησιν Ἰσμηνίου καὶ Στίλβωνος ἀμφισβητούντων ἢ Δωδωνὶς ἀπέδειξεν Ἰσμηνίου τὸν υἱόν, καὶ διὰ τοῦτο Θετταλίσκον Ἰσμηνίου ἐνόμιζον. καὶ πάλιν ἐκ τοῦ Νόμου τοῦ Θεοδέκτου, “εἰ τοῖς κακῶς ἐπιμεληθεῖσι τῶν ἀλλοτρίων ἵππων οὐ παραδιδόασι τοὺς οἰκείους, οὐδὲ τοῖς ἀνατρέψασι τὰς ἀλλοτρίας ναῦς <τὰς οἰκείας>, οὐκοῦν εἰ ὁμοίως ἐφ’ ἀπάντων, καὶ τοῖς κακῶς φυλάξασι τὴν ἀλλοτρίαν οὐ χρηστέον ἐστὶν εἰς τὴν οἰκείαν σωτηρίαν”. καὶ ὡς Ἀλκιδάμας, ὅτι πάντες τοὺς σοφοὺς τιμῶσιν· “Πάριοι γοῦν Ἀρχίλοχον καίπερ βλάσφημον ὄντα τετιμήκασι, καὶ

Χῖοι Ὅμηρον οὐκ ὄντα πολίτην, καὶ Μυτιληναῖοι Σαπφῶ καίπερ γυναῖκα οὖσαν, καὶ Λακεδαιμόνιοι Χίλωνα καὶ τῶν γερόντων ἐποίησαν ἥκιστα φιλόλογοι ὄντες, καὶ Ἰταλιῶται Πυθαγόραν, καὶ Λαμψακηνοὶ Ἀναξαγόραν ξένον ὄντα ἔθαψαν καὶ τιμῶσι ἔτι καὶ νῦν, καὶ Ἀθηναῖοι τοῖς Σόλωνος νόμοις χρησάμενοι εὐδαιμόνησαν καὶ Λακεδαιμόνιοι τοῖς Λυκούργου, καὶ Θήβησιν ἅμα οἱ προστάται φιλόσοφοι ἐγένοντο καὶ εὐδαιμόνησεν ἡ πόλις”.

ἄλλος ἐκ κρίσεως περὶ τοῦ αὐτοῦ ἢ ὁμοίου ἢ ἐναντίου, μάλιστα μὲν εἰ πάντες καὶ ἀεὶ, εἰ δὲ μή, ἀλλ’ οἳ γε πλεῖστοι, ἢ σοφοὶ ἢ πάντες ἢ οἱ πλεῖστοι, ἢ ἀγαθοί, ἢ εἰ αὐτοὶ οἱ κρίνοντες, ἢ οὖς ἀποδέχονται οἱ κρίνοντες, ἢ οἷς μὴ οἶόν τε ἐναντίον κρίνειν, οἶον τοῖς κυρίοις, ἢ οἷς μὴ καλὸν ἐναντίον κρίνειν, οἶον θεοῖς ἢ πατρὶ ἢ διδασκάλοις, ὥσπερ ὁ εἰς Μιξιδημίδην εἶπεν Αὐτοκλῆς, [εἰ] ταῖς μὲν σεμναῖς θεαῖς καλῶς εἶχεν ἐν Ἀρείῳ πάγῳ δοῦναι τὰ δίκαια, Μιξιδημίδῃ δ’ οὐ. ἢ ὥσπερ Σαπφῶ, ὅτι τὸ ἀποθνήσκειν κακόν· οἱ θεοὶ γὰρ οὕτω κεκρίκασιν· ἀπέθνησκον γὰρ ἄν. ἢ ὥσπερ Ἀρίστιππος πρὸς Πλάτωνα ἐπαγγελτικώτερόν τι εἰπόντα, ὡς ᾤετο· “ἀλλὰ μὴν ὁ γ’ ἐταῖρος ἡμῶν”, ἔφη, “οὐθὲν τοιοῦτον”, λέγων τὸν Σωκράτη, καὶ Ἥγησίπολις ἐν Δελφοῖς ἡρώτα τὸν θεόν, πρότερον κεχηρμένος Ὀλυμπίασιν, εἰ αὐτῷ τὰ αὐτὰ δοκεῖ [1399a] ἅπερ τῷ πατρὶ, ὡς αἰσχρὸν ὄν τάναντία εἰπεῖν, καὶ περὶ τῆς Ἑλένης ὡς Ἰσοκράτης ἔγραψεν ὅτι σπουδαία, εἶπερ Θησεὺς ἔκρινεν, καὶ περὶ Ἀλεξάνδρου, ὅτι αἱ θεαὶ προέκριναν, καὶ περὶ Εὐαγόρου, ὅτι σπουδαῖος, ὥσπερ Ἰσοκράτης φησὶν· “Κόνων γοῦν δυστυχήσας, πάντας τοὺς ἄλλους παραλιπών, ὡς Εὐαγόραν ἤλθεν”.

ἄλλος ἐκ τῶν μερῶν, ὥσπερ ἐν τοῖς Τοπικοῖς ποία κίνησις ἢ ψυχὴ· ἦδε γὰρ ἢ ἦδε. παράδειγμα ἐκ τοῦ Σωκράτους τοῦ Θεοδέκτου· “εἰς ποῖον ἱερὸν ἡσέβηκεν; τίνας θεῶν οὐ τετίμηκεν ὧν ἡ πόλις νομίζει;”

ἄλλος, ἐπειδὴ ἐπὶ τῶν πλείστων συμβαίνει ὥστε ἔπεσθαί τι τῷ αὐτῷ ἀγαθὸν καὶ κακόν, ἐκ τοῦ ἀκολουθοῦντος προτρέπειν ἢ ἀποτρέπειν, καὶ κατηγορεῖν ἢ ἀπολογεῖσθαι, καὶ ἐπαινεῖν ἢ ψέγειν, οἶον “τῇ παιδεύσει τὸ φθονεῖσθαι ἀκολουθεῖ κακὸν ὄν, τὸ δὲ σοφὸν εἶναι ἀγαθόν· οὐ τοίνυν δεῖ παιδεύεσθαι, φθονεῖσθαι γὰρ οὐ δεῖ· δεῖ μὲν οὖν παιδεύεσθαι, σοφὸν γὰρ εἶναι δεῖ”. ὁ τόπος οὗτός ἐστιν ἡ Καλλιππου τέχνη, προσλαβοῦσα τὸ δυνατόν καὶ τᾶλλα ὡς εἴρηται.

ἄλλος, ὅταν περὶ δυοῖν καὶ ἀντικειμένοιν ἢ προτρέπειν ἢ

ἀποτρέπειν δέη, [καί] τῷ πρότερον εἰρημένῳ τρόπῳ ἐπ’ ἀμφοῖν χρησθαι. διαφέρει δέ, ὅτι ἐκεῖ μὲν τὰ τυχόντα ἀντιτίθεται, ἐνταῦθα δὲ τὰναντία· οἷον ἰέρεια οὐκ εἶα τὸν υἱὸν δημηγορεῖν· “ἐὰν μὲν γάρ”, ἔφη, “τὰ δίκαια λέγῃς, οἱ ἄνθρωποι σε μισήσουσιν, ἐὰν δὲ τὰ ἄδικα, οἱ θεοί· δεῖ μὲν οὖν δημηγορεῖν· ἐὰν μὲν γὰρ τὰ δίκαια λέγῃς, οἱ θεοὶ σε φιλήσουσιν, ἐὰν δὲ τὰ ἄδικα, οἱ ἄνθρωποι”. τοῦτο δ’ ἐστὶ ταὐτὸ τῷ λεγομένῳ, τὸ ἔλος πρίασθαι καὶ τοὺς ἄλλας· καὶ ἡ βλαίσωσις τοῦτο ἐστίν, ὅταν δυοῖν ἐναντίοις ἑκατέρῳ ἀγαθὸν καὶ κακὸν ἔπῃται, ἐναντία ἑκάτερα ἑκατέροις.

ἄλλος, ἐπειδὴ οὐ ταῦτα φανερώς ἐπαινοῦσι καὶ ἀφανῶς, ἀλλὰ φανερώς μὲν τὰ δίκαια καὶ τὰ καλὰ ἐπαινοῦσι μάλιστα, ἰδία δὲ τὰ συμφέροντα μᾶλλον βούλονται, ἐκ τούτων πειρᾶσθαι συνάγειν θάτερον· τῶν γὰρ παραδόξων οὗτος ὁ τόπος κυριώτατός ἐστιν.

ἄλλος ἐκ τοῦ ἀνάλογον ταῦτα συμβαίνειν, οἷον ὁ Ἰφικράτης, τὸν υἱὸν αὐτοῦ, νεώτερον ὄντα τῆς ἡλικίας, ὅτι μέγας ἦν λειτουργεῖν ἀναγκαζόντων, εἶπεν ὅτι εἰ τοὺς μεγάλους τῶν παιδῶν ἄνδρας νομίζουσι, τοὺς μικροὺς τῶν ἀνδρῶν [1399b] παῖδας εἶναι ψηφιοῦνται, καὶ Θεοδόκτης ἐν τῷ Νόμῳ, ὅτι “πολίτας μὲν ποιεῖσθε τοὺς μισθοφόρους, οἷον Στράβακα καὶ Χαρίδημον, διὰ τὴν ἐπιείκειαν· φυγάδας δ’ οὐ ποιήσεσθε τοὺς ἐν τοῖς μισθοφόροις ἀνήκεστα διαπεπραγμένους;”

ἄλλος ἐκ τοῦ τὸ συμβαῖνον ἐὰν ἦ ταυτόν, ὅτι καὶ ἐξ ὧν συμβαίνει ταῦτά· οἷον Ξενοφάνης ἔλεγεν ὅτι ὁμοίως ἀσεβοῦσιν οἱ γενέσθαι φάσκοντες τοὺς θεοὺς τοῖς ἀποθανεῖν λέγουσιν· ἀμφοτέρως γὰρ συμβαίνει μὴ εἶναι τοὺς θεοὺς ποτε. καὶ ὅλως δὲ τὸ συμβαῖνον ἐξ ἐκάστου λαμβάνειν ὥς τὸ αὐτὸ αἰεὶ· “μέλλετε δὲ κρίνειν οὐ περὶ Ἰσοκράτους ἀλλὰ περὶ ἐπιτηδεύματος, εἰ χρὴ φιλοσοφεῖν”. καὶ ὅτι τὸ διδόναι γῆν καὶ ὕδωρ δουλεύειν ἐστίν, καὶ τὸ μετέχειν τῆς κοινῆς εἰρήνης ποιεῖν τὸ προσταττόμενον. ληπτέον δ’ ὁπότερον ἂν ἦ χρήσιμον.

ἄλλος ἐκ τοῦ μὴ ταὐτὸ αἰεὶ αἰρεῖσθαι ὕστερον καὶ πρότερον, ἀλλ’ ἀνάπαλιν, οἷον τόδε τὸ ἐνθύμημα, “ἢ φεύγοντες μὲν ἐμαχόμεθα ὅπως κατέλθωμεν, κατελθόντες δὲ φευξόμεθα ὅπως μὴ μαχώμεθα;” ὅτε μὲν γὰρ τὸ μένειν ἀντὶ τοῦ μάχεσθαι ἡροῦντο, ὅτε δὲ τὸ μὴ μάχεσθαι ἀντὶ τοῦ μὴ μένειν.

ἄλλος τὸ οὗ ἕνεκ’ ἂν εἴη ἢ γένοιτο, τούτου ἕνεκα φάναι εἶναι ἢ γεγενῆσθαι, οἷον εἰ δοίη [ἂν] τίς τι· ἴν’ ἀφελόμενος

καὶ τὸ ἐκ τοῦ Μελεάγρου τοῦ Ἀντιφῶντος,
οὐχ ὥς κτάνωσι θῆρ', ὅπως δὲ μάρτυρες

καὶ τὸ ἐκ τοῦ Αἴαντος τοῦ Θεοδέκτου, ὅτι ὁ Διομήδης προεῖλετο
Ὀδυσσεά οὐ τιμῶν, ἀλλ' ἵνα ἦττων ᾗ ὁ ἀκολουθῶν· ἐνδέχεται γὰρ
τούτου ἕνεκα ποιῆσαι.

ἄλλος, κοινὸς καὶ τοῖς ἀμφισβητοῦσιν καὶ τοῖς συμβουλευούσι,
σκοπεῖν τὰ προτρέποντα καὶ ἀποτρέποντα, καὶ ὧν ἕνεκα καὶ
πράττουσι καὶ φεύγουσιν· ταῦτα γὰρ ἐστὶν ἃ ἐὰν μὲν ὑπάρχη δεῖ
πράττειν, ἐὰν δὲ μὴ ὑπάρχη, μὴ πράττειν, οἷον, εἰ δυνατόν καὶ ῥάδιον
καὶ ὠφέλιμον ἢ αὐτῶ ἢ φίλοις ἢ βλαβερὸν ἐχθροῖς, κἂν ἢ ἐπιζήμιον,
εἰ ἐλάττων ἢ ζημία τοῦ πράγματος, καὶ προτρέπονται [δ'] ἐκ τούτων
καὶ [1400a] ἀποτρέπονται ἐκ τῶν ἐναντίων. ἐκ δὲ τῶν αὐτῶν τούτων
καὶ κατηγοροῦσι καὶ ἀπολογοῦνται· ἐκ μὲν τῶν ἀποτρεπόντων
ἀπολογοῦνται, ἐκ δὲ τῶν προτρεπόντων κατηγοροῦσιν. ἔστι δ' ὁ
τόπος οὗτος ὅλη τέχνη ἢ τε Παμφίλου καὶ ἡ Καλλίππου.

ἄλλος ἐκ τῶν δοκούντων μὲν γίνεσθαι ἀπίστων δέ, ὅτι οὐκ ἂν
ἔδοξαν, εἰ μὴ ἦν ἡ ἐγγὺς ἦν. καὶ ὅτι μᾶλλον· ἡ γὰρ τὰ ὄντα ἢ τὰ
εἰκότα ὑπολαμβάνουσιν· εἰ οὖν ἄπιστον καὶ μὴ εἰκός, ἀληθὲς ἂν εἴη·
οὐ γὰρ διὰ γε τὸ εἰκός καὶ πιθανὸν δοκεῖ οὕτως· οἷον Ἀνδροκλῆς
ἔλεγεν ὁ Πιτθεὺς κατηγορῶν τοῦ νόμου, ἐπεὶ ἐθορύβησαν αὐτῶ
εἰπόντι, “δέονται οἱ νόμοι νόμου τοῦ διορθώσοντος, καὶ γὰρ οἱ
ιχθύες ἄλός, καίτοι οὐκ εἰκός οὐδὲ πιθανὸν ἐν ἄλμῃ τρεφομένους
δεῖσθαι ἄλός, καὶ τὰ στέμφυλα ἐλαίου, καίτοι ἄπιστον, ἐξ ὧν ἔλαιον
γίνεται, ταῦτα δεῖσθαι ἐλαίου”. ἄλλος ἐλεγκτικός, τὸ τὰ
ἀνομολογούμενα σκοπεῖν, εἴ τι ἀνομολογούμενον ἐκ τόπων καὶ
χρόνων καὶ πράξεων καὶ λόγων, χωρὶς μὲν ἐπὶ τοῦ ἀμφισβητοῦντος,
οἷον “καὶ φησὶ μὲν φιλεῖν ὑμᾶς, συνώμοσεν δὲ τοῖς τριάκοντα”,
χωρὶς δ' ἐπ' αὐτοῦ, “καὶ φησὶ μὲν εἶναί με φιλόδικον, οὐκ ἔχει δὲ
ἀποδεῖξαι δεδικασμένον οὐδεμίαν δίκην”, χωρὶς δ' ἐπ' αὐτοῦ καὶ τοῦ
ἀμφισβητοῦντος, “καὶ οὗτος μὲν οὐ δεδάνεικε πώποτε οὐδέν, ἐγὼ δὲ
καὶ πολλοὺς λέλυμαι ὑμῶν”.

ἄλλος τοῖς προδιαβεβλημένοις καὶ ἀνθρώποις καὶ πράγμασιν, ἢ

δοκοῦσι, τὸ λέγειν τὴν αἰτίαν τοῦ παραδόξου· ἔστιν γάρ τι δι' ὃ φαίνεται· οἷον, ὑποβεβλημένης τινὸς τὸν αὐτῆς υἱόν, διὰ τὸ ἀσπάζεσθαι ἐδόκει συνεῖναι τῷ μειρακίῳ, λεχθέντος δὲ τοῦ αἰτίου ἐλύθη ἡ διαβολή· καὶ οἷον ἐν τῷ Αἴαντι τῷ Θεοδόκτου Ὀδυσσεὺς λέγει πρὸς τὸν Αἴαντα διότι ἀνδρειότερος ὢν τοῦ Αἴαντος οὐ δοκεῖ.

ἄλλος ἀπὸ τοῦ αἰτίου, ἂν τε ὑπάρχη, ὅτι ἔστι, καὶ μὴ ὑπάρχη, ὅτι οὐκ ἔστιν· ἅμα γὰρ τὸ αἴτιον καὶ οὐ αἴτιον, καὶ ἄνευ αἰτίου οὐθὲν ἔστιν, οἷον Λεωδάμας ἀπολογούμενος ἔλεγε, κατηγορήσαντος Θρασυβούλου ὅτι ἦν στηλῖτης γεγωνὸς ἐν τῇ ἀκροπόλει, ἀλλ' ἐκκέκοπται ἐπὶ τῶν τριάκοντα· οὐκ ἐνδέχεσθαι ἔφη· μᾶλλον γὰρ ἂν πιστεύειν αὐτῷ τοὺς τριάκοντα ἐγγεγραμμένης τῆς ἔχθρας πρὸς τὸν δῆμον.

ἄλλος, εἰ ἐνεδέχετο βέλτιον ἄλλως, ἢ ἐνδέχεται, ὧν ἡ συμβουλεύει ἢ πράττει ἢ πέπραχε σκοπεῖν· φανερόν γάρ ὅτι, [1400b] εἰ [μὴ] οὕτως ἔχει, οὐ πέπραχεν· οὐδεὶς γὰρ ἐκὼν τὰ φαῦλα καὶ γινώσκων προαιρεῖται. ἔστιν δὲ τοῦτο ψεῦδος· πολλάκις γὰρ ὕστερον γίγνεται δῆλον πῶς ἦν πρᾶξι βέλτιον, πρότερον δὲ ἄδηλον.

ἄλλος, ὅταν τι ἐναντίον μέλλῃ πράττεσθαι τοῖς πεπραγμένοις, ἅμα σκοπεῖν, οἷον Ξενοφάνης Ἐλεάταις ἐρωτῶσιν εἰ θύωσι τῇ Λευκοθέᾳ καὶ θρηνῶσιν ἢ μὴ, συνεβούλευεν, εἰ μὲν θεὸν ὑπολαμβάνουσιν, μὴ θρηνεῖν, εἰ δ' ἄνθρωπον, μὴ θύειν.

ἄλλος τόπος τὸ ἐκ τῶν ἀμαρτηθέντων κατηγορεῖν ἢ ἀπολογεῖσθαι, οἷον ἐν τῇ Καρκίνου Μηδεΐᾳ οἱ μὲν κατηγοροῦσιν ὅτι τοὺς παῖδας ἀπέκτεινεν, οὐ φαίνεσθαι γοῦν αὐτούς (ἡμαρτε γὰρ ἡ Μήδεια περὶ τὴν ἀποστολὴν τῶν παιδῶν), ἢ δ' ἀπολογεῖται ὅτι οὐ [ἂν] τοὺς παῖδας ἀλλὰ τὸν Ἰάσονα ἂν ἀπέκτεινεν· τοῦτο γὰρ ἡμαρτεν ἂν μὴ ποιήσασα, εἴπερ καὶ θάτερον ἐποίησεν. ἔστι δ' ὁ τόπος οὗτος τοῦ ἐνθυμήματος καὶ τὸ εἶδος ὅλη ἢ πρότερον Θεοδώρου τέχνη.

ἄλλος ἀπὸ τοῦ ὀνόματος, οἷον ὡς ὁ Σοφοκλῆς

σαφῶς σιδήρῳ καὶ φοροῦσα τοῦνομα,

καὶ ὡς ἐν τοῖς τῶν θεῶν ἐπαίνοις εἰώθασι λέγειν, καὶ ὡς Κόνων Θρασύβουλον θρασύβουλον ἐκάλει, καὶ Ἡρόδικος Θρασύμαχον “ἄει θρασύμαχος εἶ”, καὶ Πῶλον “ἄει σὺ πῶλος εἶ”, καὶ Δράκοντα τὸν νομοθέτην, ὅτι οὐκ [ἂν] ἀνθρώπου οἱ νόμοι ἀλλὰ δράκοντος (χαλεποὶ γάρ)· καὶ ὡς ἡ Εὐριπίδου Ἐκάβη εἰς τὴν Ἀφροδίτην “καὶ τοῦνομ' ὀρθῶς ἀφροσύνης ἄρχει θεᾶς”, καὶ ὡς Χαιρήμων Πενθεὺς ἐσομένης συμφορᾶς ἐπώνυμος.

εὐδοκιμεῖ δὲ μᾶλλον τῶν ἐνθυμημάτων τὰ ἐλεγκτικά τῶν ἀποδεικτικῶν διὰ τὸ συναγωγὴν μὲν ἐναντίων εἶναι ἐν μικρῷ τὸ ἐλεγκτικὸν ἐνθύμημα, παρ' ἄλληλα δὲ φανερὰ εἶναι τῷ ἀκροατῇ μᾶλλον. πάντων δὲ καὶ τῶν ἐλεγκτικῶν καὶ τῶν δεικτικῶν συλλογισμῶν θορυβεῖται μάλιστα τὰ τοιαῦτα ὅσα ἀρχόμενα προορῶσι μὴ ἐπιπολῆς εἶναι (ἅμα γὰρ καὶ αὐτοὶ ἐφ' αὐτοῖς χαίρουσι προαισθανόμενοι), καὶ ὅσων τοσοῦτον ὑστερίζουσιν ὥσθ' ἅμα εἰρημένων γνωρίζειν.

Ἐπεὶ δ' ἐνδέχεται τὸν μὲν εἶναι συλλογισμόν, τὸν δὲ μὴ εἶναι μὲν φαίνεσθαι δέ, ἀνάγκη καὶ ἐνθύμημα τὸ μὲν εἶναι, τὸ δὲ μὴ εἶναι ἐνθύμημα φαίνεσθαι δέ, ἐπεὶπερ τὸ ἐνθύμημα συλλογισμός [1401a] τις. τόποι δ' εἰσὶ τῶν φαινομένων ἐνθυμημάτων εἰς μὲν ὁ παρὰ τὴν λέξιν, καὶ τούτου ἐν μὲν μέρος, ὥσπερ ἐν τοῖς διαλεκτικοῖς, τὸ μὴ συλλογισάμενον συμπερασματικῶς τὸ τελευταῖον εἰπεῖν, “οὐκ ἄρα τὸ καὶ τό, ἀνάγκη ἄρα τὸ καὶ τό”, ἐν τοῖς ἐνθυμήμασι τὸ συνεστραμμένως καὶ ἀντικειμένως εἰπεῖν φαίνεται ἐνθύμημα (ἡ γὰρ τοιαύτη λέξις χώρα ἐστὶν ἐνθυμήματος)· καὶ ἔοικε τὸ τοιοῦτον εἶναι παρὰ τὸ σχῆμα τῆς λέξεως. ἔστι δὲ εἰς τὸ τῇ λέξει συλλογιστικῶς λέγειν χρήσιμον τὸ συλλογισμῶν πολλῶν κεφάλαια λέγειν, ὅτι τοὺς μὲν ἔσωσε, τοῖς δ' ἐτέροις ἐτιμώρησε, τοὺς δ' Ἑλλήνας ἡλευθέρωσε· ἕκαστον μὲν γὰρ τούτων ἐξ ἄλλων ἀπεδείχθη, συντεθέντων δὲ φαίνεται καὶ ἐκ τούτων τι γίνεσθαι.

ἐν δὲ τὸ παρὰ τὴν ὁμωνυμίαν, τὸ φάναι σπουδαῖον εἶναι μῦν, ἀφ' οὗ γ' ἐστὶν ἡ τιμιωτάτη πασῶν τελετή· τὰ γὰρ μυστήρια πασῶν τιμιωτάτη τελετή. ἢ εἴ τις κύνα ἐγκωμιάζων τὸν ἐν τῷ οὐρανῷ συμπαραλαμβάνοι, ἢ τὸν Πᾶνα, ὅτι Πίνδαρος ἔφησεν

ὦ μάκαρ, ὃν τε μεγάλας θεοῦ κύνα παντοδαπὸν
καλέουσιν Ὀλύμπιοι,

ἢ ὅτι τὸ μηδένα εἶναι κύν' ἀτιμώτατόν ἐστιν, ὥστε τὸ κύνα δηλονότι τίμιον. καὶ τὸ κοινωνικὸν φάναι τὸν Ἑρμῆν εἶναι μάλιστα τῶν θεῶν· μόνος γὰρ καλεῖται κοινὸς Ἑρμῆς. καὶ τὸ τὸν λόγον εἶναι σπουδαιότατον, ὅτι οἱ ἀγαθοὶ ἄνδρες οὐ χρημάτων ἀλλὰ λόγου εἰσὶν ἄξιοι· τὸ γὰρ λόγου ἄξιον οὐχ ἀπλῶς λέγεται. ἄλλος τὸ <τὸ> διηρημένον συντιθέντα λέγειν ἢ τὸ συγκείμενον διαιροῦντα· ἐπεὶ γὰρ ταῦτόν δοκεῖ εἶναι οὐκ ὃν ταῦτό πολλακίς, ὁπότερον χρησιμώτερον, τοῦτο δεῖ ποιεῖν. ἔστι δὲ τοῦτο Εὐθυδήμου λόγος, οἷον τὸ εἰδέναι ὅτι τριήρης ἐμ Πειραιεὶ ἐστίν· ἕκαστον γὰρ οἶδεν. καὶ τὸν τὰ στοιχεῖα

ἐπιστάμενον ὅτι τὸ ἔπος οἶδεν· τὸ γὰρ ἔπος τὸ αὐτὸ ἐστίν. καὶ ἐπεὶ τὸ δις τοσοῦτον νοσῶδες, μηδὲ τὸ ἐν φάναι ὑγιεινὸν εἶναι· ἄτοπον γὰρ εἰ τὰ δύο ἀγαθὰ ἐν κακόν ἐστιν. οὕτω μὲν οὖν ἐλεγκτικόν, ὧδε δὲ δεικτικόν· οὐ γάρ ἐστιν ἐν ἀγαθὸν δύο κακά· ὅλος δὲ ὁ τόπος παραλογιστικός. πάλιν τὸ Πολυκράτους εἰς Θρασύβουλον, ὅτι τριάκοντα τυράννους κατέλυσε· συντίθησι γάρ. ἢ τὸ ἐν τῷ Ὁρέστη τῷ Θεοδέκτου· ἐκ διαιρέσεως γάρ ἐστιν·

δίκαιόν ἐστιν, ἥτις ἂν κτείνῃ πόσιν,

ἀποθνήσκειν ταύτην, καὶ τῷ πατρί γε τιμωρεῖν τὸν υἱόν, [1401b] οὐκοῦν καὶ ταῦτα ἃ ἐπράκται· συντεθέντα γὰρ ἴσως οὐκέτι δίκαιον. εἴη δ' ἂν καὶ παρὰ τὴν ἔλλειψιν· ἀφαιρεῖ γὰρ τὸ ὑπὸ τίνος.

ἄλλος δὲ τόπος τὸ δεινῶσει κατασκευάζειν ἢ ἀνασκευάζειν· τοῦτο δ' ἐστὶν ὅταν, μὴ δεῖξας ὅτι ἐποίησεν <μηδ' ὅτι οὐκ ἐποίησεν>, αὐξήσῃ τὸ πρᾶγμα· ποιεῖ γὰρ φαίνεσθαι ἢ ὥς οὐ πεποίηκεν, ὅταν ὁ τὴν αἰτίαν ἔχων αὖξῃ, ἢ ὥς πεποίηκεν, ὅταν ὁ κατηγορῶν αὖξῃ. οὐκ οὖν ἐστὶν ἐνθύμημα· παραλογίζεται γὰρ ὁ ἀκροατὴς ὅτι ἐποίησεν ἢ οὐκ ἐποίησεν, οὐ δεδειγμένου.

ἄλλος τὸ ἐκ σημείου· ἀσυλλόγιστον γὰρ καὶ τοῦτο· οἷον εἴ τις λέγοι “ταῖς πόλεσι συμφέρουσιν οἱ ἐρῶντες· ὁ γὰρ Ἀρμοδίου καὶ Ἀριστογείτονος ἔρωσ κατέλυσε τὸν τύραννον “Ἰππαρχον”, ἢ εἴ τις λέγοι ὅτι κλέπτῃς Διονύσιος· πονηρὸς γάρ· ἀσυλλόγιστον γὰρ δὴ τοῦτο· οὐ γὰρ πᾶς πονηρὸς κλέπτῃς, ἀλλὰ κλέπτῃς πᾶς πονηρός.

ἄλλος διὰ τὸ συμβεβηκός, οἷον ὁ λέγει Πολυκράτης εἰς τοὺς μῦς, ὅτι ἐβοήθησαν διατραγόντες τὰς νευράς· ἢ εἴ τις φαίη τὸ ἐπὶ δεῖπνον κληθῆναι τιμιώτατον· διὰ γὰρ τὸ μὴ κληθῆναι ὁ Ἀχιλλεὺς ἐμήνισε τοῖς Ἀχαιοῖς ἐν Τενέδῳ· ὁ δ' ὥς ἀτιμαζόμενος ἐμήνισεν, συνέβη δὲ τοῦτο διὰ τὸ μὴ κληθῆναι.

ἄλλος τὸ παρὰ τὸ ἐπόμενον, οἷον ἐν τῷ Ἀλεξάνδρῳ, ὅτι μεγαλόψυχος· ὑπεριδὼν γὰρ τὴν πολλῶν ὁμιλίαν ἐν τῇ Ἰδῇ διέτριβεν καθ' αὐτόν· ὅτι γὰρ οἱ μεγαλόψυχοι τοιοῦτοι, καὶ οὗτος μεγαλόψυχος δόξειεν ἂν. καὶ ἐπεὶ καλλωπιστὴς καὶ νύκτωρ πλανᾶται, μοιχός· τοιοῦτοι γάρ. ὅμοιον δὲ καὶ ὅτι ἐν τοῖς ἱεροῖς οἱ πτωχοὶ καὶ ἄδουσι καὶ ὀρχοῦνται, καὶ ὅτι τοῖς φυγάσιν ἔξεστιν οἰκεῖν ὅπου ἂν θέλωσιν· ὅτι γὰρ τοῖς δοκοῦσιν εὐδαιμονεῖν ὑπάρχει ταῦτα, καὶ οἷς ταῦτα ὑπάρχει δόξαιεν ἂν εὐδαιμονεῖν, διαφέρει δὲ τῷ πῶς· διὸ καὶ εἰς τὴν ἔλλειψιν ἐμπίπτει.

ἄλλος παρὰ τὸ ἀναίτιον ὡς αἴτιον, οἷον τῷ ἅμα ἢ μετὰ τοῦτο

γεγονέναι· τὸ γὰρ μετὰ τοῦτο ὥς διὰ τοῦτο λαμβάνουσιν, καὶ μάλιστα οἱ ἐν ταῖς πολιτείαις, οἷον ὥς ὁ Δημάδης τὴν Δημοσθένους πολιτείαν πάντων τῶν κακῶν αἰτίαν· μετ’ ἐκείνην γὰρ συνέβη ὁ πόλεμος.

ἄλλος παρὰ τὴν ἔλλειψιν τοῦ πότε καὶ πῶς, οἷον ὅτι δικαίως Ἀλέξανδρος ἔλαβε τὴν Ἑλένην· αἵρεσις γὰρ αὐτῇ ἐδόθη παρὰ τοῦ πατρός. οὐ γὰρ αἰεὶ ἴσως, ἀλλὰ τὸ [1402a] πρῶτον· καὶ γὰρ ὁ πατὴρ μέχρι τούτου κύριος. ἢ εἴ τις φαίη τὸ τύπτειν τοὺς ἐλευθέρους ὕβριν εἶναι· οὐ γὰρ πάντως, ἀλλ’ ὅταν ἄρχῃ χειρῶν ἀδίκων.

ἔτι ὥσπερ ἐν τοῖς ἐριστικοῖς παρὰ τὸ ἀπλῶς καὶ μὴ ἀπλῶς, ἀλλὰ τί, γίγνεται φαινόμενος συλλογισμός, οἷον ἐν μὲν τοῖς διαλεκτικοῖς ὅτι ἔστι τὸ μὴ ὄν [ὄν], ἔστι γὰρ τὸ μὴ ὄν μὴ ὄν, καὶ ὅτι ἐπιστητὸν τὸ ἄγνωστον, ἔστιν γὰρ ἐπιστητὸν τὸ ἄγνωστον ὅτι ἄγνωστον, οὕτως καὶ ἐν τοῖς ῥητορικοῖς ἔστιν φαινόμενον ἐνθύμημα παρὰ τὸ μὴ ἀπλῶς εἰκὸς ἀλλὰ τί εἰκός. ἔστιν δὲ τοῦτο οὐ καθόλου, ὥσπερ καὶ Ἀγάθων λέγει

τάχ’ ἂν τις εἰκὸς αὐτὸ τοῦτ’ εἶναι λέγοι,

βροτοῖσι πολλὰ τυγχάνειν οὐκ εἰκότα.

γίγνεται γὰρ τὸ παρὰ τὸ εἰκός, ὥστε εἰκός καὶ τὸ παρὰ τὸ εἰκός, εἰ δὲ τοῦτο, ἔσται τὸ μὴ εἰκὸς εἰκός. ἀλλ’ οὐχ ἀπλῶς, ἀλλ’ ὥσπερ καὶ ἐπὶ τῶν ἐριστικῶν τὸ κατὰ τί καὶ πρὸς τί καὶ πῇ οὐ προστιθέμενα ποιεῖ τὴν συκοφαντίαν, καὶ ἐνταῦθα παρὰ τὸ εἰκός εἶναι μὴ ἀπλῶς ἀλλὰ τί εἰκός. ἔστι δ’ ἐκ τούτου τοῦ τόπου ἡ Κόρακος τέχνη συγκειμένη· “ἂν τε γὰρ μὴ ἔνοχος ἦ τῇ αἰτίᾳ, οἷον ἀσθενὴς ὢν αἰκίας φεύγει (οὐ γὰρ εἰκός), καὶ ἔνοχος ἦ, οἷον ἰσχυρὸς ὢν (οὐ γὰρ εἰκός, ὅτι εἰκὸς ἔμελλε δόξειν)”. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἢ γὰρ ἔνοχον ἀνάγκη ἢ μὴ ἔνοχον εἶναι τῇ αἰτίᾳ· φαίνεται μὲν οὖν ἀμφοτέρω εἰκότα, ἔστι δὲ τὸ μὲν εἰκός, τὸ δὲ οὐχ ἀπλῶς ἀλλ’ ὥσπερ εἴρηται· καὶ τὸ τὸν ἦττω δὲ λόγον κρείττω ποιεῖν τοῦτ’ ἔστιν. καὶ ἐντεῦθεν δικαίως ἐδυσχέραινον οἱ ἄνθρωποι τὸ Πρωταγόρου ἐπάγγελμα· ψευδὸς τε γὰρ ἔστιν, καὶ οὐκ ἀληθὲς ἀλλὰ φαινόμενον εἰκός, καὶ ἐν οὐδεμιᾷ τέχνῃ ἀλλ’ <ἢ> ἐν ῥητορικῇ καὶ ἐριστικῇ.

Καὶ περὶ μὲν ἐνθυμημάτων, καὶ τῶν ὄντων καὶ τῶν φαινομένων, εἴρηται, περὶ δὲ λύσεως ἐχόμενόν ἐστιν τῶν εἰρημένων εἰπεῖν. ἔστιν δὲ λύειν ἢ ἀντισυλλογισάμενον ἢ ἔνστασιν ἐνεγκόντα. τὸ μὲν οὖν ἀντισυλλογίζεσθαι δῆλον ὅτι ἐκ τῶν αὐτῶν τόπων ἐνδέχεται ποιεῖν· οἱ μὲν γὰρ συλλογισμοὶ ἐκ τῶν ἐνδόξων, δοκοῦντα

δὲ πολλὰ ἐναντία ἀλλήλοις ἐστίν· αἱ δ' ἐνστάσεις φέρονται καθάπερ καὶ ἐν τοῖς Τοπικοῖς, τετραχῶς· ἡ γὰρ ἐξ αὐτοῦ ἢ ἐκ τοῦ ὁμοίου ἢ ἐκ τοῦ ἐναντίου ἢ ἐκ τῶν κεκριμένων.

λέγω δὲ ἀφ’ ἑαυτοῦ μέν, οἷον εἰ περὶ ἔρωτος εἶη [1402b] τὸ ἐνθύμημα ὡς σπουδαῖος, ἢ ἔνστασις διχῶς· ἢ γὰρ καθόλου εἰπόντα ὅτι πᾶσα ἔνδεια πονηρόν, ἢ κατὰ μέρος ὅτι οὐκ ἂν ἐλέγετο Καύνιος ἔρωτος, εἰ μὴ ᾗσαν καὶ πονηροὶ ἔρωτες.

ἀπὸ δὲ τοῦ ἐναντίου ἔνστασις φέρεται, οἷον, εἰ τὸ ἐνθύμημα ἦν ὅτι ὁ ἀγαθὸς ἀνὴρ πάντας τοὺς φίλους εὖ ποιεῖ, *ᾧτι* ἀλλ’ οὐδ’ ὁ μοχθηρὸς κακῶς.

ἀπὸ δὲ τοῦ ὁμοίου, οἶον, εἰ ἦν τὸ ἐνθύμημα ὅτι οἱ κακῶς
πεπονθότες ἀεὶ μισοῦσιν, ὅτι ἄλλ' οὐδ' οἱ εὖ πεπονθότες ἀεὶ
φιλοῦσιν.

αἱ δὲ κρίσεις αἱ ἀπὸ τῶν γνωρίμων ἀνδρῶν, οἷον εἴ τις ἐνθύμημα εἶπεν ὅτι τοῖς μεθύουσι δεῖ συγγνώμην ἔχειν, ἀγνοοῦντες γὰρ ἁμαρτάνουσιν, ἕνστασις ὅτι οὐκ οὐκουν ὁ Πιπτακὸς αἰνετός· οὐ γὰρ ἂν μείζους ζημίας ἐνομοθέτησεν ἐάν τις μεθύνων ἁμαρτάνῃ.

ἐπεὶ δὲ τὰ ἐνθυμήματα λέγεται ἐκ τεττάρων, τὰ δὲ τέτταρα ταῦτ' ἐστίν, εἰκὸς παράδειγμα τεκμήριον σημεῖον, ἔστι δὲ τὰ μὲν ἐκ τῶν ὡς ἐπὶ τὸ πολὺ ἢ ὄντων ἢ δοκούντων συνηγμένα ἐνθυμήματα ἐκ τῶν εἰκότων, τὰ δὲ δι' ἐπαγωγῆς ἐκ τοῦ ὁμοίου, ἢ ἐνὸς ἢ πλειόνων, ὅταν λαβὼν τὸ καθόλου εἶτα συλλογίσηται τὰ κατὰ μέρος, διὰ παραδείγματος, τὰ δὲ διὰ ἀναγκαίου καὶ «ἀεὶ» ὄντος διὰ τεκμηρίου, τὰ δὲ διὰ τοῦ καθόλου [ἦ] τοῦ ἐν μέρει ὄντος, ἐάν τε ὄν ἐάν τε μὴ, διὰ σημείων, τὸ δὲ εἰκὸς οὐ τὸ ἀεὶ ἀλλὰ τὸ ὡς ἐπὶ τὸ πολὺ, φανερόν ὅτι τὰ τοιαῦτα μὲν τῶν ἐνθυμημάτων ἀεὶ ἔστι λύειν φέροντα ἔνστασιν, ἢ δὲ λύσις φαινομένη ἀλλ' οὐκ ἀληθὴς ἀεὶ· οὐ γὰρ ὅτι οὐκ εἰκὸς λύει ὁ ἐνιστάμενος, ἀλλ' ὅτι οὐκ ἀναγκαῖον· διὸ καὶ ἀεὶ ἔστι πλεονεκτεῖν ἀπολογούμενον μᾶλλον ἢ κατηγοροῦντα διὰ τοῦτον τὸν παραλογισμόν· ἐπεὶ γὰρ ὁ μὲν κατηγορῶν διὰ εἰκότων ἀποδείκνυσιν, ἔστι δὲ οὐ ταῦτὸ λῦσαι ἢ ὅτι οὐκ εἰκὸς ἢ ὅτι οὐκ ἀναγκαῖον, ἀεὶ δ' ἔχει ἔνστασιν τὸ ὡς ἐπὶ τὸ πολὺ (οὐ γὰρ ἂν ἦ ἅμ' ἀεὶ εἰκὸς, ἀεὶ καὶ ἀναγκαῖον), ὁ δὲ κριτὴς οἶεται, ἂν οὕτω λυθῇ, ἢ οὐκ εἰκὸς εἶναι ἢ οὐχ αὐτῷ κριτέον, παραλογιζόμενος, ὥσπερ ἐλέγομεν (οὐ γὰρ ἐκ τῶν ἀναγκαίων δεῖ αὐτὸν μόνον κρίνειν, ἀλλὰ καὶ ἐκ τῶν εἰκότων· τοῦτο γάρ ἐστι τὸ γνώμη τῇ ἀρίστη κρίνειν), οὐκ οὐκ ἵκανὸν ἂν λύσῃ ὅτι οὐκ ἀναγκαῖον, ἀλλὰ δεῖ λύειν ὅτι οὐκ εἰκὸς· τοῦτο δὲ συμβήσεται

ἐὰν ἢ ἡ ἔνστασις μᾶλλον ὥς ἐπὶ τὸ πολὺ. ἐνδέχεται δὲ εἶναι τοιαύτην διχῶς, ἢ τῷ χρόνῳ ἢ τοῖς πράγμασιν, κυριώτατα δὲ εἰ ἀμφοῖν· εἰ γὰρ τὰ «πλείω καὶ» [1403a] πλεονάκις οὕτως, τοῦτ' ἐστὶν εἰκὸς μᾶλλον.

λύεται δὲ καὶ τὰ σημεῖα καὶ τὰ διὰ σημείου ἐνθυμήματα εἰρημένα, κἂν ἢ ὑπάρχοντα, ὥσπερ ἐλέχθη ἐν τοῖς πρώτοις· ὅτι γὰρ ἀσυλλόγιστόν ἐστιν πᾶν σημεῖον, δηλὸν ἡμῖν ἐκ τῶν Ἀναλυτικῶν.

πρὸς δὲ τὰ παραδειγματώδη ἡ αὐτὴ λύσις καὶ τὰ εἰκότα· ἐάν τε γὰρ ἔχωμεν «ἐν» τι οὐχ οὕτω, λέλυται, ὅτι οὐκ ἀναγκαῖον, εἰ καὶ τὰ πλείω ἢ πλεονάκις ἄλλως, ἐάν τε καὶ τὰ πλείω καὶ τὰ πλεονάκις οὕτω, μαχετέον ἢ ὅτι τὸ παρὸν οὐχ ὁμοιον ἢ οὐχ ὁμοίως, ἢ διαφορὰν γέ τινα ἔχει.

τὰ δὲ τεκμήρια καὶ τεκμηριώδη ἐνθυμήματα κατὰ μὲν τὸ ἀσυλλόγιστον οὐκ ἔσται λῦσαι (δηλὸν δὲ καὶ τοῦθ' ἡμῖν ἐκ τῶν Ἀναλυτικῶν), λείπεται δ' ὥς οὐχ ὑπάρχει τὸ λεγόμενον δεικνύναι. εἰ δὲ φανερόν καὶ ὅτι ὑπάρχει καὶ ὅτι τεκμήριον, ἄλυτον ἤδη γίνγεται τοῦτο· πάντα γὰρ γίνγεται ἀπόδειξις ἤδη φανερά.

Τὸ δ' αὔξειν καὶ μειοῦν οὐκ ἔστιν ἐνθυμήματος στοιχεῖον· τὸ γὰρ αὐτὸ λέγω στοιχεῖον καὶ τόπον· ἔστιν γὰρ στοιχεῖον καὶ τόπος εἰς ὃ πολλὰ ἐνθυμήματα ἐμπίπτει. τὸ δ' αὔξειν καὶ μειοῦν ἐστὶν ἐνθυμήματα πρὸς τὸ δεῖξαι ὅτι μέγα ἢ μικρόν, ὥσπερ καὶ ὅτι ἀγαθὸν ἢ κακόν, ἢ δίκαιον ἢ ἀδικον, καὶ τῶν ἄλλων ὁτιοῦν. ταῦτα δ' ἐστὶν πάντα περὶ ἃ οἱ συλλογισμοὶ καὶ τὰ ἐνθυμήματα, ὥστ' εἰ μηδὲ τούτων ἕκαστον ἐνθυμήματος τόπος, οὐδὲ τὸ αὔξειν καὶ μειοῦν. οὐδὲ τὰ λυτικά ἐνθυμήματος εἰδὸς τί ἐστὶν [ἄλλο τῶν κατασκευαστικῶν]· δηλὸν γὰρ ὅτι λύει μὲν ἢ δείξας ἢ ἔνστασιν ἐνεγκών, ἀνταποδείκνυσιν δὲ τὸ ἀντικείμενον, οἷον εἰ ἔδειξε ὅτι γέγονεν, οὗτος ὅτι οὐ γέγονεν, εἰ δὲ ὅτι οὐ γέγονεν, οὗτος ὅτι γέγονεν· ὥστε αὕτη μὲν οὐκ ἂν εἴη [ἢ] διαφορὰ (τοῖς αὐτοῖς γὰρ χρῶνται ἀμφοτέροι· ὅτι γὰρ οὐκ ἔστιν ἢ ἔστιν, ἐνθυμήματα φέρουσιν)· ἢ δ' ἔνστασις οὐκ ἔστιν ἐνθύμημα, ἀλλὰ, καθάπερ ἐν τοῖς Τοπικοῖς, τὸ εἰπεῖν δόξαν τινὰ ἐξ ἧς ἔσται δηλὸν ὅτι οὐ συλλελόγισται ἢ ὅτι ψευδὸς τι εἴληφεν.

ἐπεὶ δὲ τρία ἔστιν ἃ δεῖ πραγματευθῆναι περὶ τὸν λόγον, ὑπὲρ μὲν παραδειγμάτων καὶ γνωμῶν καὶ ἐνθυμημάτων καὶ [1403b] ὅλως τῶν περὶ τὴν διάνοιαν, ὅθεν τε εὐπορήσομεν καὶ ὥς αὐτὰ λύσομεν, εἰρήσθω ἡμῖν τοσαῦτα, λοιπὸν δὲ διελθεῖν περὶ λέξεως καὶ τάξεως.

Ἐπειδὴ τρία ἐστὶν ἃ δεῖ πραγματευθῆναι περὶ τὸν λόγον, ἐν μὲν ἐκ τίνων αἱ πίστεις ἔσονται, δεύτερον δὲ περὶ τὴν λέξιν, τρίτον δὲ πῶς χρή τάξαι τὰ μέρη τοῦ λόγου, περὶ μὲν τῶν πίστεων εἴρηται, καὶ ἐκ πόσων, ὅτι ἐκ τριῶν εἰσί, καὶ ταῦτα ποῖα, καὶ διὰ τί τοσαῦτα μόνα (ἢ γὰρ τῷ αὐτοῖ τι πεπονθέναι οἱ κρίνοντες, ἢ τῷ ποιούς τινας ὑπολαμβάνειν τοὺς λέγοντας, ἢ τῷ ἀποδεδείχθαι, πείθονται πάντες), εἴρηται δὲ καὶ τὰ ἐνθυμήματα, πόθεν δεῖ πορίζεσθαι (ἔστι γὰρ τὰ μὲν εἶδη τῶν ἐνθυμημάτων, τὰ δὲ τόποι· περὶ δὲ τῆς λέξεως ἐχόμενόν ἐστιν εἰπεῖν· οὐ γὰρ ἀπόχρη τὸ ἔχειν ἃ δεῖ λέγειν, ἀλλ' ἀνάγκη καὶ ταῦτα ὡς δεῖ εἰπεῖν, καὶ συμβάλλεται πολλὰ πρὸς τὸ φανῆναι ποιόν τινα τὸν λόγον. τὸ μὲν οὖν πρῶτον ἐξητήθη κατὰ φύσιν ὅπερ πέφυκε πρῶτον, αὐτὰ τὰ πράγματα ἐκ τίνων ἔχει τὸ πιθανόν, δεύτερον δὲ τὸ ταῦτα τῇ λέξει διαθέσθαι, τρίτον δὲ τούτων ὃ δύναμιν μὲν ἔχει μεγίστην, οὐπω δ' ἐπικεχείρηται, τὰ περὶ τὴν ὑπόκρισιν. καὶ γὰρ εἰς τὴν τραγικὴν καὶ ῥαψωδίαν ὁψὲ παρήλθεν· ὑπεκρίνοντο γὰρ αὐτοὶ τὰς τραγωδίας οἱ ποιηταὶ τὸ πρῶτον. δῆλον οὖν ὅτι καὶ περὶ τὴν ῥητορικὴν ἐστὶ τὸ τοιοῦτον ὥσπερ καὶ περὶ τὴν ποιητικὴν, ὅπερ ἕτεροὶ <τέ> τινες ἐπραγματεύθησαν καὶ Γλαύκων ὁ Τήσιος. ἐστὶν δὲ αὕτη μὲν ἐν τῇ φωνῇ, πῶς αὐτῇ δεῖ χρῆσθαι πρὸς ἕκαστον πάθος, οἷον πότε μεγάλη καὶ πότε μικρὰ καὶ μέση, καὶ πῶς τοῖς τόνοις, οἷον ὀξεῖα καὶ βαρεῖα καὶ μέση, καὶ ῥυθμοῖς τίσι πρὸς ἕκαστα. τρία γάρ ἐστιν περὶ ἃ σκοποῦσιν· ταῦτα δ' ἐστὶ μέγεθος ἀρμονία ῥυθμός. τὰ μὲν οὖν ἅθλα σχεδὸν ἐκ τῶν ἀγώνων οὗτοι λαμβάνουσιν, καὶ καθάπερ ἐκεῖ μείζον δύνανται νῦν τῶν ποιητῶν οἱ ὑποκριταί, καὶ κατὰ τοὺς πολιτικοὺς ἀγῶνας, διὰ τὴν μοχθηρίαν τῶν πολιτῶν. οὐπω δὲ σύγκειται τέχνη περὶ αὐτῶν, ἐπεὶ καὶ τὸ περὶ τὴν λέξιν ὁψὲ παρήλθεν· καὶ δοκεῖ φορτικὸν εἶναι, [1404a] καλῶς ὑπολαμβάνομενον. ἀλλ' ὅλης οὔσης πρὸς δόξαν τῆς πραγματείας τῆς περὶ τὴν ῥητορικὴν, οὐχ ὡς ὀρθῶς ἔχοντος ἀλλ' ὡς ἀναγκαίου τὴν ἐπιμέλειαν ποιητέον, ἐπεὶ τό γε δίκαιόν <ἐστι> μηδὲν πλέον ζητεῖν περὶ τὸν λόγον ἢ ὥστε μήτε λυπεῖν μήτ' εὐφραίνειν· δίκαιον γὰρ αὐτοῖς ἀγωνίζεσθαι τοῖς πράγμασιν, ὥστε τᾶλλα ἔξω τοῦ ἀποδείξαι περίεργα ἐστίν· ἀλλ' ὅμως μέγα δύναται, καθάπερ εἴρηται, διὰ τὴν τοῦ ἀκροατοῦ μοχθηρίαν. τὸ μὲν οὖν τῆς λέξεως ὅμως ἔχει τι μικρὸν

ἀναγκαῖον ἐν πάσῃ διδασκαλίᾳ· διαφέρει γάρ τι πρὸς τὸ δηλῶσαι ὧδὶ ἢ ὧδὶ εἰπεῖν, οὐ μέντοι τοσοῦτον, ἀλλ' ἅπαντα φαντασία ταῦτ' ἐστί, καὶ πρὸς τὸν ἀκροατὴν· διὸ οὐδεὶς οὕτω γεωμετρεῖν διδάσκει. ἐκείνη μὲν οὖν ὅταν ἔλθῃ ταῦτὸ ποιήσῃ τῇ ὑποκριτικῇ, ἐγκεχειρήκασιν δὲ ἐπ' ὀλίγον περὶ αὐτῆς εἰπεῖν τινές, οἷον Θρασύμαχος ἐν τοῖς Ἑλέοις· καὶ ἔστιν φύσεως τὸ ὑποκριτικὸν εἶναι, καὶ ἀτεχνότερον, περὶ δὲ τὴν λέξιν ἔντεχνον. διὸ καὶ τοῖς τοῦτο δυναμένοις γίνεται πάλιν ἄθλα, καθάπερ καὶ τοῖς κατὰ τὴν ὑπόκρισιν ῥήτορσιν· οἱ γὰρ γραφόμενοι λόγοι μεῖζον ἰσχύουσι διὰ τὴν λέξιν ἢ διὰ τὴν διάνοιαν.

ἥρξαντο μὲν οὖν κινῆσαι τὸ πρῶτον, ὥσπερ πέφυκεν, οἱ ποιηταί· τὰ γὰρ ὀνόματα μιμήματα ἐστίν, ὑπῆρξεν δὲ καὶ ἡ φωνὴ πάντων μιμητικώτατον τῶν μορίων ἡμῖν· διὸ καὶ αἱ τέχναι συνέστησαν ἢ τε ῥαψωδία καὶ ἡ ὑποκριτικὴ καὶ ἄλλαι γε. ἐπεὶ δ' οἱ ποιηταί, λέγοντες εὐήθη, διὰ τὴν λέξιν ἐδόκουν πορίσασθαι τὴν δόξαν, διὰ τοῦτο ποιητικὴ πρώτη ἐγένετο λέξις, οἷον ἡ Γοργίου, καὶ νῦν ἔτι οἱ πολλοὶ τῶν ἀπαιδευτῶν τοὺς τοιούτους οἶονται διαλέγεσθαι κάλλιστα. τοῦτο δ' οὐκ ἔστιν, ἀλλ' ἑτέρα λόγου καὶ ποιήσεως λέξις ἐστίν. δηλοῖ δὲ τὸ συμβαῖνον· οὐδὲ γὰρ οἱ τὰς τραγωδίας ποιοῦντες ἔτι χρῶνται τὸν αὐτὸν πρόπον, ἀλλ' ὥσπερ καὶ ἐκ τῶν τετραμέτρων εἰς τὸ ἱαμβεῖον μετέβησαν διὰ τὸ τῷ λόγῳ τοῦτο τῶν μέτρων ὁμοιότατον εἶναι τῶν ἄλλων, οὕτω καὶ τῶν ὀνομάτων ἀφείκασιν ὅσα παρὰ τὴν διάλεκτόν ἐστιν, οἷς [δ'] οἱ πρῶτοι ἐκόσμου, καὶ ἔτι νῦν οἱ τὰ ἐξάμετρα ποιοῦντες [ἀφείκασιν]. διὸ γελοῖον μιμεῖσθαι τούτους οἱ αὐτοὶ οὐκέτι χρῶνται ἐκείνῳ τῷ τρόπῳ, ὥστε φανερόν ὅτι οὐχ ἅπαντα ὅσα περὶ λέξεως ἔστιν εἰπεῖν ἀκριβολογητέον ἡμῖν, ἀλλ' ὅσα περὶ τοιαύτης οἴας λέγομεν. περὶ δ' ἐκείνης εἴρηται ἐν τοῖς περὶ ποιητικῆς.

[1404b] Ἔστω οὖν ἐκεῖνα τεθεωρημένα καὶ ὠρίσθω λέξεως ἀρετὴ σαφὴ εἶναι (σημεῖον γάρ τι ὁ λόγος ὢν, ἐὰν μὴ δηλοῖ οὐ ποιήσῃ τὸ ἑαυτοῦ ἔργον), καὶ μήτε ταπεινὴν μήτε ὑπὲρ τὸ ἀξίωμα, ἀλλὰ πρέπουσαν· ἡ γὰρ ποιητικὴ ἴσως οὐ ταπεινὴ, ἀλλ' οὐ πρέπουσα λόγῳ. τῶν δ' ὀνομάτων καὶ ῥημάτων σαφὴ μὲν ποιεῖ τὰ κύρια, μὴ ταπεινὴν δὲ ἀλλὰ κεκοσμημένην τᾶλλα ὀνόματα ὅσα εἴρηται ἐν τοῖς περὶ ποιητικῆς· τὸ γὰρ ἐξαλλάξαι ποιεῖ φαίνεσθαι σεμνοτέραν· ὥσπερ γὰρ πρὸς τοὺς ξένους οἱ ἄνθρωποι καὶ πρὸς τοὺς πολίτας, τὸ αὐτὸ πάσχουσιν καὶ πρὸς τὴν λέξιν· διὸ δεῖ ποιεῖν ξένην τὴν διάλεκτον· θαυμασταὶ γὰρ τῶν ἀπόντων εἰσίν, ἡδὺ δὲ τὸ θαυμαστόν

ἐστιν. ἐπὶ μὲν οὖν τῶν μέτρων πολλά τε ποιεῖται οὕτω καὶ ἀρμόττει ἐκεῖ (πλέον γὰρ ἐξέστηκεν περὶ ᾧ καὶ περὶ οὓς ὁ λόγος), ἐν δὲ τοῖς ψιλοῖς λόγοις πολλῷ ἐλάττω· ἡ γὰρ ὑπόθεσις ἐλάττων, ἐπεὶ καὶ ἐνταῦθα, εἰ δοῦλος καλλιεποῖτο ἢ λίαν νέος, ἀπρεπέστερον, ἢ περὶ λίαν μικρῶν· ἀλλ' ἔστι καὶ ἐν τούτοις ἐπισυστελλόμενον καὶ αὐξάνόμενον τὸ πρέπον· διὸ δεῖ λανθάνειν ποιοῦντας, καὶ μὴ δοκεῖν λέγειν πεπλασμένως ἀλλὰ πεφυκóτως (τοῦτο γὰρ πιθανόν, ἐκεῖνο δὲ τοῦναντίον· ὥς γὰρ πρὸς ἐπιβουλευόντα διαβάλλονται, καθάπερ πρὸς τοὺς οἴνους τοὺς μεμιγμένους), καὶ οἶον ἢ Θεοδώρου φωνὴ πέπονθε πρὸς τὴν τῶν ἄλλων ὑποκριτῶν· ἡ μὲν γὰρ τοῦ λέγοντος ἔοικεν εἶναι, αἱ δ' ἁλλότριαι. κλέπτεται δ' εὖ, ἔαν τις ἐκ τῆς εἰωθυίας διαλέκτου ἐκλέγων συντιθῇ· ὅπερ Εὐριπίδης ποιεῖ καὶ ὑπέδειξε πρῶτος.

ὄντων δ' ὀνομάτων καὶ ῥημάτων ἐξ ὧν ὁ λόγος συνέστηκεν, τῶν δὲ ὀνομάτων τοσαῦτ' ἐχόντων εἶδη ὅσα τεθεώρηται ἐν τοῖς περὶ ποιήσεως, τούτων γλώτταις μὲν καὶ διπλοῖς ὀνόμασι καὶ πεπονημένοις ὀλιγάκις καὶ ὀλιγαχοῦ χρηστέον (ὅπου δέ, ὕστερον ἐροῦμεν, τό τε διὰ τί εἴρηται· ἐπὶ τὸ μεῖζον γὰρ ἐξαλλάττει τοῦ πρέποντος), τὸ δὲ κύριον καὶ τὸ οἰκεῖον καὶ μεταφορὰ μόνα χρήσιμα πρὸς τὴν τῶν ψιλῶν λόγων λέξις. σημεῖον δ' ὅτι τούτοις μόνοις πάντες χρῶνται· πάντες γὰρ μεταφοραῖς διαλέγονται καὶ τοῖς οἰκείοις καὶ τοῖς κυρίοις, ὥστε δηλόν ὥς ἂν εὖ ποιῇ τις, ἔσται τε ξενικὸν καὶ λανθάνειν ἐνδέξεται καὶ σαφηνιεῖ· αὕτη δ' ἦν ἡ τοῦ ῥητορικοῦ λόγου ἀρετή. τῶν δ' ὀνομάτων τῷ μὲν σοφιστῇ ὁμωνυμίαι χρήσιμοι (παρὰ ταύτας γὰρ κακουργεῖ), τῷ ποιητῇ δὲ συνωνυμίαι, λέγω δὲ κύρια τε καὶ συνώνυμα [1405a] οἷον τὸ πορεύεσθαι καὶ τὸ βαδίζειν· ταῦτα γὰρ ἀμφοτέρω καὶ κύρια καὶ συνώνυμα ἀλλήλοισι.

τί μὲν οὖν τούτων ἕκαστόν ἐστι, καὶ πόσα εἶδη μεταφορᾶς, καὶ ὅτι τοῦτο πλεῖστον δύναται καὶ ἐν ποιήσει καὶ ἐν λόγοις, [αἱ μεταφοραί,] εἴρηται, καθάπερ ἐλέγομεν, ἐν τοῖς περὶ ποιητικῆς· τοσοῦτ' δ' ἐν λόγῳ δεῖ μᾶλλον φιλοπονεῖσθαι περὶ αὐτῶν, ὅσ' ἐξ ἐλαττόνων βοηθημάτων ὁ λόγος ἐστὶ τῶν μέτρων· καὶ τὸ σαφές καὶ τὸ ἡδὺ καὶ τὸ ξενικὸν ἔχει μάλιστα ἡ μεταφορά, καὶ λαβεῖν οὐκ ἔστιν αὐτὴν παρ' ἄλλου. δεῖ δὲ καὶ τὰ ἐπίθετα καὶ τὰς μεταφορὰς ἀρμοττοῦσας λέγειν. τοῦτο δ' ἔσται ἐκ τοῦ ἀνάλογον· εἰ δὲ μή, ἀπρεπὲς φανεῖται διὰ τὸ παρ' ἄλληλα τὰ ἐναντία μάλιστα φαίνεσθαι. ἀλλὰ δεῖ σκοπεῖν, ὥς νέφ' φοινίκις, οὕτω γέροντι τί (οὐ γὰρ ἡ αὕτη

πρέπει ἐσθής), καὶ ἐάν τε κοσμεῖν βούλῃ, ἀπὸ τῶν βελτίστων τῶν ἐν ταυτῷ γένει φέρειν τὴν μεταφοράν, ἐάν τε ψέγειν, ἀπὸ τῶν χειρόνων· λέγω δ' οἷον, ἐπεὶ τὰ ἐναντία ἐν τῷ αὐτῷ γένει, τὸ φάναι τὸν μὲν πτωχεύοντα εὐχεσθαι τὸν δὲ εὐχόμενον πτωχεύειν, ὅτι ἄμφω αἰτήσεις, τὸ εἰρημένον ἐστὶ ποιεῖν, ὡς καὶ Ἰφικράτης Καλλιὰν μητραγύρτην ἀλλ' οὐ δαδοῦχον, ὃ δὲ ἔφη ἀμύητον αὐτὸν εἶναι· οὐ γὰρ ἂν μητραγύρτην αὐτὸν καλεῖν, ἀλλὰ δαδοῦχον· ἄμφω γὰρ περὶ θεόν, ἀλλὰ τὸ μὲν τίμιον τὸ δὲ ἄτιμον. καὶ ὁ μὲν διονυσοκόλακας, αὐτοὶ δ' αὐτοὺς τεχνίτας καλοῦσιν (ταῦτα δ' ἄμφω μεταφορά, ἢ μὲν ῥυπαινόντων ἢ δὲ τούναντίον), καὶ οἱ μὲν ληστὰι αὐτοὺς ποριστὰς καλοῦσι νῦν (διὸ ἔξεστι λέγειν τὸν ἀδικήσαντα μὲν ἁμαρτάνειν, τὸν δ' ἁμαρτάνοντα ἀδικῆσαι, καὶ τὸν κλέψαντα καὶ λαβεῖν καὶ πορίσασθαι). τὸ δὲ ὡς ὁ Τήλεφος Εὐριπίδου φησίν,

Τὰ δὲ ψυχρὰ ἐν τέτταρσι γίνεταί κατὰ τὴν λέξιν, ἐν τε τοῖς διπλοῖς ὀνόμασιν, οἷον Λυκόφρων “τὸν πολυπρόσωπον οὐρανὸν τῆς μεγαλοκορύφου γῆς”, καὶ “ἀκτὴν δὲ στενοπόρον”, καὶ ὡς Γοργίας ὠνόμαζεν “πτωχομουσοκόλοκας ἐπιорκήσαντας [1406a] κατ' εὐορκήσαντος”, καὶ ὡς Ἀλκιδάμας “μένους μὲν τὴν ψυχὴν πληρουμένην, πυρίχρων δὲ τὴν ὄψιν γιγνομένην”, καὶ “τελεσφόρον” ᾠήθη τὴν προθυμίαν αὐτῶν γενήσεσθαι, καὶ “τελεσφόρον” τὴν πειθῷ τῶν λόγων κατέστησεν, καὶ “κυανόχρων” τὸ τῆς θαλάττης ἔδαφος· πάντα ταῦτα γὰρ ποιητικὰ διὰ τὴν δίπλωσιν φαίνεται. μία μὲν οὖν αὕτη αἰτία, μία δὲ τὸ χρῆσθαι γλώτταις, οἷον Λυκόφρων Ξέρξην “πέλωρον ἄνδρα”, καὶ Σκίρων “σίνις ἀνὴρ”, καὶ Ἀλκιδάμας “ἄθυρμα τῇ ποιήσει”, καὶ “τὴν τῆς φύσεως ἀτασθαλίαν”, καὶ “ἀκράτῳ τῆς διανοίας ὀργῇ τεθηγμένον”. τρίτον δ' ἐν τοῖς ἐπιθέτοις τὸ ἢ μακροῖς ἢ ἀκαίροις ἢ πυκνοῖς χρῆσθαι· ἐν μὲν γὰρ ποιήσει πρέπει “γάλα λευκὸν” εἰπεῖν, ἐν δὲ λόγῳ τὰ μὲν ἀπρεπέστερα· τὰ δέ, ἂν ἢ κατακορῇ, ἐξελέγχει καὶ ποιεῖ φανερόν ὅτι ποιήσις ἐστίν, ἐπεὶ δεῖ γε χρῆσθαι αὐτοῖς (ἐξελλάττει γὰρ τὸ εἰωθὸς καὶ ξενικὴν ποιεῖ τὴν λέξιν), ἀλλὰ δεῖ στοχάζεσθαι τοῦ μετρίου, ἐπεὶ μείζον ποιεῖ κακὸν τοῦ εἰκῇ λέγειν· ἢ μὲν γὰρ οὐκ ἔχει τὸ εὖ, ἢ δὲ τὸ κακῶς. διὸ τὰ Ἀλκιδάμαντος ψυχρὰ φαίνεται· οὐ γὰρ ὡς ἡδύσματι χρῆται ἀλλ' ὡς ἐδέσματι τοῖς ἐπιθέτοις <τοῖς> οὕτω πυκνοῖς καὶ μείζοσι καὶ ἐπιδήλοις, οἷον οὐχ ἰδρῶτα ἀλλὰ τὸν ὕγρον ἰδρῶτα, καὶ οὐκ εἰς

Ἔστιν δὲ καὶ ἡ εἰκὼν μεταφορά· διαφέρει γὰρ μικρόν· ὅταν μὲν γὰρ εἶπῃ [τὸν Ἀχιλλέα] “ὥς δὲ λέων ἐπόρουσεν”, εἰκὼν ἐστίν, ὅταν δὲ “λέων ἐπόρουσε”, μεταφορά· διὰ γὰρ τὸ ἅμφω ἀνδρείους εἶναι, προσηγόρευσεν μετενέγκας λέοντα τὸν Ἀχιλλέα. χρήσιμον δὲ ἡ εἰκὼν καὶ ἐν λόγῳ, ὀλιγάκις δέ· ποιητικὸν γάρ. οἰστέαί δὲ ὥσπερ αἱ μεταφοραί· μεταφοραὶ γάρ εἰσι, διαφέρουσαι τῷ εἰρημένῳ.

[1407b] - καὶ διὰ τὸ ὅλως ἔλαττον εἶναι ἀμάρτημα διὰ τῶν γενῶν τοῦ πράγματος λέγουσιν οἱ μάντεις· τύχοι γὰρ ἂν τις μᾶλλον ἐν τοῖς ἀρτιασμοῖς ἄρτια ἢ περισσὰ εἰπὼν μᾶλλον ἢ πόσα ἔχει, καὶ τὸ ὅτι ἔσται ἢ τὸ πότε, διὸ οἱ χρησμολόγοι οὐ προσορίζονται τὸ πότε. ἅπαντα δὴ ταῦτα ὅμοια, ὥστ' ἂν μὴ τοιούτου τινὸς ἔνεκα, φευκτέον. τέταρτον, ὡς Πρωταγόρας τὰ γένη τῶν ὀνομάτων διήρει, ἄρρενα καὶ θήλεα καὶ σκεύη· δεῖ γὰρ ἀποδιδόναι καὶ ταῦτα ὀρθῶς· “ἡ δ' ἐλθοῦσα καὶ διαλεχθεῖσα ὄχρετο”. πέμπτον ἐν τῷ τὰ πολλὰ καὶ ὀλίγα καὶ ἐν ὀρθῶς ὀνομάζειν· “οἱ δ' ἐλθόντες ἐτυπτόν με”.

ὅλως δὲ δεῖ εὐανάγνωστον εἶναι τὸ γεγραμμένον καὶ εὐφραστον· ἔστιν δὲ τὸ αὐτό· ὅπερ οἱ πολλοὶ σύνδεσμοι οὐκ ἔχουσιν, οὐδ' ἂ μὴ ῥάδιον διαστίξαι, ὥσπερ τὰ Ἡρακλείτου. τὰ γὰρ Ἡρακλείτου διαστίξαι ἔργον διὰ τὸ ἄδηλον εἶναι ποτέρῳ πρόσκειται, τῷ ὕστερον ἢ τῷ πρότερον, οἷον ἐν τῇ ἀρχῇ αὐτῇ τοῦ συγγράμματος· φησὶ γὰρ “τοῦ λόγου τοῦδ' ἐόντος αἰεὶ ἀξύνετοι ἄνθρωποι γίνονται”. ἄδηλον γὰρ τὸ αἰεὶ, πρὸς ποτέρῳ <δεῖ> διαστίξαι. ἔτι τότε ποιεῖ σολοικίζειν, τὸ μὴ ἀποδιδόναι, ἐὰν μὴ ἐπιζευγνύης ὁ ἀμφοῖν ἀρμόττει, οἷον [ἦ] ψόφῳ καὶ χρώματι τὸ μὲν ἰδὼν οὐ κοινόν, τὸ δ' αἰσθόμενος κοινόν· ἀσαφὴ δὲ ἂν μὴ προθεῖς εἴπῃς, μέλλων πολλὰ μεταξὺ ἐμβάλλειν, οἷον “ἔμελλον γὰρ διαλεχθεῖς ἐκείνῳ τάδε καὶ τάδε καὶ ὧδε πορεύεσθαι”, ἀλλὰ μὴ “ἔμελλον γὰρ διαλεχθεῖς πορεύεσθαι, εἴτα τάδε καὶ τάδε καὶ ὧδε ἐγένετο”.

Εἰς ὅγκον δὲ τῆς λέξεως συμβάλλεται τάδε, τὸ λόγῳ χρῆσθαι ἀντ' ὀνόματος, οἷον μὴ κύκλον, ἀλλ' ἐπίπεδον τὸ ἐκ τοῦ μέσου ἴσον· εἰς δὲ συντομίαν τὸ ἐναντίον, ἀντὶ τοῦ λόγου ὄνομα. καὶ ἐὰν αἰσχροὺς ἢ ἀπρεπές, ἐὰν μὲν ἐν τῷ λόγῳ ἢ <τὸ> αἰσχρόν, τοῦνομα λέγειν, ἐὰν δ' ἐν τῷ ὀνόματι, τὸν λόγον. καὶ μεταφορᾷ δηλοῦν καὶ τοῖς ἐπιθέτοις, εὐλαβούμενον τὸ ποιητικόν. καὶ τὸ ἐν πολλὰ ποιεῖν, ὅπερ οἱ ποιηταὶ ποιοῦσιν· ἐνὸς ὄντος λιμένος ὅμως λέγουσι

καὶ μὴ ἐπιζευγνύναι, ἀλλ' ἐκατέρῳ ἐκάτερον, “τῆς γυναικὸς τῆς ἡμετέρας”. ἐὰν δὲ συντόμως, τοῦναντίον, “τῆς ἡμετέρας γυναικός”. καὶ μετὰ συνδέσμου λέγειν· ἐὰν δὲ συντόμως, ἄνευ μὲν συνδέσμου, μὴ ἀσύνδετα δέ, οἷον “πορευθεὶς καὶ δια[1408a]λεχθεὶς”, “πορευθεὶς διελέχθην”. καὶ τὸ Ἀντιμάχου χρήσιμον, ἐξ ὧν μὴ ἔχει λέγειν, ὃ ἐκεῖνος ποιεῖ ἐπὶ τοῦ Τευμησοῦ,

ἔστι τις ἡνεμόεις ὀλίγος λόφος·

αὕξεται γὰρ οὕτως εἰς ἅπειρον. ἔστι δὲ τοῦτο καὶ ἐπὶ ἀγαθῶν καὶ κακῶν, ὅπως οὐκ ἔχει, ὅποτέρως ἂν ἦ χρήσιμον, ὅθεν καὶ τὰ ὀνόματα οἱ ποιηταὶ φέρουσιν, τὸ ἄχορδον καὶ τὸ ἄλυρον μέλος· ἐκ τῶν στερήσεων γὰρ ἐπιφέρουσιν· εὐδοκιμεῖ γὰρ τοῦτο ἐν ταῖς μεταφοραῖς λεγόμενον ταῖς ἀνάλογον, οἷον τὸ φάναι τὴν σάλπιγγα ἰέναι μέλος ἄλυρον.

Τὸ δὲ πρέπον ἔξει ἡ λέξις, ἐὰν ἡ παθητικὴ τε καὶ ἠθικὴ καὶ τοῖς ὑποκειμένοις πράγμασιν ἀνάλογον. τὸ δ' ἀνάλογόν ἐστιν ἐὰν μήτε περὶ εὐόγκων αὐτοκαθδάλως λέγεται μήτε περὶ εὐτελῶν σεμνῶς, μηδ' ἐπὶ τῷ εὐτελεῖ ὀνόματι ἐπὶ κόσμος· εἰ δὲ μή, κωμωδία φαίνεται, οἷον ποιεῖ Κλεοφῶν· ὁμοίως γὰρ ἓν ἔλεγε καὶ εἰ εἴπειεν [ἂν] “πότνια συκῇ”. παθητικὴ δέ, ἐὰν μὲν ἡ ὕβρις, ὀργιζομένου λέξις, ἐὰν δὲ ἀσεβῇ καὶ αἰσχυρά, δυσχεραίνοντος καὶ εὐλαβουμένου καὶ λέγειν, ἐὰν δὲ ἐπαινετά, ἀγαμένως, ἐὰν δὲ ἐλεεινά, ταπεινῶς, καὶ ἐπὶ τῶν ἄλλων δὲ ὁμοίως. πιθανοὶ δὲ τὸ πρᾶγμα καὶ ἡ οἰκεῖα λέξις· παραλογίζεται τε γὰρ ἡ ψυχὴ ὡς ἀληθῶς λέγοντος, ὅτι ἐπὶ τοῖς τοιούτοις οὕτως ἔχουσιν, ὥστ' οἷονται, εἰ καὶ μὴ οὕτως ἔχει ὡς <λέγει> ὁ λέγων, τὰ πράγματα οὕτως ἔχειν, καὶ συνομοπαθεῖ ὁ ἀκούων ἀεὶ τῷ παθητικῶς λέγοντι, κἂν μηθὲν λέγῃ. διὸ πολλοὶ καταπλήττουσι τοὺς ἀκροατὰς θορυβοῦντες. καὶ ἠθικὴ δὲ αὕτη ἡ ἐκ τῶν σημείων δεῖξις, ὅτε ἀκολουθεῖ ἡ ἀρμόττουσα ἐκάστῳ γένει καὶ ἔξει. λέγω δὲ γένος μὲν καθ' ἡλικίαν, οἷον παῖς ἢ ἀνὴρ ἢ γέρων, καὶ γυνὴ ἢ ἀνὴρ, καὶ Λάκων ἢ Θετταλός, ἔξεις δέ, καθ' ἃς ποιός τις τῷ βίῳ· οὐ γὰρ καθ' ἅπασαν ἔξιν οἱ βίοι ποιοὶ τινες. ἐὰν οὖν καὶ τὰ ὀνόματα οἰκεῖα λέγῃ τῇ ἔξει, ποιήσει τὸ ἥθος· οὐ γὰρ ταῦτα οὐδ' ὡσαύτως ἀγροῖκος ἂν καὶ πεπαιδευμένος εἴπειεν. πάσχουσι δὲ τι οἱ ἀκροαταὶ καὶ ᾧ κατακόρως χρῶνται οἱ λογογράφοι, “τίς δ' οὐκ οἶδεν;”, “ἅπαντες ἴσασιν”. ὁμολογεῖ γὰρ ὁ ἀκούων αἰσχυρόμενος, ὅπως μετέχῃ οὐπὲρ καὶ οἱ ἄλλοι πάντες.

[1408b] τὸ δ' εὐκαίρως ἢ μὴ εὐκαίρως χρῆσθαι κοινὸν πάντων τῶν εἰδῶν ἐστίν. ἄκος δ' ἐπὶ πάσῃ ὑπερβολῇ τὸ θρυλούμενον· δεῖ γὰρ αὐτὸν αὐτῷ προσεπιπλήττειν· δοκεῖ γὰρ ἀληθὲς εἶναι, ἐπεὶ οὐ λανθάνει γε ὁ ποιεῖ τὸν λέγοντα. ἔτι τοῖς ἀνάλογον μὴ πᾶσιν ἅμα χρήσασθαι (οὕτω γὰρ κλέπτεται ὁ ἀκροατής)· λέγω δὲ οἷον ἐὰν τὰ ὀνόματα σκληρὰ ἦ, μὴ καὶ τῇ φωνῇ καὶ τῷ προσώπῳ [καὶ] τοῖς ἀρμόττουσιν· εἰ δὲ μὴ, φανερόν γίνεται ἕκαστον ὃ ἐστίν. ἐὰν δὲ τὸ μὲν τὸ δὲ μὴ, λανθάνει ποιῶν τὸ αὐτό. ἐὰν οὖν τὰ μαλακὰ σκληρῶς καὶ τὰ σκληρὰ μαλακῶς λέγεται, πιθανὸν γίνεται. τὰ δὲ ὀνόματα τὰ διπλᾶ καὶ [τὰ] ἐπίθετα πλείω καὶ τὰ ξένα μάλιστα ἀρμόττει λέγοντι παθητικῶς· συγγνώμη γὰρ ὀργιζομένῳ κακὸν φάναι οὐρανόμηκες, ἢ πελώριον εἰπεῖν, καὶ ὅταν ἔχη ἤδη τοὺς ἀκροατὰς καὶ ποιήσῃ ἐνθουσιάσαι ἢ ἐπαίνους ἢ ψόγοις ἢ ὀργῇ ἢ φιλίᾳ, οἷον καὶ Ἰσοκράτης ποιεῖ ἐν τῷ Πανηγυρικῷ ἐπὶ τέλει “φήμην δὲ καὶ μνήμην” καὶ “οἵτινες ἔτλησαν”· φθέγγονται γὰρ τὰ τοιαῦτα ἐνθουσιάζοντες, ὥστε καὶ ἀποδέχονται δηλονότι ὁμοίως ἔχοντες. διὸ καὶ τῇ ποιήσει ἤρμοσεν· ἐνθεον γὰρ ἡ ποίησις. ἢ δὴ οὕτως δεῖ, ἢ μετ' εἰρωνείας, ὥσπερ Γοργίας ἐποίει καὶ τὰ ἐν τῷ Φαίδρῳ.

Τὸ δὲ σχῆμα τῆς λέξεως δεῖ μήτε ἔμμετρον εἶναι μήτε ἄρρυθμον· τὸ μὲν γὰρ ἀπίθανον (πεπλάσθαι γὰρ δοκεῖ), καὶ ἅμα καὶ ἐξίστησι· προσέχειν γὰρ ποιεῖ τῷ ὁμοίῳ, πότε πάλιν ἤξει· ὥσπερ οὖν τῶν κηρύκων προλαμβάνουσι τὰ παιδιά τὸ “τίνα αἰρεῖται ἐπίτροπον ὁ ἀπελευθερούμενος;” “Κλέωνα”· τὸ δὲ ἄρρυθμον ἀπέραντον, δεῖ δὲ πεπεράνθαι μὲν, μὴ μέτρω δέ· ἀηδὲς γὰρ καὶ ἄγνωστον τὸ ἄπειρον. περαίνεται δὲ ἀριθμῷ πάντα· ὁ δὲ τοῦ σχήματος τῆς λέξεως ἀριθμὸς ῥυθμὸς ἐστίν, οὗ καὶ τὰ μέτρα τμήματα· διὸ ῥυθμὸν δεῖ ἔχειν τὸν λόγον, μέτρον δὲ μὴ· ποίημα γὰρ ἔσται. ῥυθμὸν δὲ μὴ ἀκριβῶς· τοῦτο δὲ ἔσται ἐὰν μέχρι τοῦ ἦ. τῶν δὲ ῥυθμῶν ὁ μὲν ἡρῶς σεμνῆς ἄλλ' οὐ λεκτικῆς ἀρμονίας δεόμενος, ὁ δ' ἱαμβος αὐτῇ ἐστίν ἢ λέξις ἢ τῶν πολλῶν (διὸ μάλιστα πάντων τῶν μέτρων ἱαμβεῖα φθέγγονται λέγοντες), δεῖ δὲ σεμνότητα γενέσθαι καὶ ἐκστῆσαι. ὁ δὲ τροχαῖος κορδακικώτερος· δηλοῖ δὲ [1409a] τὰ τετράμετρα· ἔστι γὰρ τροχερὸς ῥυθμὸς τὰ τετράμετρα. λείπεται δὲ παιάν, ᾧ ἐχρῶντο μὲν ἀπὸ Θρασυμάχου ἀρξάμενοι, οὐκ εἶχον δὲ λέγειν τίς ἦν. ἔστι δὲ τρίτος ὁ παιάν, καὶ ἐχόμενος τῶν εἰρημένων· τρία γὰρ πρὸς δύο ἐστίν, ἐκείνων δὲ ὁ μὲν ἐν πρὸς ἓν, ὁ δὲ δύο πρὸς ἓν, ἔχεται δὲ τῶν λόγων τούτων ὁ ἡμιόλιος· οὗτος δ' ἐστὶν ὁ παιάν. οἱ μὲν οὖν ἄλλοι διὰ τε τὰ

εἰρημένα ἀφετέοι, καὶ διότι μετρικοί· ὁ δὲ παιὰν ληπτέος· ἀπὸ μόνου γὰρ οὐκ ἔστι μέτρον τῶν ῥηθέντων ῥυθμῶν, ὥστε μάλιστα λανθάνειν. νῦν μὲν οὖν χρῶνται τῷ ἐνὶ παιᾶνι καὶ ἀρχόμενοι «καὶ τελευτῶντες», δεῖ δὲ διαφέρειν τὴν τελευτὴν τῆς ἀρχῆς. ἔστιν δὲ παιᾶνος δύο εἶδη ἀντικείμενα ἀλλήλοις, ὧν τὸ μὲν ἐν ἀρχῇ ἀρμόττει, ὥσπερ καὶ χρῶνται· οὗτος δ' ἐστὶν οὗ ἀρχεῖ μὲν ἡ μακρά, τελευτῶσιν δὲ τρεῖς βραχεῖαι, “Δαλογενὲς εἶτε Λυκίαν”, καὶ “Χρυσεοκόμα Ἑκατε παῖ Διός”· ἕτερος δ' ἐξ ἐναντίας, οὗ βραχεῖαι ἄρχουσιν τρεῖς, ἡ δὲ μακρὰ τελευταία·

μετὰ δὲ γὰν ὕδατά τ' ὠκεανὸν ἠφάνισε νύξ.

οὗτος δὲ τελευτὴν ποιεῖ· ἡ γὰρ βραχεῖα διὰ τὸ ἀτελὲς εἶναι ποιεῖ κολοβόν. ἀλλὰ δεῖ τῇ μακρᾷ ἀποκόπτεσθαι, καὶ δήλην εἶναι τὴν τελευτὴν μὴ διὰ τὸν γραφέα, μηδὲ διὰ τὴν παραγραφὴν, ἀλλὰ διὰ τὸν ῥυθμόν.

ὅτι μὲν οὖν εὐρυθμον δεῖ εἶναι τὴν λέξιν καὶ μὴ ἄρρυθμον, καὶ τίνες εὐρυθμον ποιοῦσι ῥυθμοὶ καὶ πῶς ἔχοντες, εἴρηται· τὴν δὲ λέξιν ἀνάγκη εἶναι ἢ εἰρομένην καὶ τῷ συνδέσμῳ μίαν, ὥσπερ αἱ ἐν τοῖς διθυράμβοις ἀναβολαί, ἢ κατεστραμμένην καὶ ὁμοίαν ταῖς τῶν ἀρχαίων ποιητῶν ἀντιστρόφοις. ἡ μὲν οὖν εἰρομένη λέξις ἢ ἀρχαία ἐστίν [“Ἡροδότου Θουρίου ἥδ' ἱστορίας ἀπόδειξις”] (ταύτη γὰρ πρότερον μὲν ἅπαντες, νῦν δὲ οὐ πολλοὶ χρῶνται)· λέγω δὲ εἰρομένην ἢ οὐδὲν ἔχει τέλος καθ' αὐτήν, ἂν μὴ τὸ πρᾶγμα «τὸ» λεγόμενον τελειωθῇ. ἔστι δὲ ἀηδὴς διὰ τὸ ἄπειρον· τὸ γὰρ τέλος πάντες βούλονται καθορᾶν· διόπερ ἐπὶ τοῖς καμπτήρσιν ἐκπνέουσι καὶ ἐκλύονται· προορῶντες γὰρ τὸ πέρας οὐ κάμνουσι πρότερον. ἡ μὲν οὖν εἰρομένη [τῆς λέξεώς] ἐστὶν ἥδε, κατεστραμμένη δὲ ἢ ἐν περιόδοις· λέγω δὲ περίοδον λέξιν ἔχουσαν ἀρχὴν καὶ τελευτὴν αὐτὴν καθ' αὐτήν καὶ [1409b] μέγεθος εὐσύνοπτον. ἡδεῖα δ' ἢ τοιαύτη καὶ εὐμαθής, ἡδεῖα μὲν διὰ τὸ ἐναντίως ἔχειν τῷ ἀπεράντῳ, καὶ ὅτι ἀεὶ τι οἶεται ἔχειν ὁ ἀκροατὴς καὶ πεπεράνθαι τι αὐτῷ, τὸ δὲ μηδὲν προνοεῖν μηδὲ ἀνύειν ἀηδές· εὐμαθὴς δὲ ὅτι εὐμνημόνευτος, τοῦτο δὲ ὅτι ἀριθμὸν ἔχει ἢ ἐν περιόδοις λέξις, ὁ πάντων εὐμνημονευτότατον. διὸ καὶ τὰ μέτρα πάντες μνημονεύουσιν μᾶλλον τῶν χύδην· ἀριθμὸν γὰρ ἔχει ὧς μετρεῖται. δεῖ δὲ τὴν περίοδον καὶ τῇ διανοαίᾳ τετελειῶσθαι, καὶ μὴ διακόπτεσθαι ὥσπερ τὰ Σοφοκλέους ἰαμβεῖα,

Καλυδὼν μὲν ἥδε γαῖα· Πελοπίας χθονός·

τοῦναντίον γὰρ ἔστιν ὑπολαβεῖν τῷ διαιρεῖσθαι, ὥσπερ καὶ ἐπὶ τοῦ εἰρημένου τὴν Καλυδῶνα εἶναι τῆς Πελοποννήσου.

περίοδος δὲ ἡ μὲν ἐν κώλοις ἡ δ' ἀφελής. ἔστιν δ' ἐν κώλοις μὲν λέξις ἡ τετελειωμένη τε καὶ διηρημένη καὶ εὐανάπνευστος, μὴ ἐν τῇ διαιρέσει ὥσπερ καὶ ἡ περίοδος, ἄλλ' ὅλη (κῶλον δ' ἔστιν τὸ ἕτερον μῦθον ταύτης)· ἀφελὴ δὲ λέγω τὴν μονόκωλον. δεῖ δὲ καὶ τὰ κῶλα καὶ τὰς περιόδους μήτε μνύουσιν εἶναι μήτε μακράς. τὸ μὲν γὰρ μικρὸν προσπταίειν πολλάκις ποιεῖ τὸν ἀκροατὴν (ἀνάγκη γὰρ ὅταν, ἔτι ὁρμῶν ἐπὶ τὸ πόρρω καὶ τὸ μέτρον οὐ ἔχει ἐν ἑαυτῷ ὅρον, ἀντισπασθῇ παυσαμένου, οἷον πρόσπτασιν γίνεσθαι διὰ τὴν ἀντίκρουσιν)· τὰ δὲ μακρὰ ἀπολείπεσθαι ποιεῖ, ὥσπερ οἱ ἐξωτέρω ἀποκάμπτοντες τοῦ τέρματος· ἀπολείπουσι γὰρ καὶ οὗτοι τοὺς συμπεριπατοῦντας, ὁμοίως δὲ καὶ αἱ περίοδοι αἱ μακραι οὖσαι λόγος γίνεται καὶ ἀναβολῇ ὁμοιον, ὥστε γίνεται ὁ ἔσκωπεν Δημόκριτος ὁ Χίος εἰς Μελανιπιδίην ποιήσαντα ἀντὶ τῶν ἀντιστροφῶν ἀναβολάς

οἱ τ' αὐτῷ κακὰ τεύχει ἀνὴρ ἄλλω κακὰ τεύχων,

ἡ δὲ μακρὰ ἀναβολὴ τῷ ποιήσαντι κακίστη·

ἀρμόττει γὰρ τὸ τοιοῦτον καὶ εἰς τὰς μακροκῶλους λέγειν. αἱ τε λίαν βραχύκωλοι οὐ περίοδος γίνεται· προπετὴ οὖν ἄγει τὸν ἀκροατὴν.

τῆς δὲ ἐν κώλοις λέξεως ἡ μὲν διηρημένη ἔστιν ἡ δὲ ἀντικειμένη, διηρημένη μὲν, οἷον “πολλάκις ἐθαύμασα τῶν τὰς πανηγύρεις συναγαγόντων καὶ τοὺς γυμνικοὺς ἀγῶνας καταστησάντων”, ἀντικειμένη δὲ ἐν ἧ ἑκατέρῳ τῷ κῶλῳ ἡ [1410a] πρὸς ἐναντίῳ ἐναντίον σύγκειται ἢ ταῦτὸ ἐπέξευκται τοῖς ἐναντίοις, οἷον “ἀμφοτέρους δ' ὤνησαν, καὶ τοὺς ὑπομείναντας καὶ τοὺς ἀκολουθήσαντας· τοῖς μὲν γὰρ πλείω τῆς οἴκοι προσεκτήσαντο, τοῖς δ' ἱκανὴν τὴν οἴκοι κατέλιπον”· ἐναντία ὑπομονὴ ἀκολούθησις, ἱκανὸν πλείον. “ὥστε καὶ τοῖς χρημάτων δεομένοις καὶ τοῖς ἀπολαῦσαι βουλομένοις”· ἀπόλαυσις κτήσεται ἀντίκειται. καὶ ἔτι “συμβαίνει πολλάκις ἐν ταύταις καὶ τοὺς φρονίμους ἀτυχεῖν καὶ τοὺς ἄφρονας κατορθοῦν”. “εὐθύς μὲν τῶν ἀριστείων ἡξιώθησαν, οὐ πολὺ δὲ ὕστερον τὴν ἀρχὴν τῆς θαλάττης ἔλαβον”. “πλεῦσαι μὲν διὰ τῆς ἡπείρου, πεξεῦσαι δὲ διὰ τῆς θαλάττης, τὸν μὲν Ἑλλήσποντον ζεύξας, τὸν δ' Ἀθῶ διορύξας.” “καὶ φύσει πολίτας ὄντας νόμῳ τῆς πόλεως στέρεσθαι.” “οἱ μὲν γὰρ αὐτῶν κακῶς ἀπώλοντο, οἱ δ' αἰσχυρῶς ἐσώθησαν.” “καὶ ἰδίᾳ μὲν τοῖς βαρβάροις οἰκέταις χρῆσθαι,

κοινή δὲ πολλοὺς τῶν συμμάχων περιορᾶν δουλεύοντας.” “ἡ ζῶντας ἕξειν ἢ τελευτήσαντας καταλείψειν.” καὶ ὁ εἰς Πειθόλαόν τις εἶπεν καὶ Λυκόφρονα ἐν τῷ δικαστηρίῳ, “οὗτοι δ’ ὑμᾶς οἴκοι μὲν ὄντες ἐπώλουν, ἐλθόντες δ’ ὡς ὑμᾶς ἐώνηνται”. ἅπαντα γὰρ ταῦτα ποιεῖ τὸ εἰρημένον. ἡδεῖα δὲ ἐστὶν ἡ τοιαύτη λέξις, ὅτι τάναντία γνωριμώτατα καὶ παρ’ ἄλληλα μᾶλλον γνώριμα, καὶ ὅτι ἔοικεν συλλογισμῷ· ὁ γὰρ ἔλεγχος συναγωγή τῶν ἀντικειμένων ἐστίν.

ἀντίθεσις μὲν οὖν τὸ τοιοῦτον ἐστίν, παρίσσωσις δ’ ἐὰν ἴσα τὰ κῶλα, παρομοιώσις δὲ ἐὰν ὅμοια τὰ ἔσχατα ἔχη ἐκάτερον τὸ κῶλον· ἀνάγκη δὲ ἢ ἐν ἀρχῇ ἢ ἐπὶ τελευτῆς ἔχειν, καὶ ἐν ἀρχῇ μὲν αἰεὶ τὰ ὀνόματα, ἐπὶ δὲ τελευτῆς τὰς ἐσχάτας συλλαβὰς ἢ τοῦ αὐτοῦ ὀνόματος πτώσεις ἢ τὸ αὐτὸ ὄνομα· ἐν ἀρχῇ μὲν τὰ τοιαῦτα, “ἀργρὸν γὰρ ἔλαβεν ἀργὸν παρ’ αὐτοῦ”,

δωρητοὶ τ’ ἐπέλοντο παρὰρρητοὶ τ’ ἐπέεσσιν·

ἐπὶ τελευτῆς δὲ “ῥήθης ἂν αὐτὸν <οὐ> παιδίον τετοκέнай, ἀλλ’ αὐτὸν παιδίον γεγενῆναι”, “ἐν πλείεσταις δὲ φροντίσι καὶ ἐν ἐλαχίσταις ἐλπίσιν”. πτώσεις δὲ ταῦτο “ἄξιοι δὲ σταθῆναι χαλκοῦς, οὐκ ἄξιος ὢν χαλκοῦ;” ταῦτό δ’ ὄνομα “σὺ δ’ αὐτὸν καὶ ζῶντα ἔλεγες κακῶς καὶ νῦν γράφεις κακῶς”. ἀπὸ συλλαβῆς δὲ “τί ἂν ἔπαθες δεινόν, εἰ ἄνδρ’ εἶδες ἀργόν;”

[1410b] ἐστὶν δὲ ἅμα πάντα ἔχειν ταῦτό, καὶ ἀντίθεσιν εἶναι τὸ αὐτὸ καὶ πάρισον καὶ ὁμοιοτέλευτον. αἱ δ’ ἀρχαὶ τῶν περιόδων σχεδὸν ἐν τοῖς Θεοδοκτείοις ἐξηρίθμηνται. εἰσὶν δὲ καὶ ψευδεῖς ἀντιθέσεις, οἷον καὶ Ἐπίχαρμος ἐποίει,

τόκα μὲν ἐν τήνων ἐγὼν ἦν, τόκα δὲ παρὰ τήνοις ἐγὼν.

Ἐπεὶ δὲ διώρισται περὶ τούτων, πόθεν λέγεται τὰ ἀστεῖα καὶ τὰ εὐδοκιμοῦντα λεκτέον. ποιεῖν μὲν οὖν ἐστὶν τοῦ εὐφυοῦς ἢ τοῦ γεγυμνασμένου, δεῖξαι δὲ τῆς μεθόδου ταύτης. εἵπωμεν οὖν καὶ διαριθμησόμεθα· ἀρχὴ δ’ ἔστω ἡμῖν αὕτη. τὸ γὰρ μανθάνειν ῥαδίως ἢδὺ φύσει πᾶσιν ἐστί, τὰ δὲ ὀνόματα σημαίνει τι, ὥστε ὅσα τῶν ὀνομάτων ποιεῖ ἡμῖν μάθησιν, ἥδιστα. αἱ μὲν οὖν γλῶτται ἀγνώτες, τὰ δὲ κύρια ἴσμεν· ἡ δὲ μεταφορὰ ποιεῖ τοῦτο μάλιστα· ὅταν γὰρ εἴπῃ τὸ γῆρας καλᾶμην, ἐποίησεν μάθησιν καὶ γνῶσιν διὰ τοῦ γένους· ἄμφω γὰρ ἀπηνθηκότα. ποιοῦσιν μὲν οὖν καὶ αἱ τῶν ποιητῶν εἰκόνες τὸ αὐτό· διόπερ ἂν εὖ, ἀστεῖον φαίνεται. ἐστὶν γὰρ ἡ εἰκὼν, καθάπερ εἴρηται πρότερον, μεταφορὰ διαφέρουσα προθέσει· διὸ ἦττον ἢδὺ, ὅτι μακροτέρως· καὶ οὐ λέγει ὡς τοῦτο ἐκεῖνο· οὐκοῦν

οὐδὲ ζητεῖ τοῦτο ἡ ψυχὴ· ἀνάγκη δὴ καὶ λέξιν καὶ ἐνθυμήματα ταῦτ' εἶναι ἀστεῖα ὅσα ποιεῖ ἡμῖν μάθησιν ταχεῖαν· διὸ οὔτε τὰ ἐπιπόλαια τῶν ἐνθυμημάτων εὐδοκιμεῖ (ἐπιπόλαια γὰρ λέγομεν τὰ παντὶ δῆλα, καὶ ἃ μηδὲν δεῖ ζητῆσαι), οὔτε ὅσα εἰρημένα ἀγνοοῦμεν, ἀλλ' ὅσων ἢ ἅμα λεγομένων ἢ γινῶσις γίνεται, καὶ εἰ μὴ πρότερον ὑπῆρχεν, ἢ μικρὸν ὑστερίζει ἡ διάνοια· γίνεταί γὰρ οἷον μάθησις, ἐκείνων δὲ οὐδετέρου. κατὰ μὲν οὖν τὴν διάνοιαν τοῦ λεγομένου τὰ τοιαῦτα εὐδοκιμεῖ τῶν ἐνθυμημάτων, κατὰ δὲ τὴν λέξιν τῷ μὲν σχήματι, ἐὰν ἀντικειμένως λέγεται, οἷον “καὶ τὴν τοῖς ἄλλοις κοινὴν εἰρήνην νομιζόντων τοῖς αὐτῶν ἰδίοις πόλεμον”· ἀντίκειται πόλεμος εἰρήνῃ· τοῖς δ' ὀνόμασιν, ἐὰν ἔχη μεταφοράν, καὶ ταύτην μὴτ' ἄλλοτρίαν, χαλεπὸν γὰρ συνιδεῖν, μὴτ' ἐπιπόλαιον, οὐδὲν γὰρ ποιεῖ πάσχειν. ἔτι εἰ πρὸ ὁμμάτων ποιεῖ· ὁρᾶν γὰρ δεῖ [τὰ] πραπτόμενα μᾶλλον ἢ μέλλοντα. δεῖ ἄρα τούτων στοχάζεσθαι τριῶν, μεταφορᾶς ἀντιθέσεως ἐνεργείας.

[1411a] τῶν δὲ μεταφορῶν τεττάρων οὐσῶν εὐδοκιμοῦσι μάλιστα αἱ κατ' ἀναλογίαν, ὥσπερ Περικλῆς ἔφη τὴν νεότητα τὴν ἀπολομένην ἐν τῷ πολέμῳ οὕτως ἠφανίσθαι ἐκ τῆς πόλεως ὥσπερ εἴ τις τὸ ἔαρ ἐκ τοῦ ἐνιαυτοῦ ἐξέλοι. καὶ Λεπτίνης περὶ Λακεδαιμονίων, οὐκ ἂν περιδεῖν τὴν Ἑλλάδα ἐτερόφθαλμον γενομένην. καὶ Κηφισόδοτος, σπουδάζοντος Χάρητος εὐθύνας δοῦναι περὶ τὸν Ὀλυνθιακὸν πόλεμον, ἠγανάκτει, φάσκων εἰς πνῖγμα τὸν δῆμον ἄγχοντα τὰς εὐθύνας πειρᾶσθαι δοῦναι. καὶ παρακαλῶν ποτὲ τοὺς Ἀθηναίους εἰς Εὐβοίαν ἐπισιτισαμένους ἔφη δεῖν ἐξιέναι τὸ Μιλτιάδου ψήφισμα. καὶ Ἰφικράτης σπείσασιν Ἀθηναίων πρὸς Ἐπίδουρον καὶ τὴν παραλίαν ἠγανάκτει, φάσκων αὐτοὺς τὰ ἐφόδια τοῦ πολέμου παρηρῆσθαι. καὶ Πειθόλαος τὴν πάραλον ρόπαλον τοῦ δήμου, Σηστὸν δὲ τηλίαν τοῦ Πειραιέως. καὶ Περικλῆς τὴν Αἴγιναν ἀφελεῖν ἐκέλευσε, τὴν λήμην τοῦ Πειραιέως. καὶ Μοιροκλῆς οὐθὲν ἔφη πονηρότερος εἶναι, ὀνομάσας τινὰ τῶν ἐπεικῶν· ἐκείνον μὲν γὰρ ἐπιτρίτων τόκων πονηρεῦσθαι, αὐτὸς δὲ ἐπιδεκάτων. καὶ τὸ Ἀναξανδρίδου ἱαμβεῖον ὑπὲρ τῶν θυγατέρων πρὸς τὸν γάμον ἐγχρονίζουσιν “ὑπερήμεροί μοι τῶν γάμων αἱ παρθέναι”. καὶ τὸ Πολυεύκτου εἰς ἀποπληκτικὸν τινα Σπεύσιππον, τὸ μὴ δύνασθαι ἡσυχίαν ἄγειν ὑπὸ τῆς τύχης ἐν πεντεσυρίγγῳ νόσῳ δεδεδεμένον. καὶ Κηφισόδοτος τὰς τριήρεις ἐκάλει μύλωνας ποικίλους, ὁ Κύων δὲ τὰ καπηλεῖα τὰ Ἀττικὰ φιδίτια· Αἰσίων δέ, ὅτι εἰς Σικελίαν τὴν πόλιν

ἐξέχεαν· τοῦτο γὰρ μεταφορὰ καὶ πρὸ ὁμμάτων. καὶ “ὥστε βοηῆσαι τὴν Ἑλλάδα”, καὶ τοῦτο τρόπον τινὰ μεταφορὰ καὶ πρὸ ὁμμάτων. καὶ ὥσπερ Κηφισόδοτος εὐλαβεῖσθαι ἐκέλευεν μὴ πολλὰς ποιήσωσιν τὰς συνδρομὰς [ἐκκλησίας]. καὶ Ἰσοκράτης πρὸς τοὺς συντρέχοντας ἐν ταῖς πανηγύρεσιν. καὶ οἷον ἐν τῷ ἐπιταφίῳ, διότι ἄξιον ἦν ἐπὶ τῷ τάφῳ τῷ τῶν ἐν Σαλαμῖνι τελευτησάντων κείρασθαι τὴν Ἑλλάδα ὡς συγκαταθαπτομένης τῇ ἀρετῇ αὐτῶν τῆς ἐλευθερίας· εἰ μὲν γὰρ εἶπεν ὅτι ἄξιον δακρῦσαι συγκαταθαπτομένης τῆς ἀρετῆς, μεταφορὰ καὶ πρὸ ὁμμάτων, τὸ δὲ “τῇ ἀρετῇ [1411b] τῆς ἐλευθερίας” ἀντίθεσιν τίνα ἔχει. καὶ ὡς Ἰφικράτης εἶπεν “ἡ γὰρ ὁδὸς μοι τῶν λόγων διὰ μέσων τῶν Χάρητι πεπραγμένων ἐστίν” μεταφορὰ κατ’ ἀναλογίαν, καὶ τὸ διὰ μέσου πρὸ ὁμμάτων ποιεῖ. καὶ τὸ φάναι παρακαλεῖν τοὺς κινδύνους τοῖς κινδύνοις βοηθήσοντας, πρὸ ὁμμάτων <καὶ> μεταφορὰ. καὶ Λυκολέων ὑπὲρ Χαβρίου “οὐδὲ τὴν ἱκετηρίαν αἰσχυρθέντες αὐτοῦ, τὴν εἰκόνα τὴν χαλκῆν”· μεταφορὰ γὰρ ἐν τῷ παρόντι, ἀλλ’ οὐκ ἀεὶ, ἀλλὰ πρὸ ὁμμάτων· κινδυνεύοντος γὰρ αὐτοῦ ἱκετεύει ἢ εἰκὼν, τὸ “ἔμψυχον δὴ ἄψυχον”, τὸ ὑπόμνημα τῶν τῆς πόλεως ἔργων. καὶ “πάντα τρόπον μικρὸν φρονεῖν μελετῶντες”· τὸ γὰρ μελετᾶν αὖξιν τι ἐστίν. καὶ ὅτι “τὸν νοῦν ὁ θεὸς φῶς ἀνῆψεν ἐν τῇ ψυχῇ”· ἅμφω γὰρ δηλοῖ τι. “οὐ γὰρ διαλυόμεθα τοὺς πολέμους ἀλλ’ ἀναβαλλόμεθα”· ἅμφω γὰρ ἐστὶν μέλλοντα, καὶ ἡ ἀναβολὴ καὶ ἡ τοιαύτη εἰρήνη. καὶ τὸ τὰς συνθήκας φάναι τρόπαιον εἶναι πολὺ κάλλιον τῶν ἐν τοῖς πολέμοις γινομένων· τὰ μὲν γὰρ ὑπὲρ μικρῶν καὶ μιᾶς τύχης, αὐταὶ δ’ ὑπὲρ παντὸς τοῦ πολέμου· ἅμφω γὰρ νίκης σημεῖα. καὶ ὅτι αἱ πόλεις τῷ ψόγῳ τῶν ἀνθρώπων μεγάλας εὐθύνας δίδόασιν· ἢ γὰρ εὐθυνα βλάβη τις δικαία ἐστίν.

“Ὅτι μὲν οὖν τὰ ἀστεῖα ἐκ μεταφορᾶς τε τῆς ἀνάλογον λέγεται καὶ τῷ πρὸ ὁμμάτων ποιεῖν, εἴρηται· λεκτέον δὲ τί λέγομεν πρὸ ὁμμάτων, καὶ τί ποιοῦσι γίγνεται τοῦτο. λέγω δὴ πρὸ ὁμμάτων ταῦτα ποιεῖν ὅσα ἐνεργοῦντα σημαίνει, οἷον τὸν ἀγαθὸν ἄνδρα φάναι εἶναι τετράγωνον μεταφορὰ, (ἅμφω γὰρ τέλεια), ἀλλ’ οὐ σημαίνει ἐνέργειαν· ἀλλὰ τὸ “ἀνθοῦσαν ἔχοντος τὴν ἀκμήν” ἐνέργεια, καὶ τὸ “σὲ δ’ ὥσπερ ἄφετον” [ἐλεύθερον] ἐνέργεια, καὶ

<τοῦντεῦθεν οὖν> Ἑλλήνες ἄξαντες ποσίν·

τὸ ἄξαντες ἐνέργεια καὶ μεταφορὰ· ταχὺ γὰρ λέγει. καὶ ὡς κέχρηται πολλαχοῦ Ὅμηρος, τὸ τὰ ἄψυχα ἔμψυχα ποιεῖν διὰ τῆς μεταφορᾶς. ἐν πᾶσι δὲ τῷ ἐνέργειαν ποιεῖν εὐδοκιμεῖ, οἷον ἐν τοῖσδε,

“αὐτίς ἐπὶ δάπεδόνδε κυλίνδετο λᾶας ἀναιδής”, καὶ [1412a] “ἔπατ’ οἰστός”, καὶ “ἐπιπτέσθαι μενεαίνων”, καὶ “ἐν γαίῃ ἴσαντο λιλαιόμενα χροὸς ἄσαι”, καὶ “αἰχμὴ δὲ στέρνοιο διέσσυτο μαιμώωσα”. ἐν πᾶσι γὰρ τούτοις διὰ τὸ ἔμψυχα εἶναι ἐνεργοῦντα φαίνεται· τὸ ἀναισχυντεῖν γὰρ καὶ μαιμᾶν καὶ τὰ ἄλλα ἐνέργεια. ταῦτα δὲ προσῆψε διὰ τῆς κατ’ ἀναλογίαν μεταφορᾶς· ὥς γὰρ ὁ λίθος πρὸς τὸν Σίσυφον, ὁ ἀναισχυντῶν πρὸς τὸν ἀναισχυντούμενον. ποιεῖ δὲ καὶ ἐν ταῖς εὐδοκιμούσαις εἰκόσιν ἐπὶ τῶν ἀψύχων ταυτά·

“κυρτά, φαληριόωντα· πρὸ μὲν τ’ ἄλλ’, αὐτὰρ ἐπ’ ἄλλα”· κινούμενα γὰρ καὶ ζῶντα ποιεῖ πάντα, ἡ δ’ ἐνέργεια κίνησις.

δεῖ δὲ μεταφέρειν, καθάπερ εἴρηται πρότερον, ἀπὸ οἰκείων καὶ μὴ φανερῶν, οἷον καὶ ἐν φιλοσοφίᾳ τὸ ὁμοιον καὶ ἐν πολὺ διέχουσι θεωρεῖν εὐστόχου, ὥσπερ Ἀρχύτας ἔφη ταὐτὸν εἶναι διαιτητὴν καὶ βωμόν· ἐπ’ ἄμφω γὰρ τὸν ἀδικοῦμενον καταφεύγειν. ἢ εἴ τις φαίη ἄγκυραν καὶ κρεμάθραν τὸ αὐτὸ εἶναι· ἄμφω γὰρ ταυτό τι, ἀλλὰ διαφέρει τῷ ἄνωθεν καὶ κάτωθεν. καὶ τὸ ἀνωμαλίσθαι τὰς πόλεις ἐν πολὺ διέχουσιν ταυτό, ἐν ἐπιφανείᾳ καὶ δυνάμεσι τὸ ἴσον.

ἔστιν δὲ καὶ τὰ ἀστεῖα τὰ πλεῖστα διὰ μεταφορᾶς καὶ ἐκ τοῦ προσεξαπατᾶν· μᾶλλον γὰρ γίγνεται δῆλον ὅ τι ἔμαθε παρὰ τὸ ἐναντίως ἔχειν, καὶ ἔοικεν λέγειν ἢ ψυχὴ “ὥς ἀληθῶς, ἐγὼ δὲ ἥμαρτον”. καὶ τῶν ἀποφθεγμάτων δὲ τὰ ἀστεῖα ἔστιν ἐκ τοῦ μὴ ὀφῆσι λέγειν, οἷον τὸ Στησιχόρου, ὅτι οἱ τέττιγες ἑαυτοῖς χαμόθεν ἄσσονται. καὶ τὰ εὖ ἠνιγμένα διὰ τὸ αὐτὸ ἡδέα (μάθησις γὰρ ἐστὶ καὶ μεταφορά), καὶ (ὃ λέγει Θεόδωρος) τὸ καινὰ λέγειν. γίγνεται δὲ ὅταν παράδοξον ᾖ, καὶ μὴ, ὥς ἐκεῖνος λέγει, πρὸς τὴν ἔμπροσθεν δόξαν, ἀλλ’ ὥσπερ ἐν τοῖς γελοίοις τὰ παραπεποιημένα (ὅπερ δύναται καὶ τὰ παρὰ γράμμα σκώμματα· ἐξαπατᾶ γάρ), καὶ ἐν τοῖς μέτροις· οὐ γὰρ ὥσπερ ὁ ἀκούων ὑπέλαβεν· “ἔστειχε δ’ ἔχων ὑπὸ ποσὶ χίμεθλα”· ὁ δ’ ὥετο πέδιλα ἐρεῖν. τούτου δ’ ἅμα λεγομένου δεῖ δῆλον εἶναι. τὰ δὲ παρὰ γράμμα ποιεῖ οὐχ ὃ λέγει λέγειν, ἀλλ’ ὃ μεταστρέφει ὄνομα, οἷον τὸ Θεοδώρου εἰς Νίκωνα τὸν κιθαρωδὸν “θράξει σε”, προσποιεῖται γὰρ λέγειν τὸ [1412b] “Θρᾷξ εἰ σύ” καὶ ἐξαπατᾶ· ἄλλο γὰρ λέγει. διὸ μαθόντι ἡδύ, ἐπεὶ εἰ μὴ ὑπολαμβάνει Θρᾶκα εἶναι, οὐ δόξει ἀστεῖον εἶναι. καὶ τὸ “βούλει αὐτὸν πέρσαι”. δεῖ δὲ ἀμφοτέρω προσηκόντως λεχθῆναι. οὕτω δὲ καὶ τὰ ἀστεῖα, οἷον τὸ φάναι Ἀθηναίοις τὴν τῆς θαλάττης ἀρχὴν μὴ ἀρχὴν εἶναι τῶν κακῶν· ὄνασθαι γάρ. ἢ ὥσπερ Ἰσοκράτης τὴν ἀρχὴν τῇ πόλει ἀρχὴν

εἶναι τῶν κακῶν. ἀμφοτέρως γὰρ ὁ οὐκ ἂν ᾤηθη τις ἐρεῖν, τοῦτ' εἴρηται, καὶ ἐγνώσθη ὅτι ἀληθές· τό τε γὰρ τὴν ἀρχὴν φάναι ἀρχὴν εἶναι οὐθὲν σοφόν, ἀλλ' οὐχ οὕτω λέγει ἀλλ' ἄλλως, καὶ ἀρχὴν οὐχ ὁ εἶπεν ἀπόφησιν, ἀλλ' ἄλλως. ἐν ἅπασιν δὲ τούτοις, ἐὰν προσηκόντως τὸ ὄνομα ἐνέγκῃ ὁμωνυμία ἢ μεταφορᾷ, τότε τὸ εὖ. οἶον “Ἀνάσχετος οὐκ ἀνασχετός” ὁμωνυμία ἀπέφησε, ἀλλὰ προσηκόντως, εἰ ἀηδής. καὶ “οὐκ ἂν γένοιο μᾶλλον ἢ σε δεῖ ξένος”. “ξένος” <γὰρ> “οὐ μᾶλλον ἢ σε δεῖ” τὸ αὐτὸ καὶ “οὐ δεῖ τὸν ξένον ξένον ἀεὶ εἶναι”. ἀλλότριον γὰρ καὶ τοῦτο. τὸ αὐτὸ καὶ τὸ Ἀναξανδρίδου τὸ ἐπαινούμενον,

καλόν γ' ἀποθανεῖν πρὶν θανάτου δρᾶν ἄξιον·

ταῦτό γάρ ἐστι τῷ εἰπεῖν “ἄξιόν γ' ἀποθανεῖν μὴ ὄντα ἄξιον ἀποθανεῖν”, ἢ “ἄξιόν γ' ἀποθανεῖν μὴ θανάτου ἄξιον ὄντα”, ἢ “μὴ ποιοῦντα θανάτου ἄξια”. τὸ μὲν οὖν εἶδος τὸ αὐτὸ τῆς λέξεως τούτων· ἀλλ' ὅσῳ ἂν <ἐν> ἐλάττονι καὶ ἀντικειμένως λεχθῇ, τοσούτῳ εὐδοκιμεῖ μᾶλλον. τὸ δ' αἴτιον ὅτι ἡ μάθησις διὰ μὲν τὸ ἀντικεῖσθαι μᾶλλον, διὰ δὲ τὸ ἐν ὀλίγῳ θᾶπτον γίνεται. δεῖ δ' ἀεὶ προσεῖναι [ἢ] τὸ πρὸς ὃν λέγεται [ἢ] ὀρθῶς λέγεσθαι, εἰ τὸ λεγόμενον ἀληθές καὶ μὴ ἐπιπόλαιον <ἔσται>. ἔστιν γὰρ ταῦτα χωρὶς ἔχειν, οἶον “ἀποθνήσκειν δεῖ μὴθὲν ἀμαρτάνοντα” [ἀλλ' οὐκ ἀστεῖον], “τὴν ἀξίαν δεῖ γαμεῖν τὸν ἄξιον”, ἀλλ' οὐκ ἀστεῖον, ἀλλ' <ἢ> ἐὰν ἅμα ἅμφω ἔχη· “ἄξιόν γ' ἀποθανεῖν μὴ ἄξιον ὄντα τοῦ ἀποθανεῖν”. ὅσῳ δ' ἂν πλείω ἔχη, τοσούτῳ ἀστειότερον φαίνεται, οἶον εἰ καὶ τὰ ὀνόματα μεταφορὰ εἴη καὶ μεταφορὰ τοιαδὶ καὶ ἀντίθεσις καὶ παρίσῳσις, καὶ ἔχοι ἐνέργειαν.

εἰσὶν δὲ καὶ αἱ εἰκόνες, ὥσπερ εἴρηται καὶ ἐν τοῖς ἄνω, αἱ εὐδοκιμοῦσαι τρόπον τινὰ μεταφοραί· ἀεὶ γὰρ ἐκ δυοῖν λέγονται, ὥσπερ ἡ ἀνάλογον μεταφορὰ, οἶον “ἢ ἀσπίς”, φαμέν, [1413a] “ἔστι φιάλη Ἄρεως”, καὶ “<τὸ> τόξον φόρμιγξ ἄχορδος”. οὕτω μὲν οὖν λέγουσιν οὐχ ἀπλοῦν, τὸ δ' εἰπεῖν τὸ τόξον φόρμιγγα ἢ τὴν ἀσπίδα φιάλην ἀπλοῦν. καὶ εἰκάζουσιν δὲ οὕτως, οἶον πιθήκῳ αὐλητήν, λύχνῳ ψακαζομένῳ [εἰς] μύωπα· ἅμφω γὰρ συνάγεται. τὸ δὲ εὖ ἐστὶν ὅταν μεταφορὰ ᾖ· ἔστιν γὰρ εἰκάσαι τὴν ἀσπίδα φιάλη Ἄρεως καὶ τὸ ἐρείπιον ῥάκει οἰκίας, καὶ τὸν τὸν Νικήρατον φάναι Φιλοκλήτην εἶναι δεδηγμένον ὑπὸ Πράτῃ, ὥσπερ εἵκασεν Θρασύμαχος ἰδὼν τὸν Νικήρατον ἡττημένον ὑπὸ Πράτῃ ῥαψωδοῦντα, κομῶντα δὲ καὶ αὐχμηρὸν ἔτι. ἐν οἷς μάλιστα τ' ἐκπίπτουσιν οἱ ποιηταὶ ἐὰν μὴ εὖ, καὶ ἐὰν εὖ, εὐδοκιμοῦσιν· λέγω δ' ὅταν ἀποδιδῶσιν·

“ὥσπερ σέλινον οὐλα τὰ σκέλη φορεῖ.”

“ὥσπερ Φιλάμμων ζυγομαχῶν τῷ κωρύκῳ.”

καὶ τὰ τοιαῦτα πάντ’ εἰκόνες εἰσίν. αἱ δ’ εἰκόνες ὅτι μεταφοραί, εἴρηται πολλάκις.

καὶ αἱ παροιμίαι δὲ μεταφοραί ἀπ’ εἰδους ἐπ’ εἶδος εἰσίν·

οἶον ἂν τις ὡς ἀγαθὸν πεισόμενος αὐτὸς ἐπαγάγηται, εἴτα βλαβῇ, “ὡς ὁ Καρπάθιος”, φασιν, “τὸν λαγῷ”. ἄμφω γὰρ τὸ εἰρημένον πεπόνθασιν. ὅθεν μὲν οὖν τὰ ἀστεῖα λέγεται καὶ διότι, σχεδὸν εἴρηται τὸ αἴτιον· εἰσίν δὲ καὶ «αἱ» εὐδοκιμοῦσαι ὑπερβολαὶ μεταφοραί, οἶον εἰς ὑπωπιασμένον “ῥήθητε δ’ ἂν αὐτὸν εἶναι συκαμίνων κάλαθον”· ἐρυθρὸν γάρ τι τὸ ὑπώπιον, ἀλλὰ τοῦτο πολὺ σφόδρα. τὸ δὲ “ὥσπερ τὸ καὶ τὸ” ὑπερβολὴ τῇ λέξει διαφέρουσα. “ὥσπερ Φιλάμμων ζυγομαχῶν τῷ κωρύκῳ”, “ῥήθης δ’ ἂν αὐτὸν Φιλάμμωνα εἶναι μαχόμενον τῷ κωρύκῳ”.

“ὥσπερ σέλινον οὐλα τὰ σκέλη φορεῖν”,

“ῥήθης δ’ ἂν οὐ σκέλη ἀλλὰ σέλινα ἔχειν, οὕτως οὐλα”. εἰσὶ δ’ αἱ ὑπερβολαὶ μειρακιώδεις· σφοδρότητα γὰρ δηλοῦσιν. διὸ ὀργιζόμενοι λέγουσιν μάλιστα·

οὐδ’ εἴ μοι τόσα δοίῃ ὅσα ψάμαθός τε κόνις τε.

Δεῖ δὲ μὴ λεληθῆναι ὅτι ἄλλη ἐκάστῳ γένει ἀρμόττει λέξις. οὐ γὰρ ἡ αὐτὴ γραφικὴ καὶ ἀγωνιστικὴ, οὐδὲ δημηγορικὴ καὶ δικανικὴ. ἄμφω δὲ ἀνάγκη εἰδέναι· τὸ μὲν γὰρ ἐστὶν ἐλληνίζειν ἐπίστασθαι, τὸ δὲ μὴ ἀναγκάζεσθαι κατασιωπᾶν ἂν τι βούληται μεταδοῦναι τοῖς ἄλλοις, ὅπερ πάσχουσιν οἱ μὴ ἐπιστάμενοι γράφειν. ἐστὶ δὲ λέξις γραφικὴ μὲν ἢ ἀκριβεστάτη, ἀγωνιστικὴ δὲ ἢ ὑποκριτικωτάτη (ταύτης δὲ δύο εἶδη· ἡ μὲν γὰρ ἠθικὴ ἢ δὲ παθητικὴ)· διὸ καὶ οἱ ὑποκριταὶ τὰ τοιαῦτα τῶν δραμάτων διώκουσι, καὶ οἱ ποιηταὶ τοὺς τοιούτους. βαστάζονται δὲ οἱ ἀναγνωστικοί, οἶον Χαιρήμων (ἀκριβής γὰρ ὥσπερ λογογράφος), καὶ Λικύμνιος τῶν διθυραμβοποιῶν. καὶ παραβαλλόμενοι οἱ μὲν τῶν γραφέων ἁλόγου ἐν τοῖς ἀγῶσι στενοὶ φαίνονται, οἱ δὲ τῶν ῥητόρων, εὖ λεχθέντες, ἰδιωτικοὶ ἐν ταῖς χερσίν. αἴτιον δ’ ὅτι ἐν τῷ ἀγῶνι ἀρμόττει τὰ

ὑποκριτικά· διὸ καὶ ἀφηρημένης τῆς ὑποκρίσεως οὐ ποιοῦντα τὸ αὐτῶν ἔργον φαίνεται εὐήθη, οἷον τὰ τε ἀσύνδετα καὶ τὸ πολλάκις τὸ αὐτὸ εἰπεῖν ἐν τῇ γραφικῇ ὀρθῶς ἀποδοκιμάζεται, ἐν δὲ ἀγωνιστικῇ οὐ, καὶ οἱ ῥήτορες χρῶνται· ἔστι γὰρ ὑποκριτική· ἀνάγκη δὲ μεταβάλλειν τὸ αὐτὸ λέγοντας, ὅπερ ὥσπερ ὁδοποιεῖ τῷ ὑποκρίνεσθαι· “οὗτός ἐστιν ὁ κλέψας ὑμῶν, οὗτός ἐστιν ὁ ἐξαπατήσας, οὗτος ὁ τὸ ἔσχατον προδοῦναι ἐπιχειρήσας”, οἷον καὶ Φιλήμων ὁ ὑποκριτὴς ἐποίει ἐν τε τῇ Ἀναξανδρίδου Γεροντομαχίᾳ, ὅτε λέγοι “Ραδάμανθυς καὶ Παλαμήδης”, καὶ ἐν τῷ προλόγῳ τῶν Εὐσεβῶν τὸ “ἐγώ”· ἐὰν γὰρ τις τὰ τοιαῦτα μὴ ὑποκρίνηται, γίνεται “ὁ τὴν δοκὸν φέρων”. καὶ τὰ ἀσύνδετα ὡσαύτως· “ἦλθον, ἀπῆντησα, ἐδεόμην”· ἀνάγκη γὰρ ὑποκρίνεσθαι καὶ μὴ ὡς ἐν λέγοντα τῷ αὐτῷ ἦθαι καὶ τόνῳ εἰπεῖν· ἔτι ἔχει ἴδιόν τι τὰ ἀσύνδετα· ἐν ἴσῳ γὰρ χρόνῳ πολλὰ δοκεῖ εἰρῆσθαι· ὁ γὰρ σύνδεσμος ἐν ποιεῖ τὰ πολλά, ὥστε ἐὰν ἐξαίρεθῇ, δῆλον ὅτι τοῦναντίον ἔσται τὸ ἐν πολλά· ἔχει οὖν αὐξήσιν· “ἦλθον, [1414a] διελέχθην, ἐκέτευσά” (πολλὰ δοκεῖ), “ὑπερεῖδεν ὅσα εἶπον”. τοῦτο δὲ βούλεται ποιεῖν καὶ Ὅμηρος ἐν τῷ

“Νιρεὺς αὖ Σύμηθεν”, “Νιρεὺς Ἀγλαΐης”, “Νιρεὺς ὃς κάλλιστος”.

περὶ οὗ γὰρ πολλὰ λέγεται, ἀνάγκη καὶ πολλάκις εἰρῆσθαι· εἰ οὖν [καὶ] πολλάκις, καὶ πολλὰ δοκεῖ, ὥστε ἠῤῥηκεν, ἅπαξ μνησθεῖς, διὰ τὸν παραλογισμόν, καὶ μνήμην πεποίηκεν, οὐδαμοῦ ὕστερον αὐτοῦ λόγον ποιησάμενος.

ἡ μὲν οὖν δημηγορικὴ λέξις καὶ παντελῶς ἔοικεν τῇ σκιαγραφίᾳ· ὅσῳ γὰρ ἂν πλείων ἢ ὁ ὄχλος, πορρώτερον ἢ θέα, διὸ τὰ ἀκριβῆ περιέργα καὶ χεῖρω φαίνεται ἐν ἀμφοτέροις· ἡ δὲ δικανικὴ ἀκριβεστέρα· ἔτι δὲ μᾶλλον ἢ <ἐν> ἐνὶ κριτῇ· ἐλάχιστον γὰρ ἔνεστι ρητορικῆς· εὐσύνοπτον γὰρ μᾶλλον τὸ οἰκεῖον τοῦ πράγματος καὶ τὸ ἀλλότριον, καὶ ὁ ἀγὼν ἄπεστιν, ὥστε καθαρὰ ἡ κρίσις· διὸ οὐχ οἱ αὐτοὶ ἐν πᾶσιν τούτοις εὐδοκιμοῦσιν ῥήτορες· ἀλλ’ ὅπου μάλιστα ὑπόκρισις, ἐνταῦθα ἥκιστα ἀκρίβεια ἐνι· τοῦτο δὲ ὅπου φωνῆς, καὶ μάλιστα ὅπου μεγάλης.

ἡ μὲν οὖν ἐπιδεικτικὴ λέξις γραφικωτάτη· τὸ γὰρ ἔργον αὐτῆς ἀνάγνωσις· δευτέρα δὲ ἡ δικανικὴ· τὸ δὲ προσδιδραμεῖσθαι τὴν λέξιν, ὅτι ἡδεῖαν δεῖ εἶναι καὶ μεγαλοπρεπῆ, περιέργον· τί γὰρ μᾶλλον ἢ σῶφρονα καὶ ἐλευθέριον καὶ εἴ τις ἄλλη ἡθους ἀρετὴ; τὸ δὲ ἡδεῖαν εἶναι ποιήσει δηλονότι τὰ εἰρημένα, εἴπερ ὀρθῶς ὠρισταὶ ἢ ἀρετῇ

τῆς λέξεως· τίνος γὰρ ἔνεκα δεῖ σαφῆ καὶ μὴ ταπεινὴν εἶναι ἀλλὰ πρέπουσαν; ἂν τε γὰρ ἀδολεσχή, οὐ σαφές, οὐδὲ ἂν σύντομος, ἀλλὰ δῆλον ὅτι τὸ μέσον ἀρμόττει. καὶ τὸ ἠδεῖαν τὰ εἰρημένα ποιήσει, ἂν εὖ μυχθῇ, τὸ εἰωθὸς καὶ <τὸ> ξενικόν, καὶ ὁ ρυθμός, καὶ τὸ πιθανὸν ἐκ τοῦ πρέποντος.

περὶ μὲν οὖν τῆς λέξεως εἴρηται, καὶ κοινῇ περὶ πάντων καὶ ἰδίᾳ περὶ ἐκάστου γένους· λοιπὸν δὲ περὶ τάξεως εἰπεῖν. ἔστι δὲ τοῦ λόγου δύο μέρη· ἀναγκαῖον γὰρ τό τε πρᾶγμα εἰπεῖν περὶ οὗ, καὶ τοῦτ' ἀποδείξαι. διὸ εἰπόντα μὴ ἀποδείξαι ἢ ἀποδείξαι μὴ προειπόντα ἀδύνατον· ὃ τε γὰρ ἀποδεικνύων τι ἀποδείκνυσι, καὶ ὁ προλέγων ἔνεκα τοῦ ἀποδείξαι προλέγει. τούτων δὲ τὸ μὲν πρόθεσις ἐστὶ τὸ δὲ πίστις, ὥσπερ ἂν εἴ τις διέλοι ὅτι τὸ μὲν πρόβλημα τὸ δὲ ἀπόδειξις. νῦν δὲ διαιροῦσι γελοίως· διήγησις γάρ που τοῦ δικανικοῦ μόνου λόγου ἐστίν, ἐπιδεικτικοῦ δὲ καὶ δημηγορικοῦ πῶς ἐνδέχεται εἶναι διήγησιν οἷαν λέγουσιν, [1414b] ἢ τὰ πρὸς τὸν ἀντίδικον, ἢ ἐπίλογον τῶν ἀποδεικτικῶν; προοίμιον δὲ καὶ ἀντιπαραβολὴ καὶ ἐπάνοδος ἐν ταῖς δημηγορίαις τότε γίνεται ὅταν ἀντιλογία ᾖ. καὶ γὰρ ἡ κατηγορία καὶ ἡ ἀπολογία πολλάκις, ἀλλ' οὐχ ἡ συμβουλή· ἀλλ' ὁ ἐπίλογος ἔτι οὐδὲ δικανικοῦ παντός, οἷον ἐὰν μικρὸς ὁ λόγος ἢ τὸ πρᾶγμα εὐμνημόνευτον· συμβαίνει γὰρ τοῦ μήκους ἀφαιρεῖσθαι. ἀναγκαῖα ἄρα μόρια πρόθεσις καὶ πίστις. ἴδια μὲν οὖν ταῦτα, τὰ δὲ πλεῖστα προοίμιον πρόθεσις πίστις ἐπίλογος· τὰ γὰρ πρὸς τὸν ἀντίδικον τῶν πίστεων ἐστὶ, καὶ ἡ ἀντιπαραβολὴ αὐξήσις τῶν αὐτοῦ, ὥστε μέρος τι τῶν πίστεων (ἀποδείκνυσι γὰρ τι ὁ ποιῶν τοῦτο), ἀλλ' οὐ τὸ προοίμιον, οὐδ' ὁ ἐπίλογος, ἀλλ' ἀναμιμνήσκει. ἔσται οὖν, ἂν τις τὰ τοιαῦτα διαιρῇ, ὅπερ ἐποίουν οἱ περὶ Θεόδωρον, διήγησις ἕτερον καὶ [ἡ] ἐπιδιήγησις καὶ προδιήγησις, καὶ ἔλεγχος καὶ ἐπεξέλεγχος. δεῖ δὲ εἰδὸς τι λέγοντα καὶ διαφορᾷ ὄνομα τίθεσθαι· εἰ δὲ μή, γίνεται κενὸν καὶ ληρῶδες, οἷον Λικύμνιος ποιεῖ ἐν τῇ τέχνῃ, ἐπούρωσιν ὀνομάζων καὶ ἀποπλάνησιν καὶ ὄζους.

Τὸ μὲν οὖν προοίμιόν ἐστιν ἀρχὴ λόγου, ὅπερ ἐν ποιήσει πρόλογος καὶ ἐν αὐλήσει προαύλιον· πάντα γὰρ ἀρχαί ταῦτ' εἰσί, καὶ οἷον ὁδοποιήσις τῷ ἐπιόντι. τὸ μὲν οὖν προαύλιον ὅμοιον τῷ τῶν ἐπιδεικτικῶν προοιμίῳ· καὶ γὰρ οἱ αὐληταί, ὃ τι ἂν εὖ ἔχωσιν αὐλῆσαι, τοῦτο προαυλήσαντες συνῆψαν τῷ ἐνδοσίμῳ, καὶ ἐν τοῖς ἐπιδεικτικοῖς λόγοις δεῖ οὕτως γράφειν, ὃ τι [γὰρ] ἂν βούληται εὐθὺ εἰπόντα ἐνδοῦναι καὶ συνάσαι, ὅπερ πάντες ποιοῦσιν. παράδειγμα τὸ

τῆς Ἰσοκράτους Ἑλένης προοίμιον· οὐθὲν γὰρ κοινὸν ὑπάρχει τοῖς ἐριστικοῖς καὶ Ἑλένη. ἅμα δὲ καὶ ἐὰν ἐκτοπίσῃ, ἀρμόττει, καὶ μὴ ὅλον τὸν λόγον ὁμοειδῆ εἶναι. λέγεται δὲ τὰ τῶν ἐπιδεικτικῶν προοίμια ἐξ ἐπαίνου ἢ ψόγου (οἶον Γοργίας μὲν ἐν τῷ Ὀλυμπικῷ λόγῳ “ὑπὸ πολλῶν ἄξιοι θαυμάζεσθαι, ὧ ἄνδρες Ἕλληνες”. ἐπαινεῖ γὰρ τοὺς τὰς πανηγύρεις συνάγοντας· Ἰσοκράτης δὲ ψέγει ὅτι τὰς μὲν τῶν σωμάτων ἀρετὰς δωρεαῖς ἐτίμησαν, τοῖς δ’ εὖ φρονοῦσιν οὐθὲν ἄθλον ἐποίησαν), καὶ ἀπὸ συμβουλῆς (οἶον ὅτι δεῖ τοὺς ἀγαθοὺς τιμᾶν, διὸ καὶ αὐτὸς Ἀριστείδην ἐπαινεῖ, ἢ τοὺς τοιούτους οἱ μήτε εὐδοκιμοῦσιν μήτε φαῦλοι, ἀλλ’ ὅσοι ἀγαθοὶ ὄντες ἄδηλοι, ὥσπερ Ἀλέξανδρος ὁ Πριάμου· οὗτος γὰρ συμβουλεύει). ἔτι δ’ ἐκ τῶν [1415a] δικανικῶν προοιμίων· τοῦτο δ’ ἐστὶν ἐκ τῶν πρὸς τὸν ἀκροατὴν, εἰ περὶ παραδόξου λόγος ἢ περὶ χαλεποῦ ἢ περὶ τεθρυλημένου πολλοῖς, ὥστε συγγνώμην ἔχειν, οἶον Χοιρίλος νῦν δ’ ὅτε πάντα δέδασται.

τὰ μὲν οὖν τῶν ἐπιδεικτικῶν λόγων προοίμια ἐκ τούτων, ἐξ ἐπαίνου, ἐκ ψόγου, ἐκ προτροπῆς, ἐξ ἀποτροπῆς, ἐκ τῶν πρὸς τὸν ἀκροατὴν· δεῖ δὲ ἢ ξένα ἢ οἰκεῖα εἶναι τὰ ἐνδόσιμα τῷ λόγῳ. τὰ δὲ τοῦ δικανικοῦ προοίμια δεῖ λαβεῖν ὅτι ταὐτὸ δύναται ὅπερ τῶν δραμάτων οἱ πρόλογοι καὶ τῶν ἐπῶν τὰ προοίμια· τὰ μὲν γὰρ τῶν διθυράμβων ὅμοια τοῖς ἐπιδεικτικοῖς· “διὰ σέ καὶ τεὰ δῶρα εἶτε σκύλα”. ἐν δὲ προλόγοις καὶ ἔπεσι δεῖγμά ἐστιν τοῦ λόγου, ἵνα προειδῶσι περὶ οὗ [ἧ] ὁ λόγος καὶ μὴ κρέμῃται ἢ διάνοια· τὸ γὰρ ἀόριστον πλανᾷ· ὁ δοὺς οὖν ὥσπερ εἰς τὴν χεῖρα τὴν ἀρχὴν ποιεῖ ἐχόμενον ἀκολουθεῖν τῷ λόγῳ. διὰ τοῦτο

“μῆνιν ἄειδε, θεά”. “ἄνδρα μοι ἔννεπε, μοῦσα.”

“ἦγεό μοι λόγον ἄλλον, ὅπως Ἀσίας ἀπὸ γαίης ἦλθεν ἐς Εὐρώπην πόλεμος μέγας.”

καὶ οἱ τραγικοὶ δηλοῦσι περὶ <οὔ> τὸ δράμα, κἂν μὴ εὐθὺς ὥσπερ Εὐριπίδης ἐν τῷ προλόγῳ, ἀλλὰ πού γε, ὥσπερ [καὶ] Σοφοκλῆς

“ἐμοὶ πατὴρ ἦν Πόλυβος”. καὶ ἡ κωμῳδία ὡσαύτως. τὸ μὲν οὖν ἀναγκαϊότατον ἔργον τοῦ προοιμίου καὶ ἴδιον τοῦτο, δηλῶσαι τί ἐστὶν τὸ τέλος οὗ ἕνεκα ὁ λόγος (διόπερ ἂν δῆλον ἦ καὶ μικρὸν τὸ πρᾶγμα, οὐ χρηστέον προοιμίῳ)· τὰ δὲ ἄλλα εἶδη οἷς χρῶνται, ἰατρεύματα καὶ κοινά. λέγεται δὲ ταῦτα ἔκ τε τοῦ λέγοντος καὶ τοῦ ἀκροατοῦ καὶ τοῦ πράγματος καὶ τοῦ ἐναντίου περὶ αὐτοῦ μὲν καὶ

τοῦ ἀντιδίκου οἷά περ διαβολὴν λῦσαι καὶ ποιῆσαι (ἔστιν δὲ οὐχ ὁμοίως· ἀπολογουμένῳ μὲν γὰρ πρῶτον τὰ πρὸς διαβολήν, κατηγοροῦντι δ' ἐν τῷ ἐπιλόγῳ· δι' ὃ δέ, οὐκ ἄδηλον· τὸν μὲν γὰρ ἀπολογούμενον, ὅταν μέλλῃ εἰσάξειν αὐτόν, ἀναγκαῖον ἀνελεῖν τὰ κωλύοντα, ὥστε λυτέον πρῶτον τὴν διαβολήν· τῷ δὲ διαβάλλοντι ἐν τῷ ἐπιλόγῳ διαβλητέον, ἵνα μνημονεύσωσι μᾶλλον). τὰ δὲ πρὸς τὸν ἀκροατὴν ἔκ τε τοῦ εὖνουν ποιῆσαι καὶ ἐκ τοῦ ὀργίσει, καὶ ἐνίετε τὸ προσεκτικὸν ἢ τοῦναντίον· οὐ γὰρ ἀεὶ συμφέρει ποιεῖν προσεκτικόν, διὸ πολλοὶ εἰς γέλωτα πειρῶνται προάγειν. εἰς δὲ εὐμάθειαν ἅπαντα ἀνάξει, ἂν τις βούληται, καὶ τὸ ἐπιεικὴ φαίνεσθαι· προσέχουσι γὰρ [1415b] μᾶλλον τούτοις. προσεκτικοὶ δὲ τοῖς μεγάλοις, τοῖς ἰδίῳις, τοῖς θαυμαστοῖς, τοῖς ἡδέσιν· διὸ δεῖ ἐμποιεῖν ὡς περὶ τοιούτων ὁ λόγος· ἂν δὲ μὴ προσεκτικούς, ὅτι μικρόν, ὅτι οὐδὲν πρὸς ἐκείνους, ὅτι λυπηρόν. δεῖ δὲ μὴ λανθάνειν ὅτι πάντα ἔξω τοῦ λόγου τὰ τοιαῦτα· πρὸς φαῦλον γὰρ ἀκροατὴν καὶ τὰ ἔξω τοῦ πράγματος ἀκούοντα· ἐπεὶ ἂν μὴ τοιοῦτος ᾖ, οὐθὲν δεῖ προοιμίῳ, ἀλλ' ἢ ὅσον τὸ πρᾶγμα εἰπεῖν κεφαλαιωδῶς, ἵνα ἔχῃ ὥσπερ σῶμα κεφαλὴν. ἔτι τὸ προσεκτικούς ποιεῖν πάντων τῶν μερῶν κοινόν, ἂν δέῃ· πανταχοῦ γὰρ ἀνιᾶσι μᾶλλον ἢ ἀρχόμενοι· διὸ γελοῖον ἐν ἀρχῇ τάττειν, ὅτε μάλιστα πάντες προσέχοντες ἀκροῶνται· ὥστε ὅπου ἂν ᾖ καὶρός, λεκτέον “καὶ μοι προσέχετε τὸν νοῦν· οὐθὲν γὰρ μᾶλλον ἐμὸν ἢ ὑμέτερον”, καὶ “ἔρῳ γὰρ ὑμῖν οἷον οὐδεπώποτε ἀκηκόατε δεινὸν ἢ οὕτω θαυμαστόν”. τοῦτο δ' ἐστίν, ὥσπερ ἔφη Πρόδικος, ὅτε νυστάζουσιν οἱ ἀκροαταί, παρεμβάλλειν <τι> τῆς πεντηκονταδράχμου αὐτοῖς. ὅτι δὲ πρὸς τὸν ἀκροατὴν οὐχ ἥπερ [ὁ] ἀκροατής, δηλόν· πάντες γὰρ ἢ διαβάλλουσιν ἢ φόβους ἀπολύονται ἐν τοῖς προοιμίῳις·

ἄναξ, ἐρῶ μὲν οὐχ ὅπως σπουδῆς ὑπο,

τί φοριμιάζῃ;

καὶ οἱ πονηρόν τὸ πρᾶγμα ἔχοντες ἢ δοκοῦντες· πανταχοῦ γὰρ βέλτιον διατρίβειν ἢ ἐν τῷ πράγματι, διὸ οἱ δοῦλοι οὐ τὰ ἐρωτώμενα λέγουσιν ἀλλὰ τὰ κύκλῳ, καὶ φοριμιάζονται. πόθεν δ' εὖνους δεῖ ποιεῖν, εἴρηται, καὶ τῶν ἄλλων ἕκαστον τῶν τοιούτων. ἐπεὶ δ' εὖ λέγεται

δός μ' ἐς Φαίηκας φίλον ἐλθεῖν ἢ δ' ἐλεεινόν,

τούτων δεῖ δύο στοχάζεσθαι. ἐν δὲ τοῖς ἐπιδεικτικοῖς οἶεσθαι δεῖ ποιεῖν συνεπαινεῖσθαι τὸν ἀκροατὴν, ἢ αὐτὸν ἢ γένος ἢ ἐπιτηδεύματ' αὐτοῦ ἢ ἄλλως γέ πως· ὁ γὰρ λέγει Σωκράτης ἐν τῷ

ἐπιταφίῳ, ἀληθές, ὅτι οὐ χαλεπὸν Ἀθηναίους ἐν Ἀθηναίοις ἐπαινεῖν, ἀλλ' ἐν Λακεδαιμονίοις.

τὰ δὲ τοῦ δημηγορικοῦ ἐκ τῶν τοῦ δικανικοῦ λόγου ἐστίν, φύσει δὲ ἥκιστα ἔχει· καὶ γὰρ καὶ περὶ οὗ ἴσασιν, καὶ οὐδὲν δεῖται τὸ πρᾶγμα προσιμίῳ, ἀλλ' ἡ δι' αὐτὸν ἢ τοὺς ἀντιλέγοντας, ἢ ἐὰν μὴ ἡλίκον βούλει ὑπολαμβάνωσιν, ἀλλ' ἡ μεῖζον ἢ ἔλαττον, διὸ ἡ διαβάλλειν ἢ ἀπολύεσθαι ἀνάγκη, καὶ ἡ αὐξῆσαι ἢ μειῶσαι. τούτων δὲ ἕνεκα προσιμίου δεῖται, ἢ κόσμου χάριν, ὡς αὐτοκάβδαλα [1416a] φαίνεται ἐὰν μὴ ἔχη. τοιοῦτον γὰρ τὸ Γοργίου ἐγκώμιον εἰς Ἥλείους· οὐδὲν γὰρ προεξαγκωνίσας οὐδὲ προανακινήσας εὐθὺς ἄρχεται “Ἥλις, πόλις εὐδαίμων”.

Περὶ δὲ διαβολῆς ἐν μὲν τὸ ἐξ ὧν ἂν τις ὑπόληψιν δυσχερῇ ἀπολύσαιο (οὐθὲν γὰρ διαφέρει εἴτε εἰπόντος τινὸς εἴτε μὴ, ὥστε τοῦτο καθόλου)· ἄλλος τόπος ὥστε πρὸς τὰ ἀμφισβητούμενα ἀπαντᾶν, ἢ ὡς οὐκ ἔστιν, ἢ ὡς οὐ βλαβερὸν ἢ οὐ τούτῳ, ἢ ὡς οὐ τηλικούτον, ἢ οὐκ ἄδικον ἢ οὐ μέγα, ἢ οὐκ αἰσχρὸν ἢ οὐκ ἔχον μέγεθος· περὶ γὰρ τοιούτων ἡ ἀμφισβήτησις, ὥσπερ Ἰφικράτης πρὸς Ναυσικράτην· ἔφη γὰρ ποιῆσαι ὁ ἔλεγεν καὶ βλάψαι, ἀλλ' οὐκ ἀδικεῖν. ἢ ἀντικαταλλάττεσθαι ἀδικοῦντα, εἰ βλαβερὸν, ἀλλ' οὖν καλόν, εἰ λυπηρόν, ἀλλ' ὠφέλιμον, ἢ τι ἄλλο τοιοῦτον. ἄλλος τόπος ὡς ἐστὶν ἀμάρτημα ἢ ἀτύχημα ἢ ἀναγκαῖον, οἷον Σοφοκλῆς ἔφη τρέμειν οὐχ ὡς ὁ διαβάλλων ἔφη, ἵνα δοκῇ γέρων, ἀλλ' ἐξ ἀνάγκης· οὐ γὰρ ἐκόντι εἶναι αὐτῷ ἔτη ὀγδοήκοντα. καὶ ἀντικαταλλάττεσθαι τὸ οὗ ἕνεκα, ὅτι οὐ βλάψαι ἐβούλετο ἀλλὰ τόδε, καὶ οὐ τοῦτο ὁ διεβάλλετο ποιῆσαι, συνέβη δὲ βλαβῆναι· “δίκαιον δὲ μισεῖν, εἰ ὅπως τοῦτο γένηται ἐποιοῦν.” ἄλλος, εἰ ἐμπεριεῖληπται ὁ διαβάλλων, ἢ νῦν ἢ πρότερον, ἢ αὐτὸς ἢ τῶν ἐγγύς τις. ἄλλος, εἰ ἄλλοι ἐμπεριλαμβάνονται οὓς ὁμολογοῦσιν μὴ ἐνόχους εἶναι τῇ διαβολῇ, οἷον εἰ, ὅτι καθάριος, ὁ <δεῖνα> μοιχός, καὶ ὁ δεῖνα ἄρα. ἄλλος, εἰ ἄλλους διέβαλεν ἢ ἄλλος <ἦ> αὐτός, ἢ ἄνευ διαβολῆς ὑπελαμβάνοντο ὥσπερ αὐτὸς νῦν, οἱ πεφῆνασιν οὐκ ἔνοχοι. ἄλλος ἐκ τοῦ ἀντιδιαβάλλειν τὸν διαβάλλοντα· ἄτοπον γὰρ εἰ ὃς αὐτὸς ἄπιστος, οἱ τούτου λόγοι ἔσονται πιστοί. ἄλλος, εἰ γέγονεν κρίσις, ὥσπερ Εὐριπίδης πρὸς Ὑγιαίνοντα ἐν τῇ ἀντιδόσει κατηγοροῦντα ὡς ἀσεβῆς, ὃς γ' ἐποίησε κελεύων ἐπιорκεῖν,

ἢ γλῶσσε' ὁμώμοχ', ἢ δὲ φρὴν ἀνώμοτος.

ἔφη γὰρ αὐτὸν ἀδικεῖν τὰς ἐκ τοῦ Διονυσιακοῦ ἀγῶνος κρίσεις

εἰς τὰ δικαστήρια ἄγοντα· ἐκεῖ γὰρ αὐτῶν δεδωκέναι λόγον, ἢ δώσειν εἰ βούλεται κατηγορεῖν. ἄλλος ἐκ τοῦ διαβολῆς κατηγορεῖν, ἡλίκον, καὶ τοῦτο, ὅτι ἄλλας κρίσεις ποιεῖ, καὶ ὅτι οὐ πιστεύει τῷ πράγματι.

κοινὸς [1416b] δ' ἄμφοιν [ὁ] τόπος τὸ σύμβολα λέγειν, οἷον ἐν τῷ Τεύκρῳ ὁ Ὀδυσσεὺς ὅτι οἰκεῖος τῷ Πριάμῳ· ἡ γὰρ Ἥσιόνῃ ἀδελφή· ὁ δὲ ὅτι ὁ πατὴρ ἐχθρὸς τῷ Πριάμῳ, ὁ Τελαμών, καὶ ὅτι οὐ κατεῖπε τῶν κατασκόπων.

ἄλλος τῷ διαβάλλοντι, τὸ ἐπαινοῦντα μικρὸν μακρῶς ψέξαι μέγα συντόμως, ἢ πολλὰ ἀγαθὰ προθέντα, ὃ εἰς τὸ πρᾶγμα προφέρει ἐν ψέξαι. τοιοῦτοι δὲ οἱ τεχνικώτατοι καὶ ἀδικώτατοι· τοῖς ἀγαθοῖς γὰρ βλάπτειν πειρῶνται, μιγνύντες αὐτὰ τῷ κακῷ.

κοινὸν δὲ τῷ διαβάλλοντι καὶ τῷ ἀπολυομένῳ, ἐπειδὴ τὸ αὐτὸ ἐνδέχεται πλειόνων ἔνεκαπραχθῆναι, τῷ μὲν διαβάλλοντι κακοηθιστέον ἐπὶ τὸ χεῖρον ἐκλαμβάνοντι, τῷ δὲ ἀπολυομένῳ ἐπὶ τὸ βέλτιον, οἷον ὅτι ὁ Διομήδης τὸν Ὀδυσσεά προεῖλετο, τῷ μὲν ὅτι διὰ τὸ ἄριστον ὑπολαμβάνειν τὸν Ὀδυσσεά, τῷ δ' ὅτι οὐ, ἀλλὰ διὰ τὸ μόνον μὴ ἀνταγωνιστεῖν ὥς φαῦλον.

Καὶ περὶ μὲν διαβολῆς εἰρήσθω τοσαῦτα, διήγησις δ' ἐν μὲν τοῖς ἐπιδεικτικοῖς ἐστὶν οὐκ ἐφεξῆς ἀλλὰ κατὰ μέρος· δεῖ μὲν γὰρ τὰς πράξεις διελθεῖν ἐξ ὧν ὁ λόγος· σύγκειται γὰρ ἔχων ὁ λόγος τὸ μὲν ἄτεχνον (οὐθὲν γὰρ αἴτιος ὁ λέγων τῶν πράξεων), τὸ δ' ἐκ τῆς τέχνης· τοῦτο δ' ἐστὶν ἢ ὅτι ἔστι δεῖξαι, ἐὰν ἢ ἄπιστον, ἢ ὅτι ποιόν, ἢ ὅτι ποσόν, ἢ καὶ ἅπαντα. διὰ δὲ τοῦτ' ἐνίοτε οὐκ ἐφεξῆς δεῖ διηγεῖσθαι πάντα, ὅτι δυσμνημόνευτον τὸ δεικνύναι οὕτως· ἐκ μὲν οὖν τούτων ἀνδρεῖος, ἐκ δὲ τῶνδε σοφὸς ἢ δίκαιος. καὶ ἀπλούστερος ὁ λόγος οὗτος, ἐκεῖνος δὲ ποικίλος καὶ οὐ λιτός. δεῖ δὲ τὰς μὲν γνωρίμους ἀναμνησκειν· διὸ οἱ πολλοὶ οὐδὲν δέονται διηγῆσεως, οἷον εἰ θέλεις Ἀχιλλέα ἐπαινεῖν (ἴσασι γὰρ πάντες τὰς πράξεις), ἀλλὰ χρησθαι αὐταῖς δεῖ. ἐὰν δὲ Κριτίαν, δεῖ· οὐ γὰρ πολλοὶ ἴσασιν νῦν δὲ γελοίως τὴν διήγησιν φασὶ δεῖν εἶναι ταχεῖαν. καίτοι ὥσπερ [ὁ] τῷ μάττοντι ἐρομένῳ πότερον σκληρὰν ἢ μαλακὴν μάξῃ “τί δ’”, ἔφη <τις>, “εὖ ἀδύνατον;”, καὶ ἐνταῦθα ὁμοίως· δεῖ γὰρ μὴ μακρῶς διηγεῖσθαι ὥσπερ οὐδὲ προοιμιάζεσθαι μακρῶς, οὐδὲ τὰς πίστει λέγειν. οὐδὲ γὰρ ἐνταῦθά ἐστὶ τὸ εὖ [ἢ] τὸ ταχὺ ἢ τὸ συντόμως, ἀλλὰ τὸ μετρίως· τοῦτο δ' ἐστὶ τὸ λέγειν ὅσα δηλώσει τὸ πρᾶγμα, [1417a] ἢ ὅσα ποιήσει ὑπολαβεῖν γεγονέναι ἢ βεβλαφέναι ἢ ἡδικηκέναι, ἢ

τηλικαῦτα ἡλίκα βούλει, τῷ δὲ ἐναντίῳ τὰ ἐναντία· παραδιηγείσθαι δὲ ὅσα εἰς τὴν σὴν ἀρετὴν φέρει (οἷον “ἐγὼ δ’ ἐνουθέτουν, ἀεὶ τὰ δίκαια λέγων, μὴ τὰ τέκνα ἐγκαταλείπειν”), ἢ θατέρου κακίαν· “ὁ δὲ ἀπεκρίνατό μοι ὅτι, οὗ ἂν ἦ αὐτός, ἔσται ἄλλα παιδιά”, ὁ τοὺς ἀφισταμένους Αἰγυπτίους ἀποκρίνασθαί φησιν ὁ Ἡρόδοτος· ἢ ὅσα ἡδέα τοῖς δικασταῖς, ἀπολογουμένῳ δὲ ἐλάττων ἢ διήγησις· αἱ γὰρ ἀμφισβητήσεις ἢ μὴ γεγονέναι ἢ μὴ βλαβερὸν εἶναι ἢ μὴ ἄδικον ἢ μὴ τηλικούτον, ὥστε περὶ τὸ ὁμολογούμενον οὐ διατριπτέον, ἐὰν μὴ τι εἰς ἐκεῖνο συντείνη, οἷον εἰ πέπρακται, ἀλλ’ οὐκ ἄδικον. ἔτι πεπραγμένα δεῖ λέγειν ὅσα μὴ πραττόμενα ἢ οἶκτον ἢ δαίνωσιν φέρει· παράδειγμα ὁ Ἀλκίνοῦ ἀπόλογος, ὃς πρὸς τὴν Πηνελόπην ἐν ἐξήκοντα ἔπεσιν πεποιήται, καὶ ὡς Φάϋλλος τὸν κύκλον, καὶ ὁ ἐν τῷ Οἶνεϊ πρόλογος· ἠθικὴν δὲ χρὴ τὴν διήγησιν εἶναι· ἔσται δὲ τοῦτο, ἂν εἰδῶμεν τί ἦθος ποιεῖ. ἐν μὲν δὴ τὸ προαίρεσιν δηλοῦν, ποιὸν δὲ τὸ ἦθος τῷ ποιᾶν ταύτην, ἢ δὲ προαίρεσις ποῖα τῷ τέλει· διὰ τοῦτο <δ’> οὐκ ἔχουσιν οἱ μαθηματικοὶ λόγοι ἦθη, ὅτι οὐδὲ προαίρεσιν (τὸ γὰρ οὗ ἔνεκα οὐκ ἔχουσιν), ἀλλ’ οἱ Σωκρατικοί· περὶ τοιούτων γὰρ λέγουσιν. ἄλλα δ’ ἠθικὰ τὰ ἐπόμενα ἐκάστω ἦθει, οἷον ὅτι ἅμα λέγων ἐβάδιζεν· δηλοῖ γὰρ θρασύτητα καὶ ἀγροικίαν ἦθους· καὶ μὴ ὡς ἀπὸ διανοίας λέγειν, ὥσπερ οἱ νῦν, ἀλλ’ ὡς ἀπὸ προαιρέσεως· “ἐγὼ δὲ ἐβουλόμην· καὶ προειλόμην γὰρ τοῦτο· ἀλλ’ εἰ μὴ ὦνήμην, βέλτιον”· τὸ μὲν γὰρ φρονίμου τὸ δὲ ἀγαθοῦ· φρονίμου μὲν γὰρ ἐν τῷ τὸ ὠφέλιμον διώκειν, ἀγαθοῦ δ’ ἐν τῷ τὸ καλόν· ἂν δ’ ἄπιστον ἦ, τότε τὴν αἰτίαν ἐπιλέγειν, ὥσπερ Σοφοκλῆς ποιεῖ· παράδειγμα τὸ ἐκ τῆς Ἀντιγόνης, ὅτι μᾶλλον τοῦ ἀδελφοῦ ἐκήδετο ἢ ἀνδρὸς ἢ τέκνων· τὰ μὲν γὰρ ἂν γενέσθαι ἀπολομένων,

μητρὸς δ’ ἐν Αἰδοῦ καὶ πατρὸς βεβηκότων

οὐκ ἔστ’ ἀδελφὸς ὅς τις ἂν βλάστοι ποτέ.

ἐὰν δὲ μὴ ἔχῃς αἰτίαν, ἀλλ’ ὅτι οὐκ ἄγνοεῖς ἄπιστα λέγων, ἀλλὰ φύσει τοιοῦτος εἶ· ἀπιστοῦσι γὰρ ἄλλο τι πράττειν ἐκόντα πλὴν τὸ συμφέρον· ἔτι ἐκ τῶν παθητικῶν λέγε διηγούμενος καὶ τὰ ἐπόμενα [καὶ] ἃ ἴσασι, καὶ τὰ ἴδια ἢ σεαυτῷ ἢ ἐκείνῳ προσόντα· “ὁ δ’ ὄχρετό με ὑποβλέψας”.

[1417b] καὶ ὡς περὶ Κρατύλου Αἰσχίνης, ὅτι διασίζων, τοῖν χειροῖν διασειῶν· πιθανὰ γάρ, διότι σύμβολα γίνονται ταῦτα ἃ ἴσασιν ἐκείνων ὧν οὐκ ἴσασιν. πλεῖστα δὲ τοιαῦτα λαβεῖν ἐξ Ὁμήρου ἔστιν·

ὧς ἄρ’ ἔφη, γρήυς δὲ κατέσχετο χερσὶ πρόσωπα·

οἱ γὰρ δακρύειν ἀρχόμενοι ἐπιλαμβάνονται τῶν ὀφθαλμῶν. καὶ εὐθὺς εἵσαγε καὶ σεαυτὸν ποιόν τινα, ἵνα ὡς τοιοῦτον θεωρῶσιν, καὶ τὸν ἀντίδικον· λανθάνων δὲ ποίει. ὅτι δὲ ῥάδιον, ὅρα ἐκ τῶν ἀπαγγελλόντων· περὶ ὧν γὰρ μὴθὲν ἴσμεν, ὅμως λαμβάνομεν ὑπόληψιν τινά. πολλαχοῦ δὲ δεῖ διηγεῖσθαι, καὶ ἐνίστε οὐκ ἐν ἀρχῇ.

ἐν δὲ δημηγορίᾳ ἥκιστα διήγησις ἔστιν, ὅτι περὶ τῶν μελλόντων οὐθεὶς διηγεῖται· ἀλλ' ἐάν περ διήγησις ᾗ, τῶν γενομένων ἔστω, ἵνα ἀναμνησθέντες ἐκείνων βέλτιον βουλευσῶνται περὶ τῶν ὕστερον, ἢ διαβάλλοντος ἢ ἐπαινοῦντος· ἀλλὰ τότε οὐτὸ τοῦ συμβούλου ποιεῖ ἔργον. ἂν δ' ἢ ἄπιστον, ὑπισχνεῖσθαι δεῖ καὶ αἰτίαν λέγειν εὐθὺς καὶ διατάττειν ὡς βούλονται, οἷον ἡ Ἰοκάστη ἡ Καρκίνου ἐν τῷ Οἰδίποδι ἀεὶ ὑπισχνεῖται πυνθανομένου τοῦ ζητοῦντος τὸν υἱόν, καὶ ὁ Αἴμων ὁ Σοφοκλέους.

Τὰς δὲ πίστει δεῖ ἀποδεικτικὰς εἶναι· ἀποδεικνύναι δὲ χρή, ἐπεὶ περ τεττάρων ἡ ἀμφισβήτησις, περὶ τοῦ ἀμφισβητουμένου φέροντα τὴν ἀπόδειξιν, οἷον, εἰ ὅτι οὐ γέγονεν ἀμφισβητεῖται, ἐν τῇ κρίσει δεῖ τούτου μάλιστα τὴν ἀπόδειξιν φέρειν, εἰ δ' ὅτι οὐκ ἔβλαψεν, τούτου, καὶ ὅτι οὐ τοσόνδε ἢ ὅτι δικαίως, ὡσαύτως καὶ εἰ περὶ τοῦ γενέσθαι τοῦτο ἡ ἀμφισβήτησις. μὴ λανθανέτω δ' ὅτι ἀναγκαῖον ἐν ταύτῃ τῇ ἀμφισβήτησει μόνῃ τὸν ἕτερον εἶναι πονηρόν· οὐ γὰρ ἔστιν ἄγνοια αἰτία, ὥσπερ ἂν εἴ τινες περὶ τοῦ δικαίου ἀμφισβητοῖεν, ὥστ' ἐν τούτῳ χρονιστέον, ἐν δὲ τοῖς ἄλλοις οὐ. ἐν δὲ τοῖς ἐπιδεικτικοῖς τὸ πολὺ ὅτι καλὰ καὶ ὠφέλιμα ἡ αὐξησις ἔστω· τὰ γὰρ πράγματα δεῖ πιστεῦεσθαι· ὀλιγάκις γὰρ καὶ τούτων ἀποδείξεις φέρουσιν, ἐὰν ἄπιστα ᾗ ἢ ἐὰν ἄλλος αἰτίαν ἔχῃ. ἐν δὲ τοῖς δημηγορικοῖς ἢ ὡς οὐκ ἔσται ἀμφισβητήσκειν ἂν τις, ἢ ὡς ἔσται μὲν <ποιοῦσιν> ἃ κελεύει, ἀλλ' οὐ δίκαια ἢ οὐκ ὠφέλιμα ἢ οὐ τηλικαῦτα. δεῖ δὲ καὶ ὁρᾶν εἴ τι ψεύδεται ἐκτὸς τοῦ πράγματος· τεκμήρια γὰρ ταῦτα φαίνεται [1418a] καὶ τῶν ἄλλων ὅτι ψεύδεται. ἔστιν δὲ τὰ μὲν παραδείγματα δημηγορικώτερα, τὰ δ' ἐνθυμήματα δικανικώτερα· ἢ μὲν γὰρ περὶ τὸ μέλλον, ὥστ' ἐκ τῶν γενομένων ἀνάγκη παραδείγματα λέγειν, ἢ δὲ περὶ ὄντων ἢ μὴ ὄντων, οὗ μᾶλλον ἀπόδειξις ἔστι καὶ ἀνάγκη· ἔχει γὰρ τὸ γεγονὸς ἀνάγκην. οὐ δεῖ δὲ ἐφεξῆς λέγειν τὰ ἐνθυμήματα, ἀλλ' ἀναμιγνύναι· εἰ δὲ μή, καταβλάπτει ἄλληλα. ἔστιν γὰρ καὶ τοῦ ποσοῦ ὅρος.

ὦ φίλ', ἐπεὶ τόσα εἶπες ὅς' ἂν πεπνυμένος ἀνὴρ,
ἀλλ' οὐ τοιαῦτα. καὶ μὴ περὶ πάντων ἐνθυμήματα ζητεῖ· εἰ δὲ μή,

ποιήσεις ὅπερ ἔνιοι ποιοῦσι τῶν φιλοσοφούντων, οἱ συλλογίζονται τὰ γνωριμώτερα καὶ πιστότερα ἢ ἐξ ὧν λέγουσιν. καὶ ὅταν πάθος ποιῇς, μὴ λέγε ἐνθύμημα (ἢ γὰρ ἐκκρούσει τὸ πάθος ἢ μάτην εἰρημένον ἔσται τὸ ἐνθύμημα· ἐκκρούουσι γὰρ αἱ κινήσεις ἀλλήλας αἱ ἅμα, καὶ ἡ ἀφανίζουσιν ἡ ἀσθενεῖς ποιοῦσιν), οὐδ’ ὅταν ἠθικὸν τὸν λόγον, οὐ δεῖ ἐνθύμημά τι ζητεῖν ἅμα· οὐ γὰρ ἔχει οὔτε ἦθος οὔτε προαίρεσιν ἢ ἀπόδειξις. γνώμαις δὲ χρηστέον καὶ ἐν διηγῇ καὶ ἐν πίστει· ἠθικὸν γὰρ “καὶ ἐγὼ δέδωκα, καὶ ταῦτ’ εἰδὼς ὥς οὐ δεῖ πιστεῦειν”· ἐὰν δὲ παθητικῶς, “καὶ οὐ μεταμέλει μοι καίπερ ἡδικομένην· τούτῳ μὲν γὰρ περίεστιν τὸ κέρδος, ἐμοὶ δὲ τὸ δίκαιον.”

τὸ δὲ δημηγορεῖν χαλεπώτερον τοῦ δικάζεσθαι, εἰκότως, διότι περὶ τὸ μέλλον, ἐκεῖ δὲ περὶ τὸ γεγονός, ὃ ἐπιστητὸν ἤδη καὶ τοῖς μάντεσιν, ὥς ἔφη Ἐπιμενίδης ὁ Κρής (ἐκεῖνος γὰρ περὶ τῶν ἐσομένων οὐκ ἐμαντεύετο, ἀλλὰ περὶ τῶν γεγονότων μὲν ἀδήλων δέ), καὶ ὁ νόμος ὑπόθεσις ἐν τοῖς δικανικοῖς· ἔχοντα δὲ ἀρχὴν ῥαὸν εὔρεῖν ἀπόδειξιν. καὶ οὐκ ἔχει πολλὰς διατριβάς, οἷον πρὸς ἀντίδικον ἢ περὶ αὐτοῦ, ἢ παθητικὸν ποιεῖν, ἀλλ’ ἥκιστα πάντων, ἐὰν μὴ ἐξιστῇ. δεῖ οὖν ἀποροῦντα τοῦτο ποιεῖν ὅπερ οἱ Ἀθήνησι ῥήτορες ποιοῦσι καὶ Ἰσοκράτης· καὶ γὰρ συμβουλευὼν κατηγορεῖ, οἷον Λακεδαιμονίων μὲν ἐν τῷ πανηγυρικῷ, Χάρητος δ’ ἐν τῷ συμμαχικῷ. ἐν δὲ τοῖς ἐπιδεικτικοῖς δεῖ τὸν λόγον ἐπεισοδιοῦν ἐπαίνοις, οἷον Ἰσοκράτης ποιεῖ· ἀεὶ γὰρ τινα εἰσάγει. καὶ ὃ ἔλεγεν Γοργίας, ὅτι οὐχ ὑπολείπει αὐτὸν ὁ λόγος, ταῦτό ἐστιν· εἰ γὰρ Ἀχιλλέα λέγει Πηλέα ἐπαινεῖ, εἴτα Αἰακόν, εἴτα τὸν θεόν, ὁμοίως δὲ καὶ ἀνδρείαν, ἢ τὰ καὶ τὰ ποιεῖ ἢ τοιόνδε ἐστίν.

ἔχοντα μὲν οὖν ἀποδείξεις καὶ ἠθικῶς λεκτέον καὶ ἀποδεικτικῶς, ἐὰν δὲ μὴ ἔχῃς ἐνθυμήματα, ἠθικῶς· καὶ μᾶλλον τῷ ἐπεικεῖ ἀρμόττει χρηστὸν φαίνεσθαι [1418b] ἢ τὸν λόγον ἀκριβῆ. τῶν δὲ ἐνθυμημάτων τὰ ἐλεγκτικὰ μᾶλλον εὐδοκιμεῖ τῶν δεικτικῶν, ὅτι ὅσα ἔλεγχον ποιεῖ, μᾶλλον δῆλον ὅτι συλλελόγισται· παρ’ ἀλλήλα γὰρ μᾶλλον τὰναντία γνωρίζεται.

τὰ δὲ πρὸς τὸν ἀντίδικον οὐχ ἕτερόν τι εἶδος, ἀλλὰ τῶν πίστεων ἐστὶ <τὸ> τὰ μὲν λῦσαι ἐνστάσει τὰ δὲ συλλογισμῷ. δεῖ δὲ καὶ ἐν συμβουλῇ καὶ ἐν δίκῃ ἀρχόμενον μὲν λέγειν τὰς ἑαυτοῦ πίστεις πρότερον, ὕστερον δὲ πρὸς τὰναντία ἀπαντᾶν λύοντα καὶ προδιασύροντα. ἂν δὲ πολύχους ἢ ἡ ἐναντίωσις, πρότερον τὰ ἐναντία, οἷον ἐποίησε Καλλίστρατος ἐν τῇ Μεσσηνιακῇ ἐκκλησίᾳ· ἃ

γὰρ ἐροῦσι προανελὼν οὕτως τότε αὐτὸς εἶπεν. ὕστερον δὲ λέγοντα πρῶτον πρὸς τὸν ἐναντίον λόγον λεκτέον, λύοντα καὶ ἀντισυλλογιζόμενον, καὶ μάλιστα ἂν εὐδοκιμηκότα ἦ· ὥσπερ γὰρ ἄνθρωπον προδιαβεβλημένον οὐ δέχεται ἡ ψυχὴ, τὸν αὐτὸν τρόπον οὐδὲ λόγον, ἐὰν ὁ ἐναντίος εὖ δοκῇ εἰρηκέναι. δεῖ οὖν χώραν ποιεῖν ἐν τῷ ἀκροατῇ τῷ μέλλοντι λόγῳ· ἔσται δὲ ἂν ἀνέλης· διὸ ἡ πρὸς πάντα ἡ τὰ μέγιστα ἡ τὰ εὐδοκιμοῦντα ἡ τὰ εὐέλεγκτα μαχεσάμενον οὕτω τὰ αὐτοῦ πιστὰ ποιητέον.

ταῖς θεαῖσι πρῶτα σύμμαχος γενήσομαι·

ἐγὼ γὰρ Ἥραν·

ἐν τούτοις ἦψατο πρῶτον τοῦ εὐηθεστάτου.

περὶ μὲν οὖν πίστεων ταῦτα. εἰς δὲ τὸ ἦθος, ἐπειδὴ ἔνια περὶ αὐτοῦ λέγειν ἡ ἐπίφθονον ἡ μακρολογίαν ἡ ἀντιλογίαν ἔχει, καὶ περὶ ἄλλου ἡ λοιδορίαν ἡ ἀγροικίαν, ἕτερον χρή λέγοντα ποιεῖν, ὅπερ Ἰσοκράτης ποιεῖ ἐν τῷ Φιλίππῳ καὶ ἐν τῇ Ἀντιδόσει, καὶ ὡς Ἀρχιλόχος ψέγει· ποιεῖ γὰρ τὸν πατέρα λέγοντα περὶ τῆς θυγατρὸς ἐν τῷ ἰάμβῳ

χρημάτων δ' ἄελπτον οὐθέν ἐστιν οὐδ' ἀπώμοτον,

καὶ τὸν Χάρωνα τὸν τέκτονα ἐν τῷ ἰάμβῳ οὗ ἀρχῇ

οὐ μοι τὰ Γύγεω,

καὶ ὡς Σοφοκλῆς τὸν Αἴμονα ὑπὲρ τῆς Ἀντιγόνης πρὸς τὸν πατέρα ὡς λεγόντων ἐτέρων.

δεῖ δὲ καὶ μεταβάλλειν τὰ ἐνθυμήματα καὶ γνώμας ποιεῖν ἐνίοτε, οἷον “χρὴ δὲ τὰς διαλλαγὰς ποιεῖν τοὺς νοῦν ἔχοντας εὐτυχοῦντας· οὕτω γὰρ ἂν μέγιστα πλεονεκτοῖεν,” ἐνθυμηματικῶς δὲ “εἰ γὰρ δεῖ, ὅταν ὠφελιμώταται ὥσιν καὶ πλεονεκτικώταται αἱ καταλλαγαί, τότε καταλλάττεσθαι, εὐτυχοῦντας δεῖ καταλλάττεσθαι.”

Περὶ δὲ ἐρωτήσεως, εὐκαιρόν ἐστι ποιεῖσθαι μάλιστα [1419a] μὲν ὅταν τὸ ἕτερον εἰρηκῶς ἦ, ὥστε ἐνὸς προσερωτηθέντος συμβαίνει τὸ ἄτοπον, οἷον Περικλῆς Λάμπωνα ἐπήρετο περὶ τῆς τελετῆς τῶν τῆς σωτείας ἱερῶν, εἰπόντος δὲ ὅτι οὐχ οἷόν τε ἀτέλεστον ἀκούειν, ἤρετο εἰ οἶδεν αὐτός, φάσκοντος δὲ “καὶ πῶς, ἀτέλεστος ὢν;” δεύτερον δὲ ὅταν τὸ μὲν φανερόν ἦ, τὸ δὲ ἐρωτήσαντι δῆλον ἦ ὅτι δώσει· πυθόμενον μὲν γὰρ δεῖ τὴν μίαν πρότασιν μὴ προσερωτᾶν τὸ φανερόν ἀλλὰ τὸ συμπέρασμα εἰπεῖν, οἷον Σωκράτης, Μελήτου οὐ φάσκοντος αὐτὸν θεοὺς νομίζειν,

εἰρηκότος δὲ ὡς δαιμόνιον τι λέγοι, ἤρετο εἰ οὐχ οἱ δαίμονες ἦτοι θεῶν παῖδες εἶεν ἢ θεῖόν τι, φήσαντος δὲ “ἔστιν οὖν”, ἔφη, “ὅστις θεῶν μὲν παῖδας οἶεται εἶναι, θεοὺς δὲ οὐ;” ἔτι ὅταν μέλλῃ ἢ ἐναντία λέγοντα δεῖξιν ἢ παράδοξον. τέταρτον δὲ ὅταν μὴ ἐνῇ ἄλλ’ ἢ σοφιστικῶς ἀποκρινάμενον λῦσαι· ἐὰν γὰρ οὕτως ἀποκρίνηται, ὅτι ἔστι μὲν ἔστι δ’ οὐ, ἢ τὰ μὲν τὰ δ’ οὐ, ἢ πῇ μὲν πῇ δ’ οὐ, θορυβοῦσιν ὡς ἀποροῦντος. ἄλλως δὲ μὴ ἐγγείρει. ἐὰν γὰρ ἐνστῇ, κεκρατῆσθαι δόξεις· οὐ γὰρ οἷόν τε πολλὰ ἐρωτᾶν, διὰ τὴν ἀσθένειαν τοῦ ἀκροατοῦ· διὸ καὶ τὰ ἐνθυμήματα ὅτι μάλιστα συστρέφειν δεῖ.

ἀποκρίνασθαι δὲ δεῖ πρὸς μὲν τὰ ἀμφίβολα διαιροῦντα λόγῳ καὶ μὴ συντόμῳ, πρὸς δὲ τὰ δοκοῦντα ἐναντία τὴν λύσιν φέροντα εὐθὺς τῇ ἀποκρίσει, πρὶν ἐπερωτῆσαι τὸ ἐπιὸν ἢ συλλογίσασθαι· οὐ γὰρ χαλεπὸν προορᾶν ἐν τίνι ὁ λόγος. φανερόν δ’ ἡμῖν ἔστιν ἐκ τῶν Τοπικῶν καὶ τοῦτο καὶ αἱ λύσεις. καὶ συμπεραινομένου, ἐὰν ἐρώτημα ποιῇ τὸ συμπέρασμα, τὴν αἰτίαν εἰπεῖν, οἷον Σοφοκλῆς, ἐρωτώμενος ὑπὸ Πεισάνδρου εἰ ἔδοξεν αὐτῷ, ὥσπερ καὶ τοῖς ἄλλοις προβούλοις, καταστήσαι τοὺς τετρακοσίους, ἔφη “τί δέ; οὐ πονηρά σοι ταῦτα ἐδόκει εἶναι;” ἔφη. “οὐκοῦν σὺ ταῦτα ἔπραξας τὰ πονηρά;” “ναὶ”, ἔφη, “οὐ γὰρ ἦν ἄλλα βελτίω”. καὶ ὡς ὁ Λάκων εὐθυνόμενος τῆς ἐφορίας, ἐρωτώμενος εἰ δοκοῦσιν αὐτῷ δικαίως ἀπολωλέναι ἄτεροι, ἔφη. ὁ δὲ “οὐκοῦν σὺ τούτοις ταῦτα ἔθου;” καὶ ὃς ἔφη. “οὐκοῦν δικαίως ἄν”, ἔφη, “καὶ σὺ ἀπόλοιο;” “οὐ δῆτα”, ἔφη, “οἱ μὲν γὰρ χρήματα λαβόντες ταῦτα ἔπραξαν, ἐγὼ δὲ οὐ, ἀλλὰ γνώμη.” διὸ [1419b] οὔτε ἐπερωτᾶν δεῖ μετὰ τὸ συμπέρασμα, οὔτε τὸ συμπέρασμα ἐπερωτᾶν, ἐὰν μὴ τὸ πολὺ περιῇ τοῦ ἀληθοῦς.

περὶ δὲ τῶν γελοίων, ἐπειδὴ τινα δοκεῖ χρῆσιν ἔχειν ἐν τοῖς ἀγῶσι, καὶ δεῖν ἔφη Γοργίας τὴν μὲν σπουδὴν διαφθεῖρειν τῶν ἐναντίων γέλῳτι τὸν δὲ γέλῳτα σπουδῇ, ὀρθῶς λέγων, εἴρηται πόσα εἶδη γελοίων ἔστιν ἐν τοῖς περὶ ποιητικῆς, ὧν τὸ μὲν ἀρμόττει ἐλευθέρῳ τὸ δ’ οὐ, ὅπως τὸ ἀρμόττον αὐτῷ λήψεται. ἔστι δ’ ἢ εἰρωνεία τῆς βωμολοχίας ἐλευθεριώτερον· ὁ μὲν γὰρ αὐτοῦ ἕνεκα ποιεῖ τὸ γελοῖον, ὁ δὲ βωμολόχος ἐτέρου.

Ὁ δ’ ἐπίλογος σύγκειται ἐκ τεττάρων, ἕκ τε τοῦ πρὸς ἑαυτὸν κατασκευάσαι εὐ τὸν ἀκροατὴν καὶ τὸν ἐναντίον φαύλως, καὶ ἐκ τοῦ αὐξῆσαι καὶ ταπεινῶσαι, καὶ ἐκ τοῦ εἰς τὰ πάθη τὸν ἀκροατὴν καταστήσαι, καὶ ἐξ ἀναμνήσεως. πέφυκε γὰρ, μετὰ τὸ ἀποδεῖξαι αὐτὸν μὲν ἀληθῆ τὸν δὲ ἐναντίον ψευδῆ, οὕτω τὸ ἐπαινεῖν καὶ ψέγειν

καὶ ἐπιχαλκεύειν. δυοῖν δὲ θατέρου δεῖ στοχάζεσθαι, ἢ ὅτι τούτοις ἀγαθὸς ἢ ὅτι ἀπλῶς, ὁ δ' ὅτι κακὸς τούτοις ἢ ὅτι ἀπλῶς. ἐξ ὧν δὲ δεῖ τοῦτο κατασκευάζειν [δεῖ], εἴρηνται οἱ τόποι πόθεν σπουδαίους δεῖ κατασκευάζειν καὶ φαύλους. τὸ δὲ μετὰ τοῦτο, δεδειγμένων ἤδη, αὖξιν ἐστὶν κατὰ φύσιν ἢ ταπεινοῦν· δεῖ γὰρ τὰ πεπραγμένα ὁμολογεῖσθαι, εἰ μέλλει τὸ ποσὸν ἐρεῖν· καὶ γὰρ ἡ τῶν σωμάτων αὖξησις ἐκ προϋπαρχόντων ἐστίν. ὅθεν δὲ δεῖ αὖξιν καὶ ταπεινοῦν ἔκκεινται οἱ τόποι πρότερον. μετὰ δὲ ταῦτα, δήλων ὄντων καὶ οἷα καὶ ἡλίκα, εἰς τὰ πάθη ἄγειν τὸν ἀκροατὴν. ταῦτα δ' ἐστὶν ἔλεος καὶ δεινῶσις καὶ ὀργή καὶ μίσος καὶ φθόνος καὶ ζῆλος καὶ ἔρις. εἴρηνται δὲ καὶ τούτων οἱ τόποι πρότερον, ὥστε λοιπὸν ἀναμνησáι τὰ προειρημένα. τοῦτο δὲ ἀρμόττει ποιεῖν οὐχ ὥσπερ φασὶν ἐν τοῖς προοιμίοις, οὐκ ὀρθῶς λέγοντες. ἵνα γὰρ εὐμαθὴς ἦ, κελεύουσι πολλάκις εἰπεῖν. ἐκεῖ μὲν οὖν δεῖ τὸ πρᾶγμα εἰπεῖν, ἵνα μὴ λανθάνῃ περὶ οὗ ἡ κρίσις, ἐνταῦθα δὲ δι' ὧν δέδεικται, κεφαλαιωδῶς. ἀρχὴ δὲ διότι ἂν ὑπέσχετο ἀποδέδωκεν, ὥστε ἂν τε καὶ δι' ὃ λεκτέον. λέγεται δὲ ἐξ ἀντιπαραβολῆς τοῦ ἐναντίου. παραβάλλειν δὲ [ἦ] ὅσα περὶ τὸ αὐτὸ ἄμφω εἶπον, ἢ [μὴ] καταντικρὺ (“ἀλλ' οὗτος [1420a] μὲν τάδε περὶ τούτου, ἐγὼ δὲ ταδί, καὶ διὰ ταῦτα”), ἢ ἐξ εἰρωνείας (οἷον “οὗτος γὰρ τάδ' εἶπεν, ἐγὼ δὲ ταδί”, καὶ “τί ἂν ἐποίει, εἰ τάδε ἔδειξεν, ἀλλὰ μὴ ταδί”), ἢ ἐξ ἐρωτήσεως (“τί οὖν δέδεικται;” ἢ “οὗτος τί ἔδειξεν;”). ἢ δὴ οὕτως [ἦ] ἐκ παραβολῆς ἢ κατὰ φύσιν ὡς ἐλέχθη, οὕτως τὰ αὐτοῦ, καὶ πάλιν, ἐὰν βούλῃ, χωρὶς τὰ τοῦ ἐναντίου λόγου. τελευτὴ δὲ τῆς λέξεως ἀρμόττει ἢ ἀσύνδετος, ὅπως ἐπίλογος ἀλλὰ μὴ λόγος ἦ· “εἴρηκα, ἀκηκόατε, ἔχετε, κρίνατε”.

Περὶ Ποιητικῆς (1447a) Poetics

[1447a] Περὶ ποιητικῆς αὐτῆς τε καὶ τῶν εἰδῶν αὐτῆς, ἦν τινα δύνανται ἕκαστον ἔχει, καὶ πῶς δεῖ συνίστασθαι τοὺς μύθους εἰ μέλλει καλῶς ἔξεναι ἢ ποιήσας, ἔτι δὲ ἐκ πόσων καὶ ποίων ἐστὶ μορίων, ὁμοίως δὲ καὶ περὶ τῶν ἄλλων ὅσα τῆς αὐτῆς ἐστὶ μεθόδου, λέγωμεν ἀρξάμενοι κατὰ φύσιν πρῶτον ἀπὸ τῶν πρώτων. ἐποποιία δὴ καὶ ἡ τῆς τραγωδίας ποίησις ἔτι δὲ κωμωδία καὶ ἡ διθυραμβοποιητικὴ καὶ τῆς αὐλητικῆς ἡ πλείστη καὶ κιθαριστικῆς πᾶσαι τυγχάνουσιν οὖσαι μιμήσεις τὸ σύνολον· διαφέρουσι δὲ ἀλλήλων τρισίν, ἥ γὰρ τῷ ἐν ἑτέροις μιμεῖσθαι ἢ τῷ ἕτερα ἢ τῷ ἑτέρως καὶ μὴ τὸν αὐτὸν τρόπον. ὥσπερ γὰρ καὶ χρώμασι καὶ σχήμασι πολλὰ μιμοῦνται τινες ἀπεικάζοντες (οἱ μὲν διὰ τέχνης οἱ δὲ διὰ συνηθείας), ἕτεροι δὲ διὰ τῆς φωνῆς, οὕτω κὰν ταῖς εἰρημέναις τέχναις ἅπασαι μὲν ποιοῦνται τὴν μίμησιν ἐν ῥυθμῷ καὶ λόγῳ καὶ ἁρμονίᾳ, τούτοις δ' ἢ χωρὶς ἢ μεμιγμένοις· οἷον ἁρμονία μὲν καὶ ῥυθμῷ χρώμεναι μόνον ἢ τε αὐλητικὴ καὶ ἡ κιθαριστικὴ κὰν εἴ τινες ἕτεραι τυγχάνωσιν οὖσαι τοιαῦται τὴν δύνανται, οἷον ἡ τῶν συρίγγων, αὐτῷ δὲ τῷ ῥυθμῷ [μιμοῦνται] χωρὶς ἁρμονίας ἢ τῶν ὀρχηστῶν (καὶ γὰρ οὗτοι διὰ τῶν σχηματιζομένων ῥυθμῶν μιμοῦνται καὶ ἦθη καὶ πάθη καὶ πράξεις)· ἢ δὲ [ἐποποιία] μόνον τοῖς λόγοις ψιλοῖς «καὶ» ἢ τοῖς μέτροις καὶ τούτοις εἴτε [1447b] μιγνῦσα μετ' ἀλλήλων εἴθ' ἐνὶ τινὶ γένει χρωμένη τῶν μέτρων ἀνώνυμοι τυγχάνουσι μέχρι τοῦ νῦν· οὐδὲν γὰρ ἂν ἔχοιμεν ὀνομάσαι κοινὸν τοὺς Σώφρονος καὶ Ξενάρχου μίμους καὶ τοὺς Σωκρατικοὺς λόγους οὐδὲ εἴ τις διὰ τριμέτρων ἢ ἐλεγείων ἢ τῶν ἄλλων τινῶν τῶν τοιούτων ποιοῖτο τὴν μίμησιν. πλὴν οἱ ἄνθρωποι γε συνάπτοντες τῷ μέτρῳ τὸ ποιεῖν ἐλεγειοποιοῦς τοὺς δὲ ἐποποιοῦς ὀνομάζουσιν, οὐχ ὥς κατὰ τὴν μίμησιν ποιητὰς ἀλλὰ κοινῇ κατὰ τὸ μέτρον προσαγορεύοντες· καὶ γὰρ ἂν ἱατρικὸν ἢ φυσικὸν τι διὰ τῶν μέτρων ἐκφέρωσιν, οὕτω καλεῖν εἰώθασιν· οὐδὲν δὲ κοινόν ἐστιν Ὀμήρῳ καὶ Ἐμπεδοκλεῖ πλὴν τὸ μέτρον, διὸ τὸν μὲν ποιητὴν δίκαιον καλεῖν, τὸν δὲ φυσιολόγον μᾶλλον ἢ ποιητὴν·

ὁμοίως δὲ κἂν εἴ τις ἅπαντα τὰ μέτρα μιγνύων ποιοῖτο τὴν μίμησιν καθάπερ Χαιρήμων ἐποίησε Κένταυρον μικτὴν ῥαψωδίαν ἐξ ἀπάντων τῶν μέτρων, καὶ ποιητὴν προσαγορευτέον. περὶ μὲν οὖν τούτων διωρίσθω τοῦτον τὸν τρόπον. εἰσὶ δὲ τινες αἱ πᾶσι χρῶνται τοῖς εἰρημένους, λέγω δὲ οἶον ῥυθμῷ καὶ μέλει καὶ μέτρῳ, ὥσπερ ἢ τε τῶν διθυραμβικῶν ποιήσεις καὶ ἢ τῶν νόμων καὶ ἢ τε τραγωδία καὶ ἢ κωμωδία· διαφέρουσι δὲ ὅτι αἱ μὲν ἅμα πᾶσιν αἱ δὲ κατὰ μέρος. ταύτας μὲν οὖν λέγω τὰς διαφορὰς τῶν τεχνῶν ἐν οἷς ποιοῦνται τὴν μίμησιν.

[1448a] Ἐπεὶ δὲ μιμοῦνται οἱ μιμούμενοι πράττοντας, ἀνάγκη δὲ τούτους ἢ σπουδαίους ἢ φαύλους εἶναι (τὰ γὰρ ἦθη σχεδὸν αἰεὶ τούτοις ἀκολουθεῖ μόνοις, κακία γὰρ καὶ ἀρετὴ τὰ ἦθη διαφέρουσι πάντες), ἦτοι βελτίονας ἢ καθ' ἡμᾶς ἢ χείρονας ἢ καὶ τοιούτους, ὥσπερ οἱ γραφεῖς· Πολύγνωτος μὲν γὰρ κρείττους, Παύσων δὲ χείρους, Διονύσιος δὲ ὁμοίους εἵκαζεν. δῆλον δὲ ὅτι καὶ τῶν λεχθεῖσων ἐκάστη μιμήσεων ἔξει ταύτας τὰς διαφορὰς καὶ ἔσται ἑτέρα τῷ ἑτέρα μιμεῖσθαι τοῦτον τὸν τρόπον. καὶ γὰρ ἐν ὀρχήσει καὶ αὐλήσει καὶ κιθαρίσει ἔστι γενέσθαι ταύτας τὰς ἀνομοιότητας, καὶ [τὸ] περὶ τοὺς λόγους δὲ καὶ τὴν ψιλομετρίαν, οἶον Ὅμηρος μὲν βελτίους, Κλεοφῶν δὲ ὁμοίους, Ἡγήμων δὲ ὁ Θάσιος <ὁ> τὰς παρῳδίας ποιήσας πρῶτος καὶ Νικοχάρης ὁ τὴν Δειλιάδα χείρους· ὁμοίως δὲ καὶ περὶ τοὺς διθυράμβους καὶ περὶ τοὺς νόμους, ὥσπερ γὰς†Κύκλωπας Τιμόθεος καὶ Φιλόξενος μιμήσαιο ἂν τις. ἐν αὐτῇ δὲ τῇ διαφορᾷ καὶ ἡ τραγωδία πρὸς τὴν κωμωδίαν διέστηκεν· ἡ μὲν γὰρ χείρους ἢ δὲ βελτίους μιμεῖσθαι βούλεται τῶν νῦν.

Ἔτι δὲ τούτων τρίτη διαφορὰ τὸ ὥς ἕκαστα τούτων μιμήσαιο ἂν τις. καὶ γὰρ ἐν τοῖς αὐτοῖς καὶ τὰ αὐτὰ μιμεῖσθαι ἔστιν ὅτε μὲν ἀπαγγέλλοντα, ἢ ἑτερόν τι γιγνόμενον ὥσπερ Ὅμηρος ποιεῖ ἢ ὥς τὸν αὐτὸν καὶ μὴ μεταβάλλοντα, ἢ πάντας ὥς πράττοντας καὶ ἐνεργοῦντας τοὺς μιμουμένους. ἐν τρισὶ δὴ ταύταις διαφοραῖς ἡ μίμησίς ἐστιν, ὥς εἵπομεν κατ' ἀρχάς, ἐν οἷς τε <καὶ ἃ> καὶ ὥς. ὥστε τῇ μὲν ὁ αὐτὸς ἂν εἴη μιμητὴς Ὀμήρῳ Σοφοκλῆς, μιμοῦνται γὰρ ἄμφω σπουδαίους, τῇ δὲ Ἀριστοφάνει, πράττοντας γὰρ μιμοῦνται καὶ δρῶντας ἄμφω. ὅθεν καὶ δράματα καλεῖσθαι τινες αὐτὰ φασιν, ὅτι μιμοῦνται δρῶντας. διὸ καὶ ἀντιποιοῦνται τῆς τε τραγωδίας καὶ τῆς κωμωδίας οἱ Δωριεῖς (τῆς μὲν γὰρ κωμωδίας οἱ Μεγαρεῖς οἱ τε ἐνταῦθα ὥς ἐπὶ τῆς παρ' αὐτοῖς δημοκρατίας γενομένης καὶ οἱ ἐκ

Σικελίας, ἐκεῖθεν γὰρ ἦν Ἐπίχαρμος ὁ ποιητὴς πολλῶ πρότερος ὢν Χιονίδου καὶ Μάγνητος· καὶ τῆς τραγωδίας ἔνιοι τῶν ἐν Πελοποννήσῳ) ποιούμενοι τὰ ὀνόματα σημεῖον· αὐτοὶ μὲν γὰρ κώμας τὰς περιοικίδας καλεῖν φασιν, Ἀθηναίους δὲ δῆμους, ὡς κωμωδοὺς οὐκ ἀπὸ τοῦ κωμάζειν λεχθέντας ἀλλὰ τῇ κατὰ κώμας πλάνῃ ἀτιμαζομένους ἐκ τοῦ ἄστεως· [1448b] καὶ τὸ ποιεῖν αὐτοὶ μὲν δρᾶν, Ἀθηναίους δὲ πράττειν προσαγορεύειν. περὶ μὲν οὖν τῶν διαφορῶν καὶ πόσαι καὶ τίνες τῆς μιμήσεως εἰρήσθω ταῦτα.

Ἐοίκασι δὲ γεννῆσαι μὲν ὅλως τὴν ποιητικὴν αἰτίαι δύο τινές καὶ αὗται φυσικαί. τό τε γὰρ μιμεῖσθαι σύμφυτον τοῖς ἀνθρώποις ἐκ παίδων ἐστὶ καὶ τούτῳ διαφέρουσι τῶν ἄλλων ζώων ὅτι μιμητικώτατόν ἐστι καὶ τὰς μαθήσεις ποιεῖται διὰ μιμήσεως τὰς πρώτας, καὶ τὸ χαίρειν τοῖς μιμήμασι πάντας. σημεῖον δὲ τούτου τὸ συμβαίνειν ἐπὶ τῶν ἔργων· ἃ γὰρ αὐτὰ λυπηρῶς ὀρῶμεν, τούτων τὰς εἰκόνας τὰς μάλιστα ἠκριβωμένας χαίρομεν θεωροῦντες, οἷον θηρίων τε μορφὰς τῶν ἀτιμοτάτων καὶ νεκρῶν. αἴτιον δὲ καὶ τούτου, ὅτι μανθάνειν οὐ μόνον τοῖς φιλοσόφοις ἡδιστον ἀλλὰ καὶ τοῖς ἄλλοις ὁμοίως, ἀλλ' ἐπὶ βραχὺ κοινωνοῦσιν αὐτοῦ. διὰ γὰρ τοῦτο χαίρουσι τὰς εἰκόνας ὀρῶντες, ὅτι συμβαίνει θεωροῦντας μανθάνειν καὶ συλλογίζεσθαι τί ἕκαστον, οἷον ὅτι οὗτος ἐκεῖνος· ἐπεὶ ἐὰν μὴ τύχῃ προεωρακώς, οὐχ ἧ μίμημα ποιήσει τὴν ἡδονὴν ἀλλὰ διὰ τὴν ἀπεργασίαν ἢ τὴν χροιάν ἢ διὰ τοιαύτην τινὰ ἄλλην αἰτίαν. κατὰ φύσιν δὲ ὄντος ἡμῖν τοῦ μιμεῖσθαι καὶ τῆς ἁρμονίας καὶ τοῦ ῥυθμοῦ (τὰ γὰρ μέτρα ὅτι μόρια τῶν ῥυθμῶν ἐστὶ φανερόν) ἐξ ἀρχῆς οἱ πεφυκότες πρὸς αὐτὰ μάλιστα κατὰ μικρὸν προάγοντες ἐγέννησαν τὴν ποίησιν ἐκ τῶν αὐτοσχεδιασμάτων. διεσπᾶσθη δὲ κατὰ τὰ οἰκεῖα ἦθη ἢ ποίησις· οἱ μὲν γὰρ σεμνότεροι τὰς καλὰς ἐμιμοῦντο πράξεις καὶ τὰς τῶν τοιούτων, οἱ δὲ εὐτελέστεροι τὰς τῶν φαύλων, πρῶτον ψόγους ποιοῦντες, ὥσπερ ἕτεροι ὕμνους καὶ ἐγκώμια. τῶν μὲν οὖν πρὸ Ὀμήρου οὐδενὸς ἔχομεν εἰπεῖν τοιοῦτον ποίημα, εἰκὸς δὲ εἶναι πολλούς, ἀπὸ δὲ Ὀμήρου ἀρξαμένοις ἔστιν, οἷον ἐκείνου ὁ Μαργίτης καὶ τὰ τοιαῦτα. ἐν οἷς κατὰ τὸ ἀρμόττον καὶ τὸ ἱαμβεῖον ἦλθε μέτρον - διὸ καὶ ἱαμβεῖον καλεῖται νῦν, ὅτι ἐν τῷ μέτρῳ τούτῳ ἱάμβιζον ἀλλήλους. καὶ ἐγένοντο τῶν παλαιῶν οἱ μὲν ἥρωικῶν οἱ δὲ ἱάμβων ποιηταί. ὥσπερ δὲ καὶ τὰ σπουδαῖα μάλιστα ποιητὴς Ὅμηρος ἦν (μόνος γὰρ οὐχ ὅτι εὖ ἀλλὰ καὶ μιμήσεις δραματικὰς ἐποίησεν), οὕτως καὶ τὸ τῆς κωμωδίας σχῆμα πρῶτος ὑπέδειξεν, οὐ ψόγον ἀλλὰ

τὸ γελοῖον δραματοποιήσας· ὁ γὰρ Μαργίτης ἀνάλογον ἔχει, ὥσπερ Ἰλιάς [1449a] καὶ ἡ Ὀδύσσεια πρὸς τὰς τραγωδίας, οὕτω καὶ οὗτος πρὸς τὰς κωμωδίας. παραφανείσης δὲ τῆς τραγωδίας καὶ κωμωδίας οἱ ἐφ' ἑκατέραν τὴν ποίησιν ὁρμῶντες κατὰ τὴν οἰκείαν φύσιν οἱ μὲν ἀντὶ τῶν ἰαμβῶν κωμωδοποιοὶ ἐγένοντο, οἱ δὲ ἀντὶ τῶν ἐπῶν τραγωδοδιδάσκαλοι, διὰ τὸ μείζω καὶ ἐντιμότερα τὰ σχήματα εἶναι ταῦτα ἐκείνων. τὸ μὲν οὖν ἐπισκοπεῖν εἰ ἄρα ἔχει ἤδη ἡ τραγωδία τοῖς εἶδεσιν ἱκανῶς ἢ οὐ, αὐτὸ τε καθ' αὐτὸ κρῖναι καὶ πρὸς τὰ θέατρα, ἄλλος λόγος. γενομένη δ' οὖν ἀπ' ἀρχῆς αὐτοσχεδιαστικῆς - καὶ αὕτη καὶ ἡ κωμωδία, καὶ ἡ μὲν ἀπὸ τῶν ἐξαρχόντων τὸν διθύραμβον, ἡ δὲ ἀπὸ τῶν τὰ φαλλικά ἃ ἔτι καὶ νῦν ἐν πολλαῖς τῶν πόλεων διαμένει νομιζόμενα - κατὰ μικρὸν ηὐξήθη προαγόντων ὅσον ἐγίγνετο φανερόν αὐτῆς· καὶ πολλὰς μεταβολὰς μεταβαλοῦσα ἡ τραγωδία ἐπαύσατο, ἐπεὶ ἔσχε τὴν αὐτῆς φύσιν. καὶ τό τε τῶν ὑποκριτῶν πλῆθος ἐξ ἑνὸς εἰς δύο πρῶτος Αἰσχύλος ἤγαγε καὶ τὰ τοῦ χοροῦ ἡλάττωσε καὶ τὸν λόγον πρωταγωνιστεῖν παρεσκεύασεν· τρεῖς δὲ καὶ σκηνογραφίαν Σοφοκλῆς. ἔτι δὲ τὸ μέγεθος· ἐκ μικρῶν μύθων καὶ λέξεως γελοίας διὰ τὸ ἐκ σατυρικοῦ μεταβαλεῖν ὅψε ἀπεσεμνύνθη, τό τε μέτρον ἐκ τετραμέτρου ἰαμβεῖον ἐγένετο. τὸ μὲν γὰρ πρῶτον τετραμέτρῳ ἐχρῶντο διὰ τὸ σατυρικὴν καὶ ὀρχηστικωτέραν εἶναι τὴν ποίησιν, λέξεως δὲ γενομένης αὕτη ἡ φύσις τὸ οἰκεῖον μέτρον εὗρε· μάλιστα γὰρ λεκτικὸν τῶν μέτρων τὸ ἰαμβεῖόν ἐστιν· σημεῖον δὲ τούτου, πλεῖστα γὰρ ἰαμβεῖα λέγομεν ἐν τῇ διαλέκτῳ τῇ πρὸς ἀλλήλους, ἐξάμετρα δὲ ὀλιγάκις καὶ ἐκβαίνοντες τῆς λεκτικῆς ἁρμονίας. ἔτι δὲ ἐπεισοδίων πλήθη. καὶ τὰ ἄλλ' ὥς ἕκαστα κοσμηθῆναι λέγεται ἔστω ἡμῖν εἰρημένα· πολὺ γὰρ ἂν ἴσως ἔργον εἶη διεξιέναι καθ' ἕκαστον.

Ἡ δὲ κωμωδία ἐστὶν ὥσπερ εἵπομεν μίμησις φαυλοτέρων μὲν, οὐ μέντοι κατὰ πᾶσαν κακίαν, ἀλλὰ τοῦ αἰσχροῦ ἐστὶ τὸ γελοῖον μόριον. τὸ γὰρ γελοῖόν ἐστιν ἀμάρτημά τι καὶ αἰσχος ἀνώδυνον καὶ οὐ φθαρτικόν, οἷον εὐθύς τὸ γελοῖον πρόσωπον αἰσχρόν τι καὶ διεστραμμένον ἄνευ ὀδύνης. αἱ μὲν οὖν τῆς τραγωδίας μεταβάσεις καὶ δι' ὧν ἐγένοντο οὐ λελήθασιν, ἡ δὲ κωμωδία διὰ τὸ μὴ [1449b] σπουδάζεσθαι ἐξ ἀρχῆς ἔλαθεν· καὶ γὰρ χορὸν κωμωδῶν ὅψε ποτε ὁ ἄρχων ἔδωκεν, ἀλλ' ἐθέλονται ἦσαν. ἤδη δὲ σχήματά τινα αὐτῆς ἐχούσης οἱ λεγόμενοι αὐτῆς ποιηταὶ μνημονεύονται. τίς δὲ πρόσωπα ἀπέδωκεν ἢ προλόγους ἢ πλήθη ὑποκριτῶν καὶ ὅσα τοιαῦτα,

ἡγνόνται. τὸ δὲ μύθους ποιεῖν [Ἐπίχαρμος καὶ Φόρμις] τὸ μὲν ἐξ ἀρχῆς ἐκ Σικελίας ἦλθε, τῶν δὲ Ἀθήνησιν Κράτης πρῶτος ἤρξεν ἀφέμενος τῆς ἱαμβικῆς ιδέας καθόλου ποιεῖν λόγους καὶ μύθους. ἡ μὲν οὖν ἐποποιία τῇ τραγωδίᾳ μέχρι μὲν τοῦ μετὰ μέτρου λόγῳ μίμησις εἶναι σπουδαίων ἠκολούθησεν· τῷ δὲ τὸ μέτρον ἀπλοῦν ἔχειν καὶ ἀπαγγελίαν εἶναι, ταύτῃ διαφέρουσιν· ἔτι δὲ τῷ μήκει· ἡ μὲν ὅτι μάλιστα πειρᾶται ὑπὸ μίαν περίοδον ἡλίου εἶναι ἢ μικρὸν ἐξαλλάττειν, ἡ δὲ ἐποποιία ἀόριστος τῷ χρόνῳ καὶ τούτῳ διαφέρει, καίτοι τὸ πρῶτον ὁμοίως ἐν ταῖς τραγωδίαις τοῦτο ἐποίουν καὶ ἐν τοῖς ἔπεσιν. μέρη δ' ἐστὶ τὰ μὲν ταῦτά, τὰ δὲ ἴδια τῆς τραγωδίας· διόπερ ὅστις περὶ τραγωδίας οἶδε σπουδαίας καὶ φαύλης, οἶδε καὶ περὶ ἐπῶν· ἃ μὲν γὰρ ἐποποιία ἔχει, ὑπάρχει τῇ τραγωδίᾳ, ἃ δὲ αὐτῇ, οὐ πάντα ἐν τῇ ἐποποιίᾳ.

Περὶ μὲν οὖν τῆς ἐν ἑξαμέτροις μιμητικῆς καὶ περὶ κωμωδίας ὕστερον ἐροῦμεν· περὶ δὲ τραγωδίας λέγωμεν ἀναλαβόντες αὐτῆς ἐκ τῶν εἰρημένων τὸν γινόμενον ὅρον τῆς οὐσίας. ἔστιν οὖν τραγωδία μίμησις πράξεως σπουδαίας καὶ τελείας μέγεθος ἐχούσης, ἡδυσμένῳ λόγῳ χωρὶς ἐκάστῳ τῶν εἰδῶν ἐν τοῖς μορίοις, δρώντων καὶ οὐ δι' ἀπαγγελίας, δι' ἐλέου καὶ φόβου περαίνουσα τὴν τῶν τοιούτων παθημάτων κάθαρσιν. λέγω δὲ ἡδυσμένον μὲν λόγον τὸν ἔχοντα ῥυθμὸν καὶ ἁρμονίαν [καὶ μέλος], τὸ δὲ χωρὶς τοῖς εἶδεσι τὸ διὰ μέτρων ἔνια μόνον περαίνεσθαι καὶ πάλιν ἕτερα διὰ μέλους. ἐπεὶ δὲ πράττοντες ποιοῦνται τὴν μίμησιν, πρῶτον μὲν ἐξ ἀνάγκης ἂν εἴη τι μόριον τραγωδίας ὁ τῆς ὀψεως κόσμος· εἴτα μελοποιία καὶ λέξις, ἐν τούτοις γὰρ ποιοῦνται τὴν μίμησιν. λέγω δὲ λέξιν μὲν αὐτὴν τὴν τῶν μέτρων σύνθεσιν, μελοποιίαν δὲ ὅ τὴν δύναμιν φανεράν ἔχει πᾶσαν. ἐπεὶ δὲ πράξεώς ἐστι μίμησις, πράττεται δὲ ὑπὸ τινῶν πραττόντων, οὓς ἀνάγκη ποιούς τινας εἶναι κατὰ τε τὸ ἦθος καὶ τὴν διάνοιαν (διὰ γὰρ τούτων καὶ τὰς [1450a] πράξεις εἶναί φαμεν ποιὰς τινας [πέφυκεν αἷτια δύο τῶν πράξεων εἶναι, διάνοια καὶ ἦθος] καὶ κατὰ ταύτας καὶ τυγχάνουσι καὶ ἀποτυγχάνουσι πάντες), ἔστιν δὲ τῆς μὲν πράξεως ὁ μῦθος ἢ μίμησις, λέγω γὰρ μῦθον τοῦτον τὴν σύνθεσιν τῶν πραγμάτων, τὰ δὲ ἦθη, καθ' ὃ ποιούς τινας εἶναί φαμεν τοὺς πράττοντας, διάνοιαν δέ, ἐν ὅσοις λέγοντες ἀποδεικνύασιν τι ἢ καὶ ἀποφαίνονται γνώμην - ἀνάγκη οὖν πάσης τῆς τραγωδίας μέρη εἶναι ἔξ, καθ' ὃ ποιὰ τις ἐστὶν ἢ τραγωδία· ταῦτα δ' ἐστὶ μῦθος καὶ ἦθος καὶ λέξις καὶ διάνοια καὶ ὄψις καὶ μελοποιία. οἷς μὲν γὰρ μιμοῦνται, δύο

μέρη ἐστίν, ὥς δὲ μιμοῦνται, ἓν, ἃ δὲ μιμοῦνται, τρία, καὶ παρὰ ταῦτα οὐδέν. τούτοις μὲν οὖν οὐκ ὀλίγοι αὐτῶν ὥς εἰπεῖν κέχρηται τοῖς εἰδεσιν· καὶ γὰρ ὄψις ἔχει πᾶν† καὶ ἦθος καὶ μῦθον καὶ λέξιν καὶ μέλος καὶ διάνοιαν ὡσαύτως. μέγιστον δὲ τούτων ἐστίν ἡ τῶν πραγμάτων σύστασις. ἡ γὰρ τραγωδία μίμησις ἐστίν οὐκ ἀνθρώπων ἀλλὰ πράξεων καὶ βίου [καὶ εὐδαιμονία καὶ κακοδαιμονία ἐν πράξει ἐστίν, καὶ τὸ τέλος πρᾶξις τις ἐστίν, οὐ ποιότης· εἰσὶν δὲ κατὰ μὲν τὰ ἦθη ποιοί τινες, κατὰ δὲ τὰς πράξεις εὐδαίμονες ἢ τούναντίον]· οὐκ οὖν ὅπως τὰ ἦθη μιμήσονται πράττουσιν, ἀλλὰ τὰ ἦθη συμπεριλαμβάνουσιν διὰ τὰς πράξεις· ὥστε τὰ πράγματα καὶ ὁ μῦθος τέλος τῆς τραγωδίας, τὸ δὲ τέλος μέγιστον ἀπάντων. ἔτι ἄνευ μὲν πράξεως οὐκ ἂν γένοιτο τραγωδία, ἄνευ δὲ ἡθῶν γένοιτ' ἂν· αἱ γὰρ τῶν νέων τῶν πλείστων ἀήθεις τραγωδίαι εἰσὶν, καὶ ὅλως ποιηταὶ πολλοὶ τοιοῦτοι, οἷον καὶ τῶν γραφέων Ζεῦξις πρὸς Πολύγνωτον πέπονθεν· ὁ μὲν γὰρ Πολύγνωτος ἀγαθὸς ἠθογράφος, ἡ δὲ Ζεῦξιδος γραφὴ οὐδὲν ἔχει ἦθος. ἔτι ἐάν τις ἐφεξῆς θῇ ῥήσεις ἠθικὰς καὶ λέξει καὶ διανοίᾳ εὖ πεποιημένας, οὐ ποιήσει ὁ ἦν τῆς τραγωδίας ἔργον, ἀλλὰ πολὺ μᾶλλον ἢ καταδεεστέροις τούτοις κεκρημένη τραγωδία, ἔχουσα δὲ μῦθον καὶ σύστασιν πραγμάτων. πρὸς δὲ τούτοις τὰ μέγιστα οἷς ψυχαγωγεῖ ἡ τραγωδία τοῦ μύθου μέρη ἐστίν, αἱ τε περιπέτειαι καὶ ἀναγνωρίσεις. ἔτι σημεῖον ὅτι καὶ οἱ ἐγχειροῦντες ποιεῖν πρότερον δύνανται τῇ λέξει καὶ τοῖς ἡθεσιν ἀκριβοῦν ἢ τὰ πράγματα συνίστασθαι, οἷον καὶ οἱ πρῶτοι ποιηταὶ σχεδὸν ἅπαντες. ἀρχὴ μὲν οὖν καὶ οἷον ψυχὴ ὁ μῦθος τῆς τραγωδίας, δεύτερον δὲ τὰ ἦθη (παραπλήσιον γὰρ ἐστίν καὶ [1450b] ἐπὶ τῆς γραφικῆς· εἰ γὰρ τις ἐναλείψειε τοῖς καλλίστοις φαρμάκοις χύδην, οὐκ ἂν ὁμοίως εὐφράνειεν καὶ λευκογραφήσας εἰκόνα)· ἐστίν τε μίμησις πράξεως καὶ διὰ ταύτην μάλιστα τῶν πραττόντων. τρίτον δὲ ἡ διάνοια· τοῦτο δὲ ἐστίν τὸ λέγειν δύνασθαι τὰ ἐνόντα καὶ τὰ ἀρμόττοντα, ὅπερ ἐπὶ τῶν λόγων τῆς πολιτικῆς καὶ ῥητορικῆς ἔργον ἐστίν· οἱ μὲν γὰρ ἀρχαῖοι πολιτικῶς ἐποιοῦν λέγοντας, οἱ δὲ νῦν ῥητορικῶς. ἐστίν δὲ ἦθος μὲν τὸ τοιοῦτον ὃ δηλοῖ τὴν προαίρεσιν, ὅποια τις [ἐν οἷς οὐκ ἔστι δῆλον ἢ προαιρεῖται ἢ φεύγει] - διόπερ οὐκ ἔχουσιν ἦθος τῶν λόγων ἐν οἷς μὴδ' ὅλως ἐστίν ὃ τι προαιρεῖται ἢ φεύγει ὁ λέγων - διάνοια δὲ ἐν οἷς ἀποδεικνύουσιν τι ὥς ἐστίν ἢ ὥς οὐκ ἐστίν ἢ καθόλου τι ἀποφαίνονται. τέταρτον δὲ τῶν μὲν λόγων† ἡ λέξις· λέγω δέ, ὥσπερ πρότερον εἴρηται, λέξιν εἶναι τὴν διὰ τῆς

ὀνομασίας ἐρμηνείαν, ὃ καὶ ἐπὶ τῶν ἐμμέτρων καὶ ἐπὶ τῶν λόγων ἔχει τὴν αὐτὴν δύναμιν. τῶν δὲ λοιπῶν ἡ μελοποιία μέγιστον τῶν ἡδυσμάτων, ἡ δὲ ὄψις ψυχαγωγικὸν μὲν, ἀτεχνότατον δὲ καὶ ἥκιστα οἰκεῖον τῆς ποιητικῆς· ἡ γὰρ τῆς τραγωδίας δύναμις καὶ ἄνευ ἀγῶνος καὶ ὑποκριτῶν ἔστιν, ἔτι δὲ κυριωτέρα περὶ τὴν ἀπεργασίαν τῶν ὄψεων ἢ τοῦ σκευοποιοῦ τέχνη τῆς τῶν ποιητῶν ἔστιν.

Διωρισμένων δὲ τούτων, λέγωμεν μετὰ ταῦτα ποίαν τινὰ δεῖ τὴν σύστασιν εἶναι τῶν πραγμάτων, ἐπειδὴ τοῦτο καὶ πρῶτον καὶ μέγιστον τῆς τραγωδίας ἔστιν. κεῖται δὴ ἡμῖν τὴν τραγωδίαν τελείας καὶ ὅλης πράξεως εἶναι μίμησιν ἐχούσης τι μέγεθος· ἔστιν γὰρ ὅλον καὶ μηδὲν ἔχον μέγεθος. ὅλον δὲ ἔστιν τὸ ἔχον ἀρχὴν καὶ μέσον καὶ τελευτήν. ἀρχὴ δὲ ἔστιν ὃ αὐτὸ μὲν μὴ ἐξ ἀνάγκης μετ' ἄλλο ἔστιν, μετ' ἐκεῖνο δ' ἕτερον πέφυκεν εἶναι ἢ γίνεσθαι· τελευτὴ δὲ τούναντίον ὃ αὐτὸ μὲν μετ' ἄλλο πέφυκεν εἶναι ἢ ἐξ ἀνάγκης ἢ ὡς ἐπὶ τὸ πολὺ, μετὰ δὲ τοῦτο ἄλλο οὐδέν· μέσον δὲ ὃ καὶ αὐτὸ μετ' ἄλλο καὶ μετ' ἐκεῖνο ἕτερον. δεῖ ἄρα τοὺς συνεστῶτας εὖ μύθους μὴθ' ὀπόθεν ἔτυχεν ἄρχεσθαι μὴθ' ὅπου ἔτυχε τελευτᾶν, ἀλλὰ κεκρῆσθαι ταῖς εἰρημέναις ιδέαις. ἔτι δ' ἐπεὶ τὸ καλὸν καὶ ζῶον καὶ ἅπαν πρᾶγμα ὃ συνέστηκεν ἐκ τινῶν οὐ μόνον ταῦτα τεταγμένα δεῖ ἔχειν ἀλλὰ καὶ μέγεθος ὑπάρχειν μὴ τὸ τυχόν· τὸ γὰρ καλὸν ἐν μεγέθει καὶ τάξει ἔστιν, διὸ οὔτε πάμμικρον ἂν τι γένοιτο καλὸν ζῶον (συγχεῖται γὰρ ἡ θεωρία ἐγγὺς τοῦ ἀναισθήτου χρόνου γινομένη) οὔτε παμμέγεθες (οὐ γὰρ [1451a] ἅμα ἡ θεωρία γίνεται ἀλλ' οἷχεται τοῖς θεωροῦσι τὸ ἐν καὶ τὸ ὅλον ἐκ τῆς θεωρίας) οἷον εἰ μυρίων σταδίων εἴη ζῶον· ὥστε δεῖ καθάπερ ἐπὶ τῶν σωμάτων καὶ ἐπὶ τῶν ζώων ἔχειν μὲν μέγεθος, τοῦτο δὲ εὐσύνοπτον εἶναι, οὕτω καὶ ἐπὶ τῶν μύθων ἔχειν μὲν μῆκος, τοῦτο δὲ εὐμνημόνευτον εἶναι. τοῦ δὲ μήκους ὅρος <ὁ> μὲν πρὸς τοὺς ἀγῶνας καὶ τὴν αἴσθησιν οὐ τῆς τέχνης ἔστιν· εἰ γὰρ ἔδει ἐκατὸν τραγωδίας ἀγωνίζεσθαι, πρὸς κλεψύδρας ἂν ἡγωνίζοντο, ὥσπερ ποτὲ καὶ ἄλλοτε φασιν. ὁ δὲ κατ' αὐτὴν τὴν φύσιν τοῦ πράγματος ὅρος, αἰὲ μὲν ὁ μεῖζων μέχρι τοῦ σύνδηλος εἶναι καλλίων ἔστι κατὰ τὸ μέγεθος· ὡς δὲ ἀπλῶς διορίσαντας εἰπεῖν, ἐν ὅσῳ μεγέθει κατὰ τὸ εἰκὸς ἢ τὸ ἀναγκαῖον ἐφεξῆς γιγνομένων συμβαίνει εἰς εὐτυχίαν ἐκ δυστυχίας ἢ ἐξ εὐτυχίας εἰς δυστυχίαν μεταβάλλειν, ἱκανὸς ὅρος ἔστιν τοῦ μεγέθους.

Μῦθος δ' ἔστιν εἷς οὐχ ὥσπερ τινὲς οἰονται ἐὰν περὶ ἓνα ᾗ· πολλὰ γὰρ καὶ ἅπειρα τῶ ἐνὶ συμβαίνει, ἐξ ὧν ἐνίων οὐδέν ἔστιν ἐν·

οὕτως δὲ καὶ πράξεις ἐνὸς πολλάι εἰσιν, ἐξ ὧν μία οὐδεμία γίνεται πρᾶξις. διὸ πάντες εὐόκασιν ἀμαρτάνειν ὅσοι τῶν ποιητῶν Ἡρακλῆϊδα Θησηΐδα καὶ τὰ τοιαῦτα ποιήματα πεποιήκασιν· οἴονται γάρ, ἐπεὶ εἷς ἦν ὁ Ἡρακλῆς, ἓνα καὶ τὸν μῦθον εἶναι προσήκειν. ὁ δ' Ὅμηρος ὥσπερ καὶ τὰ ἄλλα διαφέρει καὶ τοῦτ' εἰσὶν καλῶς ἰδεῖν, ἥτοι διὰ τέχνην ἢ διὰ φύσιν· Ὀδύσσειαν γὰρ ποιῶν οὐκ ἐποίησεν ἅπαντα ὅσα αὐτῷ συνέβη, οἷον πληγῆναι μὲν ἐν τῷ Παρνασσῷ, μανῆναι δὲ προσποιήσασθαι ἐν τῷ ἀγερμῷ, ὧν οὐδὲν θατέρου γενομένου ἀναγκαῖον ἦν ἢ εἰκὸς θάτερον γενέσθαι, ἀλλὰ περὶ μίαν πρᾶξιν οἷαν λέγομεν τὴν Ὀδύσσειαν συνέστησεν, ὁμοίως δὲ καὶ τὴν Ἰλιάδα. χρὴ οὖν, καθάπερ καὶ ἐν ταῖς ἄλλαις μιμητικαῖς ἢ μία μίμησις ἐνός ἐστιν, οὕτω καὶ τὸν μῦθον, ἐπεὶ πράξεως μίμησις ἐστι, μιᾶς τε εἶναι καὶ ταύτης ὅλης, καὶ τὰ μέρη συνεστάναι τῶν πραγμάτων οὕτως ὥστε μετατιθεμένου τινὸς μέρους ἢ ἀφαιρουμένου διαφέρεσθαι καὶ κινεῖσθαι τὸ ὅλον· ὁ γὰρ προσὸν ἢ μὴ προσὸν μηδὲν ποιεῖ ἐπίδηλον, οὐδὲν μόνιον τοῦ ὅλου ἐστίν.

Φανερόν δὲ ἐκ τῶν εἰρημένων καὶ ὅτι οὐ τὸ τὰ γένομενα λέγειν, τοῦτο ποιητοῦ ἔργον ἐστίν, ἀλλ' οἷα ἂν γένοιτο καὶ τὰ δυνατὰ κατὰ τὸ εἰκὸς ἢ τὸ ἀναγκαῖον. ὁ γὰρ [1451b] ἱστορικὸς καὶ ὁ ποιητὴς οὐ τῷ ἢ ἔμμετρα λέγειν ἢ ἄμμετρα διαφέρουσιν (εἴη γὰρ ἂν τὰ Ἡροδότου εἰς μέτρα τεθῆναι καὶ οὐδὲν ἦττον ἂν εἴη ἱστορία τις μετὰ μέτρου ἢ ἄνευ μέτρων)· ἀλλὰ τούτῳ διαφέρει, τῷ τὸν μὲν τὰ γένομενα λέγειν, τὸν δὲ οἷα ἂν γένοιτο. διὸ καὶ φιλοσοφώτερον καὶ σπουδαιότερον ποίησις ἱστορίας ἐστίν· ἢ μὲν γὰρ ποίησις μᾶλλον τὰ καθόλου, ἢ δ' ἱστορία τὰ καθ' ἕκαστον λέγει. ἔστιν δὲ καθόλου μὲν, τῷ ποίῳ τὰ ποῖα ἅττα συμβαίνει λέγειν ἢ πράττειν κατὰ τὸ εἰκὸς ἢ τὸ ἀναγκαῖον, οὗ στοχάζεται ἢ ποίησις ὀνόματα ἐπιτιθεμένη· τὸ δὲ καθ' ἕκαστον, τί Ἀλκιβιάδης ἔπραξεν ἢ τί ἔπαθεν. ἐπὶ μὲν οὖν τῆς κωμωδίας ἤδη τοῦτο δῆλον γέγονεν· συστήσαντες γὰρ τὸν μῦθον διὰ τῶν εἰκότων οὕτω τὰ τυχόντα ὀνόματα ὑποτιθέασιν, καὶ οὐχ ὥσπερ οἱ ἰαμβοποιοὶ περὶ τὸν καθ' ἕκαστον ποιοῦσιν. ἐπὶ δὲ τῆς τραγωδίας τῶν γενομένων ὀνομάτων ἀντέχονται. αἴτιον δ' ὅτι πιθανόν ἐστι τὸ δυνατόν· τὰ μὲν οὖν μὴ γένομενα οὐπω πιστεύομεν εἶναι δυνατά, τὰ δὲ γένομενα φανερόν ὅτι δυνατά· οὐ γὰρ ἂν ἐγένετο, εἰ ἦν ἀδύνατα. οὐ μὴν ἀλλὰ καὶ ἐν ταῖς τραγωδίαις ἐν ἐνίαις μὲν ἐν ἢ δύο τῶν γνωρίμων ἐστὶν ὀνομάτων, τὰ δὲ ἄλλα πεποιημένα, ἐν ἐνίαις δὲ οὐθέν, οἷον ἐν τῷ Ἀγάθωνος Ἀνθεῖ· ὁμοίως γὰρ ἐν τούτῳ τά τε

πράγματα καὶ τὰ ὀνόματα πεποιήται, καὶ οὐδὲν ἤττον εὐφραίνει. ὥστ' οὐ πάντως εἶναι ζητητέον τῶν παραδεδομένων μύθων, περὶ οὓς αἱ τραγωδίαί εἰσιν, ἀντέχεσθαι. καὶ γὰρ γελοῖον τοῦτο ζητεῖν, ἐπεὶ καὶ τὰ γνώριμα ὀλίγοις γνώριμά ἐστιν, ἀλλ' ὅμως εὐφραίνει πάντας. δῆλον οὖν ἐκ τούτων ὅτι τὸν ποιητὴν μᾶλλον τῶν μύθων εἶναι δεῖ ποιητὴν ἢ τῶν μέτρων, ὅσῳ ποιητὴς κατὰ τὴν μίμησιν ἐστιν, μιμεῖται δὲ τὰς πράξεις. κἂν ἄρα συμβῇ γενόμενα ποιεῖν, οὐθὲν ἤττον ποιητὴς ἐστι· τῶν γὰρ γενομένων ἓνα οὐδὲν κωλύει τοιαῦτα εἶναι οἷα ἂν εἰκὸς γενέσθαι [καὶ δυνατὰ γενέσθαι], καθ' ὃ ἐκεῖνος αὐτῶν ποιητὴς ἐστιν.

τῶν δὲ ἀπλῶν μύθων καὶ πράξεων αἱ ἐπεισοδιώδεις εἰσιν χεῖριςται· λέγω δ' ἐπεισοδιώδη μῦθον ἐν ᾧ τὰ ἐπεισόδια μετ' ἄλληλα οὗτ' εἰκὸς οὗτ' ἀνάγκη εἶναι. τοιαῦται δὲ ποιοῦνται ὑπὸ μὲν τῶν φαύλων ποιητῶν δι' αὐτούς, ὑπὸ δὲ τῶν ἀγαθῶν διὰ τοὺς ὑποκριτάς· ἀγωνίσματα γὰρ ποιοῦντες καὶ παρὰ τὴν δύναμιν παρατείνοντες τὸν μῦθον πολλάκις διαστρέφειν ἀναγκάζονται τὸ ἐφεξῆς. ἐπεὶ δὲ οὐ μόνον τελείας ἐστὶ πράξεως ἢ μίμησις ἀλλὰ καὶ φοβερῶν καὶ ἐλεεινῶν, ταῦτα δὲ γίνεται καὶ μάλιστα [καὶ μᾶλλον] ὅταν γένηται παρὰ τὴν δόξαν δι' ἄλληλα· τὸ γὰρ θαυμαστὸν οὕτως ἔξει μᾶλλον ἢ εἰ ἀπὸ τοῦ αὐτομάτου καὶ τῆς τύχης, ἐπεὶ καὶ τῶν ἀπὸ τύχης ταῦτα θαυμασιώτατα δοκεῖ ὅσα ὥσπερ ἐπίτηδες φαίνεται γεγενῆσθαι, οἷον ὡς ὁ ἀνδριάς ὁ τοῦ Μίτυος ἐν Ἄργει ἀπέκτεινεν τὸν αἵτιον τοῦ θανάτου τῷ Μίτυι, θεωροῦντι ἐμπεσόν· ἔοικε γὰρ τὰ τοιαῦτα οὐκ εἰκῇ γίνεσθαι· ὥστε ἀνάγκη τοὺς τοιοῦτους εἶναι καλλίους μύθους.

Εἰσὶ δὲ τῶν μύθων οἱ μὲν ἀπλοῖ οἱ δὲ πεπλεγμένοι· καὶ γὰρ αἱ πράξεις ὧν μιμήσεις οἱ μῦθοί εἰσιν ὑπάρχουσιν εὐθὺς οὔσαι τοιαῦται. λέγω δὲ ἀπλῆν μὲν πρᾶξιν ἥς γινομένης ὥσπερ ὥριςται συνεχοῦς καὶ μιᾶς ἄνευ περιπετείας ἢ ἀναγνωρισμοῦ ἢ μετάβασις γίνεται, πεπλεγμένην δὲ ἐξ ἥς μετὰ ἀναγνωρισμοῦ ἢ περιπετείας ἢ ἀμφοῖν ἢ μετάβασις ἐστιν. ταῦτα δὲ δεῖ γίνεσθαι ἐξ αὐτῆς τῆς συστάσεως τοῦ μύθου, ὥστε ἐκ τῶν προγεγενημένων συμβαίνειν ἢ ἐξ ἀνάγκης ἢ κατὰ τὸ εἰκὸς γίγνεσθαι ταῦτα· διαφέρει γὰρ πολὺ τὸ γίγνεσθαι τάδε διὰ τάδε ἢ μετὰ τάδε.

Ἔστι δὲ περιπέτεια μὲν ἢ εἰς τὸ ἐναντίον τῶν πραττομένων μεταβολὴ καθάπερ εἴρηται, καὶ τοῦτο δὲ ὥσπερ λέγομεν κατὰ τὸ εἰκὸς ἢ ἀναγκαῖον, οἷον ἐν τῷ Οἰδίποδι ἐλθὼν ὡς εὐφρανῶν τὸν

Οιδίπουν καὶ ἀπαλλάξων τοῦ πρὸς τὴν μητέρα φόβου, δηλώσας ὃς ἦν, τοῦναντίον ἐποίησεν· καὶ ἐν τῷ Λυγκεῖ ὁ μὲν ἀγόμενος ὡς ἀποθανούμενος, ὁ δὲ Δαναὸς ἀκολουθῶν ὡς ἀποκτενῶν, τὸν μὲν συνέβη ἐκ τῶν πεπραγμένων ἀποθανεῖν, τὸν δὲ σωθῆναι. ἀναγνώρισις δέ, ὥσπερ καὶ τοῦνομα σημαίνει, ἐξ ἀγνοίας εἰς γνῶσιν μεταβολή, ἢ εἰς φιλίαν ἢ εἰς ἔχθραν, τῶν πρὸς εὐτυχίαν ἢ δυστυχίαν ὀρισμένων· καλλίστη δὲ ἀναγνώρισις, ὅταν ἅμα περιπετεία γένηται, οἷον ἔχει ἡ ἐν τῷ Οιδίποδι. εἰσὶν μὲν οὖν καὶ ἄλλαι ἀναγνωρίσεις· καὶ γὰρ πρὸς ἄψυχα καὶ τὰ τυχόντα ἐστὶν ὥσπερ εἴρηται συμβαίνει· καὶ εἰ πέπραγέ τις ἢ μὴ πέπραγεν ἐστὶν ἀναγνωρίσαι. ἀλλ' ἡ μάλιστα τοῦ μύθου καὶ ἡ μάλιστα τῆς πράξεως ἡ εἰρημένη ἐστίν· ἡ γὰρ τοιαύτη ἀναγνώρισις καὶ περιπέτεια ἡ ἔλεον [1452b] ἔξει ἡ φόβον (οἷων πράξεων ἡ τραγωδία μίμησις ὑπόκειται), ἐπειδὴ καὶ τὸ ἀτυχεῖν καὶ τὸ εὐτυχεῖν ἐπὶ τῶν τοιούτων συμβήσεται. ἐπεὶ δὴ ἡ ἀναγνώρισις τινῶν ἐστὶν ἀναγνώρισις, αἱ μὲν εἰσι θατέρου πρὸς τὸν ἕτερον μόνον, ὅταν ἢ δῆλος ἄτερος τίς ἐστίν, ὅτε δὲ ἀμφοτέρους δεῖ ἀναγνωρίσαι, οἷον ἡ μὲν Ἰφιγένεια τῷ Ὀρέστη ἀνεγνωρίσθη ἐκ τῆς πέμψεως τῆς ἐπιστολῆς, ἐκείνου δὲ πρὸς τὴν Ἰφιγένειαν ἄλλης ἔδει ἀναγνωρίσεως.

δύο μὲν οὖν τοῦ μύθου μέρη ταῦτ' ἐστί, περιπέτεια καὶ ἀναγνώρισις· τρίτον δὲ πάθος. τούτων δὲ περιπέτεια μὲν καὶ ἀναγνώρισις εἴρηται, πάθος δὲ ἐστὶ πρᾶξις φθαρτικὴ ἢ ὀδυνηρά, οἷον οἷ τε ἐν τῷ φανερῷ θάνατοι καὶ αἱ περιωδυνίαι καὶ τρώσεις καὶ ὅσα τοιαῦτα.

Μέρη δὲ τραγωδίας οἷς μὲν ὡς εἶδεσι δεῖ χρῆσθαι πρότερον εἵπομεν, κατὰ δὲ τὸ ποσὸν καὶ εἰς ἃ διαιρεῖται κεχωρισμένα τάδε ἐστίν, πρόλογος ἐπεισόδιον ἔξοδος χορικόν, καὶ τούτου τὸ μὲν πάροδος τὸ δὲ στάσιμον, κοινὰ μὲν ἀπάντων ταῦτα, ἴδια δὲ τὰ ἀπὸ τῆς σκηνῆς καὶ κομμοί. ἐστὶν δὲ πρόλογος μὲν μέρος ὅλον τραγωδίας τὸ πρὸ χοροῦ παρόδου, ἐπεισόδιον δὲ μέρος ὅλον τραγωδίας τὸ μεταξὺ ὅλων χορικῶν μελῶν, ἔξοδος δὲ μέρος ὅλον τραγωδίας μεθ' ὃ οὐκ ἔστι χοροῦ μέλος· χορικοῦ δὲ πάροδος μὲν ἡ πρώτη λέξις ὅλη χοροῦ, στάσιμον δὲ μέλος χοροῦ τὸ ἄνευ ἀναπαίστου καὶ τροχαίου, κομμός δὲ θρῆνος κοινὸς χοροῦ καὶ ἀπὸ σκηνῆς. μέρη δὲ τραγωδίας οἷς μὲν «ὡς εἶδεσι» δεῖ χρῆσθαι πρότερον εἵπαμεν, κατὰ δὲ τὸ ποσὸν καὶ εἰς ἃ διαιρεῖται κεχωρισμένα ταῦτ' ἐστίν.

Ὡν δὲ δεῖ στοχάζεσθαι καὶ ἃ δεῖ εὐλαβεῖσθαι συνιστάντας

τοὺς μύθους καὶ πόθεν ἔσται τὸ τῆς τραγωδίας ἔργον, ἐφεξῆς ἂν εἶη λεκτέον τοῖς νῦν εἰρημένοις. ἐπειδὴ οὖν δεῖ τὴν σύνθεσιν εἶναι τῆς καλλίστης τραγωδίας μὴ ἀπλὴν ἀλλὰ πεπλεγμένην καὶ ταύτην φοβερῶν καὶ ἔλεεινῶν εἶναι μιμητικὴν (τοῦτο γὰρ ἴδιον τῆς τοιαύτης μιμήσεώς ἐστιν), πρῶτον μὲν δῆλον ὅτι οὔτε τοὺς ἐπιεικεῖς ἄνδρας δεῖ μεταβάλλοντας φαίνεσθαι ἐξ εὐτυχίας εἰς δυστυχίαν, οὐ γὰρ φοβερὸν οὐδὲ ἔλεεινὸν τοῦτο ἀλλὰ μιαιρόν ἐστιν· οὔτε τοὺς μοχθηροὺς ἐξ ἀτυχίας εἰς εὐτυχίαν, ἀτραγωδότατον γὰρ τοῦτ' ἐστὶ πάντων, οὐδὲν γὰρ ἔχει ὧν δεῖ, οὔτε γὰρ φιλόανθρωπον [1453a] οὔτε ἔλεεινὸν οὔτε φοβερόν ἐστιν· οὐδ' αὖ τὸν σφόδρα πονηρὸν ἐξ εὐτυχίας εἰς δυστυχίαν μεταπίπτειν· τὸ μὲν γὰρ φιλόανθρωπον ἔχει ἂν ἢ τοιαύτη σύστασις ἀλλ' οὔτε ἔλεον οὔτε φόβον, ὁ μὲν γὰρ περὶ τὸν ἀνάξιόν ἐστιν δυστυχοῦντα, ὁ δὲ περὶ τὸν ὅμοιον, ἔλεος μὲν περὶ τὸν ἀνάξιον, φόβος δὲ περὶ τὸν ὅμοιον, ὥστε οὔτε ἔλεεινὸν οὔτε φοβερόν ἐστὶ τὸ συμβαῖνον. ὁ μεταξὺ ἄρα τούτων λοιπός. ἐστὶ δὲ τοιοῦτος ὁ μήτε ἀρετῇ διαφέρων καὶ δικαιοσύνη μήτε διὰ κακίαν καὶ μοχθηρίαν μεταβάλλων εἰς τὴν δυστυχίαν ἀλλὰ δι' ἁμαρτίαν τινά, τῶν ἐν μεγάλῃ δόξῃ ὄντων καὶ εὐτυχία, οἷον Οἰδίπους καὶ Θυέστης καὶ οἱ ἐκ τῶν τοιούτων γενῶν ἐπιφανεῖς ἄνδρες. ἀνάγκη ἄρα τὸν καλῶς ἔχοντα μῦθον ἀπλοῦν εἶναι μᾶλλον ἢ διπλοῦν, ὥσπερ τινές φασι, καὶ μεταβάλλειν οὐκ εἰς εὐτυχίαν ἐκ δυστυχίας ἀλλὰ τούναντίον ἐξ εὐτυχίας εἰς δυστυχίαν μὴ διὰ μοχθηρίαν ἀλλὰ δι' ἁμαρτίαν μεγάλην ἢ οἷου εἴρηται ἢ βελτίονος μᾶλλον ἢ χείρονος. σημεῖον δὲ καὶ τὸ γιννόμενον· πρῶτον μὲν γὰρ οἱ ποιηταὶ τοὺς τυχόντας μύθους ἀπηρίθμουν, νῦν δὲ περὶ ὀλίγας οἰκίας αἱ κάλλιστα τραγωδαὶ συντίθενται, οἷον περὶ Ἀλκμέονα καὶ Οἰδίπου καὶ Ὀρέστην καὶ Μελέαγρον καὶ Θυέστην καὶ Τήλεφον καὶ ὅσοις ἄλλοις συμβέβηκεν ἢ παθεῖν δεῖν ἢ ποιῆσαι. ἢ μὲν οὖν κατὰ τὴν τέχνην καλλίστη τραγωδία ἐκ ταύτης τῆς συστάσεώς ἐστι. διὸ καὶ οἱ Εὐριπίδῃ ἐγκαλοῦντες τὸ αὐτὸ ἁμαρτάνουσιν ὅτι τοῦτο δρᾷ ἐν ταῖς τραγωδαῖς καὶ αἱ πολλαὶ αὐτοῦ εἰς δυστυχίαν τελευτῶσιν. τοῦτο γὰρ ἐστὶν ὥσπερ εἴρηται ὀρθόν· σημεῖον δὲ μέγιστον· ἐπὶ γὰρ τῶν σκηνῶν καὶ τῶν ἀγώνων τραγικώταται αἱ τοιαῦται φαίνονται, ἂν κατορθωθῶσιν, καὶ ὁ Εὐριπίδης, εἰ καὶ τὰ ἄλλα μὴ εὖ οἰκονομεῖ, ἀλλὰ τραγικώτατός γε τῶν ποιητῶν φαίνεται. δευτέρα δ' ἡ πρώτη λεγομένη ὑπὸ τινῶν ἐστὶν σύστασις, ἢ διπλὴν τε τὴν σύστασιν ἔχουσα καθάπερ ἡ Ὀδύσσεια καὶ τελευτῶσα ἐξ ἐναντίας τοῖς

βελτίοσι καὶ χείροσιν. δοκεῖ δὲ εἶναι πρώτη διὰ τὴν τῶν θεάτρων ἀσθένειαν· ἀκολουθοῦσι γὰρ οἱ ποιηταὶ κατ' εὐχὴν ποιοῦντες τοῖς θεαταῖς. ἔστιν δὲ οὐχ αὕτη ἀπὸ τραγωδίας ἡδονὴ ἀλλὰ μᾶλλον τῆς κωμωδίας οἰκεία· ἐκεῖ γὰρ οἱ ἂν ἔχθιστοι ὣσιν ἐν τῷ μύθῳ, οἷον Ὀρέστης καὶ Αἴγισθος, φίλοι γενόμενοι ἐπὶ τελευτῆς ἐξέρχονται, καὶ ἀποθνήσκει οὐδεὶς ὑπ' οὐδενός.

[1453b] Ἔστιν μὲν οὖν τὸ φοβερὸν καὶ ἐλεεινὸν ἐκ τῆς ὀψεως γίνεσθαι, ἔστιν δὲ καὶ ἐξ αὐτῆς τῆς συστάσεως τῶν πραγμάτων, ὅπερ ἐστὶ πρότερον καὶ ποιητοῦ ἀμείνονος. δεῖ γὰρ καὶ ἄνευ τοῦ ὁρᾶν οὕτω συνεστάναι τὸν μῦθον ὥστε τὸν ἀκούοντα τὰ πράγματα γινόμενα καὶ φρίττειν καὶ ἐλεεῖν ἐκ τῶν συμβαινόντων· ἅπερ ἂν πάθοι τις ἀκούων τὸν τοῦ Οἰδίου μῦθον. τὸ δὲ διὰ τῆς ὀψεως τοῦτο παρασκευάζειν ἀτεχνότερον καὶ χορηγίας δεόμενόν ἐστιν. οἱ δὲ μὴ τὸ φοβερὸν διὰ τῆς ὀψεως ἀλλὰ τὸ τερατῶδες μόνον παρασκευάζοντες οὐδὲν τραγωδία κοινωνοῦσιν· οὐ γὰρ πᾶσαν δεῖ ζητεῖν ἡδονὴν ἀπὸ τραγωδίας ἀλλὰ τὴν οἰκείαν. ἐπεὶ δὲ τὴν ἀπὸ ἐλέου καὶ φόβου διὰ μιμήσεως δεῖ ἡδονὴν παρασκευάζειν τὸν ποιητὴν, φανερόν ὡς τοῦτο ἐν τοῖς πράγμασιν ἐμποιητέον. ποῖα οὖν δεινὰ ἢ ποῖα οἰκτρὰ φαίνεται τῶν συμπιπτόντων, λάβωμεν. ἀνάγκη δὴ ἢ φίλων εἶναι πρὸς ἀλλήλους τὰς τοιαύτας πράξεις ἢ ἐχθρῶν ἢ μηδετέρων. ἂν μὲν οὖν ἐχθρὸς ἐχθρόν, οὐδὲν ἐλεεινὸν οὔτε ποιῶν οὔτε μέλλον, πλὴν κατ' αὐτὸ τὸ πάθος· οὐδ' ἂν μηδετέρως ἔχοντες· ὅταν δ' ἐν ταῖς φιλίαις ἐγγένηται τὰ πάθη, οἷον ἢ ἀδελφὸς ἀδελφὸν ἢ υἱὸς πατέρα ἢ μήτηρ υἱὸν ἢ υἱὸς μητέρα ἀποκτείνει ἢ μέλλῃ ἢ τι ἄλλο τοιοῦτον δρᾷ, ταῦτα ζητητέον. τοὺς μὲν οὖν παρειλημμένους μύθους λύειν οὐκ ἔστιν, λέγω δὲ οἷον τὴν Κλυταιμῆστραν ἀποθανοῦσαν ὑπὸ τοῦ Ὀρέστου καὶ τὴν Ἐριφύλην ὑπὸ τοῦ Ἀλκμέωνος, αὐτὸν δὲ εὐρίσκειν δεῖ καὶ τοῖς παραδεδομένοις χρησθαι καλῶς. τὸ δὲ καλῶς τί λέγομεν, εἴπωμεν σαφέστερον. ἔστι μὲν γὰρ οὕτω γίνεσθαι τὴν πρᾶξιν, ὥσπερ οἱ παλαιοὶ ἐποίουν εἰδότας καὶ γινώσκοντας, καθάπερ καὶ Εὐριπίδης ἐποίησεν ἀποκτείνουσιν τοὺς παῖδας τὴν Μήδειαν· ἔστιν δὲ πρᾶξι μὲν, ἀγνοοῦντας δὲ πρᾶξι τὸ δεινόν, εἴθ' ὕστερον ἀναγνωρίσαι τὴν φιλίαν, ὥσπερ ὁ Σοφοκλέους Οἰδίπους· τοῦτο μὲν οὖν ἔξω τοῦ δράματος, ἐν δ' αὐτῇ τῇ τραγωδίᾳ οἷον ὁ Ἀλκμέων ὁ Ἀστυδάμαντος ἢ ὁ Τηλέγονος ὁ ἐν τῷ τραυματίᾳ Ὀδυσσεῖ. ἔτι δὲ τρίτον παρὰ ταῦτα τὸ μέλλοντα ποιεῖν τι τῶν ἀνηκέστων δι' ἄγνοιαν ἀναγνωρίσαι πρὶν ποιῆσαι. καὶ παρὰ ταῦτα

οὐκ ἔστιν ἄλλως. ἢ γὰρ πρᾶξαι ἀνάγκη ἢ μὴ καὶ εἰδότας ἢ μὴ εἰδότας. τούτων δὲ τὸ μὲν γινώσκοντα μελλῆσαι καὶ μὴ πρᾶξαι χεῖριστον· τό τε γὰρ μιαρὸν ἔχει, καὶ οὐ τραγικόν· ἀπαθὲς γάρ. διόπερ οὐδεὶς [1454a] ποιεῖ ὁμοίως, εἰ μὴ ὀλιγάκις, οἷον ἐν Ἀντιγόῃ τὸν Κρέοντα ὁ Αἰμῶν. τὸ δὲ πρᾶξαι δεύτερον. βέλτιον δὲ τὸ ἀγνοοῦντα μὲν πρᾶξαι, πράξαντα δὲ ἀναγνώρισαι· τό τε γὰρ μιαρὸν οὐ πρόσεστιν καὶ ἡ ἀναγνώρισις ἐκπληκτικόν. κράτιστον δὲ τὸ τελευταῖον, λέγω δὲ οἷον ἐν τῷ Κρεσφόντῃ ἡ Μερόπη μέλλει τὸν υἱὸν ἀποκτείνειν, ἀποκτείνει δὲ οὐ, ἀλλ' ἀνεγνώρισε, καὶ ἐν τῇ Ἰφιγενείᾳ ἡ ἀδελφὴ τὸν ἀδελφόν, καὶ ἐν τῇ Ἑλλῃ ὁ υἱὸς τὴν μητέρα ἐκδιδόναι μέλλων ἀνεγνώρισεν. διὰ γὰρ τοῦτο, ὅπερ πάλαι εἴρηται, οὐ περὶ πολλὰ γένη αἱ τραγωδίαι εἰσίν. ζητοῦντες γὰρ οὐκ ἀπὸ τέχνης ἀλλ' ἀπὸ τύχης εὖρον τὸ τοιοῦτον παρασκευάζειν ἐν τοῖς μύθοις· ἀναγκάζονται οὖν ἐπὶ ταύτας τὰς οἰκίας ἀπαντᾶν ὅσαις τὰ τοιαῦτα συμβέβηκε πάθῃ. περὶ μὲν οὖν τῆς τῶν πραγμάτων συστάσεως καὶ ποίους τινὰς εἶναι δεῖ τοὺς μύθους εἴρηται ἱκανῶς.

Περὶ δὲ τὰ ἦθη τέτταρά ἐστιν ὧν δεῖ στοχάζεσθαι, ἐν μὲν καὶ πρῶτον, ὅπως χρηστὰ ἦ. ἔξει δὲ ἦθος μὲν ἐὰν ὥσπερ ἐλέχθη ποιῇ φανερόν ὁ λόγος ἢ ἡ πρᾶξις προαίρεσιν τινα <ἢ τις ἂν> ἢ, χρηστὸν δὲ ἐὰν χρηστήν. ἔστιν δὲ ἐν ἐκάστῳ γένει· καὶ γὰρ γυνὴ ἐστὶν χρηστὴ καὶ δοῦλος, καίτοι γε ἴσως τούτων τὸ μὲν χεῖρον, τὸ δὲ ὅλως φαῦλόν ἐστιν. δεύτερον δὲ τὸ ἀρμόττοντα· ἔστιν γὰρ ἀνδρείαν μὲν τὸ ἦθος, ἀλλ' οὐχ ἀρμόττον γυναικὶ οὕτως ἀνδρείαν ἢ δεινὴν εἶναι. τρίτον δὲ τὸ ὅμοιον. τοῦτο γὰρ ἕτερον τοῦ χρηστὸν τὸ ἦθος καὶ ἀρμόττον ποιῆσαι ὡς προείρηται. τέταρτον δὲ τὸ ὁμαλόν. κἂν γὰρ ἀνώμαλός τις ἦ ὁ τὴν μίμησιν παρέχων καὶ τοιοῦτον ἦθος ὑποτεθῇ, ὅμως ὁμαλῶς ἀνώμαλον δεῖ εἶναι. ἔστιν δὲ παράδειγμα πονηρίας μὲν ἦθους μὴ ἀναγκαίας οἷον ὁ Μενέλαος ὁ ἐν τῷ Ὀρέστῃ, τοῦ δὲ ἀπρεποῦς καὶ μὴ ἀρμόττοντος ὁ τε θρῆνος Ὀδυσσεύς ἐν τῇ Σκύλλῃ καὶ ἡ τῆς Μελανίππης ῥῆσις, τοῦ δὲ ἀνωμάλου ἡ ἐν Αὐλίδι Ἰφιγένεια· οὐδὲν γὰρ ἔοικεν ἡ ἱκετεύουσα τῇ ὑστέρᾳ. χρὴ δὲ καὶ ἐν τοῖς ἡθεσιν ὁμοίως ὥσπερ καὶ ἐν τῇ τῶν πραγμάτων συστάσει ἀεὶ ζητεῖν ἢ τὸ ἀναγκαῖον ἢ τὸ εἰκός, ὥστε τὸν τοιοῦτον τὰ τοιαῦτα λέγειν ἢ πράττειν ἢ ἀναγκαῖον ἢ εἰκός καὶ τοῦτο μετὰ τοῦτο γίνεσθαι ἢ ἀναγκαῖον ἢ εἰκός. φανερόν οὖν ὅτι καὶ τὰς λύσεις τῶν μύθων ἐξ αὐτοῦ δεῖ τοῦ [1454b] μύθου συμβαίνειν, καὶ μὴ ὥσπερ ἐν τῇ Μηδεΐᾳ ἀπὸ μηχανῆς καὶ ἐν τῇ Ἰλιάδι τὰ περὶ τὸν ἀπόπλουν. ἀλλὰ

μηχανῇ χρηστέον ἐπὶ τὰ ἔξω τοῦ δράματος, ἢ ὅσα πρὸ τοῦ γέγονεν ἂ οὐχ οἷόν τε ἄνθρωπον εἰδέναι, ἢ ὅσα ὕστερον, ἂ δεῖται προαγορεύσεως καὶ ἀγγελίας· ἅπαντα γὰρ ἀποδίδομεν τοῖς θεοῖς ὁρᾶν. ἄλογον δὲ μηδὲν εἶναι ἐν τοῖς πράγμασιν, εἰ δὲ μή, ἔξω τῆς τραγωδίας, οἷον τὸ ἐν τῷ Οἰδίποδι τῷ Σοφοκλέους. ἐπεὶ δὲ μίμησις ἐστὶν ἡ τραγωδία βελτιόνων ἢ ἡμεῖς, δεῖ μιμεῖσθαι τοὺς ἀγαθοὺς εἰκονογράφους· καὶ γὰρ ἐκεῖνοι ἀποδιδόντες τὴν ἰδίαν μορφήν ὁμοίους ποιοῦντες καλλίους γράφουσιν· οὕτω καὶ τὸν ποιητὴν μιμούμενον καὶ ὀργίλους καὶ ῥαθύμους καὶ τᾶλλα τὰ τοιαῦτα ἔχοντας ἐπὶ τῶν ἡθῶν τοιούτους ὄντας ἐπεικεῖς ποιεῖν παράδειγμα σκληρότητος οἷον τὸν Ἀχιλλεῦς ἀγαθὸν καὶ Ὀμηρος. ταῦτα δὲ διατηρεῖν, καὶ πρὸς τοῦτοις τὰ παρὰ τὰς ἐξ ἀνάγκης ἀκολουθούσας αἰσθήσεις τῇ ποιητικῇ· καὶ γὰρ κατ’ αὐτὰς ἔστιν ἀμαρτάνειν πολλάκις· εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς ἐκδεδομένοις λόγοις ἱκανῶς.

Ἀναγνώρισις δὲ τί μὲν ἐστὶν, εἴρηται πρότερον· εἶδη δὲ ἀναγνωρίσεως, πρώτη μὲν ἡ ἀτεχνοτάτη καὶ ἡ πλείστη χρῶνται δι’ ἀπορίαν, ἡ διὰ τῶν σημείων. τούτων δὲ τὰ μὲν σύμφυτα, οἷον “λόγῃν ἣν φοροῦσι Γηγενεῖς” ἢ ἀστέρας οἴους ἐν τῷ Θυέστη Καρκίνος, τὰ δὲ ἐπίκτητα, καὶ τούτων τὰ μὲν ἐν τῷ σώματι, οἷον οὐλαί, τὰ δὲ ἐκτός, οἷον τὰ περιδέραια καὶ οἷον ἐν τῇ Τυροῖ διὰ τῆς σκάφης. ἔστιν δὲ καὶ τούτοις χρῆσθαι ἢ βέλτιον ἢ χεῖρον, οἷον Ὀδυσσεὺς διὰ τῆς οὐλῆς ἄλλως ἀνεγνωρίσθη ὑπὸ τῆς τροφῆς καὶ ἄλλως ὑπὸ τῶν συβοτῶν· εἰσὶ γὰρ αἱ μὲν πίστεως ἕνεκα ἀτεχνότεραι, καὶ αἱ τοιαῦται πᾶσαι, αἱ δὲ ἐκ περιπετείας, ὥσπερ ἡ ἐν τοῖς Νίπτροις, βελτίους. δευτέραι δὲ αἱ πεποιημέναι ὑπὸ τοῦ ποιητοῦ, διὸ ἄτεχνοι. οἷον Ὀρέστης ἐν τῇ Ἰφιγενείᾳ ἀνεγνώρισεν ὅτι Ὀρέστης· ἐκείνη μὲν γὰρ διὰ τῆς ἐπιστολῆς, ἐκεῖνος δὲ αὐτὸς λέγει ἂ βούλεται ὁ ποιητὴς ἄλλ’ οὐχ ὁ μῦθος· διὸ ἐγγύς τι τῆς εἰρημένης ἀμαρτίας ἐστίν, ἐξῆν γὰρ ἂν ἔνια καὶ ἐνεγκεῖν. καὶ ἐν τῷ Σοφοκλέους Τηρεῖ ἡ τῆς κερκίδος φωνή· ἡ τρίτη διὰ μνήμης, τῷ αἰσθῆσθαι [1455a] τι ἰδόντα, ὥσπερ ἡ ἐν Κυπρίοις τοῖς Δικαιογένοισι, ἰδὼν γὰρ τὴν γραφὴν ἐκλαυσεν, καὶ ἡ ἐν Ἀλκίνοιο ἀπολόγῳ, ἀκούων γὰρ τοῦ κιθαριστοῦ καὶ μνησθεὶς ἐδάκρυσεν, ὅθεν ἀνεγνωρίσθησαν. τετάρτη δὲ ἡ ἐκ συλλογισμοῦ, οἷον ἐν Χοηφόροις, ὅτι ὁμοίως τις ἐλήλυθεν, ὁμοίος δὲ οὐθεὶς ἄλλ’ ἢ Ὀρέστης, οὗτος ἄρα ἐλήλυθεν. καὶ ἡ Πολυίδου τοῦ σοφιστοῦ περὶ τῆς Ἰφιγενείας· εἰκὸς γὰρ ἔφη τὸν Ὀρέστην συλλογίσασθαι ὅτι ἢ τ’ ἀδελφῇ ἐτύθη καὶ αὐτῷ συμβαίνει

θύεσθαι. καὶ ἐν τῷ Θεοδέκτου Τυδεῖ, ὅτι ἐλθὼν ὡς εὐρήσων τὸν υἱὸν αὐτὸς ἀπόλλυται. καὶ ἡ ἐν τοῖς Φινεΐδαις· ἰδοῦσαι γὰρ τὸν τόπον συνελογίσαντο τὴν εἰμαρμένην ὅτι ἐν τούτῳ εἴμαρτο ἀποθανεῖν αὐταῖς, καὶ γὰρ ἐξετέθησαν ἐνταῦθα. ἔστιν δέ τις καὶ συνθετὴ ἐκ παραλογισμοῦ τοῦ θεάτρου, οἷον ἐν τῷ Ὀδυσσεῖ τῷ ψευδαγγέλῳ· τὸ μὲν γὰρ τὸ τόξον ἐντείνειν, ἄλλον δὲ μηδὲνα, πεπονημένον ὑπὸ τοῦ ποιητοῦ καὶ ὑπόθεσις, καὶ εἴ γε τὸ τόξον ἔφη γνώσεσθαι ὁ οὐχ ἑωράκει· τὸ δὲ ὡς δι' ἐκείνου ἀναγνωριούντος διὰ τούτου ποιῆσαι παραλογισμός. πασῶν δὲ βελτίστη ἀναγνώρισις ἡ ἐξ αὐτῶν τῶν πραγμάτων, τῆς ἐκπλήξεως γιγνομένης δι' εἰκότων, οἷον ἐν τῷ Σοφοκλέους Οἰδίποδι καὶ τῇ Ἰφιγενείᾳ· εἰκὸς γὰρ βούλεσθαι ἐπιθεῖναι γράμματα. αἱ γὰρ τοιαῦται μόναι ἄνευ τῶν πεπονημένων σημείων καὶ περιδεραίων. δεύτεραι δὲ αἱ ἐκ συλλογισμοῦ.

Δεῖ δὲ τοὺς μύθους συνιστάναι καὶ τῇ λέξει συναπεργάζεσθαι ὅτι μάλιστα πρὸ ὁμμάτων τιθέμενον· οὕτω γὰρ ἂν ἐναργέστατα [ὁ] ὁρῶν ὥσπερ παρ' αὐτοῖς γινόμενος τοῖς πραττομένοις εὐρίσκοι τὸ πρέπον καὶ ἥκιστα ἂν λανθάνοι [τὸ] τὰ ὑπεναντία. σημεῖον δὲ τούτου ὁ ἐπετιμᾶτο Καρκίνῳ. ὁ γὰρ Ἀμφιάραος ἐξ ἱεροῦ ἀνῆει, ὁ μὴ ὁρῶντα [τὸν θεατὴν] ἐλάνθανεν, ἐπὶ δὲ τῆς σκηνῆς ἐξέπεσεν δυσχερανάντων τοῦτο τῶν θεατῶν. ὅσα δὲ δυνατόν καὶ τοῖς σχήμασιν συναπεργαζόμενον· πιθανώτατοι γὰρ ἀπὸ τῆς αὐτῆς φύσεως οἱ ἐν τοῖς πάθεσιν εἰσιν, καὶ χειμαίνει ὁ χειμαζόμενος καὶ χαλεπαίνει ὁ ὀργιζόμενος ἀληθινώτατα. διὸ εὐφυοῦς ἡ ποιητικὴ ἐστὶν ἢ μανικοῦ· τούτων γὰρ οἱ μὲν εὐπλαστοὶ οἱ δὲ ἐκστατικοὶ εἰσιν. τοὺς τε λόγους καὶ τοὺς πεπονημένους [1455b] δεῖ καὶ αὐτὸν ποιοῦντα ἐκτίθεσθαι καθόλου, εἴθ' οὕτως ἐπεισοδιοῦν καὶ παρατείνειν. λέγω δὲ οὕτως ἂν θεωρεῖσθαι τὸ καθόλου, οἷον τῆς Ἰφιγενείας· τυθείσης τινὸς κόρης καὶ ἀφανισθείσης ἀδήλως τοῖς θύσασιν, ἰδρυνθείσης δὲ εἰς ἄλλην χώραν, ἐν ἣ νόμος ἦν τοὺς ξένους θύειν τῇ θεῷ, ταύτην ἔσχε τὴν ἱερωσύνην· χρόνῳ δὲ ὕστερον τῷ ἀδελφῷ συνέβη ἐλθεῖν τῆς ἱερείας, τὸ δὲ ὅτι ἀνέϊλεν ὁ θεὸς [διὰ τινὰ αἰτίαν ἔξω τοῦ καθόλου] ἐλθεῖν ἐκεῖ καὶ ἐφ' ὃ τι δὲ ἔξω τοῦ μύθου· ἐλθὼν δὲ καὶ ληφθεὶς θύεσθαι μέλλων ἀνεγνώρισεν, εἴθ' ὡς Εὐριπίδης εἴθ' ὡς Πολύιδος ἐποίησεν, κατὰ τὸ εἰκὸς εἰπὼν ὅτι οὐκ ἄρα μόνον τὴν ἀδελφὴν ἀλλὰ καὶ αὐτὸν ἔδει τυθῆναι, καὶ ἐντεῦθεν ἡ σωτηρία. μετὰ ταῦτα δὲ ἤδη ὑποθέντα τὰ ὀνόματα ἐπεισοδιοῦν· ὅπως δὲ ἔσται οἰκεῖα τὰ ἐπεισόδια, οἷον ἐν τῷ Ὀρέστη ἡ μανία δι' ἣς ἐλήφθη καὶ ἡ σωτηρία διὰ τῆς καθάρσεως.

ἐν μὲν οὖν τοῖς δράμασιν τὰ ἐπεισόδια σύντομα, ἡ δ' ἐποποιία τούτοις μηκύνεται. τῆς γὰρ Ὀδυσσεΐας οὐ μακρὸς ὁ λόγος ἐστίν· ἀποδημοῦντός τινος ἔτη πολλὰ καὶ παραφυλαττομένου ὑπὸ τοῦ Ποσειδῶνος καὶ μόνου ὄντος, ἔτι δὲ τῶν οἴκοι οὕτως ἐχόντων ὥστε τὰ χρήματα ὑπὸ μνηστήρων ἀναλίσκεσθαι καὶ τὸν υἱὸν ἐπιβουλεύεσθαι, αὐτὸς δὲ ἀφικνεῖται χειμασθεὶς, καὶ ἀναγνωρίσας τινὰς ἐπιθέμενος αὐτὸς μὲν ἐσώθη τοὺς δ' ἐχθροὺς διέφθειρε. τὸ μὲν οὖν ἴδιον τοῦτο, τὰ δ' ἄλλα ἐπεισόδια.

Ἔστι δὲ πάσης τραγωδίας τὸ μὲν δέσις τὸ δὲ λύσις, τὰ μὲν ἔξωθεν καὶ ἔνια τῶν ἔσωθεν πολλάκις ἢ δέσις, τὸ δὲ λοιπὸν ἢ λύσις· λέγω δὲ δέσιν μὲν εἶναι τὴν ἀπ' ἀρχῆς μέχρι τούτου τοῦ μέρους ὃ ἔσχατόν ἐστιν ἐξ οὗ μεταβαίνει εἰς εὐτυχίαν ἢ εἰς ἀτυχίαν, λύσιν δὲ τὴν ἀπὸ τῆς ἀρχῆς τῆς μεταβάσεως μέχρι τέλους· ὥσπερ ἐν τῷ Λυγκεῖ τῷ Θεοδόκτου δέσις μὲν τὰ τε προπεπραγμένα καὶ ἡ τοῦ παιδίου λῆψις καὶ πάλιν ἡ αὐτῶν λύσις δ' ἡ ἀπὸ τῆς αἰτίας αἰτίας τοῦ θανάτου μέχρι τοῦ τέλους. τραγωδίας δὲ εἶδη εἰσὶ τέσσαρα (τοσαῦτα γὰρ καὶ τὰ μέρη ἐλέγχῃ), ἡ μὲν πεπλεγμένη, ἥς τὸ ὅλον ἐστὶν περιπέτεια καὶ ἀναγνώρισις, ἡ δὲ παθητική, οἷον οἱ τε [1456a] Αἴαντες καὶ οἱ Ἰξίονες, ἡ δὲ ἠθική, οἷον αἱ Φθιώτιδες καὶ ὁ Πηλεΐδης· τὸ δὲ τέταρτον οἷον, οἷον αἱ τε Φορκίδες καὶ ὁ Προμηθεὺς καὶ ὅσα ἐν ᾧδου. μάλιστα μὲν οὖν ἅπαντα δεῖ πειρᾶσθαι ἔχειν, εἰ δὲ μή, τὰ μέγιστα καὶ πλεῖστα, ἄλλως τε καὶ ὥς νῦν συκοφαντοῦσιν τοὺς ποιητάς· γεγονότων γὰρ καθ' ἕκαστον μέρος ἀγαθῶν ποιητῶν, ἐκάστου τοῦ ἰδίου ἀγαθοῦ ἀξιοῦσι τὸν ἕνα ὑπερβάλλειν. δίκαιον δὲ καὶ τραγωδίαν ἄλλην καὶ τὴν αὐτὴν λέγειν οὐδενὶ ὥς τῷ μῦθῳ· τοῦτο δέ, ὣν ἡ αὐτὴ πλοκὴ καὶ λύσις. πολλοὶ δὲ πλέξαντες εὖ λύουσι κακῶς· δεῖ δὲ ἀμφοτέρω ἀρτικροτεῖσθαι. χρή δὲ ὅπερ εἴρηται πολλάκις μεμνησθαι καὶ μὴ ποιεῖν ἐποποιικὸν σύστημα τραγωδίας - ἐποποιικὸν δὲ λέγω τὸ πολύμυθον - οἷον εἴ τις τὸν τῆς Ἰλιάδος ὅλον ποιοῖ μῦθον. ἐκεῖ μὲν γὰρ διὰ τὸ μῆκος λαμβάνει τὰ μέρη τὸ πρέπον μέγεθος, ἐν δὲ τοῖς δράμασι πολὺ παρὰ τὴν ὑπόληψιν ἀποβαίνει. σημεῖον δέ, ὅσοι πέρσιν Ἰλίου ὅλην ἐποίησαν καὶ μὴ κατὰ μέρος ὥσπερ Εὐριπίδης, «ἢ» Νιόβην καὶ μὴ ὥσπερ Αἰσχύλος, ἡ ἐκπίπτουσιν ἢ κακῶς ἀγωνίζονται, ἐπεὶ καὶ Ἀγάθων ἐξέπεσεν ἐν τούτῳ μόνῳ. ἐν δὲ ταῖς περιπετείαις καὶ ἐν τοῖς ἀπλοῖς πράγμασι στοχάζονται ὥν βούλονται θαυμαστώς· τραγικὸν γὰρ τοῦτο καὶ φιλόφρων. ἐστὶν δὲ τοῦτο, ὅταν ὁ σοφὸς μὲν μετὰ πονηρίας «δ'» ἐξαπατηθῇ, ὥσπερ

Σίσυφος, καὶ ὁ ἀνδρεῖος μὲν ἄδικος δὲ ἡττηθῆ. ἔστιν δὲ τοῦτο καὶ εἰκὸς ὥσπερ Ἀγάθων λέγει, εἰκὸς γὰρ γίνεσθαι πολλὰ καὶ παρὰ τὸ εἰκός, καὶ τὸν χορὸν δὲ ἓνα δεῖ ὑπολαμβάνειν τῶν ὑποκριτῶν, καὶ μῦριον εἶναι τοῦ ὅλου καὶ συναγωνίζεσθαι μὴ ὥσπερ Εὐριπίδῃ ἄλλ' ὥσπερ Σοφοκλεῖ. τοῖς δὲ λοιποῖς τὰ ἀδόκιμα οὐδὲν μᾶλλον τοῦ μύθου ἢ ἄλλης τραγωδίας ἐστίν· διὸ ἐμβόλιμα ἄδουσιν πρώτου ἄρξαντος Ἀγάθωνος τοῦ τοιούτου. καίτοι τί διαφέρει ἢ ἐμβόλιμα ἄδειν ἢ εἰ ῥῆσιν ἐξ ἄλλου εἰς ἄλλο ἀρμόττοι ἢ ἐπεισόδιον ὅλον;

Περὶ μὲν οὖν τῶν ἄλλων εἰδῶν εἴρηται, λοιπὸν δὲ περὶ λέξεως καὶ διανοίας εἰπεῖν. τὰ μὲν οὖν περὶ τὴν διάνοιαν ἐν τοῖς περὶ ῥητορικῆς κείσθω· τοῦτο γὰρ ἴδιον μᾶλλον ἐκείνης τῆς μεθόδου. ἔστι δὲ κατὰ τὴν διάνοιαν ταῦτα, ὅσα ὑπὸ τοῦ λόγου δεῖ παρασκευασθῆναι. μέρη δὲ τούτων τό τε ἀποδεικνύειν καὶ τὸ λύειν καὶ τὸ πάθη παρασκευάζειν (οἶον [1456b] ἔλεον ἢ φόβον ἢ ὀργὴν καὶ ὅσα τοιαῦτα) καὶ ἔτι μέγεθος καὶ μικρότητας. δῆλον δὲ ὅτι καὶ ἐν τοῖς πράγμασιν ἀπὸ τῶν αὐτῶν ἰδεῶν δεῖ χρῆσθαι ὅταν ἢ ἐλεῖν ἢ δεινὰ ἢ μεγάλα ἢ εἰκότα δέη παρασκευάζειν· πλὴν τοσοῦτον διαφέρει, ὅτι τὰ μὲν δεῖ φαίνεσθαι ἄνευ διδασκαλίας, τὰ δὲ ἐν τῷ λόγῳ ὑπὸ τοῦ λέγοντος παρασκευάζεσθαι καὶ παρὰ τὸν λόγον γίνεσθαι. τί γὰρ ἂν εἴη τοῦ λέγοντος ἔργον, εἰ φαίνοιτο ἢ δέοι καὶ μὴ διὰ τὸν λόγον; τῶν δὲ περὶ τὴν λέξιν ἐν μὲν ἐστὶν εἶδος θεωρίας τὰ σχήματα τῆς λέξεως, ἃ ἐστὶν εἰδέναι τῆς ὑποκριτικῆς καὶ τοῦ τὴν τοιαύτην ἔχοντος ἀρχιτεκτονικῆν, οἶον τί ἐντολὴ καὶ τί εὐχὴ καὶ διήγησις καὶ ἀπειλὴ καὶ ἐρώτησις καὶ ἀπόκρισις καὶ εἴ τι ἄλλο τοιοῦτον. παρὰ γὰρ τὴν τούτων γνῶσιν ἢ ἄγνοιαν οὐδὲν εἰς τὴν ποιητικὴν ἐπιτίμημα φέρεται ὅ τι καὶ ἄξιον σπουδῆς. τί γὰρ ἂν τις ὑπολάβοι ἡμαρτησθαι ἃ Πρωταγόρας ἐπιτιμᾷ, ὅτι εὐχεσθαι οἰόμενος ἐπιτάττει εἰπὼν “μῆνιν ἄειδε θεά”; τὸ γὰρ κελεῦσαι, φησὶν, ποιεῖν τι ἢ μὴ ἐπιτάξις ἐστίν. διὸ παρείσθω ὡς ἄλλης καὶ οὐ τῆς ποιητικῆς ὃν θεώρημα.

Τῆς δὲ λέξεως ἀπάσης τάδ' ἐστὶ τὰ μέρη, στοιχεῖον συλλαβὴ σύνδεσμος ὄνομα ῥῆμα ἄρθρον πῶσις λόγος. στοιχεῖον μὲν οὖν ἐστὶν φωνὴ ἀδιαίρετος, οὐ πᾶσα δὲ ἄλλ' ἐξ ἧς πέφυκε συνθετὴ γίνεσθαι φωνή· καὶ γὰρ τῶν θηρίων εἰσὶν ἀδιαίρετοι φωναί, ὧν οὐδεμίαν λέγω στοιχεῖον. ταύτης δὲ μέρη τό τε φωνῆεν καὶ τὸ ἡμίφωνον καὶ ἄφωνον. ἔστιν δὲ ταῦτα φωνῆεν μὲν <τὸ> ἄνευ προσβολῆς ἔχον φωνὴν ἀκουστήν, ἡμίφωνον δὲ τὸ μετὰ προσβολῆς

Ὀνόματος δὲ εἶδη τὸ μὲν ἀπλοῦν, ἀπλοῦν δὲ λέγω ὃ μὴ ἐκ

σημαινόντων σύγκειται, οἷον γῆ, τὸ δὲ διπλοῦν· τούτου δὲ τὸ μὲν ἐκ σημαίνοντος καὶ ἀσήμου, πλὴν οὐκ ἐν τῷ ὀνόματι σημαίνοντος καὶ ἀσήμου, τὸ δὲ ἐκ σημαινόντων σύγκειται. εἴη δ' ἂν καὶ τριπλοῦν καὶ τετραπλοῦν ὄνομα καὶ πολλαπλοῦν, οἷον τὰ πολλὰ τῶν Μασσαλιωτῶν, Ἑρμοκαϊκόξανθος [1457b] . ἅπαν δὲ ὄνομά ἐστιν ἢ κύριον ἢ γλῶττα ἢ μεταφορὰ ἢ κόσμος ἢ πεποιημένον ἢ ἐπεκτεταμένον ἢ ὑψηλόμενον ἢ ἐξηλλαγμένον. λέγω δὲ κύριον μὲν ὃ χρῶνται ἕκαστοι, γλῶτταν δὲ ὃ ἕτεροι· ὥστε φανερόν ὅτι καὶ γλῶτταν καὶ κύριον εἶναι δυνατόν τὸ αὐτό, μὴ τοῖς αὐτοῖς δέ· τὸ γὰρ σίγυνον Κυπρίοις μὲν κύριον, ἡμῖν δὲ γλῶττα. μεταφορὰ δὲ ἐστιν ὀνόματος ἀλλοτρίου ἐπιφορὰ ἢ ἀπὸ τοῦ γένους ἐπὶ εἶδος ἢ ἀπὸ τοῦ εἶδους ἐπὶ τὸ γένος ἢ ἀπὸ τοῦ εἶδους ἐπὶ εἶδος ἢ κατὰ τὸ ἀνάλογον. λέγω δὲ ἀπὸ γένους μὲν ἐπὶ εἶδος οἷον “νηὺς δέ μοι ἦδ' ἔστηκεν”· τὸ γὰρ ὀρμεῖν ἐστιν ἐστάναι τι. ἀπ' εἶδους δὲ ἐπὶ γένος “ἦ δὴ μυρί' Ὀδυσσεὺς ἐσθλὰ ἔοργεν”· τὸ γὰρ μυρίον πολὺ ἐστίν, ὃ νῦν ἀντὶ τοῦ πολλοῦ κέχρηται. ἀπ' εἶδους δὲ ἐπὶ εἶδος οἷον “χαλκῷ ἀπὸ ψυχὴν ἀρύσας” καὶ “τεμὼν ταναήκει χαλκῷ”· ἐνταῦθα γὰρ τὸ μὲν ἀρύσαι ταμεῖν, τὸ δὲ ταμεῖν ἀρύσαι εἴρηκεν· ἄμφω γὰρ ἀφελεῖν τί ἐστιν. τὸ δὲ ἀνάλογον λέγω, ὅταν ὁμοίως ἔχη τὸ δεύτερον πρὸς τὸ πρῶτον καὶ τὸ τέταρτον πρὸς τὸ τρίτον· ἐρεῖ γὰρ ἀντὶ τοῦ δευτέρου τὸ τέταρτον ἢ ἀντὶ τοῦ τετάρτου τὸ δεύτερον. καὶ ἐνίοτε προστιθέασιν ἀνθ' οὗ λέγει πρὸς ὃ ἐστι. λέγω δὲ οἷον ὁμοίως ἔχει φιάλη πρὸς Διόνυσον καὶ ἀσπίς πρὸς Ἄρη· ἐρεῖ τοίνυν τὴν φιάλην ἀσπίδα Διονύσου καὶ τὴν ἀσπίδα φιάλην Ἄρεως. ἢ ὁ γῆρας πρὸς βίον, καὶ ἐσπέρα πρὸς ἡμέραν· ἐρεῖ τοίνυν τὴν ἐσπέραν γῆρας ἡμέρας ἢ ὥσπερ Ἑμπεδοκλῆς, καὶ τὸ γῆρας ἐσπέραν βίου ἢ δυσμὰς βίου. ἐνίοις δ' οὐκ ἐστὶν ὄνομα κείμενον τῶν ἀνάλογον, ἀλλ' οὐδὲν ἤττον ὁμοίως λεχθήσεται· οἷον τὸ τὸν καρπὸν μὲν ἀφιέναι σπείρειν, τὸ δὲ τὴν φλόγα ἀπὸ τοῦ ἡλίου ἀνώνυμον· ἀλλ' ὁμοίως ἔχει τοῦτο πρὸς τὸν ἥλιον καὶ τὸ σπείρειν πρὸς τὸν καρπὸν, διὸ εἴρηται “σπείρων θεοκτίσταν φλόγα”. ἐστὶ δὲ τῷ τρόπῳ τούτῳ τῆς μεταφορᾶς χρῆσθαι καὶ ἄλλως, προσαγορεύσαντα τὸ ἀλλότριον ἀποφῆσαι τῶν οἰκείων τι, οἷον εἰ τὴν ἀσπίδα εἴποι φιάλην μὴ Ἄρεως ἀλλ' αἶονιν. πεποιημένον δ' ἐστὶν ὃ ὅλως μὴ καλούμενον ὑπὸ τινῶν αὐτὸς τίθεται ὁ ποιητής, δοκεῖ γὰρ ἓν εἶναι τοιαῦτα, οἷον τὰ κέρατα ἔρυνγας καὶ τὸν ἱερέα ἀρητῆρα. ἐπεκτεταμένον [1458a] δὲ ἐστὶν ἢ ἀφηρημένον τὸ μὲν ἐὰν φωνήεντι μακροτέρῳ κεκρημένον ἢ τοῦ οἰκείου ἢ

συλλαβῇ ἐμβεβλημένη, τὸ δὲ ἄν ἀφηρημένον τι ἢ αὐτοῦ, ἐπεκτεταμένον μὲν οἷον τὸ πόλεως πόληος καὶ τὸ Πηλείδου Πηληιάδεω, ἀφηρημένον δὲ οἷον τὸ κρῖ καὶ τὸ δῶ καὶ “μία γίνεται ἀμφοτέρων ὄψ”. ἐξηλλαγμένον δ’ ἐστὶν ὅταν τοῦ ὀνομαζομένου τὸ μὲν καταλείπη τὸ δὲ ποιῇ, οἷον τὸ “δεξιτερόν κατὰ μαζόν” ἀντὶ τοῦ δεξιόν.

αὐτῶν δὲ τῶν ὀνομάτων τὰ μὲν ἄρρενα τὰ δὲ θήλεα τὰ δὲ μεταξύ, ἄρρενα μὲν ὅσα τελευτᾷ εἰς τὸ Ν καὶ Ρ καὶ Σ καὶ ὅσα ἐκ τούτου σύγκειται (ταῦτα δ’ ἐστὶν δύο, Ψ καὶ Ξ), θήλεα δὲ ὅσα ἐκ τῶν φωνηέντων εἰς τε τὰ ἀεὶ μακρά, οἷον εἰς Η καὶ Ω, καὶ τῶν ἐπεκτεινομένων εἰς Α· ὥστε ἴσα συμβαίνει πλήθει εἰς ὅσα τὰ ἄρρενα καὶ τὰ θήλεα· τὸ γὰρ Ψ καὶ τὸ Ξ σύνθετά ἐστιν. εἰς δὲ ἄφωνον οὐδὲν ὄνομα τελευτᾷ, οὐδὲ εἰς φωνῆεν βραχύ. εἰς δὲ τὸ Ι τρία μόνον, μέλι κόμμι πέπερι. εἰς δὲ τὸ Υ πέντε. τὰ δὲ μεταξύ εἰς ταῦτα καὶ Ν καὶ Σ.

Λέξεως δὲ ἀρετὴ σαφὴ καὶ μὴ ταπεινὴ εἶναι. σαφεστάτη μὲν οὖν ἐστὶν ἡ ἐκ τῶν κυρίων ὀνομάτων, ἀλλὰ ταπεινὴ· παράδειγμα δὲ ἡ Κλεοφῶντος ποιήσις καὶ ἡ Σθενέλου. σεμνὴ δὲ καὶ ἐξαλλάττουσα τὸ ιδιωτικὸν ἢ τοῖς ξενικοῖς κεχρημένη· ξενικὸν δὲ λέγω γλωτταν καὶ μεταφορὰν καὶ ἐπέκτασιν καὶ πᾶν τὸ παρὰ τὸ κύριον. ἀλλ’ ἂν τις ἅπαντα τοιαῦτα ποιήσῃ, ἡ αἰνίγμα ἔσται ἡ βαρβαρισμός· ἂν μὲν οὖν ἐκ μεταφορῶν, αἰνίγμα, ἐὰν δὲ ἐκ γλωττῶν, βαρβαρισμός. αἰνίγματός τε γὰρ ἰδέα αὕτη ἐστὶ, τὸ λέγοντα ὑπάρχοντα ἀδύνατα συνάψαι· κατὰ μὲν οὖν τὴν τῶν ἄλλων ὀνομάτων σύνθεσιν οὐχ οἷόν τε τοῦτο ποιῆσαι, κατὰ δὲ τὴν μεταφορῶν ἐνδέχεται, οἷον “ἄνδρ’ εἶδον πυρὶ χαλκὸν ἐπ’ ἀνέρι κολλήσαντα”, καὶ τὰ τοιαῦτα. τὰ δὲ ἐκ τῶν γλωττῶν βαρβαρισμός. δεῖ ἄρα κεκρᾶσθαι πῶς τούτοις· τὸ μὲν γὰρ τὸ μὴ ιδιωτικὸν ποιήσει μὴδὲ ταπεινόν, οἷον ἡ γλωττα καὶ ἡ μεταφορὰ καὶ ὁ κόσμος καὶ τᾶλλα τὰ εἰρημένα εἶδη, τὸ δὲ κύριον τὴν σαφήνειαν. οὐκ ἐλάχιστον δὲ μέρος [1458b] συμβάλλεται εἰς τὸ σαφὲς τῆς λέξεως καὶ μὴ ιδιωτικὸν αἰ ἐπεκτάσεις καὶ ἀποκοπαὶ καὶ ἐξαλλαγαὶ τῶν ὀνομάτων· διὰ μὲν γὰρ τὸ ἄλλως ἔχειν ἢ ὥς τὸ κύριον παρὰ τὸ εἰωθὸς γινόμενον τὸ μὴ ιδιωτικὸν ποιήσει, διὰ δὲ τὸ κοινωνεῖν τοῦ εἰωθότος τὸ σαφὲς ἔσται. ὥστε οὐκ ὀρθῶς ψέγουσιν οἱ ἐπιτιμῶντες τῷ τοιοῦτῳ τρόπῳ τῆς διαλέκτου καὶ διακωμωδοῦντες τὸν ποιητὴν, οἷον Εὐκλείδης ὁ ἀρχαῖος, ὡς ῥάδιον ὄν ποιεῖν εἴ τις δώσει ἐκτείνειν ἐφ’ ὅποσον βούλεται, ἱαμβοποιήσας ἐν αὐτῇ τῇ λέξει “Επιχάρην εἶδον Μαραθῶνάδε βαδίζοντα”, καὶ “οὐκ ἂν

Περὶ δὲ τῆς διηγηματικῆς καὶ ἐν μέτρῳ μιμητικῆς, ὅτι δεῖ τοὺς μύθους καθάπερ ἐν ταῖς τραγωδίαις συνιστάναι δραματικούς καὶ περὶ μίαν πρᾶξιν ὅλην καὶ τελείαν ἔχουσιν ἀρχὴν καὶ μέσα καὶ τέλος, ἴν' ὥσπερ ζῶον ἐν ὅλῳ ποιῇ τὴν οἰκείαν ἡδονήν, δῆλον, καὶ μὴ ὁμοίας ἱστορίαις τὰς συνθέσεις εἶναι, ἐν αἷς ἀνάγκη οὐχὶ μιᾶς πράξεως ποιεῖσθαι δῆλωσιν ἄλλ' ἐνὸς χρόνου, ὅσα ἐν τούτῳ συνέβη περὶ ἓνα ἢ πλείους, ὧν ἕκαστον ὡς ἔτυχεν ἔχει πρὸς ἄλληλα. ὥσπερ γὰρ κατὰ τοὺς αὐτοὺς χρόνους ἢ τ' ἐν Σαλαμῖνι ἐγένετο ναυμαχία καὶ ἡ ἐν Σικελίᾳ Καρχηδονίων μάχη οὐδὲν πρὸς τὸ αὐτὸ συντείνουσαι τέλος, οὕτω καὶ ἐν τοῖς ἐφεξῆς χρόνοις ἐνίοτε γίνεται θάτερον μετὰ θάτερον, ἐξ ὧν ἐν οὐδὲν γίνεται τέλος. σχεδὸν δὲ οἱ πολλοὶ τῶν ποιητῶν τοῦτο δρῶσι. διὸ ὥσπερ εἶπομεν ἤδη καὶ ταύτῃ θεσπέσιος ἂν φανείη Ὅμηρος παρὰ τοὺς ἄλλους, τῷ μὴδὲ τὸν πόλεμον καίπερ ἔχοντα ἀρχὴν καὶ τέλος ἐπιχειρῆσαι ποιεῖν ὅλον· λίαν γὰρ ἂν μέγας καὶ οὐκ εὐσύνοπτος ἔμελλεν ἔσεσθαι ὁ μῦθος, ἢ τῷ μεγέθει μετριάζοντα καταπεπλεγμένον τῇ ποικιλίᾳ. νῦν δ' ἐν μέρος ἀπολαβὼν ἐπεισοδίοις κέχρηται αὐτῶν πολλοῖς, οἷον νεῶν καταλόγῳ καὶ ἄλλοις ἐπεισοδίοις [δῖς] διαλαμβάνει τὴν ποίησιν. οἱ δ' ἄλλοι περὶ ἓνα ποιοῦσι [1459b] καὶ περὶ ἓνα χρόνον καὶ μίαν πρᾶξιν πολυμερῆ, οἷον ὁ τὰ Κύπρια ποιήσας καὶ τὴν μικρὰν Ἰλιάδα. τοιγαροῦν ἐκ μὲν Ἰλιάδος καὶ Ὀδυσσεΐας μία τραγωδία ποιεῖται ἑκατέρας ἢ δύο μόναι, ἐκ δὲ Κυπρίων πολλαὶ καὶ τῆς μικρᾶς Ἰλιάδος [[πλέον] ὀκτώ, οἷον ὅπλων κρίσις, Φιλοκτήτης, Νεοπτόλεμος, Εὐρύπυλος, Πτωχεΐα, Λάκαινα, Ἰλίου πέρσις καὶ ἀπόπλους [καὶ Σίνων καὶ Τρωάδες]]. ἔτι δὲ τὰ εἶδη ταῦτα δεῖ ἔχειν τὴν ἐποποιίαν τῇ τραγωδίᾳ, ἢ γὰρ ἀπλὴν ἢ πεπλεγμένην ἢ ἠθικὴν ἢ παθητικὴν· καὶ τὰ μέρη ἔξω μελοποιίας καὶ ὄψεως ταῦτά· καὶ γὰρ περιπετειῶν δεῖ καὶ ἀναγνωρίσεων καὶ παθημάτων· ἔτι τὰς διανοίας καὶ τὴν λέξιν ἔχειν καλῶς. οἷς ἅπασιν Ὅμηρος κέχρηται καὶ πρῶτος καὶ ἱκανῶς. καὶ γὰρ τῶν ποιημάτων ἑκάτερον συνέστηκεν ἢ μὲν Ἰλιάς ἀπλοῦν καὶ παθητικόν, ἢ δὲ Ὀδύσεια πεπλεγμένον (ἀναγνωρίσις γὰρ διόλου) καὶ ἠθικὴ· πρὸς δὲ τούτοις λέξει καὶ διανοία πάντα ὑπερβέβληκεν.

Διαφέρει δὲ κατὰ τε τῆς συστάσεως τὸ μῆκος ἢ ἐποποιία καὶ τὸ μέτρον. τοῦ μὲν οὖν μήκους ὅρος ἱκανὸς ὁ εἰρημένος· δύνασθαι γὰρ δεῖ συννοεῖσθαι τὴν ἀρχὴν καὶ τὸ τέλος. εἴη δ' ἂν τοῦτο, εἰ τῶν μὲν ἀρχαίων ἐλάττους αἱ συστάσεις εἶεν, πρὸς δὲ τὸ πλῆθος τραγωδιῶν τῶν εἰς μίαν ἀκρόασιν τιθεμένων παρήκοιεν. ἔχει δὲ πρὸς τὸ

ἐπεκτείνεσθαι τὸ μέγεθος πολὺ τι ἢ ἐποποιία ἴδιον διὰ τὸ ἐν μὲν τῇ τραγωδίᾳ μὴ ἐνδέχεσθαι ἅμα πραττόμενα πολλὰ μέρη μιμεῖσθαι ἀλλὰ τὸ ἐπὶ τῆς σκηνῆς καὶ τῶν ὑποκριτῶν μέρος μόνον· ἐν δὲ τῇ ἐποποιίᾳ διὰ τὸ διηγήσιν εἶναι ἔστι πολλὰ μέρη ἅμα ποιεῖν περαινόμενα, ὅφ' ὧν οἰκείων ὄντων αὖξεται ὁ τοῦ ποιήματος ὄγκος. ὥστε τοῦτ' ἔχει τὸ ἀγαθὸν εἰς μεγαλοπρέπειαν καὶ τὸ μεταβάλλειν τὸν ἀκούοντα καὶ ἐπεισοδιοῦν ἀνομοίοις ἐπεισοδίοις· τὸ γὰρ ὅμοιον ταχὺ πληροῦν ἐκπίπτειν ποιεῖ τὰς τραγωδίας. τὸ δὲ μέτρον τὸ ἥρωικὸν ἀπὸ τῆς πείρας ἤρμοκεν. εἰ γὰρ τις ἐν ἄλλῳ τινὶ μέτρῳ διηγηματικὴν μίμησιν ποιοῖτο ἢ ἐν πολλοῖς, ἀπρεπὲς ἂν φαίνοιτο· τὸ γὰρ ἥρωικὸν στασιμώτατον καὶ ὀγκωδέστατον τῶν μέτρων ἐστίν (διὸ καὶ γλώττας καὶ μεταφορὰς δέχεται μάλιστα· περιττὴ γὰρ καὶ ἡ διηγηματικὴ μίμησις τῶν ἄλλων), τὸ δὲ ἱαμβεῖον καὶ τετράμετρον [1460a] κινητικὰ καὶ τὸ μὲν ὀρχηστικὸν τὸ δὲ πρακτικόν. ἔτι δὲ ἀτοπώτερον εἰ μὴ γινύοι τις αὐτά, ὥσπερ Χαιρήμων. διὸ οὐδεὶς μακρὰν σύστασιν ἐν ἄλλῳ πεποίηκεν ἢ τῷ Ἡρόφῳ, ἀλλ' ὥσπερ εἵπομεν αὐτῇ ἡ φύσις διδάσκει τὸ ἀρμόττον αὐτῇ αἰρεῖσθαι. Ὅμηρος δὲ ἄλλα τε πολλὰ ἄξιος ἐπαινέσθαι καὶ δὴ καὶ ὅτι μόνος τῶν ποιητῶν οὐκ ἄγνοεῖ ὁ δεῖ ποιεῖν αὐτόν. αὐτὸν γὰρ δεῖ τὸν ποιητὴν ἐλάχιστα λέγειν· οὐ γὰρ ἐστὶ κατὰ ταῦτα μιμητῆς, οἱ μὲν οὖν ἄλλοι αὐτοὶ μὲν δι' ὅλου ἀγωνίζονται, μιμοῦνται δὲ ὀλίγα καὶ ὀλιγάκις· ὁ δὲ ὀλίγα φρονησάμενος εὐθύς εἰσάγει ἄνδρα ἢ γυναῖκα ἢ ἄλλο τι ἦθος, καὶ οὐδέν' ἀήθη ἀλλ' ἔχοντα ἦθος. δεῖ μὲν οὖν ἐν ταῖς τραγωδίαις ποιεῖν τὸ θαυμαστόν, μᾶλλον δ' ἐνδέχεται ἐν τῇ ἐποποιίᾳ τὸ ἄλογον, δι' ὃ συμβαίνει μάλιστα τὸ θαυμαστόν, διὰ τὸ μὴ ὁρᾶν εἰς τὸν πράττοντα· ἐπεὶ τὰ περὶ τὴν Ἑκτορος δίωξιν ἐπὶ σκηνῆς ὄντα γελοῖα ἂν φανείη, οἱ μὲν ἐστῶτες καὶ οὐ διώκοντες, ὁ δὲ ἀνανεύων, ἐν δὲ τοῖς ἔπεσιν λανθάνει. τὸ δὲ θαυμαστόν ἡδύ· σημεῖον δέ, πάντες γὰρ προστιθέντες ἀπαγγέλλουσιν ὡς χαριζόμενοι. δεδίδαχεν δὲ μάλιστα Ὅμηρος καὶ τοὺς ἄλλους ψευδῇ λέγειν ὡς δεῖ. ἔστι δὲ τοῦτο παραλογισμός. οἶοντα γὰρ οἱ ἄνθρωποι, ὅταν τουδὶ ὄντος τοδὶ ἦ ἢ γινομένου γίνηται, εἰ τὸ ὕστερον ἔστιν, καὶ τὸ πρότερον εἶναι ἢ γίνεσθαι· τοῦτο δὲ ἐστὶ ψεῦδος, διὸ δεῖ, ἂν τὸ πρῶτον ψεῦδος, ἄλλο δὲ τούτου ὄντος ἀνάγκη εἶναι ἢ γενέσθαι ἢ, προσθεῖναι· διὰ γὰρ τὸ τοῦτο εἰδέναι ἀληθὲς ὃν παραλογίζεται ἡμῶν ἡ ψυχὴ καὶ τὸ πρῶτον ὡς ὄν. παράδειγμα δὲ τούτου τὸ ἐκ τῶν Νίπτρων. προαιρεῖσθαι τε δεῖ ἀδύνατα εἰκότα μᾶλλον ἢ δυνατὰ ἀπίθανα· τοὺς τε λόγους μὴ

συνίστασθαι ἐκ μερῶν ἀλόγων, ἀλλὰ μάλιστα μὲν μηδὲν ἔχειν ἄλογον, εἰ δὲ μή, ἔξω τοῦ μυθεύματος, ὥσπερ Οἰδίπους τὸ μὴ εἰδέναι πῶς ὁ Λάιος ἀπέθανεν, ἀλλὰ μὴ ἐν τῷ δράματι, ὥσπερ ἐν Ἡλέκτρῳ οἱ τὰ Πύθια ἀπαγγέλλοντες ἢ ἐν Μυσοῖς ὁ ἄφωνος ἐκ Τεγέας εἰς τὴν Μυσίαν ἦκων. ὥστε τὸ λέγειν ὅτι ἀνήρητο ἂν ὁ μῦθος γελοῖον· ἐξ ἀρχῆς γὰρ οὐ δεῖ συνίστασθαι τοιούτους. ἂν δὲ θῇ καὶ φαίνεται εὐλογωτέως ἐνδέχεσθαι καὶ ἄτοπον ἔπει καὶ τὰ ἐν Ὀδυσσεΐᾳ ἄλογα τὰ περὶ τὴν ἔκθεσιν ὡς οὐκ ἂν ἦν ἀνεκτὰ δῆλον [1460b] ἂν γένοιτο, εἰ αὐτὰ φαῦλος ποιητῆς ποιήσῃ· νῦν δὲ τοῖς ἄλλοις ἀγαθοῖς ὁ ποιητῆς ἀφανίζει ἡδύνων τὸ ἄτοπον. τῇ δὲ λέξει δεῖ διαπονεῖν ἐν τοῖς ἀργοῖς μέρεσιν καὶ μήτε ἠθικοῖς μήτε διανοητικοῖς· ἀποκρύπτει γὰρ πάλιν ἢ λίαν λαμπρὰ λέξεις τὰ τε ἦθη καὶ τὰς διανοίας.

Περὶ δὲ προβλημάτων καὶ λύσεων, ἐκ πόσων τε καὶ ποίων εἰδῶν ἐστίν, ὧδ' ἂν θεωροῦσιν γένοιτ' ἂν φανερόν. ἐπεὶ γὰρ ἐστὶ μιμητῆς ὁ ποιητῆς ὡπερανεὶ ζωγράφος ἢ τις ἄλλος εἰκονοποιός, ἀνάγκη μιμεῖσθαι τριῶν ὄντων τὸν ἀριθμὸν ἐν τι αἰεὶ, ἢ γὰρ οἷα ἦν ἢ ἔστιν, ἢ οἷα φασιν καὶ δοκεῖ, ἢ οἷα εἶναι δεῖ. ταῦτα δ' ἐξαγγέλλεται λέξει ἐν ἣ καὶ γλῶτται καὶ μεταφοραὶ καὶ πολλὰ πάθη τῆς λέξεώς ἐστι· δίδομεν γὰρ ταῦτα τοῖς ποιηταῖς. πρὸς δὲ τούτοις οὐχ ἡ αὐτὴ ὀρθότης ἐστὶν τῆς πολιτικῆς καὶ τῆς ποιητικῆς οὐδὲ ἄλλης τέχνης καὶ ποιητικῆς. αὐτῆς δὲ τῆς ποιητικῆς διττὴ ἁμαρτία, ἡ μὲν γὰρ καθ' αὐτήν, ἡ δὲ κατὰ συμβεβηκός. εἰ μὲν γὰρ προεῖλετο μιμῆσασθαι ἀδυναμίαν, αὐτῆς ἡ ἁμαρτία· εἰ δὲ τὸ προελέσθαι μὴ ὀρθῶς, ἀλλὰ τὸν ἵππον «ἄμ'» ἄμφω τὰ δεξιὰ προβεβληκότα, ἢ τὸ καθ' ἐκάστην τέχνην ἁμάρτημα, οἷον τὸ κατ' ἰατρικὴν ἢ ἄλλην τέχνην [ἢ ἀδύνατα πεποιῆται] ὅποιανοῦν, οὐ καθ' ἑαυτήν. ὥστε δεῖ τὰ ἐπιτιμήματα ἐν τοῖς προβλήμασιν ἐκ τούτων ἐπισκοποῦντα λύειν. πρῶτον μὲν τὰ πρὸς αὐτήν τὴν τέχνην· ἀδύνατα πεποιῆται, ἡμάρτηται· ἄλλ' ὀρθῶς ἔχει, εἰ τυγχάνει τοῦ τέλους τοῦ αὐτῆς (τὸ γὰρ τέλος εἴρηται), εἰ οὕτως ἐκπληκτικώτερον ἢ αὐτὸ ἢ ἄλλο ποιεῖ μέρος. παράδειγμα ἡ τοῦ Ἑκτορος δίωξις. εἰ μέντοι τὸ τέλος ἢ μᾶλλον ἢ «μὴ» ἦττον ἐνεδέχετο ὑπάρχειν καὶ κατὰ τὴν περὶ τούτων τέχνην, [ἡμαρτῆσθαι] οὐκ ὀρθῶς· δεῖ γὰρ εἰ ἐνδέχεται ὅλως μηδαμῇ ἡμαρτῆσθαι. ἔτι ποτέρων ἐστὶ τὸ ἁμάρτημα, τῶν κατὰ τὴν τέχνην ἢ κατ' ἄλλο συμβεβηκός; ἔλαττον γὰρ εἰ μὴ ἦδει ὅτι ἔλαφος θήλεια κέρατα οὐκ ἔχει ἢ εἰ ἀμιμήτως ἔγραψεν. πρὸς δὲ τούτοις ἐὰν ἐπιτιμᾶται ὅτι οὐκ ἀληθῆ, ἀλλ' ἴσως «ὥς» δεῖ, οἷον καὶ Σοφοκλῆς ἔφη αὐτὸς μὲν οἷους

δεῖ ποιεῖν, Εὐριπίδην δὲ οἷοι εἰσίν, ταύτῃ λυτέον. εἰ δὲ μηδετέρως, ὅτι οὕτω φασίν, οἷον τὰ περὶ θεῶν· ἴσως γὰρ οὔτε βέλτιον οὕτω λέγειν οὐτ' ἀληθῆ, ἀλλ' εἰ ἔτυχεν [1461a] ὥσπερ Ξενοφάνει· ἀλλ' οὖν φασι. τὰ δὲ ἴσως οὐ βέλτιον μέν, ἀλλ' οὕτως εἶχεν, οἷον τὰ περὶ τῶν ὄπλων, “ἔγχεα δὲ σφιν ὄρθ' ἐπὶ σαυρωτῆρος”· οὕτω γὰρ τότε ἐνόμιζον, ὥσπερ καὶ νῦν Ἰλλυριοί. περὶ δὲ τοῦ καλῶς ἢ μὴ καλῶς εἰ εἴρηται τινι ἢ πέπρακται, οὐ μόνον σκεπτέον εἰς αὐτὸ τὸ πεπραγμένον ἢ εἰρημένον βλέποντα εἰ σπουδαῖον ἢ φαῦλον, ἀλλὰ καὶ εἰς τὸν πράττοντα ἢ λέγοντα πρὸς ὃν ἢ ὅτε ἢ ὅτῳ ἢ οὗ ἕνεκεν, οἷον εἰ μείζονος ἀγαθοῦ, ἵνα γένηται, ἢ μείζονος κακοῦ, ἵνα ἀπογένηται. τὰ δὲ πρὸς τὴν λέξιν ὁρῶντα δεῖ διαλύειν, οἷον γλώττῃ τὸ “οὐρήας μὲν πρῶτον”· ἴσως γὰρ οὐ τοὺς ἡμίονους λέγει ἀλλὰ τοὺς φύλακας· καὶ τὸν Δόλωνα, “ὅς ῥ' ἦ τοι εἶδος μὲν ἦν κακός”, οὐ τὸ σῶμα ἀσύμμετρον ἀλλὰ τὸ πρόσωπον αἰσχρόν, τὸ γὰρ εὐεῖδές οἱ Κρήτες τὸ εὐπρόσωπον καλοῦσι· καὶ τὸ “ζωρότερον δὲ κέραει” οὐ τὸ ἄκρατον ὡς οἰνόφυλξιν ἀλλὰ τὸ θᾶπτον. τὸ δὲ κατὰ μεταφορὰν εἴρηται, οἷον “πάντες μὲν ῥα θεοὶ τε καὶ ἄνδρες εὐδον παννύχιον”· ἅμα δὲ φησιν “ἦ τοι ὅτ' ἐς πεδίον τὸ Τρωικὸν ἀθρήσειεν, αὐλῶν συρίγγων τε ὄμαδον”· τὸ γὰρ πάντες ἀντὶ τοῦ πολλοὶ κατὰ μεταφορὰν εἴρηται, τὸ γὰρ πᾶν πολὺ τι. καὶ τὸ “οἶη δ' ἄμμορος” κατὰ μεταφορὰν, τὸ γὰρ γνωριμώτατον μόνον. κατὰ δὲ προσωδίαν, ὥσπερ Ἰππίας ἔλυσεν ὁ Θάσιος, τὸ “δίδομεν δὲ οἱ εὐχος ἀρέσθαι” καὶ “τὸ μὲν οὗ καταπύθεται ὄμβρῳ”. τὰ δὲ διαιρέσει, οἷον Ἐμπεδοκλῆς “αἶψα δὲ θνήτ' ἐφύοντο τὰ πρὶν μάθον ἀθάνατ' εἶναι ζωρά τε πρὶν κέκρητο”. τὰ δὲ ἀμφιβολία, “παρώχηκεν δὲ πλέω νύξ·” τὸ γὰρ πλείω ἀμφιβολόν ἐστιν. τὰ δὲ κατὰ τὸ ἔθος τῆς λέξεως. τὸν κεκραμένον οἶνον φασιν εἶναι, ὅθεν πεποιῆται “κνημὶς νεοτεύκτου κασσιτέροιο”· καὶ χαλκέας τοὺς τὸν σίδηρον ἐργαζομένους, ὅθεν εἴρηται ὁ Γανυμήδης Διὶ οἰνοχοεῦειν, οὐ πινόντων οἶνον. εἴη δ' ἂν τοῦτό γε «καὶ» κατὰ μεταφορὰν. δεῖ δὲ καὶ ὅταν ὄνομά τι ὑπεναντίωμά τι δοκῇ σημαίνειν, ἐπισκοπεῖν ποσαχῶς ἂν σημήναιε τοῦτο ἐν τῷ εἰρημένῳ, οἷον τῷ “τῇ ῥ' ἔσχετο χάλκεον ἔγχος” τὸ ταύτῃ κωλυθῆναι ποσαχῶς ἐνδέχεται, ὡδὶ ἢ ὡδί, ὡς μάλιστ' ἂν τις ὑπολάβοι· κατὰ τὴν καταντικρὺ ἢ [1461b] ὡς Γλαῦκων λέγει, ὅτι ἔνιοι ἀλόγως προὑπολαμβάνουσιν τι καὶ αὐτοὶ κατανηφιζόμενοι συλλογίζονται, καὶ ὡς εἰρηκότος ὃ τι δοκεῖ ἐπιτιμῶσιν, ἂν ὑπεναντίον ἢ τῇ αὐτῶν οἰήσει. τοῦτο δὲ πέπονθε τὰ περὶ Ἰκάριον. οἶονται γὰρ αὐτὸν

Λάκωνα εἶναι· ἄτοπον οὖν τὸ μὴ ἐντυχεῖν τὸν Τηλέμαχον αὐτῷ εἰς Λακεδαιμόνα ἐλθόντα. τὸ δ' ἴσως ἔχει ὥσπερ οἱ Κεφαλλῆνές φασι· παρ' αὐτῶν γὰρ γῆμαι λέγουσι τὸν Ὀδυσσέα καὶ εἶναι Ἰκάδιον ἀλλ' οὐκ Ἰκάριον· δι' ἀμάρτημα δὲ τὸ πρόβλημα εἰκὸς ἐστίν. ὅλως δὲ τὸ ἀδύνατον μὲν πρὸς τὴν ποίησιν ἢ πρὸς τὸ βέλτιον ἢ πρὸς τὴν δόξαν δεῖ ἀνάγειν. πρὸς τε γὰρ τὴν ποίησιν αἰρετώτερον πιθανὸν ἀδύνατον ἢ ἀπίθανον καὶ δυνατόν· τοιούτους εἶναι οἷον Ζεῦξις ἔγραφεν, ἀλλὰ βέλτιον· τὸ γὰρ παράδειγμα δεῖ ὑπερέχειν. πρὸς ἃ φασιν τᾶλογα· οὕτω τε καὶ ὅτι ποτὲ οὐκ ἄλογόν ἐστιν· εἰκὸς γὰρ καὶ παρὰ τὸ εἰκὸς γίνεσθαι. τὰ δ' ὑπεναντίως εἰρημένα οὕτω σκοπεῖν ὥσπερ οἱ ἐν τοῖς λόγοις ἔλεγκοι εἰ τὸ αὐτὸ καὶ πρὸς τὸ αὐτὸ καὶ ὡσαύτως, ὥστε καὶ αὐτὸν τῇ πρὸς ἃ αὐτὸς λέγει ἢ ὃ ἂν φρόνιμος ὑποθῆται. ὀρθὴ δ' ἐπιτίμησις καὶ ἀλογία καὶ μοχθηρία, ὅταν μὴ ἀνάγκης οὔσης μὴθὲν χρήσεται τῷ ἀλόγῳ, ὥσπερ Εὐριπίδης τῷ Αἰγεῖ, ἢ τῇ πονηρίᾳ, ὥσπερ ἐν Ὁρέσῃ <τῇ> τοῦ Μενελάου. τὰ μὲν οὖν ἐπιτιμήματα ἐκ πέντε εἰδῶν φέρουσιν· ἢ γὰρ ὡς ἀδύνατα ἢ ὡς ἄλογα ἢ ὡς βλαβερὰ ἢ ὡς ὑπεναντία ἢ ὡς παρὰ τὴν ὀρθότητα τὴν κατὰ τέχνην. αἱ δὲ λύσεις ἐκ τῶν εἰρημένων ἀριθμῶν σκεπτεται. εἰσὶν δὲ δώδεκα.

Πότερον δὲ βελτίων ἢ ἐποποιικὴ μίμησις ἢ ἡ τραγικὴ, διαπορήσειεν ἂν τις. εἰ γὰρ ἡ ἥττον φορτικὴ βελτίων, τοιαύτη δ' ἢ πρὸς βελτίους θεατὰς ἐστίν ἀεὶ, λίαν δῆλον ὅτι ἡ ἅπαντα μιμουμένη φορτικὴ· ὥς γὰρ οὐκ αἰσθανομένων ἂν μὴ αὐτὸς προσθῇ, πολλὴν κίνησιν κινεῖνται, οἷον οἱ φαῦλοι αὐληταὶ κυλιόμενοι ἂν δίσκον δέη μιμεῖσθαι, καὶ ἔλκοντες τὸν κορυφαῖον ἂν Σκύλλαν αὐλῶσιν. ἡ μὲν οὖν τραγωδία τοιαύτη ἐστίν, ὡς καὶ οἱ πρότερον τοὺς ὑστέρους αὐτῶν ᾤοντο ὑποκριτάς· ὡς λίαν γὰρ ὑπερβάλλοντα πίθηκον ὁ Μυννίσκος τὸν Καλλιπίδην ἐκάλει, τοιαύτη δὲ δόξα καὶ περὶ Πινδάρου [1462a] ἦν· ὡς δ' οὗτοι ἔχουσι πρὸς αὐτούς, ἡ ὅλη τέχνη πρὸς τὴν ἐποποιίαν ἔχει. τὴν μὲν οὖν πρὸς θεατὰς ἐπιεικεῖς φασιν εἶναι <οῖ> οὐδὲν δέονται τῶν σχημάτων, τὴν δὲ τραγικὴν πρὸς φαύλους· εἰ οὖν φορτικὴ, χείρων δῆλον ὅτι ἂν εἴη. πρῶτον μὲν οὐ τῆς ποιητικῆς ἢ κατηγορία ἀλλὰ τῆς ὑποκριτικῆς, ἐπεὶ ἔστι περιεργάζεσθαι τοῖς σημείοις καὶ ῥαψωδοῦντα, ὅπερ [ἐστὶ] Σωσίστρατος, καὶ διάδοντα, ὅπερ ἐποίει Μνασίθεος ὁ Ὁπούντιος. εἴτα οὐδὲ κίνησις ἅπανα ἀποδοκιμαστέα, εἴπερ μὴδ' ὄρχησις, ἀλλ' ἢ φαύλων, ὅπερ καὶ Καλλιπίδῃ ἐπετιμᾶτο καὶ νῦν ἄλλοις ὡς οὐκ ἐλευθέρας γυναῖκας μιμουμένων. ἔτι ἡ τραγωδία καὶ ἄνευ κινήσεως

ποιεῖ τὸ αὐτῆς, ὥσπερ ἡ ἐποποιία· διὰ γὰρ τοῦ ἀναγινώσκειν φανερὰ ὅποια τίς ἐστίν· εἰ οὖν ἐστὶ τὰ γ' ἄλλα κρείττων, τοῦτό γε οὐκ ἀναγκαῖον αὐτῇ ὑπάρχειν. ἔπειτα διότι πάντ' ἔχει ὅσαπερ ἡ ἐποποιία (καὶ γὰρ τῷ μέτρῳ ἔξῃσθαι χρῆσθαι), καὶ ἔτι οὐ μικρὸν μέρος τὴν μουσικὴν [καὶ τὰς ὁφείας], δι' ἧς αἱ ἡδοναὶ συνίστανται ἐναργέστατα· εἴτα καὶ τὸ ἐναργὲς ἔχει καὶ ἐν τῇ ἀναγνώσει καὶ ἐπὶ τῶν ἔργων· ἔτι τῷ ἐν ἐλάττονι μήκει τὸ τέλος [1462b] τῆς μιμήσεως εἶναι (τὸ γὰρ ἁθροώτερον ἥδιον ἢ πολλῶ κεκραμένον τῷ χρόνῳ, λέγω δ' οἷον εἴ τις τὸν Οἰδίπουν θεῖη τὸν Σοφοκλέους ἐν ἔπεσιν ὅσοις ἡ Ἰλιάς)· ἔτι ἦττον μία ἡ μίμησις ἢ τῶν ἐποποιῶν (σημεῖον δέ, ἐκ γὰρ ὅποιασούν μιμήσεως πλείους τραγωδίαί γίνονται), ὥστε ἐὰν μὲν ἓνα μῦθον ποιῶσιν, ἢ βραχέως δεικνύμενον μύουρον φαίνεσθαι, ἢ ἀκολουθοῦντα τῷ τοῦ μέτρου μήκει ὑδαρῇ· λέγω δὲ οἷον ἐὰν ἐκ πλειόνων πράξεων ἢ συγκειμένη, ὥσπερ ἡ Ἰλιάς ἔχει πολλὰ τοιαῦτα μέρη καὶ ἡ Ὀδύσσεια <ᾧ> καὶ καθ' ἑαυτὰ ἔχει μέγεθος· καίτοι ταῦτα τὰ ποιήματα συνέστηκεν ὥς ἐνδέχεται ἄριστα καὶ ὅτι μάλιστα μιᾶς πράξεως μίμησις. εἰ οὖν τούτοις τε διαφέρει πᾶσιν καὶ ἔτι τῷ τῆς τέχνης ἔργῳ (δεῖ γὰρ οὐ τὴν τυχοῦσαν ἡδονὴν ποιεῖν αὐτὰς ἀλλὰ τὴν εἰρημένην), φανερόν ὅτι κρείττων ἂν εἴη μᾶλλον τοῦ τέλους τυγχάνουσα τῆς ἐποποιίας.

περὶ μὲν οὖν τραγωδίας καὶ ἐποποιίας, καὶ αὐτῶν καὶ τῶν εἰδῶν καὶ τῶν μερῶν, καὶ πόσα καὶ τί διαφέρει, καὶ τοῦ εὖ ἢ μὴ τίνες αἰτίαι, καὶ περὶ ἐπιτιμήσεων καὶ λύσεων, εἰρήσθω τοσαῦτα.

* - * - Μύρωνος καθ' ἱερῶν ὁμόσαντες ἀριστίνδην.
καταγνωσθέντος δὲ τοῦ ἄγου, α[ὕ]τοι μὲν ἐκ τῶν τάφων
ἐξεβλήθησαν, τὸ δὲ γένος αὐτῶν ἔφυγεν ἀειφυγίαν. Ἐ[πι]μενίδης δ'
ὁ Κρής ἐπὶ τούτοις ἐκάθηρε τὴν πόλιν.

Μετὰ δὲ ταῦτα συνέβη στασιάζειν τοὺς τε γνωρίμους [2] καὶ τὸ πλῆθος πολὺν χρόνον τὸν δῆμον. ἦν γὰρ αὐτῶν ἡ πολιτεία τοῖς τε ἄλλοις ὀλιγαρχικὴ πᾶσι, καὶ δὴ καὶ ἐδούλευον οἱ πένητες τοῖς πλουσίοις καὶ αὐτοὶ καὶ τὰ τέκνα καὶ αἱ γυναῖκες· καὶ ἐκαλοῦντο πελάται καὶ ἐκτήμοροι· κατὰ ταύτην γὰρ τὴν μίσθωσιν [ἡ]ργάζοντο τῶν πλουσίων τοὺς ἀγροὺς (ἡ δὲ πᾶσα γῆ δι' ὀλίγων ἦν), καὶ εἰ μὴ τὰς μισθώσεις ἀποδίδοιεν, ἀγώγιμοι καὶ αὐτοὶ καὶ οἱ παῖδες ἐγίγνοντο· καὶ οἱ δανεισμοὶ πᾶσιν ἐπὶ τοῖς σώμασιν ἦσαν μέχρι Σόλωνος· [3] οὗτος δὲ πρῶτος ἐγένετο τοῦ δήμου προστάτης. χαλεπώτατον μὲν οὖν καὶ πικρότατον ἦν τοῖς πολλοῖς τῶν κατὰ τὴν πολιτείαν τὸ δουλεύειν· οὐ μὴν ἀλλὰ καὶ ἐπὶ τοῖς ἄλλοις ἐδυσχέραινον· οὐδενὸς γὰρ ὥς εἰπεῖν ἐτύγχανον μετέχοντες.

[1] Ἦν δ' ἡ τάξις τῆς ἀρχαίας πολιτείας τῆς πρὸ Δράκοντος τοιάδε. τὰς μὲν ἀρχὰς [καθ]ίστασαν ἀριστίνδην καὶ πλουτίνδην. ἦρχον δὲ τὸ μὲν πρῶτον διὰ [βίου], μετὰ δὲ [2] ταῦτα [δε]καέτειαν. μέγισται δὲ καὶ πρῶται τῶν ἀρχῶν ἦσαν βασιλεὺς καὶ πολέμαρχος καὶ [ἄ]ρ[χω]ν· τούτων δὲ πρώτη μὲν ἡ τοῦ βασιλέως (αὕτη γὰρ ἦν πάτριος), δευτέρα δ' ἐπικατέστη [πολ]εμαρχία, διὰ τὸ γενέσθαι τινὰς τῶν βασιλέων τὰ πολέμια μαλακοὺς, ὅθεν κ]αὶ τὸν Ἴωνα [3] μετε[πέ]μψαντο χρείας καταλαβούσης. τελευταία δ' ἡ τ[οῦ ἄ]ρ[χ]οντ[ος· ο]ἱ μὲν γὰρ πλείους ἐπὶ Μέδοντος, ἔνιοι δ' ἐπὶ Ἀκάστου φασὶ γενέσθαι [ταύ]την· τεκμήριον δ' ἐπιφέρουσιν, ὅτι οἱ ἐννέα ἄρχοντες ὁμνύουσι[ν] ἡ «μὴν» τὰ ἐπὶ Ἀκάστου ὄρκια ποιήσιν, ὡς ἐπὶ τούτου τῆς βασιλείας παραχωρησάντων τῶν Κοδ[ρι]δ[ῶν] ἀντὶ τῶν δοθεισῶν τῷ ἄρχοντι δωρεῶν. τοῦτο μὲν οὖν ὁποτέρως ποτ' ἔχει, μικρὸν ἂν παραλλάττοι τοῖς χρόνοις. ὅτι δὲ τελευταία τούτων ἐγένετο τῶν ἀρχῶν, σημεῖον καὶ [τὸ] μηδὲν τῶν πατρίων τὸν ἄρχ[ο]ντα διοικεῖν, ὥσπερ ὁ βασιλεὺς καὶ ὁ πολέμαρχος, ἀλλ' ἀπλῶ[ς] τὰ ἐπίθετα· διὸ καὶ νεωστὶ γέγονεν ἡ ἀρχὴ μεγάλη, τοῖς ἐπ[ι]θέτοις αὐξηθε[ῖ]σα.

[4] θ[ε]ς]μοθέται δὲ πολλοῖς ὕστερον ἔτεσιν ἠρέθησαν, ἥδη κατ' ἐνιαυτὸν αἰρουμέ[νων] τὰς ἀρχάς, ὅπως ἀναγράψαντες τὰ θέσμια φυλάττωσι πρὸς τὴν τῶν ἀμφι[ς]βητ[ού]ντων κρίσιν· διὸ καὶ μόνη τῶν ἀρχῶν οὐκ ἐγένετο πλειῶν [5] ἐνιαυσίας. τοῖς μὲν οὖν χρόνοις τοσοῦτον προέχουσιν ἀλλήλων. ἦσαν δ' οὐχ ἅμα πάντες οἱ ἐννέα ἄρχοντες, ἀλλ' ὁ μὲν βασιλεὺς εἶχε τὸ νῦν καλούμενον Βουκόλιον, πλησίον τοῦ πρυτανείου (σημεῖον δέ· ἔτι καὶ νῦν γὰρ τῆς τοῦ βασιλέως γυναικὸς ἡ σύμμειξις ἐνταῦθα γίγνεται τῷ Διονύσῳ καὶ ὁ γάμος), ὁ δὲ ἄρχων τὸ πρυτανεῖον, ὁ δὲ πολέμαρχος τὸ Ἐπὶλύκειον (ὃ πρότερον μὲν ἐκαλεῖτο πολεμαρχεῖον, ἐπεὶ δὲ Ἐπίλυκος ἀνφοδόκησε καὶ κατεσκεύασεν αὐτὸ πολεμαρχ[χ]ήσας, Ἐπὶλύκειον ἐκλήθη), θεσμοθέται δ' εἶχον τὸ θεσμοθετεῖον. ἐπὶ δὲ Σόλωνος [ἄπ]αντες εἰς τὸ θεσμοθετεῖον συνῆλθον. κύριοι δ' ἦσαν καὶ τὰς δίκας αὐτοτελεῖς [κρίν]ειν, καὶ οὐχ ὥσπερ νῦν προανακρίνειν. τὰ μὲν οὖν περὶ τὰς ἀρχὰς τοῦτον εἶχε τὸν τρόπον.

[6] ἡ δὲ τῶν Ἀρεοπαγιτῶν βουλὴ τὴν μὲν τάξιν εἶχε τοῦ διατηρεῖν

τοὺς νόμους, διώκει δὲ τὰ πλεῖστα καὶ τὰ μέγιστα τῶν ἐν τῇ πόλει,
καὶ κολάζουσα καὶ ζημιοῦσα πάντας τοὺς ἀκοσμοῦντας κυρίως. ἡ
γὰρ αἵρεσις τῶν ἀρχόντων ἀριστίνδην καὶ πλουτίνδην ἦν, ἐξ ὧν οἱ
Ἀρεοπαγῖται καθίσταντο. διὸ καὶ μόνη τῶν ἀρχῶν αὕτη μεμένηκε διὰ
βίου καὶ νῦν.

[1] Ἡ μὲν οὖν πρώτη πολιτεία ταύτην εἶχε τὴν ὑπογραφὴν. μετὰ δὲ ταῦτα χρόνου τινὸς οὐ πολλοῦ διελθόντος, ἐπ' Ἀρισταίχμου ἄρχοντος, Δρά[κ]ων τοὺς θεσμοὺς ἔθηκεν· [2] ἡ δὲ τάξις αὐτοῦ τόνδε τὸν τρόπον εἶχε. ἀπεδέδοτο μὲν ἡ πολιτεία τοῖς ὅπλα παρεχομένοις· ἡροῦντο δὲ τοὺς μὲν ἐννέα ἄρχοντας καὶ τοὺς ταμίας οὐσίαν κεκτημένους οὐκ ἐλάττω δέκα μνῶν ἐλευθέραν, τὰς δ' ἄλλας ἀρχὰς <τὰς> ἐλάττους ἐκ τῶν ὅπλα παρεχομένων, στρατηγοὺς δὲ καὶ ἱπάρχους οὐσίαν ἀποφαίνοντας οὐκ ἔλαττον ἢ ἑκατὸν μνῶν ἐλευθέραν, καὶ παῖδας ἐκ γαμετῆς γυναικὸς γνησίους ὑπὲρ δέκα ἔτη γεγονότας. τούτους δ' ἔδει διε[γγ]υᾶν τοὺς πρυτάνεις καὶ τοὺς στρατηγοὺς καὶ τοὺς ἱπάρχους τοὺς ἔνους μέχρι εὐθυνῶν, ἐγγυητὰς δ' ἐκ τοῦ αὐτοῦ τέλους δεχομένους, οὐπὲρ οἱ στρατηγοὶ καὶ οἱ ἱπάρχοι.

[3] βουλευεῖν δὲ τετρακοσίους καὶ ἓνα τοὺς λαχόντας ἐκ τῆς πολιτείας. κληροῦσθαι δὲ καὶ ταύτην καὶ τὰς ἄλλας ἀρχὰς τοὺς ὑπὲρ τριάκοντ' ἔτη γεγονότας, καὶ δις τὸν αὐτὸν μὴ ἄρχειν πρὸ τοῦ πάντας ἐξελθεῖν· τότε δὲ πάλιν ἐξ ὑπαρχῆς κληροῦν. εἰ δέ τις τῶν βουλευτῶν, ὅταν ἔδρα βουλῆς ἢ ἐκκλησίας ᾗ, ἐκλείποι τὴν σύνοδον, ἀπέτινον ὁ μὲν πεντακοσιομέδιμνος τρεῖς δραχμάς, ὁ δὲ ἱππεὺς δύο, [4] ζευγίτης δὲ μίαν. ἡ δὲ βουλὴ ἢ ἐξ Ἀρείου πάγου φύλαξ ἦν τῶν νόμων καὶ διετήρει τὰς ἀρχάς, ὅπως κατὰ τοὺς νόμους ἄρχωσιν. ἐξῆν δὲ τῷ ἀδικουμένῳ πρὸ[ς] τὴν τῶν] Ἀρεοπαγιτῶν βουλήν εἰσαγγέλλειν, ἀποφαίνοντι παρ' ὃν [5] ἀδικεῖται νόμον. ἐπὶ δὲ τοῖς σῶ[μ]ασιν ἦσαν οἱ δανεισμοί, καθάπερ εἴρηται, καὶ ἡ χώρα δι' ὀλίγων ἦν.

[1] Τοιαύτης δὲ τῆς τάξεως οὔσης ἐν τῇ πολιτείᾳ, καὶ τῶν πολλῶν δουλευόντων τοῖς ὀλίγοις, ἀντέστη τοῖς γνωρίμοις [2] ὁ δῆμος. ἰσχυρᾶς δὲ τῆς στάσεως οὔσης καὶ πολὺν χρόνον ἀντικαθημένων ἀλλήλοις, εἶλοντο κοινῇ διαλλακτὴν καὶ ἄρχοντα Σόλωνα, καὶ τὴν πολιτείαν ἐπέτρεψαν αὐτῷ, ποιήσαντι τὴν ἐλεγείαν ἣς ἐστὶν ἀρχή·

γινώσκω, καὶ μοι φρενὸς ἔνδοθεν ἄλγεα κεῖται,
 πρεσβυτάτην ἐσορῶν γαῖαν Ἰαονίας
 κλινομένην·

ἐν ἣ πρὸς ἐκατέρους ὑπὲρ ἐκατέρων μάχεται καὶ διαμφισβητεῖ, καὶ μετὰ ταῦτα κοινῇ παραινεῖ καταπαύειν τὴν [3] ἐνεστῶσαν φιλονικίαν. ἦν δ' ὁ Σόλων τῇ μὲν [φύ]σει καὶ τῇ δόξῃ τῶν πρώτων, τῇ δ' οὐσίᾳ καὶ τοῖς πράγμασι τῶν μέσων, ὥς ἔκ τε τῶν ἄλλων ὁμολογεῖται, καὶ αὐτὸς ἐν τοῖσδε τοῖς ποιήμασιν μαρτυρεῖ, παραινῶν τοῖς πλουσίοις μὴ πλεονεκτεῖν·

ὕμεῖς δ' ἡσυχάσαντες ἐνὶ φρεσὶ καρτερὸν ἦτορ,
 οἱ πολλῶν ἀγαθῶν ἐς κόρον [ἡ]λάσατε,
 ἐν μετρίοισι τίθεσ[θ]ε μέγαν νόον. οὔτε γὰρ ἡμεῖς
 πεισόμεθ', οὔθ' ὑμῖν ἄρτια τα[ῦτ'] ἔσεται.

καὶ ὅλως αἰεὶ τὴν αἰτίαν τῆς στάσεως ἀνάπτει τοῖς πλουσίοις· διὸ καὶ ἐν ἀρχῇ τῆς ἐλεγείας δεδοικέναι φησὶ 'τὴν τε φι[λαργυρ]ίαν τὴν θ' ὑπερηφανίαν', ὥς διὰ ταῦτα τῆς ἔχθρας ἐνεστώσης.

[1] Κύριος δὲ γενόμενος τῶν πραγμάτων Σόλων τόν τε δῆμον ἠλευθέρωσε καὶ ἐν τῷ π[α]ρόντι καὶ εἰς τὸ μέλλον, κωλύσας δ[ανε]ίζειν ἐπὶ τοῖς σώμασιν, καὶ νόμους ἔθηκε καὶ χρεῶν ἀπ[ο]κοπὰς ἐποίησε, καὶ τῶν ἰδίων καὶ τῶν δ[η]μοσίων, ἃς σεισάχθειαν καλοῦσιν, ὡς ἀποσεισάμενοι [2] τὸ βάρος. ἐν οἷς πειρῶνται τιν[ες] διαβάλλ[ει]ν αὐτόν· συνέβη γὰρ τῷ Σόλωνι μέλλοντι ποιεῖν τὴν σεισάχθειαν προειπεῖν τισι τῶν [γν]ωρίμω[ν], ἔπειθ' ὡς μὲν οἱ δημοτικοὶ λέγουσι, παραστρατηγ[η]θῆναι διὰ τῶν φίλων, ὡς δ' οἱ β[ουλ]όμενοι βλασ[φ]ημεῖν, καὶ αὐτόν κοινωνεῖν. δανεισάμενοι γὰρ οὗτοι συνεπρίαντο πολλὴν χώραν, καὶ μετ' οὐ πολὺ τῆς τῶν χρεῶν ἀποκοπῆς γενομένης ἐπλούτουν. ὅθεν φασὶ γενέσθαι τοὺς ὕστερον δοκοῦντας εἶναι [3] παλαιοπλούτους. οὐ μὴν ἀλλὰ πιθ[ανώ]τερος ὁ τῶν δημοτικῶν λόγος· οὐ γὰρ εἰς ἐν μὲν τοῖς ἄλλοις οὕτω μέτριον γενέσθαι καὶ κοινόν, [ὥ]στ' ἐξὸν αὐτῷ τοὺς ἐ[τ]έρους ὑποποιησάμενον τυραννεῖν τῆς πόλεως, ἀμφοτέροις ἀπεχ[θέ]σθαι καὶ περὶ πλείονος ποιήσασθαι τὸ καλὸν καὶ τὴν τῆς πόλεως σωτηρίαν ἢ τὴν αὐτοῦ πλεονεξίαν, ἐν [4] οὕτω δὲ μικροῖς καὶ ἀνα[ξί]οις καταρρυπαίνειν ἑαυτόν. ὅτι δὲ ταύτην ἔσχε τὴν ἐξουσίαν, τά τε πράγματα νοσοῦντα μαρτυρεῖ, καὶ ἐν τοῖς ποιήμασιν αὐτὸς πολλαχοῦ μέμνηται, καὶ οἱ ἄλλοι συνομολογοῦσι πάντες. ταύτην μὲν οὖν χρὴ νομίζειν ψευδῇ τὴν αἰτίαν εἶναι.

[1] Πολιτείαν δὲ κατέστησε καὶ νόμους ἔθηκεν ἄλλους, τοῖς δὲ Δράκοντος θεσμοῖς ἐπαύσαντο χρώμενοι πλὴν τῶν φονικῶν. ἀναγράψαντες δὲ τοὺς νόμους εἰς τοὺς κύρβεις ἔστησαν ἐν τῇ στοᾷ τῇ βασιλείῳ καὶ ὤμοσαν χρῆσεσθαι πάντες. οἱ δ' ἑννέα ἄρχοντες ὁμνύντες πρὸς τῷ λίθῳ κατεφάτιζον ἀναθήσειν ἀνδριάντα χρυσοῦν, εἴαν τινα παραβῶσι τῶν νόμων· [2] ὅθεν ἔτι καὶ νῦν οὕτως ὁμνίουσι. κατέκλεισεν δὲ τοὺς νόμους εἰς ἑκατὸν ἔτη καὶ διέταξε τὴν πολιτείαν [3] τόνδε <τὸν> τρόπον. τιμήματι διεῖλεν εἰς τέτταρα τέλη, καθάπερ διήρητο καὶ πρότερον, εἰς πεντακοσιομέδιμνον καὶ ἱπ[πέα] καὶ ζευγίτην καὶ θῆτα. καὶ τὰς με[ν] ἄλλ[α]ς ἀρχὰς ἀπένειμεν ἄρχειν ἐκ πεντακοσιομεδίωνων καὶ ἱπέων καὶ ζευγιδῶν, τοὺς ἑννέα ἄρχοντας καὶ τοὺς ταμίας καὶ τοὺς πωλητὰς καὶ τοὺς ἑνδεκα καὶ τοὺς κωλακρέτας, ἐκάστοις ἀνάλογον τῷ μεγέθει τοῦ τιμήματος ἀποδιδούς τὴν ἀρχήν· τοῖς δὲ τὸ θητικὸν τελοῦσιν ἐκκλησίας καὶ [4] δικαστηρίων μετέδωκε μόνον. ἔδει δὲ τελεῖν πεντακοσιομέδιμνον μὲν, ὃς ἂν ἐκ τῆς οἰκείας ποιῇ πεντακόσια μέτρα τὰ συνάμφω ξηρὰ καὶ ὑγρά, ἱππάδα δὲ τοὺς τριακόσια ποιοῦντας - ὥς δ' ἑνιοὶ φασὶ τοὺς ἵπποτροφεῖν δυναμένους· σημεῖον δὲ φέρουσι τό τε ὄνομα τοῦ τέλους, ὥς ἂν ἀπὸ τοῦ πράγματος κείμενον, καὶ τὰ ἀναθήματα τῶν ἀρχαίων· ἀνάκειται γὰρ ἐν ἀκροπόλει εἰκὼν Διφίλου, ἐφ' ἣ ἐπιγέγραπται τάδε·

Διφίλου Ἀνθεμίων τήνδ' ἀνέθηκε θεοῖς,

θητικοῦ ἀντὶ τέλους ἱππὰδ' ἀμειψάμενος. καὶ παρέστηκεν ἵππος ἐκμαρτυρῶν, ὥς τὴν ἱππάδα τοῦτο σημαίνουσιν. οὐ μὴν ἄλλ' εὐλογώτερον τοῖς μέτροις διηρηῆσθαι, καθάπερ τοὺς πεντακοσιομεδίμνους - ζευγίσιον δὲ τελεῖν τοὺς διακόσια τὰ συνάμφω ποιοῦντας. τοὺς δ' ἄλλους θητικόν, οὐδεμιᾶς μετέχοντας ἀρχῆς. διὸ καὶ νῦν ἐπειδὴν ἔρηται τὸν μέλλοντα κληροῦσθαί τιν' ἀρχήν, ποῖον τέλος τελεῖ, οὐδ' ἂν εἷς εἴποι θητικόν.

[1] Τὰς δ' ἀρχὰς ἐποίησε κληρωτὰς ἐκ προκρίτων, οὓς ἐκάστη προκρίνειε τῶν φυλῶν. προύκρινεν δ' εἰς τοὺς ἐννέα ἄρχοντας ἐκάστη δέκα, καὶ τοῦ[των ἐκ]λήρουν· ὅθεν ἔτι διαμένει ταῖς φυλαῖς τὸ δέκα κληροῦν ἐκάστην, εἴτ' ἐκ τούτων κυαμεύειν. σημεῖον δ' ὅτι κληρωτὰς ἐποίησεν ἐκ τῶν τιμημάτων ὁ περὶ τῶν ταμιῶν νόμος, ὃ χρώμενοι δια[τελ]οῦσιν ἔτι καὶ νῦν· κελεύει γὰρ κληροῦν τοὺς ταμίας [2] ἐκ πεντακοσιομεδίμων. [Σόλ]ων μὲν οὖν οὕτως ἐνομοθέτησεν περὶ τῶν ἐννέα ἀρχόντων· τὸ γὰρ ἀρχαῖον ἢ ἐν Ἀ[ρεί]φ [πάγφ βου]λή, ἀνακαλεσαμένη καὶ κρίνασα καθ' αὐτήν, τὸν ἐπιτήδειον ἐφ' ἐκάστη τῶν ἀρχῶν ἐπ' [3] [ἐν]ια[υτ]ὸν [διατάξα]σα ἀπέστελλεν. φυλαὶ δ' ἦσαν δ' καθάπερ πρότερον, καὶ φυλοβασιλεῖς τέτταρες. [ἐκ] δὲ [τῆς] φυ[λῆς] ἐκάστης ἦσαν νενεμημέναι τριτῦες μὲν τρεῖς, ναυκραφαὶ δὲ δώδεκα καθ' ἐκάστην· ἦν δ' ἐπὶ τῶν ναυκραφῶν ἀρχὴ καθεστηκυῖα ναύκραροι, τεταγμένη πρὸς τε τὰς εἰσφοράς καὶ τὰς δαπ[άνας] τὰς γιγνομένας· διὸ καὶ ἐν τοῖς νόμοις τοῖς Σόλωνος οἷς οὐκέτι χρῶνται πολλαχο[ῦ] γέ[γραπται], 'τοὺς ναυκράρους εἰσπράττειν', καὶ 'ἀναλίσκειν [4] ἐκ τοῦ ναυκραρικοῦ ἀργυρ[ί]ου'. β[ου]λὴν δ' ἐποίησε τετρακοσίους, ἑκατὸν ἐξ ἐκάστης φυλῆς, τὴν δὲ τῶν Ἀρεοπαγιτῶν ἔταξεν ἐπὶ [τὸ] νομοφυλακεῖν, ὥσπερ ὑπῆρχεν καὶ πρότερον ἐπίσκοπος οὖσα τῆς πολιτείας, καὶ τὰ τε ἄλλα τὰ πλεῖστα καὶ τὰ μέγιστα τῶν πολιτικῶν διετήρει, καὶ τοὺς ἁμαρτάνοντας ἠϋθυνεν κυρία οὖσα καὶ [ζη]μιοῦν καὶ κολάζειν, καὶ τὰς ἐκτίσεις ἀνέφερεν εἰς πόλιν, οὐκ ἐπιγράφουσα τὴν πρόφασιν δι' ὃ [τὸ ἐ]κτ[ίν]εσθαι, καὶ τοὺς ἐπὶ καταλύσει τοῦ δήμου συνισταμένους ἔκρινεν, [5] Σόλωνος θέντ[ος] νόμον εἰσα[γγ]ελ[ία]ς περὶ αὐτῶν. ὁρῶν δὲ τὴν μὲν πόλιν πολλακίς στασιάζουσιν, τῶν δὲ πολιτῶν ἐνίους διὰ τὴν ῥαθυμίαν [ἀγα]πῶντας τὸ αὐτόματον, νόμον ἔθηκεν πρὸς αὐτοὺς ἴδιον, ὃς ἂν στασιαζούσης τῆς πόλεως μ[ὴ] θῆται τὰ ὄπλα μηδὲ μεθ' ἑτέρων, ἄτιμον εἶναι καὶ τῆς πόλεως μὴ μετέχειν.

[1] Τὰ μὲν οὖν [περὶ τὰ]ς ἀρχὰς τ[οῦ]τον εἶχε τὸν τρόπον. δοκεῖ δὲ τῆς Σόλωνος πολιτείας τρία ταῦτ' εἶναι τὰ δημοτικώτατα· πρῶτον μὲν καὶ μέγιστον τὸ μὴ δανεῖζειν ἐπὶ τοῖς σώμασιν, ἔπειτα τὸ ἐξεῖναι τῷ βουλομένῳ τιμωρ[εῖ]ν ὑπὲρ τῶν ἀδικουμένων, τρίτον δὲ «ὧ καὶ» μάλιστα φασιν ἰσχυκέναι τὸ πλῆθος, ἢ εἰς τὸ δικαστή[ριον] ἔφε[σι]ς· κύριος γὰρ ὢν ὁ δῆμος τῆς ψήφου, κύριος γίνεταί τῆς πολιτείας.

[2] ἔτι δὲ καὶ διὰ τὸ μὴ γεγράφθ[αι το]ὺς νόμους ἀπλῶς μηδὲ σαφῶς, ἀλλ' ὥσπερ ὁ τῶν κλήρων καὶ ἐπικλήρων, ἀνάγκη [πο]λλὰς ἀμφισβητήσεις γίνεσθαι, καὶ πάντα βραβεύειν καὶ τὰ κοινὰ καὶ τὰ ἴδια τὸ δικαστή[ριον]. οἴονται μὲν οὖν τινες ἐπίτηδες ἀσαφεῖς αὐτὸν ποιῆσαι τοὺς νόμους, ὅπως ἦ τῆς κρίσεως [ὁ] δῆ[μος κ]ύριος. οὐ μὴν εἰκός, ἀλλὰ διὰ τὸ μὴ δύνασθαι καθόλου περιλαβεῖν τὸ βέλτιστον· οὐ γὰρ [δ]ίκ[αιον] ἐκ τῶν νῦν γιγνομένων, ἀλλ' ἐκ τῆς ἄλλης πολιτείας θεωρεῖν τὴν ἐκείνου βούλησιν.

[1] Ἐν μὲν οὖν τοῖς νόμοις ταῦτα δοκεῖ θεῖναι δημοτικά, πρὸ δὲ τῆς νομοθεσίας ποιήσας τὴν τῶν χρ[ρ]εῶν [ἀπο]κοπὴν, καὶ μετὰ ταῦτα τὴν τε τῶν μέτρων καὶ σταθμῶν καὶ [2] τὴν τοῦ νομίσματος αὐξησιν. ἔπ' ἐκείνου γὰρ ἐγένετο καὶ τὰ μέτρα μείζω τῶν Φειδωνείων, καὶ ἡ μνᾶ, πρότερον ἔχ[ο]υσα [ς]ταθμὸν ἑβδομήκοντα δραχμάς, ἀνεπληρώθη ταῖς ἑκατόν. ἦν δ' ὁ ἀρχαῖος χαρακτήρ διδραχμον. ἐποίησε δὲ καὶ σταθμὰ πρὸς τ[ὸ] νόμισμα, τ[ρ]εῖς καὶ ἑξήκοντα μνᾶς τὸ τάλαντον ἀγούσας, καὶ ἐπιδιενεμήθησαν [αἱ τ]ρεῖς μναῖ τῷ στατήρι καὶ τοῖς ἄλλοις σταθμοῖς.

[1] Διατάξας δὲ τὴν πολιτείαν ὄνπερ εἴρηται τρόπον, ἐπειδὴ προσιόντες αὐτῷ περὶ τῶν νόμων ἠνώχλουν, τὰ μὲν ἐπιτιμῶντες τὰ δὲ ἀνακρίνοντες, βουλόμενος μήτε ταῦτα κινεῖν, μήτ' ἀπεχθάνεσθαι παρῶν, ἀποδημίαν ἐποίησατο κατ' ἐμπορίαν ἅμα καὶ θεωρίαν εἰς Αἴγυπτον, ἐ[ἰπ]ὼν ὥς οὐχ [ῆ]ξει δέκα ἐτῶν. οὐ γὰρ οἶεσθαι δίκαιον εἶναι τοὺς νόμους ἐξηγεῖσθαι παρῶν, ἀλλ' ἕκαστον τὰ γεγραμμένα [2] ποιεῖν. ἅμα δὲ καὶ συνέβαινεν αὐτῷ τῶν τε γνωρίμων διαφόρους γεγενῆσθαι πολλοὺς διὰ τὰς τῶν χρεῶν ἀποκοπάς, καὶ τὰς στάσεις ἀμφοτέρας μεταθέσθαι διὰ τὸ παράδοξον αὐτοῖς γενέσθαι τὴν κατάστασιν. ὁ μὲν γὰρ δῆμος ὄρετο πάντ' ἀνάδαστα ποιήσῃν αὐτόν, οἱ δὲ γνώριμοι πάλιν εἰς τὴν αὐτὴν τάξιν ἀποδώσειν, ἢ μ[ικρὸν] παραλλάξ[ειν]. «ὁ δὲ» Σόλων ἀμφοτέροις ἠναντιώθη, καὶ ἐξὸν αὐτῷ μεθ' ὁποτέρων ἐβούλετο συστά[ντ]α τυραννεῖν, εἴλετο πρὸς ἀμφοτέρους ἀπεχθέσθαι, σώσας τὴν πατρίδα καὶ τὰ βέλ[τι]στα νομοθετήσας.

[1] Ταῦτα δ' ὅτι τοῦτον <τὸν> τρόπον ἔσχεν οἱ τ' ἄλλοι συμφωνοῦσι πάντες, καὶ αὐτὸς ἐν τῇ ποιήσει μέμνηται περὶ αὐτῶν ἐν τοῖσδε·

δήμῳ μὲν γὰρ ἔδωκα τόσον γέρας, ὅσπον ἀπαρκεῖ,
τιμῆς οὐτ' ἀφελὼν οὐτ' ἐπορεξάμενος·
οἱ δ' εἶχον δύναμιν καὶ χρήμασιν ἦσαν ἀγητοί,
καὶ τοῖς ἐφρασάμην μηδὲν ἀεικὲς ἔχειν.
ἔστην δ' ἀμφιβαλὼν κρατερόν σάκος ἀμφοτέροισι,
νικᾶν δ' οὐκ εἶας· οὐδετέρους ἀδίκως.

[2] πάλιν δ' ἀποφαινόμενος περὶ τοῦ πλήθους, ὡς αὐτῷ δεῖ χρῆσθαι·

δῆμος δ' ὧδ' ἂν ἄριστα σὺν ἡγεμόνεσσιν ἔποιτο,
μήτε λῖαν ἀνεθείς μήτε βιαζόμενος.
τίκτει γὰρ κόρος ὕβριν, ὅταν πολὺς ὄλβος ἔπηται
ἀνθρώποισιν, ὅσοις μὴ νόος ἄρτιος ᾖ.

[3] καὶ πάλιν δ' ἐτέρωθί που λέγει περὶ τῶν διανείμασθαι τὴν γῆν βουλομένων·

οἱ δ' ἐφ' ἀρπαγαῖσιν ἦλθον, ἐλπίδ' εἶχον ἀφνεάν,
κἀδόκουν ἕκαστος αὐτῶν ὄλβον εὐρήσειν πολύν,
καὶ με κωτίλλοντα λείως τραχὺν ἐκφανεῖν νόον.
χαῦνα μὲν τότε· ἐφράσαντο, νῦν δέ μοι χολοῦμενοι
λοξ[ὸν ὁ]φθαλμοῖς· ὁρῶσι πάντες ὥστε δήιον.
οὐ χρεῶν· ἃ μὲν γὰρ εἶπα, σὺν θεοῖσιν ἦνυσσα,
ἄ[λλ]α δ' ο[ὐ] μάτην ἔερδον, οὐδέ μοι τυραννίδος
ἀνδάνει βία τι [ρέζ]ειν, οὐδέ πιεῖ[ρ]ας χθονὸς
πατρίδος κακοῖσιν ἐσθλοὺς ἰσομοιρίαν ἔχειν.

[4] [πάλιν] δὲ καὶ περὶ τῆς ἀπ[οκ]οπῆς τῶν χ[ρε]ῶν καὶ τῶν δουλευόντων μὲν πρότερον, ἐλευθερωθέντων δὲ διὰ τὴν σεισάχθειαν·

ἐγὼ δὲ τῶν μὲν οὔνεκα ξ[υ]νήγαγον

συμμαρτυροίη ταῦτ' ἂν ἐν δίκῃ Χρόνου

πρόσθεν δὲ δουλεύουσα, νῦν ἐλευθέρα.
πολλοὺς δ' Ἀθήνας, πατρίδ' εἰς θεόκτιτον,
ἀνήγαγον πραθέντας, ἄλλον ἐκδίκως,
ἄλλον δικαίως, τοὺς δ' ἀναγκαίης ὑπὸ
χρειοῦς φυγόντας, γλῶσσαν οὐκέτ' Ἀττικὴν
ιέντας, ὡς ἂν πολλαχῇ πλανωμένους·
τοὺς δ' ἐνθάδ' αὐτοῦ δουλίην ἀεικέα
ἔχοντας, ἦθη δεσποτῶν τρομευμέν[ους],
ἐλευθέρους ἔθηκα. ταῦτα μὲν κράτει
νομοῦ βίην τε καὶ δίκην συναρμόσας

θεσμοὺς δ' ὁμοίως τῷ κακῷ τε κάγαθῷ,
εὐθεῖαν εἰς ἕκαστον ἀρμόσας δίκην,
ἔγραψα. κέντρον δ' ἄλλος ὡς ἐγὼ λαβών,
κακοφραδῆς τε καὶ φιλοκτῆμων ἀνὴρ,
οὐκ ἂν κατέσχε δῆμον. εἰ γὰρ ἦθελον
ἂ τοῖς ἐναντίο[ισι]ν ἦνδανεν τότε,
αὐθις δ' ἂ τοῖσιν οὔτεροι φρασαίατο,
πολλῶν ἂν ἀνδρῶν ἥδ' ἐχηρώθη πόλις.
τῶν οὐνεκ' ἀλκὴν πάντοθεν ποιούμενος
ὡς ἐν κυσὶν πολλῇσιν ἐστράφην λύκος.

[5] καὶ πάλιν ὀνειδίζων πρὸς τὰς ὕστερον αὐτῶν μεμψιμοιρίας
ἀμφοτέρων·

δῆμῳ μὲν εἰ χρὴ διαφάδην ὀνειδίσαι,
ἂ νῦν ἔχουσιν οὐποτ' ὀφθαλμοῖσιν ἂν
εὐδοντες εἶδον.
ὅσοι δὲ μείζους καὶ βίαν ἀμείνονες,
αἰνοῖεν ἂν με καὶ φίλον ποιοίατο.
εἰ γάρ τις ἄλλος, φησί, ταύτης τῆς τιμῆς ἔτυχεν,
οὐκ ἂν κατέσχε δῆμον οὐδ' ἐπαύσατο,
πρὶν ἀνταράξας πῖα ἑξείλεν γάλα.
ἐγὼ δὲ τούτων ὥσπερ ἐν μεταιχμίῳ
ὄρος κατέστην.

[1] Τὴν μὲν οὖν ἀποδημίαν ἐποιήσατο διὰ ταύτας τὰς αἰτίας. Σόλωνος δ' ἀποδημήσαντος, ἔτι τῆς πόλεως τεταραγμένης ἐπὶ μὲν ἔτη τέτταρα διηγῶν ἐν ἡσυχίᾳ· τῷ δὲ πέμπτῳ μετὰ τὴν Σόλωνος ἀρχὴν οὐ κατέστησαν ἄρχοντα διὰ τὴν στ[άς]ιν, καὶ πάλιν ἔτει πέμπτῳ διὰ τὴν αὐτὴν αἰτίαν [2] ἀναρχίαν ἐποίησαν. μετὰ δὲ ταῦτα διὰ τῶν αὐτῶν χρόνων Δαμασσίας αἰρεθεὶς ἄρχων ἔτη δύο καὶ δύο μῆνας ἥρξεν, ἕως ἐξηλάθη βία τῆς ἀρχῆς. εἴτ' ἔδοξεν αὐτοῖς διὰ τὸ στασιάζειν ἄρχοντας ἐλέσθαι δέκα, πέντε μὲν εὐπατριδῶν, τρεῖς δὲ ἀ[γ]ροίκων, δύο δὲ δημιουργῶν, καὶ οὗτοι τὸν μετὰ Δαμασίαν ἥρξαν ἐνιαυτόν. ὃ καὶ δῆλον ὅτι μεγίστην εἶχεν δύναμιν ὁ ἄρχων· φαίνονται γὰρ αἰεὶ στασιάζοντες [3] περὶ ταύτης τῆς ἀρχῆς. ὅλως δὲ διετέλουν νοσοῦντες τὰ πρὸς ἑαυτούς, οἱ μὲν ἀρχὴν καὶ πρόφασιν ἔχοντες τὴν τῶν χρεῶν ἀποκοπὴν (συνεβεβήκει γὰρ αὐτοῖς γεγενῆσθαι πένησιν), οἱ δὲ τῇ πολιτείᾳ δυσχεραίνοντες διὰ τὸ μεγάλην γεγενῆσθαι μεταβολήν, ἔνιοι δὲ διὰ [τὴν] πρὸς ἀλλήλους [4] φιλονικίαν. ἦσαν δ' αἱ στάσεις τρεῖς· μία μὲν τῶν παραλίων, ᾧν προειστήκει Μεγακλῆς ὁ Ἀλκμέωνος, οἵπερ ἐδόκουν μάλιστα διώκειν τὴν μέσσην πολιτείαν. ἄλλη δὲ τῶν πεδιακῶν, οἱ τὴν ὀλιγαρχίαν ἐζήτουν· ἡγεῖτο δ' αὐτῶν Λυκοῦργος. τρίτη δ' ἡ τῶν διακρίων, ἐφ' ἣν τεταγμένος ἦν [5] Πεισίστρατος, δημοτικ[κ]ώτατος εἶναι δοκῶν. προσεκεκόσμηντο δὲ τούτοις οἱ τε ἀφ[η]ρημένοι τὰ χρέα διὰ τὴν ἀπορ[ί]αν, καὶ οἱ τῷ γένει μὴ καθαροὶ διὰ τὸν φόβον· σημεῖον δ', ὅτι μετὰ τὴν [τῶν] τυράννων κατάλυσιν ἐποίησαν διαψηφισμόν, ὥς πολλῶν κοινωνούντων τῆς πολιτείας οὐ προσῆκον. εἶχον δ' ἕκαστοι τὰς ἐπωνυμίας ἀπὸ τῶν τόπων ἐν οἷς ἐγεώργουν.

[1] Δημοτικώτατος δ' εἶναι δοκῶν ὁ Πεισίστρατος καὶ σφόδρ' εὐδοκιμηκῶς ἐν τῷ πρὸς Μεγαρέας πολέμῳ, κατατραυματίσας ἑαυτὸν συνέπεισε τὸν δῆμον, ὥς ὑπὸ τῶν ἀντιστασιωτῶν ταῦτα πεπονθῶς, φυλακὴν ἑαυτῷ δοῦναι τοῦ σώματος, Ἀριστίωνος γράψαντος τὴν γνώμην. λαβὼν δὲ τοὺς κορυνηφόρους καλουμένους, ἐπαναστὰς μετὰ τούτων τῷ δήμῳ, κατέσχε τὴν ἀκρόπολιν ἔτει δευτέρῳ καὶ τριακοστῷ μετὰ τὴν τῶν νόμων θέσιν, ἐπὶ Κωμέου ἄρχοντος.

[2] λέγεται δὲ Σόλωνα Πεισιστράτου τὴν φυλακὴν αἰτοῦντος ἀντιλέξει καὶ εἰπεῖν ὅτι τῶν μὲν εἴη σοφώτερος, τῶν δ' ἀνδρειό[τε]ρος· ὅσοι μὲν γὰρ ἀγνοοῦσι Πεισίστρατον ἐπιτιθέμενον τυραν[νίδι], σοφώτερος εἶναι τούτων, ὅσοι δ' εἰδότες κατασιωπῶσιν, ἀνδρειότερος. ἐπεὶ δὲ λέγων [οὐκ ἔ]πειθεν, ἐξαράμενος τὰ ὄπλα πρὸ τῶν θυρῶν, αὐτὸς μὲν ἔφη βεβροθηκέναι τῇ πατρίδι, καθ' ὅσον ἦν δυνατός (ἤδη γὰρ σφόδρα πρεσβύτης ἦν), ἀξιοῦν δὲ καὶ τοὺς ἄλλους [3] ταῦτο τοῦτο ποιεῖν. Σόλων μὲν [οὖν ο]ὐδὲν ἤνυσεν τότε παρακαλῶν. Πεισίστρατος δὲ λαβὼν τὴν ἀρχὴν διώκει τὰ κοινά, πολιτικῶς μᾶλλον ἢ τυραννικῶς. οὐπω δὲ τῆς ἀρχῆς ἐρριζωμένης, ὁμοφρονήσαντες οἱ περὶ τὸν Μεγακλέα καὶ τὸν Λυκοῦργον, ἐξέβαλον αὐτὸν ἔκτῳ ἔτει μετὰ τὴν [4] πρώτην κατάστασιν, ἐφ' Ἥγησιου ἄρχοντος. ἔτει δὲ δωδεκάτῳ μετὰ ταῦτα περιελανόμενος ὁ Μεγακλῆς τῇ στάσει, πάλιν ἐπικηρυκευσάμενος πρὸς τὸν Πεισίστρατον, ἐφ' ᾧ τε τὴν θυγατέρα αὐτοῦ λήψεται, κατήγαγεν αὐτὸν ἀρχαίως καὶ λίαν ἀπλῶς. προδιασπείρας γὰρ λόγον, ὥς τῆς Ἀθηνᾶς καταγούσης Πεισίστρατον, καὶ γυναῖκα μεγάλην καὶ καλὴν ἐξευρών, ὥς μὲν Ἡρόδοτός φησιν ἐκ τοῦ δήμου τῶν Παιανιέων, ὥς δ' ἔνιοι λέγουσιν ἐκ τοῦ Κολλυτοῦ στεφανόπωλιν Θραῦτταν, ἥ ὄνομα Φύη, τὴν θεὸν ἀπομιμησάμενος τῷ κόσμῳ, συνεισήγαγεν μετ' αὐτοῦ· καὶ ὁ μὲν Πεισίστρατος ἐφ' ἄρματος εἰσήλαινε, παραιβατούσης τῆς γυναικός, οἱ δ' ἐν τῷ ἅστει προσκυνοῦντες ἐδέχοντο θαυμάζοντες.

[1] Ἡ μὲν οὖν πρώτη κάθοδος ἐγένετο τοιαύτη. μετὰ δὲ ταῦτα ὡς ἐξέπεσε τὸ δεύτερον, ἔτει μάλιστα ἐβδόμῳ μετὰ τὴν κάθοδον, (οὐ γὰρ πολὺν χρόνον κατέσχευεν, ἀλλὰ διὰ τὸ μὴ βούλεσθαι τῇ τοῦ Μεγακλέους θυγατρὶ συγγίγνεσθαι, [2] φοβηθεὶς ἀμφοτέρας τὰς στάσεις ὑπεξῆλθεν). καὶ πρῶτον μὲν συνώκισε περὶ τὸν Θερμαῖον κόλπον χωρίον ὃ καλεῖται Ῥαΐκηλος, ἐκεῖθεν δὲ παρήλθεν εἰς τοὺς περὶ Πάγγαιον τόπους, ὅθεν χρηματισάμενος καὶ στρατιώτας μισθωσάμενος, ἐλθὼν εἰς Ἑρέτριαν ἐνδεκάτῳ πάλιν ἔτει τότ'ε᾽ πρῶτον ἀνασώσασθαι βίᾳ τὴν ἀρχὴν ἐπεχείρει, συμπροθυμουμένων αὐτῷ πολλῶν μὲν καὶ ἄλλων, μάλιστα δὲ Θηβαίων καὶ Λυγδάμιος τοῦ Ναξίου, ἔτι δὲ τῶν ἱππέων [3] τῶν ἐχόντων ἐν Ἑρετρίᾳ τὴν πολιτείαν. νικήσας δὲ τὴν ἐπὶ Παλληνίδι μάχην καὶ λαβὼν τὴν [π]όλιν καὶ παρελόμενος τοῦ δήμου τὰ ὅπλα, κατεῖχεν ἤδη τὴν τυρρανίδα βεβαίως· καὶ Νάξον ἐλὼν ἄρχοντα κατέστησε Λύγδαμιν.

[4] παρεῖλε δὲ τοῦ δήμου τὰ ὅπλα τόνδε τὸν τρόπον. ἐξοπλάσιαν ἐν τῷ Θησείῳ ποιησάμενος ἐκκλησιάζειν ἐπεχείρει, καὶ [χρόνον προσηγό]ρευεν μικρόν, οὐ φασκόντων δὲ κατακούειν, ἐκέλευσεν αὐτοὺς προσαναβῆναι πρὸς τὸ πρόπυλον τῆς ἀκροπόλεως, ἵνα γεγωνῇ μᾶλλον. ἐν ᾧ δ' ἐκεῖνος διέτριβε δημηγορῶν, ἀνελόντες οἱ ἐπὶ τούτῳ τεταγμένοι τ[ὰ ὅπλα], καὶ [κατα]κλείσαντες εἰς τὰ πλησίον οἰκήματα τοῦ Θησείου, διεσήμηναν ἐλθόντες πρὸς τὸν Πεισίστρατον. ὁ δὲ ἐπεὶ τὸν ἄλλον λόγον ἐπετέλεσεν, εἶπε καὶ περὶ τῶν ὅπλων τὸ γεγονός, ὡς οὐ χρὴ θαυμάζειν οὐδ' ἀθυμεῖν, ἀλλ' ἀπελθόντας ἐπὶ τῶν ἰδίων εἶναι, τῶν δὲ κοινῶν αὐ[τὸς] ἐπ[ι]μελήσεσθαι πάντων.

[1] Ἡ μὲν οὖν Πεισιστράτου τυραννὶς ἐξ ἀρχῆς τε κατέστη [2] τοῦτον τὸν τρόπον, καὶ μεταβολὰς ἔσχεν τοσαύτας. διώκει δ' ὁ Πεισίστρατος, ὥσπερ εἴρηται, τὰ περὶ τὴν πόλιν μετρίως καὶ μᾶλλον πολιτικῶς ἢ τυραννικῶς. ἔν τε γὰρ τοῖς ἄλλοις φιλόανθρωπος ἦν καὶ πρᾶος καὶ τοῖς ἀμαρτάνουσι συγγνωμονικός, καὶ δὴ καὶ τοῖς ἀ[πό]ροις προεδάνειζε χρήματα πρὸς τὰς ἐργασίας, ὥστε διατρέφεσθαι [3] γεωργοῦντας. τοῦτο δ' ἐποίει δυοῖν χάριν, ἵνα μήτε ἐν τῷ ἄστει διατρίβωσιν, ἀλλὰ διεσπαρμένοι κατὰ τὴν χώραν, καὶ ὅπως εὐποροῦντες τῶν μετρίων καὶ πρὸς τοῖς ἰδίους ὄντες, μήτ' ἐπιθυμῶσι μήτε σχολάζω[σι]ν ἐπιμελεῖσθαι [4] τῶν κοινῶν. ἅμα δὲ συνέβαιεν αὐτῷ καὶ τὰς προσόδους γίγνεσθαι μείζους, ἐξεργαζομένης τῆς χώρας. ἐπράττετο [5] γὰρ ἀπὸ τῶν γιγνομένων δεκάτην. διὸ καὶ τοὺς κατὰ δήμους κατεσκεύασε δικαστάς, καὶ αὐτὸς ἐξῆι πολλάκις εἰς τὴν χώραν, ἐπισκοπῶν καὶ διαλύων τοὺς διαφορομένους, ὅπως μὴ καταβαίνοντες εἰς τὸ ἄστὺ παραμελῶσι τῶν ἔργων.

[6] τοιαύτης γάρ τινος ἐξόδου τῷ Πεισιστράτῳ γιγνομένης, συμβῆναί φασι τὰ περὶ τὸν ἐν τῷ [Υμ]ητῷ γεωργοῦντα τὸ κληθὲν ὕστερον χωρίον ἀτελές. ἰδὼν γάρ τινα παντελῶς [π]έτρας σκάπτοντα καὶ ἐργαζόμενον, διὰ τὸ θαυμάσαι τὸν παῖδα ἐκέλευσεν ἐρέσθαι, τί γίγνεται ἐκ τοῦ χωρίου. ὁ δ' ὅσα κακὰ καὶ ὀδύνας ἔφη, 'καὶ τούτων τῶν κακῶν καὶ τῶν ὀδυνῶν Πεισίστρατον δεῖ λαβεῖν τὴν δεκάτην.' ὁ μὲν οὖν ἄνθρωπος ἀπεκρίνατο ἀγνοῶν, ὁ δὲ Πεισίστρατος ἤσθεις διὰ τὴν παρρησίαν καὶ τὴν φιλερ[γ]ίαν [7] ἀτελῇ πάντων ἐποίησεν αὐτόν. οὐδὲν δὲ τὸ πλῆθος οὐδ' ἐν τοῖς ἄλλοις παρώχλει [ι] κατὰ τὴν ἀρχήν, ἀλλ' αἰεὶ παρεσκε[ύ]αζεν εἰρήνην καὶ ἐτήρει τὴν ἡσυχίαν· διὸ καὶ πολλάκ[ις] ἐ[θρ]ύλλο[υ]ν ὥς ἡ Πεισιστράτου τυραννὶς ὁ ἐπὶ Κρόν[ου] βίος εἴη· συνέβη γὰρ ὕστερον δια[δε]ξ[α]μένων [8] τῶν υἱέων πολλῷ γενέσθαι τραχυτέραν τὴν ἀρχήν. μέγιστον δὲ πάντων ἦ[ν] τῶν εἰ[ρη]μένων τὸ δημοτικὸν εἶναι τῷ ἦθει καὶ φιλόανθρωπον. ἐν τε γὰρ τοῖς ἄλλο[ις] ἐβ[ούλ]ετο πάντα διοικεῖν κατὰ τοὺς νόμους, οὐδεμίαν ἑαυτῷ πλεονεξίαν διδοῦς, [κ]αί [ποτ]ε προσκληθεὶς φόνου δίκην εἰς Ἄρειον πάγον, αὐτὸς μὲν ἀπήντησεν ὡς ἀπο[λο]γησόμενος, [9] ὁ δὲ προσκαλεσάμενος φοβηθεὶς ἔλιπεν. διὸ καὶ πολὺν χρόνον

ἔμεινεν <έν> [τῇ ἀρ]χ[ῇ], καὶ [ὄ]τ' ἐκπέσοι πάλιν ἀνελάμβανε ῥαδίως. ἐβούλοντο γὰρ καὶ τῶν γνωρίμων καὶ τῶν δημοτικῶν οἱ πολλοί. τοὺς μὲν γὰρ ταῖς ὁμιλίαις, τοὺς δὲ ταῖς εἰς τὰ ἴδια βοηθείαις προσ[ή]γετο, [10] καὶ πρὸς ἀμφοτέρους ἐπεφύκει καλῶς. ἦσαν δὲ καὶ τοῖς Ἀθηναίοις οἱ περὶ τῶν τυράννων νόμοι πρᾶοι κατ' ἐκείνους τοὺς καιρούς, οἳ τ' ἄλλοι καὶ δὴ καὶ ὁ μάλιστα καθήκων πρὸς τὴν τῆς τυραννίδος <κατάστασιν>. νόμος γὰρ αὐτοῖς ἦν ὅδε. 'θέσμια τάδε Ἀθηναίων καὶ πάτρια· ἐάν τινες τυραννεῖν ἐπανιστῶνται ἐπὶ τυραννίδι, ἢ συγκαθιστῇ τὴν τυραννίδα, ἄτιμον εἶναι καὶ αὐτὸν καὶ γένος.'

[1] Πεισίστρατος μὲν οὖν ἐγκατεγήρασε τῇ ἀρχῇ, καὶ ἀπέθανε νοσήσας ἐπὶ Φιλόνεω ἄρχοντας, ἀφ' οὗ μὲν κατέστη τὸ πρῶτον τύραννος, ἔτη τριάκοντα καὶ τρία βιώσας, ἃ δ' [2] ἐν τῇ ἀρχῇ διέμεινε, ἐνὸς δέοντα εἴκοσι. ἔφυγε γὰρ τὰ λοιπά. διὸ καὶ φανερώς ληροῦσιν «οἱ» φάσκοντες ἐρώμενον εἶναι Πεισίστρα[τον] Σόλωνος, καὶ στρατηγεῖν ἐν τῷ πρὸς Μεγαρέας πολέμῳ περὶ Σαλαμῖνος· οὐ γὰρ ἐνδέχεται ταῖς ἡλικίαις, ἐάν τις ἀναλογίζηται τὸν ἐκατέρου [3] βίον καὶ ἐφ' οὗ ἀπέθανεν ἄρχοντας. τελευτήσαντος δὲ Πεισιστράτου, κατεῖχον οἱ υἱεῖς τὴν ἀρχήν, προάγοντες τὰ πράγματα τὸν αὐτὸν τρόπον. ἦσαν δὲ δύο μὲν ἐκ τῆς γαμετῆς Ἰππίας καὶ Ἰππαρχος, δύο δ' ἐκ τῆς Ἀργείας Ἰοφῶν καὶ Ἠγησίστρατος, ὃ παρωνύμιον ἦν Θέτταλος.

[4] «ἐπ»έγημεν γὰρ Πεισίστρατος ἐξ Ἄργους ἀνδρὸς Ἀργείου θυγατέρα, ὃ ὄνομα ἦν Γοργίλος, Τιμώνασσαν, ἣν πρότερον ἔσχεν γυναικα Ἀρχῖνος ὁ Ἀμπρακιώτης τῶν Κυψελιδῶν. ὅθεν καὶ ἡ πρὸς τοὺς Ἀργεῖους ἐνέστη φιλία, καὶ συνεμαχέσαντο χίλιοι τὴν ἐπὶ Παλληνίδι μάχην, Ἠγησιστράτου κομίσαντος. γῆμαι δέ φασι τὴν Ἀργεῖαν οἱ μὲν ἐκπεσόντα τὸ πρῶτον, οἱ δὲ κατέχοντα τὴν ἀρχήν.

[1] Ἦσαν δὲ κύριοι μὲν τῶν πραγμάτων διὰ τὰ ἀξιώματα καὶ διὰ τὰς ἡλικίας Ἰππαρχος καὶ Ἰππίας, πρεσβύτερος δὲ ὢν ὁ Ἰππίας καὶ τῇ φύσει πολιτικὸς καὶ ἔμφρων ἐπεστάται τῆς ἀρχῆς. ὁ δὲ Ἰππαρχος παιδιώδης καὶ ἐρωτικὸς καὶ φιλόμουσος ἦν, (καὶ τοὺς περὶ Ἀνακρέοντα καὶ Σιμωνίδην καὶ τοὺς ἄλλους ποιητὰς οὗτος ἦν ὁ μεταπεμπόμενος), [2] Θέτταλος δὲ νεώτερος πολὺ καὶ τῷ βίῳ θρασὺς καὶ ὕβριστής, ἀφ' οὗ καὶ συνέβη τὴν ἀρχὴν αὐτοῖς γενέσθαι πάντων τῶν κακῶν. ἐρασθεῖς γὰρ τοῦ Ἀρμόδιου καὶ διαμαρτάνων τῆς πρὸς αὐτὸν φιλίας, οὐ κατεῖχε τὴν ὀργήν, ἀλλ' ἐν τε τοῖς ἄλλοις ἐνεσημαίνετο πικρῶς, καὶ τὸ τελευταῖον μέλλουσαν αὐτοῦ τὴν ἀδελφὴν κληροδοτεῖν Παναθηναίους ἐκώλυσεν, λοιδορήσας τι τὸν Ἀρμόδιον ὡς μαλακὸν ὄντα, ὅθεν συνέβη παροξυνθέντα τὸν Ἀρμόδιον καὶ τὸν Ἀριστογείτονα πράττειν τὴν πρᾶξιν μετεχόντων πολλῶν.

[3] ἤδη δὲ παρατηροῦντες ἐν ἀκροπόλει τοῖς Παναθηναίοις Ἰππίαν (ἐτύγχανεν γὰρ οὗτος μὲν [δ]εχόμενος, ὁ δ' Ἰππαρχος ἀποστέλλων τὴν πομπήν), ἰδόντες τινὰ τῶν κοινωνούντων τῆς πρά[ξ]εως φιланθρώπως ἐντυγχάνοντα τῷ Ἰππία, καὶ νομίσαντες μηνῦειν, βουλόμενοί τι δρᾶσαι πρὸ τῆς συλλήψεως, καταβάντες καὶ προεξαναστάντες τῶν [ἄλλω]ν, τὸν μὲν Ἰππαρχον διακοσμοῦντα τὴν πομπὴν παρὰ τὸ Λεωκόρειον ἀπέκτειναν, τὴν δ' ὅλην ἐλυμήναντο [4] πρᾶξιν. αὐτῶν δ' ὁ μὲν Ἀρμόδιος εὐθέως ἐτελεύτησεν ὑπὸ τῶν δορ[υ]φόρων, ὁ δ' Ἀριστογείτων ὕστερον, συλληφθεὶς καὶ πολὺν χρόνον αἰκισθεὶς. κατηγορήσεν δ' ἐν ταῖς ἀνάγκαις πολλῶν, οἳ καὶ τῇ φύσει τῶν ἐπιφανῶν καὶ φίλοι τοῖς τυράννοις ἦσαν. οὐ γὰρ ἐδύνατο παραχρῆμα λαβεῖν οὐδὲν ἵχνος τῆς πράξεως, ἀλλ' ὁ λεγόμενος λόγος, ὡς ὁ Ἰππίας ἀποστήσας ἀπὸ τῶν ὅπλων τοὺς πομπεύοντας, ἐφώρασε τοὺς τὰ ἐγχειρίδια ἔχοντας, οὐκ ἀληθής ἐστιν· οὐ γὰρ ἔπεμπον τό<τε> μεθ' ὅπλων, ἀλλ' ὕστερον [5] τοῦτο κατεσκεύασεν ὁ δῆμος. κατηγορεῖ δὲ τῶν τοῦ τυράννου φίλων, ὡς μὲν οἱ δημοτικοὶ φασιν ἐπίτηδες, ἵνα ἀσεβήσαιεν ἅμα καὶ γένοιτο ἀσθενεῖς, ἀνελόντες τοὺς ἀναιτίους καὶ φίλους ἑαυτῶν, ὡς δ' ἐνιοὶ λέγουσιν οὐχὶ [6] πλαττόμενος, ἀλλὰ τοὺς συνειδότας ἐμήνυνεν. καὶ τέλος ὡς οὐκ ἐδύνατο πάντα ποιῶν ἀποθανεῖν, ἐπαγγειλάμενος ὡς ἄλλους

μηνύσων πολλούς, καὶ πείσας αὐτῷ τὸν Ἰππίαν δοῦναι τὴν δεξιὰν
πίστεως χάριν, ὥς ἔλαβεν ὀνειδίσας ὅτι τῷ φονεῖ τὰδελφοῦ τὴν
δεξιὰν δέδωκε, οὕτω παρώξυνε τὸν Ἰππίαν, ὥσθ' ὑπὸ τῆς ὀργῆς οὐ
κατέσχεν ἑαυτόν, ἀλλὰ σπασάμενος τὴν μάχαιραν διέφθειρεν αὐτόν.

[1] Μετὰ δὲ ταῦτα συνέβαινεν πολλῶ τραχυτέραν εἶναι τὴν τυραννίδα· καὶ γὰρ διὰ τὸ τιμωρεῖν τὰδελφῶ καὶ διὰ τὸ πολλοὺς ἀνηρηκέναι καὶ ἐκβεβληκέναι, πᾶσιν ἦν ἄπιστος [2] καὶ πικρός. ἔτει δὲ τετάρτῳ μάλιστα μετὰ τὸν Ἰπάρχου θάνατον, ἐπεὶ κακῶς εἶχεν τὰ ἐν τῷ ἅστει, τὴν Μουνιχίαν ἐπεχείρησε τειχίζειν, ὥς ἐκεῖ μεθιδρυσόμενος. ἐν τούτοις δ' ὦν ἐξέπεσεν ὑπὸ Κλεομένους τοῦ Λακεδαιμονίων βασιλέως, χρησμῶν γιγνομένων αἰεὶ τοῖς Λάκωσι καταλύειν τὴν [3] τυραννίδα διὰ τοιάνδ' αἰτίαν. οἱ φυγάδες ὧν οἱ Ἀλκμεωνίδαι προειστήκεσαν, αὐτοὶ μὲν δι' αὐτῶν οὐκ ἐδύναντο ποιήσασθαι τὴν κάθοδον, ἀλλ' αἰεὶ προσέπταιον. ἔν τε γὰρ τοῖς ἄλλοις οἷς ἔπραττον διεσφάλλοντο, καὶ τειχίσαντες ἐν τῇ χώρᾳ Λειψύδριον τὸ ὑπὲρ Πάρνηθος, εἰς ὃ συνεξῆλθόν τινες τῶν ἐκ τοῦ ἁστέως, ἐξεπολιορκήθησαν ὑπὸ τῶν τυράννων, ὅθεν ὕστερον μετὰ ταύτην τὴν συμφορὰν ἦδον ἐν τοῖς σκολιοῖς αἰεὶ·

αἰαῖ Λειψύδριον προδωσέταιρον,
οἷους ἄνδρας ἀπώλεσας, μάχεσθαι
ἀγαθοὺς τε καὶ εὐπατρίδας,
οἱ τότε' ἔδειξαν οἶων πατέρων ἔσαν.

[4] ἀποτυγχάνοντες οὖν ἐν ἅπασι τοῖς ἄλλοις, ἐμισθώσαντο τὸν ἐν Δελφοῖς νεῶν οἰκοδομεῖν, ὅθεν εὐπόρησαν χρημάτων πρὸς τὴν τῶν Λακόνων βοήθειαν. ἡ δὲ Πυθία προέφερεν αἰεὶ τοῖς Λακεδαιμονίοις χρηστηριαζομένοις ἐλευθεροῦν τὰς Ἀθήνας, εἰς τοῦθ' ἕως προύτρεψε τοὺς Σπαρτιάτας, καίπερ ὄντων ξένων αὐτοῖς τῶν Πεισιστρατιδῶν· συνεβάλλετο δὲ οὐκ ἐλάττω μοῖραν τῆς ὁρμῆς τοῖς Λάκωσιν ἢ πρὸς τοὺς Ἀργεῖους τοῖς Πεισιστρατιδαῖς ὑπάρχουσα [5] φιλία. τὸ μὲν οὖν πρῶτον Ἀγχίμολον ἀπέστειλαν κατὰ θάλατταν ἔχοντα στρατιάν· ἡττηθέντος δ' αὐτοῦ καὶ τελευτήσαντος, διὰ τὸ Κινεάν βοηθῆσαι τὸν Θετταλὸν ἔχοντα χιλίους ἵππεῖς, προσοργισθέντες τῷ γενομένῳ, Κλεομένην ἐξέπεμψαν τὸν βασιλέα στόλον ἔχοντα μείζω κατὰ γῆν, ὃς ἐπεὶ τοὺς τῶν Θετταλῶν ἵππεῖς ἐνίκησεν, κωλύοντας αὐτὸν εἰς τὴν Ἀττικὴν παριέναι, κατακλείσας τὸν Ἰππῖαν εἰς τὸ καλούμενον Πελαργικὸν τεῖχος, ἐπολιόρκει [6] μετὰ τῶν Ἀθηναίων. προσκαθημένου δ' αὐτοῦ, συνέπεσεν ὑπεξιώντας ἀλῶναι τοὺς τῶν Πεισιστρατιδῶν υἱεῖς. ὧν ληφθέντων

ὁμολογίαν ἐπὶ τῇ τῶν παίδων σωτηρίᾳ ποιησάμενοι, καὶ τὰ ἐαυτῶν
ἐν πένθ' ἡμέραις ἐκκομισάμενοι, παρέδωκαν τὴν ἀκρόπολιν τοῖς
Ἀθηναίοις ἐπὶ Ἀρπακτίδου ἄρχοντος, κατασχόντες τὴν τυραννίδα
μετὰ τὴν τοῦ πατρὸς τελευτὴν ἔτη μάλιστα ἑπτακαίδεκα, τὰ δὲ
σύμπαντα σὺν οἷς ὁ πατὴρ ἥρξεν ἐνὸς δεῖ πεντήκοντα.

[1] Καταλυθείσης δὲ τῆς τυραννίδος, ἐστασίαζον πρὸς ἀλλήλους Ἰσαγόρας ὁ Τεισάνδρου φίλος ὢν τῶν τυράννων, καὶ Κλεισθένης τοῦ γένους ὢν τῶν Ἀλκμεωνιδῶν. ἡττώμενος δὲ ταῖς ἐταιρείαις ὁ Κλεισθένης, προσηγάγετο τὸν [2] δῆμον, ἀποδιδούς τῷ πλήθει τὴν πολιτείαν. ὁ δὲ Ἰσαγόρας ἐπιλειπόμενος τῇ δυνάμει, πάλιν ἐπικαλεσάμενος τὸν Κλεομένην ὄντα ἐαυτῷ ξένον, συνέπεισεν ἐλαύνειν τὸ ἄγος, διὰ τὸ τοὺς Ἀλκμεωνίδας δοκεῖν εἶναι τῶν ἐναγῶν.

[3] ὑπεξεληθόντος δὲ τοῦ Κλεισθένου, «ἀφικόμενος ὁ Κλεομένης» μετ' ὀλίγων, ἡγηλάτει τῶν Ἀθηναίων ἑπτακοσίας οἰκίας. ταῦτα δὲ διαπραξάμενος, τὴν μὲν βουλὴν ἐπειρᾶτο καταλύειν, Ἰσαγόραν δὲ καὶ τριακοσίους τῶν φίλων μετ' αὐτοῦ κυρίου καθιστάναι τῆς πόλεως. τῆς δὲ βουλῆς ἀντιστάσης καὶ συναθροισθέντος τοῦ πλήθους, οἱ μὲν περὶ τὸν Κλεομένην καὶ Ἰσαγόραν κατέφυγον εἰς τὴν ἀκρόπολιν, ὁ δὲ δῆμος δύο μὲν ἡμέρας προσκαθεζόμενος ἐπολιόρκει, τῇ δὲ τρίτῃ Κλεομένην μὲν καὶ τοὺς μετ' αὐτοῦ πάντας ἀφεῖσαν ὑποσπόνδους, Κλεισθένην δὲ καὶ τοὺς ἄλλους φυγάδας μετεπέμψαντο. κατασχόντος δὲ τοῦ δήμου [4] τὰ πράγματα, Κλεισθένης ἡγεμὼν ἦν καὶ τοῦ δήμου προστάτης. αἰτιώτατοι γὰρ σχεδὸν ἐγένοντο τῆς ἐκβολῆς τῶν τυράννων οἱ Ἀλκμεωνίδαι, καὶ στασιάζοντες τὰ πολλὰ [5] διετέλεσαν. ἔτι δὲ πρότερον τῶν Ἀλκμεωνιδῶν Κήδων ἐπέθετο τοῖς τυράννοις, διὸ καὶ ἦδον καὶ εἰς τοῦτον ἐν τοῖς σκολιοῖς·

ἔγχει καὶ Κήδωνι, διάκονε, μηδ' ἐπιλήθου,
εἰ χρὴ τοῖς ἀγαθοῖς ἀνδράσιν οἰνοχοεῖν.

[1] Διὰ μὲν οὖν ταύτας τὰς αἰτίας ἐπίστευεν ὁ δῆμος τῷ Κλεισθένει. τότε δὲ τοῦ πλήθους προεστηκώς, ἔτει τετάρτῳ [2] μετὰ τὴν τῶν τυράννων κατάλυσιν, ἐπὶ Ἰσαγόρου ἄρχοντος, πρῶτον μὲν συνένειμε πάντας εἰς δέκα φυλὰς ἀντὶ τῶν τεττάρων, ἀναμεῖξαι βουλόμενος, ὅπως μετάσχωσι πλείους τῆς πολιτείας· ὅθεν ἐλέχθη καὶ τὸ μὴ φυλοκρινεῖν, [3] πρὸς τοὺς ἐξετάζειν τὰ γένη βουλομένους. ἔπειτα τὴν βουλὴν πεντακοσί[υ]ς ἀντὶ τετρακοσίων κατέστησεν, πεντήκοντα ἐξ ἐκάστης φυλῆς. τότε δ' ἦσαν ἑκατόν. διὰ τοῦτο δὲ οὐκ εἰς δώδεκα φυλὰς συνέταξεν, ὅπως αὐτῷ μὴ συμβαίνειν μερίζειν πρὸς τὰς προὔπαρχούσας τριττῷς. ἦσαν γὰρ ἐκ δ' φυλῶν δώδεκα τριττύες, ὥστ' οὐ [συν]έπιπτεν [4] «ἄν» ἀναμίσγεσθαι τὸ πλῆθος. διένειμε δὲ καὶ τὴν χώραν κατὰ δήμους τριάκοντα μέρη, δέκα μὲν τῶν περὶ τὸ ἄστυ, δέκα δὲ τῆς παραλίας, δέκα δὲ τῆς μεσογείου, καὶ ταύτας ἐπονομάσας τριττῷς, ἐκλήρωσεν τρεῖς εἰς τὴν φυλὴν ἐκάστην, ὅπως ἐκάστη μετέχῃ πάντων τῶν τόπων. καὶ δημότας ἐποίησεν ἀλλήλων τοὺς οἰκοῦντας ἐν ἐκάστῳ τῶν δήμων, ἵνα μὴ πατρόθεν προσαγορεύοντες ἐξελέγχωσιν τοὺς νεοπολίτας, ἀλλὰ τῶν δήμων ἀναγορεύωσιν. ὅθεν [5] καὶ καλοῦσιν Ἀθηναῖοι σφᾶς αὐτοὺς τῶν δήμων. κατέστησε δὲ καὶ δημάρχους, τὴν αὐτὴν ἔχοντας ἐπιμέλειαν τοῖς πρότερον ναυκράροις. καὶ γὰρ τοὺς δήμους ἀντὶ τῶν ναυκραριῶν ἐποίησεν. προσηγόρευσε δὲ τῶν δήμων τοὺς μὲν ἀπὸ τῶν τόπων, τοὺς δὲ ἀπὸ τῶν κτισάντων· οὐ γὰρ [6] ἅπαντες ὑπῆρχον ἐν τοῖς τόποις. τὰ δὲ γένη καὶ τὰς φρατρίας καὶ τὰς ἱερωσύνας εἶασεν ἔχειν ἐκάστους κατὰ τὰ πάτρια. ταῖς δὲ φυλαῖς ἐποίησεν ἐπωνύμους ἐκ τῶν προκριθέντων ἑκατὸν ἀρχηγετῶν, οὓς ἀνεῖλεν ἡ Πυθία δέκα.

[1] Τούτων δὲ γενομένων δημοτικωτέρα πολὺ τῆς Σόλωνος ἐγένετο ἡ πολιτεία. καὶ γὰρ συνέβη τοὺς μὲν Σόλωνος νόμους ἀφανίσαι τὴν τυραννίδα διὰ τὸ μὴ χρῆσθαι, καί[ν]ους δ' ἄλλους θεῖναι τὸν Κλεισθένη στοχαζόμενον τοῦ πλήθους, ἐν οἷς ἐτέθη καὶ ὁ περὶ τοῦ ὀστρακισμοῦ νόμος.

[2] πρῶτον μὲν οὖν ἔτει πέμπτῳ μετὰ ταύτην τὴν κατάστασιν, ἐφ' Ἑρμοκρέοντος ἄρχοντος, τῇ βουλῇ τοῖς πεντακοσίοις τὸν ὄρκον ἐποίησαν, ὃν ἔτι καὶ νῦν ὁμνύουσιν. ἔπειτα τοὺς στρατηγούς ἡρῶντο κατὰ φυλάς, ἐξ ἐκάστης φυλῆς ἓνα, τῆς δὲ ἀπάσης στρατιᾶς ἡγεμὼν ἦν ὁ πολέμαρχος.

[3] ἔτει δὲ μετὰ ταῦτα δωδεκάτῳ νικήσαντες τὴν ἐν Μαραθῶνι μάχην, ἐπὶ Φαινίππου ἄρχοντος, διαλιπόντες ἔτη δύο μετὰ τὴν νίκην, θαρροῦντος ἤδη τοῦ δήμου, τότε πρῶτον ἐχρήσαντο τῷ νόμῳ τῷ περὶ τὸν ὀστρακισμόν, ὃς ἐτέθη διὰ τὴν ὑποψίαν τῶν ἐν ταῖς δυνάμεσιν, ὅτι Πεισίστρατος [4] δημαγωγὸς καὶ στρατηγὸς ὢν τύραννος κατέστη. καὶ πρῶτος ὀστρακίσθη τῶν ἐκείνου συγγενῶν Ἰππαρχος Χάρμου Κολλυτεύς, δι' ὃν καὶ μάλιστα τὸν νόμον ἔθηκεν ὁ Κλεισθένης, ἐξελάσαι βουλούμενος αὐτόν. οἱ γὰρ Ἀθηναῖοι τοὺς τῶν τυράννων φίλους, ὅσοι μὴ συνεξαμαρτάνοιεν ἐν ταῖς ταραχαῖς, εἶων οἰκεῖν τὴν πόλιν, χρώμενοι τῇ εἰωθυίᾳ τοῦ δήμου πραότητι· ὃν ἡγεμὼν καὶ προστάτης [5] ἦν Ἰππαρχος. εὐθὺς δὲ τῷ ὑστέρῳ ἔτει, ἐπὶ Τελεσίνου ἄρχοντος, ἐκυάμευσαν τοὺς ἑννέα ἄρχοντας κατὰ φυλάς ἐκ τῶν προκριθέντων ὑπὸ τῶν δήμων πεντακοσίων, τότε μετὰ τὴν τυραννίδα πρῶτον. οἱ δὲ πρότεροι πάντες ἦσαν αἰρετοί. καὶ ὀστρακίσθη Μεγακλῆς Ἰποκράτους Ἀλωπεκῆθεν.

[6] ἐπὶ μὲν οὖν ἔτη γ' τοὺς τῶν τυράννων φίλους ὀστράκιζον, ὃν χάριν ὁ νόμος ἐτέθη, μετὰ δὲ ταῦτα τῷ τετάρτῳ ἔτει καὶ τῶν ἄλλων εἴ τις δοκοίη μείζων εἶναι μεθίσταντο· καὶ πρῶτος ὀστρακίσθη τῶν ἁπλοῦς τῆς [7] τυραννίδος Ξάνθιππος ὁ Ἀρίφρωνος. ἔτει δὲ τρίτῳ μετὰ ταῦτα Νικοδήμου ἄρχοντος, ὡς ἐφάνη τὰ μέταλλα τὰ ἐν Μαρωνείᾳ, καὶ περιεγένετο τῇ πόλει τάλαντα ἑκατὸν ἐκ τῶν ἔργων, συμβουλευόντων τινῶν τῷ δήμῳ διανεῖμασθαι τὸ ἀργύριον, Θεμιστοκλῆς ἐκώλυσεν, οὐ λέγων ὅτι χρήσεται τοῖς χρήμασιν, ἀλλὰ δανεῖσαι κελεύων τοῖς πλουσιωτάτοις Ἀθηναίων ἑκατὸν ἐκάστῳ

τάλαντον, εἴτ' ἐὰν μὲν ἀρέσκη τὸ ἀνάλωμα, τῆς πόλεως εἶναι τὴν δαπάνην, εἰ δὲ μή, κομίσασθαι τὰ χρήματα παρὰ τῶν δανεισαμένων. λαβὼν δ' ἐπὶ τούτοις ἐναυπηγήσατο τριήρεις ἑκατόν, ἐκάστου ναυπηγουμένου τῶν ἑκατὸν μίαν, αἷς ἐναυμάχησαν ἐν Σαλαμῖνι πρὸς τοὺς βαρβάρους. ὠστρακίσθη δ' ἐν τούτοις [8] τοῖς καιροῖς Ἀριστείδης ὁ Λυσιμάχου. τετάρτῳ δ' ἔτει κατεδέξαντο πάντας τοὺς ὠστρακισμένους ἄρχοντας Ὑψηλίδου, διὰ τὴν Ξέρξου στρατείαν· καὶ τὸ λοιπὸν ὥρισαν τοῖς ὠστρακιζομένοις, ἐντὸς Γεραιστοῦ καὶ Σκυλλαίου κατοικεῖν, ἢ ἀτίμους εἶναι καθάπαξ.

[1] Τότε μὲν οὖν μέχρι τούτου προῆλθεν ἡ πόλις, ἅμα τῇ δημοκρατίᾳ κατὰ μικρὸν αὐξανομένη· μετὰ δὲ τὰ Μηδικὰ πάλιν ἴσχυσεν ἡ ἐν Ἀρείῳ πάγῳ βουλὴ καὶ διώκει τὴν πόλιν, οὐδενὶ δόγματι λαβοῦσα τὴν ἡγεμονίαν, ἀλλὰ διὰ τὸ γενέσθαι τῆς περὶ Σαλαμῖνα ναυμαχίας αἰτία. τῶν γὰρ στρατηγῶν ἐξαπορησάντων τοῖς πράγμασι, καὶ κηρυζάντων σφ[ι]εῖν ἕκαστον ἑαυτόν, πορίσασα δραχμὰς ἑκάστῳ [2] ὀκτὼ διέδωκε καὶ ἐνεβίβασεν εἰς τὰς ναῦς. διὰ ταύτην δὴ τὴν αἰτίαν παρεχώρουν αὐτῆς τῷ ἀξιώματι, καὶ ἐπολιτεύθησαν Ἀθηναῖοι καλῶς καὶ κατὰ τούτους τοὺς καιροὺς. συνέβη γὰρ αὐτοῖς κατὰ τὸν χρόνον τοῦτον τὰ τε περὶ τὸν πόλεμον ἀσκήσαι, καὶ παρὰ τοῖς Ἑλλήσιν εὐδοκιμῆσαι, καὶ τὴν τῆς θαλάττης ἡγεμονίαν λαβεῖν, ἀκόντων [3] Λακεδαιμονίων. ἦσαν δὲ προστάται τοῦ δήμου κατὰ τούτους τοὺς καιροὺς Ἀριστείδης ὁ Λυσιμάχου καὶ Θεμιστοκλῆς ὁ Νεοκλέους, ὁ μὲν τὰ πολέμια δοκῶν, ὁ δὲ τὰ πολιτικά δεινὸς εἶναι καὶ δικαιοσύνη τῶν καθ' ἑαυτὸν διαφέρειν· διὸ καὶ ἐχρῶντο τῷ μὲν στρατηγῷ, τῷ δὲ συμβούλῳ.

[4] τὴν μὲν οὖν τῶν τειχῶν ἀνοικοδόμησιν κοινῇ διώκησαν, καίπερ διαφερόμενοι πρὸς ἀλλήλους, ἐπὶ δὲ τὴν ἀπόστασιν τὴν τῶν Ἰώνων ἀπὸ τῆς τῶν Λακεδαιμονίων συμμαχίας Ἀριστείδης ἦν ὁ προτρέψας, τηρήσας τοὺς Λάκωνας διαβεβλημένους [5] διὰ Πausανίαν. διὸ καὶ τοὺς φόρους οὗτος ἦν ὁ τάξας ταῖς πόλεσιν τοὺς πρώτους, ἔτει τρίτῳ μετὰ τὴν ἐν Σαλαμῖνι ναυμαχίαν, ἐπὶ Τιμοσθένους ἄρχοντος, καὶ τοὺς ὄρκους ὤμοσεν τοῖς Ἰωσ[ι]ν, ὥστε τὸν αὐτὸν ἐχθρὸν εἶναι καὶ φίλον, ἐφ' οἷς καὶ τοὺς μύδρους ἐν τῷ πελάγει καθεῖσαν.

[1] Μετὰ δὲ ταῦτα θαρροῦσης ἤδη τῆς πόλεως, καὶ χρημάτων ἠθροισμένων πολλῶν, συνεβούλευεν ἀντιλαμβάνεσθαι τῆς ἡγεμονίας, καὶ καταβάντας ἐκ τῶν ἀγρῶν οἰκεῖν ἐν τῷ ἄστει· τροφήν γὰρ ἔσεσθαι πᾶσι, τοῖς μὲν στρατευομένοις, τοῖς δὲ φρουροῦσι, τοῖς δὲ τὰ κοινὰ πράττουσι· [2] εἴθ' οὕτω κατασχίσειν τὴν ἡγεμονίαν. πεισθέντες δὲ ταῦτα καὶ λαβόντες τὴν ἀρχὴν τοῖς τε συμμάχοις δεσποτικωτέρως ἐχρῶντο, πλὴν Χίων καὶ Λεσβίων καὶ Σαμίων· (τούτους δὲ φύλακας εἶχον τῆς ἀρχῆς, ἐῶντες τὰς τε πολιτείας [3] παρ' αὐτοῖς καὶ ἄρχειν ὧν ἔτυχον ἄρχοντες·) κατέστησαν δὲ καὶ τοῖς πολλοῖς εὐπορίαν τροφῆς, ὥσπερ Ἀριστείδης εἰσηγήσατο. συνέβαινεν γὰρ ἀπὸ τῶν φόρων καὶ τῶν τελῶν καὶ τῶν συμμάχων πλείους ἢ δισμυρίους ἄνδρας τρέφεσθαι. δικασταὶ μὲν γὰρ ἦσαν ἑξακισχίλιοι, τοξόται δ' ἑξακόσιοι καὶ χίλιοι, καὶ πρὸς τούτοις ἵππεῖς χίλιοι καὶ διακόσιοι, βουλὴ δὲ πεντακόσιοι, καὶ φρουροὶ νεωρίων πεντακόσιοι, καὶ πρὸς τούτοις ἐν τῇ πόλει φρουροὶ ν', ἀρχαὶ δ' ἑνδημοὶ μὲν εἰς ἑπτακοσίους ἄνδρας, ὑπερόριοι δ' εἰς ἑπτακοσίους· πρὸς δὲ τούτοις ἐπεὶ συνεστήσαντο τὸν πόλεμον ὕστερον, ὀπλῖται μὲν δισχίλιοι καὶ πεντακόσιοι, νῆες δὲ φρουρίδες εἴκοσι, ἄλλαι δὲ νῆες αἱ τοὺς φόρους ἄγουσαι τοὺς ἀπὸ τοῦ κυάμου δισχιλίους ἄνδρας. ἔτι δὲ πρυτανεῖον καὶ ὀρφανοὶ καὶ δεσμωτῶν φύλακες· ἅπασι γὰρ τούτοις ἀπὸ τῶν κοινῶν ἡ διοίκησις ἦν.

[1] Ἡ μὲν οὖν τροφή τῷ δήμῳ διὰ τούτων ἐγίγνετο. ἔτη δὲ ἑπτακαίδεκα μάλιστα μετὰ τὰ Μηδικὰ διέμεινεν ἡ πολιτεία προεστώτων τῶν Ἀρεοπαγιτῶν, καίπερ ὑποφερομένη κατὰ μικρόν. αὐξανομένου δὲ τοῦ πλήθους, γενόμενος τοῦ δήμου προστάτης Ἐφιάλτης ὁ Σοφωνίδου, δοκῶν καὶ ἀδωροδόκητος εἶναι καὶ δίκαιος πρὸς τὴν πολιτείαν, [2] ἐπέθετο τῇ βουλῇ. καὶ πρῶτον μὲν ἀνεῖλεν πολλοὺς τῶν Ἀρεοπαγιτῶν, ἀγῶνας ἐπιφέρων περὶ τῶν διωκμένων. ἔπειτα τῆς βουλῆς ἐπὶ Κόνωνος ἄρχοντος ἅπαντα περιεῖλε τὰ ἐπίθετα δι' ὧν ἦν ἡ τῆς πολιτείας φυλακή, καὶ τὰ μὲν τοῖς πεντακοσίοις, τὰ δὲ τῷ δήμῳ καὶ τοῖς [3] δικαστηρίοις ἀπέδωκεν. ἔπρα[ξ]ε δὲ ταῦτα συναιτίου γενομένου Θεμιστοκλέους, ὃς ἦν μὲν τῶν Ἀρεοπαγιτῶν, ἔμελλε δὲ κρίνεσθαι μηδισμοῦ. βουλόμενος δὲ καταλυθῆναι τὴν βουλήν ὁ Θεμιστοκλῆς πρὸς μὲν τὸν Ἐφιάλτην ἔλεγεν ὅτι συναρπάζειν αὐτὸν ἡ βουλή μέλλει, πρὸς δὲ τοὺς Ἀρεοπαγίτας, ὅτι δείξει τινὰς συνισταμένους ἐπὶ καταλύσει τῆς πολιτείας. ἀγαγὼν δὲ τοὺς αἰρεθέντας τῆς βουλῆς οὗ διέτριβεν ὁ Ἐφιάλτης, ἵνα δείξῃ τοὺς ἀθροιζομένους, διελέγετο [4] μετὰ σπουδῆς αὐτοῖς. ὁ δ' Ἐφιάλτης ὡς εἶδεν καταπλαγεῖς, καθίζει μονοχίτων ἐπὶ τὸν βωμόν. θαυμασάντων δὲ πάντων τὸ γεγον[ός], καὶ μετὰ ταῦτα συναθροισθείσης τῆς βουλῆς τῶν πεντακοσίων, κατηγοροῦν τῶν Ἀρεοπαγιτῶν ὃ τ' Ἐφιάλτης καὶ ὁ Θεμιστοκλῆς, καὶ πάλιν ἐν τῷ δήμῳ τὸν αὐτὸν τρόπον, ἕως περιεῖλοντο αὐτῶν τὴν δύναμιν. καὶ ἀνηρέθη δὲ καὶ ὁ Ἐφιάλτης δολοφονηθεὶς μετ' οὐ πολλὸν χρόνον δι' Ἀριστοδίκου τοῦ Ταναγραίου.

[1] Ἡ μὲν οὖν τῶν Ἀρεοπαγιτῶν βουλή τοῦτον τὸν τρόπον ἀπεστερήθη τῆς ἐπιμελείας. μετὰ δὲ ταῦτα συνέβαινεν ἀνίσσθαι μᾶλλον τὴν πολιτείαν διὰ τοὺς προθύμως δημαγωγοῦντας. κατὰ γὰρ τοὺς καιροὺς τούτους συνέπεσε μὴδ' ἡγεμόνα ἔχειν τοὺς ἐπιεικεστέρους, ἀλλ' αὐτῶν προεστάναι Κίμωνα τὸν Μιλτιάδου, νεώτερον ὄντα καὶ πρὸς τὴν πόλιν ὀψὲ προσελθόντα, πρὸς δὲ τούτοις ἐφθάρθαι τοὺς πολλοὺς κατὰ πόλεμον. τῆς γὰρ στρατείας γιγνομένης ἐν τοῖς τότε χρόνοις ἐκ καταλόγου, καὶ στρατηγῶν ἐφισταμένων ἀπείρων μὲν τοῦ πολεμεῖν, τιμωμένων δὲ διὰ τὰς πατρικὰς δόξας, αἰεὶ συνέβαινεν τῶν ἐξιόντων ἀνὰ δισχιλίους ἢ τρισχιλίους ἀπόλλυσθαι, ὥστε ἀναλίσκεσθαι τοὺς ἐπιεικεῖς καὶ [2] τοῦ δήμου καὶ τῶν εὐπόρων. τὰ μὲν οὖν ἄλλα πάντα διώκουν οὐχ ὁμοίως καὶ πρότερον τοῖς νόμοις προσέχοντες, τὴν δὲ τῶν ἐννέα ἀρχόντων αἵρεσιν οὐκ ἐκίνουν, ἀλλ' ἔκτω ἔτει μετὰ τὸν Ἐφιάλτου θάνατον ἔγνωσαν καὶ ἐκ ζευγитῶν προκρίνεσθαι τοὺς κληρωσομένους τῶν ἐννέα ἀρχόντων, καὶ πρῶτος ἦρξεν ἐξ αὐτῶν Μνησιθείδης. οἱ δὲ πρὸ τούτου πάντες ἐξ ἱππέων καὶ πεντακοσιομεδίμων ἦσαν (οἱ <δὲ> ζευγίται τὰς ἐγκυκλίους ἦρχον), εἰ μὴ τι παρεωρᾶτο [3] τῶν ἐν τοῖς νόμοις. ἔτει δὲ πέμπτῳ μετὰ ταῦτα ἐπὶ Λυσικράτους ἄρχοντος οἱ τριάκοντα δικασταὶ κατέστησαν πάλιν οἱ καλούμενοι κατὰ δήμους. καὶ τρίτῳ μετὰ τοῦτον ἐπὶ Ἀντιδότου διὰ τὸ πλῆθος τῶν πολιτῶν Περικλέους εἰπόντος ἔγνωσαν μὴ μετέχειν τῆς πόλεως, ὅς ἂν μὴ ἐξ ἀμφοῖν ἀστοῖν ἢ γεγονώς.

[1] Μετὰ δὲ ταῦτα πρὸς τὸ δημαγωγεῖν ἐλθόντος Περικλέους, καὶ πρῶτον εὐδοκίμησαντος, ὅτε κατηγόρησε τὰς εὐθύνas Κίμωνος στρατηγοῦντος νέος ὢν, δημοτικωτέραν ἔτι συνέβη γενέσθαι τὴν πολιτείαν. καὶ γὰρ τῶν Ἀρεοπαγιτῶν ἕνια παρείλετο, καὶ μάλιστα προύτρεψεν τὴν πόλιν ἐπὶ τὴν ναυτικὴν δύναμιν, ἐξ ἧς συνέβη θαρρήσαντας τοὺς πολλοὺς ἅπασαν τὴν πολιτείαν μᾶλλον ἄγειν εἰς αὐτούς.

[2] μετὰ δὲ τὴν ἐν Σαλαμῖνι ναυμαχίαν ἐνὸς δεῖ πεντηκοστῷ ἔτει, ἐπὶ Πυθοδώρου ἄρχοντος, ὁ πρὸς Πελοποννησίους ἐνέστη πόλεμος, ἐν ᾧ κατακλεισθεῖς ὁ δῆμος ἐν τῷ ἄστει, καὶ συνεθισθεῖς ἐν ταῖς στρατείαις μισθοφορεῖν, τὰ μὲν ἐκὼν τὰ δὲ ἄκων προηρεῖτο τὴν πολιτείαν διοικεῖν αὐτός.

[3] ἐποίησε δὲ καὶ μισθοφόρα τὰ δικαστήρια Περικλῆς πρῶτος, ἀντιδημαγωγῶν πρὸς τὴν Κίμωνος εὐπορίαν. ὁ γὰρ Κίμων ἄτε τυραννικὴν ἔχων οὐσίαν, πρῶτον μὲν τὰς κοινὰς λητουργίας ἐλητούργει λαμπρῶς, ἔπειτα τῶν δημοτῶν ἔτρεφε πολλοὺς. ἐξῆν γὰρ τῷ βουλομένῳ Λακιάδων, καθ' ἐκάστην τὴν ἡμέραν ἐλθόντι παρ' αὐτὸν ἔχειν τὰ μέτρια. ἔτι δὲ τὰ χωρία πάντα ἄφρακτα ἦν, ὅπως ἐξῆν τῷ βουλομένῳ [4] τῆς ὁπώρας ἀπολαύειν. πρὸς δὲ ταύτην τὴν χορηγίαν ἐπιλειπόμενος ὁ Περικλῆς τῇ οὐσίᾳ, συμβουλευσάντος αὐτῷ Δαμωνίδου τοῦ Οἷηθεν (ὃς ἐδόκει τῶν πολλῶν εἰσηγητὴς εἶναι τῷ Περικλεῖ· διὸ καὶ ὠστράκισαν αὐτὸν ὕστερον), ἐπεὶ τοῖς ἰδίῳις ἡττάτο, δίδοναι τοῖς πολλοῖς τὰ αὐτῶν, κατεσκεύασε μισθοφορὰν τοῖς δικαστηρίοις· ἅφ' ὧν αἰτιῶνται τινες χεῖρω γενέσθαι, κληρουμένων ἐπιμελῶς ἀεὶ μᾶλλον τῶν τυχόντων ἢ τῶν ἐπιεικῶν ἀνθρώπων. ἤρξατο [5] δὲ μετὰ ταῦτα καὶ τὸ δεκάζειν, πρώτου καταδείξαντος Ἀνύτου μετὰ τὴν ἐν Πύλῳ στρατηγίαν. κρινόμενος γὰρ ὑπὸ τινων διὰ τὸ ἀποβαλεῖν Πύλον, δεκάσας τὸ δικαστήριον ἀπέφυγεν.

[1] Ἔως μὲν οὖν Περικλῆς προειστῆκει τοῦ δήμου, βελτίω τὰ κατὰ τὴν πολιτείαν ἦν, τελευτήσαντος δὲ Περικλέους πολὺ χεῖρω. πρῶτον γὰρ τότε προστάτην ἔλαβεν ὁ δῆμος οὐκ εὐδοκιμοῦντα παρὰ τοῖς ἐπεικέσιν· ἐν δὲ τοῖς πρότερον [2] χρόνοις αἰεὶ διετέλουν οἱ ἐπεικεῖς δημαγωγοῦντες. ἐξ ἀρχῆς μὲν γὰρ καὶ πρῶτος ἐγένετο προστάτης τοῦ δήμου Σόλων, δεύτερος δὲ Πεισίστρατος, τῶν εὐγενῶν καὶ γνωρίμων· καταλυθείσης δὲ τῆς τυραννίδος Κλεισθένης, τοῦ γένους ὦν τῶν Ἀλκμεωνιδῶν, καὶ τούτῳ μὲν οὐδεὶς ἦν ἀντιστασιώτης, ὥς ἐξέπεσον οἱ περὶ τὸν Ἰσαγόραν. μετὰ δὲ ταῦτα τοῦ μὲν δήμου προειστῆκει Ξάνθιππος, τῶν δὲ γνωρίμων Μιλτιάδης, ἔπειτα Θεμιστοκλῆς καὶ Ἀριστείδης· μετὰ δὲ τούτους Ἐφιάλτης μὲν τοῦ δήμου, Κίμων δ' ὁ Μιλτιάδου τῶν εὐπόρων· εἶτα Περικλῆς μὲν τοῦ δήμου, [3] Θουκυδίδης δὲ τῶν ἐτέρων, κηδεστής ὦν Κίμωνος. Περικλέους δὲ τελευτήσαντος, τῶν μὲν ἐπιφανῶν προειστῆκει Νικίας ὁ ἐν Σικελίᾳ τελευτήσας, τοῦ δὲ δήμου Κλέων ὁ Κλεαινέτου, ὃς δοκεῖ μάλιστα διαφθεῖραι τὸν δῆμον ταῖς ὁρμαῖς, καὶ πρῶτος ἐπὶ τοῦ βήματος ἀνέκραγε καὶ ἐλοιδορήσατο, καὶ περιζωσάμενος ἐδημηγόρησε, τῶν ἄλλων ἐν κόσμῳ λεγόντων. εἶτα μετὰ τούτους τῶν μὲν ἐτέρων Θηραμένης ὁ Ἄγνωνος, τοῦ δὲ δήμου Κλεοφῶν ὁ λυροποιός, ὃς καὶ τὴν διωβελίαν ἐπόρισε πρῶτος· καὶ χρόνον μὲν τινα διεδίδου, μετὰ δὲ ταῦτα κατέλυσε Καλλικράτης Παιανιεύς, πρῶτος ὑποσχόμενος ἐπιθήσειν πρὸς τοῖν δυοῖν ὀβολοῖν ἄλλον ὀβολόν. τούτων μὲν οὖν ἀμφοτέρων θάνατον κατέγνωσαν ὕστερον· εἶωθεν γὰρ καὶ ἐξαπατηθῆ τὸ πλῆθος ὕστερον μισεῖν τοὺς τι προαγαγόντας [4] ποιεῖν αὐτοὺς τῶν μὴ καλῶς ἐχόντων. ἀπὸ δὲ Κλεοφῶντος ἤδη διεδέχοντο συνεχῶς τὴν δημαγωγίαν οἱ μάλιστα βουλόμενοι θρασύνεσθαι καὶ χαρίζεσθαι τοῖς πολλοῖς [5] πρὸς τὸ παραντίκα βλέποντες. δοκοῦσι δὲ βέλτιστοι γεγονέναι τῶν Ἀθήνησι πολιτευσαμένων μετὰ τοὺς ἀρχαίους Νικίας καὶ Θουκυδίδης καὶ Θηραμένης. καὶ περὶ μὲν Νικίου καὶ Θουκυδίδου πάντες σχεδὸν ὁμολογοῦσιν ἄνδρας γεγονέναι οὐ μόνον καλοὺς καγαθοὺς, ἀλλὰ καὶ πολιτικοὺς καὶ τῇ πόλει πάσῃ πατρικῶς χρωμένους, περὶ δὲ Θηραμένου, διὰ τὸ συμβῆναι κατ' αὐτὸν ταραχάδεις τὰς πολιτείας, ἀμφισβήτησις τῆς κρίσεώς ἐστι. δοκεῖ μέντοι μὴ παρέργως

ἀποφαινομένοις οὐχ ὥσπερ αὐτὸν διαβάλλουσι πάσας τὰς πολιτείας καταλύειν, ἀλλὰ πάσας προάγειν ἕως μηδὲν παρανομοῖεν, ὡς δυνάμενος πολιτεύεσθαι κατὰ πάσας, ὅπερ ἐστὶν ἀγαθοῦ πολίτου ἔργον, παρανομούσαις δὲ οὐ συγχω[ρ]ῶν, ἀλλ' ἀπεχθανόμενος.

[1] Ἔως μὲν οὖν ισόρροπα τὰ πράγματα κατὰ τὸν πόλεμον ἦν, διεφύλαττον τὴν δημοκρατίαν. ἐπεὶ δὲ μετὰ τὴν ἐν Σικελίᾳ γενομένην συμφορὰν ισχυρότερα τὰ τῶν Λακεδαιμονίων ἐγένετο διὰ τὴν πρὸς βασιλέα συμμαχίαν, ἠναγκάσθησαν κι[νῆσα]ντες τὴν δημοκρατίαν καταστήσαι τὴν ἐπὶ τῶν τετρακοσίων πολιτείαν, εἰπόντος τὸν μὲν πρὸ τοῦ ψηφίσματος λόγον Μηλοβίου, τὴν δὲ γνώμην γράψαντος Πυθοδώρου τοῦ Ἀναφλ[υ]τίου, μάλιστα δὲ συμπεισθέντων τῶν πολλῶν διὰ τὸ νομίζειν βασιλέα μᾶ[λ]λον ἑαυτοῖς συμπολεμήσειν, ἢ δι' ὀλίγων ποιήσωνται τὴν πολιτείαν.

[2] ἦν δὲ τὸ ψήφισμα τὸ Πυθοδώρου τοιόνδε· τὸν δῆμον ἐλέσθαι μετὰ τῶν προϋπαρχόντων δέκα προβούλων ἄλλους εἴκοσι ἐκ τῶν ὑπὲρ τετταράκοντα ἔτη γεγονότων, οἵτινες ὁμόσαντες ἢ μὴν συγγράψαι ἃ ἂν ἡγῶνται βέλτιστα [3] εἶναι τῇ πόλει, συγγράψουσι περὶ τῆς σωτηρίας· ἐξεῖναι δὲ καὶ τῶν ἄλλων τῷ βουλομένῳ γράφειν, ἢ ἐξ ἀπάντων αἰρῶνται τὸ ἄριστον. Κλειτοφῶν δὲ τὰ μὲν ἄλλα καθάπερ Πυθόδωρος εἶπεν, προσαναζητῆσαι δὲ τοὺς αἰρεθέντας ἔγραψεν καὶ τοὺς πατρίους νόμους, οὓς Κλεισθένης ἔθηκεν ὅτε καθίστη τὴν δημοκρατίαν, ὅπως «ἂν» ἀκούσαντες καὶ τούτων βουλευσῶνται τὸ ἄριστον, ὥς οὐ δημοτικὴν ἀλλὰ παραπλησίαν οὖσαν τὴν Κλεισθένους πολιτείαν [4] τῇ Σόλωνος. οἱ δ' αἰρεθέντες πρῶτον μὲν ἔγραψαν ἐπάναγκες εἶναι τοὺς πρυτάνεις ἅπαντα τὰ λεγόμενα περὶ τῆς σωτηρίας ἐπιψηφίζειν, ἔπειτα τὰς τῶν παρανόμων γραφὰς καὶ τὰς εἰσαγγελίας καὶ τὰς προσκλήσεις ἀνεῖλον, ὅπως ἂν οἱ ἐθέλοντες Ἀθηναίων συμβουλεύωσι περὶ τῶν προκειμένων. ἂν δὲ τις τούτων χάριν ἢ ζημιοῖ ἢ προσκαλῆται ἢ εἰσάγῃ εἰς δικαστήριον, ἔνδειξιν αὐτοῦ εἶναι καὶ ἀπαγωγὴν πρὸς τοὺς στρατηγούς, τοὺς δὲ στρατηγούς [5] παραδοῦναι τοῖς ἑνδεκα θανάτῳ ζημιῶσαι. μετὰ δὲ ταῦτα τὴν πολιτείαν διέταξαν τόνδε «τὸν» τρόπον. τὰ μὲν χρήματα «τὰ» προσιόντα μὴ ἐξεῖναι ἄλλοσε δαπανῆσαι ἢ εἰς τὸν πόλεμον, τὰς δ' ἀρχὰς ἀμίσθους ἄρχειν ἀπάσας ἕως ἂν ὁ πόλεμος ᾗ, πλὴν τῶν ἐννέα ἀρχόντων καὶ τῶν πρυτάνεων οἱ ἂν ᾧσιν· τούτους δὲ φέρειν τρεῖς ὀβολοὺς ἕκαστον τῆς ἡμέρας. τὴν δ' ἄλλην πολιτείαν ἐπιτρέψαι πᾶσαν Ἀθηναίων τοῖς δυνατωτάτοις καὶ τοῖς σώμασιν καὶ τοῖς χρήμασιν λητουργεῖν, μὴ ἔλαττον ἢ πεντακισχιλίοις, ἕως ἂν ὁ

πόλεμος ἦ. κυρίους δ' εἶναι τούτους καὶ συνθήκας συντίθεσθαι πρὸς οὓς ἂν ἐθέλωσιν. ἐλέσθαι δὲ καὶ τῆς φυλῆς ἐκάστης δέκα ἄνδρας ὑπὲρ τετταράκοντα ἔτη γεγονότας, οἵτινες καταλέξουσι τοὺς πεντακισχιλίους ὁμόσαντες καθ' ἱερῶν τελείων.

[1] Οἱ μὲν οὖν αἰρεθέντες ταῦτα συνέγραψαν. κυρωθέντων δὲ τούτων, εἵλοντο σφῶν αὐτῶν οἱ πεντακισχίλιοι τοὺς ἀναγράψοντας τὴν πολιτείαν ἑκατὸν ἄνδρας. οἱ δ' αἰρεθέντες [2] ἀνέγραψαν καὶ ἐξήνεγκαν τάδε· βουλευεῖν μὲν κατ' ἐνιαυτὸν τοὺς ὑπὲρ τριάκοντα ἔτη γεγονότας ἄνευ μισθοφορᾶς· τούτων δ' εἶναι τοὺς στρατηγούς καὶ τοὺς ἐννέα ἄρχοντας καὶ τὸν ἱερομνήμονα καὶ τοὺς ταξιάρχους καὶ ἱπάρχους καὶ φυλάρχους καὶ ἄρχοντας εἰς τὰ φρούρια καὶ ταμίας τῶν ἱερῶν χρημάτων τῇ θεᾷ [ᾧ] καὶ τοῖς ἄλλοις θεοῖς δέκα καὶ ἑλληνοταμίας καὶ τῶν ἄλλων ὁσίων χρημάτων ἀπάντων εἴκοσιν οἱ διαχειριοῦσιν, καὶ ἱεροποιοὺς καὶ ἐπιμελητὰς δέκα ἑκατέρους· αἰρεῖσθαι δὲ πάντας τούτους ἐκ προκρίτων, ἐκ τῶν ἀεὶ βουλευόντων πλείους προκρίνοντας· τὰς δ' ἄλλας ἀρχὰς ἀπάσας κληρωτὰς εἶναι καὶ μὴ ἐκ τῆς βουλῆς. τοὺς δὲ ἑλληνοταμίας οἱ ἂν διαχειρίζωσι [3] τὰ χρήματα μὴ συμβουλεύειν. βουλὰς δὲ ποιῆσαι τέτταρας ἐκ τῆς ἡλικίας τῆς εἰρημένης εἰς τὸν λοιπὸν χρόνον, καὶ τούτων τὸ λαχὸν μέρος βουλεύειν, νεῖμαι δὲ καὶ τοὺς ἄλλους πρὸς τὴν λῆξιν ἐκάστην. τοὺς δ' ἑκατὸν ἄνδρας διανεῖμαι σφᾶς τε αὐτοὺς καὶ τοὺς ἄλλους τέτταρα [4] μέρη ὡς ἰσαίτατα καὶ διακληρῶσαι καὶ εἰς ἐνιαυτὸν βουλεύειν. <βουλεύεσθαι> δὲ ἥ ἂν δοκῇ αὐτοῖς ἄριστα ἔξειν περὶ τε τῶν χρημάτων, ὅπως ἂν σφᾶ ἡ καὶ εἰς τὸ δέον ἀναλίσκηται, καὶ περὶ τῶν ἄλλων ὡς ἂν δύνωνται ἄριστα· κἄν τι θέλωσιν βουλεύεσθαι μετὰ πλειόνων, ἐπεισκαλεῖν ἕκαστον ἐπέισκλητον ὃν ἂν ἐθέλῃ τῶν ἐκ τῆς αὐτῆς ἡλικίας. τὰς δ' ἔδρας ποιεῖν τῆς βουλῆς κατὰ πενθήμερον, ἐὰν μὴ δέωνται πλειόνων. πληροῦν δὲ τὴν βουλὴν τοὺς ἐννέα ἄρχοντας. τὰς δὲ χειροτονίας κρίνειν πέντε τοὺς λαχόντας ἐκ τῆς βουλῆς, καὶ ἐκ τούτων ἓνα κληροῦσθαι [5] καθ' ἐκάστην ἡμέραν τὸν ἐπιψηφιοῦντα. κληροῦν δὲ τοὺς λαχόντας πέντε τοὺς ἐθέλοντας προσελθεῖν ἐναντίον τῆς βουλῆς, πρῶτον μὲν ἱερῶν, δεύτερον δὲ κήρυξιν, τρίτον πρεσβείαις, τέταρτον τῶν ἄλλων· τὰ δὲ τοῦ πολέμου ὅταν δέῃ ἀκληρωτὶ προσαγαγόντας τοὺς στρατηγούς χρηματίζεσθαι.

[6] τὸν δὲ μὴ ἰόντα εἰς τὸ βουλευτήριον τῶν βουλευόντων τὴν ὥραν τὴν προρρηθεῖσαν ὀφείλειν δραχμὴν τῆς ἡμέρας ἐκάστης, ἐὰν μὴ εὕρισκόμενος ἄφεςιν τῆς βουλῆς ἀπῇ.

[1] Ταύτην μὲν οὖν εἰς τὸν μέλλοντα χρόνον ἀνέγραψαν τὴν πολιτείαν, ἐν δὲ τῷ παρόντι καιρῷ τήνδε· βουλευεῖν μὲν τετρακοσίους κατὰ τὰ πάτρια, τετταράκοντα ἐξ ἐκάστης φυλῆς, ἐκ προκρίτων [οἱ] ὅς ἂν ἔλονται οἱ φυλέται τῶν ὑπὲρ τριάκοντα ἔτη γεγονότων. τούτους δὲ τὰς τε ἀρχὰς καταστήσαι, καὶ περὶ τοῦ ὄρκου ὄντινα χρή ὁμόσαι γράψαι, «καὶ» περὶ τῶν νόμων καὶ τῶν εὐθυ[νῶ]ν καὶ τῶν ἄλλων [2] πράττειν ἣ ἂν ἡγῶνται συμφέρειν. τοῖς δὲ νόμοις οἱ ἂν τεθῶσιν περὶ τῶν πολιτικῶν χρῆσθαι, καὶ μὴ ἐξεῖναι μετακινεῖν μηδ' ἐτέρους θέσθαι. τῶν δὲ στρατηγῶν τὸ νῦν εἶναι τὴν αἵρεσιν ἐξ ἀπάντων ποιεῖσθαι τῶν πεντακισχιλίων, τὴν δὲ βουλὴν ἐπειδὴν καταστή, ποιήσασαν ἐξέτασιν «ἐν» ὅπλοις ἐλέσθαι δέκα ἄνδρας καὶ γραμματέα τούτοις, τοὺς δὲ αἰρεθέντας ἄρχειν τὸν εἰσιόντα ἐνιαυτὸν αὐτοκράτορας, καὶ ἂν τι δέωνται συμβουλευέσθαι μετὰ τῆς βουλῆς.

[3] ἐλέσθαι δὲ καὶ ἵππαρχον ἓνα καὶ φυλάρχους δέκα. τὸ δὲ λοιπὸν τὴν αἵρεσιν ποιεῖσθαι τούτων τὴν βουλὴν κατὰ τὰ γεγραμμένα. τῶν δ' ἄλλων ἀρχῶν πλὴν τῆς βουλῆς καὶ τῶν στρατηγῶν μὴ ἐξεῖναι μήτε τούτοις μήτε ἄλλῳ μηδενὶ πλεόν ἢ ἅπαξ ἄρξαι τὴν αὐτὴν ἀρχήν. εἰς δὲ τὸν ἄλλον χρόνον ἵνα νεμηθῶσιν οἱ τετρακόσιοι εἰς τὰς τέτταρας λήξεις, ὅταν τοῖς αὐτοῖς γίγνηται μετὰ τῶν ἄλλων βουλευεῖν, διανεμίσαντων αὐτοὺς οἱ ἑκατὸν ἄνδρες.

[1] Οἱ μὲν οὖν ἑκατὸν οἱ ὑπὸ τῶν πεντακισχιλίων αἰρεθέντες ταύτην ἀνέγραψαν τὴν πολιτείαν. ἐπικυρωθέντων δὲ τούτων ὑπὸ τοῦ πλήθους, ἐπιψηφίσαντος Ἀριστομάχου, ἡ μὲν βουλὴ «ἦ» ἐπὶ Καλλίου πρὶν διαβουλευῆσαι κατελύθη μηνὸς Θαρρηλιῶνος τετράδι ἐπὶ δέκα, οἱ δὲ τετρακόσιοι εἰσήεσαν ἐνάτῃ φθίνοντος Θαρρηλιῶνος· ἔδει δὲ τὴν εἰληχυῖαν τῷ κυάμφῳ βουλὴν εἰσιέναι δ' ἐπὶ δέκα Σκιροφοριῶνος.

[2] ἡ μὲν οὖν ὀλιγαρχία τοῦτον κατέστη τὸν τρόπον, ἐπὶ Καλλίου μὲν ἄρχοντος, ἔτεσιν δ' ὕστερον τῆς τῶν τυράννων ἐκβολῆς μάλιστα ἑκατὸν, αἰτίων μάλιστα γενομένων Πεισάνδρου καὶ Αντιφῶντος καὶ Θηραμένους, ἀνδρῶν καὶ γεγενημένων εὖ καὶ συνέσει καὶ γνώμῃ δοκούντων διαφέρειν.

[3] γενομένης δὲ ταύτης τῆς πολιτείας, οἱ μὲν πεντακισχίλιοι λόγῳ μόνον ἠρέθησαν, οἱ δὲ τετρακόσιοι μετὰ τῶν δέκα τῶν αὐτοκρατόρων εἰσελθόντες εἰς τὸ βουλευτήριον ἦρχον τῆς πόλεως, καὶ πρὸς Λακεδαιμονίους πρεσβευσάμενοι κατελύοντο τὸν πόλεμον, ἐφ' οἷς ἑκάτεροι τυγχάνουσιν ἔχοντες· οὐχ ὑπακούοντων δ' ἐκείνων, εἰ μὴ καὶ τὴν ἀρχὴν τῆς θαλάττης ἀφήσουσιν, οὕτως ἀπέστησαν.

[1] Μῆνας μὲν οὖν ἴσως τέτταρας διέμεινεν ἡ τῶν τετρακοσίων πολιτεία, καὶ ἤρξεν ἐξ αὐτῶν Μνησίλοχος δίμηνον ἐπὶ Θεοπόμπου ἄρχοντος, <ὅς> ἤρξε τοὺς ἐπιλοίπους δέκα μῆνας. ἡττηθέντες δὲ τῇ περὶ Ἑρέτριαν ναυμαχίᾳ, καὶ τῆς Εὐβοίας ἀποστάσης ὅλης πλὴν Ὀρεοῦ, χαλεπῶς ἐνεγκόντες ἐπὶ τῇ συμφορᾷ μάλιστα τῶν προγεγενημένων (πλείω γὰρ ἐκ τῆς Εὐβοίας ἢ τῆς Ἀττικῆς ἐτύγχανον ὠφελούμενοι), κατέλυσαν τοὺς τετρακοσίους, καὶ τὰ πράγματα παρέδωκαν τοῖς πεντακισχιλίοις τοῖς ἐκ τῶν ὅπλων, [2] ψηφισάμενοι μηδεμίαν ἀρχὴν εἶναι μισθοφόρον. αἰτιώτατοι δ' ἐγένοντο τῆς καταλύσεως Ἀριστοκράτης καὶ Θηραμένης, οὐ συναρεσκόμενοι τοῖς ὑπὸ τῶν τετρακοσίων γιγνομένοις. ἅπαντα γὰρ δι' αὐτῶν ἔπραττον, οὐδὲν ἐπαναφέροντες τοῖς πεντακισχιλίοις. δοκοῦσι δὲ καλῶς πολιτευθῆναι κατὰ τούτους τοὺς καιροὺς, πολέμου τε καθεστῶτος καὶ ἐκ τῶν ὅπλων τῆς πολιτείας οὔσης.

[1] Τούτους μὲν οὖν ἀφείλετο τὴν πολιτείαν ὁ δῆμος διὰ τάχους· ἔτει δ' ἔκτω μετὰ τὴν τῶν τετρακοσίων κατάλυσιν, ἐπὶ Καλλίου τοῦ Ἀγγελῆθεν ἄρχοντος, γενομένης τῆς ἐν Ἀργινούσσαις ναυμαχίας, πρῶτον μὲν τοὺς δέκα στρατηγοὺς τοὺς τῇ ναυμαχίᾳ νικῶντας συνέβη κριθῆναι μιᾷ χειροτονίᾳ πάντας, τοὺς μὲν οὐδὲ συνναυμαχήσαντας, τοὺς δ' ἐπ' ἀλλοτρίας νεῶς σωθέντας, ἐξαπατηθέντος τοῦ δήμου διὰ τοὺς παροργίσαντας· ἔπειτα βουλομένων Λακεδαιμονίων ἐκ Δεκελείας ἀπιέναι καὶ ἐφ' οἷς ἔχουσιν ἑκάτεροι εἰρήνην ἄγειν, ἔνιοι μὲν ἐσπούδαζον, τὸ δὲ πλῆθος οὐχ ὑπήκουσεν ἐξαπατηθέντες ὑπὸ Κλεοφῶντος, ὃς ἐκώλυσε γενέσθαι τὴν εἰρήνην, ἐλθὼν εἰς τὴν ἐκκλησίαν μεθύων καὶ θώρακα ἐνδεδυκώς, οὐ φάσκων ἐπιτρέψειν ἂν [2] μὴ πάσας ἀφῶσι Λακεδαιμόνιοι τὰς πόλεις. οὐ χρησάμενοι δὲ καλῶς τότε τοῖς πράγμασι, μετ' οὐ πολὺν χρόνον ἔγνωσαν τὴν ἁμαρτίαν. τῷ γὰρ ὕστερον ἔτει, ἐπ' Ἀλεξίου ἄρχοντος, ἠτύχησαν τὴν ἐν Αἰγὸς ποταμοῖς ναυμαχίαν, ἐξ ἧς συνέβη κύριον γενόμενον τῆς πόλεως Λύσανδρον [3] καταστήσαι τοὺς τριάκοντα τρόπῳ τοιῷδε. τῆς εἰρήνης γενομένης αὐτοῖς ἐφ' ᾧ τε πολιτεύσονται τὴν πάτριον πολιτείαν, οἱ μὲν δημοτικοὶ διασώζειν ἐπειρῶντο τὸν δῆμον, τῶν δὲ γνωρίμων οἱ μὲν ἐν ταῖς ἐταιρείαις ὄντες, καὶ τῶν φυγάντων οἱ μετὰ τὴν εἰρήνην κατελθόντες ὀλιγαρχίας ἐπεθύμουν, οἱ δ' ἐν ἐταιρείᾳ μὲν οὐδεμιᾷ συγκαθεστῶτες, [ἀ]λλως δὲ δοκοῦντες οὐδενὸς ἐπιλείπεσθαι τῶν πολιτῶν, τὴν πάτριον πολιτείαν ἐζήτουν· ὧν ἦν μὲν καὶ Ἀρχῖνος καὶ Ἄνυτος καὶ Κλειτοφῶν καὶ Φορμίσιος καὶ ἕτεροι πολλοί, προειστήκει δὲ μάλιστα Θηραμένης. Λυσάνδρου δὲ προσθεμένου τοῖς ὀλιγαρχικοῖς, καταπλαγείς ὁ δῆμος ἠναγκάσθη χειροτονεῖν τὴν ὀλιγαρχίαν. ἔγραψε δὲ τὸ ψήφισμα Δρακοντίδης Ἀφιδναῖος.

[1] Οἱ μὲν οὖν τριάκοντα τοῦτον τὸν τρόπον κατέστησαν ἐπὶ Πυθοδώρου ἄρχοντος. γενόμενοι δὲ κύριοι τῆς πόλεως, τὰ μὲν ἄλλα τὰ δόξαντα περὶ τῆς πολιτείας παρεώρων, πεντακοσίους δὲ βουλευτὰς καὶ τὰς ἄλλας ἀρχὰς καταστήσαντες ἐκ προκρίτων ἐκ τῶν χιλίων, καὶ προσελόμενοι σφίσιν αὐτοῖς τοῦ Πειραιέως ἄρχοντας δέκα, καὶ τοῦ δεσποτηρίου φύλακας ἔνδεκα, καὶ μαστιγοφόρους τριακοσίους [2] ὑπηρέτας κατεῖχον τὴν πόλιν δι' ἑαυτῶν. τὸ μὲν οὖν πρῶτον μέτριοι τοῖς πολίταις ἦσαν καὶ προσεποιούντο διώκειν τὴν πάτριον πολιτείαν, καὶ τοὺς τ' Ἐφιάλτου καὶ Ἀρχεστράτου νόμους τοὺς περὶ τῶν Ἀρεοπαγιτῶν καθεῖλον ἐξ Ἀρείου πάγο[υ], καὶ τῶν Σόλωνος θεσμῶν ὅσοι διαμφισβητήσεις ἔσχον, καὶ τὸ κῦρος ὃ ἦν ἐν τοῖς δικασταῖς κατέλυσαν, ὥς ἐπανορθοῦντες καὶ ποιοῦντες ἀναμφισβήτητον τὴν πολιτείαν, οἷον <τὸν> περὶ τοῦ δοῦναι τὰ ἑαυτοῦ ᾧ ἂν ἐθέλῃ κύριον ποιήσαντες καθάπαξ· τὰς δὲ προσοῦσας δυσκολίας, 'ἐὰν μὴ μανιῶν ἢ γηρῶν ἢ γυναικὶ πιθόμενος', ἀφεῖλον ὅπως μὴ ἦ τοῖς συκοφάνταις ἔφοδος· [3] ὁμοίως δὲ τοῦτ' ἔδρων καὶ ἐπὶ τῶν ἄλλων. κατ' ἀρχὰς μὲν οὖν ταῦτ' ἐποίουν, καὶ τοὺς συκοφάντας καὶ τοὺς τῷ δήμῳ πρὸς χάριν ὁμιλοῦντας παρὰ τὸ βέλτιστον καὶ κακοπράγμονας ὄντας καὶ πονηροὺς ἀνήρουν, ἐφ' οἷς ἔχαιρεν ἡ πόλις γιγνομένοις, ἡγούμενοι τοῦ βελτίστου χάριν ποιεῖν [4] αὐτούς. ἐπεὶ δὲ τὴν πόλιν ἐγκρατέστερον ἔσχον, οὐδενὸς ἀπείχοντο τῶν πολιτῶν, ἀλλ' ἀπέκτειναν τοὺς καὶ ταῖς οὐσίαις καὶ τῷ γένει καὶ τοῖς ἀξιώμασιν προέχοντας, ὑπεξαιρούμενοί τε τὸν φόβον καὶ βουλόμενοι τὰς οὐσίας διαρπάζειν. καὶ χρόνου διαπεσόντος βραχέος, οὐκ ἐλάττους ἀνηρήκεσαν ἢ χιλίους πεντακοσίους.

[1] Οὕτως δὲ τῆς πόλεως ὑποφερομένης, Θηραμένης ἀγανακτῶν ἐπὶ τοῖς γιγνομένοις, τῆς μὲν ἀσελγείας αὐτοῖς παρήνει παύσασθαι, μεταδοῦναι δὲ τῶν πραγμάτων τοῖς βελτίστοις. οἱ δὲ πρῶτον ἐναντιωθέντες, ἐπεὶ διεσπάρησαν οἱ λόγοι πρὸς τὸ πλῆθος καὶ πρὸς τὸν Θηραμένην οἰκείως εἶχον οἱ πολλοί, φοβηθέντες μὴ προστάτης γενόμενος τοῦ δήμου καταλύσῃ τὴν δυναστείαν, καταλέγουσιν τῶν πολιτῶν [2] τρισχιλίους, ὥς μεταδώσοντες τῆς πολιτείας. Θηραμένης δὲ πάλιν ἐπιτιμᾷ καὶ τούτοις, πρῶτον μὲν ὅτι βουλόμενοι μεταδοῦναι τοῖς ἐπιεικέσι τρισχιλίοις μόνοις μεταδιδόασι, ὥς ἐν τούτῳ τῷ πλήθει τῆς ἀρετῆς ὠρισμένης, ἔπειθ' ὅτι δύο τὰ ἐναντιώτατα ποιοῦσιν, βίαιόν τε τὴν ἀρχὴν καὶ τῶν ἀρχομένων ἥττω κατασκευάζοντες. οἱ δὲ τούτων μὲν ὀλιγώρησαν, τὸν δὲ κατάλογον τῶν τρισχιλίων πολὺν μὲν χρόνον ὑπερεβάλλοντο καὶ παρ' αὐτοῖς ἐφύλαττον τοὺς ἐγνωσμένους, ὅτε δὲ καὶ δόξειεν αὐτοῖς ἐκφέρειν, τοὺς μὲν ἐξήλειπον τῶν <ἐγ>γεγραμμένων, τοὺς δ' ἀντενέγραφον τῶν ἔξωθεν.

[1] Ἦδη δὲ τοῦ χειμῶνος ἐνεστῶτος, καταλαβόντος Θρασυβούλου μετὰ τῶν φυγάδων Φυλὴν, καὶ κατὰ τὴν στρατιὰν ἦν ἐξήγαγον οἱ τριάκοντα κακῶς ἀποχωρήσαντες, ἔγνωσαν τῶν μὲν ἄλλων τὰ ὄπλα παρελῆσθαι, Θηραμένην δὲ διαφθεῖραι τόνδε <τὸν> τρόπον· νόμους εἰσήνεγκαν εἰς τὴν βουλὴν δύο κελεύοντες ἐπιχειροτονεῖν, ὧν ὁ μὲν εἷς αὐτοκράτορας ἐποίει τοὺς τριάκοντα, τῶν πολιτῶν ἀποκτεῖναι τοὺς μὴ τοῦ καταλόγου μετέχοντας τῶν τρισχιλίων, ὁ δ' ἕτερος ἐκώλυε κοινωνεῖν τῆς παρούσης πολιτείας, ὅσοι τυγχάνουσιν τὸ ἐν Ἡετιωνείᾳ τεῖχος κατασκάψαντες, ἢ τοῖς τετρακοσίοις ἐναντίον τι πράξαντες ἢ τοῖς κατασκευάσασι τὴν προτέραν ὀλιγαρχίαν· ὧν ἐτύγχανεν ἀμφοτέρων κεκοινωνηκῶς ὁ Θηραμένης, ὥστε συνέβαινεν ἐπικυρωθέντων τῶν νόμων, ἔξω τε γίνεσθαι τῆς πολιτείας αὐτόν, καὶ τοὺς τριάκοντα κυρίους εἶναι θανατοῦντας.

[2] ἀναιρεθέντος δὲ Θηραμένους, τά τε ὄπλα παρείλοντο πάντων πλὴν τῶν τρισχιλίων, καὶ ἐν τοῖς ἄλλοις πολὺ πρὸς ὠμότητα καὶ πονηρίαν ἐπέδοσαν. πρέσβεις <δὲ> πέμψαντες εἰς Λακεδαιμόνα τοῦ τε Θηραμένους κατηγοροῦν, καὶ βοηθεῖν αὐτοῖς ἠξίου. ὧν ἀκούσαντες οἱ Λακεδαιμόνιοι Καλλίβιον ἀπέστειλαν ἄρμοστὴν καὶ στρατιώτας ὡς ἑπτακοσίους, οἳ τὴν ἀκρόπολιν ἐλθόντες ἐφρούρουν.

[1] Μετὰ δὲ ταῦτα καταλαβόντων τῶν ἀπὸ Φυλῆς τὴν Μουνιχίαν, καὶ νικησάντων μάχῃ τοὺς μετὰ τῶν τριάκοντα βοηθήσαντας, ἐπαναχωρήσαντες μετὰ τὸν κίνδυνον οἱ ἐκ τοῦ ἄστεως, καὶ συναθροισθέντες εἰς τὴν ἀγορὰν τῇ ὑστεραία τοὺς μὲν τριάκοντα κατέλυσαν, αἰροῦνται δὲ δέκα τῶν πολιτῶν αὐτοκράτορας ἐπὶ τὴν τοῦ πολέμου κατάλυσιν. οἱ δὲ παραλαβόντες τὴν ἀρχὴν, ἐφ' οἷς μὲν ἡρέθησαν οὐκ ἔπραττον, ἔπεμπον δ' εἰς Λακεδαίμονα βοήθειαν μεταπεμπόμενοι [2] καὶ χρήματα δανειζόμενοι. χαλεπῶς δὲ φερόντων ἐπὶ τούτοις τῶν ἐν τῇ πολιτείᾳ, φοβούμενοι μὴ καταλυθῶσιν τῆς ἀρχῆς, καὶ βουλόμενοι καταπλῆξαι τοὺς ἄλλους (ὅπερ ἐγένετο), συλλαβόντες [Δ]ημάρετον οὐδενὸς ὄντα δεύτερον τῶν πολιτῶν ἀπέκτειναν, καὶ τὰ πράγματα βεβαίως εἶχον, συναγωνιζομένου Καλλιβίου τε καὶ τῶν Πελοποννησίων τῶν παρόντων, καὶ πρὸς τούτοις ἐνίων τῶν ἐν τοῖς ἰππεῦσι· τούτων γάρ τινες μάλιστα τῶν πολιτῶν [3] ἐσπούδαζον μὴ κατελθεῖν τοὺς ἀπὸ Φυλῆς. ὥς δ' οἱ τὸν Πειραιέα καὶ τὴν Μουνιχίαν ἔχοντες, ἀποστάντος ἅπαντος τοῦ δήμου πρὸς αὐτούς, ἐπεκράτουν τῷ πολέμῳ, τότε καταλύσαντες τοὺς δέκα τοὺς πρώτους αἰρεθέντας ἄλλους εἵλοντο δέκα τοὺς βελτίστους εἶναι δοκοῦντας, ἐφ' ὧν συνέβη καὶ τὰς διαλύσεις γενέσθαι καὶ κατελθεῖν τὸν δῆμον, συναγωνιζομένων καὶ προθυμουμένων τούτων. προειστήκεσαν δ' αὐτῶν μάλιστα Ῥίνων τε ὁ Παιανιεὺς καὶ Φάυλλος ὁ Ἀχερδούσιος· οὗτοι γὰρ πρὶν τε Πausανίαν τ' ἀφικέσθαι διεπέμποντο πρὸς τοὺς ἐν Πειραιεῖ, καὶ [4] ἀφικομένου συνεσπούδασαν τὴν κάθοδον. ἐπὶ πέρας γὰρ ἤγαγε τὴν εἰρήνην καὶ τὰς διαλύσεις Πausανίας ὁ τῶν Λακεδαιμονίων βασιλεὺς, μετὰ τῶν δέκα διαλλακτῶν τῶν ὕστερον ἀφικομένων ἐκ Λακεδαίμονος, οὓς αὐτὸς ἐσπούδασεν ἐλθεῖν· οἱ δὲ περὶ τὸν Ῥίνωνα διὰ τε τὴν εὐνοίαν τὴν εἰς τὸν δῆμον ἐπηνέθησαν, καὶ λαβόντες τὴν ἐπιμέλειαν ἐν ὀλιγαρχίᾳ, τὰς εὐθύνas ἔδοσαν ἐν δημοκρατίᾳ, καὶ οὐδεὶς οὐδὲν ἐνεκάλεσεν αὐτοῖς, οὔτε τῶν ἐν ἄστει μεινάντων, οὔτε τῶν ἐκ Πειραιέως κατελθόντων, ἀλλὰ διὰ ταῦτα καὶ στρατηγὸς εὐθὺς ἡρέθη Ῥίνων.

[1] Ἐγένοντο δ' αἱ διαλύσεις ἐπ' Εὐκλείδου ἄρχοντος κατὰ τὰς συνθήκας τάσδε. τοὺς βουλομένους Ἀθηναίων τῶν ἐν ἄστει μεινάντων ἐξοικεῖν ἔχειν Ἐλευσίνα ἐπιτίμους ὄντας καὶ κυρίους καὶ αὐτοκράτορας ἑαυτῶν καὶ τὰ αὐτῶν [2] καρπουμένους. τὸ δ' ἱερὸν εἶναι κοινὸν ἀμφοτέρων, ἐπιμελεῖσθαι δὲ Κήρυκας καὶ Εὐμολπίδας κατὰ τὰ πάτρια. μὴ ἐξεῖναι δὲ μήτε τοῖς Ἐλευσινόθεν εἰς τὸ ἄστυ μήτε τοῖς ἐκ τοῦ ἄστεως Ἐλευσινάδε ἰέναι, πλὴν μυστηρίους ἐκατέρους. συντελεῖν δὲ ἀπὸ τῶν προσιόντων εἰς τὸ συμμαχικὸν [3] καθάπερ τοὺς ἄλλους Ἀθηναίους. ἐὰν δέ τινες τῶν ἀπιόντων οἰκίαν λαμβάνωσιν Ἐλευσίνι, συμπεῖθαι τὸν κεκτημένον. ἐὰν δὲ μὴ συμβαίνωσιν ἀλλήλοις, τιμητὰς ἐλέσθαι τρεῖς ἐκάτερον, καὶ ἦντιν' ἂν οὗτοι τάξωσιν τιμὴν λαμβάνειν. Ἐλευσινίων δὲ συνοικεῖν οὐς ἂν οὗτοι βούλωνται.

[4] τὴν δ' ἀπογραφὴν εἶναι τοῖς βουλομένοις ἐξοικεῖν, τοῖς μὲν ἐπιδημοῦσιν ἀφ' ἧς ἂν ὁμόσωσιν τοὺς ὅρκους δεκά ἡμερῶν, τὴν δ' ἐξοίκησιν εἴκοσι, τοῖς δ' ἀποδημοῦσιν [5] ἐπειδὰν ἐπιδημήσωσιν κατὰ ταυτά. μὴ ἐξεῖναι δὲ ἄρχειν μηδεμίαν ἀρχὴν τῶν ἐν τῷ ἄστει τὸν Ἐλευσίνι κατοικοῦντα, πρὶν ἂν ἀπογράφηται πάλιν ἐν τῷ ἄστει κατοικεῖν. τὰς δὲ δίκας τοῦ φόνου εἶναι κατὰ τὰ πάτρια, εἴ τίς τινα αὐτοχειρίᾳ ἔκτεινεν ἢ ἔτρωσεν.

[6] τῶν δὲ παρεληλυθότων μηδενὶ πρὸς μηδένα μνησικακεῖν ἐξεῖναι, πλὴν πρὸς τοὺς τριάκοντα καὶ τοὺς δέκα καὶ τοὺς ἑνδεκα καὶ τοὺς τοῦ Πειραιέως ἄρξαντας, μηδὲ πρὸς τούτους, ἐὰν διδῶσιν εὐθύνας. εὐθύνας δὲ δοῦναι τοὺς μὲν ἐν Πειραιεῖ ἄρξαντας ἐν τοῖς ἐν Πειραιεῖ, τοὺς δ' ἐν τῷ ἄστει ἐν τοῖς τὰ τιμήματα παρεχομένοις. εἴθ' οὕτως ἐξοικεῖν τοὺς ἐθέλοντας. τὰ δὲ χρήματα ἃ ἐδανείσαντο εἰς τὸν πόλεμον ἐκατέρους ἀποδοῦναι χωρὶς.

[1] Γενομένων δὲ τοιούτων τῶν διαλύσεων, καὶ φοβουμένων, ὅσοι μετὰ τῶν τριάκοντα συνεπολέμησαν, καὶ πολλῶν μὲν ἐπινοούντων ἐξοικεῖν, ἀναβαλλομένων δὲ τὴν ἀπογραφὴν εἰς τὰς ἐσχάτας ἡμέρας, ὅπερ εἰώθασιν ποιεῖν ἅπαντες, Ἀρχῖνος συνιδὼν τὸ πλῆθος καὶ βουλόμενος κατασχεῖν αὐτούς, ὑφέϊλε τὰς ὑπολοίπους ἡμέρας τῆς ἀπογραφῆς, ὥστε συναναγκασθῆναι μένειν πολλοὺς ἄκοντας, [2] ἕως ἐθάρρησαν. καὶ δοκεῖ τοῦτό τε πολιτεύσασθαι καλῶς Ἀρχῖνος, καὶ μετὰ ταῦτα γραψάμενος τὸ ψήφισμα τὸ Θρασυβούλου παρανόμων, ἐν ᾧ μετεδίδου τῆς πολιτείας πᾶσι τοῖς ἐκ Πειραιέως συγκατελθοῦσι, ὧν ἔνιοι φανερώς ἦσαν δοῦλοι, καὶ τρίτον, ἐπεὶ τις ἤρξατο τῶν κατεληλυθότων μνησικακεῖν, ἀπαγαγὼν τοῦτον ἐπὶ τὴν βουλὴν καὶ πείσας ἄκριτον ἀποκτεῖναι, λέγων ὅτι νῦν δείξουσιν, εἰ βούλονται τὴν δημοκρατίαν σῶζειν καὶ τοῖς ὅρκοις ἐμμένειν· ἀφέντας μὲν γὰρ τοῦτον προτρέψειν καὶ τοὺς ἄλλους, ἐὰν δ' ἀνέλωσιν, παράδειγμα ποιήσιν ἅπασιν. ὅπερ καὶ συνέπεσεν· ἀποθανόντος γὰρ οὐδεὶς πώποτε ὕστερον ἐμνησικάκησεν, ἀλλὰ δοκοῦσιν κάλλιστα δὴ καὶ πολιτικώτατα ἀπάντων καὶ ἰδίᾳ καὶ κοινῇ χρήσασθαι ταῖς προγεγενημέναις [3] συμφοραῖς· οὐ γὰρ μόνον τὰς περὶ τῶν προτέρων αἰτίας ἐξήλειψαν, ἀλλὰ καὶ τὰ χρήματα Λακεδαιμονίοις, ἃ οἱ τριάκοντα πρὸς τὸν πόλεμον ἔλαβον, ἀπέδωκαν κοινῇ, κελευουσῶν τῶν συνθηκῶν ἑκατέρους ἀποδιδόναι χωρὶς, τοὺς τ' ἐκ τοῦ ἄστεως καὶ τοὺς ἐκ τοῦ Πειραιέως, ἡγούμενοι τοῦτο πρῶτον ἄρχειν δεῖν τῆς ὁμονοίας· ἐν δὲ ταῖς ἄλλαις πόλεσιν οὐχ οἷον ἔτι προστιθέασιν τῶν οἰκείων οἱ δῆμοι κρατήσαντες, ἀλλὰ καὶ τὴν χώραν ἀνάδαστον [4] ποιοῦσιν. διελύθησαν δὲ καὶ πρὸς τοὺς ἐν Ἐλευσίνι [κατο]ικήσαντας, ἔτει τρίτῳ μετὰ τὴν ἐξοίκησιν, ἐπὶ Ξε[ναι]νέτου ἄρχοντος.

[1] Ταῦτα μὲν οὖν ἐν τοῖς ὕστε[ρο]ν συνέβη γενέσθαι καιροῖς, τότε δὲ κύριος ὁ δῆμος γενόμενος τῶν πραγμάτων, ἐνεστήσατο τὴν νῦν οὖσαν πολιτείαν, ἐπὶ Πυθοδώρου μὲν ἄρχοντος δοκοῦντος δὲ δικαίως τοῦ δήμου λαβεῖν τὴν π[ο]λιτείαν, διὰ τὸ ποιήσασθαι τὴν κάθοδον δι' αὐτοῦ τὸν [2] δῆμον. ἦν δὲ τῶν μεταβολῶν ἐνδεκάτη τὸν ἀριθμὸν αὕτη. πρώτη μὲν γὰρ ἐγένετο μετὰστασις τῶν ἐξ ἀρχῆς Ἴωνος καὶ τῶν μετ' αὐτοῦ συνοικησάντων· τότε γὰρ πρῶτον εἰς τὰς τέτταρας συνενεμήθησαν φυλάς, καὶ τοὺς φυλοβασιλέας κατέστησαν. δευτέρα δὲ καὶ πρώτη μετὰ ταύτη[ν] ἔχουσα τι πολιτείας τάξις ἡ ἐπὶ Θησέως γενομένη, μικρὸν παρεγκλίνουσα τῆς βασιλικῆς. μετὰ δὲ ταύτην ἡ ἐπὶ Δράκοντος, ἐν ἧ καὶ νόμους ἀνέγραψαν πρῶτον. τρίτη δ' ἡ μετὰ τὴν στάσιν ἡ ἐπὶ Σόλωνος, ἀφ' ἧς ἀρχὴ δημοκρατίας ἐγένετο. τετάρτη δ' ἡ ἐπὶ Πεισιστράτου τυραννίς. πέμπτη δ' ἡ μετὰ <τὴν> τῶν τυράννων κατάλυσιν ἡ Κλεισθένους, δημοτικωτέρα τῆς Σόλωνος. ἕκτη δ' ἡ μετὰ τὰ Μηδικά, τῆς ἐξ Ἀρείου πάγου βουλῆς ἐπιστατούσης. ἑβδόμη δὲ ἡ μετὰ ταύτην, ἣν Ἀριστείδης μὲν ὑπέδειξεν, Ἐφιάλτης δ' ἐπετέλεσεν, καταλύσας τὴν Ἀρεοπαγίτιν βουλήν· ἐν ἧ πλεῖστα συνέβη τὴν πόλιν διὰ τοὺς δημαγωγοὺς ἀμαρτάνειν διὰ τὴν τῆς θαλάττης ἀρχήν. ὀγδόη δ' ἡ τῶν τετρακοσίων κατάστασις, καὶ <ἡ> μετὰ ταύτην, ἐνάτη δέ, ἡ δημοκρατία πάλιν. δεκάτη δ' ἡ τῶν τριάκοντα καὶ ἡ τῶν δέκα τυραννίς. ἐνδεκάτη δ' ἡ μετὰ τὴν ἀπὸ Φυλῆς καὶ ἐκ Πειραιέως κάθοδον, ἀφ' ἧς διαγεγένηται μέχρι τῆς νῦν, αἰὲ προσεπιλαμβάνουσα τῷ πλήθει τὴν ἐξουσίαν. ἀπάντων γὰρ αὐτὸς αὐτὸν πεποίηκεν ὁ δῆμος κύριον, καὶ πάντα διοικεῖται ψηφίσμασιν καὶ δικαστηρίοις, ἐν οἷς ὁ δῆμός ἐστιν ὁ κρατῶν. καὶ γὰρ αἱ τῆς βουλῆς κρίσεις εἰς τὸν δῆμον ἐληλύθασιν. καὶ τοῦτο δοκοῦσι ποιεῖν ὀρθῶς· εὐδιαφθορώτεροι γὰρ ὀλίγοι τῶν πολλῶν εἰσιν καὶ κέρδει [3] καὶ χάρισιν. μισθοφόρον δ' ἐκκλησίαν τὸ μὲν πρῶτον ἀπέγνωσαν ποιεῖν· οὐ συλλεγομένων δ' εἰς τὴν ἐκκλησίαν, ἀλλὰ πολλὰ σοφίζομένων τῶν πρυτάνεων, ὅπως προσιστῆται τὸ πλῆθος πρὸς τὴν ἐπικύρωσιν τῆς χειροτονίας, πρῶτον μὲν Ἀγύρριος ὀβολὸν ἐπόρισεν, μετὰ δὲ τοῦτον Ἡρακλείδης ὁ Κλαζομένιος ὁ βασιλεὺς ἐπικαλούμενος διώβολον, πάλιν δ' Ἀγύρριος τριώβολον.

[1] Ἔχει δ' ἡ νῦν κατάστασις τῆς πολιτείας τόνδε τὸν τρόπον. μετέχουσιν μὲν τῆς πολιτείας οἱ ἐξ ἀμφοτέρων γεγονότες ἀστῶν, ἐγγράφονται δ' εἰς τοὺς δημότας ὀκτωκαίδεκα ἔτη γεγονότες, ὅταν δ' ἐγγράφονται, διαψηφίζονται περὶ αὐτῶν ὁμόσαντες οἱ δημόται, πρῶτον μὲν εἰ δοκοῦσι γεγονέναι τὴν ἡλικίαν τὴν ἐκ τοῦ νόμου, κἂν μὴ δόξωσι, ἀπέρχονται πάλιν εἰς παῖδας, δεύτερον δ' εἰ ἐλεύθερός ἐστι καὶ γέγονε κατὰ τοὺς νόμους. ἔπειτ' ἂν μὲν ἀποψηφίσωνται μὴ εἶναι ἐλεύθερον, ὁ μὲν ἐφήσιν εἰς τὸ δικαστήριον, οἱ δὲ δημόται κατηγοροὺς αἰροῦνται πέντε [ἄν]δρας ἐξ αὐτῶν, κἂν μὲν μὴ δόξη δικαίως ἐγγράφεσθαι, πωλεῖ τοῦτον ἡ πόλις· ἐὰν δὲ νικήσῃ, τοῖς [δ]ημόταις ἐπάναγκες [2] ἐγγράφειν. μετὰ δὲ ταῦτα δ[οκ]ιμάζει τοὺς ἐγγραφέντας ἡ βουλή, κἂν τις δόξ[η] νεώτερος ὀκτωκαίδεκα ἔτων εἶναι, ζημιοῖ τ[ο]ὺς δημότας τοὺς ἐγγράψαντας. ἐπὶ δὲ δοκιμασθῶσιν οἱ ἔφηβοι, συλλεγέστες οἱ πατέρες αὐτῶν [κ]ατὰ φυλάς, ὁμόσαντες αἰροῦνται τρεῖς ἐκ τῶν φυλετῶν τῶν ὑπὲρ τετταράκοντα ἔτη γεγονότων, οὓς ἂν ἡγῶνται βελτίστους εἶναι καὶ ἐπιτηδειοτάτους ἐπιμελεῖσθαι τῶν ἐφήβων, ἐκ δὲ τούτων ὁ δῆμος ἓνα τῆς φυλῆς ἐκάστης χειροτονεῖ σωφρονιστήν, καὶ κοσμητήν ἐκ τῶν ἄλλων Ἀθηναίων ἐπὶ πάντας. συλλαβόντες δ' οὗτοι τοὺς [3] ἐφήβους, πρῶτον μὲν τὰ ἱερὰ περιῆλθον, εἴτ' εἰς Πειραιέα πορεύονται, καὶ φρουροῦσιν οἱ μὲν τὴν Μουνιχίαν, οἱ δὲ τὴν Ἀκτὴν. χειροτ[ο]νεῖ δὲ καὶ παιδοτρίβας αὐτοῖς δύο καὶ διδασκάλους, οἵτινες ὀπλομαχεῖν καὶ τοξεύειν καὶ ἀκοντίζειν καὶ καταπάλην ἀφιέναι διδάσκουσιν. δίδωσι δὲ καὶ εἰς τροφ[ὴν] τοῖς μὲν σωφρονισταῖς δραχμὴν α' ἐκάστῳ, τοῖς δ' ἐφήβοις τέτταρας ὀβολοὺς ἐκάστῳ· τὰ δὲ τῶν φυλετῶν τῶν αὐτοῦ λαμβάνων ὁ σωφρονιστῆς ἕκαστος ἀγοράζει τὰ ἐπιτήδεια πᾶσιν εἰς τὸ κοινόν (συσσιτοῦσι γὰρ [4] κατὰ φυλάς), καὶ τῶν ἄλλων ἐπιμελεῖται πάντων. καὶ τὸν μὲν πρῶτον ἐνιαυτὸν οὕτως διάγουσι· τὸν δ' ὕστερον ἐκκλησίας ἐν τῷ θεάτρῳ γενομένης, ἀποδειξάμενοι τῷ δήμῳ τὰ περὶ τὰς τάξεις, καὶ λαβόντες ἀσπίδα καὶ δόρυ παρὰ τῆς πόλεως, περιπολοῦσι τὴν χώραν καὶ διατρίβουσιν ἐν [5] τοῖς φυλακτηρίοις. φρουροῦσι δὲ τὰ δύο ἔτη χλαμύδας ἔχοντες, καὶ ἀτελεῖς εἰσι πάντων· καὶ δίκην οὔτε διδόασιν οὔτε λαμβάνουσιν, ἵνα μὴ πρό[φ]ασις ᾖ τ[ο]ῦ ἀπιέναι, πλὴν περὶ κλήρου καὶ

ἐπικλή[ρου], κᾶν τ[ι]νι κατὰ τὸ γένος ἱερωσύνη γένηται.
διε[ξ]ελθόντων δὲ τῶν δυεῖν ἐτῶν, ἤδη μετὰ τῶν ἄλλων εἰσίν.

[1] Τὰ μὲν οὖν περὶ τὴν τῶν πολιτῶν ἐγγραφὴν καὶ τοὺς ἐφήβους τοῦτον ἔχει τὸν τρόπον. τὰς δ' ἀρχὰς τὰς περὶ τὴν ἐγκύκλιον διοίκησιν ἀπάσας ποιοῦσι κληρωτάς, πλὴν ταμίου στρατιωτικῶν καὶ τῶν ἐπὶ τὸ θεωρικὸν καὶ τοῦ τῶν κρηνῶν ἐπιμελητοῦ. ταύτας δὲ χειροτονοῦσιν, καὶ οἱ χειροτονηθέντες ἄρχουσιν ἐκ Παναθηναίων εἰς Παναθήναια. [χ]ειροτονοῦσι δὲ καὶ τὰς πρὸς τὸν πόλεμον ἀπάσας.

[2] βουλὴ δὲ κληροῦται φ', ν' ἀπὸ φυλῆς ἐκάστης. πρυτανεύει δ' ἐν μέρει τῶν φυλῶν ἐκάστη καθ' ὃ τι ἂν λάχωσιν, αἱ μὲν πρῶται τέτταρες ζ' καὶ λ' ἡμέρας ἐκάστη, αἱ δὲ ζ' αἱ ὕστεραι πέντε καὶ λ' ἡμέρας ἐκάστη· κατὰ σελήνην [3] γὰρ ἄγουσιν τὸ[ν] ἐνιαυτόν. οἱ δὲ πρυτανεύοντες αὐτῶν πρῶτον μὲν συσσιτοῦσιν ἐν τῇ θόλῳ, λαμβάνοντες ἀργύριον παρὰ τῆς πόλεως, ἔπειτα συνάγουσιν καὶ τὴν βουλήν καὶ τὸν δῆμον· τὴν μὲν οὖν βουλήν ὅσαι ἡμέραι, πλὴν ἑάν τις ἀφέσιμος ᾖ, τὸν δὲ δῆμον τετράκις τῆς πρυτανείας ἐκάστης. καὶ ὅσα δεῖ χρηματίζειν τὴν βουλήν, καὶ ὃ τι ἐν ἐκάστη τῇ ἡμέρᾳ καὶ ὅπου καθίζειν, οὗτοι προγράφουσι.

[4] προγράφουσι δὲ καὶ τὰς ἐκκλησίας οὗτοι· μίαν μὲν κυρίαν, ἐν ἧ δεῖ τὰς ἀρχὰς ἐπιχειροτονεῖν εἰ δοκοῦσι καλῶς ἄρχειν, καὶ περὶ σίτου καὶ περὶ φυλακῆς τῆς χώρας χρηματίζειν, καὶ τὰς εἰσαγγελίας ἐν ταύτῃ τῇ ἡμέρᾳ τοὺς βουλομένους ποιεῖσθαι, καὶ τὰς ἀπογραφὰς τῶν δημευομένων ἀναγινώσκειν, καὶ τὰς λήξεις τῶν κλήρων καὶ τῶν ἐπικλήρων ἀναγινώσκειν, ὅπως μηδένα λάθῃ μηδὲν ἔρημον γενόμενον.

[5] ἐπὶ δὲ τῆς ἕκτης πρυτανείας πρὸς τοῖς εἰρημένοισι καὶ περὶ τῆς ὀστρακοφορίας ἐπιχειροτονίαν διδόασιν, εἰ δοκεῖ ποιεῖν ἢ μὴ, καὶ συκοφαντῶν προβολὰς τῶν Ἀθηναίων καὶ τῶν μετοίκων μέχρι τριῶν ἐκατέρων, κἄν τι[ς] [6] ὑποσχόμενός τι μὴ ποιήσῃ τῷ δήμῳ. ἐτέραν δὲ ταῖς ἱκετηρίαις, ἐν ἧ θεὶς ὁ βουλόμενος ἱκετηρίαν, ὑπὲρ ὧν ἂν βούληται καὶ ἰδίων καὶ δημοσίων, διαλέξεται πρὸς τὸν δῆμον. αἱ δὲ δύο περὶ τῶν ἄλλων εἰσὶν, ἐν αῖς κελεύουσιν οἱ νόμοι τρία μὲν ἱερῶν χρηματίζειν, τρία δὲ κήρυξιν καὶ πρεσβεΐαις, τρία δὲ ὀσίων. χρηματίζουσιν δ' ἐνίοτε καὶ ἄνευ προχειροτονίας. προσέρχονται δὲ καὶ οἱ κήρυκες καὶ οἱ πρέσβεις τοῖς πρυτάνεσιν πρῶτον, καὶ οἱ τὰς ἐπιστολάς φέροντες τούτοις ἀποδίδοσι.

[1] Ἔστι δ' ἐπιστάτης τῶν πρυτάνεων εἷς ὁ λαχών. οὗτος δ' ἐπιστατεῖ νύκτα καὶ ἡμέραν, καὶ οὐκ ἔστιν οὔτε πλείω χρόνον οὔτε δις τὸν αὐτὸν γενέσθαι. τηρεῖ δ' οὗτος τὰς τε κλεῖς τὰς τῶν ἱερῶν, ἐν οἷς τὰ χρήματ' ἐστὶν καὶ <τὰ> γράμματα τῇ πόλει, καὶ τὴν δημοσίαν σφραγίδα, καὶ μένειν ἀναγκαῖον ἐν τῇ θόλῳ τοῦτόν ἐστιν καὶ τριττὸν [2] τῶν πρυτάνεων ἦν ἂν οὗτος κελεύῃ. καὶ ἐπειδὰν συναγάγῃσιν οἱ πρυτάνεις τὴν βουλὴν ἢ τὸν δῆμον, οὗτος κληροῖ προέδρους ἑννέα, ἓνα ἐκ τῆς φυλῆς ἐκάστης πλὴν τῆς πρυτανευούσης, καὶ πάλιν ἐκ τούτων ἐπιστάτην ἓνα, καὶ [3] παραδίδωσι τὸ πρόγραμμα αὐτοῖς· οἱ δὲ παραλαβόντες τῆς τ' εὐκοσμίας ἐπιμελοῦνται, καὶ ὑπὲρ ὧν δεῖ χρηματίζειν προτιθέασιν, καὶ τὰς χειροτονίας κρίνουσιν, καὶ τὰ ἄλλα πάντα διοικοῦσιν, καὶ τοῦ τ' ἀφεῖναι κύριοί εἰσιν. καὶ ἐπιστατῆσαι μὲν οὐκ ἔξεστιν πλέον ἢ ἅπαξ ἐν τῷ ἐνιαυτῷ, προεδρεύειν δ' ἔξεστιν ἅπαξ ἐπὶ τῆς πρυτανείας ἐκάστης.

[4] ποιοῦσι δὲ καὶ ἀρχαιρεσίας στρατηγῶν καὶ ἱπάρχων καὶ τῶν ἄλλων τῶν πρὸς τὸν πόλεμον ἀρχῶν ἐν τῇ ἐκκλησίᾳ, καθ' ὃ τι ἂν τῷ δήμῳ δοκῇ· ποιοῦσι δ' οἱ μετὰ τὴν Σ' πρυτανεύοντες, ἐφ' ὧν ἂν εὐσημία γένηται. δεῖ δὲ προβούλευμα γενέσθαι καὶ περὶ τούτων.

[1] Ἡ δὲ βουλὴ πρότερον μὲν ἦν κυρία καὶ χρήμασιν ζημιῶσαι καὶ δῆσαι καὶ ἀποκτείνειν. καὶ Λυσίμαχον αὐτῆς ἀγαγούσης ὡς τὸν δῆμιον, καθήμενον ἤδη μέλλοντα ἀποθνήσκειν, Εὐμηλίδης ὁ Ἀλωπεκῆθεν ἀφείλετο, οὐ φάσκων δεῖν ἄνευ δικαστηρίου γνώσεως οὐδένα τῶν πολιτῶν ἀποθνήσκειν· καὶ κρίσεως ἐν δικαστηρίῳ γενομένης, ὁ μὲν Λυσίμαχος ἀπέφυγεν, καὶ ἐπωνυμίαν ἔσχεν ὁ ἀπὸ τοῦ τυπάνου, ὁ δὲ δῆμος ἀφείλετο τῆς βουλῆς τὸ θανατοῦν καὶ δεῖν καὶ χρήμασι ζημιοῦν, καὶ νόμον ἔθετο, ἂν τινος ἀδικεῖν ἢ βουλὴ καταγνῶ ἢ ζημιώσῃ, τὰς καταγνώσεις καὶ τὰς ἐπιζημιώσεις εἰσάγειν τοὺς θεσμοθέτας εἰς τὸ δικαστήριον, καὶ ὃ τι ἂν οἱ δικασταὶ ψηφίσωνται, τοῦτο κύριον εἶναι.

[2] κρίνει δὲ τὰς ἀρχὰς ἢ βουλὴ τὰς πλείστας, καὶ μάλισθ' ὅσαι χρήματα διαχειρίζουσιν· οὐ κυρία δ' ἢ κρίσις, ἀλλ' ἐφέσιμος εἰς τὸ δικαστήριον. ἔξεστι δὲ καὶ τοῖς ιδιώταις εἰσαγγέλλειν ἦν ἂν βούλωνται τῶν ἀρχῶν μὴ χρῆσθαι τοῖς νόμοις· ἔφεσις δὲ καὶ τούτοις ἐστὶν εἰς τὸ δικαστήριον, ἐὰν αὐτῶν ἢ βουλὴ καταγνῶ.

[3] δοκιμάζει δὲ καὶ τοὺς βουλευτὰς τοὺς τὸν ὕστερον ἐνιαυτὸν βουλευσόντας καὶ τοὺς ἐννέα ἄρχοντας. καὶ πρότερον μὲν ἦν ἀποδοκιμάσαι κυρία, νῦν δὲ τούτοις ἔφεσις ἐστὶν εἰς τὸ δικαστήριον.

[4] τούτων μὲν οὖν ἄκυρός ἐστιν ἢ βουλή· προβουλεύει δ' εἰς τὸν δῆμον, καὶ οὐκ ἔξεστιν οὐδὲν ἀπροβούλευτον οὐδ' ὃ τι ἂν μὴ προγράψωσιν οἱ πρυτάνεις ψηφίσασθαι τῷ δήμῳ. κατ' αὐτὰ γὰρ ταῦτα ἐνοχός ἐστιν ὁ νικήσας γραφῇ παρανόμων.

[1] Ἐπιμελεῖται δὲ καὶ τῶν πεποιημένων τριήρων καὶ τῶν σκευῶν καὶ τῶν νεωσοίκων, καὶ ποιεῖται καινὰς δὲ τριήρεις ἢ τετρήρεις, ὁποτέρας ἂν ὁ δῆμος χειροτονήσῃ, καὶ σκεύη ταύταις καὶ νεωσοίκους· χειροτονεῖ δ' ἀρχιτέκτονας ὁ δῆμος ἐπὶ τὰς ναῦς. ἂν δὲ μὴ παραδῶσιν ἐξεργασμένα ταῦτα τῇ νέᾳ βουλῇ, τὴν δωρεὰν οὐκ ἔστιν αὐτοῖς λαβεῖν· ἐπὶ γὰρ τῆς ὕστερον βουλῆς λαμβάνουσιν. ποιεῖται δὲ τὰς τριήρεις, δέκα ἄνδρας ἐξ αὐ[τῆς] ἐλομένη [2] τριηροποιούς. ἐξετάζει δὲ καὶ τὰ οἰκοδομήματα τὰ δημόσια πάντα, καὶ τις ἀδικεῖν αὐτῇ δόξῃ, τῷ τε δήμῳ τοῦτον [ἀπ]οφαίνει, καὶ καταγνοῦσα παραδίδωσι δικαστηρίῳ.

[1] Συνδιοικεῖ δὲ καὶ ταῖς ἄλλαις ἀρχαῖς τὰ πλεῖστα. πρῶτον μὲν γὰρ οἱ ταμίαι τῆς Ἀθηνᾶς εἰσὶ μὲν δέκα, κλη[ροῦτα]ι δ' εἰς ἓκ τῆς φυλῆς, ἓκ πεντακοσιομεδίμων κατὰ τὸν Σόλωνος νόμ[ον] (ἔτι γὰρ ὁ] νόμος κύριός ἐστιν), ἄρχει δ' ὁ λαχὼν κἂν πάνυ πένης ᾗ. παραλαμβάνου[σι] δὲ τό τε ἄγαλμα τῆς Ἀθηνᾶς καὶ τὰς Νίκας καὶ τὸν ἄλλον κόσμον καὶ τὰ χρ[ήμ]ατα ἐναντίον τῆς βουλῆς.

[2] ἔπειθ' οἱ πωληταὶ ἰ' μὲν εἰσι, κληροῦται δ' εἰς ἓκ τῆς φ[υ]λῆς. [μ]ισθοῦσι δὲ τὰ μισθώματα πάντα, καὶ τὰ μέταλλα πωλοῦσι καὶ τὰ τέλη μετὰ τοῦ ταμίου τῶν στρατιωτικῶν καὶ τῶν ἐπὶ τὸ θεωρικὸν ἡρημένων ἐναντίον τῆς [βουλῆς], καὶ κυροῦσιν ὅτῳ ἂν ἡ βουλή χειροτονήσῃ, καὶ τὰ πραθέντα μέταλλα, τὰ τ' ἐργάσιμα τὰ εἰς τρία ἔτη πεπραμένα, καὶ τὰ συγκεχωρημένα τὰ εἰς [.] ἔ[τη] πεπραμένα. καὶ τὰς οὐσίας τῶν ἐξ Ἀρείου πάγου φευγόντων καὶ τῶν ἄλλ[ων] ἐναντ[ί]ον τῆς β[ου]λῆς πωλοῦσιν, κατακυροῦσι δ' οἱ θ' ἄρχοντες. καὶ τὰ τέλη τὰ εἰς ἐνιαυτ[ὸ]ν πεπραμένα, ἀναγράψαντες εἰς λελευκωμένα γραμματεῖα τὸν τε πριάμενον καὶ [ὅσου] ἂν πρίηται, τῇ βουλῇ παραδιδόασιν.

[3] ἀναγράφουσιν δὲ χωρὶς μὲν οὖς δεῖ κατὰ π[ρυ]τανείαν ἐκάστην καταβάλλειν, εἰς δέκα γραμματεῖα, χωρὶς δὲ οὖς τρεῖς τοῦ [ἐ]νιαυτοῦ, γραμματεῖον κατὰ τὴν καταβολὴν ἐκάστην ποιήσαντες, χωρὶς δ' οὖς [ἐπ]ὶ τῆς ἐνάτης πρυτανείας. ἀναγράφουσι δὲ καὶ τὰ χωρία καὶ τὰς οἰκίας τὰ[πο]γρα[φ]έντα καὶ πραθέντα ἐν τῷ δικαστηρίῳ· καὶ γὰρ ταῦθ' οὗτοι πωλ[οῦ]σιν. ἔστι] δὲ τῶν μὲν οἰκιῶν ἐν ε' ἔτεσιν ἀνάγκη τὴν τιμὴν ἀποδοῦναι, τῶν δὲ χωρίων ἐν δέκα· καταβάλλουσιν δὲ ταῦτα ἐπὶ τῆς ἐνάτης πρυτανείας.

[4] εἰσφέρει δὲ καὶ ὁ βασιλεὺς τὰς μισθώσεις τῶν <τε>μενῶν, ἀναγράφας ἐν γραμματεῖ[οις] λελ[ε]υ[κ]ωμένοις. ἔστι δὲ καὶ τούτων ἡ μὲν μίσθωσις εἰς ἔτη δέκα, καταβάλλεται δ' ἐπὶ τῆς [θ'] πρυτανείας. διὸ καὶ πλεῖστα χρήματα ἐπὶ [5] ταύτης συλλέγεται τῆς πρυτανείας. εἰσφέρεται μὲν οὖν εἰς τὴν βουλήν τὰ γραμματεῖα κατὰ τὰς καταβολὰς ἀναγεγραμμένα, τηρεῖ δ' ὁ δημόσιος· ὅταν δ' ἡ χρημάτων [κατα]βολή, παραδίδωσι τοῖς ἀποδέκταις αὐτὰ ταῦτα καθελ[ὼν] ἀπ[ὸ] τῶν] ἐπιστυλίων, ὧν ἐν ταύτῃ τῇ ἡμέρᾳ δεῖ τὰ χρήματα καταβληθ[ῆν]αι καὶ ἀπαλειφθῆναι· τὰ δ' ἄλλα ἀπόκειται

χωρίς, ίνα μή προεξαλει[φθῇ].

[1] [Εἰσὶ] δ' ἀποδέκται δέκα κεκληρωμένοι κατὰ φυλάς· οὗτοι δὲ παραλαβόντες τὰ [γρα]μματεῖα, ἀπαλείφουσι τὰ καταβαλλόμενα χρήματα ἐναντίον τ[ῆς] βουλῆς] ἐν τῷ βουλευτηρίῳ, καὶ πάλιν ἀποδιδόασιν τὰ γραμματεῖα τ[ῷ] δημοσίῳ. κἄν τις ἐλλίπη καταβολήν, ἐνταῦθ' ἐγγέγραπται, καὶ διπλά[σιον] ἀ]νάγκη τὸ [ἐλλ]ειφθὲν καταβάλλειν ἢ δεδέσθαι, καὶ ταῦτα εἰσπράτ[τειν] ἢ βο]υλὴ καὶ δῆσαι [κυ]ρία [2] κατὰ τοὺς νόμους ἐστίν. τῇ μὲν οὖν προτεραία δέχονται τὰς [πάσα]ς καὶ μερίζουσι ταῖς ἀρχαῖς, τῇ δ' ὑστεραία τὸν τε μερισμὸν εἰσ[φέρου]σι γράψαντες ἐν σανίδι καὶ καταλέγουσιν ἐν τῷ βουλευτηρίῳ, καὶ προ[τιθ]έασιν ἐν τῇ βουλῇ, εἴ τίς τινα οἶδεν ἀδικοῦντα περὶ τὸν μερισμ[ὸν] ἢ ἄρ]χοντα ἢ ιδιώτην, καὶ γνώμας ἐπιψηφίζουσιν, ἐάν τίς τι δοκῇ ἀδικ[εῖν].]

[3] [κ]ληροῦσι δὲ καὶ λογιστὰς ἐξ αὐτῶν οἱ βουλευταὶ δέκα, τοὺς λογιουμένους τ[αῖς] ἀ]ρχαῖς κατὰ τὴν πρυτανείαν [4] ἐκάστην. κληροῦσι δὲ καὶ εὐθύνους ἓνα τῆς φυλῆς ἐκάστης, καὶ παρέδρους β' ἐκάστῳ τῶν εὐθύνων οἷς ἀναγκαῖόν ἐστι ταῖς ἀ[γορ]αῖς κατὰ τὸν ἐπώνυμον τὸν τῆς φυλῆς ἐκάστης καθῆσθαι, κἄν τις βούλ[ηται] τινὶ τῶν τὰς εὐθύνων ἐν τῷ δικαστηρίῳ δεδοκότων ἐντὸς γ' ἡ[μερῶν] ἀφ' ἧς ἔδωκε τὰς εὐθύνων εὐθυναν ἂν τ' ἰδίαν ἂν τε δ[η]μο[σί]α[ν] ἐμβαλέσθαι, γράψας εἰς πινάκιον λελευκωμένον τοῦνομα τό [θ' αὐ]τ[ο]ῦ καὶ τὸ τοῦ φεύγοντος, καὶ τὸ ἀδίκημ' ὃ τι ἂν ἐγκαλῇ, καὶ τίμημα ἐ[πι]γραψάμενος ὃ [5] τι ἂν αὐτῷ δοκῇ, δίδωσιν τῷ εὐθύνῳ· ὁ δὲ λαβὼν τοῦτο καὶ ἀν[ακρίνα]ς, ἐὰν μὲν καταγνῶ, παραδίδωσιν τὰ μὲν ἴδια τοῖς δικασταῖς τοῖς κατὰ δήμ[ους] τοῖς] τὴν φυλὴν ταύτην δικάζουσιν, τὰ δὲ δημόσια τοῖς θεσμοθέτα[ις] συνα]ναγράφει. οἱ δὲ θεσμοθέται, ἐὰν παραλάβωσιν, πάλιν εἰσάγουσιν [ταύτην τὴν] εὐθυναν εἰς τὸ δικαστήριον, καὶ ὃ τι ἂν γνῶσιν οἱ δικαστα[ί], τοῦτο κύ]ριόν ἐστιν.

[1] Δοκιμάζει δὲ καὶ τοὺς ἵππους ἢ βουλή, κἂν μὲν τις καλ[ὸν] ἵππον ἔχ[ω]ν κακῶς δοκῇ τρέφειν, ζημιοῖ τῷ σίτῳ· τοῖς δὲ μὴ δυναμ[ένοις] ἀκολ[ουθεῖν, ἢ μὴ θέλουσι μένειν ἀλλ' ἀνάγουσι, τροχὸν ἐπὶ τὴν γνάθ[ο]ν [ἐπιβ]άλλει, καὶ ὁ τοῦτο παθὼν ἀδόκιμός ἐστι. δοκιμάζει δὲ καὶ τοὺς προ[δ]ρ[όμους, οἵ]τινες ἂν αὐτῇ δοκῶσιν ἐπιτήδειοι προδρομεύειν εἶναι, κἂν τιν' ἀποχειροτονήσῃ, καταβέβηκεν οὗτος. δοκιμάζει δὲ καὶ τοὺς ἀμίππους, κἂν τιν' ἀποχειροτονήσῃ, [2] πέπνυται μισθοφορῶν οὗτος. τοὺς δ' ἵππας καταλέγουσι μὲν οἱ καταλογεῖς, οὓς ἂν ὁ δῆμος χειροτονήσῃ δέκα ἄνδρας· οὓς δ' ἂν καταλέξωσι, παραδιδόασιν τοῖς ἱπάρχοις καὶ φυλάρχοις, οὗτοι δὲ παραλαβόντες εἰσφέρουσι τὸν κατάλογον εἰς τὴν βουλήν, καὶ τὸν πίνακ' ἀνοίξαντες, ἐν ᾧ κατασεσημασμένα τὰ ὀνόματα τῶν ἱππέων ἐστί, τοὺς μὲν ἐξομνυμένους τῶν πρότερον ἐγγεγραμμένων μὴ δυνατοὺς εἶναι τοῖς σώμασιν ἱπεύειν ἐξαλείφουσι, τοὺς δὲ κατελεγμένους καλοῦσι, κἂν μὲν τις ἐξομότηται μὴ δύνασθαι τῷ σώματι ἱπεύειν ἢ τῇ οὐσίᾳ, τοῦτον ἀφίᾳσιν, τὸν δὲ μὴ ἐξομνύμενον διαχειροτονοῦσιν οἱ βουλευταί, πότερον ἐπιτήδειός ἐστιν ἱπεύειν ἢ οὐ. κἂν μὲν χειροτονήσωσιν, ἐγγράφουσιν εἰς τὸν πίνακα, εἰ δὲ μή, καὶ τοῦτον ἀφίᾳσιν.

ARISTOTLE: LIVES OF THE EMINENT PHILOSOPHERS by Diogenes Laërtius

Translated by Robert Drew Hicks

Diogenes Laërtius was a biographer of Greek philosophers, who flourished in the third century AD. Very little is known about his life, although his collection of biographies, *Lives of the Eminent Philosophers*, is the principal surviving source for Ancient Greek philosophy.

Laërtius divides the biographies into two divisions, which he names the Ionian and Italian schools. The Ionian biographies begin with Anaximander and conclude with Clitomachus, Theophrastus and Chrysippus; the latter begins with Pythagoras, and ends with Epicurus. The Socratic school, with its various branches, is classed with the Ionic; while the Eleatics and sceptics are treated under the Italic. He also includes his own poetic verse about the philosophers he discusses. Book IV is devoted to the work of the Peripatetic school, beginning with their leader Aristotle.

ARISTOTLE

1. Aristotle, son of Nicomachus and Phaestis, was a native of Stagira. His father, Nicomachus, as Hermippus relates in his book *On Aristotle*, traced his descent from Nicomachus who was the son of Machaon and grandson of Asclepius; and he resided with Amyntas, the king of Macedon, in the capacity of physician and friend. Aristotle was Plato's most genuine disciple; he spoke with a lisp, as we learn from Timotheus the Athenian in his book *On Lives*; further, his calves were slender (so they say), his eyes small, and he was conspicuous by his attire, his rings, and the cut of his hair. According to Timaeus, he had a son by Herpyllis, his concubine, who was also called Nicomachus.

2. He seceded from the Academy while Plato was still alive. Hence the remark attributed to the latter: "Aristotle spurns me, as colts kick out at the mother who bore them." Hermippus in his *Lives* mentions that he was absent as Athenian envoy at the court of Philip when Xenocrates became head of the Academy, and that on his return, when he saw the school under a new head, he made choice of a public walk in the Lyceum where he would walk up and down discussing philosophy with his pupils until it was time to rub themselves with oil. Hence the name "Peripatetic." But others say that it was given to him because, when Alexander was recovering from an illness and taking daily walks, Aristotle joined him and talked with him on certain matters.

3. In time the circle about him grew larger; he then sat down to lecture, remarking:

It were base to keep silence and let Xenocrates speak.

He also taught his pupils to discourse upon a set theme, besides practising them in oratory. Afterwards, however, he departed to Hermias the eunuch, who was tyrant of Atarneus, and there is one story that he was on very affectionate terms with Hermias; according to another, Hermias bound him by ties of kinship, giving him his daughter or his niece in marriage, and so Demetrius of Magnesia narrates in his work on *Poets and Writers of the Same Name*. The same author tells us that Hermias had been the slave of Eubulus, and

that he was of Bithynian origin and had murdered his master. Aristippus in his first book *On the Luxury of the Ancients* says that Aristotle fell in love with a concubine of Hermias, 4. and married her with his consent, and in an excess of delight sacrificed to a weak woman as the Athenians did to Demeter of Eleusis; and that he composed a paean in honour of Hermias, which is given below; next that he stayed in Macedonia at Philip's court and received from him his son Alexander as his pupil; that he petitioned Alexander to restore his native city which had been destroyed by Philip and obtained his request; and that he also drew up a code of laws for the inhabitants. We learn further that, following the example of Xenocrates, he made it a rule in his school that every ten days a new president should be appointed. When he thought that he had stayed long enough with Alexander, he departed to Athens, having first presented to Alexander his kinsman Callisthenes of Olynthus. 5. But when Callisthenes talked with too much freedom to the king and disregarded his own advice, Aristotle is said to have rebuked him by citing the line:

Short-lived, I ween, wilt thou be, my child, by what thou sayest.

And so indeed it fell out. For he, being suspected of complicity in the plot of Hermolaus against the life of Alexander, was confined in an iron cage and carried about until he became infested with vermin through lack of proper attention; and finally he was thrown to a lion and so met his end.

To return to Aristotle: he came to Athens, was head of his school for thirteen years, and then withdrew to Chalcis because he was indicted for impiety by Eurymedon the hierophant, or, according to Favorinus in his *Miscellaneous History*, by Demophilus, the ground of the charge being the hymn he composed to the aforesaid Hermias, 6. as well as the following inscription for his statue at Delphi:

This man in violation of the hallowed law of the immortals was unrighteously slain by the king of the bow-bearing Persians, who overcame him, not openly with a spear in murderous combat, but by treachery with the aid of one in whom he trusted.

At Chalcis he died, according to Eumelus in the fifth book of his *Histories*, by drinking aconite, at the age of seventy. The same authority makes him thirty years old when he came to Plato; but here

he is mistaken. For Aristotle lived to be sixty-three, and he was seventeen when he became Plato's pupil.

The hymn in question runs as follows:

7. O virtue, toilsome for the generation of mortals to achieve, the fairest prize that life can win, for thy beauty, O virgin, it were a doom glorious in Hellas even to die and to endure fierce, untiring labours. Such courage dost thou implant in the mind, imperishable, better than gold, dearer than parents or soft-eyed sleep. For thy sake Heracles, son of Zeus, and the sons of Leda endured much in the tasks whereby they pursued thy might. 8. And yearning after thee came Achilles and Ajax to the house of Hades, and for the sake of thy dear form the nursling of Atarneus too was bereft of the light of the sun. Therefore shall his deeds be sung, and the Muses, the daughters of Memory, shall make him immortal, exalting the majesty of Zeus, guardian of strangers, and the grace of lasting friendship.

There is, too, something of my own upon the philosopher which I will quote:

Eurymedon, the priest of Deo's mysteries, was once about to indict Aristotle for impiety, but he, by a draught of poison, escaped prosecution. This then was an easy way of vanquishing unjust calumnies.

9. Favorinus in his *Miscellaneous History* affirms that Aristotle was the first to compose a forensic speech in his own defence written for this very suit; and he cites him as saying that at Athens

Pear upon pear grows old and fig upon fig.

According to Apollodorus in his *Chronology* he was born in the first year of the 99th Olympiad. He attached himself to Plato and resided with him twenty years, having become his pupil at the age of seventeen. He went to Mitylene in the archonship of Eubulus in the fourth year of the 108th Olympiad. When Plato died in the first year of that Olympiad, during the archonship of Theophilus, he went to Hermias and stayed with him three years. 10. In the archonship of Pythodotus, in the second year of the 109th Olympiad, he went to the court of Philip, Alexander being then in his fifteenth year. His arrival at Athens was in the second year of the 111th Olympiad, and he lectured in the Lyceum for thirteen years; then he retired to Chalcis in the third year of the 114th Olympiad and died a natural death, at

the age of about sixty-three, in the archonship of Philocles, in the same year in which Demosthenes died at Calauria. It is said that he incurred the king's displeasure because he had introduced Callisthenes to him, and that Alexander, in order to cause him annoyance, honoured Anaximenes and sent presents to Xenocrates.

11. Theocritus of Chios, according to Ambryon in his book *On Theocritus*, ridiculed him in an epigram which runs as follows:

To Hermias the eunuch, the slave withal of Eubulus, an empty monument was raised by empty-witted Aristotle, who by constraint of a lawless appetite chose to dwell at the mouth of the Borborus [muddy stream] rather than in the Academy.

Timon again attacked him in the line:

No, nor yet Aristotle's painful futility.

Such then was the life of the philosopher. I have also come across his will, which is worded thus:

"All will be well; but, in case anything should happen, Aristotle has made these dispositions. Antipater is to be executor in all matters and in general; 12. but, until Nicanor shall arrive, Aristomenes, Timarchus, Hipparchus, Dioteles and (if he consent and if circumstances permit him) Theophrastus shall take charge as well of Herpyllis and the children as of the property. And when the girl shall be grown up she shall be given in marriage to Nicanor; but if anything happen to the girl (which heaven forbid and no such thing will happen) before her marriage, or when she is married but before there are children, Nicanor shall have full powers, both with regard to the child and with regard to everything else, to administer in a manner worthy both of himself and of us. Nicanor shall take charge of the girl and of the boy Nicomachus as he shall think fit in all that concerns them as if he were father and brother. And if anything should happen to Nicanor (which heaven forbid!) either before he marries the girl, or when he has married her but before there are children, any arrangements that he may make shall be valid. 13. And if Theophrastus is willing to live with her, he shall have the same rights as Nicanor. Otherwise the executors in consultation with Antipater shall administer as regards the daughter and the boy as seems to them to be best. The executors and Nicanor, in memory of me and of the steady affection which Herpyllis has borne towards

me, shall take care of her in every other respect and, if she desires to be married, shall see that she be given to one not unworthy; and besides what she has already received they shall give her a talent of silver out of the estate and three handmaids whomsoever she shall choose besides the maid she has at present and the man-servant Pyrrhaeus; 14. and if she chooses to remain at Chalcis, the lodge by the garden, if in Stagira, my father's house. Whichever of these two houses she chooses, the executors shall furnish with such furniture as they think proper and as Herpyllis herself may approve. Nicanor shall take charge of the boy Myrmex, that he be taken to his own friends in a manner worthy of me with the property of his which we received. Ambracis shall be given her freedom, and on my daughter's marriage shall receive 500 drachmas and the maid whom she now has. And to Thale shall be given, in addition to the maid whom she has and who was bought, a thousand drachmas and a maid. 15. And Simon, in addition to the money before paid to him towards another servant, shall either have a servant purchased for him or receive a further sum of money. And Tycho, Philo, Olympius and his child shall have their freedom when my daughter is married. None of the servants who waited upon me shall be sold but they shall continue to be employed; and when they arrive at the proper age they shall have their freedom if they deserve it. My executors shall see to it, when the images which Gryllion has been commissioned to execute are finished, that they be set up, namely that of Nicanor, that of Proxenus, which it was my intention to have executed, and that of Nicanor's mother; also they shall set up the bust which has been executed of Arimnestus, to be a memorial of him seeing that he died childless, 16. and shall dedicate my mother's statue to Demeter at Nemea or wherever they think best. And wherever they bury me, there the bones of Pythias shall be laid, in accordance with her own instructions. And to commemorate Nicanor's safe return, as I vowed on his behalf, they shall set up in Stagira stone statues of life size to Zeus and Athena the Saviours."

Such is the tenor of Aristotle's will. It is said that a very large number of dishes belonging to him were found, and that Lyco mentioned his bathing in a bath of warm oil and then selling the oil. Some relate that he placed a skin of warm oil on his stomach, and

that, when he went to sleep, a bronze ball was placed in his hand with a vessel under it, in order that, when the ball dropped from his hand into the vessel, he might be waked up by the sound.

17. Some exceedingly happy sayings are attributed to him, which I proceed to quote. To the question, "What do people gain by telling lies?" his answer was, "Just this, that when they speak the truth they are not believed." Being once reproached for giving alms to a bad man, he rejoined, "It was the man and not his character that I pitied." He used constantly to say to his friends and pupils, whenever or wherever he happened to be lecturing, "As sight takes in light from the surrounding air, so does the soul from mathematics." Frequently and at some length he would say that the Athenians were the discoverers of wheat and of laws; but, though they used wheat, they had no use for laws.

18. "The roots of education," he said, "are bitter, but the fruit is sweet." Being asked, "What is it that soon grows old?" he answered, "Gratitude." He was asked to define hope, and he replied, "It is a waking dream." When Diogenes offered him dried figs, he saw that he had prepared something caustic to say if he did not take them; so he took them and said Diogenes had lost his figs and his jest into the bargain. And on another occasion he took them when they were offered, lifted them up aloft, as you do babies, and returned them with the exclamation, "Great is Diogenes." Three things he declared to be indispensable for education: natural endowment, study, and constant practice. On hearing that some one abused him, he rejoined, "He may even scourge me so it be in my absence." Beauty he declared to be a greater recommendation than any letter of introduction. 19. Others attribute this definition to Diogenes; Aristotle, they say, defined good looks as the gift of god, Socrates as a short-lived reign, Plato as natural superiority, Theophrastus as a mute deception, Theocritus as an evil in an ivory setting, Carneades as a monarchy that needs no bodyguard. Being asked how the educated differ from the uneducated, "As much," he said, "as the living from the dead." He used to declare education to be an ornament in prosperity and a refuge in adversity. Teachers who educated children deserved, he said, more honour than parents who merely gave them birth; for bare life is furnished by the one, the

other ensures a good life. To one who boasted that he belonged to a great city his reply was, "That is not the point to consider, but who it is that is worthy of a great country." 20. To the query, "What is a friend?" his reply was, "A single soul dwelling in two bodies." Mankind, he used to say, were divided into those who were as thrifty as if they would live for ever, and those who were as extravagant as if they were going to die the next day. When some one inquired why we spend much time with the beautiful, "That," he said, "is a blind man's question." When asked what advantage he had ever gained from philosophy, he replied, "This, that I do without being ordered what some are constrained to do by their fear of the law." The question being put, how can students make progress, he replied, "By pressing hard on those in front and not waiting for those behind." To the chatterbox who poured out a flood of talk upon him and then inquired, "Have I bored you to death with my chatter?" he replied, "No, indeed; for I was not attending to you." 21. When some one accused him of having given a subscription to a dishonest man – for the story is also told in this form – "It was not the man," said he, "that I assisted, but humanity." To the question how we should behave to friends, he answered, "As we should wish them to behave to us." Justice he defined as a virtue of soul which distributes according to merit. Education he declared to be the best provision for old age. Favorinus in the second book of his *Memorabilia* mentions as one of his habitual sayings that "He who has friends can have no true friend." Further, this is found in the seventh book of the *Ethics*. These then are the sayings attributed to him.

28. Such is the number of the works written by him. And in them he puts forward the following views. There are two divisions of philosophy, the practical and the theoretical. The practical part includes ethics and politics, and in the latter not only the doctrine of the state but also that of the household is sketched. The theoretical part includes physics and logic, although logic is not an independent science, but is elaborated as an instrument to the rest of science. And he clearly laid down that it has a twofold aim, probability and truth. For each of these he employed two faculties, dialectic and rhetoric where probability is aimed at, analytic and philosophy where the end is truth; he neglects nothing which makes either for discovery or for judgement or for utility. 29. As making for discovery he left in the *Topics* and *Methodics* a number of propositions, whereby the student can be well supplied with probable arguments for the solution of problems. As an aid to judgement he left the *Prior* and *Posterior Analytics*. By the *Prior Analytics* the premisses are judged, by the *Posterior* the process of inference is tested. For practical use there are the precepts on controversy and the works dealing with question and answer, with sophistical fallacies, syllogisms and the like. The test of truth which he put forward was sensation in the sphere of objects actually presented, but in the sphere of morals dealing with the state, the household and the laws, it was reason.

30. The one ethical end he held to be the exercise of virtue in a completed life. And happiness he maintained to be made up of goods of three sorts: goods of the soul, which indeed he designates as of the highest value; in the second place bodily goods, health and strength, beauty and the like; and thirdly external goods, such as wealth, good birth, reputation and the like. And he regarded virtue as not of itself sufficient to ensure happiness; bodily goods and external goods were also necessary, for the wise man would be miserable if he lived in the midst of pains, poverty, and similar circumstances. Vice, however, is sufficient in itself to secure misery, even if it be ever so abundantly furnished with corporeal and external goods. 31. He held that the

virtues are not mutually interdependent. For a man might be prudent, or again just, and at the same time profligate and unable to control his passions. He said too that the wise man was not exempt from all passions, but indulged them in moderation.

He defined friendship as an equality of reciprocal good-will, including under the term as one species the friendship of kinsmen, as another that of lovers, and as a third that of host and guest. The end of love was not merely intercourse but also philosophy. According to him the wise man would fall in love and take part in politics; furthermore he would marry and reside at a king's court. Of three kinds of life, the contemplative, the practical, and the pleasure-loving life, he gave the preference to the contemplative. He held that the studies which make up the ordinary education are of service for the attainment of virtue.

32. In the sphere of natural science he surpassed all other philosophers in the investigation of causes, so that even the most insignificant phenomena were explained by him. Hence the unusual number of scientific notebooks which he compiled. Like Plato he held that God was incorporeal; that his providence extended to the heavenly bodies, that he is unmoved, and that earthly events are regulated by their affinity with them (the heavenly bodies). Besides the four elements he held that there is a fifth, of which the celestial bodies are composed. Its motion is of a different kind from that of the other elements, being circular. Further, he maintained the soul to be incorporeal, defining it as the first entelechy [i.e. realization] of a natural organic body potentially possessed of life. 33. By the term realization he means that which has an incorporeal form. This realization, according to him, is twofold.

Either it is potential, as that of Hermes in the wax, provided the wax be adapted to receive the proper mouldings, or as that of the statue implicit in the bronze; or again it is determinate, which is the case with the completed figure of Hermes or the finished statue. The soul is the realization "of a natural body," since bodies may be divided into (a) artificial bodies made by the hands of craftsmen, as a tower or a ship, and (b) natural bodies which are the work of nature, such as plants and the bodies of animals. And when he said "organic" he meant constructed as means to an end, as sight is adapted for

seeing and the ear for hearing. Of a body “potentially possessed of life,” that is, in itself.

34. There are two senses of “potential,” one answering to a formed state and the other to its exercise in act. In the latter sense of the term he who is awake is said to have soul, in the former he who is asleep. It was then in order to include the sleeper that Aristotle added the word “potential.”

He held many other opinions on a variety of subjects which it would be tedious to enumerate. For altogether his industry and invention were remarkable, as is shown by the catalogue of his writings given above, which come to nearly 400 in number, i.e. counting those only the genuineness of which is not disputed. For many other written works and pointed oral sayings are attributed to him.

35. There were in all eight Aristotles: (1) our philosopher himself; (2) an Athenian statesman, the author of graceful forensic speeches; (3) a scholar who commented on the *Iliad*; (4) a Sicilian rhetorician, who wrote a reply to the Panegyric of Isocrates; (5) a disciple of Aeschines the Socratic philosopher, surnamed Myth; (6) a native of Cyrene, who wrote upon the art of poetry; (7) a trainer of boys, mentioned by Aristoxenus in his *Life of Plato*; (8) an obscure grammarian, whose handbook *On Redundancy* is still extant.

Aristotle of Stagira had many disciples; the most distinguished was Theophrastus, of whom we have next to speak.

ARISTOTLE by Elbert Hubbard

ARISTOTLE

Happiness itself is sufficient excuse. Beautiful things are right and true; so beautiful actions are those pleasing to the gods. Wise men have an inward sense of what is beautiful, and the highest wisdom is to trust this intuition and be guided by it. The answer to the last appeal of what is right lies within a man's own breast. Trust thyself.

— *Ethics of Aristotle*

ARISTOTLE

The Sublime Porte recently issued a request to the American Bible Society, asking that references to Macedonia be omitted from all Bibles circulated in Turkey or Turkish provinces. The argument of His Sublimity is that the Macedonian cry, "Come over and help us!" puts him and his people in a bad light. He ends his most courteous petition by saying, "The land that produced a Philip, an Alexander the Great and an Aristotle, and that today has citizens who are the equal of these, needs nothing from our dear brothers, the Americans, but to be let alone."

As to the statement that Macedonia today has citizens who are the equals of Philip, Alexander and Aristotle, the proposition, probably, is based on the confession of the citizens themselves, and therefore may be truth. Great men are only great comparatively. It is the stupidity of the many that allows one man to bestride the narrow world like a Colossus. In the time of Alexander and Aristotle there wasn't so much competition as now, so perhaps what we take to be lack of humor on the part of the Sublime Porte may have a basis in fact.

Aristotle was born Three Hundred Eighty-four B.C., at the village of Stagira in the mountains of Macedonia. King Amyntas used to live at Stagira several months in the year and hunt the wild hogs that fed on the acorns which grew in the gorges and valleys. Mountain climbing and hunting was dangerous sport, and it was well to have a surgeon attached to the royal party, so the father of Aristotle served in that capacity. No doubt, though, but the whole outfit was decidedly barbaric, even including the doctor's little son "Aristo," who refused to be left behind. The child's mother had died years before, and boys without mothers are apt to manage their fathers. And so Aristo was allowed to trot along by his father's side, carrying a formidable bow, which he himself had made, with a quiver of arrows at his back.

Those were great times when the King came to Stagira!

When the King went back to the capital everybody received presents, and the good doctor, by some chance, was treated best of all, and little Aristo came in for the finest bow that ever was, all tipped with silver and eagle-feathers. But the bow did not bring good

luck, for soon after, the boy's father was caught in an avalanche of sliding stone and crushed to death.

Aristo was taken in charge by Proxenus, a near kinsman. The lad was so active at climbing, so full of life and energy and good spirits, that when the King came the next year to Stagira, he asked for Aristo. With the King was his son Philip, a lad about the age of Aristo, but not so tall nor so active. The boys became fast friends, and once when a stranger saw them together he complimented the King on his fine, intelligent boys, and the King had to explain, "The other boy is mine — but I wish they both were."

Aristo knew where the wild boars fed in gulches, and where the stunted oaks grew close and thick. Higher up in the mountains there were bears, which occasionally came down and made the wild pigs scamper. You could always tell when the bears were around, for then the little pigs would run out into the open. The bears had a liking for little pigs, and the bears had a liking for the honey in the bee-trees, too. Aristo could find the bee-trees better than the bears — all you had to do was to watch the flight of the bees as they left the clover.

Then there were deer — you could see their tracks any time around the mountain marshes where the springs gushed forth and the watercress grew lush. Still higher up the mountains, beyond where bears ever traveled, there were mountain-sheep, and still higher up were goats. The goats were so wild that hardly any one but Aristo had ever seen them, but he knew they were there.

The King was delighted to have such a lad as companion for his son, and insisted that he should go back to the capital with them and become a member of the Court.

Not he — there were other ambitions. He wanted to go to Athens and study at the school of Plato — Plato, the pupil of the great Socrates.

The King laughed — he had never heard of Plato. That a youth should refuse to become part of the Macedonian Court, preferring the company of an unknown school-master, was amusing — he laughed.

The next year when the King came back to Stagira, Aristo was still there. "And you haven't gone to Athens yet?" said the King.

"No, but I am going," was the firm reply.

"We will send him," said the King to Proxenus, Aristo's guardian.

And so we find Aristo, aged seventeen, tall and straight and bronzed, starting off for Athens, his worldly goods rolled up in a bearskin, tied about with thongs. There is a legend to the effect that Philip went with Aristo, and that for a time they were together at Plato's school. But, anyway, Philip did not remain long. Aristo — or Aristotle, we had better call him — remained with Plato just twenty years.

At Plato's school Aristotle was called by the boys, "the Stagirite," a name that was to last him through life — and longer. In Winter he wore his bearskin, caught over one shoulder, for a robe, and his mountain grace and native beauty of mind and body must have been a joy to Plato from the first. Such a youth could not be overlooked.

To him that hath shall be given. The pupil that wants to learn is the teacher's favorite — which is just as it should not be. Plato proved his humanity by giving his all to the young mountaineer. Plato was then a little over sixty years of age — about the same age that Socrates was when Plato became his pupil. But the years had touched Plato lightly — unlike Socrates, he had endured no Thracian winters in bare feet, neither had he lived on cold snacks picked up here and there, as Providence provided. Plato was a bachelor. He still wore the purple robe, proud, dignified, yet gentle, and his back was straight as that of a youth. Lowell once said, "When I hear Plato's name mentioned, I always think of George William Curtis — a combination of pride and intellect, a man's strength fused with a woman's gentleness."

Plato was an aristocrat. He accepted only such pupils as he invited, or those that were sent by royalty. Like Franz Liszt, he charged no tuition, which plan, by the way, is a good scheme for getting more money than could otherwise be obtained, although no such selfish charge should be brought against either Plato or Liszt. Yet every benefit must be paid for, and whether you use the word fee or honorarium, matters little. I hear there be lecturers who accept invitations to banquets and accept an honorarium mysteriously placed on the mantel, when they would scorn a fee.

Plato's Garden School, where the pupils reclined under the trees on marble benches, and read and talked, or listened to lectures by the Master, was almost an ideal place. Not the ideal for us, because we

believe that the mental and the manual must go hand in hand. The world of intellect should not be separated from the world of work. It was too much to expect that in a time when slavery was everywhere, Plato would see the fallacy of having one set of men to do the thinking, and another do the work. We haven't got far from that yet; only free men can see the whole truth, and a free man is one who lives in a country where there are no slaves. To own slaves is to be one, and to live in a land of slavery is to share in the bondage — a partaker in the infamy and the profits.

Plato and Aristotle became fast friends — comrades. With thinking men years do not count — only those grow old who think by proxy. Plato had no sons after the flesh, and the love of his heart went out to the Stagirite: in him he saw his own life projected.

When Aristotle had turned twenty he was acquainted with all the leading thinkers of his time; he read constantly, wrote, studied and conversed. The little property his father left had come to him; the King of Macedon sent him presents; and he taught various pupils from wealthy families — finances were easy. But success did not spoil him. The brightest scholars do not make the greatest success in life, because alma mater usually catches them for teachers. Sometimes this is well, but more often it is not. Plato would not hear of Aristotle's leaving him, and so he remained, the chief ornament and practical leader of the school.

He became rich, owned the largest private library at Athens, and was universally regarded as the most learned man of his time.

In many ways he had surpassed Plato. He delved into natural history, collected plants, rocks, animals, and made studies of the practical workings of economic schemes. He sought to divest the Platonic teaching of its poetry, discarded rhetoric, and tried to get at the simple truth of all subjects.

Toward the last of Plato's career this repudiation by Aristotle of poetry, rhetoric, elocution and the polite accomplishments caused a schism to break out in the Garden School. Plato's head was in the clouds at times; Aristotle's was, too, but his feet were always on the earth.

When Plato died, Aristotle was his natural successor as leader of the school, but there was opposition to him, both on account of his

sturdy, independent ways and because he was a foreigner.

He left Athens to become a member of the Court of Hermias, a former pupil, now King of Atarneus.

He remained here long enough to marry the niece of his patron, and doubtless saw himself settled for life — a kingly crown within his reach should his student-sovereign pass away.

And the royal friend did pass away, by the dagger's route. As life-insurance risks I am told that Kings have to pay double premium. Revolution broke out, and as Aristotle was debating in his mind what course to pursue, a messenger with soldiers arrived from King Philip of Macedon, offering safe convoy, enclosing transportation, and asking that Aristotle come and take charge of the education of his son, Alexander, aged thirteen.

Aristotle did not wait to parley: he accepted the invitation. Horses were saddled, camels packed and that night, before the moon arose, the cavalcade silently moved out into the desert.

The offer that had been made twenty-four years before, by Philip's father, was now accepted. Aristotle was forty-two years old, in the prime of his power. Time had tempered his passions, but not subdued his zest in life. He had the curious, receptive, alert and eager mind of a child. His intellect was at its ripest and best. He was a lover of animals, and all outdoor life appealed to him as it does to a growing boy. He was a daring horseman, and we hear of his riding off into the desert and sleeping on the sands, his horse untethered watching over him. Aristotle was the first man to make a scientific study of the horse, and with the help of Alexander he set up a skeleton, fastening the bones in place, to the mighty astonishment of the natives, who mistook the feat for an attempt to make a living animal; and when the beast was not at last saddled and bridled there were subdued chuckles of satisfaction among the "hoi polloi" at the failure of the scheme, and murmurs of "I told you so!"

Eighteen hundred years were to pass before another man was to take up the horse as a serious scientific study; and this was Leonardo da Vinci, a man in many ways very much like Aristotle. The distinguishing feature in these men — the thing that differentiates them from other men — was the great outpouring sympathy with

every living creature. Everything they saw was related to themselves — it came very close to them — they wanted to know more about it. This is essentially the child-mind, and the calamity of life is to lose it.

Leonardo became interested in Aristotle's essay on the horse, and continued the subject further, dissecting the animal in minutest detail and illustrating his discoveries with painstaking drawings. His work is so complete and exhaustive that nobody nowadays has time to more than read the title-page. Leonardo's bent was natural science, and his first attempts at drawing were done to illustrate his books. Art was beautiful, of course — it brought in an income, made friends and brought him close to people who saw nothing unless you made a picture of it. He made pictures for recreation and to amuse folks, and his threat to put the peeping Prior into the "Last Supper," posed as Judas, revealed his contempt for the person to whom a picture was just a picture. The marvel to Leonardo was the mind that could imagine, the hand that could execute, and the soul that could see.

And the curious part is that Leonardo lives for us through his play and not through his serious work. His science has been superseded, but his art is immortal.

This expectant mental attitude, this attitude of worship, belongs to all great scientists. The man divines the thing first and then looks for it, just as the Herschels knew where the star ought to be and then patiently waited for it. The Bishop of London said that if Darwin had spent one-half as much time in reading his Bible as in studying earthworms, he would have really benefited the world, and saved his soul alive. To Walt Whitman, a hair on the back of his hand was just as curious and wonderful as the stars in the sky, or God's revelation to man through a printed book.

Aristotle loved animals as a boy loves them — his house was a regular menagerie of pets, and into this world of life Alexander was very early introduced. We hear of young Alexander breaking the wild horse, Bucephalus, and beyond a doubt Aristotle was seated on the top rail of the paddock when he threw the lariat.

Aristotle and his pupil had the first circus of which we know, and they also inaugurated the first Zoological Garden mentioned in history, barring Noah, of course.

So much was Alexander bound up in this menagerie, and in his old teacher as well, that in after-life, in all of his travels, he was continually sending back to Aristotle specimens of every sort of bird, beast and fish to be found in the countries through which he traveled.

When Philip was laid low by the assassin's thrust, it was Aristotle who backed up Alexander, aged twenty — but a man — in his prompt suppression of the revolution. The will that had been used to subdue man-eating stallions and to train wild animals, now came in to repress riot, and the systematic classification of things was a preparation for the forming of an army out of a mob. Aristotle said, "An army is a huge animal with a million claws — it must have only one brain, and that the commander's."

Alexander gave credit again and again to Aristotle for those elements in his character that went to make up success: steadiness of purpose, self-reliance, systematic effort, mathematical calculation, attention to details, and a broad and generous policy that sees the end.

When Aristotle argued with Philip, years before, that horse-breaking should be included in the educational curriculum of all young men, he evidently divined football and was endeavoring to supplant it.

I think history has been a trifle severe on Alexander. He was elected Captain-General of Greece, and ordered to repel the Persian invasion. And he did the business once for all. War is not all fighting — Providence is on the side of the strongest commissariat. Alexander had to train, arm, clothe and feed a million men, and march them long miles across a desert country. The real foe of a man is in his own heart, and the foe of an army is in its own camp — disease takes more prisoners than the enemy. Fever sniped more of our boys in blue than did the hostile Filipinos.

Alexander's losses were principally from men slain in battle; from this, I take it that Alexander knew a deal of sanitary science, and had a knowledge of practical mathematics, in order to systematize that mob of restless, turbulent helots. We hear of Aristotle cautioning him that safety lies in keeping his men busy — they must not have too much time to think, otherwise mutiny is to be feared. Still, they must

not be over-worked, or they will be in no condition to fight when the eventful time occurs. And we are amazed to see this: "Do not let your men drink out of stagnant pools — Athenians, city-born, know no better. And when you carry water on the desert marches, it should be first boiled to prevent its getting sour."

Concerning the Jews, Alexander writes to his teacher and says, "They are apt to be in sullen rebellion against their governors, receiving orders only from their high priests, and this leads to severe measures, which are construed as persecution"; all of which might have been written yesterday by the Czar in a message to The Hague Convention.

Alexander captured the East, and was taken captive by the East. Like the male bee that never lives to tell the tale of its wooing, he succeeded and died. Yet he vitalized all Asia with the seeds of Greek philosophy, turned back the hungry barbaric tide, and made a new map of the Eastern world. He built far more cities than he destroyed. He set Andrew Carnegie an example at Alexandria, such as the world had never up to that time seen. At the entrance to the harbor of the same city he erected a lighthouse, surpassing far the one at Minot's Ledge, or Race Rock. This structure endured for two centuries, and when at last wind and weather had their way, there was no Hopkinson Smith who could erect another.

At Thebes, Alexander paid a compliment to letters, by destroying every building in the city except the house of the poet, Pindar. At Corinth, when the great, the wise, the noble, came to pay homage, one great man did not appear. In vain did Alexander look for his card among all those handed in at the door — Diogenes, the Philosopher, oft quoted by Aristotle, was not to be seen.

Alexander went out to hunt him up, and found him sunning himself, propped up against the wall in the Public Square, busy doing nothing.

The philosopher did not arise to greet the conqueror; he did not even offer a nod of recognition.

"I am Alexander — is there not something I can do for you?" modestly asked the descendant of Hercules.

"Just stand out from between me and the sun," replied the philosopher, and went on with his meditations.

Alexander enjoyed the reply so much that he said to his companions, and afterward wrote to Aristotle, "If I were not Alexander, I would be Diogenes," and thus did strenuousness pay its tribute to self-sufficiency.

Aristotle might have assumed important affairs of State, but practical politics were not to his liking. "What Aristotle is in the world of thought I will be in the world of action," said Alexander.

On all of his journeys Alexander found time to keep in touch with his old teacher at home; and we find the ruler of Asia voicing that old request, "Send me something to read," and again, "I live alone with my thoughts, amidst a throng of men, but without companions."

Plutarch gives a copy of a letter sent by Alexander wherein Aristotle is chided for publishing his lecture on oratory. "Now all the world will know what formerly belonged to you and me alone," plaintively cries the young man who sighed for more worlds to conquer, and therein shows he was the victim of a fallacy that will never die — the idea that truth can be embodied in a book. When will we ever learn that inspired books demand inspired readers!

There are no secrets. A book may stimulate thought, but it can never impart it.

Aristotle wrote out the Laws of Oratory. "Alas!" groans Alexander, "everybody will turn orator now." But he was wrong, because Oratory and the Laws of Oratory are totally different things.

A Boston man of excellent parts has just recently given out the Sixteen Perfective Laws of Oratory, and the Nineteen Steps in Evolution.

The real truth is, there are Fifty-seven Varieties of Artistic Vagaries, and all are valuable to the man who evolves them — they serve him as a scaffolding whereby he builds thought. But woe betide Alexander and all rareripe Bostonians who mistake the scaffolding for the edifice.

There are no Laws of Art. A man evolves first, and builds his laws afterward. The style is the man, and a great man, full of the spirit, will express himself in his own way.

Bach ignored all the Laws of Harmony made before his day and set down new ones — and these marked his limitations, that was all.

Beethoven upset all these, and Wagner succeeded by breaking most of Beethoven's rules. And now comes Grieg, and writes harmonious discords that Wagner said were impossible, and still it is music, for by it we are transported on the wings of song and uplifted to the stars.

The individual soul striving for expression ignores all man-made laws. Truth is that which serves us best in expressing our lives. A rotting log is truth to a bed of violets, while sand is truth to a cactus. But when the violet writes a book on "Expression as I Have Found It," making laws for the evolution of beautiful blossoms, it leaves the Century Plant out of its equation, or else swears, i' faith, that a cactus is not a flower, and that a Night-Blooming Cereus is a disordered thought from a madman's brain. And when the proud and lofty cactus writes a book it never mentions violets, because it has never stooped to seek them.

Art is the blossoming of the Soul.

We can not make the plant blossom — all we can do is to comply with the conditions of growth. We can supply the sunshine, moisture and aliment, and God does the rest. In teaching, he only is successful who supplies the conditions of growth — that is all there is of the Science of Pedagogics, which is not a science, and if it ever becomes one, it will be the Science of Letting Alone, and not a scheme of interference. Just so long as some of the greatest men are those who have broken through pedagogic fancy and escaped, succeeding by breaking every rule of pedagogy, as Wagner discarded every Law of Harmony, there will be no such thing as a Science of Education.

Recently I read Aristotle's Essays on Rhetoric and Oratory, and I was pained to see how I had been plagiarized by this man who wrote three hundred years before Christ. Aristotle used charts in teaching and indicated the mean by a straight horizontal line, and the extreme by an upright dash. He says: "From one extreme the mean looks extreme, and from another extreme the mean looks small — it all depends upon your point of view. Beware of jumping to conclusions, for beside the appearance you must look within and see from what vantage-ground you gain the conclusions. All truth is relative, and none can be final to a man six feet high, who stands on the ground, who can walk but forty miles at a stretch, who needs four meals a

day and one-third of his time for sleep. A loss of sleep, or loss of a meal, or a meal too much, will disarrange his point of view, and change his opinions," And thus do we see that a belief in "eternal punishment" is a mere matter of indigestion.

A certain bishop, we have seen, experienced a regret that Darwin expended so much time on earthworms; and we might also express regret that Aristotle did not spend more. As long as he confined himself to earth, he was eminently sure and right: he was really the first man who ever used his eyes. But when he quit the earth, and began to speculate about the condition of souls before they are clothed with bodies, or what becomes of them after they discard the body, or the nature of God, he shows that he knew no more than we. That is to say, he knew no more than the barbarians who preceded him.

He attempted to grasp ideas which Herbert Spencer pigeonholes forever as the Unknowable; and in some of his endeavors to make plain the unknowable, Aristotle strains language to the breaking-point — the net bursts and all of his fish go free. Here is an Aristotelian proposition, expressed by Hegel to make lucid a thing nobody comprehends: "Essential being as being that meditates with itself, with itself by the negativity of itself, is relative to itself only as it is relative to another; that is, immediate only as something posited and meditated." It gives one a slight shock to hear him speak of headache being caused by wind on the brain, or powdered grasshopper-wings being a cure for gout, but when he calls the heart a pump that forces the blood to the extremities, we see that he anticipates Harvey, although more than two thousand years of night lie between them.

Some of Aristotle reads about like this Geometrical Domestic Equation:

Definitions:

All boarding-houses are the same boarding-houses.

Boarders in the same boarding-house, and on the same flat, are equal to one another.

A single room is that which hath no parts and no magnitude.

The landlady of the boarding-house is a parallelogram — that is, an oblong figure that can not be described, and is equal to anything.

A wrangle is the disinclination to each other of two boarders that meet together, but are not on the same floor.

All the other rooms being taken, a single room is a double room.

Postulates and Propositions:

A pie may be produced any number of times.

The landlady may be reduced to her lowest terms by a series of propositions.

A bee-line is the shortest distance between the Phalanstery and By Allen's.

The clothes of a boarding-house bed stretched both ways will not meet.

Any two meals at a boarding-house are together less than one meal at the Phalanstery.

On the same bill and on the same side of it there should not be two charges for the same thing.

If there be two boarders on the same floor, and the amount of the side of the one be equal to the amount of the side of the other, and the wrangle between the one boarder and the landlady be equal to the wrangle between the landlady and the other boarder, then shall the weekly bills of the two boarders be equal. For, if not, let one bill be the greater, then the other bill is less than it might have been, which is absurd. Therefore the bills are equal.

Quod erat demonstrandum.

The business of the old philosophers was to philosophize. To philosophize as a business is to miss the highest philosophy. To do a certain amount of useful work every day, and not trouble about either the past or the future, is the highest wisdom. The man who drags the past behind him, and dives into the future, spreads the present out thin. Therein lies the bane of most religions. A man goes out into the woods to study the birds: he walks and walks and walks and sees no birds. But just let him sit down on a log and wait, and lo! the branches are full of song.

Those who pursue Culture never catch up with her. Culture takes alarm at pursuit and avoids the stealthy pounce. Culture is a woman, and a certain amount of indifference wins her. Ardent wooing will not secure either wisdom or a woman — except in the case where a

woman marries a man to get rid of him, and then he really does not get the woman — he only secures her husk. And the husks of culture are pedantry and sciolism. The highest philosophy of the future will consist in doing each day that which is most useful. Talking about it will be quite incidental and secondary.

After Alexander had completed his little task of conquering the world, it was his intention to sit down and improve his mind. He was going back to Greece to complete the work Pericles had so well begun. To this end Aristotle had left Macedonia and established his Peripatetic School at Athens. Plato was exclusive, and taught in the Garden with its high walls. Aristotle taught in the “peripatos,” or porch of the Lyceum, and his classes were for all who wished to attend. Socrates was really the first peripatetic philosopher, but he was a roustabout. Nothing sanctifies like death — and now Socrates had become respectable, and his methods were to be made legal and legitimate.

Socrates discovered the principle of human liberty; he taught the rights of the individual, and as these threatened to interfere with the State, the politicians got alarmed and put him to death. Plato, much more cautious, wrote his “Republic,” wherein everything is subordinated for the good of the State, and the individual is but a cog in a most perfectly lubricated machine. Aristotle saw that Socrates was nearer right than Plato — sin is the expression of individuality and is not wholly bad — the State is made up of individuals, and if you suppress the thinking-power of the individual, you will get a weak and effeminate body politic; there will be none to govern. The whole fabric will break down of its own weight. A man must have the privilege of making a fool of himself — within proper bounds, of course. To that end learning must be for all, and liberty both to listen and to teach should be the privilege of every man.

This is a problem that Boston has before it today: Shall free speech be allowed on the Common? William Morris tried it in Trafalgar Square, to his sorrow; but in Hyde Park, if you think you have a message, London will let you give it. But this is not considered good form, and the “Best Society” listen to no speeches in the park. However, there are signs that Aristotle’s outdoor school

may come back. Phillips Brooks tried outdoor preaching, and if his health had not failed, he might have popularized it. It only wants a man who is big enough to inaugurate it.

Aristotle had various helpers, and arranged to give his lectures and conferences daily in certain porches or promenades. These lectures covered the whole range of human thought — logic, rhetoric, oratory, physics, ethics, politics, esthetics, and physical culture. These outdoor talks were called exoteric, and there gradually grew up esoteric lessons, which were for the rich or luxurious and the dainty. And there being money in the esoteric lessons, these gradually took the place of the exoteric, and so we get the genesis of our modern private school or college, where we send our children to be taught great things by great men, for a consideration.

Will the exoteric, peripatetic school come back?

I think so.

I believe that university education will soon be free to every boy and girl in America, and this without going far from home. Esoteric education is always more or less of a sham. Our public-school system is purely exoteric, only we stop too soon. We also give our teachers too much work and too little pay. Stop building warships, and use the money to double the teachers' salaries, making the profession respectable, raise the standard of efficiency, and the free university with the old Greek Lyceum will be here.

America must do this — the Old World can't. We have the money, and we have the men and the women; all that is needed is the desire, and this is fast awakening.

When Alexander died, of acute success, aged thirty-two, Aristotle's sustaining prop was gone. The Athenians never thought much of the Macedonians — not much more than Saint Paul did, he having tried to convert both and failed.

Athens was jealous of the power of Alexander: that a provincial should thus rule the Mother-Country was unforgivable. It was as if a Canadian should make himself King of England!

Everybody knew that Aristotle had been the tutor of Alexander, and that they were close friends. And that a Macedonian should be the chief school-teacher in Athens was an affront. The very greatness

of the man was his offense: Athens had none to match him, and the world has never since matched him, either. How to get rid of the Macedonian philosopher was the question.

And so our old friend, heresy, comes in again. A poem was found, written by Aristotle many years before, on the death of his friend, King Hermias, wherein Apollo was disrespectfully mentioned. It was the old charge against Socrates come back — the hemlock was brewing. But life was sweet to Aristotle; he chose discretion to valor, and fled to his country home at Chalcis in Eubœa.

The humiliation of being driven from his work, and the sudden change from active life to exile, undermined his strength, and he died in a year, aged sixty-two.

In morals the world has added nothing new to the philosophy of Aristotle: gentleness, consideration, moderation, mutual helpfulness, and the principle that one man's privileges end where another man's rights begin — these make up the sum. And on them, all authorities agree, and have for twenty-five hundred years.

The family relations of Aristotle were most exemplary. The unseemly wrangles of Philip and his wife were never repeated in the home of Aristotle. Yet we will have to offer this fact in the interests of stirpiculture: the inconstant Philip and the termagant Olympias brought into the world Alexander; whereas the sons of Aristotle lived their day and died, without making a ripple on the surface of history.

As in the scientific study of the horse, no progress was made from the time of Aristotle to that of Leonardo, so Hegel says there was no advancement in philosophy from the time of Aristotle to that of Spinoza.

Eusebius called Aristotle "Nature's Private Secretary."

Dante spoke of him as the "Master of those who know."

Sir William Hamilton said, "In the range of his powers and perceptions, only Leonardo can be compared with him."

ARISTOTLE by Charles McRae

An Extract from 'Fathers of Biology by Charles McRae'

About the time that Hippocrates died, Aristotle, who may be regarded as the founder of the science of "Natural History," was born (B.C. 384) in Stagira, an unimportant Hellenic colony in Thrace, near the Macedonian frontier. His father was a distinguished physician, and, like Hippocrates, boasted descent from the Asclepiadæ. The importance attached by the Asclepiads to the habit of physical observation, which has been already referred to in the life of Hippocrates, secured for Aristotle, from his earliest years, that familiarity with biological studies which is so clearly evident in many of his works.

Both parents of Aristotle died when their son was still a youth, and in consequence of this he went to reside with Proxenus, a native of Atarneus, who had settled at Stagira. Subsequently he went to Athens and joined the school of Plato. Here he remained for about twenty years, and applied himself to study with such energy that he became pre-eminent even in that distinguished band of philosophers. He is said to have been spoken of by Plato as "the intellect" of the school, and to have been compared by him to a spirited colt that required the application of the rein to restrain its ardour.

Aristotle probably wrote at this time some philosophical works, the fame of which reached the ears of Philip, King of Macedonia, and added to the reputation which the young philosopher had already made with that monarch; for Philip is said to have written to him on the occasion of Alexander's birth, B.C. 356: "King Philip of Macedonia to Aristotle, greeting. Know that a son has been born to me. I thank the gods not so much that they have given him to me, as that they have permitted him to be born in the time of Aristotle. I hope that thou wilt form him to be a king worthy to succeed me and to rule the Macedonians."

After the death of Plato, which occurred in 347 B.C., Aristotle quitted Athens and went to Atarneus, where he stayed with Hermias, who was then despot of that town. Hermias was a remarkable man, who, from being a slave, had contrived to raise himself to the supreme power. He had been at Athens and had heard Plato's lectures, and had there formed a friendship for Aristotle. With this man the philosopher remained for three years, and was then compelled suddenly to seek refuge in Mitylene, owing to the perfidious murder of Hermias. The latter was decoyed out of the town by the Persian general, seized and sent prisoner to Artaxerxes, by whom he was hanged as a rebel. On leaving Atarneus, Aristotle took with him a niece of Hermias, named Pythias, whom he afterwards married. She died young, leaving an infant daughter.

Two or three years after this, Aristotle became tutor to Alexander, who was then about thirteen years old. The philosopher seems to have been a favourite with both the king and the prince, and, in gratitude for his services, Philip rebuilt Stagira and restored it to its former inhabitants, who had either been dispersed or carried into slavery. The king is said also to have established there a school for Aristotle. The high respect in which Alexander held his teacher is expressed in his saying that he honoured him no less than his own father, for while to one he owed life, to the other he owed all that made life valuable.

In 336 B.C. Alexander, who was then only about twenty years of age, became king, and Aristotle soon afterwards quitted Macedonia and took up his residence in Athens once more, after an absence of about twelve years. Here he opened a school in the Lycæum, a gymnasium on the eastern side of the city, and continued his work there for about twelve years, during which time Alexander was making his brilliant conquests. The lectures were given for the most part while walking in the garden, and in consequence, perhaps, of this, the sect received the name of the Peripatetics. The discourses were of two kinds — the *esoteric*, or abstruse, and the *exoteric*, or familiar; the former being delivered to the more advanced pupils only. During the greater part of this time Aristotle kept up correspondence with Alexander, who is said to have placed at his disposal thousands of men, who were busily employed in collecting

objects and in making observations for the completion of the philosopher's zoological researches. Alexander is, moreover, said to have given the philosopher eight hundred talents for the same purpose.

In spite of these marks of friendship and respect, Alexander, who was fast becoming intoxicated with success, and corrupted by Asiatic influences, gradually cooled in his attachment towards Aristotle. This may have been hastened by several causes, and among others by the freedom of speech and republican opinions of Callisthenes, a kinsman and disciple of Aristotle, who had been, by the latter's influence, appointed to attend on Alexander. Callisthenes proved so unpopular, that the king seems to have availed himself readily of the first plausible pretext for putting him to death, and to have threatened his former friend and teacher with a similar punishment. The latter, for his part, probably had a deep feeling of resentment towards the destroyer of his kinsman.

Meanwhile the Athenians knew nothing of these altered relations between Aristotle and Alexander, but continued to regard the philosopher as thoroughly imbued with kingly notions (in spite of his writings being quite to the contrary); so that he was an object of suspicion and dislike to the Athenian patriots. Nevertheless, as long as Alexander was alive, Aristotle was safe from molestation. As soon, however, as Alexander's death became known, the anti-Macedonian feeling of the Athenians burst forth, and found a victim in the philosopher. A charge of impiety was brought against him. It was alleged that he had paid divine honours to his wife Pythias and to his friend Hermias. Now, for the latter, a eunuch, who from the rank of a slave had raised himself to the position of despot over a free Grecian community, so far from coupling his name (as Aristotle had done in his hymn) with the greatest personages of Hellenic mythology, the Athenian public felt that no contempt was too bitter. To escape the storm the philosopher retired to Chalcis, in Eubœa, then under garrison by Antipater, the Governor of Macedonia, remarking in a letter, written afterwards, that he did so in order that the Athenians might not have the opportunity of sinning a second time against philosophy (the allusion being, of course, to the fate of Socrates).

He probably intended to return to Athens again so soon as the political troubles had abated, but in September, 322 B.C., he died at Chalcis. An overwrought mind, coupled with indigestion and weakness of the stomach, from which he had long suffered, was most probably the cause of death. Some of his detractors, however, have asserted that he took poison, and others that he drowned himself in the Eubœan Euripus.

It is not easy to arrive at a just estimate of the character of Aristotle. By some of his successors he has been reproached with ingratitude to his teacher, Plato; with servility to Macedonian power, and with love of costly display. How far these two last charges are due to personal slander it is impossible to say. The only ground for the first charge is, that he criticised adversely some of Plato's doctrines.

The manuscripts of Aristotle's works passed through many vicissitudes. At the death of the philosopher they were bequeathed to Theophrastus, who continued chief of the Peripatetic school for thirty-five years. Theophrastus left them, with his own works, to a philosophical friend and pupil, Neleus, who conveyed them from Athens to his residence at Scepsis, in Asia Minor. About thirty or forty years after the death of Theophrastus, the kings of Pergamus, to whom the city of Scepsis belonged, began collecting books to form a library on the Alexandrian plan. This led the heirs of Neleus to conceal their literary treasures in a cellar, and there the manuscripts remained for nearly a century and a half, exposed to injury from damp and worms. At length they were sold to Apellicon, a resident at Athens, who was attached to the Peripatetic sect. Many of the manuscripts were imperfect, having become worm-eaten or illegible. These defects Apellicon attempted to remedy; but, being a lover of books rather than a philosopher, he performed the work somewhat unskilfully. When Athens was taken by Sylla, 86 B.C., the library of Apellicon was transported to Rome. There various literary Greeks obtained access to it; and, among others, Tyrannion, a grammarian and friend of Cicero, did good service in the work of correction. Andronicus of Rhodes afterwards arranged the whole into sections, and published the manuscripts with a tabulated list.

The three principal works on biology which are extant are: "The

History of Animals;” “On the Parts of Animals;” “On the Generation of Animals.” The other biological works are: “On the Motion of Animals;” “On Respiration;” “Parva Naturalia;” — a series of essays which are planned to form an entire work on sense and the sensible.

“The History of Animals” is the largest and most important of Aristotle’s works on biology. It contains a vast amount of information, not very methodically arranged, and spoiled by the occurrence here and there of very gross errors. It consists of nine books.

The first book opens with a division of the body into similar and dissimilar parts. Besides thus differing in their parts, animals also differ in their mode of life, their actions and dispositions. Thus some are aquatic, others terrestrial; of the former, some breathe water, others air, and some neither. Of aquatic animals, some inhabit the sea, and others rivers, lakes, or marshes. Again, some animals are locomotive, and others are stationary. Some follow a leader, others act independently. Various differences are in this way pointed out, and there is no lack of illustration and detail, but a suspicion is excited that the generalizations are sometimes based upon insufficient facts. The book closes with a description of the different parts of the human body, both internal and external. In speaking of the ear, Aristotle seems to have been aware of what we now call the Eustachian tube, for he says, “There is no passage from the ear into the brain, but there is to the roof of the mouth.”

In the second book he passes on to describe the organs of animals. The animals are dealt with in groups — viviparous and oviparous quadrupeds, fish, serpents, birds, etc. The ape, elephant, chameleon, and some others are especially noticed.

The third book continues the description of the internal organs. References which are made to a diagram by letters, *a*, *b*, *c*, *d*, show that the work was originally illustrated. At the close of this book Aristotle has some remarks on milk, and mentions the occasional appearance of milk in male animals. He speaks of a male goat at Lemnos which yielded so much that cakes of cheese were made from it. Similar instances of this phenomenon have been recorded by Humboldt, Burdach, Geoffroy St. Hilaire, and others.

In the first four chapters of the fourth book the anatomy of the

invertebrata is dealt with, and the accounts given of certain mollusca and crustacea are very careful and minute. The rest of the book is devoted to a description of the organs of sense and voice; of sleep, and the distinctions of sex. The accurate knowledge which Aristotle exhibits of the anatomy and habits of marine animals, such as the Cephalopoda and the larger Crustacea, leaves no doubt that he derived it from actual observation. Professor Owen says, "Respecting the living habits of the Cephalopoda, Aristotle is more rich in detail than any other zoological author." What is now spoken of as the *hectocotylization* of one or more of the arms of the male cephalopod did not escape Aristotle's eye. And while he speaks of the teeth and that which serves these animals for a tongue, it is plain from the context that he means in the one case the two halves of the parrot-like beak, and in the other the anterior end of the odontophore.

Books five to seven deal with the subject of generation.

The eighth book contains a variety of details respecting animals, their food, migrations, hibernation, and diseases; with the influence of climate and locality upon them.

The ninth book describes the habits and instincts of animals. The details are interesting; but there is, as usual, very little attempt at classification. Disjointed statements and sudden digressions occur, the subjects being treated in the order in which they presented themselves to the author. Such curious statements as the following are met with: "The raven is an enemy to the bull and the ass, for it flies round them and strikes their eyes." "If a person takes a goat by the beard, all the rest of the herd stand by, as if infatuated, and look at it." "Female stags are captured by the sound of the pipe and by singing. When two persons go out to capture them, one shows himself, and either plays upon a pipe or sings, and the other strikes behind, when the first gives him the signal." "Swans have the power of song, especially when near the end of their life; for they then fly out to sea, and some persons sailing near the coast of Libya have met many of them in the sea singing a mournful song, and have afterwards seen some of them die." "Of all wild animals, the elephant is the most tame and gentle; for many of them are capable of instruction and intelligence, and they have been taught *to worship the king*."

In the work “On the Parts of Animals,” the author considers not only the phenomena of life exhibited by each species, but also the cause or causes to which these phenomena are attributable. After a general introduction, he proceeds to enumerate the three degrees of composition, viz.: —

(1) “Composition out of what some call the elements, such as air, earth, water, and fire,” or “out of the elementary forces, hot and cold, solid and fluid, which form the material of all compound substances.”

(2) Composition out of these primary substances of the homogeneous parts of animals, e.g. blood, fat, marrow, brain, flesh, and bone.

(3) Composition into the heterogeneous parts or organs. These parts he describes in detail, considering those belonging to sanguineous animals first and most fully.

These divisions correspond roughly to the threefold study of structure which we nowadays recognize as chemical, histological, and anatomical.

As examples of Aristotle’s method of treatment, his descriptions of blood, the brain, the heart, and the lung may be considered.

Of the *blood* he says, “What are called fibres are found in the blood of some animals, but not of all. There are none, for instance, in the blood of deer and of roes, and for this reason the blood of such animals as these never coagulates.... Too great an excess of water makes animals timorous.... Such animals, on the other hand, as have thick and abundant fibres in their blood are of a more choleric temperament, and liable to bursts of passion.... Bulls and boars are choleric, for their blood is exceedingly rich in fibres, and the bull’s, at any rate, coagulates more rapidly than that of any other animal.... If these fibres are taken out of the blood, the fluid that remains will no longer coagulate.”

From these quotations it will be noted that Aristotle attributed the coagulum to the presence of fibres, and in this he anticipated Malpighi’s discovery made in the seventeenth century. His remarks on the proportion of coagulum and serum in different animals, which is enlarged upon in the “History of Animals,” harmonize with modern observations. In another of his works he remarks that the

blood in certain diseased conditions will not coagulate. This is known to be the case in cholera, certain fevers, asphyxia, etc.; and the fact was probably obtained from Hippocrates. Although Aristotle speaks here of entire absence of coagulation in the blood of the deer and the roe, in the "History of Animals" he admits an imperfect coagulation, for he says, "so that their blood does not coagulate like that of other animals." The animals named are commonly hunted, and it was probably after they had been hunted to death that he examined them. Now, it is generally admitted that coagulation under such circumstances is imperfect and even uncommon. The statement as to the richness in fibres of the blood of bulls and boars has been confirmed by some modern investigations, which have shown that the clot bears a proportion to the strength and ferocity of the animal. The remarks, however, as to the relative rapidity of coagulation would appear to be contradicted by later observations, for Thackrah came to the conclusion that coagulation commenced sooner in small and weak animals than in strong.

Of the *brain* Aristotle makes the following among other assertions: "Of all parts of the body there is none so cold as the brain.... Of all the fluids of the body it is the one that has the least blood, for, in fact, it has no blood at all in its proper substance.... That it has no continuity with the organs of sense is plain from simple inspection, and still more closely shown by the fact that when it is touched no sensation is produced.... The brain tempers the heat and seething of the heart.... In order that it may not itself be absolutely without heat, blood-vessels from the aorta end in the membrane which surrounds the brain.... Of all animals man has the largest brain in proportion to his size: and it is larger in men than in women. This is because the region of the heart and of the lung is hotter and richer in blood in man than in any other animal; and in men than in women. This again explains why man alone of animals stands erect. For the heat, overcoming any opposite inclination, makes growth take its own line of direction, which is from the centre of the body upwards.... Man again has more sutures in his skull than any other animal, and the male more than the female. The explanation is to be found in the greater size of the brain, which demands free ventilation proportionate to its bulk.... There is no brain

in the hinder part of the head.... The brain in all animals that have one is placed in the front part of the head ... because the heart, from which sensation proceeds, is in the front part of the body.”

Although it would perhaps be difficult to find anywhere as many errors in as few words, yet it should be observed that Aristotle here shows himself to have been aware of the existence of the membranes of the brain — the *pia mater* and the *dura mater*; and elsewhere he says more explicitly, “Two membranes enclose the brain; that about the skull is the stronger; the inner membrane is slighter than the outer one.” And further, it should be noted that he describes the latter membrane as a vascular one. The fact of the brain substance being insensible to mechanical irritation was known to Aristotle, and may have been learnt from the practice of Hippocrates. Lastly, it should be remembered that — though this may have been but a lucky guess on Aristotle’s part — the relative weight of brain to the entire body has been shown, with few exceptions, to be greater in man than in any other animal.

In describing the *heart* Aristotle says: “The heart lies about the centre of the body, but rather in its upper than in its lower half, and also more in front than behind.... In man it inclines a little towards the left, so that it may counterbalance the chilliness of that side. It is hollow, to serve for the reception of the blood; while its wall is thick, that it may serve to protect the source of heat. For here, and here alone, in all the viscera, and in fact in all the body, there is blood without blood-vessels, the blood elsewhere being always contained within vessels. The heart is the first of all the parts of the body to be formed, and no sooner is it formed than it contains blood.... For no sooner is the embryo formed than its heart is seen in motion like a living creature, and this before any of the other parts. The heart is abundantly supplied with sinews.... In no animal does the heart contain a bone, certainly in none of those that we ourselves have inspected, with the exception of the horse and a certain kind of ox. In animals of great size the heart has three cavities; in smaller animals it has two; and in all it has at least one.”

It will be observed that here Aristotle so correctly describes the position of the human heart as to render it probable that he is speaking from actual inspection; although man is not the only animal

in which the heart is turned towards the left. In contrasting the heart with the other viscera he appears to have overlooked the existence of the coronary vessels, and to have imagined that the nutrition of the heart was effected directly by the blood in its cavities. Although the heart is not really the first part to appear, the observation of its very early appearance in the embryo, which he treats more fully elsewhere, is alone enough to establish his reputation as an original observer. It is remarkable that Aristotle should have overlooked the presence of the valves of the heart, the structure and functions of which were fully investigated within thirty years of his death by the anatomists of the Alexandrian school. This is the more remarkable, as he calls attention here, and in the "History of Animals," to the sinews or tendons (νεῦρα) with which, he says, the heart is supplied, and by which he probably meant chiefly the *chordæ tendineæ*. The "bone in the heart" of which he speaks was probably the cruciform ossification which is normally found in the ox and the stag below the origin of the aorta. It is found in the horse only in advanced age, or under abnormal conditions. The statement that the heart contains no more than three chambers has always been considered as a very gross blunder on the part of Aristotle. Even Cuvier, who generally lavishes upon the philosopher the most extravagant praise, sneers at this. Professor Huxley, however, has shown, by a comparison of several passages from the "History of Animals," that what we now call the right auricle was regarded by the author as a venous sinus, as being a part not of the heart, but of the great vein (*i.e.* the superior and the inferior *venæ cavæ*).

Aristotle speaks of the *lung* as a single organ, sub-divided, but having a common outlet — the trachea. Elsewhere he says, "Canals from the heart pass to the lung and divide in the same fashion as the windpipe does, closely accompanying those from the windpipe through the whole lung." His theory of respiration, as explained in his treatise on the subject, is that it tempers the excessive heat produced in the heart. The lung is compared to a pair of bellows. When the lung is expanded, air rushes in; when it is contracted, the air is expelled. The heat from the heart causes the lung to expand — cold air rushes in, the heat is reduced, the lung collapses, and the air is expelled. The cold air drawn into the lung reaches the bronchial

tubes, and as the vessels containing hot blood run alongside these tubes, the air cools it and carries off its superfluous heat. Some of the air which enters the lung gets from the bronchial tubes into the blood-vessels by transudation, for there is no direct communication between them; and this air, penetrating the body, rapidly cools the blood throughout the vessels. But Aristotle did not consider the “pneuma,” which thus reached the interior of the blood-vessels, to be exactly the same thing as air — it was “a subtilized and condensed air.” And this we now know to be oxygen.

The treatise “On the Generation of Animals” is an extraordinary production. “No ancient and few modern works equal it in comprehensiveness of detail and profound speculative insight. We here find some of the obscurest problems of biology treated with a mastery which, when we consider the condition of science at that day, is truly astounding. That there are many errors, many deficiencies, and not a little carelessness in the admission of facts, may be readily imagined; nevertheless at times the work is frequently on a level with, and occasionally even rises above, the speculations of many advanced embryologists.”

It commences with the statement that the present work is a sequel to that “On the Parts of Animals;” and first the masculine and feminine *principles* are defined. The masculine principle is the origin of all motion and generation; the feminine principle is the origin of the material generated. Aristotle’s philosophy of nature was teleological, and the imperfect character of his anatomical knowledge often gives him occasion to explain particular phenomena by final causes. Thus animals producing soft-shelled eggs (*e.g.* cartilaginous fish and vipers) are said to do so because they have so little warmth that the external surface of the egg cannot be dried.

Among insects, some (*e.g.* grasshopper, cricket, ant, etc.) produce young in the ordinary way, by the union of the sexes; in other cases (*e.g.* flies and fleas) this union of the sexes results in the production of a *skolex*; while others have no parents, nor do they have congress — such are the ephemera, tipula, and the like. Aristotle discusses and rejects the theory that the male reproductive element is derived from every part of the body. He concludes that “instead of saying that it comes *from* all parts of the body, we should say that it goes *to* them.

It is not the nutrient fluid, but that which is *left over*, which is secreted. Hence the larger animals have fewer young than the smaller, for by them the consumption of nutrient material will be larger and the secretion less. Another point to be noticed is, that the nutrient fluid is universally distributed through the body, but each secretion has its separate organ.... It is thus intelligible why children resemble their parents, since that which makes all the parts of the body, resembles that which is left over as secretion: thus the hand, or the face, or the whole animal pre-exists in the sperm, though in an undifferentiated state (ἀδιορίστως); and what each of these is in actuality (ἐνεργείᾳ), such is the sperm in potentiality (δυνάμει).”

In later times the two great rival theories put forward to account for the development of the embryo have been —

(a) The theory of Evolution, which makes the embryo pre-existent in the germ, and only rendered visible by the unfolding and expansion of its organs.

(b) The theory of Epigenesis, which makes the embryo arise, by a series of successive differentiations, from a simple homogeneous mass into a complex heterogeneous organism.

The above quotation will show how closely Aristotle held to the theory of Epigenesis; and in another place he says, “Not at once is the animal a man or a horse, for the end is last attained; and the specific form is the end of each development.”

Spontaneous generation is nowadays rejected by science; but Aristotle went so far as to believe that insects, molluscs, and even eels, were spontaneously generated. It is, however, noteworthy, in view of modern investigations, that he looked upon *putrefying* matter as the source of such development.

A chapter of this work is devoted to the consideration of the hereditary transmission of peculiarities from parent to offspring.

The fifth and last book contains inquiries into the cause of variation in the colour of the eyes and hair, the abundance of hair, the sleep of the embryo, sight and hearing, voice and the teeth.

Widely different opinions have been held from time to time of the value of Aristotle’s biological labours. This philosopher’s reputation has, perhaps, suffered most from those who have praised him most. The praise has often been of such an exaggerated character as to have

become unmeaning, and to have carried with it the impression of insincerity on the part of the writer. Such are the laudations of Cuvier. To say as he does, "Alone, in fact, without predecessors, without having borrowed anything from the centuries which had gone before, since they had produced nothing enduring, the disciple of Plato discovered and demonstrated more truths and executed more scientific labours in a life of sixty-two years than twenty centuries after him were able to do," is of course to talk nonsense, for the method which Aristotle applied was that which Hippocrates had used so well before him; and it is evident to any one that both his predecessors and contemporaries are frequently laid under contribution by Aristotle, although the authority is rarely, if ever, stated by him unless he is about to refute the view put forward. Exaggerated praise of any author has a tendency to excite depreciation correspondingly unjust and untrue. It has been so in the case of this great man. In the endeavour to depose him from the impossible position to which his panegyrists had exalted him, his detractors have gone to any length. The principal charges brought against his biological work have been inaccuracy and hasty generalization. In support of the charge of inaccuracy, some of the extraordinary statements which are met with in his works are adduced. "These," Professor Huxley says, "are not so much to be called errors as stupidities." Some, however, of the inaccuracies alleged against Aristotle are fancied rather than real. Thus he is charged with having represented that the arteries contained nothing but air; that the aorta arose from the right ventricle; that the heart did not beat in any other animal but man; that reptiles had no blood, etc.; although in reality he made no one of these assertions. There remain, nevertheless, the gross misstatements referred to above, and which really do occur. Such, for instance, as that there is but a single bone in the neck of the lion; that there are more teeth in male than in female animals; that the mouth of the dolphin is placed on the under surface of the body; that the back of the skull is empty, etc. Although these absurdities undoubtedly occur in Aristotle's works, it by no means follows that he is responsible for them. Bearing in mind the curious history of the manuscripts of his treatises, we shall find it far more reasonable to conclude that such errors crept in during the

process of correction and restoration, by men apparently ignorant of biology, than that (to take only one case) an observer who had distinguished the cetacea from fishes and had detected their hidden mammæ, discovered their lungs, and recognized the distinct character of their bones, should have been so blind as to fancy that the mouth of these animals was on the under surface of the body.

That Aristotle made hasty generalizations is true; but it was unavoidable. Biology was in so early a stage that a theory had often of necessity to be founded on a very slight basis of facts. Yet, notwithstanding this drawback, so great was the sagacity of this philosopher, that many of his generalizations, which he himself probably looked upon as temporary, have held their ground for twenty centuries, or, having been lost sight of, have been discovered and put forward as original by modern biologists. Thus "the advantage of physiological division of labour was first set forth," says Milne-Edwards, "by myself in 1827;" and yet Aristotle had said that "whenever Nature is able to provide two separate instruments for two separate uses, without the one hampering the other, she does so, instead of acting like a coppersmith, who for cheapness makes a spit-and-a-candlestick in one. It is only when this is impossible that she uses one organ for several functions."

In conclusion, we may say that the great Stagirite expounded the true principles of science, and that when he failed his failure was caused by lack of materials. His desire for completeness, perhaps, tempted him at times to fill in gaps with such makeshifts as came to his hand; but no one knew better than he did that "theories must be abandoned unless their teachings tally with the indisputable results of observation."

PREFACE

In undertaking to treat of Aristotle as the expounder of ancient educational ideas, I might, with Kapp's *Aristoteles' Staatspaedagogik* before me, have made my task an easy one. I might simply have presented in an orderly way and with a little commentary, what is to be found on the subject of education in his various works — Politics, Ethics, Rhetoric, Poetics, etc. I had two reasons, however, for not adopting this course: (1) that this work had been done, better than I could do it, in the treatise referred to, and (2) that a mere restatement of what Aristotle says on education would hardly have shown his relation to ancient pedagogy as a whole. I therefore judged it better, by tracing briefly the whole history of Greek education up to Aristotle and down from Aristotle, to show the past which conditioned his theories and the future which was conditioned by them. Only thus, it seemed to me, could his teachings be seen in their proper light. And I have found that this method has many advantages, of which I may mention one. It has enabled me to show the close connection that existed at all times between Greek education and Greek social and political life, and to present the[vi] one as the reflection of the other. And this is no small advantage, since it is just from its relation to the whole of life that Greek education derives its chief interest for us. We can never, indeed, return to the purely political education of the Greeks; they themselves had to abandon that, and, since then,

A boundless hope has passed across the earth —

a hope which gives our education a meaning and a scope far wider than any that the State aims at; but in these days, when the State and the institution which embodies that hope are contending for the right to educate, it cannot but aid us in settling their respective claims, to follow the process by which they came to have distinct claims at all, and to see just what these mean. This process, the method which I have followed has, I hope, enabled me, in some degree, to bring into clearness. This, at all events, has been one of my chief aims.

In treating of the details of Greek educational practice, I have been guided by a desire to present only, or mainly, those which

contribute to make up the complete picture. For this reason I have omitted all reference to the training for the Olympic and other games, this (so it seems to me) being no essential part of the system.

It would have been easy for me to give my book a learned appearance, by checkering its pages with references to ancient authors, or quotations, in the original, from them; but this has seemed to me both unnecessary and unprofitable in a work intended for the general public. I have, therefore, preferred to place at the[vii] heads of the different chapters, in English mostly, such quotations as seemed to express, in the most striking way, the spirit of the different periods and theories of Greek education. Taken together, I believe these quotations will be found to present a fairly definite outline of the whole subject.

In conclusion, I would say that, though I have used a few modern works, such as those of Kapp and Grasberger, I have done so almost solely for the sake of finding references. In regard to every point I believe I have turned to the original sources. If, therefore, my conclusions on certain points differ from those of writers of note who have preceded me, I can only say that I have tried to do my best with the original materials before me. I am far from flattering myself that I have reached the truth in every case, and shall be very grateful for corrections, in whatever spirit they may be offered; but I trust that I have been able to present in their essential features, the “ancient ideals of education.”

CHAPTER I

CHARACTER AND IDEAL OF GREEK EDUCATION

Nothing in excess! — Solon.

No citizen has a right to consider himself as belonging to himself; but all ought to regard themselves as belonging to the State, inasmuch as each is a part of the State; and care for the part naturally looks to care for the whole. — Aristotle.

Greek life, in all its manifestations, was dominated by a single idea, and that an æsthetic one. This idea, which worked sometimes consciously, sometimes unconsciously, was Proportion. The Greek term for this (*Logos*) not only came to designate the incarnate Word of Religion, but has also supplied many modern languages with a name for the Science of Manifested Reason — Logic. To the Greek, indeed, Reason always meant ratio, proportion; and a rational life meant to him a life of which all the parts, internal and external, stood to each other in just proportion. Such proportion was threefold; *first*, between the different parts of the individual human being; *second*, between the individual and his fellows in a social whole; *third*, between the human, as such, and the overruling divine. The realization of this threefold harmony in the individual was called by the Greeks Worth (Ἀρετή, usually, but incorrectly, rendered Virtue). There has come down to us, from the pen of Aristotle, in whom all that was implicit in Hellenism became explicit, a portion of a pæan addressed to this ideal. It may be fitly inserted here, in a literal translation.

To Worth.

O Worth! stern taskmistress of human kind,
Life's noblest prize:
O Virgin! for thy beauty's sake
It is an envied lot in Hellas even to die,
And suffer toils devouring, unassuaged —
So well dost thou direct the spirit
To fruit immortal, better than gold

And parents and soft-eyed sleep.
For thy cause Jove-born Hercules and Leda's sons
Much underwent, by deeds
Thy power proclaiming.
For love of thee Achilles and Ajax to Hades' halls went down.
For thy dear beauty's sake Atarneus' nursling too widowed the
glances of the sun.
Therefore, as one renowned for deeds and deathless, him the Muses
shall exalt,
The daughters of Memory, exalting so the glory of Stranger-guarding
Jove, and the honor of friendship firm.

With regard to this ideal, four things are especially noteworthy; *first*, that it took an exhaustive survey of man's nature and relations; *second*, that it called for strong, persistent, heroic effort; *third*, that it tended to sink the individual in the social whole and the universal order; *fourth*, that its aim was, on the whole, a static perfection. The first two were merits; the second two, demerits. The first merit prevented the Greeks from pursuing one-sided systems of education; the second, from trying to turn education into a means of amusement. Aristotle says distinctly, "Education ought certainly not to be turned into a means of amusement; for young people are not playing when they are learning, since all learning is accompanied with pain." The first demerit was prejudicial to individual liberty, and therefore obstructive of the highest human development; the second encouraged Utopian dreams, which, being always of static conditions, undisturbed by the toils and throes essential to progress, tend to produce impatience of that slow advance whereby alone man arrives at enduring results. To this tendency we owe such works as Plato's *Republic* and Xenophon's *Education of Cyrus*.

CHAPTER II

BRANCHES OF GREEK EDUCATION

With thee the aged car-borne Peleus sent me on the day whereon from Phthia to Agamemnon he sent thee, a mere boy, not yet acquainted with mutual war or councils, in which men rise to distinction — for this end he sent me forth to teach thee all these things, to be a speaker of words and a doer of deeds. — (*Phœnix in*) Homer.

Above all and by every means we provide that our citizens shall have good souls and strong bodies. — Lucian.

Life is the original school — life, domestic and social. All other schools merely exercise functions delegated by the family and by society, and it is not until the latter has reached such a state of complication as to necessitate a division of labor that special schools exist. Among the Homeric Greeks we find no mention of schools, and the only person recorded as having had a tutor is Achilles, who was sent away from home so early in life as to be deprived of that education which he would naturally have received from his father. In what that education consisted, we learn from the first quotation at the head of this chapter. It consisted in such training as would make the pupil “a speaker of words and a doer of deeds” — a man eloquent and persuasive in council, and brave and resolute on the field of battle. For these ends he required, as Lucian says, a good soul and a strong body.

These expressions mark the two great divisions into which Greek education at all periods fell — Mental Education and Physical Education — as well as their original aims, viz. goodness (that is, bravery) of soul and strength of body. As time went on, these aims underwent considerable changes, and consequently the means for attaining them considerable modifications and extensions. Physical education aimed more and more at beauty and grace, instead of strength, while mental education, in its effort to extend itself to all the powers of the mind, divided itself into literary and musical education.

As we have seen, the Greeks aimed at developing all the powers of the human being in due proportion and harmony. But, in course of time, they discovered that the human creature comes into the world with his powers, not only undeveloped, but already disordered and inharmonious; that not only do the germs of manhood require to be carefully watched and tended, but also that the ground in which they are to grow must be cleared from an overgrowth of choking weeds, before education can be undertaken with any hope of success. This clearing process was called by the later Greeks *Katharsis*, or Purgation, and played an ever-increasing part in their pedagogical systems. It was supposed to do for man's emotional nature what Medicine undertook to do for his body. The means employed were mainly music and the kindred arts, which the ancients believed to exert what we should now call a dæmonic effect upon the soul, drawing off the exciting causes of disturbing passion, and leaving it in complete possession of itself. It would hardly be too much to say that the power to exert this purgative influence on the soul was regarded by the ancients as the chief function and end of the Fine Arts. Such was certainly Aristotle's opinion.

When purgation and the twofold education of body and mind had produced their perfect work, the result was what the Greeks called *Kalokagathia* (καλοκάγαθία) that is, Fair-and-Goodness. Either half of this ideal was named ἀρετή (*aretê*), Worth or Excellence. We are expressly told by Aristotle (*Categories*, chap. viii.) that the adjective to ἀρετή is σπουδαῖος (*spoudaios*), a word which we usually render into English by "earnest." And we do so with reason; for to the Greek, Excellence or Worth meant, above all, earnestness, genuineness, truthfulness, thoroughness, absence of frivolity.

CHAPTER III

CONDITIONS OF EDUCATION

Some hold that men become good by nature, others by training, others by instruction. The part that is due to nature obviously does not depend upon us, but is imparted through certain divine causes to the truly fortunate. — Aristotle.

It is not merely begetting that makes the father, but also the imparting of a noble education. — John Chrysostom.

There are two sorts of education, the one divine, the other human. The divine is great and strong and easy; the human small and weak and beset with many dangers and delusions. Nevertheless, the latter must be added to the former, if a right result is to be reached. — Dion Chrysostom.

The same thing that we are wont to assert regarding the arts and sciences, may be asserted regarding moral worth, viz. that the production of a completely just character demands three conditions — nature, reason, and habit. By “reason” I mean instruction, by “habit,” training.... Nature without instruction is blind; instruction without nature, helpless; exercise (training) without both, aimless. — Plutarch.

To the realization of their ideal in any individual the Greeks conceived three conditions to be necessary, (1) a noble nature, (2) persistent exercise or training in right action, (3) careful instruction. If any one of these was lacking, the highest result could not be attained.

(1) To be well or nobly born was regarded by the Greeks as one of the best gifts of the gods. Aristotle defines noble birth as “ancient wealth and worth,” and this fairly enough expresses the Greek view generally. Naturally enough, therefore, the Greek in marrying looked above all things to the chances of a worthy offspring. Indeed, it may be fairly said that the purpose of the Greek in marriage was, not so much to secure a helpmeet for himself as to find a worthy mother for his children. In Greece, as everywhere else in the ancient world, marriage was looked upon solely as an arrangement for the

procreation and rearing of offspring. The romantic, pathological love-element, which plays so important a part in modern match-making, was almost entirely absent among the Greeks. What love there was, assumed either the noble form of enthusiastic friendship or the base one of free lust. In spite of this, and of the fact that woman was regarded as a means and not as an end, the relations between Greek husbands and wives were very often such as to render the family a school of virtue for the children. They were noble, sweet, and strong, — all the more so, it should seem, that they were based, not upon a delusive sentimentality, but upon reason and a sense of reciprocal duty.

(2) The value of exercise, practice, habituation, seems to have been far better understood by the ancients than by the moderns. Whatever a man has to do, be it speaking, swimming, playing, or fighting, he can learn only by doing it; this was a universally accepted maxim. The modern habit of trying to teach languages and virtues by rules, not preceded by extensive practice, would have seemed to the ancients as absurd as the notion that a man could learn to swim before going into the water. Practice first; theory afterwards: do the deed, and ye shall know of the doctrine — so said ancient Wisdom, to which the notion that children should not be called upon to perform any act, or submit to any restriction, without having the grounds thereof explained to them, would have seemed the complete inversion of all scientific method. It was by insisting upon a certain practice in children, on the ground of simple authority, that the ancients sought to inculcate the virtues of reverence for experience and worth, and respect for law.

(3) The work begun by nature, and continued by habit or exercise, was completed and crowned by instruction. This had, according to the Greek, two functions, (*a*) to make action free, by making it rational, (*b*) to make possible an advance to original action. Nature and habit left men thralls, governed by instincts and prescriptions; instruction, revelation of the grounds of action, set them free. Such freedom, based on insight, was to the thinkers of Greece the realization of manhood, or rather, of the divine in man. “The truth shall make you free” — no one understood this better than they. Hence, with all their steady insistence upon practice in education,

they never regarded it as the ultimate end, or as any end at all, except when guided by insight, the fruit of instruction. A practicality leading to no widening of the spiritual horizon, to no freeing insight, was to them illiberal, slavish, paltry—"banausic," they said, — degrading both to body and soul.

CHAPTER IV

SUBJECTS FOR EDUCATION

It is right that Greeks should rule over barbarians, but not barbarians over Greeks; for those are slaves, but these are free men. — Euripides.

Barbarian and slave are by nature the same. — Aristotle.

Nature endeavors to make the bodies of freemen and slaves different; the latter strong for necessary use, the former erect and useless for such operations, but useful for political life.... It is evident, then, that by nature some men are free, others slaves, and that, in the case of the latter, slavery is both beneficial and just. — *Id.*

Instruction, though it plainly has power to direct and stimulate the generous among the young ... is as plainly powerless to turn the mass of men to nobility and goodness (*Kalokagathia*). For it is not in their nature to be guided by reverence, but by fear, nor to abstain from low things because they are disgraceful, but (only) because they entail punishment. — *Id.*

In thinking of Greek education as furnishing a possible model for us moderns, there is one point which it is important to bear in mind: Greek education was intended only for the few, for the wealthy and well-born. Upon all others, upon slaves, barbarians, the working and trading classes, and generally upon all persons spending their lives in pursuit of wealth or any private ends whatsoever, it would have seemed to be thrown away. Even well-born women were generally excluded from most of its benefits. The subjects of education were the sons of full citizens, themselves preparing to be full citizens, and to exercise all the functions of such. The duties of such persons were completely summed up under two heads, duties to the family and duties to the State, or, as the Greeks said, œconomic and political duties. The free citizen not only acknowledged no other duties besides these, but he looked down upon persons who sought occupation in any other sphere. Œconomy and Politics, however, were very comprehensive terms. The former included the three relations of husband to wife, father to children, and master to slaves

and property; the latter, three public functions, legislative, administrative, and judiciary. All occupations not included under these six heads the free citizen left to slaves or resident foreigners. Money-making, in the modern sense, he despised, and, if he devoted himself to art or philosophy, he did so only for the benefit of the State. If he improved the patrimony which was the condition of his free citizenship, he did so, not by chaffering or money-lending, but by judicious management, and by kindly, but firm, treatment of his slaves. If he performed any great artistic service to the State — for example, if he wrote a tragedy for a State religious festival (and plays were never written for any other purpose) — the only reward he looked forward to was a crown of olive or laurel and the respect of his fellow-citizens.

The Greeks divided mankind, in all the relations of life, into two distinct classes, a governing and a governed, and considered the former alone as the subject of education; the latter being a mere instrument in its hands. The governing class required education in order that it might govern itself and the other class, in accordance with reason and justice; that other, receiving its guidance from the governing class, required no education, or only such as would enable it to obey. It followed that the duty of the governing class was to govern; of the governed, to obey. Only in this correlation of duties did each class find its usefulness and satisfaction. Any attempt to disturb or invert this correlation was a wilful running in the teeth of the laws of nature, a rebellion against the divine order of things.

As husband, father, master in the family, and as legislator, officer, judge in the State, each member of the governing class found his proper range of activities; and he did wrong, degrading himself to the level of the serving class, if he sought any other. This view, in a more or less conscious form, pervades the whole ancient world, conditioning all its notions and theories of education; and Paul the Apostle only echoed it when he said to wives: "Wives, be in subjection to your own husbands as to the Lord"; to children: "Children, obey your parents in the Lord: for this is right"; and to slaves: "Slaves, be obedient unto them that according to the flesh are your masters with fear and trembling, in singleness of heart, as unto Christ."

CHAPTER V

EDUCATION AS INFLUENCED BY TIME, PLACE, AND CIRCUMSTANCES

The peculiar character of each form of government is what establishes it at the beginning and what usually preserves it.... Since the whole State has but one end, it is plainly necessary that there should be one education for all the citizens. — Aristotle.

Education among the Greeks, as among every other progressive people, varied with times and circumstances. The education of the Homeric Greeks was not that of the Athenians in the days of Aristotle, nor the latter the same as the education of the contemporary Spartans or Thebans. Moreover, the education actually imparted was not the same as that demanded or recommended by philosophers and writers on pedagogics. It is true that the aim was always the same; Worth, Excellence, Fair-and-Goodness (ἀρετή, καλοκάγαθία); but this was differently conceived and differently striven after at different times and in different places.

Among the Homeric Greeks, as we have seen, education, being purely practical, aiming only at making its subject “a speaker of words and a doer of deeds,” was acquired in the actual intercourse and struggles of life. The simple conditions of their existence demanded no other education and, consequently, no special educational institutions. These conditions, as described by Homer, though by no means barbarous, are primitive. Nomadism has long been left behind and the later village-communities have been mostly merged in walled towns, generally situated at some distance from the shore, on or near a hill, whose summit forms a citadel for refuge in cases of danger. Even in the most advanced of these towns, however, the type of civilization is still largely patriarchal. The government is in the hands of chiefs or kings (βασιλῆες) claiming to be born and bred of Jove, as, indeed, in a sense, they were, since they ruled quite as much by right of personal worth, which more than anything is due to the grace of God, as by hereditary title. Worth in those days consisted in physical strength, courage, beauty, judgment, and power

to address an assembly, and any king proving deficient in these qualities would soon have found his position insecure, or been compelled to fortify it by lawless tyranny. The functions devolving upon the king were mainly three, those of judge, military commander, and priest. The first required judgment and ready speech; the second, strength and intelligent courage; the third, personal beauty and dignity. Though the kings were allowed to exercise great power, this was not irresponsible or arbitrary. On the contrary, it was compatible with great public freedom in speech and action. Slavery existed only to a limited extent and in a mild form. All free heads of families, however poor, had a right to attend the popular assembly, which the king consulted on all important matters, and at which the freest discussion was allowed. When the kings exercised judicial power, they did so in accordance with certain *themistes* or laws, held to have originated with Zeus, and not according to their own caprice. As there was little commerce in those days, the inhabitants of the ancient cities, when not engaged in warfare, devoted themselves chiefly to agriculture, cattle-raising, and the useful arts. In these even the kings thought it no shame to engage. We find Paris helping to build his own palace, Odysseus constructing his own bed, Lycaon cutting wood to make chariot-rails, and so on. Similarly, we find Helen and other princesses spinning and weaving, while Nausicaa, the daughter of the Phæacian king, washes the clothes of the family.

In such a primitive society, unacquainted with letters, the higher education found but few aspirants. The only persons of scientific pretensions mentioned by Homer are the physicians (who are likewise surgeons) and the soothsayers. The former are highly appreciated, and are always chiefs. The soothsayers are the exponents of divine omens to the community, and occupy a kind of official position, like the Hebrew prophets. No artists, strictly speaking, are mentioned by Homer, except the bard, and he is much honored, as historian, teacher, and inspirer. We find, indeed, that Achilles and Paris are proficient in music; but such cases seem exceptional. Of artisans, several are mentioned — the worker in wood, the worker in horn and ivory, the potter (who uses the wheel), and so on. The existence of others is implied — the weaver, the

mason, the metal-worker, etc.

If there were no special schools in the heroic age, life was so lived as to be an excellent school. Then, as at all other times, it was extremely social, far more so than our modern life. This was due chiefly to three causes, (1) the smallness of the states, which made it possible for every citizen to know, and to feel his solidarity with, every other, (2) the absence of titles and formalities, which had not yet been introduced from the East, (3) the fact that the people, especially the men, spent the greater part of the day in the open air, — in the streets and agora, — and so were continually rubbing against each other. This sociality had much to do with the shaping of the Greek character, the salient elements of which are thus enumerated by Zeller, the historian of Greek philosophy: “A strong sense of freedom, combined with a rare susceptibility to proportion, form, and order, a keen relish for companionship in life and action, a social tendency which compelled the individual to combine with others, to submit to the general will, to follow the traditions of his family and his community.”

Between the simple social condition described by Homer and that for which Aristotle wrote, there intervened a period of at least six hundred years. During that time many great changes took place in the social and political life of the Greeks, demanding corresponding changes in education. These changes were due to several causes, (1) the natural human tendency toward freedom, (2) the influence of foreign nations, (3) the development of commerce, (4) the introduction of letters, (5) the rise of philosophy, (6) the Persian Wars. Though all these are closely interwoven with each other, there can be no harm in treating them separately.

(1) The tendency toward freedom, so essentially characteristic of human nature, was especially so of the nature of the Greeks. Among them it rapidly manifested itself in an ordered series of political forms, beginning with patriarchalism, and ending variously in the various states and races. There is, indeed, hardly a single form of political life that was not realized among the Greeks at some time or place. It was this that made it possible for Aristotle to write a work on Politics which, in the words of a recent political writer, “has

remained for two thousand years one of the purest sources of political wisdom.”

The varied and changeful political life of the Greeks was in itself a great education. It made them aware of the principles, political and ethical, upon which society rests, and rendered necessary a faculty of clear and ready expression, which reacted most favorably upon their intellectual and æsthetic faculties. It was in the school of practical politics that the Greeks acquired their rhetoric; and Aristotle, in his treatise on Poetry, tells us that, while “the older poets made their characters talk like statesmen, the later ones made theirs talk like rhetoricians.” Not only, indeed, did political life react upon the drama, but, in developing rhetoric, it drew attention to language and led to the sciences of grammar and logic, both of which were thus called into existence by real social needs (see p. 102).

(2) Greece, lying, as it did, between three continents, and in the thoroughfare of the ancient nations, could hardly fail to be visited by many different races, or, considering its beauty and commercial advantages, to be coveted by them. From this followed two consequences, (*a*) that the Greeks were a very mixed race, (*b*) that they were, from the first and at all times, in manifold contact with foreign peoples. That they were a mixed race, is attested alike by their language, their mythology, and their legends. That they were in close and continual communication with foreign peoples, is rendered evident by their alphabet, their art, and the direct statements of their historians. Although it is true that the Greeks, especially after the Persian Wars, regarded themselves as a superior and chosen people, calling all others “barbarians,” and considering them as fit only to be slaves, it is not the less true that hardly one of all the arts and sciences which they ultimately carried to a high degree of perfection had its origin in Greece proper. All appear first in the colonies settled among “barbarians,” — in Egypt, Asia Minor, Thrace, Crete, Sicily, or Italy. Architecture, sculpture, painting, poetry — epic, lyric, dramatic — music, history, politics, philosophy, were all borrowed, transformed, and, with the exception perhaps of tragedy and painting, carried to a high degree of excellence in the colonies, before they were transplanted to the mother-country. It is beyond any doubt that even the Homeric legends are of “barbarian” origin, though from

what people they were borrowed is uncertain. It was the plasticity and versatility of their character, due in part to their mixed blood, that, by enabling them to appropriate and assimilate the arts and sciences of their neighbors, raised the Greeks to a new plane of civilization and made them the initiators of a new epoch in history, the epoch of life according to reason. Sir Henry Sumner Maine says, "Except the blind forces of Nature, nothing moves in this world which is not Greek in its origin."

(3) It was chiefly through commerce that the arts and sciences borrowed by the colonial Greeks found their way into Greece proper. That foreign art-objects were introduced into it at an early period, is rendered certain by the recent discoveries at Mycenæ, Sparta, and other places, as well as by statements in the Homeric poems. That these were followed later by artists, bringing with them foreign art-processes and appliances, is equally certain. The earliest sculptors whose names are known to us, Dipœnis and Scyllis, were natives of Crete, settled in Sicyon; and the earliest poetic guild of which we have any mention is that of the Homeridæ in the island of Chios. But, besides introducing art and artists into Greece, commerce tended to educate the Greeks in other ways. It made them acquainted with foreign manners and luxuries, and forced them to learn the arts of navigation, ship-building and exchange, which again rendered necessary an acquaintance with arithmetic and the art of writing. And this leads us to

(4) The Introduction of Letters. This event, the date of which is uncertain, not only exercised a most furthering influence on the arts and sciences, but gave rise to a new branch of education. Letters were probably first used for diplomatic and trade purposes, then for inscriptions, and last of all for the perpetuation of literary productions. So much of a change did they effect in Greek education that even in the best times the whole of the literary and scientific education was called simply "letters" (γράμματα). As late as the time of Plato letters seem to have been considered a part of Music, and to have been taught by the same teacher as the latter; but Aristotle already distinguishes the two. It is extremely probable that the introduction of letters was the immediate cause of the establishment of schools for youth; for we find no mention of them prior to that

event.

(5) The introduction of letters was closely followed by the rise of Philosophy, or the reflective spirit. Up to about the year 600 b.c., the Greeks, like the rest of the world, lived by habit, tradition, and prescription, handed on, with little or no criticism, from generation to generation. Their ideal world was shaped by the works of Homer and Hesiod. "Hesiod is the teacher of most," says Heraclitus. About the date named, however, society having advanced to a condition of organization which made possible a leisure class, there begins to appear a new spirit, destined to revolutionize, not only Greece, but the whole world. Armed with a *what?* a *which?* a *why?* and a *wherefore?* it no longer blindly accepts the world of nature and man, but calls upon it to give an account of itself. Science, philosophy, and art are the result.

At first the new spirit turns to nature with a *what?*; but, gradually discovering that the answer to this brings no complete explanation of the world, it propounds its other questions. It thus arrives at a consciousness of four distinguishable elements in the constitution of things, — four causes (αἴτια, αἰτίαι), as they were termed, — (1) matter, (2) form, (3) efficiency, (4) end or aim. At the same time, and by the same process, it is forced to a recognition of the presence of reason (λόγος) and intelligence (νοῦς) in the world, since form, efficiency, and aim all presuppose both. It is thus compelled to turn from nature to man, and man's mind, as the highest known expression of reason and intelligence, and to devote itself to the consideration of spirit, as alone promising any true explanation of the world. The process is a slow and difficult one, and the history of it is the history of Greek science, philosophy, and art.

Before the rise of philosophy, the teacher of the people had been the rhapsode, or public reciter; after that event he gradually gives place to the sophist (σοφιστής, one who makes wise), or, as he later with more modesty calls himself, the philosopher (φιλόσοφος, lover of wisdom). The history of Greece for centuries is, on its inner side, a history of the struggle between what the rhapsode represents and what the philosopher represents, between popular tradition and common sense on the one hand, and individual opinion and philosophy on the other. The transition from the first to the second of

these mental conditions was accomplished for the world, once for all, by the Greeks, and the turning-point in the process is marked by

(6) The Persian Wars (b.c. 490-479). The victories gained in these at Marathon, Salamis, and Plataeæ, victories the most brilliant that history records, exerted a most powerful influence upon the thought and life of the Greeks. The consciousness of having, with their small numbers, over and over again, both by land and by sea, discomfited and crushed the countless hosts of an empire which for generations had threatened their peace and liberty, made them at once feel the superiority of their own characters and civil institutions to those of the Persians, and draw a clear line of demarcation between Greek and barbarian. From this point on, they felt themselves to be a chosen people, a nation destined by the gods to rule all others. "The soul of Greece had conquered the bulk of Persia." Persia was bulk and body; Greece was soul and spirit. This conviction appears at once in all the departments of Greek life. In the sphere of art we may instance the *Prometheia* of Æschylus and the Parthenon. In the former, what does the conflict between Zeus and Prometheus mean but the conflict between Greek spirituality, intellect, and freedom, on the one hand, and barbarian materiality, instinct, and thralldom or necessity, on the other? And what is the latter but a matchless pæan in stone to Divine Wisdom, as the conqueror of brute force? In the sphere of thought, we find Parmenides, Anaxagoras and, above all, Socrates (born ten years after the second Persian War), turning consciously to the study of spirit. "To be and to think are the same thing," says the first of these: "All things were confused; then Mind came and reduced them to order," says the second; "Know thyself" is the chosen motto of the third. In the political sphere we find the Athenians trying to make the State an instrument of intelligence and virtue, and insisting upon education as a means thereto. Other and less desirable results followed from the Persian Wars; but these can be better stated and estimated in another connection.

Such were the chief causes that contributed to transform the simple patriarchal State of the Homeric Greeks, with its purely practical education at home and in the field, into the free polity of the Greeks of the days of Miltiades, Themistocles, and Æschylus, with

its complicated institutions and manifold education. It has seemed better to enumerate these causes than to try to trace the steps of the transformation itself. Indeed this would have been a hopeless task, owing to the lack of historical data.

CHAPTER VI

EPOCHS IN GREEK EDUCATION

When they (our ancestors) began to enjoy leisure for thought, as the result of easy circumstances, and to cherish more exalted ideas with respect to worth, and especially when, in the period before and after the Persian Wars, they came to entertain a high opinion of themselves, on account of their achievements, they pursued all kinds of education, making no distinction, but beating about generally. — Aristotle.

In treating of Greek education subsequent to the introduction of letters and the establishment of schools, we shall be obliged, in the interest of clearness, to make three distinctions: —

(1) Between the educational systems of different periods.

(2) Between the educational systems of different peoples and states.

(3) Between the education actually imparted in the various states, and that recommended by theorists or philosophers.

In pursuance of the first, it will be convenient first to distinguish two main periods, the Hellenic, and the Hellenistic, and then to subdivide these into minor periods.

I. *The Hellenic Period (776-338 b.c.).* This includes, roughly speaking, the whole historic life of free Greece, from the date of the first Olympiad to that of the absorption of Greece into the Macedonian Empire. It naturally subdivides itself into two periods,
(a) 776-450; (b) 450-338.

(a) That of the “Old Education,” authoritative and puritanical, whose aim was the training of good citizens, god-fearing, law-abiding, patriotic, and brave.

(b) That of the “New Education,” rationalistic and “liberal,” whose aim was the training of formidable individuals, self-centred, law-despising, time-serving, and cunning.

It is in the struggle between the two systems, and in the practical

triumph of the latter, that Greece loses her moral fibre; so that her citizens, weakened through sundering selfishness, fall an easy prey to the foreign invader.

II. *The Hellenistic Period (338 b.c.-313 a.d.)*. This extends from the Battle of Chæronea, in which Greece lost her independence, to the definitive triumph of Christianity, which brought a new ideal and a new spirit into life and education. It naturally subdivides itself into two periods, (a) b.c. 338-146; (b) b.c. 146-a.d. 313.

(a) The Macedonian Period, during which Macedonian influence prevailed, and Greek thought and education, absorbing foreign, chiefly Oriental, elements, tended toward an encyclopædic cosmopolitanism. During this period, Alexandria is the centre of Greek influence.

(b) The Roman Period, during which, as Horace says, "Captive Greece took captive her rude conqueror," and Rome became, alongside Alexandria, a diffusive centre of Greek thought, art, and education.

Between the two great periods, the Hellenic and the Hellenistic, stands the man who draws up the testament of the former and outlines the programme of the latter, the Macedonian Greek, Aristotle.

Our second distinction will lead us to treat separately, in the Hellenic period, the educational system of the three Greek races, (1) the Æolic, (2) the Doric, (3) the Ionic, the first having its chief centre at Thebes, the second at Sparta, the third at Athens. For an account of the education of the first our data are but meagre; with the main features of Spartan and Athenian education we are well acquainted. In education, as in everything, Sparta was conservative, socialistic, and aristocratic, while Athens tended to liberalism, individualism, and democracy. Hence Sparta clung desperately to the "Old Education," and almost closed her doors against art, letters, and philosophy, while Athens, dragged into the "New Education," became the home of all these. It must always be borne in mind that, in favoring individualism and the "New Education," Athens was abandoning the Hellenic ideal, and paving the way for the

cosmopolitanism of the Hellenistic period. In this latter, we shall have to distinguish between the educational systems of Athens, Alexandria, and Rome.

Our third distinction is that between individual theory and popular practice. In all epochs of their history the Greek states produced men who strove to realize in thought and imagination the ideal of their people, and to exhibit it as an aim, an encouragement, and an inspiration, in contrast with the imperfect actual. In more than one case this ideal modified the education of the following periods. Of course, such theories did not arise until practice was compelled to defend itself by producing sanctions, either in religion or in reason, and it may perhaps be affirmed that the aim of them all was to discover such sanctions for the Greek ideal. Among the many educational theorists of Greece, there are six who especially deserve to be considered: (1) Pythagoras, who in Southern Italy sought to graft on the Doric ideal a half-mystical, half-ethical theology, and a mathematical theory of the physical world; (2) Xenophon, who sought to secure the same ideal by connecting it with a monarchical form of government; (3) Plato, who sought to elevate it, and find a sanction for it in his theory of super-sensuous ideas; (4) Aristotle, who presented in all its fulness the Hellenic ideal, and sought to find sanctions for it in history, social well-being, and the promise of a higher life; (5) Quintilian, who, in Rome, embodies the rhetorical or worldly education of the Hellenistic period; and (6) Plotinus, who presents an ideal of philosophical or other-worldly education, and paves the way for the triumph of Christian dogma.

CHAPTER I

EDUCATION FOR WORK AND FOR LEISURE

When we consider the different arts that have been discovered, and distinguish between those which relate to the necessary conditions of life and those which contribute to the free enjoyment of it (διαγωγή), we always consider the man who is acquainted with the latter wiser than him who is acquainted with the former, for the reason that the sciences of the latter have no reference to use. Hence it was only when all the necessary conditions of life had been attained that those arts were discovered which have no reference either to pleasure or to the common needs of life; and this took place first in those countries where men enjoyed leisure. — Aristotle.

The free life of God is such as are our brief best moments. — *Id.*

It is not fitting that the free enjoyment of life should be permitted to boys or to young persons; for the crown of perfection belongs not to the imperfect. — *Id.*

Obviously, the free enjoyment of life demands not only the noble but also the pleasant; for happiness consists of these too. — *Id.*

Among the Homeric Greeks, whose life was almost entirely devoted to practical pursuits, education was mainly practical, aiming to produce “a speaker of words and a doer of deeds.” As civilization advanced, and higher political forms were evolved, certain classes of men found themselves blessed with leisure which they were not inclined to devote to mere play. In order to make a worthy use of this leisure, they required a certain training in those arts which were regarded as befitting a free man. Education, accordingly, in some states, widened its scope, to include those accomplishments, which enable men to fill their hours of freedom with refined and gracious enjoyment — music and letters. Music, indeed, had been cultivated long before, not only by professional bards, but even by princes, like Achilles and Paris; this, however, was for the sake of amusement and recreation rather than of the free enjoyment of life. It had been regarded as a means, not as an end. We must be careful, in our study of Greek life and education, not to confound play and recreation,

which are for the sake of work, with the free enjoyment of life, which is an end in itself, and to which all work is but a means. "Enjoyment is the end." We shall see, as we proceed, to what momentous results this distinction leads, how it governs not only all education but all the institutions of life, and how it finally contributes to break up the whole civilization which it determines. It may fairly be said that Greece perished because she placed the end of life in individual æsthetic enjoyment, possible only for a few and regarding only the few.

In historic Greece, music came to be an essential part of the education of every free man. Even free women learnt it. Along with music went poetry, and when this came to be written down, it was termed "letters." As every free man came to be his own minstrel and his own rhapsode, the professional minstrel and rhapsode disappeared, and the Homeric poems even, in order to be preserved from oblivion, were committed to writing by an enlightened tyrant — Pisistratus.

The first portion of the Greek people that attained a degree of civilization demanding an education for hours of leisure, was the Æolian race, and particularly the Asiatic portion of it. Accordingly we find that all the earliest musicians and poets, didactic and lyric, are Æolians — Hesiod, Terpander, Arion, Alcæus, Sappho, Pittacus, etc. Lesbos seems to have taken the lead in this "higher education." The last five names all belong to that island, which produced also the earliest Greek historian and prose-writer — Hellanicus. But the Æolians, though earliest in the field, were soon outstripped by the other two races, the Doric and the Ionic. Æolian education and culture never advanced beyond music and lyric poetry. It knew no drama, science, or philosophy.

The Æolians were followed, almost simultaneously, by the Dorians and Ionians, who pursued two widely divergent directions. The former borrowed the lyric education and culture of the Æolians, and produced several lyric poets of distinguished merit — Tyrtæus, Alcman, Ibycus, Stesichorus: nay, they even advanced far enough to take the first steps in science, philosophy, and dramatic poetry. Pythagoras, Epicharmus, Sophron, Xenarchus, and Susarion were all Dorians. But the progress of the race was retarded and finally

checked by rigid political institutions of a socialistic character, which, by suppressing individual initiative, reduced the whole to immobility.

The Ionians, on the contrary, borrowing freely from both Æolians and Dorians, and evolving ever freer and freer institutions, carried education and culture to a point which has never been passed, and rarely, if ever, reached, in the history of our race. And when they ceased to grow, and decay set in, this was due to exactly the opposite cause to that which stunted them among the Dorians; namely, to excessive individualism, misnamed liberty. Individualism ruined Athens.

Although education assumed different forms among different portions of the Greek race, there are certain features that seem to have been common to all these forms during the epoch of the "Old Education." Two of these deserve attention.

First. Education was everywhere a branch of statecraft, and the State itself was only the highest educational institution. This was equally true whether the schools were public, as at Sparta, or private, as at Athens. Everywhere citizenship was a degree, conferred only upon sons of free citizens, after a satisfactory examination (δοκιμασία).

Second. The stages or grades of education were everywhere the same, although their limits were not everywhere marked by the same number of years. The first, extending usually from birth to the end of the seventh year, was that of home education; the second, extending from the beginning of the eighth year to the end of the sixteenth or, perhaps oftener, the eighteenth year, was that of school education; the third, extending from the beginning of the seventeenth or nineteenth year to the end of the twentieth (in Sparta of the thirtieth), was that of college education, or education for the duties of citizenship; the fourth, including the remainder of life, was that of university education, or education through the State, which then was the only university. At the beginning of the third period, the young men took their first State examination, and if they passed it successfully, they received the degree of Cadet or Citizen-novice (ἐφηβοϛ); but it was only at the beginning of the fourth period, and after they had passed a second examination (δοκιμασία εἰς ἄνδρας), that they received the

degree of Man and Citizen and were permitted to exercise all the functions of freemen. The State then became, in a very real sense, their *Alma Mater*.

In most states, this graded education fell only to the lot of males, the education of females stopping short with the first grade, the family, which was regarded as their only sphere. It was otherwise at Sparta, Teos, and apparently among the Æolians generally. As a consequence it is only among the Æolians and Dorians that any poetesses of note appear — Sappho, Corinna, Telesilla, etc. Although, however, woman's sphere was the family, and she was considered to have done her duty when she worthily filled the place of wife, mother, and mistress, there was nothing to prevent her from acquiring the higher education, if she chose to do so. That she did not often so choose, seems true; still there are examples of learned women even among the Athenians. The daughter of Thucydides is said to have continued his history after his death, and, whether the statement be true or not, the fact that it was made shows that the ability to write history was not regarded as impossible or surprising in a woman.

CHAPTER II

ÆOLIAN OR THEBAN EDUCATION

Hesiod is the teacher of most. — Heraclitus.

When thou art dead, thou shalt lie in the earth.
Not even the memory of thee shall be
Thenceforward nor forever; for thou hast
No share in the Pierian roses; but
Ev'n in the halls of Hades thou shalt flit,
A frightened shadow, with the shadowy dead.
— Sappho (*to an uneducated woman*).

What rustic hoyden ever charms the soul,
That round her ankles cannot kilt her coats? — *Id.*

The Æolians appear to have been the earliest of the Greek races to make any considerable advance in culture. Their claim to Homer can hardly be sustained; but they certainly produced Hesiod, most of the greater lyric poets and poetesses, and the first historian. For a time they bade fair to lead the culture of Greece. But the promise was not fulfilled. During the palmy period of Greek history, they were not only the most uncultured and uncouth of the Greeks, but they even prided themselves upon their boorishness of speech and manner, and derided culture. In the glorious struggle in which Greece maintained the cause of culture and freedom against Persia, Thebes, then the chief centre of Æolianism, sided with the barbarian, as, indeed, was natural.

Theban education was, of course, a reflex of the character of the Theban and, indeed, of the Bœotian, people. Its main divisions were those of Greek education generally, — Gymnastics and Music; but the former was learnt solely for athletic purposes, and the latter mainly for use at banquets and drinking-bouts, in which the Bœotians found their chief delight. Letters were studied as little as at Sparta (see p. 47), and the language of the people remained harsh and

unmusical. Of higher education there was hardly a trace. The sophists passed Bœotia by. Even Pindar, who was by birth a Theban, and a sincerely patriotic one, sought and found recognition anywhere rather than among his own people. He did not even write in their dialect.

The reason for this backwardness on the part of the Bœotian Æolians lay in the fact that they lived, as a conquering race, in the midst of a people superior to them in every respect save strength, and could maintain their ascendancy only by brute force. When this failed, and the conquered race, which had never forgotten Cadmus and its ancient traditions, came to the front, education and culture found their way even to Thebes. It was due to this change in political conditions that a Pindar could arise, and it was doubtless the demand for culture consequent thereupon that induced certain members of the scattered Pythagorean school (see p. 54) to seek refuge in Thebes and there devote themselves to teaching. Among these were Philolaus and Lysis, the latter of whom was probably the author of the famous "Golden Words" (see p. 57). But he has a better claim to fame than this; for he was the teacher of the bravest and most lovable man that Greece ever produced — Epaminondas.

If any enthusiastic believer in the power of education desire to fortify his cause by means of a brilliant example, he will find none superior to Epaminondas; for there can hardly be any question that it was the earnest, systematic, religious, and moral Pythagorean training which he received from the aged Lysis, whom he treated as a father, that made him what he was, and enabled him to do what he did, — which was nothing less than to place Thebes at the head of Greece. Thebes rose and fell with Epaminondas. But that was not all. It was the example of Epaminondas that kindled the ambition of Philip of Macedon, who was educated under his eye, and of his far more famous son, Alexander, who made all Greece a province of his empire. Pythagoras, Lysis, Epaminondas, Philip, Alexander — in five brief generations an earnest teacher conquers a world!

From the time of Epaminondas on, Thebes followed the ordinary course of Greek education.

CHAPTER III

DORIAN OR SPARTAN EDUCATION

Go, tell at Sparta, thou that passest by,
That here, obedient to her laws, we lie.

— Simonides (*Epitaph on the Three Hundred who fell at Thermopylæ*).

This is a matter for which the Lacedæmonians deserve approbation: they are extremely solicitous about the education of their youth and make it a public function. — Aristotle.

The Lacedæmonians impart to their children the look of wild beasts, through the severity of the exercises to which they subject them, their notion being that such training is especially calculated to heighten courage. — *Id.*

These are so far behind in education and philosophy that they do not learn even letters. — Isocrates.

Old Men. We *were* once strong men (youths).

Men. And we *are*; if you will, behold.

Boys. And we *shall be* far superior. — *Spartan Choric Anthem.*

They asked no clarion's voice to fire
Their souls with an impulse high:
But the Dorian reed and the Spartan lyre
For the sons of liberty!
So moved they calmly to their field,
Thence never to return,
Save bearing back the Spartan shield,
Or on it proudly borne! — Hemans.

There was a law that the cadets should present themselves naked in public before the ephors every ten days; and, if they were well knit and strong, and looked as if they had been carved and hammered into shape by gymnastics, they were praised; but if their limbs showed any flabbiness or softness, any little swelling or suspicion of adipose

matter due to laziness, they were flogged and justiced there and then. The ephors, moreover, subjected their clothing every day to a strict examination, to see that everything was up to the mark. No cooks were permitted in Lacedæmon but flesh-cooks. A cook who knew anything else was driven out of Sparta, as physic for invalids. — Ælian.

Every rational system of education is determined by some aim or ideal more or less consciously set up. That of the Dorians, and particularly of the Spartans, may be expressed in one word — Strength, which, in the individual, took the form of physical endurance, in the State, that of self-sufficiency (αὐτάρκεια). A self-sufficient State, furnishing a field for all the activities and aspirations of all its citizens, and demanding their strongest and most devoted exertions — such is the Dorian ideal. It is easy to see what virtues Dorian education would seek to develop — physical strength, bravery, and obedience to the laws of the State. Among the Dorians the human being is entirely absorbed in the citizen. The State is all in all.

The Dorian ideal realized itself chiefly in two places, Crete and Sparta. Both these were repeatedly held up in ancient times as models of well-governed states, and even Plato puts the substance of his *Laws* into the mouth of a Cretan.

About the details of Cretan education we are but poorly informed. Two things, however, we know: (1) that Lycurgus, the reputed founder of Spartan education, was held to have drawn many of his ideas from Crete, and (2) that the final result of Cretan education — and the same is true of all education that merges the man in the citizen — was, in spite of its strictness, demoralizing. The character of the people was summed up by their poet Epimenides, a contemporary of Solon's, in a famous line quoted by St. Paul, "The Cretans are always liars, evil beasts, lazy bellies."

With regard to Spartan education our information is much greater, and we may therefore select it as the type of Dorian education generally.

The Peloponnesian Dorians having, through contact with the more civilized peoples whom they conquered, lost much of that rigorous discipline and unquestioning loyalty which made them formidable,

were, in the ninth century b.c., becoming disorganized, so that in two of the Dorian states they were assimilated by the native population, the Argives and the Messenians. The same process was rapidly going on in the third state, Lacedæmon, when Lycurgus, fired with patriotic zeal, resolved to put an end to it, by restoring among his people the old Dorian military discipline. To prepare himself for this task, he visited Crete and studied its institutions. On his return he persuaded his countrymen to submit to a "Constitution," which ever afterwards went by his name. This constitution included a scheme of education, whose aim was a thorough training of the whole of the free citizens, both male and female, (1) in physical endurance, and (2) in complete subordination to the State. The former was sought to be imparted by means of a rigorous and often cruel, system of gymnastics; the latter, through choric music and dancing, including military drill. Spartan education, therefore, was confined to two branches, Gymnastics and Music. Instruction in letters was confined to the merest elements. Sparta accordingly never produced a poet, an historian, an artist, or a philosopher of any note. Even the arrangers of her choruses were foreigners — Tyrtæus, Terpander, Arion, Alcman, Thaletas, Stesichorus.

As Spartan education was nothing more or less than a training for Spartan citizenship, we must preface our account of it by a few words on the Spartan State.

The government of Sparta was in the hands of a closed aristocracy, whose sole aim was the maintenance of its own supremacy, as against (1) foreign enemies, (2) *Perioikoi*, or disfranchised native citizens, (3) Helots, or native serfs. To secure this, it formed itself into a standing army, with a strict military organization. Sparta, its one abode, was a camp; all free inhabitants were soldiers. Though they were compelled to marry, the city contained no homes. The men and, from the close of their seventh year, the boys, lived in barracks and ate at public tables (*Phiditia*). The women had but one recognized function, that of furnishing the State with citizens, and were educated solely with a view to this. No other virtue was expected of them. Aristotle tells us that "they lived in every kind of profligacy and in luxury." Polyandry was common, and, when a woman lost all her husbands, she was often compelled to

enter into relations with slaves, in order that she might not fail in her political duty.

Among a people organized on the basis of brute force, it were vain to look for any of the finer traits of human nature — gentleness, tenderness, sympathy, pity, mercy. The mercilessness and cruelty of the Spartans were proverbial. Perioikoi and Helots incurring the displeasure or suspicion of the authorities were secretly put to death, without even the form of a trial. A striking instance of such cruelty is recorded by Thucydides. The facts are thus stated by Grote (*History of Greece*, vol. ii, pp. 376-7): “It was in the eighth year of the Peloponnesian War, after the Helots had been called upon for signal military efforts in various ways, ... that the ephors felt especially apprehensive of an outbreak. Anxious to single out the most forward and daring Helots, as men from whom they had most to dread, they issued proclamation that every member of that class who had rendered distinguished services should make his claim known at Sparta, promising liberty to the most deserving. A large number of Helots came forward to claim the boon: not less than two thousand of them were approved, formally manumitted, and led in solemn procession round the temples, with garlands on their heads, as an inauguration to their coming life of freedom. But the treacherous garland only marked them out as victims for sacrifice: every man of them forthwith disappeared; the manner of their death was an untold mystery.”

Spartan education was entirely conducted by the State, at the expense of the State, and for the ends of the State. It differed in this respect from nearly every other system of Greek education. It was divided into four periods, corresponding respectively to childhood, boyhood, youth, and manhood.

(a) Childhood. — As soon as the Spartan child came into the world, the State, through officers appointed for that purpose, sent to examine it. If it seemed vigorous, and showed no bodily defect, it was permitted to live, and forthwith adopted by the State; otherwise it was carried to the mountains and thrown over a precipice. The children accepted by the State were for the next seven years left in charge of their mothers, but, doubtless, still under State surveillance. Just how they were trained during these years, we do not know. We

can only guess that they underwent very much the same process as other Greek children, any difference being in the direction of rigor. As the details of Greek education generally will be dealt with under the head of Athens, they may be omitted here.

(b) Boyhood. — On completing his seventh year, the Spartan boy was transferred from his mother's house and care to a public barracks and the direct tuition of the State. Although the boys were in charge of a special officer (παιδονόμος), who divided them into squads and companies, and arranged their exercises for them, they were nevertheless taught to regard every grown man as a teacher, and every such man was expected to correct them promptly and rigorously, whenever he saw them doing wrong. At the same time, every boy was expected to form an intimate connection with some one man, who then, to a large extent, became responsible for his conduct; and, though the choice in this matter rested with the parties concerned, it was considered a disgrace in a man, no less than in a boy, to be without such connection. Though this arrangement, it is said, often led to lamentable abuses, there can be no doubt that it admirably served the purposes of Sparta. It furnished every boy with a tutor, who, under the circumstances, could hardly fail to treat him kindly, and who was interested in making him surpass all other boys in courage and endurance. This friendly influence of teacher on pupil was something in which the Greeks at all times strongly believed, and which formed an important force in all their education. In Sparta, as in Crete and Thebes, it was legally recognized. One of the duties of Spartan "inspirer" (εἰσπνήλας or εἰσπνηλος), as he was called, was to teach his young friend (ἄιτας) to demean himself properly on all occasions, and to hold his tongue except when he had something very important to say. In this way it was that the young Spartans received their moral education, and acquired that effective brevity of speech which to this day we call "laconic."

The formal education of Spartan boys consisted mainly of gymnastics, music, choric dancing, and larceny. Their literary education was confined to a little reading, writing, and finger-arithmetic; everything beyond this was proscribed. And the reasons for this proscription are not difficult to discover. Sparta staked everything upon her political strength, and this involved two things,

(1) equality among her free citizens, and (2) absolute devotion on their part to her interest, both of which the higher education would have rendered impossible. Education establishes among men distinctions of worth quite other than military, and gives them individual interests distinct from those of the State. It was the same reason that induced Rome, during the best period of her history, to exclude her citizens from all higher education, which is essentially individual and cosmopolitan.

The education of the Spartan boys was conducted mostly in the open air and in public, so that they were continually exposed to the cheers or scoffs of critical spectators, to whom their performances were a continual amusement of the nature of a cock-fight. Whether the different “inspirers” betted on their own boys may be doubtful; but they certainly used every effort to make them win in any and every contest, and the “inspirer” of a “winning” boy was an envied man. The result was that many boys lost their lives amid cheers, rather than incur the disgrace of being beaten. Inasmuch as the sole purpose of gymnastics was strength and endurance; of dancing, order; and of music, martial inspiration, it is easy to see what forms these studies necessarily assumed; and we need only stop to remark that Dorian music received the unqualified approbation of all the great educational writers of antiquity, — even of Aristotle, who had only words of condemnation for Spartan gymnastics.

There was only one branch of Spartan school-education that was not conducted in public, and that was larceny. The purpose of this curious discipline was to enable its subjects to act, on occasion, as detectives and assassins among the ever discontented and rebellious Helots. How successful it was, may be judged from the incident recorded on page 45. Larceny, when successfully carried out under difficult circumstances, was applauded; when discovered, it was severely punished. A story is told of a boy who, rather than betray himself, allowed a stolen fox, concealed under his clothes, to eat out his entrails.

In one respect Spartan education may claim superiority over that of most other Greek states: it was not confined to one sex. Spartan girls, though apparently permitted to live at home, were subjected to a course of training differing from that of their brothers only in being

less severe. They had their own exercise-grounds, on which they learnt to leap, run, cast the javelin, throw the discus, play ball, wrestle, dance, and sing; and there is good evidence to show that their exercises had an admirable effect upon their physical constitution. That the breezy daughters of Sparta were handsomer and more attractive than the hot-house maidens of Athens, is a well-attested fact. Many Spartan women continued their athletic and musical exercises into ripe womanhood, learning even to ride spirited horses and drive chariots. If we may believe Aristotle, however, the effect of all this training upon their moral nature was anything but desirable. They were neither virtuous nor brave.

(c) Youth. — About the age of eighteen, Spartan boys passed into the class of *epheboi*, or cadets, and began their professional training for war. This was their business for the next twelve years, and no light business it was. For the first two years they were called *melleirenes*, and devoted themselves to learning the use of arms, and to light skirmishing. They were under the charge of special officers called *bideoi*, but had to undergo a rigid examination before the ephors every ten days (see p. 41). Their endurance was put to severe tests. Speaking of the altar of Artemis Orthia, Pausanias says: "An oracle commanded the people to imbrue the altar with human blood, and hence arose the custom of sacrificing on it a man chosen by lot. Lycurgus did away with this practice, and ordained that, instead, the cadets should be scourged before the altar, and thus the altar is covered with blood. While this is going on, a priestess stands by, holding, in her arms the wooden image (of Artemis). This image, being small, is, under ordinary circumstances, light; but, if at any time the scourgers deal too lightly with any youth, on account of his beauty or his rank, then the image becomes so heavy that the priestess cannot support it; whereupon she reproves the scourgers, and declares that she is burdened on their account. Thus the image that came from the sacrifices in the Crimea has always continued to enjoy human blood." This Artemis appears, with a bundle of twigs in her arm, next to Ares, among the Spartan divinities, on the frieze of the Parthenon. At twenty years of age, the young men became *eirenes*, and entered upon a course of study closely resembling actual warfare. They lived on the coarsest food, slept on reeds, and rarely

bathed or walked. They exercised themselves in heavy arms, in shooting, riding, swimming, ball-playing, and in conflicts of the most brutal kind. They took part in complicated and exhausting dances, the most famous of which was the Pyrrhic, danced under arms. They manned fortresses, assassinated Helots, and, in cases of need, even took the field against an enemy.

(*d*) Manhood. — At the age of thirty, being supposed to have reached their majority, they fell into the ranks of full citizens, and took their share in all political functions. They were compelled to marry, but were allowed to visit their wives only rarely and by stealth. They sometimes had two or three children before they had ever seen their wives by daylight. When not engaged in actual war, they spent much of their time in watching the exercises of their juniors, and the rest in hunting wild boars and similar game in the mountains. Like Xenophon, they thought hunting the nearest approach to war.

Such was the education that Sparta gave her sons. That it produced strong warriors and patriotic citizens, there can be no doubt. But that is all: it produced no men. It was greatly admired by men like Xenophon and Plato, who were sick of Athenian democracy; but Aristotle estimated it at its true worth. He says: "As long as the Laconians were the only people who devoted themselves to violent exercises, they were superior to all others; but now they are inferior even in gymnastic contests and in war. Their former superiority, indeed, was not due to their training their young men in this way, but to the fact that they alone did so." And even Xenophon, at the end of a long panegyric on the Spartan constitution, is obliged to admit that already in his time it has fallen from its old worth into feebleness and corruption, and this in spite of the fact that he had his own sons educated at Sparta. When Sparta fell before the heroic and cultured Epaminondas, she fell unpitied, leaving to the world little or nothing but a warning example.

CHAPTER IV

PYTHAGORAS

Virtue and health and all good and God are a harmony. — Pythagoras.

One is the principle of all. — Philolaus the Pythagorean.

All things that are known have number. — *Id.*

The principles of all virtue are three, knowledge, power, and choice. Knowledge is like sight, whereby we contemplate and judge things; power is like bodily strength, whereby we endure and adhere to things; choice is like hands to the soul, whereby we stretch out and lay hold of things. — Theages the Pythagorean.

The Doric discipline, even in Sparta, where it could exhibit its character most freely, produced merely soldiers and not free citizens or cultivated men. It was, nevertheless, in its essential features, the Hellenic ideal, and numerous attempts were made to remedy its defects and to give it permanence, by connecting it with higher than mere local and aristocratic interests. One of the earliest and most noteworthy of these was made by Pythagoras.

This extraordinary personage appears to have been born in the island of Samos in the first quarter of the sixth century b.c. Though he was born among Ionians, his family appears to have been Achaian and, to some extent, Pelasgian (Tyrrhenian), having emigrated from Phlius in the Argolid. After distinguishing himself in Ionia, he emigrated in middle life to Magna Græcia, and took up his abode in the Achaian colony of Croton, then a rich and flourishing city. The cause of his emigration seems to have been the tyranny of Polycrates, which apparently imparted to him a prejudice against Ionic tendencies in general. Whether he derived any part of his famous learning from visits to Egypt, Phœnicia, Babylonia, etc., as was asserted in later times, is not clear. It is not improbable that he visited Egypt, and there is good reason for believing that he became acquainted with Phœnician theology through Pherecydes of Syros. That he was an omnivorous student is attested by his contemporary, Heraclitus. He was undoubtedly affected by the physical theories

current in his time in Ionia, while he plainly drew his political and ethical ideas from Sparta or Crete.

Of his activity in Ionia we know little; but we may perhaps conclude that it was of the same nature as that which he afterwards displayed in Italy. Here he appeared in the triple capacity of theologian, ethical teacher, and scientist. His chief interest for us lies in the fact that he was apparently the first man in Greece, and, indeed, in the western world, who sought to establish an ethical institution apart from the State. In this respect he bears a strong resemblance to the prophet Isaiah, who may be said to have originated the idea of a Church (see p. 133). Pythagoras' aim seems to have been to gather round him a body of disciples who should endeavor to lead a perfect life, based upon certain theological or metaphysical notions, and guided by a rule of almost monastic strictness. Like other men who have found themselves in the midst of irreverence, selfishness, and democratic vulgarity and anarchy, he believed that his time demanded moral discipline, based upon respect for authority and character, with a firm belief in future retribution, and inculcated by a careful study of the order and harmony of nature; and such discipline he strove, with all his might, to impart. Having no faith in the capacity of the State to be an instrument for his purpose, he set to work independently of it, and seems to have met with very marked success, drawing to him many of the best men and women of Southern Italy. So numerous and powerful, indeed, did his followers become that they held the balance of power in several cities, and were able to use it for the enforcement of their own principles. As these were exceedingly undemocratic, and opposed to the tendencies of the time, they finally roused bitter opposition, so that the Pythagoreans were persecuted and attempts made to exterminate them with fire and sword. In this way their political influence was broken, and their assemblies suppressed; but the effect of Pythagoras' teaching was not lost. His followers, scattered abroad throughout the Hellenic world, carried his precepts and his life-ideal with them. In the following centuries they found many noble sympathizers — Pindar, Socrates, Plato, Epicharmus, etc. — and underwent many modifications, until they finally witnessed a resurrection, in the forms of Neo-Pythagoreanism and Neo-

Platonism, after the Christian era. In these later guises, Pythagoreanism lost itself in mysticism and contemplation, turning its followers into inactive ascetics; but in its original form it seems to have been especially adapted to produce men of vigorous action and far-sighted practicality. Milo of Croton, the inimitable wrestler; Archytas of Tarentum, philosopher, mathematician, musician, inventor, engineer, general, statesman; and Epaminondas, the greatest and noblest of Theban generals, were professed Pythagoreans.

We might perhaps express the aim of Pythagoras' pedagogical efforts by the one word Harmony. Just as he found harmony everywhere in the physical world, so he strove to introduce the same into the constitution of the human individual, and into the relations of individuals with each other. He may perhaps be regarded as the originator of that view of the world, of men, and of society which makes all good consist in order and proportion, a view which recommends itself strongly to idealists, and has given birth to all those social Utopias, whose static perfection seems to relieve the individual from the burden of responsibility, and which have been dangled before the eyes of struggling humanity from his days to ours. According to this view, which had its roots in Greek thought generally, the aim of education is to find for each individual his true place and to make him efficient therein. Man is made for order, and not order for man. He is born into a world of order, as is shown by the fact that number and proportion are found in everything that is known. Pythagoras, in his enthusiasm for his principle, carried his doctrine of numbers to absurd lengths, identifying them with real things; but this enthusiasm was not without its valuable results, since it is to Pythagoras and his school that we owe the sciences of geometry and music. Moreover, experience must have taught him that it is one thing to propound a theory, another to make it effective in regulating human relations. In order to accomplish the latter object, he invoked the aid of divine authority and of the doctrines of metempsychosis and future retribution. Hence his educational system had a strong religious cast, which showed itself even outwardly in the dignified demeanor and quiet self-possession of his followers.

Harmony, then, to be attained by discipline, under religious sanctions, was the aim of Pythagoras' teaching. Believing, however,

that only a limited number of persons were capable of such harmony, he selected his pupils with great care, and subjected them to a long novitiate, in which silence, self-examination, and absolute obedience played a prominent part. The aim of this was to enable them to overcome impulse, concentrate attention, and develop reverence, reflection, and thoughtfulness, the first conditions of all moral and intellectual excellence. While the first care was directed to their spiritual part, their bodies were by no means forgotten. Food, clothing, and exercise were all carefully regulated on hygienic and moral principles.

Regarding the details of Pythagoras' educational system we are not well informed; but the spirit and tendency of it have been embalmed for us in the so-called *Golden Words*, which, if not due to the pen of Pythagoras himself, certainly reach back to very near his time, and contain nothing at variance with what we otherwise know of his teaching. We insert a literal version.

The Golden Words.

The Gods immortal, as by law disposed,
First venerate, and reverence the oath:
Then to the noble heroes, and the powers
Beneath the earth, do homage with just rites.

Thy parents honor and thy nearest kin,
And from the rest choose friends on virtue's scale.
To gentle words and kindly deeds give way,
Nor hate thy friend for any slight offence.
Bear all thou canst; for Can dwells nigh to Must.
These things thus know.

What follow learn to rule:
The belly first, then sleep and lust and wrath.
Do nothing base with others or alone:
But most of all thyself in reverence hold.

Then practise justice both in deed and word,
Nor let thyself wax thoughtless about aught:

But know that death's the common lot of all.

Be not untimely wasteful of thy wealth,
Like vulgar men, nor yet illiberal.
In all things moderation answers best.

Do things that profit thee: think ere thou act.

Let never sleep thy drowsy eyelids greet,
Till thou hast pondered each act of the day:
"Wherein have I transgressed? What have I done?
What duty shunned?" — beginning from the first,
Unto the last. Then grieve and fear for what
Was basely done; but in the good rejoice.

These things perform; these meditate; these love.
These in the path of godlike excellence
Will place thee, yea, by Him who gave our souls
The number Four, perennial nature's spring!
But, ere thou act, crave from the gods success.

These precepts having mastered, thou shalt know
The system of the never-dying gods
And dying men, and how from all the rest
Each thing is sunder'd, and how held in one:
And thou shalt know, as it is right thou shouldst,
That nature everywhere is uniform,
And so shalt neither hope for things that lie
Beyond all hope, nor fail of any truth.

But from such food abstain as we have named,
And, while thou seek'st to purge and free thy soul,
Use judgment, and reflect on everything,
Setting o'er all best Thought as charioteer.

Be glad to gather goods, nor less to lose.

Of human ills that spring from spirit-powers

Endure thy part nor peevishly complain.
Cure what thou canst: 'tis well, and then reflect:
"Fate never lays too much upon the good."

Words many, brave and base, assail men's ears.
Let these not disconcert or trammel thee;
But when untruth is spoken, meekly yield.

What next I say in every act observe:
Let none by word or deed prevail on thee
To do or say what were not best for thee.
Think ere thou act, lest foolish things be done; —
For thoughtless deeds and words the caitiff mark; —
But strongly do what will not bring regret.
Do naught thou dost not know; but duly learn.
So shall thy life with happiness o'erflow.

Be not neglectful of thy body's health;
But measure use in drink, food, exercise —
I mean by 'measure' what brings no distress.

Follow a cleanly, simple mode of life,
And guard against such acts as envy breed.
Then, if, when thou the body leav'st, thou mount
To the free ether, deathless shalt thou be,
A god immortal, — mortal never more!

In this system six things are noteworthy: (1) Its comprehensiveness, in that it takes account of man's whole nature, — body, soul, and spirit; affections, intellect, and will, and of all his relations — to gods and men, to self and nature: (2) Its aimfulness, in that it promises happiness here and blessedness hereafter, as the reward of right living: (3) Its piety, in that it everywhere recognizes the need of divine assistance: (4) Its appreciation of science, as insight into the nature and grounds of multiplicity and unity: (5) Its stress laid on right doing, as the condition of right knowing: (6) Its belief in man's divinity and perfectibility. It is curious that the poem

contains no reference to the doctrine of metempsychosis, which might apparently have been appealed to as a powerful moral sanction.

That a system like that of Pythagoras, combining the religious, the mystical, the scientific, the ethical, and the social tendencies of the Hellenic mind, should have exerted a deep and abiding influence, need not surprise us. We find profound traces of it, not only in all subsequent Greek thought, but even in foreign systems, such as Essenism, whose elements were Hebrew Nazarenism and Greek Pythagoreanism. The relations between Essenism and Christianity have not yet been determined. Of the effect of Pythagoras' teaching on Epaminondas I have already spoken.

CHAPTER V

IONIAN OR ATHENIAN EDUCATION

Let me now give an account of the Old Education, when I, uttering words of justice, was in my prime, and self-control was held in respect. In the first place, a child was not allowed to be heard uttering a grumble. Then all the boys of the quarter were obliged to march in a body, in an orderly way and with the scantest of clothing, along the streets to the music master's, and this they did even if it snowed like barley-groats. Then they were set to rehearse a song, without compressing their thighs, — either "Pallas, mighty city-stormer," or "A shout sounding far," putting energy into the melody which their fathers handed down. And, if any one attempted any fooling, or any of those trills like the difficult inflexions *à la* Phrynis now in vogue, he received a good threshing for his pains, as having insulted the Muses. Again, at the physical trainer's, the boys, while sitting, were obliged to keep their legs in front of them.... And at dinner they were not allowed to pick out the best radish-head, or to snatch away anise or celery from their elders, or to gourmandize on fish and field-fares, or to sit with their legs crossed.... Take courage, young man, and choose me, the Better Reason, and you shall know how to hate the public square, to avoid the bath-houses, to be ashamed of what is shameful, to show temper when any one addresses you in ribald language, to rise from your seat when your elders approach, and not to be a lubber to your own parents, or to do any other unseemly thing to mar the image of Modesty, or to rush to the house of the dancing-girl, and, while you are gaping at her performances, get struck with an apple by a wench and fall from your fair fame, or to talk back to your father, or, addressing him as Japhet, to revile the old age which made the nest for you.... Then, fresh and blooming, you will spend your time in the gymnasia, and not go about the public square, mouthing monstrous jokes, like the young men of to-day, or getting dragged into slippery, gumshon-bamboozling disputes, but, going down to the Academy, with some worthy companion of your own age, you will start a running-match, crowned with white reed,

smelling of smilax, leisure and deciduous white poplar, rejoicing in the spring, when the plane-tree whispers to the maple. If you do the things which I enjoin, and give your mind to them, you will always have a well-developed chest, a clear complexion, broad shoulders, and a short tongue. — Aristophanes, *Clouds* (*Speech of Right Reason*).

In their systems of education, some states strive to impart a courageous habit to their people from their very childhood by a painful and laborious training, whereas we, though living in a free and natural way, are ready to meet them in a fair field with no favor. — Pericles' *Funeral Oration* (*Thucydides*).

I will never disgrace these sacred arms, nor desert my companion in the ranks. I will fight for temples and public property, both alone and with many. I will transmit my fatherland, not only not less, but greater and better, than it was transmitted to me. I will obey the magistrates who may at any time be in power. I will observe both the existing laws and those which the people may unanimously hereafter make, and, if any person seek to annul the laws or to set them at nought, I will do my best to prevent him, and will defend them both alone and with many (all?). I will honor the religion of my fathers. And I call to witness Aglauros, Enyalios, Ares, Zeus, Thallo, Auxo, and Hegemone. — *Oath of the Athenian Epheboi*.

Consider, Men of Athens, what careful provision was made by Solon, the ancient lawgiver, by Draco, and other lawgivers of that period, for the cultivation of good morals. In the first place, they made laws to secure a moral education for our children, and laid down, in plain terms, just what the free-born boy should study and how he should be nurtured; secondly, they made regulations regarding young men; and, thirdly, with regard to the other periods of life in their order, including both private persons and public speakers; and, having recorded these laws, they left them in your keeping, appointing you their guardians. — Æschines (*against Timarchus*).

If systems of education are to be classified according to their results — and these are perhaps the fairest test — then the “Old Education” of Athens must be assigned a very high place. The character which she displayed, and the exploits which she performed, in the early decades of the fifth century b.c., bear unequivocal

testimony to the value of the training to which her citizens had previously been subjected. This training could perhaps hardly be better characterized than by the word "puritanical." The men who fought at Marathon, Salamis, and Plataeæ were puritans, trained, in a hard school, to fear the gods, to respect the laws, their neighbors, and themselves, to reverence the wisdom of experience, to despise comfort and vice, and to do honest work. They were not enfeebled by æsthetic culture, paralyzed by abstract thinking, or hardened by professional training. They were educated to be men, friends, and citizens, not to be mere thinkers, critics, soldiers, or money-makers. It was against a small band of such men that the hosts of Persia fought in vain.

It is natural that this "Old Education" of Athens should have a special interest for us, inasmuch as it seems, in great measure, to have solved the problem that must be uppermost with every true educator and friend of education, viz. How can strong, wise, and good men be produced? For this reason, as also because we are the better informed regarding the educational system of Athens than that of any other Greek state, it seems proper to devote special attention to it, treating it as preëminently Greek education. Indeed, whatever is permanently valuable in Greek education is to be found in that of Athens, other systems having mainly but an historical interest for us.

In comparing the education of Athens with that of Sparta, we are at once struck with two great distinctions: (1) While Spartan education is public, Athenian education is mainly private; (2) While Sparta educates for war, Athens educates for peace. As to the former of these, it is not a little remarkable that, while many of the first thinkers of Greece, including Plato and Aristotle, advocated an entirely public education, Athens never adopted it, or even took any steps in that direction. It seems as if the Athenians felt instinctively that socialistic education, by relieving parents of the responsibility of providing for the education of their own children, was removing a strong moral influence, undermining the family, and jeopardizing liberty. Perhaps the example of Sparta was not without its influence. No liberty-loving people, such as the Athenians were, would consent to merge the family in the State, or to sacrifice private life to public order. As to the second distinction, which was all-pervasive, it

divides the two peoples by an impassable gulf and assigns them to two different grades of civilization. And it was one of which both peoples were entirely conscious. While Sparta represented her ideal by a chained Ares, Athens found hers in a Wingless Victory, a form of Athena, the divinity of political and industrial wisdom. As the aim of Sparta was strength, so that of Athens was Wisdom — the wise man in the wise state. By the “wise man,” was meant he whose entire faculties of body, soul, and mind were proportionately and coördinately developed; by the “wise state,” that in which each class of the population performed its proper function, and occupied its proper relation toward the rest, and this without any excessive exercise of authority. If the Spartan, like the artificially tamed barbarian, submitted to living by rule and command, the Athenian, like the naturally civilized man, delighted to live in a free and natural way (ἀνειμένως διατῆσθαι) governed from within, and not from without. To make possible such life was the aim of Athenian education, which, instead of seeking to merge the man in the State, or to rend the two asunder, treated them as necessary correlates and strove to balance their claims.

The endeavor on the part of Athens to steer a middle course between socialism and individualism, is manifest in the fact that, though she had no public system of education, she took great care to see that her citizens were thoroughly educated in the spirit of her institutions, and, indeed, made such education a condition of citizenship, which was thus an academic degree, conferred only after careful examination. By a law of Solon's, parents who had failed to give their sons a proper education lost all claim upon them for support in their old age. Furthermore, Athens subjected all her male citizens to a systematic preparation for civil and military functions, before she allowed them to exercise these.

Athenian education comprised four grades corresponding to four institutions, (1) the family, (2) the school, (3) the gymnasium or college, (4) the State. We may consider these in their order.

(1) Family Education.

The birth of a child was regarded by the Athenians as a joyful event, as something calling for gratitude to the gods. This expressed itself in a family festival, called the Amphidromia, celebrated usually

on the seventh day after the birth. On this occasion, the child was carried rapidly round the family altar and received its name. A sacrifice was then offered to the gods, the mother was purified, and christening presents were displayed. The child was now a member of the family and under the protection of its gods. For the next seven years, it was wholly in the hands of parents and nurses, the latter being usually slaves. During this time its body was the chief object of care, and everything seems to have been done to render it healthy and hardy. Cradles do not seem to have been in use, and the child was sung to sleep on the nurse's knee. While it was being weaned, it was fed on milk and soft food sweetened with honey. As soon as it was able to move about and direct attention to external objects, it received playthings, such as rattles, dolls of clay or wax, hobby-horses, etc., and was allowed to roll and dig in the sand. Such were the simple gymnastics of this early period. As to the other branch of education, it consisted mostly in being sung to and in listening to stories about gods and heroes, monsters and robbers, of which Greek mythology was full. By means of these the child's imagination was roused and developed, and certain æsthetic, ethical, and national prepossessions awakened. Though children were often frightened from certain acts and habits by threats of bogles coming to carry them off, yet the chief ethical agency employed was evidently strict discipline. To secure good behavior in his children was the first care of the Athenian parent. Though disinclined to harshness, he never doubted that "he who spareth the rod hateth the child." Children were never placed upon exhibition or applauded for their precocious or irreverent sayings. They were kept as much as possible out of the way of older people, and, when necessity brought them into the presence of these, they were taught to behave themselves quietly and modestly. No Greek author has preserved for us a collection of the smart sayings or roguish doings of Athenian children.

Though the Kindergarten did not exist in those old days, yet its place was, in great measure, filled by the numerous games in which the children engaged, in part at least under their nurses' superintendence. Games played so important a part in the whole life of the Greek people, and especially of the Athenians, that their importance in the education of children was fully recognized and

much attention devoted to them. During play, character both displays itself more fully, and is more easily and deeply affected, than at any other time; and, since the whole of the waking life of the child in its earliest years is devoted to play, this is the time when character is formed, and therefore the time which calls for most sedulous care. In playing games, children not only exercise their bodies and their wits; they also learn to act with fairness, and come to feel something of the joy that arises from companionship and friendly rivalry in a common occupation. Moreover, as games have no end beyond themselves, they are admirable exercises in free, disinterested activity and a protection against selfish and sordid habits. Of all this the Athenians were fully aware.

There are probably few games played by children in our day that were not known in ancient Athens. It seems, however, that games were there conducted with more system, and a deeper sense of their pedagogical value, than they are with us. We hear of running, leaping, hopping, catching, hitting, and throwing games, gymnastic games, and games of chance. The ball, the top, the hoop, the swing, the see-saw, the skipping rope, the knuckle-bones were as much in use in ancient, as in modern, times. Cards, of course, there were not; and, indeed, games of chance, though well known, seem rarely to have been indulged in by children. It hardly seems necessary to remark that there were some games peculiar to boys and others to girls, and that the latter were less rude than the former. Doubtless, too, the games played in the city, where the children would have few chances of going beyond their homes, were different from those played in the country, where almost complete freedom to roam in the open air was enjoyed. We must always bear in mind that well-to-do Athenian families spent the greater part of the year at their country-houses, which, with few exceptions, were so near the city that they could be reached even on foot in a single day. This country life had a marked effect upon the education of Athenian children.

(2) School Education.

About the age of seven, the Athenian boy, after being entered on the roll of prospective citizens in the temple of Apollo Patroös, and made a member of a phratría, went to school, or, rather, he went to two schools, that of the music-master, and that of the physical trainer.

He was always accompanied thither and back by a *pedagogue*, who was usually a slave, who carried his writing-materials, his lyre, etc. (there being no school-books to carry), and whom he was expected implicitly to obey. The boys of each quarter of the city collected every morning at some appointed place and walked to school, like little soldiers, in rank and file. They wore next to no clothing, even in the coldest weather, and were obliged to conduct themselves very demurely in the streets. The school hours were very long, beginning early in the morning and continuing till late in the evening. Solon found it necessary to introduce a law forbidding schoolmasters to have their schools open before sunrise or after sunset. It thus appears that boys, after the age of seven, spent their whole day at school, and were thus early withdrawn from the influence of their mothers and sisters, a fact which was not without its bearing upon morals.

There are several interesting points in connection with Athenian school life about which our information is so scanty that we are left in some doubt respecting them. For example, though it is quite plain that Athens had no system of public instruction, it is not so clear that she did not own the school buildings. Again, it is not certain whether music (including letters) and gymnastics were, or were not, taught in the same locality. Thirdly, there is some doubt about the number and order of the hours devoted to each of the two branches of study. In regard to these points I can state only what seems to me most probable.

As to school buildings, we are expressly told by the author of the fragmentary tract on *The Athenian State*, currently attributed to Xenophon, but probably written as early as b.c. 424, that “the people (δῆμος) builds itself many palæstras, dressing-rooms, baths, and the masses have more enjoyment of these than the few that are well-to-do.” If we assume that some of these palæstras were for boys, as we apparently have a right to do, we must conclude that some, at least, if not all, of the schools for bodily training were public edifices, let out by the State to teachers. Like all the great gymnasia, some, and possibly all, of them were situated outside the city walls and had gardens attached to them. Whether the music-schools were so likewise, is doubtful, and this brings us to our second question — whether the two branches of education were taught in the same place.

That they were not taught in the same room, or by the same person, is clear enough; but it does not follow from this that they were not taught in the same building, or at any rate in the same enclosed space. Though there seems to be no explicit statement in any ancient author on this point, I think there are sufficient reasons for concluding that, generally at least, they were so taught. If we find that Antisthenes, Plato, and Aristotle, who may be said to have introduced a systematic "higher education" into Athens, opened their schools in the great public gymnasia, frequented by youths and men, we may surely conclude that the lower mental education was not separated from the physical. In the *Lysis* of Plato, we find some young men coming out of a palæstra outside the city walls, and inviting Socrates to enter, telling him that their occupation (διατριβή) consists *mostly* in discussions (τὰ πολλὰ ἐν λόγοις), and that their teacher is a certain Miccus, an admirer of his. Socrates recognizes the man as a capable "sophist," a term never used of physical trainers. On entering, Socrates finds a number of boys and youths (νεανίσκοι) playing together, the former having just finished a sacrifice. It seems to follow directly from this that intellectual education was imparted in the palæstras. If this be true, we may, I think, conclude that in Athens the schools generally were outside the city walls, though the case was certainly different in some other cities.

In regard to our third question, it is clear that, if boys spent their whole day in one place, it would be more easy to divide it profitably between musical instruction and gymnastics than if they spent one part of it in one place, and another in another. Just how it was divided, we do not know, and I have little doubt that much depended upon the notions of parents and the tendencies of different periods. It is quite clear, from certain complaints of Aristotle's, that in Athens parents enjoyed great liberty in this matter. In any case, since, as we know, the institutions of education were open all day, it seems more than probable that one class of boys took their gymnastic lesson at one hour, another at another, and so with other branches of study. It cannot be that the physical training-schools were deserted when the music-schools were in session. I think there is sufficient reason for believing that, generally, the younger boys took their physical exercises in the morning, and their intellectual instruction in the

afternoon, the order being reversed in the case of the older boys. How much of the time spent at school was given up to lessons and how much to play, is not at all clear; but I am inclined to think that the playtime was at least as long as the worktime. The schools were for boys what the agora and the gymnasium were for grown men — the place where their lives were spent.

Before we consider separately the two divisions of Athenian education, a few facts common to them may be mentioned. In the first place, they had a common end, which was, to produce men independent but respectful, freedom-loving but law-abiding, healthy in mind and body, clear in thought, ready in action, and devoted to their families, their fatherland, and their gods. Contrary to the practice of the Romans, the Athenians sought to prepare their sons for independent citizenship at as early an age as possible. In the second place, the motives employed in both divisions were the same, viz. fear of punishment and hope of reward. As we have seen, the Athenian boy, if he behaved badly, was not spared the rod. As an offset against this, when he did well, he received unstinted praise, not to speak of more substantial things. Education, like everything else in Greece, took the form of competition. The Homeric line (*Il.*, vi, 208; xi, 784),

“See that thou ever be best, and above all others distinguished,”

was the motto of the Athenian in everything. In the third place, in both divisions the chief aim was the realization of capacity, not the furthering of acquisition. Mere learning and execution were almost universally despised in the old time, while intelligence and capacity were universally admired. In the fourth place, in both divisions the utmost care was directed to the conduct of the pupils, so that it might be gentle, dignified, and rational. In the fifth place, education in both its branches was intended to enable men to occupy worthily and sociably their leisure time, quite as much as to prepare them for what might be called their practical duties in family, society, and State. The fine arts, according to the Greeks, furnished the proper amusements for educated men (πεπαιδευμένοι).

(a) *Musical (and Literary) Instruction.*

Though the Greek word *music* (μουσική) came in later times to

have an extended meaning, in the epoch of which we are treating, it included only music in our sense, and poetry, two things which were not then separated. Aristophanes, as late as b.c. 422, can still count upon an audience ready to laugh at the idea of giving instruction in astronomy and geometry, as things too remote from human interests (*Clouds*, vv 220 sqq.). The poetry consisted chiefly of the epics of Homer and Hesiod, the elegiacs of Tyrtaeus, Solon, Theognis, etc., the iambics of Archilochus, Simonides, etc., and the songs of the numerous lyrists, Terpander, Arion, Alcæus, Alcman, Sappho, Simonides, etc. The music was simple, meant to “sweeten” (ἡδύνειν) the words and bring out their meaning. In fact, the music and the poetry were always composed together, so that the poet was necessarily also a musician. What we call “harmony” was unknown in Greek music at all times, and instrumental music was almost entirely confined to solo-playing.

In treating of Athenian, and, indeed, of all Greek, education, it is of the utmost importance to realize that the intellectual and moral part of it has music and poetry for its starting-point. This is the core round which everything else gathers; this is what determines its character, influence, and ideal. Culture, as distinguished from nature, is the material of Athenian intellectual and moral education; and by this is meant, not the history or theory of culture, as it might be set forth in prose, but culture itself, as embodied in the ideals and forms of music-wedded poetry, appealing to the emotions that stir the will, as well as to the intelligence that guides it.

By making the works of the great poets of the Greek people the material of their education, the Athenians attained a variety of objects difficult of attainment by any other one means. The fact is, the ancient poetry of Greece, with its finished form, its heroic tales and characters, its accounts of peoples far removed in time and space, its manliness and pathos, its directness and simplicity, its piety and wisdom, its respect for law and order, combined with its admiration for personal initiative and worth, furnished, in the hands of a careful and genial teacher, a material for a complete education such as could not well be matched even in our own day. What instruction in ethics, politics, social life, and manly bearing could not find a fitting vehicle in the Homeric poems, not to speak of the

geography, the grammar, the literary criticism, and the history which the comprehension of them involved? Into what a wholesome, unsentimental, free world did these poems introduce the imaginative Greek boy! What splendid ideals of manhood and womanhood did they hold up for his admiration and imitation! From Hesiod he would learn all that he needed to know about his gods and their relation to him and his people. From the elegiac poets he would derive a fund of political and social wisdom, and an impetus to patriotism, which would go far to make him a good man and a good citizen. From the iambic poets he would learn to express with energy his indignation at meanness, feebleness, wrong, and tyranny, while from the lyric poets he would learn the language suitable to every genial feeling and impulse of the human heart. And in reciting or singing all these, how would his power of terse, idiomatic expression, his sense of poetic beauty and his ear for rhythm and music be developed! With what a treasure of examples of every virtue and vice, and with what a fund of epigrammatic expression would his memory be furnished! How familiar he would be with the character and ideals of his nation, how deeply in sympathy with them! And all this was possible even before the introduction of letters. With this event a new era in education begins. The boy now not only learns and declaims his Homer, and sings his Simonides or Sappho, he learns also to write down their verses from dictation, and so at once to read and to write. This, indeed, was the way in which these two (to us) fundamental arts were acquired. As soon as the boy could trace with his finger in sand, or scratch with a stylus on wax, the forms of the letters, and combine them into syllables and words, he began to write poetry from his master's dictation. The writing-lesson of to-day was the reading, recitation, or singing-lesson of to-morrow. Every boy made his own reading-book, and, if he found it illegible, and stumbled in reading, he had only himself to blame. The Greeks, and especially the Athenians, laid the greatest stress upon reading well, reciting well, and singing well, and the youth who could not do all the three was looked upon as uncultured. Nor could he hide his want of culture, since young men were continually called upon, both at home and at more or less public gatherings, to perform their part in the social entertainment.

The strictly musical instruction of this period was almost entirely confined to simple, strong Doric airs, sung to an accompaniment which was played on an instrument closely resembling the modern guitar (λύρα, κιθάρις). Complicated and wind instruments were unpopular, and the softer or more thrilling kinds of music, Lydian, Phrygian, etc., had not yet been introduced, at least into schools. Anything like the skill and execution demanded of professional players, who were usually slaves or foreigners, was considered altogether unworthy of a free man and a citizen, and was therefore not aimed at. Fond as the Athenians were of the fine arts, they always held professional skill in any of them, except poetry and musical composition, to be incompatible with that dignity and virtue which they demanded of the free citizen. A respectable Athenian would no more have allowed his son to be a professional musician than he would have allowed him to be a professional acrobat.

It is difficult for us to understand the way in which the Greeks regarded music. Inferior as their music was to ours in all technical ways, it exerted an influence upon their lives of which we can form but a faint conception. To them it was a dæmonic power, capable of rousing or assuaging the passions, and hence of being used for infinite good or evil. No wonder, then, that in their education they sought to employ those kinds which tended to “purgation” (κάθαρσις), and to avoid those that were exciting, sentimental, or effeminate! No wonder that they disapproved of divorcing music from the intellectual element contained in the words, and allowing it to degenerate into a mere emotional or sensual luxury! Music the Greeks regarded, not indeed as a moral force (a phrase that to them, who regarded morality as a matter of the will, would have conveyed no meaning), but as a force whose office it was, by purging and harmonizing the human being, to make him a fit subject for moral instruction. Music, they held, brought harmony, first into the human being himself, by putting an end to the conflict between his passions and his intelligent will, and then, as a consequence, into his relations with his fellows. Harmony within was held to be the condition of harmony without.

In the period of which I am speaking, no distinction was yet made between music and literature (γράμματα), both being taught by the

citharist (κιθαριστής). Indeed, the term for teacher of literature (γραμματιστής) was not then invented. But the citharist not only taught literature: he also taught the elements of arithmetic, a matter of no small difficulty, considering the clumsy notation then in use. This was done by means of pebbles, a box of sand, or an abacus similar in principle to that now used by billiard players to keep count of their strokes.

As to the schoolrooms in ancient Athens, they were apparently simple in the extreme; indeed, rather porches open to sun and wind than rooms in the modern sense. They contained little or no furniture. The boys sat upon the ground or upon low benches, like steps (βάθρα), while the teacher occupied a high chair (θρόνος). The benches were washed, apparently every day, with sponges. The only decorations permitted in the schoolrooms, it seems, were statues or statuettes of the Muses and Apollo, and the school festivals or exhibitions were regarded as festivals in honor of these. Indeed, in Greece every sort of festival was regarded as an act of worship to some divinity. The chief school festival seems to have been the *Musēa* (μουσεῖα), at which the boys recited and sang.

(β) *Gymnastics or Bodily Training.*

Under the term *Gymnastics* (γυμναστική), the Greeks generally included everything relating to the culture of the body. The ends which the Athenians sought to reach through this branch of education were health, strength, adroitness, ease, self-possession, and firm, dignified bearing. A certain number of boys, intending to take part in the Olympic and other great games, were allowed to train as athletes under a gymnast (γυμναστής, ἀλείπτης) in the public gymnasia, and under the direction of the State; but these were exceptions. The athlete was not an ideal person at Athens, as he was at Thebes and Sparta.

Gymnastic exercises were conducted partly in the palæstras, or wrestling schools, partly on the race-courses, both of which were under the direction of professional trainers (παιδοτρίβαι). In early times, the palæstra and race-course were simply an open space covered with sand and probably connected with the school (διδασκαλεῖον), thus corresponding to our playground. Later, this space was partly covered over and furnished with dressing-rooms, a

bath, seats for spectators, an altar for sacrifices, statues, etc. Of the five gymnastic exercises in which boys were trained, all except wrestling seem to have been conducted on the race-course, so that the palæstra was reserved for what its name implied. It is by no means certain that every palæstra had a race-course connected with it, at least in the time of which we are speaking, and possibly in many cases the boys took part of their exercises in the public race-course running from the agora to beyond the walls. Just as the schoolroom was decorated with images of Apollo and the Muses, so the palæstra was decorated with images of Hermes, Heracles, and Eros, symbolizing, respectively, adroitness, human strength, and youthful friendship. The special patron of the palæstra was Hermes, and the gymnastic exhibition took the form of a festival to him, the Hermæa, at which a sacrifice was offered and the boys were allowed the use of the building to play games in, the victors wearing crowns.

It would be impossible, in a work of this compass, to enter into a minute description of all the exercises of the Athenian palæstra. We must be content with a general statement, which may be prefaced with the remark that these exercises were at first light, increasing gradually in rigor and difficulty as the strength and skill of the growing child permitted.

The chief gymnastic exercises were five, named in this order in a famous line of Simonides: (1) leaping, (2) running, (3) discus-throwing, (4) javelin-casting, (5) wrestling (πάλη), which last gave the name to the palæstra. We shall not strictly follow this order, but begin with

(1) *Running*. — This was the simplest, lightest, most natural, and, therefore, the most easily taught of exercises. It was probably also the oldest. We find even Homer making his ideal Phæacians begin their games with it, and this practice seems to have been general throughout antiquity. In taking this exercise, the boys divested themselves of all clothing and had their bodies rubbed with oil. The running appears to have been of the simplest kind. Hurdle-races, sack-races, etc., were apparently excluded from education. At the same time, the running was rendered difficult by the soft sand with which the course was covered to the depth of several inches. The races were distinguished according to their length in furlongs or

stadia: (1) the furlong-race, (2) the double-furlong race, (3) the horse (four-furlong) race, (4) the long race, whose length seems to have been twenty-four furlongs, or about three miles. The stadion was = 202¼ yards English. The shorter races called for brief concentration of energy, the longer for persistence and endurance; all were exercises in agility; all tended to develop lung-power.

(2) *Leaping or Jumping*. — This exercise seems, in the main, to have confined itself to the long leap. Though the high leap and the pole-jump can hardly have been unknown, we have no evidence that they were ever employed in the gymnastic training of boys. There may have been hygienic reasons which forbade their use. On the other hand, boys were taught to lengthen their leap by means of weights, somewhat similar to our dumb-bells, carried in their hands, and swung forward in the act of leaping. Such leaping would be an exercise for the arms, as well as for the legs and the rest of the body. But, just as there were two exercises intended chiefly for the legs, so there were two intended chiefly for the arms — discus-throwing and javelin-casting.

(3) *Discus-throwing*. — The modern world has been rendered very familiar with the method of this exercise by the copies of the *discobolus* of Myron, preserved in Rome and extensively engraved and photographed, and that of the *discobolus* of Alcamenes which now stands in the Vatican (see Overbeck, *Griech. Plastik* vol. i, p. 276). The discus was generally a flat, round piece of stone or metal, a sort of large quoit with no hole in the middle, which the user sought to throw as far as he could. The *discobolus* of Alcamenes shows us a youth balancing the discus in his left hand, and taking the measure of his throw with his eye; that of Myron shows us another in the act of throwing. He swings the discus backward in his right hand, and bends his body forward to balance it. His right foot, the toes contracted with effort, rests firmly on the ground; the left is slightly lifted; the whole body is like a bent bow. In the next instant the left foot will advance, the left hand, now resting on the right knee, will swing backwards, the body will resume its erect position, and the discus will be shot forward from the right hand like an arrow. Nothing could show more clearly than does this statue the perfect organization, symmetry, and balance which were the aim of Greek

gymnastics. Not one limb could be moved without affecting all the rest, — which shows that the exercise extended to the whole body.

(4) *Javelin-casting*. — The aim of this exercise was to develop skill and precision of eye and hand, rather than strength of muscle. The instrument employed was a short dagger or lance, which was aimed at a mark. He who could hit the mark from the greatest distance was the most proficient scholar. The spear, before being thrown, was balanced in the right hand at the height of the ear.

(5) *Wrestling*. — This very complicated exercise was evidently the principal one in the gymnastic course, the one to which the others were merely preparatory. It was the only one which a boy could not practice by himself. It exercised not only the whole body, but the patience and temper as well. The aim of the wrestler was to throw (καταβλλειν) his antagonist. Those who took part in this exercise had their bodies rubbed with oil and strewn with fine sand. It seems that the wrestler was allowed to do anything he chose to his antagonist except to bite, strike, or kick him. Before he could claim the victory he had to throw him three times. After the contest the wrestlers scraped from their bodies, with a strigil, the oil and dust, bathed, were again rubbed with oil, exposed their bodies to the sun, in order to dry and tan them, and dressed. The bathing was done in cold water, and both the bathing and the sunning were in part intended to inure the body to sudden cold and heat, which inurement was considered a very essential part of physical training.

Such were the chief exercises employed in the gymnastic training of the Athenians. Thus far, we have considered the two branches of education as conducted separately, and as not coming at any point in contact with each other. But it would have been very unlike the Greek, and especially the Athenian, to leave the two divisions of education unrelated and unharmonized. And, indeed, he did not so leave them, but brought them together in the most admirable way in what he called *orchesis*, a word for which we have no better equivalent than

(γ) *Dancing* (ὄρχησις, χορός).

“Dancers,” says Aristotle, “by means of plastic rhythms (rhythms reproduced in plastic forms) imitate characters, feelings, and actions.” Xenophon, in his *Anabasis*, describing a banquet that took

place in the wilds of Paphlagonia, says: "After the treaty was ratified and the pæan sung, there first rose up two Thracians and danced in armor to the flute, leaping high and lightly, and using their swords. Finally one of them struck the other, so that everybody thought he had wounded him; but he fell in an artificial way. Then the Paphlagonians raised a shout; but the assailant, having despoiled the fallen man of his armor, went out singing the Sitalcas. Then others of the Thracians carried out the other as if he had been dead; but he was none the worse. Next, some Ænians and Magnesians stood up and danced the so-called Carpæa in armor. The manner of the dance was this: one man, putting his arms within reach, sows and drives a team, frequently turning round as if afraid. Then a robber makes his appearance. As soon as the other espies him, he seizes his arms, advances to him, and fights in front of the team. And the two did this keeping time to the flute. Finally the robber, having bound the other, carries off both him and the team; sometimes, on the contrary, the ploughman binds the robber, in which case he yokes him, with his hands bound behind his back, to his oxen and drives off." Several other dances, performed by persons of different nationalities, follow; but enough has been quoted to show that the Greek ὄρχησις was something very different from our dancing. It was, indeed, a pantomimic ballet, interspersed with *tableaux vivans*.

In the dances here mentioned, the flute is the instrument employed, and this the player could not accompany with his voice. But in the Athenian schools, in the old time, the flute, and all music without words, were tabooed. There can be no doubt, therefore, that in these the orchestric performances were accompanied by the lyre, the player on which sang in words what the dancers danced. It is obvious that in such performances the musical (literary) and gymnastic branches of education came in for about equal shares. Dancing exercised the whole human being, body and soul, and exercised them in a completely harmonious way. It is this harmony, this rhythmic movement of the body in consonance with the emotions of the soul and the purposes of the intelligence, that is *grace* (χάρις). Hence, while the Greeks relied upon gymnastics to impart strength and firmness to the body, they looked to dancing for courtliness and grace. Plato places the two on the same footing, as

parts of a single discipline.

The fact that the two divisions of education met in dancing seems to prove what I surmised above, viz. that they were conducted within the same precincts; in which case we may suppose that, while the dancing exercises took place in the palæstra, the music was supplied by the music master. We know that the chorus-leader was a public officer, appointed by the demos, and had to be over forty years old. In any case, it is curious enough to think that Athenian, and, generally, Greek, education culminated in dancing. But this was a perfectly logical result; for the chorus is the type of Greek social life, as we see most clearly in the *Republic* of Plato. It hardly needs to be pointed out that the supreme form of Greek art, the drama, was but a development of the Bacchic or Dionysiac chorus. This development consisted in the separation of the music from the pantomime, and the assignment of the former to the chorus, which no longer danced, but walked, and of the latter to the actors, who added the dialogue to it. Greek life was divided into three parts — civil, military, religious. Music and letters were a preparation for the first, gymnastics for the second, and dancing for the third. Dancing formed a prominent part in Greek worship, and it may be doubted whether free Athenians ever danced except “before the gods “ — ἐν ταῖς πρὸς τοὺς θεοὺς προσόδοις, as Xenophon says.

Two things still remain to be considered with regard to Athenian schools, (1) grading, (2) holidays. With respect to the former, the practice probably differed at different times; but we seem to be justified in assuming that, at the time of which I am speaking, there were but two grades, boys (παῖδες) and youths (νεανίσκοι). These are mentioned by Plato, in the *Lysis*, as celebrating the Hermæa together in a palæstra. The first grade would include the boys from seven to eleven years of age; the second, those from eleven to fifteen. As to holidays, they seem to have been simply the feast-days of the greater gods, when business of every sort was suspended. Such days amounted to about ninety annually.

(3) College Education.

About the time when he was blossoming into manhood, that is, some time between his fourteenth and his sixteenth year, the Athenian boy of the olden time was transferred from the private

school and palæstra, which belonged to the family side of life, to the gymnasium, which belonged to the State, and in which he received the education calculated to fit him for the duties of a citizen. Having, in the family and the school, been trained to be a gentleman (καλοκάγαθός), he must now be trained to be a citizen, capable of exercising legislative, judicial, and military functions. The State saw to it that he received this training, if his parents chose and could afford it.

In the time of Solon, about b.c. 590, two great gymnasia, the Academy and Cynosarges, were erected in the midst of extensive groves outside the city walls. These groves were afterwards surrounded with high walls, furnished with seats and other conveniences, and turned into city parks. The Academy, which lay to the northwest of the city, in the valley of the Cephissus, and was under the patronage of Athena, was the resort of the full-blooded citizens, while Cynosarges, situated to the east of the city, near the foot of Lycabettus, was assigned to those who had foreign blood in their veins, that is, who had only one parent of pure Athenian stock. This gymnasium was under the patronage of Heracles, whose worship always implies the presence of a foreign and vanquished element. These were the only two gymnasia belonging to Athens before the time of Pericles. They were, probably, destroyed by the Persians in 480, and had afterwards to be rebuilt, and the groves replanted.

While the children of nearly all the free citizens of Athens attended the school and the palæstra, it is clear that only the youth of the wealthier classes attended the gymnasium. One result of this was that the government and offices of the State fell exclusively into the hands of those classes; and it was perhaps just in order to make this division, without introducing any class-law, that the shrewd Solon established the gymnasia, which thus became a bulwark against democracy.

As soon as the Athenian youth was transferred to the gymnasium, he passed from under the charge of the pedagogue, who represented the family, and came under the direct surveillance of the State. He was now free to go where he would, to frequent the agora and the street, to attend the theatre, in which he had his appointed place, and to make himself directly acquainted with all the details of public life.

In the gymnasium he passed into the hands of a gymnast or scientific trainer, and for the next two or three years was subjected to the severer exercises, wrestling, boxing, etc. No special provision, beyond the fact that he had to learn the laws, was made for his intellectual and moral instruction. He was expected to acquire this from contact with the older citizens whom he met in the agora, the street, or the public park. Thus, at what is justly regarded as the most critical age, he was almost compelled to live a free, breezy, outdoor life, full of activity and stirring incident, his thoughts and feelings directed outwards into acts of will, and not turned back upon himself or his own states. At the same time he was acquiring just that practical knowledge of ethical laws and of real life which could best fit him for active citizenship. He now learnt to ride, to drive, to row, to swim, to attend banquets, to sustain a conversation, to discuss the weightiest questions of statesmanship, to sing and dance in public choruses, and to ride or walk in public processions. If he abused his liberty and behaved in a lawless or unseemly way, he was called to account by the severe Court of the Areopagus, which attended to public morals. He saw little of girls of his own age, except his sisters, unless it was at public festivals, when there was little opportunity of becoming acquainted with them. His affectionate nature therefore expressed itself mostly in the form of devoted friendships to other youths of his own, or nearly his own, age, a fact which enables us to understand why friendship fills so large a space, not only in the life, but also in the ethical treatises of the Greeks, — Plato, Aristotle, etc., — and why love, in the modern sense, plays so insignificant a part. The truth is that, even in Athens, the State encroached upon the family. Plato's *Republic* was only the logical carrying out of principles that were latent long before in the social life of the Athenian people.

It would be impossible to treat in detail the exercises to which the Athenian youth was subjected during the years in which he attended the public gymnasium as a pupil. The old exercises of the palæstra were continued, running and wrestling especially; but the former was now done in armor, and the latter became more violent, and was supplemented by boxing. In fact, the physical exercises were now systematized into the *pentathlon* — running, leaping, discus-

throwing, wrestling, boxing — which formed the programme of nearly all gymnastic exhibitions. During these years, the youth was still regarded as a minor, and his father or guardian was responsible for his good behavior. But when he reached the age of eighteen, a change took place, and he passed under the direct control of the State. His father now brought him before the reeve of his *demos* (ward or village), as a candidate for independent citizenship. If he proved to be the lawful child of free citizens, and came up to the moral and physical requirements of the law, his name was entered upon the register of the *demos*, and he became a member of it. He was now prepared to be presented to the whole people, and to pass the State examination. He shorn his long hair for the first time, and donned the black garment of the citizen. In this guise he presented himself to the king-archon of the State, who, at a public assembly, introduced him, along with others, to the whole people. He was then and there armed with spear and shield (supplied by the State if his father had fallen in war), and thence proceeded to the shrine of Aglauros, where, looking down on the agora, the city, and the Attic plain, he took the Solonian oath of citizenship (see p. 61). He was now technically an *ephēbos*, cadet, or citizen-novice, ready to undergo those two years of severe discipline which at once formed his introduction to practical affairs, and constituted the State examination. During the first year he remained in the neighborhood of Athens, drilling in arms, and acquiring a knowledge of military tactics. His life was now the hard life of a soldier. He slept in the open air, or in the guard-houses (φρουρία) that surrounded the city, and was liable to be called upon at any time by the government to give aid in an emergency. He also took part in the public festivals. At the end of the year, all the *ephēboi* of one year's standing passed an examination in military drill before the assembled people (ἀπεδείξαντο τῷ δήμῳ περὶ τὰς τάξεις), after which they were employed as militia to man the frontier guard-houses, and as rural *gendarmes* (περίπολοι), scouring the country in all directions. They now lived like soldiers in war-time, and learnt two important things, (1) the topography of Attica, its roads, passes, brooks, springs, etc., (2) the art of enforcing law and order. Their life, indeed, closely resembled that of the Alpine corps (*Alpini*) of the Italian army at the

present day. These spend the summer in making themselves acquainted with every height, valley, pass, stream, and covert in the Italian Alps, often bivouacking for days together at great heights. That during this time the *ephēboi* should have taken any part in the legislative or judicial duties of citizens, seems in the highest degree improbable. At the end of their second year, however, they passed a second examination, called the citizenship or manhood examination (δοκιμασία εἰς ἄνδρας), after which they were full members of the State.

(4) University Education.

The Greek university was the State, and the Greek State was a university — a *Cultur-Staat*, as the Germans say. That the State is a school of virtue, was a view generally entertained in the ancient world, which, until it began to decay, completely identified the man with the citizen. The influence of this view upon the attitude of the individual to the State, and of the State to the individual, can hardly be overestimated. The State claimed, and the individual accorded to it, a disciplinary right which extended to every sphere and action of life. Thus the sphere of morality coincided exactly with the sphere of legality, or, to put it the other way, the sphere of legality extended to the whole sphere of morality, and this was considered true, whatever form the State or government might assume — monarchy, aristocracy, democracy, etc.

To give a full account of the university education of old Athens would be to write her social and political history up to the time of the Persian Wars. This is, of course, out of the question. All I can do is to point out those elements in the State which enabled it to produce that splendid array of noble men, and accomplish those great deeds and works, which make her brief career seem the brightest spot in the world's history.

The chief of these elements, and the one which included all the rest, was the Greek ideal of harmony. Athens was great as a State and as a school so long as she embodied that ideal, so long as she distributed power and honor in accordance with worth (ἀρετή) intellectual, moral, practical; in a word, so long as the State was governed by the best citizens (ἄριστοι), and the rest acknowledged their right to do so. Notwithstanding the contention of Grote and

others, it is strictly true that Athens was great because, and so long as, she was aristocratic (in the ancient sense), and perished when she abandoned her fundamental ideal by becoming democratic. This assertion must not be construed as any slur upon democracy as such, or as denying that Athens in perishing paved the way for a higher ideal than her own. It simply states a fact, which may be easily generalized without losing its truth: An institution perishes when it abandons the principle on which it was founded and built up. Unless we bear this in mind, we shall utterly fail to understand the lesson of Athenian history. If it be maintained that some of Athens' noblest work was done under the democracy, the sufficient answer is, that it was nearly all done by men who retained the spirit of the old aristocracy, and bitterly opposed the democracy. We need name only Æschylus, Sophocles, Aristophanes, Plato, Aristotle, Demosthenes.

Part II. THE “NEW EDUCATION” (b.c. 480-338)

CHAPTER I

INDIVIDUALISM AND PHILOSOPHY

Homer ought to be driven from the lists and whipt, and Archilochus likewise. — Heraclitus.

Thou needs must have knowledge of all things,
First of the steadfast core of the Truth that forceth conviction,
Then of the notions of mortals, where true conviction abides not.
— Parmenides.

All things were undistinguished: then Intellect came and brought them into order. — Anaxagoras.

Man is the measure of all things.

In regard to the Gods, I am unable to know whether they are or are not. — Protagoras.

Strepsiades. Don't you see what a good thing it is to have learning? There isn't any Zeus, Phidippides!

Phidippides. Who is there then?

Streps. Vortex rules, having dethroned Zeus.

Phid. Pshaw! what nonsense!

Streps. You may count it true, all the same.

Phid. Who says so?

Streps. Socrates the Melian, and Chærephon, who knows the footprints of fleas. — Aristophanes, *Clouds*.

There is an old-fashioned saw, current of yore among mortals, that a man's happiness, when full-grown, gives birth and dies not childless, and that from Fortune there springs insatiate woe for all his race. But I, dissenting from all others, am alone of different mind. It is the Irreverent Deed that begets after it more of its kind. For to righteous homes belongs a fair-childrened lot forever; but old Irreverence is sure to beget Irreverence, springing up fresh among evil men, when the numbered hour arrives. And the new Irreverence begets Surfeit of Wealth, and a power beyond all battle, beyond all war, unholy Daring, twin curses, black to homes, like to their parents.

But Justice shines in smoky homes, and honors the righteous life, and, leaving, with averted eyes, foundations gilded with impurity of hands, she draws nigh to holy things, honoring not the power of wealth, with its counterfeit stamp of praise. And her will is done. — Æschylus.

From the time they are children to the day of their death, we teach them and admonish them. As soon as the child understands what is said to him, his nurse and his mother and his pedagogue and even his father vie with each other in trying to make the best of him that can be made, at every word and deed instructing him and warning him, “This is right,” “This is wrong,” “This is beautiful,” “This is ugly,” “This is righteous,” “This is sinful,” “Do this,” “Don’t do that.” And if the child readily obeys, well and good; if he does not, then they treat him like a bent and twisted stick, straightening him out with threats and blows. Later on, they send him to school, and then they lay their injunctions upon the masters to pay much more attention to the good behavior of their sons than to their letters and music (κῆθάρις); and the teachers act upon these injunctions. Later yet, when they have learnt to read, and are proceeding to understand the meaning of what is written, just as formerly they understood what was said to them, they put before them on the benches to read the works of good poets, and insist upon their learning them by heart — works which contain many admonitions, and many narratives, noble deeds, and eulogies of the worthy men of old — their purpose being to awaken the boy’s ambition, so that he may imitate these men and strive to be worthy likewise. The music-teachers also, pursuing the same line, try to inculcate self-control (σωφροσύνη) and to prevent the boys from falling into mischief. In addition to this, when they have learnt to play on the lyre, their masters teach them other poems, written by great lyric poets, making them sing them and play the accompaniments to them, and compelling them to work into their souls the rhythms and melodies of them, so that they may grow in gentleness, and, having their natures timed and tuned, may be fitted to speak and act. The truth is, the whole life of man needs timing and tuning. Furthermore, in addition to all this, parents send their sons to the physical trainer, in order that their bodies may be improved and rendered capable of seconding a noble intent, and they themselves

not be forced, from physical deterioration, to play the coward in war or other (serious) matters. And those who can best afford to give this education, give most of it, and these are the richest people. Their sons go earliest to school and leave it latest. And when the boys leave school, the State insists that they shall learn the laws and live according to them, and not according to their own caprice ... And if any one transgresses these laws, the State punishes him ... Seeing that so much attention is devoted to virtue, both in the family and in the State, do you wonder, Socrates, and question whether virtue be something that can be taught? Surely you ought not to wonder at this, but rather to wonder if it could *not* be taught. — Plato, *Protagoras* (*words of Protagoras*).

“Isn’t it true, Lysis,” said I, “that your parents love you very much?”—“To be sure,” said he.—“Then they would wish you to be as happy as possible?”—“Of course,” said he.—“And do you think a person is happy who is a slave, and is not allowed to do anything he desires?”—“I don’t, indeed,” said he.—“Then, if your father and mother love you and wish you to be happy, they endeavor by every means in their power to make you happy.”—“To be sure they do,” said he.—“Then they allow you to do anything you please, and never chide you, or prevent you from doing what you desire.”—“By Jove! they do, Socrates: they prevent me from doing a great many things.”—“What do you mean,” said I; “they wish you to be happy, and yet prevent you from doing what you wish? Let us take an example: If you want to ride in one of your father’s chariots, and to hold the reins, when it is competing in a race, won’t they allow you, or will they prevent you?”—“By Jove! no: they would not allow me,” said he. “But why should they? There is a charioteer, who is hired by my father.”—“What do you mean? They allow a hired man, rather than you, to do what he likes with the horses, and pay him a salary besides?”—“And why not?” said he.—“Well then, I suppose they allow you to manage the mule-team, and if you wanted to take the whip and whip it, they would permit you.”—“How could they?” said he.—“What?” said I: “is nobody allowed to whip it?”—“Of course,” he said; “the muleteer.”—“A slave or a free man?”—“A slave,” said he.—“And so it seems they think more of a slave than of their son, and entrust their property to him rather than to you, and

allow him to do what he pleases, whereas they prevent you. But, farther, tell me this. Do they allow you to manage yourself, or do they not even trust you to that extent?"—"How trust me?" said he.—"Then does some one manage you?"—"Yes, my pedagogue here," said he.—"But he is surely not a slave?"—"Of course he is, our slave," said he.—"Is it not strange," said I, "that a freeman should be governed by a slave? But, to continue, what is this pedagogue doing when he governs you?"—"Taking me to a teacher, or something of the kind," he said.—"And these teachers, it cannot be that they too govern you?"—"To any extent."—"So then your father likes to set over you a host of masters and managers; but, of course, when you go home to your mother, she lets you do what you like, in order to make you happy, either with the threads or the loom, when she is weaving — does she not? She surely doesn't in the least prevent you from handling the batten, or the comb, or any of the instruments used in spinning." — And he, laughing, said: "By Jove, Socrates; she not only prevents me, but I should be beaten if I touched them."—"By Hercules," said I, "isn't it true that you have done some wrong to your father and mother?"—"By Jove, not I," he said.—"But for what reason, then, do they so anxiously prevent you from being happy, and doing what you please, and maintain you the whole day in servitude to some one or another, and without power to do almost anything you like. It seems, indeed, that you derive no advantage from all this wealth, but anybody manages it rather than you, nor from your body, nobly born as it is, but some one else shepherds it and takes care of it. But you govern nothing, Lysis, and do nothing that you desire."—"The reason, Socrates," he said, "is, that I am not of age." — Plato, *Lysis*.

The present state of the constitution is as follows: Citizenship is a right of children whose parents are both of them citizens. Registration as member of a deme or township takes place when eighteen years of age are completed. Before it takes place the townsmen of the deme find a verdict on oath, firstly, whether they believe the youth to be as old as the law requires, and if the verdict is in the negative he returns to the ranks of the boys. Secondly, the jury find whether he is freeborn and legitimate. If the verdict is against him he appeals to the Heliæa, and the municipality delegate five of

their body to accuse him of illegitimacy. If he is found by the jurors to have been illegally proposed for the register, the State sells him for a slave; if the judgment is given in his favor, he must be registered as one of the municipality. Those on the register are afterwards examined by the senate, and if anyone is found not to be eighteen years old, a fine is imposed on the municipality by which he was registered. After approbation, they are called *epheboi*, or cadets, and the parents of all who belong to a single tribe hold a meeting and, after being sworn, choose three men of the tribe above forty years of age, whom they believe to be of stainless character and fittest for the superintendence of youth, and out of these the commons in ecclesia select one superintendent for all of each tribe, and a governor of the whole body of youths from the general body of the Athenians. These take them in charge, and after visiting with them all the temples, march down to Piræus, where they garrison the north and south harbors, Munychia and Acte. The commons also elect two gymnastic trainers for them, and persons who teach them to fight in heavy armor, to draw the bow, to throw the javelin, and to handle artillery. Each of the ten commanders receives as pay a drachma [about 20 cts.] per diem, and each of the cadets four obols [about 13 cts.]. Each commander draws the pay of the cadets of his own tribe, buys with it the necessities of life for the whole band (for they mess together by tribes), and purveys for all their wants. The first year is spent in military exercises. The second year the commons meet in the theatre and the cadets, after displaying before them their mastery in warlike evolutions, are each presented with a shield and spear, and become mounted patrols of the frontier and garrison the fortresses. They perform this service for two years, wearing the equestrian cloak and enjoying immunity from civic functions. During this period, to guard their military duties from interruption, they can be parties to no action either as defendant or plaintiff, except in suits respecting inheritance, or heiresses, or successions to hereditary priesthoods. When the three years are completed they fall into the ordinary body of citizens. — Aristotle, *Constitution of Athens* (*Poste's Version, with slight alterations*).

That perfect harmony between power and worth at which the Athenian State aimed, was something not easily attained or

preserved. As far back as its recorded history reaches, we find a struggle for power going on between a party which possessed more power than its worth justified, and a party which possessed less; that is, between a party which, having once been worthy, strove to hold power in virtue of its past history, and one that claimed power in virtue of the worth into which it was growing: in a word, a struggle between declining aristocracy and growing democracy. To the party in power, of course, this seemed a rebellion against lawful authority and privilege, and it did its best to suppress it. Hence came the rigorous legislation of Draco; later the more conciliatory, less outspoken, but equally aristocratic legislation of Solon; then the tyranny of Pisistratus, lasting as long as he could hold the balance of power between the contending parties; then the constitution of Clisthenes, with the breaking up of the old Athenian aristocratic system, the remodelling of the tribes, the degradation of the Areopagus, and the definite triumph of democracy. To complete the movement and, as it were, to consecrate it, came the Persian Wars, which mark the turning-point, the *peripeteia*, in Athenian history and education. Whatever efforts aristocracy makes to maintain itself after this, are made in the name of, and under cover of a zeal for, democracy.

The aristocratic Athenian State was based upon land-ownership, slavery, and the entire freedom of the land-owning class from all but family and State duties, from all need of engaging in productive industry. So long as the chief wealth of the State consisted in land and its produce, so long the population was divided into two classes, the rich and the poor, and so long the former had little difficulty in keeping all power in its own hands. But no sooner did the growth of commerce throw wealth into the hands of a class that owned no land, and was not above engaging in industry, than this class began to claim a share in political power. There were now two wealthy classes, standing opposed to each other, a proud, conservative one, with "old wealth and worth," and a vain, radical one, with new wealth and wants, both bidding for the favor of the class that had little wealth, little worth, and many wants, and thus making it feel its importance. Such is the origin of Athenian democracy. It is the child of trade and productive industry. It owed its final consecration to the Persian Wars, and especially to the battle of Salamis, in which

Athens was saved by her fleet, manned chiefly by marines (ἐπιβάται) from the lower classes, the upper classes, as we have seen, being trained only for land-service. Thus the battle of Salamis was not only a victory of Greece over Persia, but of foreign trade over home agriculture, of democracy over aristocracy.

The fact that the Athenian democracy owed its origin to trade determined, in great measure, its history and tendencies. One of its many results was that it opened Athens to the influx of foreign men, foreign ideas, and foreign habits, not to speak of foreign gods, all of which tended to break up the old self-contained, carefully organized life of the people. In no department were their effects sooner or more clearly felt than in that of education. From about the date of the battle of Salamis, when the youthful Ionian, Anaxagoras, came to Athens, a succession of men of “advanced” ideas in art and science sought a field of action within her borders. Such a field, indeed, seemed purposely to have been left open for them by the State, which had provided no means of intellectual or moral education for its young citizens, after they passed under its care (see p. 87). Nothing was easier or more profitable than for these wise foreigners to constitute themselves public teachers, and fill the place which the State had left vacant. The State might occasionally object, and seek to punish one or another of them for corrupting of the youth by the promulgation of impious or otherwise dangerous ideas, as it did in the case of Anaxagoras; but their activity was too much in harmony with a tendency of the time, — a radical and individualistic tendency inseparable from democracy, — to be dispensed with altogether. Hence it was that, within a few years after the battle of Salamis, there flourished in Athens a class of men unknown before within her boundaries, a class of private professors, or “sophists,” as they called themselves, who undertook to teach theoretically what the State had assumed could be taught only practically and by herself, viz., virtue and wisdom. Their ideas were novel, striking, and radical, hence congenial to a newly emancipated populace, vain of its recent achievements, and contemptuous of all that savored of the narrow, pious puritanism of the old time; their premises were magnificent, and their fees high enough to impose upon a class that always measures the value of a thing by what it is asked to pay for it; their

method of teaching was such as to flatter the vanity, and secure the favor, of both pupils and parents. No wonder that their success was immediate and their influence enormous.

From the days of Socrates to our own, 'sophist' has been a term of reproach, and not altogether unjustly so. Hegel, Grote, and Zeller have, indeed, shown that the sophists did not deserve all the obloquy which has attached itself to their name, inasmuch as they were neither much better nor much worse than any class of men who set up to teach new doctrines for money, and, as wise economists, suit supply to demand; nevertheless, it may be fairly enough said that they largely contributed to demoralize Athens, by encouraging irreverence for the very conceptions upon which her polity was built, and by pandering to some of the most selfish and individualistic tendencies of democracy. If it be said that they have their place in the history of human evolution, as the heralds of that higher view of life which allows the individual a sphere of activities and interests outside of that occupied by the State, this may at once and without difficulty be admitted, without our being thereby forced to regard them as noble men. The truth is, they represented, in practice and in theory, the spirit of individualism, which was then everywhere asserting itself against the spirit of nationalism or polity, and which perhaps had to assert itself in an exaggerated and destructive way, before the rightful claims of the two could be manifested and harmonized. It is the incorporation of this spirit of individualism into education that constitutes the "New Education."

This spirit, as manifested in the sophists and their teaching, directed itself against the old political spirit in all the departments of life — in religion, in politics, in education. It discredited the old popular gods, upon loyalty to whom the existence of the State had been supposed to depend, substituting for them some crude fancy like Vortex, or some bald abstraction like Intellect. It encouraged the individual to seek his end in his own pleasure, and to regard the State as but a means to that end. It championed an education in which these ideas occupied a prominent place. What the sophists actually taught the ambitious young men who sought their instruction, was self-assertion, unscrupulousness, and a showy rhetoric, in whose triumphal procession facts, fancies, and falsehoods marched together

in brilliant array. It is but fair to them to say that, in their endeavor to instruct young men in the art of specious oratory, they laid the foundations of the art of rhetoric and the science of grammar. So much, at least, the world owes to them.

Since it was to the young men, who, freed from the discipline of home, pedagogue, school, and palæstra, could be met with anywhere, in the street, the agora, the gymnasium, that the sophists directed their chief attention, it was of course these who first showed the effects of their teaching. But their influence, falling in, as it did, with the pronounced radical tendencies of the time, soon made itself felt in all grades of education, from the family to the university, in the form of an irreverent, flippant, conceited rationalism, before whose self-erected and self-corrupted tribunal every institution in heaven and earth was to be tried. In the schools this influence showed itself in various ways: (1) in an increased attention to literature, and especially to the formal side of it, (2) in the tendency to substitute for the works of the old epic and lyric poets the works of more recent writers tinged with the new spirit, (3) in the introduction of new and complicated instruments and kinds of music, (4) in an increasing departure from the severe physical and moral discipline of the old days. We now, for the first time, hear of a teacher of literature, distinct from the music master, of teachers who possessed no copy of Homer (Alcibiades is said to have chastised such a one), of flutes, citharas, and the like in use in schools, of wildness and lewdness among boys of tender age. In the palæstra the new spirit showed itself in a tendency to substitute showy and unsystematic exercises for the vigorous and graded exercises of the older time, to sacrifice education to execution.

But, as already remarked, the new spirit showed itself most clearly and hurtfully in the higher education. The young men, instead of spending their time in vigorous physical exercise in the gymnasia and open country, began now to hang about the streets and public places, listening to sophistic discussions, and to attend the schools of the sophists, exercising their tongues more than any other part of their bodies. The effect of this soon showed itself in a decline of physical power, of endurance, courage, and manliness, and in a strong tendency to luxury and other physical sins. They now began to

imagine for themselves a private life, very far from coincident with that demanded of a citizen, and to look upon the old citizen-life, and its ideals, sanctions, and duties, with contempt or pity, as something which they had learnt to rise above. The glory and well-being of their country were no longer their chief object of ambition. The dry rot of individualism, which always seems to those affected by it an evidence of health and manly vigor, was corrupting their moral nature, and preparing the way for the destruction of the State. For it was but too natural that these young men, when they came to be members of the State, should neglect its lessons and claims, and, following the new teachings, live to themselves. Thus, just as the character of the "Old Education" of Athens showed itself in the behavior of her sons in the Persian Wars, so that of her "New Education" showed itself fifty years later in the Peloponnesian War, that long and disastrous struggle which wrecked Athens and Greece.

Yet Athens and her education were not allowed to go to ruin without a struggle. The aristocratic party long stuck to the old principles and tried to give them effect; but, failing to understand the new circumstances and to take account of them, it erred in the application of them, by seeking simply to restore the old conditions. Individuals also exerted their best efforts for the same end. Æschylus, who had fought at Marathon, and who, more than any other Greek, was endowed with the spirit of religion, interpreted the old mythology in an ethical sense, and in this form worked it into a series of dramas, whereby the history and institutions of the Greek people were shown to be due to a guiding Providence of inexorable justice, rewarding each man according to his works, abhorring proud homes "gilded with impurity of hands," and dwelling with the pure and righteous, though housed in the meanest cot. Æschylus thus became, not only the father of Greek tragedy, but also the sublimest moral teacher Greece ever possessed. For moral grandeur there is but one work in all literature that can stand by the side of Æschylus' *Oresteia*, and that is the *Divine Comedy*. Yet Æschylus was driven from Athens on a charge of impiety, and died in exile.

But it was not the tragic drama alone that was inspired and made a preacher of righteousness: in the hands of Aristophanes, the comic drama exerted all its power for the same end. For over thirty years

this inimitable humorist used the public theatre to lash the follies, and hold up to contempt the wretched leaders, of the Athenian populace, pointing out to his countrymen the abyss of destruction that was yawning before them. The world has never seen such earnest comedy, not even in the works of Molière or Beaumarchais. Yet it was all in vain. Long before his death, Aristophanes was forbidden to hold up to public scorn the degradation of his people.

Among the individual citizens who labored with all their might to bring back Athens to her old worth were two of very different character, endowments, and position, the one laboring in the world of action, the other in the world of thought. The first was Pericles, who, seeing that democracy was the order of the day, accepted it, and, by his personal character and position, strove to guide it to worthy ends. In order to encourage gymnastic exercises, particularly among the sons of the newer families, he built the Lyceum, in a grove sacred to Apollo, between Cynosarges and the city walls, as a gymnasium for them. With a view to encouraging among them the study of music, he built an odeon, or music-hall, under the southeast end of the Acropolis. Both were magnificent structures. What he did towards the completion of the great theatre for the encouragement of dancing, we do not know; that this entered into his plan, there can hardly be any doubt. But Pericles was too wise a man to suppose that he could induce his pleasure-seeking countrymen to subject themselves to the old discipline, without offering them an object calculated to rouse their ambition and call forth their energy. This object was nothing less than a united Greece, with Athens as its capital. How hard he tried to make this object familiar to them, and to render Athens worthy of the place he desired her to occupy, is pathetically attested to this day by the Propylæa and the Parthenon. On the frieze of the latter is represented the solemn sacrifice that was to cement the union of the Hellenic people, and place it at the head of civilization. When degenerate Greece resisted all his efforts to make her become one peaceably, he tried to make her do so by force, and the Peloponnesian War, started on a mere frivolous pretext, was the result. He did not live long enough to learn the outcome of this desperate attempt to wake his countrymen to new moral and political life, and it was well. If he had, he might have been forced to

recognize that he had been attempting an impossible task, — trying to erect a strong structure with rotten timber, to make a noble State out of ignoble, selfish men. Unfortunately, the example of his own private life, in which he openly defied one of the laws of the State, and tried to make concubinage (ἑταιρήσις) respectable, more than undid all the good he sought to accomplish. The truth is, Pericles was himself too deeply imbued with the three vices of his time — rationalism, self-indulgence, and love of show — to be able to see any true remedy for the evils that sprang from them. What was needed was not letters, music, gymnastics, dancing, or dream of empire, but something entirely different — a new moral inspiration and ideal.

This, the second of the men to whom reference has been made, Socrates, sought to supply. In the midst of self-indulgence, he lived a life of poverty and privation; in the midst of splendor and the worship of outward beauty, he pursued simplicity and took pleasure in his ugliness; in the midst of self-assertive rationalism and all-knowing sophistry, he professed ignorance and submission to the gods. The problem of how to restore the moral life of Athens and Greece presented itself to Socrates in this form: *The old ethical social sanctions, divine and human, having, under the influence of rationalism and individualism, lost their power, where and how shall we find other sanctions to take their place?* To answer this one question was the aim of Socrates' whole life. He was not long in seeing that any true answer must rest upon a comprehension of man's entire nature and relations, and that the sophists were able to impose upon his countrymen only because no such comprehension was theirs. He saw that the old moral life, based upon naïve tradition and prescription, sanctioned by gods of the imagination, would have to give place to a moral life resting upon self-understanding and reflection. He accordingly adopted as his motto the command of the Delphic oracle, *Know Thyself* (γνῶθι σεαυτόν), and set to work with all his might to obey it.

He now, therefore, went to meet the sophists on their own ground and with their own methods, and he did this so well as to be considered by many, Aristophanes among them, as the best possible representative of the class. What is true is, that he was the first

Athenian who undertook to do what the sophists had for some time considered their special function, — to impart a “higher education” to the youth and men of Athens. He went about the streets, shops, walks, schools, and gymnasia of the city, drawing all sorts of persons into conversation, and trying to elicit truth for himself and them (for he pretended to know nothing). He was never so pleased as when he met a real sophist, who professed to have knowledge, and never so much in his element as when, in the presence of a knot of young men, he could, by his ironical, subtle questions, force said sophist to admit that he too knew nothing. The fact was, Socrates, studying Heraclitus, had become convinced that the reason why men fell into error was because they did not know themselves, or their own thoughts, because what they called thoughts were mere opinions, mere fragments of thoughts. He concluded that, if men were ever to be redeemed from error, intellectual and moral, they must be made to think whole thoughts. Accordingly, he took the ordinary opinions of men and, by a series of well-directed questions, tried to bring out their implications, that is, the wholes of which they were parts. Such is the Socratic or dialectic (= conversational) method. It does not pretend to impart any new knowledge, but merely, as Socrates said, to deliver the mind of the thoughts with which it is pregnant. And Socrates not only held that saving truth consisted of whole thoughts; he held also that all such thoughts were universally and necessarily true; that, while there might be many opinions about a thing, there could be but one truth, the same for all men, and therefore independent of any man. This was the exact opposite of what Protagoras the sophist had taught, the opposite of the gospel of individualism (see p. 93). Man is so far from being the measure of all things, that there is in all things a measure to which he must conform, if he is not to sink into error. This measure, this system of whole truths, implying an eternal mind to which it is present, and by which it is manifested in the world, is just what man arrives at, if he will but think out his thoughts in their completeness. In doing so, he at once learns the laws by which the universe is governed and finds a guide and sanction for his own conduct — a sanction no longer external and imposed by the State, but internal and imposed by the mind. A system like this involved a complete reversal of the old view of the

relation between man and the State, and at the same time took the feet from under individualism. "It is true," said Socrates in effect, "that the individual, and not the State, is the source of all authority, the measure of all things; but he is so, not as individual, but as endowed with the universal reason by which the world, including the State, is governed." This is the sum and substance of Socrates' teaching, this is what he believed to be true self-knowledge. This is the truth whose application to life begins a new epoch in human history, and separates the modern from the ancient world; this is the truth that, reiterated and vivified by Christianity, forms the very life of our life to-day.

In adopting this view, Socrates necessarily formed "a party by himself," a party which could hope for no sympathy from either of the other two into which his countrymen were divided. The party of tradition charged him with denying the gods of his country and corrupting her youth; the radical party hated him because he convicted its champions of vanity, superficiality, and ignorance. Between them, they compassed his death, and Athens learnt, only when it was too late, that she had slain her prophet. But Socrates, though slain, was not dead. His spirit lived on, and the work which he had begun grew and prospered. Yet it could not save Athens, except upon a condition which she neither would nor could accept, that of remodelling her polity and the life of her citizens in accordance with divine truth and justice. Indeed, though he discovered a great truth, Socrates did not present it in a form in which it could be accepted under the given conditions. He himself even did not by any means see all the stupendous implications of his own principle, which, in fact, was nothing less than the ground of all true ethics, all liberty, and all science. It is doubtful whether any one sees them now, and certain that they have been nowhere realized. Still his truth and his life were not without their immediate effect upon Athens and Athenian education. Men, working in his spirit, and inspired with his truth, more or less clearly understood, almost immediately replaced the sophists in Athens, and drew the attention of her citizens, old and young, to the serious search for truth. In fact, from this time on, the intellectual tendency began to prevail over the gymnastic and musical, and this continued until, finally, it absorbed

the whole life of the people, and Athens, from being a university-State, became a State-university. Such it was in the days of Cicero, Paul, Plutarch, Lucian, and Proclus. That this one-sided tendency was fatal to the political life of Athens, and therefore, in some degree, to its moral life, is clear enough; and, though we cannot hold Socrates personally responsible for this result, we must still admit that it was one which flowed from his system of thought. Personally, indeed, Socrates was a moral hero, and "five righteous" men like him, had they appeared, would have gone far to save Athens; but this very heroism, this inborn enthusiasm for righteousness, blinded him so far as to make him believe that men had only to know the right in order to be ready to follow it. Hence that exaggerated importance attached to right knowing, and that comparative neglect of right feeling and right doing, which in the sequel proved so paralyzing. Hence the failure of Socrates' teaching to stem the tide of corruption in Athens, and restore her people to heroism and worth.

Socrates left behind him many disciples, some of whom distinguished themselves in practical ways, others as founders of philosophic schools, emphasizing different sides of his teaching. He was but a few years in his grave when two of these were teaching regularly in the two old gymnasia of Athens. Plato, a full-blooded Athenian, was teaching in the Academy the intellectual and moral theories of his master, while Antisthenes, a half-breed (his mother being a Thracian), was inculcating the lesson of his heroic life in Cynosarges. Their followers were called, respectively, Academics and Cynics. Thus, by these two men, was the higher education for the first time introduced into the public institutions of Athens.

Socrates' aim, as we have seen, had been purely a moral one, and this fact was not lost sight of by his immediate followers. The chief question with them all was still: How can the people be brought back to moral life? But, thanks partly to the vagueness in which he had left the details of his doctrine, they were divided with respect to the means whereby this was to be accomplished. One party, best represented by Plato, and following most closely in the footsteps of the master, held that, man being essentially a social being, and morality a relation in society, it was only in and through a social order, a State, that virtue could be realized. Another party,

represented by Antisthenes, maintained that virtue was a purely personal matter, and that the wise man stood high above any and all social institutions. These two views maintained themselves, side by side, in nearly all subsequent Greek thought, and at last found expression in the State and Church of the Christian world.

Two of Socrates' followers, believers in institutional morality, left behind them treatises which have come down to us, giving their views as to the manner in which virtue might be cultivated. These are the practical Xenophon and the theoretic Plato, both men of pure Athenian stock. Nothing will better enable us to comprehend the evils of the "New Education" than a consideration of the means by which these worthy men proposed to remedy them. Both are idealists and Utopians; but the former is conservative and reactionary, while the latter is speculative and progressive. Both are aiming at one thing — a virtuous and happy State, to replace the vicious and wretched one in which they found their lot cast; but they differed in their views regarding the nature of such a State, and the means of realizing it.

CHAPTER II

XENOPHON

Never a good is the rule of the many; let one be the ruler. — Homer.

Wealth without Worth is no harmless housemate. — Sappho.

One to me is ten thousand, if he be best.

All the Ephesians, from youth up, ought to be hanged and the State left to the boys, because they cast out Hermodorus, the worthiest man amongst them, saying: ‘No one of us shall be worthiest, else let him be so elsewhere and among others.’ — Heraclitus.

Reflecting once that, of the very small states, Sparta appeared to be the most powerful and the most renowned in Greece, I began to wonder in what way this had come about. But when I reflected upon the manners of the Spartans, I ceased to wonder. As to Lycurgus, who drew up for them the laws, by obedience to which they have prospered, I admire him and hold him to be, in the highest degree, a wise man. For he, instead of imitating other states, reached conclusions opposite to those of most, and thereby rendered his country conspicuous for prosperity. — Xenophon.

Xenophon was in no sense a philosopher or a practical teacher, but he was a man of sterling worth, of knightly courage, of wide and varied experience, of strong sagacity, and of genial disposition, a keen observer, and a charming writer. He was a true old Athenian puritan, broadened and softened by study and contact with the world. He hated democracy so cordially that he would not live in Athens to witness its vulgarity and disorder; but he loved his country, and desired to see its people restored to their ancient worth. He believed that this could be done only by some great, royal personality, like Lycurgus or Cyrus, enforcing a rigid discipline, and once more reducing the man to the citizen. Unwilling, probably, to hold up hated Sparta as a model to his beaten and smarting countrymen, he laid the scene of his pedagogical romance in far-off Persia.

In the *Education of Cyrus* (Κύρου παιδεία) we have Xenophon’s scheme for a perfect education. Despite the scene in which it is laid,

it is purely Hellenic, made up of Athenian and Spartan elements in about equal proportions. For this reason also it has a special interest for us. As the portion of the treatise dealing directly with public education is brief, we can hardly do better than transcribe it in a translation.

“Cyrus is still celebrated in legend and song by the barbarians as a man of extraordinary personal beauty, and as of a most gentle, studious, and honor-loving disposition, which made him ready to undergo any labor, and brave any danger, for the sake of praise. Such is the account that has been handed down of his appearance and disposition. He was, of course, educated in accordance with the laws of the Persians. These laws seem to begin their efforts for the public weal at a different point from those of most other states; for most states, after allowing parents to educate their children as they please, and the older people even to spend their time according to their own preference, lay down such laws as: Thou shalt not steal, Thou shalt not rob, Thou shalt not commit burglary, Thou shalt not commit assault, Thou shalt not commit adultery, Thou shalt not disobey a magistrate, etc.; and if any one transgresses any of these laws, they inflict punishment on him. The Persian laws, on the contrary, provide beforehand that the citizens shall never, from the very first, have any disposition to commit a wicked or base act. And they do so in this way. They have what they call a Freeman’s Square, where the royal palace and the other public buildings stand. From this square are removed all wares and chafferers, with their cries and vulgarities, to another place, so that their din and disorder may not interfere with the decorum of the cultivated class. This square in the neighborhood of the public buildings is divided into four parts, one for boys, one for youths (ἔφηβοι), one for mature men, and one for men beyond the military age. The hour when these shall appear in their places is settled by law. The boys and mature men come at daybreak, the older men when they think fit, except on the special days when they are bound to appear. The youths pass the night by the public buildings in light armor, only those who are married being excused. These are not hunted up, unless they have been ordered beforehand to appear; but it is not thought decent to be often absent. Each of these divisions is under the charge of twelve governors, one from each of the twelve

tribes into which the Persians are divided. The governors of the boys are chosen from among the elderly men, with special view to their fitness for making the most of boys, while those of the youths are chosen from among the mature men upon a similar principle. Those of the mature men are selected with a view to their ability to hold these to their regular duties, and to the special commands of the supreme authority. Even the old men have presidents appointed over them, who see that they perform their duty. What the duties of each are we shall now state, in order to show just how provision is made for securing the highest worth on the part of the citizens.

“First, then, the boys, when they go to school, spend their time in learning justice. They say they go for that purpose, just as our boys go to learn letters. Their governors spend the greater part of the day in acting as judges among them. It is needless to say that boys, as well as men, bring charges against each other of theft and robbery and violence and deceit and slander, and similar things, and those whom the judges find guilty of any of these they punish. But they also punish those whom they find bringing false charges. They pronounce judgment likewise on a charge which, more than anything else, makes men hate each other, and for which they are judged less than for any other, namely, ingratitude. If the judges find a boy in a position to return a favor and not doing it, they punish him severely, believing that persons who are ungrateful will, more than any others, be undutiful to the gods, to parents, country, and friends. It is generally held that ingratitude, more than aught else, leads to irreverence, and we need not add that *it* is the prime mover in every form of baseness. They teach the boys also self-denial, and these are greatly aided in learning this virtue from seeing it daily practised by their elders. Another thing they teach them is obedience to those placed in authority over them; and they are greatly aided in learning this, by seeing their elders strictly obeying their governors. Another thing yet which they teach them is self-discipline in matters of eating and drinking; and they are greatly aided in this by seeing that their elders never absent themselves for the purpose of eating, until they are permitted to do so by their governors, as well as by the fact that they (the boys) do not eat with their mothers, but with their teachers, and at a signal from their governors. As food, they bring with them

from home bread, as a relish, nasturtium, and in order to drink, if they are thirsty, they bring an earthen cup to draw water from the river with. In addition to all these things, the boys learn to shoot with the bow and to throw the javelin. Up to the age of sixteen or seventeen years, these are the studies in which the boys engage; after that they are transferred to the class of cadets (ἐφηβοί).

“These cadets spend their time in this way: For ten years from the time when they graduate from the boys’ class, they sleep, as we have already said, in the precincts of the public buildings, acting at once as a guard to the city and practising self-denial. It is generally agreed, indeed, that this is the age which especially requires attention. During the day they are at the disposal of their governors, and ready to perform any public service required. If no such service is demanded, they remain in the neighborhood of the public buildings. When the king goes out to hunt, which he does many times a month, he takes with him one-half of the tribes, and leaves the other behind. Those youths who accompany him must carry with them bows and, in a sheath alongside their quivers, a bill or scimitar; also a light shield, and two javelins apiece, one to throw, the other to use, if necessary, at close quarters. For this reason they make hunting a matter of public concern, and the king, as in war, acts as their leader, hunts himself, and sees that the others hunt, the Persians being of opinion that this is the best of all preparations for war. And, indeed, it accustoms them to rise early, and to bear heat and cold; it affords them exercise in marching and running, and compels them to use their bows or their javelins upon wild animals, wherever they happen to come upon them. They are often forced, moreover, to sharpen their courage, when they find themselves face to face with some powerful animal. They must, of course, wound the one that comes to close quarters, and hold at bay the one that attacks them. Hence it is difficult to find in war anything that is absent from the chase. When they go out to hunt, the young men, of course, take with them a larger luncheon than the boys are allowed to have; but this is the only difference between the two. And while they are hunting, they sometimes do not lunch at all; but, if they have to remain beyond their time on account of some game, or otherwise, if they wish to prolong the chase, they make a dinner of this lunch, and on the

following day continue the hunt till dinner-time, counting the two days one, because they consume only one day's food. And they do this for the sake of practice, so that, if ever they should run short of provisions in war, they may be able to do the same thing. These youths have as a relish what game they capture in the chase, otherwise they have nasturtium. And if any one thinks that they eat without pleasure, when they have only nasturtium with their food, or drink without pleasure, when they drink water, let him remember how sweet barley-cake and wheaten bread are when he is hungry, and how sweet water is when he is thirsty. The tribes that remain behind, when the king goes hunting, spend their time in the same studies which they pursued as boys, including shooting and javelin-casting, and in these continual contests are going on. There are likewise public exhibitions in them, at which prizes are offered; and whichever tribe contains most young men exceptionally proficient, manly, and steady, is commended by the citizens, who likewise honor, not only their present governor, but also the governor who had charge of them as boys. The young men who are left behind are also employed by the authorities, if any such service is required as manning a guard-house, tracking out malefactors, running down robbers, or anything demanding strength and swiftness. Such are the studies of the young men. And when they have passed ten years in these, they graduate into the class of mature men.

“From the date of this graduation, they spend five and twenty years more in the following manner: In the first place, like the young men, they place themselves at the disposal of the authorities for any public service requiring at once sagacity and unimpaired strength. If they are required to take the field in war, men proficient as they are go armed, no longer with bows and javelins, but with what are called hand-to-hand weapons, breast-plates, shields in their left hands, such as we see in pictures of the Persians, and a sword or bill in their right. And all the officials are drawn from this class, except the boys' teachers. And when they have passed twenty-five years in this class, they are something more than fifty years of age. At that age they graduate into the class of elders, as, indeed, they are called.

“These elders no longer serve in war outside their own country, but, remaining at home, act as judges in public and private cases.

They do so even in capital cases. They likewise choose all the officials, and if any person belonging to either of the classes of young and mature men neglects any of his lawful duties, the governor of his tribe, or any one else who pleases, may report him to the elders, and these, if they find the fact to be as reported, expel him from his tribe, and he who is expelled remains dishonored all his life.

“To give a clearer notion of the polity of the Persians as a whole, I will retrace my steps a little. After what has been said, this may be done in a very few words: The Persians, then, are said to number about one hundred and twenty thousand. Of these, none is excluded by law from honors or offices; but all Persians are allowed to send their sons to the public schools of justice. However, it is only those who are able to maintain their sons without employment that send them there: the rest do not. On the other hand, those that are educated by the public teachers are permitted to spend their youth among the *ephēboi*, while those who have not completed this education are not. Again those that pass their youth among the *ephēboi*, and come up to the legal requirements, are allowed to graduate into the class of mature men, and to participate in honors and offices; whereas those who do not pass through the grade of the *ephēboi* do not rise to the class of mature men. Finally, those who complete the curriculum of the mature men without reproach, pass into the class of elders. Thus it is that this class of elders is composed of men who have passed through all the grades of culture. Such is the polity of the Persians, and such is the system of training whereby they endeavor to secure the highest worth.”

This Utopian scheme of education has a peculiar interest, because it is nothing more or less than the old ideal of Greek education become fully conscious of itself, under the influence of the new ideal. Let us call attention to the main points of it. (1) The education here set forth is purely political: men are regarded simply and solely as citizens; all honors are civic honors. (2) No provision is made for the education of women, their range of activity being entirely confined to the family. (3) Distinction is made to rest upon education and conduct. (4) The poorer classes of the population, though not legally excluded from education, position, and power, are virtually excluded by their poverty, so that the government is altogether in the

hands of the rich, and is, in fact, an aristocracy, while pretending to be a democracy: hence, (5) Social distinctions are distinctions of worth, which is just the Greek ideal.

There is, however, one point in the scheme which shows that it is reactionary, directed against prevailing tendencies. Not one word is said of the intellectual side of education, of music or letters. It is evident that Xenophon, himself a man of no mean literary attainments, clearly saw the dangers to Greek life and liberty involved in that exaggerated devotion to literary and intellectual pursuits which followed the teaching of the sophists and Socrates, and that, in order to check this perilous tendency, he drew up a scheme of education from which intellectual and literary pursuits are altogether excluded, in which justice takes the place of letters, and music is not mentioned.

This suggests a curious inquiry in respect to his *Memoirs of Socrates*. This work has generally been regarded as giving us a more correct notion of the real, living Socrates than the manifestly idealizing works of Plato. But was not Xenophon, who could not fail to see the future power of Socrates' influence, as anxious as Plato to claim the prophet as the champion of his own views, and does not this fact determine the whole character of his work? Is it not a romance, in the same sense that the *Cyropædia* is, with only this difference, that the facts of Socrates' life, being fairly well known to those for whom Xenophon was writing, could not be treated with the same freedom and disregard as those of Cyrus' life?

Before we part with Xenophon, we must call attention to another treatise of his, in which he deals with a subject that was then pressing for consideration — the education of women. While, as we have seen, the Æolian states and even Dorian Sparta provided, in some degree, for women's education, Athens apparently, conceiving that woman had no duties outside of the family, left her education entirely to the care of that institution. The conservative Xenophon does not depart from this view; but, seeing the moral evils that were springing from the neglect of women and their inability to be, in any sense, companions to their cultured, or over-cultured, husbands, he lays down in his *Œconomics* a scheme for the education of the young wife *by her husband*. As this affords us an admirable insight into the

lives of Athenian girls and women, better, indeed, than can be found elsewhere, we cannot do better than transcribe the first part of it. It takes the form of a conversation between Socrates and a young husband, named Ischomachus (Strong Fighter), and is reported by the former. Socrates tells how, seeing Ischomachus sitting at leisure in a certain portico, he entered into conversation with him, paid him an acceptable compliment, and inquired how he came to be nearly always busy out of doors, seeing that he evidently spent little time in the house. Ischomachus replies: —

“‘As to your inquiry, Socrates, it is true that I never remain indoors. Nor need I; for my wife is fully able by herself to manage everything in the house.’ ‘This again, Ischomachus,’ said I, ‘is something that I should like to ask you about, whether it was you who taught your wife to be a good wife, or whether she knew all her household duties when you received her from her father and mother.’ ‘Well, Socrates,’ said he, ‘what do you suppose she knew when I took her, since she was hardly fifteen when she came to me, and, during the whole of her life before that, special care had been taken that she should see, hear, and ask as little as possible. Indeed, don’t you think I ought to have been satisfied if, when she came to me, she knew nothing but how to take wool and turn it into a garment, and had seen nothing but how tasks in spinning are assigned to maids? As regards matters connected with eating and drinking, of course she was extremely well educated when she came, and this seems to me the chief education, whether for a man or a woman.’ ‘In all other matters, Ischomachus,’ said I, ‘you yourself instructed your wife, so as to make her an excellent housewife.’ ‘To be sure,’ said he, ‘but not until I had first sacrificed, and prayed that I might succeed in teaching her, and she might succeed in learning, what was best for both of us.’ ‘Then,’ said I, ‘your wife took part in your sacrifice and in these prayers, did she not?’ ‘Certainly she did,’ said Ischomachus, ‘and solemnly promised to the gods that she would be what she ought to be, and showed every evidence of a disposition not to neglect what was taught her.’ ‘But do, I beseech you, Ischomachus, explain to me,’ said I, ‘what was the first thing you set about teaching her? I shall be more interested in hearing you tell that, than if you told me all about the finest gymnastic or equestrian

exhibition.' And Ischomachus replied: 'What *should* I teach her? As soon as she could be handled, and was tame enough to converse, I spoke to her in some such way as this: Tell me, my dear, have you ever considered why I took *you* as my wife, and why your parents gave you to me? That it was not because I could not find any one else to share my bed, you know as well as I. No, but because I was anxious to find for myself, and your parents were anxious to find for you, the most suitable partner in home and offspring, I selected you, and your parents, it seems, selected me, out of all possible matches. If, then, God shall ever bless us with children, then we will take the greatest care of them, and try to give them the best possible education; for it will prove a blessing to both of us to have the very best of helpers and supports in our old age. But at present we have this as our common home. And all that I have, I pass over to the common stock, and all that you have brought with you, you have added to the same. Nor must we begin to count which of us has contributed the larger number of things, but must realize that whichever of us is the better partner contributes the more valuable things. Then, Socrates, my wife replied, and said: In what way can I coöperate with you? What power have I? Everything rests with you. My mother told me that my only duty was to be dutiful. Assuredly, my dear, said I, and my father told me the same thing. But it is surely the duty of a dutiful husband and a dutiful wife to act so that what they have may be improved to the utmost, and by every fair and lawful means increased to the utmost. And what do you find, said my wife, that I can do towards helping you to build up our house? Dear me! said I, whatever things the gods have endowed you with the power to do, and the law permits, try to do these to the best of your ability. And what *are* these? said she. It strikes me, said I, that they are by no means the least important things, unless it be true that in the hive the queen-bee is entrusted with the least important functions. Indeed, it seems to me, my dear, I continued, that the very gods have yoked together this couple called male and female with a very definite purpose, viz. to be the source of the greatest mutual good to the yoke-fellows. In the first place, this union exists in order that living species may not die out, but be preserved by propagation; in the second, the partners in this union, at least in the case of human

beings, obtain through it the supports of their old age. Moreover, human beings do not live, like animals, in the open air, but obviously require roofs. And I am sure, people who are going to have anything to bring under a roof must have some one to do outdoor duties; for, you see, ploughing, sowing, planting, herding, are all outdoor employments, and it is from them that we obtain all our supplies. On the other hand, when the supplies have all been brought under cover, there is needed some one to take care of them, and to perform those duties which must be done indoors. Among these are the rearing of children and the preparation of food from the produce of the earth; likewise the making of cloth out of wool. And, since both these classes of duties, the outdoor and the indoor, require labor and care, it seems to me, I said, that God has constructed the nature of woman with a special view to indoor employments and cares, and that of man with a view to outdoor employments and cares. For he has made both the body and the soul of the man better able than those of the woman to bear cold, heat, travelling, military service, and so has assigned to him the outdoor employments. And, since he has made the body of woman less able to endure these things, he seems to me to have assigned to her the indoor employments. Considering, moreover, that he had made it woman's nature and duty to nourish young children, he imparted to her a greater love for babies than he did to man. And, inasmuch as he had made it part of woman's duty to take care of the income of the family, God, knowing that for care-taking the soul is none the worse for being ready to fear, bestowed upon woman a greater share of fear than upon a man. On the other hand, knowing that he who attends to the outdoor employments will have to protect the family from wrong-doers, he endowed him with a greater share of courage. And, since both have to give and receive, he divided memory and carefulness between them, so that it would be difficult to determine which of the sexes, the male or the female, is the better equipped with these. And the necessary self-denial he divided between them, and made a decree that, whichever of the two, the husband or the wife, was the superior, should be rewarded with the larger share of this blessing. And just because the nature of man and the nature of woman are not both equally fitted for all tasks, the two are the more dependent upon each other, and their union is the

more beneficial to them, because the one is able to supply what the other lacks. And now, said I, my dear, that we know the duties which God has assigned to us respectively, it becomes each of us to do our best, in order to perform these duties. And the law, I continued, coincides with the divine intention, and unites man and woman. And, just as God has made them partners in offspring, so the law makes them partners in the household. And the law sets its approval upon that difference of function which God has signified by the difference of ability which marks the sexes. For it is more respectable for a woman to remain indoors than to spend her time out of doors, and less respectable for a man to remain indoors than to attend to outdoor concerns. And, if any one acts in a manner at variance with this divine ordination, it may be that his transgression does not escape the notice of the gods, and that he is punished for neglecting his own duties or performing those of his wife. It appears to me, said I, that the queen-bee also performs duties that are assigned to her by God. And what duties, said my wife, does the queen-bee perform, that have any resemblance to those incumbent upon me? This, said I, that she remains in the hive and does not allow the other bees to be idle, but sends out those that have to work to their business, and knows and receives what each brings in, and takes care of it till it is needed for use. And when the time for using comes, she distributes to each her just share. Besides this, she attends to the construction of the honey-combs that goes on indoors, and sees that it is done properly and rapidly, and carefully sees that the young swarm is properly reared. And when it is old enough, and the young bees are fit for work, she sends them out, as a colony, under the leadership of one of the old ones. And will it be my duty, said my wife, to do these things? Exactly so, said I, it will be your duty to remain indoors, to send out together to their work those whose duties lie out of doors, and to superintend those who have to work indoors, to receive whatever is brought in, to dispense whatever has to be paid out, while the necessary surplus you must provide for, and take care that the year's allowance be not spent in a month. When wool is brought in to you, you must see that it is turned into cloth; and when dried grain comes, that it is properly prepared for food. There is, however, one of your duties, said I, that will perhaps seem somewhat

disagreeable to you. Whenever any one of the slaves is sick, you will have to see that he is properly nursed, no matter who he is. Indeed, said my wife, that will be a most pleasant duty, if those who have been carefully nursed are going to be grateful and kindlier than they were before. And I,' said Ischomachus, 'admiring her answer, continued: Don't you suppose, my dear, that by such examples of care on the part of the queen of the hive the bees are so disposed to her that, when she leaves, none of them are willing to remain behind, but all follow her? And my wife replied: I should be surprised if the duties of headship did not fall to you rather than to me. For my guardianship and disposal of things in the house would be ridiculous, unless you saw to it that something was brought in from without. And my bringing-in would be ridiculous, said I, if there were no one to take care of what I brought? Don't you see, I said, how those who pour water into a leaky barrel, as the expression is, are pitied, as wasting their labour? And indeed, said my wife, they are to be pitied, if they do that. There are other special duties, said I, that are sure to become pleasant to you; for example, when you take a raw hand at weaving and turn her into an adept, and so double her value to you, or when you take a raw hand at managing and waiting and make her capable, reliable, and serviceable, so that she acquires untold value, or when you have it in your power to reward those male slaves that are dutiful and useful to your family, or to punish one who proves the opposite of this. But the pleasantest thing of all will be, if you prove superior to me, and make me your knight, and if you need not fear that, as you advance in years, you will forfeit respect in the house, but are sure that, as you grow older, the better a partner you are to me, and the better a mother to the children, the more highly you will be respected in the house. For all that is fair and good, said I, increases for men, as life advances, not through beauties, but through virtues. Such, Socrates, to the best of my recollection, was the first conversation I had with my wife.'"

Ischomachus goes on and tells how, in subsequent conversations, he taught his wife the value of order, "how to have a place for everything, and everything in its place," how to train a servant, and how to make herself attractive without the use of cosmetics or fine clothes. But enough has been quoted to show what the ideal family

relation among the Athenians was, and what education was thought fitting for girls and women. Just as the man was merged in the citizen, so the woman was merged in the housewife, and they each received the education and training demanded by their respective duties. If Athenian husbands had all been like Ischomachus, it is clear that the lives of wives might have been very happy and useful, and that harmony might have reigned in the family. But, unfortunately, that was not very often the case. Wives, being neglected, became lazy, wasteful, self-indulgent, shrewish, and useless, while their husbands, finding them so, sought in immoral relations with brilliant and cultivated *hetærae*, or in worse relations still, a coarse substitute for that satisfaction which they ought to have sought and found in their own homes. Thus there grew up a condition of things which could not fail to sap the moral foundations of society, and which made thoughtful men turn their attention to the question of woman's education and sphere of duty.

CHAPTER III

PLATO

All human laws are nourished by the one divine law; for it prevaieth as far as it listeth, and sufficeth for all and surviveth all. — Heraclitus.

Though reason is universal, the mass of men live as if they had each a private wisdom of his own. — *Id.*

Antigone. ... But him will I inter;
And sweet 'twill be to die in such a deed,
And sweet will be my rest with him, the sweet,
When I have righteously offended here.
For longer time, methinks, have I to please
The dwellers in yon world than those in this;
For I shall rest forever there. But thou,
Dishonor still what's honored of the gods.
— Sophocles, *Antigone*.

The circle that gathered round Isaiah and his household in these evil days, holding themselves apart from their countrymen, treasuring the word of revelation, and waiting for Jehovah, were indeed, as Isaiah describes them, “signs and tokens in Israel from Jehovah of hosts that dwelleth in Mount Zion.” The formation of this little community was a new thing in the history of religion. Till then no one had dreamed of a fellowship of faith dissociated from all national forms, maintained without the exercise of ritual services, bound together by faith in the divine word alone. It was the birth of a new era in the Old Testament religion, for it was the birth of the conception of the *Church*, the first step in the emancipation of spiritual religion from the forms of political life, — a step not less significant that all its consequences were not seen till centuries had passed away. — W. Robertson Smith, *Prophets of Israel*.

Still at the prophets' feet the nations sit. — Lowell.

That which is to be known I shall declare, knowing which a man

attains immortality — the beginningless Supreme Brahma that is said to be neither Aught nor Naught. — *Bhagavad Gîtâ*.

The only Metaphysics which really and immediately sustains Ethics is one which is itself primarily ethical, and made of the stuff of Ethics. — Schopenhauer.

In answer to the burning question, How can Athens be brought back to moral life and strength? Socrates had answered, “By finding a new moral sanction.” He had even gone further, and said: “This sanction is to be found in correct thinking, in thinking whole thoughts, which, because they are whole, are absolutely true, being the very principles according to which God governs the world.” This is, obviously, a mere formal answer. If it was to be of any real service, three further questions had to be answered: (1) How can whole thoughts be reached? (2) What do they prove to be when they are reached? (3) How can they be applied to the moral reorganization of human life? Plato’s philosophy is but an attempt to answer these questions. It therefore naturally falls into three divisions, (1) *Dialectics*, including Logic and Theory of Knowledge, (2) *Theoretics*, including Metaphysics and Physics, (3) *Practics*, including Ethics and Politics.

It is obvious that any attempt to reform society on Socratic principles must proceed, not from society itself, but from some person or persons in whom these principles are realized, and who act upon it from without. These persons will be the philosophers or, rather, the sages. Two distinct questions, therefore, present themselves at the outset: (1) How does a man become a sage? (2) How can the sage organize human life, and secure a succession of sages to continue his work after him? To the first of these questions, dialectics gives the answer; to the second, practics; while theoretics exhibits to us at once the origin and the end, that is, the meaning, of all existence, the human included. In the teaching of Plato we find, for the first time recognized and exhibited, the extra-civic or super-civic man, the man who is not a mere fragment of a social whole, completely subordinated to it, but who, standing above society, moulds it in accordance with ideas derived from a higher source. Forecasts of this man, indeed, we find in all Greek literature from Homer down, — in Heraclitus, Sophocles, etc., and especially, as we

have seen, in Pythagoras; — but it is now for the first time that he finds full expression, and tries to play a conscious part. In him we have the promise of the future Church.

But to return to the first of our two questions, How does a man become a sage? We found the answer to be, By the dialectic method. Of this, however, not all men have the inclination to avail themselves, but only a chosen few, to whom the gods have granted the inspiration of Love (ἔρως) — a longing akin to madness (μανία), kindled by physical beauty, but tending to the Supreme Good. This good, as we shall see, consists in the vision (θεωρία) of eternal truth, of being, as it is. The few men who are blessed with this love are the divinely appointed reformers and guides of mankind, the well-being of which depends upon submission to them. The dialectic method is the process by which the inspired mind rises from the beauty of physical things, which are always particulars, to the beauty of spiritual things, which are always universals, and finally to the beauty of the Supreme Good, which is *The Universal*. The man who has reached this last, and who sees its relation to all other universals, so that they form together a correlated whole, sees all truth, and is the sage. What we call universals Plato called “ideas” (ιδέαι = forms or species). These ideas he regards as genera, as numbers, as active powers, and as substances, the highest of which is God.

Two things are especially notable in connection with this theory: (1) that it involves that Oriental ascetic view of life which makes men turn away from the sensible world, and seek their end and happiness in the colorless world of thought; (2) that it suggests a view of the nature of God which comes perilously near to Oriental pantheism. Plato, indeed, nowhere denies personality of God; but neither does he affirm it, and he certainly leaves the impression that the Supreme Being is a force acting according to a numerical ratio or law. It would be difficult to overestimate the influence of these two views upon the subsequent course of Greek education and life. The former suggested to the super-civic man a sphere of activity which he could flatter himself was superior to the civic, viz. a sphere of contemplation; while the second, by blurring, or rather ignoring, the essential elements of personality in God, viz. consciousness, choice, and will, left no place for a truly religious or moral life. This explains

why Platonism, while it has inspired no great civic movement, has played such a determining part in ecclesiasticism, and why, nevertheless, the Church for ages was compelled to fight the tendencies of it, which it did in great measure under the ægis of Plato's stern critic, Aristotle.

We are now ready to take up our second question: How can the sage organize human life, and secure a succession of sages to continue his work after him? Plato has given two widely different answers to this question, in his two most extensive works, (1) the *Republic*, written in his earlier life, when he was under the influence of Heraclitus, Parmenides, and Socrates, and stood in a negative attitude toward the real world of history, (2) the *Laws*, written toward the end of his life, when he became reconciled, in part at least, to the real world and its traditional beliefs, and found satisfaction and inspiration in the teachings of Pythagoras. His change of allegiance is shown by the fact that in the *Laws*, and in them alone, Socrates does not appear as a character. We shall speak first of the *Republic*, and then point out wherein the *Laws* differs from it.

When Plato wrote his *Republic*, he was deeply impressed with the evils and dangers of the social order in which he lived. This impression, which was that of every serious man of the time, had in his case probably been deepened by the teaching and the tragic death of Socrates. The dangers were, obviously, the demoralization of Athenian men and women, and the consequent weakening and dissolution of the social bonds. The evils, as he saw them, were (1) the defective education of children, (2) the neglect of women, (3) the general disorganization of the State through individualism, which placed power in the hands of ignorance and rapacity, instead of in those of wisdom and worth. The *Republic* is a scheme for removing these evils and averting the consequent dangers. It is the Platonic sage's recipe for the healing of society, and it is but fair to say that, of all the Utopian and æsthetic schemes ever proposed for this end, it is incomparably the best. It proposes nothing less than the complete transformation of society, without offering any hint as to how a selfish and degraded people is to be induced to submit thereto. In the transformed society, the State is all in all; the family is abolished; women are emancipated and share in the education and duties of

men; the State attends to the procreation and education of children; private property is forbidden. The State is but the individual writ large, and the individual has three faculties, in the proper development and coördination of which consists his well-being: the same, therefore, must be true of the State. These faculties are (1) intellect or reason, (λογιστικόν, λόγος, νοῦς, etc.), (2) spirit or courage (θυμός, θυμοειδές), (3) desire or appetite (ἐπιθυμία, ἐπιθυμητικόν, φιλοχρήματον). The first resides in the head, the second in the heart, the third in the abdomen. The first is peculiar to man, the second he shares with the animals, and the third with both animals and plants. The proper relation of these faculties exists when reason, with clear insight, rules the whole man (Prudence); when spirit takes its directions from reason in its attitude toward pleasure and pain (Fortitude); when spirit and appetite together come to an understanding with reason as to when the one, and when the other, shall act (Temperance); and, finally, when each of the three strictly confines itself to its proper function (Justice). Thus we obtain the four “cardinal virtues.” As existing in the individual, they are relations between his own faculties. It is only in the State that they are relations between the individual and his fellows. Rather we ought to say, they are relations between different classes of society; for society is divided into three classes, marked by the predominance of one or other of the three faculties of the soul. *First*, there is the intelligent class, — the philosophers or sages; *second*, the spirited class, — the military men or soldiers; *third*, the covetous class, — men devoted to industry, trade, and money-making. The well-being of the State, as of the individual, is secure only when the relations between these classes are the four cardinal virtues; when the sages rule, and the soldiers and money-makers accept this rule, and when each class strictly confines itself to its own function, so, for example, that the sages do not attempt to fight, the soldiers to make money, or the money-makers to fight or rule. In the Platonic ideal State, accordingly, the three classes dwell apart and have distinct functions. All the power is in the hands of the philosophers, who dwell in lofty isolation, devoted to the contemplation of divine ideas, and descending only through grace to mingle with human affairs, as teachers and absolute rulers, ruling without laws. Their will is

enforced by the military class, composed of both sexes, which lives outside the city, devoting itself to physical exercises and the defence of the State. These two classes together constitute the guardians (φύλακες) of the State, and stand to each other in the relation of head and hand. They produce nothing, own nothing, live sparingly, and, indeed, cherish a sovereign contempt for all producing and owning, as well as for those who produce and own. They find their satisfaction in the performance of their functions, and the maintenance of virtue in the State. What small amount of material good they require is supplied to them by the industrial class, which they protect in the enjoyment of the only good it strives after or can appreciate, the good of the appetites. This class, of course, has no power, either directive or executive, being incapable of any. It is, nevertheless, entirely happy in its condition of tutelage, and, as far as virtue can be predicated of sensuality, virtuous, the excesses of sensuality being repressed by the other two classes. Indeed, the great merit which Plato claims for his scheme is, that it secures harmony, and therefore happiness, for all, by placing every individual citizen in the class to which by nature he belongs, that is, in which his nature can find the fullest and freest expression compatible with the well-being of the whole. Such is Plato's political scheme, marked by the two notorious Greek characteristics, love of harmony and contempt for labor. It is curious to think that it foreshadowed three modern institutions — the ecclesiastical hierarchy, the standing army, and the industrial community, in which, however, the relations of power demanded by Plato are almost reversed, with (it is only fair to say) the result which he foresaw.

In trying to answer the question, By what means shall these classes be sundered? Plato calmly assumes that his scheme is already in full operation among grown people, so that the only difficulty remaining is with regard to the children. And this is completely met by his scheme of education. The State or, let us say at once, the philosophic class, having abolished the family, and assumed its functions, determines what number and kind of children it requires at any given time, and provides for them as it would for sheep or kine. It brings together at festivals the vigorous males and females, and allows them to choose their mates for the occasion. As soon as the

children are born, they are removed from their mothers and taken charge of in State institutions, where the feeble and deformed are at once destroyed. Any children begotten without the authority of the State share the same fate, either before or after birth. Those whose birth is authorized, and who prove vigorous, are reared by the State, none of them knowing, or being known by, their parents. But they by no means suffer any diminution of parentage on that account; for every mature man regards himself as the father, and every mature woman regards herself as the mother, of all the children born within a certain time, so that every child has thousands of fathers and mothers, all interested in his welfare; and the mothers, being relieved from nearly all the duties of maternity, share equally with the men in all the functions of the State.

The system of education to which the children of the State are subjected is, to a large extent, modelled after that of Sparta, especially in respect to its rigor and its absolutely political character. It contains, however, a strong Ionic or Athenian element, notably on the intellectual and æsthetic side. It may fairly claim to be intensely Hellenic. It accepts the time-honored division of education into Music and Gymnastics, making no distinct place for Letters, but including them under Music. It demands that these two branches shall be pursued as parts of a whole, calculated to develop, as far as may be, the harmonious human being, and fit him to become part of the harmonious State. I have said "as far as may be," because Plato believes that only a small number of persons at any given time can be reduced to complete harmony. These are the born philosophers, who, when their nature is fully realized, no longer require the State, but stand, as gods, above it. In truth, the State is needed just because the mass of mankind cannot attain inner harmony, but would perish, were it not for the outer harmony imposed by the philosophers. This is a sad fact, and would be altogether disheartening, were it not for the belief, which Plato seems to have derived from Pythagoras and the Egyptians, that those human beings who fail to attain harmony in one life, will have opportunities to do so in other lives, so long as they do not, by some awful and malignant crime or crimes, show that they are utterly incapable of harmony. Plato's scheme of political education, therefore, requires, as its complement, the doctrines of

individual immortality, of probation continued through as many lives as may be necessary, and of the possibility of final and eternal blessedness or misery. In fact, Plato has a fully-developed eschatology, with an "other world," consisting of three well-defined parts, — Elysium, Acheron, and Tartarus, — corresponding to the Paradise, Purgatory, and Hell of Catholic Christianity; with one important difference, however, due to the doctrine of metempsychosis. While the Christian purgatory is a place or state of purgation for souls whose probation is over forever, Acheron is merely a place where imperfect souls remain till the end of a world-period, or æon, of ten thousand years, when they are again allowed to return to life and renew their struggle for that complete harmony which is the condition of admission to the society of the gods.

It is from this eschatology that Plato derives the moral sanctions which he employs in his State. It is true that no one has insisted with greater force than he upon the truth that virtue is, in and for itself, the highest human good; he believed, however, that this could be appreciated only by the philosopher, who had experience of it, and that for the lower orders of men a more powerful, though less noble, sanction was necessary. Accordingly, he depicts the joys of Elysium in images that could not but appeal to the Hellenic imagination, and paints Tartarus in gruesome colors that would do honor to a St. Ignatius.

In order fully to understand the method of Plato's political education, we must revert to Chapter III of Book I. There we saw that, according to the Greeks, a complete education demanded three things, (1) a noble nature, (2) training through habit, (3) instruction. For the first Plato would do what can be done by artificial selection of parents; for the second, he would depend upon music and gymnastics; for the third, upon philosophy. In these last two divisions we have the root of the mediæval *trivium* and *quadrivium*. The Platonic pedagogical system seeks to separate the ignoble from the noble natures, and to place the former in the lowest class. It then trains the noble natures in music and gymnastics, and, while this is going on, it tries to distinguish those natures which are capable of rising above mere training to reflective or philosophic thought, from those which are not. The latter it assigns to the military class, which

always remains at the stage of training, while the former are instructed in philosophy, and, if they prove themselves adepts, are finally admitted to the ruling class, as sages. Any member of either of the higher classes who proves himself unworthy of that class, may at any time be degraded into the next below.

As soon as the children are accepted by the State, their education under State nurses begins. The chief efforts of these for some time are directed to the bodies of the children, to seeing that they are healthy and strong. As soon as the young creatures can stand and walk, they are taught to exert themselves in an orderly way and to play little games; and as soon as they understand what is said to them, they are told stories and sung to. Such is their first introduction to gymnastics and music. What games are to be taught, what stories told, and what airs sung to the children, the State determines, and indeed, since the character of human beings depends, in great measure, upon the first impression made upon them, this is one of its most sacred duties. Plato altogether disapproves of leaving children without guidance to seek exercise and amusement in their own way, and demands that their games shall be such as call forth, in a gentle and harmonious way, all the latent powers of body and mind, and develop the sense of order, beauty, and fitness. He is still more earnest in insisting that the stories told to children shall be exemplifications of the loftiest morality, and the airs sung to them such as settle, strengthen, and solemnize the soul. He follows Heraclitus in demanding that the Homeric poems, so long the storehouse for children's stories, shall be entirely proscribed, on account of the false ideals which they hold up both of gods and heroes, and the intimidating descriptions which they give of the other world. Virtue, he holds, cannot be furthered by fear, which is characteristic only of slaves. He thinks that all early intellectual training should be a sort of play. The truth is, the infant-school of Plato's *Republic* comes as near as can well be imagined to the ideal of the modern kindergarten.

While this elementary education is going on, the officers of the State have abundant opportunity for observing the different characters of the children, and distinguishing the noble from the ignoble. As soon as a child shows plainly that it belongs by nature to

the lowest class, they consign it to that class, and its education by the State practically ceases. Of course these officers know from what class each child came, and they make use of this knowledge in determining its future destiny. At the same time, they are not to be entirely guided by it, but to act impartially. The education of the lowest class after childhood the State leaves to take care of itself, persuaded that appetite will always find means for its own satisfaction. The nobler natures it continues to educate, without any break, until they reach the age of twenty. And this education is distinctly a military training. As time goes on, the gymnastic exercises become more violent, more complex, and more sustained, but always have for their subject the soul, rather than the body, and never degenerate into mere athletic brutality. Special attention is directed to the musical and literary exercises, as the means whereby the soul is directly trained and harmonized. Plato holds that no change can be made in the "music" of a State, without a corresponding change in the whole organization; in other words, that the social and political condition of a people is determined by the literature and music which it produces and enjoys. He virtually says, Let me make the songs of a people, and he who will may make their laws. Of the character of the music which he recommends we have already spoken. From literature he would exclude all that we are in the habit of calling by that name, all that is mimetic, poetic, or creative, and confine the term to what is scientific, didactic, and edifying. He sends the poets out of the State with mock-reverent politeness, as creatures too divine for human use. He is particularly severe upon the dramatists, not sparing even the sublime Æschylus. In fact, he would banish from his State all art not directly edifying. The literature which he recommends is plainly of the nature of Æsop's *Fables*, the Pythagorean *Golden Words*, and the Parmenidean or Heraclitean work *On Nature*. If we wished to express his intent in strictly modern language, we should have to say that he desired to replace literary training by ethical and scientific, and the poetical mode of presenting ideals by the prosaic. The true music, he held, is in the human being. "If we find," he says, "a man who perfectly combines gymnastics with music, and in exact proportion applies them to the soul, we shall be entirely justified in calling him the

perfect musician and the perfect trainer, far superior to the man who arranges strings alongside each other.”

There are many matters of detail in Plato’s scheme of military training that well deserve consideration, but cannot be even touched upon here. Before we leave it, however, we may give the dates at which the different branches of education are to begin. Care of the body begins at birth, story-telling with the third year, gymnastics with the seventh, writing and reading with the tenth, letters and music with the fourteenth, mathematics with the sixteenth, military drill, which for the time supplants all other training, with the eighteenth. When the young people reach the age of twenty, those who show no great capacity for science, but are manly and courageous, are assigned to the soldier class, and start on a course of higher education in military training, while those who evince great intellectual ability become novices in the ruling class, and begin a curriculum in science, which lasts till the close of their thirtieth year. This course includes arithmetic, geometry, and astronomy, the only sciences at that time cultivated, and aims at impressing upon the youthful mind the unity and harmony of the physical or phenomenal universe. At the age of thirty, those students who do not show any particular aptitude for higher studies are drafted off into the lower public offices, while those who do, pass five years in the study of dialectics, whereby they rise to pure ideas. They are then, from their thirty-fifth to their fiftieth year, made to fill the higher public offices, in which they take their orders directly from the sages. During this period they put their acquirements to a practical test, and so come really and fully into possession of them. At the end of their fiftieth year, after half a century of continuous education of body, mind, and will, they are reckoned to have reached the vision of the supreme good, and therefore to be fit to enter the contemplative ruling class. They are now free men; they have reached the goal of existence; their life is hidden with God; they are free from the prison of the body, and only remain in it voluntarily, and out of gratitude to the State which has educated them, in order to direct it, in accordance with absolute truth and right, toward the Supreme Good.

Such, in its outlines, is Plato’s theory of education, as set forth in the *Republic*. It is easy to point out its defects and its errors, which

are neither small nor few, but fundamental and all-pervasive. But it is equally easy to see how it came to have these defects and errors, since they are simply those of every æsthetic social scheme which ignores the nature of the material with which it presumes to deal, and takes no account of the actual history of social institutions or of the forces by which they are evolved. It is emphatically the product of a youthful intellect, carried away by an artistic ideal. It was, however, the intellect of a Plato, who, when he became more mature, saw, without "irreverence for the dreams of youth," the feebleness of ideas for the conflict with human frailties, and strove to correct his exaggerated estimate of their power.

This he did in the *Laws*, whose very title suggests, in a way almost obtrusive, the change of attitude and allegiance. While in the *Republic* the State is governed by sages, almost entirely without laws, in the later work, the sages almost disappear and the laws assume an all-important place. In writing the *Laws*, moreover, he exchanges allegiance to Socrates and ideas for allegiance to Pythagoras and the gods. In saying this, I have marked the fundamental difference between the *Republic* and the *Laws*. While in the former Plato finds the moral sanctions, in the last resort, in the ideas of the pure intellect, trained in mathematics, astronomy, and dialectics, in the latter he derives them from the content of the popular consciousness, with its gods, its ethical notions, its traditions. In these, as embodied in institutions, he finds the most serviceable, if not the most exalted, revelation of divine truth. Trusting to this, he no longer seeks to abolish the family and private property, but merely to have them regulated; he no longer banishes strangers and poets from his State, but merely subjects them to State supervision; he no longer demands a philosophical training for the rulers, but only practical insight; he no longer divides his citizens into sages, soldiers, and wealth-producers, but into freemen (corresponding to his previous military class) and slaves. His government is no longer an aristocracy of intellect, but a compound of aristocracy, oligarchy, and democracy, representing, respectively, worth, wealth, and will. His plan of education is modified to suit these altered conditions. The children, as in Sparta, do not begin the State course of education until about their seventh year, after which

their training is very much the same as that demanded in the *Republic*, with the omission, of course, of dialectics. Though women are no longer to be relieved of their home duties, they are still to share in the education and occupations of men, an arrangement which is facilitated by the law ordaining that both men and women shall eat at public tables. In making these changes, Plato believed that he was falling from a lofty, but unrealizable, ideal, and making concessions to human weakness; in reality, he was approaching truth and right.

BOOK III. ARISTOTLE (b.c. 384-322)

CHAPTER I

ARISTOTLE — LIFE AND WORKS

Aristotle, in my opinion, stands almost alone in philosophy. — Cicero.

Aristotle, Nature's private secretary, dipping his pen in intellect. — Eusebius.

Wherever the divine wisdom of Aristotle has opened its mouth, the wisdom of others, it seems to me, is to be disregarded. — Dante.

I could soon get over Aristotle's *prestige*, if I could only get over his reasons. — Lessing.

If, now in my quiet days, I had youthful faculties at my command, I should devote myself to Greek, in spite of all the difficulties I know. Nature and Aristotle should be my sole study. It is beyond all conception what that man espied, saw, beheld, remarked, observed. To be sure he was sometimes hasty in his explanations; but are we not so, even to the present day? — Goethe (at 78).

If the proper earnestness prevailed in philosophy, nothing would be more worthy of establishing than a foundation for a special lectureship on Aristotle; for he is, of all the ancients, the most worthy of study. — Hegel.

Aristotle was one of the richest and most comprehensive geniuses that ever appeared — a man beside whom no age has an equal to place. — *Id.*

Physical philosophy occupies itself with the general qualities of matter. It is an abstraction from the dynamic manifestations of the different kinds of matter; and even where its foundations were first laid, in the eight books of Aristotle's *Physical Lectures*, all the phenomena of nature are represented as the motive vital activity of a universal world-force. — Alexander von Humboldt.

It was characteristic of this extraordinary genius to work at both ends of the scientific process. He was alike a devotee to facts and a master of the highest abstractions. — Alexander Bain.

Aristotle is the *Father of the Inductive Method*, and he is so for

two reasons: First, he theoretically recognized its essential principles with a clearness, and exhibited them with a conviction, which strike the modern man with amazement; and then he made the first comprehensive attempt to apply them to all the science of the Greeks. — Wilhelm Oncken.

Aristotle, for whose political philosophy our admiration rises, the more we consider the work of his successors, is less guided by imagination than Plato, examines reality more carefully, and recognizes more acutely, the needs of man. — Bluntschli.

It appears to me that there can be no question, that Aristotle stands forth, not only as the greatest figure in antiquity, but as the greatest intellect that has ever appeared upon the face of this earth. — George J. Romanes.

Aristotle, with all the wisdom of Plato before him, which he was well able to appropriate, could find no better definition of the true good of man than the full exercise or realization of the soul's faculties in accordance with its proper excellence, which was excellence of thought, speculative and practical. — Thomas Hill Green.

It is pretty definitely settled, among men competent to form a judgment, that Aristotle was the best educated man that ever walked on the surface of this earth. He is still, as he was in Dante's time, the "master of those that know." It is, therefore, not without reason that we look to him, not only as the best exponent of ancient education, but as one of the worthiest guides and ensamples in education generally. That we may not lose the advantage of his example, it will be well, before we consider his educational theories, to cast a glance at his life, the process of his development, and his work.

Aristotle was born about b.c. 384, in the Greek colony of Stagira in Thrace, near the borders of Macedonia. His father, Nicomachus, was a physician of good standing, the author of several medical works, and the trusted friend of Amyntas, the Macedonian King. His mother, Phæstis, was descended from the early settlers of the place. It was doubtless under his father's guidance that the boy Aristotle first became interested in those physical studies in which he was destined to do such wonderful work. Losing, however, both his parents at an early age, he came under the charge of Proxenus, of Atarneus, who

appears to have done his duty by him. At the age of eighteen he came to Athens for his higher education, and entered the school of Plato in the Academy. Here he remained for nearly twenty years, listening to Plato, and acquiring those vast stores of information which in later life he worked up into lectures and scientific treatises. Nothing escaped him, neither art, science, religion, philosophy, nor politics. He seems, being well off, to have begun early to collect a library, and to aim at encyclopædic knowledge. About his methods of study we know very little; but we hear that at times he assisted Plato in his work and was very careful of his own attire. It is clear that, in course of time, he rose in thought above the teachings of his master, and even rejected the most fundamental of them, the doctrine of self-existent ideas. But he never lost respect for that master, and when the latter died, he retired with Xenocrates, son of the new head of the Academy, to Atarneus, the home of his old guardian Proxenus, and of his fellow-Academic, Hermias, now king or tyrant of the place. Here he remained for three years, in the closest intimacy with his friend, until the latter was treacherously murdered by the Persians. He then crossed over to Mytilene, taking with him Pythias, Hermias' sister or niece, whom he had married, and to whom he was deeply devoted. He erected in Delphi a statue to his dead friend, and dedicated to him a poem, of which we shall hear more in the sequel. About b.c. 343, when he was over forty years old, he was called to Macedonia, as tutor to Alexander, the thirteen-year-old son of King Philip, and grandson of his own father's old patron, Amyntas. This office he filled for about three years with distinguished success, and it may be safely said that never had so great a tutor so great a pupil. During the latter part of the time, at least, Aristotle and Alexander seem to have lived at Stagira. This town had been captured and destroyed by Philip, and its inhabitants scattered. With the permission of the conqueror, Aristotle reassembled the inhabitants, rebuilt the town, drew up its laws, and laid out near it, at Mieza, in imitation of the Academy, a gymnasium and park, which he called the *Nymphæum*. Hither he appears to have retired with his royal pupil and several other youths who were receiving education along with him, among them Theophrastus and the ill-fated Callisthenes. It was probably here that Aristotle adopted the habit of walking while

imparting instruction, a habit which afterwards gave the name to his school. When Alexander, at sixteen, entered his father's army, Aristotle still continued to teach in the Nymphæum, which existed even in Plutarch's time, more than four hundred years afterwards. But this lasted only for about five years; for in 335, when Alexander, who in the previous year had succeeded his murdered father, was preparing to invade Persia, Aristotle moved to Athens. Finding that his old friend, Xenocrates, was director of the school in the Academy, he established himself, as a public teacher or professor, in the Lyceum, the Periclean gymnasium, used chiefly, it should seem, by the lower classes and by foreign residents, of whom he himself was one. As an alien, as the friend of the victorious Macedonians, who three years before had broken the power of Greece at Chæronea, and taken away her autonomy forever, as a rival of the Platonists, and as a wealthy, well-dressed gentleman, he had many enemies and detractors; but his conduct seems to have been so unobjectionable that no formal charge could be brought against him. His very numerous pupils were mostly foreigners, a fact not without its influence on the subsequent course of thought. He divided his days between writing and teaching, taking his physical exercise while engaged in the latter occupation. In the mornings he gave lectures to a narrow circle, in a strictly formal and scientific way, upon the higher branches of science; while in the afternoons he conducted conversations upon more popular themes with a less select audience. The former were called his esoteric, the latter his exoteric, discourses.

It was during his second residence in Athens, in the twelve years from b.c. 335 to 323, that Aristotle composed most of those great works in which he sought to sum up, in an encyclopædic way, the results of a life of all-embracing study and thought. He had been in no haste to put himself on record, and it was not until he had reached a consistent view of the world that he ventured to treat, in a definitive way, any aspect of it. Thus it was that each of his treatises formed part of one great whole of thought. Had he succeeded in completing his plan, he would have left to the world a body of science such as, even in our own day, would look in vain for a peer among the works of any one man. Unfortunately, his plan was not completed, and even

of the works which he did write only a portion has come down to us. But that portion is sufficient to place their author at the head of all scientific men. Some of his works, for example, his *Logic*, *Metaphysics*, *Ethics*, and *Politics*, still occupy the first place in the literature of these subjects. How a single man could have done all that he did, and in so many different departments, is almost inconceivable. No doubt he had helpers, in the shape of secretaries, learned slaves, and disciples; and it is certain that he received from his royal pupil munificent aid, which enabled him to do much, especially in the directions of physical and political research, that would have been impossible for a poor man; but, after all allowances have been made, his achievement still seems almost miraculous.

During all the years in which Aristotle was thus engaged, his position at Athens was becoming more and more insecure. The anti-Macedonian party were waiting for the first opportunity to rid the city of him, and were prevented from open attempts at this only by dread of Alexander's displeasure. Even when it was known that Aristotle had incurred disfavor with his old pupil, they did not venture to attack him; but in 323, when the news of Alexander's sudden death made all Greece feel that now the time had come to get rid forever of the hated Macedonians, and recover its liberty, they at once gave vent to their long-cherished hatred. How hard it was to find matter for an accusation against him, is shown by the fact that they had to go back to his old poem on *Worth*, written in memory of Hermias (see p. 4), and to base thereon a charge of impiety — a charge always easily made, and always sure to arouse strong popular prejudice. According to Athenian law, the defendant in any such case might, if he chose, escape punishment by leaving the city any time before the trial; and Aristotle, not being, like Socrates, a citizen, could have no ground for refusing to take advantage of this liberty. Accordingly, with the remark that he would not voluntarily allow the Athenians to sin a second time against philosophy, he withdrew to his country residence at Chalcis in Eubœa, the old home of his mother's family, to wait till affairs should take another turn, as, indeed, they soon afterwards did, when Athens had to open her gates to Antipater. But, ere that happened, Aristotle was in his grave, having died in 322, shortly before Demosthenes, of disease of the

stomach, from which he had long suffered. His remains are said to have been carried to Stagira, where the grateful inhabitants erected an altar over them and paid divine honors to his memory. His library and the manuscripts of his works he left in the hands of Theophrastus, who succeeded him in the Lyceum. His will, the text of which has come down to us, bears testimony, along with all else that we know of him, to the nobility, kindliness, and justice of his nature.

CHAPTER II

ARISTOTLE'S PHILOSOPHY

Platon rêvait; Aristote pensait. — Alfred de Musset.

Are God and Nature then at strife
That Nature lends such evil dreams?
— Tennyson.

There are three Essences. Two of these are sensible; one being eternal, and the other perishable. The latter is admitted by all, in the form, for example, of plants and animals; in regard to the former, or eternal one, we shall have to consider its elements, and see whether they be one or many. The third is immutable [and, therefore, inaccessible to sense], and this some thinkers hold to be transcendent. — Aristotle.

The vision of the divine is what is sweetest and best; and if God always enjoys that vision as we sometimes do, it is wonderful, and if he does so in a yet higher degree, it is more wonderful still. And so even it is. And life belongs to him; for the self-determination of thought is life, and he is self-determination. And his absolute self-determination is the supreme and eternal life. And we call God a living being, eternal, best; so that life and duration, uniform and eternal, belong to God; for this is God. — *Id.*

We must consider in what way the system of the universe contains the good and the best, whether as something transcendent and self-determined, or as order. Surely in both ways at once, as in any army, for which the good is in order, and is the general, and the latter more than the former. For the general is not due to the order, but the order to the general. — *Id.*

The thought of Aristotle differs from that of Plato both in its method and in its results. Plato, reared in the school of Pythagoras, Parmenides, Heraclitus, and Socrates, had, naturally enough, come to look for truth in the supersensual region of mind, and thought he found it in ideas attainable by a process of dialectic within the

individual consciousness. He thus came to put forward a doctrine which, despite its ostensible purpose to cement the bonds of society, in reality tended to withdraw men from society altogether and increase the very individualism it was intended to cure. Aristotle, while still in Plato's school, had turned away from this doctrine, and in after-life he never lost an opportunity of combating it. He could point to Plato's *Republic* as a warning example of its logical consequences. But, in doing this, he was prepared to put another doctrine in its place, and he did so on the basis of a profound study of the whole course of Greek thought, mythological and philosophical.

Instead of appealing, like Plato, to the individual consciousness, and trying to discover ultimate truth by bringing its data into harmony among themselves, Aristotle appeals to the historic consciousness, and endeavors to find truth by harmonizing and complementing its data through a further appeal to the outer world, in which these data are realized. He maintains that the truths reached by the dialectic process are merely formal, and therefore empty, — useless in practice, until they have been filled by experience from the storehouse of nature. In consequence of this changed attitude, he sets aside the dialectic process, and substitutes for it the *Method of Induction*, which he was the first man in the world to comprehend, expound, and apply, becoming thus the father of all true science. And he makes a more extensive use of induction than any other man since his time, applying it in a field in which even now it is hardly supposed to yield any results, the field of the common consciousness. Indeed, he everywhere begins his search for concrete truth by examining the historic consciousness, and, having, by a process of induction, discovered and generalized its contents, he turns with these to nature and, by a second induction, corrects, completes, and harmonizes them. We might express this in modern language, by saying that his whole endeavor is to correct and supplement the imperfect human consciousness by a continual appeal to the divine consciousness, *as manifested in the world*. It is the error of modern investigators that they employ only one-half of the inductive method, the objective, and either omit altogether the subjective, or else, like Plato, apply it only to the individual consciousness. Hence come the widely divergent results which still meet us in so many of the

sciences, in Politics, Psychology, etc., hence the fact that a great deal of science, instead of correcting, widening, and harmonizing the common consciousness, stands altogether apart from it, or even in direct opposition to it. The man who writes a treatise on Psychology, or on the Soul, without troubling himself to discover what "Soul" means in the general consciousness of mankind, and perhaps setting out with an altogether individual notion of it, can hardly look for any other result. Aristotle, true to his method of induction, devotes one entire book of his *Psychology* to finding out what "Soul" means in the historic consciousness, unreflective as well as reflective. Then, with this meaning, he goes to nature, seeks by induction to discover what she has to say about it, and abides by her reply. Hence it is that his thought has laid hold upon the world, and influenced it in practical ways, as no other man's thought has ever done. Hence it is that, of all ancient men, he is the one before whom the modern scientist bows with respect.

If we now ask ourselves what was the underlying thought that shaped Aristotle's theory of induction, what was his *Weltanschauung*, we shall find it to be this: The divine intelligence reveals itself subjectively in an historic process in the human consciousness, and objectively in a natural process in the outer world. Truth for man is the harmony of the two revelations. It follows directly from this that the scientist must take impartial account of both. So, for example, if he finds gods in the historical consciousness, and laws or forces in nature, he has no right, like the theologian, to merge the latter in the former, or, like the physicist, to replace the former by the latter. He must retain both till he can bring them into harmony. Only then does he know either.

Such a philosophy as this, instead of drawing men away from the world of nature and history, and confining them to the narrow circle of their own consciousness, of necessity sent them back to that world, as the only means by which any human well-being could be reached. It is for this reason that it has so powerfully affected both social life and science. Nevertheless, we should err greatly, if we supposed that, in Aristotle's view, the divine is nothing more than an immanent idea, working as a force-form in nature, and as a thought-form in mind. He does, indeed, believe that the divine is all this, but

not that this is all the divine there is. Over and above the divine which is determined in nature and in man, there is the transcendent Mind, or God, determining himself through himself, and bearing the same relation to the divine that the sun bears to light, the human mind to human thought, the general to the order of his army. Here we are far away from Pantheism, and, though we have not yet risen to a clear conception of personality, we have at the “helm of the universe” a conscious being, the source of law and order. And man, rising above the thought whereby he knows himself through nature, and nature through himself, may enter into the consciousness of God and become a partaker in that life which is “sweetest and best.” These are the features of Aristotle’s thought which in the thirteenth century made it acceptable to the Christian Church in her struggle against Pantheism, and which paved the way for that higher mysticism of which Thomas Aquinas is the most distinguished exponent — a mysticism which does not, like that of the Neoplatonists and Buddhists, dispense with thought to lose itself in vacancy, but which, rising upon a broad basis of knowledge, pierces the clouds of sense, to find itself in the presence of the most concrete Reality, the inexhaustible source of all thought and all things.

CHAPTER III

ARISTOTLE'S THEORY OF THE STATE

First, then, let us try to enumerate whatever worthy utterances have proceeded from men of the past upon any aspect of the subject, and then, referring to our collections of *Constitutional Histories*, let us seek to arrive at a theory as to what sorts of things preserve and destroy each particular form of government, and see for what reasons some are well, some ill, managed. Succeeding in this, we may, perhaps, the better learn both what is the best form of government, and what arrangements, laws, and customs are best suited to each form. — Aristotle.

Man is a political animal. — *Id.*

The State is prior to the individual. — *Id.*

Without friends no one would choose to live, although he possessed all other blessings. — *Id.*

If happiness be self-determination in accordance with worth, we must conclude that it will be in accordance with the supreme worth, which will be the worth of the noblest part of us. This part, whatever it may be, whether intellect (νοῦς) or something else, that which by nature evidently rules and guides us and has insight into things beautiful and divine, whether it be itself divine, or the divinest part of us, is that whose self-determination, in accordance with its proper worth, will be the perfect happiness. That this consists in the vision of divine things has already been said.... This, indeed, is the supreme self-determination, for the reason that intellect is the highest part of us, and that with which it deals is the highest of the knowable.... But a life of this sort would be something higher than the human; for he who lived it would not be living as man, but as the subject of something divine.... If, then, intellect is something divine in relation to man, the life lived according to it must be divine in relation to human life. Instead, then, of following those who advise us, as being human, to set our thoughts upon human things, and, as being mortals, to set them on mortal things, it is our duty, as far as may be, to act as immortal beings, and do all we can to live in accordance with the

supreme part of us. — Aristotle.

Man alone, among all beings, occupies a middle place between things corruptible and things incorruptible.... Two ends, therefore, Ineffable Providence has ordained for man: Blessedness in this life, which consists in the exercise of native faculty, and is figured by the Earthly Paradise, and blessedness in the eternal life, which consists in the enjoyment of the vision of God, a thing not to be achieved by any native faculty, unless aided by divine light, and which is to be understood by the Heavenly Paradise.... These ends and means would be disregarded by human passion, if men were not restrained in their course by bit and bridle.... For this reason man required a double directive, corresponding to this double end. He required the Supreme Pontiff to guide the human race to life eternal, and the Emperor to guide the human race to temporal felicity, in accordance with the teachings of philosophy.... The truth with regard to the question whether the authority of the Emperor is derived directly from God or from another, must not be taken so strictly as to mean that the Roman Prince is not, in some respects, subject to the Roman Pontiff, the fact being that this mortal felicity of ours is, in some sense, ordained with a view to immortal felicity. Let Cæsar, therefore, display that reverence for Peter which the first-born son ought to display for his father, so that, being illuminated by his father's grace, he may with greater virtue enlighten the world, which he has been called to govern by Him who is governor of all things, spiritual and temporal. — Dante.

O Grace abounding, whence I did presume
To fix my gaze upon the eternal light
So far that I consumed my sight therein!
Within its deeps I saw internalized
Into one volume, bound with love,
That which is outered in the universe; —
Substance and accident, and all their modes,
As 'twere, together merged in such a sort
That what I mean is but a simple light.
The universal form of this same knot
I think I saw, because, when thus I speak,

I feel that I rejoice with larger joy. — *Id.*

Man's chief end is to glorify God, and to enjoy him forever. — *Westminster Shorter Catechism.*

Plato's chief purpose, in writing upon education, had been to suggest a remedy for the social and moral conditions of his native Athens. Aristotle has no such purpose. He is, in a very deep sense, a cosmopolitan, and writes in the interest of science and universal utility. His range of vision is not confined to Athens, or even to Greece (though he is very proud of being a Greek), but ranges over the whole known world in time and space. Unlike Plato, too, who had been familiar mainly with institutions of the past in Egypt and Greece, Aristotle is deeply affected by the tendencies of the future, and, though no one lays greater stress than he upon the necessity of a knowledge of the past for him who would construct a sound social theory, he nevertheless declares that the whole of the past is shaped by something which is in the future, by the ultimate realization. This view comes out in a paradoxical way in his famous saying that "the State is prior to the individual," by which he means that it is man's political nature working in him that makes him an individual, and at the same time realizes itself in a State. And this brings us to Aristotle's conception of the State, which we must consider before taking up his theory of education, for the reason that to him, as to all the ancient world, education is a function of the State, and is conducted, primarily at least, for the ends of the State.

Before venturing upon a theory of the State, Aristotle, true to his inductive principles, wrote the Constitutional Histories of over two hundred and fifty different states. One of these, the *Constitutional History of Athens*, has recently been discovered and published (see p. 96). He held that it was only by means of a broad induction, thus rendered possible, that he could discover the idea of the State, that is, its self-realizing form. Employing this method, then, he came to the conclusion that the State is that highest social institution which secures the highest good or happiness of man. Having, in a previous treatise, satisfied himself that this good is Worth (ἀρετή), and worth being in every case the full exercise of characteristic or differentiating faculty, he concludes that, since man's distinguishing

faculty is reason, the State is the institution which secures to man the fullest and freest exercise of this. It follows directly that the State is, simply and solely, the supreme educational institution, the university to which all other institutions are but preparatory. And two more conclusions follow: (1) that states will differ in constitution with the different educational needs of the peoples among whom they exist, and (2) that, since all education is but a preparation for some worthy activity, political education, the life of man as a citizen, is but a preparation for the highest activity, which, because it is highest, must necessarily be an end in itself. This activity, Aristotle argues, can be none other than contemplation, the Vision of the Divine (θεωρία).

Results which have moved the world followed logically from this doctrine. Whereas Plato had made provision for a small and select body of super-civic men, and so paved the way for religious monasticism and asceticism, Aristotle maintains that in every civilized man, as such, there is a super-civic part, in fact, a superhuman and divine part, for the complete realization of which all the other parts, and the State wherein they find expression, are but means. Here we have, in embryo, the whole of Dante's theory of the relation of Church and State, a theory which lies at the basis of all modern political effort, however little the fact may be recognized. Here, indeed, we have the whole framework of the *Divine Comedy*; here too we have the doctrine of the Beatific Vision, which for ages shaped and, to a large extent, still shapes, the life of Christendom. Well might Dante claim Aristotle as his master (see p. 153)! Well might the great doctors of the Church speak of him as "*The Philosopher*," and as the "Forerunner of Christ in Things Natural." In vain did Peter Ramus and Luther and Bruno and Bacon depreciate or anathematize him! He is more powerful to-day in thought and life than at any time for the last twenty-two centuries.

It may be asked how far, and in what form, Aristotle conceives the divine life to be possible for man on earth. He answers that, though it cannot be perfectly or continuously realized here, it is in some degree and for certain times attainable (see p. 161). In so far as it is a social life, it is the life of friendship or spiritual love (φιλία), to which he has devoted almost two books of his *Ethics*, books which give us a loftier idea of his personal purity and worth than any other of his

extant writings. He insists that friendship is the supreme blessing (see p. 166), and that “whatever a man’s being is, or whatever he chooses to live for, in that he wishes to spend his life in the company of his friends.” It is even said that Aristotle, while teaching in the Lyceum, gathered about him a knot of noble youths and earnest students, and formed them into a kind of community, with a view to leading a truly spiritual social life.

CHAPTER IV

ARISTOTLE'S PEDAGOGICAL STATE

Nature is the beginning of everything. — Aristotle.

Life is more than meat, and the body than raiment. — Jesus.

The forces of the human passions in us, when completely repressed, become more vehement; but when they are called into action for short time and in the right degree, they enjoy a measured delight, are soothed, and, thence being purged away, cease in a kindly, instead of a violent, way. For this reason, in tragedy and comedy, through being spectators of the passions of others, we still our own passions, render them more moderate, and purge them away; and so, likewise, in the temples, by seeing and hearing base things, we are freed from the injury that would come from the actual practice of them. — Jamblichus.

Care for the body must precede care for the soul; next to care for the body must come care for the appetites; and, last of all, care for the intelligence. We train the appetites for the sake of the intelligence, and the body for the sake of the soul. — Aristotle.

The practice of abortion was one to which few persons in antiquity attached any deep feeling of condemnation.... The physiological theory that the fœtus did not become a living creature till the hour of birth had some influence on the judgments passed upon this practice. The death of an unborn child does not appeal very powerfully to the feeling of compassion, and men who had not yet attained any strong sense of the sanctity of human life, who believed that they might regulate their conduct on these matters by utilitarian views, according to the general interest of the community, might very readily conclude that prevention of birth was in many cases an act of mercy. In Greece, Aristotle not only countenanced the practice, but even desired that it should be enforced by law, when population had exceeded certain assigned limits. No law in Greece, or in the Roman Republic, or during the greater part of the Empire, condemned it.... The language of the Christians from the very beginning was very different. With unwavering consistency and with the strongest

emphasis, they denounced the practice, not simply as inhuman, but as definitely murder. — Lecky, *European Morals*.

Aristotle clearly saw that the strong tendency of the human race to increase, unless corrected by strict and positive laws, was absolutely fatal to every system founded on equality of property; and there cannot surely be a stronger argument against any system of this kind than the necessity of such laws as Aristotle himself proposes.... He seems to be fully aware that to encourage the birth of children, without providing properly for their support, is to obtain a very small accession to the population of a country, at the expense of a very great accession of misery. — Malthus, *Essay on Population*.

Considering Aristotle's views with regard to man, his end, and the function of the State, we can have little difficulty in divining the character and method of his educational system. Man is a being endowed with reason; his end is the full realization of this, his sovereign and distinguishing faculty; the State is the means whereby this is accomplished.

Readers of Goethe's *Wilhelm Meister* will remember the description, in the second part, of the Pedagogical Province. Now, Aristotle's State might with entire propriety be called a Pedagogical Province. In trying to describe this State, and the manner in which it discharges its function, it is difficult to know where to begin, for the reason that, taken as a whole, the State is both teacher and pupil. It arranges the whole scheme of education, and is therefore related to it as cause; it is built up by this scheme, and is therefore related to it as effect. It comes, accordingly, both at the beginning and at the end. It is a university which arranges the entire scheme of education, and is itself its highest grade. I shall try to surmount this difficulty by distinguishing what the State is from what it does, beginning with the former, and ending with the latter.

With regard to what the State is, we have to consider (1) its natural, (2) its social, conditions. The former are climate, and extent, nature, and situation of territory; the latter, number and character of inhabitants, property regulations, distinction of classes, city architecture, mode of life, government, and relations to other states.

Aristotle demands for his State a temperate climate, on the ground that a cold one renders men strong and bold, but dull and stupid,

while a hot one renders them intellectual but effeminate. The best climate is one that makes them at once brave and intelligent. The territory must be extensive enough, and fertile enough, to supply its inhabitants with all the material conditions of life in answer to labor which shall rouse, without exhausting, their energies. It must face east or south, and be healthy, well-watered, accessible from land and sea, and easily defensible.

As to the social conditions, Aristotle finds the most important to be the number of citizens. And here two things must be carefully borne in mind. (1) He means by "State" a city with a small territory. This is not, as has been erroneously supposed, his highest social unity. He recognizes clearly the nation (ἔθνος) and the confederacy (συνμαχία); but he holds that they exist merely for material ends, whereas the end of the State is spiritual. (2) He means by "citizen" a politician. A man is a citizen, not because he is born or domiciled in a State, but because he is a sharer in its functions. A State made up of mechanics, no matter how great their number, would be a small State, and one composed of slaves would be no State at all. Thus, in estimating the size of a State, we are to consider the character of its inhabitants, their fitness for political functions, rather than their number. Little Athens was a much larger State than gigantic Persia on the field of Marathon. Aristotle lays down that the number of citizens must be large enough to insure independence, this being essential to a Culture-State, and not too large to be manageable. Besides the citizens, there will necessarily be in the State a very large number of other human beings, slaves, agriculturists, mechanics, sailors — for all these he excludes from citizenship on the ground that they do not make virtue, that is, the realization of reason, the end of their lives. Women, in a sense, are citizens, if they belong to the families of citizens; but their sphere is the family.

With regard to property, Aristotle begins by considering what things it is necessary for. These he finds to be six, three private and three public. The former are food (including clothing and shelter), instruments of production, and arms; the latter are public enterprises (civil and military), religion, and law. These are the "necessaries" (ἀναγκαῖα) of a State, for which it must duly provide. The most important of all is religion, on which he everywhere lays great stress.

As to the distribution of property, he propounds a scheme which is half socialistic. All the land is to belong to the State, that is, to the body of the free citizens. It is to be divided into two equal portions, and one set apart for public, the other for private, uses. The revenue from the public part is to go for the support of religion (and law?) and of the public tables, from which no citizen is excluded by poverty. The private part is to be so divided that each citizen shall have one lot near the city, and one near the frontier. This will give him an interest in defending the whole territory. Both parts are to be cultivated by serfs or slaves, part of whom will necessarily belong to the State, and part to private individuals. Land-owning is to be a condition of citizenship, and all citizens are to be forbidden to exercise any form of productive industry. This last rule, it is hoped, will prevent grievous inequalities of wealth, and the evils that flow from them. A modest competency, derived from his estate, is all that any citizen should aim at. Only degraded people, incapable of virtue, will crave for more.

Upon the distinction of classes some light has been already thrown. They are two; the ruling and the ruled. Aristotle holds that this distinction runs through the whole of nature and spirit, that it is fundamental in being itself. It holds between God and the universe, form and matter, soul and body, object and subject, husband and wife, parent and child, master and slave, etc., etc. The ruling class again is sub-divided into two parts, one that thinks and determines (legislators and judges), and one that executes (officials, officers, soldiers); while the ruled is sub-divided into husbandmen, mechanics, and seamen (sailors, fishermen, etc.). All the members of the ruled class are serfs or public slaves, working, not for themselves, but for their masters. Aristotle holds that they ought to be barbarians of different races, and not Greeks.

The architecture of the city will in some degree correspond to this social division. It will naturally fall into three divisions, military, religious, and civil. First of all, a city must have walls. These should have towers and bastions at proper distances, and be made as attractive as possible. The temples of the gods and the offices of the chief magistrates should, if possible, stand together on a fortified citadel, conspicuously dominating the entire city. Adjoining this

ought to be the Freeman's Square, reserved entirely for the ruling class, and unencumbered by business or wares of any sort. Here ought to stand the gymnasium for the older citizens, who will thus be brought into contact with the magistrates and inspired with "true reverence and freemen's fear." The market-square must be placed so as to be convenient for the reception of goods both from sea and land. This comprehends all the civil architecture except the mess-halls, of which we shall better speak in the next paragraph.

The mode of life of the ruling class will necessarily differ widely from that of the ruled. About the latter Aristotle has nothing to say. He hopes for little from that class beyond the possibility of being held in contented subordination. As it has no political life, all that is left to it is the life of the family. The ruling class, on the contrary, live to a large extent in public, and on public funds. They exercise in public gymnasia and eat at public tables. The chief magistrates have their mess-hall in the citadel; the priests have theirs close to the temples; the magistrates, who preside over business matters, streets, and markets, have theirs near the market-square, while those who attend to the defences of the city have tables in the towers. When not engaged in public business, the citizens may meet in the Freeman's Square and enjoy an open-air *conversazione*, with music, poetry, and philosophy, in a word, διαγωγή, for which our language has no even approximate equivalent (see p. 33). In proportion as they advance in years, the citizens enjoy more and more διαγωγή, which, indeed, is regarded as the end of life, here and hereafter.

The government is entirely in the hands of the free citizens, the legislative and deliberative power being in those of the elders; the executive power, civil and military, in those of the younger portion. It is curious that, though Aristotle regards this as the best possible arrangement under ordinary circumstances, he nevertheless believes that the happiest condition for a State would be to be governed by some divine or heroic man, far superior to all the others in wisdom and goodness. He plainly considers Pisistratus to have been one such man, and he perhaps hoped that Alexander might be another.

The relations of the pedagogical State to other States are, as far as possible, to be peaceful. Just as all labor is for the sake of rest and διαγωγή, so all war is for the sake of peace; and that State is to be

envied which can maintain an honorable independence without war. A cultured State will eschew all attempts at conquest, and be as unwilling to tyrannize over another State as to be tyrannized over by one. At the same time, it will always be prepared for war, possessing an army of well-trained, well-armed soldiers, and a well-manned, well-equipped fleet.

Such are the chief features of Aristotle's ideal State, based, as he believes, on man's political nature and the history of the past. Like all social ideals, like heaven itself, as ordinarily conceived, it is a static condition. Its institutions are fixed once for all, and every effort is made to preserve them. It is curious to note in how many points it coincides with Xenophon's ideal.

The purpose of the State is to educate its citizens, to make them virtuous. Virtue is the very life-principle of the State, and it does not depend, as other conditions do, upon nature or chance, but upon free will. The ideal State, like every other, must educate with a view to its own institutions, since only in this way can these be preserved. "And, since the State, as a whole, has but one aim, it is evident that the political education of all the citizens ought to be the same, and that this is a matter for the State to attend to, and not one to be left to individual caprice, as is now almost universally done, when every parent attends to the education of his own children, and gives them whatever schooling suits his own fancy." For the education of those members of the State who are not citizens the State makes no provision. They learn their practical duties by performing them, and are completely under the control of the citizens. Aristotle makes the most vigorous efforts to prove that slavery has its justification in nature, which has established between Greek and barbarian the relation of master and slave (see p. 12). As woman belongs to the family, and is only indirectly a citizen of the State, her education is entrusted to the former institution. The daughter is to be educated by the parents, and the wife by the husband, exactly as recommended by Xenophon.

Having concluded that education ought to be a matter of State legislation, and the same for all the citizens, he continues: "It remains to inquire what shall be the nature of the education, and the method of imparting it.... The present state of education leaves this question

in a perfect muddle, no one seeming to know whether we ought to teach those subjects which enable people to make a living, or those which foster worth, or, finally, accomplishments. All have had their advocates. In regard to those studies which have worth for their aim, there is no general agreement, owing to the fact that different people have different views as to what kinds of worth are admirable, and consequently differ in regard to the means to be employed for the cultivation of them. One point, however, is perfectly clear, viz. that those useful things which are necessary ought to be taught. But it is equally clear that a distinction ought to be made between liberal and illiberal studies, and that only those useful subjects ought to be taught which do not turn those learning them into craftsmen. We ought to look upon every employment, art, or study which contributes to render the bodies, souls, or intellects of free men unfit for the uses and practices of virtue, as a craft. For this reason it is that we call all those arts which lower the condition of the body crafts, and extend the term to the money-making trades, because they preoccupy and degrade the intelligence. As to the liberal arts, to cultivate an acquaintance with them up to a certain point is not illiberal; but any over-devotion to them, with a view to attaining professional skill, is liable to the objections mentioned. It also makes a great difference for what purpose we do or learn a thing. If a man does a thing for his own, for his friends', or for worth's sake, it is not illiberal, whereas if he does it often for the sake of anybody else, he will be held to be doing something mercenary or slavish."

The next and all-important question is, For what end shall the State educate, — for business or for leisure? In answering this, Aristotle breaks entirely away from the old Greek traditions, as well as from Plato, and maintains that, while it must educate for both, yet education for leisure is far more important than education for business, and cites Nature as his authority. "Nature itself demands," he says, "not only that we should pursue business properly, but that we should be able to employ our leisure elegantly. If we must have both, we must; but leisure is preferable to business, and our final inquiry must be, in what sort of employment we shall spend our leisure. It is useless to say that we are to spend it in play, and that play is the end and aim of our life. If this is impossible, and the truth

is that the proper place for play is in the midst of business (it is the man who is toiling that requires recreation, which is the aim of play, business being accompanied with exertion and tension), then, in having recourse to play, we must select the proper seasons for administering it, just as if it were a medicine. Indeed, all such movement of the soul is relaxation, and becomes recreation on account of the pleasure which it affords. Leisure, on the contrary, is considered, in and by itself, to involve pleasure, happiness, and a blessed life. These fall to the lot of those who have leisure, not of those who are engaged in business. Those who engage in business do so for some ulterior end not realized in it, whereas happiness is itself an end and, according to universal belief, brings, not pain but pleasure. Of course, as to the nature of this pleasure, there is at present a variety of opinions, every one having his own preferences due to his character and habits, and the highest type of man preferring the highest type of pleasure and that which arises from the noblest things. We need no further argument to show that we should receive instruction and education in certain things with a view to *otium cum dignitate* (or cultured leisure), and that these should be ends in themselves, in contradistinction to the instruction given for business, which is necessary and has an ulterior aim.”

Three principles Aristotle lays down as valid for all education: (1) that the training of the body ought to take precedence in time over that of the mind; (2) that pupils should be taught to do things before they are taught the reasons and principles of them; (3) that learning is never playing, or for the sake of playing.

The periods of education distinguished by Aristotle are: (1) Childhood, extending from birth to the end of the seventh year, and spent in healthy growing and, latterly, in preparation for discipline; (2) Boyhood, from the beginning of the eighth year to the advent of puberty, devoted to the lighter forms of discipline, bodily and mental; (3) Youth, from the age of puberty to the end of the twenty-first year, occupied with the severer forms of discipline; (4) Manhood, devoted to State duties. All these are but preparations for the divine life of the soul. We shall treat these in order, including the second and third under one head.

CHAPTER V

EDUCATION DURING THE FIRST SEVEN YEARS

Suffer no lewdness or indecent speech
The apartment of tender youth to reach. — Juvenal.

Le cœur d'un homme vierge est un vase profond —
Lorsque la première eau qu'on y verse est impure,
La mer y passerait sans laver la souillure;
Car l'abîme est immense, et la tache est au fond.
— Alfred de Musset.

The State must begin the education of children before their birth; indeed, before the marriage of their parents. It must see that only persons of robust constitutions marry. Athletes are not suited for marriage, neither are weaklings. The best age for marriage is thirty-seven for a man, and eighteen for a woman. During their pregnancy women must take special care of their health, living on light food, and taking short walks. The State should make a law that they visit the temples of certain gods every day, and offer up a prayer of thanksgiving for the honor conferred upon them. They must carefully avoid all forms of emotional excitement. When defective children are born, they must be exposed or destroyed. The State must determine what number of children each married couple may have, and, if more than this number are begotten, they must be destroyed either before or after birth. "As soon as children are born, it ought to be remembered that their future strength will depend greatly upon the nourishment supplied to them." A milk diet is best, and wine must be avoided. "It is likewise of great importance that children should make those motions that are appropriate to their stage of development.... Whatever it is possible to inure children to, they ought to be subjected to from the very outset, and gradual progress to be made. Children, on account of their high natural warmth, are the proper subjects for inurement to cold. These and other points of the same nature are what ought to be attended to in the first years of the

child's life. In the following years, up to the age of five, while children ought not to be subjected to any instruction or severe discipline, for fear of impeding their growth, they ought to take such exercises as shall guard their bodies from sluggishness. This may be secured by other forms of activity as well as by play. Care must be taken that their games shall be neither unrefined, laborious, nor languid. As to the conversation and stories which children are to hear, that is a matter for the attention of those officers called Guardians of Public Instruction. It ought to be seen to that all such things tend to pave the way for future avocations. Hence all games ought to be types of future studies. As to the screaming and crying of children, they are things that ought not to be prohibited, as they are in some places. They contribute to the growth of the body, by acting as a sort of gymnastics. Just as persons engaged in hard work increase their strength by holding their breath, so children increase theirs by screaming. It is the business of the Guardians of Public Instruction to provide for their amusement generally, as well as to see that these bring them as little as possible in contact with slaves. It is, of course, natural that at this age they should learn improprieties of speech and manner from what they hear and see. As to foul language, it ought, of course, like everything else that is foul, to be prohibited in all society (for frivolous impurity of talk easily leads to impurity of action), but above all, in the society of the young, so that they may neither hear nor utter any such thing. If any child be caught uttering or doing anything that is forbidden, if he be freeborn and under the age when children are allowed to come to the public table, he ought to be disgraced and subjected to corporal punishment; if he be older, it will be sufficient to punish him with disgrace, like a slave, for having behaved like one. And if we thus prohibit all mention of improper things, with stronger reason shall we prohibit all looking at improper pictures and listening to improper narratives. It ought to be made the business of the Guardians of Public Instruction to see that there does not exist a statue or a picture representing any such thing anywhere in the State, except in the temples of those gods to whom ordinary belief ascribes a certain wantonness.... There ought to be a regulation forbidding young persons to be present at lampoons or comedies before they reach the age when they are allowed to come to the

public table and partake of wine, and when education has fortified them against all possible danger from them.... We all have a preference for what we first know; for this reason everything that savors of meanness or ignobility ought to be made alien to children. From the completion of their fifth year to that of their seventh, children ought to be present at the giving of the various kinds of instruction which they will afterwards have to acquire.”

In this brief sketch of primary education we see that Aristotle does not depart far from the notions of Plato. It contains even the revolting features of his scheme. It assumes that the citizens — men, women, and, after a certain age, children — eat at public tables, and that education is entirely managed by the State, — the family, in this respect, being merely its agent. Some of its features, including the Guardians of Public Instruction (παιδονόμοι, child-herds) are plainly borrowed from Sparta.

CHAPTER VI

THE YEARS FROM SEVEN TO TWENTY-ONE

The natures that give evidence of being the noblest are just those that most require education. — Socrates.

We found ourselves beneath a noble castle
Encompassed seven times with lofty walls,
Defended round by a fair rivulet.
O'er this we passed as upon solid earth:
Through seven gates I entered with these sages.
We came upon a meadow of fresh green. — Dante.

For this period, which Aristotle divides into two (see p. 183) by the advent of puberty, he, in the main, accepts the course of study customary in his time. It consists, he says, of four branches, —"Letters, Gymnastics, Music, and Drawing, the last not being universal. Letters and Drawing are taught because they are useful in the ordinary business of life and for a variety of purposes, and Gymnastics because they foster manliness, whereas the purpose of Music is doubtful."

Of Letters Aristotle has not much to say, beyond the fact that they are necessary in the common affairs of life. He champions Homer against Plato, and goes into a long discussion to show the value of the drama. Instead of believing, with Plato, that children should see and hear nothing that would excite their emotions, he maintains that it is only by being properly excited and "purged" that these can be trained and made subordinate to the reason. Among the passions that obstruct the exercise of reason are fear and pity. Tragedy rouses these and then drains them off in a pleasant and harmless way. Comedy does the same thing for pleasure and laughter. In fact, he maintains that the special function of the fine arts is to act as cathartics for the different passions. Art is ideal experience. Aristotle has left us a work on tragedy that holds the place of honor in the literature of that subject even at the present day.

Drawing Aristotle recommends as a branch of study which develops taste and judgment in regard to the products of industrial art; but he says it should not be studied merely for its use in enabling us to choose these, or even works of fine art, correctly, but rather because it enables us to appreciate beauty of form. He adds: "The perpetual demand for what is merely useful is anything but a mark of breadth or liberality."

After thus briefly dismissing Letters and Drawing, Aristotle passes on to Gymnastics and Music, and devotes considerable space to each.

Alongside Gymnastics, but distinguished from them, he names Physical Culture (παιδοτριβική), saying that, while the former gives character to the acts of the body, the latter gives character to the body itself. The aim of gymnastic training should be neither athleticism nor ferocity, such as the Lacedæmonians cultivate in their children in the hope of making them courageous. The former is detrimental to the beauty and growth of the body; the latter misses its aim (see p. 41). "Hence nobility, and not ferocity, ought to play the principal part among our aims in physical education. For neither a wolf nor any other wild beast ever braved a noble danger. To do that takes a noble man; and those who allow their children to go too deep into such wild exercises, and so leave them uninstructed in the necessary branches, make them, in point of fact, mere professionals, useful for the ends of the State only in a single requisite, and, as we have shown, inferior to others even in that.

"There is a general agreement, then, as to the utility of Gymnastics and to the manner in which they ought to be conducted. Up to the age of puberty, children ought to be subjected only to the lighter exercises, and all forced dieting and violent exertions eschewed, so that no obstacle may be put to the growth of the body. It is no slight evidence of the fact that violent exercise impedes growth, that there are not more than two or three examples on record of persons' having been victorious at the Olympic games both as boys and men. The explanation of this is, that the others were robbed of their strength in their boyhood by the training they had to undergo." After the advent of puberty, for a period of three years, the young men are apparently to have very little gymnastics, and to

devote themselves assiduously to letters, music, and drawing. The period following this is to be devoted to severe exercise and strict dieting, mental exertion being reduced to a minimum; "for the two kinds of exertion naturally work against each other, bodily exertion impeding the intellect, and intellectual exertion the body."

On Music, as a branch of study, we have almost a disquisition from the pen of Aristotle. The question that first occupies him is, What is the use of music? Is it a recreation, an occupation for cultured leisure, or a gymnastic for the soul? It is all three, he replies, and would deserve study for the sake of any one of them. At the same time, its chief value in education lies in its third use. Music imparts a mental habit; about that there can be no doubt. For example, the songs of Olympus "render the soul enthusiastic, and enthusiasm is an affection of the soul's habit." Aristotle reasons in this way: Music is capable of affecting us with all kinds of pleasures and pains. But moral worth at bottom consists in finding pleasure in what is noble, and pain in what is ignoble, that is, in a correct distribution of affection. But in good music the strains that give pleasure are attached to the ideas that are noble, and the strains that give pain to the ideas that are ignoble; hence, by a natural association, the pleasures and pains which we find in the music attach themselves to the ideas which it accompanies. "There is nothing that we ought to learn and practice so assiduously as the art of judging correctly and of taking delight in gentlemanly bearing and noble deeds. And apart from the natural manifestations of the passions themselves, there is nothing in which we can find anger, gentleness, courage, self-control, and their opposites, as well as the other moods, so well represented as in rhythms and songs. This we all know by experience; for the moods of our souls change when we listen to such strains. But the practice which we thus receive from rhythms and songs, in rejoicing and suffering properly, brings us very near being affected in the same way by the realities themselves." Here Aristotle draws a distinction between music, which appeals to the ear, and the arts that appeal to the other senses, or rather to sight; for no art appeals to touch, taste, or smell. In the objects of art that appeal to the eye, we have expressions of passions only in so far as they affect the body, whereas in music we have their direct

expression passing from soul to soul. Yet persons are deeply moved by statuary and painting, so much so that young people ought not to be allowed to see such works as those of Pauson. How much more then must they be moved by music! "That they are so is quite plain; for there is such an obvious difference of nature between harmonies that the listeners are affected in entirely different ways by them. By some they are thrown into a kind of mournful or grave mood, *e.g.*, by what is known as the mixed Lydian; by others a sentimental turn is given to their thoughts, for example, by languid harmonies; while there is another kind that especially produces balance of feeling and collectedness. This effect is confined to the Doric harmonies. The Phrygian harmonies rouse enthusiasm. These are correct results arrived at by those thinkers who have devoted their attention to this branch of education, — results based upon actual experience. What is true of harmonies is true also of rhythms. Some of these have a steady, others a mobile, character; of the latter, again, some have coarse, others refined, movements. From all these considerations, it is obvious that music is calculated to impart a certain character to the habit of the soul, whence it follows that it ought to be brought to bear upon children, and instruction given them in it. Musical instruction, indeed, is admirably adapted to their stage of development; for young people, just because they are young, are not fond of persisting in anything that does not give them pleasure, and music is one of the pleasant things. There seems even to be a certain kinship between harmonies and rhythms [and the soul]; whence many philosophers hold that the soul is a harmony, or that it has harmony."

Aristotle, having thus shown that music is a proper subject of instruction, goes on to inquire "whether children ought, or ought not, to be taught music, by being taught to sing and play themselves?" His answer is well worth quoting at full length. "It is quite evident," he says, "that music will have a very much greater effect in moulding people, if they take part in the performance themselves. Indeed, it is difficult, or even impossible, for those who do not learn to do things themselves to be good judges of them when they are done. At the same time, children must have some amusement, and we may look upon Archytas' rattle, which they give to children to spend their energies upon, and to prevent them from breaking things about the

house, as a good invention. It is useless to try to keep a young creature quiet, and, just as the rattle is the proper thing for babies, so musical instruction is the proper rattle for older children. It follows that children ought to be taught music by being made to produce it themselves, and it is not difficult to determine either what is suitable and unsuitable for different ages, or to answer those people who pretend that the study of music is something ungentlemanly. In the first place, since people must, to some extent, learn things themselves, in order to form a correct judgment about them, they ought to learn the practice of them while they are young, so that, when they grow up, they may be able to dispense with it, and yet, through their early studies, be able to judge of them correctly and take the proper delight in them. To the objections which some people raise, that music turns people into craftsmen, it is not hard to find an answer, if we consider to what extent the practice of music ought to be required of children who are being reared in the civic virtues, what songs and rhythms they ought to learn, and what instruments they ought to use — for this makes a difference. Herein lies the solution of the difficulty. The fact is, there is nothing to prevent certain kinds of music from accomplishing the end proposed.

“It is, of course, obvious that the acquisition of music ought not to be allowed to interfere with future usefulness, to impart an ignoble habit to the body, or render it unfit for civic duties, — either for the immediate learning, or the subsequent exercise, of them. All the beneficial results of musical education would be attained, if, instead of going into a laborious practice, such as is required to prepare people for public exhibitions, if instead of trying to perform those marvellous feats and *tours de force* which have lately become popular at public exhibitions, and passed from them into education, the children were to learn just enough to enable them to take delight in noble songs and rhythms, instead of finding a mere indiscriminating pleasure in anything that calls itself music, as some of the lower animals and the bulk of slaves and children do. If so much be admitted, we need be in no doubt respecting our choice of instruments.” Aristotle specially condemns the flute, and tells how it came into use, and how it was afterwards discarded, as exerting an immoral influence. “In the same way were condemned many of the

older instruments, as the pectis, the barbitus, and those which tended to produce sensual pleasure in the hearers — also the septangle, the triangle, the sambuca, and all those requiring scientific manipulation.” ... “We would, then, condemn all professional instruction in the nature and use of these instruments. ‘Professional’ we call all instruction that looks toward public exhibitions. The person who receives this pursues his art, not with a view to his own culture, but to afford a pleasure, and that a vulgar one, to other people. For this reason we hold that such practice is not proper for free men, but savors of meniality and handicraft. The aim, indeed, for which they undertake this task is an ignoble one. For audiences, being vulgar, are wont to change their music, and so react upon the character of the professionals who cater to their tastes, and this again has its influence upon their bodies, on account of the motions which they are obliged to go through.”

Since different kinds of music have different effects upon the habit of the soul, Aristotle next inquires what kinds are suitable for education. “We accept,” he says, “the classification made by certain philosophers, who divide songs into ethical, practical, and enthusiastic, assigning to them the different harmonies respectively, and we affirm that music is to be employed, not for one useful purpose alone, but for several; *first*, for instruction; *second*, for purgation; and *third*, for cultured leisure, for relaxation, and for recreation. It is obvious that all harmonies ought to be employed, though not all in the same way. The most ethical (*i.e.* those that most affect the *ethos* or habit of the soul) must be employed for instruction; the practical and enthusiastic for entertainments by professional performers. For those emotions which manifest themselves powerfully in some souls are potentially present in all, with a difference in degree merely, *e.g.*, pity, fear, and also enthusiasm, a form of excitement by which certain persons are very liable to be possessed. If we watch the effects of the sacred songs, we shall see that those persons are restored to a normal condition under the influence of those that solemnize the soul, just as if they had undergone medical treatment and purgation. The same thing must happen to all persons predisposed to pity, fear, or emotion generally, as well as to others in so far as they allow themselves to come within

the reach of any of these; for them all there must exist some form or another of purgation and relief accompanied with pleasure. In this way those 'purgative' songs afford a harmless pleasure, and it is for this reason that there ought to be a legal enactment to the effect that performers giving public concerts should employ such harmonies and such songs. The fact is, since there are two kinds of public, the one free and cultivated, the other rude and vulgar, composed of mechanics, laborers, and the like, there must be entertainments and exhibitions to afford pastime to the latter as well as the former. As the souls of these people are, so to speak, perverted from the normal habit, so also among the harmonies there are abnormities, and among songs there are the strained and discolored; and each individual derives pleasure from that which is germane to his nature. For this reason performers must be allowed to produce this kind of music, for the benefit of this portion of the public.

"For the purposes of instruction, as has been said, we must employ ethical songs and the corresponding harmonies. Such a harmony is the Doric, as has already been remarked. We must likewise admit any other species of music that may have approved itself to such persons as have devoted attention to philosophic discussion and musical education.... In respect to the Doric harmony, it is universally admitted to be, of all harmonies, the most sedate, expressive of the most manly character. Moreover, since our principle is, that the mean between extremes is desirable and ought to be pursued, and the Doric harmony holds this relation to other harmonies, it follows that Doric songs should be taught to young people in preference to any other. Two things, however, must be kept in view, the practicable and the befitting. I mean that we must discuss what is specially practicable for different people, as well as what is befitting. This, indeed, will depend upon the different periods of life. For example, it would not be easy for persons in the decline of life to sing the intense harmonies; for them nature suggests the languid kinds. For this reason those musicians are right who blame Socrates for having condemned the languid harmonies, as subjects of instruction, on the ground that they were intoxicating. (By this term he did not mean inebriating, in the sense that wine is inebriating, — for wine renders boisterous rather than anything else, — but

languid.) The truth is, with an eye to the future, to old age, instruction ought to be given in harmonies and songs of this sort. Moreover, if there is any harmony suitable for youth, as tending to refine as well as to instruct, as is the case notably with the Lydian, it, of course, ought to be adopted. It is clear, then, that there are three distinct things to be considered in reference to education, avoidance of extremes, practicability, and appropriateness.”

So much for the four branches of study which, according to Aristotle, ought to compose the curriculum of youth. We have noticed that, in his extant works, he says little about Letters and Drawing. Just what branches the former was supposed to include, he has nowhere told us directly; but I think there can be little doubt that he gave a place to Grammar, Rhetoric (including Poetics), Dialectic, Arithmetic, Geometry, and Astronomy, which, along with Music, make up the Seven Liberal Arts, the *Trivium* and *Quadrivium* of the Middle Ages. This curriculum underwent considerable changes at different times, as we can see from Philo, Teles, Sextus Empiricus, St. Augustine, and others; but in Martianus Capella it returned to its original form, and in this dominated education for a thousand years. We might perhaps draw out Aristotle’s programme of secondary education thus: —

CHAPTER VII

EDUCATION AFTER TWENTY-ONE

Be assured that happiness has its source, not in extensive possessions, but in a right disposition of the soul. Even in the case of the body, no one would call it fortunate for being arrayed in splendid garments; but one would do so, if it had health, and were nobly developed, even without such appendages. In the same manner, we ought to ascribe happiness to the soul only when it is cultivated, and to call a man happy only if he possesses such a soul, not if he is splendidly attired outwardly, but has no worth of his own.... For those whose souls are ill-conditioned, neither wealth, nor power, nor beauty is a blessing; on the contrary, the more excessive these conditions are, the more widely and deeply do they injure their possessors, being unaccompanied with right-mindedness. — Aristotle.

Zeno used to tell a story about Crates, to this effect: One day Crates was sitting in a shoemaker's shop, reading aloud Aristotle's *Exhortation* (to Philosophy), addressed to Themison, king of the Cyprians, in which the king is reminded that he possesses, in an exceptional degree, all the conditions of philosophy, superabundant wealth, and high position. As he was reading, the shoemaker, without interrupting his sewing, listened to him, until at last Crates said: "Philiscus, I think I will write an *Exhortation* for you; for I see you have more of the conditions of philosophy than Aristotle has enumerated." — Teles.

At the age of twenty-one, those young men who have successfully completed the State system of training become citizens or politicians, and begin to exercise the functions of such. These are of two kinds, (1) active, practical, or executive, and (2) deliberative, theoretical, or legislative. As action must, on the one hand, be vigorous, and, on the other, guided by deliberation, which requires large experience, the functions of the State must be so arranged that the active duties fall to the young and robust, the deliberative to the elderly and mature. The distinguishing virtue of the former is fortitude, with endurance

or patience; that of the latter philosophy. Both equally have self-control and justice. In this way does Aristotle distribute Plato's four cardinal virtues.

When young men first become citizens, they are assigned to posts of active service, civil and military, and thus study practical philosophy — Ethics and Politics — in a practical way. As they grow older, they gradually rise to posts demanding less practice and more thought, until at last they are admitted to the deliberative body, or council, when their active duties cease, and they are able to devote themselves to Speculative Philosophy or Theoretics. These men have now reached the end of life, as far as this world is concerned. They spend their days in cultured leisure, and the contemplation of divine things (θεωρία). The very oldest of them, those who are most conversant with divine things, are chosen as priests, so that they may, as it were, live with the gods, and these be worthily served. Thus gradually, almost insensibly, they pass from the world of time to that of eternity; from the imperfect activity of practice, whose end is beyond itself, to the perfect energy of contemplation, which is self-sufficient and the life of God. In this way Aristotle settles the vexed question with regard to the compatibility and relative value of the practical and the contemplative life. They are necessary complements of each other. Practice is the realization of what contemplation discovers in the pure energy of God, revealing itself in the world. Thus the practical life of man glides gradually into the contemplative life of God.

Such is the highest view of man's destiny, and the way thither, that the Greeks ever reached, and it is in many ways a most attractive and inspiring one. Its defects are the defects of all that is Greek. They are two: (1) its ideal is intellectual and æsthetic, — a coördinated, harmonious whole, whereof the individual is but a part: not moral or religious — a self-surrender of the individual to the supreme will; consequently, (2) it does not provide for every human being, as such, but only for a small, select number, the fruit of the whole. Its ethics are institutional not personal, and, indeed, the Greek never arrived at a distant conception of personality, that being possible only through the moral consciousness, which is its core. It seeks to find happiness in a correlation and balancing of individual selves, not in the

independent conformity of each self to a supreme self. Hence it was that, with all its marvellous grasp and manly prudence, the ideal of Aristotle proved powerless to restore the moral unity of man, until it was absorbed in a higher.

BOOK IV. THE HELLENISTIC PERIOD (b.c. 338- a.d. 313)

CHAPTER I

FROM ETHNIC TO COSMOPOLITAN LIFE

‘Tis Greece, but living Greece no more. — Byron.

Most glorious of all the Undying, many-named, girt round with awe!
Jove, author of Nature, applying to all things the rudder of law —
Hail! Hail! for it justly rejoices the races whose life is a span
To lift unto Thee their voices — the Author and Framers of Man.
For we are Thy sons; Thou didst give us the symbols of speech at our
birth,

Alone of the things that live, and mortal move upon earth.
Wherefore Thou shalt find me extolling and ever singing Thy praise;
Since Thee the great Universe, rolling on its path round the world,
obeys: —

Obeys Thee, wherever Thou guidest, and gladly is bound in Thy
bands,

So great is the power Thou confidest, with strong, invincible hands,
To Thy mighty, ministering servant, the bolt of the thunder, that flies,
Two-edged, like a sword and fervent, that is living and never dies.
All nature, in fear and dismay, doth quake in the path of its stroke,
What time Thou preparest the way for the one Word Thy lips have
spoke,

Which blends with lights smaller and greater, which pervadeth and
thrilleth all things,

So great is Thy power and Thy nature — in the Universe Highest of
Kings!

On earth, of all deeds that are done, O God! there is none without
Thee.

In the holy æther not one, nor one on the face of the sea;

Save the deeds that evil men, driven by their own blind folly, have
planned;

But things that have grown uneven are made even again by Thy
hand;

And things unseemly grow seemly, the unfriendly are friendly to Thee;
For so good and evil supremely Thou hast blended in one by decree.
For all Thy decree is one ever — a Word that endureth for aye,
Which mortals, rebellious, endeavor to flee from and shun to obey —
Ill-fated, that, worn with proneness for the lordship of goodly things,
Neither hear nor behold, in its Oneness, the law that divinity brings;
Which men with reason obeying, might attain unto glorious life,
No longer aimlessly straying in the paths of ignoble strife.
There are men with a zeal unblest, that are wearied with following of fame,
And men, with a baser quest, that are turned to lucre and shame.
There are men, too, that pamper and pleasure the flesh with delicate stings:
All these desire beyond measure to be other than all these things.
Great Jove, all-giver, dark-clouded, great Lord of the thunderbolt's breath!
Deliver the men that are shrouded in ignorance, dismal as death.
O Father! dispel from their souls the darkness, and grant them the light
Of Reason, Thy stay, when the whole wide world Thou rulest with might,
That we, being honored, may honor Thy name with the music of hymns,
Extolling the deeds of the Donor, unceasing, as rightly beseems
Mankind; for no worthier trust is awarded to God or to man
Than forever to glory with justice in the law that endures and is One.
— Cleanthes.

The distinguishing characteristics of Hellenic education were unity, comprehensiveness, proportion, and aimfulness. It extended to the whole human being, striving to bring the various elements of his nature into complete harmony in view of an end. This end was the State, in which the individual citizen was expected to find a field for all his activities. We have seen how, while conservative Sparta clung to this ideal to the last, and rigorously excluded those influences which tended to undermine it, Athens, by freely admitting these,

gradually broke down the fair proportion between bodily and mental education, in an excessive devotion to the latter, and so came to make a distinction between the man and the citizen. The result was an epidemic of individualism which threatened the existence of all that was Hellenic. Against this destructive power the noblest men in the nation, an Æschylus, an Aristophanes, a Pericles, a Socrates, a Xenophon, a Plato, an Aristotle, fought with all the might of worth and intellect. Some of them sought once more to remerge the man in the citizen by means of a despotism and the suppression of all intellectual pursuits; others, seeing clearly the impossibility of this, tried so to define the sphere of the individual that it should not encroach upon that of the citizen, but stand in harmonious relation to it. They did this by placing the sphere of the individual above that of the State, and, inasmuch as the former was a purely intellectual sphere, they found themselves driven to conclude, and to lay down, that the contemplative life is the end and consummation of the practical, that the citizen and the State exist only for the sake of the individual. They were very far indeed from seeing all the implications of this conclusion: these showed themselves only in the sequel; but the fact is, that the principle of the separation between the man and the citizen, and the assignment of the place of honor to the former, proved at once the destroying angel of Hellenism and the animating spirit of the civilization which took its place. If we look closely at the schemes of Plato and Aristotle, we shall see that they try to render innocuous the spirit of individualism by exhausting its activities in intellectual relations to the divine, offering it heaven, if it will only consent to relinquish to the political spirit its earthly claims. They practically said: Man, in all his relations to his fellow-men here below, is a citizen; only in relation to God is he an individual. The history of the last two thousand years is but a commentary on this text. From the day when the master-mind of the Greek world credited man's nature with a divine element having a supreme activity of its own, European thought and life have been agitated by three questions, and largely shaped by the answers given to them: (1) What is the nature of the divine element in man? (2) In what form or institution shall that element find expression and realization? (3) How shall that institution relate itself to the State? And they have not

yet been definitely answered.

Principles that are to move the world are never the result of mere abstract thought, but always of a crisis or epoch in human affairs. And so it was in the present case. The separation between the man and the citizen was accomplished in fact, before it was formulated in theory. On the other hand, the theory received emphasis from the events which accompanied and followed its promulgation. The battle of Chæronea, which took place sixteen years before Aristotle's death, by putting an end forever to the free civic life of Greece, removed the very conditions under which the old ideal could realize itself, and forced men to seek a sphere of activity, and to form associations, outside of the State. The State, indeed, still maintained a semblance of life, and the old education, with its literature, gymnastics, and music still continued; but the spirit of both was gone. The State was gradually replaced by the philosophic schools, while intellectual training tended more and more to concentrate itself upon rhetoric, that art which enables the individual to shine before his fellows, and to gain wealth or public preferment. From this time on, the spiritual life of Greece found expression in the pretentious, empty individualism of the rhetorician, the lineal descendant of the sophists, and in the philosophical sects, which embodied the spirit of Socrates, their opponent.

The founder of the rhetorical schools may be said to have been Isocrates, who, after being a pupil of Socrates', turned against the philosophic tendency, and championed elegant philistinism. The aim of these schools was to turn out clever men of the world, thoroughly acquainted with popular opinions and motives, and capable of expressing themselves glibly, sententiously, and persuasively on any and every subject. They usually made no profession of imparting profound learning or eliciting philosophic thought: indeed, they despised both; but they did seek to impart such an amount of ordinary knowledge as to place their pupils in the chief current of the popular thought of their time. They thus became the bearers of practical education among a people who, having lost their political life without finding any higher, sought to obtain satisfaction in social intercourse. For hundreds of years they exerted an enormous influence, and, indeed, at certain times and places were formidable

rivals of the philosophic schools.

The first man of Greek race who attempted to found a sect or school outside the State was Pythagoras, and there can be no doubt that all subsequent schools were in some degree modelled upon his. It is true that the Pythagorean school had been broken up and dispersed long before the days of Plato and Aristotle (see p. 54); nevertheless, his followers, scattered over Greece, had carried with them the ideas and principles of their master, and now that Athens had fallen into the condition against which the Pythagorean discipline had been a protest, these ideas found a ready response in the hearts of those men whom the social life of the time could not satisfy. Hence the schools of Plato and Aristotle, which had originally been mere educational institutions, turned, even during the lifetime of the latter, into sects (αἰρέσεις, heresies, as they were called later on), with definite sets of non-political principles, in accordance with which their members tried to shape their lives. It cannot be said that these two schools were in any high degree successful, and the reasons were that they were too purely intellectual, that they made no striking revolt against political life, and that they called for a type of man not easy to find. But, shortly after the death of Aristotle, there arose, almost contemporaneously, two other schools, which exerted an influence, deep and wide, for over six hundred years. These were the Epicurean and the Stoic. Widely as these differed in respect to means, they sought the same end, namely, personal independence, and they sought it by conformity to laws imposed by no human legislator, but by nature. The former took the law of the senses, the latter the law of the spirit, for its guide; and, by a strange contradiction, while the former championed free will, the latter professed fatalism. These four schools were the only ones that ever met with extensive patronage in Athens, and with the exception of the Academic, they never diverged far from the principles of their founders. In the time of Marcus Aurelius, after Athens had been for ages a mere Roman university, they were placed under State patronage, and supported by public funds, and there is no record to show that this was discontinued until they were finally closed by the Emperor Justinian in a.d. 529.

Not long after the death of Aristotle, Athens was supplanted by

Alexandria, as the centre of Greek influence. Here the rhetorical and philosophic schools established themselves, and could soon boast a numerous discipleship. This, however, was no longer exclusively, or even mainly, Greek, but was recruited from all the nations of the known world, more especially those of the East. Phœnicians, Syrians, Jews, Persians, etc., not to speak of Egyptians, now became students of Greek philosophy, and members of philosophic sects, whose members not only studied together, but often, to a large extent, lived together in communities. About the year b.c. 300 were founded the famous Museum and Library of Alexandria — the first university and the first public library in the world. Round these the various sects gathered, to study, to discuss, and to exchange opinions. Nor was it Greek thought alone that engaged their attention. The opinions and beliefs of Egypt and the East came in for a share, and, in the end, for the largest share. Nor is this wonderful, when we consider the direction that thought and life were then taking.

We have already seen that, as Greek civic life lost the conditions of its existence, the thoughtful portion of the people came more and more to seek for life-principles in the supersensible world of intellect. The nature of this world Plato and Aristotle had done their best to reveal. But the event proved that neither an ordered host of ideas commanded by the Good, nor a Supreme Intelligence served by a host of lower intelligences, could yield the principles which the life of the time demanded; and thus we find the philosophers of Alexandria striving to people their intelligible world with forms drawn from all the religions of the East, including Judaism. Thus there grew up the various forms of Alexandrine philosophy, compounds of Greek thought and Oriental religion. On the basis of these again were organized, at the same time, various forms of social life, all tending more or less to religious communism. Hence came the Essenes (see p. 59), the Therapeuts, the Neopythagoreans, and the Neoplatonists, all of whom, notwithstanding certain shortcomings, did much to purify life, and to pave the way for a higher civilization.

In b.c. 146, Greece, and, in b.c. 30, Egypt, fell into the hands of the Romans and thenceforth formed provinces of their empire. Athens and Alexandria were now Roman university-towns, while

Rome became more and more the diffusing centre of Greek and Oriental influence. It would be impossible, in a work like the present, to give even a sketch of the forms which education assumed in these three great centres, or in the world that revolved round them, in the six hundred and more years that passed between the loss of Greek autonomy and the triumph of Christianity. We shall merely endeavor to give a general notion of its two chief tendencies, which, as we saw, were towards rhetoric and philosophy; and we shall do this in connection with the names of two men, who may be regarded as respectively typical of the two tendencies, Quintilian the rhetorician, and Plotinus the philosopher. By doing so we shall pave the way for the consideration of the Rise of the Christian Schools.

CHAPTER II

QUINTILIAN AND RHETORICAL EDUCATION

Rhetoric is the counterpart of Dialectic. Both have for their subjects those things which, in a certain way, are matters of common knowledge, and belong to no definite science. Hence everybody, in some degree, is gifted with them; for everybody, to some extent, tries to examine and sustain an argument, to defend himself, and to accuse others. — Aristotle.

There is a certain political theory which is made up of many great things. A large and important part of it is artificial eloquence, which they call rhetoric. — Cicero.

Every duty which tends to preserve human relations and human society must be assigned a higher place than any that stops short with knowledge and science. — *Id.*

Zeno, having pressed his fingers together and closed his fist, said that was like Dialectic; having spread them out and opened his hand, he said Eloquence was like his palm there. — *Id.*

To act considerately is of more moment than to think wisely. — *Id.*

I pass to the pleasure of oratorical eloquence, the delight of which one enjoys not at any one moment, but almost every day and every hour. — Tacitus.

Grammar is an experimental knowledge of the usages of language as generally current among poets and prose writers. It is divided into six parts, (1) trained reading with due regard to prosody [*i.e.* aspiration, accentuation, quantity, emphasis, metre, etc.], (2) exposition according to poetic figures [literary criticism], (3) ready statement of dialectical peculiarities and allusions [philology, geography, history, mythology], (4) discovery of etymologies, (5) accurate account of analogies [accidence and syntax], (6) criticism of poetical productions, which is the noblest part of the grammatic art [ethics, politics, strategy, etc.]. — Dionysius Thrax.

Reading is the rendering of poetic or prose productions without

stumbling or hesitancy. It must be done with due regard to expression, prosody, and pauses. From the expression we learn the merit of the piece, from the prosody the art of the reader, and from the pauses the meaning intended to be conveyed. In this way we read tragedy heroically, comedy conversationally, elegiacs thrillingly, epics sustainedly, lyrics musically, and dirges softly and plaintively. Any reading done without due observance of these rules degrades the merits of the poets and makes the habits of readers ridiculous. — *Id.*

Some arts are common, others liberal.... The liberal arts, which some call the logical arts, are astronomy, geometry, music, philosophy, medicine, grammar, rhetoric. — *Scholia to Dionysius Thrax.*

It is obvious that man excels the other animals in worth and speech: Why may we not hold that his worth consists as much in eloquence as in reason? — Quintilian.

The civil man, and he who is truly wise, who does not devote himself to idle disputes, but to the administration of the commonwealth (from which those folks who are called philosophers have farthest withdrawn themselves), will be glad to employ every available oratorical means to reach his ends, having previously settled in his own mind what ends are honorable. — *Id.*

If we count over all the epochs of life, we shall find its pains far more numerous than its pleasures.... The first, that of babyhood, is trying. The baby is hungry; the nurse sends it to sleep: it is thirsty; she washes it: it wants to go to sleep; she takes a rattle and makes a noise. When the child has escaped from the nurse, it is taken hold of by the pedagogue, the physical trainer, the grammar-master, the music-master, the drawing-master. In process of time, there are added the arithmetic-master, the geometer, the horse-breaker; he rises early; he has no chance for leisure. He becomes a cadet; again he has to fear the drill-master, the physical trainer, the fencing-master, the gymnasiarch. By all these he is whipt, watched, throttled. He graduates from the cadets at twenty; again he dreads and watches captain and general, etc. — Teles the Stoic (b.c. 260).

The palmy period in the history of Rome is the period when she had no literature. It was only when the Roman nationality began to break up, and cosmopolitan Greek tendencies to lay hold upon the

people, that a literature began to appear. For this reason, Roman literature from its very inception is, from absolute necessity, filled with the Greek spirit, and stands in the most direct opposition to the national spirit of the people. — Mommsen.

Quintiliane, vagæ moderator summe juventæ,
Gloria Romanæ, Quintiliane, togæ. — Martial.

Up to the time when Rome began to decline, the school education of her youth was meagre in the extreme, consisting of reading, writing, and a little law. All later education that was more than this was borrowed from the Greeks. It was about the year 200 b.c., at the close of the Second Punic War, that their influence began clearly to show itself. The severe Cato, who so cordially despised rhetoricians and philosophers, learnt Greek in his old age and wrote, for the use of his son, a series of manuals on ethics, rhetoric, medicine, military science, farming, and law. At the same time Scipio Africanus spent his leisure hours in practising gymnastics. From this time on, and just in proportion as Rome lost her national character and became cosmopolitan, she more and more adopted Greek manners, Greek religion (or irreligion), and Greek education. When, finally, in b.c. 146, Greece became a Roman dependency, it was strictly true that “Captive Greece took captive her rude conqueror.” Thousands of Greek schoolmasters, rhetoricians, philosophers, etc., flocked to Rome, and, though attempts were made to expel or suppress them, they held their place, for the simple reason that the education they offered was a necessity of the time. Rome, the mistress of the world, had either to become cosmopolitan or perish, and she preferred the former alternative. She now, for the first time, began to have a literature and to cultivate her own language. The studies which she specially affected were (1) grammar, that is, literature, (2) rhetoric, (3) philosophy, which corresponded to school, college, and university education. The last, like music and geometry, was, for the most part, an elegant accomplishment, rather than a serious study. The physical sciences found little favor.

So long as Roman education was in the hands of Greeks, it was conducted in the Greek language, and the authors read and discussed

were Greek. But the Romans, though willing enough to borrow Greek culture, were unwilling to remain permanently in intellectual dependence upon a conquered people, which in many respects they despised. Strong efforts, therefore, were made to develop a national literature and a national education. About the year b.c. 100, Lucius Ælius Præconinus Stilo, a worthy and conservative Roman knight, opened a private class in Latin grammar and rhetoric for young men of the upper classes, and from this time on the direct influence of the Greeks, except in philosophy, declined. Greek, indeed, continued to be spoken by all persons making any pretensions to culture; but Latin became the language of Roman literature. Among the pupils of Stilo were Varro and Cicero, who, along with Julius Cæsar, may be called the parents of the classical Latin language, literature, and eloquence. Both Varro and Cæsar wrote works on grammar. A certain Cornificius (generally known as *Auctor ad Herennium*) about this time wrote the first Latin treatise on Rhetoric; but the great authority on the subject, in practice as well as theory, was Cicero, who wrote no fewer than seven works on it. With Cicero's death, and the transformation of the republic into an empire, eloquence lost its noblest use, the defence of liberty. Rhetoric, nevertheless, continued to be cultivated as a fine art and for forensic use, and, indeed, was made to cover the whole of the higher education of youth. Of this art the most celebrated teacher was Quintilian, "the supreme director of giddy youth, the glory of the Roman toga" (*i.e.* civil manhood).

Quintilian was born about a.d. 35 in the Spanish city of Calagurris (Calahorra), where, later, St. Dominic first saw the light. He was educated in Rome, but afterwards returned to his native place and established himself as a teacher of rhetoric. About a.d. 68, he was invited by the Emperor Galba to settle in Rome, which he did, giving instruction in rhetoric with unparalleled success for twenty years, and drawing a salary from the government. At the end of that time, he retired, rich and honored, into private life. It was after this that he wrote the work which carried his fame down to posterity, his *Institutio Oratorica*, or Education of the Orator. In the first book of this he draws out a scheme of preparatory education for the family and the school; the succeeding ten are devoted to rhetoric, and the last to the character of the orator, whom he regards as identical with

the cultivated gentleman. It is only the first book that concerns the modern student of education, and of this I shall now give a brief summary.

The first care of the parent, after the birth of a child, should be to procure for it a nurse of good moral character and of cultivated speech. A child that early learns bad habits in acting and speaking, rarely, if ever, gets cured of them afterwards. Great care ought to be taken with regard to the child's youthful companions, and to his pedagogue, who ought to be of good character and well-informed. Its first language ought to be Greek; but Latin ought to be begun early, and both to be carefully cultivated. There is no need to follow the ordinary custom of not allowing the child to learn to read or write before the close of its seventh year. Much can very profitably be done by play long before that. It is a mistake to teach children to repeat the alphabet before they know the forms of the letters. These they may learn from tablets or blocks. As soon as the letters are recognized, they ought to be written. Following with a pen the forms of letters engraved on ivory tablets is a good thing. After letters, syllables must be learnt — all the possible syllables in both languages. After syllables come words, and after words, sentences. In all this process, it is of the utmost importance to secure thoroughness by avoiding haste. The child must not attempt words till he can read and write all the syllables, nor sentences till he is perfectly familiar with words. In reading sentences, he must learn to run ahead, so that, while he is pronouncing one word with his lips, he is recognizing others with his eye. The writing lesson should be utilized in order to make the child acquainted with rare words and good poetry. At this stage, his memory ought to be well exercised, and made to lay up large stores of good literature for future use. At the same time, his organs of speech should be well trained, by being made to pronounce rapidly verses containing difficult combinations of sound.

As soon as he is able, the child should go to school. Home education is objectionable on many accounts, especially for boys intended for orators. These, above all others, must learn sociability, tact, and *esprit de corps*, and form school-friendships. Many moral lessons can be learnt, and many motives employed, in the school, that are not possible in the family. Among the latter is ambition,

which “though itself a vice, is the parent of many virtues,” and therefore ought to be freely used. Hardly any motive is so powerful.

When a boy is sent to school, his teacher’s first business is to investigate his character and capacity. The chief marks of ability are memory and power of imitation. Imitation is not mimicry, which is always a sign of low nature. Slowness, though objectionable, is better than precocity, which should be discouraged in every way. Different treatment is required for different boys: some need the bit, some the spur. The best boy is the one “whom praise excites, whom glory pleases, who cries when he is beaten. Such a one may be nourished with emulation; reproach will sting him; honor will rouse him.” Boys ought to have seasons of rest and play, neither too short to afford recreation, nor too long to encourage idleness. Games of question and answer are good for sharpening the wits. In play an excellent opportunity is offered to the teacher for learning the character of his pupils. Corporal punishment is altogether to be deprecated, and, indeed, is unneeded when the teacher does his duty.

What boys learn in school is grammar; but this must be supplemented by music and astronomy. Without the former it will be impossible to scan verse; without the latter, to understand certain allusions and modes of fixing dates in the poets. A little philosophy is necessary for the sake of understanding such poets as Empedocles and Lucretius; geometry, in order to give practice in apodictic reasoning, as well as for practical uses. Thus the curriculum of school education will consist of Grammar, Music, Astronomy, Philosophy, and Geometry.

Grammar consists of two parts, (1) *Methodics*, or the art of correct speaking, (2) *Historics* (German *Realien*), the interpretation of poets, historians, philosophers, etc. *Methodics* — grammar in the modern sense — should aim at enabling a boy to speak and write with correctness, clearness, and elegance. All barbarisms (*i.e.* foreign words and idioms), solecisms, affectations, and careless pronunciations are to be avoided. In the use of language, four things are to be taken into account, (1) reason, (2) antiquity, (3) authority, (4) custom. In reading, the boy must be taught “where to draw his breath, where to divide a verse, where the sense is complete, where it begins, where the voice is to be raised, where lowered, what

inflections to use, what is to be uttered slowly, what rapidly, what forcibly, what gently." "That he may be able to do all this, he must *understand*. Reading must above all be manly and grave, with a certain sweetness." Poetry must not be read either as prose, nor yet in a sing-song way. All theatrical personification, and all gesticulation smacking of the comedian, are to be avoided.

For *Histories* the teacher must be very careful in his selection of texts. Homer and Virgil are best to begin with. Though their full import cannot be understood by youth, they awake enthusiasm for what is noble and spirited, and will often be read in later life. "Tragedies are useful. There is nourishment in the lyric poets"; but they must be used with caution and in selections, from which everything relating to love must be excluded. Even Horace must be expurgated. Satire and comedy, though of the utmost value for the orator, must be deferred till the moral character is sufficiently established not to be injured by them. Passages from the poets ought to be committed to memory. In all reading, the utmost care ought to be taken to promote purity and manliness (*sanctitas et virilitas*).

After reading a piece of poetry, boys must be made to analyze and scan it, to point out peculiarities of language and rhythm, to enumerate the different meanings of words, to name and explain the various figures of speech. But far more important than all this it is, that the teacher should impress on their minds the importance of systematic arrangement and propriety of description, "showing what is suitable for each rôle, what is commendable in thought, what in expression, where diffuseness is proper, and where brevity." In giving collateral information, whether in history, mythology, or geography, he should keep within bounds, giving only what is necessary and rests on respectable authority. "It is one of the virtues of a schoolmaster to be ignorant of some things."

As regards lessons in composition, the teacher should begin by making his pupils write out from memory the *Fables* of Æsop, in pure, simple, direct, and unadorned language. He should then call upon them to turn poetry into prose, and to paraphrase it, either briefly or diffusely. He should then make them write out proverbs, apophthegms, aphorisms, short, brilliant anecdotes, etc. Famous stories related by the poets may be used as subjects for composition,

but chiefly for the sake of information. Beyond this the schoolmaster should not go in the matter of composition. The rest should be left to the rhetorician.

It is of great importance in youthful education that several subjects should be studied at the same time. Boys like and need variety, and, when they get it, it is truly astonishing how much they can accomplish. "There is not the slightest reason for fearing that boys will shrink from the labor of study. No age is less easily fatigued." ... "Boys are naturally more inclined to hard work than young men."

Such, in brief, is Quintilian's school-programme. It has no place for physical science (except Astronomy), for manual training, or for physical exercise. Play is, indeed, permitted as a necessary recreation, and gymnastics and physical training (*παιδοτρίβεια*) are recommended in so far as they are necessary to enable the budding orator to move and to gesticulate gracefully; but that is all. "Nothing can please that is not becoming."

As soon as he is ready, the young aspirant for oratorical fame passes into the hands of the rhetorician, under whom he learns all the arts, and acquires all that knowledge, necessary to fit him for his profession. No kind of knowledge, and no moral excellence ought to be foreign to the orator. Quintilian is very severe upon the philosophers for claiming, in their title, to be, in an exceptional way, lovers of wisdom, and maintains that the true orator is the truly wise and good man. He is surely superior to the philosopher, who turns his back upon the world and manifests no interest in human affairs. Moreover, "philosophy may be simulated; eloquence cannot."

The closing chapter of the last book of Quintilian's work treats of the orator after his retirement from public life. He is to devote himself to writing and to the study of art, science, and philosophy. The picture is charming; but it ends with death, and there is nothing beyond. God may be defined for oratorical purposes; but his existence is a matter of conjecture.

In Quintilian we have the highest type of the civic man living under a cosmopolitan despotism. His defects — his pedantry, his servility, his externality, his worldliness — are only such as are natural to a good man placed in this position, without any outlook

upon a higher existence.

CHAPTER III

PLOTINUS AND PHILOSOPHIC EDUCATION

The material body, which is subject to motion, change, dissolution, and division, requires an immaterial principle to hold and bind it together in unity. This principle of unity is the soul. If it were material, it would require another principle of unity, and so on *ad infinitum*, till an immaterial first were reached, which would then be the true soul. — Ammonius Saccas.

Intelligible things, when they are united with other things, are not changed, as corporeal things are when they are united with each other, but remain as they are, and what they are. Soul and body are intimately united, but not mixed. The soul can separate and withdraw itself from the body, not only in sleep, but also in thought. As the sun illuminates and yet remains itself a separate light, so is the soul in its relation to the body. It is not in the body as in place; rather the body is in it and of it. — *Id.*

One's duty is to become first man, then God. — Hierocles.

Neither Schelling nor Baader nor Hegel has refuted Plotinus: in many ways he soars above them. — Arthur Richter.

What is loved by us here is mortal and hurtful. Our love is love for an image, that often turns into its opposite, because what we loved was not truly worthy of love, nor the good which we sought. God alone is the true object of our love. — Plotinus.

The practical and the contemplative lives, which Plato and Aristotle had labored so hard to combine and correlate, in order to save human worth and Greek civilization, fell asunder, despite all their efforts — greatly, of course, to the detriment of both. In the terrible picture which Quintilian draws of Roman life in the first century of our era, we see one side of the result of this divorce: in the cruel satires of Lucian, written less than a century later, we may find depicted the other. But, just as, in the midst of the moral corruption and brutality, there arose from time to time worthy men like Quintilian and Tacitus, so amid the philosophical charlatanry and pretence, there still survived a few earnest thinkers, who aspired with

all the power that was in them to divine truth, and strove to find in the eternal world that reality which was so miserably wanting in this. By far the greater number of these men were neither Greeks nor Romans, but Orientals, men whose thinking combined Greek philosophy with some earnest form of Eastern mysticism. To such men this life was merely an opportunity of preparing for a higher, in which lay all beauty, all good, and all blessedness. It is not difficult to see what sort of education would follow from this view of life. It may best be characterized by the one word "ascetic." It no longer seeks to train harmoniously all the faculties of body and mind with a view to a worthy social life, but to enable the soul to die to the body and to social life, and so rise to union and consubstantiality with God. In no sect was this tendency more marked than in the Neoplatonic, or, as it might equally well be called, the Neoaristotelian or Neopythagorean, the greatest name in which is Plotinus.

Plotinus was born in Egypt about a.d. 205. His nationality is unknown. He received his education in Alexandria — grammar, rhetoric, and philosophy, — and adopted the teaching of the last as a profession. He sought in vain, however, for a system that could satisfy him, till he met with Ammonius "the Sack-bearer," whom he at once recognized as his master. This Ammonius had been reared as a Christian, but had apostatized on becoming acquainted with philosophy. His Christian education, however, had not been altogether lost on him; for he had carried over into philosophy a religious spirit, and not a few of the esoteric ideas then current in certain Christian sects. It was this, apparently, that enabled him to give a new direction to philosophy, and to found a new school, whose influence upon subsequent, even Christian, thought, it would be difficult to overestimate. His school was the Neoplatonic, which, more than any other, united profound thought with mystic theosophy (θεωρία).

Plotinus listened to Ammonius for eleven years, and, on the death of the latter, paid a visit to Persia, with the view of studying the religion of that country. He shortly returned, however, and, after a brief sojourn at Antioch, betook himself, in his fortieth year (a.d. 244), to Rome, where he spent the remainder of his life as a teacher

of philosophy. His saintly character and his deep, religious thought drew round him a considerable number of earnest men and women, including even members of the imperial family. He made some attempt to found in Campania a Platonopolis, so that his principles might be realized in a social life, in a theosophic community; but this was never carried out. He died in a.d. 270. Plotinus was the only truly great, original ancient thinker after Aristotle.

While Plato and Aristotle had sought to rise to the intelligible world from, and by means of, the sensible, Plotinus, believing that he has attained a direct, intuitional knowledge of the former, sets out from it and thence tries to reach the other. At the summit of being he finds the supreme Platonic principle, the One or the Good, absolutely transcendent and self-sufficient; next below this, the supreme Aristotelian principle, Intelligence or Absolute Knowing, the *locus* of all ideas; and third, the supreme principle of the Stoics, Soul, Life, or Zeus, the animating principle of the world. Good, Intelligence, Life — these are Plotinus' divine trinity, evolved by a process of abstraction from the *Nous* of Aristotle (see p. 161). The members of this trinity are neither personal, conscious, nor equal. Each lower is caused by, but does not emanate from, the next above it; and this causation is due, not to any act of free will, but to an inner necessity. Thus the trinity of Plotinus is a mere energy, acting according to necessary laws. The third member of it turns toward matter, which is mere poverty and hunger for being, and, in so doing, produces a world of gods, dæmons, and mundane beings, the highest of which last is man. All that has matter has multiplicity.

It is easy enough to see what kind of ethics and education will spring from such a system as this. Inasmuch as the good means self-sufficiency, freedom from multiplicity and matter, evil means dependence, multiplicity, materiality. Whatever evil there is in man is due to his connection with matter, for which he is in no sense responsible. His sole business, if he desires blessedness, is to free himself from matter and multiplicity, and return to the unity of the Supreme Good. The steps by which this may be accomplished are, (1) Music or Art, (2) Love, (3) Philosophy or Dialectic: through all these he rises above multiplicity into unity. In all this there is, obviously, neither moral evil nor moral good, and, indeed, the world

of Plotinus contains no moral element, for the simple reason that it contains nothing personal, either in God or man. Evil is the product of necessity, and consciousness, implying as it does, multiplicity, is part of it. The unethical character of Plotinus' teaching comes out very clearly in his reversal of the positions of instruction and purgation in the scheme of education. According to the old view, purgation was a mere medical process, preparatory to ethical training (see p. 7). According to the Neoplatonic view, ethical training and the "political virtues" are a mere preparation for purgation and the intellectual virtues. And this is perfectly logical; for evil, being physical, must be cured by physical means. And the means which Plotinus recommends are magical, rather than moral; rites and prayers, rather than heroic deeds; the suppression of the will, rather than its exercise.

Plotinus is too much of a Greek to accept, or even see, all the consequences of his own theory, which makes moral life consist in an attempt to escape from the world and to quench consciousness and personality. Accordingly, though he has a poor opinion of civic life (a thing excusable enough in those days), he believes that the civic virtues ought to be cultivated, as a means toward the higher, and has apparently nothing to say against the ordinary grammatical, rhetorical, and musical education of his time. He has a good deal to say in favor of Mathematics, as a preparation for what to him is the supreme branch of education, Dialectics. But the tendency of his teaching is only too obvious, and the conclusions which he did not draw, time and succeeding generations drew for him. The effect of Neoplatonism was, in the long run, to make the super-civic part of man the whole man, to discredit political life and political effort, and to pave the way for the mystic, the ascetic, and the hermit. Nor were the tendencies of the other philosophical schools in any marked degree different. Thus philosophy, instead of contributing to harmonize man and society, and to restore moral life, came to be one of the strongest agencies in bringing about confusion and dissolution, by ignoring moral life altogether, embracing superstition, and turning man into a mere plaything of blind necessity and magical forces. And thus ancient civilization fell to pieces, because man himself had fallen to pieces, and each piece tried to set itself up for the whole.

The civic fragment finds its highest expression in Quintilian, the super-civic in Plotinus. Ere the fragments can be united into a truly moral being, a member of a truly moral society, a new combining force, unknown to either rhetorician or philosopher, must arise.

CHAPTER IV

CONCLUSION

Truly it was an old world, and even Cæsar's patriotic genius was not enough to make it young again. The dawn does not return till the night has fully set in. — Mommsen.

My thoughts are not your thoughts, neither are your ways my ways, saith the Lord. — Isaiah.

Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the great and first commandment. And a second like unto it is this, Thou shalt love thy neighbor as thyself. — Jesus.

Render unto Cæsar the things that are Cæsar's, and to God the things that are God's. — *Id.*

Are not five sparrows sold for two farthings? and not one of them is forgotten in the sight of God. But the very hairs of your head are all numbered. — *Id.*

We love because he first loved us. If a man say, I love God, and hateth his brother, he is a liar. — John.

By one intelligible form, which is the divine Essence, and one conscious intention, which is the divine Word, things may be known in their multiplicity by God. — Thomas Aquinas.

If God acts in all things, and such action in no way derogates from his dignity, but even belongs to his universal and supreme power, he cannot consider it below him, nor does it stain his dignity, if he extend his providence to the individual things of this world. — *Id.*

Une immense espérance a passé sur la terre. — Alfred de Musset.

We have seen that the Greek ideal of life rested upon the complete identification of the man with the citizen. We have seen also how this ideal was paralyzed by the growth of individualism; how the wisest men thought to render this innocuous and even beneficent, by providing for it a sphere of contemplation, superior to that of practice, but organically related to it, and, finally how, with the failure of this attempt, the two sides of human nature, divorced from each other, degenerated, the one into selfish worldliness, the other

into equally selfish other-worldliness, both conditions equally destitute of moral significance.

This sad result was mainly due to three causes, (1) that the remedies proposed for individualism were not sufficient, (2) that the best remedy was set aside, (3) that the conditions for which the remedies were offered soon ceased to exist. Both Plato and Aristotle wrote for the small Greek polities, which lost their autonomy through the Macedonian conquest. If it may be doubted whether even the proposals of the latter would have redeemed these polities, had they continued free, it is certain that they would have been ineffective under the changed circumstances. At all events, they were never adopted, and even for the super-civic man the teaching of Plato was preferred to his.

As the new cosmopolitanism deepened the gulf between the citizen and the individual, and immeasurably widened the sphere of the latter, in the same proportion did the teaching of Plato fail to bridge over that gulf, and provide activity for that sphere. To tell the super-civic man now that his function was to contemplate divine things and oracularly deliver laws for the guidance of the world, would have argued an absence of humor not common in those days. Besides, those persons who claimed to have contemplated divine things showed no such fitness for legislation as to induce practical men to accept their guidance. The sober fact was, that the contemplation of divine things, which more and more absorbed the energy of Greek thought, was, except for Aristotle, a mere vague asperation without moral value, and became ever more a sort of mystic ecstasy, in which the individual, instead of acquiring insight and power to live worthily and beneficently in the world, was thrown back upon himself, with his will paralyzed. Nor could this be otherwise, seeing the nature of the divine things, the contemplation of which was reckoned so important. Instead of being personal attributes, or a person imposing a moral law seen to be binding, they were mere abstractions, increasing in emptiness the higher they were in the series, the highest being absolute vacancy. In vain had Aristotle protested that all reality is individual: the Platonic theory, that all knowledge is of ideas or universals, prevailed, with the result that the highest knowledge was held to be knowledge of that which is

absolutely universal, viz. indeterminate being or, as Plotinus held, something lacking even the determination of being — the Supreme Good. That the super-civic man should find satisfaction in gazing into vacancy, or be any more valuable in the world after he had done so, no matter how spotless his life and ecstatic his look, is inconceivable.

But while, in the Greek world, the sphere of activity of the super-civic man was vanishing into nothingness, among a small and obscure band of restored exiles of Semitic race, that sphere had come to claim the entire man and all his relations, practical and spiritual. Isaiah's little band of faithful followers (see p. 133) had grown into a nation, living by no law save that of Jehovah, a very real, very awful, and very holy personality, whom the heaven of heavens could not contain, but who yet watched the rising up and the sitting down of every son of man. Long before Quintilian wrote his elegant treatise on rhetoric, or Plotinus his pantheistic *Enneads*, there had sprung from the bosom of this people a man who, bursting, at the expense of his life, the narrow bounds of his nationality, elevated the theocracy of his people into a Kingdom of Heaven, which he had bade proclaim to all the world. It was proclaimed, and then (though to some it seemed a stumbling-block, and to others foolishness) the super-civic man, who for hundreds of years had been wandering in darkness, in search of his fatherland, suddenly became aware that he had found it in the Church of Christ. He now no longer tries to escape from the visible world into the emptiness of an abstract first principle; but, in the service of a First Principle who is the most concrete of realities, and who numbers the very hairs of his head, he goes down into the most loathsome depths of the material world to elevate and redeem the meanest of the sons of men. There is no question of bond or free, ruler or ruled, now. In the Kingdom of Heaven there are no such relations. The only greatness recognized there is greatness in service; the only law, the Law of Love. Love! yes, the whole secret is in that one word. By adding love to the conception of the God of his people, by exemplifying it in his own life, and demanding it of his followers, Jesus accomplished what had baffled all the wisdom of the Greek sages. He restored the moral unity of man, abolished the old world, and made a new heaven and a new earth. In vain have the advocates

of an indeterminate, self-evolving first principle, whether calling themselves Neoplatonists, mystics, materialists, evolutionists, Hegelians, or Theosophists, striven to bring back the old world with its class distinctions and institutional ethics; in vain have they sought to sink the individual God and man of reality in the universal ideas of thought. The Law of Love, which is the ground of individuality, as well as of true society, has bidden, and will bid them, defiance.

APPENDIX

THE SEVEN LIBERAL ARTS

The Greeks originally recognized two branches of liberal education (1) Gymnastics, for the body, and (2) Music, for the soul. Out of music grew, in process of time, not only the so-called Liberal Arts, that is, the arts that go to constitute the education of every freeman, but also what was regarded as a superfluous luxury (περιττή), Philosophy. It is the purpose of this appendix to trace, as far as possible, this gradual development.

In doing so, one must bear in mind that originally the term “Music” covered, not only what we call music, but also poetry, and that poetry was the vehicle of all the science that then was. The Homeric *aoidos* knows the “works of gods and men.” Strictly speaking, therefore, it was out of music and poetry that all the arts and sciences grew. The first step in this direction was taken when Letters were introduced, that is, about the first Olympiad. But it was long before Letters were regarded as a separate branch of education; they were simply a means of recording poetry. Even as late as the time of Plato, Letters are still usually included under Music. In Aristotle, they are recognized as a separate branch. It follows from this that, when we find Greek writers confining soul-education to Music, or Music and Letters, we must not conclude that these signify only playing and singing, reading and writing. Socrates was saying nothing new or paradoxical, when he affirmed that Philosophy was the “highest music.” The Pythagoreans had said the same thing before him, and there can be no doubt that Pythagoras himself included under Music (1) Letters, (2) Arithmetic, (3) Geometry, (4) Astronomy, (5) Music, in our sense, and (6) Philosophy (a term invented by him). Plato did the same thing. He speaks of “the true Muse that is accompanied with truth (λόγων) and philosophy.” But in his time “Music” was used in two senses, a broad one, in which it included the whole of intellectual education, and a narrow one, in which it is confined to music in the modern sense. It is in this latter sense that it is used by Aristotle, when he makes the intellectual

branches of school education (1) Letters, (2) Music, and (3) Drawing. Philosophy he places in a higher grade. Having distinguished Letters from Music, it is natural enough that he should assign to the former the branches which Pythagoras had included under the latter. His literary scheme appears to be (1) Grammar, (2) Rhetoric, (3) Dialectic, (4) Arithmetic, (5) Geometry, (6) Astronomy. Add Music, and we have exactly the Seven Liberal Arts; but, as Drawing must also be added, it is clear that there was, as yet, no thought of fixing definitely the number seven. That Drawing was for a long time part of the school curriculum, is rendered clear by a passage in a work of Teles (b.c. 260) quoted by Stobæus (xcviii, 72), in which it is said that boys study (1) Letters, (2) Music, (3) Drawing; young men, (4) Arithmetic, and (5) Geometry. The last two branches are here already distinguished from Letters; but we cannot be sure that the list is intended to be exhaustive. What is especially noticeable in the list of Teles is, that it draws a clear distinction between the lower and higher studies, a distinction which foreshadows the *Trivium* and *Quadrivium* of later times.

Philosophy, or the highest education, Aristotle divided into (1) Theory and (2) Practice. Theory he subdivided into (a) Theology, First Philosophy, or Wisdom, called later Metaphysics, the science of the Unchangeable, and (b) Physics, the science of the Changeable; Practice into (a) Ethics, including Politics and Œconomics, and (b) Poetics or Æsthetics.

After Teles we hear little of the Greek school-curriculum until about the Christian era. Meanwhile, the Romans, having acquired a smattering of Greek learning, began to draw up a scheme of studies suitable for themselves. It is noticeable that in this scheme there is no such distinction as the Greeks drew between liberal (ἐλευθέριαι, ἐγκύκλιοι, λογικαί) and illiberal (βάνανσοι) arts. As early as the first half of the second century b.c., Cato the Censor wrote a series of manuals for his son on (1) Ethics, (2) Rhetoric, (3) Medicine, (4) Military Science, (5) Farming, (6) Law. It is very significant that the only Greek school-study which appears here is Rhetoric; this the Romans, and notably Cato himself, always studied with great care for practical purposes. It seems that Cato, in order to resist the inroads of Greek education and manners, which he felt to be

demoralizing, tried to draw up a characteristically Roman curriculum. Greece, however, in great measure, prevailed, and half a century later we find Varro writing upon most of the subjects in the Greek curriculum: Grammar, Rhetoric, Dialectic, Arithmetic, Geometry, Astronomy, Music, Philosophy, besides many others. He wrote a treatise in nine books, called *Disciplinarum Libri*. Ritschl, in his *Quæstiones Varronianæ*, tried to show that these “Disciplinæ” were the Seven Liberal Arts, *plus* Architecture and Medicine, and Mommsen, in his *Roman History*, has followed him; but Ritschl himself later changed his opinion. There seems no doubt that (1) Grammar, (2) Rhetoric, (3) Dialectic, (4) Music, (5) Geometry, and (6) Architecture were treated in the work: what the rest were we can only guess. There is no ground for the assertion that the Seven Liberal Arts were obtained by dropping Architecture and Medicine from Varro’s list. It must have been about the time of Varro, if not earlier, that Roman education came to be divided into three grades, called respectively (1) Grammar, (2) Rhetoric, and (3) Philosophy, the last falling to the lot of but few persons. Of course “Grammar” now came to have a very extensive meaning, as we can see from the definition of it given by Dionysius Thrax, in his grammar, prepared apparently for Roman use (b.c. 90). In the Scholia to that work (I am unable to fix their date), we find the Liberal Arts enumerated as (1) Astronomy, (2) Geometry, (3) Music, (4) Philosophy, (5) Medicine, (6) Grammar, (7) Rhetoric.

But to return to the Greeks. In the works of Philo Judæus, a contemporary of Jesus, we find the Encyclic Arts frequently referred to, and distinguished from Philosophy. The former, he says, are represented by the Egyptian slave Hagar, the latter by Sarah, the lawful wife. One must associate with the Arts before he can find Philosophy fruitful. In no one passage does Philo give a list of the Encyclic Arts. In one place we find enumerated (1) Grammar, (2) Geometry, (3) Music, (4) Rhetoric (*De Cherub.*, § 30); in another (1) Grammar, (2) Geometry, (3) “the entire music of encyclic instruction” (*De Agricult.*, § 4); in another (1) Grammar, (2) Music, (3) Geometry, (4) Rhetoric, (5) Dialectic (*De Congressu Quær. Erud. Grat.*, § 5); in another, (1) Grammar, (2) Arithmetic, (3) Geometry, (4) Music, (5) Rhetoric (*De Somniis*, § 35), etc.

It would seem that the Encyclic Arts, according to Philo, were (1) Grammar, (2) Rhetoric, (3) Dialectic, (4) Arithmetic, (5) Geometry, (6) Music. Astronomy appears in none of the lists. Philosophy is divided into (1) Physics, (2) Logic, (3) Ethics (*De Mutat. Nom.*, § 10), a division that was long current.

From what has been adduced, I think we may fairly conclude that at the Christian era no definite number had been fixed for the liberal arts either at Athens, Alexandria, or Rome. The list apparently differed in different places. Clearly the Roman programme was quite different from the Greek. Shortly after this era, we find Seneca (who died a.d. 65) giving the liberal arts, *liberalia studia*, as (1) Grammar, (2) Music, (3) Geometry, (4) Arithmetic, (5) Astronomy (*Epist.*, 88). He divides Philosophy into (1) Moral, (2) Natural, (3) Rational, and the last he subdivides into (a) Dialectic and (b) Rhetoric. Above all he places Wisdom, "*Sapientia perfectum bonum est mentis humanæ*" (*Epist.*, 89). Here we see that two of the Seven Liberal Arts are classed under Philosophy. A little later, Quintilian divides all education into (1) Grammar, and (2) Rhetoric, but condescends to allow his young orator to study a little Music, Geometry, and Astronomy.

Turning to the Greeks, we find Sextus Empiricus, who seems to have flourished in Athens and Alexandria toward the end of the second century, writing a great work against the dogmatists or "mathematicians," of whom he finds nine classes, corresponding to six arts, and three sciences of philosophy. The arts are (1) Grammar, (2) Rhetoric, (3) Geometry, (4) Arithmetic, (5) Astronomy, (6) Music: the sciences, (1) Logic, (2) Physics, (3) Ethics. We are now not far from the Seven Liberal Arts; still we have not reached them.

There is not, I think, any noteworthy list of the liberal arts to be found in any ancient author after Sextus, till we come to St. Augustine. In his *Retractiones*, written about 425, he tells us (I, 6) that in his youth he undertook to write *Disciplinarum Libri* (the exact title of Varro's work!), that he finished the book on (1) Grammar, wrote six volumes on (2) Music, and made a beginning with *other five* disciplines, (3) Dialectic, (4) Rhetoric, (5) Geometry, (6) Arithmetic, (7) Philosophy. It has frequently been assumed that we have here, for the first time, the Seven Liberal Arts definitely fixed;

but there is nothing whatever in the passage to justify this assumption. The author does not say “*the* other five disciplines,” but merely “other five.” Among these five, moreover, is named Philosophy, which, though certainly a “discipline,” was never, so far as I can discover, called an art, liberal or otherwise. There is not the smallest reason for tracing back the Seven Liberal Arts to St. Augustine, who surely was incapable of any such playing with numbers. He does not, indeed, recognize the “Seven.”

It is in the fantastic and superficial work of Martianus Capella, a heathen contemporary of Augustine's, that they first make their appearance, and even there no stress is laid upon their number. They are (1) Grammar, (2) Dialectic, (3) Rhetoric, (4) Geometry, (5) Arithmetic, (6) Astronomy, (7) Music. These, no doubt, were the branches taught in the better schools of the Roman Empire in the fourth and fifth centuries, when, on the whole, the Greek liberal curriculum had supplanted the Roman rhetorical one. There is not the slightest ground for supposing that Capella had anything to do with fixing the curriculum which he celebrates. His work is a wretched production, sufficiently characterized by its title, *The Wedding of Mercury and Philology*. He wrote about seven arts because he found seven to write about. Attention was first called to the *number* of the arts, and a mystical meaning attached to it, by the Christian senator, Cassiodorus (480-575) in his *De Artibus et Disciplinis Liberalium Litterarum*. He finds it written in Prov. ix, 1, that “Wisdom hath builded her house. She hath hewn out her seven pillars.” He concludes that the Seven Liberal Arts are the seven pillars of the house of Wisdom. They correspond also to the days of the week, which are also seven. It is to be observed that he distinguishes the “Arts” from the “Disciplines,” or, as they said later, the *Trivium* from the *Quadrivium*. The pious notion of Cassiodorus was worked out by Isidore of Seville (died 636) in his *Etymologiæ*, and by Alcuin (died 804) in his *Grammatica*. Of course, as soon as the number of the arts came to be regarded as fixed by Scripture authority, it became as familiar a fact as the number of the planets or of the days of the week, or indeed, as the number of the elements. About a.d. 820 Hrabanus Maurus (776-856), a pupil of Alcuin's, wrote a work, *De Clericorum Institutione*, in which the phrase *Septem Liberales Artes*

is said to occur for the first time. About the same date Theodulfus wrote his allegorical poem *De Septem Liberalibus in quadam Pictura Descriptis*.

The Liberal Studies after St. Augustine did not include Philosophy, which rested upon the Seven Arts, as upon “seven pillars,” and was usually divided into (1) Physical, (2) Logical, (3) Ethical. After a time Philosophy came to be an all-embracing term. In a commentary on the *Timæus* of Plato, assigned by Cousin to the twelfth century, we find the following scheme: —

Philosophy

-

Practical

-

Ethics.

Economics.

Politics.

Theoretical

-

Theology.

Mathematics.

-

Arithmetic

-

= Quadrivium.

Music

Geometry

Astronomy

Physics.

The author expressly says that “*Mathematica quadrivium continet*”; but he plainly does not include the *Trivium* under Philosophy. This, however, was done the following century. In the *Itinerarium Mentis in Deum* of St. Bonaventura (1221-74) we find the following arrangements: —

Philosophy

-

Natural

-

Metaphysics — essence: leads to First Principle = Father.

Mathematics — numbers, figures: leads to Image = Son.

Physics — natures, powers, diffusions: leads to Gift of Holy Spirit.

Rational

-

Grammar — power of expression = Father.

Logic — perspicuity in argument = Son.

Rhetoric — skill in persuading = Holy Spirit.

Moral

-

Monastics — innascibility of Father.

Œconomics — familiarity of Son.

Politics — liberality of Holy Spirit.

Here we have the *Trivium*, under the division “Rational,” while the *Quadrivium* must still be included under “Mathematics.” In both cases we get nine sciences or disciplines, and the number was apparently chosen, because it is the square of three, the number of the Holy Trinity. In the latter case this was certainly true. Speaking of the primary divisions of Philosophy, the Saint says: “The first treats of the cause of being, and therefore leads to the Power of the Father; the second of the ground of understanding, and therefore leads to the Wisdom of the Word; the third of the order of living, and therefore leads to the goodness of the Holy Spirit.”

Dante, in his *Convivio* (II, 14, 15), gives the following scheme, based upon the “ten heavens,” nine of which are moved by angels or intelligences, while the last rests in God.

ARISTOTLE by William MacGillivray

An Extract from 'Lives of Eminent Zoologists: Aristotle to Linnæus'

SECTION I.

Remarkable Events in the Life of Aristotle.

Introductory Remarks — Birth and Parentage of Aristotle — He studies Philosophy under Plato — Is highly distinguished in the Academy — Retires to Atarneus on the Death of his Master — Marries — Is invited by Philip to superintend the Education of Alexander — Prosecutes his Studies at the Court — On the Succession of Alexander, returns to Athens, where he sets up a School in the Lyceum — Corresponds with Alexander, who supplies Means for carrying on his Investigations — Alexander finds Fault with him for publishing some of his Works, and after putting Callisthenes to Death, exalts his Rival Xenocrates — On the Death of Alexander, he is accused by his Enemies of Impiety, when he escapes to Chalcis, where he dies soon after — His personal Appearance and Character — His Testament — History of his Writings — Great Extent of the Subjects treated of by him — His Notions on elementary Bodies — The Material Universe — The Changes to which the Earth has been subjected, and the Eternity of its Existence — Conclusion.

Natural History, considered as a science or body of doctrine, commenced with Aristotle, the founder of the Peripatetic School, and one of the most illustrious philosophers of antiquity. His writings were held in the highest estimation by his own countrymen the Greeks, as well as by the Romans: they were considered as the most authentic sources of knowledge, after the revival of learning in Europe; and even at the present day their influence may be traced in the works of many who have not so much as bestowed upon them a cursory glance. It is therefore fit that we should begin our biographical sketches with that celebrated author, the more especially as he did not confine himself to a single branch of natural history, but, like all great minds, possessed an extensive acquaintance with objects of various classes. It is he only, whose comprehensive glance seizes upon what is common to numerous tribes, that can duly estimate what ought to be considered as distinctive of a particular group, or can form rules for the arrangement and description of the beings which compose it. The three greatest naturalists whom the

world has produced, Aristotle, Linnæus, and Cuvier, were men whose conceptions were enlarged by the most expanded views. Others have excelled them in particular departments, but none have equalled them in general knowledge.

Aristotle was born at Stagira, a city of the Thracian Chersonesus, in the first year of the 99th Olympiad, or the 384th before the Christian era. His father, Nicomachus, was physician to Amyntas, king of Macedonia, the father of Philip, and grandfather of Alexander the Great. Of his mother, we only know that her name was Phestis, and that, like her husband, she was originally from Chalcis. His family claimed descent from Machaon, the son of Esculapius. Having lost his parents at an early age, he went to reside with Proxenus, a citizen of Atarneus in Mysia, the friend to whose guardianship he had been left. According to some authorities, not being observed very strictly by those who had the immediate charge of his education, he spent a great part of his youth in licentious indulgences, by which he dissipated nearly the whole of a large patrimony. It is also said that he entered into the military profession, but finding it disagreeable soon renounced it, and, as a means of subsistence, sold medicines at Athens. But most of these reflections on his juvenile character may perhaps be attributed to slander.

However this may be, it became necessary for him to choose an employment; and, on going to Delphi to consult the oracle, he was directed to proceed to Athens, and apply himself to the study of philosophy. This he accordingly did, and at the age of seventeen commenced his career as a pupil of Plato.

Being of an ardent temperament, he addicted himself to his new pursuit with so much energy, that he determined to reduce his hours of repose to the smallest possible limits. For this purpose he placed a metallic basin beside his couch, and on lying down held out one of his hands with an iron ball in it, that the noise produced by the collision might awake him should he happen to slumber. Such intensity of application, in a penetrating and subtile mind, could not fail to render him highly successful in his studies. We accordingly find that he had not been long in the academy when he was distinguished above all the other scholars; and it is said that Plato used to call him the mind of his school, and to compare him to a

spirited colt that required the application of the rein to restrain its ardour.

He has been accused of disrespect and ingratitude to his aged master, and with having set up a school in opposition to him. The author of this charge was Aristoxenus, his own pupil; but it is well known that he was personally an enemy to Aristotle, because that philosopher, in choosing a successor, had preferred Theophrastus. It is doubted, besides, whether he taught publicly until after Plato's death, which happened in 348 B. C.

Speusippus, the nephew of the sage just named, having been appointed to succeed him in his school, Aristotle, retiring from Athens, went to reside with Hermeias, governor of Assus and Atarneus in Mysia. Here he remained three years; but his friend having been executed, by command of Artaxerxes, as a rebel against Persia, he was obliged to seek refuge in Mytelene, taking with him Pythias, the kinswoman and adopted daughter of Hermeias, to whose memory he afterwards erected a statue in the temple of Delphos. This lady, endeared to him by the gratitude which he felt towards her father, and by the distress to which she had been reduced by his death, he married in the thirty-seventh year of his age. She died, however, soon after their union, leaving an infant daughter, who received the same name.

A short time having elapsed, he was invited by Philip to superintend the education of his son. This distinction he no doubt owed in part to his previous intimacy with the King of Macedonia; but it must also have arisen from the great celebrity which he enjoyed, as excelling in all kinds of science, and especially in the doctrine of politics. Alexander had attained the age of fifteen when the management of his studies was confided to Aristotle, then in his forty-second year. There is ground, however, for presuming that previous to this period the philosopher had been consulted respecting the instruction of the young prince.

The master, it has been said, was worthy of his pupil, and the pupil of his master. In our opinion the master was worthy of a better pupil, and the pupil might have had a better master. At all events, Alexander, who was ambitious of excelling in every pursuit, must have profited greatly in the acquisition of knowledge by the lessons

of the most eminently-endowed philosopher of his age. According to Plutarch and Aulus Gellius, he was instructed by him in rhetoric, physics, ethics, and politics; and so high was the estimation in which he held his preceptor, that he is said to have declared, that "he was not less indebted to Aristotle than to his father; since if it was through the one that he lived, it was through the other that he lived well." It is also supposed that he had been initiated in the abstruse speculations respecting the human soul, the nature of the Divinity, and other subjects, on which his master had not yet promulgated his notions to the world.

During his residence at the court of Macedonia, Aristotle did not exclusively devote himself to his duties as instructor of the young prince, but also took some share in public business, and continued his philosophical researches. For the latter purpose Philip is said to have granted him liberal supplies of money. In consideration of his various merits the king also rebuilt his native city, Stagira, which had been destroyed in the wars, and restored it to its former inhabitants, who had either been dispersed or carried into slavery.

Alexander had scarcely completed his twentieth year when the assassination of his father, by Pausanias, one of the officers of the guard, called him to the throne. Aristotle, however, continued to reside at the court two years longer; when some misunderstanding having arisen, he left the young monarch at the commencement of his celebrated expedition into Asia, and returned to Athens. It has been alleged that he accompanied his former pupil as far as Egypt; but the fact is not certain, although circumstances would seem to render it probable.

He was well received at Athens, on account of the benefits which Philip had conferred, for his sake, on the inhabitants of that city; and, obtaining permission from the magistrates to occupy the Lyceum, a large enclosure in the suburbs, he proceeded to form a school. It was his custom to instruct his disciples while walking with them; and for this reason the new sect received the name of Peripatetics, or walking philosophers. In the morning he delivered his acroatic lectures to his select pupils, imparting to them the more abstruse parts of metaphysical science; and in the evening gave to his visitors or the public at large exoteric discourses, in which the subjects discussed

were treated in a popular style. As the Lyceum soon acquired great celebrity, scholars flocked to it from all parts of Greece. Xenocrates, who shared with him the lessons of Plato, had by this time succeeded Speusippus in the Academy, and it has been alleged that Aristotle established his seminary in contemptuous opposition; observing, that it would be shameful for him to be silent while the other taught publicly. But although the rival sages of those days cannot be supposed to have been influenced by a gentler spirit than animates those of our own times, there is no reason for attributing to the Stagirite in this matter any other motive than a laudable desire of seeking his own interest by communicating knowledge to those who were desirous of receiving it.

In this manner he gave public lectures at Athens thirteen years, during the greater part of which time he did not cease to correspond with Alexander. That celebrated prince had placed at his disposal several thousand persons, who were occupied in hunting, fishing, and making the observations which were necessary for completing his History of Animals. He is moreover said to have given the enormous sum of 800 talents for the same purpose; while he also took care to send to him a great variety of zoological specimens, collected in the countries which he had subdued.

The misunderstanding which had begun before Aristotle parted from his royal pupil, but which had not prevented the good offices of the latter, increased towards the end of his career. One of the first occasions seems to have been offered by the philosopher, who, having published his works on physics and metaphysics, received from Alexander, who was piqued at his having divulged to the world the valuable knowledge which he had obtained from him in his youth, the following letter: —

“Alexander to Aristotle, wishing all happiness. You have done amiss in publishing your books on the speculative sciences. In what shall I excel others if what you taught me privately be communicated to all? You know well that I would rather surpass mankind in the more sublime branches of learning than in power. Farewell.”

This epistle exhibits the king as a very exclusive personage; and, joined to what history has recorded of his actions, tends to show that

selfishness, however refined or disguised, was the main source of his insatiable ambition. One of the sincerest pleasures of a great mind is to communicate to others all the blessings that it possesses. On other occasions he appeared to entertain a wish to mortify the philosopher by exalting his rival Xenocrates, who had nothing to recommend him besides a respectable moral character. It has even been asserted by some, that the conqueror, after he had put Callisthenes to death, intended the same fate for Aristotle.

This Callisthenes was a kinsman and disciple of the other, through whose influence, it is said, he was appointed to attend the king on his Asiatic expedition. His republican sentiments and independent spirit, however, rendered him an indifferent courtier; while his rude and ill-timed reflections finally converted him into an object of suspicion or dislike. The conspiracy of Hermolaus affording Alexander a plausible pretext for getting rid of his uncourtly monitor, he caused him to be apprehended and put to death. Some say that he was exposed to lions, others that he was tortured and crucified; but, in whatever way he met his end, it is generally agreed that his life was sacrificed to gratify the enmity of his sovereign. Aristotle naturally espoused the cause of his relative, and from that period harboured a deep resentment against his destroyer. It has even been alleged that he was privy to the supposed design of murdering the victorious prince; but of this there is no satisfactory evidence.

Notwithstanding the coolness which thus existed between "Macedonia's madman" and "the Stagirate," the latter continued to enjoy at least an appearance of protection, which prevented his enemies from seriously molesting him. But as the splendour of his talents, his success in teaching, and the celebrity which he had acquired in all parts of Greece, had excited the animosity of those who found themselves eclipsed by the brightness of his genius, no sooner was Alexander dead, than they stirred up a priest, named Eurymedon, with whom was associated Demophilus, a powerful citizen, to prefer a charge of impiety against him before the court of Areopagus, on the ground that he had commemorated the virtues of his wife and of his friend Hermeias with such honours as were exclusively bestowed on the gods. Warned by the fate of Socrates under similar circumstances, he judged it prudent to retire;

remarking, that he wished to spare the Athenians the disgrace of committing another act of injustice against philosophy.

He effected his escape, with a few friends, to Chalcis in Eubœa, where he died soon after, in the year 322 b.c., and the 63d of his age; having, on his deathbed, appointed Theophrastus of Lesbos, one of his favourite pupils, his successor at the Lyceum. Various accounts are given of his demise; but it is probable that an overexcited mind, and a body worn out by disease, were the real causes of his dissolution.

According to Procopius and others, Aristotle drowned himself in the Eubœan Euripus, because he could not discover the cause of its ebbing and flowing, which are said to take place seven times a-day. Sir Thomas Browne, in his *Enquiries into Vulgar and Common Errors*, refutes this assertion on the following grounds: — In the first place, his death is related to have taken place in two ways by Diogenes Laertius; the one, from Eumolus and Phavorinus, that being accused of impiety for composing a hymn to his friend Hermeias, he withdrew to Chalcis, where he drank poison; the other, by Apollodorus, that he died of a disease in his stomach, in his sixty-third year. Again, the thing is in itself unreasonable, and therefore improbable; for Aristotle was not so apt to be vexed by the difficulty of accounting for natural phenomena, nor is there any evidence that he endeavoured to discover the ebb and flow of the Euripus, for he has made no mention of it in his works. Lastly, the phenomenon itself is disputable; and it appears from a comparison of testimonies on the subject, that the stream in question flows and ebbs only four times a-day, as is the case with other parts of the sea, though it is subject to irregularities dependent upon the winds and other causes. “However, therefore, Aristotle died,” concludes our author, “what was his end, or upon what occasion, although it be not altogether assured, yet that his memory and worthy name shall live, no man will deny, nor gratefull schollar doubt: and if, according to the *Elogie of Solon*, a man may be onely said to be happy after he is dead, and ceaseth to be in the visible capacity of beatitude: or if, according unto his own *Ethicks*, sence is not essentiall unto felicity, but a man may be happy without the apprehension thereof; surely in that sence he is pyramidally happy, nor can he ever perish but in the Euripe of

ignorance, or till the torrent of barbarisme overwhelme all.”

With respect to personal appearance, Aristotle was not highly favoured. He was of short stature, with slender legs, and remarkably small eyes. His voice was shrill, and his utterance hesitating. Although his constitution was feeble, he seems to have enjoyed good health. His moral character has been impeached by some; but we may presume that it was not liable to any serious imputation, otherwise his faults would not have escaped the observation of his numerous enemies, who yet could only prefer against him some vague charges of impiety.

Aristotle was not merely a philosopher; he was also what would at the present day be called a gentleman and a man of the world. In accordance with this character he dressed magnificently, wore rings of great value, shaved his head and face, contrary to the practice of the other scholars of Plato, and freely indulged in social intercourse. He was twice married. By his first wife, Pythias, he had a daughter of the same name, who was married to Nicanor, the son of Proxenus. His second wife was Herpylis, a native of Stagira, by whom he had a son, called Nicomachus.

It is difficult to determine his real character. Those who seem to find pleasure in reviling him, assert that he was a parasite, a habitual glutton and drunkard, a despiser of the gods, a vain person, whose chief care was to ornament his person, and thereby counteract the unfavourable impression which his disproportioned figure might make. It has been said, with perhaps more truth, that he taught his pupil Alexander principles of morals and policy which were not the best adapted for a prince of his ambitious temper; and that his desire of standing forth as the founder of a philosophical sect, induced him to prefer abstract disquisitions to solid knowledge, and to indulge in a spirit of contradiction and innovation. On the other hand, he has been extolled as a prodigy of knowledge and intellect, and represented as “the secretary of nature.” Jews have laid claim to his philosophy as derived from Solomon, and Christians have held him up as a person ordained to prepare the way for a Divine revelation. It is certain, however, that he was a very remarkable individual, possessed of great powers of observation and discrimination, and one who, had he devoted himself to the study of natural objects with a

sincere desire of ascertaining their properties and a resolution to adhere to truth, might have succeeded in laying on a solid basis the foundations of physical science.

Diogenes of Laertes in Cilicia, who lived about the end of the second century, and who wrote an account of the lives of the philosophers, has preserved his testament, the substance of which is as follows: — Antipater, the regent of Macedonia, is appointed his executor. To his wife Herpylis he leaves the choice of two houses, the one in Chalcis, the other at Stagira. He commends her domestic virtues, and requests his friends to distinguish her by the kindest attention. To Nicomachus, his son by Herpylis, and to Pythias, his daughter by his first wife, he bequeaths the remainder of his fortune, excepting his library and writings, which he leaves to Theophrastus. He desires that his daughter shall be given in marriage to Nicanor, the son of his benefactor Proxenus, or, should he not be inclined to receive her, to Theophrastus, his esteemed pupil. The bones of Pythias he orders to be disinterred and buried with his own body, as she herself had desired. None of his slaves are to be sold; they are all either emancipated by his will, or ordered to be set free by his heirs whenever they shall become worthy of liberty. Finally, he orders that the dedications which he had vowed for the safety of Nicanor be presented at Stagira to Jupiter and Minerva.

The same writer gives the titles of 260 works of Aristotle. Many of these, however, have perished. From his situation in society, and the munificent patronage of Alexander, he possessed more ample resources than any other man of science that could be named; and, considering the age in which he lived, his success in the investigation of nature may be considered as almost unrivalled. It is to be regretted that so many of his treatises have been lost, and that even those which have been transmitted to us have not been preserved in a perfect state.

Strabo has given a melancholy history of these works, in the ninth book of his geography. Aristotle, as we have stated above, had bequeathed them to Theophrastus, the most distinguished of his pupils, and his successor in the school. That philosopher left them, together with his own works, to his scholar Neleus, who carried them to his native city, Scepsis in Asia Minor. The heirs of Neleus, who

were unlettered men, kept them locked up; and when they understood that the King of Pergamos, to whom the town belonged, was collecting books, to form a library on the plan of the Alexandrian, they concealed them in a vault or cellar, where they lay forgotten 130 years. When accidentally discovered, at the end of that period, they were found to be greatly injured by damp and vermin. At length they were sold to an inhabitant of Athens, named Apellicon, who, however, was not so much a lover of philosophy as a collector of manuscripts, and who adulterated the original text by his injudicious emendations and interpolations. Several copies thus altered were published by him. When Athens was taken by Sylla, the library of this citizen was carried to Rome, where the works of Aristotle were corrected by Tyrannion, a grammarian. Andronicus of Rhodes afterwards arranged the whole into sections, and gave them to the world.

According to Dr Gillies, Aristotle must have “composed above 400 different treatises, of which only forty-eight have been transmitted to the present age. But many of these last consist of several books; and the whole of his remains together still form a golden stream of Greek erudition, exceeding four times the collective bulk of the Iliad and Odyssey.”

He was scarcely less ambitious than his pupil Alexander, and his works embrace nearly the whole range of human knowledge as it existed in his day. He was the inventor of the syllogistic mode of reasoning, the principles of which he lays down in his work on logic. In his books on rhetoric, he has investigated the principles of eloquence with great accuracy and precision, insomuch that they form the basis of all that has since been written on the subject. His work on poetics, or rather the fragment which has come down to us under that name, although almost entirely confined to the consideration of the drama, contains principles applicable to poetical composition in general, and is equally distinguished for precision and depth of thought. Those on ethics and politics are also remarkable productions; and although the former has been effectually superseded by a more perfect system, the latter contains much that is interesting even at the present day. In his metaphysics, he expounds the doctrine of Being abstracted from Matter, and speaks of a First Mover, — the

life and intellect of the universe, eternal and immutable, but neither omnipresent nor omnipotent. When treating of physics, he does not in general lay down rules *a priori*, but deduces them from the observation and comparison of facts. This being the case, we might expect that such of his writings as relate to natural history should contain much truth.

He holds that all terrestrial bodies are composed of four elements, — earth, water, air, and fire. Earth and water are heavy, because they tend towards the earth's centre; while air and fire, which tend upwards, are light.

Besides these four elements, he has admitted a fifth, of which the celestial objects were composed, and whose motion is always circular. He supposed that there is above the air, under the concave part of the moon, a sphere of fire to which all the flames ascend, as the brooks and rivers flow into the ocean.

He maintains that matter is infinitely divisible; that the universe is full, and that there is no vacuum in nature; that the world is eternal; that the sun, which has always revolved as it does at present, will for ever continue to do so; and finally, that the generations of men succeed each other without having had a beginning or foreseeing an end.

He alleges that the heavens are incapable of decay; and that although sublunar things are subject to corruption, their parts nevertheless do not perish; that they only change place; that from the remains of one thing another is made; and that thus the mass of the world always remains entire. He holds that the earth is in the centre of the world; and that the First Being makes the skies revolve round the earth, by intelligences which are continually occupied with these motions.

He asserts that all of the globe which is now covered by the waters of the sea was formerly dry land; and that what is now dry land will be again converted into water. The reason is this: the rivers and torrents are continually carrying along sand and earth, which causes the shores gradually to advance, and the sea gradually to retire; so that in the course of innumerable ages the alleged vicissitudes necessarily take place. He adds, that in several parts which are considerably inland, and even of great elevation, the sea,

when retiring, left shells, and that, on digging in the ground, anchors and fragments of ships are sometimes found. Ovid attributes the same opinion to Pythagoras.

Aristotle farther remarks, that these conversions of sea into land, and of land into sea, which gradually take place in the long lapse of ages, are in a great measure the cause of our ignorance of past occurrences. He adds, that besides this other accidents happen, which give rise even to the loss of the arts; and among these he enumerates pestilences, wars, famines, earthquakes, burnings, and desolations, which exterminate all the inhabitants of a country, excepting a few who escape and save themselves in the deserts, where they lead a savage life, and where they give origin to others, who in the progress of time cultivate the ground, and invent or rediscover the arts; and that the same opinions recur, and have been renewed times without number. In this manner, he maintains that, notwithstanding these vicissitudes and revolutions, the machine of the world always remains indestructible.

If an apology were necessary for the brevity of the above sketch, it might be urged, that it probably contains all that is authentic respecting the life of this eminent philosopher; and that our object is to condense, not to expand; to direct the attention to characteristic features, not to lead the mind to expatiate vaguely upon the general surface.

SECTION II.

Account of Aristotle's History of Animals.

Aristotle's Ideas respecting the Soul — His Views of Anatomy and Physiology — Introduction to his History of Animals, consisting of Aphorisms or general Principles — His Division of Animals; their external Parts; their Arrangement into Families; their internal Organs; Generation, &c.

Of all the sciences, it has been remarked, that which owes most to Aristotle is the natural history of animals. Not only was he acquainted with numerous species, he also described them according to a comprehensive and luminous method, which perhaps none of his successors have approached; arranging the facts observed, not according to the species, but according to the organs and functions, which affords the only means of establishing comparative results. It may in fact be said, that besides being the oldest author on comparative anatomy whose writings we possess, he was likewise one of those who have treated that part of natural history with most genius, and best deserves to be taken as a model. The principal divisions which are still adopted by naturalists in the animal kingdom are those of Aristotle, and he proposed some which have been resumed after having been unjustly rejected. If we examine the foundation of these great labours, we shall find that they all rest on the same method, which is itself derived from the theory respecting the origin of general ideas. He always observes facts with attention, compares them with great precision, and endeavours to discover the circumstances in which they agree. His style, moreover, is suited to his method: simple, precise, unstudied, and calm, it seems in every respect the reverse of Plato's; but it has also the merit of being generally clear, except in some places where his ideas themselves were not so.[C]

In one of his treatises, Aristotle divides natural bodies into those possessing life, and those destitute of that principle, — into animate and inanimate. He considers soul as the vital energy or vivifying principle common to all organized bodies; but distinguishes in it three species. Thus, in plants there is a vegetative, in animals a vegetative and a sentient, in man a vegetative, a sentient, and a

rational soul. The functions of nutrition and generation in plants and animals he attributes to the vegetative soul; sense, voluntary motion, appetite, and passion, to the sentient soul; the exercise of the intellectual faculties, to the rational soul.

His ideas of anatomy and physiology were extremely imperfect. Thus, he supposed the brain to be a cold spongy mass, adapted for collecting and exhaling the superfluous moisture, and intended for aiding the lungs and trachea in regulating the heat of the body. The heart is the seat of the vital fire, the fountain of the blood, the organ of motion, sensation, and nutrition, as well as of the passions, and the origin of the veins and nerves. The blood is confined to the veins; while the arteries contain an ærial spirit; and by nerves he means tendons, nerves, and arteries, — in short, strings of all kinds, as the name implies. The heart has three cavities; in the larger animals it communicates with the windpipe, or the ramifications of the pulmonary artery receive the breath in the lungs and carry it to the heart. Respiration is performed by the expansion of the air in the lungs, by means of the internal fire, and the subsequent irruption of the external air to prevent a vacuum. Digestion is a kind of concoction or boiling, performed in the stomach, assisted by the heat of the neighbouring viscera.

It is perhaps impossible at the present day, when the investigation of nature is so much facilitated by the accumulated knowledge of ages in every department of physical science, by the commercial relations existing between countries in all parts of the globe, by a tried method of observation, experiment, and induction, and finally, by the possession of the most ingenious instruments, to form any adequate idea of the numerous difficulties under which the ancient naturalist laboured. On the other hand, he had this great advantage, that almost every thing was new; that the most simple observation correctly recorded, the most trivial phenomenon truly interpreted, became as it were his inalienable property, and was handed down to succeeding ages as a proof of his talents, — a circumstance which must have supplied a great motive to exertion.

The History of Animals is undoubtedly one of the most remarkable performances of which physical science can boast. It must not, however, be imagined that it is a work which, replete with

truth and exhibiting the well-arranged results of accurate observation and laborious investigation, is calculated to afford material aid to the modern student. To him more recent productions are the only safe guides; nor is it until he has studied them, and interrogated nature for himself, that he can derive benefit from the perusal of the treatise which we now proceed to examine.

The first book contains a brief description of the parts of which the bodies of animals are composed. The introduction consists of general propositions; of which we shall present a few of the more remarkable as a specimen.

Some parts, he observes, are simple, and divided into similar particles; while others are compound, and consist of dissimilar elements. The same parts in different animals vary in form, proportion, and other qualities; and there are many creatures which, although they have the same parts, have them in different situations. Animals differ in their mode of living, actions, and manners: thus, some reside on land, others in water; and of the latter some breathe water, others air, and some neither. Of aquatic animals, some inhabit the sea, others the rivers, lakes, or marshes. Of those which live in the sea, some are pelagic, others littoral, and others inhabit rocks. Of land-animals, some respire air, as man; others, although they live on the land and obtain their food there, do not breathe air, as wasps, bees, and other insects.

We know no animal, says he, that flies only, as the fish swims; for those which have membranous wings walk also; and bats have feet, as have seals, although imperfect. But some birds have the feet weak; in which case the defect is compensated by the superior action of the wings, as in swallows. There are many species which both walk and swim. Animals also differ in their habits; thus, some are gregarious, others solitary, — a distinction applicable to them whether they walk, fly, or swim. Some obey a leader, others act independently; cranes and bees are of the former, ants of the latter kind. Some feed on flesh, others on fruits, while others feed indiscriminately; some have homes, others use no covering of this kind, but reside in the open air. Some burrow, as lizards and snakes; others, as the horse and the dog, live above ground. Some animals seek their food at night, others by day; some are tame, others wild; some utter sounds, others are mute,

and some sing; all of them, however, sing or cry in some way at the season of pairing.

In this way he proceeds, stating briefly the various circumstances in which animals differ from each other, and in conclusion asserting that man is the only one capable of design; for, says he, although many of them have memory and docility, none but man have the faculty of reflection.

These general propositions or aphorisms are not so simple or so easily attained as one might imagine on reading them inattentively. Let any person who has a tolerably comprehensive idea of the series of animated beings reflect a little, and he will perceive, that such as the following must be derived from the observation of a great number of facts: — Those parts which seize the food, and into which it is received, are found in all animals. The sense of touch is the only one common to all. Every living creature has a humour, blood or sanies, the loss of which produces death. Every species that has wings has also feet.

In this chapter Aristotle divides animals into such as have blood, and such as have it not. Of the former (the red-blooded) some want feet, others have two of these organs, and others four. Of the latter (the white-blooded) many have more than four feet. Of the swimming-animals, which are destitute of feet, some have fins, which are two or four; others none. Of the cartilaginous class, those which are flat have no fins, as the skate. Some of them have feet, as the mollusca. Those which have a hard leathery covering swim with their tail. Again, some animals are viviparous, others produce eggs, some worms. Man, the horse, the seal, and other land-animals, bring forth their young alive; as do the cetacea and sharks. Those which have blow-holes have no gills, as the dolphin and whale. In this department, the observations of the great philosopher are often minute, and generally accurate, although usually too aphoristic and unconnected to be of much use to the student.

Of flying-animals, some, as the eagle and hawk, have wings; others, in place of wings, have membranes, as the bee and the beetle; others a leathery expansion, as the bat. Those which have feathered or leathery wings are blooded (red-blooded); but those which have membranous wings, as insects, are bloodless (white-blooded). Those

which fly with wings or with leathery expansions, either have two feet or none; for, says he, it is reported that there are serpents of this kind in Ethiopia. Of the flying bloodless animals, some have their wings covered by a sheath, as beetles; others have no covering, and of these some have two, others four wings. Those which are of large size, or bear a sting behind, have four; but the smaller and stingless, two only. Those which have sheaths to their wings, have no sting; but those which have two wings are furnished with a sting in their fore part, as the gnat.

Animals are distinguished from each other, so as to form kinds or families. These, according to our author, are quadrupeds, birds, fishes, cetacea, all which he says have (red) blood. There is another kind, covered with a shell, such as the oyster; and another, protected by a softer shell, such as the crab. Another kind is that of the mollusca, such as the cuttlefish; and lastly, the family of insects. All these are destitute of (red) blood.

Here, then, we have a general classification of animals, which it is important to notice, as we may have occasion afterwards to compare it with arrangements proposed by other naturalists. It may be reduced to the following form: —

Red-blooded Animals.

Quadrupeds, Serpents, Birds, Fishes, Cetacea.

White-blooded Animals.

Testacea, Crustacea, Mollusca, Insects.

It must, however, be understood, that Aristotle proposes no formal distribution of animals, and that his ideas respecting families, groups, or genera, such as those of our present naturalists, are extremely vague.

His quadrupeds include the mammalia and the quadrupedal reptiles. He divides them into those which are viviparous, and those which are oviparous; the former covered with hair, the latter with scales. Serpents are also scaly, and, excepting the viper, oviparous. Yet all viviparous animals are not hairy; for some fishes, he remarks, likewise bring forth their young alive. In the great family of viviparous quadrupeds also, he says, there are many species (or genera), as man, the lion, the stag, and the dog. He then mentions, as an example of a natural genus, those which have a mane, as the

horse, the ass, the mule, and the wild-ass of Syria, which are severally distinct species, but together constitute a genus or family.

This introduction to the History of Animals the philosopher seems to have intended, less as a summary of his general views respecting their organization and habits, than as a popular exordium, calculated to engage the attention of the reader, and excite him to the study of nature. Whatever errors it may contain, and however much it may be deficient in strictly methodical arrangement, it is yet obviously the result of extensive, and frequently accurate observation. He then proceeds to the description of the different parts of the human body, first treating of what anatomists call the great regions, and the exterior generally, and then passing to the internal organization. His descriptions in general are vague, and often incorrect. As an example, we may translate the passage that refers to the ear.

This organ, he says, is that part of the head by which we hear; but we do not respire by it, for Alcmeon's opinion, that goats respire by the ears, is incorrect. One part of it has no name, the other is called lobos; it consists entirely of cartilage and flesh. The internal region is like a spiral shell, resembling an auricle at the extremity of the bone, into which as into a vessel the sound passes. Nor is there any passage from it to the brain, but to the palate; and a vein stretches from the brain to it. But the eyes belong to the brain, and each is placed upon a small vein. Every animal that has ears moves them, excepting man; for of those which are furnished with the sense of hearing, some have ears, others none, but an open passage; of which kind are feathered animals, and all that are covered with a scaly skin. But those which are viviparous, the seal, the dolphin, and other cetacea excepted, have external ears, as well as the viviparous cartilaginous animals. The seal has a manifest passage for hearing; but the dolphin, although it hears, yet has no ears. The ears are situated at the same level as the eyes, but not higher, as in certain quadrupeds. The ears of some persons are smooth, of others rough, or partly so; but this furnishes no indication of disposition. They are also large, small, or of moderate size, projecting, or flat, or intermediate. The latter circumstance indicates the best disposition. Large and projecting ears are indicative of a fool and babbler.

From this passage we perceive that Aristotle was acquainted with

the Eustachian tube; although his anatomical knowledge of the ear is certainly of the most superficial kind, and his physiognomical notions respecting it sufficiently ludicrous. He divides the body into head, neck, trunk, arms, and legs, much as we do at the present day. The head consists of the calvaria, or part covered with hair, which is divided into three regions, the bregma or fore part, the crown, and the occiput. Under the bregma is the brain; but the back part of the head is empty. When speaking of the face, he remarks, that persons having a large forehead are of slow intellect, that smallness of that part indicates fickleness, great breadth stupidity, and roundness irascibility. The physiognomists of our day have a different opinion. The neck contains the spine, the gullet, and the arteria (or windpipe). The trunk consists of the breast, the belly, &c.; — and in this manner he passes over the different external regions.

In describing the brain, he states that all red-blooded animals have that organ, as have also the mollusca, and that in man it is largest and most humid. He had observed its two membranes, as well as the hemispheres and cerebellum; but he asserts that it is bloodless, that no veins exist in it, and that it is naturally cold to the touch. He was ignorant of the distribution of the nerves, was not aware that the arteries contain blood, imagined that the heart being connected with the windpipe is inflated through it, and, in a word, manifests extreme ignorance of every thing that relates to the internal organization.

Judging from this specimen, the reader may suspect that his time would not be profitably employed in separating the few particles of wheat from the great mass of chaff which the writings of Aristotle present to us. Nor must it be concealed that the modern naturalist does not consult his volumes for information, but merely to gratify curiosity. There is to be found, indeed, in the most imperfect of our elementary works on anatomy, whether human or comparative, more knowledge than was probably contained in the Alexandrian library.

In his second book, he treats more particularly of animals. At its commencement we unfortunately meet with a stumbling-block, in the shape of an assertion, that the neck of the lion has no vertebræ, but consists of a single bone. In speaking of limbs, he takes occasion to describe the proboscis of the elephant, and to enter generally into the history of that gigantic quadruped. He then speaks with reference to

the distribution of hair, remarking, that the hair of the human head is longer than that of any other animal; that some are covered all over with long hair, as the bear; others on the neck only, as the lion; and others only along the back of the neck, as the horse and the bonasus. He describes the buffalo and the camel; of the latter of which he mentions the two species, the Arabian and the Bactrian. The subject of claws, hoofs, and horns, is next discussed. He states that some quadrupeds have many toes, as the lion; while others have the foot divided into two, as the sheep; and others again have a single toe or hoof, as the horse. His aphorisms on the subject of horns are in general correct. Thus, he states that most creatures furnished with them have cloven hoofs, and that no single-hoofed animal has two horns.

He then proceeds to speak of teeth, which he says are possessed by all viviparous quadrupeds. Some have them in both jaws, others not; for horned animals have teeth in the lower jaw only, the front ones being wanting in the upper. Yet all animals which have no teeth above are not horned; the camel, for example. Some have projecting teeth, as the boar; others not. In some they are jagged, as in the lion, panther, and dog; in others even, as in the horse and cow. No animal has horns and protruded teeth; nor is there any having jagged teeth that has either horns or projecting teeth. The greater part have the front teeth sharp, and those behind broad; but the seal has them all jagged for it partakes of the nature of fishes, which have that peculiarity. His remarks on the shedding of the teeth are in general erroneous. The elephant, he says, has four grinders, together with two others, the latter of which are of great size and bent upwards in the male, but small and directed the contrary way in the female. This circumstance Cuvier states to be correct with respect to the African variety, although the case is different in the Asiatic. His account of the hippopotamus, however, is inaccurate in almost every particular. Thus, he says it has a mane like a horse, cloven feet like an ox, and is of the size of an ass, — a description which answers better to the gnu. In speaking of monkeys, of which he mentions several kinds, he remarks their resemblance to the human species, and the peculiar formation of their hind feet, which may be used as hands.

He then gives a general account of the oviparous quadrupeds,

particularly of the Egyptian crocodile and the chameleon, concerning which he relates many interesting circumstances.

In treating of birds, he remarks that they are bipedal, like man, destitute of anterior limbs, but furnished with wings, and having a peculiar formation in the legs. Those birds which have hooked claws, he says, have the breast more robust than others. He then describes the differences in the structure of their feet; remarking, that most of them have three toes before and one behind, although a few, as the wryneck, have two only before. Birds, he adds, have the place of lips and teeth supplied by a bill; and instead of external ears and nostrils properly so called, they have passages for hearing and smelling in different parts of the head. The eyes have no lashes, but are furnished with a membrane like lizards. The other remarkable peculiarities, such as the feathers and the form of the tongue, are then mentioned. No birds, he observes, that have hooked claws are furnished with spurs. In his remarks on this family he is generally correct; though here, as elsewhere, he is not merely brief, but vague and superficial. His division of birds would seem to be the following: — Those with hooked claws; those with separated toes; and such as are web-footed.

Fishes are next discussed with nearly equal brevity. He remarks, that they have a peculiar elongated form, are destitute of mammæ, emit by their gills the water received at the mouth, swim by means of fins, are generally covered with scales, and are destitute of the organs of hearing and smelling.

His description of the internal parts of these tribes of animals contains a mixture of truth and error. This book terminates with remarks on the structure of serpents.

The third commences with observations on those parts of animals which are homogeneous, such as the blood, the fibres, the veins, the nerves, and the hair. Under the general title of nerve, he confounds the columnæ carneæ of the heart, the tendons and fasciæ; and it does not appear that he had any idea of what modern anatomists call nerves. In speaking of hair, he remarks that it grows in sick persons, especially those labouring under consumption, in old people, and even in dead bodies. The same remark applies to the nails. The blood is contained in the veins and heart, is, like the brain, insensible, flows from a wound in any part of the flesh, has a sweet taste and a red

colour, coagulates in the air, palpitates in the veins, and when vitiated is productive of disease. On the subject of milk, his observations deserve attention. Thus, he says that all viviparous animals which have hair are furnished with mammæ, as are also the whale and the dolphin; but those which are oviparous are not so provided. All milk has a watery fluid, called serum, and a thick part, called cheese; while that produced by animals which are destitute of fore teeth in the upper jaw coagulates. On this subject he mentions some curious circumstances. Some kinds of food occasion the appearance of a little milk in women who are not pregnant. There have even been instances of it flowing from the breasts of elderly females. The shepherds about Mount Ceta rub the udders of unimpregnated goats with nettles, and thus obtain abundance of milk from them. It sometimes happens that male animals secrete the same fluid; thus, there was a he-goat in the island of Lemnos, which yielded so much that small cheeses were made of it. A little may be pressed from the breasts of some men after the age of puberty; and there have been individuals who on being sucked have yielded a large quantity. Instances of this have been recorded by other observers; and Humboldt met with a similar case in South America.[D]

In the fourth book, Aristotle treats of the animals which are destitute of red blood. Of these, he says there are several genera: the mollusca, such as the cuttlefish, which is externally soft with an internal firm part; the crustacea, internally soft and covered with a firm integument, such as the crab; the testacea, internally soft and externally hard and solid, as the limpet and oyster. The insects form the fourth genus; and are distinguished by their being externally and internally formed of a hardish or cartilaginous substance, and divided into segments; some of them having wings, as the wasp; while others have none, as the centipede. He then gives a pretty full account of the cuttlefish and nautilus, treats of the crustaceous animals generally, and enters into details respecting the other two classes. After this he enumerates the organs of sensation, stating that man, and all the red-blooded and viviparous animals, possess five senses, although in the mole vision is deficient. He describes correctly the eye of that creature, showing that it is covered by a thickish skin, but presents a conformation similar to that of other animals, and is furnished with a

nerve from the brain. He shows that although fishes have no visible organs of smelling or hearing, they yet possess both senses, and, in treating of this subject, states many interesting facts relative to the mode employed in catching dolphins. He also shows that insects have the faculty of hearing and smelling. The testacea, he says, besides feeling, which is common to all animals, have smell and taste; but he also asserts that some of them, the solen and pecten, are capable of seeing, and others of hearing.

All viviparous quadrupeds not only sleep, but also dream; but whether the oviparous dream is uncertain; although it is plain that they sleep, as do the aquatic animals, fishes, mollusca, testacea, and crustacea. A transition is then made to the subject of sex, for the purpose of showing that in the mollusca, crustacea, testacea, and eels, there is no difference in that respect between individuals of the same species.

The subjects of generation and parturition occupy the fifth, sixth, and seventh books. From the comparatively large space which he has devoted to the result of his inquiries in these departments, the minuteness with which he describes the phenomena presented by them in man and the domestic animals, and the accurate knowledge which he frequently exhibits, it may be inferred that they were favourite subjects with Aristotle. It is sufficient for our purpose to mention some of the cases in which he attained the truth, and others in which he failed.

He describes the membranes with which some of the mollusca envelope their eggs, mentions the changes through which insects pass before they acquire the perfect state, and speaks with tolerable accuracy of the economy of bees and wasps. He states, however, that the former make wax from flowers, but gather their honey from a substance which falls from the air upon trees. The eggs of tortoises, he says, are hard, like those of birds, and are deposited in the ground. His remarks on those of lizards and the crocodile are also correct. He states accurately that some serpents bring forth their young enclosed in a soft membrane, which they afterwards burst; but that sometimes the little animals escape from the egg internally, and are produced free. Other serpents, he observes, bring forth eggs cohering in the form of a necklace. On the eggs of birds his observations are nearly

as correct as those which we find in books at the present day. He was acquainted with their general structure, and the development of the chick, which he minutely describes. He remarks of the cuckoo, that it is not a changed hawk, as some have asserted; that, although certain persons have alleged that its young have never been seen, it yet certainly has young; that, however, it does not construct a nest, but deposits its eggs in the nest of other birds, after eating those which it finds there.

He remarks that the cartilaginous fishes are viviparous, but that the other species bring forth eggs, and states correctly that they have no alantoid membrane. He then passes to the cetacea, with which he seems to be nearly as well acquainted as modern naturalists, and reverts to the oviparous fishes, respecting which he presents numerous details. He maintains, however, that the eel is produced spontaneously, and that no person had ever detected eggs or milt in it.

Having discussed the subject of generation, he proceeds, in the eighth book, to treat of the food and actions of animals, their migrations, and other circumstances. The ninth consists of a multitude of topics without any direct relation to each other, but apparently treated as they had successively presented themselves to the author. Thus, at the commencement we find remarks on the peculiarities of disposition observed in the males and females of different animals, the combats of hostile species, the actions of animals, nidification, generation, and other matters. Several species of different classes are then described, such as the kingfisher, the black-bird, the cuckoo, the marten, eagles, owls, fishes, insects, and quadrupeds.

The fragments which remain of Aristotle's History of Animals may, perhaps, be considered as presenting the general views which he had intended to precede his more particular descriptions; but, regarded even in this light, it cannot be denied that they are extremely deficient in method. There is in them no approach to a regular classification, we do not say of animals, but of subjects to be discussed. He is continually making abrupt transitions, seems to lose sight of the object more immediately in view, to indulge in digressions foreign to it, and frequently repeats a circumstance which

he had related before. His work resembles the rude notes which an author makes previous to the final arrangement of his book; and such it may possibly have been. Of descriptions, properly so called, there are few, — those of the elephant, the camel, the bonasus, the crocodile, the chameleon, the cuckoo, the cuttlefish, and a few others, being all that we find.

It may appear strange, that the statements of naturalists should so frequently prove incorrect. In how many works, even of the present day, are errors to be discovered, which might have been avoided by a proper use of the organs of vision, and a resolution to take nothing on trust! But it is much easier to employ the imperfect remarks of others, to collect from books, compare and arrange, than to seek or make opportunities of observation for one's self; and of so little consequence do some men hold the actual inspection of natural objects, that, without practising it to any extent, they nevertheless arrogate to themselves the title of philosophical inquirers.

In fine, the observations of Aristotle, considering the period at which he lived, and the proneness of the human intellect to wander from the true path, are remarkable for the great proportion of truth which they present to us. Whatever may be their actual merits, they are certainly superior to those of any other naturalist whose works have come down to us from the remote ages of classical antiquity; and we may take leave of this distinguished man by observing, in the words of Dr Barclay, that, “notwithstanding his many imperfections, he did much both for anatomy and natural history, and more, perhaps, than any other of the human species, excepting such as a Haller or Linnæus, could have accomplished in similar circumstances.”

The best edition of his *History of Animals* ([Greek: *Peri Zôôn Historia*]), is that of Schneider, in 4 vols 8vo, which issued from the press at Leipsic in 1811. Many editions of his works have been published; but the most complete is said to be Sylburge's, printed at Frankfort, containing, — *Organon*, 1585; *Rhetorica et Poetica*, 1584; *Ethica ad Nicomachum*, 1584; *Ethica Magna*, &c. 1584; *Politica et Œconomica*, 1587; *Animalium Historia*, 1587; *De Animalium Partibus*, &c. 1585; *Physicæ Auscultationis*, lib. viii. et *Alia Opera*, 1596; *De Cælo*, lib. iv.; *De Generatione et Conceptione*; *De*

Meteoris, lib. iv.; De Mundo; De Anima; Parva Naturalia; Varia Opuscula, 1587; Alexandri et Cassii Problemata, 1585; Aristotelis et Theophrasti Metaphysica, 1585.
